Name: IK4901020 (2780) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: CB MODULE DOWNLOAD FAILURE (1333) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to transfer the software package from the local storage to the board.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1326 IK4901022 - RRH MODULE DOWNLOAD FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4901022 (2782) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RRH	Severity: variable Specific problem: RRH MODULE DOWNLOAD FAILURE (1335) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to transfer the software package from the local storage to the board.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1327 IK4901023 - TRDU MODULE DOWNLOAD FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4901023 (2783) Type: equipmentAlarm (3) Package: lte Raised on class: lte.TRDU	Severity: variable Specific problem: TRDU MODULE DOWNLOAD FAILURE (1336) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to transfer the software package from the local storage to the board.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1328 IK4901024 - SOFTWARE AND DATABASE FALLBACK**

Alarm	Attributes	Applicable major releases
Name: IK4901024 (2784) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: SOFTWARE AND DATABASE FALLBACK (1337) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the eNodeB has detected a critical failure during eNodeB initialization while booting from the active software partition. The eNodeB has switched over to the passive software partition and booted up on the previous software version with the previous configuration data.		
<b>Impact:</b> Telecom: Services may not be operating properly until the eNodeB is restored to the proper software version and configuration data. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1329 IK4901025 - SOFTWARE FALLBACK

Alarm	Attributes	Applicable major releases
Name: IK4901025 (2785) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: SOFTWARE FALLBACK (1338) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the eNodeB has detected a critical failure during eNodeB initialization while booting from the active software partition. The eNodeB has switched over to the passive software partition and booted up on the previous software version with the previous configuration data.		
<b>Impact:</b> Telecom: Services may not be operating properly until the eNodeB is restored to the proper software version and configuration data. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1330 IK4901026 - NEW SW DOES NOT SUPPORT ALL ACTUAL HW MODULES

Alarm	Attributes	Applicable major releases
Name: IK4901026 (2786) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: NEW SW DOES NOT SUPPORT ALL ACTUAL HW MODULES (1339) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the new software package does not support all actual hardware modules installed in the eNodeB.		
<b>Impact:</b> Telecom: Modules not supported by the software may not offer telecom services. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1331 IK4901027 - BACK TO FACTORY MODE

Alarm	Attributes	Applicable major releases
Name: IK4901027 (3274) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: BACK TO FACTORY MODE (1340) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that software meta data is deleted or corrupted.		
<b>Impact:</b> Telecom: No telecom service possible. OAM: No impact on OAM service except for remote board contact which is not possible.		
<b>Remedial action:</b> No action is required.		

**Table 26-1332 IK4901028 - BACK TO MINIMUM DB**

Alarm	Attributes	Applicable major releases
Name: IK4901028 (3275) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.CBCardSpecifics	Severity: variable Specific problem: BACK TO MINIMUM DB (1341) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the database contents have been reset to default.		
<b>Impact:</b> Telecom: No telecom service possible. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1333 IK4901029 - BACK TO FACTORY MODE AND MINIMUM DB**

Alarm	Attributes	Applicable major releases
Name: IK4901029 (3276) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.CBCardSpecifics	Severity: variable Specific problem: BACK TO FACTORY MODE AND MINIMUM DB (1342) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that software meta data is deleted or corrupted and that the database contents have been reset to default.		
<b>Impact:</b> Telecom: No telecom service possible. OAM: No impact on OAM service except for remote board contact which is not possible.		
<b>Remedial action:</b> No action is required.		

**Table 26-1334 IK4901030 - BB MODULE DOWNLOAD FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4901030 (3277) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.BBCardSpecifics	Severity: variable Specific problem: BB MODULE DOWNLOAD FAILURE (1334) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to transfer the software package from the local storage to the board.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1335 IK4901031 - RESET CONTROLLER OAM LACK RESOURCE

Alarm	Attributes	Applicable major releases
Name: IK4901031 (3278) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.CBCardSpecifics	Severity: variable Specific problem: RESET CONTROLLER OAM LACK RESOURCE (1319) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the controller board is reset due to lack of internal resources.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1336 IK4901032 - RESET CONTROLLER WATCHDOG

Alarm	Attributes	Applicable major releases
Name: IK4901032 (3279) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.CBCardSpecifics	Severity: variable Specific problem: RESET CONTROLLER WATCHDOG (1320) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the controller is reset due to hardware watchdog timeout.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1337 IK4901033 - CONTROLLER OAM AUTO RESET

Alarm	Attributes	Applicable major releases
Name: IK4901033 (3280) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.CBCardSpecifics	Severity: variable Specific problem: CONTROLLER OAM AUTO RESET (1321) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the controller is auto-reset due to an internal problem.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1338 IK4901034 - OAM AUTO RESET**

Alarm	Attributes	Applicable major releases
Name: IK4901034 (3281) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: OAM AUTO RESET (1322) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates an OAM auto-reset due to an internal problem.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1339 IK4901035 - UNEXPECTED CONTROL BOARD RESET**

Alarm	Attributes	Applicable major releases
Name: IK4901035 (3854) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: UNEXPECTED CONTROL BOARD RESET (1343) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the control board suffered from an unexpected, unplanned reset. Specific details are in the Additional Text.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during the reset. On a successful reset, all resources are again functional. OAM: The OAM functionality is not available during the reset. On successful reset, the OAM functionality is again available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1340 IK4901036 - AUTO-REJECT TO PREVIOUS SW VERSION AFTER ACTIVATE**

Alarm	Attributes	Applicable major releases
Name: IK4901036 (4121) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: AUTO-REJECT TO PREVIOUS SW VERSION AFTER ACTIVATE (1329) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that a reset was performed due to the activation of the previous software version caused by a corrupt file.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1341 IK4901037 - BACK TO FACTORY MODE

Alarm	Attributes	Applicable major releases
Name: IK4901037 (4122) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: BACK TO FACTORY MODE (1340) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that software meta data is deleted or corrupted.		
<b>Impact:</b> Telecom: No telecom service possible. OAM: No impact on OAM service except for remote board contact which is not possible.		
<b>Remedial action:</b> No action is required.		

Table 26-1342 IK4901038 - BACK TO MINIMUM DB

Alarm	Attributes	Applicable major releases
Name: IK4901038 (4123) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: BACK TO MINIMUM DB (1341) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the database contents have been reset to default.		
<b>Impact:</b> Telecom: No telecom service possible. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1343 IK4901039 - BACK TO FACTORY MODE AND MINIMUM DB

Alarm	Attributes	Applicable major releases
Name: IK4901039 (4124) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: BACK TO FACTORY MODE AND MINIMUM DB (1342) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that software meta data is deleted or corrupted and that the database contents have been reset to default.		
<b>Impact:</b> Telecom: No telecom service possible. OAM: No impact on OAM service except for remote board contact which is not possible.		
<b>Remedial action:</b> No action is required.		

**Table 26-1344 IK4901040 - SCB DOWNLOAD FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4901040 (4125) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: SCB DOWNLOAD FAILURE (1344) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure of the FTP transfer of the software package from the code-server to the local RAM disk.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1345 IK4901041 - SCB MODULE DOWNLOAD FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4901041 (4126) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: SCB MODULE DOWNLOAD FAILURE (1345) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to transfer the software package from the local storage to the board.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1346 IK4901042 - CONTROLLER OAM AUTO RESET**

Alarm	Attributes	Applicable major releases
Name: IK4901042 (4127) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: CONTROLLER OAM AUTO RESET (1321) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the controller is auto-reset due to an internal problem.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1347 IK4901043 - CORRUPT FILE

Alarm	Attributes	Applicable major releases
Name: IK4901043 (4128) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: CORRUPT FILE (1318) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates a checksum error.		
<b>Impact:</b> Software replacement failure.		
<b>Remedial action:</b> No action is required.		

Table 26-1348 IK4901044 - NEW SW DOES NOT SUPPORT ALL ACTUAL HW MODULES

Alarm	Attributes	Applicable major releases
Name: IK4901044 (4129) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: NEW SW DOES NOT SUPPORT ALL ACTUAL HW MODULES (1339) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the new software package does not support all actual hardware modules installed in the eNodeB.		
<b>Impact:</b> Telecom: Modules not supported by the software may not offer telecom services. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1349 IK4901045 - OAM AUTO RESET

Alarm	Attributes	Applicable major releases
Name: IK4901045 (4130) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: OAM AUTO RESET (1322) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates an OAM auto-reset due to an internal problem.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1350 IK4901046 - POWER ON**

Alarm	Attributes	Applicable major releases
Name: IK4901046 (4131) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: POWER ON (1317) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the system is powered on successfully.		
<b>Impact:</b> All resources are available on successful power on of the system.		
<b>Remedial action:</b> No action is required.		

**Table 26-1351 IK4901047 - RESET AFTER ACTIVATE WITH DB MIGRATION**

Alarm	Attributes	Applicable major releases
Name: IK4901047 (4132) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: RESET AFTER ACTIVATE WITH DB MIGRATION (1324) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the software activation and the successful data migration.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1352 IK4901048 - RESET AFTER ACTIVATE WITHOUT DB MIGRATION**

Alarm	Attributes	Applicable major releases
Name: IK4901048 (4133) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: RESET AFTER ACTIVATE WITHOUT DB MIGRATION (1325) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the software activation without a data migration.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1353 IK4901049 - RESET AFTER ACTIVATE WITH EMPTY DATABASE

Alarm	Attributes	Applicable major releases
Name: IK4901049 (4134) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: RESET AFTER ACTIVATE WITH EMPTY DATABASE (1326) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the software activation. The database is not found.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1354 IK4901050 - RESET AFTER REJECT

Alarm	Attributes	Applicable major releases
Name: IK4901050 (4135) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: RESET AFTER REJECT (1327) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the software is rejected. The module is reset to activate the previous software version.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1355 IK4901051 - RESET AFTER REJECT WITH EMPTY DATABASE

Alarm	Attributes	Applicable major releases
Name: IK4901051 (4136) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: RESET AFTER REJECT WITH EMPTY DATABASE (1328) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the software is rejected. The module is reset to activate the previous software version. The database is not found.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1356 IK4901052 - RESET CONTROLLER OAM LACK RESOURCE**

Alarm	Attributes	Applicable major releases
Name: IK4901052 (4137) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: RESET CONTROLLER OAM LACK RESOURCE (1319) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the controller board is reset due to lack of internal resources.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1357 IK4901053 - RESET CONTROLLER WATCHDOG**

Alarm	Attributes	Applicable major releases
Name: IK4901053 (4138) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: RESET CONTROLLER WATCHDOG (1320) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the controller is reset due to hardware watchdog timeout.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1358 IK4901054 - RESET OAM EXCEPTION**

Alarm	Attributes	Applicable major releases
Name: IK4901054 (4139) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: RESET OAM EXCEPTION (1323) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the controller is reset due to an processor exception.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1359 IK4901055 - SOFTWARE AND DATABASE FALLBACK

Alarm	Attributes	Applicable major releases
Name: IK4901055 (4140) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: SOFTWARE AND DATABASE FALLBACK (1337) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the eNodeB has detected a critical failure during eNodeB initialization while booting from the active software partition. The eNodeB has switched over to the passive software partition and booted up on the previous software version with the previous configuration data.		
<b>Impact:</b> Telecom: Services may not be operating properly until the eNodeB is restored to the proper software version and configuration data. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1360 IK4901056 - SOFTWARE FALLBACK

Alarm	Attributes	Applicable major releases
Name: IK4901056 (4141) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: SOFTWARE FALLBACK (1338) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the eNodeB has detected a critical failure during eNodeB initialization while booting from the active software partition. The eNodeB has switched over to the passive software partition and booted up on the previous software version with the previous configuration data.		
<b>Impact:</b> Telecom: Services may not be operating properly until the eNodeB is restored to the proper software version and configuration data. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1361 IK4901057 - SW UPDATED AUTOMATICALLY

Alarm	Attributes	Applicable major releases
Name: IK4901057 (4142) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: SW UPDATED AUTOMATICALLY (1331) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the board was enabled with invalid software. OAM automatically updates the required software version.		
<b>Impact:</b> Telecom: All calls and cells associated with the module are not operational. On successful reset, all resources are functional. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1362 IK4901058 - UNEXPECTED CONTROL BOARD RESET**

Alarm	Attributes	Applicable major releases
Name: IK4901058 (4143) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: UNEXPECTED CONTROL BOARD RESET (1343) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the control board suffered from an unexpected, unplanned reset. Specific details are in the Additional Text.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during the reset. On a successful reset, all resources are again functional. OAM: The OAM functionality is not available during the reset. On successful reset, the OAM functionality is again available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1363 IK4901059 - CORRUPT FILE**

Alarm	Attributes	Applicable major releases
Name: IK4901059 (4144) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.RFME	Severity: variable Specific problem: CORRUPT FILE (1318) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates a checksum error.		
<b>Impact:</b> Software replacement failure.		
<b>Remedial action:</b> No action is required.		

**Table 26-1364 IK4901060 - RFME MODULE DOWNLOAD FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4901060 (4145) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.RFME	Severity: variable Specific problem: RFME MODULE DOWNLOAD FAILURE (1346) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to transfer the software package from the local storage to the board.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1365 IK4901061 - UNSUPPORTED DELEGATION BY OTHER CONTROLLER**

Alarm	Attributes	Applicable major releases
Name: IK4901061 (5384) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RFM	Severity: warning Specific problem: UNSUPPORTED DELEGATION BY OTHER CONTROLLER (1347) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	<ul style="list-style-type: none"> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The primary controller for this RE (CDMA, WCDMA or GSM) has delegated a management function such as 'Software Management' to the LTE controller. This function is not supported by this LTE release.		
<b>Remedial action:</b> Reconfigure the RE on the primary controller (CDMA, WCDMA or GSM) to no longer delegate the unsupported management function to LTE.		

**Table 26-1366 IK4904001 - UPDATE RI FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4904001 (2787) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: variable Specific problem: UPDATE RI FAILURE (1348) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to update the remote inventory information for the module.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: Incorrect information is stored in the remote inventory file or the remote inventory of the module.		
<b>Remedial action:</b> No action is required.		

**Table 26-1367 IK4904002 - UPDATE RI FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4904002 (2788) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: UPDATE RI FAILURE (1348) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to update the remote inventory information for the module.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: Incorrect information is stored in the remote inventory file or the remote inventory of the module.		
<b>Remedial action:</b> No action is required.		

**Table 26-1368 IK4904003 - UPDATE RI FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4904003 (2789) Type: equipmentAlarm (3) Package: lte Raised on class: lte.ENBSelfSpecifics	Severity: variable Specific problem: UPDATE RI FAILURE (1348) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to update the remote inventory information for the module.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: Incorrect information is stored in the remote inventory file or the remote inventory of the module.		
<b>Remedial action:</b> No action is required.		

**Table 26-1369 IK4904004 - UPDATE RI FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4904004 (2790) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RRH	Severity: variable Specific problem: UPDATE RI FAILURE (1348) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to update the remote inventory information for the module.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: Incorrect information is stored in the remote inventory file or the remote inventory of the module.		
<b>Remedial action:</b> No action is required.		

**Table 26-1370 IK4904005 - UPDATE RI FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4904005 (2791) Type: equipmentAlarm (3) Package: lte Raised on class: lte.TRDU	Severity: variable Specific problem: UPDATE RI FAILURE (1348) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to update the remote inventory information for the module.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: Incorrect information is stored in the remote inventory file or the remote inventory of the module.		
<b>Remedial action:</b> No action is required.		

Table 26-1371 IK4904006 - CONFIGURATION TIMEOUT

Alarm	Attributes	Applicable major releases
Name: IK4904006 (2792) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.BBCardSpecifics	Severity: variable Specific problem: CONFIGURATION TIMEOUT (1349) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the time-out for a response from the module.		
<b>Impact:</b> Telecom: Impacts the telecom traffic, depending on the module state. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1372 IK4904007 - CONFIGURATION TIMEOUT

Alarm	Attributes	Applicable major releases
Name: IK4904007 (2793) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: CONFIGURATION TIMEOUT (1349) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the time-out for a response from the module.		
<b>Impact:</b> Telecom: Impacts the telecom traffic, depending on the module state. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1373 IK4904008 - CONFIGURATION TIMEOUT

Alarm	Attributes	Applicable major releases
Name: IK4904008 (2794) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.ENBSelfSpecifics	Severity: variable Specific problem: CONFIGURATION TIMEOUT (1349) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the time-out for a response from the module.		
<b>Impact:</b> Telecom: Impacts the telecom traffic, depending on the module state. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1374 IK4904011 - CONFIGURATION TIMEOUT**

Alarm	Attributes	Applicable major releases
Name: IK4904011 (2795) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.RRH	Severity: variable Specific problem: CONFIGURATION TIMEOUT (1349) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the time-out for a response from the module.		
<b>Impact:</b> Telecom: Impacts the telecom traffic, depending on the module state. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1375 IK4904013 - CONFIGURATION TIMEOUT**

Alarm	Attributes	Applicable major releases
Name: IK4904013 (2796) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.TRDU	Severity: variable Specific problem: CONFIGURATION TIMEOUT (1349) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the time-out for a response from the module.		
<b>Impact:</b> Telecom: Impacts the telecom traffic, depending on the module state. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1376 IK4904016 - MODULE INSERTION**

Alarm	Attributes	Applicable major releases

Alarm	Attributes	Applicable major releases
Name: IK4904039 (3858) Type: qualityOfServiceAlarm (82) Package: lte Raised on class: lte.RRH	Severity: variable Specific problem: ALU DEBUG SESSION ON-DEMAND SNAPSHOT INTERNAL FAILURE (1359) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the on-demand snapshot request failed due to eNodeB internal error.		
<b>Impact:</b> No impact to eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1400 IK4904040 - ALU DEBUG SESSION ON-DEMAND SNAPSHOT INTERNAL FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4904040 (4146) Type: qualityOfServiceAlarm (82) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: ALU DEBUG SESSION ON-DEMAND SNAPSHOT INTERNAL FAILURE (1359) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the on-demand snapshot request failed due to eNodeB internal error.		
<b>Impact:</b> No impact to eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1401 IK4904041 - CONFIGURATION TIMEOUT**

Alarm	Attributes	Applicable major releases
Name: IK4904041 (4147) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: CONFIGURATION TIMEOUT (1349) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the time-out for a response from the module.		
<b>Impact:</b> Telecom: Impacts the telecom traffic, depending on the module state. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1402 IK4904042 - PROCESSING UNIT OCCUPANCY OVERLOAD**

Alarm	Attributes	Applicable major releases
Name: IK4904042 (4148) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: PROCESSING UNIT OCCUPANCY OVERLOAD (1355) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This events indicates that the processing unit is overloaded.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1403 IK4904043 - RAM USAGE OVERLOAD**

Alarm	Attributes	Applicable major releases
Name: IK4904043 (4149) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: RAM USAGE OVERLOAD (1356) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This events indicates that the RAM exhausted.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1404 IK4904044 - UPDATE RI FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4904044 (4150) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: UPDATE RI FAILURE (1348) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to update the remote inventory information for the module.		
<b>Impact:</b> Telecom: No impact on telecom service. OAM: Incorrect information is stored in the remote inventory file or the remote inventory of the module.		
<b>Remedial action:</b> No action is required.		

**Table 26-1405 IK4904045 - CONFIGURATION TIMEOUT**

Alarm	Attributes	Applicable major releases
Name: IK4904045 (4151) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.RFME	Severity: variable Specific problem: CONFIGURATION TIMEOUT (1349) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the time-out for a response from the module.		
<b>Impact:</b> Telecom: Impacts the telecom traffic, depending on the module state. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1406 IK4904046 - ALU DEBUG SESSION ON-DEMAND SNAPSHOT INTERNAL FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4904046 (4152) Type: qualityOfServiceAlarm (82) Package: lte Raised on class: lte.RFME	Severity: variable Specific problem: ALU DEBUG SESSION ON-DEMAND SNAPSHOT INTERNAL FAILURE (1359) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the on-demand snapshot request failed due to eNodeB internal error.		
<b>Impact:</b> No impact to eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1407 IK4904047 - UPDATE RI FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4904047 (4785) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RFME	Severity: variable Specific problem: UPDATE RI FAILURE (1348) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates a failure to update the remote inventory information for the module.		
<b>Impact:</b> Incorrect information is stored in the remote inventory file or the remote inventory of the module.		
<b>Remedial action:</b> No action is required.		

Table 26-1408 IK4904048 - UPDATE RI FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4904048 (4786) Type: equipmentAlarm (3) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: UPDATE RI FAILURE (1348) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to update the remote inventory information for the module.		
<b>Impact:</b> Incorrect information is stored in the remote inventory file or the remote inventory of the module.		
<b>Remedial action:</b> No action is required.		

Table 26-1409 IK4905002 - RESET OAM ON OPERATOR REQUEST

Alarm	Attributes	Applicable major releases
Name: IK4905002 (2811) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: RESET OAM ON OPERATOR REQUEST (1361) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls are lost. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1410 IK4905006 - LRA RESET**

Alarm	Attributes	Applicable major releases
Name: IK4905006 (2815) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: variable Specific problem: LRA RESET (1365) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset due to a local recovery action.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1411 IK4905007 - LRA RESET**

Alarm	Attributes	Applicable major releases
Name: IK4905007 (2816) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: LRA RESET (1365) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset due to a local recovery action.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1412 IK4905008 - LRA RESET**

Alarm	Attributes	Applicable major releases
Name: IK4905008 (2817) Type: equipmentAlarm (3) Package: lte Raised on class: lte.ENBShelfSpecifics	Severity: variable Specific problem: LRA RESET (1365) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset due to a local recovery action.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1413 IK4905009 - LRA RESET

Alarm	Attributes	Applicable major releases
Name: IK4905009 (2818) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RRH	Severity: variable Specific problem: LRA RESET (1365) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset due to a local recovery action.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1414 IK4905010 - LRA RESET

Alarm	Attributes	Applicable major releases
Name: IK4905010 (2819) Type: equipmentAlarm (3) Package: lte Raised on class: lte.TRDU	Severity: variable Specific problem: LRA RESET (1365) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset due to a local recovery action.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1415 IK4905011 - MODULE RESET

Alarm	Attributes	Applicable major releases
Name: IK4905011 (2820) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: variable Specific problem: MODULE RESET (1366) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1416 IK4905012 - MODULE RESET**

Alarm	Attributes	Applicable major releases
Name: IK4905012 (2821) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: MODULE RESET (1366) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1417 IK4905013 - MODULE RESET**

Alarm	Attributes	Applicable major releases
Name: IK4905013 (2822) Type: equipmentAlarm (3) Package: lte Raised on class: lte.ENBSelfSpecifics	Severity: variable Specific problem: MODULE RESET (1366) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1418 IK4905014 - MODULE RESET**

Alarm	Attributes	Applicable major releases
Name: IK4905014 (2823) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RRH	Severity: variable Specific problem: MODULE RESET (1366) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1419 IK4905015 - MODULE RESET

Alarm	Attributes	Applicable major releases
Name: IK4905015 (2824) Type: equipmentAlarm (3) Package: lte Raised on class: lte.TRDU	Severity: variable Specific problem: MODULE RESET (1366) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1420 IK4905016 - MODULE RESET

Alarm	Attributes	Applicable major releases
Name: IK4905016 (2825) Type: equipmentAlarm (3) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: MODULE RESET (1366) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1421 IK4905020 - DATABASE RECONFIGURATION RESET

Alarm	Attributes	Applicable major releases
Name: IK4905020 (2828) Type: communicationsAlarm (4) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: DATABASE RECONFIGURATION RESET (1368) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that a reset was performed due to a database reconfiguration.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1422 IK4905021 - MAX NUMBER OF DYNAMIC CARDINALITY REACHED**

Alarm	Attributes	Applicable major releases
Name: IK4905021 (2829) Type: communicationsAlarm (4) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: MAX NUMBER OF DYNAMIC CARDINALITY REACHED (1369) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>LR13.3</li> </ul>
<b>Description:</b> This event indicates that the number of X2Access objects being in an invisible state has reached the limit and the ANR function triggers the creation of a further dynamic X2Access/X2TransportLayerAccess. The new invisible X2Access/X2TransportLayerAccess is not created.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> Remove X2 objects which are not needed from the predefined configuration data.		

**Table 26-1423 IK4905022 - FALLBACK AFTER RECONFIGURATION**

Alarm	Attributes	Applicable major releases
Name: IK4905022 (2830) Type: equipmentAlarm (3) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: FALLBACK AFTER RECONFIGURATION (1370) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>LR13.3</li> <li>LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the eNodeB did an autonomous fallback to the previous configuration because the contact to the network management system could not be restored.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1424 IK4905023 - MAX NUMBER OF CARDINALITY REACHED**

Alarm	Attributes	Applicable major releases
Name: IK4905023 (3288) Type: communicationsAlarm (4) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: MAX NUMBER OF CARDINALITY REACHED (1367) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>LR13.3</li> <li>LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the maximum number of object cardinality is reached. The automatic creation of new objects is not possible anymore.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1425 IK4905024 - RESET ON OPERATOR REQUEST

Alarm	Attributes	Applicable major releases
Name: IK4905024 (3289) Type: equipmentAlarm (3) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: RESET ON OPERATOR REQUEST (1360) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls are lost. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1426 IK4905025 - RESET CONTROLLER OAM ON OPERATOR REQUEST

Alarm	Attributes	Applicable major releases
Name: IK4905025 (3290) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: RESET CONTROLLER OAM ON OPERATOR REQUEST (1362) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls are lost. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1427 IK4905026 - CONTROLLER OAM RESET AFTER RESTORE

Alarm	Attributes	Applicable major releases
Name: IK4905026 (3291) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: CONTROLLER OAM RESET AFTER RESTORE (1363) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the controller board is reset to restore the configuration data.		
<b>Impact:</b> Telecom: All associated calls are lost. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1428 IK4905027 - CONTROLLER OAM RESET AFTER RESTORE WITH EMPTY DATABASE**

Alarm	Attributes	Applicable major releases
Name: IK4905027 (3292) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: CONTROLLER OAM RESET AFTER RESTORE WITH EMPTY DATABASE (1364) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates an OAM auto-reset with an empty database as the database was not restored properly.		
<b>Impact:</b> Telecom: All associated calls are lost. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1429 IK4905028 - BBU POSITION CHANGE**

Alarm	Attributes	Applicable major releases
Name: IK4905028 (3293) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: BBU POSITION CHANGE (1371) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the BBU position coordinates have changed. The GPS antenna of the eNodeB has been moved or the bbuPositionDeltaX/Y/Z coordinates have been reconfigured.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1430 IK4905029 - BBU POSITION ERROR**

Alarm	Attributes	Applicable major releases
Name: IK4905029 (3294) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: BBU POSITION ERROR (1372) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the BBU position coordinates might not be correct.		
<b>Impact:</b> Configured coordinates of the BBU might not be correct.		
<b>Remedial action:</b> No action is required.		

Table 26-1431 IK4905030 - MAIN ANTENNA POSITION CHANGE

Alarm	Attributes	Applicable major releases
Name: IK4905030 (3295) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.CBCardSpecifics	Severity: variable Specific problem: MAIN ANTENNA POSITION CHANGE (1373) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the main RF antenna position coordinates have changed. The GPS antenna of the eNodeB has been moved or the mainAntennaPositionDeltaX/Y/Z values have been reconfigured.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1432 IK4905031 - MAIN ANTENNA POSITION ERROR

Alarm	Attributes	Applicable major releases
Name: IK4905031 (3296) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.CBCardSpecifics	Severity: variable Specific problem: MAIN ANTENNA POSITION ERROR (1374) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the main RF antenna position coordinates might not be correct.		
<b>Impact:</b> Location fix of UEs might be inaccurate.		
<b>Remedial action:</b> No action is required.		

Table 26-1433 IK4905034 - OAM CELL EVENT 3

Alarm	Attributes	Applicable major releases
Name: IK4905034 (3299) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: variable Specific problem: OAM CELL EVENT 3 (1377) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> Spare event used in LR14.3. The OAM System Integrity Monitor has run a Health Check on the cell and has detected a degradation affecting cell performance. SIM has raised a critical alarm and is now initiating Phase 2 recovery actions to initialize the cell.		
<b>Impact:</b> Telecom: The cell will be initialized by SIM actions. OAM: no impact.		
<b>Remedial action:</b> No action is required. If the degradation persists after the Local Recovery Action, Investigation is required to determine the cause for the degradations.		

Table 26-1434 IK4905035 - OAM CELL EVENT 4

Alarm	Attributes	Applicable major releases
Name: IK4905035 (3300) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.Cell	Severity: variable Specific problem: OAM CELL EVENT 4 (1378) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> Provisioned for late churn-in. This event is for future use.		
<b>Impact:</b> Unknown.		
<b>Remedial action:</b> No action is required.		

Table 26-1435 IK4905036 - OAM CELL EVENT 5

Alarm	Attributes	Applicable major releases
Name: IK4905036 (3301) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.Cell	Severity: variable Specific problem: OAM CELL EVENT 5 (1379) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> Provisioned for late churn-in. This event is for future use.		
<b>Impact:</b> Unknown.		
<b>Remedial action:</b> No action is required.		

Table 26-1436 IK4905037 - LRA RESET

Alarm	Attributes	Applicable major releases
Name: IK4905037 (3675) Type: equipmentAlarm (3) Package: lte Raised on class: lte.TmaAidEntry	Severity: variable Specific problem: LRA RESET (1365) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset due to a local recovery action.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1437 IK4905038 - LRA RESET

Alarm	Attributes	Applicable major releases
Name: IK4905038 (3676) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RetAldEntry	Severity: variable Specific problem: LRA RESET (1365) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset due to a local recovery action.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1438 IK4905039 - MODULE RESET

Alarm	Attributes	Applicable major releases
Name: IK4905039 (3677) Type: equipmentAlarm (3) Package: lte Raised on class: lte.TmaAldEntry	Severity: variable Specific problem: MODULE RESET (1366) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1439 IK4905040 - MODULE RESET

Alarm	Attributes	Applicable major releases
Name: IK4905040 (3678) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RetAldEntry	Severity: variable Specific problem: MODULE RESET (1366) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1440 IK4905041 - CELL BLOCK REQUEST RECEIVED AT SHARED RFM**

Alarm	Attributes	Applicable major releases
Name: IK4905041 (3679) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RFM	Severity: variable Specific problem: CELL BLOCK REQUEST RECEIVED AT SHARED RFM (1380) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the RFM is about to interrupt RF operation and so any cells fully supported on the RFM should be blocked. This cell block procedure is supported on shared RFMs (including ROCM) and is triggered by the other controller sharing the RFM.		
<b>Impact:</b> Telecom: The Cell Block procedure shuts down call processing on the cell(s) supported on this RFM. OAM: None.		
<b>Remedial action:</b> No action is required.		

**Table 26-1441 IK4905043 - MODEM RESET DUE ON-LINE B-MODEM CLASS PARAMETER UPDATE**

Alarm	Attributes	Applicable major releases
Name: IK4905043 (3859) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: MODEM RESET DUE ON-LINE B-MODEM CLASS PARAMETER UPDATE (1381) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates Modem has reset when operator updates the value of B-Modem Class parameter on-line.		
<b>Impact:</b> Service impact on Modem		
<b>Remedial action:</b> No action is required.		

**Table 26-1442 IK4905044 - X2 LINK RESET DUE ON-LINE B-X2-INTERFACE CLASS PARAMETER UPDATE**

Alarm	Attributes	Applicable major releases
Name: IK4905044 (3860) Type: communicationsAlarm (4) Package: lte Raised on class: lte.X2TransportLayerAccess	Severity: variable Specific problem: X2 LINK RESET DUE ON-LINE B-X2-INTERFACE CLASS PARAMETER UPDATE (1382) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates X2 link has reset when operator updates the value of B-X2-interface Class parameter on-line.		
<b>Impact:</b> Service impact on X2 link		
<b>Remedial action:</b> No action is required.		

**Table 26-1443 IK4905045 - S1 LINK RESET DUE ON-LINE B-S1-INTERFACE CLASS PARAMETER UPDATE**

Alarm	Attributes	Applicable major releases
Name: IK4905045 (3861) Type: communicationsAlarm (4) Package: Ite Raised on class: Ite.MmeTransportLayerAccess	Severity: variable Specific problem: S1 LINK RESET DUE ON-LINE B-S1-INTERFACE CLASS PARAMETER UPDATE (1383) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates S1 link has reset when operator updates the value of B-S1-interface Class parameter on-line.		
<b>Impact:</b> Service impact on S1 link		
<b>Remedial action:</b> No action is required.		

**Table 26-1444 IK4905046 - CELL OUTAGE START**

Alarm	Attributes	Applicable major releases
Name: IK4905046 (3862) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.Cell	Severity: variable Specific problem: CELL OUTAGE START (1384) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the cell has stopped to provide telecom services.		
<b>Impact:</b> Telecom: The cell is not operational. OAM: No impact		
<b>Remedial action:</b> No action is required.		

**Table 26-1445 IK4905047 - CELL OUTAGE END**

Alarm	Attributes	Applicable major releases
Name: IK4905047 (3863) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.Cell	Severity: variable Specific problem: CELL OUTAGE END (1385) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the cell has started to provide telecom services.		
<b>Impact:</b> Telecom: no impact. OAM: No impact.		
<b>Remedial action:</b> No action is required.		

Table 26-1446 IK4905048 - OAM CELL EVENT 6

Alarm	Attributes	Applicable major releases
Name: IK4905048 (3864) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.Cell	Severity: variable Specific problem: OAM CELL EVENT 6 (1386) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> Provisioned for late churn-in. This event is for future use.		
<b>Impact:</b> Unknown.		
<b>Remedial action:</b> No action is required.		

Table 26-1447 IK4905049 - OAM CELL EVENT 7

Alarm	Attributes	Applicable major releases
Name: IK4905049 (3865) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.Cell	Severity: variable Specific problem: OAM CELL EVENT 7 (1387) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> Provisioned for late churn-in. This event is for future use.		
<b>Impact:</b> Unknown.		
<b>Remedial action:</b> No action is required.		

Table 26-1448 IK4905050 - MODULE WARM RESET

Alarm	Attributes	Applicable major releases
Name: IK4905050 (3866) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: variable Specific problem: MODULE WARM RESET (1388) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates a modem warm reset of the physical cell resource.		
<b>Impact:</b> Telecom: The affected hardware and the assigned cell is not operational. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1449 IK4905051 - LRA WARM RESET

Alarm	Attributes	Applicable major releases
Name: IK4905051 (3867) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: variable Specific problem: LRA WARM RESET (1389) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates a local recovery action of the modem physical cell resource.		
<b>Impact:</b> Telecom: Associated cell and calls are not operational. OAM: No impact		
<b>Remedial action:</b> No action is required.		

Table 26-1450 IK4905052 - CMS INIT START

Alarm	Attributes	Applicable major releases
Name: IK4905052 (3868) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: CMS INIT START (1204) Implicitly cleared: true Default probable cause: operatorCommand (905)	<ul style="list-style-type: none"> <li>• LR13.3</li> </ul>
<b>Description:</b> This event indicates that operator certificate enrollment scenario started.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1451 IK4905053 - CMS INIT END

Alarm	Attributes	Applicable major releases
Name: IK4905053 (3869) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: CMS INIT END (1390) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that operator enrollment scenario ended.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1452 IK4905054 - KEY UPDATE START

Alarm	Attributes	Applicable major releases
Name: IK4905054 (3870) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: KEY UPDATE START (1391) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the key updated started.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1453 IK4905055 - KEY UPDATE END

Alarm	Attributes	Applicable major releases
Name: IK4905055 (3871) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: KEY UPDATE END (1392) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the key updated ended.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1454 IK4905056 - NEW CERTIFICATE AVAILABLE

Alarm	Attributes	Applicable major releases
Name: IK4905056 (3872) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: NEW CERTIFICATE AVAILABLE (1393) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	<ul style="list-style-type: none"> <li>• LR13.3</li> </ul>
<b>Description:</b> This event indicates that new certificate was downloaded on eNB.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1455 IK4905057 - DNS RESOLUTION ERROR

Alarm	Attributes	Applicable major releases
Name: IK4905057 (3873) Type: securityServiceOrMechanismViolation (92) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: DNS RESOLUTION ERROR (1239) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	<ul style="list-style-type: none"> <li>LR13.3</li> </ul>
<b>Description:</b> This event indicates that the searched item does not exist in DNS		
<b>Impact:</b> Depends on eNB configuration for certificate revocation (strictCrIPolicy parameter): either no impact (not strict..) or IPsec setup fails in which case there will be a separate alarm		
<b>Remedial action:</b> Check DNS configuration for HTTP URI-related records.		

Table 26-1456 IK4905058 - MF EVENT 1

Alarm	Attributes	Applicable major releases
Name: IK4905058 (4153) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: MF EVENT 1 (645) Implicitly cleared: true Default probable cause: communicationsProtocolError (901)	<ul style="list-style-type: none"> <li>LR13.3</li> </ul>
<b>Description:</b> Unspecified MF fault detected.		
<b>Impact:</b> Unknown.		
<b>Remedial action:</b> Unknown.		

Table 26-1457 IK4905059 - MF EVENT 2

Alarm	Attributes	Applicable major releases
Name: IK4905059 (4154) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: MF EVENT 2 (646) Implicitly cleared: true Default probable cause: communicationsProtocolError (901)	<ul style="list-style-type: none"> <li>LR13.3</li> </ul>
<b>Description:</b> Unspecified MF fault detected.		
<b>Impact:</b> Unknown.		
<b>Remedial action:</b> Unknown.		

**Table 26-1458 IK4905060 - MF EVENT 3**

Alarm	Attributes	Applicable major releases
Name: IK4905060 (4155) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: MF EVENT 3 (647) Implicitly cleared: true Default probable cause: communicationsProtocolError (901)	<ul style="list-style-type: none"> <li>LR13.3</li> </ul>
<b>Description:</b> Unspecified MF fault detected.		
<b>Impact:</b> Unknown.		
<b>Remedial action:</b> Unknown.		

**Table 26-1459 IK4905061 - CONTROLLER OAM RESET AFTER RESTORE**

Alarm	Attributes	Applicable major releases
Name: IK4905061 (4156) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: CONTROLLER OAM RESET AFTER RESTORE (1363) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>LR13.3</li> <li>LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the controller board is reset to restore the configuration data.		
<b>Impact:</b> Telecom: All associated calls are lost. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1460 IK4905062 - CONTROLLER OAM RESET AFTER RESTORE WITH EMPTY DATABASE**

Alarm	Attributes	Applicable major releases
Name: IK4905062 (4157) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: CONTROLLER OAM RESET AFTER RESTORE WITH EMPTY DATABASE (1364) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>LR13.3</li> <li>LR14.1.L</li> </ul>
<b>Description:</b> This event indicates an OAM auto-reset with an empty database as the database was not restored properly.		
<b>Impact:</b> Telecom: All associated calls are lost. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

Table 26-1461 IK4905063 - DATABASE RECONFIGURATION RESET

Alarm	Attributes	Applicable major releases
Name: IK4905063 (4158) Type: communicationsAlarm (4) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: DATABASE RECONFIGURATION RESET (1368) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that a reset was performed due to a database reconfiguration.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1462 IK4905064 - LRA RESET

Alarm	Attributes	Applicable major releases
Name: IK4905064 (4159) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: LRA RESET (1365) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset due to a local recovery action.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 26-1463 IK4905065 - LRA WARM RESET

Alarm	Attributes	Applicable major releases
Name: IK4905065 (4160) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: LRA WARM RESET (1389) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates a local recovery action of the modem physical cell resource.		
<b>Impact:</b> Telecom: Associated cell and calls are not operational. OAM: No impact		
<b>Remedial action:</b> No action is required.		

