# 1 Getting started

## 1.1 About this guide

This document describes the commands available in the MD-CLI that can be used to manage the router.

For a list of unsupported features by platform and chassis, see the *SR OS R24.x.Rx Software Release Notes*, part number 3HE 20152 000*x* TQZZA.

Command outputs shown in this guide are examples only; actual output may differ depending on supported functionality and user configuration.

**Note:**
This guide generically covers Release 24.*x*.R*x* content and may contain some content that will be released in later maintenance loads. In addition, some SR OS features are platform-specific and may not be available or visible on all platforms. See the *SR OS R24.x.Rx Software Release Notes*, part number 3HE 20152 000*x* TQZZA, for information about the supported features and applicable platforms in each load of the Release 24.*x*.R*x* software.

To access the configuration statements within the MD-CLI, the MD-CLI engine must be enabled and the configuration mode must be **mixed** or **model-driven**. For information about using the MD-CLI, see the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide.*

## 1.2 Platforms and terminology

**Note:**
Unless explicitly noted otherwise, this guide uses the terminology defined in the following table to collectively designate the specified platforms.

*Table 1: Platforms and terminology*

| Platform | Collective platform designation |
|---|---|
| 7450 ESS-7 | All |
| 7450 ESS-12 | |
| 7750 SR-1 | |
| 7750 SR-1-24D | |
| 7750 SR-1-46S | |
| 7750 SR-1-48D | |
| 7750 SR-1-92S | |
| 7750 SR-1x-48D | |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| Platform | Collective platform designation |
|---|---|
| 7750 SR-1x-92S | |
| 7750 SR-7 | |
| 7750 SR-12 | |
| 7750 SR-12e | |
| 7750 SR-a4 | |
| 7750 SR-a8 | |
| 7750 SR-1e | |
| 7750 SR-2e | |
| 7750 SR-3e | |
| 7750 SR-1s | |
| 7750 SR-1se | |
| 7750 SR-2s | |
| 7750 SR-2se | |
| 7750 SR-7s | |
| 7750 SR-14s | |
| 7950 XRS-20 | |
| 7950 XRS-20e | |
| 7950 XRS-40 | |
| VSR | |
| VSR-NRC | |
| 7450 ESS-7 | 7450 ESS |
| 7450 ESS-12 | |
| 7750 SR-1 | 7750 SR |
| 7750 SR-1-24D | |
| 7750 SR-1-46S | |
| 7750 SR-1-48D | |
| 7750 SR-1-92S | |
| 7750 SR-1x-48D | |
| 7750 SR-1x-92S | |
| 7750 SR-7 | |

© 2024 Nokia.

## 1.3 Conventions

This section describes the general conventions used in this guide.

### 1.3.1 Precautionary and information messages

The following information symbols are used in the documentation.

**DANGER:** Danger warns that the described activity or situation may result in serious personal injury or death. An electric shock hazard could exist. Before you begin work on this equipment, be aware of hazards involving electrical circuitry, be familiar with networking environments, and implement accident prevention procedures.

**WARNING:** Warning indicates that the described activity or situation may, or will, cause equipment damage, serious performance problems, or loss of data.

**Caution:** Caution indicates that the described activity or situation may reduce your component or system performance.

**Note:** Note provides additional operational information.

**Tip:** Tip provides suggestions for use or best practices.

### 1.3.2 Options or substeps in procedures and sequential workflows

Options in a procedure or a sequential workflow are indicated by a bulleted list. In the following example, at step 1, the user must perform the described action. At step 2, the user must perform one of the listed options to complete the step.

**Example: Options in a procedure**

1. User must perform this step.
2. This step offers three options. User must perform one option to complete this step.
   - This is one option.
   - This is another option.
   - This is yet another option.

Substeps in a procedure or a sequential workflow are indicated by letters. In the following example, at step 1, the user must perform the described action. At step 2, the user must perform two substeps (a. and b.) to complete the step.

**Example: Substeps in a procedure**

1. User must perform this step.
2. User must perform all substeps to complete this action.
   a. This is one substep.

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

**b.** This is another substep.

## 1.4 MD-CLI command reference

### 1.4.1 MD-CLI tree hierarchy

*Table 2: Command syntax symbols*

| Symbol | Description |
|---|---|
| \| | A vertical bar represents an "or" condition, indicating that only one of the parameters in the brackets or parentheses can be selected. |
| ( ) | Parentheses indicate that one of the parameters must be selected. |
| [ ] | Brackets indicate optional parameters. |
| Bold | Commands in **bold** indicate commands and keywords. |
| Italic | Commands in *italics* indicate that you must enter text for the parameter. |

In the following examples, **location** and **graceful-shutdown** are command names. For the **location** command, *keyword* must be one of the keywords **cf1**, **cf2**, or **cf3**. For the **graceful-shutdown** command, *boolean* must be one of the keywords **true** or **false**, although explicitly using the keyword **true** is optional.

```
location keyword
keyword - (cf1 | cf2 | cf3)

graceful-shutdown boolean
boolean - ([true] | false)
```

The configuration branch of the MD-CLI shows the commands and parameters (also known as elements) that are available, shown in a hierarchical structure as in the following figure.

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

*Figure 1: MD-CLI configuration tree example*

```
configure
  – cflowd
    – active-flow-timeout number
    – admin-state keyword
    – analyze-gre-payload boolean
    – analyze-l2tp-traffic boolean
    – analyze-v4overv6-traffic boolean
    – apply-groups reference
    – apply-groups-exclude reference
    – cache-size number
    – collector (ipv4-address-no-zone | ipv6-address-no-zone) port number
      – admin-state keyword
      – aggregation
        – as-matrix boolean
        – destination-prefix boolean
        – protocol-port boolean
        – raw boolean
        – source-destination-prefix boolean
        – source-prefix boolean
      – apply-groups reference
      – apply-groups-exclude reference
      – autonomous-system-type keyword
      – description string
      – export-filter
        – family
          – ipv4 boolean
          – ipv6 boolean
          – l2-ip boolean
          – mcast-ipv4 boolean
          – mcast-ipv6 boolean
          – mpls boolean
        – interface-list
          – router reference interface-name reference
          – service
```

sw4113

The **configure** context is the root level of the configuration branch within the configuration mode in the MD-CLI. Each chapter of this guide describes a configuration branch in the MD-CLI configuration tree.

Commands are linked to their command descriptions in the configuration tree with some exceptions (for example, to reduce repeated content), including the **apply-groups**, **apply-groups-exclude**, and **groups** commands. These commands are used to direct the use of configuration templates called configuration groups in the configure region at all configuration levels. The **apply-groups** command applies a configuration group at a configuration level and the **apply-groups-exclude** command excludes a configuration group at a configuration level. See "Using configuration groups" in the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide* for more information.

Some commands require one or more keys to be entered with the command. For example, the **collector** command has two keys which must be entered: the IP address and the port number. The key name for the IP address (**ip-address**) is optional, however, the key name **port** must be entered before the port number.

```
- collector (ipv4-address-no-zone | ipv6-address-no-zone) port number
```

The command description indicates the required syntax for each command. See MD-CLI command descriptions for more information.

**collector [ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **port** *number*

Italicized names after a command or parameter name indicate the parameter type. The parameter types include (but are not limited to):

- Boolean (true and false values)
- keyword (enumerated values)
- string

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

- number
- IPv4 address
- IPv6 address
- MAC address

The **summary-only** parameter, for example, requires a Boolean value. The **autonomous-system** parameter requires a number. For more information about the input values, click the command or parameter name from the MD-CLI tree to be linked to the command description.

```
- summary-only boolean
- autonomous-system number
```

A parameter type may also be a combination of different base types. These parameters are displayed in the MD-CLI tree with the individual parameter types enclosed in round brackets (()), separated by a vertical bar (|). For example, the **indirect** parameter can be configured with either an IPv4 address or IPv6 address:

```
- indirect (ipv4-address-no-zone | ipv6-address-no-zone)
```

Allowed values in strings are printable, 7-bit ASCII characters. If the string contains special characters (#, $, spaces, and so on), the entire string must be enclosed within double quotation marks. Double quotation marks within a string are not supported.

### 1.4.1.1 Context path

In the CLI tree section, a contextual path at the top of a page refers to the full context of the first command on the page, as shown in the following figure.

*Figure 2: Command tree navigation*

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### 1.4.2 MD-CLI command descriptions

The command syntax is shown in the command description, where the command is displayed in bold, followed by any key names and a type. From the MD-CLI tree, the **configure log accounting-policy** command shows that the key for the command is a number:

```
- log
    - accounting-policy number
```

The command description for **accounting-policy** shows that the key for the command is a policy identifier:

**accounting-policy** [**policy-id**] *number*

The square brackets ([ ]) indicate that the **policy-id** key name is optional. From the **policy-id** command description, the range of the identifier is a number from 1 to 99. Therefore, when using the **accounting-policy** command, the following inputs are acceptable:

```
accounting-policy policy-id 15
accounting-policy 25
accounting-policy 1
accounting-policy policy-id 99
```

The following table describes the fields that may be displayed for a command. Not all fields are applicable for all commands.

*Table 3: Command descriptions fields*

| Field | Description |
|---|---|
| Element Name | Name of the element (command or parameter) and its syntax |
| Synopsis | Summary description of the element |
| Context | Full path to the command (with links to parent commands) |
| Tree | Link to the command in the CLI tree. For key elements, the link is to the parent element. |
| Description | Detailed description of the element, as needed |
| String length | For string elements, the range of the number of characters allowed |
| Range/Max. range | For number elements, the range of allowed values. A maximum range may be overridden by a platform-specific range. |
| Units | Base unit type of the element |
| Options | Enumerated values allowed for the element. Not all options are available on all platforms. |
| MD-CLI default | MD-CLI default value for the element |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| Field | Description |
|---|---|
| Default | YANG default value when there is no MD-CLI default. Platform-specific defaults are not displayed. |
| Reference | Reference to an element instance in the configuration or state datastore |
| Min./Max. instances | For lists and leaf-lists, the minimum or maximum number of instances for this element |
| Notes | Information about special attributes of the element, including whether the element is:<br>• a key for an element<br>• mandatory<br>• ordered by the user (instead of by the system)<br>• part of a choice of elements |
| Introduced | Release in which the element was introduced |
| Deprecated | Release in which the element was deprecated |
| Platforms | Hardware platforms on which the element is available. See Platforms and terminology for more information about the platforms.<br>**Note:** Some SR OS features are platform-specific and therefore may not be available or visible on all platforms. See the *SR OS R24.x.Rx Software Release Notes*, part number 3HE 20152 000*x* TQZZA, for information about platform support. |

A description of the element is also available from the online help for the element. For information about using the online help in the MD-CLI, see the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide*.

**Note:**
All options for enumerated types and numerical ranges are listed in the MD-CLI command descriptions, however, not all options or ranges are valid on all platforms.

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

# 2 Operational commands

This section lists the commands available at the operation level of the MD-CLI.

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

## 2.1 admin commands

The **admin** commands are used to perform administrative functions, such as displaying configuration that is not subject to AAA, manually saving the configuration, clearing user sessions, and rebooting the system.

```
admin
   –  application-assurance
      –  group reference
         –  url-list reference
            –  upgrade
      –  upgrade
   –  clear
      –  security
         –  lockout
            –  all
            –  user named-item
         –  password-history
            –  all
            –  user named-item
   –  disconnect
      –  address (ipv4-address-no-zone | ipv6-address-no-zone)
      –  op-table-bypass boolean
      –  session-id number
      –  session-type keyword
      –  username named-item
   –  ipsec
      –  show
         –  key
            –  gateway named-item
            –  ip-tunnel interface-name
            –  ipsec-tunnel named-item
            –  peer-tunnel-ip-address (ipv4-address-no-zone | ipv6-address-no-zone)
            –  peer-tunnel-port number
            –  type keyword
   –  nat
      –  save-deterministic-script
   –  reboot
      –  [card] keyword
      –  hold
      –  now
   –  redundancy
      –  force-switchover
         –  ignore-status
         –  now
      –  synchronize
         –  boot-environment
         –  certificate
         –  configuration
   –  satellite
      –  ethernet-satellite reference
         –  reboot
            –  now
            –  upgrade
         –  synchronize
         –  tech-support
            –  [url] url
   –  save
      –  bof
      –  configure
      –  debug
      –  li
```

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

admin save [url]

```
      – [url] string
   – set
      – time
         – [system-time] date-and-time
   – show
      – configuration
         – bof
         – booted
         – cflash-id cflash-id
         – [cli-path] cli-path-type
         – configure
         – converted
         – debug
         – depth number
         – detail
         – differences
         – flat
         – full-context
         – inheritance
         – intended

## 2.1.1 admin command descriptions

### admin

| | |
|---|---|
| Synopsis | Enter the administrative context for system operations |
| Context | admin |
| Tree | admin |
| Introduced | 16.0.R1 |
| Platforms | All |

### application-assurance

| | |
|---|---|
| Synopsis | Enter the **application-assurance** context |
| Context | admin application-assurance |
| Tree | application-assurance |
| Description | Commands in this context configure Application Assurance (AA) upgrade and AA group upgrade operations. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **group** [aa-group-id] *reference*

| | |
|---|---|
| Synopsis | Enter the **group** list instance |
| Context | admin application-assurance group *reference* |
| Tree | group |
| Description | Commands in this context configure the attributes of the group-specific upgrade. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**aa-group-id**] *reference*

| | |
|---|---|
| Synopsis | AA group ID |
| Context | admin application-assurance group *reference* |
| Tree | group |
| Reference | **state application-assurance group** *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **url-list** [url-list-name] *reference*

| | |
|---|---|
| Synopsis | Enter the **url-list** list instance |
| Context | admin application-assurance group *reference* url-list *reference* |
| Tree | url-list |
| Description | Commands in this context configure the URL list upgrade parameters. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**url-list-name**] *reference*

| | |
|---|---|
| Synopsis | AA URL list name |
| Context | admin application-assurance group *reference* url-list *reference* |
| Tree | url-list |
| Reference | **state application-assurance group** *number* **url-list** *named-item* |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **upgrade**

| | |
|---|---|
| Synopsis | Upgrade the referenced URL list |
| Context | admin application-assurance group *reference* url-list *reference* upgrade |
| Tree | upgrade |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **upgrade**

| | |
|---|---|
| Synopsis | Upgrade to a new isa-aa.tim file |
| Context | admin application-assurance upgrade |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | upgrade |
| Description | This command loads a new isa-aa.tim file as part of a router-independent signature upgrade. An AA ISA reboot is required for the upgrade to take effect. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## clear

| | |
|---|---|
| Synopsis | Enter the **clear** context |
| Context | admin clear |
| Tree | clear |
| Introduced | 19.10.R1 |
| Platforms | All |

## security

| | |
|---|---|
| Synopsis | Enter the **security** context |
| Context | admin clear security |
| Tree | security |
| Introduced | 19.10.R1 |
| Platforms | All |

## lockout

| | |
|---|---|
| Synopsis | Reset the lockout timer |
| Context | admin clear security lockout |
| Tree | lockout |
| Introduced | 19.10.R1 |
| Platforms | All |

## all

| | |
|---|---|
| Synopsis | Clear lockout of all users |
| Context | admin clear security lockout all |
| Tree | all |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Notes | The following elements are part of a mandatory choice: **all** or **user**. |
| Introduced | 19.10.R1 |
| Platforms | All |

### **user** *named-item*

| | |
|---|---|
| Synopsis | User to be cleared of lockout |
| Context | admin clear security lockout user *named-item* |
| Tree | user |
| String length | 1 to 32 |
| Notes | The following elements are part of a mandatory choice: **all** or **user**. |
| Introduced | 19.10.R1 |
| Platforms | All |

## password-history

| | |
|---|---|
| Synopsis | Clear the password history |
| Context | admin clear security password-history |
| Tree | password-history |
| Introduced | 19.10.R1 |
| Platforms | All |

### all

| | |
|---|---|
| Synopsis | Clear password history of all users |
| Context | admin clear security password-history all |
| Tree | all |
| Notes | The following elements are part of a mandatory choice: **all** or **user**. |
| Introduced | 19.10.R1 |
| Platforms | All |

### **user** *named-item*

| | |
|---|---|
| Synopsis | User to be cleared of password history information |
| Context | admin clear security password-history user *named-item* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | user |
| String length | 1 to 32 |
| Notes | The following elements are part of a mandatory choice: **all** or **user**. |
| Introduced | 19.10.R1 |
| Platforms | All |

### disconnect

| | |
|---|---|
| Synopsis | Disconnect a user session |
| Context | admin disconnect |
| Tree | disconnect |
| Introduced | 16.0.R1 |
| Platforms | All |

### address *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | IP address of the session to disconnect |
| Context | admin disconnect address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | address |
| Introduced | 19.10.R1 |
| Platforms | All |

### op-table-bypass *boolean*

| | |
|---|---|
| Synopsis | Avoid operation ID allocation |
| Context | admin disconnect op-table-bypass *boolean* |
| Tree | op-table-bypass |
| Description | When configured to **true**, the system bypasses the YANG-based operations infrastructure and avoids the allocation of an operation ID. This is useful if the global operations table is full and a delete operation or **admin disconnect** is required. |
| Introduced | 21.5.R1 |
| Platforms | All |

### session-id *number*

| | |
|---|---|
| Synopsis | ID of the session to disconnect |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | admin disconnect session-id *number* |
| Tree | session-id |
| Range | 1 to 4294967295 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **session-type** *keyword*

| | |
|---|---|
| Synopsis | Type of session to disconnect |
| Context | admin disconnect session-type *keyword* |
| Tree | session-type |
| Options | console, bluetooth, telnet, ssh, ftp, netconf, grpc, cron-ehs |
| Introduced | 19.10.R1 |
| Platforms | All |

### **username** *named-item*

| | |
|---|---|
| Synopsis | Username to disconnect |
| Context | admin disconnect username *named-item* |
| Tree | username |
| String length | 1 to 32 |
| Introduced | 19.10.R1 |
| Platforms | All |

### **ipsec**

| | |
|---|---|
| Synopsis | Perform IPsec operations |
| Context | admin ipsec |
| Tree | ipsec |
| Introduced | 23.10.R1 |
| Platforms | All |

### **show**

| | |
|---|---|
| Synopsis | Display IPsec information |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | admin ipsec show |
| Tree | show |
| Introduced | 23.10.R1 |
| Platforms | All |

## key

| | |
|---|---|
| Synopsis | Display IPsec key history |
| Context | admin ipsec show key |
| Tree | key |
| Introduced | 23.10.R1 |
| Platforms | All |

## gateway *named-item*

| | |
|---|---|
| Synopsis | IPsec gateway name |
| Context | admin ipsec show key gateway *named-item* |
| Tree | gateway |
| String length | 1 to 32 |
| Notes | The following elements are part of a mandatory choice: (**gateway**, **peer-tunnel-ip-address**, and **peer-tunnel-port**), **ip-tunnel**, or **ipsec-tunnel**. |
| Introduced | 23.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## ip-tunnel *interface-name*

| | |
|---|---|
| Synopsis | IPsec transport mode IP tunnel name |
| Context | admin ipsec show key ip-tunnel *interface-name* |
| Tree | ip-tunnel |
| String length | 1 to 32 |
| Notes | The following elements are part of a mandatory choice: (**gateway**, **peer-tunnel-ip-address**, and **peer-tunnel-port**), **ip-tunnel**, or **ipsec-tunnel**. |
| Introduced | 23.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **ipsec-tunnel** *named-item*

| | |
|---|---|
| Synopsis | IPsec tunnel name |
| Context | admin ipsec show key ipsec-tunnel *named-item* |
| Tree | ipsec-tunnel |
| String length | 1 to 32 |
| Notes | The following elements are part of a mandatory choice: (**gateway**, **peer-tunnel-ip-address**, and **peer-tunnel-port**), **ip-tunnel**, or **ipsec-tunnel**. |
| Introduced | 23.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **peer-tunnel-ip-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Dynamic tunnel IP address |
| Context | admin ipsec show key peer-tunnel-ip-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | peer-tunnel-ip-address |
| Notes | The following elements are part of a mandatory choice: (**gateway**, **peer-tunnel-ip-address**, and **peer-tunnel-port**), **ip-tunnel**, or **ipsec-tunnel**. |
| Introduced | 23.10.R1 |
| Platforms | All |

### **peer-tunnel-port** *number*

| | |
|---|---|
| Synopsis | Dynamic tunnel port |
| Context | admin ipsec show key peer-tunnel-port *number* |
| Tree | peer-tunnel-port |
| Range | 0 \| 1 to 65535 |
| Notes | The following elements are part of a mandatory choice: (**gateway**, **peer-tunnel-ip-address**, and **peer-tunnel-port**), **ip-tunnel**, or **ipsec-tunnel**. |
| Introduced | 23.10.R1 |
| Platforms | All |

### **type** *keyword*

| | |
|---|---|
| Synopsis | Key type |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | admin ipsec show key type *keyword* |
| Tree | type |
| Options | ike, child |
| Notes | This element is mandatory. |
| Introduced | 23.10.R1 |
| Platforms | All |

## nat

| | |
|---|---|
| Synopsis | Enter the **nat** context |
| Context | admin nat |
| Tree | nat |
| Introduced | 21.2.R1 |
| Platforms | All |

## save-deterministic-script

| | |
|---|---|
| Synopsis | Save script that computes deterministic NAT map entries |
| Context | admin nat save-deterministic-script |
| Tree | save-deterministic-script |
| Introduced | 21.2.R1 |
| Platforms | All |

## reboot

| | |
|---|---|
| Synopsis | Reboot CPM or force an upgrade of system boot ROMs |
| Context | admin reboot |
| Tree | reboot |
| Introduced | 16.0.R1 |
| Platforms | All |

## [**card**] *keyword*

| | |
|---|---|
| Synopsis | Card to reboot |
| Context | admin reboot [card] *keyword* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | [card] |
| Options | active, standby, upgrade |
| Introduced | 16.0.R1 |
| Platforms | All |

## hold

| | |
|---|---|
| Synopsis | Hold a rebooted standby CPM from coming back online |
| Context | admin reboot hold |
| Tree | hold |
| Introduced | 19.10.R1 |
| Platforms | 7750 SR-7s, 7750 SR-14s, VSR |

## now

| | |
|---|---|
| Synopsis | Reboot immediately without prompts or confirmation |
| Context | admin reboot now |
| Tree | now |
| Introduced | 16.0.R1 |
| Platforms | All |

## redundancy

| | |
|---|---|
| Synopsis | Enter the **redundancy** context |
| Context | admin redundancy |
| Tree | redundancy |
| Introduced | 16.0.R1 |
| Platforms | All |

## force-switchover

| | |
|---|---|
| Synopsis | Force a switchover to the standby CPM |
| Context | admin redundancy force-switchover |
| Tree | force-switchover |
| Introduced | 16.0.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | All |

### ignore-status

| | |
|---|---|
| Synopsis | Switch to the standby CPM regardless of its status |
| Context | admin redundancy force-switchover ignore-status |
| Tree | ignore-status |
| Introduced | 19.10.R1 |
| Platforms | 7950 XRS |

### now

| | |
|---|---|
| Synopsis | Force the switchover to the standby CPM immediately |
| Context | admin redundancy force-switchover now |
| Tree | now |
| Introduced | 16.0.R1 |
| Platforms | All |

### synchronize

| | |
|---|---|
| Synopsis | Synchronize the standby CPM |
| Context | admin redundancy synchronize |
| Tree | synchronize |
| Introduced | 20.10.R1 |
| Platforms | All |

### boot-environment

| | |
|---|---|
| Synopsis | Synchronize all files required for the boot process |
| Context | admin redundancy synchronize boot-environment |
| Tree | boot-environment |
| Notes | The following elements are part of a mandatory choice: **boot-environment**, **certificate**, or **configuration**. |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### certificate

| | |
|---|---|
| Synopsis | Synchronize imported certificate, key, and CRL files |
| Context | admin redundancy synchronize certificate |
| Tree | certificate |
| Notes | The following elements are part of a mandatory choice: **boot-environment**, **certificate**, or **configuration**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### configuration

| | |
|---|---|
| Synopsis | Synchronize the configuration files |
| Context | admin redundancy synchronize configuration |
| Tree | configuration |
| Description | When specified, the system synchronizes the primary, secondary, and tertiary configuration files. |
| Notes | The following elements are part of a mandatory choice: **boot-environment**, **certificate**, or **configuration**. |
| Introduced | 20.10.R1 |
| Platforms | All |

### satellite

| | |
|---|---|
| Synopsis | Perform administrative operations for satellites |
| Context | admin satellite |
| Tree | satellite |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **ethernet-satellite** [satellite-id] *reference*

| | |
|---|---|
| Synopsis | Enter the **ethernet-satellite** list instance |
| Context | admin satellite ethernet-satellite *reference* |
| Tree | ethernet-satellite |
| Introduced | 22.2.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### [**satellite-id**] *reference*

| | |
|---|---|
| Synopsis | Satellite ID |
| Context | admin satellite ethernet-satellite *reference* |
| Tree | ethernet-satellite |
| Reference | **state satellite ethernet-satellite** *number* |
| Notes | This element is part of a list key. |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### reboot

| | |
|---|---|
| Synopsis | Initiate an administrative reboot of the chassis |
| Context | admin satellite ethernet-satellite *reference* reboot |
| Tree | reboot |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### now

| | |
|---|---|

## tech-support

| | |
|---|---|
| Synopsis | Save satellite technical support information |
| Context | admin satellite ethernet-satellite *reference* tech-support |
| Tree | tech-support |
| Description | This command creates a system core dump. If no file URL is specified and the **ts-location** command is configured in the **configure system security tech-support** context, the technical support file is automatically generated by the system with the file name based on the system name and the date and time, and is saved to the directory indicated by the **ts-location** configuration.<br><br>The format of the auto-generated file name is ts-XXXXX.YYYYMMDD.HHMMUTC.dat, where:<br>• XXXXX is the system name with special characters expanded to avoid problems with file systems (for example, a period (.) is expanded to %2E)<br>• YYYYMMDD is the date with leading zeros on the year, month, and day<br>• HHMM is the hours and minutes in UTC time (24 hour format, always 4 characters, with leading zeros on the hours and minutes)<br><br>**Note**: This command is not supported over non-interactive interfaces (for example, NETCONF).<br><br>**Note**: This command should only be used with authorized direction from the Nokia Technical Assistance Center (TAC). |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## [**url**] *url*

| Context | admin system security image-digital-signature |
| Tree | image-digital-signature |
| Introduced | 24.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## validate

| | |
|---|---|
| Synopsis | Perform software digital-signature validations |
| Context | admin system security image-digital-signature validate |
| Tree | validate |
| Introduced | 24.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## software-image *cflash-and-url*

| | |
|---|---|
| Synopsis | Location of the target software image |
| Context | admin system security image-digital-signature validate software-image *cflash-and-url* |
| Tree | software-image |
| Description | This command specifies the URL where the following software image files are located: cpm.tim, both.tim, iom.tim, boot.ldr, support.tim, kernel.tim, hypervisor.tim, isa-aa.tim.<br>The signatures.txt file must be present in the same folder as the preceding files. To ensure the signatures.txt file is present on both the active and standby CF, see the "Upgrade procedure to a FIPS image" topic in the *7450 ESS, 7750 SR, 7950 XRS, and VSR Basic System Configuration Guide*. |
| String length | 1 to 180 |
| Notes | This element is mandatory. |
| Introduced | 24.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## pki

| | |
|---|---|
| Synopsis | Perform PKI related operations |
| Context | admin system security pki |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | pki |
| Description | Commands in this context specify options for public key infrastructure operations. |
| Introduced | 23.3.R1 |
| Platforms | All |

## clear-ocsp-cache

| | |
|---|---|
| Synopsis | Clear the current OCSP response cache |
| Context | admin system security pki clear-ocsp-cache |
| Tree | clear-ocsp-cache |
| Introduced | 23.3.R1 |
| Platforms | All |

## [**entry-id**] *number*

| | |
|---|---|
| Synopsis | Local OCSP response cache entry ID to clear |
| Context | admin system security pki clear-ocsp-cache [entry-id] *number* |
| Tree | [entry-id] |
| Range | 1 to 2000 |
| Introduced | 23.3.R1 |
| Platforms | All |

## cmpv2

| | |
|---|---|
| Synopsis | Perform CMPv2 operations |
| Context | admin system security pki cmpv2 |
| Tree | cmpv2 |
| Description | Commands in this context specify options for Certificate Management Protocol v2 (CMPv2) operations. |
| Introduced | 23.3.R1 |
| Platforms | All |

## cert-request

| | |
|---|---|
| Synopsis | Request an additional certificate |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | admin system security pki cmpv2 cert-request |
| Tree | cert-request |
| Description | When specified, the system requests an additional certificate after the initial certificate has been obtained from the CA.<br>The request is authenticated by a signature signed by the current key, along with the current certificate. The hash algorithm used for the signature depends on the key type:<br>• DSA key - SHA1<br>• RSA key: MD5 \| SHA1 \| SHA224 \| SHA256 \| SHA384 \| SHA512 (default is SHA1)<br>• ECDSA key: SHA1 \| SHA224 \| SHA256 \| SHA384 \| SHA512 (default is SHA256)<br>CA may not return a certificate immediately, for example, if the request process requires manual intervention. The **poll** command can be used to poll the status of the request. |
| Introduced | 23.3.R1 |
| Platforms | All |

## **ca-profile** *reference*

| | |
|---|---|
| Synopsis | PKI CA profile name |
| Context | admin system security pki cmpv2 cert-request ca-profile *reference* |
| Tree | ca-profile |
| Description | This command configures the CA profile that contains the CMPv2 configuration like server URL. |
| Reference | **state system security pki ca-profile** *named-item* |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

## **current-certificate** *pki-file-name*

| | |
|---|---|
| Synopsis | Existing imported certificate file to create request |
| Context | admin system security pki cmpv2 cert-request current-certificate *pki-file-name* |
| Tree | current-certificate |
| String length | 1 to 95 |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **current-key** *pki-file-name*

| | |
|---|---|
| Synopsis | Imported key file used to create the request |
| Context | admin system security pki cmpv2 cert-request current-key *pki-file-name* |
| Tree | current-key |
| Description | This command specifies the imported key file corresponding to the existing imported certificate file used to create the request. |
| String length | 1 to 95 |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **domain-name** *string*

| | |
|---|---|
| Synopsis | FQDNs for the Subject Alternative Name |
| Context | admin system security pki cmpv2 cert-request domain-name *string* |
| Tree | domain-name |
| Description | This command specifies the Fully Qualified Domain Names (FQDNs) for the Subject Alternative Name extension of the requesting certificate, separated by commas. |
| String length | 1 to 512 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **hash-algorithm** *keyword*

| | |
|---|---|
| Synopsis | Hash algorithm used for the certificate signature |
| Context | admin system security pki cmpv2 cert-request hash-algorithm *keyword* |
| Tree | hash-algorithm |
| Options | md5, sha1, sha224, sha256, sha384, sha512 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **ip-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | IP address for the Subject Alternative Name |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | admin system security pki cmpv2 cert-request ip-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | ip-address |
| Description | This command specifies an IPv4 or IPv6 address for the Subject Alternative Name extension of the requesting certificate. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **new-key** *pki-file-name*

| | |
|---|---|
| Synopsis | New imported key file to create certificate request |
| Context | admin system security pki cmpv2 cert-request new-key *pki-file-name* |
| Tree | new-key |
| String length | 1 to 95 |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **save-as** *cflash-url*

| | |
|---|---|
| Synopsis | Full path to save the result certificate |
| Context | admin system security pki cmpv2 cert-request save-as *cflash-url* |
| Tree | save-as |
| String length | 1 to 200 |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **subject-dn** *string*

| | |
|---|---|
| Synopsis | Subject of the requesting certificate |
| Context | admin system security pki cmpv2 cert-request subject-dn *string* |
| Tree | subject-dn |
| Description | This command specifies the subject DN attributes used in the certificate request. The format is a comma separated list with the format attr1=val1, attr2=val2, where attrN={C \| ST \| O \| OU \| CN}. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| String length | 1 to 256 |
| Introduced | 23.3.R1 |
| Platforms | All |

## clear-request

| | |
|---|---|
| Synopsis | Clear pending CMPv2 requests |
| Context | admin system security pki cmpv2 clear-request |
| Tree | clear-request |
| Description | When specified, the system clears pending CMPv2 requests for the specified CA. If no requests are pending, the system clears the saved result of the previous request |
| Introduced | 23.3.R1 |
| Platforms | All |

## ca-profile *reference*

| | |
|---|---|
| Synopsis | PKI CA profile name |
| Context | admin system security pki cmpv2 clear-request ca-profile *reference* |
| Tree | ca-profile |
| Description | This command configures the CA profile that contains the CMPv2 configuration like server URL. |
| Reference | **state system security pki ca-profile** *named-item* |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

## initial-registration

| | |
|---|---|
| Synopsis | Request initial certificate using the CMPv2 protocol |
| Context | admin system security pki cmpv2 initial-registration |
| Tree | initial-registration |
| Description | When specified, the system requests the initial certificate from the CA using the CMPv2 initial registration procedure.<br>The **ca-profile** parameter specifies a CA profile which includes CMP server information.<br>The **key-to-certify** parameter is an imported key file to be certified by the CA.<br>The request is authenticated via one of the following methods: |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

- A password and a reference number that pre-distributed by CA via out-of-band means. The specified password and reference number are not necessarily in the key-list configured in the corresponding CA-Profile. If key-list is not configured in the corresponding CA profile, the system uses the existing password to authenticate the CMPv2 packets from server if it is in password protection. If key-list is configured in the corresponding CA profile and the server does not send SenderKID, the system uses the lexicographical first key in the key-list to authenticate the CMPv2 packets from the server in case it is in password protection mode.
- A signature signed by the protection-key or key-to-certify, optionally with with the corresponding certificate. If the **protection-key** command is not specified, the system uses the **key-to-certify** configuration for message protection. The hash algorithm used for the signature depends on the key type. See the **cert-request** command for details. Optionally, the system may send a certificate or a chain of certificates in the extraCertsfield. The certificate is specified by the **certificate** parameter and must include the public key of the key used for message protection. Sending a chain is enabled by specifying the **send-chain** and **with-ca** command options.

The **subject-dn** command specifies the subject of the requesting certificate.

The **save-as** command specifies the full path name for saving the result certificate.

The CA may not return the certificate immediately, for example, if the request process requires manual intervention. In such cases, the **poll** command can be used to poll the status of the request.

| | |
|---|---|
| Introduced | 23.3.R1 |
| Platforms | All |

## **ca-profile** *reference*

| | |
|---|---|
| Synopsis | PKI CA profile name |
| Context | admin system security pki cmpv2 initial-registration ca-profile *reference* |
| Tree | ca-profile |
| Description | This command configures the CA profile that contains the CMPv2 configuration like server URL. |
| Reference | **state system security pki ca-profile** *named-item* |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

## **certificate** *pki-file-name*

| | |
|---|---|
| Synopsis | Filename of the certificate for the protection key |
| Context | admin system security pki cmpv2 initial-registration certificate *pki-file-name* |

© 2024 Nokia.

Use subject to Terms available at: www.nokia.com/terms.

The **hash-alg**, **subject-dn**, **domain-name**, and **ip-address** commands are used to generate the Certificate Signing Request (CSR) in the EST request message. The **domain-name** and **ip-address** commands are used as subject alternative names.

If **validate-certificate-chain** is specified, the system validates the chain of result certificate before importing it. The certificate chain is the chain of all certificates from the result certificate to the issuing CA. The result certificate is the new certificate returned by the EST server.

The result certificate is imported and saved with the filename specified by the **output-file** command. If the **force** command is specified, the system overwrites the existing file with same name as the output file.

| | |

### **card** *reference*

| | |
|---|---|
| Synopsis | CPM slot where secure boot is activated or modified |
| Context | admin system security secure-boot update-key card *reference* |
| Tree | card |
| Reference | **state cpm** *cpm-card-slot* |
| Notes | This element is mandatory. |
| Introduced | 23.7.R1 |
| Platforms | 7750 SR-1, 7750 SR-1 (FP5), 7750 SR-s, 7950 XRS-20e |

### **confirmation-code** *string-not-all-spaces*

| | |
|---|---|
| Synopsis | Confirmation code |
| Context | admin system security secure-boot update-key confirmation-code *string-not-all-spaces* |
| Tree | confirmation-code |
| String length | 1 to 32 |
| Introduced | 23.7.R1 |
| Platforms | 7750 SR-1, 7750 SR-1 (FP5), 7750 SR-s, 7950 XRS-20e |

### **serial-number** *string-not-all-spaces*

| | |
|---|---|
| Synopsis | CPM card serial number which secure-boot activates |
| Context | admin system security secure-boot update-key serial-number *string-not-all-spaces* |
| Tree | serial-number |
| String length | 1 to 32 |
| Introduced | 23.7.R1 |
| Platforms | 7750 SR-1, 7750 SR-1 (FP5), 7750 SR-s, 7950 XRS-20e |

### **software-image** *cflash-and-url*

| | |
|---|---|
| Synopsis | Location of the target software image |
| Context | admin system security secure-boot update-key software-image *cflash-and-url* |
| Tree | software-image |
| String length | 1 to 180 |
| Notes | This element is mandatory. |

## 2.2 environment commands

See “Environment commands” in the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide* for more information.

```
environment
   –  command-alias
      –  alias string
         –  admin-state keyword
         –  cli-command string
         –  description string-not-all-spaces
         –  mount-point (keyword | string)
         –  python-script reference
   –  command-completion
      –  enter boolean
      –  space boolean
      –  tab boolean
   –  commit-options
      –  comment boolean
      –  confirm boolean
   –  console
      –  length number
      –  width number
   –  history
      –  recall boolean
      –  size number
   –  info-output
      –  always-display
         –  admin-state boolean
   –  message-severity-level
      –  cli keyword
   –  more boolean
   –  progress-indicator
      –  admin-state keyword
      –  delay number
      –  type keyword
   –  prompt
      –  context boolean
      –  newline boolean
      –  timestamp boolean
      –  uncommitted-changes-indicator boolean
   –  python
      –  memory-reservation number
      –  minimum-available-memory number
      –  timeout number
   –  time-display keyword
   –  time-format keyword
```

## 2.2.1 environment command descriptions

### environment

| | |
|---|---|
| Synopsis | Configure the environment settings for this session |
| Context | environment |
| Tree | environment |
| Introduced | 16.0.R1 |
| Platforms | All |

### command-alias

| | |
|---|---|
| Synopsis | Enter the **command-alias** context |
| Context | environment command-alias |
| Tree | command-alias |
| Description | Commands in this context create aliases to existing MD-CLI commands or to Python scripts.<br>Aliases may be mounted for use globally or for selected context paths. Arguments and output modifiers may be provided to aliases at configuration or run time. |
| Introduced | 21.7.R1 |
| Platforms | All |

### **alias** [alias-name] *string*

| | |
|---|---|
| Synopsis | Enter the **alias** list instance |
| Context | environment command-alias alias *string* |
| Tree | alias |
| Description | Commands in this context create aliases to existing MD-CLI commands or to Python applications.<br>Aliases may be mounted for use globally or for selected context paths. Arguments and output modifiers may be provided to aliases at configuration or run time. |
| Introduced | 21.7.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### [**alias-name**] *string*

| | |
|---|---|
| Synopsis | Alias name |
| Context | environment command-alias alias *string* |
| Tree | alias |
| String length | 1 to 64 |
| Notes | This element is part of a list key. |
| Introduced | 21.7.R1 |
| Platforms | All |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the alias |
| Context | environment command-alias alias *string* admin-state *keyword* |
| Tree | admin-state |
| Description | This command controls the administrative state of the MD-CLI alias.<br>MD-CLI aliases that are administratively disabled cannot be executed, do not autocomplete in operational mode, and do not appear in **?** help. |
| Options | enable, disable |
| Introduced | 21.10.R1 |
| Platforms | All |

### **cli-command** *string*

| | |
|---|---|
| Synopsis | CLI command to run when executing the alias |
| Context | environment command-alias alias *string* cli-command *string* |
| Tree | cli-command |
| String length | 1 to 255 |
| Notes | The following elements are part of a mandatory choice: **cli-command** or **python-script**. |
| Introduced | 21.7.R1 |
| Platforms | All |

### **description** *string-not-all-spaces*

| | |
|---|---|
| Synopsis | Text description |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | environment command-alias alias *string* description *string-not-all-spaces* |
| Tree | description |
| String length | 1 to 110 |
| Introduced | 21.7.R1 |
| Platforms | All |

### **mount-point** [path] *(keyword | string)*

| | |
|---|---|
| Synopsis | Add a list entry for **mount-point** |
| Context | environment command-alias alias *string* mount-point *(keyword | string)* |
| Tree | mount-point |
| Min. instances | 1 |
| Introduced | 21.7.R1 |
| Platforms | All |

### [**path**] *(keyword | string)*

| | |
|---|---|
| Synopsis | Mount point where the alias is available |
| Context | environment command-alias alias *string* mount-point *(keyword | string)* |
| Tree | mount-point |
| String length | 1 to 255 |
| Options | global |
| Notes | This element is part of a list key. |
| Introduced | 21.7.R1 |
| Platforms | All |

### **python-script** *reference*

| | |
|---|---|
| Synopsis | Python script to run when executing the alias |
| Context | environment command-alias alias *string* python-script *reference* |
| Tree | python-script |
| Reference | **state python python-script** *named-item* |
| Notes | The following elements are part of a mandatory choice: **cli-command** or **python-script**. |
| Introduced | 21.7.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | All |

### command-completion

| | |
|---|---|
| Synopsis | Enter the **command-completion** context |
| Context | environment command-completion |
| Tree | command-completion |
| Introduced | 16.0.R1 |
| Platforms | All |

### **enter** *boolean*

| | |
|---|---|
| Synopsis | Complete the command when the Enter key is pressed |
| Context | environment command-completion enter *boolean* |
| Tree | enter |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

### **space** *boolean*

| | |
|---|---|
| Synopsis | Complete the command when the Space key is pressed |
| Context | environment command-completion space *boolean* |
| Tree | space |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

### **tab** *boolean*

| | |
|---|---|
| Synopsis | Complete the command when the Tab key is pressed |
| Context | environment command-completion tab *boolean* |
| Tree | tab |
| Default | true |
| Introduced | 16.0.R1 |

© 2024 Nokia.

| | |
|---|---|
| Platforms | All |

## commit-options

| | |
|---|---|
| Synopsis | Enter the **commit-options** context |
| Context | environment commit-options |
| Tree | commit-options |
| Introduced | 24.10.R1 |
| Platforms | All |

## comment *boolean*

| | |
|---|---|
| Synopsis | Require a commit comment when committing configuration |
| Context | environment commit-options comment *boolean* |
| Tree | comment |
| Default | false |
| Introduced | 24.10.R1 |
| Platforms | All |

## confirm *boolean*

| | |
|---|---|
| Synopsis | Require confirmed commit when committing configuration |
| Context | environment commit-options confirm *boolean* |
| Tree | confirm |
| Default | false |
| Introduced | 24.10.R1 |
| Platforms | All |

## console

| | |
|---|---|
| Synopsis | Enter the **console** context |
| Context | environment console |
| Tree | console |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **length** *number*

| | |
|---|---|
| Synopsis | Number of lines displayed on the console |
| Context | environment console length *number* |
| Tree | length |
| Range | 24 to 512 |
| Default | 24 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **width** *number*

| | |
|---|---|
| Synopsis | Number of columns displayed on the console |
| Context | environment console width *number* |
| Tree | width |
| Range | 80 to 512 |
| Default | 80 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **history**

| | |
|---|---|
| Synopsis | Enter the **history** context |
| Context | environment history |
| Tree | history |
| Introduced | 24.7.R1 |
| Platforms | All |

### **recall** *boolean*

| | |
|---|---|
| Synopsis | Allow command history recall and search execution |
| Context | environment history recall *boolean* |
| Tree | recall |
| Description | When configured to **true**, the command history recall (**!**), substitution (**!$**), display (**:p**, **Esc+.**), and backward search (**Ctrl-R**) are enabled. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

When configured to **false**, the command history can be displayed using the **history** command, but commands in the history cannot be executed.

| | |
|---|---|
| Default | true |
| Introduced | 24.7.R1 |
| Platforms | All |

### **size** *number*

| | |
|---|---|
| Synopsis | Command history size |
| Context | environment history size *number* |
| Tree | size |
| Description | This command specifies the maximum size of the command history. A value of 0 disables the command history. |
| Range | 0 to 1000 |
| Default | 50 |
| Introduced | 24.7.R1 |
| Platforms | All |

### info-output

| | |
|---|---|
| Synopsis | Enter the **info-output** context |
| Context | environment info-output |
| Tree | info-output |
| Introduced | 22.2.R1 |
| Platforms | All |

### always-display

| | |
|---|---|
| Synopsis | Enter the **always-display** context |
| Context | environment info-output always-display |
| Tree | always-display |
| Description | Commands in this context specify elements that are always displayed, regardless of whether they are set to their default value. |
| Introduced | 22.2.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **admin-state** *boolean*

| | |
|---|---|
| Synopsis | Always display admin-state elements |
| Context | environment info-output always-display admin-state *boolean* |
| Tree | admin-state |
| Description | When configured to **true**, the values of the **admin-state** elements in **info** output (without the **detail** option) are always displayed, even if they are the default values. |
| Default | false |
| Introduced | 22.2.R1 |
| Platforms | All |

### **message-severity-level**

| | |
|---|---|
| Synopsis | Enter the **message-severity-level** context |
| Context | environment message-severity-level |
| Tree | message-severity-level |
| Introduced | 16.0.R1 |
| Platforms | All |

### **cli** *keyword*

| | |
|---|---|
| Synopsis | Message severity threshold for CLI messages |
| Context | environment message-severity-level cli *keyword* |
| Tree | cli |
| Options | warning, info |
| Default | info |
| Introduced | 16.0.R1 |
| Platforms | All |

### **more** *boolean*

| | |
|---|---|
| Synopsis | Activate the pager when output is longer than a screen |
| Context | environment more *boolean* |
| Tree | more |
| Default | true |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 16.0.R1 |
| Platforms | All |

### progress-indicator

| | |
|---|---|
| Synopsis | Enter the **progress-indicator** context |
| Context | environment progress-indicator |
| Tree | progress-indicator |
| Introduced | 16.0.R1 |
| Platforms | All |

### admin-state *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the progress indicator |
| Context | environment progress-indicator admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | enable |
| Introduced | 16.0.R1 |
| Platforms | All |

### delay *number*

| | |
|---|---|
| Synopsis | Delay before the progress indicator is displayed |
| Context | environment progress-indicator delay *number* |
| Tree | delay |
| Range | 0 to 10000 |
| Units | milliseconds |
| Default | 1000 |
| Introduced | 16.0.R1 |
| Platforms | All |

### type *keyword*

| | |
|---|---|
| Synopsis | Progress indicator output style |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | environment progress-indicator type *keyword* |
| Tree | type |
| Options | dots |
| Default | dots |
| Introduced | 16.0.R1 |
| Platforms | All |

### prompt

| | |
|---|---|
| Synopsis | Enter the **prompt** context |
| Context | environment prompt |
| Tree | prompt |
| Introduced | 16.0.R1 |
| Platforms | All |

### context *boolean*

| | |
|---|---|
| Synopsis | Show the current command context in the prompt |
| Context | environment prompt context *boolean* |
| Tree | context |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

### newline *boolean*

| | |
|---|---|
| Synopsis | Add a new line before every prompt line |
| Context | environment prompt newline *boolean* |
| Tree | newline |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **timestamp** *boolean*

| | |
|---|---|
| Synopsis | Show the timestamp before the first prompt line |
| Context | environment prompt timestamp *boolean* |
| Tree | timestamp |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **uncommitted-changes-indicator** *boolean*

| | |
|---|---|
| Synopsis | Show an asterisk (*) when uncommitted changes exist |
| Context | environment prompt uncommitted-changes-indicator *boolean* |
| Tree | uncommitted-changes-indicator |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

### **python**

| | |
|---|---|
| Synopsis | Enter the **python** context |
| Context | environment python |
| Tree | python |
| Introduced | 21.10.R1 |
| Platforms | All |

### **memory-reservation** *number*

| | |
|---|---|
| Synopsis | Memory reserved per Python interpreter |
| Context | environment python memory-reservation *number* |
| Tree | memory-reservation |
| Range | 1 to 500 |
| Units | megabytes |
| Introduced | 21.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **minimum-available-memory** *number*

| | |
|---|---|
| Synopsis | Minimum memory requirement to run a Python interpreter |
| Context | environment python minimum-available-memory *number* |
| Tree | minimum-available-memory |
| Range | 5 to 50 |
| Units | percent |
| Introduced | 21.10.R1 |
| Platforms | All |

### **timeout** *number*

| | |
|---|---|
| Synopsis | Maximum run time before a Python application is stopped |
| Context | environment python timeout *number* |
| Tree | timeout |
| Range | 30 to 86400 |
| Units | seconds |
| Default | 3600 |
| Introduced | 21.10.R1 |
| Platforms | All |

### **time-display** *keyword*

| | |
|---|---|
| Synopsis | Time zone to display time |
| Context | environment time-display *keyword* |
| Tree | time-display |
| Description | This command configures the time zone for a timestamp displayed in outputs, such as event logs and **show** commands for the current CLI session.<br>In event logs, the selected time is used to control the timestamps in the CLI output of **show log log-id** and in YANG state in the /state/log/log-id branch (for logs such as session, cli, memory, SNMP, and NETCONF).<br>Also see the **configure log log-id time-format** command. |
| Options | local, utc |
| Default | local |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **time-format** *keyword*

| | |
|---|---|
| Synopsis | Format to display the date and time |
| Context | environment time-format *keyword* |
| Tree | time-format |
| Description | This command specifies the format of the time display in the prompt, configuration, state, and certain **show** command output in the current CLI session. |
| Options | iso-8601, rfc-1123, rfc-3339 |
| Default | rfc-3339 |
| Introduced | 20.5.R1 |
| Platforms | All |

© 2024 Nokia.

## 2.3 file commands

See “File management” in the *7450 ESS, 7750 SR, 7950 XRS, and VSR Basic System Configuration Guide* for more information.

```
file
   –  change-directory
      –  [url] (sat-url | cflash-url | string-not-all-spaces | ftp-url)
   –  checksum
      –  [type] keyword
      –  [url] (sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url)
   –  copy
      –  client-tls-profile string
      –  [destination-url] (sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-
url-loose | scp-url)
      –  direct-http
      –  force
      –  proxy http-url
      –  recursive
      –  router-instance string
      –  [source-url] (sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-url-
loose)
   –  disable
      –  active
      –  cflash-id cflash-id
      –  standby
   –  edit
      –  [url] (sat-url | cflash-url | string-not-all-spaces)
   –  enable
      –  active
      –  cflash-id cflash-id
      –  standby
   –  format
      –  [cflash-id] cflash-id
   –  list
      –  reverse
      –  [sort-order] keyword
      –  [url] (sat-url | cflash-url | string-not-all-spaces | ftp-url)
   –  make-directory
      –  [url] (sat-url | cflash-url | string-not-all-spaces | ftp-url)
   –  move
      –  client-tls-profile string
      –  [destination-url] (sat-url | cflash-url | string-not-all-spaces | ftp-url | http-url-
loose)
      –  direct-http
      –  force
      –  proxy http-url
      –  [source-url] (sat-url | cflash-url | string-not-all-spaces | ftp-url | http-url-loose)
   –  permission
      –  [attribute] keyword
      –  [url] (sat-url | cflash-url | string-not-all-spaces)
   –  remove
      –  client-tls-profile string
      –  direct-http
      –  force
      –  proxy http-url
      –  [url] (sat-url | cflash-url | string-not-all-spaces | ftp-url | http-url-loose)
   –  remove-directory
      –  force
      –  recursive
      –  [url] (sat-url | cflash-url | string-not-all-spaces | ftp-url)

## 2.3.1 file command descriptions

### file

| | |
|---|---|
| Synopsis | Perform file operations |
| Context | file |
| Tree | file |
| Description | Commands in this context execute file management operations. |
| Introduced | 20.10.R1 |
| Platforms | All |

### change-directory

| | |
|---|---|
| Synopsis | Change the working directory |
| Context | file change-directory |
| Tree | change-directory |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**url**] *(sat-url | cflash-url | string-not-all-spaces | ftp-url)*

| | |
|---|---|
| Synopsis | New working directory URL |
| Context | file change-directory [url] *(sat-url* \| *cflash-url* \| *string-not-all-spaces* \| *ftp-url)* |
| Tree | [url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 180 (*ftp-url*) |
| Default | . |
| Introduced | 20.10.R1 |
| Platforms | All |

### checksum

| | |
|---|---|
| Synopsis | Compute and display checksums |
| Context | file checksum |
| Tree | checksum |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | This command computes and displays an image file or a checksum for a file. |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**type**] *keyword*

| | |
|---|---|
| Synopsis | Checksum option type |
| Context | file checksum [type] *keyword* |
| Tree | [type] |
| Options | image, md5, sha256 |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**url**] *(sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-tftp-url)*

| | |
|---|---|
| Synopsis | File URL |
| Context | file checksum [url] *(sat-url* \| *cflash-url* \| *string-not-all-spaces* \| *ftp-tftp-url)* |
| Tree | [url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 199 (*ftp-tftp-url*) |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

## copy

| | |
|---|---|
| Synopsis | Copy files |
| Context | file copy |
| Tree | copy |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **client-tls-profile** *string*

| | |
|---|---|
| Synopsis | Connect over HTTP with a client TLS profile |
| Context | file copy client-tls-profile *string* |
| Tree | client-tls-profile |
| String length | 1 to 32 |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**destination-url**] *(sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-url-loose | scp-url)*

| | |
|---|---|
| Synopsis | Destination URL or '.' for the working directory |
| Context | file copy [destination-url] *(sat-url* \| *cflash-url* \| *string-not-all-spaces* \| *ftp-tftp-url* \| *http-url-loose* \| *scp-url)* |
| Tree | [destination-url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 199 (*ftp-tftp-url*)<br>1 to 180 (*http-url-loose*, *scp-url*) |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

### **direct-http**

| | |
|---|---|
| Synopsis | Allow direct HTTP connection, do not follow redirects |
| Context | file copy direct-http |
| Tree | direct-http |
| Introduced | 20.10.R1 |
| Platforms | All |

### **force**

| | |
|---|---|
| Synopsis | Force copy without prompting before overwriting |
| Context | file copy force |
| Tree | force |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 20.10.R1 |
| Platforms | All |

### **proxy** *http-url*

| | |
|---|---|
| Synopsis | Connect over HTTP with a proxy |
| Context | file copy proxy *http-url* |
| Tree | proxy |
| String length | 1 to 255 |
| Introduced | 20.10.R1 |
| Platforms | All |

### **recursive**

| | |
|---|---|
| Synopsis | Copy sub-directories encountered at the source URL |
| Context | file copy recursive |
| Tree | recursive |
| Description | This command recursively copies files and directories. If files or directories already exist, the operator is prompted to overwrite them. When the **force** command is enabled, a positive response to the overwrite prompts is assumed, and the operator is not prompted for confirmation. The existing files or directories are overwritten. |
| Introduced | 21.10.R1 |
| Platforms | All |

### **router-instance** *string*

| | |
|---|---|
| Synopsis | Router name or VPRN service name |
| Context | file copy router-instance *string* |
| Tree | router-instance |
| Introduced | 23.10.R1 |
| Platforms | All |

### [**source-url**] *(sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-url-loose)*

| | |
|---|---|
| Synopsis | Source URL |
| Context | file copy [source-url] *(sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-url-loose)* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | [source-url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 199 (*ftp-tftp-url*)<br>1 to 180 (*http-url-loose*) |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

## disable

| | |
|---|---|
| Synopsis | Disable compact flash devices |
| Context | file disable |
| Tree | disable |
| Introduced | 20.10.R1 |
| Platforms | All |

## active

| | |
|---|---|
| Synopsis | Disable all devices on the active CPM |
| Context | file disable active |
| Tree | active |
| Notes | The following elements are part of a choice: **active**, **cflash-id**, or **standby**. |
| Introduced | 20.10.R1 |
| Platforms | All |

## cflash-id *cflash-id*

| | |
|---|---|
| Synopsis | Disable the compact flash device |
| Context | file disable cflash-id *cflash-id* |
| Tree | cflash-id |
| String length | 4 to 6 |
| Notes | The following elements are part of a choice: **active**, **cflash-id**, or **standby**. |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### standby

| | |
|---|---|
| Synopsis | Disable all devices on the standby CPM |
| Context | file disable standby |
| Tree | standby |
| Notes | The following elements are part of a choice: **active**, **cflash-id**, or **standby**. |
| Introduced | 20.10.R1 |
| Platforms | All |

### edit

| | |
|---|---|
| Synopsis | Edit files with the text editor |
| Context | file edit |
| Tree | edit |
| Description | This command allows users to edit files with the text editor.<br>See "Text editor" in the *7450 ESS, 7750 SR, 7950 XRS, and VSR Basic System Configuration Guide* for more information. |
| Introduced | 22.10.R1 |
| Platforms | All |

### [**url**] *(sat-url | cflash-url | string-not-all-spaces)*

| | |
|---|---|
| Synopsis | File URL |
| Context | file edit [url] *(sat-url | cflash-url | string-not-all-spaces)* |
| Tree | [url] |
| String length | 1 to 200 |
| Notes | This element is mandatory. |
| Introduced | 22.10.R1 |
| Platforms | All |

### enable

| | |
|---|---|
| Synopsis | Enable compact flash devices |
| Context | file enable |
| Tree | enable |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 20.10.R1 |
| Platforms | All |

### active

| | |
|---|---|
| Synopsis | Enable all devices on the active CPM |
| Context | file enable active |
| Tree | active |
| Notes | The following elements are part of a choice: **active**, **cflash-id**, or **standby**. |
| Introduced | 20.10.R1 |
| Platforms | All |

### cflash-id *cflash-id*

| | |
|---|---|
| Synopsis | Enable the compact flash device |
| Context | file enable cflash-id *cflash-id* |
| Tree | cflash-id |
| String length | 4 to 6 |
| Notes | The following elements are part of a choice: **active**, **cflash-id**, or **standby**. |
| Introduced | 20.10.R1 |
| Platforms | All |

### standby

| | |
|---|---|
| Synopsis | Enable all devices on the standby CPM |
| Context | file enable standby |
| Tree | standby |
| Notes | The following elements are part of a choice: **active**, **cflash-id**, or **standby**. |
| Introduced | 20.10.R1 |
| Platforms | All |

### format

| | |
|---|---|
| Synopsis | Format a compact flash device |
| Context | file format |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | format |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**cflash-id**] *cflash-id*

| | |
|---|---|
| Synopsis | Compact flash ID |
| Context | file format [cflash-id] *cflash-id* |
| Tree | [cflash-id] |
| String length | 4 to 6 |
| Introduced | 20.10.R1 |
| Platforms | All |

### list

| | |
|---|---|
| Synopsis | List directory contents |
| Context | file list |
| Tree | list |
| Introduced | 20.10.R1 |
| Platforms | All |

### reverse

| | |
|---|---|
| Synopsis | List files in reverse sort order |
| Context | file list reverse |
| Tree | reverse |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**sort-order**] *keyword*

| | |
|---|---|
| Synopsis | Sort order for the directory |
| Context | file list [sort-order] *keyword* |
| Tree | [sort-order] |
| Options | date, name, size |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 20.10.R1 |
| Platforms | All |

### [**url**] *(sat-url | cflash-url | string-not-all-spaces | ftp-url)*

| | |
|---|---|
| Synopsis | Location of the directory to be listed |
| Context | file list [url] *(sat-url | cflash-url | string-not-all-spaces | ftp-url)* |
| Tree | [url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 180 (*ftp-url*) |
| Default | . |
| Introduced | 20.10.R1 |
| Platforms | All |

## make-directory

| | |
|---|---|
| Synopsis | Make a directory |
| Context | file make-directory |
| Tree | make-directory |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**url**] *(sat-url | cflash-url | string-not-all-spaces | ftp-url)*

| | |
|---|---|
| Synopsis | Directory location |
| Context | file make-directory [url] *(sat-url | cflash-url | string-not-all-spaces | ftp-url)* |
| Tree | [url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 180 (*ftp-url*) |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

## move

| | |
|---|---|
| Synopsis | Move or rename files or directories |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | file move |
| Tree | move |
| Introduced | 20.10.R1 |
| Platforms | All |

### **client-tls-profile** *string*

| | |
|---|---|
| Synopsis | Connect over HTTP with a client TLS profile |
| Context | file move client-tls-profile *string* |
| Tree | client-tls-profile |
| String length | 1 to 32 |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**destination-url**] *(sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-url* | *http-url-loose)*

| | |
|---|---|
| Synopsis | Destination URL or '.' for the working directory |
| Context | file move [destination-url] *(sat-url* \| *cflash-url* \| *string-not-all-spaces* \| *ftp-url* \| *http-url-loose)* |
| Tree | [destination-url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 180 (*ftp-url*, *http-url-loose*) |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

### **direct-http**

| | |
|---|---|
| Synopsis | Allow direct HTTP connection, do not follow redirects |
| Context | file move direct-http |
| Tree | direct-http |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### force

| | |
|---|---|
| Synopsis | Force move without prompting before overwriting |
| Context | file move force |
| Tree | force |
| Introduced | 20.10.R1 |
| Platforms | All |

### proxy *http-url*

| | |
|---|---|
| Synopsis | Connect over HTTP with a proxy |
| Context | file move proxy *http-url* |
| Tree | proxy |
| String length | 1 to 255 |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**source-url**] *(sat-url | cflash-url | string-not-all-spaces | ftp-url | http-url-loose)*

| | |
|---|---|
| Synopsis | Source URL |
| Context | file move [source-url] *(sat-url \| cflash-url \| string-not-all-spaces \| ftp-url \| http-url-loose)* |
| Tree | [source-url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 180 (*ftp-url*, *http-url-loose*) |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

### permission

| | |
|---|---|
| Synopsis | Show or set file permissions |
| Context | file permission |
| Tree | permission |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### [**attribute**] *keyword*

| | |
|---|---|
| Synopsis | File permission |
| Context | file permission [attribute] *keyword* |
| Tree | [attribute] |
| Options | read-only, read-write |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**url**] *(sat-url | cflash-url | string-not-all-spaces)*

| | |
|---|---|
| Synopsis | File URL to set permissions |
| Context | file permission [url] *(sat-url | cflash-url | string-not-all-spaces)* |
| Tree | [url] |
| String length | 1 to 200 |
| Introduced | 20.10.R1 |
| Platforms | All |

### **remove**

| | |
|---|---|
| Synopsis | Remove files |
| Context | file remove |
| Tree | remove |
| Introduced | 20.10.R1 |
| Platforms | All |

### **client-tls-profile** *string*

| | |
|---|---|
| Synopsis | Connect over HTTP with a client TLS profile |
| Context | file remove client-tls-profile *string* |
| Tree | client-tls-profile |
| String length | 1 to 32 |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### direct-http

| | |
|---|---|
| Synopsis | Allow direct HTTP connection, do not follow redirects |
| Context | file remove direct-http |
| Tree | direct-http |
| Introduced | 20.10.R1 |
| Platforms | All |

### force

| | |
|---|---|
| Synopsis | Force removal without prompting |
| Context | file remove force |
| Tree | force |
| Introduced | 20.10.R1 |
| Platforms | All |

### **proxy** *http-url*

| | |
|---|---|
| Synopsis | Connect over HTTP with a proxy |
| Context | file remove proxy *http-url* |
| Tree | proxy |
| String length | 1 to 255 |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**url**] *(sat-url | cflash-url | string-not-all-spaces | ftp-url | http-url-loose)*

| | |
|---|---|
| Synopsis | File URL |
| Context | file remove [url] *(sat-url | cflash-url | string-not-all-spaces | ftp-url | http-url-loose)* |
| Tree | [url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 180 (*ftp-url*, *http-url-loose*) |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.

### remove-directory

| | |
|---|---|
| Synopsis | Remove directories |
| Context | file remove-directory |
| Tree | remove-directory |
| Introduced | 20.10.R1 |
| Platforms | All |

### force

| | |
|---|---|
| Synopsis | Force removal without prompting |
| Context | file remove-directory force |
| Tree | force |
| Introduced | 20.10.R1 |
| Platforms | All |

### recursive

| | |
|---|---|
| Synopsis | Remove directory and contents recursively |
| Context | file remove-directory recursive |
| Tree | recursive |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**url**] *(sat-url* | *cflash-url* | *string-not-all-spaces* | *ftp-url)*

| | |
|---|---|
| Synopsis | Directory URL |
| Context | file remove-directory [url] *(sat-url* \| *cflash-url* \| *string-not-all-spaces* \| *ftp-url)* |
| Tree | [url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 180 (*ftp-url*) |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### repair

| | |
|---|---|
| Synopsis | Repair a compact flash file system |
| Context | file repair |
| Tree | repair |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**cflash-id**] *cflash-id*

| | |
|---|---|
| Synopsis | Compact flash ID |
| Context | file repair [cflash-id] *cflash-id* |
| Tree | [cflash-id] |
| String length | 4 to 6 |
| Introduced | 20.10.R1 |
| Platforms | All |

### show

| | |
|---|---|
| Synopsis | Display the contents of a file |
| Context | file show |
| Tree | show |
| Introduced | 20.10.R1 |
| Platforms | All |

### client-tls-profile *string*

| | |
|---|---|
| Synopsis | Connect over HTTP with a client TLS profile |
| Context | file show client-tls-profile *string* |
| Tree | client-tls-profile |
| String length | 1 to 32 |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### direct-http

| | |
|---|---|
| Synopsis | Allow direct HTTP connection, do not follow redirects |
| Context | file show direct-http |
| Tree | direct-http |
| Introduced | 20.10.R1 |
| Platforms | All |

### proxy *http-url*

| | |
|---|---|
| Synopsis | Connect over HTTP with a proxy |
| Context | file show proxy *http-url* |
| Tree | proxy |
| String length | 1 to 255 |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**url**] *(sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-url-loose)*

| | |
|---|---|
| Synopsis | File URL |
| Context | file show [url] *(sat-url* \| *cflash-url* \| *string-not-all-spaces* \| *ftp-tftp-url* \| *http-url-loose)* |
| Tree | [url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 199 (*ftp-tftp-url*)<br>1 to 180 (*http-url-loose*) |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

### unzip

| | |
|---|---|
| Synopsis | Unzip files |
| Context | file unzip |
| Tree | unzip |
| Introduced | 20.10.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | All |

### create-destination

| | |
|---|---|
| Synopsis | Create destination directory if it does not exist |
| Context | file unzip create-destination |
| Tree | create-destination |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**destination-url**] *(sat-url | cflash-url | string-not-all-spaces)*

| | |
|---|---|
| Synopsis | Destination URL or '.' for the working directory |
| Context | file unzip [destination-url] *(sat-url | cflash-url | string-not-all-spaces)* |
| Tree | [destination-url] |
| String length | 1 to 200 |
| Introduced | 20.10.R1 |
| Platforms | All |

### force

| | |
|---|---|
| Synopsis | Force the unzip operation without prompting |
| Context | file unzip force |
| Tree | force |
| Description | When configured, files and directories that already exist in the destination URL are overwritten without prompting.<br>The system does not automatically create directories explicitly specified by the destination URL. To allow the system to create new directories, use the **create-destination** command.<br>When unconfigured, the system prompts the user before overwriting a file or directory. |
| Notes | The following elements are part of a choice: **force** or **list**. |
| Introduced | 20.10.R1 |
| Platforms | All |

### list

| | |
|---|---|
| Synopsis | List the file contents without the unzip operation |
| Context | file unzip list |
| Tree | list |
| Notes | The following elements are part of a choice: **force** or **list**. |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**source-url**] *(sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url | http-url-loose)*

| | |
|---|---|
| Synopsis | Source URL |
| Context | file unzip [source-url] *(sat-url* \| *cflash-url* \| *string-not-all-spaces* \| *ftp-tftp-url* \| *http-url-loose)* |
| Tree | [source-url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*)<br>1 to 199 (*ftp-tftp-url*)<br>1 to 180 (*http-url-loose*) |
| Notes | This element is mandatory. |
| Introduced | 20.10.R1 |
| Platforms | All |

### version

| | |
|---|---|
| Synopsis | Display the version of an SR OS image file |
| Context | file version |
| Tree | version |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**url**] *(sat-url | cflash-url | string-not-all-spaces | ftp-tftp-url)*

| | |
|---|---|
| Synopsis | File URL |
| Context | file version [url] *(sat-url* \| *cflash-url* \| *string-not-all-spaces* \| *ftp-tftp-url)* |
| Tree | [url] |
| String length | 1 to 200 (*sat-url*, *cflash-url*, *string-not-all-spaces*) |

## 2.4 Global commands

Global commands are used for operational functions, such as entering configuration sessions, navigating the CLI, executing OAM commands, and logging into remote hosts.

```
– back number
– bof
  – exclusive
  – private
  – read-only
– configure
  – exclusive
  – global
  – private
  – read-only
– debug
  – exclusive
  – private
  – read-only
– delete instance-id
– edit-config
  – bof
  – debug
  – exclusive
  – global
  – li
  – private
  – read-only
– enable
– exec string
  – echo
– exit
  – all
– history
  – all
  – commands-only
– info keyword
  – [cli-path] cli-path-type
  – converted
  – depth number
  – detail
  – differences
  – flat
  – full-context
  – inheritance
  – json
  – model keyword
  – units
  – values
  – xml
– li
  – exclusive
  – private
  – read-only
– logout
– oam
  – efm
    – local-loopback
      – [action] keyword
      – port-id port
    – remote-loopback
```

oam efm remote-loopback [action]

```
            – [action] keyword
            – port-id port
      – eth-cfm
         – eth-test
            – data-length number
            – [destination] (mac-unicast-address-no-zero | number)
            – ma-admin-name reference
            – md-admin-name reference
            – mep-id number
            – priority number
         – linktrace
            – [destination] (mac-unicast-address-no-zero | number)
            – ma-admin-name reference
            – md-admin-name reference
            – mep-id number
            – ttl number
         – loopback
            – [destination] (mac-unicast-address-no-zero | keyword | number)
            – interval number
            – lbm-padding number
            – ma-admin-name reference
            – md-admin-name reference
            – mep-id number
            – priority number
            – send-count number
            – size number
            – timeout number
         – one-way-delay-test
            – [destination] (mac-unicast-address-no-zero | number)
            – ma-admin-name reference
            – md-admin-name reference
            – mep-id number
            – priority number
         – two-way-delay-test
            – [destination] (mac-unicast-address-no-zero | number)
            – ma-admin-name reference
            – md-admin-name reference
            – mep-id number
            – priority number
         – two-way-slm-test
            – [destination] (mac-unicast-address-no-zero | number)
            – interval (number | decimal-number)
            – ma-admin-name reference
            – md-admin-name reference
            – mep-id number
            – priority number
            – send-count number
            – size number
            – timeout number
      – lsp-ping
         – bgp-label
            – fc keyword
            – interface reference
            – interval number
            – next-hop (ipv4-address-no-zone | ipv6-address-no-zone)
            – path-destination (ipv4-address-no-zone | ipv6-address-no-zone)
            – prefix (ipv4-prefix | ipv6-prefix)
            – profile keyword
            – send-count number
            – size number

## 2.4.1 Global command descriptions

### **back** [levels] *number*

| | |
|---|---|
| Synopsis | Move back one or more levels |
| Context | back *number* |
| Tree | back |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**levels**] *number*

| | |
|---|---|
| Synopsis | Number of levels to move up |
| Context | back *number* |
| Tree | back |
| Range | 1 to 4294967295 |
| MD-CLI default | 1 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

### **bof**

| | |
|---|---|
| Synopsis | Enter a candidate configuration mode |
| Context | bof |
| Tree | bof |
| Introduced | 20.10.R1 |
| Platforms | All |

### **exclusive**

| | |
|---|---|
| Synopsis | Enter exclusive configuration mode |
| Context | bof exclusive |
| Tree | exclusive |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 20.10.R1 |
| Platforms | All |

## private

| | |
|---|---|
| Synopsis | Enter private configuration mode |
| Context | bof private |
| Tree | private |
| Introduced | 20.10.R1 |
| Platforms | All |

## read-only

| | |
|---|---|
| Synopsis | Enter read-only configuration mode |
| Context | bof read-only |
| Tree | read-only |
| Introduced | 20.10.R1 |
| Platforms | All |

## configure

| | |
|---|---|
| Synopsis | Enter a candidate configuration mode |
| Context | configure |
| Tree | configure |
| Introduced | 16.0.R2 |
| Platforms | All |

## exclusive

| | |
|---|---|
| Synopsis | Enter exclusive configuration mode |
| Context | configure exclusive |
| Tree | exclusive |
| Introduced | 16.0.R2 |
| Platforms | All |

## global

| | |
|---|---|
| Synopsis | Enter global configuration mode |
| Context | configure global |
| Tree | global |
| Introduced | 16.0.R2 |
| Platforms | All |

## private

| | |
|---|---|
| Synopsis | Enter private configuration mode |
| Context | configure private |
| Tree | private |
| Introduced | 16.0.R4 |
| Platforms | All |

## read-only

| | |
|---|---|
| Synopsis | Enter read-only configuration mode |
| Context | configure read-only |
| Tree | read-only |
| Introduced | 16.0.R2 |
| Platforms | All |

## debug

| | |
|---|---|
| Synopsis | Enter a candidate configuration mode |
| Context | debug |
| Tree | debug |
| Introduced | 21.5.R1 |
| Platforms | All |

## exclusive

| | |
|---|---|
| Synopsis | Enter exclusive configuration mode |

## global

| | |
|---|---|
| Synopsis | Enter global configuration mode |
| Context | edit-config global |
| Tree | global |
| Introduced | 16.0.R1 |
| Platforms | All |

## li

| | |
|---|---|
| Synopsis | Enter the li configuration context |
| Context | edit-config li |
| Tree | li |
| Introduced | 19.10.R1 |
| Platforms | All |

## private

| | |
|---|---|
| Synopsis | Enter private configuration mode |
| Context | edit-config private |
| Tree | private |
| Introduced | 16.0.R4 |
| Platforms | All |

## read-only

| | |
|---|---|
| Synopsis | Enter read-only configuration mode |
| Context | edit-config read-only |
| Tree | read-only |
| Introduced | 16.0.R1 |
| Platforms | All |

## enable

| | |
|---|---|
| Synopsis | Enable administrative mode |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | enable |
| Tree | enable |
| Introduced | 20.2.R1 |
| Platforms | All |

### **exec** [url] *string*

| | |
|---|---|
| Synopsis | Execute commands from a file |
| Context | exec *string* |
| Tree | exec |
| Description | The **exec** command should not be used to execute configuration files. Use the **load** command instead. |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**url**] *string*

| | |
|---|---|
| Synopsis | Location of the file to be executed |
| Context | exec *string* |
| Tree | exec |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

### **echo**

| | |
|---|---|
| Synopsis | Display the commands as they are being executed |
| Context | exec *string* echo |
| Tree | echo |
| Introduced | 16.0.R1 |
| Platforms | All |

### **exit**

| | |
|---|---|
| Synopsis | Return to the previous context or to operational root |

© 2024 Nokia.

| | |
|---|---|
| Platforms | All |

### **info** [from] *keyword*

| | |
|---|---|
| Synopsis | Show the information under the present working context |
| Context | info *keyword* |
| Tree | info |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**from**] *keyword*

| | |
|---|---|
| Synopsis | Source datastore |
| Context | info *keyword* |
| Tree | info |
| Description | This command specifies the source datastore. This option is not supported for **state** elements. |
| Options | candidate – The candidate datastore<br>running – The running datastore<br>baseline – The baseline candidate configuration<br>intended – The intended datastore |
| MD-CLI default | candidate |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**cli-path**] *cli-path-type*

| | |
|---|---|
| Synopsis | Absolute path or relative path from pwc |
| Context | info *keyword* [cli-path] *cli-path-type* |
| Tree | [cli-path] |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

## converted

| | |
|---|---|
| Synopsis | Include converted third-party model configuration from the running datastore |
| Context | info *keyword* converted |
| Tree | converted |
| Description | This option specifies the inclusion of converted configuration values from third-party models in the output and is only available when **configure system management-interface yang-modules openconfig-modules** is set to **true**.<br>This option should only be used in the **configure** region when third-party models are used. The output with this option is the same as **info** when used in other configuration regions.<br>This option is not supported for **state** elements. |
| Introduced | 16.0.R1 |
| Platforms | All |

## depth *number*

| | |
|---|---|
| Synopsis | Depth limit from the pwc |
| Context | info *keyword* depth *number* |
| Tree | depth |
| Range | 1 to 4294967040 |
| Introduced | 23.10.R1 |
| Platforms | All |

## detail

| | |
|---|---|
| Synopsis | Include default and unconfigured values |
| Context | info *keyword* detail |
| Tree | detail |
| Introduced | 16.0.R1 |
| Platforms | All |

## differences

| | |
|---|---|
| Synopsis | Show the different values each model tries to set |
| Context | info *keyword* differences |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | differences |
| Description | When specified, this command shows only the values that are different when multiple models try to set the same configuration element.<br>This option is supported only with the **converted** option and is available only when **configure system management-interface yang-modules openconfig-modules** is set to **true**.<br>This option is not supported for **state** elements. |
| Notes | The following elements are part of a choice: **differences**, **model**, or **values**. |
| Introduced | 23.3.R1 |
| Platforms | All |

## flat

| | |
|---|---|
| Synopsis | Show the context from the pwc on each line |
| Context | info *keyword* flat |
| Tree | flat |
| Description | This option shows the hierarchy on each line starting from the present working context. |
| Notes | The following elements are part of a choice: **flat**, **json**, or **xml**. |
| Introduced | 16.0.R1 |
| Platforms | All |

## full-context

| | |
|---|---|
| Synopsis | Show the full context on each line |
| Context | info *keyword* full-context |
| Tree | full-context |
| Introduced | 16.0.R1 |
| Platforms | All |

## inheritance

| | |
|---|---|
| Synopsis | Include configuration inherited from configuration groups |
| Context | info *keyword* inheritance |
| Tree | inheritance |
| Description | This option specifies the inclusion of configuration inherited from configuration groups in the output. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

This option should only be used in the **configure** region when configuration groups are used. The output with this option is the same as **info** when used in other configuration regions.

This option is not supported for **state** elements.

Introduced 16.0.R1

Platforms All

## json

Synopsis Show the output in indented JSON IETF format

Context info *keyword* json

Tree json

Notes The following elements are part of a choice: **flat**, **json**, or **xml**.

Introduced 19.10.R1

Platforms All

## model *keyword*

Synopsis Data model for which to display converted output

Context info *keyword* model *keyword*

Tree model

Description This option specifies the data model for which to display the converted output.

This option is supported only with the **converted** option and is available only when **configure system management-interface yang-modules openconfig-modules** is set to **true**.

This option is not supported for **state** elements.

Options all – All models
openconfig – OpenConfig models

Default all

Notes The following elements are part of a choice: **differences**, **model**, or **values**.

Introduced 20.7.R1

Platforms All

## units

Synopsis Include unit types for applicable elements

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **ma-admin-name** *reference*

| | |
|---|---|
| Synopsis | Association name |
| Context | oam eth-cfm eth-test ma-admin-name *reference* |
| Tree | ma-admin-name |
| Reference | **state eth-cfm domain** *admin-name* **association** *admin-name* |
| Notes | This element is mandatory. |
| Introduced | 20.2.R1 |
| Platforms | All |

### **md-admin-name** *reference*

| | |
|---|---|
| Synopsis | Domain name |
| Context | oam eth-cfm eth-test md-admin-name *reference* |
| Tree | md-admin-name |
| Reference | **state eth-cfm domain** *admin-name* |
| Notes | This element is mandatory. |
| Introduced | 20.2.R1 |
| Platforms | All |

### **mep-id** *number*

| | |
|---|---|
| Synopsis | Local Maintenance Association Endpoint (MEP) ID |
| Context | oam eth-cfm eth-test mep-id *number* |
| Tree | mep-id |
| Range | 1 to 8191 |
| Notes | This element is mandatory. |
| Introduced | 20.2.R1 |
| Platforms | All |

### **priority** *number*

| | |
|---|---|
| Synopsis | Frame priority that can be manipulated by QoS policies |
| Context | oam eth-cfm eth-test priority *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | priority |
| Range | 0 to 7 |
| Default | 7 |
| Introduced | 20.2.R1 |
| Platforms | All |

### linktrace

| | |
|---|---|
| Synopsis | Initiate a linktrace test |
| Context | oam eth-cfm linktrace |
| Tree | linktrace |
| Introduced | 20.2.R1 |
| Platforms | All |

### [**destination**] *(mac-unicast-address-no-zero* | *number)*

| | |
|---|---|
| Synopsis | Destination MAC address or remote MEP ID of the peer |
| Context | oam eth-cfm linktrace [destination] *(mac-unicast-address-no-zero* \| *number)* |
| Tree | [destination] |
| Range | 1 to 8191 |
| Notes | This element is mandatory. |
| Introduced | 20.2.R1 |
| Platforms | All |

### **ma-admin-name** *reference*

| | |
|---|---|
| Synopsis | Association name |

| Synopsis | Domain name |
| Context | oam eth-cfm linktrace md-admin-name *reference* |
| Tree | md-admin-name |
| Reference | **state eth-cfm domain** *admin-name* |
| Notes | This element is mandatory. |
| Introduced | 20.2.R1 |
| Platforms | All |

### **mep-id** *number*

| | |
|---|---|
| Synopsis | Local Maintenance Association Endpoint (MEP) ID |
| Context | oam eth-cfm linktrace mep-id *number* |
| Tree | mep-id |
| Range | 1 to 8191 |
| Notes | This element is mandatory. |
| Introduced | 20.2.R1 |
| Platforms | All |

### **ttl** *number*

| | |
|---|---|
| Synopsis | Time to live for a returned linktrace |
| Context | oam eth-cfm linktrace ttl *number* |
| Tree | ttl |
| Range | 0 to 255 |
| Default | 64 |
| Introduced | 20.2.R1 |
| Platforms | All |

### **loopback**

| | |
|---|---|
| Synopsis | Initiate a loopback test |
| Context | oam eth-cfm loopback |
| Tree | loopback |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 20.2.R1 |
| Platforms | All |

### [**destination**] *(mac-unicast-address-no-zero | keyword | number)*

| | |
|---|---|
| Synopsis | Destination MAC address or remote MEP ID of the peer |
| Context | oam eth-cfm loopback [destination] *(mac-unicast-address-no-zero \| keyword \| number)* |
| Tree | [destination] |
| Range | 1 to 8191 |
| Options | multicast – Class one destination multicast address based on the level of the local MEP |
| Notes | This element is mandatory. |
| Introduced | 20.2.R1 |
| Platforms | All |

### **interval** *number*

| | |
|---|---|
| Synopsis | Time between probes within the test run |
| Context | oam eth-cfm loopback interval *number* |
| Tree | interval |
| Range | 0 to 600 |
| Units | deciseconds |
| Default | 0 |
| Introduced | 20.2.R1 |
| Platforms | All |

### **lbm-padding** *number*

| | |
|---|---|
| Synopsis | Data portion size of the data TLV, no octet string |
| Context | oam eth-cfm loopback lbm-padding *number* |
| Tree | lbm-padding |
| Description | This command specifies the size of the data portion of the data TLV which does not allow for an optional octet string.<br>MSDU is not processed when setting is in use. A value of 0 means that no data TLV is added to the packet. This is specified with an octet string. This parameter and **size** are mutually exclusive. |
| Range | 0 \| 3 to 9778 |

### **priority** *number*

| | |
|---|---|
| Synopsis | Frame priority that can be manipulated by QoS policies |
| Context | oam eth-cfm loopback priority *number* |
| Tree | priority |
| Range | 0 to 7 |
| Introduced | 20.2.R1 |
| Platforms | All |

### **send-count** *number*

| | |
|---|---|
| Synopsis | Number of loopback messages to send |
| Context | oam eth-cfm loopback send-count *number* |
| Tree | send-count |
| Range | 1 to 1024 |
| Default | 1 |
| Introduced | 20.2.R1 |
| Platforms | All |

### **size** *number*

| | |
|---|---|
| Synopsis | Data portion size of the data TLV, octet string allowed |
| Context | oam eth-cfm loopback size *number* |
| Tree | size |
| Description | This command specifies the size of the data portion of the data TLV allowing for an optional octet string to be included.<br>A value of 0 means that no data TLV is added to the packet. This parameter and **lbm-padding** are mutually exclusive. |
| Range | 0 to 1500 |
| Units | bytes |
| Default | 0 |
| Introduced | 20.2.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **timeout** *number*

| | |
|---|---|
| Synopsis | Wait time for a reply to a sent message request |
| Context | oam eth-cfm loopback timeout *number* |
| Tree | timeout |
| Description | This command specifies the time the router waits for a message reply after sending a message request.<br>Upon expiration of the timeout, the router assumes that the message response is not received. Any response received after the timeout is silently discarded. |
| Range | 1 to 10 |
| Units | seconds |
| Default | 5 |
| Introduced | 20.2.R1 |
| Platforms | All |

### **one-way-delay-test**

| | |
|---|---|
| Synopsis | Initiate a one-way delay test |
| Context | oam eth-cfm one-way-delay-test |
| Tree | one-way-delay-test |
| Introduced | 20.2.R1 |
| Platforms | All |

### [**destination**] *(mac-unicast-address-no-zero* | *number)*

| | |
|---|---|
| Synopsis | Destination MAC address or remote MEP ID of the peer |
| Context | oam eth-cfm one-way-delay-test [destination] *(mac-unicast-address-no-zero* \| *number)* |
| Tree | [destination] |
| Range | 1 to 8191 |
| Notes | This element is mandatory. |
| Introduced | 20.2.R1 |
| Platforms | All |

### sr-isis

| | |
|---|---|
| Synopsis | Perform an SR-ISIS LSP ping test |
| Context | oam lsp-ping sr-isis |
| Tree | sr-isis |
| Introduced | 23.3.R1 |
| Platforms | All |

### fc *keyword*

| | |
|---|---|
| Synopsis | QoS forwarding class for the sent echo request packet |
| Context | oam lsp-ping sr-isis fc *keyword* |
| Tree | fc |
| Options | be – Best effort<br>l2 – Low 2 (best effort)<br>af – Assured forwarding (assured)<br>l1 – Low 1 (assured)<br>h2 – High 2 (high priority)<br>ef – Expedited forwarding (high priority)<br>h1 – High 1 (high priority)<br>nc – Network control (high priority) |
| Default | be |
| Introduced | 23.3.R1 |
| Platforms | All |

### flex-algo *number*

| | |
|---|---|
| Synopsis | Segment Routing Flexible Algorithm for the test |
| Context | oam lsp-ping sr-isis flex-algo *number* |
| Tree | flex-algo |
| Range | 128 to 255 |
| Introduced | 23.7.R1 |

### **igp-instance** *number*

| | |
|---|---|
| Synopsis | IGP instance for the SR-ISIS test |
| Context | oam lsp-ping sr-isis igp-instance *number* |
| Tree | igp-instance |
| Range | 0 to 127 |
| Default | 0 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **interface** *reference*

| | |
|---|---|
| Synopsis | Egress router interface to use with path destination |
| Context | oam lsp-ping sr-isis interface *reference* |
| Tree | interface |
| Reference | **state router** *named-item-64* **interface** *interface-name* |
| Notes | The following elements are part of a choice: **interface** or **next-hop**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **interval** *number*

| | |
|---|---|
| Synopsis | Minimum time to expire before next echo request is sent |
| Context | oam lsp-ping sr-isis interval *number* |
| Tree | interval |
| Range | 1 to 10 |
| Units | seconds |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **next-hop** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Egress IP next hop address to use with path destination |
| Context | oam lsp-ping sr-isis next-hop *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | next-hop |
| Notes | The following elements are part of a choice: **interface** or **next-hop**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **path-destination** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | IP address of the path destination |
| Context | oam lsp-ping sr-isis path-destination *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | path-destination |
| Introduced | 23.3.R1 |
| Platforms | All |

### **prefix** *(ipv4-prefix | ipv6-prefix)*

| | |
|---|---|
| Synopsis | Destination IP prefix for the test |
| Context | oam lsp-ping sr-isis prefix *(ipv4-prefix \| ipv6-prefix)* |
| Tree | prefix |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **profile** *keyword*

| | |
|---|---|
| Synopsis | QoS profile for the transmitted echo request packets |
| Context | oam lsp-ping sr-isis profile *keyword* |
| Tree | profile |
| Options | in – In profile<br>out – Out of profile |
| Default | out |
| Introduced | 23.3.R1 |

### **send-count** *number*

| | |
|---|---|
| Synopsis | Number of echo request packets to send |
| Context | oam lsp-ping sr-isis send-count *number* |
| Tree | send-count |
| Range | 1 to 100 |
| Units | packets |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **size** *number*

| | |
|---|---|
| Synopsis | Echo request packet pad size |
| Context | oam lsp-ping sr-isis size *number* |
| Tree | size |
| Range | 1 to 9786 |
| Units | bytes |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **source-ip-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Source IP address |
| Context | oam lsp-ping sr-isis source-ip-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | source-ip-address |
| Introduced | 23.3.R1 |
| Platforms | All |

### **timeout** *number*

| | |
|---|---|
| Synopsis | Time to wait for a reply after sending an echo request |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | oam lsp-ping sr-isis timeout *number* |
| Tree | timeout |
| Range | 1 to 10 |
| Units | seconds |
| Default | 5 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **ttl** *number*

| | |
|---|---|
| Synopsis | TTL value for the MPLS label of the echo request |
| Context | oam lsp-ping sr-isis ttl *number* |
| Tree | ttl |
| Range | 1 to 255 |
| Default | 255 |
| Introduced | 23.3.R1 |
| Platforms | All |

## sr-ospf

| | |
|---|---|
| Synopsis | Perform an SR-OSPF LSP ping test |
| Context | oam lsp-ping sr-ospf |
| Tree | sr-ospf |
| Introduced | 23.3.R1 |
| Platforms | All |

### **fc** *keyword*

| | |
|---|---|
| Synopsis | QoS forwarding class for the sent echo request packet |
| Context | oam lsp-ping sr-ospf fc *keyword* |
| Tree | fc |
| Options | be – Best effort<br>l2 – Low 2 (best effort)<br>af – Assured forwarding (assured)<br>l1 – Low 1 (assured)<br>h2 – High 2 (high priority)<br>ef – Expedited forwarding (high priority) |

|---|---|
| Synopsis | Name of the MPLS path to test |
| Context | oam lsp-ping sr-te path *reference* |
| Tree | path |
| Reference | **state router** *named-item-64* **mpls path** *named-item-64* |
| Introduced | 23.3.R1 |
| Platforms | All |

### **path-destination** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | IP address of the path destination |
| Context | oam lsp-ping sr-te path-destination *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | path-destination |
| Introduced | 23.3.R1 |
| Platforms | All |

### **profile** *keyword*

| | |
|---|---|
| Synopsis | QoS profile for the transmitted echo request packets |
| Context | oam lsp-ping sr-te profile *keyword* |
| Tree | profile |
| Options | in – In profile<br>out – Out of profile |
| Default | out |
| Introduced | 23.3.R1 |
| Platforms | All |

### **send-count** *number*

| | |
|---|---|
| Synopsis | Number of echo request packets to send |
| Context | oam lsp-ping sr-te send-count *number* |
| Tree | send-count |
| Range | 1 to 100 |
| Units | packets |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **size** *number*

| | |
|---|---|
| Synopsis | Echo request packet pad size |
| Context | oam lsp-ping sr-te size *number* |
| Tree | size |
| Range | 1 to 9786 |
| Units | bytes |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **source-ip-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Source IP address |
| Context | oam lsp-ping sr-te source-ip-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | source-ip-address |
| Introduced | 23.3.R1 |
| Platforms | All |

### **timeout** *number*

| | |
|---|---|
| Synopsis | Time to wait for a reply after sending an echo request |
| Context | oam lsp-ping sr-te timeout *number* |
| Tree | timeout |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Range | 1 to 10 |
| Units | seconds |
| Default | 5 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **ttl** *number*

| | |
|---|---|
| Synopsis | TTL value for the MPLS label of the echo request |
| Context | oam lsp-ping sr-te ttl *number* |
| Tree | ttl |
| Range | 1 to 255 |
| Default | 255 |
| Introduced | 23.3.R1 |
| Platforms | All |

### lsp-trace

| | |
|---|---|
| Synopsis | Perform a Label Switched Path (LSP) trace test |
| Context | oam lsp-trace |
| Tree | lsp-trace |
| Introduced | 23.3.R1 |
| Platforms | All |

### bgp-label

| | |
|---|---|
| Synopsis | Perform a BGP-label LSP trace test |
| Context | oam lsp-trace bgp-label |
| Tree | bgp-label |
| Description | This option performs an LSP trace test using Target FEC Stack sub-type "BGP labeled IPv4 prefix". |
| Introduced | 23.3.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **downstream-map-tlv** *keyword*

| | |
|---|---|
| Synopsis | Type of downstream mapping TLV in MPLS echo request PDU |
| Context | oam lsp-trace bgp-label downstream-map-tlv *keyword* |
| Tree | downstream-map-tlv |
| Options | dsmap – Downstream Mapping TLV<br>ddmap – Downstream Detailed Mapping TLV<br>none – No mapping TLV |
| Introduced | 23.3.R1 |
| Platforms | All |

### **fc** *keyword*

| | |
|---|---|
| Synopsis | QoS forwarding class for the sent echo request packet |
| Context | oam lsp-trace bgp-label fc *keyword* |
| Tree | fc |
| Options | be – Best effort<br>l2 – Low 2 (best effort)<br>af – Assured forwarding (assured)<br>l1 – Low 1 (assured)<br>h2 – High 2 (high priority)<br>ef – Expedited forwarding (high priority)<br>h1 – High 1 (high priority)<br>nc – Network control (high priority) |
| Default | be |
| Introduced | 23.3.R1 |
| Platforms | All |

### **interface** *reference*

| | |
|---|---|
| Synopsis | Egress router interface to use with path destination |
| Context | oam lsp-trace bgp-label interface *reference* |
| Tree | interface |
| Reference | **state router** *named-item-64* **interface** *interface-name* |
| Notes | The following elements are part of a choice: **interface** or **next-hop**. |
| Introduced | 23.3.R1 |
| Platforms | All |

© 2024 Nokia.

### **interval** *number*

| | |
|---|---|
| Synopsis | Minimum time to expire before next echo request is sent |
| Context | oam lsp-trace bgp-label interval *number* |
| Tree | interval |
| Range | 1 to 10 |
| Units | seconds |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **max-fail** *number*

| | |
|---|---|
| Synopsis | Maximum consecutive timeouts before terminating test |
| Context | oam lsp-trace bgp-label max-fail *number* |
| Tree | max-fail |
| Range | 1 to 255 |
| Default | 5 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **max-ttl** *number*

| | |
|---|---|
| Synopsis | Maximum TTL |
| Context | oam lsp-trace bgp-label max-ttl *number* |
| Tree | max-ttl |
| Range | 1 to 255 |
| Default | 30 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **min-ttl** *number*

| | |
|---|---|
| Synopsis | Initial TTL for the test |
| Context | oam lsp-trace bgp-label min-ttl *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | min-ttl |
| Range | 1 to 255 |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **next-hop** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Egress IP next hop address to use with path destination |
| Context | oam lsp-trace bgp-label next-hop *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | next-hop |
| Notes | The following elements are part of a choice: **interface** or **next-hop**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **output-format** *keyword*

| | |
|---|---|
| Synopsis | Output format for the result |
| Context | oam lsp-trace bgp-label output-format *keyword* |
| Tree | output-format |
| Options | summary, detail |
| Default | summary |
| Introduced | 23.3.R1 |
| Platforms | All |

### **path-destination** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | IP address of the path destination |
| Context | oam lsp-trace bgp-label path-destination *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | path-destination |
| Introduced | 23.3.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **prefix** *(ipv4-prefix | ipv6-prefix)*

| | |
|---|---|
| Synopsis | Destination IP prefix for the test |
| Context | oam lsp-trace bgp-label prefix *(ipv4-prefix \| ipv6-prefix)* |
| Tree | prefix |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **probe-count** *number*

| | |
|---|---|
| Synopsis | Number of OAM trace probes to send per TTL |
| Context | oam lsp-trace bgp-label probe-count *number* |
| Tree | probe-count |
| Range | 1 to 10 |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **profile** *keyword*

| | |
|---|---|
| Synopsis | QoS profile for the transmitted echo request packets |
| Context | oam lsp-trace bgp-label profile *keyword* |
| Tree | profile |
| Options | in – In profile<br>out – Out of profile |
| Default | out |
| Introduced | 23.3.R1 |
| Platforms | All |

### **size** *number*

| | |
|---|---|
| Synopsis | Echo request packet pad size |
| Context | oam lsp-trace bgp-label size *number* |
| Tree | size |

| | |
|---|---|
| Tree | min-ttl |
| Range | 1 to 255 |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **next-hop** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Egress IP next hop address to use with path destination |
| Context | oam lsp-trace sr-isis next-hop *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | next-hop |
| Notes | The following elements are part of a choice: **interface** or **next-hop**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **output-format** *keyword*

| | |
|---|---|
| Synopsis | Output format for the result |
| Context | oam lsp-trace sr-isis output-format *keyword* |
| Tree | output-format |
| Options | summary, detail |
| Default | summary |
| Introduced | 23.3.R1 |
| Platforms | All |

### **path-destination** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | IP address of the path destination |
| Context | oam lsp-trace sr-isis path-destination *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | path-destination |
| Introduced | 23.3.R1 |
| Platforms | All |

© 2024 Nokia.

### **prefix** *(ipv4-prefix | ipv6-prefix)*

| | |
|---|---|
| Synopsis | Destination IP prefix for the test |
| Context | oam lsp-trace sr-isis prefix *(ipv4-prefix \| ipv6-prefix)* |
| Tree | prefix |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **probe-count** *number*

| | |
|---|---|
| Synopsis | Number of OAM trace probes to send per TTL |
| Context | oam lsp-trace sr-isis probe-count *number* |
| Tree | probe-count |
| Range | 1 to 10 |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **profile** *keyword*

| | |
|---|---|
| Synopsis | QoS profile for the transmitted echo request packets |
| Context | oam lsp-trace sr-isis profile *keyword* |
| Tree | profile |
| Options | in – In profile<br>out – Out of profile |
| Default | out |
| Introduced | 23.3.R1 |
| Platforms | All |

### **size** *number*

| | |
|---|---|
| Synopsis | Echo request packet pad size |
| Context | oam lsp-trace sr-isis size *number* |
| Tree | size |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Range | 1 to 9786 |
| Units | bytes |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **source-ip-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Source IP address |
| Context | oam lsp-trace sr-isis source-ip-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | source-ip-address |
| Introduced | 23.3.R1 |
| Platforms | All |

### **timeout** *number*

| | |
|---|---|
| Synopsis | Time to wait for a reply after sending an echo request |
| Context | oam lsp-trace sr-isis timeout *number* |
| Tree | timeout |
| Range | 1 to 10 |
| Units | seconds |
| Default | 5 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **sr-ospf**

| | |
|---|---|
| Synopsis | Perform an SR-OSPF LSP trace test |
| Context | oam lsp-trace sr-ospf |
| Tree | sr-ospf |
| Introduced | 23.3.R1 |
| Platforms | All |

© 2024 Nokia.

### **downstream-map-tlv** *keyword*

| | |
|---|---|
| Synopsis | Type of downstream mapping TLV in MPLS echo request PDU |
| Context | oam lsp-trace sr-ospf downstream-map-tlv *keyword* |
| Tree | downstream-map-tlv |
| Options | dsmap – Downstream Mapping TLV<br>ddmap – Downstream Detailed Mapping TLV<br>none – No mapping TLV |
| Introduced | 23.3.R1 |
| Platforms | All |

### **fc** *keyword*

| | |
|---|---|
| Synopsis | QoS forwarding class for the sent echo request packet |
| Context | oam lsp-trace sr-ospf fc *keyword* |
| Tree | fc |
| Options | be – Best effort<br>l2 – Low 2 (best effort)<br>af – Assured forwarding (assured)<br>l1 – Low 1 (assured)<br>h2 – High 2 (high priority)<br>ef – Expedited forwarding (high priority)<br>h1 – High 1 (high priority)<br>nc – Network control (high priority) |
| Default | be |
| Introduced | 23.3.R1 |
| Platforms | All |

### **flex-algo** *number*

| | |
|---|---|
| Synopsis | Segment Routing Flexible Algorithm for the test |
| Context | oam lsp-trace sr-ospf flex-algo *number* |
| Tree | flex-algo |
| Range | 128 to 255 |
| Introduced | 23.7.R1 |
| Platforms | All |

### **igp-instance** *number*

| | |
|---|---|
| Synopsis | IGP instance for the SR-OSPF test |
| Context | oam lsp-trace sr-ospf igp-instance *number* |
| Tree | igp-instance |
| Range | 0 to 31 |
| Default | 0 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **interface** *reference*

| | |
|---|---|
| Synopsis | Egress router interface to use with path destination |
| Context | oam lsp-trace sr-ospf interface *reference* |
| Tree | interface |
| Reference | **state router** *named-item-64* **interface** *interface-name* |
| Notes | The following elements are part of a choice: **interface** or **next-hop**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **interval** *number*

| | |
|---|---|
| Synopsis | Minimum time to expire before next echo request is sent |
| Context | oam lsp-trace sr-ospf interval *number* |
| Tree | interval |
| Range | 1 to 10 |
| Units | seconds |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **max-fail** *number*

| | |
|---|---|
| Synopsis | Maximum consecutive timeouts before terminating test |
| Context | oam lsp-trace sr-ospf max-fail *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | max-fail |
| Range | 1 to 255 |
| Default | 5 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **max-ttl** *number*

| | |
|---|---|
| Synopsis | Maximum TTL |
| Context | oam lsp-trace sr-ospf max-ttl *number* |
| Tree | max-ttl |
| Range | 1 to 255 |
| Default | 30 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **min-ttl** *number*

| | |
|---|---|
| Synopsis | Initial TTL for the test |
| Context | oam lsp-trace sr-ospf min-ttl *number* |
| Tree | min-ttl |
| Range | 1 to 255 |
| Default | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **next-hop** *ipv4-address*

| | |
|---|---|
| Synopsis | Egress IP next hop address to use with path destination |
| Context | oam lsp-trace sr-ospf next-hop *ipv4-address* |
| Tree | next-hop |
| Notes | The following elements are part of a choice: **interface** or **next-hop**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **output-format** *keyword*

| | |
|---|---|
| Synopsis | Output format for the result |
| Context | oam lsp-trace sr-ospf output-format *keyword* |
| Tree | output-format |
| Options | summary, detail |
| Default | summary |
| Introduced | 23.3.R1 |
| Platforms | All |

### **path-destination** *ipv4-address*

| | |
|---|---|
| Synopsis | IP address of the path destination |
| Context | oam lsp-trace sr-ospf path-destination *ipv4-address* |
| Tree | path-destination |
| Introduced | 23.3.R1 |
| Platforms | All |

### **prefix** *(ipv4-prefix | ipv6-prefix)*

| | |
|---|---|
| Synopsis | Destination IP prefix for the test |
| Context | oam lsp-trace sr-ospf prefix *(ipv4-prefix \| ipv6-prefix)* |
| Tree | prefix |
| Notes | This element is mandatory. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **probe-count** *number*

| | |
|---|---|
| Synopsis | Number of OAM trace probes to send per TTL |
| Context | oam lsp-trace sr-ospf probe-count *number* |
| Tree | probe-count |
| Range | 1 to 10 |
| Default | 1 |
| Introduced | 23.3.R1 |

## start

| | |
|---|---|
| Synopsis | Start OAM SATH service test |
| Context | oam service-activation-testhead service-test *reference* start |
| Tree | start |
| Description | This command starts an OAM Service Activtation Testhead (SATH) service test.<br>Only one instance of a service test is allowed for the specified *service-test-name*. If the user attempts to start another instance of a service test for the same *service-test-name* while the current instance is still running, an error is generated. |
| Introduced | 23.10.R1 |
| Platforms | All |

## stop

| | |
|---|---|
| Synopsis | Stop OAM SATH service test |
| Context | oam service-activation-testhead service-test *reference* stop |
| Tree | stop |
| Description | This command stops an OAM Service Activtation Testhead (SATH) service test.<br>If the user attempts to stop a service test that is already complete, an error is generated. |
| Introduced | 23.10.R1 |
| Platforms | All |

## password

| | |
|---|---|
| Synopsis | Change the local user password |
| Context | password |
| Tree | password |
| Introduced | 20.10.R1 |
| Platforms | All |

## ping

| | |
|---|---|
| Synopsis | Ping an IP address or DNS name |
| Context | ping |
| Tree | ping |
| Introduced | 19.10.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | All |

## bypass-routing

| | |
|---|---|
| Synopsis | Bypass routing table when sending ping request to host |
| Context | ping bypass-routing |
| Tree | bypass-routing |
| Description | When configured, the system bypasses the routing table when sending the ping request to a host on a directly-attached network. If the host is not on a directly-attached network, an error is returned. |
| Notes | The following elements are part of a choice: **bypass-routing**, **interface**, **next-hop-address**, or **subscriber**. |
| Introduced | 19.10.R1 |
| Platforms | All |

## candidate-path

| | |
|---|---|
| Synopsis | Ping candidate path of the SRv6 policy |
| Context | ping candidate-path |
| Tree | candidate-path |
| Description | When configured, this command allows the user to specify a candidate path of the SRv6 policy to ping. The candidate path does not need to be the currently active candidate path. |
| Introduced | 23.10.R1 |
| Platforms | All |

## color *number*

| | |
|---|---|
| Synopsis | Color identifier of the Segment Routing IPv6 policy |
| Context | ping color *number* |
| Tree | color |
| Max. range | 0 to 4294967295 |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 23.7.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **count** *number*

| | |
|---|---|
| Synopsis | Number of ping requests to send to the remote host |
| Context | ping count *number* |
| Tree | count |
| Range | 1 to 100000 |
| Units | packets |
| Default | 5 |
| Introduced | 19.10.R1 |
| Platforms | All |

### [**destination**] *(ipv4-address-with-zone | ipv6-address-with-zone | string-not-all-spaces)*

| | |
|---|---|
| Synopsis | Destination IP address or DNS name |
| Context | ping [destination] *(ipv4-address-with-zone* \| *ipv6-address-with-zone* \| *string-not-all-spaces)* |
| Tree | [destination] |
| String length | 1 to 128 |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 19.10.R1 |
| Platforms | All |

### **distinguisher** *number*

| | |
|---|---|
| Synopsis | SRv6 policy candidate path distinguisher |
| Context | ping distinguisher *number* |
| Tree | distinguisher |
| Description | This command specifies the distinguisher of the SRv6 policy candidate path to send the ping probe on.<br>This command must be configured if the **protocol-owner** command is configured to **bgp**. |
| Range | 1 to 4294967295 |
| Introduced | 23.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### do-not-fragment

| | |
|---|---|
| Synopsis | Do not fragment echo request packets (valid for IPv4) |
| Context | ping do-not-fragment |
| Tree | do-not-fragment |
| Description | This command sets the Do Not Fragment (DF) bit in the IPv4 header. This prevents packet fragmentation along the path when there is an MTU mismatch. |
| Introduced | 19.10.R1 |
| Platforms | All |

### **endpoint** *ipv6-unicast-or-zero-address*

| | |
|---|---|
| Synopsis | Endpoint identifier of the Segment Routing IPv6 policy to be pinged |
| Context | ping endpoint *ipv6-unicast-or-zero-address* |
| Tree | endpoint |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 23.7.R1 |
| Platforms | All |

### **fc** *keyword*

| | |
|---|---|
| Synopsis | Forwarding class option for the transmitted packet |
| Context | ping fc *keyword* |
| Tree | fc |
| Options | be – Best effort<br>l2 – Low 2 (best effort)<br>af – Assured forwarding (assured)<br>l1 – Low 1 (assured)<br>h2 – High 2 (high priority)<br>ef – Expedited forwarding (high priority)<br>h1 – High 1 (high priority)<br>nc – Network control (high priority) |
| Default | nc |
| Introduced | 19.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **interface** *(reference | reference | reference | reference | reference)*

| | |
|---|---|
| Synopsis | Sending interface name |
| Context | ping interface *(reference \| reference \| reference \| reference \| reference)* |
| Tree | interface |
| Reference | **state router** *named-item-64* **interface** *interface-name*<br>**state service ies** *service-name* **interface** *interface-name*<br>**state service ies** *service-name* **subscriber-interface** *interface-name*<br>**state service vprn** *service-name* **interface** *interface-name*<br>**state service vprn** *service-name* **subscriber-interface** *interface-name* |
| Notes | The following elements are part of a choice: **bypass-routing**, **interface**, **next-hop-address**, or **subscriber**. |
| Introduced | 19.10.R1 |
| Platforms | All |

### **interval** *(number | decimal-number)*

| | |
|---|---|
| Synopsis | Time between consecutive ping requests |
| Context | ping interval *(number \| decimal-number)* |
| Tree | interval |
| Range | 1 to 10000 |
| Units | seconds |
| Default | 1 |
| Introduced | 19.10.R1 |
| Platforms | All |

### **next-hop-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Next-hop address to send packet, ignoring routing table |
| Context | ping next-hop-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | next-hop-address |
| Description | This command specifies the next-hop address. The system does not use the routing table and the address must be on an adjacent router attached to a common subnet. |
| Notes | The following elements are part of a choice: **bypass-routing**, **interface**, **next-hop-address**, or **subscriber**. |

© 2024 Nokia.

| | |
|---|---|
| Introduced | 19.10.R1 |
| Platforms | All |

### **output-format** *keyword*

| | |
|---|---|
| Synopsis | Output format |
| Context | ping output-format *keyword* |
| Tree | output-format |
| Options | summary, detail |
| Default | detail |
| Introduced | 19.10.R1 |
| Platforms | All |

### **pattern** *(keyword | number)*

| | |
|---|---|
| Synopsis | Pattern string to include in the packet |
| Context | ping pattern *(keyword | number)* |
| Tree | pattern |
| Range | 0 to 65535 |
| Options | sequential |
| Default | sequential |
| Introduced | 19.10.R1 |
| Platforms | All |

### **preference** *number*

| | |
|---|---|
| Synopsis | SRv6 policy candidate path preference |
| Context | ping preference *number* |
| Tree | preference |
| Description | This command specifies the preference of the SRv6 policy candidate path to send the ping probe on. |
| Max. range | 0 to 4294967295 |
| Default | 100 |
| Introduced | 23.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **protocol-owner** *keyword*

| | |
|---|---|
| Synopsis | Protocol owner |
| Context | ping protocol-owner *keyword* |
| Tree | protocol-owner |
| Description | This command specifies the protocol owner of the SRv6 policy candidate path to ping.<br>The **bgp** option specifies a BGP SRv6 policy.<br>The **static** option specifies a locally configured static SRv6 policy. |
| Options | bgp, static |
| Introduced | 23.10.R1 |
| Platforms | All |

### **router-instance** *(reference | reference)*

| | |
|---|---|
| Synopsis | Router name or VPRN service name |
| Context | ping router-instance *(reference \| reference)* |
| Tree | router-instance |
| Default | Base |
| Reference | **state router** *named-item-64*<br>**state service vprn** *service-name* |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 19.10.R1 |
| Platforms | All |

### **segment-list** *number*

| | |
|---|---|
| Synopsis | Segment Routing IPv6 segment list to be pinged |
| Context | ping segment-list *number* |
| Tree | segment-list |
| Range | 1 to 32 |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 23.7.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **size** *number*

| | |
|---|---|
| Synopsis | Request packet size including ICMP header and payload |
| Context | ping size *number* |
| Tree | size |
| Range | 0 to 16384 |
| Units | bytes |
| Default | 56 |
| Introduced | 19.10.R1 |
| Platforms | All |

### **source-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Source IP address used in the ICMP Echo Request packet |
| Context | ping source-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | source-address |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 19.10.R1 |
| Platforms | All |

### **srv6-policy**

| | |
|---|---|
| Synopsis | Ping a Segment Routing IPv6 policy |
| Context | ping srv6-policy |
| Tree | srv6-policy |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 23.7.R1 |
| Platforms | All |

### **subscriber** *subscriber-id*

| | |
|---|---|
| Synopsis | Subscriber ID for sending ICMP Echo Request packets |
| Context | ping subscriber *subscriber-id* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | subscriber |
| String length | 1 to 64 |
| Notes | The following elements are part of a choice: **bypass-routing**, **interface**, **next-hop-address**, or **subscriber**. |
| Introduced | 19.10.R1 |
| Platforms | All |

### **timeout** *number*

| | |
|---|---|
| Synopsis | Wait time for the ICMP Echo Reply packet |
| Context | ping timeout *number* |
| Tree | timeout |
| Description | This command specifies the time to wait for the ICMP Echo Reply packet. The timer is started when the last ICMP Echo Request is sent. |
| Range | 1 to 10 |
| Units | seconds |
| Default | 5 |
| Introduced | 19.10.R2 |
| Platforms | All |

### **tos** *number*

| | |
|---|---|
| Synopsis | Type of Service (ToS) bits in the IP header |
| Context | ping tos *number* |
| Tree | tos |
| Range | 0 to 255 |
| Default | 0 |
| Introduced | 19.10.R1 |
| Platforms | All |

### **ttl** *number*

| | |
|---|---|
| Synopsis | Time to Live (TTL) included in the request packet |
| Context | ping ttl *number* |
| Tree | ttl |

## ssh

| | |
|---|---|
| Synopsis | SSH to an IP address or DNS name |
| Context | ssh |
| Tree | ssh |
| Introduced | 20.7.R1 |
| Platforms | All |

## [**destination**] *(ipv4-address-with-zone | ipv6-address-with-zone | string-not-all-spaces)*

| | |
|---|---|
| Synopsis | Destination IP address or DNS name |
| Context | ssh [destination] *(ipv4-address-with-zone \| ipv6-address-with-zone \| string-not-all-spaces)* |
| Tree | [destination] |
| String length | 1 to 128 |
| Notes | This element is mandatory. |
| Introduced | 20.7.R1 |
| Platforms | All |

## key-re-exchange

| | |
|---|---|
| Synopsis | Enter the **key-re-exchange** context |
| Context | ssh key-re-exchange |
| Tree | key-re-exchange |
| Introduced | 20.7.R1 |
| Platforms | All |

## mbytes *(number | keyword)*

| | |
|---|---|
| Synopsis | Maximum bytes before initiating key re-exchange |
| Context | ssh key-re-exchange mbytes *(number \| keyword)* |
| Tree | mbytes |
| Description | This command specifies the number of bytes transmitted on an SSH session, after which the SSH client initiates the key re-exchange. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Range | 1 to 64000 |
| Units | megabytes |
| Options | infinite |
| Default | 1024 |
| Introduced | 20.7.R1 |
| Platforms | All |

### **minutes** *(number | keyword)*

| | |
|---|---|
| Synopsis | Time after which SSH client initiates key re-exchange |
| Context | ssh key-re-exchange minutes *(number | keyword)* |
| Tree | minutes |
| Range | 1 to 1440 |
| Units | minutes |
| Options | infinite |
| Default | 60 |
| Introduced | 20.7.R1 |
| Platforms | All |

### **login-name** *string-not-all-spaces*

| | |
|---|---|
| Synopsis | SSH login username |
| Context | ssh login-name *string-not-all-spaces* |
| Tree | login-name |
| String length | 1 to 32 |
| Introduced | 20.7.R1 |
| Platforms | All |

### **port** *number*

| | |
|---|---|
| Synopsis | TCP listening port on SSH client for SSH session |
| Context | ssh port *number* |
| Tree | port |
| Description | This command configures the listening port for the SR OS SSH client to establish the SSH session with the SSH server. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Range | 1 to 65535 |
| Default | 22 |
| Introduced | 24.7.R1 |
| Platforms | All |

### **private-key-file** *string*

| | |
|---|---|
| Synopsis | SSH private key file for public-key authentication |
| Context | ssh private-key-file *string* |
| Tree | private-key-file |
| Description | This command configures the name of the file containing the private key for public-key authentication on the SR OS SSH client, up to 255 characters. (The public key must be provided to the SSH server.) If the file containing the private key is encrypted, the system asks for the password to decrypt the file. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **router-instance** *(string | string)*

| | |
|---|---|
| Synopsis | Router name or VPRN service name |
| Context | ssh router-instance *(string | string)* |
| Tree | router-instance |
| Default | Base |
| Introduced | 20.7.R1 |
| Platforms | All |

### **telnet**

| | |
|---|---|
| Synopsis | Telnet to an IP address or DNS name |
| Context | telnet |
| Tree | telnet |
| Description | This command opens a Telnet session to a remote host. In SR OS, the Telnet servers limit Telnet clients to three login attempts; if unsuccessful, the Telnet client session disconnects. The number is not user configurable. |
| Introduced | 20.7.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### [**destination**] *(ipv4-address-with-zone | ipv6-address-with-zone | string-not-all-spaces)*

| | |
|---|---|
| Synopsis | Destination IP address or DNS name |
| Context | telnet [destination] *(ipv4-address-with-zone \| ipv6-address-with-zone \| string-not-all-spaces)* |
| Tree | [destination] |
| Description | This command specifies the IP address or DNS name (if DNS name resolution is configured) of the remote host for the Telnet session. |
| String length | 1 to 128 |
| Notes | This element is mandatory. |
| Introduced | 20.7.R1 |
| Platforms | All |

### **port** *number*

| | |
|---|---|
| Synopsis | Remote host TCP port for the Telnet connection |
| Context | telnet port *number* |
| Tree | port |
| Range | 1 to 65535 |
| Default | 23 |
| Introduced | 20.7.R1 |
| Platforms | All |

### **router-instance** *(string | string)*

| | |
|---|---|
| Synopsis | Router name or VPRN service name |
| Context | telnet router-instance *(string \| string)* |
| Tree | router-instance |
| Default | Base |
| Introduced | 20.7.R1 |
| Platforms | All |

### **source-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Source IP address of the Telnet packets |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | telnet source-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | source-address |
| Introduced | 20.7.R1 |
| Platforms | All |

## top

| | |
|---|---|
| Synopsis | Move to the top level of the context |
| Context | top |
| Tree | top |
| Introduced | 16.0.R1 |
| Platforms | All |

## traceroute

| | |
|---|---|
| Synopsis | Show the route taken to an IP address or DNS name |
| Context | traceroute |
| Tree | traceroute |
| Introduced | 19.10.R1 |
| Platforms | All |

## candidate-path

| | |
|---|---|
| Synopsis | Trace route of the candidate path of the SRv6 policy |
| Context | traceroute candidate-path |
| Tree | candidate-path |
| Description | When configured, this command allows the user to specify a candidate path of the SRv6 policy to traceroute. The candidate path does not need to be the currently active candidate path. |
| Introduced | 23.10.R1 |
| Platforms | All |

## color *number*

| | |
|---|---|
| Synopsis | Color ID of the SRv6 policy to trace |
| Context | traceroute color *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | color |
| Description | This command launches a traceroute of an SRv6 policy that matches a specific color. |
| Max. range | 0 to 4294967295 |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 23.3.R1 |
| Platforms | All |

### **decode** *keyword*

| | |
|---|---|
| Synopsis | Perform original datagram parsing functions |
| Context | traceroute decode *keyword* |
| Tree | decode |
| Options | none, original-datagram |
| Default | none |
| Introduced | 22.7.R1 |
| Platforms | All |

### **dest-port** *number*

| | |
|---|---|
| Synopsis | Transport protocol destination port number |
| Context | traceroute dest-port *number* |
| Tree | dest-port |
| Range | 1 to 65535 |
| Default | 33434 |
| Introduced | 20.10.R1 |
| Platforms | All |

### **dest-port-udp-fixed**

| | |
|---|---|
| Synopsis | Avoid increment of destination port number for UDP test |
| Context | traceroute dest-port-udp-fixed |
| Tree | dest-port-udp-fixed |
| Introduced | 21.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### [**destination**] *(ipv4-address-no-zone | ipv6-address-no-zone | string-not-all-spaces)*

| | |
|---|---|
| Synopsis | Destination IP address or DNS name |
| Context | traceroute [destination] *(ipv4-address-no-zone \| ipv6-address-no-zone \| string-not-all-spaces)* |
| Tree | [destination] |
| String length | 1 to 128 |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 19.10.R1 |
| Platforms | All |

### **detail**

| | |
|---|---|
| Synopsis | Display MPLS label stack information or TCP port status |
| Context | traceroute detail |
| Tree | detail |
| Introduced | 19.10.R1 |
| Platforms | All |

### **distinguisher** *number*

| | |
|---|---|
| Synopsis | SRv6 policy candidate path distinguisher |
| Context | traceroute distinguisher *number* |
| Tree | distinguisher |
| Description | This command specifies the distinguisher of the SRv6 policy candidate path to send the traceroute probe on.<br>This command must be configured if the **protocol-owner** command is configured to **bgp**. |
| Range | 1 to 4294967295 |
| Introduced | 23.10.R1 |
| Platforms | All |

### **endpoint** *ipv6-unicast-or-zero-address*

| | |
|---|---|
| Synopsis | Endpoint of the SRv6 policy to trace |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | traceroute endpoint *ipv6-unicast-or-zero-address* |
| Tree | endpoint |
| Description | This command configures an IPv6 endpoint address for an SRv6 policy as the target of the traceroute. |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 23.3.R1 |
| Platforms | All |

### **min-ttl** *number*

| | |
|---|---|
| Synopsis | First hop traceroute probes using the TTL value |
| Context | traceroute min-ttl *number* |
| Tree | min-ttl |
| Description | This command specifies the first hop traceroute probes, using the **ttl** value. |
| Range | 1 to 255 |
| Default | 1 |
| Introduced | 21.10.R1 |
| Platforms | All |

### **numeric**

| | |
|---|---|
| Synopsis | Display IP addresses instead of DNS names |
| Context | traceroute numeric |
| Tree | numeric |
| Introduced | 19.10.R1 |
| Platforms | All |

### **preference** *number*

| | |
|---|---|
| Synopsis | SRv6 policy candidate path preference |
| Context | traceroute preference *number* |
| Tree | preference |
| Description | This command specifies the preference of the SRv6 policy candidate path to send the traceroute probe on. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Max. range | 0 to 4294967295 |
| Default | 100 |
| Introduced | 23.10.R1 |
| Platforms | All |

### **probe-count** *number*

| | |
|---|---|
| Synopsis | Number of probes to send per hop |
| Context | traceroute probe-count *number* |
| Tree | probe-count |
| Range | 1 to 10 |
| Default | 3 |
| Introduced | 20.10.R1 |
| Platforms | All |

### **protocol** *keyword*

| | |
|---|---|
| Synopsis | Packet type to send |
| Context | traceroute protocol *keyword* |
| Tree | protocol |
| Description | This command sets the transport protocol, UDP or TCP, for the traceroute packet. A targeted VPRN service silently discards TCP traceroutes and only responds to UDP traceroutes. |
| Options | udp, tcp |
| Default | udp |
| Introduced | 21.10.R1 |
| Platforms | All |

### **protocol-owner** *keyword*

| | |
|---|---|
| Synopsis | Protocol owner |
| Context | traceroute protocol-owner *keyword* |
| Tree | protocol-owner |
| Description | This command specifies the protocol owner of the SRv6 policy candidate path to traceroute.<br>The **bgp** option specifies a BGP SRv6 policy. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

The **static** option specifies a locally configured static SRv6 policy.

| | |
|---|---|
| Options | bgp, static |
| Introduced | 23.10.R1 |
| Platforms | All |

### **router-instance** *string*

| | |
|---|---|
| Synopsis | Router name or VPRN service name |
| Context | traceroute router-instance *string* |
| Tree | router-instance |
| Default | Base |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 19.10.R1 |
| Platforms | All |

### **segment-list** *number*

| | |
|---|---|
| Synopsis | SR IPv6 segment list to trace |
| Context | traceroute segment-list *number* |
| Tree | segment-list |
| Description | This command configures the traceroute probe to target a specific segment list of an SRv6 policy. When the segment list is not specified, the traceroute probe is sent on the lowest available segment list. |
| Range | 1 to 32 |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 23.3.R1 |
| Platforms | All |

### **size** *number*

| | |
|---|---|
| Synopsis | Number of pad bytes in each transmitted packet |
| Context | traceroute size *number* |
| Tree | size |
| Range | 0 to 9786 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Units | bytes |
| Default | 0 |
| Introduced | 21.10.R1 |
| Platforms | All |

### **source-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Source address of the probe packets |
| Context | traceroute source-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | source-address |
| Description | This command specifies the source address of the probe packets. If the IP address is not one of the interfaces of the device, the system returns an error. |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 19.10.R1 |
| Platforms | All |

### **srv6-policy**

| | |
|---|---|
| Synopsis | Trace an SRv6 policy |
| Context | traceroute srv6-policy |
| Tree | srv6-policy |
| Description | This command launches a traceroute of a Segment Routing IPv6 (SRv6) policy. |
| Notes | The following elements are part of a mandatory choice: (**destination**, **router-instance**, and **source-address**) or (**color**, **endpoint**, **segment-list**, and **srv6-policy**). |
| Introduced | 23.3.R1 |
| Platforms | All |

### **tos** *number*

| | |
|---|---|
| Synopsis | Type of Service (ToS) bits in the IP header |
| Context | traceroute tos *number* |
| Tree | tos |
| Range | 0 to 255 |
| Default | 0 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 19.10.R1 |
| Platforms | All |

### **ttl** *number*

| | |
|---|---|
| Synopsis | Maximum number of hops (TTL) to probe |
| Context | traceroute ttl *number* |
| Tree | ttl |
| Range | 1 to 255 |
| Default | 30 |
| Introduced | 19.10.R1 |
| Platforms | All |

### **wait** *number*

| | |
|---|---|
| Synopsis | Time to wait for a response to the probe |
| Context | traceroute wait *number* |
| Tree | wait |
| Range | 10 to 60000 |
| Units | milliseconds |
| Default | 5000 |
| Introduced | 19.10.R1 |
| Platforms | All |

### **tree**

| | |
|---|---|
| Synopsis | Show the command tree under the present working context |
| Context | tree |
| Tree | tree |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**cli-path**] *cli-path-type*

| | |
|---|---|
| Synopsis | Absolute path or relative path from pwc |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | tree [cli-path] *cli-path-type* |
| Tree | [cli-path] |
| Introduced | 20.10.R1 |
| Platforms | All |

## detail

| | |
|---|---|
| Synopsis | Display the tree with keys and field values |
| Context | tree detail |
| Tree | detail |
| Notes | The following elements are part of a choice: (**detail** and **flat**) or **path-format**. |
| Introduced | 16.0.R1 |
| Platforms | All |

## flat

| | |
|---|---|
| Synopsis | Show the context from the pwc on each line |
| Context | tree flat |
| Tree | flat |
| Notes | The following elements are part of a choice: (**detail** and **flat**) or **path-format**. |
| Introduced | 16.0.R1 |
| Platforms | All |

## [**path-format**] *keyword*

| | |
|---|---|
| Synopsis | Alternative format to display the path |
| Context | tree [path-format] *keyword* |
| Tree | [path-format] |
| Description | This option outputs the tree information in alternative YANG formats for use in external tools, such as pySROS, gNMI, or the Network Services Platform (NSP). |
| Options | model-path – YANG-modeled format for RESTCONF<br>gnmi-path – gNMI format for streaming telemetry<br>json-instance-path – YANG-modeled format for pySROS |
| Notes | The following elements are part of a choice: (**detail** and **flat**) or **path-format**. |
| Introduced | 24.7.R1 |

## 2.6 perform commands

The **perform** commands are YANG-modeled versions of the **tools perform** commands and are available in MD-CLI and NETCONF interfaces. The **perform** commands execute actions in the router, such as:

- force a LAG subgroup to become active
- set an IS-IS overload condition
- terminate a Python script