**Table 26-1464 IK4905066 - MAIN ANTENNA POSITION CHANGE**

Alarm	Attributes	Applicable major releases
Name: IK4905066 (4161) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: MAIN ANTENNA POSITION CHANGE (1373) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the main RFME antenna position coordinates have changed. The GPS antenna of the eNodeB has been moved or the mainAntennaPositionDeltaX/Y/Z values have been reconfigured.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1465 IK4905067 - MAIN ANTENNA POSITION ERROR**

Alarm	Attributes	Applicable major releases
Name: IK4905067 (4162) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: MAIN ANTENNA POSITION ERROR (1374) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the main RFME antenna position coordinates might not be correct.		
<b>Impact:</b> Location fix of UEs might be inaccurate.		
<b>Remedial action:</b> No action is required.		

**Table 26-1466 IK4905068 - MODULE RESET**

Alarm	Attributes	Applicable major releases
Name: IK4905068 (4163) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: MODULE RESET (1366) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1467 IK4905069 - MODULE WARM RESET**

Alarm	Attributes	Applicable major releases
Name: IK4905069 (4164) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: MODULE WARM RESET (1388) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates a modem warm reset of the physical cell resource.		
<b>Impact:</b> Telecom: The affected hardware and the assigned cell is not operational. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1468 IK4905070 - RESET CONTROLLER OAM ON OPERATOR REQUEST**

Alarm	Attributes	Applicable major releases
Name: IK4905070 (4165) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: RESET CONTROLLER OAM ON OPERATOR REQUEST (1362) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls are lost. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1469 IK4905071 - RESET OAM ON OPERATOR REQUEST**

Alarm	Attributes	Applicable major releases
Name: IK4905071 (4166) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: RESET OAM ON OPERATOR REQUEST (1361) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls are lost. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1470 IK4905072 - RESET ON OPERATOR REQUEST**

Alarm	Attributes	Applicable major releases
Name: IK4905072 (4167) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: RESET ON OPERATOR REQUEST (1360) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset command by the operator.		
<b>Impact:</b> Telecom: All associated calls are lost. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required.		

**Table 26-1471 IK4905073 - LRA RESET**

Alarm	Attributes	Applicable major releases
Name: IK4905073 (4168) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.RFME	Severity: variable Specific problem: LRA RESET (1365) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the reset due to a local recovery action.		
<b>Impact:</b> Telecom: All associated calls and cells are not operational during reset. On successful reset, all resources are functional. OAM: The OAM functionalities are not available during reset. On successful reset, the OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

**Table 26-1472 IK4905077 - SIM HEALTH CHECK - TX PWR FAILED**

Alarm	Attributes	Applicable major releases
Name: IK4905077 (4787) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: critical Specific problem: SIM HEALTH CHECK - TX PWR FAILED (1238) Implicitly cleared: true Default probable cause: softwareProgramError (720)	<ul style="list-style-type: none"> <li>• LR13.3</li> </ul>
<b>Description:</b> This alarm indicates that the System Integrity Monitor monitoring the health of the eNodeB has detected a degradation. Depending on the severity of the degradation, local recovery actions may be taken.		
<b>Impact:</b> Telecom service is impaired on the cell.		
<b>Remedial action:</b> If the alarm persists, the cell may need to be reinitialized.		

**Table 26-1473 IK4905080 - LOGICAL RESET AND RF RECONF DUE TO ON-LINE B-CELL+RF(s) CLASS PARAMETER UPDATE**

Alarm	Attributes	Applicable major releases
Name: IK4905080 (4788) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: variable Specific problem: LOGICAL RESET AND RF RECONF DUE TO ON-LINE B-CELL+RF(s) CLASS PARAMETER UPDATE (1240) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	<ul style="list-style-type: none"> <li>LR13.3</li> </ul>
<b>Description:</b> This event indicates the LTE Cell is logically reset and the RF is reconfigured during parameter update procedure.		
<b>Impact:</b> The LTE Cell is reset and the RF is reconfigured, releasing all calls handled on this cell. The cell is then back into service with new values of the parameters.		
<b>Remedial action:</b> None.		

**Table 26-1474 IK4905083 - AUTOMATED HANDOVER PARAMETER ADJUSTMENT COMPLETED**

Alarm	Attributes	Applicable major releases
Name: IK4905083 (4789) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: variable Specific problem: AUTOMATED HANDOVER PARAMETER ADJUSTMENT COMPLETED (1394) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>LR13.3</li> <li>LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the SON process that automatically adjusts intra-frequency handover parameters has no further adjustments to make.		
<b>Impact:</b> The cell will not initiate further HO parameter adjustments unless HO performance degrades more than a configurable amount or the operator manually triggers the MRO feature to attempt further adjustments.		
<b>Remedial action:</b> No action is required.		

**Table 26-1475 IK4905086 - BBU POSITION CHANGE**

Alarm	Attributes	Applicable major releases
Name: IK4905086 (4790) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: variable Specific problem: BBU POSITION CHANGE (1371) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>LR13.3</li> <li>LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the BBU position coordinates have changed.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1476 IK4905087 - BBU POSITION ERROR**

Alarm	Attributes	Applicable major releases
Name: IK4905087 (4791) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: BBU POSITION ERROR (1372) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the BBU position coordinates might not be correct.		
<b>Impact:</b> Configured coordinates of the BBU might not be correct.		
<b>Remedial action:</b> No action is required.		

**Table 26-1477 IK4906001 - THREE UNSUCCESSFUL LOGIN ATTEMPTS**

Alarm	Attributes	Applicable major releases
Name: IK4906001 (2831) Type: securityServiceOrMechanismViolation (92) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: THREE UNSUCCESSFUL LOGIN ATTEMPTS (1395) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the user failed to log into the eNodeB through SSH or CLI for three times in a span of 10 minutes.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1478 IK4906002 - SUCCESSFUL LOGIN**

Alarm	Attributes	Applicable major releases
Name: IK4906002 (2832) Type: securityServiceOrMechanismViolation (92) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: SUCCESSFUL LOGIN (1396) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the user successfully logged into the eNodeB through SSH or CLI.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1479 IK4906003 - UNSUCCESSFUL LOGIN ATTEMPT

Alarm	Attributes	Applicable major releases
Name: IK4906003 (2833) Type: securityServiceOrMechanismViolation (92) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: UNSUCCESSFUL LOGIN ATTEMPT (1397) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the user failed to log into the eNodeB through SSH or CLI.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1480 IK4906004 - SUCCESSFUL ROLE CHANGE

Alarm	Attributes	Applicable major releases
Name: IK4906004 (2834) Type: securityServiceOrMechanismViolation (92) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: SUCCESSFUL ROLE CHANGE (1398) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that the user successfully changed roles on the eNodeB.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 26-1481 IK4906005 - UNSUCCESSFUL ROLE CHANGE

Alarm	Attributes	Applicable major releases
Name: IK4906005 (2835) Type: securityServiceOrMechanismViolation (92) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: UNSUCCESSFUL ROLE CHANGE (1399) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates the failure to change the user role on the eNodeB.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1482 IK4906006 - ETHERNET CABLE CONNECTED**

Alarm	Attributes	Applicable major releases
Name: IK4906006 (2836) Type: physicalViolation (91) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: ETHERNET CABLE CONNECTED (1400) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that an Ethernet cable is connected to a port on the eNodeB.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1483 IK4906007 - ETHERNET CABLE DISCONNECTED**

Alarm	Attributes	Applicable major releases
Name: IK4906007 (2837) Type: physicalViolation (91) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: ETHERNET CABLE DISCONNECTED (1401) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that an Ethernet cable is disconnected from a port on the eNodeB.		
<b>Impact:</b> Telecom outage: Loss of S1 and SyncE (if used). All associated calls are lost, there is an impact on user plane and control plane.		
<b>Remedial action:</b> No action is required.		

**Table 26-1484 IK4906008 - SECURITY LOG ROLLED OVER**

Alarm	Attributes	Applicable major releases
Name: IK4906008 (2838) Type: integrityViolation (85) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: SECURITY LOG ROLLED OVER (1402) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that a security log is rolled over.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1485 IK4906010 - AUTHORIZATION LOG READ FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4906010 (3302) Type: integrityViolation (85) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: AUTHORIZATION LOG READ FAILURE (1404) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates a failure to read the SSH authorization log. The eNodeB is unable to log login attempts.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1486 IK4906011 - NEW CERTIFICATE AVAILABLE**

Alarm	Attributes	Applicable major releases
Name: IK4906011 (5385) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: NEW CERTIFICATE AVAILABLE (1393) Implicitly cleared: true Default probable cause: unknown (1097)	<ul style="list-style-type: none"> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This event indicates that new certificate was downloaded on eNB.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

**Table 26-1487 IK4906012 - DNS SERVICE UNAVAILABLE**

Alarm	Attributes	Applicable major releases
Name: IK4906012 (5386) Type: securityServiceOrMechanismViolation (92) Package: lte Raised on class: lte.ENBEquipment	Severity: major Specific problem: DNS SERVICE UNAVAILABLE (1169) Implicitly cleared: true Default probable cause: communicationsSubsystemFailure (915)	<ul style="list-style-type: none"> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This alarm indicates that No DNS server at all is available for resolving a symbolic address to a numeric IP address		
<b>Impact:</b> The IPsec tunnel cannot be setup since IKEv2 fails.		
<b>Remedial action:</b> Check the state of DNS server(s) and the state of the comm. network between eNB and DNS		

## 26 – Alcatel-Lucent 9xxx eNodeB alarms

Table 26-1488 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

Table 26-1489 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 26-1490 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 26-1491 LinkDown (equipment)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

Table 26-1492 LowTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 26-1493 LTECellAdminDown - LTE Cell LOCKED BY OPERATOR

Alarm	Attributes	Applicable major releases
Name: LTECellAdminDown (1471) Type: equipmentAlarm (3) Package: lte Raised on class: lte.Cell	Severity: warning Specific problem: LTE Cell LOCKED BY OPERATOR (1927) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an LTE Cell Administrative State is down.		
<b>Raising condition:</b> (('administrativeState' NOT EQUAL 'Unlocked'))		
<b>Clearing condition:</b> (('administrativeState' EQUAL 'Unlocked'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 26-1494 LTECellDegradedOrFaulty - LTE Cell DEGRADED OR FAULTY

Alarm	Attributes	Applicable major releases
Name: LTECellDegradedOrFaulty (8023) Type: equipmentAlarm (3) Package: lte Raised on class: lte.Cell	Severity: major Specific problem: LTE Cell DEGRADED OR FAULTY (1928) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an LTE Cell is not fully available.		
<b>Raising condition:</b> (('availabilityStatus'anyBit'Faulty') OR ('availabilityStatus'anyBit'Degraded'))		
<b>Clearing condition:</b> NOT (((('availabilityStatus'anyBit'Faulty') OR ('availabilityStatus'anyBit'Degraded'))))		
<b>Remedial action:</b> The Cell is not fully available. AvailabilityStatus value and Additional attributes may indicate the nature and cause of the issue.		

Table 26-1495 LTECellDown - LTE Cell DOWN

Alarm	Attributes	Applicable major releases
Name: LTECellDown (1472) Type: equipmentAlarm (3) Package: lte Raised on class: lte.Cell	Severity: critical Specific problem: LTE Cell DOWN (1929) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an LTE Cell is operationally down and availability status is failed or dependency.		
<b>Raising condition:</b> (('operationalState' EQUAL 'Disabled') AND ('administrativeState' EQUAL 'Unlocked') AND (('availabilityStatus'anyBit'Failed') OR ('availabilityStatus'anyBit'Dependency')))		
<b>Clearing condition:</b> (('administrativeState' EQUAL 'Locked') OR ('operationalState' EQUAL 'Enabled') OR NOT (((('availabilityStatus'anyBit'Failed') OR ('availabilityStatus'anyBit'Dependency'))))		
<b>Remedial action:</b> The Cell is inoperable. Additional attributes may indicate the nature and cause of the issue.		

Table 26-1496 M3MmeAccessAdminDown - M3MmeAccess LOCKED BY OPERATOR

Alarm	Attributes	Applicable major releases
Name: M3MmeAccessAdminDown (4792) Type: equipmentAlarm (3) Package: lte Raised on class: lte.M3MmeAccess	Severity: warning Specific problem: M3MmeAccess LOCKED BY OPERATOR (1930) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an M3MmeAccess Administrative State is down.		
<b>Raising condition:</b> (('Administrative State' NOT EQUAL 'Unlocked'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Administrative State' EQUAL 'Unlocked'))		
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 26-1497 M3MmeAccessDegradedOrFaulty - M3MmeAccess DEGRADED OR FAULTY

Alarm	Attributes	Applicable major releases
Name: M3MmeAccessDegradedOrFaulty (8024) Type: equipmentAlarm (3) Package: lte Raised on class: lte.M3MmeAccess	Severity: major Specific problem: M3MmeAccess DEGRADED OR FAULTY (1931) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an M3MmeAccess is not fully available.		
<b>Raising condition:</b> (('Availability Status'anyBit'Faulty') OR ('Availability Status'anyBit'Degraded'))		
<b>Clearing condition:</b> NOT (('Availability Status'anyBit'Faulty') OR ('Availability Status'anyBit'Degraded'))		
<b>Remedial action:</b> The Equipment is not fully available. AvailabilityStatus value and Additional attributes may indicate the nature and cause of the issue.		

Table 26-1498 M3MmeAccessDown - M3MmeAccess DOWN

Alarm	Attributes	Applicable major releases
Name: M3MmeAccessDown (4793) Type: equipmentAlarm (3) Package: lte Raised on class: lte.M3MmeAccess	Severity: critical Specific problem: M3MmeAccess DOWN (1932) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an M3MmeAccess is operationally down.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Disabled') AND ('Administrative State' EQUAL 'Unlocked') AND (('Availability Status'anyBit'Failed') OR ('Availability Status'anyBit'Dependency')))		
<b>Clearing condition:</b> (('Administrative State' EQUAL 'Locked') OR ('Operational State' EQUAL 'Enabled') OR NOT (('Availability Status'anyBit'Failed') OR ('Availability Status'anyBit'Dependency')))		
<b>Remedial action:</b> The Equipment is inoperable. Additional attributes may indicate the nature and cause of the issue.		

Table 26-1499 MmeAccessAdminDown - MmeAccess LOCKED BY OPERATOR

Alarm	Attributes	Applicable major releases
Name: MmeAccessAdminDown (1523) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MmeAccess	Severity: warning Specific problem: MmeAccess LOCKED BY OPERATOR (1933) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an MME Access Administrative State is down.		
<b>Raising condition:</b> (('Administrative State' NOT EQUAL 'Unlocked'))		
<b>Clearing condition:</b> (('Administrative State' EQUAL 'Unlocked'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 26-1500 MmeAccessDegradedOrFaulty - MmeAccess DEGRADED OR FAULTY

Alarm	Attributes	Applicable major releases
Name: MmeAccessDegradedOrFaulty (8025) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MmeAccess	Severity: major Specific problem: MmeAccess DEGRADED OR FAULTY (1934) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an MME Access is not fully available.		
<b>Raising condition:</b> (('Availability Status'anyBit'Faulty') OR ('Availability Status'anyBit'Degraded'))		
<b>Clearing condition:</b> NOT (('Availability Status'anyBit'Faulty') OR ('Availability Status'anyBit'Degraded'))		
<b>Remedial action:</b> The Equipment is not fully available. AvailabilityStatus value and Additional attributes may indicate the nature and cause of the issue.		

Table 26-1501 MmeAccessDown - MmeAccess DOWN

Alarm	Attributes	Applicable major releases
Name: MmeAccessDown (1524) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MmeAccess	Severity: critical Specific problem: MmeAccess DOWN (1935) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an MME Access is operationally down.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Disabled') AND ('Administrative State' EQUAL 'Unlocked') AND (('Availability Status'anyBit'Failed') OR ('Availability Status'anyBit'Dependency'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Administrative State' EQUAL 'Locked') OR ('Operational State' EQUAL 'Enabled') OR NOT (('Availability Status'anyBit'Failed') OR ('Availability Status'anyBit'Dependency'))))		
<b>Remedial action:</b> The Equipment is inoperable. Additional attributes may indicate the nature and cause of the issue.		

(2 of 2)

Table 26-1502 MobileConnectorDown

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL "\")		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL "\")		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

Table 26-1503 MonitoredLinkStatusError

Alarm	Attributes	Applicable major releases
Name: MonitoredLinkStatusError (4796) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.ENBEquipment	Severity: major Implicitly cleared: true Default probable cause: corruptData (910)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This alarm is raised when the Network Element is reachable but the monitoring of link status fails. This alarm can be raised when several managers are managing a given Network Element which is not able to support multiple managers. The alarm can also be raised if the identifier of Network Element does not match the identifier in the Network Element managed in SAM. It is automatically cleared when the monitoring of the link status succeeds.		
<b>Raising condition:</b> ('OAM Link Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('OAM Link Status' EQUAL 'Up')		
<b>Remedial action:</b> Network Element is reachable but the monitoring of link status fails		

Table 26-1504 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band')))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band')))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

Table 26-1505 NewSsh2ServerKeyDetected

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

Table 26-1506 NodeDatabaseFallbackDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

Table 26-1507 NodeDatabaseMisalignmentDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

Table 26-1508 NodeRebooted

Alarm	Attributes	Applicable major releases
Name: NodeRebooted (32) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: false Default probable cause: nodeReboot (25)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE reboot based on the latest NE sysUpTime value.		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

## 26 – Alcatel-Lucent 9xxx eNodeB alarms

Table 26-1509 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 26-1510 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotManagedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when node is not managed by any EMS after n retries( threshold crossed) It is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM. Add a discovery rule in order to manage it.		

Table 26-1511 OutOfService

Alarm	Attributes	Applicable major releases
Name: OutOfService (4385) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an Equipment is detected as Out Of Service. For an ENB: the supervision link is down and all S1c Links between the ENB and its MMEs are down.		
<b>Remedial action:</b> The NE is Out of Service. Investigate on Site.		

Table 26-1512 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 26-1513 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

Table 26-1514 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		

(1 of 2)

## 26 – Alcatel-Lucent 9xxx eNodeB alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

(2 of 2)

Table 26-1515 PMCMaxResultStringBlockSizeNotOptimum

Alarm	Attributes	Applicable major releases
Name: PMCMaxResultStringBlockSizeNotOptimum (2922) Type: performanceOptimization (97) Package: lte Raised on class: lte.ENBEquipment	Severity: warning Implicitly cleared: true Default probable cause: wrongValue (1120)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This alarm is raised when the PM maximum block size that will be transferred in one SNMP request is set to a value less than an optimum value of 6000 bytes. NOTE that the node's default value can be lower than 6000 bytes.		
<b>Raising condition:</b> ('pmcMaxResultStringBlockSize' < '6000')		
<b>Clearing condition:</b> ('pmcMaxResultStringBlockSize' >=" '6000'")		
<b>Remedial action:</b> Set blocksize to the recommended value.		

Table 26-1516 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

**Table 26-1517 PrimaryImageBootFailure**

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

**Table 26-1518 RadiusOperStatusDown**

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

**Table 26-1519 ReachabilityProblem**

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		

(1 of 2)

26 – Alcatel-Lucent 9xxx eNodeB alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

(2 of 2)

**Table 26-1520 ReconfigFailure**

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		
<b>Remedial action:</b> Verify that the object is configured as expected.		

**Table 26-1521 RncAccessAdminDown - Rnc Access DOWN**

Alarm	Attributes	Applicable major releases
Name: RncAccessAdminDown (4797) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RncAccess	Severity: warning Specific problem: Rnc Access DOWN (1936) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when a RNC Access Administrative State is down.		
<b>Raising condition:</b> (('administrativeState' NOT EQUAL 'Unlocked'))		
<b>Clearing condition:</b> (('administrativeState' EQUAL 'Unlocked'))		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 26-1522 SaveConfigFailed**

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

(2 of 2)

Table 26-1523 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 26-1524 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

## 26 — Alcatel-Lucent 9xxx eNodeB alarms

Table 26-1525 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

Table 26-1526 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

Table 26-1527 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

(2 of 2)

Table 26-1528 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

Table 26-1529 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

Table 26-1530 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 26-1531 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

(2 of 2)

Table 26-1532 UpgradedBuildVersionMismatch

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 26-1533 upgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 26-1534 VersionConfigRestoreFailed**

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

**Table 26-1535 WrongCpaaSoftwareVersion**

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Clearing condition:</b> (('Software Version' NOT EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

**Table 26-1536 X2AccessAdminDown - X2 Access LOCKED BY OPERATOR**

Alarm	Attributes	Applicable major releases
Name: X2AccessAdminDown (1906) Type: equipmentAlarm (3) Package: lte Raised on class: lte.X2Access	Severity: warning Specific problem: X2 Access LOCKED BY OPERATOR (1937) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an X2 Access Administrative State is down.		
<b>Raising condition:</b> (('Administrative State' NOT EQUAL 'Unlocked'))		
<b>Clearing condition:</b> (('Administrative State' EQUAL 'Unlocked'))		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 26-1537 X2AccessDegradedOrFaulty - X2 Access DEGRADED OR FAULTY**

Alarm	Attributes	Applicable major releases
Name: X2AccessDegradedOrFaulty (8027) Type: equipmentAlarm (3) Package: lte Raised on class: lte.X2Access	Severity: major Specific problem: X2 Access DEGRADED OR FAULTY (1938) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an X2 Access is not fully available.		
<b>Raising condition:</b> (('Availability Status'anyBit'Faulty') OR ('Availability Status'anyBit'Degraded'))		
<b>Clearing condition:</b> NOT (((('Availability Status'anyBit'Faulty') OR ('Availability Status'anyBit'Degraded'))))		
<b>Remedial action:</b> The Equipment is not fully available. AvailabilityStatus value and Additional attributes may indicate the nature and cause of the issue.		

**Table 26-1538 X2AccessDown - X2 Access DOWN**

Alarm	Attributes	Applicable major releases
Name: X2AccessDown (1907) Type: equipmentAlarm (3) Package: lte Raised on class: lte.X2Access	Severity: critical Specific problem: X2 Access DOWN (1939) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	<ul style="list-style-type: none"> <li>• LR13.3</li> <li>• LR14.1.L</li> </ul>
<b>Description:</b> The alarm is raised when an X2 Access is operationally down.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Disabled') AND ('Administrative State' EQUAL 'Unlocked') AND (('Availability Status'anyBit'Failed') OR ('Availability Status'anyBit'Dependency')))		
<b>Clearing condition:</b> (('Administrative State' EQUAL 'Locked') OR ('Operational State' EQUAL 'Enabled') OR NOT (((('Availability Status'anyBit'Failed') OR ('Availability Status'anyBit'Dependency'))))		
<b>Remedial action:</b> The Equipment is inoperable. Additional attributes may indicate the nature and cause of the issue.		

## 27 — Alcatel-Lucent OS10K alarms

---

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 27-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

**Table 27-2 ActiveAbnormalCondition**

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

**Table 27-3 AggregatedVFLPortDown**

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

**Table 27-4 AGWDiameterPeerDown**

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 27-5 AreaTypeMismatch

Alarm	Attributes	Applicable major releases
Name: AreaTypeMismatch (38) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Area	Severity: warning Implicitly cleared: true Default probable cause: areaTypeMisconfigured (34)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF area on one NE is configured as an NSSA and the same OSPF area on another NE is configured as a stub area.		
<b>Raising condition:</b> ('Type Mismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('Type Mismatch' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The OSPF area type configured for the NE does not match with the same OSPF area configured on another NE. Compare the configuration on the endpoint and correct the mismatch.		

Table 27-6 AtcaFanFailure

Alarm	Attributes	Applicable major releases
Name: AtcaFanFailure (1124) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Fan	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('operationalState' EQUAL 'Disabled') OR ('operationalState' EQUAL 'Down'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Enabled') OR ('operationalState' EQUAL 'Up'))		
<b>Remedial action:</b> This alarm is raised if the fan speed falls below 500 rpm. If the alarm persists, replace the appropriate (upper or lower) fan tray.		

Table 27-7 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

## 27 – Alcatel-Lucent OS10K alarms

Table 27-8 BgpDown

Alarm	Attributes	Applicable major releases
Name: BgpDown (6) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a BGP instance has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP protocol entity is down - administratively disable BGP and re-enable. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 27-9 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 27-10 BootableConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

(2 of 2)

Table 27-11 BootParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>• persistentIndexFailure</li> <li>• configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified'))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

Table 27-12 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

## 27 – Alcatel-Lucent OS10K alarms

Table 27-13 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 27-14 ContainingEquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 27-15 ContainingEquipmentOperationallyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

(2 of 2)

Table 27-16 CorruptImageFile

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

Table 27-17 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 27-18 EquipmentAdministrativelyDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 27-19 EquipmentDegraded**

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

**Table 27-20 EquipmentDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

Table 27-21 EquipmentFailure

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 27-22 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 27-23 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		

(1 of 2)

27 — Alcatel-Lucent OS10K alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

(2 of 2)

Table 27-24 EquipmentRemoved

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

Table 27-25 EthernetPortConfiguredLoopback

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

Table 27-26 EthernetPortDuplicateLane

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 27-27 EthernetPortHighBer

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 27-28 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		

(1 of 2)

## 27 – Alcatel-Lucent OS10K alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 27-29 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 27-30 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 27-31 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 27-32 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 27-33 EthernetPortSignalFailure

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		

(1 of 2)

27 – Alcatel-Lucent OS10K alarms

---

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 27-34 FanFailure

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfService'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

Table 27-35 FanTrayRemoved

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

Table 27-36 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL 'OL'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL 'OL'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 27-37 FrameSizeProblem (svt)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('Operational State' EQUAL 'MTU Mismatch') OR ('Operational State' EQUAL 'Tunnel MTU Too Small'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'MTU Mismatch') AND ('Operational State' NOT EQUAL 'Tunnel MTU Too Small'))		
<b>Remedial action:</b> The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 27-38 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggns Raised on class: Iteggns.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

## 27 — Alcatel-Lucent OS10K alarms

Table 27-39 IfVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

Table 27-40 IgmpDown

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

Table 27-41 IgmpSnoopingDown

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

Table 27-42 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

Table 27-43 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface is not in operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue is resolved, the alarm will clear.		

Table 27-44 IsisDown

Alarm	Attributes	Applicable major releases
Name: IsisDown (19) Type: ProtocolAlarm (1) Package: isis Raised on class: isis.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an IS-IS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		

(1 of 2)

27 – Alcatel-Lucent OS10K alarms

---

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The protocol is not working anymore, could be a problem with IP addresses, resources on the device, ...		

(2 of 2)

Table 27-45 LabelProblem

Alarm	Attributes	Applicable major releases
Name: LabelProblem (98) Type: CircuitAlarm (17) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: labelProblem (84)	<ul style="list-style-type: none"> <li>7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an ingress or an egress label is missing.		
<b>Raising condition:</b> (('Operational State' EQUAL 'No Egress Label') OR ('Operational State' EQUAL 'No Ingress Label') OR ('Operational State' EQUAL 'No Labels'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'No Egress Label') AND ('Operational State' NOT EQUAL 'No Ingress Label') AND ('Operational State' NOT EQUAL 'No Labels'))		
<b>Remedial action:</b> An ingress or egress label is missing for the SDP binding.		

Table 27-46 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>7.1.1</li> <li>7.2.1</li> <li>7.3.1</li> <li>7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 27-47 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 27-48 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 27-49 LinkDown (equipment)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

**Table 27-50 LowTemperatureDetected**

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

**Table 27-51 LowTemperatureThresholdCrossed**

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

**Table 27-52 LpsViolation**

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

Table 27-53 macMoveRateExceeded (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

Table 27-54 macMoveRateExceededNonBlock (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

Table 27-55 MepAISReceivedAlarm

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetOam Raised on class: ethernetOam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

## 27 — Alcatel-Lucent OS10K alarms

Table 27-56 MobileConnectorDown

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\')		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\')		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

Table 27-57 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

Table 27-58 NeighborDown

Alarm	Attributes	Applicable major releases
Name: NeighborDown (121) Type: NeighborDown (20) Package: ospf Raised on class: ospf.AbstractNeighbor	Severity: major Implicitly cleared: true Default probable cause: NeighborDown (103)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface neighbor is operationally Down.		
<b>Raising condition:</b> ('Operational State' NOT EQUAL 'full')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'full')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> This alarm is raised when the OSPF interface neighbor is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

(2 of 2)

Table 27-59 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>7.1.1</li> <li>7.2.1</li> <li>7.3.1</li> <li>7.3.2</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

Table 27-60 NewSsh2ServerKeyDetected

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>7.1.1</li> <li>7.2.1</li> <li>7.3.1</li> <li>7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

**Table 27-61 NodeDatabaseFallbackDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

**Table 27-62 NodeDatabaseMisalignmentDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

**Table 27-63 NodeSuspended**

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 27-64 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotManagedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) It is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM.Add an discovery rule in order to managed it.		

Table 27-65 OspflInterfaceDown

Alarm	Attributes	Applicable major releases
Name: OspflInterfaceDown (141) Type: OspflInterfaceDown (24) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: true Default probable cause: OspflInterfaceDown (112)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface is operationally down.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Down')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF interface is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 27-66 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

## 27 – Alcatel-Lucent OS10K alarms

Table 27-67 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

Table 27-68 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

Table 27-69 PimDown

Alarm	Attributes	Applicable major releases
Name: PimDown (184) Type: ProtocolAlarm (1) Package: pim Raised on class: pim.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a PIM site is administratively Up but operationally Down. The alarm is cleared when the PIM site becomes operationally Up but administratively Down.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This should never happen. Contact Alcatel-Lucent Customer Support for assistance.		

(2 of 2)

Table 27-70 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 27-71 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

## 27 — Alcatel-Lucent OS10K alarms

Table 27-72 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

Table 27-73 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 27-74 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('inputFeedStatus' EQUAL 'Input A Down') OR ('inputFeedStatus' EQUAL 'Input B Down') OR ('inputFeedStatus'allBits'Input A Down') AND ('inputFeedStatus'allBits'Input B Down'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('inputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

(2 of 2)

**Table 27-75 PowerSupplyRemoved**

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

**Table 27-76 PrimaryImageBootFailure**

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

## 27 — Alcatel-Lucent OS10K alarms

Table 27-77 RadiusOperStatusDown

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

Table 27-78 ReachabilityProblem

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 27-79 ReconfigFailure

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Verify that the object is configured as expected.		

(2 of 2)

Table 27-80 RedundantMepMisconfiguration

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

Table 27-81 RedundantMepMissing

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\'))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\')))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

## 27 – Alcatel-Lucent OS10K alarms

Table 27-82 RemoteMepCCMAAlarm

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

Table 27-83 RipDown

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 27-84 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 27-85 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>7.1.1</li> <li>7.2.1</li> <li>7.3.1</li> <li>7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 27-86 SdpBindingDown

Alarm	Attributes	Applicable major releases
Name: SdpBindingDown (221) Type: SdpBindingAlarm (30) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: SdpBindingNotReady (166)	<ul style="list-style-type: none"> <li>7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an SDP binding has an Operational State other than Up.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-Homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For BGP Multi-Homing'))		
<b>Remedial action:</b> To resolve this alarm check the SDP binding to determine if a configuration mismatch exists. If configuration is determined to be correct then the associated network interface may be down. Further investigation is required to determine why the underlying network interface is down.		

Table 27-87 SdpBindingTunnelDown

Alarm	Attributes	Applicable major releases
Name: SdpBindingTunnelDown (222) Type: CircuitAlarm (17) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: SdpTunnelNotReady (167)	<ul style="list-style-type: none"> <li>7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an SDP binding tunnel has an Operational State other than Up.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Tunnel Not Ready') OR ('Operational State' EQUAL 'Tunnel Down'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'Tunnel Not Ready') AND ('Operational State' NOT EQUAL 'Tunnel Down'))		

(1 of 2)

27 — Alcatel-Lucent OS10K alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> To resolve this alarm check the endpoints of the SDP binding to determine if a configuration mismatch exists. If configuration matches then the underlying network resource between the endpoints of the SDP may be down. Further investigation is required to determine why the underlying transport network is down.		

(2 of 2)

Table 27-88 ServiceSiteDown

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

Table 27-89 SiteManagementVlanConflict

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

Table 27-90 SiteVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

Table 27-91 SpbSiteDown

Alarm	Attributes	Applicable major releases
Name: SpbSiteDown (4396) Type: ProtocolAlarm (1) Package: spb Raised on class: spb.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an SPB site has an Operational State other than Up.		
<b>Raising condition:</b> ('Operational State' NOT EQUAL 'Up')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Check if the administrative state is down. If the administrative state is up, then check the ISIS instance associated with the SPB and make sure it is up.		

Table 27-92 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

## 27 — Alcatel-Lucent OS10K alarms

Table 27-93 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

Table 27-94 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

Table 27-95 TemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

(2 of 2)

Table 27-96 TmnxEqPortEtherLoopDetected

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

Table 27-97 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

## 27 – Alcatel-Lucent OS10K alarms

Table 27-98 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>7.1.1</li> <li>7.2.1</li> <li>7.3.1</li> <li>7.3.2</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

Table 27-99 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>7.1.1</li> <li>7.2.1</li> <li>7.3.1</li> <li>7.3.2</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

(2 of 2)

Table 27-100 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 27-101 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 27-102 UpgradedBuildVersionMismatch

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>

(1 of 2)

27 – Alcatel-Lucent OS10K alarms

---

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

(2 of 2)

Table 27-103 upgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 27-104 VersionConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 27-105 VirtualLinkDown

Alarm	Attributes	Applicable major releases
Name: VirtualLinkDown (122) Type: VirtualLinkAlarm (21) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: true Default probable cause: VirtualLinkDown (104)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a virtual link is Down.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Operational State' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 27-106 VirtualNeighborDown

Alarm	Attributes	Applicable major releases
Name: VirtualNeighborDown (123) Type: VirtualNeighborDown (22) Package: ospf Raised on classes: <ul style="list-style-type: none"> <li>• ospf.ShamLink</li> <li>• ospf.VirtualLink</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: VirtualNeighborDown (105)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when a neighbor virtual link is operationally down.		
<b>Raising condition:</b> ('neighborCount' EQUAL '0L')		
<b>Clearing condition:</b> ('neighborCount' NOT EQUAL '0L')		
<b>Remedial action:</b> This alarm is raised when the OSPF neighbor virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 27-107 WrongCpaaSoftwareVersion

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 7.1.1</li> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		

(1 of 2)

**27 – Alcatel-Lucent OS10K alarms**

---

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Software Version' NOT EQUAL \"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

**(2 of 2)**

## 28 — Alcatel-Lucent OS6250 alarms

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 28-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

## 28 – Alcatel-Lucent OS6250 alarms

Table 28-2 ActiveAbnormalCondition

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

Table 28-3 AggregatedVFLPortDown

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

Table 28-4 AGWDiameterPeerDown

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

(2 of 2)

Table 28-5 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

Table 28-6 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

## 28 – Alcatel-Lucent OS6250 alarms

Table 28-7 BootableConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 28-8 BootParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>• persistentIndexFailure</li> <li>• configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified'))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

Table 28-9 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

(2 of 2)

Table 28-10 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 28-11 ContainingEquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

## 28 – Alcatel-Lucent OS6250 alarms

Table 28-12 ContainingEquipmentOperationallyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

Table 28-13 CorruptImageFile

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

Table 28-14 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 28-15 EfmOamAlarm

Alarm	Attributes	Applicable major releases
Name: EfmOamAlarm (4617) Type: equipmentAlarm (3) Package: ethernetequipment Raised on class: ethernetequipment.Dot3Oam	Severity: minor Implicitly cleared: true Default probable cause: EFMOAMOperationalstateOutOfService (1886)	<ul style="list-style-type: none"> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		
<b>Raising condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Clearing condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Remedial action:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		

Table 28-16 EquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

**28 – Alcatel-Lucent OS6250 alarms****Table 28-17 EquipmentDegraded**

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

**Table 28-18 EquipmentDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

**Table 28-19 EquipmentFailure**

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

(2 of 2)

Table 28-20 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 28-21 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

## 28 — Alcatel-Lucent OS6250 alarms

Table 28-22 EquipmentRemoved

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

Table 28-23 EthernetPortConfiguredLoopback

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

Table 28-24 EthernetPortDuplicateLane

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

(2 of 2)

Table 28-25 EthernetPortHighBer

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 28-26 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

## 28 – Alcatel-Lucent OS6250 alarms

Table 28-27 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 28-28 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 28-29 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 28-30 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 28-31 EthernetPortSignalFailure

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

## 28 – Alcatel-Lucent OS6250 alarms

Table 28-32 FanFailure

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfservice'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

Table 28-33 FanTrayRemoved

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

Table 28-34 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL '0L'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL '0L'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 28-35 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggns Raised on class: Iteggns.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 28-36 IfVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

Table 28-37 IgmpDown

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		

(1 of 2)

## 28 – Alcatel-Lucent OS6250 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

(2 of 2)

Table 28-38 IgmpSnoopingDown

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

Table 28-39 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

Table 28-40 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface in not operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue w		

Table 28-41 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 28-42 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>

(1 of 2)

## 28 – Alcatel-Lucent OS6250 alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

(2 of 2)

Table 28-43 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 28-44 LinkDown (equipment)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

Table 28-45 LowTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 28-46 LowTemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 28-47 LpsViolation

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		

(1 of 2)

28 – Alcatel-Lucent OS6250 alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

(2 of 2)

**Table 28-48 macMoveRateExceeded (service)**

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

**Table 28-49 macMoveRateExceededNonBlock (service)**

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

Table 28-50 MepAISReceivedAlarm

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

Table 28-51 MobileConnectorDown

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\')		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\')		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

Table 28-52 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		

(1 of 2)

## 28 – Alcatel-Lucent OS6250 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

(2 of 2)

Table 28-53 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

Table 28-54 NewSsh2ServerKeyDetected

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

Table 28-55 NodeDatabaseFallbackDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

Table 28-56 NodeDatabaseMisalignmentDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

Table 28-57 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		

(1 of 2)

28 – Alcatel-Lucent OS6250 alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

(2 of 2)

Table 28-58 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotManagedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) It is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM. Add an discovery rule in order to managed it.		