```
perform
   –  application-assurance
      –  aarp reference
         –  force-evaluate
            –  [force-evaluate]
      –  group reference
         –  load-balance
            –  service-id number
         –  partition reference
            –  aa-sub
               –  esm
                  –  clear-quarantine
                  –  quarantine
                  –  [sub-ident-string] named-item
               –  esm-mac
                  –  clear-quarantine
                  –  [esm-mac-name] named-item
                  –  quarantine
               –  sap
                  –  clear-quarantine
                  –  quarantine
                  –  [sap-id] sap
               –  spoke-sdp
                  –  clear-quarantine
                  –  quarantine
                  –  [sdp-bind-id] sdp-bind-id
               –  transit
                  –  clear-quarantine
                  –  quarantine
                  –  [transit-aasub-name] named-item
            –  tethering
               –  [clear-counters]
   –  card number
      –  power-cycle
   –  chassis reference chassis-number reference
      –  check-backplane-eprom
      –  link-check
   –  filter
      –  ip-filter reference
         –  entry reference
            –  activate-primary-action
      –  ipv6-filter reference
         –  entry reference
            –  activate-primary-action
      –  mac-filter reference
         –  entry reference
            –  activate-primary-action
      –  redirect-policy reference
         –  activate-best-dest
   –  lag
      –  clear-force
```

| Description | This command specifies the string for the parameter. Embedded double quotes are supported by using the backslash character (\) followed by the double quote character (”). |
| String length | 0 to 2000 |
| Default | |
| Introduced | 24.10.R1 |
| Platforms | All |

### **parameter5** *string*

| | |
|---|---|
| Synopsis | Custom text of the parameter |
| Context | perform log custom-event parameter5 *string* |
| Tree | parameter5 |
| Description | This command specifies the string for the parameter. Embedded double quotes are supported by using the backslash character (\) followed by the double quote character (”). |
| String length | 0 to 2000 |
| Default | |
| Introduced | 24.10.R1 |
| Platforms | All |

### **parameter6** *string*

| | |
|---|---|
| Synopsis | Custom text of the parameter |
| Context | perform log custom-event parameter6 *string* |
| Tree | parameter6 |
| Description | This command specifies the string for the parameter. Embedded double quotes are supported by using the backslash character (\) followed by the double quote character (”). |
| String length | 0 to 2000 |
| Default | |
| Introduced | 24.10.R1 |
| Platforms | All |

### **parameter7** *string*

| | |
|---|---|
| Synopsis | Custom text of the parameter |

| | |
|---|---|
| Context | perform log custom-event parameter7 *string* |
| Tree | parameter7 |
| Description | This command specifies the string for the parameter. Embedded double quotes are supported by using the backslash character (\) followed by the double quote character (”). |
| String length | 0 to 2000 |
| Default | |
| Introduced | 24.10.R1 |
| Platforms | All |

### **parameter8** *string*

| | |
|---|---|
| Synopsis | Custom text of the parameter |
| Context | perform log custom-event parameter8 *string* |
| Tree | parameter8 |
| Description | This command specifies the string for the parameter. Embedded double quotes are supported by using the backslash character (\) followed by the double quote character (”). |
| String length | 0 to 2000 |
| Default | |
| Introduced | 24.10.R1 |
| Platforms | All |

### **subject** *string*

| | |
|---|---|
| Synopsis | Subject of the log event |
| Context | perform log custom-event subject *string* |
| Tree | subject |
| Description | This command specifies the string in the subject field of the log event. Embedded double quotes are supported by using the backslash character (\) followed by the double quote character (”). |
| String length | 1 to 32 |
| Notes | This element is mandatory. |
| Introduced | 24.10.R1 |
| Platforms | All |

### test-event

| | |
|---|---|
| Synopsis | Send a test log event |
| Context | perform log test-event |
| Tree | test-event |
| Introduced | 24.10.R1 |
| Platforms | All |

### custom-text *string*

| | |
|---|---|
| Synopsis | Custom text of the test event message field |
| Context | perform log test-event custom-text *string* |
| Tree | custom-text |
| Description | This command specifies custom text for the message section of the test log event. Embedded double quotes are not supported in the custom-text string. There is no special treatment for or \r sequences. For example, in the custom-text string is output as the backslash character (\) and "n" (the equivalent of ASCII 0x5C and 0x6e). |
| String length | 0 to 800 |
| Default | |
| Introduced | 24.10.R1 |
| Platforms | All |

### python

| | |
|---|---|
| Synopsis | Enter the **python** context |
| Context | perform python |
| Tree | python |
| Introduced | 23.10.R1 |
| Platforms | All |

### python-policy

| | |
|---|---|
| Synopsis | Enter the python-policy context |
| Context | perform python python-policy |

## protect

| | |
|---|---|
| Synopsis | Convert a Python file into a protected SRPY format |
| Context | perform python python-script protect |
| Tree | protect |
| Description | When invoked, the system converts a normal (unprotected) Python script file into a protected SRPY format using a specified key.<br>For more information about the SRPY format and protected scripts, see "Python script protection" in the *7450 ESS, 7750 SR, and VSR Triple Play Service Delivery Architecture Guide*. |
| Introduced | 23.10.R1 |
| Platforms | All |

## hmac-sha256-key *string*

| | |
|---|---|
| Synopsis | Key used to compute the hash |
| Context | perform python python-script protect hmac-sha256-key *string* |
| Tree | hmac-sha256-key |
| String length | 1 to 128 |
| Notes | This element is mandatory. |
| Introduced | 23.10.R1 |
| Platforms | All |

## input-file *string*

| | |
|---|---|
| Synopsis | URL of the input unprotected script file |
| Context | perform python python-script protect input-file *string* |
| Tree | input-file |
| String length | 1 to 180 |
| Notes | This element is mandatory. |
| Introduced | 23.10.R1 |
| Platforms | All |

## output-file *string*

## 2.7 reset commands

The **reset** commands are YANG-modeled versions of the **clear** commands and are available in MD-CLI and NETCONF interfaces. The **reset** commands are primarily used to:

- set statistics in a specific area back to a value of zero
- reset specific hardware assemblies, for example, cards
- delete temporary operational state data, for example, contents of a log in memory

```
reset
   –  application-assurance
      –  group reference
         –  cflowd
         –  partition reference
            –  event-log
               –  name reference
            –  gtp
         –  statistics
            –  force
         –  status
      –  radius-accounting-policy reference

## 2.7.1 reset command descriptions

### reset

| | |
|---|---|
| Synopsis | Clear statistics or reset operational state |
| Context | reset |
| Tree | reset |
| Description | Commands in this context are used to clear specific statistics, reset specific hardware assemblies (for example, cards), and delete temporary operational state data (for example, contents of a log in memory). |
| Introduced | 23.3.R1 |
| Platforms | All |

### application-assurance

| | |
|---|---|
| Synopsis | Enter the **application-assurance** context |
| Context | reset application-assurance |
| Tree | application-assurance |
| Description | Commands in this context reset Application Assurance (AA) data. |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **group** [aa-group-id] *reference*

| | |
|---|---|
| Synopsis | Enter the **group** list instance |
| Context | reset application-assurance group *reference* |
| Tree | group |
| Description | Commands in this context reset AA group data. |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**aa-group-id**] *reference*

| | |
|---|---|
| Synopsis | AA group ID |
| Context | reset application-assurance group *reference* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | group |
| Reference | **state application-assurance group** *number* |
| Notes | This element is part of a list key. |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### cflowd

| | |
|---|---|
| Synopsis | Reset AA group cflowd |
| Context | reset application-assurance group *reference* cflowd |
| Tree | cflowd |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **partition** [aa-partition-id] *reference*

| | |
|---|---|
| Synopsis | Enter the **partition** list instance |
| Context | reset application-assurance group *reference* partition *reference* |
| Tree | partition |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**aa-partition-id**] *reference*

| | |
|---|---|
| Synopsis | AA partition ID |
| Context | reset application-assurance group *reference* partition *reference* |
| Tree | partition |
| Reference | **state application-assurance group** *number* **partition** *number* |
| Notes | This element is part of a list key. |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### event-log

| | |
|---|---|
| Synopsis | Reset the AA event log for the group partition |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | reset application-assurance group *reference* partition *reference* event-log |
| Tree | event-log |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **name** *reference*

| | |
|---|---|
| Synopsis | Event log name |
| Context | reset application-assurance group *reference* partition *reference* event-log name *reference* |
| Tree | name |
| Reference | **state application-assurance group** *number* **partition** *number* **event-log** *named-item* |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## gtp

| | |
|---|---|
| Synopsis | Reset the AA GTP for the group partition |
| Context | reset application-assurance group *reference* partition *reference* gtp |
| Tree | gtp |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## statistics

| | |
|---|---|
| Synopsis | Reset AA group statistics |
| Context | reset application-assurance group *reference* statistics |
| Tree | statistics |
| Description | This command resets statistics displayed using the **show application-assurance group status** command.<br><br>**Note**: This command resets all the application assurance statistics counters to zero on the CPM; however, in some instances these counters may still display non-zero values if there are active flows on the ISA. |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### force

| | |
|---|---|
| Synopsis | Force the reset action |
| Context | reset application-assurance group *reference* statistics force |
| Tree | force |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### status

| | |
|---|---|
| Synopsis | Reset status and statistics |

| Introduced | 23.7.R1 |
| Platforms | All |

### [**name**] *reference*

| | |
|---|---|
| Synopsis | Name of the manager |
| Context | reset system management-interface remote-management statistics manager [name] *reference* |
| Tree | [name] |
| Reference | **state system management-interface remote-management manager** *named-item-64* |
| Notes | This element is mandatory. |
| Introduced | 23.7.R1 |
| Platforms | All |

### ptp

| | |
|---|---|
| Synopsis | Enter the **ptp** context |
| Context | reset system ptp |
| Tree | ptp |
| Introduced | 23.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### clock-recovery

| | |
|---|---|
| Synopsis | Reset PTP clock recovery algorithm |
| Context | reset system ptp clock-recovery |
| Tree | clock-recovery |
| Description | This command resets the algorithms involved in PTP frequency and time recovery to initial conditions. This clears out any previous history and can be used to ensure a consistent starting state for a test or can be used to clear any unexpected behavior in the algorithm. |

| | |
|---|---|
| Introduced | 23.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## reboot-required

| | |
|---|---|
| Synopsis | Clear the reboot required state |
| Context | reset system reboot-required |
| Tree | reboot-required |
| Description | This command clears the reboot required information. Use this command after a configuration triggers the reboot required state, but the configuration is removed. |
| Introduced | 24.3.R1 |
| Platforms | All |

## satellite

| | |
|---|---|
| Synopsis | Enter the **satellite** context |
| Context | reset system satellite |
| Tree | satellite |
| Description | Commands in this context reset satellite information. |
| Introduced | 23.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## **ethernet-satellite** [satellite-id] *reference*

| | |
|---|---|
| Synopsis | Enter the **ethernet-satellite** list instance |
| Context | reset system satellite ethernet-satellite *reference* |
| Tree | ethernet-satellite |
| Description | Commands in this context reset Ethernet satellite information. |
| Introduced | 23.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## [**satellite-id**] *reference*

| | |
|---|---|
| Synopsis | Satellite ID |
| Context | reset system satellite ethernet-satellite *reference* |

# 3 Configuration mode commands

This section lists the commands available in MD-CLI configuration modes.

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

## 3.1 Configuration mode commands

See “Editing configuration” in the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide* for more information.

```
–  annotate comment-text-type
   –  [cli-path] cli-path-type
–  commit
   –  comment string
   –  confirmed
      –  accept
      –  cancel
      –  comment string
      –  persist-id string
      –  [timeout] number
–  compare string [to] string
   –  [cli-path] cli-path-type
   –  flat
   –  full-context
   –  lines number
   –  netconf-rpc
   –  summary
–  copy
   –  [cli-path] cli-path-type
   –  to cli-path-type
–  discard
   –  [cli-path] cli-path-type
–  insert instance-id
   –  after
      –  [cli-path] instance-id
   –  before
      –  [cli-path] instance-id
   –  beginning
   –  end
–  load keyword
   –  encryption-key string
   –  interactive
   –  [url] string
–  rename
   –  [cli-path] cli-path-type
   –  to cli-path-type
–  replace string with string
   –  [cli-path] cli-path-type
   –  continue-on-error
   –  depth number
   –  ignore-case
–  rollback
   –  commit-id number
   –  [rollback-id] (keyword | number)
–  update
   –  /configure
   –  /bof
   –  check
   –  /debug
   –  /li
–  validate
```

### 3.1.1 Configuration mode command descriptions

#### **annotate** [comment-text] *comment-text-type*

| | |
|---|---|
| Synopsis | Annotate a configuration element with a comment |
| Context | annotate *comment-text-type* |
| Tree | annotate |
| Introduced | 21.5.R1 |
| Platforms | All |

#### [**comment-text**] *comment-text-type*

| | |
|---|---|
| Synopsis | Comment for the configuration element |
| Context | annotate *comment-text-type* |
| Tree | annotate |
| String length | 0 to 2048 |
| Notes | This element is part of a list key. |
| Introduced | 21.5.R1 |
| Platforms | All |

#### [**cli-path**] *cli-path-type*

| | |
|---|---|
| Synopsis | Absolute path or relative path from pwc, or 'pwc' |
| Context | annotate *comment-text-type* [cli-path] *cli-path-type* |
| Tree | [cli-path] |
| Notes | This element is mandatory. |
| Introduced | 21.5.R1 |
| Platforms | All |

#### **commit**

| | |
|---|---|
| Synopsis | Commit the candidate configuration |
| Context | commit |
| Tree | commit |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 16.0.R1 |
| Platforms | All |

### **comment** *string*

| | |
|---|---|
| Synopsis | Comment associated with the commit |
| Context | commit comment *string* |
| Tree | comment |
| String length | 1 to 2048 |
| Introduced | 21.10.R1 |
| Platforms | All |

### **confirmed**

| | |
|---|---|
| Synopsis | Enter the **confirmed** context |
| Context | commit confirmed |
| Tree | confirmed |
| Introduced | 16.0.R1 |
| Platforms | All |

### **accept**

| | |
|---|---|
| Synopsis | Accept commit confirmed and cancel automatic rollback |
| Context | commit confirmed accept |
| Tree | accept |
| Notes | The following elements are part of a choice: **accept**, **cancel**, or (**comment** and **timeout**). |
| Introduced | 16.0.R1 |
| Platforms | All |

### **cancel**

| | |
|---|---|
| Synopsis | Cancel commit confirmed and roll back changes |
| Context | commit confirmed cancel |
| Tree | cancel |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | When specified, the router rolls back the configuration and returns the changes to the candidate. |
| Notes | The following elements are part of a choice: **accept**, **cancel**, or (**comment** and **timeout**). |
| Introduced | 16.0.R1 |
| Platforms | All |

### **comment** *string*

| | |
|---|---|
| Synopsis | Comment associated with the commit |
| Context | commit confirmed comment *string* |
| Tree | comment |
| String length | 1 to 2048 |
| Notes | The following elements are part of a choice: **accept**, **cancel**, or (**comment** and **timeout**). |
| Introduced | 21.10.R1 |
| Platforms | All |

### **persist-id** *string*

| | |
|---|---|
| Synopsis | Persistent confirmed commit ID |
| Context | commit confirmed persist-id *string* |
| Tree | persist-id |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**timeout**] *number*

| | |
|---|---|
| Synopsis | Confirmed commit expiration timeout interval |
| Context | commit confirmed [timeout] *number* |
| Tree | [timeout] |
| Range | 1 to 65535 |
| Units | minutes |
| Default | 10 |
| Notes | The following elements are part of a choice: **accept**, **cancel**, or (**comment** and **timeout**). |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 16.0.R1 |
| Platforms | All |

### **compare** [from] *string* to *string*

| | |
|---|---|
| Synopsis | Compare changes between datastores |
| Context | compare *string* [to] *string* |
| Tree | compare |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**from**] *string*

| | |
|---|---|
| Synopsis | Source configuration from which to compare |
| Context | compare *string* [to] *string* |
| Tree | compare |
| MD-CLI default | baseline |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**to**] *string*

| | |
|---|---|
| Synopsis | Configuration to compare against source configuration |
| Context | compare *string* [to] *string* |
| Tree | compare |
| MD-CLI default | candidate |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**cli-path**] *cli-path-type*

| | |
|---|---|
| Synopsis | Absolute path or relative path from pwc |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | compare *string* [to] *string* [cli-path] *cli-path-type* |
| Tree | [cli-path] |
| Introduced | 20.10.R1 |
| Platforms | All |

## flat

| | |
|---|---|
| Synopsis | Show the context from the pwc on each line |
| Context | compare *string* [to] *string* flat |
| Tree | flat |
| Description | This option shows the hierarchy on each line starting from the present working context. |
| Notes | The following elements are part of a choice: **flat** or **netconf-rpc**. |
| Introduced | 16.0.R1 |
| Platforms | All |

## full-context

| | |
|---|---|
| Synopsis | Show the full context on each line |
| Context | compare *string* [to] *string* full-context |
| Tree | full-context |
| Introduced | 16.0.R1 |
| Platforms | All |

## lines *number*

| | |
|---|---|
| Synopsis | Number of lines of context to display before and after |
| Context | compare *string* [to] *string* lines *number* |
| Tree | lines |
| Description | This command specifies the number of lines of context to display before and after changed elements. The context is evaluated separately at each container. If the parameter value is larger than the available context, the maximum available context up to the container boundary is displayed. |
| Max. range | 0 to 4294967295 |
| Default | 0 |
| Introduced | 16.0.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | All |

## netconf-rpc

| | |
|---|---|
| Synopsis | Display changes in NETCONF <edit-config> RPC format |
| Context | compare *string* [to] *string* netconf-rpc |
| Tree | netconf-rpc |
| Description | This option specifies the display of changes in NETCONF <edit-config> RPC format.<br>This option is only supported with the **summary** option. |
| Notes | The following elements are part of a choice: **flat** or **netconf-rpc**. |
| Introduced | 21.5.R1 |
| Platforms | All |

## summary

| | |
|---|---|
| Synopsis | Suppress specific differences and display a summary |
| Context | compare *string* [to] *string* summary |
| Tree | summary |
| Description | This command allows the suppression of specific differences and displays a summarized comparison. The summarized differences in elements under the highest level container that was deleted is displayed with { ... }. A tilde (~) character is displayed to indicate the new value of an element that has changed. |
| Introduced | 16.0.R1 |
| Platforms | All |

## copy

| | |
|---|---|
| Synopsis | Copy a configuration element to another |
| Context | copy |
| Tree | copy |
| Introduced | 20.10.R1 |
| Platforms | All |

## [**cli-path**] *cli-path-type*

| | |
|---|---|
| Synopsis | Absolute path or relative path from pwc, or 'pwc' |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | copy [cli-path] *cli-path-type* |
| Tree | [cli-path] |
| Introduced | 20.10.R1 |
| Platforms | All |

### **to** *cli-path-type*

| | |
|---|---|
| Synopsis | Destination path, or 'pwc' |
| Context | copy to *cli-path-type* |
| Tree | to |
| Introduced | 20.10.R1 |
| Platforms | All |

### **discard**

| | |
|---|---|
| Synopsis | Discard changes in the candidate configuration |
| Context | discard |
| Tree | discard |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**cli-path**] *cli-path-type*

| | |
|---|---|
| Synopsis | Absolute path or relative path from pwc |
| Context | discard [cli-path] *cli-path-type* |
| Tree | [cli-path] |
| Introduced | 20.10.R1 |
| Platforms | All |

### **insert** [new-entry] *instance-id*

| | |
|---|---|
| Synopsis | Insert an element into a user-ordered list |
| Context | insert *instance-id* |
| Tree | insert |
| Introduced | 19.10.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | All |

### [**new-entry**] *instance-id*

| | |
|---|---|
| Synopsis | Identification of the new entry |
| Context | insert *instance-id* |
| Tree | insert |
| Notes | This element is part of a list key. |
| Introduced | 19.10.R1 |
| Platforms | All |

### after

| | |
|---|---|
| Synopsis | Insert an entry after the specified entry |
| Context | insert *instance-id* after |
| Tree | after |
| Notes | The following elements are part of a choice: **after**, **before**, **beginning**, or **end**. |
| Introduced | 19.10.R1 |
| Platforms | All |

### [**cli-path**] *instance-id*

| | |
|---|---|
| Synopsis | Absolute path or relative path from pwc |
| Context | insert *instance-id* after [cli-path] *instance-id* |
| Tree | [cli-path] |
| Introduced | 19.10.R1 |
| Platforms | All |

### before

| | |
|---|---|
| Synopsis | Insert an entry before the specified entry |
| Context | insert *instance-id* before |
| Tree | before |
| Notes | The following elements are part of a choice: **after**, **before**, **beginning**, or **end**. |
| Introduced | 19.10.R1 |

| | |
|---|---|
| Platforms | All |

### [**cli-path**] *instance-id*

| | |
|---|---|
| Synopsis | Absolute path or relative path from pwc |
| Context | insert *instance-id* before [cli-path] *instance-id* |
| Tree | [cli-path] |
| Introduced | 19.10.R1 |
| Platforms | All |

### **beginning**

| | |
|---|---|
| Synopsis | Insert the new entry at the beginning of the list |
| Context | insert *instance-id* beginning |
| Tree | beginning |
| Notes | The following elements are part of a choice: **after**, **before**, **beginning**, or **end**. |
| Introduced | 19.10.R1 |
| Platforms | All |

### **end**

| | |
|---|---|
| Synopsis | Insert the new entry at the end of the list |
| Context | insert *instance-id* end |
| Tree | end |
| Notes | The following elements are part of a choice: **after**, **before**, **beginning**, or **end**. |
| Introduced | 19.10.R1 |
| Platforms | All |

### **load** [mode] *keyword*

| | |
|---|---|
| Synopsis | Load configuration into the candidate configuration |
| Context | load *keyword* |
| Tree | load |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### [**mode**] *keyword*

| | |
|---|---|
| Synopsis | Load mode |
| Context | load *keyword* |
| Tree | load |
| Options | merge – Merge with the candidate configuration<br>full-replace – Replace the candidate configuration |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

### **encryption-key** *string*

| | |
|---|---|
| Synopsis | Encryption key of the file to be loaded |
| Context | load *keyword* encryption-key *string* |
| Tree | encryption-key |
| String length | 8 to 32 |
| Notes | The following elements are part of a mandatory choice: **interactive** or (**encryption-key** and **url**). |
| Introduced | 21.7.R1 |
| Platforms | All |

### **interactive**

| | |
|---|---|
| Synopsis | Load the configuration interactively |
| Context | load *keyword* interactive |
| Tree | interactive |
| Description | This command allows the user to enter configuration commands directly in an interactive session.<br>This command is available with the **merge** option of the **load** command.<br>See "Loading configuration interactively" in the *7450 ESS, 7750 SR, 7950 XRS, and VSR MD-CLI User Guide* for more information. |
| Notes | The following elements are part of a mandatory choice: **interactive** or (**encryption-key** and **url**). |
| Introduced | 22.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### [**url**] *string*

| | |
|---|---|
| Synopsis | Location of the file to be loaded |
| Context | load *keyword* [url] *string* |
| Tree | [url] |
| String length | 1 to 255 |
| Notes | The following elements are part of a mandatory choice: **interactive** or (**encryption-key** and **url**). |
| Introduced | 16.0.R1 |
| Platforms | All |

### **rename**

| | |
|---|---|
| Synopsis | Rename a list element |
| Context | rename |
| Tree | rename |
| Introduced | 20.10.R1 |
| Platforms | All |

### [**cli-path**] *cli-path-type*

| | |
|---|---|
| Synopsis | Source element path to the list, or 'pwc' |
| Context | rename [cli-path] *cli-path-type* |
| Tree | [cli-path] |
| Introduced | 20.10.R1 |
| Platforms | All |

### **to** *cli-path-type*

| | |
|---|---|
| Synopsis | Destination key name |
| Context | rename to *cli-path-type* |
| Tree | to |
| Introduced | 20.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **replace** [pattern] *string* with *string*

| | |
|---|---|
| Synopsis | Match and replace values in the candidate configuration |
| Context | replace *string* with *string* |
| Tree | replace |
| Introduced | 23.7.R1 |
| Platforms | All |

### [**pattern**] *string*

| | |
|---|---|
| Synopsis | String (") or regular expression (') pattern to match |
| Context | replace *string* with *string* |
| Tree | replace |
| Description | This command configures a text string or regular expression that defines the values to match. |
| String length | 1 to 255 |
| Notes | This element is part of a list key. |
| Introduced | 23.7.R1 |
| Platforms | All |

### **with** *string*

| | |
|---|---|
| Synopsis | String (") or regular expression (') pattern to replace |
| Context | replace *string* with *string* |
| Tree | replace |
| String length | 0 to 255 |
| Notes | This element is part of a list key. |
| Introduced | 23.7.R1 |
| Platforms | All |

### [**cli-path**] *cli-path-type*

| | |
|---|---|
| Synopsis | Absolute path or relative path from pwc |
| Context | replace *string* with *string* [cli-path] *cli-path-type* |
| Tree | [cli-path] |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 23.7.R1 |
| Platforms | All |

### continue-on-error

| | |
|---|---|
| Synopsis | Continue the replace operation upon errors |
| Context | replace *string* with *string* continue-on-error |
| Tree | continue-on-error |
| Introduced | 23.7.R1 |
| Platforms | All |

### depth *number*

| | |
|---|---|
| Synopsis | Replace operation depth from the pwc |
| Context | replace *string* with *string* depth *number* |
| Tree | depth |
| Range | 1 to 4294967040 |
| Introduced | 23.7.R1 |
| Platforms | All |

### ignore-case

| | |
|---|---|
| Synopsis | Ignore case in pattern match |
| Context | replace *string* with *string* ignore-case |
| Tree | ignore-case |
| Introduced | 23.7.R1 |
| Platforms | All |

### rollback

| | |
|---|---|
| Synopsis | Roll back to a previous configuration |
| Context | rollback |
| Tree | rollback |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **commit-id** *number*

| | |
|---|---|
| Synopsis | Commit ID to roll back to |
| Context | rollback commit-id *number* |
| Tree | commit-id |
| Range | 1 to 4294967295 |
| Notes | The following elements are part of a choice: **commit-id** or **rollback-id**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### [**rollback-id**] *(keyword | number)*

| | |
|---|---|
| Synopsis | Previous configuration to roll back to |
| Context | rollback [rollback-id] *(keyword | number)* |
| Tree | [rollback-id] |
| Range | 0 to 200 |
| Options | startup – Configuration loaded when the system boots |
| Notes | The following elements are part of a choice: **commit-id** or **rollback-id**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **update**

| | |
|---|---|
| Synopsis | Update the candidate baseline |
| Context | update |
| Tree | update |
| Introduced | 16.0.R4 |
| Platforms | All |

### **/configure**

| | |
|---|---|
| Synopsis | Update the entire candidate |
| Context | update /configure |
| Tree | /configure |
| Introduced | 16.0.R4 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | All |

### /bof

| | |
|---|---|
| Synopsis | Update the entire BOF candidate |
| Context | update /bof |
| Tree | /bof |
| Introduced | 20.10.R1 |
| Platforms | All |

### check

| | |
|---|---|
| Synopsis | Perform dry-run update report without an actual update |
| Context | update check |
| Tree | check |
| Introduced | 16.0.R4 |
| Platforms | All |

### /debug

| | |
|---|---|
| Synopsis | Update the entire debug candidate |
| Context | update /debug |
| Tree | /debug |
| Introduced | 21.5.R1 |
| Platforms | All |

### /li

| | |
|---|---|
| Synopsis | Update the entire LI candidate |
| Context | update /li |
| Tree | /li |
| Introduced | 19.10.R1 |
| Platforms | All |

# 4 Configuration commands

This section lists MD-CLI configuration commands.

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

## 4.1 aaa commands

```
configure
  - aaa
    - apply-groups reference
    - apply-groups-exclude reference
    - diameter
      - node diam-fqdn
        - apply-groups reference
        - apply-groups-exclude reference
        - connection
          - ipv4
            - allow-connections boolean
            - local-address ipv4-unicast-address
          - ipv6
            - allow-connections boolean
            - local-address ipv6-unicast-address
          - timer number
        - description description
        - origin-realm diam-fqdn
        - peer index number
          - address (ipv4-address-no-zone | ipv6-address-no-zone)
          - admin-state keyword
          - apply-groups reference
          - apply-groups-exclude reference
          - connection-timer number
          - default-peer boolean
          - destination-host diam-fqdn
          - preference number
          - route index number
            - application keyword
            - apply-groups reference
            - apply-groups-exclude reference
            - preference number
            - realm diam-fqdn
          - watchdog-timer number
        - python-policy reference
        - router-instance string
    - radius
      - acct-on-off-group named-item
        - apply-groups reference
        - apply-groups-exclude reference
        - description description
      - coa-port number
      - isa-policy named-item
        - accounting
          - include-attributes
            - acct-delay-time boolean
            - acct-triggered-reason boolean
            - called-station-id boolean
            - calling-station-id boolean
            - circuit-id boolean
            - class boolean
            - credit-control-quota boolean
            - dhcp-options boolean
            - dhcp-vendor-class-id boolean
            - frame-counters boolean
            - framed-ip-address boolean
            - framed-ip-netmask boolean
            - framed-ipv6-prefix boolean
            - hardware-timestamp boolean
```

configure aaa radius isa-policy accounting include-attributes ipv6-address

```
                - ipv6-address boolean
                - mac-address boolean
                - millisecond-event-timestamp boolean
                - multi-session-id boolean
                - nas-identifier boolean
                - nas-ip-address boolean
                - nas-ipv6-address boolean
                - nas-port boolean
                - nas-port-id boolean
                - nas-port-type boolean
                - nat-inside-service-id boolean
                - nat-outside-ip-address boolean
                - nat-outside-service-id boolean
                - nat-port-forward-logging boolean
                - nat-port-range-block boolean
                - nat-port-time boolean
                - nat-subscriber-string boolean
                - octet-counters boolean
                - proxied-subscriber-data boolean
                - release-reason boolean
                - remote-id boolean
                - rssi boolean
                - session-time boolean
                - subscriber-id boolean
                - toserver-dhcp6-options boolean
                - ue-creation-type boolean
                - user-name boolean
                - wlan-custom-user-group boolean
                - wlan-ssid-vlan boolean
                - xconnect-tunnel-home-address boolean
                - xconnect-tunnel-local-ipv6-address boolean
                - xconnect-tunnel-remote-ipv6-address boolean
                - xconnect-tunnel-service boolean
                - xconnect-tunnel-type boolean
            - nat-periodic-update
                - interval number
                - rate-limit (number | keyword)
            - update-triggers
                - address-state boolean
                - soft-quota-exhausted boolean
        - apply-groups reference
        - apply-groups-exclude reference
        - authentication
            - include-attributes
                - called-station-id boolean
                - calling-station-id boolean
                - circuit-id boolean
                - dhcp-vendor-class-id boolean
                - framed-ip-address boolean
                - ipv6-address boolean
                - mac-address boolean
                - nas-identifier boolean
                - nas-ip-address boolean
                - nas-ipv6-address boolean
                - nas-port boolean
                - nas-port-id boolean
                - nas-port-type boolean
                - remote-id boolean
                - toserver-dhcp-options boolean
                - toserver-dhcp6-options boolean
                - wlan-ssid-vlan boolean
                - xconnect-tunnel-home-address boolean
        - description description
        - nas-ip-address-origin keyword
```

## 4.1.1 aaa command descriptions

### aaa

| | |
|---|---|
| Synopsis | Enter the **aaa** context |
| Context | **configure** aaa |
| Tree | aaa |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### diameter

| | |
|---|---|
| Synopsis | Enter the **diameter** context |
| Context | **configure** aaa diameter |
| Tree | diameter |
| Description | Commands in this context configure Diameter Base parameters. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **node** [origin-host] *diam-fqdn*

| | |
|---|---|
| Synopsis | Enter the **node** list instance |
| Context | **configure** aaa diameter node *diam-fqdn* |
| Tree | node |
| Max. instances | 32 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### [**origin-host**] *diam-fqdn*

| | |
|---|---|
| Synopsis | Origin-Host AVP |
| Context | **configure** aaa diameter node *diam-fqdn* |
| Tree | node |
| String length | 1 to 80 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## connection

| | |
|---|---|
| Synopsis | Enter the **connection** context |
| Context | **configure** aaa diameter node *diam-fqdn* connection |
| Tree | connection |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## ipv4

| | |
|---|---|
| Synopsis | Enter the **ipv4** context |
| Context | **configure** aaa diameter node *diam-fqdn* connection ipv4 |
| Tree | ipv4 |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## allow-connections *boolean*

| | |
|---|---|
| Synopsis | Listen on local address for incoming peer connections |
| Context | **configure** aaa diameter node *diam-fqdn* connection ipv4 allow-connections *boolean* |
| Tree | allow-connections |
| Description | When configured to **true**, this command is used in multi-chassis redundancy where the local Diameter node accepts connection from the inter-chassis peer. The peer requesting the connection must have the same Diameter name as the local peer and its source address must match the IP address of the locally configured destination peer.<br><br>The IPv4 address on which the node listens for incoming connection is the configured source address of the local peer. This source IPv4 address can reference any local interface, including loopbacks.<br><br>When configured to **false**, incoming requests for connections are refused. |
| Default | false |
| Introduced | 19.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **local-address** *ipv4-unicast-address*

| | |
|---|---|
| Synopsis | IPv4 source address for the TCP peer connection |
| Context | **configure** aaa diameter node *diam-fqdn* connection ipv4 local-address *ipv4-unicast-address* |
| Tree | local-address |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **ipv6**

| | |
|---|---|
| Synopsis | Enter the **ipv6** context |
| Context | **configure** aaa diameter node *diam-fqdn* connection ipv6 |
| Tree | ipv6 |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **allow-connections** *boolean*

| | |
|---|---|
| Synopsis | Listen on local address for incoming peer connections |
| Context | **configure** aaa diameter node *diam-fqdn* connection ipv6 allow-connections *boolean* |
| Tree | allow-connections |
| Default | false |
| Introduced | 19.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **local-address** *ipv6-unicast-address*

| | |
|---|---|
| Synopsis | IPv6 source address for the TCP peer connection |
| Context | **configure** aaa diameter node *diam-fqdn* connection ipv6 local-address *ipv6-unicast-address* |
| Tree | local-address |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **timer** *number*

| | |
|---|---|
| Synopsis | Wait time before attempting reconnection to peer |
| Context | **configure** aaa diameter node *diam-fqdn* connection timer *number* |
| Tree | timer |
| Description | This command configures the time the system waits before attempting to reconnect to a peer after the connection is lost. |
| Range | 1 to 1000 |
| Units | seconds |
| Default | 30 |
| Introduced | 16.0.R6 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** aaa diameter node *diam-fqdn* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **origin-realm** *diam-fqdn*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Origin-realm name |
| Context | **configure** aaa diameter node *diam-fqdn* origin-realm *diam-fqdn* |
| Tree | origin-realm |
| String length | 1 to 80 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **peer** index *number*

| | |
|---|---|
| Synopsis | Enter the **peer** list instance |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* |
| Tree | peer |
| Max. instances | 5 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **index** *number*

| | |
|---|---|
| Synopsis | Index of a peer within the node |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* |
| Tree | peer |
| Range | 1 to 5 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Diameter peer address |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | address |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the Diameter peer |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **connection-timer** *number*

| | |
|---|---|
| Synopsis | Wait time before attempting reconnection to peer |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* connection-timer *number* |
| Tree | connection-timer |
| Range | 1 to 1000 |
| Units | seconds |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **default-peer** *boolean*

| | |
|---|---|
| Synopsis | Use the peer as default route for realm-based routing |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* default-peer *boolean* |
| Tree | default-peer |
| Default | false |
| Introduced | 19.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **destination-host** *diam-fqdn*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Destination-Host AVP string for Diameter messages |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* destination-host *diam-fqdn* |
| Tree | destination-host |
| String length | 1 to 80 |
| Notes | This element is mandatory. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **preference** *number*

| | |
|---|---|
| Synopsis | Diameter routing preference for a peer |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* preference *number* |
| Tree | preference |
| Range | 1 to 100 |
| Default | 50 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **route** index *number*

| | |
|---|---|
| Synopsis | Enter the **route** list instance |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* route index *number* |
| Tree | route |
| Max. instances | 15 |
| Introduced | 20.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **index** *number*

| | |
|---|---|
| Synopsis | Static Diameter route ID |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* route index *number* |
| Tree | route |
| Description | This command configures the ID of the static route used to reach remote realms that are not directly connected to the origin realm. The route can also be used to override the route preference (peer preference) of the directly-connected realms. |
| Range | 1 to 15 |
| Notes | This element is part of a list key. |
| Introduced | 20.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **application** *keyword*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Diameter application to which the route applies |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* route index *number* application *keyword* |
| Tree | application |
| Description | This command specifies the Diameter application in the destination realm reachable via the static route. |
| Options | nasreq, gy, gx |
| Notes | This element is mandatory. |
| Introduced | 20.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **preference** *number*

| | |
|---|---|
| Synopsis | Static route preference; lower value is preferred |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* route index *number* preference *number* |
| Tree | preference |
| Description | This command configures the preference of the static route. The preference is compared with the preference values of all other static and dynamic routes. The dynamic route is a realm route learned directly from the peer via the Capabilities Exchange process during the peer negotiation phase. The preference value of the dynamic route is configured directly under the peer configuration. A lower preference value is preferred for route selection. |
| Range | 1 to 100 |
| Default | 50 |
| Introduced | 20.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

## **realm** *diam-fqdn*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Destination realm reachable via the static route |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* route index *number* realm *diam-fqdn* |
| Tree | realm |
| String length | 1 to 80 |
| Notes | This element is mandatory. |
| Introduced | 20.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **watchdog-timer** *number*

| | |
|---|---|
| Synopsis | Time between consecutive watchdog messages |
| Context | **configure** aaa diameter node *diam-fqdn* peer index *number* watchdog-timer *number* |
| Tree | watchdog-timer |
| Range | 1 to 1000 |
| Units | seconds |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **python-policy** *reference*

| | |
|---|---|
| Synopsis | Python policy for received or sent Diameter messages |
| Context | **configure** aaa diameter node *diam-fqdn* python-policy *reference* |
| Tree | python-policy |
| Reference | **configure** python python-policy *named-item* |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **router-instance** *string*

| | |
|---|---|
| Synopsis | Router in which this node connects to its peers |
| Context | **configure** aaa diameter node *diam-fqdn* router-instance *string* |
| Tree | router-instance |
| Default | Base |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **radius**

| | |
|---|---|
| Synopsis | Enter the **radius** context |
| Context | **configure** aaa radius |
| Tree | radius |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **acct-on-off-group** [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **acct-on-off-group** list instance |
| Context | **configure** aaa radius acct-on-off-group *named-item* |
| Tree | acct-on-off-group |
| Max. instances | 32 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | Group name for accounting on/off |
| Context | **configure** aaa radius acct-on-off-group *named-item* |
| Tree | acct-on-off-group |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** aaa radius acct-on-off-group *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **coa-port** *number*

| | |
|---|---|
| Synopsis | RADIUS listening port for CoA and Disconnect messages |
| Context | **configure** aaa radius coa-port *number* |
| Tree | coa-port |
| Range | 1647 \| 1700 \| 1812 \| 3799 |
| Default | 3799 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **isa-policy** [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **isa-policy** list instance |
| Context | **configure** aaa radius isa-policy *named-item* |
| Tree | isa-policy |
| Max. instances | 8 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | ISA RADIUS policy name referenced by a NAT application |
| Context | **configure** aaa radius isa-policy *named-item* |
| Tree | isa-policy |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## accounting

| | |
|---|---|
| Synopsis | Enter the **accounting** context |
| Context | **configure** aaa radius isa-policy *named-item* accounting |
| Tree | accounting |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## include-attributes

| | |
|---|---|
| Synopsis | Enter the **include-attributes** context |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes |
| Tree | include-attributes |
| Description | Commands in this context specify the attributes to include in the RADIUS accounting messages. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## acct-delay-time *boolean*

| | |
|---|---|
| Synopsis | Include the accounting delay time attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes acct-delay-time *boolean* |
| Tree | acct-delay-time |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## acct-triggered-reason *boolean*

| | |
|---|---|
| Synopsis | Include the accounting triggered reason attribute |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes acct-triggered-reason *boolean* |
| Tree | acct-triggered-reason |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **called-station-id** *boolean*

| | |
|---|---|
| Synopsis | Include the Called-Station-Id attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes called-station-id *boolean* |
| Tree | called-station-id |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **calling-station-id** *boolean*

| | |
|---|---|
| Synopsis | Include the Calling-Station-Id attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes calling-station-id *boolean* |
| Tree | calling-station-id |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **circuit-id** *boolean*

| | |
|---|---|
| Synopsis | Include the Agent-Circuit-Id attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes circuit-id *boolean* |
| Tree | circuit-id |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

### **class** *boolean*

| | |
|---|---|
| Synopsis | Include the Class attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes class *boolean* |
| Tree | class |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **credit-control-quota** *boolean*

| | |
|---|---|
| Synopsis | Add unconsumed volume quota to Credit-Control-Quota |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes credit-control-quota *boolean* |
| Tree | credit-control-quota |
| Default | false |
| Introduced | 21.7.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **dhcp-options** *boolean*

| | |
|---|---|
| Synopsis | Include the Alc-ToServer-Dhcp-Options attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes dhcp-options *boolean* |
| Tree | dhcp-options |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **dhcp-vendor-class-id** *boolean*

| | |
|---|---|
| Synopsis | Include the Alc-Dhcp-Vendor-Class-Id attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes dhcp-vendor-class-id *boolean* |
| Tree | dhcp-vendor-class-id |
| Default | false |

Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **frame-counters** *boolean*

| | |
|---|---|
| Synopsis | Include Acct-Input-Packets and Acct-Output-Packets |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes frame-counters *boolean* |
| Tree | frame-counters |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **framed-ip-address** *boolean*

| | |
|---|---|
| Synopsis | Include the Framed-IP-Address attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes framed-ip-address *boolean* |
| Tree | framed-ip-address |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **framed-ip-netmask** *boolean*

| | |
|---|---|
| Synopsis | Include the Framed-IP-Netmask attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes framed-ip-netmask *boolean* |
| Tree | framed-ip-netmask |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **framed-ipv6-prefix** *boolean*

| | |
|---|---|
| Synopsis | Include the Framed-IPv6-Prefix attribute |

| | |
|---|---|
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes framed-ipv6-prefix *boolean* |
| Tree | framed-ipv6-prefix |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **hardware-timestamp** *boolean*

| | |
|---|---|
| Synopsis | Include the Event-Timestamp attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes hardware-timestamp *boolean* |
| Tree | hardware-timestamp |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ipv6-address** *boolean*

| | |
|---|---|
| Synopsis | Include the Alc-Ipv6-Address attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes ipv6-address *boolean* |
| Tree | ipv6-address |
| Description | When configured to **true**, the IA_NA address of the UE is included in the accounting message if an active IA_NA lease exists.<br>When configured to **false**, the address is not included. |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **mac-address** *boolean*

| | |
|---|---|
| Synopsis | Include the Alc-Client-Hardware-Addr attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes mac-address *boolean* |
| Tree | mac-address |
| Default | false |

| | |
|---|---|
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **millisecond-event-timestamp** *boolean*

| | |
|---|---|
| Synopsis | Include the Alc-Millisecond-Event-Timestamp attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes millisecond-event-timestamp *boolean* |
| Tree | millisecond-event-timestamp |
| Description | When configured to **true**, the router includes the Alc-Millisecond-Event-Timestamp attribute in the accounting message. This attribute includes the time the accounting event was logged in milliseconds since Jan 1, 1970 00:00:00 UTC.<br>When configured to **false**, the router does not include this attribute. |
| Default | false |
| Introduced | 20.10.R1 |
| Platforms | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **multi-session-id** *boolean*

| | |
|---|---|
| Synopsis | Include the Acct-Multi-Session-Id attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes multi-session-id *boolean* |
| Tree | multi-session-id |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nas-identifier** *boolean*

| | |
|---|---|
| Synopsis | Include the NAS-Identifier attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nas-identifier *boolean* |
| Tree | nas-identifier |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

### **nas-ip-address** *boolean*

| | |
|---|---|
| Synopsis | Include the NAS-IP-Address attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nas-ip-address *boolean* |
| Tree | nas-ip-address |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nas-ipv6-address** *boolean*

| | |
|---|---|
| Synopsis | Include the NAS-IPv6-Address attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nas-ipv6-address *boolean* |
| Tree | nas-ipv6-address |
| Description | When configured to **true**, the router includes the NAS-IPv6-Address attribute in RADIUS accounting messages using the address specified in the **configure aaa radius isa-policy nas-ip-address-origin** command. The NAS-IPv6-Address attribute is included in both IPv4 and IPv6 RADIUS connections.<br>When configured to **false**, the router does not include the NAS-IPv6-Address attribute in RADIUS accounting messages. |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nas-port** *boolean*

| | |
|---|---|
| Synopsis | Include the NAS-Port attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nas-port *boolean* |
| Tree | nas-port |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

### **nas-port-id** *boolean*

| | |
|---|---|
| Synopsis | Include the NAS-Port-Id attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nas-port-id *boolean* |
| Tree | nas-port-id |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nas-port-type** *boolean*

| | |
|---|---|
| Synopsis | Include the NAS-Port-Type attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nas-port-type *boolean* |
| Tree | nas-port-type |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nat-inside-service-id** *boolean*

| | |
|---|---|
| Synopsis | Include NAT inside service ID in Alc-Serv-Id attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nat-inside-service-id *boolean* |
| Tree | nat-inside-service-id |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nat-outside-ip-address** *boolean*

| | |
|---|---|
| Synopsis | Include the Alc-Nat-Outside-Ip-Addr attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nat-outside-ip-address *boolean* |
| Tree | nat-outside-ip-address |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nat-outside-service-id** *boolean*

| | |
|---|---|
| Synopsis | Include NAT outside service ID in Alc-Serv-Id attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nat-outside-service-id *boolean* |
| Tree | nat-outside-service-id |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nat-port-forward-logging** *boolean*

| | |
|---|---|
| Synopsis | Enable logging of port forwards via RADIUS |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nat-port-forward-logging *boolean* |
| Tree | nat-port-forward-logging |
| Description | When configured to **true**, the router enables static or PCP port-forward logging via RADIUS. Port-forward logging is supported only in conjunction with the logging of port blocks.<br>When configured to **false**, the router disables static or PCP port-forward logging. |
| Default | false |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nat-port-range-block** *boolean*

| | |
|---|---|
| Synopsis | Include the Alc-Nat-Port-Range attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nat-port-range-block *boolean* |
| Tree | nat-port-range-block |
| Default | false |
| Introduced | 16.0.R4 |

© 2024 Nokia.

|---|---|
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nat-port-time** *boolean*

| | |
|---|---|
| Synopsis | Enable the Alc-Nat-Port-Time RADIUS attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nat-port-time *boolean* |
| Tree | nat-port-time |
| Description | When configured to **true**, the router records the duration of port-blocks or port-forwards allocated to a NAT subscriber using the Alc-Nat-Port-Time RADIUS attribute.<br>When configured to **false**, the router disables the Alc-Nat-Port-Time RADIUS attribute. |
| Default | false |
| Introduced | 24.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nat-subscriber-string** *boolean*

| | |
|---|---|
| Synopsis | Include the Alc-Subsc-ID-Str attribute |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes nat-subscriber-string *boolean* |
| Tree | nat-subscriber-string |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **octet-counters** *boolean*

| | |
|---|---|
| Synopsis | Include Acct-Input-Octets and Acct-Output-Octets |
| Context | **configure** aaa radius isa-policy *named-item* accounting include-attributes octet-counters *boolean* |
| Tree | octet-counters |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

| | |
|---|---|
| Default | true |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **nas-ipv6-address** *boolean*

| | |
|---|---|
| Synopsis | Include the NAS-IPv6-Address attribute |
| Context | **configure** aaa radius isa-policy *named-item* authentication include-attributes nas-ipv6-address *boolean* |
| Tree | nas-ipv6-address |
| Description | When configured to **true**, the router includes the NAS-IPv6-Address attribute in RADIUS authentication messages using the address specified in the **configure aaa radius isa-policy nas-ip-address-origin** command. The NAS-IPv6-Address attribute is included in both IPv4 and IPv6 RADIUS connections.<br>When configured to **false**, the router does not include the NAS-IPv6-Address attribute in RADIUS authentication messages. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **nas-port** *boolean*

| | |
|---|---|
| Synopsis | Include the NAS-Port attribute |
| Context | **configure** aaa radius isa-policy *named-item* authentication include-attributes nas-port *boolean* |
| Tree | nas-port |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **nas-port-id** *boolean*

| | |
|---|---|
| Synopsis | Include the NAS-Port-Id attribute |
| Context | **configure** aaa radius isa-policy *named-item* authentication include-attributes nas-port-id *boolean* |
| Tree | nas-port-id |
| Default | false |
| Introduced | 16.0.R4 |

| | |
|---|---|
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nas-port-type** *boolean*

| | |
|---|---|
| Synopsis | Include the NAS-Port-Type attribute |
| Context | **configure** aaa radius isa-policy *named-item* authentication include-attributes nas-port-type *boolean* |
| Tree | nas-port-type |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **remote-id** *boolean*

| | |
|---|---|
| Synopsis | Include the Agent-Remote-Id attribute |
| Context | **configure** aaa radius isa-policy *named-item* authentication include-attributes remote-id *boolean* |
| Tree | remote-id |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **toserver-dhcp-options** *boolean*

| | |
|---|---|
| Synopsis | Include the Alc-ToServer-Dhcp-Options attribute |
| Context | **configure** aaa radius isa-policy *named-item* authentication include-attributes toserver-dhcp-options *boolean* |
| Tree | toserver-dhcp-options |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **toserver-dhcp6-options** *boolean*

| | |
|---|---|
| Synopsis | Include the Alc-ToServer-Dhcp6-Options attribute |
| Context | **configure** aaa radius isa-policy *named-item* authentication include-attributes toserver-dhcp6-options *boolean* |

### **access-algorithm** *keyword*

| | |
|---|---|
| Synopsis | Algorithm that accesses the RADIUS servers |
| Context | **configure** aaa radius isa-policy *named-item* servers access-algorithm *keyword* |
| Tree | access-algorithm |
| Options | direct, round-robin, hash-based, direct-priority |
| Default | direct |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ipv6**

| | |
|---|---|
| Synopsis | Enter the **ipv6** context |
| Context | **configure** aaa radius isa-policy *named-item* servers ipv6 |
| Tree | ipv6 |
| Description | Commands in this context configure how to communicate with IPv6 RADIUS servers. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **mtu** *number*

| | |
|---|---|
| Synopsis | MTU used to fragment outgoing IPv6 RADIUS packets |
| Context | **configure** aaa radius isa-policy *named-item* servers ipv6 mtu *number* |
| Tree | mtu |
| Range | 1280 to 9000 |
| Default | 9000 |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **source-prefix** *ipv6-prefix*

| | |
|---|---|
| Synopsis | Prefix containing individual source addresses per ISA |
| Context | **configure** aaa radius isa-policy *named-item* servers ipv6 source-prefix *ipv6-prefix* |
| Tree | source-prefix |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | This command configures an IPv6 prefix containing individual /128 addresses. These addresses are used as the source address for connections to IPv6 RADIUS servers.<br>The prefix must be large enough to accommodate all BB-ISAs or ESA VMs in the system. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **router-instance** *string*

| | |
|---|---|
| Synopsis | Routing instance |
| Context | **configure** aaa radius isa-policy *named-item* servers router-instance *string* |
| Tree | router-instance |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **server** [index] *number*

| | |
|---|---|
| Synopsis | Enter the **server** list instance |

| | |
|---|---|
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **suffix** *keyword*

| | |
|---|---|
| Synopsis | NAS-Port-Id suffix type |
| Context | **configure** aaa radius l2tp-accounting-policy *named-item* include-radius-attribute nas-port-id suffix *keyword* |
| Tree | suffix |
| Options | circuit-id, remote-id |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **nas-port-type**

| | |
|---|---|
| Synopsis | Enable the **nas-port-type** context |
| Context | **configure** aaa radius l2tp-accounting-policy *named-item* include-radius-attribute nas-port-type |
| Tree | nas-port-type |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **type** *(keyword | number)*

| | |
|---|---|
| Synopsis | Value for RADIUS NAS-Port-Type attribute |
| Context | **configure** aaa radius l2tp-accounting-policy *named-item* include-radius-attribute nas-port-type type *(keyword \| number)* |
| Tree | type |
| Range | 0 to 255 |
| Options | rfc-aligned |
| Default | rfc-aligned |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **radius-server-policy** *reference*

| | |
|---|---|
| Synopsis | RADIUS server policy referenced |
| Context | **configure** aaa radius l2tp-accounting-policy *named-item* radius-server-policy *reference* |
| Tree | radius-server-policy |
| Reference | **configure** aaa radius server-policy *named-item* |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **route-downloader** [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **route-downloader** list instance |
| Context | **configure** aaa radius route-downloader *named-item* |
| Tree | route-downloader |
| Max. instances | 1 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | RADIUS route downloader name |
| Context | **configure** aaa radius route-downloader *named-item* |
| Tree | route-downloader |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of this route downloader |
| Context | **configure** aaa radius route-downloader *named-item* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Default | disable |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **base-user-name** *named-item*

| | |
|---|---|
| Synopsis | Prefix of the username used as access requests |
| Context | **configure** aaa radius route-downloader *named-item* base-user-name *named-item* |
| Tree | base-user-name |
| Description | This command sets the prefix for the username that is used for access requests. The actual name used is a concatenation of this string, the "-" (dash) character and a monotonically increasing integer. |
| String length | 1 to 32 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **default-metric** *number*

| | |
|---|---|
| Synopsis | Default metric that RTM imported routes acquire |
| Context | **configure** aaa radius route-downloader *named-item* default-metric *number* |
| Tree | default-metric |
| Range | 0 to 254 |
| Default | 2 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **default-tag** *number*

| | |
|---|---|
| Synopsis | Default tag of this route downloader |
| Context | **configure** aaa radius route-downloader *named-item* default-tag *number* |
| Tree | default-tag |
| Range | 0 to 4294967295 |
| Default | 0 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** aaa radius route-downloader *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **download-interval** *number*

| | |
|---|---|
| Synopsis | Wait time between consecutive runs of the process |
| Context | **configure** aaa radius route-downloader *named-item* download-interval *number* |
| Tree | download-interval |
| Range | 1 to 1440 |
| Units | minutes |
| Default | 720 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **max-routes** *number*

| | |
|---|---|
| Synopsis | Maximum routes imported by this route downloader |
| Context | **configure** aaa radius route-downloader *named-item* max-routes *number* |
| Tree | max-routes |
| Range | 1 to 200000 |
| Default | 200000 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **password** *encrypted-leaf*

| | |
|---|---|
| Synopsis | Route downloader password for RADIUS access requests |
| Context | **configure** aaa radius route-downloader *named-item* password *encrypted-leaf* |
| Tree | password |

© 2024 Nokia.

| | |
|---|---|
| String length | 1 to 71 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **radius-server-policy** *reference*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | RADIUS server policy referenced |
| Context | **configure** aaa radius route-downloader *named-item* radius-server-policy *reference* |
| Tree | radius-server-policy |
| Reference | **configure** aaa radius server-policy *named-item* |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **retry-interval**

| | |
|---|---|
| Synopsis | Enter the **retry-interval** context |
| Context | **configure** aaa radius route-downloader *named-item* retry-interval |
| Tree | retry-interval |
| Description | Commands in this context configure parameters of the retry interval timer, which is an exponential backoff timer. The system retries sending an Access Request message after the previous message was unanswered (for example, a RADIUS failure or ICMP port unreachable error). |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **max** *number*

| | |
|---|---|
| Synopsis | Maximum duration of the retry interval |
| Context | **configure** aaa radius route-downloader *named-item* retry-interval max *number* |
| Tree | max |
| Range | 1 to 1440 |
| Units | minutes |
| Default | 20 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **min** *number*

| | |
|---|---|
| Synopsis | Minimum duration of the retry interval |
| Context | **configure** aaa radius route-downloader *named-item* retry-interval min *number* |
| Tree | min |
| Description | This command specifies the minimum duration of the retry interval. This duration grows exponentially after each sequential failure. |
| Range | 1 to 1440 |
| Units | minutes |
| Default | 10 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **server-policy** [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **server-policy** list instance |
| Context | **configure** aaa radius server-policy *named-item* |
| Tree | server-policy |
| Max. instances | 32 |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | RADIUS server policy name |
| Context | **configure** aaa radius server-policy *named-item* |
| Tree | server-policy |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

## acct-on-off

| | |
|---|---|
| Synopsis | Enable the **acct-on-off** context |
| Context | **configure** aaa radius server-policy *named-item* acct-on-off |
| Tree | acct-on-off |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## monitor *reference*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Accounting on/off group name |
| Context | **configure** aaa radius server-policy *named-item* acct-on-off monitor *reference* |
| Tree | monitor |
| Reference | **configure** aaa radius acct-on-off-group *named-item* |
| Notes | The following elements are part of a choice: **monitor** or **oper-state-change**. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## oper-state-change

| | |
|---|---|
| Synopsis | Enable the **oper-state-change** context |
| Context | **configure** aaa radius server-policy *named-item* acct-on-off oper-state-change |
| Tree | oper-state-change |
| Notes | The following elements are part of a choice: **monitor** or **oper-state-change**. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## 4.2 anysec commands

```
configure
   –  anysec
      –  apply-groups reference
      –  apply-groups-exclude reference
      –  mka-over-ip
         –  mka-udp-port number
      –  reserved-label-block reference
      –  tunnel-encryption
         –  encryption-group named-item
            –  admin-state keyword
            –  apply-groups reference
            –  apply-groups-exclude reference
            –  ca-name reference
            –  encryption-label number
            –  peer (ipv4-address-no-zone | ipv6-address-no-zone)
               –  admin-state keyword
               –  apply-groups reference
               –  apply-groups-exclude reference
            –  peer-tunnel-attributes
               –  flex-algo-id number
               –  igp-instance-id number
               –  protocol keyword
            –  security-termination-policy reference
         –  security-termination-policy named-item
            –  admin-state keyword
            –  apply-groups reference
            –  apply-groups-exclude reference
            –  flex-algo-id number
            –  igp-instance-id number
            –  local-address (ipv4-address-no-zone | ipv6-address-no-zone)
            –  protocol keyword
            –  rx-must-be-encrypted boolean
```

## 4.2.1 anysec command descriptions

### anysec

| | |
|---|---|
| Synopsis | Enter the **anysec** context |
| Context | **configure** anysec |
| Tree | anysec |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

### mka-over-ip

| | |
|---|---|
| Synopsis | Enter the **mka-over-ip** context |
| Context | **configure** anysec mka-over-ip |
| Tree | mka-over-ip |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

### mka-udp-port *number*

| | |
|---|---|
| Synopsis | ANYSec MKA UDP port |
| Context | **configure** anysec mka-over-ip mka-udp-port *number* |
| Tree | mka-udp-port |
| Description | This command configures the UDP port that identifies the MKA packet on the system.<br>Nokia recommends configuring this UDP port network wide. In addition, ensure the UDP port is not used by any other protocols in the network. |
| Range | 1024 to 49151 |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

### reserved-label-block *reference*

| | |
|---|---|
| Synopsis | ANYSec reserved label block |
| Context | **configure** anysec reserved-label-block *reference* |
| Tree | reserved-label-block |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | This command assigns the label block that is reserved for the ANYsec encryption SID. Without this reserved block, ANYsec cannot assign any encryption SIDs. The encryption SID uniquely identifies the encrypting node within a network and avoids double encryption scenarios. The encryption SID can be assigned per encryption group. However, all encryption groups can have the same encryption SID.<br>To save label space, Nokia recommends limiting the number of encryption SIDs within a network. |
| Reference | **configure** router *named-item-64* mpls-labels reserved-label-block *named-item-64* |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

## tunnel-encryption

| | |
|---|---|
| Synopsis | Enter the **tunnel-encryption** context |
| Context | **configure** anysec tunnel-encryption |
| Tree | tunnel-encryption |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

## encryption-group [group-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **encryption-group** list instance |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* |
| Tree | encryption-group |
| Description | Commands in this context create an encryption group.<br>An encryption group is a group of LSPs that use the same CA and preshared keys (PSK). For ease of PSK management, SR OS allows a group of LSPs to use the same CA with the same PSKs. The PSK is used to secure the SAK for distribution to other PEERs.<br>Note: Although the LSPs are unidirectional, ANYsec is a bidirectional concept where a pair of LSPs between two peers are encrypted and decrypted. Each pair of LSPs uses its own SAK for maximum security, although they may share the same CA and PSK with all other LSPs in the encryption group to secure the SAK. |
| Max. instances | 1023 |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### [**group-name**] *named-item*

| | |
|---|---|
| Synopsis | ANYsec encryption group name |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* |
| Tree | encryption-group |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the encryption group |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 23.3.R2 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

### **ca-name** *reference*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Connectivity association for the encryption group |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* ca-name *reference* |
| Tree | ca-name |
| Description | This command configures the CA used for this encryption group.<br>A CA must be configured with the keyword **anysec** for use in the encryption group. |
| Reference | **configure** macsec connectivity-association *string* |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

© 2024 Nokia.

### **encryption-label** *number*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Label identifying packets sent from the node to peers |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* encryption-label *number* |
| Tree | encryption-label |
| Description | This command creates an encryption SD for the encryption group.<br>The encryption SID uniquely identifies the encrypting node within a network to avoid double encryption scenarios. The encryption SID can be assigned per encryption group. However, all encryption groups can have the same encryption SID. To save label space, Nokia recommends limiting the number of encryption SIDs within a network. To configure the encryption SID, a **reserved-label-block** command must be configured under the **anysec** context. The encryption SID is programmed at the bottom of the stack with the S-it set. |
| Range | 32 to 1048575 |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

### **peer** [peer-ip-address] *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Enter the **peer** list instance |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | peer |
| Max. instances | 1023 |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

### [**peer-ip-address**] *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Peer IP address of the node SID |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | peer |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | This command configures the IPv4 or IPv6 address of the node SID of the peer that is part of this encryption group.<br>This configuration identifies the segment routing node SID of the peer and programs the egress label stack for matching on the FP5 for encrypting the LSP.<br>When the label stack is downloaded, the encryption SID is also included at the bottom of the stack with the S-bit set. |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

## **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the encryption group peer |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

## **peer-tunnel-attributes**

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Enter the **peer-tunnel-attributes** context |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* peer-tunnel-attributes |
| Tree | peer-tunnel-attributes |
| Description | Commands in this context configure the peer-tunnel attributes.<br>Tunnel attributes are used to match and identify the outgoing tunnels for encryptoin with ANYsec. A single tunnel attribute is used for multiple peers. Since an LSP is unidirectional, the outgoing tunnel can have different attributes from the incoming tunnel (for example, security termination policy). |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

## **flex-algo-id** *number*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Flexible algorithm ID |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* peer-tunnel-attributes flex-algo-id *number* |
| Tree | flex-algo-id |
| Description | This command configures the flexible algorithm ID. This ID must match the local terminating ANYsec tunnel. |
| Range | 128 to 255 |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

## **igp-instance-id** *number*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | IGP instance ID |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* peer-tunnel-attributes igp-instance-id *number* |
| Tree | igp-instance-id |
| Description | This command configures the IGP instance ID. This IGP instance ID must match the IGP instance that the incoming encrypted LSP was signaled on. |
| Range | 0 to 31 \| 64 to 95 |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

## **protocol** *keyword*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Synopsis | Protocol used to advertise node SID of incoming tunnel |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* peer-tunnel-attributes protocol *keyword* |
| Tree | protocol |
| Options | sr-ospf, sr-ospf3, sr-isis |
| Default | sr-isis |
| Introduced | 23.10.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

## **security-termination-policy** *reference*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Security termination policy used by encryption group |
| Context | **configure** anysec tunnel-encryption encryption-group *named-item* security-termination-policy *reference* |

| | |
|---|---|
| Context | **configure** anysec tunnel-encryption security-termination-policy *named-item* protocol *keyword* |
| Tree | protocol |
| Options | sr-ospf, sr-ospf3, sr-isis |
| Default | sr-isis |
| Introduced | 23.10.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

## **rx-must-be-encrypted** *boolean*

| | |
|---|---|
| Synopsis | Enforce encryption for received packets |
| Context | **configure** anysec tunnel-encryption security-termination-policy *named-item* rx-must-be-encrypted *boolean* |
| Tree | rx-must-be-encrypted |
| Description | When configured to **true**, the router accepts all arriving traffic that is ANYsec secured on the port. All other traffic is dropped.<br>When configured to **false**, the router accepts all arriving traffic on the port. |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | 7750 SR-1 (FP5), 7750 SR-1se |

## 4.3 application-assurance commands

```
configure
   –  application-assurance
      –  aarp number
         –  admin-state keyword
         –  apply-groups reference
         –  apply-groups-exclude reference
         –  description description
         –  master-selection-mode keyword
         –  peer (ipv4-address-no-zone | ipv6-address-no-zone)
         –  peer-endpoint
            –  sap
               –  encap-type keyword
               –  sap-id sap
            –  spoke-sdp sdp-bind-id
         –  priority number
      –  apply-groups reference
      –  apply-groups-exclude reference
      –  cflowd
         –  field named-item
            –  apply-groups reference
            –  apply-groups-exclude reference
            –  comment named-item
      –  flow-attribute
         –  attribute named-item
            –  apply-groups reference
            –  apply-groups-exclude reference
            –  comment named-item
      –  group number
         –  apply-groups reference
         –  apply-groups-exclude reference
         –  certificate-profile named-item
            –  admin-state keyword
            –  apply-groups reference
            –  apply-groups-exclude reference
            –  description description
            –  file certificate-file
         –  cflowd
            –  admin-state keyword
            –  apply-groups reference
            –  apply-groups-exclude reference
            –  collector (ipv4-address-no-zone | ipv6-address-no-zone) port number
               –  admin-state keyword
               –  apply-groups reference
               –  apply-groups-exclude reference
               –  description description
            –  comprehensive
               –  apply-groups reference
               –  apply-groups-exclude reference
               –  flow-rate number
               –  flow-rate-2 number
               –  template
                  –  apply-groups reference
                  –  apply-groups-exclude reference
                  –  dynamic-fields
                     –  admin-state keyword
                     –  field named-item
                  –  field-selection keyword
            –  direct-export
               –  collector number
```

## 4.3.1 application-assurance command descriptions

### application-assurance

| | |
|---|---|
| Synopsis | Enter the **application-assurance** context |
| Context | **configure** application-assurance |
| Tree | application-assurance |
| Description | Commands in this context configure the attributes of Application Assurance (AA) operations. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **aarp** [aarp-id] *number*

| | |
|---|---|
| Synopsis | Enter the **aarp** list instance |
| Context | **configure** application-assurance aarp *number* |
| Tree | aarp |
| Description | Commands in this context define an Application Assurance Redundancy Protocol (AARP) instance. This instance is paired with the same AARP ID in a peer node, as part of the configuration to provide flow and packet asymmetry removal for traffic of a multi-homed SAP or spoke SDP. |
| Max. instances | 100 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**aarp-id**] *number*

| | |
|---|---|
| Synopsis | AARP ID |
| Context | **configure** application-assurance aarp *number* |
| Tree | aarp |
| Range | 1 to 65535 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the AARP instance |
| Context | **configure** application-assurance aarp *number* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** application-assurance aarp *number* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **master-selection-mode** *keyword*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | AARP master selection mode |
| Context | **configure** application-assurance aarp *number* master-selection-mode *keyword* |
| Tree | master-selection-mode |
| Description | This command configures the AARP mode of operation with the peer instance. The modes affect the AARP state machine behavior according to the specified behavior. |
| Options | minimize-switchovers, inter-chassis-efficiency, priority-based-balance |
| Default | minimize-switchovers |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

## **peer** *(ipv4-address-no-zone | ipv6-address-no-zone)*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | AARP peer IP address |
| Context | **configure** application-assurance aarp *number* peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | peer |
| Description | This command defines the IP address of the AARP peer router, which must be a routable system IP address. If no peer is configured when the AARP is administratively enabled, it is configured as a single node AARP instance. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## peer-endpoint

| | |
|---|---|
| Synopsis | Enter the **peer-endpoint** context |
| Context | **configure** application-assurance aarp *number* peer-endpoint |
| Tree | peer-endpoint |
| Description | Commands in this context specify the attributes of the peer endpoint parent AA subscriber of the AARP peer. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## sap

| | |
|---|---|
| Synopsis | Enable the **sap** context |
| Context | **configure** application-assurance aarp *number* peer-endpoint sap |
| Tree | sap |
| Notes | The following elements are part of a choice: **sap** or **spoke-sdp**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **encap-type** *keyword*

| | |
|---|---|
| Synopsis | Encapsulation type for peer endpoint SAP |
| Context | **configure** application-assurance aarp *number* peer-endpoint sap encap-type *keyword* |
| Tree | encap-type |
| Options | null, dot1q, qinq |
| Notes | This element is mandatory. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **sap-id** *sap*

| | |
|---|---|
| Synopsis | AARP peer endpoint SAP ID |
| Context | **configure** application-assurance aarp *number* peer-endpoint sap sap-id *sap* |
| Tree | sap-id |
| String length | 1 to 45 |
| Notes | This element is mandatory. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **spoke-sdp** *sdp-bind-id*

| | |
|---|---|
| Synopsis | AARP peer endpoint spoke SDP |
| Context | **configure** application-assurance aarp *number* peer-endpoint spoke-sdp *sdp-bind-id* |
| Tree | spoke-sdp |
| String length | 3 to 16 |
| Notes | The following elements are part of a choice: **sap** or **spoke-sdp**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **priority** *number*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Synopsis | AARP priority |
| Context | **configure** application-assurance aarp *number* priority *number* |
| Tree | priority |
| Description | This command defines the priority for the AARP instance. The priority value is used to determine the master and backup upon initialization or rebalance. |
| Range | 0 to 255 |
| Default | 100 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## cflowd

| | |
|---|---|
| Synopsis | Enter the **cflowd** context |
| Context | **configure** application-assurance cflowd |
| Tree | cflowd |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **field** [field-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **field** list instance |
| Context | **configure** application-assurance cflowd field *named-item* |
| Tree | field |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**field-name**] *named-item*

| | |
|---|---|
| Synopsis | Cflowd record field name |
| Context | **configure** application-assurance cflowd field *named-item* |
| Tree | field |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **comment** *named-item*

| | |
|---|---|
| Synopsis | User information comment |
| Context | **configure** application-assurance cflowd field *named-item* comment *named-item* |
| Tree | comment |
| String length | 1 to 32 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **flow-attribute**

| | |
|---|---|
| Synopsis | Enter the **flow-attribute** context |
| Context | **configure** application-assurance flow-attribute |
| Tree | flow-attribute |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **attribute** [attribute-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **attribute** list instance |
| Context | **configure** application-assurance flow-attribute attribute *named-item* |
| Tree | attribute |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**attribute-name**] *named-item*

| | |
|---|---|
| Synopsis | Attribute name |
| Context | **configure** application-assurance flow-attribute attribute *named-item* |
| Tree | attribute |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **comment** *named-item*

| | |
|---|---|
| Synopsis | User information comment |
| Context | **configure** application-assurance flow-attribute attribute *named-item* comment *named-item* |
| Tree | comment |
| String length | 1 to 32 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **group** [aa-group-id] *number*

| | |
|---|---|
| Synopsis | Enter the **group** list instance |
| Context | **configure** application-assurance group *number* |
| Tree | group |
| Description | Commands in this context configure an Application Assurance group and partition parameters. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**aa-group-id**] *number*

| | |
|---|---|
| Synopsis | AA group ID |
| Context | **configure** application-assurance group *number* |
| Tree | group |
| Range | 1 to 255 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **certificate-profile** [cert-prof-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **certificate-profile** list instance |
| Context | **configure** application-assurance group *number* certificate-profile *named-item* |
| Tree | certificate-profile |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | Commands in this context create a certificate profile to be used for certificate-based encryption in HTTP header enrichment. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**cert-prof-name**] *named-item*

| | |
|---|---|
| Synopsis | AA group certificate profile name |
| Context | **configure** application-assurance group *number* certificate-profile *named-item* |
| Tree | certificate-profile |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the AA certificate profile |
| Context | **configure** application-assurance group *number* certificate-profile *named-item* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** application-assurance group *number* certificate-profile *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **file** *certificate-file*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Certificate file name |
| Context | **configure** application-assurance group *number* certificate-profile *named-item* file *certificate-file* |
| Tree | file |
| String length | 1 to 95 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **cflowd**

| | |
|---|---|
| Synopsis | Enter the **cflowd** context |
| Context | **configure** application-assurance group *number* cflowd |
| Tree | cflowd |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of cflowd export |
| Context | **configure** application-assurance group *number* cflowd admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **collector** [ip-address] *(ipv4-address-no-zone | ipv6-address-no-zone)* port *number*

| | |
|---|---|
| Synopsis | Enter the **collector** list instance |
| Context | **configure** application-assurance group *number* cflowd collector *(ipv4-address-no-zone | ipv6-address-no-zone)* port *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | collector |
| Description | Commands in this context configure flow data collectors for cflowd data.<br>In the current release, the system supports IPv4 addresses only for the cflowd collector host. |
| Max. instances | 2 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**ip-address**] *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | IP address of the remote cflowd collector host |
| Context | **configure** application-assurance group *number* cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* |
| Tree | collector |
| Description | This command configures the IP address of the remote cflowd collector host.<br>In the current release, the system supports IPv4 addresses only for the cflowd collector host. |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **port** *number*

| | |
|---|---|
| Synopsis | Cflowd collector host port number |

### **export-override**

| | |
|---|---|
| Synopsis | Enter the **export-override** context |
| Context | **configure** application-assurance group *number* cflowd export-override |
| Tree | export-override |
| Description | Commands in this context configure the AA subtype used in the cflowd record export. The cflowd statistics exported to the cflowd collector look identical to AA for the type of system defined by the mode. The following cflowd export fields are affected:<br>• The cflowd export observation point (field 138) mode is derived from the export-override category that is selected.<br>• The cflowd export AA_Subscriber_Type (field 12) mode is modified as configured, using existing field types.<br>• The cflowd interface name is used as the sub-ID field, optionally modified to use the configured **mode** and **prefix** commands for global identifiers.<br>All AA cflowd record types are affected by export override. To change the export override or prefix, cflowd must first be disabled. When this command is set back to the default, the prefix is also set back to its default. |

| | |
|---|---|
| Synopsis | AA cflowd export override mode |
| Context | **configure** application-assurance group *number* cflowd export-override mode *keyword* |
| Tree | mode |
| Description | This command specifies the type of system emulated for the cflowd export. |
| Options | mobile, ifname-obfuscate |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **prefix** *named-item*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | AA group cflowd export override prefix |
| Context | **configure** application-assurance group *number* cflowd export-override prefix *named-item* |
| Tree | prefix |
| Description | This command specifies the prefix-string associated with the export override. The prefix string specifies up to an 8 character string. If the 8 character prefix is "ABCDEFG_" for a particular node, the cflowd export override would generate IPv4 interface names such as ABCDEFG_255.255.255.255 or IPv6 as ABCDEFG_2001:DB8:EF01:2345::/64. By default, the prefix is left blank. |
| String length | 1 to 8 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **field** [field-name] *named-item*

| | |
|---|---|
| Synopsis | Add a list entry for **field** |
| Context | **configure** application-assurance group *number* cflowd volume template dynamic-fields field *named-item* |
| Tree | field |
| Description | This command adds a list entry for the fields to be included in the exported cflowd template. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**field-name**] *named-item*

| | |
|---|---|
| Synopsis | Cflowd template dynamic field name |
| Context | **configure** application-assurance group *number* cflowd volume template dynamic-fields field *named-item* |
| Tree | field |
| Description | This command specifies the name of the field to be included in the exported cflowd template. |

- Common to all templates are the following values: session/flowStartSeconds, session/flowDurationMilliseconds, postIpPrecedence, ipTTL, aaProt, aaApp, aa AppGrp, hostName, deviceId, deviceMfgId, deviceOsId, ipFamily, deviceOsVer1, deviceOsVer2, deviceOsVer3, anlType, anlTopology, anlCongestionState, timeZone, aaChargingGrp, flowAttr_video, flowAttr_abr_service, flowAttr_audio, flowAttr_encrypted, flowAttr_download, flowAttr_upload, flowAttr_realtime_communication, aa SubTetheringState
- When AA is deployed in FWA SR, the following value applies: ApnExtended
- For the TCP and comprehensive templates only, the following values apply: tcp SessionEstDelay, tcpRetransmittedBytes, tcpRetransmittedPackets
- For the comprehensive templates only when deployed on VSR or ESA in FWA SR configured in the residential mode, the following values apply: dnsAnswerName, dnsType, dnsState, dnsTid, tlsCname, sliceId, mmeAmfAddr, flowActiveBytes, flow ActiveTime, qci, policyRuleName chargeVolumeIPBytes, http-url-len http-uri http-referer http-ua http-ua-len http-request-method http-content-type httpReplyCode http-contentlen

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

- For the Comprehensive template only (in Residential AA scale mode): sessionStart Milliseconds, sessionEndMilliseconds, flow-end-reason, aaSystemName

| | |
|---|---|
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **field-selection** *keyword*

| | |
|---|---|
| Synopsis | Field selection method |
| Context | **configure** application-assurance group *number* cflowd volume template field-selection *keyword* |
| Tree | field-selection |
| Description | This command configures the method for selecting the fields to be included in the exported cflowd template. |
| Options | legacy, dynamic |
| Default | legacy |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **dns-ip-cache** [dns-ip-cache-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **dns-ip-cache** list instance |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* |
| Tree | dns-ip-cache |
| Description | Commands in this context configure a DNS IP cache that is used to snoop DNS requests generated by subscribers, to populate a cache of IP addresses that match a specified list of domain names. In the context of strengthening URL-content charging, Operators may also specify a list of trusted DNS servers to populate the DNS IP cache. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**dns-ip-cache-name**] *named-item*

| | |
|---|---|
| Synopsis | DNS IP cache name within the AA group |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* |
| Tree | dns-ip-cache |

| | |
|---|---|
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the AA DNS IP cache object |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **dns-match**

| | |
|---|---|
| Synopsis | Enter the **dns-match** context |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* dns-match |
| Tree | dns-match |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **domain** [domain-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **domain** list instance |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* dns-match domain *named-item* |
| Tree | domain |
| Description | Commands in this context configure a domain expression to populate the DNS IP cache. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**domain-name**] *named-item*

| | |
|---|---|
| Synopsis | DNS IP cache domain name |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* dns-match domain *named-item* |
| Tree | domain |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **expression** *display-string*

| | |
|---|---|
| Synopsis | AA DNS domain expression to match |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* dns-match domain *named-item* expression *display-string* |
| Tree | expression |
| Description | This command specifies a domain name expression string used to define a pattern match. The domain expression uses the same syntax as the expressions used in **configure application-assurance group partition policy app-filter entry app-filters** configuration. |
| String length | 1 to 255 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

### **trusted-server-address** [dns-server-address] *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Enter the **trusted-server-address** list instance |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* dns-match trusted-server-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | trusted-server-address |
| Description | Commands in this context configure a trusted DNS server address. DNS responses from this DNS server are used to populate the DNS IP cache. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**dns-server-address**] *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Trusted DNS server address |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* dns-match trusted-server-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | trusted-server-address |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **server-name** *named-item*

| | |
|---|---|
| Synopsis | DNS server name |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* dns-match trusted-server-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* server-name *named-item* |
| Tree | server-name |
| String length | 1 to 32 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ip-cache**

| | |
|---|---|
| Synopsis | Enter the **ip-cache** context |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* ip-cache |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | ip-cache |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **high-watermark** *number*

| | |
|---|---|
| Synopsis | High watermark value for the DNS IP cache |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* ip-cache high-watermark *number* |
| Tree | high-watermark |
| Description | This command configures the high watermark value for the DNS IP cache. When the number of cached IP addresses exceeds the threshold, the system generates a trap. |
| Range | 0 to 100 |
| Default | 90 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **low-watermark** *number*

| | |
|---|---|
| Synopsis | Low watermark value for the DNS IP cache |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* ip-cache low-watermark *number* |
| Tree | low-watermark |
| Description | This command configures the low watermark value for the DNS IP cache. When the number of cached IP addresses exceeds the high watermark threshold, the system generates a trap based on the high watermark. The trap clears after the number of cached IP addresses drops below the configured low watermark value. |
| Range | 0 to 100 |
| Default | 80 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **size** *number*

| | |
|---|---|
| Synopsis | Maximum number of IP addresses stored in the cache |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* ip-cache size *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | size |
| Range | 10 to 64000 |
| Default | 10 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **static-address** [static-ip-address] *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Add a list entry for **static-address** |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* ip-cache static-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | static-address |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**static-ip-address**] *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Trusted IP address for the DNS IP cache |
| Context | **configure** application-assurance group *number* dns-ip-cache *named-item* ip-cache static-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | static-address |
| Description | This command configures an IP address to be used as a trusted IP address. For packets whose destination IP address matches that of the trusted IP address, a cache hit is assumed. |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **http-enrich** [http-enrich-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **http-enrich** list instance |
| Context | **configure** application-assurance group *number* http-enrich *named-item* |
| Tree | http-enrich |
| Description | Commands in this context configure the attributes of the HTTP enrichment policy. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

plmn-id - Public Land Mobile Network (PLMN) ID of the SGSN/MME

rat-type - Radio Access Technology (RAT) type

timestamp - timestamp inserted in UNIX time format; for example, 1531204313

user-location - UE LOCATION (ULI)

user-location-3gpp - ULI encoded as defined in 3GPP 29.061

user-location-raw - ULI in raw format:<ULI-TYPE1>[+<ULI-TYPE2>]=<ULI HEX>

Example: x-locinfo: TAI+ECGI=1300622c46130062014adf16

user-location-raw-2 - ULI in raw format:<ULI-TYPE1>[+<ULI-TYPE2>]=<ULI HEX>

Example: x-locinfo: TAI+ECGI=1300622c46130062014adf16

| | |
|---|---|
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **aes-initialization-vector** *hex-string*

| | |
|---|---|
| Synopsis | Initialization vector for the AES CBC encryption |
| Context | **configure** application-assurance group *number* http-enrich *named-item* field *named-item* aes-initialization-vector *hex-string* |
| Tree | aes-initialization-vector |
| Description | This command configures the initialization vector used for the AES CBC encryption. The vector consists of 34 characters, that is, 0x followed by exactly 32 hexadecimal characters. |
| String length | 34 |
| Introduced | 22.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **anti-spoof** *boolean*

| | |
|---|---|
| Synopsis | Enable anti-spoofing |
| Context | **configure** application-assurance group *number* http-enrich *named-item* field *named-item* anti-spoof *boolean* |
| Tree | anti-spoof |
| Description | When configured to **true**, this command enables the HTTP header enrichment anti-spoofing functionality. |
| Default | false |

## **captive-redirect**

| | |
|---|---|
| Synopsis | Enter the **captive-redirect** context |
| Context | **configure** application-assurance group *number* http-redirect *named-item* captive-redirect |
| Tree | captive-redirect |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | Commands in this context configure the captive redirect capability for an HTTP redirect policy. HTTP redirect policies using captive redirect can be used in conjunction with a session-filter policy to terminate TCP flows in the ISA-AA card before reaching the Internet to redirect subscribers to the predefined redirect URL.<br>Non-HTTP TCP flows are TCP reset. Captive redirect uses the provisioned VLAN ID to send the HTTP response to subscribers; therefore, this VLAN ID must be properly assigned in the same VPN as the subscriber.<br>The operator can select the URL arguments to include in the redirect URL using either a specific template ID or by configuring the redirect URL using a supported macro substitution keyword. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **vlan-id** *number*

| | |
|---|---|
| Synopsis | Captive redirect VLAN ID |
| Context | **configure** application-assurance group *number* http-redirect *named-item* captive-redirect vlan-id *number* |
| Tree | vlan-id |
| Description | This command configures the VLAN ID for a captive redirect. Captive redirect uses the provisioned VLAN ID to send the HTTP response to subscribers; therefore, this VLAN ID must be properly assigned in the same VPN as the subscriber. |
| Range | 1 to 4094 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** application-assurance group *number* http-redirect *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **redirect-https** *boolean*

| | |
|---|---|
| Synopsis | Enable HTTPS redirect |
| Context | **configure** application-assurance group *number* http-redirect *named-item* redirect-https *boolean* |
| Tree | redirect-https |
| Description | When set to **true**, the HTTP redirect policy redirects HTTPS sessions to the configured redirect URL. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **redirect-url** *http-redirect-url*

| | |
|---|---|
| Synopsis | HTTP redirect URL |
| Context | **configure** application-assurance group *number* http-redirect *named-item* redirect-url *http-redirect-url* |
| Tree | redirect-url |
| Description | This command configures the HTTP redirect URL which is the URL (page) that the user is redirected to when an HTTP redirect takes effect.<br>The operator can select the URL arguments to include in the redirect URL, using either a specific template ID or by configuring any of the following macro substitution keywords:<br>• $URL - The Request-URI in the HTTP GET Request received<br>• $SUB - The subscriber ID<br>• $IP - The IP address of the subscriber host<br>• $RTRID - The router ID<br>• $URLPRM - The HTTP URL parameter associated with the subscriber<br>• $MAC - The UE MAC address<br>• $SAP - The UE SAP<br>• $CID - The circuit ID or interface ID of the subscriber<br>• $RID - The remote ID of the subscriber<br>• $CATID - The URL filter web-service rating category identifier<br>• $CATNAME - The URL filter web-service rating category name<br>Only ESM and ESM-MAC sub types support $MAC, $SAP, $CID, and $RID macro substitution. |
| String length | 1 to 255 |

| | |
|---|---|
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **tcp-client-reset** *boolean*

| | |
|---|---|
| Synopsis | Enable TCP client reset |
| Context | **configure** application-assurance group *number* http-redirect *named-item* tcp-client-reset *boolean* |
| Tree | tcp-client-reset |
| Description | When configured to **true**, this command enables an HTTP-redirect policy to initiate a TCP reset towards the client if the AA policy results in a redirect with packet drop but the HTTP redirect cannot be delivered. Scenarios for this include HTTP (TLS) sessions, blocking of non-HTTP TCP traffic, and blocking of existing flows after a policy re-evaluation of an existing subscriber. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **template** *number*

| | |
|---|---|
| Synopsis | Template ID for the HTTP redirect object |
| Context | **configure** application-assurance group *number* http-redirect *named-item* template *number* |
| Tree | template |
| Description | This command configures the template that defines which parameters are appended to the HTTP host redirect field in the redirect message. The HTTP redirect template provides HTTP 302 redirect containing only the URL specified in the redirect policy, with no other parameters. |
| Max. range | 0 to 4294967295 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **ip-identification-assist**

| | |

## positive-app-id

| | |
|---|---|
| Synopsis | Enter the **positive-app-id** context |
| Context | **configure** application-assurance group *number* ip-identification-assist positive-app-id |
| Tree | positive-app-id |
| Description | Commands in this context implement the positive application identification mechanism, which monitors the correlations between IP addresses and applications identified with a high degree of confidence independently of any IP identification assist mechanism. |
| Introduced | 23.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## enabled *boolean*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Use the positive application identification mechanism |
| Context | **configure** application-assurance group *number* ip-identification-assist positive-app-id enabled *boolean* |
| Tree | enabled |
| Description | When configured to **true**, the router uses the positive application identification mechanism. This mechanism causes the router to add the IP addresses of the global applications learned through AA analysis into the IP identification assist cache. The router uses the harvested IP addresses to build its internal application-IP database.<br>When configured to **false**, only DNS is used to harvest IP addresses. |
| Default | true |
| Introduced | 23.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

| | |
|---|---|
| Description | This command configures the maximum acceptable round trip time (RTT) under no congestion. Any measured RTT above the threshold is considered an indication of possible congestion. |
| Range | 1 to 500 |
| Units | milliseconds |
| Options | not-applicable |
| Notes | This element is mandatory. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **rtt-threshold** *(number | keyword)*

| | |
|---|---|
| Synopsis | Round trip time congestion threshold |
| Context | **configure** application-assurance group *number* partition *number* aa-sub-congestion-detection rtt-threshold *(number \| keyword)* |
| Tree | rtt-threshold |
| Description | This command configures the default round trip delay threshold used by the DEM gateway algorithm to determine subscriber congestion for NLB-DEM. This default value is used when the current RAT-Type is not known, or has no associated configured RTT threshold. |
| Range | 1 to 500 |
| Units | milliseconds |
| Options | not-applicable |
| Default | 173 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **rtt-threshold-tolerance** *number*

| | |
|---|---|
| Synopsis | RTT threshold tolerance for congestion detection |
| Context | **configure** application-assurance group *number* partition *number* aa-sub-congestion-detection rtt-threshold-tolerance *number* |
| Tree | rtt-threshold-tolerance |
| Description | This command configures the round trip delay threshold tolerance used by the DEM gateway algorithm to determine subscriber-level congestion. |
| Range | 0 to 100 |
| Units | percent |

## **rtt-threshold** *(number | keyword)*

| | |
|---|---|
| Synopsis | RTT congestion threshold for a RAT type |
| Context | **configure** application-assurance group *number* partition *number* access-network-location source *keyword* rat-type *keyword* rtt-threshold *(number \| keyword)* |
| Tree | rtt-threshold |
| Description | This command specifies the maximum acceptable round trip time (RTT) under no congestion. Any measured RTT above the threshold is considered an indication of possible congestion. |
| Range | 1 to 500 |
| Units | milliseconds |
| Options | not-applicable |
| Notes | This element is mandatory. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **rtt-threshold** *(number | keyword)*

| | |
|---|---|
| Synopsis | Source round trip time congestion threshold |
| Context | **configure** application-assurance group *number* partition *number* access-network-location source *keyword* rtt-threshold *(number \| keyword)* |
| Tree | rtt-threshold |
| Description | This command configures the default round trip delay threshold used by the DEM gateway algorithm to determine ANL congestion. This default value is used when either the ANL RAT-Type is not known or has no associated configured RTT threshold. |
| Range | 1 to 500 |
| Units | milliseconds |
| Options | not-applicable |
| Default | 173 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **rtt-threshold-tolerance** *number*

| | |
|---|---|
| Synopsis | Source round trip time congestion threshold tolerance |
| Context | **configure** application-assurance group *number* partition *number* access-network-location source *keyword* rtt-threshold-tolerance *number* |
| Tree | rtt-threshold-tolerance |
| Description | This command configures the ANL round trip delay threshold tolerance used by the DEM gateway algorithm to determine ANL-level congestion. |
| Range | 0 to 100 |
| Units | percent |
| Default | 50 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **source-level** *keyword*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Access network location source level |
| Context | **configure** application-assurance group *number* partition *number* access-network-location source *keyword* source-level *keyword* |
| Tree | source-level |
| Options | cell, transport-network-link, mac-vlan |
| Default | cell |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **aqp-initial-lookup** *boolean*

| | |
|---|---|
| Synopsis | Enable AQP initial lookup |
| Context | **configure** application-assurance group *number* partition *number* aqp-initial-lookup *boolean* |
| Tree | aqp-initial-lookup |
| Description | When configured to **true**, this command allows AA to perform application QoS policy (AQP) lookups on flows prior to complete application identification. As usual, AQP will be looked up again when identification is complete. Without this, AA executes AQPs that |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

are part of the sub-default policy. The sub-default policy is formed by regular AQPs that contain ASOs, subID, or flow direction as matching conditions.

This behavior is required, for example, to apply GTP and SCTP filtering on the first packet of a new GTP/SCTP flow (AQP matching conditions).

When configured to **false**, AA only performs AQP lookups when identification is complete.

| | |
|---|---|
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## cflowd

| | |
|---|---|
| Synopsis | Enter the **cflowd** context |
| Context | **configure** application-assurance group *number* partition *number* cflowd |
| Tree | cflowd |
| Description | Commands in this context configure the AA partition-based cflowd fields. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **export-type** [flow-export-type] *keyword*

| | |
|---|---|
| Synopsis | Enter the **export-type** list instance |
| Context | **configure** application-assurance group *number* partition *number* cflowd export-type *keyword* |
| Tree | export-type |
| Description | Commands in this context configure the scope of traffic subjected to AA cflowd export. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**flow-export-type**] *keyword*

| | |
|---|---|
| Synopsis | Cflowd flow export type for the partition |
| Context | **configure** application-assurance group *number* partition *number* cflowd export-type *keyword* |
| Tree | export-type |
| Description | This command allows the operator to configure the scope of traffic that can be sampled for cflowd export for the configured cflowd template. |

### **default-tunnel-endpoint-limit** *number*

| | |
|---|---|
| Synopsis | Default GTP tunnel endpoint limit |
| Context | **configure** application-assurance group *number* partition *number* gtp gtp-filter *named-item* gtp-tunnel-database default-tunnel-endpoint-limit *number* |
| Tree | default-tunnel-endpoint-limit |
| Description | This command configures the maximum number of GTP endpoints requested in GTP-C messages by using, for example, the PDP Context Create message type.<br>The **validate-gtp-tunnels** command must be enabled before using this command. |
| Range | 1 to 4294967295 |
| Default | 4294967295 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **validate-gtp-tunnels** *boolean*

| | |
|---|---|
| Synopsis | Enable GTP tunnel validation |
| Context | **configure** application-assurance group *number* partition *number* gtp gtp-filter *named-item* gtp-tunnel-database validate-gtp-tunnels *boolean* |
| Tree | validate-gtp-tunnels |
| Description | When configured to **true**, this command configures GTP tunnel validation. This allows for the validation of TEIDs and is a prerequisite for sequence checking and UE IP address validation. This command is only applicable when AA GTP FW is deployed on S8/S5/Gp/Gn interfaces. The **gtpc-inspection** command in the **configure application-assurance group partition gtp** context must be configured to true before using this command.<br>When configured to **false**, the GTP tunnels cannot be validated. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **validate-sequence-number** *boolean*

| | |
|---|---|
| Synopsis | Enable GTP sequence number checking |
| Context | **configure** application-assurance group *number* partition *number* gtp gtp-filter *named-item* gtp-tunnel-database validate-sequence-number *boolean* |
| Tree | validate-sequence-number |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | When configured to **true**, this command enables GTP sequence number checking. GTP packets that fail the sequence number check are discarded.<br>The **validate-gtp-tunnels** command in the **configure application-assurance group partition gtp gtp-filter gtp-tunnel-database** context must be configured to **true** before using this command.<br>When configured to **false**, the GTP packet sequence number cannot be checked. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **validate-source-ip-addr** *boolean*

| | |
|---|---|
| Synopsis | Validate source IP address in GTP frames |
| Context | **configure** application-assurance group *number* partition *number* gtp gtp-filter *named-item* gtp-tunnel-database validate-source-ip-addr *boolean* |
| Tree | validate-source-ip-addr |
| Description | When configured to **true**, this command enables checking for spoofed or invalid UE IP addresses. Upstream GTP packets that contain invalid UE IP addresses are discarded. When a packet is dropped due to source-ip-address “invalid source IP add”, the statistics counter is updated.<br>The **validate-gtp-tunnels** command in the **configure application-assurance group partition gtp gtp-filter gtp-tunnel-database** context must be configured to **true** before using this command.<br>When configured to **false**, the spoofed or invalid UE IP addresses cannot be checked. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **imsi-apn-filter**

## **action** *keyword*

Synopsis IMSI APN filter entry action

Context **configure** application-assurance group *number* partition *number* gtp gtp-filter *named-item* imsi-apn-filter entry *number* action *keyword*

Tree action

Options deny, permit

Default permit

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **apn** *display-string*

Synopsis APN as GTP filter match criterion

Context **configure** application-assurance group *number* partition *number* gtp gtp-filter *named-item* imsi-apn-filter entry *number* apn *display-string*

Tree apn

Description This command configures a matching condition for an APN configured as a GTP filter. If no APN is specified, the entry is not checked for the APN IE in GTP-C packets. The values for this command are:

- string:The extracted APN must match string exactly.
- ^string: The extracted APN must start with string.
- string$: The extracted APN must end with string.
- WILDCARD_APN: Special string that indicates that the extracted APN must be “*” (that is, a length octet with value one, followed by the ASCII code for the asterisk)
- EMPTY_APN: Special string that indicates that the extracted APN must be empty (that is, “”)
- ANY_APN: Special string that indicates that the extracted APN IE must be present and can have any value in order for the filter entry to match

String length 1 to 100

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **imsi-mcc-mnc-prefix** *display-string*

| | |
|---|---|
| Synopsis | IMSI (MCC-MNC) prefix as GTP filter match criterion |
| Context | **configure** application-assurance group *number* partition *number* gtp gtp-filter *named-item* imsi-apn-filter entry *number* imsi-mcc-mnc-prefix *display-string* |
| Tree | imsi-mcc-mnc-prefix |
| Description | This command configures a matching condition for the IMSI (MCC-MNC) prefix. This string represents the IMSI prefix to be matched against the IMSI IE of the packet, or the special value ANY_IMSI to indicate that an IMSI IE must be present as a matching condition regardless of the IMSI IE value. If no MCC-MNC prefix is specified, the entry will match GTP packets that have an IMSI IE containing any value. |
| String length | 1 to 8 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **src-gsn**

| | |
|---|---|
| Synopsis | Enter the **src-gsn** context |
| Context | **configure** application-assurance group *number* partition *number* gtp gtp-filter *named-item* imsi-apn-filter entry *number* src-gsn |
| Tree | src-gsn |
| Description | Commands in this context configure a matching condition for the GSN IP address. The IP address value is checked only against the source IP address of the GTP packets that contain an APN IE or an IMSI IE. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **ip-prefix** *(ipv4-prefix | ipv6-prefix)*

| | |
|---|---|
| Synopsis | Source GSN IP address prefix as filter match criterion |
| Context | **configure** application-assurance group *number* partition *number* gtp gtp-filter *named-item* imsi-apn-filter entry *number* src-gsn ip-prefix *(ipv4-prefix \| ipv6-prefix)* |
| Tree | ip-prefix |
| Description | This command specifies a valid unicast address associated with the IMSI-APN filter entry. |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |
| Introduced | 21.10.R1 |

## message-type-gtp-v2

Synopsis Enter the **message-type-gtp-v2** context

Context **configure** application-assurance group *number* partition *number* gtp gtp-filter *named-item* message-type-gtp-v2

Tree message-type-gtp-v2

Description Commands in this context configure the GTPv2 message-type filtering.

If message-type GTPv2 is not specified within a filter, all GTP message types are allowed, except for the messages that are dropped by GTP-C inspection because they violate the expected GTP protocol for the deployment interface (for example, roaming deployment).

The **gtpc-inspection** command in the **configure application-assurance group partition gtp** context must be configured to true before configuring GTPv2 message-type filtering.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## default-action *keyword*

Synopsis GTPv2 message type default action

Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | **configure** application-assurance group *number* partition *number* gtp gtpc-inspection *boolean* |
| Tree | gtpc-inspection |
| Description | When configured to **true**, this command enables the inspection of GTP-C packets. This is relevant only when AA GTP FW is deployed on S8/S5/Gp/Gn interfaces. This command must be enabled before configuring related features, such as APN filtering, GTP tunnel validation, message-type-v2 filtering, sequence number validation, and SRC IP validation.<br>When configured to **false**, GTP-C packet inspection cannot be performed. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## log

| | |
|---|---|
| Synopsis | Enter the **log** context |
| Context | **configure** application-assurance group *number* partition *number* gtp log |
| Tree | log |
| Description | Commands in this context configure the AA group partition GTP log. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## action *keyword*

| | |
|---|---|
| Synopsis | GTP log action |
| Context | **configure** application-assurance group *number* partition *number* gtp log action *keyword* |
| Tree | action |
| Description | This command specifies the action on which the GTP log is raised. |
| Options | deny, permit, all |
| Default | deny |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## event-log *reference*

| | |
|---|---|
| Synopsis | Event log reference for logging GTP events |

© 2024 Nokia.

| | |
|---|---|
| Context | **configure** application-assurance group *number* partition *number* gtp log event-log *reference* |
| Tree | event-log |
| Reference | **configure** application-assurance group *number* partition *number* event-log *named-item* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **mode** *keyword*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | GTP mode |
| Context | **configure** application-assurance group *number* partition *number* gtp mode *keyword* |
| Tree | mode |
| Options | filtering, untunneling |
| Default | filtering |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **http-match-all-requests** *boolean*

| | |
|---|---|
| Synopsis | Enable HTTP matching for all requests for an expression |
| Context | **configure** application-assurance group *number* partition *number* http-match-all-requests *boolean* |
| Tree | http-match-all-requests |
| Description | When configured to **true**, this command enables HTTP matching for all requests for an HTTP expression.<br>When configured to **false**, this command restores the default and removes the matching request for this particular expression. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

### **http-x-online-host** *boolean*

| | |
|---|---|
| Synopsis | Enable X-Online-Host header field |
| Context | **configure** application-assurance group *number* partition *number* http-x-online-host *boolean* |
| Tree | http-x-online-host |
| Description | When configured to **true**, this command enables the X-Online-Host header field as a replacement for the HTTP Host header field. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ip-identification-contribute** *boolean*

| | |
|---|---|
| Synopsis | Contribute traffic info from this partition to group |
| Context | **configure** application-assurance group *number* partition *number* ip-identification-contribute *boolean* |
| Tree | ip-identification-contribute |
| Description | When configured to **true**, the router collects information from traffic in this partition and contributes it to the database that is built by the IP identification assist feature at the group level. |
| Default | true |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ip-prefix-list** [ip-prefix-list-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **ip-prefix-list** list instance |
| Context | **configure** application-assurance group *number* partition *number* ip-prefix-list *named-item* |
| Tree | ip-prefix-list |
| Description | Commands in this context configure an IP prefix list. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

|---|---|
| Tree | prefix |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **name** *named-item*

| | |
|---|---|
| Synopsis | AA IP prefix name |
| Context | **configure** application-assurance group *number* partition *number* ip-prefix-list *named-item* prefix *(ipv4-prefix \| ipv6-prefix)* name *named-item* |
| Tree | name |
| String length | 1 to 32 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### policy

| | |
|---|---|
| Synopsis | Enter the **policy** context |
| Context | **configure** application-assurance group *number* partition *number* policy |
| Tree | policy |
| Description | Commands in this context configure the fields for the Application Assurance policy. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### app-filter

| | |
|---|---|
| Synopsis | Enter the **app-filter** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter |
| Tree | app-filter |
| Description | Commands in this context configure an application filter for Application Assurance. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **entry** [entry-id] *number*

| | |
|---|---|
| Synopsis | Enter the **entry** list instance |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* |
| Tree | entry |
| Description | Commands in this context create an application filter entry.<br>Application filter entries are an ordered list. The lowest numerical entry that matches the flow defines the application for that flow.<br>An application filter entry or entries configure match attributes of an application. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**entry-id**] *number*

| | |
|---|---|
| Synopsis | Application filter entry ID |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* |
| Tree | entry |
| Range | 1 to 65535 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the AA application filter entry |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **application** *reference*

| | |
|---|---|
| Synopsis | Application name |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* application *reference* |
| Tree | application |
| Reference | **configure** application-assurance group *number* partition *number* policy application *named-item* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **expression** [expr-index] *number*

| | |
|---|---|
| Synopsis | Enter the **expression** list instance |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* expression *number* |
| Tree | expression |
| Description | Commands in this context configure string values to use in the application definition. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**expr-index**] *number*

| | |
|---|---|
| Synopsis | Application filter matching expression identifier |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* expression *number* |

© 2024 Nokia.

| | |
|---|---|
| Tree | expression |
| Range | 1 to 4 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **eq** *display-string*

| | |
|---|---|
| Synopsis | Exact match for application filter matching expression |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* expression *number* eq *display-string* |
| Tree | eq |
| String length | 1 to 255 |
| Notes | The following elements are part of a mandatory choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **neq** *display-string*

| | |
|---|---|
| Synopsis | Non-match for application filter matching expression |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* expression *number* neq *display-string* |
| Tree | neq |
| String length | 1 to 255 |
| Notes | The following elements are part of a mandatory choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **type** *keyword*

| | |
|---|---|
| Synopsis | Application filter matching expression type |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* expression *number* type *keyword* |
| Tree | type |
| Options | http-host, http-uri, http-referer, sip-ua, sip-uri, sip-mt, citrix-app, http-user-agent, h323-product-id, tls-cert-subj-org-name, tls-cert-subj-common-name, rtsp-host, rtsp-uri, |

| | rtsp-ua, rtmp-page-host, rtmp-page-uri, rtmp-swf-host, rtmp-swf-uri, rtmp-tc-host, rtmp-tc-uri, dns-domain-name |
| Notes | This element is mandatory. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **flow-setup-direction** *keyword*

| | |
|---|---|
| Synopsis | Traffic flow direction for the application filter entry |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* flow-setup-direction *keyword* |
| Tree | flow-setup-direction |
| Options | subscriber-to-network, network-to-subscriber, both |
| Default | both |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **http-match-all-requests** *boolean*

| | |
|---|---|
| Synopsis | Enable HTTP matching for all requests |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* http-match-all-requests *boolean* |
| Tree | http-match-all-requests |
| Description | When configured to **true**, this command enables HTTP matching for all requests for an HTTP expression.<br>When configured to **false**, this command restores the default for this app-filter entry which matches the first request. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **http-port**

| | |
|---|---|
| Synopsis | Enter the **http-port** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* http-port |
| Tree | http-port |

| | |
|---|---|
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## eq

| | |
|---|---|
| Synopsis | Enter the **eq** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* http-port eq |
| Tree | eq |
| Description | Commands in this context configure the exact value as the match criterion. |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## port-list *reference*

| | |
|---|---|
| Synopsis | Port list name |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* http-port eq port-list *reference* |
| Tree | port-list |
| Reference | **configure** application-assurance group *number* partition *number* port-list *named-item* |
| Notes | The following elements are part of a choice: **port-list** or **port-number**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## port-number *number*

| | |
|---|---|
| Synopsis | Server port number |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* http-port eq port-number *number* |
| Tree | port-number |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Notes | The following elements are part of a choice: **port-list** or **port-number**. |
| Introduced | 21.10.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## neq

| | |
|---|---|
| Synopsis | Enter the **neq** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* http-port neq |
| Tree | neq |
| Description | Commands in this context configure the non-match criterion used. |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## port-list *reference*

| | |
|---|---|
| Synopsis | Port list name |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* http-port neq port-list *reference* |
| Tree | port-list |
| Reference | **configure** application-assurance group *number* partition *number* port-list *named-item* |
| Notes | The following elements are part of a choice: **port-list** or **port-number**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## port-number *number*

| | |
|---|---|
| Synopsis | Server port number |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* http-port neq port-number *number* |
| Tree | port-number |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Notes | The following elements are part of a choice: **port-list** or **port-number**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ip-identification-assist** *boolean*

| | |
|---|---|
| Synopsis | Enable IP identification assist for this entry |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* ip-identification-assist *boolean* |
| Tree | ip-identification-assist |
| Description | When configured to **true**, the router performs a network IP address lookup that overrides the assigned application if it finds the network IP address in its internal application-IP database.<br>If an IP match is found, the application assigned from the app-filter is overridden with the application from the IP lookup. This also affects the app-group and charging group.<br>If an IP match is not found, the application assigned from the app-filter is not overridden and remains (including the app-group and charging group).<br>When configured to **false**, this command disables the router from performing a network IP address lookup and overriding the assigned application. |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ip-protocol**

| | |
|---|---|
| Synopsis | Enter the **ip-protocol** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* ip-protocol |
| Tree | ip-protocol |
| Description | Commands in this context configure the IP protocol to use in the application definition. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **eq** *(number | keyword)*

| | |
|---|---|
| Synopsis | Exact match criterion used for the IP protocol number |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* ip-protocol eq *(number | keyword)* |
| Tree | eq |
| Range | 0 to 255 |

| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### network-address

| | |
|---|---|
| Synopsis | Enter the **network-address** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-filter entry *number* network-address |
| Tree | network-address |
| Description | Commands in this context configure the network address to use for the application filter entry. The network address is the address on the network side of AA, independent of whether the subscriber is acting as a client or server and is not normally used in AA app-filters. The network address will match the destination IP address in a from-sub flow or the source IP address in a to-sub flow. |
| Notes | The following elements are part of a choice: **network-address** or **server-address**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **aa-sub-distribute-traffic-by-ip** *boolean*

| | |
|---|---|
| Synopsis | Allow application assurance to divert traffic |
| Context | **configure** application-assurance group *number* partition *number* policy app-profile *named-item* aa-sub-distribute-traffic-by-ip *boolean* |
| Tree | aa-sub-distribute-traffic-by-ip |
| Description | When configured to **true**, the system diverts traffic on the parent SAPor spoke-SDP to multiple ISAs or ESAs based on the source IP address. This is useful when the bandwidth of a single SAP is larger than the capacity of a single ISA or ESA. This is only supported for the auto-created transit IP subscribers.<br>The traffic is diverted when the hashing is enabled at the AA group level and in the parent SAP application profile. |
| Default | false |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s |