Table 28-59 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 28-60 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

Table 28-61 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

Table 28-62 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>

(1 of 2)

## 28 – Alcatel-Lucent OS6250 alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

(2 of 2)

Table 28-63 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

Table 28-64 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

Table 28-65 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 28-66 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('inputFeedStatus' EQUAL 'Input A Down') OR ('inputFeedStatus' EQUAL 'Input B Down') OR (('inputFeedStatus'allBits'Input A Down') AND ('inputFeedStatus'allBits'Input B Down'))		
<b>Clearing condition:</b> ('inputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

Table 28-67 PowerSupplyRemoved

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		

(1 of 2)

28 – Alcatel-Lucent OS6250 alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

(2 of 2)

Table 28-68 PrimaryImageBootFailure

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 28-69 RadiusOperStatusDown

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

Table 28-70 ReachabilityProblem

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 28-71 ReconfigFailure

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		
<b>Remedial action:</b> Verify that the object is configured as expected.		

Table 28-72 RedundantMepMisconfiguration

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		

(1 of 2)

**28 – Alcatel-Lucent OS6250 alarms**

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

(2 of 2)

**Table 28-73 RedundantMepMissing**

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\\"'))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\\"')))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

**Table 28-74 RemoteMepCCMAAlarm**

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

Table 28-75 RipDown

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 28-76 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 28-77 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		

(1 of 2)

28 – Alcatel-Lucent OS6250 alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

(2 of 2)

Table 28-78 ServiceSiteDown

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

Table 28-79 SiteManagementVlanConflict

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

Table 28-80 SiteVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

Table 28-81 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

Table 28-82 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		

(1 of 2)

**28 – Alcatel-Lucent OS6250 alarms**

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

(2 of 2)

**Table 28-83 SubSysChassMemoryUsageHi**

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

**Table 28-84 TemperatureThresholdCrossed**

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 28-85 TlsSiteDown

Alarm	Attributes	Applicable major releases
Name: TlsSiteDown (163) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.TlsSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('TLS Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('TLS Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable TLS Admin Status under the Bridge Instance.		

Table 28-86 TmnxEqPortEtherLoopDetected

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

Table 28-87 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		

(1 of 2)

## 28 – Alcatel-Lucent OS6250 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

(2 of 2)

Table 28-88 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

Table 28-89 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

(2 of 2)

Table 28-90 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 28-91 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

**28 – Alcatel-Lucent OS6250 alarms****Table 28-92 UpgradedBuildVersionMismatch**

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

**Table 28-93 upgradedCardAlarm**

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 28-94 VersionConfigRestoreFailed**

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

(2 of 2)

Table 28-95 WrongCpaaSoftwareVersion

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 6.6.1</li> <li>• 6.6.2</li> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL '"TiMOS-B-3.0.Generic "') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Clearing condition:</b> (('Software Version' NOT EQUAL '"TiMOS-B-3.0.Generic "') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

## 29 — Alcatel-Lucent OS6400 alarms

---

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 29-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

**Table 29-2 ActiveAbnormalCondition**

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

**Table 29-3 AggregatedVFLPortDown**

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

**Table 29-4 AGWDiameterPeerDown**

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 29-5 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

Table 29-6 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 29-7 BootableConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		

(1 of 2)

## 29 — Alcatel-Lucent OS6400 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

(2 of 2)

Table 29-8 BootParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>• persistentIndexFailure</li> <li>• configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified'))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

Table 29-9 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

**Table 29-10 ContainingEquipmentAdministrativelyDown**

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 29-11 ContainingEquipmentMismatch**

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

**Table 29-12 ContainingEquipmentOperationallyDown**

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		

(1 of 2)

29 – Alcatel-Lucent OS6400 alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

(2 of 2)

Table 29-13 CorruptImageFile

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

Table 29-14 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 29-15 EfmOamAlarm

Alarm	Attributes	Applicable major releases
Name: EfmOamAlarm (4617) Type: equipmentAlarm (3) Package: ethernetEquipment Raised on class: ethernetEquipment.Dot3Oam	Severity: minor Implicitly cleared: true Default probable cause: EFMOperationalStateOutOfService (1886)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		
<b>Raising condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Clearing condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Remedial action:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		

Table 29-16 EquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 29-17 EquipmentDegraded

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

## 29 – Alcatel-Lucent OS6400 alarms

Table 29-18 EquipmentDown

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

Table 29-19 EquipmentFailure

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 29-20 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 29-21 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 29-22 EquipmentRemoved

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

Table 29-23 EthernetPortConfiguredLoopback

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>

(1 of 2)

## 29 – Alcatel-Lucent OS6400 alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

(2 of 2)

Table 29-24 EthernetPortDuplicateLane

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 29-25 EthernetPortHighBer

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 29-26 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 29-27 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 29-28 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		

(1 of 2)

## 29 – Alcatel-Lucent OS6400 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

(2 of 2)

Table 29-29 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> ((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock')))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 29-30 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> ((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault')))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

**Table 29-31 EthernetPortSignalFailure**

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

**Table 29-32 FanFailure**

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfservice'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

**Table 29-33 FanTrayRemoved**

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

## 29 – Alcatel-Lucent OS6400 alarms

Table 29-34 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL 'OL'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL 'OL'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 29-35 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggsn Raised on class: Iteggsn.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 29-36 IfVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

(2 of 2)

Table 29-37 IgmpDown

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

Table 29-38 IgmpSnoopingDown

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

Table 29-39 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		

(1 of 2)

## 29 – Alcatel-Lucent OS6400 alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

(2 of 2)

Table 29-40 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface in not operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue w		

Table 29-41 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end) may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and that the cable has not been damaged.		

Table 29-42 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 29-43 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 29-44 LinkDown (equipment)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

## 29 — Alcatel-Lucent OS6400 alarms

Table 29-45 LowTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 29-46 LowTemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 29-47 LpsViolation

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

Table 29-48 macMoveRateExceeded (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

Table 29-49 macMoveRateExceededNonBlock (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

Table 29-50 MepAISReceivedAlarm

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetOam Raised on class: ethernetOam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

## 29 – Alcatel-Lucent OS6400 alarms

Table 29-51 MobileConnectorDown

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\')		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\')		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

Table 29-52 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

Table 29-53 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

(2 of 2)

Table 29-54 NewSsh2ServerKeyDetected

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>6.4.3</li> <li>6.4.4</li> <li>6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

Table 29-55 NodeDatabaseFallbackDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>6.4.3</li> <li>6.4.4</li> <li>6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

## 29 – Alcatel-Lucent OS6400 alarms

Table 29-56 NodeDatabaseMisalignmentDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

Table 29-57 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 29-58 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotManagedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) it is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM. Add an discovery rule in order to managed it.		

Table 29-59 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 29-60 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

Table 29-61 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		

(1 of 2)

## 29 – Alcatel-Lucent OS6400 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

(2 of 2)

Table 29-62 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 29-63 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

Table 29-64 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

Table 29-65 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 29-66 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('inputFeedStatus' EQUAL 'Input A Down') OR ('inputFeedStatus' EQUAL 'Input B Down') OR ('inputFeedStatus'allBits'Input A Down') AND ('inputFeedStatus'allBits'Input B Down'))		

(1 of 2)

29 – Alcatel-Lucent OS6400 alarms

---

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('inputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

(2 of 2)

**Table 29-67 PowerSupplyRemoved**

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

**Table 29-68 PrimaryImageBootFailure**

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 29-69 RadiusOperStatusDown

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

Table 29-70 ReachabilityProblem

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 29-71 ReconfigFailure

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		

(1 of 2)

## 29 – Alcatel-Lucent OS6400 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Verify that the object is configured as expected.		

(2 of 2)

Table 29-72 RedundantMepMisconfiguration

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

Table 29-73 RedundantMepMissing

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\'))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\')))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

Table 29-74 RemoteMepCCMAAlarm

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

Table 29-75 RipDown

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 29-76 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

## 29 – Alcatel-Lucent OS6400 alarms

Table 29-77 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 29-78 ServiceSiteDown

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

Table 29-79 SiteManagementVlanConflict

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

(2 of 2)

Table 29-80 SiteVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

Table 29-81 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

Table 29-82 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>

(1 of 2)

## 29 – Alcatel-Lucent OS6400 alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

(2 of 2)

Table 29-83 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

Table 29-84 TemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 29-85 TlsSiteDown

Alarm	Attributes	Applicable major releases
Name: TlsSiteDown (163) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.TlsSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('TLS Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('TLS Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable TLS Admin Status under the Bridge Instance.		

Table 29-86 TmnxEqPortEtherLoopDetected

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

Table 29-87 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		

(1 of 2)

## 29 – Alcatel-Lucent OS6400 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

(2 of 2)

Table 29-88 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

Table 29-89 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

(2 of 2)

Table 29-90 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 29-91 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

**Table 29-92 UpgradedBuildVersionMismatch**

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

**Table 29-93 upgradedCardAlarm**

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 29-94 VersionConfigRestoreFailed**

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

**Table 29-95 WrongCpaaSoftwareVersion**

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL 'TiMOS-B-3.0.Generic "') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Clearing condition:</b> (('Software Version' NOT EQUAL 'TiMOS-B-3.0.Generic "') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

## 30 — Alcatel-Lucent OS6450 alarms

---

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 30-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

**Table 30-2 ActiveAbnormalCondition**

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

**Table 30-3 AggregatedVFLPortDown**

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

**Table 30-4 AGWDiameterPeerDown**

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 30-5 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>6.6.3</li> <li>6.6.4</li> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

Table 30-6 BITS2NotQualified

Alarm	Attributes	Applicable major releases
Name: BITS2NotQualified (1941) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: timingReferenceNotQualified (418)	<ul style="list-style-type: none"> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the BITS-2 timing reference on an NE is not in the Qualified state.		
<b>Raising condition:</b> (('Qualified For Use' EQUAL 'Not Qualified') AND ('Input Administrative State' NOT EQUAL 'Down'))		
<b>Clearing condition:</b> (('Qualified For Use' NOT EQUAL 'Not Qualified') OR ('Input Administrative State' EQUAL 'Down'))		
<b>Remedial action:</b> Make sure that BITS2 is qualified		

Table 30-7 BITSNotQualified

Alarm	Attributes	Applicable major releases
Name: BITSNotQualified (547) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: timingReferenceNotQualified (418)	<ul style="list-style-type: none"> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the BITS timing reference on an NE is not in the Qualified state.		
<b>Raising condition:</b> (('Qualified For Use' EQUAL 'Not Qualified') AND ('Output Administrative State' NOT EQUAL 'Down'))		
<b>Clearing condition:</b> (('Qualified For Use' NOT EQUAL 'Not Qualified') OR ('Output Administrative State' EQUAL 'Down'))		
<b>Remedial action:</b> Make sure that BITS is qualified		

**Table 30-8 BITSReferenceLossOfSignal**

Alarm	Attributes	Applicable major releases
Name: BITSReferenceLossOfSignal (1950) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: BITSReferenceLossOfSignal (938)	<ul style="list-style-type: none"> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the BITS reference on an NE is not qualified due to Loss of Signal.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'LOS'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'LOS'))))		
<b>Remedial action:</b> Make sure that peer connected to BITS is properly configured.		

**Table 30-9 BITSReferenceOutOfFrequency**

Alarm	Attributes	Applicable major releases
Name: BITSReferenceOutOfFrequency (1951) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: BITSReferenceOutOfFrequency (939)	<ul style="list-style-type: none"> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the BITS Reference on an NE is not qualified due to Out of frequency.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'OOF'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'OOF'))))		
<b>Remedial action:</b> Make sure that frequency configured for BITS is correct.		

**Table 30-10 BITSReferenceOutOfPollInRange**

Alarm	Attributes	Applicable major releases
Name: BITSReferenceOutOfPollInRange (1952) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: BITSReferenceOutOfPollInRange (940)	<ul style="list-style-type: none"> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the BITS Reference on an NE is not qualified state due to Out of poll in range.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'OOPIR'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'OOPIR'))))		
<b>Remedial action:</b> Check the BITS is configured correctly. Check the SONET port is configured correctly and that the physical layer cabling is operating correctly. Call customer support if necessary		

Table 30-11 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 30-12 BootableConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 30-13 BootParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>• persistentIndexFailure</li> <li>• configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		

(1 of 2)

## 30 – Alcatel-Lucent OS6450 alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (((('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified')))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

(2 of 2)

Table 30-14 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

Table 30-15 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 30-16 ContainingEquipmentMismatch**

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

**Table 30-17 ContainingEquipmentOperationallyDown**

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

**Table 30-18 CorruptImageFile**

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		

(1 of 2)

## 30 – Alcatel-Lucent OS6450 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

(2 of 2)

Table 30-19 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 30-20 EfmOamAlarm

Alarm	Attributes	Applicable major releases
Name: EfmOamAlarm (4617) Type: equipmentAlarm (3) Package: ethernetEquipment Raised on class: ethernetEquipment.Dot3Oam	Severity: minor Implicitly cleared: true Default probable cause: EFMOAMOperationalStateOutOfService (1886)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		
<b>Raising condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Clearing condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Remedial action:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		

**Table 30-21 EquipmentAdministrativelyDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 30-22 EquipmentDegraded**

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

**Table 30-23 EquipmentDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

## 30 – Alcatel-Lucent OS6450 alarms

Table 30-24 EquipmentFailure

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 30-25 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 30-26 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

(2 of 2)

Table 30-27 EquipmentRemoved

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

Table 30-28 EthernetPortConfiguredLoopback

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

## 30 – Alcatel-Lucent OS6450 alarms

Table 30-29 EthernetPortDuplicateLane

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 30-30 EthernetPortHighBer

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 30-31 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 30-32 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 30-33 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

## 30 – Alcatel-Lucent OS6450 alarms

Table 30-34 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 30-35 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 30-36 EthernetPortSignalFailure

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 30-37 ExternalTimingReferenceNotQualified

Alarm	Attributes	Applicable major releases
Name: ExternalTimingReferenceNotQualified (548) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: timingReferenceNotQualified (418)	<ul style="list-style-type: none"> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the External timing reference on an NE is not in the Qualified state.		
<b>Raising condition:</b> (('Qualified For Use' EQUAL 'Not Qualified') AND ('Administrative State' NOT EQUAL 'Down'))		
<b>Clearing condition:</b> (('Qualified For Use' NOT EQUAL 'Not Qualified') OR ('Administrative State' EQUAL 'Down'))		
<b>Remedial action:</b> Informational		

Table 30-38 FanFailure

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>6.6.3</li> <li>6.6.4</li> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfservice'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

**Table 30-39 FanTrayRemoved**

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

**Table 30-40 FrameSizeProblem (netw)**

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL '0L'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL '0L'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

**Table 30-41 GaPeerDown**

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggns Raised on class: Iteggns.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 30-42 IfVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

Table 30-43 IgmpDown

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

Table 30-44 IgmpSnoopingDown

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

## 30 – Alcatel-Lucent OS6450 alarms

Table 30-45 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

Table 30-46 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface is not in operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue is resolved, the alarm will clear.		

Table 30-47 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end) may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and that the cable has not been damaged.		

(2 of 2)

Table 30-48 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 30-49 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

**Table 30-50 LinkDown (equipment)**

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

**Table 30-51 LowTemperatureDetected**

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

**Table 30-52 LowTemperatureThresholdCrossed**

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 30-53 LpsViolation

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

Table 30-54 macMoveRateExceeded (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

Table 30-55 macMoveRateExceededNonBlock (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

## 30 – Alcatel-Lucent OS6450 alarms

Table 30-56 MepAISReceivedAlarm

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

Table 30-57 MobileConnectorDown

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: IteService Raised on class: IteService.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\')		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\')		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

Table 30-58 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

Table 30-59 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band')))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band')))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

Table 30-60 NewSsh2ServerKeyDetected

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

**Table 30-61 NodeDatabaseFallbackDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

**Table 30-62 NodeDatabaseMisalignmentDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

**Table 30-63 NodeSuspended**

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 30-64 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotMangedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) it is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM.Add an discovery rule in order to managed it.		

Table 30-65 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 30-66 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		

(1 of 2)

## 30 – Alcatel-Lucent OS6450 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

(2 of 2)

Table 30-67 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

Table 30-68 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 30-69 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

Table 30-70 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

Table 30-71 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		

(1 of 2)

## 30 – Alcatel-Lucent OS6450 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

(2 of 2)

Table 30-72 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('inputFeedStatus' EQUAL 'Input A Down') OR ('inputFeedStatus' EQUAL 'Input B Down') OR (('inputFeedStatus'allBits'Input A Down') AND ('inputFeedStatus'allBits'Input B Down'))		
<b>Clearing condition:</b> ('inputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

Table 30-73 PowerSupplyRemoved

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

**Table 30-74 PrimaryImageBootFailure**

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

**Table 30-75 PTPNotQualified**

Alarm	Attributes	Applicable major releases
Name: PTPNotQualified (3611) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: PTPNotQualified (1400)	<ul style="list-style-type: none"> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when PTP on an NE is not in the Qualified state.		
<b>Raising condition:</b> (('Qualified For Use' EQUAL 'Not Qualified'))		
<b>Clearing condition:</b> (('Qualified For Use' NOT EQUAL 'Not Qualified'))		
<b>Remedial action:</b> Check the communication path is up between the local PTP slave clock and its selected master		

**Table 30-76 PTPReferenceLossOfSignal**

Alarm	Attributes	Applicable major releases
Name: PTPReferenceLossOfSignal (3613) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: PTPReferenceLossOfSignal (1402)	<ul style="list-style-type: none"> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the PTP reference on an NE is not qualified due to Loss of Signal.		
<b>Raising condition:</b> (('Not Qualified Due To anyBit'LOS'))		
<b>Clearing condition:</b> NOT (('Not Qualified Due To anyBit'LOS'))		
<b>Remedial action:</b> Check the communication path is up between the local PTP slave clock and its selected master		

**Table 30-77 PTPReferenceOutOfFrequency**

Alarm	Attributes	Applicable major releases
Name: PTPReferenceOutOfFrequency (3614) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: PTPReferenceOutOfFrequency (1403)	<ul style="list-style-type: none"> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the PTP Reference on an NE is not qualified due to Out of frequency.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'OOFF'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'OOFF'))))		
<b>Remedial action:</b> Make sure that frequency configured for Reference One is correct.		

**Table 30-78 PTPReferenceOutOfPollInRange**

Alarm	Attributes	Applicable major releases
Name: PTPReferenceOutOfPollInRange (3615) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: PTPReferenceOutOfPollInRange (1404)	<ul style="list-style-type: none"> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the PTP Reference on an NE is not qualified state due to Out of poll in range.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'OOPIR'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'OOPIR'))))		
<b>Remedial action:</b> If there is packet flow, the PTP slave clock is in it's initial acquiring states where the sync-if-timing reference does not qualify just wait.		

**Table 30-79 RadiusOperStatusDown**

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>6.6.3</li> <li>6.6.4</li> <li>6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

Table 30-80 ReachabilityProblem

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 30-81 ReconfigFailure

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		
<b>Remedial action:</b> Verify that the object is configured as expected.		

Table 30-82 RedundantMepMisconfiguration

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetOam Raised on class: ethernetOam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		

(1 of 2)

## 30 – Alcatel-Lucent OS6450 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

(2 of 2)

Table 30-83 RedundantMepMissing

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\\""))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\\""))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

Table 30-84 RemoteMepCCMAAlarm

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

Table 30-85 RipDown

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 30-86 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 30-87 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

**Table 30-88 ServiceSiteDown**

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

**Table 30-89 SiteManagementVlanConflict**

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

**Table 30-90 SiteVlanSubTypeConflict**

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

Table 30-91 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

Table 30-92 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

Table 30-93 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		

(1 of 2)

**30 – Alcatel-Lucent OS6450 alarms**

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

(2 of 2)

**Table 30-94 TemperatureThresholdCrossed**

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

**Table 30-95 TlsSiteDown**

Alarm	Attributes	Applicable major releases
Name: TlsSiteDown (163) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.TlsSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('TLS Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('TLS Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable TLS Admin Status under the Bridge Instance.		

**Table 30-96 TmnxEqPortEtherLoopDetected**

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetEquipment Raised on class: ethernetEquipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

**Table 30-97 TrapDestinationMisconfigured**

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

**Table 30-98 TrapReceivingFailure**

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		

(1 of 2)

## 30 – Alcatel-Lucent OS6450 alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'In Band Preferred')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

(2 of 2)

Table 30-99 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>6.6.3</li> <li>6.6.4</li> <li>6.6.5</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

Table 30-100 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 30-101 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 30-102 UpgradedBuildVersionMismatch

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

## 30 – Alcatel-Lucent OS6450 alarms

Table 30-103 upgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 30-104 VersionConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 30-105 WrongCpaaSoftwareVersion

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 6.6.3</li> <li>• 6.6.4</li> <li>• 6.6.5</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Clearing condition:</b> (('Software Version' NOT EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

## 31 — Alcatel-Lucent OS6850/6850E alarms

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 31-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

**Table 31-2 ActiveAbnormalCondition**

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

**Table 31-3 AggregatedVFLPortDown**

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

**Table 31-4 AGWDiameterPeerDown**

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

(2 of 2)

Table 31-5 AreaTypeMismatch

Alarm	Attributes	Applicable major releases
Name: AreaTypeMismatch (38) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Area	Severity: warning Implicitly cleared: true Default probable cause: areaTypeMisconfigured (34)	<ul style="list-style-type: none"> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF area on one NE is configured as an NSSA and the same OSPF area on another NE is configured as a stub area.		
<b>Raising condition:</b> ('Type Mismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('Type Mismatch' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The OSPF area type configured for the NE does not match with the same OSPF area configured on another NE. Compare the configuration on the endpoint and correct the mismatch.		

Table 31-6 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

## 31 – Alcatel-Lucent OS6850/6850E alarms

Table 31-7 BgpDown

Alarm	Attributes	Applicable major releases
Name: BgpDown (6) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a BGP instance has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP protocol entity is down - administratively disable BGP and re-enable. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 31-8 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 31-9 BootableConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

(2 of 2)

Table 31-10 BootParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>• persistentIndexFailure</li> <li>• configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (((('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified'))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

Table 31-11 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

## 31 – Alcatel-Lucent OS6850/6850E alarms

Table 31-12 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 31-13 ContainingEquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 31-14 ContainingEquipmentOperationallyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

(2 of 2)

Table 31-15 CorruptImageFile

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

Table 31-16 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 31-17 EfmOamAlarm**

Alarm	Attributes	Applicable major releases
Name: EfmOamAlarm (4617) Type: equipmentAlarm (3) Package: ethernetEquipment Raised on class: ethernetEquipment.Dot3Oam	Severity: minor Implicitly cleared: true Default probable cause: EFMOperationalStateOutOfService (1886)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		
<b>Raising condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Clearing condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Remedial action:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		

**Table 31-18 EquipmentAdministrativelyDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 31-19 EquipmentDegraded**

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

Table 31-20 EquipmentDown

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

Table 31-21 EquipmentFailure

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 31-22 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		

(1 of 2)

31 – Alcatel-Lucent OS6850/6850E alarms

---

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

**Table 31-23 EquipmentMismatch**

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

**Table 31-24 EquipmentRemoved**

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

**Table 31-25 EthernetPortConfiguredLoopback**

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

**Table 31-26 EthernetPortDuplicateLane**

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

**Table 31-27 EthernetPortHighBer**

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		

(1 of 2)

## 31 – Alcatel-Lucent OS6850/6850E alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 31-28 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 31-29 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 31-30 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 31-31 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 31-32 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		

(1 of 2)

## 31 – Alcatel-Lucent OS6850/6850E alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 31-33 EthernetPortSignalFailure

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 31-34 FanFailure

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfService'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

Table 31-35 FanTrayRemoved

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

Table 31-36 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL '0L'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL '0L'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 31-37 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggns Raised on class: Iteggns.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		

(1 of 2)

31 – Alcatel-Lucent OS6850/6850E alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

(2 of 2)

Table 31-38 IfVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

Table 31-39 IgmpDown

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

Table 31-40 IgmpSnoopingDown

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

Table 31-41 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

Table 31-42 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		

(1 of 2)

## 31 – Alcatel-Lucent OS6850/6850E alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface in not operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue w		

(2 of 2)

Table 31-43 IsisDown

Alarm	Attributes	Applicable major releases
Name: IsisDown (19) Type: ProtocolAlarm (1) Package: isis Raised on class: isis.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an IS-IS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The protocol is not working anymore, could be a problem with IP addresses, resources on the device, ...		

Table 31-44 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 31-45 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 31-46 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 31-47 LinkDown (equipment)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		

(1 of 2)

31 – Alcatel-Lucent OS6850/6850E alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

(2 of 2)

**Table 31-48 LowTemperatureDetected**

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

**Table 31-49 LowTemperatureThresholdCrossed**

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 31-50 LpsViolation

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

Table 31-51 macMoveRateExceeded (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

Table 31-52 macMoveRateExceededNonBlock (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

## 31 – Alcatel-Lucent OS6850/6850E alarms

Table 31-53 MepAISReceivedAlarm

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

Table 31-54 MobileConnectorDown

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\')		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\')		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

Table 31-55 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

(2 of 2)

Table 31-56 NeighborDown

Alarm	Attributes	Applicable major releases
Name: NeighborDown (121) Type: NeighborDown (20) Package: ospf Raised on class: ospf.AbstractNeighbor	Severity: major Implicitly cleared: true Default probable cause: NeighborDown (103)	<ul style="list-style-type: none"> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface neighbor is operationally Down.		
<b>Raising condition:</b> ('Operational State' NOT EQUAL 'full')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'full')		
<b>Remedial action:</b> This alarm is raised when the OSPF interface neighbor is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 31-57 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band')))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band')))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

**Table 31-58 NewSsh2ServerKeyDetected**

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

**Table 31-59 NodeDatabaseFallbackDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

**Table 31-60 NodeDatabaseMisalignmentDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

(2 of 2)

Table 31-61 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 31-62 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotManagedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when node is not managed by any EMS after n retries (threshold crossed) it is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM. Add a discovery rule in order to manage it.		

## 31 – Alcatel-Lucent OS6850/6850E alarms

Table 31-63 OspfInterfaceDown

Alarm	Attributes	Applicable major releases
Name: OspfInterfaceDown (141) Type: OspfInterfaceDown (24) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: true Default probable cause: OspfInterfaceDown (112)	<ul style="list-style-type: none"> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface is operationally down.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Down')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF interface is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 31-64 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 31-65 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

(2 of 2)

Table 31-66 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

Table 31-67 PimDown

Alarm	Attributes	Applicable major releases
Name: PimDown (184) Type: ProtocolAlarm (1) Package: pim Raised on class: pim.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a PIM site is administratively Up but operationally Down. The alarm is cleared when the PIM site becomes operationally Up but administratively Down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This should never happen. Contact Alcatel-Lucent Customer Support for assistance.		

## 31 – Alcatel-Lucent OS6850/6850E alarms

Table 31-68 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 31-69 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

Table 31-70 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

(2 of 2)

Table 31-71 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 31-72 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('InputFeedStatus' EQUAL 'Input A Down') OR ('InputFeedStatus' EQUAL 'Input B Down') OR (('InputFeedStatus'allBits'Input A Down') AND ('InputFeedStatus'allBits'Input B Down'))		
<b>Clearing condition:</b> ('InputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

## 31 – Alcatel-Lucent OS6850/6850E alarms

Table 31-73 PowerSupplyRemoved

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

Table 31-74 PrimaryImageBootFailure

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('ImageSource' NOT EQUAL 'Primary') AND ('ImageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('ImageSource' EQUAL 'Primary') OR ('ImageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 31-75 RadiusOperStatusDown

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

(2 of 2)

**Table 31-76 ReachabilityProblem**

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

**Table 31-77 ReconfigFailure**

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		
<b>Remedial action:</b> Verify that the object is configured as expected.		

## 31 – Alcatel-Lucent OS6850/6850E alarms

Table 31-78 RedundantMepMisconfiguration

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

Table 31-79 RedundantMepMissing

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\'))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\')))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

Table 31-80 RemoteMepCCMAAlarm

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

(2 of 2)

Table 31-81 RipDown

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 31-82 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

**Table 31-83 ScheduledPollerProblem**

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

**Table 31-84 ServiceSiteDown**

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

**Table 31-85 SiteManagementVlanConflict**

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

(2 of 2)

Table 31-86 SiteVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

Table 31-87 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

## 31 — Alcatel-Lucent OS6850/6850E alarms

Table 31-88 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

Table 31-89 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

Table 31-90 TemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

(2 of 2)

Table 31-91 TlsSiteDown

Alarm	Attributes	Applicable major releases
Name: TlsSiteDown (163) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.TlsSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('TLS Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('TLS Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable TLS Admin Status under the Bridge Instance.		

Table 31-92 TmnxEqPortEtherLoopDetected

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

Table 31-93 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>trapDestinationMisconfigured</li> <li>duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>6.4.2</li> <li>6.4.3</li> <li>6.4.4</li> <li>6.4.5</li> <li>6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

Table 31-94 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>6.4.2</li> <li>6.4.3</li> <li>6.4.4</li> <li>6.4.5</li> <li>6.4.6</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND (('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND (('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND (('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND (('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND (('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND (('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

Table 31-95 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

Table 31-96 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 31-97 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>

(1 of 2)

31 – Alcatel-Lucent OS6850/6850E alarms

---

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

(2 of 2)

**Table 31-98 UpgradedBuildVersionMismatch**

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

**Table 31-99 upgradedCardAlarm**

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 31-100 VersionConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 31-101 VirtualLinkDown

Alarm	Attributes	Applicable major releases
Name: VirtualLinkDown (122) Type: VirtualLinkAlarm (21) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: true Default probable cause: VirtualLinkDown (104)	<ul style="list-style-type: none"> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a virtual link is Down.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Operational State' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 31-102 VirtualNeighborDown

Alarm	Attributes	Applicable major releases
Name: VirtualNeighborDown (123) Type: VirtualNeighborDown (22) Package: ospf Raised on classes: <ul style="list-style-type: none"> <li>• ospf.ShamLink</li> <li>• ospf.VirtualLink</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: VirtualNeighborDown (105)	<ul style="list-style-type: none"> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a neighbor virtual link is operationally down.		
<b>Raising condition:</b> ('neighborCount' EQUAL '0L')		

(1 of 2)

## 31 – Alcatel-Lucent OS6850/6850E alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('neighborCount' NOT EQUAL '0L')		
<b>Remedial action:</b> This alarm is raised when the OSPF neighbor virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

(2 of 2)

Table 31-103 WrongCpaaSoftwareVersion

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 6.4.2</li> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Clearing condition:</b> (('Software Version' NOT EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

## 32 — Alcatel-Lucent OS6855 alarms

---

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 32-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

Table 32-2 ActiveAbnormalCondition

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

Table 32-3 AggregatedVFLPortDown

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

Table 32-4 AGWDiameterPeerDown

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 32-5 AreaTypeMismatch

Alarm	Attributes	Applicable major releases
Name: AreaTypeMismatch (38) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Area	Severity: warning Implicitly cleared: true Default probable cause: areaTypeMisconfigured (34)	<ul style="list-style-type: none"> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF area on one NE is configured as an NSSA and the same OSPF area on another NE is configured as a stub area.		
<b>Raising condition:</b> ('Type Mismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('Type Mismatch' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The OSPF area type configured for the NE does not match with the same OSPF area configured on another NE. Compare the configuration on the endpoint and correct the mismatch.		

Table 32-6 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

Table 32-7 BgpDown

Alarm	Attributes	Applicable major releases
Name: BgpDown (6) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a BGP instance has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP protocol entity is down - administratively disable BGP and re-enable. If the problem persists please contact Alcatel-Lucent support for assistance.		

## 32 — Alcatel-Lucent OS6855 alarms

Table 32-8 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 32-9 BootableConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 32-10 BootParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>• persistentIndexFailure</li> <li>• configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (((('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified')))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

(2 of 2)

Table 32-11 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

Table 32-12 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

## 32 — Alcatel-Lucent OS6855 alarms

Table 32-13 ContainingEquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 32-14 ContainingEquipmentOperationallyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

Table 32-15 CorruptImageFile

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

(2 of 2)

Table 32-16 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 32-17 EfmOamAlarm

Alarm	Attributes	Applicable major releases
Name: EfmOamAlarm (4617) Type: equipmentAlarm (3) Package: ethernetEquipment Raised on class: ethernetEquipment.Dot3Oam	Severity: minor Implicitly cleared: true Default probable cause: EFMOAMOperationalStateOutOfService (1886)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		
<b>Raising condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Clearing condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Remedial action:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		

**Table 32-18 EquipmentAdministrativelyDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 32-19 EquipmentDegraded**

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

**Table 32-20 EquipmentDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

Table 32-21 EquipmentFailure

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 32-22 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 32-23 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		

(1 of 2)

32 — Alcatel-Lucent OS6855 alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

(2 of 2)

Table 32-24 EquipmentRemoved

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

Table 32-25 EthernetPortConfiguredLoopback

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

Table 32-26 EthernetPortDuplicateLane

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 32-27 EthernetPortHighBer

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 32-28 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		

(1 of 2)

## 32 – Alcatel-Lucent OS6855 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 32-29 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 32-30 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 32-31 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 32-32 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 32-33 EthernetPortSignalFailure

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		

(1 of 2)

## 32 – Alcatel-Lucent OS6855 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 32-34 FanFailure

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfService'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

Table 32-35 FanTrayRemoved

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

Table 32-36 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL 'OL'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL 'OL'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 32-37 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggsn Raised on class: Iteggsn.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 32-38 IfVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		

(1 of 2)

## 32 — Alcatel-Lucent OS6855 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

(2 of 2)

Table 32-39 IgmpDown

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

Table 32-40 IgmpSnoopingDown

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

Table 32-41 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

(2 of 2)

Table 32-42 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface in not operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue w		

Table 32-43 IsisDown

Alarm	Attributes	Applicable major releases
Name: IsisDown (19) Type: ProtocolAlarm (1) Package: isis Raised on class: isis.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an IS-IS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The protocol is not working anymore, could be a problem with IP addresses, resources on the device, ...		

## 32 — Alcatel-Lucent OS6855 alarms

Table 32-44 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 32-45 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 32-46 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

(2 of 2)

Table 32-47 LinkDown (equipment)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

Table 32-48 LowTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

## 32 — Alcatel-Lucent OS6855 alarms

Table 32-49 LowTemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 32-50 LpsViolation

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

Table 32-51 macMoveRateExceeded (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

**Table 32-52 macMoveRateExceededNonBlock (service)**

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

**Table 32-53 MepAISReceivedAlarm**

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

**Table 32-54 MobileConnectorDown**

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: IteService Raised on class: IteService.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\\"')'		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\\"')'		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

## 32 — Alcatel-Lucent OS6855 alarms

Table 32-55 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

Table 32-56 NeighborDown

Alarm	Attributes	Applicable major releases
Name: NeighborDown (121) Type: NeighborDown (20) Package: ospf Raised on class: ospf.AbstractNeighbor	Severity: major Implicitly cleared: true Default probable cause: NeighborDown (103)	<ul style="list-style-type: none"> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface neighbor is operationally Down.		
<b>Raising condition:</b> ('Operational State' NOT EQUAL 'full')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'full')		
<b>Remedial action:</b> This alarm is raised when the OSPF interface neighbor is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 32-57 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

(2 of 2)

Table 32-58 NewSsh2ServerKeyDetected

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

Table 32-59 NodeDatabaseFallbackDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

Table 32-60 NodeDatabaseMisalignmentDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

Table 32-61 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 32-62 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotMangedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) it is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM. Add an discovery rule in order to managed it.		

Table 32-63 OspfInterfaceDown

Alarm	Attributes	Applicable major releases
Name: OspfInterfaceDown (141) Type: OspfInterfaceDown (24) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: true Default probable cause: OspfInterfaceDown (112)	<ul style="list-style-type: none"> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface is operationally down.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Down')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF interface is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 32-64 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 32-65 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		

(1 of 2)

## 32 – Alcatel-Lucent OS6855 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

(2 of 2)

Table 32-66 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

Table 32-67 PimDown

Alarm	Attributes	Applicable major releases
Name: PimDown (184) Type: ProtocolAlarm (1) Package: pim Raised on class: pim.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a PIM site is administratively Up but operationally Down. The alarm is cleared when the PIM site becomes operationally Up but administratively Down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This should never happen. Contact Alcatel-Lucent Customer Support for assistance.		

Table 32-68 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 32-69 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

Table 32-70 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		

(1 of 2)

## 32 — Alcatel-Lucent OS6855 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

(2 of 2)

Table 32-71 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 32-72 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('inputFeedStatus' EQUAL 'Input A Down') OR ('inputFeedStatus' EQUAL 'Input B Down') OR (('inputFeedStatus'allBits'Input A Down') AND ('inputFeedStatus'allBits'Input B Down'))		
<b>Clearing condition:</b> ('inputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

Table 32-73 PowerSupplyRemoved

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

Table 32-74 PrimaryImageBootFailure

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 32-75 RadiusOperStatusDown

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

## 32 — Alcatel-Lucent OS6855 alarms

Table 32-76 ReachabilityProblem

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 32-77 ReconfigFailure

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		
<b>Remedial action:</b> Verify that the object is configured as expected.		

Table 32-78 RedundantMepMisconfiguration

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

(2 of 2)

Table 32-79 RedundantMepMissing

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\\"'))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\\"')))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

Table 32-80 RemoteMepCCMAAlarm

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

## 32 — Alcatel-Lucent OS6855 alarms

Table 32-81 RipDown

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 32-82 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 32-83 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 32-84 ServiceSiteDown

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

Table 32-85 SiteManagementVlanConflict

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

Table 32-86 SiteVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

## 32 — Alcatel-Lucent OS6855 alarms

Table 32-87 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

Table 32-88 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

Table 32-89 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

(2 of 2)

Table 32-90 TemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 32-91 TlsSiteDown

Alarm	Attributes	Applicable major releases
Name: TlsSiteDown (163) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.TlsSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('TLS Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('TLS Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable TLS Admin Status under the Bridge Instance.		

Table 32-92 TmnxEqPortEtherLoopDetected

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetEquipment Raised on class: ethernetEquipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

Table 32-93 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

Table 32-94 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

(2 of 2)

Table 32-95 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

## 32 — Alcatel-Lucent OS6855 alarms

Table 32-96 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 32-97 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 32-98 UpgradedBuildVersionMismatch

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 32-99 upgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 32-100 VersionConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 32-101 VirtualLinkDown

Alarm	Attributes	Applicable major releases
Name: VirtualLinkDown (122) Type: VirtualLinkAlarm (21) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: true Default probable cause: VirtualLinkDown (104)	<ul style="list-style-type: none"> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a virtual link is Down.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Operational State' NOT EQUAL 'Down')		

(1 of 2)

## 32 — Alcatel-Lucent OS6855 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> This alarm is raised when the OSPF virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

(2 of 2)

Table 32-102 VirtualNeighborDown

Alarm	Attributes	Applicable major releases
Name: VirtualNeighborDown (123) Type: VirtualNeighborDown (22) Package: ospf Raised on classes: <ul style="list-style-type: none"> <li>ospf.ShamLink</li> <li>ospf.VirtualLink</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: VirtualNeighborDown (105)	<ul style="list-style-type: none"> <li>6.4.4</li> <li>6.4.5</li> <li>6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a neighbor virtual link is operationally down.		
<b>Raising condition:</b> ('neighborCount' EQUAL '0L')		
<b>Clearing condition:</b> ('neighborCount' NOT EQUAL '0L')		
<b>Remedial action:</b> This alarm is raised when the OSPF neighbor virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 32-103 WrongCpaaSoftwareVersion

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>6.4.3</li> <li>6.4.4</li> <li>6.4.5</li> <li>6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Clearing condition:</b> (('Software Version' NOT EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

## 33 — Alcatel-Lucent OS6900 alarms

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 33-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

Table 33-2 ActiveAbnormalCondition

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

Table 33-3 AggregatedVFLPortDown

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

Table 33-4 AGWDiameterPeerDown

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 33-5 AreaTypeMismatch

Alarm	Attributes	Applicable major releases
Name: AreaTypeMismatch (38) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Area	Severity: warning Implicitly cleared: true Default probable cause: areaTypeMisconfigured (34)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF area on one NE is configured as an NSSA and the same OSPF area on another NE is configured as a stub area.		
<b>Raising condition:</b> ('Type Mismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('Type Mismatch' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The OSPF area type configured for the NE does not match with the same OSPF area configured on another NE. Compare the configuration on the endpoint and correct the mismatch.		

Table 33-6 AtcaFanFailure

Alarm	Attributes	Applicable major releases
Name: AtcaFanFailure (1124) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Fan	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('operationalState' EQUAL 'Disabled') OR ('operationalState' EQUAL 'Down'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Enabled') OR ('operationalState' EQUAL 'Up'))		
<b>Remedial action:</b> This alarm is raised if the fan speed falls below 500 rpm. If the alarm persists, replace the appropriate (upper or lower) fan tray.		

Table 33-7 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

## 33 — Alcatel-Lucent OS6900 alarms

Table 33-8 BgpDown

Alarm	Attributes	Applicable major releases
Name: BgpDown (6) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a BGP instance has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP protocol entity is down - administratively disable BGP and re-enable. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 33-9 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 33-10 BootableConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

(2 of 2)

Table 33-11 BootParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>• persistentIndexFailure</li> <li>• configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (((('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified'))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

Table 33-12 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

## 33 — Alcatel-Lucent OS6900 alarms

Table 33-13 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 33-14 ContainingEquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 33-15 ContainingEquipmentOperationallyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

(2 of 2)

Table 33-16 CorruptImageFile

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

Table 33-17 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 33-18 EquipmentAdministrativelyDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 33-19 EquipmentDegraded**

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

**Table 33-20 EquipmentDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

Table 33-21 EquipmentFailure

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 33-22 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 33-23 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		

(1 of 2)

33 — Alcatel-Lucent OS6900 alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

(2 of 2)

Table 33-24 EquipmentRemoved

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

Table 33-25 EthernetPortConfiguredLoopback

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

Table 33-26 EthernetPortDuplicateLane

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 33-27 EthernetPortHighBer

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 33-28 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		

(1 of 2)

## 33 – Alcatel-Lucent OS6900 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 33-29 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 33-30 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 33-31 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 33-32 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 33-33 EthernetPortSignalFailure

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		

(1 of 2)

33 – Alcatel-Lucent OS6900 alarms

---

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 33-34 FanFailure

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfService'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

Table 33-35 FanTrayRemoved

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

Table 33-36 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL 'OL'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL 'OL'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 33-37 FrameSizeProblem (svt)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('Operational State' EQUAL 'MTU Mismatch') OR ('Operational State' EQUAL 'Tunnel MTU Too Small'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'MTU Mismatch') AND ('Operational State' NOT EQUAL 'Tunnel MTU Too Small'))		
<b>Remedial action:</b> The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 33-38 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggns Raised on class: Iteggns.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

## 33 — Alcatel-Lucent OS6900 alarms

Table 33-39 IfVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

Table 33-40 IgmpDown

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

Table 33-41 IgmpSnoopingDown

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

Table 33-42 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

Table 33-43 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface is not in operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue is resolved, the alarm will clear.		

Table 33-44 IsisDown

Alarm	Attributes	Applicable major releases
Name: IsisDown (19) Type: ProtocolAlarm (1) Package: isis Raised on class: isis.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an IS-IS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		

(1 of 2)

## 33 – Alcatel-Lucent OS6900 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The protocol is not working anymore, could be a problem with IP addresses, resources on the device, ...		

(2 of 2)

Table 33-45 LabelProblem

Alarm	Attributes	Applicable major releases
Name: LabelProblem (98) Type: CircuitAlarm (17) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: labelProblem (84)	<ul style="list-style-type: none"> <li>7.3.2</li> <li>7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an ingress or an egress label is missing.		
<b>Raising condition:</b> (('Operational State' EQUAL 'No Egress Label') OR ('Operational State' EQUAL 'No Ingress Label') OR ('Operational State' EQUAL 'No Labels'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'No Egress Label') AND ('Operational State' NOT EQUAL 'No Ingress Label') AND ('Operational State' NOT EQUAL 'No Labels'))		
<b>Remedial action:</b> An ingress or egress label is missing for the SDP binding.		

Table 33-46 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>7.2.1</li> <li>7.3.1</li> <li>7.3.2</li> <li>7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 33-47 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 33-48 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 33-49 LinkDown (equipment)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

## 33 — Alcatel-Lucent OS6900 alarms

Table 33-50 LowTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 33-51 LowTemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 33-52 LpsViolation

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

**Table 33-53 macMoveRateExceeded (service)**

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

**Table 33-54 macMoveRateExceededNonBlock (service)**

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

**Table 33-55 MepAISReceivedAlarm**

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetOam Raised on class: ethernetOam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

## 33 — Alcatel-Lucent OS6900 alarms

Table 33-56 MobileConnectorDown

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\')		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\')		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

Table 33-57 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

Table 33-58 NeighborDown

Alarm	Attributes	Applicable major releases
Name: NeighborDown (121) Type: NeighborDown (20) Package: ospf Raised on class: ospf.AbstractNeighbor	Severity: major Implicitly cleared: true Default probable cause: NeighborDown (103)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface neighbor is operationally Down.		
<b>Raising condition:</b> ('Operational State' NOT EQUAL 'full')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'full')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> This alarm is raised when the OSPF interface neighbor is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

(2 of 2)

Table 33-59 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

Table 33-60 NewSsh2ServerKeyDetected

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

## 33 — Alcatel-Lucent OS6900 alarms

Table 33-61 NodeDatabaseFallbackDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

Table 33-62 NodeDatabaseMisalignmentDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

Table 33-63 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 33-64 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotManagedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) It is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM.Add an discovery rule in order to managed it.		

Table 33-65 OspflInterfaceDown

Alarm	Attributes	Applicable major releases
Name: OspflInterfaceDown (141) Type: OspflInterfaceDown (24) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: true Default probable cause: OspflInterfaceDown (112)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface is operationally down.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Down')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF interface is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 33-66 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 33-67 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

Table 33-68 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

Table 33-69 PimDown

Alarm	Attributes	Applicable major releases
Name: PimDown (184) Type: ProtocolAlarm (1) Package: pim Raised on class: pim.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a PIM site is administratively Up but operationally Down. The alarm is cleared when the PIM site becomes operationally Up but administratively Down.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This should never happen. Contact Alcatel-Lucent Customer Support for assistance.		

(2 of 2)

Table 33-70 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 33-71 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

## 33 — Alcatel-Lucent OS6900 alarms

Table 33-72 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

Table 33-73 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 33-74 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('inputFeedStatus' EQUAL 'Input A Down') OR ('inputFeedStatus' EQUAL 'Input B Down') OR ('inputFeedStatus'allBits'Input A Down') AND ('inputFeedStatus'allBits'Input B Down'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('inputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

(2 of 2)

Table 33-75 PowerSupplyRemoved

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

Table 33-76 PrimaryImageBootFailure

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

## 33 — Alcatel-Lucent OS6900 alarms

Table 33-77 RadiusOperStatusDown

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

Table 33-78 ReachabilityProblem

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 33-79 ReconfigFailure

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Verify that the object is configured as expected.		

(2 of 2)

**Table 33-80 RedundantMepMisconfiguration**

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

**Table 33-81 RedundantMepMissing**

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\'))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\')))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

## 33 — Alcatel-Lucent OS6900 alarms

Table 33-82 RemoteMepCCMAAlarm

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

Table 33-83 RipDown

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 33-84 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 33-85 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 33-86 SdpBindingDown

Alarm	Attributes	Applicable major releases
Name: SdpBindingDown (221) Type: SdpBindingAlarm (30) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: SdpBindingNotReady (166)	<ul style="list-style-type: none"> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an SDP binding has an Operational State other than Up.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-Homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For BGP Multi-Homing'))		
<b>Remedial action:</b> To resolve this alarm check the SDP binding to determine if a configuration mismatch exists. If configuration is determined to be correct then the associated network interface may be down. Further investigation is required to determine why the underlying network interface is down.		

Table 33-87 SdpBindingTunnelDown

Alarm	Attributes	Applicable major releases
Name: SdpBindingTunnelDown (222) Type: CircuitAlarm (17) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: SdpTunnelNotReady (167)	<ul style="list-style-type: none"> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an SDP binding tunnel has an Operational State other than Up.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Tunnel Not Ready') OR ('Operational State' EQUAL 'Tunnel Down'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'Tunnel Not Ready') AND ('Operational State' NOT EQUAL 'Tunnel Down'))		

(1 of 2)

33 — Alcatel-Lucent OS6900 alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> To resolve this alarm check the endpoints of the SDP binding to determine if a configuration mismatch exists. If configuration matches then the underlying network resource between the endpoints of the SDP may be down. Further investigation is required to determine why the underlying transport network is down.		

(2 of 2)

**Table 33-88 ServiceSiteDown**

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

**Table 33-89 SiteManagementVlanConflict**

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

Table 33-90 SiteVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

Table 33-91 SpbSiteDown

Alarm	Attributes	Applicable major releases
Name: SpbSiteDown (4396) Type: ProtocolAlarm (1) Package: spb Raised on class: spb.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an SPB site has an Operational State other than Up.		
<b>Raising condition:</b> ('Operational State' NOT EQUAL 'Up')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Check if the administrative state is down. If the administrative state is up, then check the ISIS instance associated with the SPB and make sure it is up.		

Table 33-92 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

## 33 — Alcatel-Lucent OS6900 alarms

Table 33-93 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

Table 33-94 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

Table 33-95 TemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

(2 of 2)

Table 33-96 TmnxEqPortEtherLoopDetected

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

Table 33-97 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

Table 33-98 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>7.2.1</li> <li>7.3.1</li> <li>7.3.2</li> <li>7.3.3</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

Table 33-99 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>7.2.1</li> <li>7.3.1</li> <li>7.3.2</li> <li>7.3.3</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

(2 of 2)

Table 33-100 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 33-101 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 33-102 UpgradedBuildVersionMismatch

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>

(1 of 2)

33 — Alcatel-Lucent OS6900 alarms

---

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

(2 of 2)

Table 33-103 upgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 33-104 VersionConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 33-105 VirtualLinkDown

Alarm	Attributes	Applicable major releases
Name: VirtualLinkDown (122) Type: VirtualLinkAlarm (21) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: true Default probable cause: VirtualLinkDown (104)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a virtual link is Down.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Operational State' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 33-106 VirtualNeighborDown

Alarm	Attributes	Applicable major releases
Name: VirtualNeighborDown (123) Type: VirtualNeighborDown (22) Package: ospf Raised on classes: <ul style="list-style-type: none"> <li>• ospf.ShamLink</li> <li>• ospf.VirtualLink</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: VirtualNeighborDown (105)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when a neighbor virtual link is operationally down.		
<b>Raising condition:</b> ('neighborCount' EQUAL '0L')		
<b>Clearing condition:</b> ('neighborCount' NOT EQUAL '0L')		
<b>Remedial action:</b> This alarm is raised when the OSPF neighbor virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 33-107 WrongCpaaSoftwareVersion

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 7.2.1</li> <li>• 7.3.1</li> <li>• 7.3.2</li> <li>• 7.3.3</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		

(1 of 2)

**33 – Alcatel-Lucent OS6900 alarms**

---

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Software Version' NOT EQUAL \"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

(2 of 2)

## 34 — Alcatel-Lucent OS9600 alarms

---

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 34-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

Table 34-2 ActiveAbnormalCondition

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

Table 34-3 AggregatedVFLPortDown

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

Table 34-4 AGWDiameterPeerDown

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 34-5 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

Table 34-6 BgpDown

Alarm	Attributes	Applicable major releases
Name: BgpDown (6) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a BGP instance has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP protocol entity is down - administratively disable BGP and re-enable. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 34-7 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		

(1 of 2)

**34 – Alcatel-Lucent OS9600 alarms**

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

(2 of 2)

**Table 34-8 BootableConfigRestoreFailed**

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

**Table 34-9 BootParametersMisconfigured**

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>• persistentIndexFailure</li> <li>• configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (((('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified'))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

Table 34-10 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

Table 34-11 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 34-12 ContainingEquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

## 34 – Alcatel-Lucent OS9600 alarms

Table 34-13 ContainingEquipmentOperationallyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

Table 34-14 CorruptImageFile

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

Table 34-15 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 34-16 EquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 34-17 EquipmentDegraded

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

## 34 – Alcatel-Lucent OS9600 alarms

Table 34-18 EquipmentDown

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

Table 34-19 EquipmentFailure

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 34-20 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 34-21 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 34-22 EquipmentRemoved

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

Table 34-23 EthernetPortConfiguredLoopback

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>

(1 of 2)

## 34 – Alcatel-Lucent OS9600 alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

(2 of 2)

Table 34-24 EthernetPortDuplicateLane

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 34-25 EthernetPortHighBer

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 34-26 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 34-27 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 34-28 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		

(1 of 2)

## 34 – Alcatel-Lucent OS9600 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

(2 of 2)

Table 34-29 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> ((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock')))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 34-30 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> ((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault')))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 34-31 EthernetPortSignalFailure

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 34-32 FanFailure

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfservice'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

Table 34-33 FanTrayRemoved

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

## 34 – Alcatel-Lucent OS9600 alarms

Table 34-34 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL 'OL'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL 'OL'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 34-35 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggsn Raised on class: Iteggsn.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 34-36 IfVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

(2 of 2)

Table 34-37 IgmpDown

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

Table 34-38 IgmpSnoopingDown

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

Table 34-39 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		

(1 of 2)

## 34 – Alcatel-Lucent OS9600 alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

(2 of 2)

Table 34-40 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface in not operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue w		

Table 34-41 IsisDown

Alarm	Attributes	Applicable major releases
Name: IsisDown (19) Type: ProtocolAlarm (1) Package: isis Raised on class: isis.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an IS-IS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The protocol is not working anymore, could be a problem with IP addresses, resources on the device, ...		

Table 34-42 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 34-43 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 34-44 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		

(1 of 2)

## 34 – Alcatel-Lucent OS9600 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

(2 of 2)

Table 34-45 LinkDown (equipment)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

Table 34-46 LowTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 34-47 LowTemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 34-48 LpsViolation

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

Table 34-49 macMoveRateExceeded (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

Table 34-50 macMoveRateExceededNonBlock (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

Table 34-51 MepAISReceivedAlarm

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

Table 34-52 MobileConnectorDown

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\\"')		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\\"')		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

Table 34-53 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

Table 34-54 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only'))) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only'))) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band')))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only'))) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only'))) AND ('Primary Route Preference' EQUAL 'Out Of Band')))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

Table 34-55 NewSsh2ServerKeyDetected

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>

(1 of 2)

34 – Alcatel-Lucent OS9600 alarms

---

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

(2 of 2)

**Table 34-56 NodeDatabaseFallbackDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

**Table 34-57 NodeDatabaseMisalignmentDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

Table 34-58 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 34-59 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotMangedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) it is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM. Add an discovery rule in order to managed it.		

Table 34-60 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 34-61 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

Table 34-62 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

Table 34-63 PimDown

Alarm	Attributes	Applicable major releases
Name: PimDown (184) Type: ProtocolAlarm (1) Package: pim Raised on class: pim.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a PIM site is administratively Up but operationally Down. The alarm is cleared when the PIM site becomes operationally Up but administratively Down.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This should never happen. Contact Alcatel-Lucent Customer Support for assistance.		

(2 of 2)

Table 34-64 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 34-65 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

## 34 – Alcatel-Lucent OS9600 alarms

Table 34-66 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

Table 34-67 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 34-68 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('inputFeedStatus' EQUAL 'Input A Down') OR ('inputFeedStatus' EQUAL 'Input B Down') OR ('inputFeedStatus'allBits'Input A Down') AND ('inputFeedStatus'allBits'Input B Down'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('inputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

(2 of 2)

Table 34-69 PowerSupplyRemoved

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

Table 34-70 PrimaryImageBootFailure

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

## 34 – Alcatel-Lucent OS9600 alarms

Table 34-71 RadiusOperStatusDown

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

Table 34-72 ReachabilityProblem

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 34-73 ReconfigFailure

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Verify that the object is configured as expected.		

(2 of 2)

Table 34-74 RedundantMepMisconfiguration

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

Table 34-75 RedundantMepMissing

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\'))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\')))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

## 34 – Alcatel-Lucent OS9600 alarms

Table 34-76 RemoteMepCCMAAlarm

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

Table 34-77 RipDown

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 34-78 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 34-79 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 34-80 ServiceSiteDown

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

Table 34-81 SiteManagementVlanConflict

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		

(1 of 2)

## 34 – Alcatel-Lucent OS9600 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

(2 of 2)

Table 34-82 SiteVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

Table 34-83 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

Table 34-84 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

(2 of 2)

Table 34-85 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

Table 34-86 TemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

## 34 – Alcatel-Lucent OS9600 alarms

Table 34-87 TlsSiteDown

Alarm	Attributes	Applicable major releases
Name: TlsSiteDown (163) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.TlsSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('TLS Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('TLS Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable TLS Admin Status under the Bridge Instance.		

Table 34-88 TmnxEqPortEtherLoopDetected

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

Table 34-89 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

(2 of 2)

Table 34-90 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>6.3.4</li> <li>6.4.2</li> <li>6.4.3</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

Table 34-91 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>6.3.4</li> <li>6.4.2</li> <li>6.4.3</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		

(1 of 2)

## 34 – Alcatel-Lucent OS9600 alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

(2 of 2)

Table 34-92 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 34-93 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 34-94 UpgradedBuildVersionMismatch

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 34-95 upgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 34-96 VersionConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

**Table 34-97 WrongCpaaSoftwareVersion**

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL 'TiMOS-B-3.0.Generic ') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Clearing condition:</b> (('Software Version' NOT EQUAL 'TiMOS-B-3.0.Generic ') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

## 35 — Alcatel-Lucent OS9700 alarms

---

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 35-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

**Table 35-2 ActiveAbnormalCondition**

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

**Table 35-3 AggregatedVFLPortDown**

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

**Table 35-4 AGWDiameterPeerDown**

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 35-5 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

Table 35-6 BgpDown

Alarm	Attributes	Applicable major releases
Name: BgpDown (6) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a BGP instance has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP protocol entity is down - administratively disable BGP and re-enable. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 35-7 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		

(1 of 2)

## 35 – Alcatel-Lucent OS9700 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

(2 of 2)

Table 35-8 BootableConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>6.3.4</li> <li>6.4.2</li> <li>6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 35-9 BootParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>persistentIndexFailure</li> <li>configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>6.3.4</li> <li>6.4.2</li> <li>6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (((('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified'))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

Table 35-10 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

Table 35-11 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 35-12 ContainingEquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

**Table 35-13 ContainingEquipmentOperationallyDown**

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

**Table 35-14 CorruptImageFile**

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

**Table 35-15 downgradedCardAlarm**

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 35-16 EquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 35-17 EquipmentDegraded

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

## 35 – Alcatel-Lucent OS9700 alarms

Table 35-18 EquipmentDown

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

Table 35-19 EquipmentFailure

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 35-20 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 35-21 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 35-22 EquipmentRemoved

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

Table 35-23 EthernetPortConfiguredLoopback

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>

(1 of 2)

## 35 – Alcatel-Lucent OS9700 alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

(2 of 2)

Table 35-24 EthernetPortDuplicateLane

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 35-25 EthernetPortHighBer

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 35-26 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 35-27 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 35-28 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		

(1 of 2)

## 35 – Alcatel-Lucent OS9700 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

(2 of 2)

Table 35-29 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> ((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 35-30 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> ((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

**Table 35-31 EthernetPortSignalFailure**

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

**Table 35-32 FanFailure**

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfservice'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

**Table 35-33 FanTrayRemoved**

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

## 35 – Alcatel-Lucent OS9700 alarms

Table 35-34 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL 'OL'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL 'OL'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 35-35 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggsn Raised on class: Iteggsn.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 35-36 IfVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

(2 of 2)

Table 35-37 IgmpDown

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

Table 35-38 IgmpSnoopingDown

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

Table 35-39 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		

(1 of 2)

## 35 – Alcatel-Lucent OS9700 alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

(2 of 2)

Table 35-40 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface in not operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue w		

Table 35-41 IsisDown

Alarm	Attributes	Applicable major releases
Name: IsisDown (19) Type: ProtocolAlarm (1) Package: isis Raised on class: isis.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an IS-IS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The protocol is not working anymore, could be a problem with IP addresses, resources on the device, ...		

Table 35-42 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 35-43 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 35-44 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		

(1 of 2)

35 – Alcatel-Lucent OS9700 alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

(2 of 2)

**Table 35-45 LinkDown (equipment)**

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

**Table 35-46 LowTemperatureDetected**

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 35-47 LowTemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 35-48 LpsViolation

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

Table 35-49 macMoveRateExceeded (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

Table 35-50 macMoveRateExceededNonBlock (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

Table 35-51 MepAISReceivedAlarm

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetOam Raised on class: ethernetOam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

Table 35-52 MobileConnectorDown

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\\"')'		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\\"')'		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

Table 35-53 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

Table 35-54 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only'))) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only'))) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band')))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only'))) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only'))) AND ('Primary Route Preference' EQUAL 'Out Of Band')))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

Table 35-55 NewSsh2ServerKeyDetected

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>

(1 of 2)

## 35 – Alcatel-Lucent OS9700 alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

(2 of 2)

Table 35-56 NodeDatabaseFallbackDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

Table 35-57 NodeDatabaseMisalignmentDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

Table 35-58 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 35-59 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotMangedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) it is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM. Add an discovery rule in order to managed it.		

Table 35-60 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 35-61 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

Table 35-62 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

Table 35-63 PimDown

Alarm	Attributes	Applicable major releases
Name: PimDown (184) Type: ProtocolAlarm (1) Package: pim Raised on class: pim.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a PIM site is administratively Up but operationally Down. The alarm is cleared when the PIM site becomes operationally Up but administratively Down.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This should never happen. Contact Alcatel-Lucent Customer Support for assistance.		

(2 of 2)

Table 35-64 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 35-65 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

## 35 – Alcatel-Lucent OS9700 alarms

Table 35-66 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

Table 35-67 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 35-68 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('inputFeedStatus' EQUAL 'Input A Down') OR ('inputFeedStatus' EQUAL 'Input B Down') OR ('inputFeedStatus'allBits'Input A Down') AND ('inputFeedStatus'allBits'Input B Down'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('inputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

(2 of 2)

Table 35-69 PowerSupplyRemoved

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

Table 35-70 PrimaryImageBootFailure

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

## 35 – Alcatel-Lucent OS9700 alarms

Table 35-71 RadiusOperStatusDown

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

Table 35-72 ReachabilityProblem

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 35-73 ReconfigFailure

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Verify that the object is configured as expected.		

(2 of 2)

**Table 35-74 RedundantMepMisconfiguration**

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

**Table 35-75 RedundantMepMissing**

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\'))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\')))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

## 35 – Alcatel-Lucent OS9700 alarms

Table 35-76 RemoteMepCCMAAlarm

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

Table 35-77 RipDown

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 35-78 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 35-79 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 35-80 ServiceSiteDown

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

Table 35-81 SiteManagementVlanConflict

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		

(1 of 2)

## 35 – Alcatel-Lucent OS9700 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

(2 of 2)

Table 35-82 SiteVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

Table 35-83 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

Table 35-84 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

(2 of 2)

Table 35-85 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

Table 35-86 TemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

**Table 35-87 TlsSiteDown**

Alarm	Attributes	Applicable major releases
Name: TlsSiteDown (163) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.TlsSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('TLS Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('TLS Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable TLS Admin Status under the Bridge Instance.		

**Table 35-88 TmnxEqPortEtherLoopDetected**

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

**Table 35-89 TrapDestinationMisconfigured**

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

(2 of 2)

Table 35-90 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>6.3.4</li> <li>6.4.2</li> <li>6.4.3</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

Table 35-91 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>6.3.4</li> <li>6.4.2</li> <li>6.4.3</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		

(1 of 2)

## 35 – Alcatel-Lucent OS9700 alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

(2 of 2)

Table 35-92 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 35-93 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

**Table 35-94 UpgradedBuildVersionMismatch**

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

**Table 35-95 upgradedCardAlarm**

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 35-96 VersionConfigRestoreFailed**

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

**Table 35-97 WrongCpaaSoftwareVersion**

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL '\TiMOS-B-3.0.Generic \') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Clearing condition:</b> (('Software Version' NOT EQUAL '\TiMOS-B-3.0.Generic \') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

## 36 — Alcatel-Lucent OS9700E/9800E alarms

---

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 36-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

Table 36-2 ActiveAbnormalCondition

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

Table 36-3 AggregatedVFLPortDown

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

Table 36-4 AGWDiameterPeerDown

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 36-5 AreaTypeMismatch

Alarm	Attributes	Applicable major releases
Name: AreaTypeMismatch (38) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Area	Severity: warning Implicitly cleared: true Default probable cause: areaTypeMisconfigured (34)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF area on one NE is configured as an NSSA and the same OSPF area on another NE is configured as a stub area.		
<b>Raising condition:</b> ('Type Mismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('Type Mismatch' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The OSPF area type configured for the NE does not match with the same OSPF area configured on another NE. Compare the configuration on the endpoint and correct the mismatch.		

Table 36-6 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

Table 36-7 BgpDown

Alarm	Attributes	Applicable major releases
Name: BgpDown (6) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a BGP instance has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP protocol entity is down - administratively disable BGP and re-enable. If the problem persists please contact Alcatel-Lucent support for assistance.		

**Table 36-8 BootableConfigBackupFailed**

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

**Table 36-9 BootableConfigRestoreFailed**

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

**Table 36-10 BootParametersMisconfigured**

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>• persistentIndexFailure</li> <li>• configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (((('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified')))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

(2 of 2)

Table 36-11 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

Table 36-12 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 36-13 ContainingEquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 36-14 ContainingEquipmentOperationallyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

Table 36-15 CorruptImageFile

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

(2 of 2)

Table 36-16 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 36-17 EquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 36-18 EquipmentDegraded**

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

**Table 36-19 EquipmentDown**

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

**Table 36-20 EquipmentFailure**

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

(2 of 2)

Table 36-21 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 36-22 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 36-23 EquipmentRemoved

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>

(1 of 2)

## 36 – Alcatel-Lucent OS9700E/9800E alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true')))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

(2 of 2)

Table 36-24 EthernetPortConfiguredLoopback

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

Table 36-25 EthernetPortDuplicateLane

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 36-26 EthernetPortHighBer

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 36-27 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 36-28 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		

(1 of 2)

## 36 – Alcatel-Lucent OS9700E/9800E alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

(2 of 2)

Table 36-29 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> ((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock')))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 36-30 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> ((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock')))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 36-31 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 36-32 EthernetPortSignalFailure

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 36-33 FanFailure

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfservice'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		

(1 of 2)

## 36 — Alcatel-Lucent OS9700E/9800E alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

(2 of 2)

Table 36-34 FanTrayRemoved

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

Table 36-35 ForwardingTableSizeLimitReached

Alarm	Attributes	Applicable major releases
Name: ForwardingTableSizeLimitReached (164) Type: resourceAlarm (28) Package: I2fwd Raised on class: I2fwd.SiteFib	Severity: major Implicitly cleared: true Default probable cause: resourceLimitReached (131)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the number of MAC address entries in the FIB reaches or exceeds the VPLS site high watermark specified by I2fwd.SiteFib.highWatermark. The alarm clears when the number of MAC address entries in the FIB drops below the VPLS site low watermark specified by I2fwd.SiteFib.lowWatermark. The alarm can be raised against a VPLS site, L2 access interface, or spoke SDP binding.		
<b>Raising condition:</b> (('Entries' >= 'Size') OR ('Entries' >= (('High Watermark' * 'Size') / 100.0)))		
<b>Clearing condition:</b> (('Entries' < 'Size') AND (('High Watermark' EQUAL '0L') OR ('Entries' < (('Low Watermark' * 'Size') / 100.0))) AND (('Low Watermark' EQUAL '0L') OR ('Entries' < (('Low Watermark' * 'Size') / 100.0)))		
<b>Remedial action:</b> Informational		

Table 36-36 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL 'OL'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL 'OL'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 36-37 FrameSizeProblem (svt)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('Operational State' EQUAL 'MTU Mismatch') OR ('Operational State' EQUAL 'Tunnel MTU Too Small'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'MTU Mismatch') AND ('Operational State' NOT EQUAL 'Tunnel MTU Too Small'))		
<b>Remedial action:</b> The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 36-38 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggns Raised on class: Iteggns.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

**Table 36-39 IfVlanSubTypeConflict**

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

**Table 36-40 IgmpDown**

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

**Table 36-41 IgmpSnoopingDown**

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

Table 36-42 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

Table 36-43 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface is not in operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue is resolved, the alarm will clear.		

Table 36-44 IsisDown

Alarm	Attributes	Applicable major releases
Name: IsisDown (19) Type: ProtocolAlarm (1) Package: isis Raised on class: isis.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an IS-IS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		

(1 of 2)

36 — Alcatel-Lucent OS9700E/9800E alarms

---

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The protocol is not working anymore, could be a problem with IP addresses, resources on the device, ...		

(2 of 2)

**Table 36-45 KeepAliveProblem**

Alarm	Attributes	Applicable major releases
Name: KeepAliveProblem (100) Type: oamAlarm (18) Package: svt Raised on class: svt.Tunnel	Severity: warning Implicitly cleared: true Default probable cause: keepAliveFailed (86)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects a keep-alive protocol status of senderIdInvalid or responderIdError.		
<b>Raising condition:</b> (('Keep-Alive State' NOT EQUAL 'Disabled') AND ('Keep-Alive State' NOT EQUAL 'Alive') AND ('Keep-Alive State' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('Keep-Alive State' EQUAL 'Disabled') OR ('Keep-Alive State' EQUAL 'Alive') OR ('Keep-Alive State' EQUAL 'Unknown'))		
<b>Remedial action:</b> Check the configuration of this tunnel and underlying physical transport.		

**Table 36-46 LabelProblem**

Alarm	Attributes	Applicable major releases
Name: LabelProblem (98) Type: CircuitAlarm (17) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: labelProblem (84)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an ingress or an egress label is missing.		
<b>Raising condition:</b> (('Operational State' EQUAL 'No Egress Label') OR ('Operational State' EQUAL 'No Ingress Label') OR ('Operational State' EQUAL 'No Labels'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'No Egress Label') AND ('Operational State' NOT EQUAL 'No Ingress Label') AND ('Operational State' NOT EQUAL 'No Labels'))		
<b>Remedial action:</b> An ingress or egress label is missing for the SDP binding.		

Table 36-47 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 36-48 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 36-49 LdpDown

Alarm	Attributes	Applicable major releases
Name: LdpDown (22) Type: ProtocolAlarm (1) Package: ldp Raised on class: ldp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an LDP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> Check operational state down reason and update accordingly.		

**Table 36-50 LdpSessionNonexistent**

Alarm	Attributes	Applicable major releases
Name: LdpSessionNonexistent (2954) Type: LdpSessionAlarm (101) Package: ldp Raised on class: ldp.Session	Severity: critical Implicitly cleared: true Default probable cause: LdpSessionDown (1149)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an LDP session is non-existent.		
<b>Raising condition:</b> ('Session State' EQUAL 'Non-existent')		
<b>Clearing condition:</b> ('Session State' EQUAL 'Operational')		
<b>Remedial action:</b> Please check the LDP session path to make sure all associated protocols/interfaces/connections are OK.		

**Table 36-51 LdpTargetedPeerDown**

Alarm	Attributes	Applicable major releases
Name: LdpTargetedPeerDown (23) Type: ProtocolAlarm (1) Package: ldp Raised on class: ldp.TargetedPeer	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an LDP targeted peer is operationally down.		
<b>Raising condition:</b> (('administrativeState' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('administrativeState' NOT EQUAL 'Up'))		
<b>Remedial action:</b> Please check the route to LDP targeted peer to make sure all associated protocols/interfaces/connections are OK.		

**Table 36-52 LicensedLimitExceeded**

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 36-53 LinkDown (equipment)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

Table 36-54 LowTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 36-55 LowTemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

**Table 36-56 LpsViolation**

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

**Table 36-57 LspDown**

Alarm	Attributes	Applicable major releases
Name: LspDown (25) Type: pathAlarm (12) Package: mpls Raised on class: mpls.Lsp	Severity: critical Implicitly cleared: true Default probable cause: lspDown (19)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the Operational State of an LSP is Down, but the Administrative State is Up.		
<b>Raising condition:</b> (('administrativeState' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('administrativeState' NOT EQUAL 'Up'))		
<b>Remedial action:</b> So many things can cause LSP down, check if source and destination interfaces are down, LSP path is down and the failure code, or MPLS path is down...		

**Table 36-58 macMoveRateExceeded (service)**

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

Table 36-59 macMoveRateExceeded (svt)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: SpokeSdpBindingAlarm (104) Package: svt Raised on class: svt.SpokeSdpBinding	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SDP exceeds the Service Site's MAC Move Frequency.		
<b>Raising condition:</b> ('operationalFlags'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('operationalFlags'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Check Service Site MAC move frequency or underlying physical link to understand issue.		

Table 36-60 macMoveRateExceededNonBlock (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

Table 36-61 MepAISReceivedAlarm

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetOam Raised on class: ethernetOam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

**Table 36-62 MobileConnectorDown**

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\')		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\')		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

**Table 36-63 MplsDown**

Alarm	Attributes	Applicable major releases
Name: MplsDown (27) Type: ProtocolAlarm (1) Package: mpls Raised on class: mpls.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an MPLS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> Check operational down reason and update accordingly.		

**Table 36-64 MvrSiteDown**

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

Table 36-65 NeighborDown

Alarm	Attributes	Applicable major releases
Name: NeighborDown (121) Type: NeighborDown (20) Package: ospf Raised on class: ospf.AbstractNeighbor	Severity: major Implicitly cleared: true Default probable cause: NeighborDown (103)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface neighbor is operationally Down.		
<b>Raising condition:</b> ('Operational State' NOT EQUAL 'full')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'full')		
<b>Remedial action:</b> This alarm is raised when the OSPF interface neighbor is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 36-66 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only'))) AND ('Primary Route Preference' EQUAL 'Out Of Band')) AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only'))) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band'))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only'))) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only'))) AND ('Primary Route Preference' EQUAL 'Out Of Band'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

**Table 36-67 NewSsh2ServerKeyDetected**

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

**Table 36-68 NodeDatabaseFallbackDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

**Table 36-69 NodeDatabaseMisalignmentDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

Table 36-70 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 36-71 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotMangedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) It is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM. Add an discovery rule in order to managed it.		

Table 36-72 OspfInterfaceDown

Alarm	Attributes	Applicable major releases
Name: OspfInterfaceDown (141) Type: OspfInterfaceDown (24) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: true Default probable cause: OspfInterfaceDown (112)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface is operationally down.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Down')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF interface is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 36-73 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 36-74 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

Table 36-75 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

(2 of 2)

Table 36-76 PimDown

Alarm	Attributes	Applicable major releases
Name: PimDown (184) Type: ProtocolAlarm (1) Package: pim Raised on class: pim.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a PIM site is administratively Up but operationally Down. The alarm is cleared when the PIM site becomes operationally Up but administratively Down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This should never happen. Contact Alcatel-Lucent Customer Support for assistance.		

Table 36-77 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 36-78 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

Table 36-79 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

Table 36-80 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

(2 of 2)

Table 36-81 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('inputFeedStatus' EQUAL 'Input A Down') OR ('inputFeedStatus' EQUAL 'Input B Down') OR (('inputFeedStatus'allBits'Input A Down') AND ('inputFeedStatus'allBits'Input B Down'))		
<b>Clearing condition:</b> ('inputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

Table 36-82 PowerSupplyRemoved

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

**Table 36-83 PrimaryImageBootFailure**

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

**Table 36-84 RadiusOperStatusDown**

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

**Table 36-85 ReachabilityProblem**

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

(2 of 2)

Table 36-86 ReconfigFailure

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		
<b>Remedial action:</b> Verify that the object is configured as expected.		

Table 36-87 RedundantMepMisconfiguration

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

**Table 36-88 RedundantMepMissing**

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\'))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\')))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

**Table 36-89 RemoteMepCCMAAlarm**

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

**Table 36-90 RipDown**

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 36-91 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 36-92 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 36-93 SdpBindingTunnelDown

Alarm	Attributes	Applicable major releases
Name: SdpBindingTunnelDown (222) Type: CircuitAlarm (17) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: SdpTunnelNotReady (167)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an SDP binding tunnel has an Operational State other than Up.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Tunnel Not Ready') OR ('Operational State' EQUAL 'Tunnel Down'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'Tunnel Not Ready') AND ('Operational State' NOT EQUAL 'Tunnel Down'))		

(1 of 2)

36 — Alcatel-Lucent OS9700E/9800E alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> To resolve this alarm check the endpoints of the SDP binding to determine if a configuration mismatch exists. If configuration matches then the underlying network resource between the endpoints of the SDP may be down. Further investigation is required to determine why the underlying transport network is down.		

(2 of 2)

**Table 36-94 SdpEgressIfsNetDomainInConsistent**

Alarm	Attributes	Applicable major releases
Name: SdpEgressIfsNetDomainInConsistent (3616) Type: resourceAlarm (28) Package: svt Raised on class: svt.Tunnel	Severity: warning Implicitly cleared: true Default probable cause: sdpEgressIfsNetDomainInConsistent (1405)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the SDP egress interface's consistency state changes to inconsistent.		
<b>Raising condition:</b> ('Egress Interfaces Consistency State' EQUAL '3')		
<b>Clearing condition:</b> ('Egress Interfaces Consistency State' EQUAL '2')		
<b>Remedial action:</b> To resolve this alarm check egress interfaces of the SDP configuration. If configuration is determined to be correct check underlying physical transport. Further investigation is required.		