## **aa-sub-suppressible** *boolean*

| | |
|---|---|
| Synopsis | Enable AA suppression for subs with this app profile |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | **configure** application-assurance group *number* partition *number* policy app-profile *named-item* aa-sub-suppressible *boolean* |
| Tree | aa-sub-suppressible |
| Description | When configured to **true**, this command configures the ability to suppress Application Assurance for subscribers with this application profile.<br>This function is used in the context of an SRRP group interface. If an SRRP group interface is configured as **configure service ies subscriber-interface group-interface suppress-aa-sub** or **configure service vprn subscriber-interface group-interface suppress-aa-sub**, subscribers with an application profile configured as suppressible are not diverted to Application Assurance. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **capacity-cost** *number*

| | |
|---|---|
| Synopsis | Application profile capacity cost |
| Context | **configure** application-assurance group *number* partition *number* policy app-profile *named-item* capacity-cost *number* |
| Tree | capacity-cost |
| Description | This command configures an application profile capacity cost.<br>Capacity cost based load balancing allows a cost to be assigned to diverted SAPs (with the application profile). This allows for load balancing SAPs between ISAs and acts as a threshold to notify the operator if capacity planning is exceeded. |
| Range | 1 to 65535 |
| Default | 1 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **characteristic** [characteristic-name] *reference*

| | |
|---|---|
| Synopsis | Enter the **characteristic** list instance |

### **divert** *boolean*

| | |
|---|---|
| Synopsis | Enable traffic redirection to AA ISAs or ESA VMs |
| Context | **configure** application-assurance group *number* partition *number* policy app-profile *named-item* divert *boolean* |
| Tree | divert |
| Description | When configured to **true**, this command enables the redirection of traffic to AA ISAs or ESA VMs for the system-wide forwarding classes diverted to Application Assurance (**configure isa application-assurance-group divert-fc**) for AA subscribers using this application profile.<br>When configured to **false**, this command stops the redirection of traffic to AA ISAs or ESA VMs for the AA subscribers using this application profile. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **app-qos-policy**

| | |
|---|---|
| Synopsis | Enter the **app-qos-policy** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy |
| Tree | app-qos-policy |
| Description | Commands in this context configure an application QoS policy. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **entry** [entry-id] *number*

| | |
|---|---|
| Synopsis | Enter the **entry** list instance |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* |
| Tree | entry |
| Description | Commands in this context create an application QoS policy (AQP) entry.<br>A flow that matches multiple AQP entries will have multiple AQP entries actions applied. If a conflict occurs for two or more actions, the action from the AQP entry with the lowest numerical value takes precedence. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

## bandwidth-policer

| | |
|---|---|
| Synopsis | Enter the **bandwidth-policer** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action bandwidth-policer |
| Tree | bandwidth-policer |
| Description | Commands in this context assign an existing bandwidth policer as an action on flows matching this AQP entry.<br>The match criteria for the AQP entry must specify a unidirectional traffic direction before a policer action can be configured. If a policer is used in one direction in an AQP match entry, the same policer name cannot be used by another AQP entry that uses different traffic direction match criteria.<br>When multiple policers apply to a single flow, the final action on a packet is the worst case of all policer outcomes (for example, if one of the policers marks packet out of profile, the final marking will reflect that). |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## anl *reference*

| | |
|---|---|
| Synopsis | Access network locator bandwidth policer |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action bandwidth-policer anl *reference* |
| Tree | anl |
| Description | This command creates an Application Assurance policy profile for a policer instance for each ANL that limits traffic bandwidth in the scope of that ANL. For ANL, only single-bucket bandwidth policers can be configured. |
| Reference | **configure** application-assurance group *number* policer anl-bandwidth-policer *named-item* |
| Notes | The following elements are part of a choice: **anl**, **dual-bucket**, **flow**, or **single-bucket**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## dual-bucket *reference*

| | |
|---|---|
| Synopsis | Dual bucket bandwidth limiting policer |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action bandwidth-policer dual-bucket *reference* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | dual-bucket |
| Description | This command creates an Application Assurance policy profile for a dual bucket (PIR) bandwidth limiting policer. |
| Reference | **configure** application-assurance group *number* policer dual-bucket-bandwidth-policer *named-item* |
| Notes | The following elements are part of a choice: **anl**, **dual-bucket**, **flow**, or **single-bucket**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **flow** *reference*

| | |
|---|---|
| Synopsis | Flow policer |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action bandwidth-policer flow *reference* |
| Tree | flow |
| Reference | **configure** application-assurance group *number* policer flow-bandwidth-policer *named-item* |
| Notes | The following elements are part of a choice: **anl**, **dual-bucket**, **flow**, or **single-bucket**. |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **single-bucket** *reference*

| | |
|---|---|
| Synopsis | Single bucket bandwidth limiting policer |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action bandwidth-policer single-bucket *reference* |
| Tree | single-bucket |
| Description | This command creates an Application Assurance policy profile for a single bucket (PIR) bandwidth limiting policer. |
| Reference | **configure** application-assurance group *number* policer single-bucket-bandwidth-policer *named-item* |
| Notes | The following elements are part of a choice: **anl**, **dual-bucket**, **flow**, or **single-bucket**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **http-error-redirect** *reference*

| | |
|---|---|
| Synopsis | HTTP error redirect for the AQP entry |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action http-error-redirect *reference* |
| Tree | http-error-redirect |
| Description | This command specifies the HTTP error redirect that is applied as defined in the redirect table. An empty value specifies no HTTP error redirect. |
| Reference | **configure** application-assurance group *number* http-error-redirect *named-item* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **http-notification** *reference*

| | |
|---|---|
| Synopsis | HTTP notification to use for flows matching AQP entry |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action http-notification *reference* |
| Tree | http-notification |
| Reference | **configure** application-assurance group *number* http-notification *named-item* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **http-redirect**

| | |
|---|---|
| Synopsis | Enter the **http-redirect** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action http-redirect |
| Tree | http-redirect |
| Description | Commands in this context assign an existing HTTP redirect policy as an action on flows matching this AQP entry. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **flow-type** *keyword*

| | |
|---|---|
| Synopsis | Flow type for HTTP redirect of flows matching the entry |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action http-redirect flow-type *keyword* |
| Tree | flow-type |
| Description | This command assigns an existing HTTP redirect policy as an action on flows matching this AQP entry. The redirect only takes effect if the matching flows are HTTP and the condition specified is met.<br>The condition specified by dropped flows means the flow is dropped due to an AQP action, such as flow rate, count policers, or drop actions. The admitted flows condition allows the operator to redirect HTTP traffic to a web portal while allowing non-HTTP traffic matching the same AQP rule to be forwarded.<br>No HTTP redirect takes place if the HTTP redirect action and a drop/flow-police action are part of the default AQP policy. In this case, any flow drop actions take place before identification of the application/application-group. |
| Options | dropped-flows, admitted-flows |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **name** *reference*

| | |
|---|---|
| Synopsis | HTTP redirect policy name |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action http-redirect name *reference* |
| Tree | name |
| Description | This command specifies the name of an existing HTTP policy redirect. |
| Reference | **configure** application-assurance group *number* http-redirect *named-item* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **mirror-source**

| | |
|---|---|
| Synopsis | Enter the **mirror-source** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action mirror-source |
| Tree | mirror-source |
| Description | Commands in this context configure an application-based policy mirroring service that uses the AQP entry of this AA ISA as a mirror source.<br>When configured, the AQP entry becomes a mirror source for IP packets seen by AA. The mirrored packet is an IP packet analyzed by AA and does not include encapsulations present on the incoming interfaces. |

| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **all-inclusive** *boolean*

| | |
|---|---|
| Synopsis | Mirror flows matching the AQP subscriber default policy |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action mirror-source all-inclusive *boolean* |
| Tree | all-inclusive |
| Description | This command specifies that all packets during the identification phase that could match a given AQP rule are mirrored in addition to packets after an application identification completes that match the AQP rule. This ensures that all packets of a flow are mirrored at a cost of sending some unidentified packets, which after the application is identified no longer match this AQP entry. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **mirror-service** *reference*

| | |
|---|---|
| Synopsis | Mirror source service ID for flows matching the entry |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action mirror-source mirror-service *reference* |
| Tree | mirror-service |
| Description | This command specifies the mirror source service ID to use for flows that match this policy. |
| Reference | **configure** mirror mirror-dest *service-name* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **overload-drop**

| | |
|---|---|
| Synopsis | Enable the **overload-drop** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action overload-drop |
| Tree | overload-drop |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | Commands in this context configure a drop action for cases where flow records are not created (overload). This command is only applicable to ISA2 hardware. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **event-log** *reference*

| | |
|---|---|
| Synopsis | Event log name |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action overload-drop event-log *reference* |
| Tree | event-log |
| Reference | **configure** application-assurance group *number* partition *number* event-log *named-item* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **remark**

| | |
|---|---|
| Synopsis | Enter the **remark** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action remark |
| Tree | remark |
| Description | Commands in this context configure the remark action on flows matching this AQP entry. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **dscp**

| | |
|---|---|
| Synopsis | Enter the **dscp** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action remark dscp |
| Tree | dscp |
| Description | Commands in this context configure the DSCP remark action or actions on flows matching this AQP entry.<br>All packets for all flows matching this AQP entry are remarked to the configured DSCP name. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

DSCP remark can only be applied when the entry remarks forwarding class or forwarding class and priority. In-profile and out-of-profile of a packet for DSCP remark is assessed after all AQP policing and priority remarking actions have taken place.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **in-profile** *keyword*

Synopsis DSCP name to remark matching in-profile flows

Context **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action remark dscp in-profile *keyword*

Tree in-profile

Options be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **out-profile** *keyword*

Synopsis DSCP name to remark matching out-of-profile flows

Context **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* action remark dscp out-profile *keyword*

Tree out-profile

Options be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **fc** *keyword*

## dscp

| | |
|---|---|
| Synopsis | Enter the **dscp** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dscp |
| Tree | dscp |
| Description | Commands in this context add a DSCP name to the match criteria used by this entry. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **eq** *keyword*

| | |
|---|---|
| Synopsis | Exact match criterion used for the DSCP |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dscp eq *keyword* |
| Tree | eq |
| Options | be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63 |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **neq** *keyword*

| | |
|---|---|
| Synopsis | Non-match criterion used for the DSCP |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dscp neq *keyword* |
| Tree | neq |
| Options | be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63 |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |

| | |
|---|---|
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## dst-ip

| | |
|---|---|
| Synopsis | Enter the **dst-ip** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-ip |
| Tree | dst-ip |
| Description | Commands in this context configure a destination IP address to use as match criteria. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## eq

| | |
|---|---|
| Synopsis | Enter the **eq** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-ip eq |
| Tree | eq |
| Description | Commands in this context specify the exact match value as the match criterion. A successful match occurs when the flow matches the specified address or prefix. |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## ip-prefix *(ipv4-prefix | ipv6-prefix)*

| | |
|---|---|
| Synopsis | IP address prefix used for match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-ip eq ip-prefix *(ipv4-prefix \| ipv6-prefix)* |
| Tree | ip-prefix |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ip-prefix-list** *reference*

| | |
|---|---|
| Synopsis | IP address prefix list used for match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-ip eq ip-prefix-list *reference* |
| Tree | ip-prefix-list |
| Reference | **configure** application-assurance group *number* partition *number* ip-prefix-list *named-item* |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **neq**

| | |
|---|---|
| Synopsis | Enter the **neq** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-ip neq |
| Tree | neq |
| Description | Commands in this context specify the non-match value as the match criterion. A successful match occurs when the flow does not match the specified address or prefix. |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ip-prefix** *(ipv4-prefix | ipv6-prefix)*

| | |
|---|---|
| Synopsis | IP address prefix used for match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-ip neq ip-prefix *(ipv4-prefix \| ipv6-prefix)* |
| Tree | ip-prefix |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **ip-prefix-list** *reference*

| | |
|---|---|
| Synopsis | IP address prefix list used for match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-ip neq ip-prefix-list *reference* |
| Tree | ip-prefix-list |
| Reference | **configure** application-assurance group *number* partition *number* ip-prefix-list *named-item* |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **dst-port**

| | |
|---|---|
| Synopsis | Enter the **dst-port** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port |
| Tree | dst-port |
| Description | Commands in this context configure a destination TCP/UDP port, a destination port list, or a destination range to use as match criteria. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **eq**

| | |
|---|---|
| Synopsis | Enter the **eq** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port eq |
| Tree | eq |
| Description | Commands in this context specify the exact match criterion. A successful match occurs when the flow matches the specified port. |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

### **port-list** *reference*

| | |
|---|---|
| Synopsis | IP port list used as match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port eq port-list *reference* |
| Tree | port-list |
| Reference | **configure** application-assurance group *number* partition *number* port-list *named-item* |
| Notes | The following elements are part of a choice: **port-list**, **port-number**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **port-number** *number*

| | |
|---|---|
| Synopsis | Server port number used as match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port eq port-number *number* |
| Tree | port-number |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Notes | The following elements are part of a choice: **port-list**, **port-number**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **range**

| | |
|---|---|
| Synopsis | Enter the **range** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port eq range |
| Tree | range |
| Description | Commands in this context specify the match value as the match criterion based on the starting or ending port number. |
| Notes | The following elements are part of a choice: **port-list**, **port-number**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **end** *number*

| | |
|---|---|
| Synopsis | TCP/UDP ending port number |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port eq range end *number* |
| Tree | end |
| Range | 0 \| 1 to 65535 |
| Default | 1 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **start** *number*

| | |
|---|---|
| Synopsis | TCP/UDP starting port number |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port eq range start *number* |
| Tree | start |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **neq**

| | |
|---|---|
| Synopsis | Enter the **neq** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port neq |
| Tree | neq |
| Description | Commands in this context specify the non-match value as the match criterion. A successful match occurs when the flow does not match the specified port. |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **port-list** *reference*

| | |
|---|---|
| Synopsis | IP port list used as match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port neq port-list *reference* |
| Tree | port-list |
| Reference | **configure** application-assurance group *number* partition *number* port-list *named-item* |
| Notes | The following elements are part of a choice: **port-list**, **port-number**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **port-number** *number*

| | |
|---|---|
| Synopsis | Server port number used as match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port neq port-number *number* |
| Tree | port-number |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Notes | The following elements are part of a choice: **port-list**, **port-number**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **range**

| | |
|---|---|
| Synopsis | Enter the **range** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port neq range |
| Tree | range |
| Description | Commands in this context specify the match value as the match criterion based on the starting or ending port number. |
| Notes | The following elements are part of a choice: **port-list**, **port-number**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **end** *number*

| | |
|---|---|
| Synopsis | TCP/UDP ending port number |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port neq range end *number* |
| Tree | end |
| Range | 0 \| 1 to 65535 |
| Default | 1 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **start** *number*

| | |
|---|---|
| Synopsis | TCP/UDP starting port number |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match dst-port neq range start *number* |
| Tree | start |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **flow-attribute** [flow-attribute-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **flow-attribute** list instance |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match flow-attribute *named-item* |
| Tree | flow-attribute |
| Description | Commands in this context configure a flow attribute to use as match criteria. The supported options are:<br>• abr_service<br>• audio<br>• download<br>• encrypted<br>• esni<br>• real_time_communication<br>• upload |

| | |
|---|---|
| | • video |
| Max. instances | 10 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**flow-attribute-name**] *named-item*

| | |
|---|---|
| Synopsis | Flow attribute name used as match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match flow-attribute *named-item* |
| Tree | flow-attribute |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## confidence

| | |
|---|---|
| Synopsis | Enter the **confidence** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match flow-attribute *named-item* confidence |
| Tree | confidence |
| Description | Commands in this context configure the confidence level of the flow attribute for use as match criteria. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **eq** *number*

| | |
|---|---|
| Synopsis | Exact match criterion for the flow-attribute confidence |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match flow-attribute *named-item* confidence eq *number* |
| Tree | eq |
| Range | 0 to 100 |
| Notes | The following elements are part of a choice: **eq**, **gte**, or **lt**. |

© 2024 Nokia.

| | |
|---|---|
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **gte** *number*

| | |
|---|---|
| Synopsis | Greater than or equal to for confidence match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match flow-attribute *named-item* confidence gte *number* |
| Tree | gte |
| Range | 0 to 100 |
| Notes | The following elements are part of a choice: **eq**, **gte**, or **lt**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **lt** *number*

| | |
|---|---|
| Synopsis | Less than value for confidence match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match flow-attribute *named-item* confidence lt *number* |
| Tree | lt |
| Range | 1 to 100 |
| Notes | The following elements are part of a choice: **eq**, **gte**, or **lt**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **ip-protocol**

| | |
|---|---|
| Synopsis | Enter the **ip-protocol** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match ip-protocol |
| Tree | ip-protocol |
| Description | Commands in this context configure the IP protocol to use in the application definition. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## eq

| | |
|---|---|
| Synopsis | Enter the **eq** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match src-ip eq |
| Tree | eq |
| Description | Commands in this context specify the exact match value as the match criterion. A successful match occurs when the flow matches the specified address or prefix. |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## ip-prefix *(ipv4-prefix | ipv6-prefix)*

| | |
|---|---|
| Synopsis | IP address prefix used for match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match src-ip eq ip-prefix *(ipv4-prefix \| ipv6-prefix)* |
| Tree | ip-prefix |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## ip-prefix-list *reference*

| | |
|---|---|
| Synopsis | IP address prefix list used for match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match src-ip eq ip-prefix-list *reference* |
| Tree | ip-prefix-list |
| Reference | **configure** application-assurance group *number* partition *number* ip-prefix-list *named-item* |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## neq

| | |
|---|---|
| Synopsis | Enter the **neq** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match src-ip neq |
| Tree | neq |
| Description | Commands in this context specify the non-match value as the match criterion. A successful match occurs when the flow does not match the specified address or prefix. |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## ip-prefix *(ipv4-prefix | ipv6-prefix)*

| | |
|---|---|
| Synopsis | IP address prefix used for match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match src-ip neq ip-prefix *(ipv4-prefix \| ipv6-prefix)* |
| Tree | ip-prefix |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## ip-prefix-list *reference*

| | |
|---|---|
| Synopsis | IP address prefix list used for match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match src-ip neq ip-prefix-list *reference* |
| Tree | ip-prefix-list |
| Reference | **configure** application-assurance group *number* partition *number* ip-prefix-list *named-item* |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## src-port

| | |
|---|---|
| Synopsis | Enter the **src-port** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match src-port |
| Tree | src-port |
| Description | Commands in this context specify a source IP port, a source port list, or a source range to use as match criteria. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## eq

| | |
|---|---|
| Synopsis | Enter the **eq** context |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match src-port eq |
| Tree | eq |
| Description | Commands in this context specify the exact match criterion. A successful match occurs when the flow matches the specified port. |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## port-list *reference*

| | |
|---|---|
| Synopsis | IP port list used as match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy app-qos-policy entry *number* match src-port eq port-list *reference* |
| Tree | port-list |
| Reference | **configure** application-assurance group *number* partition *number* port-list *named-item* |
| Notes | The following elements are part of a choice: **port-list**, **port-number**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

|---|---|
| Tree | neq |
| Description | This command specifies that the value configured and the value in the flow must differ for a match to occur. |
| Reference | **configure** application-assurance group *number* partition *number* policy application *named-item* |
| Notes | The following elements are part of a choice: **eq** or **neq**. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **flow-attribute** [flow-attribute-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **flow-attribute** list instance |
| Context | **configure** application-assurance group *number* partition *number* policy charging-filter entry *number* match flow-attribute *named-item* |
| Tree | flow-attribute |
| Max. instances | 10 |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**flow-attribute-name**] *named-item*

| | |
|---|---|
| Synopsis | Flow attribute name match criteria |
| Context | **configure** application-assurance group *number* partition *number* policy charging-filter entry *number* match flow-attribute *named-item* |
| Tree | flow-attribute |
| Description | This command adds a flow attribute to the match criteria used by this charging filter entry. |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **confidence**

| | |
|---|---|
| Synopsis | Enter the **confidence** context |

| | |
|---|---|
| Context | **configure** application-assurance group *number* partition *number* policy charging-filter entry *number* match flow-attribute *named-item* confidence |
| Tree | confidence |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **eq** *number*

| | |
|---|---|
| Synopsis | Exact value as the match criterion |
| Context | **configure** application-assurance group *number* partition *number* policy charging-filter entry *number* match flow-attribute *named-item* confidence eq *number* |
| Tree | eq |
| Description | This command specifies that a successful match occurs when the flow attribute confidence level is equal to the specified value. |
| Range | 0 to 100 |
| Notes | The following elements are part of a choice: **eq**, **gte**, or **lt**. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **gte** *number*

| | |
|---|---|
| Synopsis | Confidence value to resolve to a charging group |
| Context | **configure** application-assurance group *number* partition *number* policy charging-filter entry *number* match flow-attribute *named-item* confidence gte *number* |
| Tree | gte |
| Description | This command specifies that a successful match occurs when the flow attribute confidence level is greater than or equal to the specified value. |
| Range | 0 to 100 |
| Notes | The following elements are part of a choice: **eq**, **gte**, or **lt**. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **lt** *number*

| | |
|---|---|
| Synopsis | Less than value as the match criterion |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | **configure** application-assurance group *number* partition *number* policy charging-filter entry *number* match flow-attribute *named-item* confidence lt *number* |
| Tree | lt |
| Description | This command specifies that a successful match occurs when the flow attribute confidence level is less than the specified value. |
| Range | 1 to 100 |
| Notes | The following elements are part of a choice: **eq**, **gte**, or **lt**. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## tethered-flow

| | |
|---|---|
| Synopsis | Enable the **tethered-flow** context |
| Context | **configure** application-assurance group *number* partition *number* policy charging-filter entry *number* match tethered-flow |
| Tree | tethered-flow |
| Description | Commands in this context add the tethering status to the match criteria used by this charging filter entry. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **charging-group** [charging-group-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **charging-group** list instance |
| Context | **configure** application-assurance group *number* partition *number* policy charging-group *named-item* |
| Tree | charging-group |
| Description | Commands in this context create a charging group for an Application Assurance policy. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**charging-group-name**] *named-item*

| | |
|---|---|
| Synopsis | Charging group name |
| Context | **configure** application-assurance group *number* partition *number* policy charging-group *named-item* |

| | |
|---|---|
| Tree | charging-group |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** application-assurance group *number* partition *number* policy charging-group *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **export-id** *number*

| | |
|---|---|
| Synopsis | Charging group export ID used for RADIUS accounting |
| Context | **configure** application-assurance group *number* partition *number* policy charging-group *named-item* export-id *number* |
| Tree | export-id |
| Description | This command assigns an export ID value to a charging group, an app application group, or an application to be used for accounting export identification in RADIUS accounting. This ID is encoded in the top 2 bytes of the RADIUS accounting VSA to identify which charging group the counter value represents. |
| Range | 1 to 255 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **notify-start-stop** *keyword*

| | |
|---|---|
| Synopsis | Start and stop notification for the charging group |
| Context | **configure** application-assurance group *number* partition *number* policy charging-group *named-item* notify-start-stop *keyword* |
| Tree | notify-start-stop |
| Options | none, flow, charging-group |

© 2024 Nokia.

| | |
|---|---|
| Default | none |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **custom-protocol** [custom-protocol-id] *custom-protocol-name*

| | |
|---|---|
| Synopsis | Enter the **custom-protocol** list instance |
| Context | **configure** application-assurance group *number* partition *number* policy custom-protocol *custom-protocol-name* |
| Tree | custom-protocol |
| Description | Commands in this context configure custom protocols.<br>Custom protocols allow the creation of TCP and UDP-based custom protocols that employ pattern-match at offset in the protocol signature definition.<br>Operator-configurable custom protocols are evaluated ahead of any Nokia-provided protocol signature in order of custom protocol ID within the context the protocol is defined. The lower ID is matched first in case of flow matching multiple custom protocols.<br>Custom protocols must be created before they can be used in an application definition but do not have to be enabled. To reference a custom protocol in an application definition, or any other CLI configuration one must use the protocol name that is a concatenation of “custom_” and, (for example, custom_01, custom_02 ... custom_10, and so on). This concatenation is also used when reporting custom protocol statistics. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**custom-protocol-id**] *custom-protocol-name*

| | |
|---|---|
| Synopsis | Custom protocol ID for the AA policy custom protocol |
| Context | **configure** application-assurance group *number* partition *number* policy custom-protocol *custom-protocol-name* |
| Tree | custom-protocol |
| Description | This command configures the index into the protocol list that defines a custom protocol for Application Assurance. |
| String length | 9 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the custom protocol |
| Context | **configure** application-assurance group *number* partition *number* policy custom-protocol *custom-protocol-name* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** application-assurance group *number* partition *number* policy custom-protocol *custom-protocol-name* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **expression** [expr-index] *number*

| | |
|---|---|
| Synopsis | Enter the **expression** list instance |
| Context | **configure** application-assurance group *number* partition *number* policy custom-protocol *custom-protocol-name* expression *number* |
| Tree | expression |
| Description | Commands in this context configure an expression string value for pattern-based custom protocols match.<br>A flow matches a custom protocol if the specified string is found at an offset of a TCP/UDP of the first payload packet. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**expr-index**] *number*

| | |
|---|---|
| Synopsis | Expression substring index for custom protocol matching |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## l3-l4-redirect

Synopsis Enter the **l3-l4-redirect** context

Context **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* action l3-l4-redirect

Tree l3-l4-redirect

Description Commands in this context specify sessions matching the criteria are redirected to a different destination using Layer 3 and Layer 4 redirect.

If the redirect action is removed from a session filter, the existing redirected flows are not affected, redirect still occurs. However, no redirect will be applied to newly-established flows.

Notes The following elements are part of a choice: **deny**, **http-redirect**, **l3-l4-redirect**, **permit**, or **tcp-optimizer**.

Introduced 24.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dst-ip-address *(ipv4-address-no-zone | ipv6-address-no-zone)*

Synopsis Destination IP address for traffic redirection

Context **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* action l3-l4-redirect dst-ip-address *(ipv4-address-no-zone | ipv6-address-no-zone)*

Tree dst-ip-address

Description This command specifies a valid unicast server IPv4 or IPv6 address to forward the traffic to. The destination IP address (Layer 3) is modified as indicated. In the reverse direction (toward the subscriber), AA restores the original IP address as the source IP field.

Introduced 24.3.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## dst-port *number*

Synopsis Destination port for traffic redirection

Context **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* action l3-l4-redirect dst-port *number*

Tree dst-port

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | This command specifies a valid TCP/UDP server destination port number. The destination port is modified as indicated. In the reverse direction (toward the subscriber), AA restores the original port number as the port field. |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## permit

| | |
|---|---|
| Synopsis | Permit sessions that match the criteria |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* action permit |
| Tree | permit |
| Notes | The following elements are part of a choice: **deny**, **http-redirect**, **l3-l4-redirect**, **permit**, or **tcp-optimizer**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## tcp-optimizer *reference*

| | |
|---|---|
| Synopsis | TCP optimizer to handle sessions matching the criteria |

| Notes | The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **gt** *number*

| | |
|---|---|
| Synopsis | Greater than match criterion for the port number |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match dst-port gt *number* |
| Tree | gt |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Notes | The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **lt** *number*

| | |
|---|---|
| Synopsis | Less than match criterion for the port |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match dst-port lt *number* |
| Tree | lt |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Notes | The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **port-list** *reference*

| | |
|---|---|
| Synopsis | Destination or source port list |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match dst-port port-list *reference* |
| Tree | port-list |
| Reference | **configure** application-assurance group *number* partition *number* port-list *named-item* |
| Notes | The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## range

| | |
|---|---|
| Synopsis | Enable the **range** context |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match dst-port range |
| Tree | range |
| Description | Commands in this context specify a destination IP port, a destination port list, or a destination range to use as match criteria. |
| Notes | The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## end *number*

| | |
|---|---|
| Synopsis | Upper bound of the port range as match criterion |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match dst-port range end *number* |
| Tree | end |
| Range | 0 \| 1 to 65535 |
| Default | 1 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## start *number*

| | |
|---|---|
| Synopsis | Lower bound of the port range as match criterion |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match dst-port range start *number* |

© 2024 Nokia.

| | |
|---|---|
| Tree | start |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **ip-protocol** *(number | keyword)*

| | |
|---|---|
| Synopsis | IP protocol as a match criterion |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match ip-protocol *(number \| keyword)* |
| Tree | ip-protocol |
| Range | 0 to 255 |
| Options | tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **src-ip**

| | |
|---|---|
| Synopsis | Enter the **src-ip** context |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-ip |
| Tree | src-ip |
| Description | Commands in this context specify a source IP address to use as match criteria. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **ip-prefix** *(ipv4-prefix | ipv6-prefix)*

| | |
|---|---|
| Synopsis | Source IP address prefix as match criterion |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-ip ip-prefix *(ipv4-prefix \| ipv6-prefix)* |
| Tree | ip-prefix |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |

| | |
|---|---|
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **ip-prefix-list** *reference*

| | |
|---|---|
| Synopsis | Source IP address prefix list as match criterion |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-ip ip-prefix-list *reference* |
| Tree | ip-prefix-list |
| Reference | **configure** application-assurance group *number* partition *number* ip-prefix-list *named-item* |
| Notes | The following elements are part of a choice: **ip-prefix** or **ip-prefix-list**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **src-port**

| | |
|---|---|
| Synopsis | Enter the **src-port** context |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-port |
| Tree | src-port |
| Description | Commands in this context specify a source IP port, a source port list, or a source range to use as match criteria. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **eq** *number*

| | |
|---|---|
| Synopsis | Match criterion used for destination or source port |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-port eq *number* |
| Tree | eq |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Notes | The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**. |
| Introduced | 21.10.R1 |

| | |
|---|---|
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **gt** *number*

| | |
|---|---|
| Synopsis | Greater than match criterion for the port number |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-port gt *number* |
| Tree | gt |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Notes | The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **lt** *number*

| | |
|---|---|
| Synopsis | Less than match criterion for the port |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-port lt *number* |
| Tree | lt |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Notes | The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **port-list** *reference*

| | |
|---|---|
| Synopsis | Destination or source port list |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-port port-list *reference* |
| Tree | port-list |
| Reference | **configure** application-assurance group *number* partition *number* port-list *named-item* |
| Notes | The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**. |
| Introduced | 21.10.R1 |

| | |
|---|---|
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## range

| | |
|---|---|
| Synopsis | Enable the **range** context |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-port range |
| Tree | range |
| Description | Commands in this context specify a destination IP port, a destination port list, or a destination range to use as match criteria. |
| Notes | The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## end *number*

| | |
|---|---|
| Synopsis | Upper bound of the port range as match criterion |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-port range end *number* |
| Tree | end |
| Range | 0 \| 1 to 65535 |
| Default | 1 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## start *number*

| | |
|---|---|
| Synopsis | Lower bound of the port range as match criterion |
| Context | **configure** application-assurance group *number* partition *number* session-filter *named-item* entry *number* match src-port range start *number* |
| Tree | start |
| Range | 0 \| 1 to 65535 |
| Default | 0 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **shallow-inspection** *boolean*

| | |
|---|---|
| Synopsis | Enable shallow inspection |
| Context | **configure** application-assurance group *number* partition *number* shallow-inspection *boolean* |
| Tree | shallow-inspection |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **statistics**

| | |
|---|---|
| Synopsis | Enter the **statistics** context |
| Context | **configure** application-assurance group *number* partition *number* statistics |
| Tree | statistics |
| Description | Commands in this context configure accounting and billing statistics for this AA group. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **aa-admit-deny**

| | |
|---|---|
| Synopsis | Enter the **aa-admit-deny** context |
| Context | **configure** application-assurance group *number* partition *number* statistics aa-admit-deny |
| Tree | aa-admit-deny |
| Description | Commands in this context configure admit-deny statistics generation. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **accounting-policy** *reference*

| | |
|---|---|
| Synopsis | Accounting policy |
| Context | **configure** application-assurance group *number* partition *number* statistics aa-admit-deny accounting-policy *reference* |
| Tree | accounting-policy |
| Reference | **configure** log accounting-policy *number* |

### **collect-stats** *boolean*

| | |
|---|---|
| Synopsis | Collect statistics |
| Context | **configure** application-assurance group *number* partition *number* statistics aa-sub collect-stats *boolean* |
| Tree | collect-stats |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **exclude-tcp-retrans** *boolean*

| | |
|---|---|
| Synopsis | Exclude TCP retransmission and error statistics |
| Context | **configure** application-assurance group *number* partition *number* statistics aa-sub exclude-tcp-retrans *boolean* |
| Tree | exclude-tcp-retrans |
| Description | When configured to **true**, TCP errors and retransmission packets are not counted for the purpose of content-based billing. **Note:** This command is only applicable to EPC.This setting has no impact on app/app-group aggregate AA stats. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **max-throughput-stats** *boolean*

| | |
|---|---|
| Synopsis | Collect maximum throughput statistics |
| Context | **configure** application-assurance group *number* partition *number* statistics aa-sub max-throughput-stats *boolean* |
| Tree | max-throughput-stats |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **protocol** [protocol-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **protocol** list instance |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | **configure** application-assurance group *number* partition *number* statistics aa-sub protocol *named-item* |
| Tree | protocol |
| Description | Commands in this context configure AA subscriber accounting statistics for the export of aa-sub protocols of an AA group/partition. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**protocol-name**] *named-item*

| | |
|---|---|
| Synopsis | AA protocol name |
| Context | **configure** application-assurance group *number* partition *number* statistics aa-sub protocol *named-item* |
| Tree | protocol |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **export-using** *keyword*

| | |
|---|---|
| Synopsis | Method used to export statistics |
| Context | **configure** application-assurance group *number* partition *number* statistics aa-sub protocol *named-item* export-using *keyword* |

## aa-sub

| | |
|---|---|
| Synopsis | Enter the **aa-sub** context |
| Context | **configure** application-assurance group *number* partition *number* statistics aa-sub-study *keyword* aa-sub |
| Tree | aa-sub |
| Description | Commands in this context add an existing subscriber identification to a group of special study subscribers.<br>Identifying a group of special study subscribers allows statistics and accounting records for those subscribers to be collected for protocols and applications through Application Assurance. When adding a subscriber to the special study group, accounting records and statistics generation commence immediately. When removing a subscriber from the group, special study statistics and accounting records for that subscriber in the current interval are lost. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **esm** [esm-sub-name] *named-item*

| | |
|---|---|
| Synopsis | Add a list entry for **esm** |
| Context | **configure** application-assurance group *number* partition *number* statistics aa-sub-study *keyword* aa-sub esm *named-item* |
| Tree | esm |
| Description | Commands in this context configure the ESM fields. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**esm-sub-name**] *named-item*

| | |

## log

| | |
|---|---|
| Synopsis | Enter the **log** context |
| Context | **configure** application-assurance group *number* partition *number* tcp-validate *named-item* log |
| Tree | log |
| Description | Commands in this context enable event logging of traffic dropped by TCP validation. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **all** *boolean*

| | |
|---|---|
| Synopsis | Enable logging of all dropped TCP packets |
| Context | **configure** application-assurance group *number* partition *number* tcp-validate *named-item* log all *boolean* |
| Tree | all |
| Description | When configured to **true**, all dropped TCP packets are logged, including the following:<br>• packets received after an RST and discarded<br>• packets received before TCP session establishment (before SYN) and discarded<br>An event log must also be configured to enable logging of all dropped packets.<br>When configured to **false**, discards related to the described cases are not captured in any event log. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **event-log** *reference*

| | |
|---|---|
| Synopsis | Event log name |
| Context | **configure** application-assurance group *number* partition *number* tcp-validate *named-item* log event-log *reference* |
| Tree | event-log |
| Reference | **configure** application-assurance group *number* partition *number* event-log *named-item* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **strict** *boolean*

| | |
|---|---|
| Synopsis | Enable strict checking of TCP traffic |
| Context | **configure** application-assurance group *number* partition *number* tcp-validate *named-item* strict *boolean* |
| Tree | strict |
| Description | When configured to **true**, the command specifies whether enforcement of TCP sequence and acknowledgment numbers are applied. If a packet does not meet the expected sequence or acknowledgment number, it is dropped. This command should only be enabled if the expected bit error rate or packet loss is low.<br>For example, if acknowledgments are lost before being detected by AA, the server timeouts are triggered and retransmissions occur. If strict is enabled, these retransmissions resemble a reply attack and are dropped by AA.<br>When configured to **false**, the command removes the TCP sequence and acknowledgment number enforcement. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **tethering-detection**

| | |
|---|---|
| Synopsis | Enter the **tethering-detection** context |
| Context | **configure** application-assurance group *number* partition *number* tethering-detection |
| Tree | tethering-detection |
| Description | Commands in this context configure tethering detection for the group. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of tethering detection |
| Context | **configure** application-assurance group *number* partition *number* tethering-detection admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 21.10.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## single-device

| | |
|---|---|
| Synopsis | Enter the **single-device** context |
| Context | **configure** application-assurance group *number* partition *number* tethering-detection single-device |
| Tree | single-device |
| Description | Commands in this context configure the single-device fields and expected TTL values for flow-level tethering detection. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## expected-ttl [ttl] *number*

| | |
|---|---|
| Synopsis | Add a list entry for **expected-ttl** |
| Context | **configure** application-assurance group *number* partition *number* tethering-detection single-device expected-ttl *number* |
| Tree | expected-ttl |
| Description | Commands in this context configure the TTL values for single-device tethering detection. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [ttl] *number*

| | |
|---|---|
| Synopsis | Expected TTL traffic value from host devices |
| Context | **configure** application-assurance group *number* partition *number* tethering-detection single-device expected-ttl *number* |
| Tree | expected-ttl |
| Range | 1 to 255 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **invert-match** *boolean*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Mark flows with expected TTL values as tethered |
| Context | **configure** application-assurance group *number* partition *number* tethering-detection single-device invert-match *boolean* |
| Tree | invert-match |
| Description | When configured to **true**, AA classifies flows with expected TTL values as coming from a connected device (tethered).<br>When configured to **false**, AA classifies flows with expected TTL values as coming from the host device (untethered). |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **ttl-monitor**

| | |
|---|---|
| Synopsis | Enter the **ttl-monitor** context |
| Context | **configure** application-assurance group *number* partition *number* tethering-detection ttl-monitor |
| Tree | ttl-monitor |
| Description | Commands in this context configure the scope of analysis for TCP and UDP traffic for tethering detection. |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **tcp-protocols** *keyword*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Scope of analysis for TCP traffic |
| Context | **configure** application-assurance group *number* partition *number* tethering-detection ttl-monitor tcp-protocols *keyword* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | tcp-protocols |
| Description | This command configures whether AA analyzes all TCP traffic or only traffic from standard applications that generate consistent TTL values. Configuring AA to analyze all TCP traffic is typically recommended. |
| Options | standard – Protocols with reliable TTL-tethering state association<br>all – All protocols |
| Default | standard |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## udp-protocols *keyword*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Scope of analysis for UDP traffic |
| Context | **configure** application-assurance group *number* partition *number* tethering-detection ttl-monitor udp-protocols *keyword* |
| Tree | udp-protocols |
| Description | This command configures whether AA analyzes all UDP traffic or only traffic from standard applications that generate consistent TTL values. Configuring AA to analyze only standard UDP traffic is recommended. |
| Options | standard – Protocols with reliable TTL-tethering state association<br>all – All protocols |
| Default | standard |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## threshold-crossing-alert

| | |
|---|---|
| Synopsis | Enter the **threshold-crossing-alert** context |
| Context | **configure** application-assurance group *number* partition *number* threshold-crossing-alert |
| Tree | threshold-crossing-alert |
| Description | Commands in this context configure the generation of threshold crossing alerts (TCAs). |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

| Context | **configure** application-assurance group *number* partition *number* transit-ip-policy *number* sub-ident-policy *reference* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | sub-ident-policy |
| Description | This command defines the subscriber identification policy for the transit IP policy that will be associated with a SAP. The subscriber identification policy must be defined prior to associating the profile with a SAP in the **configure subscriber-mgmt sub-ident-policy** context. Subscribers are managed by the system through the use of subscriber identification strings. A subscriber identification string uniquely identifies a subscriber. For static hosts, the subscriber identification string is explicitly defined with each static subscriber host.<br><br>For dynamic hosts, the subscriber identification string must be derived from the DHCP ACK message sent to the subscriber host. The default value for the string is the content of Option 82 CIRCUIT-ID and REMOTE-ID fields interpreted as an octet string. As an option, the DHCP ACK message may be processed by a subscriber identification policy which has the capability to parse the message into an alternative ASCII or octet string value.<br><br>When multiple hosts on the same port are associated with the same subscriber identification string, they are considered to be host members of the same subscriber. A subscriber identification policy can also be used for identifying dynamic transit subscriber names. |
| Reference | **configure** subscriber-mgmt sub-ident-policy *external-named-item* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## transit-auto-create

| | |
|---|---|
| Synopsis | Enter the **transit-auto-create** context |
| Context | **configure** application-assurance group *number* partition *number* transit-ip-policy *number* transit-auto-create |
| Tree | transit-auto-create |
| Description | Commands in this context enable the seen-IP auto creation of transit subscribers using the transit IP policy name and subscriber IP address as the aa-sub name. The default app-profile configured against the transit IP policy is applied to these subscribers. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## admin-state *keyword*

| | |

### **inactivity-monitor** *boolean*

| | |
|---|---|
| Synopsis | Monitor inactivity on auto-created transit subscribers |
| Context | **configure** application-assurance group *number* partition *number* transit-ip-policy *number* transit-auto-create inactivity-monitor *boolean* |
| Tree | inactivity-monitor |
| Description | When configured to **true**, this command enables the auto-removal of inactive transit subscribers. Periodically, AA removes any inactive auto-created subscribers. An inactive subscriber is defined as having no active flows in the last period.<br>When configured to **false**, this command disables the auto-removal of inactive transit subscribers. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **transit-prefix-policy** [prefix-policy-id] *number*

| | |
|---|---|
| Synopsis | Enter the **transit-prefix-policy** list instance |
| Context | **configure** application-assurance group *number* partition *number* transit-prefix-policy *number* |
| Tree | transit-prefix-policy |
| Description | Commands in this context define a transit AA subscriber prefix policy. Transit AA subscribers are managed by the system through the use of this policy assigned to services, which determines how transit subscribers are created and removed for that service. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## policer

| | |
|---|---|
| Synopsis | Enter the **policer** context |
| Context | **configure** application-assurance group *number* policer |
| Tree | policer |
| Description | Commands in this context create application assurance policer profiles of a specified type. Policers can be bandwidth or flow-limiting and can have a granularity of system scope (limits traffic entering AA ISA for all or a subset of AA subscribers) or a subscriber scope (limits apply to each AA subscriber traffic).<br><br>The policer type and granularity can only be configured during creation. They cannot be modified. The policer profile must be removed from all AQPs to be removed. Changes to policer profile parameters take effect immediately for policers instantiated as a result of AQP actions using this profile. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## anl-bandwidth-policer [policer-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **anl-bandwidth-policer** list instance |
| Context | **configure** application-assurance group *number* policer anl-bandwidth-policer *named-item* |
| Tree | anl-bandwidth-policer |
| Description | Commands in this context configure the AA ANL policer. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [policer-name] *named-item*

| | |
|---|---|
| Synopsis | Policer name |
| Context | **configure** application-assurance group *number* policer anl-bandwidth-policer *named-item* |
| Tree | anl-bandwidth-policer |
| String length | 1 to 32 |

| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **action** *keyword*

| | |
|---|---|
| Synopsis | Action for packets violating configured policer rate |
| Context | **configure** application-assurance group *number* policer anl-bandwidth-policer *named-item* action *keyword* |
| Tree | action |
| Description | This command configures the action to be performed by single-bucket bandwidth policers for non-conformant traffic.<br>Dual bucket bandwidth policers cannot have their action configured and always mark traffic below CIR as in-profile, between CIR and PIR as out-of-profile, and drop traffic above PIR. Flow policers always discard non-conformant traffic.<br>When multiple application assurance policers are configured against a single flow (including policers at both subscriber and system), the flow/packet is dropped if one of the policers requires the packet to be discarded. This occurs regardless of the action of the other policers. |
| Options | permit-deny, priority-mark, monitor |
| Default | permit-deny |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **adaptation-rule**

| | |
|---|---|
| Synopsis | Enter the **adaptation-rule** context |
| Context | **configure** application-assurance group *number* policer anl-bandwidth-policer *named-item* adaptation-rule |
| Tree | adaptation-rule |
| Description | Commands in this context configure the AA policer adaptation rule fields and define the method used by the system to derive the operational CIR and PIR values when the queue is provisioned. For the CIR and PIR values individually, the system attempts to find the best operational rate depending on the defined option. To change the CIR adaptation rule only, the current PIR rule must be part of the command executed. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **pir** *keyword*

| | |
|---|---|
| Synopsis | Peak information rate value for the adaptation rule |
| Context | **configure** application-assurance group *number* policer anl-bandwidth-policer *named-item* adaptation-rule pir *keyword* |
| Tree | pir |
| Description | This command configures the adaptation rule to be used while computing the operational PIR value. The adaptation rule specifies the rules to compute the operational values while maintaining minimum offset. |
| Options | max, min, closest |
| Default | closest |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** application-assurance group *number* policer anl-bandwidth-policer *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **mbs** *number*

| | |
|---|---|
| Synopsis | ANL bandwidth policer maximum burst size |
| Context | **configure** application-assurance group *number* policer anl-bandwidth-policer *named-item* mbs *number* |
| Tree | mbs |
| Description | This command configures the maximum burst size (MBS) for the policer. Nokia recommends configuring MBS larger than twice the MTU for the traffic handled by the policer to allow for some burstiness of the traffic. MBS is configurable for single-bucket, dual-bucket bandwidth, and flow setup rate policers only. |
| Range | 0 to 131071 |
| Units | kilobytes |
| Default | 0 |

| | |
|---|---|
| Description | This command configures the committed information rate (CIR) for the dual-bucket-bandwidth-policer policer time of day override. Nokia recommends that the CIR is configured larger than twice the maximum MTU for the traffic handled by the policer to allow for some burstiness of the traffic. The CIR is configurable for dual-bucket bandwidth policers only. |
| Range | 0 to 100000000 |
| Units | kilobps |
| Options | max |
| Default | 0 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **action** *keyword*

| | |
|---|---|
| Synopsis | Action for packets violating configured policer rate |
| Context | **configure** application-assurance group *number* policer flow-bandwidth-policer *named-item* action *keyword* |
| Tree | action |
| Description | This command configures the action to be performed by single-bucket bandwidth policers for non-conformant traffic.<br>Dual bucket bandwidth policers cannot have their action configured and always mark traffic below CIR as in-profile, between CIR and PIR as out-of-profile, and drop traffic above PIR. Flow policers always discard non-conformant traffic.<br>When multiple application assurance policers are configured against a single flow (including policers at both subscriber and system), the flow/packet is dropped if one of the policers requires the packet to be discarded. This occurs regardless of the action of the other policers. |
| Options | permit-deny, priority-mark, monitor |
| Default | permit-deny |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **action** *keyword*

| | |
|---|---|
| Synopsis | Action for packets violating configured policer rate |
| Context | **configure** application-assurance group *number* policer single-bucket-bandwidth-policer *named-item* action *keyword* |
| Tree | action |
| Description | This command configures the action to be performed by single-bucket bandwidth policers for non-conformant traffic.<br>Dual bucket bandwidth policers cannot have their action configured and always mark traffic below CIR as in-profile, between CIR and PIR as out-of-profile, and drop traffic above PIR. Flow policers always discard non-conformant traffic.<br>When multiple application assurance policers are configured against a single flow (including policers at both subscriber and system), the flow/packet is dropped if one of the policers requires the packet to be discarded. This occurs regardless of the action of the other policers. |
| Options | permit-deny, priority-mark, monitor |
| Default | permit-deny |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **adaptation-rule**

| | |

### **mbs** *number*

| | |
|---|---|
| Synopsis | Bandwidth policer MBS for time of day override |
| Context | **configure** application-assurance group *number* policer single-bucket-bandwidth-policer *named-item* time-of-day-override *number* mbs *number* |
| Tree | mbs |
| Description | This command configures the maximum burst size (MBS) for the policer. Nokia recommends configuring MBS larger than twice the MTU for the traffic handled by the policer to allow for some burstiness of the traffic. MBS is configurable for single-bucket, dual-bucket bandwidth, and flow setup rate policers only. |
| Range | 0 to 131071 |
| Units | kilobytes |
| Default | 0 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **pir** *(number | keyword)*

### **time** *policer-start-time*

| | |
|---|---|
| Synopsis | Weekly start time |
| Context | **configure** application-assurance group *number* policer single-bucket-bandwidth-policer *named-item* time-of-day-override *number* time-range weekly start time *policer-start-time* |
| Tree | time |
| Description | This command configures the weekly start time of the policer override.<br>The time format must be [hh:mm]. The hh value is 00 to 24. The mm value is 00, 15, 30, or 45. If hh is 24, mm must be 00. |
| String length | 3 to 5 |
| Notes | This element is mandatory. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **tcp-optimizer** [tcp-optimizer-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **tcp-optimizer** list instance |
| Context | **configure** application-assurance group *number* tcp-optimizer *named-item* |
| Tree | tcp-optimizer |
| Description | Commands in this context configure the TCP optimizer policy. When a TCP optimizer policy is removed or deleted, the existing flows using this policy are abandoned, and optimization is stopped. |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**tcp-optimizer-name**] *named-item*

| | |
|---|---|
| Synopsis | TCP optimizer name |
| Context | **configure** application-assurance group *number* tcp-optimizer *named-item* |
| Tree | tcp-optimizer |
| Description | This command configures the name of the TCP optimizer policy. |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **dack-timeout** *number*

| | |
|---|---|
| Synopsis | Delayed acknowledgment timeout for client and server |
| Context | **configure** application-assurance group *number* tcp-optimizer *named-item* dack-timeout *number* |
| Tree | dack-timeout |
| Description | This command configures a delay ACK (DACK) timeout for the TCP optimizer.<br>By entering this command a default of 200 ms timeout is enabled for delayed acknowledgment. This value is not configurable. |
| Range | 200 |
| Units | milliseconds |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** application-assurance group *number* tcp-optimizer *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **high-cpu-backoff** *boolean*

| | |
|---|---|
| Synopsis | Stop optimizing sessions when CPU capacity is limited |
| Context | **configure** application-assurance group *number* tcp-optimizer *named-item* high-cpu-backoff *boolean* |
| Tree | high-cpu-backoff |
| Description | When configured to **true**, AA stops optimizing TCP sessions when the CPU capacity is limited.<br>AA implements the following CPU utilization thresholds:<br>•<br>level 1 - 75%<br>•<br>level 2 - 85% |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

- level 3 - 90%

The following describes the functionality of the preceding thresholds:

- **early random bypass stage (level 1)**

  When the CPU utilization is between level 1 and level 2, AA randomly optimizes or bypasses new TCP sessions proportional to the position of the CPU utilization within the range between level 1 and level 2.

- **stop optimization of new flows stage (level 2)**

  When the CPU utilization is at or above level 2, AA stops optimizing new TCP sessions.

- **abandon stage (level 3)**

  When the CPU utilization is at or above level 3, AA abandons existing optimized TCP sessions.

**Note:** The CPU utilization is measured once per second in each core or worker. The CPU utilization may differ between cores.