**Table 36-95 ServiceSiteDown**

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

**Table 36-96 SiteManagementVlanConflict**

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

**Table 36-97 SiteVlanSubTypeConflict**

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

**Table 36-98 StatsRetrieveFailed**

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

**Table 36-99 SubscriberSystemNextHopUsageHigh**

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

**Table 36-100 SubSysChassMemoryUsageHi**

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

**Table 36-101 TemperatureThresholdCrossed**

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

(2 of 2)

Table 36-102 TlsSiteDown

Alarm	Attributes	Applicable major releases
Name: TlsSiteDown (163) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.TlsSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('TLS Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('TLS Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable TLS Admin Status under the Bridge Instance.		

Table 36-103 TmnxEqPortEtherLoopDetected

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

Table 36-104 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>trapDestinationMisconfigured</li> <li>duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>6.4.3</li> <li>6.4.4</li> <li>6.4.5</li> <li>6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

Table 36-105 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>6.4.3</li> <li>6.4.4</li> <li>6.4.5</li> <li>6.4.6</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND (('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND (('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND (('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND (('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band Preferred') AND (('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

**Table 36-106 TrapRoutePreferenceRedundancyMissing**

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

**Table 36-107 TunnelAdministrativelyDown (svt)**

Alarm	Attributes	Applicable major releases
Name: TunnelAdministrativelyDown (523) Type: pathAlarm (12) Package: svt Raised on class: svt.Tunnel	Severity: minor Implicitly cleared: true Default probable cause: tunnelAdministrativelyDown (333)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects that a service tunnel is administratively down.		
<b>Raising condition:</b> ('administrativeState' NOT EQUAL 'Up')		
<b>Clearing condition:</b> ('administrativeState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - an operator has manually turned down a service tunnel.		

**Table 36-108 TunnelDown (svt)**

Alarm	Attributes	Applicable major releases
Name: TunnelDown (30) Type: pathAlarm (12) Package: svt Raised on class: svt.AbstractTunnel	Severity: critical Implicitly cleared: true Default probable cause: tunnelDown (23)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects that a service tunnel is operationally down.		
<b>Raising condition:</b> (('Administrative' EQUAL 'Up') AND ('Operational' NOT EQUAL 'Up'))		

(1 of 2)

36 – Alcatel-Lucent OS9700E/9800E alarms

---

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Operational' EQUAL 'Up') OR ('Administrative' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that a problem has been made in the underlying transport network. If the alarm persists or re-occurs frequently then investigation of the underlying transport issues is warranted.		

(2 of 2)

**Table 36-109 UnidentifiedNode**

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

**Table 36-110 UnmanageFailed**

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 36-111 UpgradedBuildVersionMismatch

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 36-112 upgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 36-113 VersionConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 36-114 VirtualLinkDown

Alarm	Attributes	Applicable major releases
Name: VirtualLinkDown (122) Type: VirtualLinkAlarm (21) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: true Default probable cause: VirtualLinkDown (104)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a virtual link is Down.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Operational State' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 36-115 VirtualNeighborDown

Alarm	Attributes	Applicable major releases
Name: VirtualNeighborDown (123) Type: VirtualNeighborDown (22) Package: ospf Raised on classes: <ul style="list-style-type: none"> <li>• ospf.ShamLink</li> <li>• ospf.VirtualLink</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: VirtualNeighborDown (105)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when a neighbor virtual link is operationally down.		
<b>Raising condition:</b> ('neighborCount' EQUAL '0L')		
<b>Clearing condition:</b> ('neighborCount' NOT EQUAL '0L')		
<b>Remedial action:</b> This alarm is raised when the OSPF neighbor virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 36-116 WrongCpaaSoftwareVersion

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 6.4.3</li> <li>• 6.4.4</li> <li>• 6.4.5</li> <li>• 6.4.6</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL "\"TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> (('Software Version' NOT EQUAL '\TIMOS-B-3.0.Generic \") AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

(2 of 2)

## 37 — Alcatel-Lucent OS9800 alarms

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 37-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

**Table 37-2 ActiveAbnormalCondition**

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

**Table 37-3 AggregatedVFLPortDown**

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

**Table 37-4 AGWDiameterPeerDown**

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 37-5 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

Table 37-6 BgpDown

Alarm	Attributes	Applicable major releases
Name: BgpDown (6) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a BGP instance has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP protocol entity is down - administratively disable BGP and re-enable. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 37-7 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		

(1 of 2)

## 37 — Alcatel-Lucent OS9800 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

(2 of 2)

Table 37-8 BootableConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>6.3.4</li> <li>6.4.2</li> <li>6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 37-9 BootParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>persistentIndexFailure</li> <li>configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>6.3.4</li> <li>6.4.2</li> <li>6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified'))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

Table 37-10 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

Table 37-11 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 37-12 ContainingEquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

## 37 — Alcatel-Lucent OS9800 alarms

Table 37-13 ContainingEquipmentOperationallyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

Table 37-14 CorruptImageFile

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

Table 37-15 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 37-16 EquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 37-17 EquipmentDegraded

Alarm	Attributes	Applicable major releases
Name: EquipmentDegraded (604) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: minor Implicitly cleared: true Default probable cause: singleFanFailure (450)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a single fan fails. The chassis attempts to continue operating within the normal temperature range using only the remaining fans.		
<b>Raising condition:</b> ('Device State' EQUAL 'MinorFailure')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'MinorFailure')		
<b>Remedial action:</b> The failed fan unit should be replaced.		

## 37 — Alcatel-Lucent OS9800 alarms

Table 37-18 EquipmentDown

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

Table 37-19 EquipmentFailure

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 37-20 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 37-21 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 37-22 EquipmentRemoved

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

Table 37-23 EthernetPortConfiguredLoopback

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>

(1 of 2)

## 37 – Alcatel-Lucent OS9800 alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

(2 of 2)

Table 37-24 EthernetPortDuplicateLane

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 37-25 EthernetPortHighBer

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 37-26 EthernetPortLocalFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 37-27 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 37-28 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		

(1 of 2)

## 37 – Alcatel-Lucent OS9800 alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

(2 of 2)

Table 37-29 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> ((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 37-30 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> ((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

**Table 37-31 EthernetPortSignalFailure**

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Clearing condition:</b> NOT (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

**Table 37-32 FanFailure**

Alarm	Attributes	Applicable major releases
Name: FanFailure (624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: fanFailure (116)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the associated fan is not operationally Up.		
<b>Raising condition:</b> (('Device State' EQUAL 'Failed') OR ('Device State' EQUAL 'Unknown') OR ('Device State' EQUAL 'OutOfservice'))		
<b>Clearing condition:</b> ('Device State' EQUAL 'OK')		
<b>Remedial action:</b> Remove and reset the fan unit. If this does not resolve the problem replace the fan.		

**Table 37-33 FanTrayRemoved**

Alarm	Attributes	Applicable major releases
Name: FanTrayRemoved (569) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.FanTray	Severity: critical Implicitly cleared: true Default probable cause: FanTrayRemoved (438)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the deviceState attribute has a value of deviceNotEquipped.		
<b>Raising condition:</b> ('Device State' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Device State' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> Informational - a fan tray has been removed from the NE.		

## 37 — Alcatel-Lucent OS9800 alarms

Table 37-34 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL 'OL'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL 'OL'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 37-35 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggsn Raised on class: Iteggsn.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 37-36 IfVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: IfVlanSubTypeConflict (213) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.L2AccessInterface	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service is configured with the same VLAN ID. The alarm is raised against an L2 access interface.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Interface.		

(2 of 2)

Table 37-37 IgmpDown

Alarm	Attributes	Applicable major releases
Name: IgmpDown (158) Type: ProtocolAlarm (1) Package: igmp Raised on class: igmp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an IGMP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> While configured under VPRN, check if VPRN site is admin down, or if route distinguisher is not configured.		

Table 37-38 IgmpSnoopingDown

Alarm	Attributes	Applicable major releases
Name: IgmpSnoopingDown (161) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.Bridge	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when IGMP snooping is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('IGMP Snooping' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('IGMP Snooping' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable IGMP Snooping under the Bridge Instance.		

Table 37-39 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		

(1 of 2)

## 37 – Alcatel-Lucent OS9800 alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

(2 of 2)

Table 37-40 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface in not operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue w		

Table 37-41 IsisDown

Alarm	Attributes	Applicable major releases
Name: IsisDown (19) Type: ProtocolAlarm (1) Package: isis Raised on class: isis.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an IS-IS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The protocol is not working anymore, could be a problem with IP addresses, resources on the device, ...		

Table 37-42 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 37-43 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 37-44 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		

(1 of 2)

37 — Alcatel-Lucent OS9800 alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

(2 of 2)

**Table 37-45 LinkDown (equipment)**

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

**Table 37-46 LowTemperatureDetected**

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 37-47 LowTemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: LowTemperatureThresholdCrossed (1128) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a low-temperature threshold is crossed.		
<b>Raising condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('lowTemperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 37-48 LpsViolation

Alarm	Attributes	Applicable major releases
Name: LpsViolation (518) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: major Implicitly cleared: true Default probable cause: learnedPortSecurityViolation (393)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an LPS violation.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Security Violated')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Down')		
<b>Remedial action:</b> Port reset is required to return the port to normal operation.		

Table 37-49 macMoveRateExceeded (service)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

**Table 37-50 macMoveRateExceededNonBlock (service)**

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

**Table 37-51 MepAISReceivedAlarm**

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetOam Raised on class: ethernetOam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

**Table 37-52 MobileConnectorDown**

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\\"')'		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\\"')'		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

Table 37-53 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

Table 37-54 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only'))) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only'))) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band')))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only'))) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only'))) AND ('Primary Route Preference' EQUAL 'Out Of Band')))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

Table 37-55 NewSsh2ServerKeyDetected

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>

(1 of 2)

37 – Alcatel-Lucent OS9800 alarms

---

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

(2 of 2)

**Table 37-56 NodeDatabaseFallbackDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

**Table 37-57 NodeDatabaseMisalignmentDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

Table 37-58 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 37-59 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotMangedByAnyEms (1934)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) it is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM. Add an discovery rule in order to managed it.		

Table 37-60 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 37-61 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

Table 37-62 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

Table 37-63 PimDown

Alarm	Attributes	Applicable major releases
Name: PimDown (184) Type: ProtocolAlarm (1) Package: pim Raised on class: pim.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a PIM site is administratively Up but operationally Down. The alarm is cleared when the PIM site becomes operationally Up but administratively Down.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This should never happen. Contact Alcatel-Lucent Customer Support for assistance.		

(2 of 2)

Table 37-64 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 37-65 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

## 37 — Alcatel-Lucent OS9800 alarms

Table 37-66 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

Table 37-67 PowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyFailure (633) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: critical Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a power-supply tray reports a failure. When the alarm is raised during device discovery, a power-supply tray may be out of service. When the alarm is raised while the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> (('Power Supply 1 Status' EQUAL 'Not Equipped') OR ('Power Supply 1 Status' EQUAL 'Failed'))		
<b>Clearing condition:</b> (('Power Supply 1 Status' EQUAL 'OK'))		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 37-68 PowerSupplyInputFeedDown

Alarm	Attributes	Applicable major releases
Name: PowerSupplyInputFeedDown (5422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: powerSupplyInputFeedDown (2073)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This alarm is generated if any one of the input feeds for a given power supply is not supplying power.		
<b>Raising condition:</b> (('inputFeedStatus' EQUAL 'Input A Down') OR ('inputFeedStatus' EQUAL 'Input B Down') OR ('inputFeedStatus'allBits'Input A Down') AND ('inputFeedStatus'allBits'Input B Down'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('inputFeedStatus' EQUAL 'None')		
<b>Remedial action:</b> Restore all of the input feeds that are not supplying power.		

(2 of 2)

**Table 37-69 PowerSupplyRemoved**

Alarm	Attributes	Applicable major releases
Name: PowerSupplyRemoved (542) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: major Implicitly cleared: true Default probable cause: PowerSupplyRemoved (415)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a chassis power supply is removed.		
<b>Raising condition:</b> ('Power Supply 1 Status' EQUAL 'Not Equipped')		
<b>Clearing condition:</b> ('Power Supply 1 Status' NOT EQUAL 'Not Equipped')		
<b>Remedial action:</b> To recover from this event, the customer is requested to add a new power supply to the system, or change a faulty power supply with a working one.		

**Table 37-70 PrimaryImageBootFailure**

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

## 37 — Alcatel-Lucent OS9800 alarms

Table 37-71 RadiusOperStatusDown

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

Table 37-72 ReachabilityProblem

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 37-73 ReconfigFailure

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Verify that the object is configured as expected.		

(2 of 2)

**Table 37-74 RedundantMepMisconfiguration**

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

**Table 37-75 RedundantMepMissing**

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\'))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\')))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

## 37 — Alcatel-Lucent OS9800 alarms

Table 37-76 RemoteMepCCMAAlarm

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

Table 37-77 RipDown

Alarm	Attributes	Applicable major releases
Name: RipDown (72) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a RIP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The RIP Site is down while it is administratively up. Please check the node e.g, IOM is not shutdown or installed.		

Table 37-78 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 37-79 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 37-80 ServiceSiteDown

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

Table 37-81 SiteManagementVlanConflict

Alarm	Attributes	Applicable major releases
Name: SiteManagementVlanConflict (223) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the management VLAN ID is used for another type of service.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		

(1 of 2)

## 37 — Alcatel-Lucent OS9800 alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service Site is not used on any other type of VLAN Service Site.		

(2 of 2)

Table 37-82 SiteVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: SiteVlanSubTypeConflict (224) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a site.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that only one type of VLAN Service is configured with the VLAN ID used by this Site.		

Table 37-83 StatsRetrieveFailed

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

Table 37-84 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

(2 of 2)

Table 37-85 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

Table 37-86 TemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

## 37 – Alcatel-Lucent OS9800 alarms

Table 37-87 TlsSiteDown

Alarm	Attributes	Applicable major releases
Name: TlsSiteDown (163) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.TlsSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('TLS Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('TLS Admin Status' EQUAL 'Enabled')		
<b>Remedial action:</b> To clear the alarm, enable TLS Admin Status under the Bridge Instance.		

Table 37-88 TmnxEqPortEtherLoopDetected

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

Table 37-89 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

(2 of 2)

Table 37-90 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>6.3.4</li> <li>6.4.2</li> <li>6.4.3</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

Table 37-91 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>6.3.4</li> <li>6.4.2</li> <li>6.4.3</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		

(1 of 2)

## 37 – Alcatel-Lucent OS9800 alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

(2 of 2)

Table 37-92 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 37-93 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 37-94 UpgradedBuildVersionMismatch

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 37-95 upgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 37-96 VersionConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

**Table 37-97 WrongCpaaSoftwareVersion**

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 6.3.4</li> <li>• 6.4.2</li> <li>• 6.4.3</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL 'TiMOS-B-3.0.Generic') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Clearing condition:</b> (('Software Version' NOT EQUAL 'TiMOS-B-3.0.Generic') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

## 38 — Alcatel-Lucent DC VSC alarms

**Note** — Some alarms that the 5620 SAM can raise against this device may not be listed in this chapter. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort. If the 5620 SAM raises an alarm against this device type, and the alarm is not described in this chapter, see chapter 39 for information about the alarm.

**Table 38-1 AccessInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: AccessInterfaceDown (249) Type: AccessInterfaceAlarm (32) Package: service Raised on class: service.AccessInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an L2 or L3 interface operational state is Down. The alarm is not raised against an L2 access interface that is associated with an MC ring or MC LAG in the standby state.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For MC-Ring') AND ('State Cause' NOT EQUAL 'Standby For MC-Lag') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For MC-Ring') OR ('State Cause' EQUAL 'Standby For MC-Lag') OR ('State Cause' EQUAL 'Standby For BGP Multi-homing'))		
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

**Table 38-2 ActiveAbnormalCondition**

Alarm	Attributes	Applicable major releases
Name: ActiveAbnormalCondition (3938) Type: activeAbnormalConditionAlarm (116) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ActiveAbnormalConditionState (1520)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is an indication for abnormal condition on NE.		
<b>Raising condition:</b> ('abnormalCondition' EQUAL 'true')		
<b>Clearing condition:</b> ('abnormalCondition' EQUAL 'false')		
<b>Remedial action:</b> This alarm is raised when there is a abnormal state indication on NE.		

**Table 38-3 AggregatedVFLPortDown**

Alarm	Attributes	Applicable major releases
Name: AggregatedVFLPortDown (5436) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Shelf	Severity: critical Implicitly cleared: true Default probable cause: connectivityIssue (2137)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is generated when the aggregated virtual fabric link on the virtual chassis slot is down.		
<b>Raising condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Shelf Type' EQUAL '7850') AND ('Total Slots' EQUAL '4') AND ('Virtual Fabric Link State' EQUAL 'Up'))		
<b>Remedial action:</b> The alarm is raised when the aggregated virtual fabric link on the virtual chassis is down. Please check the virtual fabric links for the virtual chassis setup.		

**Table 38-4 AGWDiameterPeerDown**

Alarm	Attributes	Applicable major releases
Name: AGWDiameterPeerDown (844) Type: EpcAlarm (59) Package: lte Raised on class: lte.AGWDiameterPeer	Severity: variable Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Diameter peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Diameter Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Diameter Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 38-5 AreaTypeMismatch

Alarm	Attributes	Applicable major releases
Name: AreaTypeMismatch (38) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Area	Severity: warning Implicitly cleared: true Default probable cause: areaTypeMisconfigured (34)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF area on one NE is configured as an NSSA and the same OSPF area on another NE is configured as a stub area.		
<b>Raising condition:</b> ('Type Mismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('Type Mismatch' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The OSPF area type configured for the NE does not match with the same OSPF area configured on another NE. Compare the configuration on the endpoint and correct the mismatch.		

Table 38-6 AsymmetricalConfig (lag)

Alarm	Attributes	Applicable major releases
Name: AsymmetricalConfig (295) Type: configurationAlarm (11) Package: lag Raised on classes: <ul style="list-style-type: none"> <li>• lag.MultiChassisLag</li> <li>• lag.MultiChassisLagMember</li> </ul>	Severity: major Implicitly cleared: true Default probable cause: asymmetricalConfig (226)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the members of an MC LAG do not have matching configurations.		
<b>Raising condition:</b> ('configMismatches' NOT EQUAL '0L')		
<b>Clearing condition:</b> ('configMismatches' EQUAL '0L')		
<b>Remedial action:</b> Check configurations on both members to see anything not matched.		

Table 38-7 AuxiliaryServerStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryServerStatus (311) Type: communicationsAlarm (4) Package: server Raised on class: server.AuxiliaryServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server cannot communicate with an auxiliary server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		

(1 of 2)

38 — Alcatel-Lucent DC VSC alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the AUX and SAM servers is unreliable.		

(2 of 2)

Table 38-8 BgpDown

Alarm	Attributes	Applicable major releases
Name: BgpDown (6) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a BGP instance has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP protocol entity is down - administratively disable BGP and re-enable. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 38-9 BootableConfigBackupFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigBackupFailed (103) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to back up a set of NE configuration files.		
<b>Raising condition:</b> ('Backup State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Backup State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: insufficient disk space is available to accommodate the NE configuration files (additional SAM platform alarms will accompany this alarm); the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 38-10 BootableConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: BootableConfigRestoreFailed (104) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM fails to restore a set of NE configuration files.		
<b>Raising condition:</b> ('Restore State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Restore State' EQUAL 'Success')		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: the NE is unreachable (including underlying transport network issue); loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 38-11 BootParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: BootParametersMisconfigured (35) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: persistentIndexFailure (30) Applicable probable causes: <ul style="list-style-type: none"> <li>persistentIndexFailure</li> <li>configFileBootFailure</li> </ul>	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when the SNMP Index Boot Status on an NE is not set to Persistent.		
<b>Raising condition:</b> (('isGenericNode' EQUAL 'false') AND ('State' NOT EQUAL 'Pre-provisioned') AND (((('Config File Status' NOT EQUAL 'Executed Successfully') AND ('Config File Status' NOT EQUAL 'configFileStatus_unspecified')) OR (('Persistent Index Status' NOT EQUAL 'Rebuild Succeeded') AND ('Persistent Index Status' NOT EQUAL 'persistentIndexStatus_unspecified'))))		
<b>Clearing condition:</b> (('Config File Status' EQUAL 'Executed Successfully') AND ('Persistent Index Status' EQUAL 'Rebuild Succeeded'))		
<b>Remedial action:</b> Ensure that "SNMP Index Boot Status" is persistent (using cli command "show system information" on the NE). If not, unmanage the network element from SAM, ensure that "persist on" is set in the bof file, save the bof, save a config file, verify that an index file (.ndx) is saved as well, reboot the router, verify that SNMP Index Boot Status is persistent and finally remanage the router from SAM.		

Table 38-12 CircuitStpExceptionCondition

Alarm	Attributes	Applicable major releases
Name: CircuitStpExceptionCondition (648) Type: SdpBindingAlarm (30) Package: l2fwd Raised on class: l2fwd.CircuitStp	Severity: major Implicitly cleared: true Default probable cause: StpException (228)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>

(1 of 2)

## 38 — Alcatel-Lucent DC VSC alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when an NE detects an STP exception condition on a SAP, for example, one-way communication or a downstream loop. The alarm clears when the STP status changes.		
<b>Raising condition:</b> (('STP Exception Condition' NOT EQUAL 'None') AND ('Administrative State' EQUAL 'Up'))		
<b>Clearing condition:</b> (('STP Exception Condition' EQUAL 'None') OR ('Administrative State' EQUAL 'Down'))		
<b>Remedial action:</b> Check 'STP Exception Condition' field for more details and fix the STP exception.		

(2 of 2)

Table 38-13 ClientDelegateServerStatus

Alarm	Attributes	Applicable major releases
Name: ClientDelegateServerStatus (731) Type: communicationsAlarm (4) Package: server Raised on class: server.ClientDelegateServer	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a client delegate server is unreachable.		
<b>Raising condition:</b> ('Server Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Server Status' EQUAL 'Up')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the connectivity between the client delegate platform and SAM servers is unreliable or the client delegate server itself is unreliable.		

Table 38-14 ContainingEquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentAdministrativelyDown (466) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: minor Implicitly cleared: true Default probable cause: containingEquipmentAdministrativelyDown (330)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentAdministrativelyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Admin Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Admin Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 38-15 ContainingEquipmentMismatch**

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMismatch (464) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentMismatch (328)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMismatch.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Type Mismatch') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Type Mismatch') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

**Table 38-16 ContainingEquipmentOperationallyDown**

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentOperationallyDown (465) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: containingEquipmentDown (329)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentOperationallyDown.		
<b>Raising condition:</b> (('Status' EQUAL 'Parent Oper Down') AND ('isTerminatable' EQUAL 'true'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Oper Down') OR ('isTerminatable' NOT EQUAL 'true'))		
<b>Remedial action:</b> The operational state of the equipment element indicated in the alarm is down. This may be due to the element's administrative state or it may indicate that the element has failed.		

**Table 38-17 CorruptImageFile**

Alarm	Attributes	Applicable major releases
Name: CorruptImageFile (171) Type: configurationAlarm (11) Package: mediation Raised on class: mediation.AbstractSoftwareFolderDescriptor	Severity: critical Implicitly cleared: true Default probable cause: invalidOrCorruptImageFile (134)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when one or more files in the 5620 SAM software image specified for a device software upgrade is invalid, corrupt or absent. The 5620 SAM validates a device software file set before it imports the file set and distributes it to an NE. Ensure that the file set downloads properly to the NE and is not tampered with before you re-attempt the upgrade. The alarm clears when a valid file set is on the NE and the 5620 SAM activates the software image in the file set.		
<b>Raising condition:</b> ('isImageValid' EQUAL 'false')		

(1 of 2)

## 38 — Alcatel-Lucent DC VSC alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('isImageValid' EQUAL 'true')		
<b>Remedial action:</b> The existing SW image in the SAM database should be replaced with an image that is known to be complete and valid.		

(2 of 2)

Table 38-18 CpmProtectionExceedEntry

Alarm	Attributes	Applicable major releases
Name: CpmProtectionExceedEntry (2925) Type: communications (87) Package: sitesec Raised on class: sitesec.CpmProtExcdEntry	Severity: warning Implicitly cleared: false Default probable cause: denialOfService (790)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a MAC packet stream has exceeded its per-source limit.		
<b>Raising condition:</b> ('Number of Rate Violations' NOT EQUAL '0L')		
<b>Remedial action:</b> A device in the network is sending traffic to the NE at a rate which is higher than expected. The source of the traffic must be identified and if the behavior is undesired then the device should be disabled. It is also possible that the threshold has been configured at a level which is lower than acceptable in which case the configuration should be align with the traffic levels expected.		

Table 38-19 CpmProtectionExceedSapIpEntry

Alarm	Attributes	Applicable major releases
Name: CpmProtectionExceedSapIpEntry (3911) Type: communications (87) Package: sitesec Raised on class: sitesec.CpmProtExcdSapIpEntry	Severity: warning Implicitly cleared: false Default probable cause: denialOfService (790)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an IP packet stream has exceeded the per-source limit.		
<b>Raising condition:</b> ('Number of Rate Violations' NOT EQUAL '0L')		
<b>Remedial action:</b> A device in the network is sending traffic to the NE at a rate which is higher than expected. The source of the traffic must be identified and if the behavior is undesired then the device should be disabled. It is also possible that the threshold has been configured at a level which is lower than acceptable in which case the configuration should be align with the traffic levels expected.

Table 38-51 DDMTxOutputPowerLowWarning

Alarm	Attributes	Applicable major releases
Name: DDMTxOutputPowerLowWarning (484) Type: thresholdAlarm (49) Package: equipment Raised on class: equipment.AbstractDDM	Severity: warning Implicitly cleared: true Default probable cause: txOutputPowerLowWarning (370)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when the output power of an SFP or XFP approaches the maximum threshold value.		
<b>Raising condition:</b> ('failedThresholds'anyBit'Tx Output Power Low Warning')		
<b>Clearing condition:</b> NOT (('failedThresholds'anyBit'Tx Output Power Low Warning'))		
<b>Remedial action:</b> Informational. Check the environmental parameters of the transceiver and ensure that it is not faulty.		

Table 38-52 downgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: downgradedCardAlarm (256) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: downgradedCard (195)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an IOM is not upgraded or reset after a device software upgrade of both CPMs. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Downgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-53 EfmOamAlarm

Alarm	Attributes	Applicable major releases
Name: EfmOamAlarm (4617) Type: equipmentAlarm (3) Package: ethernetEquipment Raised on class: ethernetEquipment.Dot3Oam	Severity: minor Implicitly cleared: true Default probable cause: EFMOperationalStateOutOfService (1886)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		
<b>Raising condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Clearing condition:</b> ('Ignore EFM State' EQUAL 'true')		
<b>Remedial action:</b> The alarm is raised when EFM Ignore status is Enabled, and Physical port Administrative State is Down.		

Table 38-54 EquipmentAdministrativelyDown

Alarm	Attributes	Applicable major releases
Name: EquipmentAdministrativelyDown (455) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: minor Implicitly cleared: true Default probable cause: equipmentAdministrativelyDown (326)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentAdministrativelyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Admin Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Admin Down')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 38-55 EquipmentDown

Alarm	Attributes	Applicable major releases
Name: EquipmentDown (10) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentOperationallyDown.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Oper Down')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Oper Down')		
<b>Remedial action:</b> This alarm indicates that a card in the NE has failed. The card must be replaced.		

Table 38-56 EquipmentFailure

Alarm	Attributes	Applicable major releases
Name: EquipmentFailure (145) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: cardFailure (123)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when a control processor or power-supply tray reports a failure. When the object type is ControlProcessor, a CPM may be unable to boot. When the object type is Power Supply Tray and the alarm is raised during device discovery, a power-supply tray may be out of service. When the object type is a Power Supply Tray and the device is in the managed state, a power-supply tray may be out of service or the AC power shelf has a fault condition. The alarm clears when the status changes to OK.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Failed')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Failed')		
<b>Remedial action:</b> If the alarm indicates that the CPM card has a fault, remove the card and reset it. If this does not clear the alarm then please contact Alcatel-Lucent support for assistance. If the alarm indicates that the Power Supply tray is out of service ensure that the NE is properly connected to power. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 38-57 EquipmentInTest

Alarm	Attributes	Applicable major releases
Name: EquipmentInTest (11) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: warning Implicitly cleared: true Default probable cause: equipmentInTest (9)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when equipment enters a diagnostic state.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'In Test')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'In Test')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 38-58 EquipmentMismatch

Alarm	Attributes	Applicable major releases
Name: EquipmentMismatch (9) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: equipmentTypeMismatch (7)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMismatch.		
<b>Raising condition:</b> ('compositeEquipmentState' EQUAL 'Type Mismatch')		
<b>Clearing condition:</b> ('compositeEquipmentState' NOT EQUAL 'Type Mismatch')		

(1 of 2)

38 — Alcatel-Lucent DC VSC alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

(2 of 2)

**Table 38-59 EquipmentRemoved**

Alarm	Attributes	Applicable major releases
Name: EquipmentRemoved (8) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: replaceableEquipmentRemoved (6)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of equipmentMissing.		
<b>Raising condition:</b> (((('isEquipped' EQUAL 'false') OR ('compositeEquipmentState' EQUAL 'Removed')) AND ('isEquipmentInserted' EQUAL 'true'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Removed') AND ('isEquipped' EQUAL 'true'))		
<b>Remedial action:</b> Informational - this alarm is raised when a card is removed.		

**Table 38-60 EthernetPortConfiguredLoopback**

Alarm	Attributes	Applicable major releases
Name: EthernetPortConfiguredLoopback (801) Type: configurationAlarm (11) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ethernetPortConfiguredLoopback (567)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a timed loopback is in effect for an Ethernet port.		
<b>Raising condition:</b> (('Type' NOT EQUAL 'None'))		
<b>Clearing condition:</b> (('Type' EQUAL 'None'))		
<b>Remedial action:</b> This alarm has been raised by the node because "Timed Loopback" option of the specific port's Ethernet property has been enabled. To resolve this problem from "Ethernet" tab of "Physical Port" properties form configure "Timed Loopback" Type property as "None".		

**Table 38-61 EthernetPortDuplicateLane**

Alarm	Attributes	Applicable major releases
Name: EthernetPortDuplicateLane (3557) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: DuplicateLane (1387)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a Duplicate Lane on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Duplicate Lane') AND ('Report Alarms'anyBit'Duplicate Lane'))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

**Table 38-62 EthernetPortHighBer**

Alarm	Attributes	Applicable major releases
Name: EthernetPortHighBer (307) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a high bit-error rate on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'High Bit Error Rate') AND ('Report Alarms'anyBit'High Bit Error Rate'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

**Table 38-63 EthernetPortLocalFault**

Alarm	Attributes	Applicable major releases
Name: EthernetPortLocalFault (305) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: LocalFault (236)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a local fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))		

(1 of 2)

## 38 – Alcatel-Lucent DC VSC alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Local Fault') AND ('Report Alarms'anyBit'Local Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 38-64 EthernetPortNoAmLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoAmLock (3558) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoAmLock (1388)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Am Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No AM Lock') AND ('Report Alarms'anyBit'No AM Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 38-65 EthernetPortNoBlockLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoBlockLock (3559) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoBlockLock (1389)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a No Block Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Block Lock') AND ('Report Alarms'anyBit'No Block Lock'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 38-66 EthernetPortNoFrameLock

Alarm	Attributes	Applicable major releases
Name: EthernetPortNoFrameLock (306) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: NoFrameLock (237)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when a device reports No Frame Lock on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'No Frame Lock') AND ('Report Alarms'anyBit'No Frame Lock'))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 38-67 EthernetPortRemoteFault

Alarm	Attributes	Applicable major releases
Name: EthernetPortRemoteFault (304) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: RemoteFault (235)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a remote fault on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Remote Fault') AND ('Report Alarms'anyBit'Remote Fault'))		
<b>Remedial action:</b> One of the following conditions exists on the remote physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

Table 38-68 EthernetPortSignalFailure

Alarm	Attributes	Applicable major releases
Name: EthernetPortSignalFailure (303) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: SignalFailure (234)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a signal failure on an Ethernet port.		
<b>Raising condition:</b> (('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))		

(1 of 2)

## 38 – Alcatel-Lucent DC VSC alarms

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> NOT (((('Outstanding Alarms'anyBit'Signal Failure') AND ('Report Alarms'anyBit'Signal Failure'))))		
<b>Remedial action:</b> One of the following conditions exists on the physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault.		

(2 of 2)

Table 38-69 ForwardingTableSizeLimitReached

Alarm	Attributes	Applicable major releases
Name: ForwardingTableSizeLimitReached (164) Type: resourceAlarm (28) Package: I2fwd Raised on class: I2fwd.SiteFib	Severity: major Implicitly cleared: true Default probable cause: resourceLimitReached (131)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the number of MAC address entries in the FIB reaches or exceeds the VPLS site high watermark specified by I2fwd.SiteFib.highWatermark. The alarm clears when the number of MAC address entries in the FIB drops below the VPLS site low watermark specified by I2fwd.SiteFib.lowWatermark. The alarm can be raised against a VPLS site, L2 access interface, or spoke SDP binding.		
<b>Raising condition:</b> (('Entries' >= 'Size') OR ('Entries' >= (('High Watermark' * 'Size') / 100.0)))"		
<b>Clearing condition:</b> (('Entries' < 'Size') AND (('High Watermark' EQUAL '0L') OR ('Entries' < (('Low Watermark' * 'Size') / 100.0))) AND (('Low Watermark' EQUAL '0L') OR ('Entries' < (('Low Watermark' * 'Size') / 100.0))))		
<b>Remedial action:</b> Informational		

Table 38-70 FrameSizeProblem (netw)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('mtuMismatch' EQUAL 'true') AND ('portId' NOT EQUAL '0L'))		
<b>Clearing condition:</b> (('mtuMismatch' EQUAL 'false') OR ('portId' EQUAL '0L'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MTU value must be changed such that is less than or equal to the supported MTU size value.		

Table 38-71 FrameSizeProblem (svt)

Alarm	Attributes	Applicable major releases
Name: FrameSizeProblem (37) Type: configurationAlarm (11) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: frameSizeProblem (33)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a provisioned MTU size value is greater than the supported MTU size value.		
<b>Raising condition:</b> (('Operational State' EQUAL 'MTU Mismatch') OR ('Operational State' EQUAL 'Tunnel MTU Too Small'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'MTU Mismatch') AND ('Operational State' NOT EQUAL 'Tunnel MTU Too Small'))		
<b>Remedial action:</b> The MTU value must be changed such that is is less than or equal to the supported MTU size value.		

Table 38-72 GaPeerDown

Alarm	Attributes	Applicable major releases
Name: GaPeerDown (3303) Type: EpcAlarm (59) Package: Iteggsn Raised on class: Iteggsn.GaPeer	Severity: major Implicitly cleared: true Default probable cause: EPSPeerDown (602)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the path management state of a Ga peer changes to a state other than Up.		
<b>Raising condition:</b> ('Path Management State' NOT EQUAL 'Active')		
<b>Clearing condition:</b> ('Path Management State' EQUAL 'Active')		
<b>Remedial action:</b> A Ga reference point (peer) is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 38-73 IncompleteConfiguration

Alarm	Attributes	Applicable major releases
Name: IncompleteConfiguration (1942) Type: operationalViolation (93) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: incompleteConfig (225)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a pre-provisioned NE has no objects configured beneath it.		
<b>Raising condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' EQUAL '\'))		
<b>Clearing condition:</b> (('State' EQUAL 'Pre-provisioned') AND ('eNodeB Equipment' NOT EQUAL '\'))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration of the pre-provisioned NE is incomplete. A work order was not associated with the pre-provisioned NE and as a consequence the attempt to auto-configure the NE failed.		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-74 InstanceDown (srrp)

Alarm	Attributes	Applicable major releases
Name: InstanceDown (284) Type: configurationAlarm (11) Package: srrp Raised on class: srrp.Instance	Severity: major Implicitly cleared: true Default probable cause: instanceDown (216)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects that an SRRP instance is operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' EQUAL 'Initialize'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'Initialize') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> Check the configuration of the instance		

Table 38-75 InterfaceDown (netw)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: InterfaceAlarm (13) Package: netw Raised on class: netw.StatefullConnectableInterface	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an interface or underlying resource fails, as indicated by an interface compositeState attribute value of failed or underlyingResourceFailed.		
<b>Raising condition:</b> (('compositeState' EQUAL 'Inoperable') OR ('compositeState' EQUAL 'Underlying Resource Inoperable'))		
<b>Clearing condition:</b> (('compositeState' NOT EQUAL 'Inoperable') AND ('compositeState' NOT EQUAL 'Underlying Resource Inoperable'))		
<b>Remedial action:</b> A physical port (physical interface, LAG, channel) associated with the network interface in not operation. Ensure that the interface is cabled and that there is not a configuration error (i.e. MTU size set incorrectly) on the interface. Once the issue w		

Table 38-76 InterfaceDown (vppls)

Alarm	Attributes	Applicable major releases
Name: InterfaceDown (36) Type: configurationAlarm (11) Package: vppls Raised on class: vppls.L2ManagementInterface	Severity: major Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an L2 management interface has an Operational State of Down, and the associated VPLS site has an Administrative State of Up.		
<b>Raising condition:</b> (('administrativeState' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('administrativeState' NOT EQUAL 'Up'))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> The condition exists because the physical interface is down either because it is administratively disabled, faulty or a cabling fault has occurred. Ensure that the interface is administratively up. Check for a poor cable connection to the port or for a faulty cable/fiber. If neither appears to be the problem run diagnostics on the port to determine if it is faulty.		

(2 of 2)

Table 38-77 IsisAdjacencyDown

Alarm	Attributes	Applicable major releases
Name: IsisAdjacencyDown (153) Type: adjacencyAlarm (31) Package: isis Raised on class: isis.Interface	Severity: minor Implicitly cleared: true Default probable cause: IsisInterfaceDown (232)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an IS-IS interface has no adjacencies, for example, because the IS-IS protocol on the remote site is down.		
<b>Raising condition:</b> (('Adjacency Count' EQUAL '0L') AND ('interfaceClass' NOT EQUAL 'System') AND ('Passive' NOT EQUAL 'True'))		
<b>Clearing condition:</b> (('Adjacency Count' > '0L') OR ('Passive' EQUAL 'True'))		
<b>Remedial action:</b> Check remote site to see if corresponding IS-IS interface is configured and admin up.		

Table 38-78 IsisDown

Alarm	Attributes	Applicable major releases
Name: IsisDown (19) Type: ProtocolAlarm (1) Package: isis Raised on class: isis.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an IS-IS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The protocol is not working anymore, could be a problem with IP addresses, resources on the device, ...		

Table 38-79 IsisInterfaceDown

Alarm	Attributes	Applicable major releases
Name: IsisInterfaceDown (301) Type: ProtocolAlarm (1) Package: isis Raised on class: isis.Interface	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>

(1 of 2)

38 — Alcatel-Lucent DC VSC alarms

---

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when an IS-IS interface has an Operational State other than Up.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Operational State' NOT EQUAL 'Down')		
<b>Remedial action:</b> Check if underlying port is down, or associated network interface is down.		