When configured to **false**, AA optimizes TCP sessions, regardless of the CPU capacity.

| | |
|---|---|
| Default | false |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **initial-cwnd** *number*

| | |
|---|---|
| Synopsis | MSS of the TCP optimizer initial congestion window |
| Context | **configure** application-assurance group *number* tcp-optimizer *named-item* initial-cwnd *number* |
| Tree | initial-cwnd |
| Description | This command configures the maximum segment size (MSS) of the initial congestion window used by the TCP optimizer (TCPO) during the Slow Start (SS) period. |
| Range | 1 to 256 |
| Default | 8 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **initial-ss-threshold** *(number | keyword)*

| | |
|---|---|
| Synopsis | Initial TCP Slow Start threshold for client and server |
| Context | **configure** application-assurance group *number* tcp-optimizer *named-item* initial-ss-threshold *(number \| keyword)* |
| Tree | initial-ss-threshold |
| Description | This command configures the initial Slow Start (SS) threshold for a specific TCP optimizer policy. Nokia recommends setting the threshold close to the access network Bandwidth Delay Product (BDP). |
| Range | 0 to 1000000 |
| Units | kilobytes |
| Options | auto |
| Default | 1000000 |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **network-rtt-threshold** *number*

| | |
|---|---|
| Synopsis | Network round trip time threshold |
| Context | **configure** application-assurance group *number* tcp-optimizer *named-item* network-rtt-threshold *number* |
| Tree | network-rtt-threshold |
| Description | This command configures the threshold of the Round Trip Time (RTT) delay of the network side (between AA and the content provider) above which TCP Optimization (TCPO) is performed. This enables the operator to disable optimization for content that is served from a location close to the TCP optimizer. |
| Range | 1 to 100 |
| Units | milliseconds |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **tcp-stack** *keyword*

| | |
|---|---|
| Synopsis | TCP stack congestion control algorithm |
| Context | **configure** application-assurance group *number* tcp-optimizer *named-item* tcp-stack *keyword* |
| Tree | tcp-stack |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | This command configures the TCP stack used toward the subscriber.<br>**Note:** The TCP stack used toward the core network is new-reno, and it is not configurable. TCP BBR, BBRv2, TCP Illinois, and TCP Westwood implement a sender-side modification of the TCP congestion window algorithm that improves the performance of TCP Reno in wireless networks with lossy links. |
| Options | westwood, illinois, new-reno, bbr, bbrv2 |
| Default | westwood |
| Introduced | 22.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **url-filter** [url-filter-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **url-filter** list instance |
| Context | **configure** application-assurance group *number* url-filter *named-item* |
| Tree | url-filter |
| Description | Commands in this context configure a URL filter action for flows of a specific type matching this entry. If no URL filters are specified, then no URL filters are evaluated. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**url-filter-name**] *named-item*

| | |
|---|---|
| Synopsis | URL filter name |
| Context | **configure** application-assurance group *number* url-filter *named-item* |
| Tree | url-filter |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the AA URL filter |
| Context | **configure** application-assurance group *number* url-filter *named-item* admin-state *keyword* |

Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Options | enable, disable |
| Default | disable |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## apply-function-specific-behaviour *boolean*

| | |
|---|---|
| Synopsis | Use function-specific behavior for action or redirect |
| Context | **configure** application-assurance group *number* url-filter *named-item* apply-function-specific-behaviour *boolean* |
| Tree | apply-function-specific-behaviour |
| Description | When configured to **true**, the function-specific configurations for URL list, ICAP, and web service (**url-list**, **icap**, and **web-service)** are used for default action (**default-action**) and HTTP redirect (**http-redirect**).<br>When configured to **false**, the configuration at the URL filter level (**url-filter**) is used for default action and HTTP redirect. |
| Default | false |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## default-action

| | |
|---|---|
| Synopsis | Enter the **default-action** context |
| Context | **configure** application-assurance group *number* url-filter *named-item* default-action |
| Tree | default-action |
| Description | Commands in this context configure the default action to take effect when the URL filter cannot be used. This may occur in the following cases:<br>• for the local URL list when the URL list is shut down or the file is not loaded due to an error.<br>• in the case of ICAP or web filtering when all TCP connections are busy or down. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## allow

| | |
|---|---|
| Synopsis | Allow all requests as the default URL filter action |
| Context | **configure** application-assurance group *number* url-filter *named-item* default-action allow |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | allow |
| Description | When configured, the router allows all requests as the default URL filter action when the URL filter cannot be used. |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## block-all

| | |
|---|---|
| Synopsis | Block all requests as the default URL filter action |
| Context | **configure** application-assurance group *number* url-filter *named-item* default-action block-all |
| Tree | block-all |
| Description | When configured, the router blocks all requests as the default URL filter action when the URL filter cannot be used. |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## block-http-redirect *reference*

| | |
|---|---|
| Synopsis | HTTP URL name for block and redirect request action |
| Context | **configure** application-assurance group *number* url-filter *named-item* default-action block-http-redirect *reference* |
| Tree | block-http-redirect |
| Description | This command specifies the URL that the user is directed to when the router blocks traffic. The information page can be different from the page the user is redirected to when the site that the user tried to access is found in the URL filter. This page is configured using the **configure application-assurance group url-filter http-redirect** command. |
| Reference | **configure** application-assurance group *number* http-redirect *named-item* |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

| | |
|---|---|
| Description | Commands in this context configure the URL filter ICAP policy fields. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **custom-x-header** *named-item*

| | |
|---|---|
| Synopsis | Custom x-header field name to include in ICAP requests |
| Context | **configure** application-assurance group *number* url-filter *named-item* icap custom-x-header *named-item* |
| Tree | custom-x-header |
| Description | This command configures the URL filter ICAP policy to include a new x-header field; the content of the x-header is populated based on the AQP URL filter action which can optionally specify the ASO characteristic value to include in the x-header. |
| String length | 1 to 32 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **default-action**

| | |
|---|---|
| Synopsis | Enter the **default-action** context |
| Context | **configure** application-assurance group *number* url-filter *named-item* icap default-action |
| Tree | default-action |
| Description | Commands in this context configure a default action for the URL filter. The default action takes effect when the URL filter cannot be used. This may happen when all TCP connections are busy or down. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **allow**

| | |
|---|---|
| Synopsis | Allow all requests as the default action |
| Context | **configure** application-assurance group *number* url-filter *named-item* icap default-action allow |
| Tree | allow |
| Description | When configured, this command allows all traffic when the URL filter cannot be used. |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |

| | |
|---|---|
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## block-all

| | |
|---|---|
| Synopsis | Block all requests as the default action |
| Context | **configure** application-assurance group *number* url-filter *named-item* icap default-action block-all |
| Tree | block-all |
| Description | When configured, this command blocks all traffic when the URL filter cannot be used. |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## block-http-redirect *reference*

| | |
|---|---|
| Synopsis | HTTP URL for redirection when URL filter cannot be used |
| Context | **configure** application-assurance group *number* url-filter *named-item* icap default-action block-http-redirect *reference* |
| Tree | block-http-redirect |
| Description | This command blocks traffic and redirects the user to an information page, which can be different than the page the user is redirected to when the site they attempted to access was found in the URL filter; this page is configured using the **configure application-assurance group url-filter http-redirect** command. |
| Reference | **configure** application-assurance group *number* http-redirect *named-item* |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## http-redirect *reference*

| | |
|---|---|
| Synopsis | HTTP redirect object used when ICAP blocks HTTP request |
| Context | **configure** application-assurance group *number* url-filter *named-item* icap http-redirect *reference* |
| Tree | http-redirect |
| Reference | **configure** application-assurance group *number* http-redirect *named-item* |

## local-filtering

| | |
|---|---|
| Synopsis | Enter the **local-filtering** context |
| Context | **configure** application-assurance group *number* url-filter *named-item* local-filtering |
| Tree | local-filtering |
| Description | Commands in this context configure a URL filter policy for local filtering to filter traffic based on a list of URLs located on a file stored in the router compact flash. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## allow-list *reference*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Local filtering URL list for allowed URLs |
| Context | **configure** application-assurance group *number* url-filter *named-item* local-filtering allow-list *reference* |
| Tree | allow-list |
| Reference | **configure** application-assurance group *number* url-list *named-item* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## deny-list [url-list-name] *reference*

| | |
|---|---|
| Synopsis | Enter the **deny-list** list instance |
| Context | **configure** application-assurance group *number* url-filter *named-item* local-filtering deny-list *reference* |
| Tree | deny-list |
| Description | Commands in this context configure a list of denied URLs to be added to the local URL filter policy. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**url-list-name**] *reference*

| | |
|---|---|
| Synopsis | URL list name |
| Context | **configure** application-assurance group *number* url-filter *named-item* local-filtering deny-list *reference* |
| Tree | deny-list |
| Description | This command adds a deny-list URL list to the local URL filter policy. |
| Reference | **configure** application-assurance group *number* url-list *named-item* |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### default-action

| | |
|---|---|
| Synopsis | Enter the **default-action** context |
| Context | **configure** application-assurance group *number* url-filter *named-item* local-filtering deny-list *reference* default-action |
| Tree | default-action |
| Description | Commands in this context configure a default action for the URL filter. The default action takes effect when the URL filter cannot be used. This may happen in the case of a local URL list when the URL list is disabled or the file is not loaded due to an error. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### allow

| | |
|---|---|
| Synopsis | Allow all requests as the default action |
| Context | **configure** application-assurance group *number* url-filter *named-item* local-filtering deny-list *reference* default-action allow |
| Tree | allow |
| Description | This command allows all traffic when the URL filter cannot be used. |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## block-all

| | |
|---|---|
| Synopsis | Block all requests as the default action |
| Context | **configure** application-assurance group *number* url-filter *named-item* local-filtering deny-list *reference* default-action block-all |
| Tree | block-all |
| Description | This command blocks all traffic when the URL filter cannot be used. |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## block-http-redirect *reference*

| | |
|---|---|
| Synopsis | HTTP URL for redirection when URL filter cannot be used |
| Context | **configure** application-assurance group *number* url-filter *named-item* local-filtering deny-list *reference* default-action block-http-redirect *reference* |
| Tree | block-http-redirect |
| Description | This command blocks traffic and redirects the user to an information page, which can be different than the page the user is redirected to when the site they attempted to access was found in the URL filter; this page is configured using the **configure application-assurance group url-filter http-redirect** command. |
| Reference | **configure** application-assurance group *number* http-redirect *named-item* |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## http-redirect *reference*

| | |
|---|---|
| Synopsis | HTTP redirect object applied to blocked HTTP requests |
| Context | **configure** application-assurance group *number* url-filter *named-item* local-filtering deny-list *reference* http-redirect *reference* |
| Tree | http-redirect |
| Reference | **configure** application-assurance group *number* http-redirect *named-item* |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## web-service

| | |
|---|---|
| Synopsis | Enter the **web-service** context |
| Context | **configure** application-assurance group *number* url-filter *named-item* web-service |
| Tree | web-service |
| Description | Commands in this context configure the URL filter policy using web-service filtering. The operator must configure the web service, hostname, DNS server to use, the AA interface VLAN ID, and provision the category profiles. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## category-set *number*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Web service category ID |
| Context | **configure** application-assurance group *number* url-filter *named-item* web-service category-set *number* |
| Tree | category-set |
| Range | 1 to 65535 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## classification-overrides

| | |
|---|---|
| Synopsis | Enter the **classification-overrides** context |
| Context | **configure** application-assurance group *number* url-filter *named-item* web-service classification-overrides |
| Tree | classification-overrides |
| Description | Commands in this context create a classification override and allow the operator to manually set the category of a hostname. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

## allow

| | |
|---|---|
| Synopsis | Allow all requests as the default action |
| Context | **configure** application-assurance group *number* url-filter *named-item* web-service default-action allow |
| Tree | allow |
| Description | This command allows all traffic when the web service is unavailable. |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## block-all

| | |
|---|---|
| Synopsis | Block all requests as the default action |
| Context | **configure** application-assurance group *number* url-filter *named-item* web-service default-action block-all |
| Tree | block-all |
| Description | This command blocks all traffic when the web service is unavailable. |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## block-http-redirect *reference*

| | |
|---|---|
| Synopsis | HTTP URL for redirection when traffic is blocked |
| Context | **configure** application-assurance group *number* url-filter *named-item* web-service default-action block-http-redirect *reference* |
| Tree | block-http-redirect |
| Description | This command specifies the HTTP URL to be redirected to when traffic is blocked. This URL can be different than the URL the user is redirected to when the site they attempted to access was found in the URL filter (which is configured in the **configure application-assurance group url-filter http-redirect** command). |
| Reference | **configure** application-assurance group *number* http-redirect *named-item* |
| Notes | The following elements are part of a choice: **allow**, **block-all**, or **block-http-redirect**. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

| | |
|---|---|
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **url-list** [url-list-name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **url-list** list instance |
| Context | **configure** application-assurance group *number* url-list *named-item* |
| Tree | url-list |
| Description | Commands in this context configure a URL list object. The URL list points to a file containing a list of URLs located on the system Compact Flash and is then referenced in a URL filter object to filter and redirect subscribers when a URL from this file is accessed. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**url-list-name**] *named-item*

| | |
|---|---|
| Synopsis | URL list name |
| Context | **configure** application-assurance group *number* url-list *named-item* |
| Tree | url-list |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the URL list |
| Context | **configure** application-assurance group *number* url-list *named-item* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **server** [server-index] *number*

| | |
|---|---|
| Synopsis | Enter the **server** list instance |
| Context | **configure** application-assurance radius-accounting-policy *named-item* radius-accounting-server server *number* |
| Tree | server |
| Description | Commands in this context configure the RADIUS server and the RADIUS server IP address, index, and key values. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

RADIUS servers are accessed in order from lowest to highest index for authentication requests until a response from a server is received. A higher indexed server is only queried if no response is received from a lower indexed server (which implies that the server is not available). If a response from a server is received, no other RADIUS servers are queried.

| | |
|---|---|
| Max. instances | 5 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**server-index**] *number*

| | |
|---|---|
| Synopsis | RADIUS accounting server index |
| Context | **configure** application-assurance radius-accounting-policy *named-item* radius-accounting-server server *number* |
| Tree | server |
| Description | This command configures the index for the RADIUS server. The index determines the sequence in which the servers are queried for authentication requests. Servers are queried in order from lowest to highest index. |
| Range | 1 to 5 |
| Notes | This element is part of a list key. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **address** *ipv4-unicast-address*

| | |
|---|---|
| Synopsis | RADIUS server IP address |
| Context | **configure** application-assurance radius-accounting-policy *named-item* radius-accounting-server server *number* address *ipv4-unicast-address* |
| Tree | address |
| Description | This command configures the IP address of the RADIUS server. Two RADIUS servers cannot have the same IP address. An error message is generated if the server address is a duplicate. |
| Notes | This element is mandatory. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **port** *number*

| | |
|---|---|
| Synopsis | RADIUS server UDP port used for authentication |
| Context | **configure** application-assurance radius-accounting-policy *named-item* radius-accounting-server server *number* port *number* |
| Tree | port |
| Range | 1 to 65535 |
| Default | 1813 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **secret** *encrypted-leaf*

| | |
|---|---|
| Synopsis | RADIUS server secret key |
| Context | **configure** application-assurance radius-accounting-policy *named-item* radius-accounting-server server *number* secret *encrypted-leaf* |
| Tree | secret |
| Description | This command configures the secret key to access the RADIUS server. This secret key must match the password on the RADIUS server. |
| String length | 1 to 54 |
| Notes | This element is mandatory. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **source-address** *ipv4-unicast-address*

| | |
|---|---|
| Synopsis | Source IP address of RADIUS packets |
| Context | **configure** application-assurance radius-accounting-policy *named-item* radius-accounting-server source-address *ipv4-unicast-address* |
| Tree | source-address |
| Description | This command configures the source IP address of the RADIUS packet.<br>The system IP address must be configured for the RADIUS client to work. The system IP address must only be configured if the source address is not specified. When this command reverts to its default, the source address is determined at the moment the request is sent.<br>This address is also used in the **nas-ip-address** command in the **configure aaa radius isa-policy accounting include-attributes** and **configure aaa radius isa-policy** |

| | |
|---|---|
| | **authentication include-attributes** contexts as it is set to the system IP address if no source address was given. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **timeout** *number*

| | |
|---|---|
| Synopsis | RADIUS accounting server response timeout |
| Context | **configure** application-assurance radius-accounting-policy *named-item* radius-accounting-server timeout *number* |
| Tree | timeout |
| Range | 1 to 90 |
| Units | seconds |
| Default | 5 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **significant-change** *number*

| | |
|---|---|
| Synopsis | Change delta for RADIUS accounting record updates |
| Context | **configure** application-assurance radius-accounting-policy *named-item* significant-change *number* |
| Tree | significant-change |
| Description | This command configures the number of changes required to generate the record. |
| Range | 1 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **usage-alert-thresholds**

| | |
|---|---|
| Synopsis | Enter the **usage-alert-thresholds** context |
| Context | **configure** application-assurance usage-alert-thresholds |
| Tree | usage-alert-thresholds |
| Description | Commands in this context configure the AA performance monitoring alerts. |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **bit-rate-high-wmark** *(number | keyword)*

| | |
|---|---|
| Synopsis | High watermark for bit rate alarms |
| Context | **configure** application-assurance usage-alert-thresholds bit-rate-high-wmark *(number \| keyword)* |
| Tree | bit-rate-high-wmark |
| Description | This command configures the high watermark for bit rate alarms. The value must be larger than or equal to the low watermark value. |
| Range | 1 to 100000 |
| Units | megabps |
| Options | max |
| Default | max |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **bit-rate-low-wmark** *number*

| | |
|---|---|
| Synopsis | Low watermark for bit rate alarms |
| Context | **configure** application-assurance usage-alert-thresholds bit-rate-low-wmark *number* |
| Tree | bit-rate-low-wmark |
| Description | This command configures the utilization of the flow records on the ISA-AA group when the full alarm is cleared by the agent. |
| Range | 0 to 99999 |
| Default | 0 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **datapath-cpu-high-wmark** *(number | keyword)*

| | |
|---|---|
| Synopsis | High watermark for datapath CPU alarms |
| Context | **configure** application-assurance usage-alert-thresholds datapath-cpu-high-wmark *(number \| keyword)* |
| Tree | datapath-cpu-high-wmark |
| Description | This command configures the system-wide high watermark threshold as a percentage of the per-ISA datapath core CPU utilization, where an alarm is raised by the agent. CPU usage is the average usage across all datapath cores. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Range | 0 to 100 |
| Units | percent |
| Options | max |
| Default | 95 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **datapath-cpu-low-wmark** *number*

| | |
|---|---|
| Synopsis | Low watermark for datapath CPU alarms |
| Context | **configure** application-assurance usage-alert-thresholds datapath-cpu-low-wmark *number* |
| Tree | datapath-cpu-low-wmark |
| Description | This command configures the system-wide low watermark threshold as a percentage of the per-ISA datapath core CPU utilization, where an alarm is raised by the agent. CPU usage is the average usage across all datapath cores. |
| Range | 0 to 100 |
| Units | percent |
| Default | 90 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **flow-setup-rate-high-wmark** *(number | keyword)*

| | |
|---|---|
| Synopsis | High watermark for flow setup rate |
| Context | **configure** application-assurance usage-alert-thresholds flow-setup-rate-high-wmark *(number | keyword)* |
| Tree | flow-setup-rate-high-wmark |
| Description | This command configures the system-wide high watermark threshold for per-ISA throughput in packets/second when an alarm is raised by the agent. The value must be larger than or equal to the **packet-rate-low-wmark** value. |
| Range | 1 to 2000000 |
| Options | max |
| Default | max |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **flow-setup-rate-low-wmark** *number*

| | |
|---|---|
| Synopsis | Low watermark for flow setup rate |
| Context | **configure** application-assurance usage-alert-thresholds flow-setup-rate-low-wmark *number* |
| Tree | flow-setup-rate-low-wmark |
| Description | This command configures the flow setup rate on the ISA-AA when a flow setup alarm is raised by the agent. |
| Range | 0 to 1999999 |
| Default | 0 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **flow-table-high-wmark** *number*

| | |
|---|---|
| Synopsis | Flow table high watermark |
| Context | **configure** application-assurance usage-alert-thresholds flow-table-high-wmark *number* |
| Tree | flow-table-high-wmark |
| Description | This command configures the system-wide high watermark threshold as a percentage of the flow table size for the per-ISA utilization of the flow records when a full alarm is raised by the agent. |
| Range | 0 to 100 |
| Units | percent |
| Default | 95 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **flow-table-low-wmark** *number*

| | |
|---|---|
| Synopsis | Flow table low watermark |
| Context | **configure** application-assurance usage-alert-thresholds flow-table-low-wmark *number* |
| Tree | flow-table-low-wmark |
| Description | This command configures the system-wide low watermark threshold as a percentage of the flow table size for per-ISA. |
| Range | 0 to 100 |
| Units | percent |

| | |
|---|---|
| Default | 90 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **packet-rate-high-wmark** *(number | keyword)*

| | |
|---|---|
| Synopsis | Packet rate high watermark |
| Context | **configure** application-assurance usage-alert-thresholds packet-rate-high-wmark *(number | keyword)* |
| Tree | packet-rate-high-wmark |
| Description | This command configures the packet rate on the ISA-AA when a packet rate alarm is raised by the agent. |
| Range | 1 to 148809524 |
| Options | max |
| Default | max |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **packet-rate-low-wmark** *number*

| | |
|---|---|
| Synopsis | Packet rate low watermark |
| Context | **configure** application-assurance usage-alert-thresholds packet-rate-low-wmark *number* |
| Tree | packet-rate-low-wmark |
| Description | This command configures the packet rate on the ISA-AA when a packet rate alarm is cleared by the agent. |
| Range | 0 to 148809523 |
| Default | 0 |
| Introduced | 21.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## 4.4 aps commands

```
configure
   –  aps number
      –  advertise-interval number
      –  annexb
         –  wait-to-restore-time number
         –  working-circuit reference
      –  apply-groups reference
      –  apply-groups-exclude reference
      –  hold-time number
      –  neighbor (ipv4-address-no-zone | ipv6-address-no-zone)
      –  protect-circuit reference
      –  revert
         –  time number
      –  switching-mode keyword
      –  working-circuit reference
```

### 4.4.1 aps command descriptions

#### **aps** [group-id] *number*

| | |
|---|---|
| Synopsis | Enter the **aps** list instance |
| Context | **configure** aps *number* |
| Tree | aps |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

#### [**group-id**] *number*

| | |
|---|---|
| Synopsis | APS group ID |
| Context | **configure** aps *number* |
| Tree | aps |
| Range | 1 to 128 |
| Notes | This element is part of a list key. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

#### **advertise-interval** *number*

| | |
|---|---|
| Synopsis | Time between subsequent advertisement messages |
| Context | **configure** aps *number* advertise-interval *number* |
| Tree | advertise-interval |
| Range | 10 to 650 |
| Units | deciseconds |
| Default | 10 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

#### **annexb**

| | |
|---|---|
| Synopsis | Enable the **annexb** context |
| Context | **configure** aps *number* annexb |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | annexb |
| Notes | The following elements are part of a choice: **annexb** or (**neighbor**, **protect-circuit**, **revert**, and **working-circuit**). |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

### **wait-to-restore-time** *number*

| | |
|---|---|
| Synopsis | Annex B mode operation wait to restore time |
| Context | **configure** aps *number* annexb wait-to-restore-time *number* |
| Tree | wait-to-restore-time |
| Description | This command specifies the delay after which the newly active section becomes the primary section after a switchover from the primary section to the secondary section occurs and the switch request clears normally. |
| Range | 0 to 3600 |
| Units | seconds |
| Default | 300 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

### **working-circuit** *reference*

| | |
|---|---|
| Synopsis | Working circuit port for the APS group |
| Context | **configure** aps *number* annexb working-circuit *reference* |
| Tree | working-circuit |
| Reference | **configure** port *port* |
| Max. instances | 2 |
| Notes | This element is ordered by the user. |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

### **hold-time** *number*

| | |
|---|---|
| Synopsis | Time to wait for an advertisement packet |
| Context | **configure** aps *number* hold-time *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | hold-time |
| Range | 10 to 650 |
| Units | deciseconds |
| Default | 30 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

### **neighbor** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Neighbor IP address for multi-chassis APS |
| Context | **configure** aps *number* neighbor *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | neighbor |
| Notes | The following elements are part of a choice: **annexb** or (**neighbor**, **protect-circuit**, **revert**, and **working-circuit**). |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

### **protect-circuit** *reference*

| | |
|---|---|
| Synopsis | Protection circuit port for the APS group |
| Context | **configure** aps *number* protect-circuit *reference* |
| Tree | protect-circuit |
| Reference | **configure** port *port* |
| Notes | The following elements are part of a choice: **annexb** or (**neighbor**, **protect-circuit**, **revert**, and **working-circuit**). |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

### **revert**

| | |
|---|---|
| Synopsis | Enable the **revert** context |
| Context | **configure** aps *number* revert |
| Tree | revert |
| Notes | The following elements are part of a choice: **annexb** or (**neighbor**, **protect-circuit**, **revert**, and **working-circuit**). |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

### **time** *number*

| | |
|---|---|
| Synopsis | Wait time before switching back to the working circuit |
| Context | **configure** aps *number* revert time *number* |
| Tree | time |
| Range | 0 \| 60 to 3600 |
| Units | seconds |
| Default | 300 |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

### **switching-mode** *keyword*

| | |
|---|---|
| Synopsis | Switching mode for the APS port |
| Context | **configure** aps *number* switching-mode *keyword* |
| Tree | switching-mode |
| Options | uni-directional, bi-directional |
| Default | bi-directional |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

### **working-circuit** *reference*

| | |
|---|---|
| Synopsis | Working circuit port for the APS group |
| Context | **configure** aps *number* working-circuit *reference* |
| Tree | working-circuit |
| Reference | **configure** port *port* |
| Notes | The following elements are part of a choice: **annexb** or (**neighbor**, **protect-circuit**, **revert**, and **working-circuit**). |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e |

## 4.5 bfd commands

```
configure
   - bfd
      - apply-groups reference
      - apply-groups-exclude reference
      - bfd-template named-item
         - apply-groups reference
         - apply-groups-exclude reference
         - echo-receive number
         - multiplier number
         - receive-interval number
         - transmit-interval number
         - type keyword
      - seamless-bfd
         - reflector named-item
            - admin-state keyword
            - apply-groups reference
            - apply-groups-exclude reference
            - description description
            - discriminator number
            - local-state keyword
```

## 4.5.1 bfd command descriptions

### bfd

| | |
|---|---|
| Synopsis | Enter the **bfd** context |
| Context | **configure** bfd |
| Tree | bfd |
| Introduced | 16.0.R1 |
| Platforms | All |

### **bfd-template** [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **bfd-template** list instance |
| Context | **configure** bfd bfd-template *named-item* |
| Tree | bfd-template |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | BFD template name |
| Context | **configure** bfd bfd-template *named-item* |
| Tree | bfd-template |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

### **echo-receive** *number*

| | |
|---|---|
| Synopsis | Echo receive interval |
| Context | **configure** bfd bfd-template *named-item* echo-receive *number* |
| Tree | echo-receive |
| Range | 100 to 100000 |
| Units | milliseconds |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Default | 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **multiplier** *number*

| | |
|---|---|
| Synopsis | Detection multiplier |
| Context | **configure** bfd bfd-template *named-item* multiplier *number* |
| Tree | multiplier |
| Range | 1 to 20 |
| Default | 3 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **receive-interval** *number*

| | |
|---|---|
| Synopsis | Receive interval |
| Context | **configure** bfd bfd-template *named-item* receive-interval *number* |
| Tree | receive-interval |
| Range | 10 to 100000 |
| Units | milliseconds |
| Default | 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **transmit-interval** *number*

| | |
|---|---|
| Synopsis | Transmit interval |
| Context | **configure** bfd bfd-template *named-item* transmit-interval *number* |
| Tree | transmit-interval |
| Range | 10 to 100000 |
| Units | milliseconds |
| Default | 100 |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **type** *keyword*

| | |
|---|---|
| Synopsis | Local termination point for the BFD session |
| Context | **configure** bfd bfd-template *named-item* type *keyword* |
| Tree | type |
| Options | cpm-np, fp |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **seamless-bfd**

| | |
|---|---|
| Synopsis | Enter the **seamless-bfd** context |
| Context | **configure** bfd seamless-bfd |
| Tree | seamless-bfd |
| Introduced | 19.7.R1 |
| Platforms | All |

### **reflector** [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **reflector** list instance |
| Context | **configure** bfd seamless-bfd reflector *named-item* |
| Tree | reflector |
| Max. instances | 1 |
| Introduced | 19.7.R1 |
| Platforms | All |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | S-BFD reflector name |
| Context | **configure** bfd seamless-bfd reflector *named-item* |
| Tree | reflector |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 19.7.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | All |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the seamless BFD reflector |
| Context | **configure** bfd seamless-bfd reflector *named-item* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 19.7.R1 |
| Platforms | All |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** bfd seamless-bfd reflector *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 19.7.R1 |
| Platforms | All |

### **discriminator** *number*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Discriminator of the seamless BFD reflector |
| Context | **configure** bfd seamless-bfd reflector *named-item* discriminator *number* |
| Tree | discriminator |
| Range | 80000 to 82047 \| 524288 to 526335 |
| Introduced | 19.7.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **local-state** *keyword*

| | |
|---|---|
| Synopsis | Local state of the seamless BFD reflector |
| Context | **configure** bfd seamless-bfd reflector *named-item* local-state *keyword* |
| Tree | local-state |
| Options | admin-down, up |
| Default | up |
| Introduced | 19.7.R1 |
| Platforms | All |

## 4.6 bmp commands

```
configure
   –  bmp
      –  admin-state keyword
      –  apply-groups reference
      –  apply-groups-exclude reference
      –  collector
         –  admin-state keyword
         –  apply-groups reference
         –  apply-groups-exclude reference
         –  connection
            –  ipv4
               –  address ipv4-unicast-address
               –  port number
            –  ipv6
               –  address ipv6-unicast-address
               –  port number
      –  station named-item
         –  admin-state keyword
         –  apply-groups reference
         –  apply-groups-exclude reference
         –  connection
            –  connect-retry number
            –  local-address (ipv4-address-no-zone | ipv6-address-no-zone)
            –  router-instance string
            –  station-address
               –  ip-address (ipv4-address-no-zone | ipv6-address-no-zone)
               –  port number
            –  tcp-keepalive
               –  admin-state keyword
               –  keep-count number
               –  keep-idle number
               –  keep-interval number
         –  description description
         –  family
            –  evpn boolean
            –  ipv4 boolean
            –  ipv6 boolean
            –  l2-vpn boolean
            –  label-ipv4 boolean
            –  label-ipv6 boolean
            –  mcast-ipv4 boolean
            –  mcast-ipv6 boolean
            –  mcast-vpn-ipv4 boolean
            –  mcast-vpn-ipv6 boolean
            –  sr-policy-ipv4 boolean
            –  sr-policy-ipv6 boolean
            –  vpn-ipv4 boolean
            –  vpn-ipv6 boolean
         –  initiation-message string
         –  report-local-routes boolean
         –  stats-report-interval number

## 4.6.1 bmp command descriptions

### bmp

| | |
|---|---|
| Synopsis | Enter the **bmp** context |
| Context | **configure** bmp |
| Tree | bmp |
| Introduced | 16.0.R1 |
| Platforms | All |

### admin-state *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the BMP operation |
| Context | **configure** bmp admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 16.0.R1 |
| Platforms | All |

### collector

| | |
|---|---|
| Synopsis | Enter the **collector** context |
| Context | **configure** bmp collector |
| Tree | collector |
| Introduced | 19.10.R1 |
| Platforms | VSR-NRC |

### admin-state *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the BMP collector |
| Context | **configure** bmp collector admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 19.10.R1 |
| Platforms | VSR-NRC |

## connection

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Enter the **connection** context |
| Context | **configure** bmp collector connection |
| Tree | connection |
| Introduced | 19.10.R1 |
| Platforms | VSR-NRC |

## ipv4

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Enter the **ipv4** context |
| Context | **configure** bmp collector connection ipv4 |
| Tree | ipv4 |
| Introduced | 19.10.R1 |
| Platforms | VSR-NRC |

## address *ipv4-unicast-address*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | IPv4 address |
| Context | **configure** bmp collector connection ipv4 address *ipv4-unicast-address* |
| Tree | address |
| Introduced | 19.10.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | VSR-NRC |

## **port** *number*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | IPv4 TCP destination port number |
| Context | **configure** bmp collector connection ipv4 port *number* |
| Tree | port |
| Range | 1 to 65535 |
| Default | 4210 |
| Introduced | 19.10.R1 |
| Platforms | VSR-NRC |

## **ipv6**

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Enter the **ipv6** context |
| Context | **configure** bmp collector connection ipv6 |
| Tree | ipv6 |
| Introduced | 19.10.R1 |
| Platforms | VSR-NRC |

## **address** *ipv6-unicast-address*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | IPv6 address |
| Context | **configure** bmp collector connection ipv6 address *ipv6-unicast-address* |
| Tree | address |
| Introduced | 19.10.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | VSR-NRC |

### **port** *number*

**WARNING:**
Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | IPv6 TCP destination port |
| Context | **configure** bmp collector connection ipv6 port *number* |
| Tree | port |
| Range | 1 to 65535 |
| Default | 4210 |
| Introduced | 19.10.R1 |
| Platforms | VSR-NRC |

### **station** [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **station** list instance |
| Context | **configure** bmp station *named-item* |
| Tree | station |
| Max. instances | 8 |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | BMP monitoring station name |
| Context | **configure** bmp station *named-item* |
| Tree | station |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the BMP monitoring station |
| Context | **configure** bmp station *named-item* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 16.0.R1 |
| Platforms | All |

### **connection**

| | |
|---|---|
| Synopsis | Enter the **connection** context |
| Context | **configure** bmp station *named-item* connection |
| Tree | connection |
| Introduced | 16.0.R1 |
| Platforms | All |

### **connect-retry** *number*

| | |
|---|---|
| Synopsis | Maximum time between connection attempts |
| Context | **configure** bmp station *named-item* connection connect-retry *number* |
| Tree | connect-retry |
| Range | 1 to 65535 |
| Units | seconds |
| Default | 120 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **local-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Local IP address to communicate with monitoring station |
| Context | **configure** bmp station *named-item* connection local-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | local-address |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 16.0.R1 |
| Platforms | All |

### **router-instance** *string*

| | |
|---|---|
| Synopsis | Router instance used to reach the BMP station |
| Context | **configure** bmp station *named-item* connection router-instance *string* |
| Tree | router-instance |
| Default | Base |
| Introduced | 16.0.R4 |
| Platforms | All |

### **station-address**

| | |
|---|---|
| Synopsis | Enter the **station-address** context |
| Context | **configure** bmp station *named-item* connection station-address |
| Tree | station-address |
| Introduced | 16.0.R1 |
| Platforms | All |

### **ip-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | IP address of the remote BMP monitoring station |
| Context | **configure** bmp station *named-item* connection station-address ip-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | ip-address |
| Introduced | 16.0.R1 |
| Platforms | All |

### **port** *number*

| | |
|---|---|
| Synopsis | BMP monitoring station port |
| Context | **configure** bmp station *named-item* connection station-address port *number* |
| Tree | port |
| Range | 1 to 65535 |
| Introduced | 16.0.R1 |

© 2024 Nokia.

| | |
|---|---|
| Platforms | All |

## tcp-keepalive

| | |
|---|---|
| Synopsis | Enter the **tcp-keepalive** context |
| Context | **configure** bmp station *named-item* connection tcp-keepalive |
| Tree | tcp-keepalive |
| Introduced | 16.0.R1 |
| Platforms | All |

## admin-state *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the TCP keepalive |
| Context | **configure** bmp station *named-item* connection tcp-keepalive admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 16.0.R1 |
| Platforms | All |

## keep-count *number*

| | |
|---|---|
| Synopsis | Keepalive threshold before connection is declared down |
| Context | **configure** bmp station *named-item* connection tcp-keepalive keep-count *number* |
| Tree | keep-count |
| Range | 3 to 100 |
| Default | 4 |
| Introduced | 16.0.R1 |
| Platforms | All |

## keep-idle *number*

| | |
|---|---|
| Synopsis | Time until the first TCP keepalive probe is sent |
| Context | **configure** bmp station *named-item* connection tcp-keepalive keep-idle *number* |
| Tree | keep-idle |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Range | 1 to 100000 |
| Units | seconds |
| Default | 600 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **keep-interval** *number*

| | |
|---|---|
| Synopsis | Time between two TCP keepalive probes |
| Context | **configure** bmp station *named-item* connection tcp-keepalive keep-interval *number* |
| Tree | keep-interval |
| Range | 1 to 100000 |
| Units | seconds |
| Default | 15 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** bmp station *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **family**

| | |
|---|---|
| Synopsis | Enter the **family** context |
| Context | **configure** bmp station *named-item* family |
| Tree | family |
| Description | Commands in this context specify the address families that are reported to a BMP monitoring station. |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **evpn** *boolean*

| | |
|---|---|
| Synopsis | Support EVPN address family |
| Context | **configure** bmp station *named-item* family evpn *boolean* |
| Tree | evpn |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | All |

### **ipv4** *boolean*

| | |
|---|---|
| Synopsis | Support IPv4 address family |
| Context | **configure** bmp station *named-item* family ipv4 *boolean* |
| Tree | ipv4 |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | All |

### **ipv6** *boolean*

| | |
|---|---|
| Synopsis | Support IPv6 address family |
| Context | **configure** bmp station *named-item* family ipv6 *boolean* |
| Tree | ipv6 |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **l2-vpn** *boolean*

| | |
|---|---|
| Synopsis | Support L2 VPN address family |
| Context | **configure** bmp station *named-item* family l2-vpn *boolean* |
| Tree | l2-vpn |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **label-ipv4** *boolean*

| | |
|---|---|
| Synopsis | Support labeled IPv4 address family |
| Context | **configure** bmp station *named-item* family label-ipv4 *boolean* |
| Tree | label-ipv4 |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **label-ipv6** *boolean*

| | |
|---|---|
| Synopsis | Support labeled IPv6 address family |
| Context | **configure** bmp station *named-item* family label-ipv6 *boolean* |
| Tree | label-ipv6 |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **mcast-ipv4** *boolean*

| | |
|---|---|
| Synopsis | Support IPv4 multicast address family |
| Context | **configure** bmp station *named-item* family mcast-ipv4 *boolean* |
| Tree | mcast-ipv4 |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | All |

### **mcast-ipv6** *boolean*

| | |
|---|---|
| Synopsis | Support IPv6 multicast address family |
| Context | **configure** bmp station *named-item* family mcast-ipv6 *boolean* |
| Tree | mcast-ipv6 |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **mcast-vpn-ipv4** *boolean*

| | |
|---|---|
| Synopsis | Support IPv4 VPN multicast address family |
| Context | **configure** bmp station *named-item* family mcast-vpn-ipv4 *boolean* |
| Tree | mcast-vpn-ipv4 |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | All |

### **mcast-vpn-ipv6** *boolean*

| | |
|---|---|
| Synopsis | Support IPv6 VPN multicast address family |
| Context | **configure** bmp station *named-item* family mcast-vpn-ipv6 *boolean* |
| Tree | mcast-vpn-ipv6 |
| Default | false |
| Introduced | 16.0.R4 |
| Platforms | All |

### **sr-policy-ipv4** *boolean*

| | |
|---|---|
| Synopsis | Support SR policy IPv4 address family |
| Context | **configure** bmp station *named-item* family sr-policy-ipv4 *boolean* |
| Tree | sr-policy-ipv4 |
| Default | false |
| Introduced | 22.5.R1 |
| Platforms | All |

### **sr-policy-ipv6** *boolean*

| | |
|---|---|
| Synopsis | Support SR policy IPv6 address family |
| Context | **configure** bmp station *named-item* family sr-policy-ipv6 *boolean* |
| Tree | sr-policy-ipv6 |
| Default | false |
| Introduced | 22.5.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **vpn-ipv4** *boolean*

| | |
|---|---|
| Synopsis | Support VPN IPv4 address family |
| Context | **configure** bmp station *named-item* family vpn-ipv4 *boolean* |
| Tree | vpn-ipv4 |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **vpn-ipv6** *boolean*

| | |
|---|---|
| Synopsis | Support VPN IPv6 address family |
| Context | **configure** bmp station *named-item* family vpn-ipv6 *boolean* |
| Tree | vpn-ipv6 |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **initiation-message** *string*

| | |
|---|---|
| Synopsis | Free form initiation message sent to monitoring station |
| Context | **configure** bmp station *named-item* initiation-message *string* |
| Tree | initiation-message |
| String length | 1 to 255 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **report-local-routes** *boolean*

| | |
|---|---|
| Synopsis | Allow local route reporting to BMP monitoring station |
| Context | **configure** bmp station *named-item* report-local-routes *boolean* |
| Tree | report-local-routes |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **stats-report-interval** *number*

| | |
|---|---|
| Synopsis | Frequency of reports sent to the BMP monitoring station |
| Context | **configure** bmp station *named-item* stats-report-interval *number* |
| Tree | stats-report-interval |
| Range | 15 to 65535 |
| Units | seconds |
| Introduced | 16.0.R1 |
| Platforms | All |

## 4.7 bof commands

```
bof
   –  auto-boot
      –  dhcp
         –  client-id (keyword | hex-string | string)
         –  inband
            –  disabled boolean
            –  null-encapsulation boolean
            –  vlan number
            –  vlan-discovery boolean
         –  include-user-class boolean
         –  ipv4 boolean
         –  ipv6 boolean
         –  management-port boolean
      –  ospf
         –  mtu number
         –  neid hex-string
         –  neip-ipv4 ipv4-unicast-address
         –  neip-ipv6 ipv6-address
         –  vendor-id number
      –  port-mtu number
      –  timeout number
   –  auto-configure
      –  ipv4
         –  dhcp
            –  client-id (hex-string | string)
            –  include-user-class boolean
            –  timeout number
      –  ipv6
         –  dhcp
            –  client-id (hex-string | string)
            –  client-type keyword
            –  include-user-class boolean
            –  timeout number
   –  configuration
      –  encrypt boolean
      –  encryption-key encrypted-leaf
      –  password encrypted-leaf
      –  primary-location bof-cflash-and-url
      –  secondary-location bof-cflash-and-url
      –  tertiary-location bof-cflash-and-url
   –  console
      –  speed number
      –  wait-time number
   –  dns
      –  domain string
      –  primary-server (ipv4-address-no-zone | ipv6-address-no-zone)
      –  secondary-server (ipv4-address-no-zone | ipv6-address-no-zone)
      –  tertiary-server (ipv4-address-no-zone | ipv6-address-no-zone)
   –  image
      –  primary-location bof-cflash-and-url
      –  secondary-location bof-cflash-and-url
      –  tertiary-location bof-cflash-and-url
   –  li
      –  local-save boolean
      –  separate boolean
   –  license
      –  primary-location bof-cflash-and-url
   –  port named-item-64
      –  autonegotiate keyword
```

## 4.7.1 bof command descriptions

### bof

| | |
|---|---|
| Synopsis | Configure system boot options |
| Context | bof |
| Tree | bof |
| Description | This command creates or edits the boot option file (BOF) for the specified local storage device.<br>A BOF file specifies where the system searches for runtime images, configuration files, and other operational parameters during system initialization.<br>BOF parameters can be modified. Changes can be saved to a specified compact flash. The BOF must be located in the root directory of either an internal or external compact flash local to the system and have the mandatory filename of bof.cfg.<br>When modifications are made to in-memory parameters that are currently in use or operating, the changes are effective immediately. For example, if the IP address of the management port is changed, the change takes place immediately.<br>Only one entry of the BOF configuration command statement can be saved once the statement has been found to be syntactically correct.<br>When opening an existing BOF that is not the BOF used in the most recent boot, a message is issued notifying the user that the parameters will not affect the operation of the node.<br>No default boot option file exists. The router boots with the factory default boot sequence and options. |
| Introduced | 20.10.R1 |
| Platforms | All |

### auto-boot

**Note:**
The new value of this element takes effect when the router boots.

| | |
|---|---|
| Synopsis | Enable the **auto-boot** context |
| Context | bof auto-boot |
| Tree | auto-boot |
| Introduced | 20.10.R1 |
| Platforms | 7450 ESS-7, 7750 SR-1, 7750 SR-1 (FP5), 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

## dhcp

**Note:**
The new value of this element takes effect when the router boots.

| | |
|---|---|
| Synopsis | Enable the **dhcp** context |
| Context | bof auto-boot dhcp |
| Tree | dhcp |
| Notes | The following elements are part of a choice: **dhcp** or **ospf**. |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS-7, 7750 SR-1, 7750 SR-1 (FP5), 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s |

## client-id *(keyword | hex-string | string)*

**Note:**
The new value of this element takes effect when the router boots.

| | |
|---|---|
| Synopsis | DHCP client ID |
| Context | bof auto-boot dhcp client-id *(keyword \| hex-string \| string)* |
| Tree | client-id |
| String length | 3 to 118 (*hex-string*)<br>1 to 58 (*string*) |
| Options | use-chassis-mac-address |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS-7, 7750 SR-1, 7750 SR-1 (FP5), 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s |

## inband

**Note:**
The new value of this element takes effect when the router boots.

| | |
|---|---|
| Synopsis | Enable the **inband** context |
| Context | bof auto-boot dhcp inband |
| Tree | inband |
| Introduced | 21.2.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | 7450 ESS-7, 7750 SR-1, 7750 SR-1 (FP5), 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s |

### **disabled** *boolean*

**Note:**
The new value of this element takes effect when the router boots.

| | |
|---|---|
| Synopsis | Do not use in-band ports |
| Context | bof auto-boot dhcp inband disabled *boolean* |
| Tree | disabled |
| Default | true |
| Notes | The following elements are part of a choice: **disabled**, **null-encapsulation**, **vlan**, or **vlan-discovery**. |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS-7, 7750 SR-1, 7750 SR-1 (FP5), 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s |

### **null-encapsulation** *boolean*

**Note:**
The new value of this element takes effect when the router boots.

| | |
|---|---|
| Synopsis | Use null encapsulation |
| Context | bof auto-boot dhcp inband null-encapsulation *boolean* |
| Tree | null-encapsulation |
| Default | true |
| Notes | The following elements are part of a choice: **disabled**, **null-encapsulation**, **vlan**, or **vlan-discovery**. |
| Introduced | 21.2.R1 |
| Platforms | 7450 ESS-7, 7750 SR-1, 7750 SR-1 (FP5), 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s |

## 4.8.1 call-trace command descriptions

### call-trace

| | |
|---|---|
| Synopsis | Enter the **call-trace** context |
| Context | **configure** call-trace |
| Tree | call-trace |
| Description | Commands in this context configure the attributes of the call trace debugging functionality. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### buffering *boolean*

| | |
|---|---|
| Synopsis | Buffer messages until the trace key is known |
| Context | **configure** call-trace buffering *boolean* |
| Tree | buffering |
| Description | When configured to **true**, the router buffers initial messages for sessions where the trace key is not yet known, for example, a username for a PPP session.<br>When the trace key, for example, a username, indicates a match for a traced session, the router sends the buffered messages immediately. If the key does not match a trace, the router discards the buffered messages.<br>When configured to **false**, the router does not buffer any messages and therefore initial messages may not be traced. |
| Default | false |
| Introduced | 20.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### location [location-type] *keyword*

| | |
|---|---|
| Synopsis | Enter the **location** list instance |
| Context | **configure** call-trace location *keyword* |
| Tree | location |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### [**location-type**] *keyword*

| | |
|---|---|
| Synopsis | Compact flash card to be used |
| Context | **configure** call-trace location *keyword* |
| Tree | location |
| Options | cf1, cf2 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of compact flash for log storage |
| Context | **configure** call-trace location *keyword* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | enable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **size-limit** *(number | keyword)*

| | |
|---|---|
| Synopsis | Maximum cumulative size of call trace files on the card |
| Context | **configure** call-trace location *keyword* size-limit *(number | keyword)* |
| Tree | size-limit |
| Range | 1 to 65536 |
| Options | unlimited |
| Default | 1000 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **max-files-number** *number*

| | |
|---|---|
| Synopsis | Maximum number of files call trace can create |
| Context | **configure** call-trace max-files-number *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | max-files-number |
| Range | 1 to 1024 |
| Default | 200 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **primary-cf** *keyword*

| | |
|---|---|
| Synopsis | Primary CF card as local storage location |
| Context | **configure** call-trace primary-cf *keyword* |
| Tree | primary-cf |
| Options | cf1, cf2 |
| Default | cf1 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **trace-profile** [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **trace-profile** list instance |
| Context | **configure** call-trace trace-profile *named-item* |
| Tree | trace-profile |
| Description | Commands in this context configure the attributes of the call-trace profile list. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | Call trace profile name |
| Context | **configure** call-trace trace-profile *named-item* |
| Tree | trace-profile |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

## applications

| | |
|---|---|
| Synopsis | Enter the **applications** context |
| Context | **configure** call-trace trace-profile *named-item* applications |
| Tree | applications |
| Description | Commands in this context configure call trace attributes for the specified application. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## connectivity-management *boolean*

| | |
|---|---|
| Synopsis | Trace messages used for connectivity protocols |
| Context | **configure** call-trace trace-profile *named-item* applications connectivity-management *boolean* |
| Tree | connectivity-management |
| Description | When configured to **true**, this command enables call trace for connectivity protocols, such as DHCP, ARP, and DHCPv6, and events related to connectivity management; for example, migrant or data-triggered host creation, idling, or session timeout. In the CUPS context, this command traces uplink IBCP messages.<br>When configured to **false**, connectivity protocols are not traced. |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## gx *boolean*

| | |
|---|---|
| Synopsis | Trace Diameter messages used for the Gx application |
| Context | **configure** call-trace trace-profile *named-item* applications gx *boolean* |
| Tree | gx |
| Description | When configured to **true**, this command enables call trace for Diameter messages used for the Gx application.<br>When configured to **false**, Diameter Gx messages are not traced. |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **gy** *boolean*

| | |
|---|---|
| Synopsis | Trace Diameter messages used for the Gy application |
| Context | **configure** call-trace trace-profile *named-item* applications gy *boolean* |
| Tree | gy |
| Description | When configured to **true**, this command enables call trace for Diameter messages used for the Gy application.<br>When configured to **false**, Diameter Gy messages are not traced. |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **ludb** *boolean*

| | |
|---|---|
| Synopsis | Trace local user database lookups |
| Context | **configure** call-trace trace-profile *named-item* applications ludb *boolean* |
| Tree | ludb |
| Description | When configured to **true**, this command enables call trace for Local User Data Base (LUDB) lookups.<br>When configured to **false**, LUDB lookups are not traced. |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **msap** *boolean*

| | |
|---|---|
| Synopsis | Trace MSAP creation events |
| Context | **configure** call-trace trace-profile *named-item* applications msap *boolean* |
| Tree | msap |
| Description | When configured to **true**, this command enables tracing of Managed Service Access Point (MSAP) creation events.<br>When configured to **false**, MSAP create events are not traced. |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **nasreq** *boolean*

| | |
|---|---|
| Synopsis | Trace Diameter messages used for NASREQ application |
| Context | **configure** call-trace trace-profile *named-item* applications nasreq *boolean* |
| Tree | nasreq |
| Description | When configured to **true**, this command enables call trace for Diameter messages used for the Diameter Network Access Server Requirements (NASREQ) application.<br>When configured to **false**, Diameter NASREQ messages are not traced. |
| Introduced | 21.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **pfcp** *boolean*

| | |
|---|---|
| Synopsis | Trace PFCP messages |
| Context | **configure** call-trace trace-profile *named-item* applications pfcp *boolean* |
| Tree | pfcp |
| Introduced | 24.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **ppp-event** *boolean*

| | |
|---|---|
| Synopsis | Allow tracing for PPP state machine related events |
| Context | **configure** call-trace trace-profile *named-item* applications ppp-event *boolean* |
| Tree | ppp-event |
| Description | When configured to **true**, events related to the PPP state machine are traced.<br>This configuration may result in a large amount of event messages.<br>When configured to **false**, tracing is not activated for PPP state machine events. |
| Default | false |
| Introduced | 20.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **python** *boolean*

| | |
|---|---|
| Synopsis | Trace Python script execution |
| Context | **configure** call-trace trace-profile *named-item* applications python *boolean* |

| | |
|---|---|
| Tree | python |
| Description | When configured to **true**, this command enables tracing of Python script execution.<br>When configured to **false**, Python script execution is not traced. |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **radius-acct** *boolean*

| | |
|---|---|
| Synopsis | Trace messages and events for RADIUS-based accounting |
| Context | **configure** call-trace trace-profile *named-item* applications radius-acct *boolean* |
| Tree | radius-acct |
| Description | When configured to **true**, this command enables tracing of messages and events related to RADIUS-based accounting.<br>When configured to **false**, RADIUS-based accounting messages and events are not traced. |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **radius-auth** *boolean*

| | |
|---|---|
| Synopsis | Trace RADIUS authentication messages and events |
| Context | **configure** call-trace trace-profile *named-item* applications radius-auth *boolean* |
| Tree | radius-auth |
| Description | When configured to **true**, this command enables tracing of messages and events related to RADIUS authentication, including CoA and Disconnect.<br>When configured to **false**, messages and events related to RADIUS authentication are not traced. |
| Default | true |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | **configure** call-trace trace-profile *named-item* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **events** *keyword*

| | |
|---|---|
| Synopsis | Events to include in the captured trace |
| Context | **configure** call-trace trace-profile *named-item* events *keyword* |
| Tree | events |
| Options | public-only, all |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **output**

| | |
|---|---|
| Synopsis | Enter the **output** context |
| Context | **configure** call-trace trace-profile *named-item* output |
| Tree | output |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **debug**

| | |
|---|---|
| Synopsis | Enable output to the debug log |
| Context | **configure** call-trace trace-profile *named-item* output debug |
| Tree | debug |
| Notes | The following elements are part of a choice: **debug**, **live**, or **local-storage**. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **live**

| | |
|---|---|
| Synopsis | Enable the **live** context |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | **configure** call-trace trace-profile *named-item* output live |
| Tree | live |
| Notes | The following elements are part of a choice: **debug**, **live**, or **local-storage**. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **fqdn** *string*

| | |
|---|---|
| Synopsis | Fully qualified domain name of live output destination |
| Context | **configure** call-trace trace-profile *named-item* output live fqdn *string* |
| Tree | fqdn |
| String length | 1 to 255 |
| Notes | The following elements are part of a mandatory choice: **fqdn** or **ip-address**. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **ip-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | IP address of the live output destination server |
| Context | **configure** call-trace trace-profile *named-item* output live ip-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | ip-address |
| Notes | The following elements are part of a mandatory choice: **fqdn** or **ip-address**. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **port** *number*

| | |
|---|---|
| Synopsis | TCP IP port |
| Context | **configure** call-trace trace-profile *named-item* output live port *number* |
| Tree | port |
| Range | 1 to 65536 |
| Default | 29770 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **router-instance** *string*

| | |
|---|---|
| Synopsis | Router instance or VPRN service name |
| Context | **configure** call-trace trace-profile *named-item* output live router-instance *string* |
| Tree | router-instance |
| Default | Base |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **local-storage**

| | |
|---|---|
| Synopsis | Destination for output |
| Context | **configure** call-trace trace-profile *named-item* output local-storage |
| Tree | local-storage |
| Notes | The following elements are part of a choice: **debug**, **live**, or **local-storage**. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **size-limit** *number*

| | |
|---|---|
| Synopsis | Maximum data output for a single call trace operation |
| Context | **configure** call-trace trace-profile *named-item* size-limit *number* |
| Tree | size-limit |
| Range | 1 to 1000 |
| Units | megabytes |
| Default | 10 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **time-limit** *number*

| | |
|---|---|
| Synopsis | Maximum time for a single call trace job |
| Context | **configure** call-trace trace-profile *named-item* time-limit *number* |
| Tree | time-limit |
| Range | 1 to 604800 |

## 4.9 card commands

```
configure
  - card number
    - admin-state keyword
    - apply-groups reference
    - apply-groups-exclude reference
    - card-type keyword
    - fail-on-error boolean
    - filter-profile keyword
    - fp number
      - apply-groups reference
      - apply-groups-exclude reference
      - egress
        - hs-fixed-high-thresh-delta number
        - hs-pool-policy reference
        - wred-queue-control
          - admin-state keyword
          - buffer-allocation decimal-number
          - reserved-cbs decimal-number
          - slope-policy reference
      - fp-resource-policy reference
      - hi-bw-mcast-src
        - alarm boolean
        - default-paths-only boolean
        - group number
      - ingress
        - access
          - queue-group reference instance-id number
            - accounting-policy reference
            - apply-groups reference
            - apply-groups-exclude reference
            - collect-stats boolean
            - description description
            - policer-control-policy
              - overrides
                - apply-groups reference
                - apply-groups-exclude reference
                - max-rate (number | keyword)
                - priority-mbs-thresholds
                  - min-threshold-separation (number | keyword)
                  - priority number
                    - apply-groups reference
                    - apply-groups-exclude reference
                    - mbs-contribution (number | keyword)
              - policy-name reference
            - policer-overrides
              - policer reference
                - apply-groups reference
                - apply-groups-exclude reference
                - cbs (number | keyword)
                - mbs (number | keyword)
                - packet-byte-offset number
                - rate
                  - cir (number | keyword)
                  - pir (number | keyword)
                - stat-mode keyword
        - dist-cpu-protection
          - dynamic-enforcement-policer-pool number
        - mcast-path-management
          - admin-state keyword
```

## 4.9.1 card command descriptions

### **card** [slot-number] *number*

| | |
|---|---|
| Synopsis | Enter the **card** list instance |
| Context | **configure** card *number* |
| Tree | card |
| Description | Commands in this context cover attributes for specific chassis slots for physical cards.<br>In SR OS, cards cover IOM, IMM, and XCM. |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**slot-number**] *number*

| | |
|---|---|
| Synopsis | Slot number within the chassis |
| Context | **configure** card *number* |
| Tree | card |
| Description | This command configures a unique value that identifies the card slot within a chassis in the system. |
| Range | 1 to 20 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

### **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the card |
| Context | **configure** card *number* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | enable |
| Introduced | 16.0.R1 |
| Platforms | All |

## **card-type** *keyword*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Card type |
| Context | **configure** card *number* card-type *keyword* |
| Tree | card-type |
| Description | This command adds an IOM, IMM, XCM to the device configuration for the slot.<br><br>The card type can be pre-provisioned, meaning that the card does not need to be installed in the chassis.<br><br>A card must be provisioned before any contained object can be configured: MDA, XIOM, XMA, MDA-s, connector, or port. A card can only be provisioned in a slot if the card type is allowed in the slot. An error message is generated if an attempt is made to provision a card type that is not allowed.<br><br>If a card is inserted that does not match the configured card type for the slot, a log event and facility alarm is raised. The alarm is cleared when the correct card type is installed or the configuration is modified. A log event and facility alarm are raised if an administratively enabled card is removed from the chassis. The alarm is cleared when the correct card type is installed or the configuration is modified. A log event is issued when a card is removed that is administratively disabled.<br><br>Because IMMs do not have the capability to install separate MDAs, the configuration of the MDAs is automatic. This configuration only includes the default options such as default buffer policies. Commands to manage the MDA remain in the MDA configuration context.<br><br>Some card hardware can support two different firmware loads. One load includes the base Ethernet functionality, including 10G WAN mode, but does not include 1588 port-based timestamping. The second load includes the base Ethernet functionality and 1588 port-based timestamping, but does not include 10G WAN mode. These are identified as two card types that are the same, except for a “-ptp” suffix to indicate the second loadset. A hard reset of the card occurs when switching between the two provisioned types.<br><br>An appropriate alarm is raised if a partial or complete card failure is detected. The alarm is cleared when the error condition ceases. |

## **fail-on-error** *boolean*

Synopsis Set operational state of the card to Failed upon error

Context **configure** card *number* fail-on-error *boolean*

Tree fail-on-error

Description When configured to **true**, this command controls the behavior of the card when any one of a specific set of card level errors is encountered in the system.

When this command is set to **true**, and any one (or more) of the specific errors is detected, the operational state of the card is set to failed. This failed state persists until the **clear card** command is issued (reset) or the card is removed and reinserted (reseated). If the condition persists after reseating the card, contact Nokia support to investigate more.

Nokia only recommends configuring this command to **true** when the network is designed to be able to route traffic around a failed card (redundant cards, nodes, or other paths exist).

The list of specific errors includes the following:

CHASSIS event ID# 2063 - tmnxEqCardPChipMemoryEvent

CHASSIS event ID# 2076 - tmnxEqCardPChipCamEvent

CHASSIS event ID# 2059 - tmnxEqCardPChipError (for ingress Ethernet only)

CHASSIS event ID# 2098 - tmnxEqCardQChipBufMemoryEvent

CHASSIS event ID# 2099 - tmnxEqCardQChipStatsMemoryEvent

CHASSIS event ID# 2101 - tmnxEqCardQChipIntMemoryEvent

CHASSIS event ID# 2103 - tmnxEqCardChipIfCellEvent

On platforms with integrated CPM and IOM, IMM, or XCM, the node is rebooted if this command is set to **true** and one of the card level errors is encountered. The tmnx EqCardPChipError is only considered as a trigger for this command for ingress FCS errors (not egress FCS errors).

**Note:** On the detection of the event or error in the system, the reporting of the event (logs) and the fail-on-error behavior of the card are independent. Log event control configuration determines whether the events are reported in logs (or SNMP traps, and so on) and the fail-on-error configuration determines the behavior of the card. This implies that the card can be configured to fail-on-error even if the events are suppressed (some may be suppressed in the system by default). To facilitate post-failure analysis, Nokia recommends reporting the specific events or errors and that **configure log log-events** be enabled when this command is set to **true**.

## hs-fixed-high-thresh-delta *number*

| | |
|---|---|
| Synopsis | High threshold delta on the forwarding plane |
| Context | **configure** card *number* fp *number* egress hs-fixed-high-thresh-delta *number* |
| Tree | hs-fixed-high-thresh-delta |
| Description | This command specifies the egress aggregate shaper high burst limit threshold delta for this HSQ IOM FP.<br><br>An aggregate rate can be applied to each egress HSQ queue group, HS secondary shaper, and (for subscribers configured with HS SLA expanded mode) primary shaper that manages the maximum burst limit over a specified shaping rate. Each aggregate shaper supports two thresholds that are used in conjunction with the low burst class setting. The system uses the lowest value attainable for each low threshold aggregate burst limit without causing shaper under run conditions.<br><br>The high burst limit threshold is determined by adding the configured value of this command to the aggregate low burst limit threshold value. An operator must set this configured value to at least two times the maximum frame size to prevent lower threshold class forwarding from also affecting the higher threshold classes when forwarding larger packet sizes. An insufficiently high threshold delta defeats the intended purpose of mapping classes to the higher threshold. |
| Range | 0 to 65536 |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-7/12/12e |

## hs-pool-policy *reference*

## **fp-resource-policy** *reference*

**WARNING:**
Modifying this element resets the associated cards/XIOMs/MDAs for the new value to take effect. On the 7750 SR-1, the configuration must be saved and the router must be rebooted for the new value to take effect.

| | |
|---|---|
| Synopsis | Resource policy to manage resources on the FP |
| Context | **configure** card *number* fp *number* fp-resource-policy *reference* |
| Tree | fp-resource-policy |
| Description | This command configures an FP resource policy used to manage resources on a forwarding plane that is FP4-based and later.<br>The system creates a default policy that applies to all FP4 and later FPs. If an FP resource policy is removed from an FP, the system automatically applies the default policy to that FP. The system prevents the modification or deletion of the default policy, and the deletion of any user-created policy that is applied to an FP. |
| Reference | **configure** qos fp-resource-policy *fp-resource-policy-name* |
| Introduced | 20.2.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS |

## **hi-bw-mcast-src**

| | |
|---|---|
| Synopsis | Enable the **hi-bw-mcast-src** context |
| Context | **configure** card *number* fp *number* hi-bw-mcast-src |
| Tree | hi-bw-mcast-src |
| Description | Commands in this context configure the attributes to designate the FP as a high-bandwidth IP multicast source, expecting the ingress traffic to include high-bandwidth IP multicast traffic.<br>When configured, the system attempts to allocate a dedicated multicast switch fabric plane (MSFP) to the forwarding plane. When a group is specified, all FPs in the group share the same MSFP. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS |

## **alarm** *boolean*

| | |
|---|---|
| Synopsis | Raise an alarm when multiple traffic taps share a plane |
| Context | **configure** card *number* fp *number* hi-bw-mcast-src alarm *boolean* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | alarm |
| Description | When configured to **true**, the router generates an event if the MDA must share an MSFP with another MDA in a different group. MDAs within the same group that share an MSFP do not generate an event. Additionally, if a failure occurs during normal operation or resources are removed, the system generates an event if it cannot maintain separation of MSFPs for the MDAs.<br>When configured to **false**, the router does not generate events. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS |

## **max-rate** *(number | keyword)*

Synopsis Maximum rate override

Context **configure** card *number* fp *number* ingress access queue-group *reference* instance-id *number* policer-control-policy overrides max-rate *(number | keyword)*

Tree max-rate

Description This command defines the PIR leaky bucket decrement rate of the parent policer. Each time you apply the policer control policy to a SAP or subscriber instance a parent policer is created. Packets not discarded by the child policer associated with the SAP or subscriber instance are evaluated against the leaky bucket of the parent policer.

For each packet, the system first decrements the bucket by the correct amount based on the decrement rate to derive the current bucket depth. The system compares the current depth to one of two discard thresholds associated with the packet. The first discard threshold is applied if the Fair Information Rate (FIR) leaky bucket of the child policer is in the confirming state. The second discard threshold is applied if the FIR leaky bucket of the child policer is in the exceed state.

Only one of the two thresholds is applied per packet. If the current depth of the parent policer PIR bucket is less than the threshold value, the parent PIR bucket is in the conform state for that particular packet. If the depth is equal to or greater than the applied threshold, the bucket is in the violate state for the packet.

If the result is conform, the bucket depth is increased by the size of the packet (plus or minus the per-packet offset setting in the child policer) and the parent policer does not discard the packet. If the result is violate, the bucket depth is not increased and the parent policer discards the packet. When the parent policer discards a packet, the bucket depth increases (PIR, CIR, and FIR) in the parent policer are canceled. This prevents packets that the parent policer discards from consuming the PIR, CIR, and FIR bandwidth of the child policers.

Range 1 to 2000000000

Units kilobps

Options max

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

| | |
|---|---|
| Description | Commands in this context configure specific overrides to one or more policers created on the SAP through SAP ingress QoS policies. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

## **policer** [policer-id] *reference*

| | |
|---|---|
| Synopsis | Enter the **policer** list instance |
| Context | **configure** card *number* fp *number* ingress access queue-group *reference* instance-id *number* policer-overrides policer *reference* |
| Tree | policer |
| Description | Commands in this context create, modify, or delete a policer. Policers are created and used in a similar manner to queues. Unlike queues that have dedicated counters, policers allow various stat-mode settings that define the counters to be associated with the policer. Packet byte offset provides a policer with the ability to modify the size of each packet based on a defined number of bytes. All policers must be created within the QoS policies.<br>After a policer is created, it cannot be deleted from the QoS policy unless all forwarding classes mapped to the policer are first moved to other policers or queues.<br>The system allows a policer to be created on a SAP QoS policy regardless of the ability to support policers on objects where the policy is currently applied. The system only scans the current objects for policer support and sufficient resources to create the policer when a forwarding class is first mapped to the policer ID. If the policer cannot be created because one or more instances of the policy do not support policing or have insufficient resources to create the policer, the forwarding class mapping fails. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

## **cbs** *(number | keyword)*

| | |
|---|---|
| Synopsis | CBS tolerance allowed by the policer |
| Context | **configure** card *number* fp *number* ingress access queue-group *reference* instance-id *number* policer-overrides policer *reference* cbs *(number \| keyword)* |
| Tree | cbs |
| Description | This command configures the CIR leaky bucket exceed threshold of the policer.<br>If the forwarding rate of the policer is equal to or less than the defined CIR, the CIR bucket depth hovers around the 0 depth, with spikes up to the maximum packet size in the offered load. If the forwarding rate increases beyond the profiling rate, the threshold caps the amount of data allowed to be in-profile above the rate. |
| Range | 0 to 268435456 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

## **mbs** *(number | keyword)*

| | |
|---|---|
| Synopsis | Maximum burst tolerance allowed by the policer |
| Context | **configure** card *number* fp *number* ingress access queue-group *reference* instance-id *number* policer-overrides policer *reference* mbs *(number \| keyword)* |
| Tree | mbs |
| Description | This command configures the PIR leaky bucket violate threshold of the policer.<br>Ingress, trusted in-profile packets and untrusted high priority packets use the high priority violate threshold and trusted out-of-profile. Untrusted low priority packets use the low priority violate threshold.<br>If the offered rate of the policer is equal to or less than the defined rate, the PIR bucket depth hovers around the 0 depth, with spikes up to the maximum packet size in the offered load. If the offered rate increases beyond the metering rate, the threshold caps the amount of data allowed above the rate.<br>The low priority violate threshold provides a smaller burst size for the lower priority traffic associated with the policer. Because all lower priority traffic is discarded at the lower burst tolerance size, the remaining burst tolerance is available for higher priority traffic. |
| Range | 0 to 268435456 |
| Units | bytes |
| Options | auto |
| Introduced | 16.0.R1 |

© 2024 Nokia.

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **packet-byte-offset** *number*

Synopsis Packet size adjustment

Context **configure** card *number* fp *number* ingress access queue-group *reference* instance-id *number* policer-overrides policer *reference* packet-byte-offset *number*

Tree packet-byte-offset

Description This command modifies the size of each packet handled by the policer by adding or subtracting a number of bytes. The actual packet size is not modified; only the size used to determine the bucket depth impact is changed.

Use this command to add downstream frame encapsulation or remove portions of packet headers.

When child policers add to or subtract from the packet size, the minimum threshold separation value of the parent policer must be modified by the same amount.

Range -32 to 31

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **rate**

Synopsis Enter the **rate** context

Context **configure** card *number* fp *number* ingress access queue-group *reference* instance-id *number* policer-overrides policer *reference* rate

Tree rate

Description Commands in this context configure the metering and optional profiling rates of the policer.

The metering rate is used by the system to configure the PIR leaky bucket decrement rate and the profiling rate configures the CIR leaky bucket decrement rate. The decrement function empties the bucket; packets applied to the bucket attempt to fill it based on its packet size. If the bucket fills faster than the rate that it empties, the bucket depth eventually reaches its exceeded (CIR) or violate (PIR) threshold.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **cir** *(number | keyword)*

Synopsis CIR for the policer

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | **configure** card *number* fp *number* ingress access queue-group *reference* instance-id *number* policer-overrides policer *reference* rate cir *(number \| keyword)* |
| Tree | cir |
| Description | This command overrides the default CIR rate of the policer.<br>When the policer is first created, the profiling rate defaults to 0 kb/s.<br>When **max** is configured, the maximum policer rate used is equal to the maximum capacity of the card that the policer is configured for. If the policer rate is set to a value larger than the maximum rate possible for the card, the CIR used is equivalent to maximum. |
| Range | 0 to 2000000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **pir** *(number | keyword)*

| | |
|---|---|
| Synopsis | PIR for the policer |
| Context | **configure** card *number* fp *number* ingress access queue-group *reference* instance-id *number* policer-overrides policer *reference* rate pir *(number \| keyword)* |
| Tree | pir |
| Description | This command configures the metering rate of the policer for the PIR leaky bucket.<br>When the policer is first created, the metering rate defaults to max.<br>When **max** is configured, the maximum policer rate used is equal to the maximum capacity of the card that the policer is configured for. If the policer rate is set to a value larger than the maximum rate possible for the card, the PIR used is equivalent to maximum. |
| Range | 1 to 2000000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **stat-mode** *keyword*

| | |
|---|---|
| Synopsis | Stat mode for the policer |
| Context | **configure** card *number* fp *number* ingress access queue-group *reference* instance-id *number* policer-overrides policer *reference* stat-mode *keyword* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | stat-mode |
| Description | This command specifies the forwarding plane counters that allow offered, output, and discard accounting to occur for the policer. |
| Options | no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-priority-no-cir, offered-profile-cir, offered-priority-cir, offered-limited-profile-cir, offered-profile-capped-cir, offered-limited-capped-cir |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

## dist-cpu-protection

| | |
|---|---|
| Synopsis | Enter the **dist-cpu-protection** context |
| Context | **configure** card *number* fp *number* ingress dist-cpu-protection |
| Tree | dist-cpu-protection |
| Description | Commands in this context configure the distributed CPU protection forwarding plane settings. |
| Introduced | 21.2.R1 |
| Platforms | All |

## dynamic-enforcement-policer-pool *number*

| | |
|---|---|
| Synopsis | Number of policers reserved as enforcement policers use |
| Context | **configure** card *number* fp *number* ingress dist-cpu-protection dynamic-enforcement-policer-pool *number* |
| Tree | dynamic-enforcement-policer-pool |
| Description | This command reserves a set of policers for use as dynamic enforcement policers for the Distributed CPU Protection (DCP) feature. Policers are allocated from this pool and instantiated as per-object per-protocol dynamic enforcement policers after a local monitor is triggered for an object, such as a SAP or network interface.<br><br>A change to this configured value automatically clears the high water mark, timestamp, and failed allocation count.<br><br>If the command is configured to a value below the currently used or allocated number, all dynamic policers are returned to the free pool (and traffic returns to the local monitors). |
| Range | 1000 to 32000 |
| Introduced | 21.2.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

## mcast-path-management

| | |
|---|---|
| Synopsis | Enter the **mcast-path-management** context |
| Context | **configure** card *number* fp *number* ingress mcast-path-management |
| Tree | mcast-path-management |
| Description | Commands in this context configure the IOM ingress multicast path management forwarding plane settings. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR |

## admin-state *keyword*

| | |
|---|---|
| Synopsis | Administrative state of multicast path management |
| Context | **configure** card *number* fp *number* ingress mcast-path-management admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | disable |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR |

## bandwidth-policy *reference*

| | |
|---|---|
| Synopsis | Bandwidth policy for ingress multicast path management |
| Context | **configure** card *number* fp *number* ingress mcast-path-management bandwidth-policy *reference* |
| Tree | bandwidth-policy |
| Description | This command specifies the bandwidth policy associated with the forwarding plane.<br>The bandwidth policy defines the dynamic rate table and the multicast paths bandwidth and queuing parameters.<br>If a bandwidth policy is not explicitly associated with a forwarding plane, the default bandwidth policy is used with ingress multicast path management. |
| Reference | **configure** multicast-management bandwidth-policy *named-item* |
| Introduced | 16.0.R1 |

| | |
|---|---|
| Tree | max-rate |
| Description | This command defines the PIR leaky bucket decrement rate of the parent policer. Each time you apply the policer control policy to a SAP or subscriber instance a parent policer is created. Packets not discarded by the child policer associated with the SAP or subscriber instance are evaluated against the leaky bucket of the parent policer.<br><br>For each packet, the system first decrements the bucket by the correct amount based on the decrement rate to derive the current bucket depth. The system compares the current depth to one of two discard thresholds associated with the packet. The first discard threshold is applied if the Fair Information Rate (FIR) leaky bucket of the child policer is in the confirming state. The second discard threshold is applied if the FIR leaky bucket of the child policer is in the exceed state.<br><br>Only one of the two thresholds is applied per packet. If the current depth of the parent policer PIR bucket is less than the threshold value, the parent PIR bucket is in the conform state for that particular packet. If the depth is equal to or greater than the applied threshold, the bucket is in the violate state for the packet.<br><br>If the result is conform, the bucket depth is increased by the size of the packet (plus or minus the per-packet offset setting in the child policer) and the parent policer does not discard the packet. If the result is violate, the bucket depth is not increased and the parent policer discards the packet. When the parent policer discards a packet, the bucket depth increases (PIR, CIR, and FIR) in the parent policer are canceled. This prevents packets that the parent policer discards from consuming the PIR, CIR, and FIR bandwidth of the child policers. |
| Range | 1 to 2000000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

## priority-mbs-thresholds

| | |
|---|---|
| Synopsis | Enter the **priority-mbs-thresholds** context |
| Context | **configure** card *number* fp *number* ingress network queue-group *reference* instance-id *number* policer-control-policy overrides priority-mbs-thresholds |
| Tree | priority-mbs-thresholds |
| Description | Commands in this context configure settings to derive the shared portion and fair portion for each priority level.<br><br>The system uses the shared portion and fair portion values to calculate the discard-unfair and discard-all MBS thresholds that enforce priority-sensitive rate-based discards within the root arbiter parent policer. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

## **mbs** *(number | keyword)*

Synopsis Maximum burst tolerance allowed by the policer

Context **configure** card *number* fp *number* ingress network queue-group *reference* instance-id *number* policer-overrides policer *reference* mbs *(number | keyword)*

Tree mbs

Description This command configures the PIR leaky bucket violate threshold of the policer.

Ingress, trusted in-profile packets and untrusted high priority packets use the high priority violate threshold and trusted out-of-profile. Untrusted low priority packets use the low priority violate threshold.

If the offered rate of the policer is equal to or less than the defined rate, the PIR bucket depth hovers around the 0 depth, with spikes up to the maximum packet size in the offered load. If the offered rate increases beyond the metering rate, the threshold caps the amount of data allowed above the rate.

The low priority violate threshold provides a smaller burst size for the lower priority traffic associated with the policer. Because all lower priority traffic is discarded at the lower burst tolerance size, the remaining burst tolerance is available for higher priority traffic.

Range 0 to 268435456

Units bytes

Options auto

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## **packet-byte-offset** *number*

Synopsis Packet size adjustment

Context **configure** card *number* fp *number* ingress network queue-group *reference* instance-id *number* policer-overrides policer *reference* packet-byte-offset *number*

Tree packet-byte-offset

Description This command modifies the size of each packet handled by the policer by adding or subtracting a number of bytes. The actual packet size is not modified; only the size used to determine the bucket depth impact is changed.

Use this command to add downstream frame encapsulation or remove portions of packet headers.

When child policers add to or subtract from the packet size, the minimum threshold separation value of the parent policer must be modified by the same amount.

Range -32 to 31

| | |
|---|---|
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

## rate

| | |
|---|---|
| Synopsis | Enter the **rate** context |
| Context | **configure** card *number* fp *number* ingress network queue-group *reference* instance-id *number* policer-overrides policer *reference* rate |
| Tree | rate |
| Description | Commands in this context configure the metering and optional profiling rates of the policer.<br>The metering rate is used by the system to configure the PIR leaky bucket decrement rate and the profiling rate configures the CIR leaky bucket decrement rate. The decrement function empties the bucket; packets applied to the bucket attempt to fill it based on its packet size. If the bucket fills faster than the rate that it empties, the bucket depth eventually reaches its exceeded (CIR) or violate (PIR) threshold. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

## **cir** *(number | keyword)*

| | |
|---|---|
| Synopsis | CIR for the policer |
| Context | **configure** card *number* fp *number* ingress network queue-group *reference* instance-id *number* policer-overrides policer *reference* rate cir *(number \| keyword)* |
| Tree | cir |
| Description | This command overrides the default CIR rate of the policer.<br>When the policer is first created, the profiling rate defaults to 0 kb/s.<br>When **max** is configured, the maximum policer rate used is equal to the maximum capacity of the card that the policer is configured for. If the policer rate is set to a value larger than the maximum rate possible for the card, the CIR used is equivalent to maximum. |
| Range | 0 to 2000000000 |
| Units | kilobps |
| Options | max |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **ingress-buffer-allocation** *decimal-number*

| | |
|---|---|
| Synopsis | Ingress buffer pool allocation for the forwarding plane |
| Context | **configure** card *number* fp *number* ingress-buffer-allocation *decimal-number* |
| Tree | ingress-buffer-allocation |
| Description | This command configures an ingress buffer allocation for the FP.<br>Ingress buffer allocation applies to user-accessible buffers (total buffers less those reserved for system use). The ingress buffer allocation determines how much of the user-accessible buffers are available for ingress purposes. The remaining buffers are available for egress purposes. |
| Range | 20.00 to 80.00 |
| Units | percent |
| Default | 50.00 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e, 7950 XRS |

### **init-extract-prio-mode** *keyword*

| | |
|---|---|
| Synopsis | Initial drop priority mode of extracted traffic |
| Context | **configure** card *number* fp *number* init-extract-prio-mode *keyword* |
| Tree | init-extract-prio-mode |
| Description | This command specifies the scheme to select the initial drop priority of extracted control plane traffic.<br>The initial drop priority of extracted packets can be either low or high priority. The drop priority can be altered subsequently by mechanisms such as CPU protection.<br>High priority traffic receives preferential treatment in control plane congestion situations over low priority traffic. |
| Options | uniform, l3-classify |
| Default | uniform |
| Introduced | 16.0.R1 |
| Platforms | All |

### **stable-pool-sizing** *boolean*

| | |
|---|---|
| Synopsis | Enable stable pool sizing for the forwarding plane |
| Context | **configure** card *number* fp *number* stable-pool-sizing *boolean* |
| Tree | stable-pool-sizing |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | When configured to **true**, the router provides a stable buffer pool allocation environment for all default port buffer pools on the forwarding plane. This stable environment is provided at the expense of optimal buffer allocation between the various port buffer pools.<br><br>When configured to **false**, the router disables stable pool sizing on the forwarding plane. Existing buffer pools are resized according to normal pool sizing behavior. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## **level** *keyword*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | License level of the card |
| Context | **configure** card *number* level *keyword* |
| Tree | level |
| Description | This command configures the license level of the card.<br><br>New generations of cards include variants controlled by hardware and software licensing. For these cards, the license level must be provisioned in addition to the card type. A card cannot become operational unless the provisioned license level matches the license level of the card installed into the slot.The set of license levels varies by card type.<br><br>The provisioned level controls aspects related to connector provisioning and the consumption of hardware egress user queues and egress policers. Changes to the provisioned license level may be blocked if configuration exists that would not be permitted with the new target license level.<br><br>If the license level is not specified, the level is set to the highest license level for that card. |

|---|---|
| Synopsis | MDA event type being monitored |
| Context | **configure** card *number* mda *number* event *keyword* |
| Tree | event |
| Description | This command configures the type of event to be acted upon.<br>• soft-error — Defines the action to take when soft errors are detected on the MDA.<br>• internal-frame-loss — Provides system detected frame loss in the traffic transiting the MDA.<br>• memory-error — Provides the user options to handle MDA memory error events on MDAs. This feature is supported on FP2- and FP3-based Ethernet MDAs and IMMs.<br>• data-link-error — Provides the user options to handle datapath link errors on an MDA. |
| Options | soft-error, internal-frame-loss, memory-error, datapath-link-error |
| Notes | This element is part of a list key. |
| Introduced | 19.7.R1 |
| Platforms | All |

### **action** *keyword*

| | |
|---|---|
| Synopsis | Action when a specific hardware error event is raised |
| Context | **configure** card *number* mda *number* event *keyword* action *keyword* |
| Tree | action |
| Description | This command defines the action taken when a specific hardware error event is detected on the target MDA.<br>When no event action is specified for an event type, the hardware errors related to the event type are ignored by the management plane of the router.<br>Actions include the following:<br>• log-only — Pass the log event to log management. No other action is taken.<br>• reset-mda — Reset the MDA.<br>• fail-mda — Set the operational state of the MDA to Failed. This Failed state persists until the clear mda command is issued (reset) or the MDA is removed and reinserted (re-seated). |
| Options | none, log-only, reset, fail |
| Introduced | 19.7.R1 |
| Platforms | All |

### **fail-on-error** *boolean*

| | |
|---|---|
| Synopsis | Set operational state to Failed if an error is detected |
| Context | **configure** card *number* mda *number* fail-on-error *boolean* |
| Tree | fail-on-error |
| Description | When configured to **true**, the fail-on-error feature is enabled on the MDA. When a defined rate of egress or ingress XPL errors occur on an MDA within a specified time interval, the MDA is placed in the Failed state. This can force an APS switchover or traffic to be rerouted.<br>The purpose of this feature is to avoid situations where traffic is forced to use a physical link that suffers from errors but is still technically operational. The feature uses values configured in the **configure card mda egress-xpl** and **configure card mda ingress-xpl** contexts.<br>See "Fail-on-error overview" in the *7450 ESS, 7750 SR, 7950 XRS, and VSR Troubleshooting Guide* for more information. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **ingress-xpl**

| | |
|---|---|
| Synopsis | Enter the **ingress-xpl** context |
| Context | **configure** card *number* mda *number* ingress-xpl |
| Tree | ingress-xpl |
| Description | Commands in this context specify settings for ingress XPL error occurrences. |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **threshold** *number*

| | |
|---|---|
| Synopsis | Threshold value for XPL errors |
| Context | **configure** card *number* mda *number* ingress-xpl threshold *number* |
| Tree | threshold |
| Description | This command configures the threshold for XPL errors. If the number of XPL errors exceeds the threshold value defined by the **window** *value* command, the MDA is placed in the failed state. |
| Range | 1 to 1000000 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Units | xpl errors |
| Default | 1000 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **window** *number*

| | |
|---|---|
| Synopsis | Time interval to measure XPL error frequency |
| Context | **configure** card *number* mda *number* ingress-xpl window *number* |
| Tree | window |
| Description | This command configures the time interval used to measure the frequency of XPL errors for the fail-on-error feature. If the number of XPL errors exceeds the threshold value in defined by this command, the MDA is placed in the Failed state. |
| Range | 1 to 1440 |
| Units | minutes |
| Default | 60 |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## **mda-type** *keyword*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | MDA type for the slot |
| Context | **configure** card *number* mda *number* mda-type *keyword* |
| Tree | mda-type |
| Description | This command provisions a specific MDA type to the device configuration for the slot. The MDA can be pre-provisioned and an MDA must be provisioned before connectors or ports can be configured.<br><br>A maximum of two MDAs can be provisioned on an IOM or XCM. XMAs are provisioned using MDA commands.<br><br>A medium severity alarm is generated if an MDA is inserted that does not match the MDA type configured for the slot. This alarm is cleared when the correct MDA is inserted or the configuration is modified. A high severity alarm is raised when an administratively enabled MDA is removed from the chassis. This alarm is cleared if either the correct MDA type is inserted or the configuration is modified. A low severity alarm is issued if an MDA is removed that is administratively disabled.<br><br>An MDA can only be provisioned in a slot if the MDA type is allowed in the MDA slot. An error message is generated when an MDA is provisioned in a slot where it is not allowed.<br><br>Some MDA hardware can support two different firmware loads. One load includes the base Ethernet functionality, including 10G WAN mode, but does not include 1588 port-based timestamping. The second load includes the base Ethernet functionality and 1588 port-based timestamping, but does not include 10G WAN mode. These are identified as two MDA types that are the same, except for a “-ptp” suffix to indicate the second loadset. A hard reset of the MDA occurs when switching between the two provisioned types.<br><br>An alarm is raised if partial or complete MDA failure is detected. The alarm is cleared when the error condition ceases.<br><br>New generations of XMAs include variants controlled through hardware and software licensing. For these XMAs, the license level must be provisioned in addition to the MDA type. An XMA cannot become operational unless the provisioned license level matches the license level of the XMA installed into the slot.<br><br>The set of license levels varies by MDA type. The provisioned level controls aspects related to connector provisioning and the consumption of hardware egress queues and egress policers. Changes to the provisioned license level may be blocked if configuration that would not be permitted with the new target license level exists. If the license level is not specified, the level is set to the highest license level for that XMA. |

### **power-save** *boolean*

| | |
|---|---|
| Synopsis | Place card in power-save mode when not in use |
| Context | **configure** card *number* power-save *boolean* |
| Tree | power-save |
| Description | When configured to **true**, this command enables the power-save mode on the card when it is not in use. The power-save mode allows the card to be installed and configured in a platform for future use, while having minimal impact on the overall power consumption.<br>A card placed in the power-save mode is reset, forced into an idle state, and consumes minimal power. In power save mode, the download of a software image to the card is not allowed. The card must be administratively disabled before it is placed in the power-save mode.<br>Cards in the power save mode do not count in the intelligent power management budget and they also do not pass traffic.<br>When configured to **false**, this command removes the card from power-save mode. |
| Default | false |
| Introduced | 19.5.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a8, 7750 SR-2e, 7750 SR-3e, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS |

### **reset-on-recoverable-error** *boolean*

| | |
|---|---|
| Synopsis | Reset card for fatal memory parity error on a Q-chip |
| Context | **configure** card *number* reset-on-recoverable-error *boolean* |
| Tree | reset-on-recoverable-error |
| Description | When configured to **true**, the card is reset when a fatal memory parity error is detected on a Q-chip of the card, regardless of the setting of the **fail-on-error** configuration for the card.<br>When configured to **false**, the recovery action is taken instead of resetting the card. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7450 ESS, 7750 SR-7/12/12e |

|---|---|
| Tree | upgrade |
| Description | Commands in this context assign a license level upgrade to the card, XIOM, or XMA. There can be multiple upgrades applied to a card, XIOM, or XMA. The first upgrade must use index 1, and then next index 2, and so on. Also, when removing upgrades, the largest index must be removed first, and then the next largest removed, and so on.<br>The path indicates the starting level and the new level that will apply due to the upgrade. For example, "cr1200g-cr1600g" can be applied to an XMA that is currently at the cr1200g level and after application of the upgrade, the operational level of the XMA will be cr1600g.<br>There must be an upgrade license available for the path specified. Available upgrades can be checked using the **show licensing entitlements** command.<br>Some upgrades require a hard reset of the card or MDA to take effect. In general, this is required when the Full Duplex bandwidth is being changed. |
| Introduced | 16.0.R4 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-1se |

## interval

| | |
|---|---|
| Synopsis | Enter the **interval** context |
| Context | **configure** card *number* virtual-scheduler-adjustment interval |
| Tree | interval |
| Introduced | 16.0.R1 |
| Platforms | All |

## rate-calculation-minimum

| | |
|---|---|
| Synopsis | Enter the **rate-calculation-minimum** context |
| Context | **configure** card *number* virtual-scheduler-adjustment interval rate-calculation-minimum |
| Tree | rate-calculation-minimum |
| Description | Commands in this context override the default minimum time that must elapse before a policer or queue's offered rate can be recalculated. A minimum time between offered rate calculations is enforced to both prevent inaccurate estimation of the offered rate and excessive input to the virtual scheduler process.<br>To smooth out rapidly fluctuating offered rates, the system averages the measured offered rate with a window of previously measured offered traffic statistics and knowledge of the time between the samples. |
| Introduced | 16.0.R1 |
| Platforms | All |

## fast-queue *decimal-number*

| | |
|---|---|
| Synopsis | Minimum rate calculation time for fast queues |
| Context | **configure** card *number* virtual-scheduler-adjustment interval rate-calculation-minimum fast-queue *decimal-number* |
| Tree | fast-queue |

### **slow-queue** *decimal-number*

| | |
|---|---|
| Synopsis | Minimum rate calculation time for slow queues |
| Context | **configure** card *number* virtual-scheduler-adjustment interval rate-calculation-minimum slow-queue *decimal-number* |
| Tree | slow-queue |
| Range | 0.01 to 1000.00 |
| Units | percent |
| Default | 100.00 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **scheduler-run-minimum** *decimal-number*

| | |
|---|---|
| Synopsis | Minimum time of the scheduler run |
| Context | **configure** card *number* virtual-scheduler-adjustment interval scheduler-run-minimum *decimal-number* |
| Tree | scheduler-run-minimum |
| Description | This command overrides the default minimum time that must elapse before a virtual scheduler can redistribute bandwidth based on changes to the offered rates of member policers or queues.<br><br>A minimum run interval is enforced to manage the number of batched queue changes before reacting to the changed rates. Because the periodic function of determining policer or queue offered rates is performed sequentially, the interval allows the policer and queue rates to be determined before the bandwidth distribution to the policers and queues. |
| Range | 0.01 to 1000.00 |
| Units | percent |
| Default | 100.00 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **task-scheduling** *decimal-number*

| | |
|---|---|
| Synopsis | Task scheduling interval |
| Context | **configure** card *number* virtual-scheduler-adjustment interval task-scheduling *decimal-number* |
| Tree | task-scheduling |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | This command overrides the system default time interval for scheduling the hierarchical virtual scheduler task.<br>By default, the system wakes the virtual scheduler task every 50 ms which is equivalent to five 10 ms timer ticks. |
| Range | 0.01 to 1000.00 |
| Units | percent |
| Default | 100.00 |
| Introduced | 16.0.R1 |
| Platforms | All |

## slow-queue-threshold-rate *number*

| | |
|---|---|
| Synopsis | Slow queue threshold rate |
| Context | **configure** card *number* virtual-scheduler-adjustment slow-queue-threshold-rate *number* |
| Tree | slow-queue-threshold-rate |
| Description | This command overrides the system default threshold rate used to place policers and queues in the slow queue category. Slow rate policers and queues use a different minimum rate calculation interval time than fast rate queues.<br>The fast rate threshold is derived by multiplying the adjusted slow rate threshold by a factor of 1.5.<br>Configuring a value of zero (0) forces all policers and queues to be treated as fast rate queues. |
| Range | 0 to 1000000 |
| Units | kilobps |
| Default | 1000 |
| Introduced | 16.0.R1 |
| Platforms | All |

| Context | **configure** card *number* xiom *string* upgrade *number* |
| Tree | upgrade |
| Description | Commands in this context assign a license level upgrade to the XIOM. Multiple upgrades can be applied to an XIOM. The first upgrade must use index 1, then index 2, and so on. When removing upgrades, the largest index must be removed first, followed by the next largest, and so on.<br>Some upgrades require a hard reset of the XIOM to take effect. In general, this is required when the Full Duplex bandwidth is changed as a result of the upgrade. |
| Introduced | 20.2.R1 |
| Platforms | 7750 SR-1s, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s |

## [**upgrade-index**] *number*

| | |

## **xiom-type** *keyword*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | XIOM type |
| Context | **configure** card *number* xiom *string* xiom-type *keyword* |
| Tree | xiom-type |
| Description | This command associates the XIOM type with the slot.<br>The XIOM type can be preprovisioned, which means that the XIOM does not have to be installed in the chassis.<br>An XIOM must be provisioned before an MDA-s, a connector, or a port can be configured. An XIOM can only be provisioned in a slot that is vacant. After an XIOM is provisioned in the slot, no other XIOM can be provisioned (configured) for the slot.<br>An XIOM can only be provisioned in a slot if the XIOM type is allowed in the slot. An error message is generated if an attempt is made to provision an XIOM type that is not allowed.<br>If an XIOM is inserted that does not match the configured XIOM type for the slot, then a log event and a facility alarm are raised. The alarm is cleared when the correct XIOM type is installed or the configuration is modified.<br>A log event and a facility alarm are raised if an administratively enabled XIOM is removed from the chassis. The alarm is cleared when the correct XIOM type is installed or the configuration is modified. A log event is issued when an XIOM is removed that is administratively disabled.<br>XIOMs are controlled by hardware and software licensing. In addition to the XIOM type, the license level must be provisioned using the **level** command. |

## 4.10 cflowd commands

```
configure
   –  cflowd
      –  active-flow-timeout number
      –  admin-state keyword
      –  analyze-gre-payload boolean
      –  analyze-l2tp-traffic boolean
      –  analyze-v4overv6-traffic boolean
      –  apply-groups reference
      –  apply-groups-exclude reference
      –  cache-size number
      –  collector (ipv4-address-no-zone | ipv6-address-no-zone) port number
         –  admin-state keyword
         –  aggregation
            –  as-matrix boolean
            –  destination-prefix boolean
            –  protocol-port boolean
            –  raw boolean
            –  source-destination-prefix boolean
            –  source-prefix boolean
         –  apply-groups reference
         –  apply-groups-exclude reference
         –  autonomous-system-type keyword
         –  description description
         –  export-filter
            –  family
               –  ipv4 boolean
               –  ipv6 boolean
               –  l2-ip boolean
               –  mcast-ipv4 boolean
               –  mcast-ipv6 boolean
               –  mpls boolean
               –  non-ip boolean
            –  interface-list
               –  router reference interface-name reference
                  –  apply-groups reference
                  –  apply-groups-exclude reference
                  –  direction keyword
               –  service
                  –  ies-group-interface service-name reference subscriber-interface-
name reference group-interface-name reference
                     –  apply-groups reference
                     –  apply-groups-exclude reference
                     –  direction keyword
                  –  ies-interface service-name reference interface-name reference
                     –  apply-groups reference
                     –  apply-groups-exclude reference

## 4.10.1 cflowd command descriptions

### cflowd

| | |
|---|---|
| Synopsis | Enable the **cflowd** context |
| Context | **configure** cflowd |
| Tree | cflowd |
| Introduced | 16.0.R1 |
| Platforms | All |

### active-flow-timeout *number*

| | |
|---|---|
| Synopsis | Maximum time before an active flow is exported |
| Context | **configure** cflowd active-flow-timeout *number* |
| Tree | active-flow-timeout |
| Description | This command configures the maximum time before an active flow is aged out of the active cache. If an individual flow is active for the configured time, the flow is exported and a new flow is created on the next packet sampled for the flow.<br>This value is set for a flow when the flow is initially created in the active cache table and does not change dynamically. |
| Range | 30 to 36000 |
| Units | seconds |
| Default | 1800 |
| Introduced | 20.2.R1 |
| Platforms | All |

### admin-state *keyword*

| | |
|---|---|
| Synopsis | Administrative state of cflowd |
| Context | **configure** cflowd admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | enable |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **analyze-gre-payload** *boolean*

| | |
|---|---|
| Synopsis | Perform cflowd analysis on the inner IP packet |
| Context | **configure** cflowd analyze-gre-payload *boolean* |
| Tree | analyze-gre-payload |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **analyze-l2tp-traffic** *boolean*

| | |
|---|---|
| Synopsis | Analyze the inner IP header of an L2TP packet |
| Context | **configure** cflowd analyze-l2tp-traffic *boolean* |
| Tree | analyze-l2tp-traffic |
| Description | When configured to **true**, cflowd looks for and analyzes the inner IP header of an L2TPv2 frame.<br>L2TPv2 traffic is identified by either the source or destination UDP port numbering that is set to 1701.<br>When configured to **false**, the analysis is not performed. |
| Default | false |
| Introduced | 19.10.R1 |
| Platforms | All |

### **analyze-v4overv6-traffic** *boolean*

| | |
|---|---|
| Synopsis | Analyze the inner IPv4 packet within an IPv6 packet |
| Context | **configure** cflowd analyze-v4overv6-traffic *boolean* |
| Tree | analyze-v4overv6-traffic |
| Description | When configured to **true**, cflowd looks for and analyzes the inner IPv4 header of IPv4overIPv6 frames that include MAP-E as well as DSLite and SAM traffic.<br>When configured to **false**, the analysis is not performed. |
| Default | false |
| Introduced | 19.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **cache-size** *number*

| | |
|---|---|
| Synopsis | Maximum number of active flows in the flow cache table |
| Context | **configure** cflowd cache-size *number* |
| Tree | cache-size |
| Range | 1000 to 4000000 |
| Units | flows |
| Introduced | 16.0.R1 |
| Platforms | All |

### **collector** [ip-address] *(ipv4-address-no-zone | ipv6-address-no-zone)* port *number*

| | |
|---|---|
| Synopsis | Enter the **collector** list instance |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* |
| Tree | collector |
| Max. instances | 8 |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**ip-address**] *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | IP address of the remote cflowd collector host |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* |
| Tree | collector |
| Description | This command specifies the IP address of the remote cflowd collector host to receive the exported cflowd data. |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

### **port** *number*

| | |
|---|---|
| Synopsis | UDP port number of the remote cflowd collector host |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | collector |
| Range | 1 to 65535 |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

## **admin-state** *keyword*

| | |
|---|---|
| Synopsis | Administrative state of the cflowd collector |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* admin-state *keyword* |
| Tree | admin-state |
| Options | enable, disable |
| Default | enable |
| Introduced | 16.0.R1 |
| Platforms | All |

## **aggregation**

| | |
|---|---|
| Synopsis | Enter the **aggregation** context |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* aggregation |
| Tree | aggregation |
| Introduced | 16.0.R1 |
| Platforms | All |

## **as-matrix** *boolean*

| | |
|---|---|
| Synopsis | Base aggregation data based on AS information |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* aggregation as-matrix *boolean* |
| Tree | as-matrix |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **destination-prefix** *boolean*

| | |
|---|---|
| Synopsis | Aggregate data based on destination prefix information |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* aggregation destination-prefix *boolean* |
| Tree | destination-prefix |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **protocol-port** *boolean*

| | |
|---|---|
| Synopsis | Aggregate flows based on the IP protocol and ports |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* aggregation protocol-port *boolean* |
| Tree | protocol-port |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **raw** *boolean*

| | |
|---|---|
| Synopsis | Export flow data without aggregation |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* aggregation raw *boolean* |
| Tree | raw |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **source-destination-prefix** *boolean*

| | |
|---|---|
| Synopsis | Aggregate data based on prefix information |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* aggregation source-destination-prefix *boolean* |
| Tree | source-destination-prefix |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **source-prefix** *boolean*

| | |
|---|---|
| Synopsis | Aggregate flows based on the source prefix information |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* aggregation source-prefix *boolean* |
| Tree | source-prefix |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **autonomous-system-type** *keyword*

| | |
|---|---|
| Synopsis | Basis of the AS information included in flow data |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* autonomous-system-type *keyword* |
| Tree | autonomous-system-type |
| Options | origin, peer |
| Default | origin |
| Introduced | 16.0.R1 |
| Platforms | All |

### **description** *description*

| | |
|---|---|
| Synopsis | Text description |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* description *description* |
| Tree | description |
| String length | 1 to 80 |
| Introduced | 16.0.R1 |
| Platforms | All |

## export-filter

| | |
|---|---|
| Synopsis | Enter the **export-filter** context |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter |
| Tree | export-filter |
| Description | Commands in this context configure the export filters that control which flows are sent to the Cflowd Collector. |
| Introduced | 16.0.R1 |
| Platforms | All |

## family

| | |
|---|---|
| Synopsis | Enter the **family** context |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter family |
| Tree | family |
| Description | Commands in this context configure the address families for the flow types prevented from going to the associated cflowd collector. |
| Introduced | 16.0.R1 |
| Platforms | All |

## ipv4 *boolean*

| | |
|---|---|
| Synopsis | Prevent IPv4 flow data from going to collector |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter family ipv4 *boolean* |
| Tree | ipv4 |
| Description | When configured to **true**, the router prevents IPv4 flow data from going to the associated cflowd collector. Cflowd collector version 9 or 10 must be configured to filter the IPv4 flow data.<br><br>When configured to **false**, the router allows IPv4 flow data to go to the associated cflowd collector. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **ipv6** *boolean*

| | |
|---|---|
| Synopsis | Prevent IPv6 flow data from going to collector |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter family ipv6 *boolean* |
| Tree | ipv6 |
| Description | When configured to **true**, the router prevents IPv6 flow data from going to the associated cflowd collector. Cflowd collector version 9 or 10 must be configured to filter the IPv6 flow data.<br>When configured to **false**, the router allows IPv6 flow data to go to the associated cflowd collector. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **l2-ip** *boolean*

| | |
|---|---|
| Synopsis | Prevent Layer 2 IP flow data from going to collector |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter family l2-ip *boolean* |
| Tree | l2-ip |
| Description | When configured to **true**, the router prevents Layer 2 IP flow data from going to the cflowd associated collector. Cflowd collector version 10 must be configured to filter the Layer 2 IP flow data.<br>When configured to **false**, the router allows the Layer 2 IP flow data to go to the associated cflowd collector. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **mcast-ipv4** *boolean*

| | |
|---|---|
| Synopsis | Prevent multicast IPv4 data from going to the collector |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter family mcast-ipv4 *boolean* |
| Tree | mcast-ipv4 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | When configured to **true**, the router prevents multicast IPv4 flow data from going to the associated cflowd collector. Cflowd collector version 9 or 10 must be configured to filter the multicast IPv4 flow data.<br>When configured to **false**, the router allows multicast IPv4 flow data to go to the associated cflowd collector. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **mcast-ipv6** *boolean*

| | |
|---|---|
| Synopsis | Prevent multicast IPv6 data from going to collector |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter family mcast-ipv6 *boolean* |
| Tree | mcast-ipv6 |
| Description | When configured to **true**, the router prevents multicast IPv6 flow data from going to the associated cflowd collector. Cflowd collector version 9 or 10 must be configured to filter multicast IPv6 flow data.<br>When configured to **false**, the router allows multicast IPv6 flow data to go to the associated cflowd collector. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **mpls** *boolean*

| | |
|---|---|
| Synopsis | Prevent MPLS flow data from going to collector |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter family mpls *boolean* |
| Tree | mpls |
| Description | When configured to **true**, the router prevents MPLS flow data from going to the associated cflowd collector. Cflowd collector version 9 or 10 must be configured to filter MPLS flow data.<br>When configured to **false**, the router allows MPLS flow data to go to the associated cflowd collector. |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **non-ip** *boolean*

| | |
|---|---|
| Synopsis | Prevent non-IP flow data from going to collector |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter family non-ip *boolean* |
| Tree | non-ip |
| Description | When configured to **true**, the router prevents Layer 2 and MPLS carrying non-IP flow data from going to the associated cflowd collector. Collector version 10 must be configured to filter the non-IP address family flow type.<br>When configured to **false**, the router allows Layer 2 and MPLS carrying non-IP flow data to go to the associated cflowd collector. |
| Default | false |
| Introduced | 24.7.R1 |
| Platforms | All |

### **interface-list**

| | |
|---|---|
| Synopsis | Enter the **interface-list** context |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter interface-list |
| Tree | interface-list |
| Description | Commands in this context configure the match conditions for the interface that control which flow data is exported to the associated Cflowd Collector. |
| Introduced | 16.0.R4 |
| Platforms | All |

### **router** [router-name] *reference* interface-name *reference*

| | |
|---|---|
| Synopsis | Enter the **router** list instance |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter interface-list router *reference* interface-name *reference* |
| Tree | router |
| Description | Commands in this context configure the interface the router uses to send ingress sampled data flows to the associated Cflowd Collector. |
| Introduced | 16.0.R4 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### [**router-name**] *reference*

| | |
|---|---|
| Synopsis | Administrative router name |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter interface-list router *reference* interface-name *reference* |
| Tree | router |
| Reference | **configure** router *named-item-64* |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | All |

### **interface-name** *reference*

| | |
|---|---|
| Synopsis | Name for the router to the service interface or SAP |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter interface-list router *reference* interface-name *reference* |
| Tree | router |
| Reference | **configure** router *named-item-64* interface *interface-name* |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R4 |
| Platforms | All |

### **direction** *keyword*

| | |
|---|---|
| Synopsis | Flow match condition direction for the export filter |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter interface-list router *reference* interface-name *reference* direction *keyword* |
| Tree | direction |
| Description | This command configures the direction of the flows as a match condition for the associated export filter. The router only sends flows that match the specified direction to the associated Cflowd Collector. |
| Options | ingress, egress, both |
| Default | both |
| Introduced | 23.10.R1 |
| Platforms | All |

| | |
|---|---|
| Description | This command configures the direction of the flows as a match condition for the associated export filter. The router only sends flows that match the specified direction to the associated Cflowd Collector. |
| Options | ingress, egress, both |
| Default | both |
| Introduced | 23.10.R1 |
| Platforms | All |

### **router** [router-instance] *string*

| | |
|---|---|
| Synopsis | Add a list entry for **router** |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter router *string* |
| Tree | router |
| Description | This command adds an entry to the list of router instances that can send flow data to the associated Cflowd Collector. |
| Introduced | 16.0.R1 |
| Platforms | All |

### [**router-instance**] *string*

| | |
|---|---|
| Synopsis | Router instance name |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* export-filter router *string* |
| Tree | router |
| Description | This command specifies the router instance name. Only "Base" is supported. |
| Notes | This element is part of a list key. |
| Introduced | 16.0.R1 |
| Platforms | All |

### **router-instance** *string*

| | |
|---|---|
| Synopsis | Router or service name |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* router-instance *string* |
| Tree | router-instance |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | This command specifies the routing instance used to route traffic to the associated collector IP address.<br>The "Base" routing instance is the fallback if no route is found. No fallback mechanism is supported for "Base" and "VPRN". |
| Default | management |
| Introduced | 16.0.R1 |
| Platforms | All |

### **template-set** *keyword*

| | |
|---|---|
| Synopsis | Templates sent to the collector |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* template-set *keyword* |
| Tree | template-set |
| Description | This command specifies the set of templates sent to the collector when using cflowd Version 9 or Version 10. |
| Options | not-applicable, basic, mpls-ip, l2-ip, mpls-transport, compact, fastpath |
| Introduced | 16.0.R1 |
| Platforms | All |

### **version** *number*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Flow data collector version |
| Context | **configure** cflowd collector *(ipv4-address-no-zone \| ipv6-address-no-zone)* port *number* version *number* |
| Tree | version |
| Range | 5 \| 8 to 10 |
| Notes | This element is mandatory. |
| Introduced | 16.0.R1 |
| Platforms | All |

### **enhanced-distribution** *boolean*

| | |
|---|---|
| Synopsis | Include ingress port ID in hashing algorithm for cflowd |
| Context | **configure** cflowd enhanced-distribution *boolean* |
| Tree | enhanced-distribution |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS |

### **export-mode** *keyword*

| | |
|---|---|
| Synopsis | Export mode for flow data |
| Context | **configure** cflowd export-mode *keyword* |
| Tree | export-mode |
| Options | automatic, manual |
| Default | automatic |
| Introduced | 16.0.R1 |
| Platforms | All |

### **inactive-flow-timeout** *number*

| | |
|---|---|
| Synopsis | Time without matching packet before flow is inactive |
| Context | **configure** cflowd inactive-flow-timeout *number* |
| Tree | inactive-flow-timeout |
| Description | This command configures the time interval that must elapse without a packet matching a flow before the flow is considered inactive.<br>This value is set for a flow when the flow is initially created in the active cache table and does not change dynamically. |
| Range | 10 to 600 |
| Units | seconds |
| Default | 15 |
| Introduced | 20.2.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **inband-collector-export-only** *boolean*

| | |
|---|---|
| Synopsis | Export the traffic to all collectors only via in-band interfaces |
| Context | **configure** cflowd inband-collector-export-only *boolean* |
| Tree | inband-collector-export-only |
| Default | false |
| Introduced | 16.0.R1 |
| Platforms | All |

### **overflow** *number*

| | |
|---|---|
| Synopsis | Percentage of entries to remove from Cflowd cache when the maximum number of entries is exceeded |
| Context | **configure** cflowd overflow *number* |
| Tree | overflow |
| Range | 1 to 50 |
| Units | percent |
| Default | 1 |
| Introduced | 16.0.R1 |
| Platforms | All |

### **sample-profile** [profile-id] *number*

| | |
|---|---|
| Synopsis | Enter the **sample-profile** list instance |
| Context | **configure** cflowd sample-profile *number* |
| Tree | sample-profile |
| Max. instances | 5 |
| Introduced | 19.5.R1 |
| Platforms | All |

### [**profile-id**] *number*

| | |
|---|---|
| Synopsis | The unique specifier of this sample-profile |
| Context | **configure** cflowd sample-profile *number* |
| Tree | sample-profile |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Range | 1 to 5 |
| Notes | This element is part of a list key. |
| Introduced | 19.5.R1 |
| Platforms | All |

### **metering-process** *keyword*

| | |
|---|---|
| Synopsis | Metering process for samples taken |
| Context | **configure** cflowd sample-profile *number* metering-process *keyword* |
| Tree | metering-process |
| Description | This command specifies the type of metering process to use for the samples taken from the associated interfaces. |
| Options | standard, fp-accelerated |
| Default | standard |
| Introduced | 21.10.R1 |
| Platforms | 7750 SR-7s, 7750 SR-14s, 7950 XRS-20e |

### **sample-rate** *number*

| | |
|---|---|
| Synopsis | Cflowd sampling rate for sample profile ID |
| Context | **configure** cflowd sample-profile *number* sample-rate *number* |
| Tree | sample-rate |
| Description | This command defines the cflowd sampling rate for the sample profile ID.<br>The sample rate indicates that the associated interface samples 1 in N packets for cflowd analysis. You can only associate one rate profile below 1:256 with a specific IOM, IMM, or XMA. |
| Range | 1 to 60000 |
| Default | 1000 |
| Introduced | 19.5.R1 |
| Platforms | All |

### **template-retransmit** *number*

| | |
|---|---|
| Synopsis | Time to resend template information |
| Context | **configure** cflowd template-retransmit *number* |
| Tree | template-retransmit |

## 4.13.1 debug command descriptions

### debug

| | |
|---|---|
| Synopsis | Configure application or protocol tracing |
| Context | debug |
| Tree | debug |
| Description | Commands in this context enable detailed debugging information for various protocols and router functions. |
| Introduced | 21.5.R1 |
| Platforms | All |

### aaa

| | |
|---|---|
| Synopsis | Enter the **aaa** context |
| Context | debug aaa |
| Tree | aaa |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### diameter

| | |
|---|---|
| Synopsis | Enter the **diameter** context |
| Context | debug aaa diameter |
| Tree | diameter |
| Description | Commands in this context configure Diameter Base parameters. |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### application

| | |
|---|---|
| Synopsis | Enter the **application** context |
| Context | debug aaa diameter application |
| Tree | application |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | Commands in this context configure debugging for Diameter session-aware application messages and application message processing failures, for example, in the case of an unknown Diameter session ID. |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **failures** *boolean*

| | |
|---|---|
| Synopsis | Debug Diameter application failures |
| Context | debug aaa diameter application failures *boolean* |
| Tree | failures |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **policy** [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **policy** list instance |
| Context | debug aaa diameter application policy *named-item* |
| Tree | policy |
| Max. instances | 32 |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | Diameter application policy name |
| Context | debug aaa diameter application policy *named-item* |
| Tree | policy |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **failures** *boolean*

| | |
|---|---|
| Synopsis | Debug Diameter application failures |
| Context | debug aaa diameter application policy *named-item* failures *boolean* |
| Tree | failures |
| Default | true |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **messages** *boolean*

| | |
|---|---|
| Synopsis | Debug Diameter application messages |
| Context | debug aaa diameter application policy *named-item* messages *boolean* |
| Tree | messages |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **node** [origin-host] *diam-fqdn*

| | |
|---|---|
| Synopsis | Enter the **node** list instance |
| Context | debug aaa diameter node *diam-fqdn* |
| Tree | node |
| Max. instances | 32 |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### [**origin-host**] *diam-fqdn*

| | |
|---|---|
| Synopsis | Origin host of the Diameter node |
| Context | debug aaa diameter node *diam-fqdn* |
| Tree | node |
| String length | 1 to 80 |
| Notes | This element is part of a list key. |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **failures** *boolean*

| | |
|---|---|
| Synopsis | Debug Diameter node failures |
| Context | debug aaa diameter node *diam-fqdn* failures *boolean* |
| Tree | failures |
| Description | When configured to **true**, the system debugs Diameter node-level failures that occur before the peer is determined. For example, when no route for a message is found in the realm routing table. |
| Default | true |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **peer** [index] *number*

| | |
|---|---|
| Synopsis | Enter the **peer** list instance |
| Context | debug aaa diameter node *diam-fqdn* peer *number* |
| Tree | peer |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### [**index**] *number*

| | |
|---|---|
| Synopsis | Index of the peer in the Diameter node |
| Context | debug aaa diameter node *diam-fqdn* peer *number* |
| Tree | peer |
| Range | 1 to 5 |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **failures** *boolean*

| | |
|---|---|
| Synopsis | Debug Diameter peer failures |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | debug aaa diameter node *diam-fqdn* peer *number* failures *boolean* |
| Tree | failures |
| Default | true |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **messages** *boolean*

| | |
|---|---|
| Synopsis | Debug Diameter peer messages |
| Context | debug aaa diameter node *diam-fqdn* peer *number* messages *boolean* |
| Tree | messages |
| Description | When configured to **true**, the system debugs peer-level messages that are required to bring up, maintain, and tear down a peering connection, for example, Capabilities Exchange and Device Watchdog messages. |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **relayed-messages** *boolean*

| | |
|---|---|
| Synopsis | Debug relayed Diameter messages |
| Context | debug aaa diameter node *diam-fqdn* relayed-messages *boolean* |
| Tree | relayed-messages |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **call-trace**

| | |
|---|---|
| Synopsis | Enter the **call-trace** context |
| Context | debug call-trace |
| Tree | call-trace |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

## ipoe

| | |
|---|---|
| Synopsis | Enter the **ipoe** context |
| Context | debug call-trace ipoe |
| Tree | ipoe |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **trace** [name] *string*

| | |
|---|---|
| Synopsis | Enter the **trace** list instance |
| Context | debug call-trace ipoe trace *string* |
| Tree | trace |
| Max. instances | 50 |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## [**name**] *string*

| | |
|---|---|
| Synopsis | Unique trace name |
| Context | debug call-trace ipoe trace *string* |
| Tree | trace |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **circuit-id** *string*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Circuit ID of the sessions to trace |
| Context | debug call-trace ipoe trace *string* circuit-id *string* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | circuit-id |
| Description | This command configures the circuit ID of the sessions to trace.<br>The circuit ID filter is ignored if it is not part of the IPoE session key. |
| String length | 1 to 255 |
| Notes | The following elements are part of a choice: **circuit-id** or **remote-id**. |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **mac** *string*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | MAC address of the sessions to trace |
| Context | debug call-trace ipoe trace *string* mac *string* |
| Tree | mac |
| String length | 1 to 17 |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **max-jobs** *number*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Maximum number of trace jobs |
| Context | debug call-trace ipoe trace *string* max-jobs *number* |
| Tree | max-jobs |
| Range | 1 to 50 |
| Default | 1 |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **profile** *named-item*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Call trace profile applied for the trace |
| Context | debug call-trace ipoe trace *string* profile *named-item* |
| Tree | profile |
| String length | 1 to 32 |
| Notes | This element is mandatory. |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **remote-id** *string*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Remote ID of the sessions to trace |
| Context | debug call-trace ipoe trace *string* remote-id *string* |
| Tree | remote-id |
| Description | This command configures the remote ID of the sessions to trace.<br>The remote ID filter is ignored if it is not part of the IPoE session key. |
| String length | 1 to 255 |
| Notes | The following elements are part of a choice: **circuit-id** or **remote-id**. |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **sap** *sap*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | SAP ID of the sessions to trace |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | debug call-trace ipoe trace *string* sap *sap* |
| Tree | sap |
| String length | 1 to 45 |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **trace-existing-sessions** *boolean*

**WARNING:**
Modifying this element recreates the parent element automatically for the new value to take effect.

| | |
|---|---|
| Synopsis | Enable call trace for existing sessions |
| Context | debug call-trace ipoe trace *string* trace-existing-sessions *boolean* |
| Tree | trace-existing-sessions |
| Description | When configured to **true**, the system traces existing sessions.<br>When configured to **false**, only new sessions are traced. |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **pppoe**

| | |
|---|---|
| Synopsis | Enter the **pppoe** context |
| Context | debug call-trace pppoe |
| Tree | pppoe |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **trace** [name] *string*

| | |
|---|---|
| Synopsis | Enter the **trace** list instance |
| Context | debug call-trace pppoe trace *string* |
| Tree | trace |
| Max. instances | 50 |

© 2024 Nokia.

### [**ca-profile-name**] *named-item*

| | |
|---|---|
| Synopsis | Certificate Authority (CA) profile name |
| Context | debug certificate auto-crl-update *named-item* |
| Tree | auto-crl-update |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 24.3.R1 |
| Platforms | All |

### **cmpv2** [ca-profile-name] *named-item*

| | |
|---|---|
| Synopsis | Add a list entry for **cmpv2** |
| Context | debug certificate cmpv2 *named-item* |
| Tree | cmpv2 |
| Description | This command adds a list entry for a CA profile to debug Certificate Management Protocol version 2 (CMPv2). |
| Max. instances | 128 |
| Introduced | 24.3.R1 |
| Platforms | All |

### [**ca-profile-name**] *named-item*

| | |
|---|---|
| Synopsis | CA profile name |
| Context | debug certificate cmpv2 *named-item* |
| Tree | cmpv2 |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 24.3.R1 |
| Platforms | All |

### **est** [est-profile-name] *named-item*

| | |
|---|---|
| Synopsis | Add a list entry for **est** |

© 2024 Nokia.

| | |
|---|---|
| Context | debug certificate est *named-item* |
| Tree | est |
| Description | This command adds a list entry for debugging Enrollment over Secure Transport Protocol (EST). |
| Max. instances | 128 |
| Introduced | 24.3.R1 |
| Platforms | All |

### [**est-profile-name**] *named-item*

| | |
|---|---|
| Synopsis | EST profile name |
| Context | debug certificate est *named-item* |
| Tree | est |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 24.3.R1 |
| Platforms | All |

### **ocsp** [ca-profile-name] *named-item*

| | |
|---|---|
| Synopsis | Add a list entry for **ocsp** |
| Context | debug certificate ocsp *named-item* |
| Tree | ocsp |
| Description | This command adds a list entry for a CA profile to debug the Online Certificate Status Protocol (OCSP). |
| Max. instances | 128 |
| Introduced | 24.3.R1 |
| Platforms | All |

### [**ca-profile-name**] *named-item*

| | |
|---|---|
| Synopsis | CA profile name |
| Context | debug certificate ocsp *named-item* |
| Tree | ocsp |

## ipsec

| | |
|---|---|
| Synopsis | Enter the **ipsec** context |
| Context | debug ipsec |
| Tree | ipsec |
| Description | Commands in this context configure debugging for IP security (IPsec) functionality. |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **certificate** [filename] *pki-file-name*

| | |
|---|---|
| Synopsis | Add a list entry for **certificate** |
| Context | debug ipsec certificate *pki-file-name* |
| Tree | certificate |
| Description | This command adds a list entry for debugging certificate chain computation in the certificate profile. |
| Max. instances | 200 |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## [**filename**] *pki-file-name*

| | |
|---|---|
| Synopsis | Imported IPsec certificate filename |
| Context | debug ipsec certificate *pki-file-name* |
| Tree | certificate |
| String length | 1 to 95 |
| Notes | This element is part of a list key. |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **client-db** [name] *named-item*

| | |
|---|---|
| Synopsis | Add a list entry for **client-db** |
| Context | debug ipsec client-db *named-item* |
| Tree | client-db |
| Description | This command adds a list entry for debugging the specified IPsec client database. |
| Max. instances | 1000 |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | IPsec client database name |
| Context | debug ipsec client-db *named-item* |
| Tree | client-db |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **gateway** [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **gateway** list instance |
| Context | debug ipsec gateway *named-item* |
| Tree | gateway |
| Description | Commands in this context configure debugging for dynamic IPsec tunnels that terminate on the specified IPsec gateway.<br>Specify the tunnel to debug using either its source address or source subnet, by using the **debug ipsec gateway tunnel** command. If a subnet is specified, the system enables debugging for all tunnels with source addresses in the specified subnet. |
| Max. instances | 16 |
| Introduced | 24.3.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

|---|---|
| Synopsis | Enter the **port** list instance |
| Context | debug lag *lag-interface* port *port* |
| Tree | port |
| Introduced | 22.7.R1 |
| Platforms | All |

### [**port-id**] *port*

| | |
|---|---|
| Synopsis | Unique identifier for the port in the LAG |
| Context | debug lag *lag-interface* port *port* |
| Tree | port |
| Notes | This element is part of a list key. |
| Introduced | 22.7.R1 |
| Platforms | All |

### **bfd** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for BFD |
| Context | debug lag *lag-interface* port *port* bfd *boolean* |
| Tree | bfd |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **config** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for configuration changes |
| Context | debug lag *lag-interface* port *port* config *boolean* |
| Tree | config |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **lacp-packets** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for LACP packets |
| Context | debug lag *lag-interface* port *port* lacp-packets *boolean* |
| Tree | lacp-packets |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **multi-chassis** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for multi-chassis LAG |
| Context | debug lag *lag-interface* port *port* multi-chassis *boolean* |
| Tree | multi-chassis |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **port-states** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for port-state changes |
| Context | debug lag *lag-interface* port *port* port-states *boolean* |
| Tree | port-states |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **redundancy** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for redundancy |
| Context | debug lag *lag-interface* port *port* redundancy *boolean* |
| Tree | redundancy |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

© 2024 Nokia.