(2 of 2)

**Table 38-80 KeepAliveProblem**

Alarm	Attributes	Applicable major releases
Name: KeepAliveProblem (100) Type: oamAlarm (18) Package: svt Raised on class: svt.Tunnel	Severity: warning Implicitly cleared: true Default probable cause: keepAliveFailed (86)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects a keep-alive protocol status of senderIdInvalid or responderIdError.		
<b>Raising condition:</b> (('Keep-Alive State' NOT EQUAL 'Disabled') AND ('Keep-Alive State' NOT EQUAL 'Alive') AND ('Keep-Alive State' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('Keep-Alive State' EQUAL 'Disabled') OR ('Keep-Alive State' EQUAL 'Alive') OR ('Keep-Alive State' EQUAL 'Unknown'))		
<b>Remedial action:</b> Check the configuration of this tunnel and underlying physical transport.		

**Table 38-81 LabelProblem**

Alarm	Attributes	Applicable major releases
Name: LabelProblem (98) Type: CircuitAlarm (17) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: labelProblem (84)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an ingress or an egress label is missing.		
<b>Raising condition:</b> (('Operational State' EQUAL 'No Egress Label') OR ('Operational State' EQUAL 'No Ingress Label') OR ('Operational State' EQUAL 'No Labels'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'No Egress Label') AND ('Operational State' NOT EQUAL 'No Ingress Label') AND ('Operational State' NOT EQUAL 'No Labels'))		
<b>Remedial action:</b> An ingress or egress label is missing for the SDP binding.		

Table 38-82 LagDown

Alarm	Attributes	Applicable major releases
Name: LagDown (20) Type: equipmentAlarm (3) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagDown (17)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when all ports in a LAG are operationally down.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 38-83 LagPortAddFailed

Alarm	Attributes	Applicable major releases
Name: LagPortAddFailed (422) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: true Default probable cause: linkDown (315)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the Lag Port Add function Fails.		
<b>Raising condition:</b> (('state' EQUAL 'Link Down') AND ('LAG ID' > '0'))		
<b>Clearing condition:</b> (('state' NOT EQUAL 'Link Down') OR ('LAG ID' EQUAL '0'))		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The link that was to be added to the LAG group may be of the wrong type (i.e. non ethernet) or the limit of the number of links supported in a LAG may have been reached.		

Table 38-84 LdpDown

Alarm	Attributes	Applicable major releases
Name: LdpDown (22) Type: ProtocolAlarm (1) Package: ldp Raised on class: ldp.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an LDP site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> Check operational state down reason and update accordingly.		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-85 LdpSessionNonexistent

Alarm	Attributes	Applicable major releases
Name: LdpSessionNonexistent (2954) Type: LdpSessionAlarm (101) Package: ldp Raised on class: ldp.Session	Severity: critical Implicitly cleared: true Default probable cause: LdpSessionDown (1149)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an LDP session is non-existent.		
<b>Raising condition:</b> ('Session State' EQUAL 'Non-existent')		
<b>Clearing condition:</b> ('Session State' EQUAL 'Operational')		
<b>Remedial action:</b> Please check the LDP session path to make sure all associated protocols/interfaces/connections are OK.		

Table 38-86 LdpTargetedPeerDown

Alarm	Attributes	Applicable major releases
Name: LdpTargetedPeerDown (23) Type: ProtocolAlarm (1) Package: ldp Raised on class: ldp.TargetedPeer	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an LDP targeted peer is operationally down.		
<b>Raising condition:</b> (('administrativeState' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('administrativeState' NOT EQUAL 'Up'))		
<b>Remedial action:</b> Please check the route to LDP targeted peer to make sure all associated protocols/interfaces/connections are OK.		

Table 38-87 LicensedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedLimitExceeded (127) Type: licensingAlarm (23) Package: security Raised on class: security.ProductLicense	Severity: critical Implicitly cleared: true Default probable cause: licensedLimitExceeded (106)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the license items in the network exceeds 100 percent of the license capacity.		
<b>Raising condition:</b> ('Exceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('Exceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of SAM licenses purchased and available on the SAM server is insufficient as compared to the number of NEs/MDA/Cells under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 38-88 LinkDown (equipment)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: major Implicitly cleared: true Default probable cause: portLinkProblem (10)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a port has no associated physical link or remote end point is operationally down.		
<b>Raising condition:</b> (('compositeEquipmentState' EQUAL 'Link Down') OR ('compositeEquipmentState' EQUAL 'Oper Down'))		
<b>Clearing condition:</b> (('compositeEquipmentState' NOT EQUAL 'Link Down') AND ('compositeEquipmentState' NOT EQUAL 'Oper Down'))		
<b>Remedial action:</b> Please make sure that port has physical link and remote end point is operationally up.		

Table 38-89 LocalRncvOperDown

Alarm	Attributes	Applicable major releases
Name: LocalRncvOperDown (521) Type: redundancyAlarm (52) Package: multichassis Raised on class: multichassis.MultiChassisRingNode	Severity: major Implicitly cleared: true Default probable cause: localRncvDisconnected (396)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the local RNCV Operational State of a ring node is other than Connected or NotTested, which means that the ring node is not connected to the local MC ring group. The alarm clears when the ring node enters the Connected or NotTested state.		
<b>Raising condition:</b> (('Local Operational State' NOT EQUAL 'Connected') AND ('Local Operational State' NOT EQUAL 'Not Tested'))		
<b>Clearing condition:</b> (('Local Operational State' EQUAL 'Connected') OR ('Local Operational State' EQUAL 'Not Tested'))		
<b>Remedial action:</b> Make sure that ring node is properly connected to MC ring group.		

Table 38-90 LowTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: LowTemperatureDetected (1127) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOvercooled (838)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature falls below the minimum threshold.		
<b>Raising condition:</b> ('Low Temperature State' EQUAL 'Low')		
<b>Clearing condition:</b> ('Low Temperature State' NOT EQUAL 'Low')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally low. This may happen when the environment that the NE is operating in may not be within specifications found in the NE user guides.		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-91 LspDown

Alarm	Attributes	Applicable major releases
Name: LspDown (25) Type: pathAlarm (12) Package: mpls Raised on class: mpls.Lsp	Severity: critical Implicitly cleared: true Default probable cause: LspDown (19)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the Operational State of an LSP is Down, but the Administrative State is Up.		
<b>Raising condition:</b> (('administrativeState' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('administrativeState' NOT EQUAL 'Up'))		
<b>Remedial action:</b> So many things can cause LSP down, check if source and destination interfaces are down, LSP path is down and the failure code, or MPLS path is down...		

Table 38-92 LspPathBypassTunnelActive

Alarm	Attributes	Applicable major releases
Name: LspPathBypassTunnelActive (264) Type: pathAlarm (12) Package: mpls Raised on class: mpls.LspPath	Severity: warning Implicitly cleared: true Default probable cause: LspPathReroutedToBypassTunnel (197)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an LSP primary path is rerouted to the bypass tunnel. The alarm clears when the primary path returns to the original tunnel and the actual hop returns to the primary path.		
<b>Raising condition:</b> ('Bypass Tunnel Active' EQUAL 'true')		
<b>Clearing condition:</b> ('Bypass Tunnel Active' EQUAL 'false')		
<b>Remedial action:</b> There is a problem with the original path, check what is the problem and fix it if possible.		

Table 38-93 LspPathDown

Alarm	Attributes	Applicable major releases
Name: LspPathDown (26) Type: pathAlarm (12) Package: mpls Raised on class: mpls.LspPath	Severity: major Implicitly cleared: true Default probable cause: LspPathDown (20)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an LSP path is operationally down.		
<b>Raising condition:</b> (('Administrative' EQUAL 'Up') AND ('Operational' NOT EQUAL 'Up') AND ('Type' EQUAL 'Standby'))		
<b>Clearing condition:</b> (('Operational' EQUAL 'Up') OR ('Administrative' NOT EQUAL 'Up') OR ('Type' EQUAL 'Secondary'))		
<b>Remedial action:</b> Check the failure code and update accordingly, e.g. whether MPLS/RSVP interfaces, OSPF interfaces are down.		

**Table 38-94 macMoveRateExceeded (service)**

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational.		

**Table 38-95 macMoveRateExceeded (svt)**

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceeded (3690) Type: SpokeSdpBindingAlarm (104) Package: svt Raised on class: svt.SpokeSdpBinding	Severity: minor Implicitly cleared: true Default probable cause: MacMoveRateExceeded (1429)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the SDP exceeds the Service Site's MAC Move Frequency.		
<b>Raising condition:</b> ('operationalFlags'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('operationalFlags'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Check Service Site MAC move frequency or underlying physical link to understand issue.		

**Table 38-96 macMoveRateExceededNonBlock (service)**

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: accessInterfaceAlarm (40) Package: service Raised on class: service.AccessInterface	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the SAP exceeds the MAC Move Frequency of the service site when limitMacMove(sapTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('State Cause'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('State Cause'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-97 macMoveRateExceededNonBlock (svt)

Alarm	Attributes	Applicable major releases
Name: macMoveRateExceededNonBlock (4893) Type: SpokeSdpBindingAlarm (104) Package: svt Raised on class: svt.SpokeSdpBinding	Severity: info Implicitly cleared: true Default probable cause: MacMoveRateExceededNonBlock (1951)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the SDP exceeds the Service Site's MAC Move Frequency even when limitMacMove(sdpBindTIsLimitMacMove) is set to 'nonBlocking'.		
<b>Raising condition:</b> ('operationalFlags'anyBit'Relearn Limit Exceeded')		
<b>Clearing condition:</b> NOT (('operationalFlags'anyBit'Relearn Limit Exceeded'))		
<b>Remedial action:</b> Informational - User can adjust the value of 'MAC Move Maximum Rate' to reduce the frequency of this alarm.		

Table 38-98 MCLagDown (lag)

Alarm	Attributes	Applicable major releases
Name: MCLagDown (394) Type: equipmentAlarm (3) Package: lag Raised on class: lag.MultiChassisLagSpecifics	Severity: critical Implicitly cleared: true Default probable cause: mCLagDown (295)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when all ports in an MC LAG are operationally down.		
<b>Raising condition:</b> (('administrativeState' EQUAL 'Up') AND ('operationalState' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('operationalState' EQUAL 'Up') OR ('administrativeState' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that all physical Ethernet links associated with a LAG are operationally down. The reasons for the links to be down may vary from link to link. The following possible causes of this alarm should be investigated. The physical port (near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 38-99 MepAISReceivedAlarm

Alarm	Attributes	Applicable major releases
Name: MepAISReceivedAlarm (2945) Type: oamAlarm (18) Package: ethernetOam Raised on class: ethernetOam.Mep	Severity: variable Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a MEP receives AIS test frames from one or more of its sub-layer MEPs.		
<b>Raising condition:</b> (('AIS Received (AisRx)' EQUAL 'true') AND ('Facility VLAN ID' EQUAL '0'))		
<b>Clearing condition:</b> ('AIS Received (AisRx)' EQUAL 'false')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> This alarm indicates that it has received a MEP fault from a sub-layer MEP, user should investigate the fault cause on the sub-layer MEP and resolve this root cause issue.		

(2 of 2)

Table 38-100 MissingLocalEntry

Alarm	Attributes	Applicable major releases
Name: MissingLocalEntry (291) Type: configurationAlarm (11) Package: I2fwd Raised on class: I2fwd.ServiceMacProtection	Severity: minor Implicitly cleared: true Default probable cause: Protected_Mac_Address_Not_Global (222)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a protected MAC address is not configured on all sites of a VPLS. This can occur if the protected MAC address is added or removed using a CLI.		
<b>Raising condition:</b> ('isEntryGlobal' EQUAL 'false')		
<b>Clearing condition:</b> ('isEntryGlobal' EQUAL 'true')		
<b>Remedial action:</b> Configure the 'Protected MAC Address' on all the VPLS sites.		

Table 38-101 MobileConnectorDown

Alarm	Attributes	Applicable major releases
Name: MobileConnectorDown (1064) Type: EpcAlarm (59) Package: Iteservice Raised on class: Iteservice.MobileServiceConnector	Severity: minor Implicitly cleared: true Default probable cause: EpcDown (519)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM no longer manages the EPS path instance of this mobile service site. As a result, the service must be regenerated.		
<b>Raising condition:</b> ('EPS Path' EQUAL '\')		
<b>Clearing condition:</b> ('EPS Path' NOT EQUAL '\')		
<b>Remedial action:</b> The underlying transport network has gone down resulting in the deletion of a mobile service connector (EPS path). Correct the issue with the transport network and regenerate the mobile service connector by clicking on the re-calculate button on the mobile service properties form.		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-102 MplsDown

Alarm	Attributes	Applicable major releases
Name: MplsDown (27) Type: ProtocolAlarm (1) Package: mpls Raised on class: mpls.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an MPLS site has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> Check operational down reason and update accordingly.		

Table 38-103 MplsPathUpdateFailed

Alarm	Attributes	Applicable major releases
Name: MplsPathUpdateFailed (1066) Type: pathAlarm (12) Package: mpls Raised on class: mpls.LspPath	Severity: major Implicitly cleared: true Default probable cause: mbbRetryExceeded (804) Applicable probable causes: <ul style="list-style-type: none"> <li>• mbbRetryExceeded</li> <li>• lspPathGoingDown</li> <li>• startingHighPriMbb</li> <li>• restartingMbb</li> <li>• highPriMbbInProg</li> </ul>	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an MPLS path update fails because of an MBB problem. The alarm clears when the MBB status changes to Successful.		
<b>Raising condition:</b> (('mbbStatus' NOT EQUAL 'None') AND ('mbbStatus' NOT EQUAL 'Successful'))		
<b>Clearing condition:</b> (('Last Performed State' EQUAL 'Success') OR ('Administrative' EQUAL 'Down') OR (('Operational' EQUAL 'Up') AND ('Last Performed State' EQUAL 'None')))		
<b>Remedial action:</b> Based on the probable cause, change the parameters and update the path again.		

Table 38-104 MrpAttrTblSizeLimitReached

Alarm	Attributes	Applicable major releases
Name: MrpAttrTblSizeLimitReached (574) Type: resourceAlarm (28) Package: l2fwd Raised on class: l2fwd.SiteMrp	Severity: major Implicitly cleared: true Default probable cause: resourceLimitReached (131)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the number of MRP attribute table entries for a service site exceeds the high watermark specified by l2fwd.SiteMrp.mrpAttrTblHighWatermark. The alarm clears when the number of MRP attribute table entries for the site drops below the low watermark specified by l2fwd.SiteMrp.mrpAttrTblLowWatermark.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('MRP Attribute Count' >= 'MRP Max Attributes') OR ('MRP Attribute Count' >= (('MRP Attribute-Table-High-Watermark' * 'MRP Max Attributes') / 100.0)))"		
<b>Clearing condition:</b> (('MRP Attribute Count' < 'MRP Max Attributes') AND (('MRP Attribute-Table-High-Watermark' EQUAL '0') OR ('MRP Attribute Count' < (('MRP Attribute-Table-Low-Watermark' * 'MRP Max Attributes') / 100.0))) AND (('MRP Attribute-Table-Low-Watermark' EQUAL '0') OR ('MRP Attribute Count' < (('MRP Attribute-Table-Low-Watermark' * 'MRP Max Attributes') / 100.0))))"		
<b>Remedial action:</b> Informational		

(2 of 2)

Table 38-105 MsPwFecRetryExpired

Alarm	Attributes	Applicable major releases
Name: MsPwFecRetryExpired (3694) Type: serviceAlarm (16) Package: svt Raised on class: svt.SpokeSdpFec	Severity: minor Implicitly cleared: true Default probable cause: msPwFecRetryExpired (1433)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a trap is received because of retry expired. The alarm is cleared when the retry starts again.		
<b>Raising condition:</b> ('Retry Expired' EQUAL 'true')		
<b>Clearing condition:</b> ('Retry Expired' EQUAL 'false')		
<b>Remedial action:</b> May need to shutdown the multi-segment pseudo-wire provider edge to restart the retries.		

Table 38-106 MultiChassisRingDown

Alarm	Attributes	Applicable major releases
Name: MultiChassisRingDown (520) Type: redundancyAlarm (52) Package: multichassis Raised on class: multichassis.MultiChassisRing	Severity: major Implicitly cleared: true Default probable cause: ringDown (395)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a MC ring group Operational State is not in the Connected state. The alarm is cleared when the ring group enters the Connected state.		
<b>Raising condition:</b> ('Operational State' NOT EQUAL 'Connected')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Connected')		
<b>Remedial action:</b> Check if MC ring is admin down, MC Sync is operational up, In-Band Control Connection is up, ring node is up ...		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-107 MvrConfiguredFromVplsNotExist

Alarm	Attributes	Applicable major releases
Name: MvrConfiguredFromVplsNotExist (219) Type: configurationAlarm (11) Package: vpls Raised on classes: <ul style="list-style-type: none"> <li>vpls.L2AccessInterfaceMldMvrCfg</li> <li>vpls.L2AccessInterfaceMvrCfg</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: MvrConfiguredFromVplsNotExist (164)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an MVR source is an MVR VPLS that does not exist. The alarm clears when the MVR VPLS is created.		
<b>Raising condition:</b> ('fromVplsExists' EQUAL 'false')		
<b>Clearing condition:</b> (('fromVplsExists' EQUAL 'true') OR ('fromVplsId' EQUAL '0L'))		
<b>Remedial action:</b> Create the missing MVR VPLS.		

Table 38-108 MvrConfiguredProxySapNotExist

Alarm	Attributes	Applicable major releases
Name: MvrConfiguredProxySapNotExist (220) Type: configurationAlarm (11) Package: vpls Raised on classes: <ul style="list-style-type: none"> <li>vpls.L2AccessInterfaceMldMvrCfg</li> <li>vpls.L2AccessInterfaceMvrCfg</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: MvrConfiguredProxySapNotExist (165)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when a configured MVR proxy SAP does not exist. The alarm clears when the proxy SAP is created.		
<b>Raising condition:</b> ('proxySapExists' EQUAL 'false')		
<b>Clearing condition:</b> ('proxySapExists' EQUAL 'true')		
<b>Remedial action:</b> Create the missing proxy SAP.		

Table 38-109 MvrSiteDown

Alarm	Attributes	Applicable major releases
Name: MvrSiteDown (162) Type: ProtocolAlarm (1) Package: layer2 Raised on class: layer2.MvrSite	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when MVR is disabled on an NE and a TLS VLAN or MVR VLAN service is provisioned on the NE.		
<b>Raising condition:</b> ('MVR Admin Status' EQUAL 'Disabled')		
<b>Clearing condition:</b> ('MVR Admin Status' EQUAL 'Enabled')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> To clear the alarm, enable MVR Admin Status under the Bridge Instance.		

(2 of 2)

Table 38-110 NeighborDown

Alarm	Attributes	Applicable major releases
Name: NeighborDown (121) Type: NeighborDown (20) Package: ospf Raised on class: ospf.AbstractNeighbor	Severity: major Implicitly cleared: true Default probable cause: NeighborDown (103)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface neighbor is operationally Down.		
<b>Raising condition:</b> ('Operational State' NOT EQUAL 'full')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'full')		
<b>Remedial action:</b> This alarm is raised when the OSPF interface neighbor is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 38-111 NeManagementAndTrapManagementMismatch

Alarm	Attributes	Applicable major releases
Name: NeManagementAndTrapManagementMismatch (1079) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: neManagementChange (817)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE configuration is one of the following: - The Active Management IP is set to Out Of Band, and the Primary Route Preference is set to In Band. - The Active Management IP is set to In Band, and the Primary Route Preference is set to Out of Band.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'Out Of Band')))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND (('Management IP Selection' EQUAL 'In Band Preferred') OR ('Management IP Selection' EQUAL 'In Band Only')) AND ('Primary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND (('Management IP Selection' EQUAL 'Out Of Band Preferred') OR ('Management IP Selection' EQUAL 'Out Of Band Only')) AND ('Primary Route Preference' EQUAL 'Out Of Band')))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The parameters described in the description for this alarm must match.		

**Table 38-112 NewSsh2ServerKeyDetected**

Alarm	Attributes	Applicable major releases
Name: NewSsh2ServerKeyDetected (285) Type: communicationsAlarm (4) Package: security Raised on class: security.KnownHostKey	Severity: warning Implicitly cleared: true Default probable cause: ssh2ServerKeyMismatch (217)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a 5620 SAM main server detects a new public SSH key.		
<b>Raising condition:</b> ('SSH2 Server Key Status' EQUAL 'Mismatch SSH2 Host Key')		
<b>Clearing condition:</b> ('SSH2 Server Key Status' EQUAL 'Active SSH2 Host Key')		
<b>Remedial action:</b> Informational - possible security breach. The SSH key of the router is different from the one known to the SAM server.		

**Table 38-113 NodeDatabaseFallbackDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseFallbackDetected (2923) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseFallback (1121)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a configuration fallback is detected on the node and comes back up with a previous configuration. To correct this situation it might be necessary to reconfigure the node, or perform full resync its database with the 'fallback' configuration returned by the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Fallback')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE has come back to a previous configuration. Perform a manual Full Resync or a Reconfigure of the NE		

**Table 38-114 NodeDatabaseMisalignmentDetected**

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseMisalignmentDetected (2924) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: nodeDatabaseMisalignment (1122)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a configuration misalignment has been detected on the node and comes back up with an unexpected configuration (configuration change triggered by external tool) To correct this situation it might be necessary to reconfigure the node with the 5620 SAM's old configuration or accept the new configuration received from the node.		
<b>Raising condition:</b> ('State' EQUAL 'Node Configuration Misalignment')		
<b>Clearing condition:</b> ('State' EQUAL 'Managed')		
<b>Remedial action:</b> the NE configuration is misaligned. Perform a resync in order to update SAM configuration according to the NE.		

Table 38-115 NodeSuspended

Alarm	Attributes	Applicable major releases
Name: NodeSuspended (5123) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: NodeSuspend (2057)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects an NE moved to suspend state as per user request.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Suspended')		
<b>Clearing condition:</b> ('SNMP Reachability' NOT EQUAL 'Suspended')		
<b>Remedial action:</b> This alarm is raised when user suspends the network element. The alarm will be cleared when the network element is managed back.		

Table 38-116 NoPeerMcRingFound

Alarm	Attributes	Applicable major releases
Name: NoPeerMcRingFound (782) Type: configurationAlarm (11) Package: multichassis Raised on class: multichassis.MultiChassisRing	Severity: major Implicitly cleared: true Default probable cause: IncompleteConfig (557)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot find the peer MC ring.		
<b>Raising condition:</b> ('Peer Multi-Chassis Ring' EQUAL '\')		
<b>Clearing condition:</b> ('Peer Multi-Chassis Ring' NOT EQUAL '\')		
<b>Remedial action:</b> Configure the missing peered MC ring, or delete this one if it is not used.		

Table 38-117 NTPOperDown

Alarm	Attributes	Applicable major releases
Name: NTPOperDown (4879) Type: communicationsAlarm (4) Package: ntp Raised on class: ntp.NTP	Severity: info Implicitly cleared: true Default probable cause: NTPOperDown (1943)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is generated when the NTP Operational State is down for NTP.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Down') AND ('NTP State' EQUAL 'Enabled'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('NTP State' EQUAL 'Disabled'))		
<b>Remedial action:</b> Please check if NTP is administratively enabled (Admin State in NTP General Tab). If admin state down, enable it to make NTP operationally up.		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-118 OrphanNodeDetected

Alarm	Attributes	Applicable major releases
Name: OrphanNodeDetected (4866) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.AdvertisedNode	Severity: major Implicitly cleared: true Default probable cause: nodeNotManagedByAnyEms (1934)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when node is node managed by any EMS after n retries( threshold crossed) it is manually cleared by the operator or when the node is discovered.		
<b>Raising condition:</b> ('State' EQUAL 'Orphan')		
<b>Remedial action:</b> The NE is not managed by any SAM.Add an discovery rule in order to managed it.		

Table 38-119 OspflInterfaceDown

Alarm	Attributes	Applicable major releases
Name: OspflInterfaceDown (141) Type: OspflInterfaceDown (24) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: true Default probable cause: OspflInterfaceDown (112)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an OSPF interface is operationally down.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Down')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF interface is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 38-120 OverTemperatureDetected

Alarm	Attributes	Applicable major releases
Name: OverTemperatureDetected (388) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when the chassis temperature exceeds the maximum threshold value.		
<b>Raising condition:</b> ('Over Temperature State' EQUAL 'Over')		
<b>Clearing condition:</b> ('Over Temperature State' NOT EQUAL 'Over')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 38-121 P2MPLSPDown

Alarm	Attributes	Applicable major releases
Name: P2MPLSPDown (4378) Type: pathAlarm (12) Package: mpls Raised on class: mpls.P2MPDynamicLsp	Severity: critical Implicitly cleared: true Default probable cause: P2MPLSPDown (1563)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the P2MP LSP Administrative State is Up and the Operational State is Down. The alarm clears when the P2MP LSP Operational State changes to Up or the Administrative State changes to Down.		
<b>Raising condition:</b> (('Administrative' EQUAL 'Up') AND ('Operational' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational' EQUAL 'Up') OR ('Administrative' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The operational state of the P2MP LSP is down, despite the administrative state being up. Review the P2MP Primary Instance or S2LPath to make sure it was configured correctly and Administrative state is up. The physical port near end or far end may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 38-122 PartialResyncProblem

Alarm	Attributes	Applicable major releases
Name: PartialResyncProblem (4401) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: partialResyncProblem (1578)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a partial resync on an NE fails. For example, when resyncing only some MIB entries as opposed to a full resync. The periodic reachability test (sysUpTime) is not considered a partial resync, neither is a full resync. However, a PartialResyncProblem alarm can only be reset by a FullResync.		
<b>Raising condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Failed')		
<b>Clearing condition:</b> ('partialResyncStatus' EQUAL 'Partial Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE.		

Table 38-123 PeerConnectionDown (bgp)

Alarm	Attributes	Applicable major releases
Name: PeerConnectionDown (2) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Peer	Severity: critical Implicitly cleared: true Default probable cause: connectionDown (2)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a BGP peer has a Connection State other than Established, and the Administrative State of the BGP peer is Up.		

(1 of 2)

38 — Alcatel-Lucent DC VSC alarms

---

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('Connection State' NOT EQUAL 'Established') AND ('Administrative State' EQUAL 'Up'))		
<b>Clearing condition:</b> (('Connection State' EQUAL 'Established') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> A mismatch in configuration may have occurred. Check the configuration of both peers to rule out a mismatched configuration.		

(2 of 2)

Table 38-124 PeerDown (bgp)

Alarm	Attributes	Applicable major releases
Name: PeerDown (1) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Peer	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a BGP peer has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP peer entity is down - administratively disable the BGP peer and re-enable it. If toggling the administrative state does not solve the problem check that the physical interface and network connection to the far end peer are up and operational. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 38-125 PeerGroupDown (bgp)

Alarm	Attributes	Applicable major releases
Name: PeerGroupDown (5) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.PeerGroup	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a BGP peer group has an Operational State other than Up, and the Administrative State is Up.		
<b>Raising condition:</b> (('Administrative State' EQUAL 'Up') AND ('Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('Administrative State' NOT EQUAL 'Up'))		
<b>Remedial action:</b> The BGP peer group is down - administratively disable the BGP peer group and re-enable it. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 38-126 PeerLacIngressEgressFault

Alarm	Attributes	Applicable major releases
Name: PeerLacIngressEgressFault (2929) Type: PeerLacAlarm (98) Package: svt Raised on class: svt.SpokeSdpBinding	Severity: minor Implicitly cleared: true Default probable cause: peerPWStatusBitsChanged (1123)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the Peer Status is Peer LAC Rx Fault and Peer LAC Tx Fault		
<b>Raising condition:</b> (('Peer State Cause'anyBit'Peer LAC Tx Fault') AND ('Peer State Cause'anyBit'Peer LAC Rx Fault'))		
<b>Clearing condition:</b> NOT (((('Peer State Cause'anyBit'Peer LAC Tx Fault') AND ('Peer State Cause'anyBit'Peer LAC Rx Fault'))))		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 38-127 PersistentIndexParametersMisconfigured

Alarm	Attributes	Applicable major releases
Name: PersistentIndexParametersMisconfigured (173) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: persistentIndexConfigurationMismatch (136)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when persistence is set to Off in the NE BOF.		
<b>Raising condition:</b> (('Persistent SNMP Indices' EQUAL 'False') OR (('hasRedundantProcessorCards' EQUAL 'true') AND ('Redundant Synchronization Mode' EQUAL 'None')))		
<b>Clearing condition:</b> (('Persistent SNMP Indices' EQUAL 'True') AND (('hasRedundantProcessorCards' EQUAL 'false') OR ('Redundant Synchronization Mode' NOT EQUAL 'None')))		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Use the CLI on the NE to enable persistency in the BOF. The discovery process will complete on the next discovery scan. A re-scan can be triggered immediately for the NE from within the discovery manager		

Table 38-128 PollerProblem

Alarm	Attributes	Applicable major releases
Name: PollerProblem (31) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resyncFailed (24)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		

(1 of 2)

## 38 – Alcatel-Lucent DC VSC alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> ('Resync Status' EQUAL 'Full Resync Failed')		
<b>Clearing condition:</b> ('Resync Status' EQUAL 'Full Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

(2 of 2)

Table 38-129 PortEtherSymMonSDAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSDAlarm (5662) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSDThresholdExceededAlarm (2439)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Degradation Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SD Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SD Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal degradation alarm could be cleared by changing/disabling the associated threshold/multiplier values or it is self clearing and will clear once the error rate drops below 1/10th of the configured rate.		

Table 38-130 PortEtherSymMonSFAlarm

Alarm	Attributes	Applicable major releases
Name: PortEtherSymMonSFAlarm (5663) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: etherPortSymMonSFThresholdExceededAlarm (2440)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an Ethernet port Symbol Monitor Failure alarm condition is detected (Signal Failure Threshold exceeded).		
<b>Raising condition:</b> ('Symbol Alarm Reason' EQUAL 'SF Threshold Exceeded')		
<b>Clearing condition:</b> ('Symbol Alarm Reason' NOT EQUAL 'SF Threshold Exceeded')		
<b>Remedial action:</b> Symbol monitor signal failure alarm could be cleared by changing/disabling the associated threshold/multiplier values or by taking the port out of service (eg. shutdown, card/mda reset, physical link loss).		

Table 38-131 PrimaryImageBootFailure

Alarm	Attributes	Applicable major releases
Name: PrimaryImageBootFailure (191) Type: configurationAlarm (11) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: bootOptionFileMisconfigured (150)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the primary software image specified in an NE BOF is unusable.		
<b>Raising condition:</b> (('imageSource' NOT EQUAL 'Primary') AND ('imageSource' NOT EQUAL 'Unknown'))		
<b>Clearing condition:</b> (('imageSource' EQUAL 'Primary') OR ('imageSource' EQUAL 'Unknown'))		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 38-132 RadiusOperStatusDown

Alarm	Attributes	Applicable major releases
Name: RadiusOperStatusDown (3692) Type: radiusOperStatusDownAlarm (105) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: radiusOperationStatusDown (1431)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when all RADIUS servers have gone down.		
<b>Raising condition:</b> ('Global RADIUS Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Global RADIUS Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Verify the RADIUS server is properly configured and radius server state is up. Check the connectivity between SAM server and radius server configured on the Network element.		

Table 38-133 ReachabilityProblem

Alarm	Attributes	Applicable major releases
Name: ReachabilityProblem (243) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: ReachabilityTestFailed (176)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a mediation poll of the SysUpTimeAlarm object on an NE fails, for example, because of network congestion or because the NE is too busy to respond. The probable cause is an unreachable NE Mediation agent on the NE. The polling interval depends on the NE type and is configurable in nms-server.xml. By default, the 5620 SAM polls a managed NE every four minutes. If a poll fails, the alarm is raised. The alarm clears when the 5620 SAM receives a response from the NE, and the 5620 SAM GUI icon that represents the NE turns from red to green.		
<b>Raising condition:</b> ('SNMP Reachability' EQUAL 'Down')		

(1 of 2)

38 — Alcatel-Lucent DC VSC alarms

---

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

(2 of 2)

**Table 38-134 ReconfigFailure**

Alarm	Attributes	Applicable major releases
Name: ReconfigFailure (1949) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: failedReconfig (937)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> This alarm is raised when the reconfig action failed.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		
<b>Remedial action:</b> Verify that the object is configured as expected.		

**Table 38-135 RedundantMepMisconfiguration**

Alarm	Attributes	Applicable major releases
Name: RedundantMepMisconfiguration (3631) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: misconfiguredRedundantMep (1416)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an Active and Redundant MEP do not have the same ID, Operational MAC Address or Sub Group configured.		
<b>Raising condition:</b> ('validRedundantMepConfig' EQUAL 'false')		
<b>Clearing condition:</b> ('validRedundantMepConfig' EQUAL 'true')		
<b>Remedial action:</b> MC-LAG redundant MEP configuration (MEP ID or Mac Address) for Active & Standby Interfaces do not match, this could cause issues with CFM or CCM tests if Active interface changes. Delete and Re-create Standby MEP to match Active.		

Table 38-136 RedundantMepMissing

Alarm	Attributes	Applicable major releases
Name: RedundantMepMissing (3632) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: missingRedundantMep (1417)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a MEP misses a redundant counterpart on LAG or SAP.		
<b>Raising condition:</b> (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' EQUAL '\\""))		
<b>Clearing condition:</b> (('MC-LAG Inactive' EQUAL 'Not Applicable') OR (('MC-LAG Inactive' NOT EQUAL 'Not Applicable') AND ('Redundant MEP' NOT EQUAL '\\""))		
<b>Remedial action:</b> MC-LAG redundant MEP is missing Active & Standby Interfaces, this will cause issues with CFM or CCM tests if Active interface changes. Create missing Active/Standby MEP to match existing.		

Table 38-137 RemoteMepCCMAAlarm

Alarm	Attributes	Applicable major releases
Name: RemoteMepCCMAAlarm (502) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: major Implicitly cleared: true Default probable cause: missingRemoteMep (388)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a MEP loses connectivity with one or more remote MEPs. The Remote MEP DB State tab on a MEP lists the missing remote MEPs.		
<b>Raising condition:</b> ('High-Priority Defect' NOT EQUAL '0')		
<b>Clearing condition:</b> ('High-Priority Defect' EQUAL '0')		
<b>Remedial action:</b> MEP has lost communication with Remote MEP defined in Maintenance Association (MEG) Remote MEP list, Either Remote MEP list is incorrect or diagnose connection fault and resolve.		

Table 38-138 RemoteRncvOperDown

Alarm	Attributes	Applicable major releases
Name: RemoteRncvOperDown (522) Type: redundancyAlarm (52) Package: multichassis Raised on class: multichassis.MultiChassisRingNode	Severity: major Implicitly cleared: true Default probable cause: remoteRncvDisconnected (397)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the remote RNCV Operational State of a ring node is other than Connected or NotTested, which means that the ring node is not connected to the local MC ring group. The alarm clears when the ring node enters the Connected or NotTested state.		
<b>Raising condition:</b> (('Remote Operational State' NOT EQUAL 'Connected') AND ('Remote Operational State' NOT EQUAL 'Not Tested'))		
<b>Clearing condition:</b> (('Remote Operational State' EQUAL 'Connected') OR ('Remote Operational State' EQUAL 'Not Tested'))		

(1 of 2)

## 38 — Alcatel-Lucent DC VSC alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Make sure that ring node is properly connected to MC ring group.		

(2 of 2)

Table 38-139 RouteDistinguisherNotConfigured

Alarm	Attributes	Applicable major releases
Name: RouteDistinguisherNotConfigured (142) Type: configurationAlarm (11) Package: I3fwd Raised on class: I3fwd.ServiceSite	Severity: major Implicitly cleared: true Default probable cause: routeDistinguisherNotConfigured (113)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when no RD is configured for an L3 service site.		
<b>Raising condition:</b> ('routeDistinguisher' EQUAL "\00 00 00 00 00 00 00")		
<b>Clearing condition:</b> ('routeDistinguisher' NOT EQUAL "\00 00 00 00 00 00 00")		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The RD must be configured on the L3 Service Site in question.		

Table 38-140 S2LPathBypassTunnelActive

Alarm	Attributes	Applicable major releases
Name: S2LPathBypassTunnelActive (777) Type: pathAlarm (12) Package: mpls Raised on class: mpls.S2LPath	Severity: warning Implicitly cleared: true Default probable cause: S2LPathReroutedToBypassTunnel (552)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when the bypass tunnel in an S2L path becomes active. The alarm clears when the bypass tunnel is no longer active, for example, because a primary tunnel failure is resolved or a new path is established.		
<b>Raising condition:</b> ('Bypass Tunnel Active' EQUAL 'true')		
<b>Clearing condition:</b> ('Bypass Tunnel Active' EQUAL 'false')		
<b>Remedial action:</b> Check what caused primary tunnel is down and fix it if possible.		

Table 38-141 S2LPathDown

Alarm	Attributes	Applicable major releases
Name: S2LPathDown (778) Type: pathAlarm (12) Package: mpls Raised on class: mpls.S2LPath	Severity: major Implicitly cleared: true Default probable cause: S2LPathDown (553)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the S2L path Administrative State is Up and the Operational State is not Up. The alarm clears when the S2L path Operational State changes to Up or the Administrative State changes to Down.		
<b>Raising condition:</b> (('Administrative' EQUAL 'Up') AND ('Operational' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational' EQUAL 'Up') OR ('Administrative' NOT EQUAL 'Up'))		
<b>Remedial action:</b> Check the failure code and update accordingly, e.g. whether MPLS/RSVP interfaces, OSPF interfaces are down.		

(2 of 2)

Table 38-142 SaveConfigFailed

Alarm	Attributes	Applicable major releases
Name: SaveConfigFailed (105) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: fileAccessError (90)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the admin save command on an NE fails.		
<b>Raising condition:</b> ('Config Save State' EQUAL 'Failure')		
<b>Clearing condition:</b> ('Config Save State' EQUAL 'Success')		
<b>Remedial action:</b> Attempt the admin save command a second time. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 38-143 ScheduledPollerProblem

Alarm	Attributes	Applicable major releases
Name: ScheduledPollerProblem (4386) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: scheduledResyncFailed (1569)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Raising condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Failed')		
<b>Clearing condition:</b> ('Scheduled Resync Status' EQUAL 'Scheduled Resync Done')		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-144 SdpBindingDown

Alarm	Attributes	Applicable major releases
Name: SdpBindingDown (221) Type: SdpBindingAlarm (30) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: SdpBindingNotReady (166)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an SDP binding has an Operational State other than Up.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'Standby For BGP Multi-Homing'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'Standby For BGP Multi-Homing'))		
<b>Remedial action:</b> To resolve this alarm check the SDP binding to determine if a configuration mismatch exists. If configuration is determined to be correct then the associated network interface may be down. Further investigation is required to determine why the underlying network interface is down.		