### **selection-logic** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for selection logic |
| Context | debug lag *lag-interface* port *port* selection-logic *boolean* |
| Tree | selection-logic |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **state-machine** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for state-machine changes |
| Context | debug lag *lag-interface* port *port* state-machine *boolean* |
| Tree | state-machine |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **timers** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for timers |
| Context | debug lag *lag-interface* port *port* timers *boolean* |
| Tree | timers |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **port-states** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for port-state changes |
| Context | debug lag *lag-interface* port-states *boolean* |
| Tree | port-states |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **redundancy** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for redundancy |
| Context | debug lag *lag-interface* redundancy *boolean* |
| Tree | redundancy |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **selection-logic** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for selection logic |
| Context | debug lag *lag-interface* selection-logic *boolean* |
| Tree | selection-logic |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **state-machine** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for state-machine changes |
| Context | debug lag *lag-interface* state-machine *boolean* |
| Tree | state-machine |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### **timers** *boolean*

| | |
|---|---|
| Synopsis | Enable debugging for timers |
| Context | debug lag *lag-interface* timers *boolean* |
| Tree | timers |
| Default | false |
| Introduced | 22.7.R1 |
| Platforms | All |

### multicast-management

| | |
|---|---|
| Synopsis | Enter the **multicast-management** context |
| Context | debug multicast-management |
| Tree | multicast-management |
| Description | Commands in this context debug multicast path management. |
| Introduced | 24.7.R1 |
| Platforms | All |

### multicast-reporting-destination [name] *named-item*

| | |
|---|---|
| Synopsis | Enter the **multicast-reporting-destination** list instance |
| Context | debug multicast-management multicast-reporting-destination *named-item* |
| Tree | multicast-reporting-destination |
| Description | Commands in this context debug multicast path management reporting destinations. |
| Introduced | 24.7.R1 |
| Platforms | All |

### [**name**] *named-item*

| | |
|---|---|
| Synopsis | Multicast reporting destination name |
| Context | debug multicast-management multicast-reporting-destination *named-item* |
| Tree | multicast-reporting-destination |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **detail-level** *keyword*

| | |
|---|---|
| Synopsis | Detail level of the debug output |
| Context | debug multicast-management multicast-reporting-destination *named-item* detail-level *keyword* |
| Tree | detail-level |
| Options | low, medium, high |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Default | medium |
| Introduced | 24.7.R1 |
| Platforms | All |

### **egress** *boolean*

| | |
|---|---|
| Synopsis | Enable tracing for outgoing messages |
| Context | debug multicast-management multicast-reporting-destination *named-item* egress *boolean* |
| Tree | egress |
| Default | true |
| Introduced | 24.7.R1 |
| Platforms | All |

### **group-address** *ipv4-multicast-address*

| | |
|---|---|
| Synopsis | Group address |
| Context | debug multicast-management multicast-reporting-destination *named-item* group-address *ipv4-multicast-address* |
| Tree | group-address |
| Introduced | 24.7.R1 |
| Platforms | All |

### **host-address** *ipv4-unicast-address*

| | |
|---|---|
| Synopsis | Host address |
| Context | debug multicast-management multicast-reporting-destination *named-item* host-address *ipv4-unicast-address* |
| Tree | host-address |
| Introduced | 24.7.R1 |
| Platforms | All |

### **nat**

| | |
|---|---|
| Synopsis | Enter the **nat** context |
| Context | debug nat |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | nat |
| Introduced | 22.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### l2-aware

| | |
|---|---|
| Synopsis | Enter the **l2-aware** context |
| Context | debug nat l2-aware |
| Tree | l2-aware |
| Introduced | 22.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **subscriber** [subscriber-id] *subscriber-id*

| | |
|---|---|
| Synopsis | Add a list entry for **subscriber** |
| Context | debug nat l2-aware subscriber *subscriber-id* |
| Tree | subscriber |
| Max. instances | 16 |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**subscriber-id**] *subscriber-id*

| | |
|---|---|
| Synopsis | L2-aware subscriber ID |
| Context | debug nat l2-aware subscriber *subscriber-id* |
| Tree | subscriber |
| String length | 1 to 64 |
| Notes | This element is part of a list key. |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### upnp

| | |
|---|---|
| Synopsis | Enter the **upnp** context |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | debug nat l2-aware upnp |
| Tree | upnp |
| Introduced | 22.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **subscriber** [subscriber-id] *subscriber-id*

| | |
|---|---|
| Synopsis | Enter the **subscriber** list instance |
| Context | debug nat l2-aware upnp subscriber *subscriber-id* |
| Tree | subscriber |
| Max. instances | 10 |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### [**subscriber-id**] *subscriber-id*

| | |
|---|---|
| Synopsis | L2-aware subscriber ID |
| Context | debug nat l2-aware upnp subscriber *subscriber-id* |
| Tree | subscriber |
| String length | 1 to 64 |
| Notes | This element is part of a list key. |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **events** *boolean*

| | |
|---|---|
| Synopsis | Enable UPnP event debugging |
| Context | debug nat l2-aware upnp subscriber *subscriber-id* events *boolean* |
| Tree | events |
| Default | true |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

© 2024 Nokia.

### packets

| | |
|---|---|
| Synopsis | Enable the **packets** context |
| Context | debug nat l2-aware upnp subscriber *subscriber-id* packets |
| Tree | packets |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### detail *boolean*

| | |
|---|---|
| Synopsis | Include IP, UDP, and TCP headers in UPnP packet debug |
| Context | debug nat l2-aware upnp subscriber *subscriber-id* packets detail *boolean* |
| Tree | detail |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### large-scale

| | |
|---|---|
| Synopsis | Enter the **large-scale** context |
| Context | debug nat large-scale |
| Tree | large-scale |
| Introduced | 22.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### dual-stack-lite

| | |
|---|---|
| Synopsis | Enter the **dual-stack-lite** context |
| Context | debug nat large-scale dual-stack-lite |
| Tree | dual-stack-lite |
| Introduced | 22.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **subscriber** inside-router *string* b4-address *ipv6-prefix*

| | |
|---|---|
| Synopsis | Add a list entry for **subscriber** |
| Context | debug nat large-scale dual-stack-lite subscriber inside-router *string* b4-address *ipv6-prefix* |
| Tree | subscriber |
| Max. instances | 16 |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **inside-router** *string*

| | |
|---|---|
| Synopsis | Inside router instance name |
| Context | debug nat large-scale dual-stack-lite subscriber inside-router *string* b4-address *ipv6-prefix* |
| Tree | subscriber |
| MD-CLI default | Base |
| Notes | This element is part of a list key. |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **b4-address** *ipv6-prefix*

| | |
|---|---|
| Synopsis | IPv6 B4 address of the DS-Lite subscriber |
| Context | debug nat large-scale dual-stack-lite subscriber inside-router *string* b4-address *ipv6-prefix* |
| Tree | subscriber |
| Notes | This element is part of a list key. |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **nat44**

| | |
|---|---|
| Synopsis | Enter the **nat44** context |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | debug nat large-scale nat44 |
| Tree | nat44 |
| Introduced | 22.5.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **subscriber** inside-router *string* ip-address *ipv4-unicast-address*

| | |
|---|---|
| Synopsis | Add a list entry for **subscriber** |
| Context | debug nat large-scale nat44 subscriber inside-router *string* ip-address *ipv4-unicast-address* |
| Tree | subscriber |
| Max. instances | 16 |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **inside-router** *string*

| | |
|---|---|
| Synopsis | Inside router instance name |
| Context | debug nat large-scale nat44 subscriber inside-router *string* ip-address *ipv4-unicast-address* |
| Tree | subscriber |
| MD-CLI default | Base |
| Notes | This element is part of a list key. |
| Introduced | 22.7.R1 |
| Platforms | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ip-address** *ipv4-unicast-address*

| | |
|---|---|
| Synopsis | Inside IPv4 address of the NAT44 subscriber |
| Context | debug nat large-scale nat44 subscriber inside-router *string* ip-address *ipv4-unicast-address* |
| Tree | subscriber |
| Notes | This element is part of a list key. |
| Introduced | 22.7.R1 |

### rtm

| | |
|---|---|
| Synopsis | Enable the **rtm** context |
| Context | debug router *string* bier rtm |
| Tree | rtm |
| Introduced | 24.3.R1 |
| Platforms | All |

### template

| | |
|---|---|
| Synopsis | Enable the **template** context |
| Context | debug router *string* bier template |
| Tree | template |
| Introduced | 24.3.R1 |
| Platforms | All |

### tunnel

| | |
|---|---|
| Synopsis | Enable the **tunnel** context |
| Context | debug router *string* bier tunnel |
| Tree | tunnel |
| Introduced | 24.3.R1 |
| Platforms | All |

### dhcp

| | |
|---|---|
| Synopsis | Enter the **dhcp** context |
| Context | debug router *string* dhcp |
| Tree | dhcp |
| Description | Commands in this context enable DHCP debug for all packets in the specified routing instance or VPRN service, or for specific packets matching the specific MAC addresses, SAP identifiers, or interface names.<br><br>When a DHCP packet matches a specified filter and is conforming the configured debug mode for that filter, the packet debug is available in the specified detail level. DHCP debug filter criteria are applied in the following order:<br><br>**1.** MAC address<br>**2.** SAP identifier |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

3. interface names
4. all packets

Up to 8 MAC address filters, 8 SAP identifier filters, 4 interface name filters, and 4 all-packet filters can be specified simultaneously across all routing instances and VPRN services.

| | |
|---|---|
| Introduced | 22.10.R1 |
| Platforms | All |

## all-packets

| | |
|---|---|
| Synopsis | Enable the **all-packets** context |
| Context | debug router *string* dhcp all-packets |
| Tree | all-packets |
| Introduced | 22.10.R1 |
| Platforms | All |

## detail-level *keyword*

| | |
|---|---|
| Synopsis | Detail level of the DHCP debug output |
| Context | debug router *string* dhcp all-packets detail-level *keyword* |
| Tree | detail-level |
| Options | high, medium, low |
| Default | high |
| Introduced | 22.10.R1 |
| Platforms | All |

## mode *keyword*

| | |
|---|---|
| Synopsis | DHCP packets present in the debug output |
| Context | debug router *string* dhcp all-packets mode *keyword* |
| Tree | mode |
| Options | egress-ingress-and-dropped, dropped-only, ingress-and-dropped |
| Default | egress-ingress-and-dropped |

| Synopsis | Enable tracing of miscellaneous events |
| Context | debug router *string* igmp miscellaneous *boolean* |
| Tree | miscellaneous |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | All |

### **packet**

| | |
|---|---|
| Synopsis | Enable the **packet** context |
| Context | debug router *string* igmp packet |
| Tree | packet |
| Introduced | 22.10.R1 |
| Platforms | All |

### **all-origins**

| | |
|---|---|
| Synopsis | Trace all origins |
| Context | debug router *string* igmp packet all-origins |
| Tree | all-origins |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Notes | The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**. |
| Introduced | 22.10.R1 |
| Platforms | All |

### **dropped** *boolean*

| | |
|---|---|
| Synopsis | Enable tracing for dropped packets |
| Context | debug router *string* igmp packet dropped *boolean* |
| Tree | dropped |
| Default | true |
| Introduced | 22.10.R1 |
| Platforms | All |

### **egress** *boolean*

| | |
|---|---|
| Synopsis | Enable tracing for transmitted packets |
| Context | debug router *string* igmp packet egress *boolean* |
| Tree | egress |
| Default | true |
| Introduced | 22.10.R1 |
| Platforms | All |

### **group-interface-name** *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* igmp packet group-interface-name *interface-name* |
| Tree | group-interface-name |
| String length | 1 to 32 |
| Notes | The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**. |
| Introduced | 22.10.R1 |
| Platforms | All |

### **host-ip-address** *ipv4-address*

| | |
|---|---|
| Synopsis | Address of the host to trace |
| Context | debug router *string* igmp packet host-ip-address *ipv4-address* |
| Tree | host-ip-address |
| Notes | The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**. |
| Introduced | 22.10.R2 |
| Platforms | All |

### **ingress** *boolean*

| | |
|---|---|
| Synopsis | Enable tracing for received packets |
| Context | debug router *string* igmp packet ingress *boolean* |
| Tree | ingress |
| Default | true |
| Introduced | 22.10.R1 |
| Platforms | All |

### **interface-ip-address** *ipv4-address*

| | |
|---|---|
| Synopsis | Source address of the packet to trace |
| Context | debug router *string* igmp packet interface-ip-address *ipv4-address* |
| Tree | interface-ip-address |
| Notes | The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**. |
| Introduced | 22.10.R2 |
| Platforms | All |

### **interface-name** *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* igmp packet interface-name *interface-name* |
| Tree | interface-name |
| String length | 1 to 32 |

| | |
|---|---|
| Notes | The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**. |
| Introduced | 22.10.R1 |
| Platforms | All |

## **type** *keyword*

| | |
|---|---|
| Synopsis | Packet type to trace |
| Context | debug router *string* igmp packet type *keyword* |
| Tree | type |
| Options | all – All IGMP packets<br>query – IGMP Query packets<br>v1-report – IGMP version 1 Report packets<br>v2-report – IGMP version 2 Report packets<br>v2-leave – IGMP version 2 Leave packets<br>v3-report – IGMP version 3 Report packets |
| Default | all |
| Introduced | 22.10.R1 |
| Platforms | All |

## ip

| | |
|---|---|
| Synopsis | Enter the **ip** context |
| Context | debug router *string* ip |
| Tree | ip |
| Introduced | 23.3.R1 |
| Platforms | All |

## icmp

| | |
|---|---|
| Synopsis | Enter the **icmp** context |
| Context | debug router *string* ip icmp |
| Tree | icmp |
| Introduced | 23.3.R1 |
| Platforms | All |

© 2024 Nokia.

### all-packets

| | |
|---|---|
| Synopsis | Enable the **all-packets** context |
| Context | debug router *string* ip icmp all-packets |
| Tree | all-packets |
| Introduced | 23.3.R1 |
| Platforms | All |

### interface [interface-name] *interface-name*

| | |
|---|---|
| Synopsis | Add a list entry for **interface** |
| Context | debug router *string* ip icmp interface *interface-name* |
| Tree | interface |
| Introduced | 23.3.R1 |
| Platforms | All |

### [interface-name] *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* ip icmp interface *interface-name* |
| Tree | interface |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | All |

### icmp6

| | |
|---|---|
| Synopsis | Enter the **icmp6** context |
| Context | debug router *string* ip icmp6 |
| Tree | icmp6 |
| Introduced | 23.3.R1 |
| Platforms | All |

### all-packets

| | |
|---|---|
| Synopsis | Enable the **all-packets** context |
| Context | debug router *string* ip icmp6 all-packets |
| Tree | all-packets |
| Introduced | 23.3.R1 |
| Platforms | All |

### interface [interface-name] *interface-name*

| | |
|---|---|
| Synopsis | Add a list entry for **interface** |
| Context | debug router *string* ip icmp6 interface *interface-name* |
| Tree | interface |
| Introduced | 23.3.R1 |
| Platforms | All |

### [interface-name] *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* ip icmp6 interface *interface-name* |
| Tree | interface |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | All |

### interface-events

| | |
|---|---|
| Synopsis | Enter the **interface-events** context |
| Context | debug router *string* ip interface-events |
| Tree | interface-events |
| Introduced | 23.3.R1 |
| Platforms | All |

© 2024 Nokia.

### all-events

| | |
|---|---|
| Synopsis | Enable the **all-events** context |
| Context | debug router *string* ip interface-events all-events |
| Tree | all-events |
| Introduced | 23.3.R1 |
| Platforms | All |

### interface [interface-name] *interface-name*

| | |
|---|---|
| Synopsis | Add a list entry for **interface** |
| Context | debug router *string* ip interface-events interface *interface-name* |
| Tree | interface |
| Introduced | 23.3.R1 |
| Platforms | All |

### [interface-name] *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* ip interface-events interface *interface-name* |
| Tree | interface |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | All |

### neighbor

| | |
|---|---|
| Synopsis | Enter the **neighbor** context |
| Context | debug router *string* ip neighbor |
| Tree | neighbor |
| Introduced | 23.3.R1 |
| Platforms | All |

© 2024 Nokia.

### all-events

| | |
|---|---|
| Synopsis | Enable the **all-events** context |
| Context | debug router *string* ip neighbor all-events |
| Tree | all-events |
| Introduced | 23.3.R1 |
| Platforms | All |

### address-family *keyword*

| | |
|---|---|
| Synopsis | Debug the specified address family |
| Context | debug router *string* ip neighbor all-events address-family *keyword* |
| Tree | address-family |
| Options | ipv4, ipv6 |
| Introduced | 23.3.R1 |
| Platforms | All |

### interface [interface-name] *interface-name*

| | |
|---|---|
| Synopsis | Enter the **interface** list instance |
| Context | debug router *string* ip neighbor interface *interface-name* |
| Tree | interface |
| Introduced | 23.3.R1 |
| Platforms | All |

### [interface-name] *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* ip neighbor interface *interface-name* |
| Tree | interface |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **address-family** *keyword*

| | |
|---|---|
| Synopsis | Debug the specified address family |
| Context | debug router *string* ip neighbor interface *interface-name* address-family *keyword* |
| Tree | address-family |
| Options | ipv4, ipv6 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **packet**

| | |
|---|---|
| Synopsis | Enter the **packet** context |
| Context | debug router *string* ip packet |
| Tree | packet |
| Introduced | 23.3.R1 |
| Platforms | All |

### **all-packets**

| | |
|---|---|
| Synopsis | Enable the **all-packets** context |
| Context | debug router *string* ip packet all-packets |
| Tree | all-packets |
| Introduced | 23.3.R1 |
| Platforms | All |

### **address-family** *keyword*

| | |
|---|---|
| Synopsis | Debug the specified address family |
| Context | debug router *string* ip packet all-packets address-family *keyword* |
| Tree | address-family |
| Options | ipv4, ipv6 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **headers** *boolean*

| | |
|---|---|
| Synopsis | Display information associated with packet header only |
| Context | debug router *string* ip packet all-packets headers *boolean* |
| Tree | headers |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | All |

### **protocol-id** *number*

| | |
|---|---|
| Synopsis | IP protocol ID to trace |
| Context | debug router *string* ip packet all-packets protocol-id *number* |
| Tree | protocol-id |
| Range | 0 to 255 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **interface** [interface-name] *interface-name*

| | |
|---|---|
| Synopsis | Enter the **interface** list instance |
| Context | debug router *string* ip packet interface *interface-name* |
| Tree | interface |
| Introduced | 23.3.R1 |
| Platforms | All |

### [**interface-name**] *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* ip packet interface *interface-name* |
| Tree | interface |
| String length | 1 to 32 |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **address-family** *keyword*

| | |
|---|---|
| Synopsis | Debug the specified address family |
| Context | debug router *string* ip packet interface *interface-name* address-family *keyword* |
| Tree | address-family |
| Options | ipv4, ipv6 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **headers** *boolean*

| | |
|---|---|
| Synopsis | Display information associated with packet header only |
| Context | debug router *string* ip packet interface *interface-name* headers *boolean* |
| Tree | headers |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | All |

### **protocol-id** *number*

| | |
|---|---|
| Synopsis | IP protocol ID to trace |
| Context | debug router *string* ip packet interface *interface-name* protocol-id *number* |
| Tree | protocol-id |
| Range | 0 to 255 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **route-table**

| | |
|---|---|
| Synopsis | Enable the **route-table** context |
| Context | debug router *string* ip route-table |
| Tree | route-table |
| Introduced | 23.3.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### all

| | |
|---|---|
| Synopsis | Allow trace for all route updates |
| Context | debug router *string* ip route-table all |
| Tree | all |
| Notes | The following elements are part of a mandatory choice: **all** or **filter**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### filter

| | |
|---|---|
| Synopsis | Enter the **filter** context |
| Context | debug router *string* ip route-table filter |
| Tree | filter |
| Notes | The following elements are part of a mandatory choice: **all** or **filter**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### ipv4

| | |
|---|---|
| Synopsis | Enter the **ipv4** context |
| Context | debug router *string* ip route-table filter ipv4 |
| Tree | ipv4 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **prefix** [prefix] *ipv4-prefix*

| | |
|---|---|
| Synopsis | Enter the **prefix** list instance |
| Context | debug router *string* ip route-table filter ipv4 prefix *ipv4-prefix* |
| Tree | prefix |
| Max. instances | 1 |
| Introduced | 23.3.R1 |
| Platforms | All |

### [**prefix**] *ipv4-prefix*

| | |
|---|---|
| Synopsis | IPv4 prefix |
| Context | debug router *string* ip route-table filter ipv4 prefix *ipv4-prefix* |
| Tree | prefix |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **longest-prefix-match** *boolean*

| | |
|---|---|
| Synopsis | Allow match for greatest prefix values |
| Context | debug router *string* ip route-table filter ipv4 prefix *ipv4-prefix* longest-prefix-match *boolean* |
| Tree | longest-prefix-match |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | All |

### **ipv6**

| | |
|---|---|
| Synopsis | Enter the **ipv6** context |
| Context | debug router *string* ip route-table filter ipv6 |
| Tree | ipv6 |
| Introduced | 23.3.R1 |
| Platforms | All |

### **prefix** [prefix] *ipv6-prefix*

| | |
|---|---|
| Synopsis | Enter the **prefix** list instance |
| Context | debug router *string* ip route-table filter ipv6 prefix *ipv6-prefix* |
| Tree | prefix |
| Max. instances | 1 |
| Introduced | 23.3.R1 |

© 2024 Nokia.

| | |
|---|---|
| Platforms | All |

### [**prefix**] *ipv6-prefix*

| | |
|---|---|
| Synopsis | IPv6 prefix |
| Context | debug router *string* ip route-table filter ipv6 prefix *ipv6-prefix* |
| Tree | prefix |
| Notes | This element is part of a list key. |
| Introduced | 23.3.R1 |
| Platforms | All |

### **longest-prefix-match** *boolean*

| | |
|---|---|
| Synopsis | Allow match for greatest prefix values |
| Context | debug router *string* ip route-table filter ipv6 prefix *ipv6-prefix* longest-prefix-match *boolean* |
| Tree | longest-prefix-match |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | All |

### **tunnel-table**

| | |
|---|---|
| Synopsis | Enable the **tunnel-table** context |
| Context | debug router *string* ip tunnel-table |
| Tree | tunnel-table |
| Introduced | 23.3.R1 |
| Platforms | All |

### **all**

| | |
|---|---|
| Synopsis | Allow trace for all tunnel updates |
| Context | debug router *string* ip tunnel-table all |
| Tree | all |
| Notes | The following elements are part of a mandatory choice: **all** or **filter**. |

Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Introduced | 23.3.R1 |
| Platforms | All |

### filter

| | |
|---|---|
| Synopsis | Enter the **filter** context |
| Context | debug router *string* ip tunnel-table filter |
| Tree | filter |
| Notes | The following elements are part of a mandatory choice: **all** or **filter**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### id

| | |
|---|---|
| Synopsis | Enter the **id** context |
| Context | debug router *string* ip tunnel-table filter id |
| Tree | id |
| Introduced | 23.3.R1 |
| Platforms | All |

### sdp-id *number*

| | |
|---|---|
| Synopsis | SDP ID for tracing |
| Context | debug router *string* ip tunnel-table filter id sdp-id *number* |
| Tree | sdp-id |
| Range | 1 to 32767 |
| Notes | The following elements are part of a choice: **sdp-id** or **tunnel-id**. |
| Introduced | 23.3.R1 |
| Platforms | All |

### tunnel-id *number*

| | |
|---|---|
| Synopsis | Tunnel ID for tracing |
| Context | debug router *string* ip tunnel-table filter id tunnel-id *number* |
| Tree | tunnel-id |

### l2tp

| | |
|---|---|
| Synopsis | Enter the **l2tp** context |
| Context | debug router *string* l2tp |
| Tree | l2tp |
| Introduced | 23.7.R1 |
| Platforms | All |

### **assignment-id** [assignment-id] *string*

| | |
|---|---|
| Synopsis | Enter the **assignment-id** list instance |
| Context | debug router *string* l2tp assignment-id *string* |
| Tree | assignment-id |
| Max. instances | 8 |
| Introduced | 23.7.R1 |
| Platforms | All |

### [**assignment-id**] *string*

| | |
|---|---|
| Synopsis | Assignment ID of the L2TP tunnel to debug |
| Context | debug router *string* l2tp assignment-id *string* |
| Tree | assignment-id |
| String length | 1 to 63 |
| Notes | This element is part of a list key. |
| Introduced | 23.7.R1 |
| Platforms | All |

### events

| | |
|---|---|
| Synopsis | Enable the **events** context |
| Context | debug router *string* l2tp assignment-id *string* events |
| Tree | events |
| Introduced | 23.7.R1 |
| Platforms | All |

© 2024 Nokia.

### all

| | |
|---|---|
| Synopsis | Enable debugging for all events |
| Context | debug router *string* l2tp assignment-id *string* events all |
| Tree | all |
| Notes | The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**). |
| Introduced | 23.7.R1 |
| Platforms | All |

### call-disconnect-notification *boolean*

| | |
|---|---|
| Synopsis | Enable L2TP CDN event debugging |
| Context | debug router *string* l2tp assignment-id *string* events call-disconnect-notification *boolean* |
| Tree | call-disconnect-notification |
| Default | false |
| Notes | The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**). |
| Introduced | 23.7.R1 |
| Platforms | All |

### finite-state-machine *boolean*

| | |
|---|---|
| Synopsis | Enable L2TP FSM event debugging |
| Context | debug router *string* l2tp assignment-id *string* events finite-state-machine *boolean* |
| Tree | finite-state-machine |
| Default | false |
| Notes | The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**). |
| Introduced | 23.7.R1 |
| Platforms | All |

Platforms All

## **call-disconnect-notification** *boolean*

Synopsis Enable L2TP CDN event debugging

Context debug router *string* l2tp udp-peer *(ipv4-address-no-zone | ipv6-address-no-zone)* udp-port *number* events call-disconnect-notification *boolean*

Tree call-disconnect-notification

Default false

Notes The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**).

Introduced 23.7.R1

Platforms All

## **finite-state-machine** *boolean*

Synopsis Enable L2TP FSM event debugging

Context debug router *string* l2tp udp-peer *(ipv4-address-no-zone | ipv6-address-no-zone)* udp-port *number* events finite-state-machine *boolean*

Tree finite-state-machine

Default false

Notes The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**).

Introduced 23.7.R1

Platforms All

## **lac**

Synopsis Enter the **lac** context

Context debug router *string* l2tp udp-peer *(ipv4-address-no-zone | ipv6-address-no-zone)* udp-port *number* events lac

Tree lac

Notes The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**).

Introduced 23.7.R1

|---|---|
| Platforms | All |

### **state-recovery** *boolean*

| | |
|---|---|
| Synopsis | Enable L2TP LAC state recovery event debugging |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* events lac state-recovery *boolean* |
| Tree | state-recovery |
| Default | false |
| Introduced | 23.7.R1 |
| Platforms | All |

### **state-recovery-failed** *boolean*

| | |
|---|---|
| Synopsis | Enable L2TP LAC state recovery failed event debugging |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* events lac state-recovery-failed *boolean* |
| Tree | state-recovery-failed |
| Default | false |
| Introduced | 23.7.R1 |
| Platforms | All |

### **lns**

| | |
|---|---|
| Synopsis | Enter the **lns** context |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* events lns |
| Tree | lns |
| Notes | The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**). |
| Introduced | 23.7.R1 |
| Platforms | All |

### **ppp**

| | |
|---|---|
| Synopsis | Enable the **ppp** context |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* events lns ppp |
| Tree | ppp |
| Introduced | 23.7.R1 |
| Platforms | All |

### **terminate-only** *boolean*

| | |
|---|---|
| Synopsis | Debug events for ungracefully terminated sessions only |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* events lns ppp terminate-only *boolean* |
| Tree | terminate-only |
| Default | false |
| Introduced | 23.7.R1 |
| Platforms | All |

### **stop-control-connection-notification** *boolean*

| | |
|---|---|
| Synopsis | Enable L2TP StopCCN event debugging |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* events stop-control-connection-notification *boolean* |
| Tree | stop-control-connection-notification |
| Default | false |
| Notes | The following elements are part of a mandatory choice: **all** or (**call-disconnect-notification**, **finite-state-machine**, **lac**, **lns**, and **stop-control-connection-notification**). |
| Introduced | 23.7.R1 |
| Platforms | All |

### **packets**

| | |
|---|---|
| Synopsis | Enable the **packets** context |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* packets |
| Tree | packets |
| Introduced | 23.7.R1 |
| Platforms | All |

### **all**

| | |
|---|---|
| Synopsis | Enable debugging for all session packets |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* packets all |
| Tree | all |
| Notes | The following elements are part of a mandatory choice: **all** or (**l2tp** and **lns**). |
| Introduced | 23.7.R1 |
| Platforms | All |

### **detail-level** *keyword*

| | |
|---|---|
| Synopsis | Detail level of the L2TP packet debug output |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* packets detail-level *keyword* |
| Tree | detail-level |
| Options | low, high |
| Default | low |
| Introduced | 23.7.R1 |
| Platforms | All |

### **direction** *keyword*

| | |
|---|---|
| Synopsis | Direction of the L2TP packet debugging |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* packets direction *keyword* |
| Tree | direction |
| Options | ingress, egress, both |
| Default | both |
| Introduced | 23.7.R1 |
| Platforms | All |

### **l2tp** *boolean*

| | |
|---|---|
| Synopsis | Enable L2TP packet debugging |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* packets l2tp *boolean* |
| Tree | l2tp |
| Default | false |
| Notes | The following elements are part of a mandatory choice: **all** or (**l2tp** and **lns**). |
| Introduced | 23.7.R1 |
| Platforms | All |

## lns

| | |
|---|---|
| Synopsis | Enter the **lns** context |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* packets lns |
| Tree | lns |
| Notes | The following elements are part of a mandatory choice: **all** or (**l2tp** and **lns**). |
| Introduced | 23.7.R1 |
| Platforms | All |

## dhcp-client *boolean*

| | |
|---|---|
| Synopsis | Enable DHCP client packet debugging |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* packets lns dhcp-client *boolean* |
| Tree | dhcp-client |
| Default | false |
| Introduced | 23.7.R1 |
| Platforms | All |

## ppp

| | |
|---|---|
| Synopsis | Enter the **ppp** context |
| Context | debug router *string* l2tp udp-peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* udp-port *number* packets lns ppp |
| Tree | ppp |
| Introduced | 23.7.R1 |
| Platforms | All |

### **detail** *boolean*

| | |
|---|---|
| Synopsis | Display detailed information |
| Context | debug router *string* ldp peer *(ipv4-address-no-zone \| ipv6-address-no-zone)* packet label detail *boolean* |
| Tree | detail |
| Default | false |
| Introduced | 23.3.R1 |
| Platforms | All |

### **mld**

| | |
|---|---|
| Synopsis | Enter the **mld** context |
| Context | debug router *string* mld |
| Tree | mld |
| Introduced | 22.10.R1 |
| Platforms | All |

### **group-interface**

| | |
|---|---|
| Synopsis | Enable the **group-interface** context |
| Context | debug router *string* mld group-interface |
| Tree | group-interface |
| Introduced | 22.10.R1 |
| Platforms | All |

### **all-group-interfaces**

| | |
|---|---|
| Synopsis | Trace all interfaces |
| Context | debug router *string* mld group-interface all-group-interfaces |
| Tree | all-group-interfaces |
| Notes | The following elements are part of a mandatory choice: **all-group-interfaces** or (**forwarding-service** and **group-interface-name**). |
| Introduced | 22.10.R1 |
| Platforms | All |

### **forwarding-service** *service-name*

| | |
|---|---|
| Synopsis | ID of the forwarding service to trace |
| Context | debug router *string* mld group-interface forwarding-service *service-name* |
| Tree | forwarding-service |
| String length | 1 to 64 |
| Default | ../../router-instance |
| Notes | The following elements are part of a mandatory choice: **all-group-interfaces** or (**forwarding-service** and **group-interface-name**). |
| Introduced | 22.10.R1 |
| Platforms | All |

### **group-interface-name** *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* mld group-interface group-interface-name *interface-name* |
| Tree | group-interface-name |
| String length | 1 to 32 |
| Notes | The following elements are part of a mandatory choice: **all-group-interfaces** or (**forwarding-service** and **group-interface-name**). |
| Introduced | 22.10.R1 |
| Platforms | All |

### **host**

| | |
|---|---|
| Synopsis | Enable the **host** context |
| Context | debug router *string* mld host |
| Tree | host |
| Introduced | 22.10.R1 |
| Platforms | All |

### **group-interface**

| | |
|---|---|
| Synopsis | Enter the **group-interface** context |
| Context | debug router *string* mld host group-interface |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | group-interface |
| Introduced | 22.10.R1 |
| Platforms | All |

### **forwarding-service** *service-name*

| | |
|---|---|
| Synopsis | ID of the forwarding service to trace |
| Context | debug router *string* mld host group-interface forwarding-service *service-name* |
| Tree | forwarding-service |
| String length | 1 to 64 |
| Default | ../../router-instance |
| Introduced | 22.10.R1 |
| Platforms | All |

### **group-interface-name** *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* mld host group-interface group-interface-name *interface-name* |
| Tree | group-interface-name |
| String length | 1 to 32 |
| Introduced | 22.10.R1 |
| Platforms | All |

### **ip-address** *ipv6-address*

| | |
|---|---|
| Synopsis | IP address of the host to trace |
| Context | debug router *string* mld host ip-address *ipv6-address* |
| Tree | ip-address |
| Introduced | 22.10.R1 |
| Platforms | All |

### **interface**

| | |
|---|---|
| Synopsis | Enable the **interface** context |
| Context | debug router *string* mld interface |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | interface |
| Introduced | 22.10.R1 |
| Platforms | All |

### all-interfaces

| | |
|---|---|
| Synopsis | Trace all interfaces |
| Context | debug router *string* mld interface all-interfaces |
| Tree | all-interfaces |
| Notes | The following elements are part of a mandatory choice: **all-interfaces** or **interface-name**. |
| Introduced | 22.10.R1 |
| Platforms | All |

### interface-name *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* mld interface interface-name *interface-name* |
| Tree | interface-name |
| String length | 1 to 32 |
| Notes | The following elements are part of a mandatory choice: **all-interfaces** or **interface-name**. |
| Introduced | 22.10.R1 |
| Platforms | All |

### mcs

| | |
|---|---|
| Synopsis | Enable the **mcs** context |
| Context | debug router *string* mld mcs |
| Tree | mcs |
| Introduced | 22.10.R1 |
| Platforms | All |

### all-interfaces

| | |
|---|---|
| Synopsis | Trace all interfaces |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | debug router *string* mld mcs all-interfaces |
| Tree | all-interfaces |
| Notes | The following elements are part of a mandatory choice: **all-interfaces** or **interface-name**. |
| Introduced | 22.10.R1 |
| Platforms | All |

### **interface-name** *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* mld mcs interface-name *interface-name* |
| Tree | interface-name |
| String length | 1 to 32 |
| Notes | The following elements are part of a mandatory choice: **all-interfaces** or **interface-name**. |
| Introduced | 22.10.R1 |
| Platforms | All |

### **miscellaneous** *boolean*

| | |
|---|---|
| Synopsis | Enable the tracing of miscellaneous events |
| Context | debug router *string* mld miscellaneous *boolean* |
| Tree | miscellaneous |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | All |

### **packet**

| | |
|---|---|
| Synopsis | Enable the **packet** context |
| Context | debug router *string* mld packet |
| Tree | packet |
| Introduced | 22.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### all-origins

| | |
|---|---|
| Synopsis | Allow trace for all origins |
| Context | debug router *string* mld packet all-origins |
| Tree | all-origins |
| Notes | The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**. |
| Introduced | 22.10.R1 |
| Platforms | All |

### dropped *boolean*

| | |
|---|---|
| Synopsis | Enable tracing for dropped packets |
| Context | debug router *string* mld packet dropped *boolean* |
| Tree | dropped |
| Default | true |
| Introduced | 22.10.R1 |
| Platforms | All |

### egress *boolean*

| | |
|---|---|
| Synopsis | Enable tracing for transmitted packets |
| Context | debug router *string* mld packet egress *boolean* |
| Tree | egress |
| Default | true |
| Introduced | 22.10.R1 |
| Platforms | All |

### group-interface-name *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* mld packet group-interface-name *interface-name* |
| Tree | group-interface-name |
| String length | 1 to 32 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Notes | The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**. |
| Introduced | 22.10.R1 |
| Platforms | All |

### **host-ip-address** *ipv6-address*

| | |
|---|---|
| Synopsis | Address of the host to trace |
| Context | debug router *string* mld packet host-ip-address *ipv6-address* |
| Tree | host-ip-address |
| Notes | The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**. |
| Introduced | 22.10.R2 |
| Platforms | All |

### **ingress** *boolean*

| | |
|---|---|
| Synopsis | Enable tracing for received packets |
| Context | debug router *string* mld packet ingress *boolean* |
| Tree | ingress |
| Default | true |
| Introduced | 22.10.R1 |
| Platforms | All |

### **interface-ip-address** *ipv6-address*

| | |
|---|---|
| Synopsis | Source address of the packet to trace |
| Context | debug router *string* mld packet interface-ip-address *ipv6-address* |
| Tree | interface-ip-address |
| Notes | The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**. |
| Introduced | 22.10.R2 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **interface-name** *interface-name*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* mld packet interface-name *interface-name* |
| Tree | interface-name |
| String length | 1 to 32 |
| Notes | The following elements are part of a choice: **all-origins**, **group-interface-name**, **host-ip-address**, **interface-ip-address**, or **interface-name**. |
| Introduced | 22.10.R1 |
| Platforms | All |

### **type** *keyword*

| | |
|---|---|
| Synopsis | Packet type |
| Context | debug router *string* mld packet type *keyword* |
| Tree | type |
| Options | all – All MLD packets<br>query – MLD Query packets<br>v1-report – MLD version 1 Report packets<br>v2-report – MLD version 2 Report packets |
| Default | all |
| Introduced | 22.10.R1 |
| Platforms | All |

### **msdp**

| | |
|---|---|
| Synopsis | Enter the **msdp** context |
| Context | debug router *string* msdp |
| Tree | msdp |
| Description | Commands in this context configure debugging for the Multicast Source Discovery Protocol (MSDP). |
| Introduced | 22.10.R1 |
| Platforms | All |

© 2024 Nokia.

## packet

| | |
|---|---|
| Synopsis | Enable the **packet** context |
| Context | debug router *string* msdp packet |
| Tree | packet |
| Introduced | 22.10.R1 |
| Platforms | All |

## all-packet-types

| | |
|---|---|
| Synopsis | Enable MSDP debugging for all packets |
| Context | debug router *string* msdp packet all-packet-types |
| Tree | all-packet-types |
| Notes | The following elements are part of a choice: **all-packet-types** or **packet-types**. |
| Introduced | 22.10.R1 |
| Platforms | All |

## packet-types

| | |
|---|---|
| Synopsis | Enter the **packet-types** context |
| Context | debug router *string* msdp packet packet-types |
| Tree | packet-types |
| Notes | The following elements are part of a choice: **all-packet-types** or **packet-types**. |
| Introduced | 22.10.R1 |
| Platforms | All |

## keep-alive

| | |
|---|---|
| Synopsis | Enable the **keep-alive** context |
| Context | debug router *string* msdp packet packet-types keep-alive |
| Tree | keep-alive |
| Introduced | 22.10.R1 |
| Platforms | All |

© 2024 Nokia.

### **peer-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Peer address used to trace packets |
| Context | debug router *string* msdp packet packet-types keep-alive peer-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | peer-address |
| Introduced | 22.10.R1 |
| Platforms | All |

### **sa-request**

| | |
|---|---|
| Synopsis | Enable the **sa-request** context |
| Context | debug router *string* msdp packet packet-types sa-request |
| Tree | sa-request |
| Introduced | 22.10.R1 |
| Platforms | All |

### **peer-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Peer address used to trace packets |
| Context | debug router *string* msdp packet packet-types sa-request peer-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | peer-address |
| Introduced | 22.10.R1 |
| Platforms | All |

### **sa-response**

| | |
|---|---|
| Synopsis | Enable the **sa-response** context |
| Context | debug router *string* msdp packet packet-types sa-response |
| Tree | sa-response |
| Introduced | 22.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **peer-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Peer address used to trace packets |
| Context | debug router *string* msdp packet packet-types sa-response peer-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | peer-address |
| Introduced | 22.10.R1 |
| Platforms | All |

### **source-active**

| | |
|---|---|
| Synopsis | Enable the **source-active** context |
| Context | debug router *string* msdp packet packet-types source-active |
| Tree | source-active |
| Introduced | 22.10.R1 |
| Platforms | All |

### **peer-address** *(ipv4-address-no-zone | ipv6-address-no-zone)*

| | |
|---|---|
| Synopsis | Peer address used to trace packets |
| Context | debug router *string* msdp packet packet-types source-active peer-address *(ipv4-address-no-zone \| ipv6-address-no-zone)* |
| Tree | peer-address |
| Introduced | 22.10.R1 |
| Platforms | All |

### **pim**

| | |
|---|---|
| Synopsis | Enable the **pim** context |
| Context | debug router *string* msdp pim |
| Tree | pim |
| Description | Commands in this context enable MSDP PIM debugging. |
| Introduced | 22.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **group-address** *ipv4-multicast-address*

| | |
|---|---|
| Synopsis | IP multicast group address used to trace events |
| Context | debug router *string* msdp pim group-address *ipv4-multicast-address* |
| Tree | group-address |
| Introduced | 22.10.R1 |
| Platforms | All |

### **rtm**

| | |
|---|---|
| Synopsis | Enable the **rtm** context |
| Context | debug router *string* msdp rtm |
| Tree | rtm |
| Description | Commands in this context enable MSDP route table manager (RTM) debugging. |
| Introduced | 22.10.R1 |
| Platforms | All |

### **rp-address** *ipv4-address*

| | |
|---|---|
| Synopsis | IP multicast RP address used to trace events |
| Context | debug router *string* msdp rtm rp-address *ipv4-address* |
| Tree | rp-address |
| Introduced | 22.10.R1 |
| Platforms | All |

### **sa-db**

| | |
|---|---|
| Synopsis | Enable the **sa-db** context |
| Context | debug router *string* msdp sa-db |
| Tree | sa-db |
| Description | Commands in this context enable MSDP source-active database debugging. |
| Introduced | 22.10.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **group-address** *ipv4-multicast-address*

| | |
|---|---|
| Synopsis | IP multicast group address used to trace events |
| Context | debug router *string* msdp sa-db group-address *ipv4-multicast-address* |
| Tree | group-address |
| Introduced | 22.10.R1 |
| Platforms | All |

### **rp-address** *ipv4-address*

| | |
|---|---|
| Synopsis | IP multicast RP address used to trace events |
| Context | debug router *string* msdp sa-db rp-address *ipv4-address* |
| Tree | rp-address |
| Introduced | 22.10.R1 |
| Platforms | All |

### **source-address** *ipv4-address*

| | |
|---|---|
| Synopsis | Source address used to trace events |
| Context | debug router *string* msdp sa-db source-address *ipv4-address* |
| Tree | source-address |
| Introduced | 22.10.R1 |
| Platforms | All |

### **mtrace**

| | |
|---|---|
| Synopsis | Enter the **mtrace** context |
| Context | debug router *string* mtrace |
| Tree | mtrace |
| Introduced | 22.10.R1 |
| Platforms | All |

### **miscellaneous**

| | |
|---|---|
| Synopsis | Enable the **miscellaneous** context |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Context | debug router *string* mtrace miscellaneous |
| Tree | miscellaneous |
| Introduced | 22.10.R1 |
| Platforms | All |

## packet

| | |
|---|---|
| Synopsis | Enable the **packet** context |
| Context | debug router *string* mtrace packet |
| Tree | packet |
| Introduced | 22.10.R1 |
| Platforms | All |

## all-packet-types

| | |
|---|---|
| Synopsis | Enable debugging for all packets |
| Context | debug router *string* mtrace packet all-packet-types |
| Tree | all-packet-types |
| Notes | The following elements are part of a choice: **all-packet-types** or **packet-types**. |
| Introduced | 22.10.R1 |
| Platforms | All |

## packet-types

| | |
|---|---|
| Synopsis | Enter the **packet-types** context |
| Context | debug router *string* mtrace packet packet-types |
| Tree | packet-types |
| Notes | The following elements are part of a choice: **all-packet-types** or **packet-types**. |
| Introduced | 22.10.R1 |
| Platforms | All |

## query *boolean*

| | |
|---|---|
| Synopsis | Debug query packets |
| Context | debug router *string* mtrace packet packet-types query *boolean* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | query |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | All |

### **request** *boolean*

| | |
|---|---|
| Synopsis | Debug request packets |
| Context | debug router *string* mtrace packet packet-types request *boolean* |
| Tree | request |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | All |

### **response** *boolean*

| | |
|---|---|
| Synopsis | Debug response packets |
| Context | debug router *string* mtrace packet packet-types response *boolean* |
| Tree | response |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | All |

### **mtrace2**

| | |
|---|---|
| Synopsis | Enter the **mtrace2** context |
| Context | debug router *string* mtrace2 |
| Tree | mtrace2 |
| Introduced | 22.10.R1 |
| Platforms | All |

### **miscellaneous**

| | |
|---|---|
| Synopsis | Enable the **miscellaneous** context |
| Context | debug router *string* mtrace2 miscellaneous |

| | |
|---|---|
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | All |

### **request** *boolean*

| | |
|---|---|
| Synopsis | Debug request packets |
| Context | debug router *string* mtrace2 packet packet-types request *boolean* |
| Tree | request |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | All |

### **response** *boolean*

| | |
|---|---|
| Synopsis | Debug response packets |
| Context | debug router *string* mtrace2 packet packet-types response *boolean* |
| Tree | response |
| Default | false |
| Introduced | 22.10.R1 |
| Platforms | All |

### **ospf** [ospf-instance] *number*

| | |
|---|---|
| Synopsis | Enter the **ospf** list instance |
| Context | debug router *string* ospf *number* |
| Tree | ospf |
| Description | Commands in this context configure debugging for OSPF. |
| Introduced | 24.7.R1 |
| Platforms | All |

### [**ospf-instance**] *number*

| | |
|---|---|
| Synopsis | OSPF ID |
| Context | debug router *string* ospf *number* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | ospf |
| Max. range | 0 to 4294967295 |
| Notes | This element is part of a list key. |
| Introduced | 24.7.R1 |
| Platforms | All |

## area

| | |
|---|---|
| Synopsis | Enable the **area** context |
| Context | debug router *string* ospf *number* area |
| Tree | area |
| Description | Commands in this context configure debugging for an OSPF area. |
| Introduced | 24.7.R1 |
| Platforms | All |

## all

| | |
|---|---|
| Synopsis | Debug all OSPF areas |
| Context | debug router *string* ospf *number* area all |
| Tree | all |
| Notes | The following elements are part of a choice: **all** or **area-id**. |
| Introduced | 24.7.R1 |
| Platforms | All |

## area-id *ipv4-address*

| | |
|---|---|
| Synopsis | OSPF area ID |
| Context | debug router *string* ospf *number* area area-id *ipv4-address* |
| Tree | area-id |
| Notes | The following elements are part of a choice: **all** or **area-id**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### area-range

| | |
|---|---|
| Synopsis | Enable the **area-range** context |
| Context | debug router *string* ospf *number* area-range |
| Tree | area-range |
| Description | Commands in this context configure debugging for an OSPF area range. |
| Introduced | 24.7.R1 |
| Platforms | All |

### all

| | |
|---|---|
| Synopsis | Debug all OSPF area ranges |
| Context | debug router *string* ospf *number* area-range all |
| Tree | all |
| Notes | The following elements are part of a choice: **all** or **range-address**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### range-address *ipv4-address*

| | |
|---|---|
| Synopsis | OSPF area range address |
| Context | debug router *string* ospf *number* area-range range-address *ipv4-address* |
| Tree | range-address |
| Notes | The following elements are part of a choice: **all** or **range-address**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### cspf

| | |
|---|---|
| Synopsis | Enable the **cspf** context |
| Context | debug router *string* ospf *number* cspf |
| Tree | cspf |
| Description | Commands in this context configure debugging for an OSPF constraint-based SPF (CSPF). |
| Introduced | 24.7.R1 |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Platforms | All |

### all

| | |
|---|---|
| Synopsis | Debug all CSPFs |
| Context | debug router *string* ospf *number* cspf all |
| Tree | all |
| Notes | The following elements are part of a choice: **all** or **cspf-addr**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### cspf-addr *ipv4-address*

| | |
|---|---|
| Synopsis | CSPF destination address |
| Context | debug router *string* ospf *number* cspf cspf-addr *ipv4-address* |
| Tree | cspf-addr |
| Notes | The following elements are part of a choice: **all** or **cspf-addr**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### graceful-restart *boolean*

| | |
|---|---|
| Synopsis | Debug OSPF graceful restart |
| Context | debug router *string* ospf *number* graceful-restart *boolean* |
| Tree | graceful-restart |
| Default | false |
| Introduced | 24.7.R1 |
| Platforms | All |

### interface

| | |
|---|---|
| Synopsis | Enable the **interface** context |
| Context | debug router *string* ospf *number* interface |
| Tree | interface |
| Description | Commands in this context configure debugging for an OSPF interface. |

| | |
|---|---|
| Introduced | 24.7.R1 |
| Platforms | All |

### **interface-ip-address** *ipv4-address*

| | |
|---|---|
| Synopsis | OSPF interface address |
| Context | debug router *string* ospf *number* interface interface-ip-address *ipv4-address* |
| Tree | interface-ip-address |
| Notes | The following elements are part of a choice: **interface-ip-address** or **interface-name**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **interface-name** *string*

| | |
|---|---|
| Synopsis | OSPF interface name |
| Context | debug router *string* ospf *number* interface interface-name *string* |
| Tree | interface-name |
| Notes | The following elements are part of a choice: **interface-ip-address** or **interface-name**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **leak**

| | |
|---|---|
| Synopsis | Enable the **leak** context |
| Context | debug router *string* ospf *number* leak |
| Tree | leak |
| Description | Commands in this context configure debugging for OSPF leaks. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **all**

| | |
|---|---|
| Synopsis | Debug all external route leaks |
| Context | debug router *string* ospf *number* leak all |
| Tree | all |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Notes | The following elements are part of a choice: **all** or **dest-addr**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **dest-addr** *ipv4-address*

| | |
|---|---|
| Synopsis | OSPF destination address |
| Context | debug router *string* ospf *number* leak dest-addr *ipv4-address* |
| Tree | dest-addr |
| Notes | The following elements are part of a choice: **all** or **dest-addr**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **lsdb**

| | |
|---|---|
| Synopsis | Enable the **lsdb** context |
| Context | debug router *string* ospf *number* lsdb |
| Tree | lsdb |
| Description | Commands in this context configure debugging for an OSPF link-state database (LSDB). |
| Introduced | 24.7.R1 |
| Platforms | All |

### **adv-rtr-id** *ipv4-address*

| | |
|---|---|
| Synopsis | LSDB advertising router ID |
| Context | debug router *string* ospf *number* lsdb adv-rtr-id *ipv4-address* |
| Tree | adv-rtr-id |
| Introduced | 24.7.R1 |
| Platforms | All |

### **area** *ipv4-address*

| | |
|---|---|
| Synopsis | LSDB area ID |
| Context | debug router *string* ospf *number* lsdb area *ipv4-address* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | area |
| Introduced | 24.7.R1 |
| Platforms | All |

### **ls-id** *ipv4-address*

| | |
|---|---|
| Synopsis | LSDB LS ID |
| Context | debug router *string* ospf *number* lsdb ls-id *ipv4-address* |
| Tree | ls-id |
| Introduced | 24.7.R1 |
| Platforms | All |

### **ls-type** *keyword*

| | |
|---|---|
| Synopsis | LSDB type |
| Context | debug router *string* ospf *number* lsdb ls-type *keyword* |
| Tree | ls-type |
| Options | router, network, summary, asbr, external, nssa, link-opaque, area-opaque, as-opaque |
| Introduced | 24.7.R1 |
| Platforms | All |

### **misc** *boolean*

| | |
|---|---|
| Synopsis | Debug OSPF miscellaneous events |
| Context | debug router *string* ospf *number* misc *boolean* |
| Tree | misc |
| Default | false |
| Introduced | 24.7.R1 |
| Platforms | All |

### **neighbor**

| | |
|---|---|
| Synopsis | Enable the **neighbor** context |
| Context | debug router *string* ospf *number* neighbor |
| Tree | neighbor |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Description | Commands in this context configure debugging for an OSPF neighbor. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **interface-ip-address** *ipv4-address*

| | |
|---|---|
| Synopsis | OSPF neighbor interface address |
| Context | debug router *string* ospf *number* neighbor interface-ip-address *ipv4-address* |
| Tree | interface-ip-address |
| Notes | The following elements are part of a choice: **interface-ip-address** or **interface-name**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **interface-name** *string*

| | |
|---|---|
| Synopsis | OSPF neighbor interface name |
| Context | debug router *string* ospf *number* neighbor interface-name *string* |
| Tree | interface-name |
| Notes | The following elements are part of a choice: **interface-ip-address** or **interface-name**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **nssa-range**

| | |
|---|---|
| Synopsis | Enable the **nssa-range** context |
| Context | debug router *string* ospf *number* nssa-range |
| Tree | nssa-range |
| Description | Commands in this context configure debugging for a Not-So-Stubby area (NSSA) range. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **all**

| | |
|---|---|
| Synopsis | Debug all OSPF NSSA ranges |
| Context | debug router *string* ospf *number* nssa-range all |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | all |
| Notes | The following elements are part of a choice: **all** or **range-address**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **range-address** *ipv4-address*

| | |
|---|---|
| Synopsis | OSPF NSSA range address |
| Context | debug router *string* ospf *number* nssa-range range-address *ipv4-address* |
| Tree | range-address |
| Notes | The following elements are part of a choice: **all** or **range-address**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **packet**

| | |
|---|---|
| Synopsis | Enable the **packet** context |
| Context | debug router *string* ospf *number* packet |
| Tree | packet |
| Description | Commands in this context configure debugging for OSPF packets. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **detail** *boolean*

| | |
|---|---|
| Synopsis | Display detailed debug information |
| Context | debug router *string* ospf *number* packet detail *boolean* |
| Tree | detail |
| Introduced | 24.7.R1 |
| Platforms | All |

### **direction** *keyword*

| | |
|---|---|
| Synopsis | OSPF packet direction |
| Context | debug router *string* ospf *number* packet direction *keyword* |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | direction |
| Options | both, ingress, egress, dropped |
| Default | both |
| Introduced | 24.7.R1 |
| Platforms | All |

### **interface-name** *string*

| | |
|---|---|
| Synopsis | Interface name |
| Context | debug router *string* ospf *number* packet interface-name *string* |
| Tree | interface-name |
| Introduced | 24.7.R1 |
| Platforms | All |

### **packet-type** *keyword*

| | |
|---|---|
| Synopsis | Packet type |
| Context | debug router *string* ospf *number* packet packet-type *keyword* |
| Tree | packet-type |
| Options | hello, db-description, ls-request, ls-update, ls-ack |
| Introduced | 24.7.R1 |
| Platforms | All |

### **rsvp-shortcut**

| | |
|---|---|
| Synopsis | Enable the **rsvp-shortcut** context |
| Context | debug router *string* ospf *number* rsvp-shortcut |
| Tree | rsvp-shortcut |
| Introduced | 24.7.R1 |
| Platforms | All |

### **all**

| | |
|---|---|
| Synopsis | Debug all RSVP shortcuts |
| Context | debug router *string* ospf *number* rsvp-shortcut all |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

| | |
|---|---|
| Tree | all |
| Notes | The following elements are part of a choice: **all** or **rsvp-ep**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **rsvp-ep** *ipv4-address*

| | |
|---|---|
| Synopsis | RSVP shortcut endpoint |
| Context | debug router *string* ospf *number* rsvp-shortcut rsvp-ep *ipv4-address* |
| Tree | rsvp-ep |
| Notes | The following elements are part of a choice: **all** or **rsvp-ep**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **rtm**

| | |
|---|---|
| Synopsis | Enable the **rtm** context |
| Context | debug router *string* ospf *number* rtm |
| Tree | rtm |
| Description | Commands in this context configure debugging for the OSPF Routing Table Manager (RTM). |
| Introduced | 24.7.R1 |
| Platforms | All |

### **all**

| | |
|---|---|
| Synopsis | Debug the RTM for all destinations |
| Context | debug router *string* ospf *number* rtm all |
| Tree | all |
| Notes | The following elements are part of a choice: **all** or **dest-addr**. |
| Introduced | 24.7.R1 |
| Platforms | All |

© 2024 Nokia.
Use subject to Terms available at: www.nokia.com/terms.

### **dest-addr** *ipv4-address*

| | |
|---|---|
| Synopsis | RTM destination address |
| Context | debug router *string* ospf *number* rtm dest-addr *ipv4-address* |
| Tree | dest-addr |
| Notes | The following elements are part of a choice: **all** or **dest-addr**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **sham-neighbor**

| | |
|---|---|
| Synopsis | Enable the **sham-neighbor** context |
| Context | debug router *string* ospf *number* sham-neighbor |
| Tree | sham-neighbor |
| Introduced | 24.7.R1 |
| Platforms | All |

### **all**

| | |
|---|---|
| Synopsis | Debug the shamlink neighbor for all addresses |
| Context | debug router *string* ospf *number* sham-neighbor all |
| Tree | all |
| Notes | The following elements are part of a choice: **all** or **dest-addr**. |
| Introduced | 24.7.R1 |
| Platforms | All |

### **dest-addr** *ipv4-address*

| | |
|---|---|
| Synopsis | Shamlink neighbor address |
| Context | debug router *string* ospf *number* sham-neighbor dest-addr *ipv4-address* |
| Tree | dest-addr |
| Notes | The following elements are part of a choice: **all** or **dest-addr**. |
| Introduced | 24.7.R1 |
| Platforms | All |

## spf

| | |
|---|---|
| Synopsis | Enable the **spf** context |
| Context | debug router *string* ospf *number* spf |
| Tree | spf |
| Description | Commands in this context configure debugging for OSPF SPF. Debug information about overall SPF start and stop times are shown. To view detailed information about calculating the SPF of a specific route, the route must be specified as an optional argument. |
| Introduced | 24.7.R1 |
| Platforms | All |

## all

| | |
|---|---|
| Synopsis | Debug the SPF for any destination address |
| Context | debug router *string* ospf *number* spf all |
| Tree | all |
| Notes | The following elements are part of a choice: **all** or **destination-address**. |
| Introduced | 24.7.R1 |
| Platforms | All |

## destination-address *ipv4-address*

| | |
|---|---|
| Synopsis | OSPF SPF destination address |
| Context | debug router *string* ospf *number* spf destination-address *ipv4-address* |
| Tree | destination-address |
| Notes | The following elements are part of a choice: **all** or **destination-address**. |
| Introduced | 24.7.R1 |
| Platforms | All |

## type *keyword*

| | |
|---|---|
| Synopsis | OSPF SPF type |
| Context | debug router *string* ospf *number* spf type *keyword* |
| Tree | type |
| Options | intra-area, inter-area, external |

© 2024 Nokia.

| | |
|---|---|
| Introduced | 24.7.R1 |
| Platforms | All |

## tunnel-endpoint

| | |
|---|---|
| Synopsis | Enter the **tunnel-endpoint** context |
| Context | debug router *string* ospf *number* tunnel-endpoint |
| Tree | tunnel-endpoint |
| Description | Commands in this context configure debugging for an OSPF tunnel endpoint. |
| Introduced | 24.7.R1 |
| Platforms | All |

## leak

| | |
|---|---|
| Synopsis | Enable the **leak** context |
| Context | debug router *string* ospf *number* tunnel-endpoint leak |
| Tree | leak |
| Description | Commands in this context configure debugging for OSPF tunnel-endpoint leaks. |
| Introduced | 24.7.R1 |
| Platforms | All |

## all

| | |
|---|---|
| Synopsis | Debug OSPF leaked tunnels for all tunnel endpoints |
| Context | debug router *string* ospf *number* tunnel-endpoint leak all |
| Tree | all |
| Notes | The following elements are part of a choice: **all** or **tunnel-endpoint**. |
| Introduced | 24.7.R1 |
| Platforms | All |

## tunnel-endpoint *ipv4-address*

| | |
|---|---|
| Synopsis | OSPF leaked tunnel endpoint |
| Context | debug router *string* ospf *number* tunnel-endpoint leak tunnel-endpoint *ipv4-address* |
| Tree | tunnel-endpoint |

© 2024 Nokia.

| | |
|---|---|
| Notes | The following elements are part of a choice: **all** or **tunnel-endpoint**. |
| Introduced | 24.7.R1 |
| Platforms | All |

## spf

| | |
|---|---|
| Synopsis | Enable the **spf** context |
| Context | debug router *string* ospf *number* tunnel-endpoint spf |
| Tree | spf |
| Introduced | 24.7.R1 |
| Platforms | All |

## all