Table 38-145 SdpBindingTunnelDown

Alarm	Attributes	Applicable major releases
Name: SdpBindingTunnelDown (222) Type: CircuitAlarm (17) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: SdpTunnelNotReady (167)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an SDP binding tunnel has an Operational State other than Up.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Tunnel Not Ready') OR ('Operational State' EQUAL 'Tunnel Down'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'Tunnel Not Ready') AND ('Operational State' NOT EQUAL 'Tunnel Down'))		
<b>Remedial action:</b> To resolve this alarm check the endpoints of the SDP binding to determine if a configuration mismatch exists. If configuration matches then the underlying network resource between the endpoints of the SDP may be down. Further investigation is required to determine why the underlying transport network is down.		

Table 38-146 SdpEgressIfsNetDomainInConsistent

Alarm	Attributes	Applicable major releases
Name: SdpEgressIfsNetDomainInConsistent (3616) Type: resourceAlarm (28) Package: svt Raised on class: svt.Tunnel	Severity: warning Implicitly cleared: true Default probable cause: sdpEgressIfsNetDomainInConsistent (1405)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the SDP egress interface's consistency state changes to inconsistent.		
<b>Raising condition:</b> ('Egress Interfaces Consistency State' EQUAL '3')		
<b>Clearing condition:</b> ('Egress Interfaces Consistency State' EQUAL '2')		
<b>Remedial action:</b> To resolve this alarm check egress interfaces of the SDP configuration. If configuration is determined to be correct check underlying physical transport. Further investigation is required.		

Table 38-147 ServiceSiteDown

Alarm	Attributes	Applicable major releases
Name: ServiceSiteDown (97) Type: serviceAlarm (16) Package: service Raised on class: service.Site	Severity: critical Implicitly cleared: true Default probable cause: siteDown (83)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when all SAPs on a site are operationally down, or when the service tunnels for the site are operationally down.		
<b>Raising condition:</b> (('Operational State' NOT EQUAL 'Up') AND ('State Cause' NOT EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up') OR ('State Cause' EQUAL 'All Spoke SDP Bindings are Standby'))		
<b>Remedial action:</b> The network resources (i.e. physical ports for SAPs, or physical ports/LSP) associated with the service site should be examined to determine if/why they are operationally down. The underlying transport network supporting the site may also be unreliable.		

Table 38-148 SessionDown

Alarm	Attributes	Applicable major releases
Name: SessionDown (73) Type: ProtocolAlarm (1) Package: rsvp Raised on class: rsvp.Session	Severity: critical Implicitly cleared: true Default probable cause: interfaceDown (32)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an RSVP session is operationally down.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Please check the RSVP session path to make sure all associated protocols/interfaces/connections are OK.		

Table 38-149 ShamLinkDown

Alarm	Attributes	Applicable major releases
Name: ShamLinkDown (665) Type: ShamLinkAlarm (57) Package: ospf Raised on class: ospf.ShamLink	Severity: critical Implicitly cleared: true Default probable cause: ShamLinkDown (492)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a sham link is operationally down.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Operational State' NOT EQUAL 'Down')		

(1 of 2)

## 38 — Alcatel-Lucent DC VSC alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> This alarm is raised when the OSPF sham link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

(2 of 2)

Table 38-150 SingleSFMOverloadDetected

Alarm	Attributes	Applicable major releases
Name: SingleSFMOverloadDetected (843) Type: ProtocolAlarm (1) Package: I3fwd Raised on class: I3fwd.Site	Severity: major Implicitly cleared: true Default probable cause: singleSfmOverloadDetected (601)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when a device reports a single-SFM overload. The alarm clears when the VR exits the Overload state.		
<b>Raising condition:</b> ('Overload State' EQUAL 'Overload')		
<b>Clearing condition:</b> ('Overload State' EQUAL 'Normal')		
<b>Remedial action:</b> Information - if the the problem persists please contact Alcatel-Lucent support for assistance.		

Table 38-151 SpbAdjacencyDown

Alarm	Attributes	Applicable major releases
Name: SpbAdjacencyDown (4392) Type: adjacencyAlarm (31) Package: spb Raised on class: spb.AbstractInterface	Severity: minor Implicitly cleared: true Default probable cause: IsisInterfaceDown (232)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when an SPB IS-IS interface has no adjacencies, for example, because the IS-IS protocol on the remote site is down.		
<b>Raising condition:</b> (('Adjacency Count' EQUAL '0L'))		
<b>Clearing condition:</b> (('Adjacency Count' > '0L'))		
<b>Remedial action:</b> Check remote site to see if corresponding IS-IS interface is configured and admin up.		

**Table 38-152 SpbInterfaceDown**

Alarm	Attributes	Applicable major releases
Name: SpbInterfaceDown (4393) Type: ProtocolAlarm (1) Package: spb Raised on class: spb.AbstractInterface	Severity: warning Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an SPB IS-IS interface has an Operational State other than Up.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Down')		
<b>Clearing condition:</b> ('operationalState' NOT EQUAL 'Down')		
<b>Remedial action:</b> Check if underlying port is down, or associated network interface is down.		

**Table 38-153 SpbSiteDown**

Alarm	Attributes	Applicable major releases
Name: SpbSiteDown (4396) Type: ProtocolAlarm (1) Package: spb Raised on class: spb.Site	Severity: critical Implicitly cleared: true Default probable cause: protocolDown (1)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an SPB site has an Operational State other than Up.		
<b>Raising condition:</b> ('Operational State' NOT EQUAL 'Up')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Check if the administrative state is down. If the administrative state is up, then check the ISIS instance associated with the SPB and make sure it is up.		

**Table 38-154 StatsRetrieveFailed**

Alarm	Attributes	Applicable major releases
Name: StatsRetrieveFailed (244) Type: configurationAlarm (11) Package: sw Raised on class: sw.AccountingStatsRetrievalManager	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM main or auxiliary server cannot transfer an accounting file from an NE.		
<b>Raising condition:</b> (('Stats Retrieval State' NOT EQUAL 'Success') AND ('Stats Retrieval State' NOT EQUAL 'Not Attempted'))		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy or otherwise cannot respond to the 5620 SAM main or auxiliary server.		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-155 SubscriberSystemNextHopUsageHigh

Alarm	Attributes	Applicable major releases
Name: SubscriberSystemNextHopUsageHigh (5157) Type: thresholdCrossed (6) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit.		
<b>Raising condition:</b> ('IP Next Hop Usage High' EQUAL 'true')		
<b>Clearing condition:</b> ('IP Next Hop Usage High' EQUAL 'false')		
<b>Remedial action:</b> The alarm is raised when the IP next-hop usage by subscriber managed routes reaches its high watermark, cleared when it reaches its low watermark again; the watermarks are derived from the limit specified with the property subSysNextHopLimit. There is no immediate effect, but when the usage actually hits the limit, new hosts will not get their managed routes.		

Table 38-156 SubSysChassMemoryUsageHi

Alarm	Attributes	Applicable major releases
Name: SubSysChassMemoryUsageHi (5656) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.Shelf	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> This alarm is raised when the memory usage by subscriber management on this system or chassis reaches its high watermark ('true').		
<b>Raising condition:</b> ('Memory Usage High' EQUAL 'True')		
<b>Clearing condition:</b> (('Memory Usage High' EQUAL 'False') OR ('Memory Usage High' EQUAL 'unspecified'))		
<b>Remedial action:</b> The memory usage by subscriber management on this system has reached its high watermark. Please check your memory usage.		

Table 38-157 TemperatureThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: TemperatureThresholdCrossed (7) Type: environmentalAlarm (2) Package: equipment Raised on class: equipment.Environment	Severity: major Implicitly cleared: true Default probable cause: equipmentOverheated (5)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when a temperature crosses a threshold.		
<b>Raising condition:</b> ('temperatureThresholdCrossed' EQUAL 'true')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('temperatureThresholdCrossed' EQUAL 'false')		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

(2 of 2)

Table 38-158 TmnxEqPortEtherLoopDetected

Alarm	Attributes	Applicable major releases
Name: TmnxEqPortEtherLoopDetected (461) Type: portEtherLoopDetected (48) Package: ethernetequipment Raised on class: ethernetequipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: HighBer (238)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when a device detects a physical loop on an Ethernet port.		
<b>Raising condition:</b> (('Down When Looped Status' EQUAL 'Loop Detected'))		
<b>Clearing condition:</b> (('Down When Looped Status' EQUAL 'No Loop Detected'))		
<b>Remedial action:</b> An Ethernet port has been mis-cabled - please remove the loopback cable on the port.		

Table 38-159 TrapDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: TrapDestinationMisconfigured (33) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: trapDestinationMisconfigured (26) Applicable probable causes: <ul style="list-style-type: none"> <li>• trapDestinationMisconfigured</li> <li>• duplicateTrapLogId</li> </ul>	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM cannot be added to the NE's SNMP trap destinations.		
<b>Raising condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('isTrapDestinationMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The SNMP trap destination on the NE must be configured to the IP address of the SAM server.		

Table 38-160 TrapReceivingFailure

Alarm	Attributes	Applicable major releases
Name: TrapReceivingFailure (1083) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: trapsWillNotBeSent (822)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> This user-defined alarm is raised when the NE is unable to send traps because the NE configuration is one of the following: - The Management IP Selection is set to Out Of Band Only, the Primary Route Preference is set to In Band, and the Secondary Route Preference is set to None. - The Management IP Selection is set to In Band Only, the Primary Route Preference is set to Out Of Band, and the Secondary Route Preference is set to None.		
<b>Raising condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Only') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Only') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'In Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'In Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'In Band') OR ('Secondary Route Preference' EQUAL 'In Band')) OR (('Active Management IP' EQUAL 'Out Of Band') AND ('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Primary Route Preference' EQUAL 'Out Of Band') OR ('Secondary Route Preference' EQUAL 'Out Of Band'))))		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configuration error must be corrected per the discussion in the description for this alarm.		

Table 38-161 TrapRoutePreferenceRedundancyMissing

Alarm	Attributes	Applicable major releases
Name: TrapRoutePreferenceRedundancyMissing (1084) Type: communications (87) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: trapsRedundancyMissing (823)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The user-defined alarm is raised when NE management redundancy is configured without trap route preference redundancy.		
<b>Raising condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Primary Route Preference' EQUAL 'In Band') AND ('Secondary Route Preference' EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Primary Route Preference' EQUAL 'Out Of Band') AND ('Secondary Route Preference' EQUAL 'None'))))		
<b>Clearing condition:</b> (((('Management IP Selection' EQUAL 'In Band Preferred') AND ('Active Management IP' EQUAL 'In Band') AND ('Secondary Route Preference' NOT EQUAL 'None')) OR (('Management IP Selection' EQUAL 'Out Of Band Preferred') AND ('Active Management IP' EQUAL 'Out Of Band') AND ('Secondary Route Preference' NOT EQUAL 'None'))))		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has been made which must be corrected. The IP address of the standby SAM server must be configured on the NE in question.		

(2 of 2)

Table 38-162 TunnelAdministrativelyDown (mpls)

Alarm	Attributes	Applicable major releases
Name: TunnelAdministrativelyDown (523) Type: pathAlarm (12) Package: mpls Raised on class: mpls.Tunnel	Severity: minor Implicitly cleared: true Default probable cause: tunnelAdministrativelyDown (333)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects that an MPLS path is administratively down.		
<b>Raising condition:</b> ('Administrative' NOT EQUAL 'Up')		
<b>Clearing condition:</b> ('Administrative' EQUAL 'Up')		
<b>Remedial action:</b> Turn up the corresponding MPLS path.		

Table 38-163 TunnelAdministrativelyDown (svt)

Alarm	Attributes	Applicable major releases
Name: TunnelAdministrativelyDown (523) Type: pathAlarm (12) Package: svt Raised on class: svt.Tunnel	Severity: minor Implicitly cleared: true Default probable cause: tunnelAdministrativelyDown (333)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects that a service tunnel is administratively down.		
<b>Raising condition:</b> ('administrativeState' NOT EQUAL 'Up')		
<b>Clearing condition:</b> ('administrativeState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - an operator has manually turned down a service tunnel.		

Table 38-164 TunnelDown (mpls)

Alarm	Attributes	Applicable major releases
Name: TunnelDown (30) Type: pathAlarm (12) Package: mpls Raised on class: mpls.Tunnel	Severity: warning Implicitly cleared: true Default probable cause: tunnelDown (23)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an MPLS path has an Operational State other than Up, and the Administrative State is Up.		

(1 of 2)

## 38 – Alcatel-Lucent DC VSC alarms

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('Administrative' EQUAL 'Up') AND ('Operational' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational' EQUAL 'Up') OR ('Administrative' NOT EQUAL 'Up'))		
<b>Remedial action:</b> Check the network resources along the path.		

(2 of 2)

Table 38-165 TunnelDown (svt)

Alarm	Attributes	Applicable major releases
Name: TunnelDown (30) Type: pathAlarm (12) Package: svt Raised on class: svt.AbstractTunnel	Severity: critical Implicitly cleared: true Default probable cause: tunnelDown (23)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 5620 SAM detects that a service tunnel is operationally down.		
<b>Raising condition:</b> (('Administrative' EQUAL 'Up') AND ('Operational' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('Operational' EQUAL 'Up') OR ('Administrative' NOT EQUAL 'Up'))		
<b>Remedial action:</b> This alarm indicates that a problem has been made in the underlying transport network. If the alarm persists or re-occurs frequently then investigation of the underlying transport issues is warranted.		

Table 38-166 UnidentifiedNode

Alarm	Attributes	Applicable major releases
Name: UnidentifiedNode (1922) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: unidentifiedNode (922)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the node being discovered can not be properly identified.		
<b>Raising condition:</b> ('State' EQUAL 'Pending Identification')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Pending Identification')		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. The eNodeB does not have a system name. The name can be configured by selecting the alarm, opening the associated properties form for the alarmed object and configuring the system name.		

Table 38-167 UnmanageFailed

Alarm	Attributes	Applicable major releases
Name: UnmanageFailed (300) Type: discoveryControlAlarm (33) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: true Default probable cause: unableToDeleteNode (231)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when an attempt to unmanage an NE fails.		
<b>Raising condition:</b> ('Site State' EQUAL 'Unmanage Failed')		
<b>Clearing condition:</b> ('Site State' NOT EQUAL 'Unmanage Failed')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 38-168 UpgradedBuildVersionMismatch

Alarm	Attributes	Applicable major releases
Name: UpgradedBuildVersionMismatch (174) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: upgradedImageNotBooted (137)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the software version that an NE reports after a software upgrade does not match the version of the software used for the upgrade.		
<b>Raising condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'true')		
<b>Clearing condition:</b> ('upgradedBuildVersionMismatch' EQUAL 'false')		
<b>Remedial action:</b> Informational - if the alarm persists please contact Alcatel-Lucent support for assistance		

Table 38-169 upgradedCardAlarm

Alarm	Attributes	Applicable major releases
Name: upgradedCardAlarm (255) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: upgradedCard (194)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the standby CPM is rebooted and operational after a software upgrade. A device resets an IOM automatically after 120 minutes if the IOM is not manually reset after a CPM upgrade.		
<b>Raising condition:</b> ('operationalState' EQUAL 'Upgrade')		
<b>Clearing condition:</b> ('operationalState' EQUAL 'Up')		
<b>Remedial action:</b> Informational - no corrective action required.		

## 38 — Alcatel-Lucent DC VSC alarms

Table 38-170 VersionConfigRestoreFailed

Alarm	Attributes	Applicable major releases
Name: VersionConfigRestoreFailed (536) Type: configurationAlarm (11) Package: sw Raised on class: sw.BackupRestoreManager	Severity: major Implicitly cleared: true Default probable cause: versionMismatch (405)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when the restore procedure on an NE fails because of a mismatch between the backup file set version and the NE software version.		
<b>Raising condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Failure')		
<b>Clearing condition:</b> ('lastNmsVersionRestoreState' EQUAL 'Success')		
<b>Remedial action:</b> The backup files being restored do not match with the version of node software release. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 38-171 VirtualLinkDown

Alarm	Attributes	Applicable major releases
Name: VirtualLinkDown (122) Type: VirtualLinkAlarm (21) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: true Default probable cause: VirtualLinkDown (104)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when a virtual link is Down.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Operational State' NOT EQUAL 'Down')		
<b>Remedial action:</b> This alarm is raised when the OSPF virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 38-172 VirtualNeighborDown

Alarm	Attributes	Applicable major releases
Name: VirtualNeighborDown (123) Type: VirtualNeighborDown (22) Package: ospf Raised on classes: <ul style="list-style-type: none"> <li>ospf.ShamLink</li> <li>ospf.VirtualLink</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: VirtualNeighborDown (105)	<ul style="list-style-type: none"> <li>2.1</li> <li>3.0</li> </ul>
<b>Description:</b> The alarm is raised when a neighbor virtual link is operationally down.		
<b>Raising condition:</b> ('neighborCount' EQUAL '0L')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('neighborCount' NOT EQUAL '0L')		
<b>Remedial action:</b> This alarm is raised when the OSPF neighbor virtual link is operationally down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

(2 of 2)

Table 38-173 WrongCpaaSoftwareVersion

Alarm	Attributes	Applicable major releases
Name: WrongCpaaSoftwareVersion (791) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: wrongCpaaSoftwareVersion (559)	<ul style="list-style-type: none"> <li>• 2.1</li> <li>• 3.0</li> </ul>
<b>Description:</b> The alarm is raised when the 7701 CPAA software is the wrong version and requires an upgrade.		
<b>Raising condition:</b> (('Software Version' EQUAL '"TIMOS-B-3.0.Generic "') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Clearing condition:</b> (('Software Version' NOT EQUAL '"TIMOS-B-3.0.Generic "') AND ('Chassis Type' EQUAL '7701 CPAA'))		
<b>Remedial action:</b> The SW version of the CPAA must be upgraded to the version compatible with CPAM version.		

## 39 – Unspecified NE alarms

---

**Note** — This chapter lists alarms that have no NE type specified. The alarms listed in this chapter may apply to one or more NE types, however, this information is not specified in the 5620 SAM alarm schema. Associating alarms with specific NE types is an ongoing Alcatel-Lucent effort.

**Table 39-1 AARadiusAcctPlcyFailure**

Alarm	Attributes	Applicable major releases
Name: AARadiusAcctPlcyFailure (3948) Type: AARadiusAcctPlcyFailureAlarm (120) Package: aapolicy Raised on class: aapolicy.AARadiusAccountingPolicy	Severity: major Implicitly cleared: false Default probable cause: aARadiusAcctPlcyFailure (1527)	Unspecified
<b>Description:</b> The alarm is raised when a RADIUS accounting request was not successfully sent to any of the RADIUS servers specified in the AA RADIUS accounting policy. The effect is accounting data for current subscribers will not be exported externally. Based on the noted reason, if necessary take action to ensure that the next RADIUS accounting will be successfully sent.		
<b>Remedial action:</b> The AA RADIUS Accounting Server(s) which are configured in the AA RADIUS Accounting Policy are unreachable. This may occur in a number of different scenarios. The server(s) may have become unresponsive - please refer to the AA RADIUS Accounting Server documentation for assistance. The network connectivity to the server(s) may have been lost - please investigate why the underlying transport network is unreliable.		

## 39 – Unspecified NE alarms

Table 39-2 AARadiusAcctServerStateChanged

Alarm	Attributes	Applicable major releases
Name: AARadiusAcctServerStateChanged (3949) Type: AARadiusAcctServerStateChangedAlarm (121) Package: aapolicy Raised on class: aapolicy.AARadiusAccountingServer	Severity: info Implicitly cleared: true Default probable cause: aARadiusAcctServerStateChanged (1528)	Unspecified
<b>Description:</b> The notification alarm is raised when the operational status of an AA RADIUS Accounting Policy Server has transitioned from 'In Service' to 'Out of Service' or 'Unknown' and cleared when operational status transitioned to 'In Service'.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Out Of Service') AND ('isLocal' EQUAL 'true'))		
<b>Clearing condition:</b> ('Operational State' EQUAL 'In Service')		
<b>Remedial action:</b> Informational - This is a notification alarm to indicate that AA RADIUS Accounting Server which is configured in the AA RADIUS Accounting Policy is changing operational state.		

Table 39-3 AarpStateChanged

Alarm	Attributes	Applicable major releases
Name: AarpStateChanged (3705) Type: AarpStateChanged (108) Package: aapolicy Raised on class: aapolicy.Aarp	Severity: info Implicitly cleared: false Default probable cause: AarpStateChanged (1445)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects that an AARP state is changed.		
<b>Remedial action:</b> The application assurance redundancy protocol state is changed between standalone, remote, master or backup.		

Table 39-4 AAUrlFilterStateChanged

Alarm	Attributes	Applicable major releases
Name: AAUrlFilterStateChanged (4972) Type: processingErrorAlarm (81) Package: aapolicy Raised on class: aapolicy.AAUrlFilter	Severity: info Implicitly cleared: true Default probable cause: aAUrlFilterStateChanged (2029)	Unspecified
<b>Description:</b> The notification alarm is raised when the operational status has transitioned from 'In Service' to 'Out of Service' and cleared when operational status transitioned from 'Out of Service' to 'In Service'.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Down') AND ('isLocal' EQUAL 'true'))		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Up')		
<b>Remedial action:</b> Informational - This is a notification alarm to indicate that AA URL Filter which is configured in the AA URL Filter Policy is changing operational state.		

Table 39-5 ABSAlarm

Alarm	Attributes	Applicable major releases
Name: ABSAlarm (5187) Type: equipmentAlarm (3) Package: isa Raised on class: isa.MgGroupMember	Severity: major Implicitly cleared: true Default probable cause: resourceLimitReached (131)	Unspecified
<b>Description:</b> The ABSAlarm is raised when a set of the internal parameters for ICC call latency and memory utilization reach the high threshold (activated) and cleared when it drop back and keep staying below the low threshold for at least some time period (de-activated)		
<b>Remedial action:</b> Diagnose why high memory utilization and/or control signaling overload happen.		

Table 39-6 AddressAttachFailed (rtr)

Alarm	Attributes	Applicable major releases
Name: AddressAttachFailed (8134) Type: processingErrorAlarm (81) Package: rtr Raised on class: rtr.NetworkInterface	Severity: warning Implicitly cleared: false Default probable cause: addressAttachFailed (2530)	Unspecified
<b>Description:</b> The alarm is raised when an IP address could not be attached to an interface.		
<b>Remedial action:</b> An IP address could not be attached to an interface. A possible cause is that a duplicate address is detected.		

Table 39-7 AddressAttachFailed (service)

Alarm	Attributes	Applicable major releases
Name: AddressAttachFailed (8134) Type: processingErrorAlarm (81) Package: service Raised on class: service.L3AccessInterface	Severity: warning Implicitly cleared: false Default probable cause: addressAttachFailed (2530)	Unspecified
<b>Description:</b> The alarm is raised when an IP address could not be attached to an interface.		
<b>Remedial action:</b> An IP address could not be attached to an interface. A possible cause is that a duplicate address is detected.		

## 39 – Unspecified NE alarms

Table 39-8 AddressMisconfiguration

Alarm	Attributes	Applicable major releases
Name: AddressMisconfiguration (591) Type: configurationAlarm (11) Package: service Raised on class: service.Service	Severity: major Implicitly cleared: true Default probable cause: EpipeBackboneMacAddressMismatch (444) Applicable probable causes: <ul style="list-style-type: none"> <li>EpipeBackboneMacAddressMismatch</li> <li>BVplsSourceMacAddressDuplicate</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when B-VPLS site addresses are misconfigured. The EpipeBackboneMacAddressMismatch probable cause indicates that the backbone destination MAC address does not match the backbone source MAC address of the site on the destination NE. The BVplsSourceMacAddressDuplicate probable cause indicates that there are duplicate backbone source MAC addresses.		
<b>Remedial action:</b> Reconfigure the backbone MAC address so that the destination MAC address match the destination site for an EPIPE, or the source MAC address is not duplicate to the other source MAC address for a B-VPLS.		

Table 39-9 AdvNotActivated

Alarm	Attributes	Applicable major releases
Name: AdvNotActivated (741) Type: configurationAlarm (11) Package: vrrp Raised on class: vrrp.InstanceV6	Severity: warning Implicitly cleared: true Default probable cause: advertisementNotActivated (517)	Unspecified
<b>Description:</b> The alarm is raised when the parent interface of an IPv6 VR instance is not configured to send router advertisements, or when router advertisement is not configured to use the virtual MAC address.		
<b>Remedial action:</b> Activate the Advertisement for the interface for the VRRP so that it sends Advertisement and Use Virtual MAC Address.		

Table 39-10 Ais

Alarm	Attributes	Applicable major releases
Name: Ais (736) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: ais (513)	Unspecified
<b>Description:</b> The alarm is raised when an NE reports an AIS condition on the Tx or Rx circuit of a PDH tributary.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-11 AisRx

Alarm	Attributes	Applicable major releases
Name: AisRx (1157) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: aisRx (860)	Unspecified
<b>Description:</b> The alarm is raised when there is a receiver alarm indication signal.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-12 AisTx

Alarm	Attributes	Applicable major releases
Name: AisTx (1158) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: aisTx (861)	Unspecified
<b>Description:</b> The alarm is raised when there is a transmission alarm indication signal.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-13 AllBgpPeerConnectionsDown

Alarm	Attributes	Applicable major releases
Name: AllBgpPeerConnectionsDown (5417) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: CPAAPeerConnectionDown (2124)	Unspecified
<b>Description:</b> The alarm is raised when all CPAA's BGP peers went down.		
<b>Remedial action:</b> 1) All BGP peer connections are down for the active CPAA. Please check the connections. 2) If the standby CPAA is functional as per your requirements, switch-over might resolve the issue.		

## 39 – Unspecified NE alarms

Table 39-14 AllTimingReferencesNotQualified

Alarm	Attributes	Applicable major releases
Name: AllTimingReferencesNotQualified (549) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: major Implicitly cleared: true Default probable cause: allTimingReferencesNotQualified (419)	Unspecified
<b>Description:</b> The alarm is raised when no timing references on an NE are in the Qualified state.		
<b>Raising condition:</b> (('Qualified For Use' NOT EQUAL 'Qualified') AND ('Qualified For Use' NOT EQUAL 'Qualified') AND ('Qualified For Use' NOT EQUAL 'Qualified') AND ('Qualified For Use' NOT EQUAL 'Qualified'))		
<b>Clearing condition:</b> (('Qualified For Use' EQUAL 'Qualified') OR ('Qualified For Use' EQUAL 'Qualified') OR ('Qualified For Use' EQUAL 'Qualified') OR ('Qualified For Use' EQUAL 'Qualified'))		
<b>Remedial action:</b> Make sure that all the Timing References are qualified.		

Table 39-15 apsCfgRaiseAlarm

Alarm	Attributes	Applicable major releases
Name: apsCfgRaiseAlarm (772) Type: configurationAlarm (11) Package: ethernetntunnel Raised on class: ethernetntunnel.EthernetTunnelEndpoint	Severity: major Implicitly cleared: true Default probable cause: configurationMismatch (548)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a mismatch between the working and protection Ethernet tunnel group configurations.		
<b>Remedial action:</b> Fix the mismatch between the working and protection Ethernet tunnel configurations.		

Table 39-16 apsNoRspRaiseAlarm

Alarm	Attributes	Applicable major releases
Name: apsNoRspRaiseAlarm (773) Type: configurationAlarm (11) Package: ethernetntunnel Raised on class: ethernetntunnel.EthernetTunnelEndpoint	Severity: major Implicitly cleared: true Default probable cause: incompleteProtectionSwitching (549)	Unspecified
<b>Description:</b> The alarm is raised when an Ethernet tunnel group protection switch is incomplete, as indicated by a comparison of the transmitted 'Requested Signal' values and the received 'Bridged Signal' in the APS protocol.		
<b>Remedial action:</b> Fix the mismatch between the working and protection Ethernet tunnel configurations.		

Table 39-17 apsPrvsnAlarm

Alarm	Attributes	Applicable major releases
Name: apsPrvsnAlarm (1196) Type: configurationAlarm (11) Package: ethring Raised on class: ethring.Element	Severity: major Implicitly cleared: true Default probable cause: provisioningMismatch (470)	Unspecified
<b>Description:</b> The alarm is raised when a mismatch is detected on Ethernet Ring provisioning. The mismatch occurs when the RPL Owner Node receives one or more No Request R-APS message(s) with an RPL blocked status flag set (NR, RB) and a different Node ID.		
<b>Remedial action:</b> Probably more than one Ring Protection Link owners configured in the Ring, make sure which one should be RPL owner and delete others.		

Table 39-18 apsPrvsnRaiseAlarm

Alarm	Attributes	Applicable major releases
Name: apsPrvsnRaiseAlarm (774) Type: configurationAlarm (11) Package: ethernetntunnel Raised on class: ethernetntunnel.EthernetTunnelEndpoint	Severity: major Implicitly cleared: true Default probable cause: provisioningMismatch (470)	Unspecified
<b>Description:</b> The alarm is raised when an Ethernet tunnel group provisioning mismatch is detected at the ETH layer. The mismatch is detected through a comparison of the transmitted and received APS protocol A, B and D bits.		
<b>Remedial action:</b> Check the configuration of the two ends of the tunnel are compatible/same for the protocol.		

Table 39-19 AsymmetricalConfig (bundle)

Alarm	Attributes	Applicable major releases
Name: AsymmetricalConfig (295) Type: configurationAlarm (11) Package: bundle Raised on class: bundle.MultiChassisApsInterface	Severity: major Implicitly cleared: true Default probable cause: asymmetricalConfig (226)	Unspecified
<b>Description:</b> The alarm is raised when the bundles in an APS group do not have matching configurations.		
<b>Raising condition:</b> ('Asymmetrical Config Detected' EQUAL 'true')		
<b>Clearing condition:</b> ('Asymmetrical Config Detected' EQUAL 'false')		
<b>Remedial action:</b> Check configurations on both members to see anything not matched.		

## 39 – Unspecified NE alarms

Table 39-20 AtcaAlarmCard\_e1InfraAlarm

Alarm	Attributes	Applicable major releases
Name: AtcaAlarmCard_e1InfraAlarm (5704) Type: communicationsAlarm (4) Package: femto Raised on class: femto.SCATCAAlarmCard	Severity: info Implicitly cleared: true Default probable cause: remoteAlarmInterface (615)	Unspecified
<b>Description:</b> This Alarm is raised when there is a failure and the infrastructure alarms :E1_A, E1_B, E1_C, E1_D get raised.		
<b>Remedial action:</b> TBD		

Table 39-21 AtcaAlarmCard\_e2InfraAlarm

Alarm	Attributes	Applicable major releases
Name: AtcaAlarmCard_e2InfraAlarm (5705) Type: communicationsAlarm (4) Package: femto Raised on class: femto.SCATCAAlarmCard	Severity: info Implicitly cleared: true Default probable cause: remoteAlarmInterface (615)	Unspecified
<b>Description:</b> This Alarm is raised when there is a failure and the infrastructure alarms : E2_A, E2_B, E2_C, E2_D get raised.		
<b>Remedial action:</b> TBD		

Table 39-22 AtcaAlarmCard\_e3InfraAlarm

Alarm	Attributes	Applicable major releases
Name: AtcaAlarmCard_e3InfraAlarm (5706) Type: communicationsAlarm (4) Package: femto Raised on class: femto.SCATCAAlarmCard	Severity: info Implicitly cleared: true Default probable cause: remoteAlarmInterface (615)	Unspecified
<b>Description:</b> This Alarm is raised when there is a failure and the infrastructure alarms : E3_A, E3_B, E3_C, E3_D get raised.		
<b>Remedial action:</b> TBD		

Table 39-23 AtcaAlarmCard\_e4InfraAlarm

Alarm	Attributes	Applicable major releases
Name: AtcaAlarmCard_e4InfraAlarm (5707) Type: communicationsAlarm (4) Package: femto Raised on class: femto.SCATCAAlarmCard	Severity: info Implicitly cleared: true Default probable cause: remoteAlarmInterface (615)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> This Alarm is raised when there is a failure and the infrastructure alarms : E4_A, E4_B, E4_C, E4_D get raised.		
<b>Remedial action:</b> TBD		

(2 of 2)

Table 39-24 AtcaAlarmCard\_pdu

Alarm	Attributes	Applicable major releases
Name: AtcaAlarmCard_pdu (5708) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAAlarmCard	Severity: info Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when there is failure in the PDU presence.		
<b>Remedial action:</b> TBD		

Table 39-25 AtcaAlarmCard\_pduBreakerPwr

Alarm	Attributes	Applicable major releases
Name: AtcaAlarmCard_pduBreakerPwr (5709) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCAAlarmCard	Severity: major Implicitly cleared: true Default probable cause: powerProblem (911)	Unspecified
<b>Description:</b> This Alarm is raised when there is failure in AT1 PDU Breaker A, AT1 PDU Breaker B.		
<b>Remedial action:</b> TBD		

Table 39-26 AtcaAlarmCard\_pduFeedPwr

Alarm	Attributes	Applicable major releases
Name: AtcaAlarmCard_pduFeedPwr (5710) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCAAlarmCard	Severity: critical Implicitly cleared: true Default probable cause: powerProblem (911)	Unspecified
<b>Description:</b> This Alarm is raised when there is failure in the AT1 PDU Feed A, AT1 PDU Feed B.		
<b>Remedial action:</b> TBD		

## 39 – Unspecified NE alarms

Table 39-27 AtcaAlarmCard\_powerFailure

Alarm	Attributes	Applicable major releases
Name: AtcaAlarmCard_powerFailure (5711) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCAAlarmCard	Severity: info Implicitly cleared: true Default probable cause: powerProblem (911)	Unspecified
<b>Description:</b> This Alarm is raised when the Loop Voltage failure, VoltageFailure48V_A and VoltageFailure48V_B. happens		
<b>Remedial action:</b> TBD		

Table 39-28 AtcaAlarmCard\_telcoAlarmInput

Alarm	Attributes	Applicable major releases
Name: AtcaAlarmCard_telcoAlarmInput (5712) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAAlarmCard	Severity: info Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when the System manager does the minor Reset, major Reset and Alarm cutoff.		
<b>Remedial action:</b> TBD		

Table 39-29 AtcaFanTray\_fanAgingDown1

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingDown1 (5713) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Down fan tray reaches the Aging1		
<b>Remedial action:</b> TBD		

Table 39-30 AtcaFanTray\_fanAgingDown2

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingDown2 (5714) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> This Alarm is raised when the Down fan tray reaches the Aging2		
<b>Remedial action:</b> TBD		

(2 of 2)

Table 39-31 AtcaFanTray\_fanAgingDown3

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingDown3 (5715) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Down fan tray reaches the Aging3		
<b>Remedial action:</b> TBD		

Table 39-32 AtcaFanTray\_fanAgingDown4

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingDown4 (5716) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Down fan tray reaches the Aging4		
<b>Remedial action:</b> TBD		

Table 39-33 AtcaFanTray\_fanAgingDown5

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingDown5 (5717) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Down fan tray reaches the Aging5		
<b>Remedial action:</b> TBD		

39 – Unspecified NE alarms

---

Table 39-34 AtcaFanTray\_fanAgingDown6

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingDown6 (5718) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Down fan tray reaches the Aging6		
<b>Remedial action:</b> TBD		

Table 39-35 AtcaFanTray\_fanAgingRear1

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingRear1 (5719) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Rear fan tray reaches the Aging1		
<b>Remedial action:</b> TBD		

Table 39-36 AtcaFanTray\_fanAgingRear2

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingRear2 (5720) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Rear fan tray reaches the Aging2		
<b>Remedial action:</b> TBD		

Table 39-37 AtcaFanTray\_fanAgingRear3

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingRear3 (5721) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> This Alarm is raised when the Rear fan tray reaches the Aging3		
<b>Remedial action:</b> TBD		

(2 of 2)

Table 39-38 AtcaFanTray\_fanAgingRear4

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingRear4 (5722) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Rear fan tray reaches the Aging4		
<b>Remedial action:</b> TBD		

Table 39-39 AtcaFanTray\_fanAgingRear5

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingRear5 (5723) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Rear fan tray reaches the Aging5		
<b>Remedial action:</b> TBD		

Table 39-40 AtcaFanTray\_fanAgingRear6

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingRear6 (5724) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Rear fan tray reaches the Aging6		
<b>Remedial action:</b> TBD		

39 – Unspecified NE alarms

---

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingUp5 (5729) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Upper fan tray reaches the Aging5		
<b>Remedial action:</b> TBD		

Table 39-46 AtcaFanTray\_fanAgingUp6

Alarm	Attributes	Applicable major releases
Name: AtcaFanTray_fanAgingUp6 (5730) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAFanTray	Severity: major Implicitly cleared: true Default probable cause: replaceableUnitProblem (643)	Unspecified
<b>Description:</b> This Alarm is raised when the Upper fan tray reaches the Aging6		
<b>Remedial action:</b> TBD		

Table 39-47 AtcaShelf\_alarmCardAbsence

Alarm	Attributes	Applicable major releases
Name: AtcaShelf_alarmCardAbsence (5755) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASHelf	Severity: info Implicitly cleared: true Default probable cause: probCauseUnknown (2442)	Unspecified
<b>Description:</b> This Alarm is raised when there is failure in the Alarm card presence.		
<b>Remedial action:</b> TBD		

## 39 – Unspecified NE alarms

Table 39-48 AtcaShelfManager\_boardFilterAbsence

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_boardFilterAbsence (5731) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASHelfManager	Severity: minor Implicitly cleared: true Default probable cause: probCauseUnknown (2442)	Unspecified
<b>Description:</b> This Alarm is raised when the Board filter or the Front side filter or grid is not present.		
<b>Remedial action:</b> TBD		

Table 39-49 AtcaShelfManager\_cpIdSensor

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_cpIdSensor (5732) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASHelfManager	Severity: minor Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when there is change in the shelf manager redundancy status.		
<b>Remedial action:</b> TBD		

Table 39-50 AtcaShelfManager\_fanTrayLowAbsence

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_fanTrayLowAbsence (5733) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASHelfManager	Severity: major Implicitly cleared: true Default probable cause: probCauseUnknown (2442)	Unspecified
<b>Description:</b> This Alarm is raised when the Lower fan tray is not present.		
<b>Remedial action:</b> TBD		

**Table 39-51 AtcaShelfManager\_fanTrayRearAbsence**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_fanTrayRearAbsence (5734) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASHelfManager	Severity: major Implicitly cleared: true Default probable cause: probCauseUnknown (2442)	Unspecified
<b>Description:</b> This Alarm is raised when the Rear fan tray is not present.		
<b>Remedial action:</b> TBD		

**Table 39-52 AtcaShelfManager\_fanTraysFRUcriticalFailure**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_fanTraysFRUcriticalFailure (5736) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASHelfManager	Severity: critical Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when failure occurs in the Fan Trays FRUs.		
<b>Remedial action:</b> TBD		

**Table 39-53 AtcaShelfManager\_fanTrayUpAbsence**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_fanTrayUpAbsence (5735) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASHelfManager	Severity: major Implicitly cleared: true Default probable cause: probCauseUnknown (2442)	Unspecified
<b>Description:</b> This Alarm is raised when the Up fan tray is not present.		
<b>Remedial action:</b> TBD		

## 39 – Unspecified NE alarms

Table 39-54 AtcaShelfManager\_i2cLocalBus

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_i2cLocalBus (5737) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: major Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when failure happens to the I2C Local Bus.		
<b>Remedial action:</b> TBD		

Table 39-55 AtcaShelfManager\_i2cMasterResourceHighLimit

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_i2cMasterResourceHighLimit (5738) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: critical Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when the I2C Master Resource reaches the critical limit.		
<b>Remedial action:</b> TBD		

Table 39-56 AtcaShelfManager\_i2cMasterResourceMidLimit

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_i2cMasterResourceMidLimit (5739) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: major Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when the I2C of the Master Resource reaches the major limit		
<b>Remedial action:</b> TBD		

Table 39-57 AtcaShelfManager\_ipmbLinkDown

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_ipmbLinkDown (5740) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: minor Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when failure happens to the IPMB-0 link		
<b>Remedial action:</b> TBD		

Table 39-58 AtcaShelfManager\_lm75TempDownHighLimit

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_lm75TempDownHighLimit (5741) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCShelfManager	Severity: critical Implicitly cleared: true Default probable cause: lowTemperature (674)	Unspecified
<b>Description:</b> This Alarm is raised when the temperature of the bottom of the NBSHMC board reaches the lower critical limit.		
<b>Remedial action:</b> TBD		

Table 39-59 AtcaShelfManager\_lm75TempDownMidLimit

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_lm75TempDownMidLimit (5742) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCShelfManager	Severity: major Implicitly cleared: true Default probable cause: lowTemperatureMidLimit (2443)	Unspecified
<b>Description:</b> This Alarm is raised when the temperature of the bottom of the NBSHMC board reaches the lower major limit.		
<b>Remedial action:</b> TBD		

## 39 – Unspecified NE alarms

Table 39-60 AtcaShelfManager\_lm75TempUpHighLimit

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_lm75TempUpHighLimit (5743) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCShelfManager	Severity: critical Implicitly cleared: true Default probable cause: highTemperature (667)	Unspecified
<b>Description:</b> This Alarm is raised when the temperature of the top of the NBSHMC board reaches the upper critical limit.		
<b>Remedial action:</b> TBD		

Table 39-61 AtcaShelfManager\_lm75TempUpMidLimit

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_lm75TempUpMidLimit (5744) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCShelfManager	Severity: major Implicitly cleared: true Default probable cause: highTemperature (667)	Unspecified
<b>Description:</b> This Alarm is raised when the temperature of the top of the NBSHMC board reaches the upper major limit.		
<b>Remedial action:</b> TBD		

Table 39-62 AtcaShelfManager\_pwrRedDegraded

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_pwrRedDegraded (5745) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: major Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> Power supply redundancy degraded assert. Redundancy still exists, but at a less than full level. For example, a system has four fans, and can tolerate the failure of two of them, and presently one has failed		
<b>Remedial action:</b> TBD		

**Table 39-63 AtcaShelfManager\_pwrRedLost**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_pwrRedLost (5746) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: major Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when the Power supply redundancy lost or Entered any non-redundant state, including Non-redundant: Insufficient Resources		
<b>Remedial action:</b> TBD		

**Table 39-64 AtcaShelfManager\_pwrRedRegained**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_pwrRedRegained (5747) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: major Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when the full power supply redundancy has been regained		
<b>Remedial action:</b> TBD		

**Table 39-65 AtcaShelfManager\_rebootReason**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_rebootReason (5748) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: major Implicitly cleared: false Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when the Shelf Manager has been Rebooted		
<b>Remedial action:</b> TBD		

39 – Unspecified NE alarms

---

**Table 39-66 AtcaShelfManager\_rtmFilterAbsence**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_rtmFilterAbsence (5749) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: minor Implicitly cleared: true Default probable cause: probCauseUnknown (2442)	Unspecified
<b>Description:</b> This Alarm is raised when the RTM filter or the Back side filter or grid is not present.		
<b>Remedial action:</b> TBD		

**Table 39-67 AtcaShelfManager\_shelfFRUcriticalFailure**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_shelfFRUcriticalFailure (5750) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: critical Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when critical failure happens to the Shelf FRUs in EEPROMs.		
<b>Remedial action:</b> TBD		

**Table 39-68 AtcaShelfManager\_shelfFRUminorFailure**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_shelfFRUminorFailure (5751) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCShelfManager	Severity: minor Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when minor failure happens to the Shelf FRUs in EEPROMs.		
<b>Remedial action:</b> TBD		

**Table 39-69 AtcaShelfManager\_shelfManagerConnectionFailure**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_shelfManagerConnectionFailure (5752) Type: communicationsAlarm (4) Package: femto Raised on class: femto.SCATCASHelfManager	Severity: critical Implicitly cleared: true Default probable cause: unspecifiedReason (802)	Unspecified
<b>Description:</b> This Alarm is raised when the Shelf Oam is unable to communicate with shelf manager		
<b>Remedial action:</b> TBD		

**Table 39-70 AtcaShelfManager\_shelfManagerInNonRedundantState**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_shelfManagerInNonRedundantState (5753) Type: communicationsAlarm (4) Package: femto Raised on class: femto.SCATCASHelfManager	Severity: major Implicitly cleared: true Default probable cause: unspecifiedReason (802)	Unspecified
<b>Description:</b> This Alarm is raised when the Peer Shelf Manager is not available		
<b>Remedial action:</b> TBD		

**Table 39-71 AtcaShelfManager\_shelfManagerUnAvailable**

Alarm	Attributes	Applicable major releases
Name: AtcaShelfManager_shelfManagerUnAvailable (5754) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASHelfManager	Severity: major Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when the Shelf Manager Card is not available		
<b>Remedial action:</b> TBD		

## 39 – Unspecified NE alarms

Table 39-72 AtcaSwitchBaseEthernetIntf\_malbanBaseEthernetPortFailure

Alarm	Attributes	Applicable major releases
Name: AtcaSwitchBaseEthernetIntf_malbanBaseEthernetPortFailure (5756) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASwitchBaseEthernetIntf	Severity: major Implicitly cleared: false Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when the Malban Card Base Ethernet port has failed		
<b>Remedial action:</b> TBD		

Table 39-73 AtcaSwitchCPU\_malban10CPUFailure

Alarm	Attributes	Applicable major releases
Name: AtcaSwitchCPU_malban10CPUFailure (5757) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASwitchCPU	Severity: critical Implicitly cleared: false Default probable cause: processorProblem (633)	Unspecified
<b>Description:</b> This Alarm is raised when software critical error occurs on the payload. Usually followed by a board reboot or reset. It is asserted upon fault detection by the payload software and de-asserted on startup.		
<b>Remedial action:</b> TBD		

Table 39-74 AtcaSwitchFabricEthernetIntf\_malbanFabricEthernetPortFailure

Alarm	Attributes	Applicable major releases
Name: AtcaSwitchFabricEthernetIntf_malbanFabricEthernetPortFailure (5758) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASwitchFabricEthernetIntf	Severity: major Implicitly cleared: false Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when the Malban Card Fabric Ethernet port has failed		
<b>Remedial action:</b> TBD		

Table 39-75 AtcaSwitchSlot\_malbanConnectionFailure

Alarm	Attributes	Applicable major releases
Name: AtcaSwitchSlot_malbanConnectionFailure (5759) Type: communicationsAlarm (4) Package: femto Raised on class: femto.SCATCAswitchSlot	Severity: critical Implicitly cleared: true Default probable cause: unspecifiedReason (802)	Unspecified
<b>Description:</b> This Alarm is raised when the Shelf Oam is unable to communicate with Malban		
<b>Remedial action:</b> TBD		

Table 39-76 AtcaSwitchSlot\_malbanInNonRedundantState

Alarm	Attributes	Applicable major releases
Name: AtcaSwitchSlot_malbanInNonRedundantState (5760) Type: communicationsAlarm (4) Package: femto Raised on class: femto.SCATCAswitchSlot	Severity: major Implicitly cleared: true Default probable cause: unspecifiedReason (802)	Unspecified
<b>Description:</b> This Alarm is raised when the Peer Malban is not available		
<b>Remedial action:</b> TBD		

Table 39-77 AtcaSwitchSlot\_malbanIpmbLinkDown

Alarm	Attributes	Applicable major releases
Name: AtcaSwitchSlot_malbanIpmbLinkDown (5761) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCAswitchSlot	Severity: minor Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when failure happens to the IPMB-0 link		
<b>Remedial action:</b> TBD		

## 39 – Unspecified NE alarms

Table 39-78 AtcaSwitchSlot\_malbanUnAvailable

Alarm	Attributes	Applicable major releases
Name: AtcaSwitchSlot_malbanUnAvailable (5762) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASwitchSlot	Severity: major Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when the Malban Card is not available		
<b>Remedial action:</b> TBD		

Table 39-79 AtcaSwitchSlot\_malbanVlanCreationFailure

Alarm	Attributes	Applicable major releases
Name: AtcaSwitchSlot_malbanVlanCreationFailure (5763) Type: communicationsAlarm (4) Package: femto Raised on class: femto.SCATCASwitchSlot	Severity: critical Implicitly cleared: true Default probable cause: unspecifiedReason (802)	Unspecified
<b>Description:</b> This Alarm is raised when the vlan creation failed in Malban		
<b>Remedial action:</b> TBD		

Table 39-80 AtcaSwitchSlot\_ncpuFatalError

Alarm	Attributes	Applicable major releases
Name: AtcaSwitchSlot_ncpuFatalError (5764) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCASwitchSlot	Severity: major Implicitly cleared: false Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when a software critical error occurs on the payload.		
<b>Remedial action:</b> TBD		

Table 39-81 ATPCHighPowerTimeout

Alarm	Attributes	Applicable major releases
Name: ATPCHighPowerTimeout (4818) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: ATPCLoopProblem (1903)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a ATPC High Power Timeout		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-82 AtpcLoopProblem

Alarm	Attributes	Applicable major releases
Name: AtpcLoopProblem (1142) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: atpcLoopProblem (848)	Unspecified
<b>Description:</b> The alarm is raised when a local transmitter was operating continuously at full power for 5-minutes, and the transmitter power is reduced to its minimum power setting.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-83 ATPCTimeout

Alarm	Attributes	Applicable major releases
Name: ATPCTimeout (3939) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: atpcTimeout (1521)	Unspecified
<b>Description:</b> The alarm is raised when a the ATPC timeout defect raise.		
<b>Remedial action:</b> The alarm is raised when a the ATPC timeout defect raise.		

## 39 – Unspecified NE alarms

Table 39-84 AuthFailure

Alarm	Attributes	Applicable major releases
Name: AuthFailure (281) Type: authenticationAlarm (14) Package: vrrp Raised on class: vrrp.AbstractInstance	Severity: major Implicitly cleared: false Default probable cause: authFailure (46)	Unspecified
<b>Description:</b> The alarm is raised when authentication fails. The alarm information includes the source IP address.		
<b>Remedial action:</b> Reconfigure the authentication key so that the keys are the same for the peer VRRP instances.		

Table 39-85 AuthKeyConflict (Idp)

Alarm	Attributes	Applicable major releases
Name: AuthKeyConflict (5188) Type: processingErrorAlarm (81) Package: Idp Raised on class: Idp.Peer	Severity: warning Implicitly cleared: true Default probable cause: AuthKeyConflict (2103)	Unspecified
<b>Description:</b> The alarm is raised when both Authentication Key and LDP Peer Keychain are configured. LDP Peer Keychain will be used.		
<b>Remedial action:</b> Authentication Key and LDP Peer Keychain are both configured. LDP Peer Keychain will be used. The alarm is cleared when only one is configured.		

Table 39-86 AuxiliaryAlarm

Alarm	Attributes	Applicable major releases
Name: AuxiliaryAlarm (1159) Type: dryContactAlarm (47) Package: equipment Raised on class: equipment.AuxAlarmDefinition	Severity: variable Implicitly cleared: false Default probable cause: auxiliaryAlarmTriggered (862)	Unspecified
<b>Description:</b> The alarm is raised when an NE reports that a configured auxiliary alarm condition has been triggered.		
<b>Remedial action:</b> Informational - no corrective action required.		

**Table 39-87 AuxiliaryDatabaseProxyStateChangeDetected**

Alarm	Attributes	Applicable major releases
Name: AuxiliaryDatabaseProxyStateChangeDetected (5170) Type: databaseAlarm (29) Package: db Raised on class: db.AuxiliaryDatabase	Severity: warning Implicitly cleared: false Default probable cause: systemFailed (144)	Unspecified
<b>Description:</b> This informative alarm is raised when the state of the auxiliary database proxy has changed at least once since the last check interval.		
<b>Remedial action:</b> Informational - no corrective action required. The state (up/down) of the auxiliary database proxy has changed at least once since the last check interval. The alarm must be manually cleared.		

**Table 39-88 AuxiliaryDatabaseProxyUnreachable**

Alarm	Attributes	Applicable major releases
Name: AuxiliaryDatabaseProxyUnreachable (5171) Type: communicationsAlarm (4) Package: db Raised on class: db.AuxiliaryDatabase	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	Unspecified
<b>Description:</b> This informative alarm is raised when a 5620 SAM server cannot communicate with an auxiliary database proxy. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Database Proxy Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Database Proxy Status' EQUAL 'Up')		
<b>Remedial action:</b> The 5620 SAM server cannot communicate with an auxiliary database proxy. Check the status of the auxiliary database proxy and the communication link between SAM server and auxiliary database node.		

**Table 39-89 AuxiliaryDatabaseStateChangeDetected**

Alarm	Attributes	Applicable major releases
Name: AuxiliaryDatabaseStateChangeDetected (5172) Type: databaseAlarm (29) Package: db Raised on class: db.AuxiliaryDatabase	Severity: warning Implicitly cleared: false Default probable cause: systemFailed (144)	Unspecified
<b>Description:</b> This informative alarm is raised when the state of the auxiliary database has changed at least once since the last check interval.		
<b>Remedial action:</b> Informational - no corrective action required. The state (up/down) of the auxiliary database has changed at least once since the last check interval. The alarm must be manually cleared.		

## 39 – Unspecified NE alarms

Table 39-90 AuxiliaryDatabaseStatus

Alarm	Attributes	Applicable major releases
Name: AuxiliaryDatabaseStatus (5173) Type: communicationsAlarm (4) Package: db Raised on class: db.AuxiliaryDatabase	Severity: critical Implicitly cleared: true Default probable cause: systemFailed (144)	Unspecified
<b>Description:</b> This informative alarm is raised when a 5620 SAM server cannot communicate with an auxiliary database server. The alarm clears when communication is restored.		
<b>Raising condition:</b> ('Database Status' EQUAL 'Down')		
<b>Clearing condition:</b> ('Database Status' EQUAL 'Up')		
<b>Remedial action:</b> The 5620 SAM server cannot communicate with an auxiliary database. Check the status of the auxiliary database and the communication link between SAM server and auxiliary database node.		

Table 39-91 BackgroundDiagnosticFault

Alarm	Attributes	Applicable major releases
Name: BackgroundDiagnosticFault (467) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: minor Implicitly cleared: true Default probable cause: backgroundDiagnosticFault (353)	Unspecified
<b>Description:</b> The alarm is raised when an NE detects a failure in a background diagnostic test suite.		
<b>Remedial action:</b> Informational - if the condition persists then the element indicated in the alarm should be replaced.		

Table 39-92 backupScriptInUse

Alarm	Attributes	Applicable major releases
Name: backupScriptInUse (274) Type: configurationAlarm (11) Package: subscrident Raised on class: subscrident.Policy	Severity: major Implicitly cleared: true Default probable cause: backupInUse (206)	Unspecified
<b>Description:</b> The alarm is raised when the primary subscriber identification script is operationally down, but one of the other scripts is operationally up.		
<b>Raising condition:</b> (('isLocal' EQUAL 'true') AND ('Primary Script Operational State' NOT EQUAL 'Up') AND (('Secondary Script Operational State' EQUAL 'Up') OR ('Tertiary Script Operational State' EQUAL 'Up')))		
<b>Clearing condition:</b> (('isLocal' EQUAL 'true') AND (('Primary Script Operational State' EQUAL 'Up') OR (('Secondary Script Operational State' NOT EQUAL 'Up') AND ('Tertiary Script Operational State' NOT EQUAL 'Up'))))		
<b>Remedial action:</b> If the DHCP ACK Python script processing behaviour is desired, please make sure that primary, secondary and tertiary scripts are installed and operationally up.		

Table 39-93 BandwidthOverflow

Alarm	Attributes	Applicable major releases
Name: BandwidthOverflow (1143) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: bandwidthOverflow (849)	Unspecified
<b>Description:</b> The alarm is raised when a MPT is on-line and the cross-connections occupation overcomes the MPT net capacity bandwidth.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-94 BatteryFail (equipment)

Alarm	Attributes	Applicable major releases
Name: BatteryFail (616) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: batteryFail (457)	Unspecified
<b>Description:</b> The alarm is raised when the battery fails or is missing.		
<b>Remedial action:</b> The battery on the CPM should be replaced or re-installed.		

Table 39-95 BatteryFail (mpr)

Alarm	Attributes	Applicable major releases
Name: BatteryFail (616) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: batteryFail (457)	Unspecified
<b>Description:</b> The alarm is raised when the battery fails or is missing.		
<b>Remedial action:</b> The battery on the subrack element should be replaced or re-installed.		

## 39 – Unspecified NE alarms

Table 39-96 BfdSessionDown (rtr)

Alarm	Attributes	Applicable major releases
Name: BfdSessionDown (439) Type: bfdSessionAlarm (46) Package: rtr Raised on class: rtr.NetworkInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionDown (346)	Unspecified
<b>Description:</b> The alarm is raised when a BFD session is operationally down.		
<b>Remedial action:</b> This alarm is raised when a BFD session on a network interface goes down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 39-97 BfdSessionDown (service)

Alarm	Attributes	Applicable major releases
Name: BfdSessionDown (439) Type: bfdSessionAlarm (46) Package: service Raised on class: service.L3AccessInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionDown (346)	Unspecified
<b>Description:</b> The alarm is raised when a BFD session is operationally down.		
<b>Remedial action:</b> This alarm is raised when a BFD session on a L3 access interface goes down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 39-98 BfdSessionDown (vprn)

Alarm	Attributes	Applicable major releases
Name: BfdSessionDown (439) Type: bfdSessionAlarm (46) Package: vprn Raised on class: vprn.NetworkInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionDown (346)	Unspecified
<b>Description:</b> The alarm is raised when a BFD session is operationally Down.		
<b>Remedial action:</b> This alarm is raised when a BFD session on a VPRN network interface goes down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 39-99 BfdSessionFlapped (rtr)

Alarm	Attributes	Applicable major releases
Name: BfdSessionFlapped (3900) Type: bfdSessionAlarm (46) Package: rtr Raised on class: rtr.NetworkInterface	Severity: warning Implicitly cleared: false Default probable cause: bfdSessionFlapped (1491)	Unspecified
<b>Description:</b> The alarm is raised when a BFD session transitions from Up to Down and back to Up within the BFD operational state transition interval.		
<b>Remedial action:</b> The BFD session on a network interface has transitioned from Up to Down and back to Up within the configured BFD Flapping Interval.		

Table 39-100 BfdSessionFlapped (service)

Alarm	Attributes	Applicable major releases
Name: BfdSessionFlapped (3900) Type: bfdSessionAlarm (46) Package: service Raised on class: service.L3AccessInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionFlapped (1491)	Unspecified
<b>Description:</b> The alarm is raised when a BFD session transitions from Up to Down and back to Up within the BFD operational state transition interval.		
<b>Remedial action:</b> The BFD session on a L3 access interface has transitioned from Up to Down and back to Up within the configured BFD Flapping Interval.		

Table 39-101 BfdSessionFlapped (vprn)

Alarm	Attributes	Applicable major releases
Name: BfdSessionFlapped (3900) Type: bfdSessionAlarm (46) Package: vprn Raised on class: vprn.NetworkInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionFlapped (1491)	Unspecified
<b>Description:</b> The alarm is raised when a BFD session transitions from Up to Down and back to Up within the BFD operational state transition interval.		
<b>Remedial action:</b> The BFD session on a VPRN network interface has transitioned from Up to Down and back to Up within the configured BFD Flapping Interval.		

**39 – Unspecified NE alarms****Table 39-102 BfdSessionMissing (rtr)**

Alarm	Attributes	Applicable major releases
Name: BfdSessionMissing (438) Type: bfdSessionAlarm (46) Package: rtr Raised on class: rtr.NetworkInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionMissing (345)	Unspecified
<b>Description:</b> The alarm is raised when a previously present BFD session is absent.		
<b>Remedial action:</b> This alarm is raised when a previously present BFD session on a network interface is absent. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the near end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

**Table 39-103 BfdSessionMissing (service)**

Alarm	Attributes	Applicable major releases
Name: BfdSessionMissing (438) Type: bfdSessionAlarm (46) Package: service Raised on class: service.L3AccessInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionMissing (345)	Unspecified
<b>Description:</b> The alarm is raised when a previously present BFD session is absent.		
<b>Remedial action:</b> This alarm is raised when a previously present BFD session on a L3 access interface is absent. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the near end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

**Table 39-104 BfdSessionMissing (vprn)**

Alarm	Attributes	Applicable major releases
Name: BfdSessionMissing (438) Type: bfdSessionAlarm (46) Package: vprn Raised on class: vprn.NetworkInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionMissing (345)	Unspecified
<b>Description:</b> The alarm is raised when a previously present BFD session is absent.		
<b>Remedial action:</b> This alarm is raised when a previously present BFD session on a VPRN network interface is absent. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the near end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 39-105 BgpAdVplsIdDiscoveryError

Alarm	Attributes	Applicable major releases
Name: BgpAdVplsIdDiscoveryError (572) Type: serviceAlarm (16) Package: vpls Raised on class: vpls.AbstractSite	Severity: major Implicitly cleared: true Default probable cause: bgpAdVplsIdInconsistent (439)	Unspecified
<b>Description:</b> The alarm is raised when the VPLS ID of a discovered VPLS instance is ambiguous.		
<b>Remedial action:</b> Check that all VPLS IDs are properly configured for all VPLS instances.		

Table 39-106 BgpAdVplsIdMisconfiguration

Alarm	Attributes	Applicable major releases
Name: BgpAdVplsIdMisconfiguration (570) Type: configurationAlarm (11) Package: vpls Raised on class: vpls.AbstractVpls	Severity: major Implicitly cleared: true Default probable cause: bgpAdVplsIdInconsistent (439)	Unspecified
<b>Description:</b> The alarm is raised when the VPLS ID of a site does not match the VPLS ID of the other sites in the service.		
<b>Remedial action:</b> All VPLS IDs of sites in a service must be the same.		

Table 39-107 BgpAsPathLenPerMonPrefThresholdReached

Alarm	Attributes	Applicable major releases
Name: BgpAsPathLenPerMonPrefThresholdReached (795) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: asPathTooLong (562)	Unspecified
<b>Description:</b> The alarm is raised when the AS path length for a monitored BGP route reaches or exceeds the maximum threshold value.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. Alarm text provides information about the affected prefix. User can look at the records for BGP prefix monitoring or BGP events history for debugging purpose.		

## 39 – Unspecified NE alarms

Table 39-108 BgpEventUnreachable

Alarm	Attributes	Applicable major releases
Name: BgpEventUnreachable (4896) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: prefixUnreachable (827)	Unspecified
<b>Description:</b> The alarm is raised when Unreachable BGP Event is detected.		
<b>Remedial action:</b> Alarm text provides information about the affected prefix. User can look at the BGP events history for debugging purpose.		

Table 39-109 BgpFlowspecNlriProblem

Alarm	Attributes	Applicable major releases
Name: BgpFlowspecNlriProblem (3317) Type: ProtocolAlarm (1) Package: rtr Raised on class: rtr.RoutingInstanceSite	Severity: major Implicitly cleared: false Default probable cause: NlriProblem (1156)	Unspecified
<b>Description:</b> The alarm is raised when the filter module receives a BGP FlowSpec NLRI that cannot be treated.		
<b>Remedial action:</b> Information - if the the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-110 BgpMonitorPrefixFlapRateThresholdReached

Alarm	Attributes	Applicable major releases
Name: BgpMonitorPrefixFlapRateThresholdReached (432) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: unstablePrefix (410)	Unspecified
<b>Description:</b> The alarm is raised when a BGP monitor prefix flap rate exceeds the maximum flap rate threshold value.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. Alarm text provides information about the affected prefix. User can look at the records for BGP prefix monitoring or BGP events history for debugging purpose.		

Table 39-111 BgpMonPrefixUnreachable

Alarm	Attributes	Applicable major releases
Name: BgpMonPrefixUnreachable (1114) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: prefixUnreachable (827)	Unspecified
<b>Description:</b> The alarm is raised when no route for the monitored prefix is detected.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. Alarm text provides information about the affected prefix. User can look at the records for BGP prefix monitoring or BGP events history for debugging purpose.		

Table 39-112 BgpMonPrefRedundancyLossThresholdReached

Alarm	Attributes	Applicable major releases
Name: BgpMonPrefRedundancyLossThresholdReached (796) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: lowNumberOfNHops (563)	Unspecified
<b>Description:</b> The alarm is raised when the number of next hops for a monitored BGP route reaches or falls below the minimum threshold value.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. Alarm text provides information about the affected prefix. User can look at the records for BGP prefix monitoring or BGP events history for debugging purpose.		

Table 39-113 BgpPktRateThresholdReached

Alarm	Attributes	Applicable major releases
Name: BgpPktRateThresholdReached (431) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: unstableBgpSpeaker (409)	Unspecified
<b>Description:</b> The alarm is raised when a BGP packet rate exceeds the maximum threshold value.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. BGP events history can be used for debugging purpose.		

## 39 – Unspecified NE alarms

Table 39-114 BgpProfilePrefixUnreachable

Alarm	Attributes	Applicable major releases
Name: BgpProfilePrefixUnreachable (8148) Type: topologyAlarm (34) Package: topology Raised on class: topology.AbstractBgpRouteProfile	Severity: variable Implicitly cleared: false Default probable cause: BGPProfilePrefixUnreachable (2544)	Unspecified
<b>Description:</b> The alarm is raised when the prefix on BGP profile is unreachable.		
<b>Remedial action:</b> BGP Profile matched with BGP prefix unreachable event.		

Table 39-115 BgpRouteChangeThresholdPerNHopReached

Alarm	Attributes	Applicable major releases
Name: BgpRouteChangeThresholdPerNHopReached (601) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: unstableBgpSpeaker (409)	Unspecified
<b>Description:</b> The alarm is raised when the number of BGP route changes for a next hop reaches the maximum threshold value for a next hop.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. BGP events history can be used for debugging purpose.		

Table 39-116 BgpRouteChangeThresholdPerRTargetReached

Alarm	Attributes	Applicable major releases
Name: BgpRouteChangeThresholdPerRTargetReached (600) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: unstableVpnSite (413)	Unspecified
<b>Description:</b> The alarm is raised when the number of BGP route changes for a route target reaches the maximum threshold value for route targets.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. BGP events history can be used for debugging purpose.		

Table 39-117 BgpRouteCountThresholdReached

Alarm	Attributes	Applicable major releases
Name: BgpRouteCountThresholdReached (428) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: tooManyBgpRouteForNextHop (408)	Unspecified
<b>Description:</b> The alarm is raised when the BGP route count for a next hop exceeds the maximum threshold value for next hops.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. BGP events history can be used for debugging purpose.		

Table 39-118 BgpRouteFlapRateThresholdReached

Alarm	Attributes	Applicable major releases
Name: BgpRouteFlapRateThresholdReached (430) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: unstableBgpSpeaker (409)	Unspecified
<b>Description:</b> The alarm is raised when the BGP route flap rate exceeds the maximum threshold value.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. BGP events history can be used for debugging purpose.		

Table 39-119 BgpRouteHighWatermarkPerRTargetReached

Alarm	Attributes	Applicable major releases
Name: BgpRouteHighWatermarkPerRTargetReached (433) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: tooManyBgpRouteForGivenRouteTarget (411)	Unspecified
<b>Description:</b> The alarm is raised when there are too many BGP routes for a route target.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. BGP events history can be used for debugging purpose.		

## 39 – Unspecified NE alarms

Table 39-120 BgpRouteLowWatermarkPerRTargetReached

Alarm	Attributes	Applicable major releases
Name: BgpRouteLowWatermarkPerRTargetReached (434) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: tooLittleBgpRouteForGivenRouteTarget (412)	Unspecified
<b>Description:</b> The alarm is raised when there are too few BGP routes for a route target.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. BGP events history can be used for debugging purpose.		

Table 39-121 BgpRouteRateThresholdPerRTargetReached

Alarm	Attributes	Applicable major releases
Name: BgpRouteRateThresholdPerRTargetReached (435) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: unstableVpnSite (413)	Unspecified
<b>Description:</b> The alarm is raised when the BGP route rate for a target reaches the maximum threshold value for route targets.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. BGP events history can be used for debugging purpose.		

Table 39-122 BgpRouteRateThresholdReached

Alarm	Attributes	Applicable major releases
Name: BgpRouteRateThresholdReached (429) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: tooManyBgpRouteForNextHop (408)	Unspecified
<b>Description:</b> The alarm is raised when the BGP route rate for a next hop exceeds the maximum threshold value for next hops.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. BGP events history can be used for debugging purpose.		

**Table 39-123 BidirectionalTPLspDestinationMisconfiguration**

Alarm	Attributes	Applicable major releases
Name: BidirectionalTPLspDestinationMisconfiguration (5117) Type: configurationAlarm (11) Package: mplstp Raised on class: mplstp.GlobalTPLsp	Severity: critical Implicitly cleared: true Default probable cause: DestinationParametersMismatch (2053)	Unspecified
<b>Description:</b> The alarm is raised when the Destination Global ID, Destination Node ID, or Destination Tunnel Number is not consistent with the configuration of the opposite TP-LSP in a Bidirectional TP-LSP.		
<b>Remedial action:</b> This alarm is generated when a TP-LSP that belongs to a Bidirectional TP-LSP has any of its Destination Global ID, Destination Node ID, or Destination Tunnel Number misconfigured. Review the configuration both TP-LSPs in the Bidirectional TP-LSP and ensure that the Destination Global ID, Destination Node ID, and Destination Tunnel Number are configured properly.		

**Table 39-124 BidirectionalTPLspPathLspNumberMisconfiguration**

Alarm	Attributes	Applicable major releases
Name: BidirectionalTPLspPathLspNumberMisconfiguration (5118) Type: configurationAlarm (11) Package: mplstp Raised on class: mplstp.GlobalTPLspPath	Severity: critical Implicitly cleared: true Default probable cause: LSPNumberMismatch (2054)	Unspecified
<b>Description:</b> The alarm is raised when the LSP Path Number is not consistent with the LSP Path Number for LER A and LER B.		
<b>Remedial action:</b> This alarm is generated when the LSP Path Number for the Bidirectional TP-LSP Path does not match LER A and/or LER B. Review the configuration of LSP Path Number LER A and LER B and ensure both are set to the same value as the Bidirectional TP-LSP Path's LSP Path Number.		

**Table 39-125 BidirIspPathMonitorPathsDiverge**

Alarm	Attributes	Applicable major releases
Name: BidirIspPathMonitorPathsDiverge (603) Type: topologyAlarm (34) Package: monpath Raised on class: monpath.BidirMonitoredIspPath	Severity: minor Implicitly cleared: true Default probable cause: ipPathsDiverge (449)	Unspecified
<b>Description:</b> The alarm is raised when the 5650 CPAM detects that the IP paths of a bidirectional IP path monitor diverge. The alarm clears when the paths converge. This may occur when an IP path monitor cannot be set up after the number of attempts specified by the cpamManagedRoute problematicThresholdAlarmAfter value in the nms-server.xml file. The alarm is raised if the cpamManagedRoute problematicRetryStrategy value in nms-server.xml is set to countdown. The default problematicRetryStrategy value of reactive prevents the alarm from being raised.		
<b>Remedial action:</b> Informational - Paths in both direction can be highlighted on the CPAM map to identify the divergence point.		

## 39 – Unspecified NE alarms

Table 39-126 BidirLspMonitorPathsDiverge

Alarm	Attributes	Applicable major releases
Name: BidirLspMonitorPathsDiverge (1915) Type: topologyAlarm (34) Package: monpath Raised on class: monpath.BidirMonitoredLspPath	Severity: minor Implicitly cleared: true Default probable cause: LspPathsDiverge (917)	Unspecified
<b>Description:</b> The alarm is raised when the LSP's active path's hops do not match in the forward and reverse direction.		
<b>Remedial action:</b> Informational - Paths in both direction can be highlighted on the CPAM map to identify the divergence point.		

Table 39-127 BladeHardware\_Im75localTempCriticalAssLMert

Alarm	Attributes	Applicable major releases
Name: BladeHardware_Im75localTempCriticalAssLMert (5870) Type: equipmentAlarm (3) Package: femto Raised on class: femto.BladeHardware	Severity: critical Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> LM 75 local temperature critical assert		
<b>Remedial action:</b> TBD		

Table 39-128 BladeHardware\_Im75localTempCriticalDeassLMert

Alarm	Attributes	Applicable major releases
Name: BladeHardware_Im75localTempCriticalDeassLMert (5872) Type: equipmentAlarm (3) Package: femto Raised on class: femto.BladeHardware	Severity: minor Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> LM 75 local temperature critical deassert		
<b>Remedial action:</b> TBD		

Table 39-129 BootEnvironmentSyncFailed

Alarm	Attributes	Applicable major releases
Name: BootEnvironmentSyncFailed (101) Type: equipmentAlarm (3) Package: sw Raised on class: sw.SoftwareUpgradeManager	Severity: critical Implicitly cleared: true Default probable cause: bootEnvironmentSyncFailed (87)	Unspecified
<b>Description:</b> The alarm is raised when the synchronization of one or more system initialization files between the active and standby CPM cards fails, or when one or both of the CSM compact flash devices do not have enough space when the 'admin redundancy synchronize boot-env' command is executed, or when the node is rebooted.		
<b>Remedial action:</b> The operator should make sure that the Boot Environment files on the CSM cards are in Sync with each other or there is enough space available on the compact flash.		

Table 39-130 BootLoaderFirmwareMismatchAlarm

Alarm	Attributes	Applicable major releases
Name: BootLoaderFirmwareMismatchAlarm (617) Type: firmwareAlarm (26) Package: equipment Raised on class: equipment.ControlProcessor	Severity: critical Implicitly cleared: false Default probable cause: bootLoaderVersionMismatch (118)	Unspecified
<b>Description:</b> The alarm is raised when there is a mismatch between the firmware version and the software image on an NE. The alarm information includes the discovered and expected version identifiers.		
<b>Remedial action:</b> Either the firmware or the device SW must be upgraded to compatible versions. The image (firmware or device SW) which is the oldest should be upgraded. Firmware must be upgraded using the NE's CLI. 5620 SAM can be used to upgrade the SW image on the device.		

Table 39-131 BrokenLoop

Alarm	Attributes	Applicable major releases
Name: BrokenLoop (469) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.StackConfiguration	Severity: major Implicitly cleared: true Default probable cause: stackNotInLoop (355)	Unspecified
<b>Description:</b> The alarm is raised when the loop-detection stack detects a loop condition, or when the stack contains an unexpected element.		
<b>Remedial action:</b> Login to switch console, check and correct configuration and reload stack.		

## 39 – Unspecified NE alarms

Table 39-132 BSRSubscriberTraceConfig\_subscriberTraceRecordingSessionFailure

Alarm	Attributes	Applicable major releases
Name: BSRSubscriberTraceConfig_subscriberTraceRecordingSessionFailure (5801) Type: processingErrorAlarm (81) Package: femto Raised on class: femto.FemtoSubscriberTraceConfig	Severity: critical Implicitly cleared: true Default probable cause: unspecifiedReason (802)	Unspecified
<b>Description:</b> Failure to start a trace recording session due to any problem.		
<b>Remedial action:</b> TBD		

Table 39-133 BSRSubscriberTraceConfig\_subscriberTraceUploadFailure

Alarm	Attributes	Applicable major releases
Name: BSRSubscriberTraceConfig_subscriberTraceUploadFailure (5802) Type: communicationsAlarm (4) Package: femto Raised on class: femto.FemtoSubscriberTraceConfig	Severity: warning Implicitly cleared: true Default probable cause: responseTimeExcessive (716)	Unspecified
<b>Description:</b> Failure to transferring SubscriberTrace files even after retries.		
<b>Remedial action:</b> TBD		

Table 39-134 BWUtilizationExceeded

Alarm	Attributes	Applicable major releases
Name: BWUtilizationExceeded (811) Type: thresholdCrossed (6) Package: netw Raised on class: netw.AbstractPhysicalLink	Severity: major Implicitly cleared: true Default probable cause: thresholdCrossed (12)	Unspecified
<b>Description:</b> The alarm is raised when the per-CoS or overall bandwidth utilization exceeds the configured threshold.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand how this Physical Link became overbooked		

Table 39-135 CableLOS (equipment)

Alarm	Attributes	Applicable major releases
Name: CableLOS (678) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: cableLOS (493)	Unspecified
<b>Description:</b> The alarm is raised when an MSS detects a cable LOS event.		
<b>Remedial action:</b> The alarm is raised when an MSS detects a cable LOS event.		

Table 39-136 CableLOS (radioequipment)

Alarm	Attributes	Applicable major releases
Name: CableLOS (678) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: cableLOS (493)	Unspecified
<b>Description:</b> The alarm is raised when an MSS detects a cable LOS event.		
<b>Remedial action:</b> The alarm is raised when an MSS detects a cable LOS event. Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-137 CallTraceAlreadyActive

Alarm	Attributes	Applicable major releases
Name: CallTraceAlreadyActive (1279) Type: callTraceSessionAlarm (90) Package: lte Raised on class: lte.CTg	Severity: warning Implicitly cleared: true Default probable cause: callTraceManuallyActivated (906)	Unspecified
<b>Description:</b> The alarm is raised when a Call Trace Session is already active when the scheduled task starts. The scheduled task will not deactivate it. The Call Trace Session must be manually deactivated. The alarm is cleared when the Call Trace session is deactivated successfully.		
<b>Remedial action:</b> The existing Call Trace Session must be manually deactivated. The alarm is cleared when the Call Trace session is deactivated successfully.		

## 39 – Unspecified NE alarms

Table 39-138 CallTraceScheduledTaskExecutionError

Alarm	Attributes	Applicable major releases
Name: CallTraceScheduledTaskExecutionError (1280) Type: callTraceSessionAlarm (90) Package: lte Raised on class: lte.CTg	Severity: warning Implicitly cleared: false Default probable cause: callTraceConfigurationError (907) Applicable probable causes: <ul style="list-style-type: none"> <li>callTraceConfigurationError</li> <li>eventBasedTraceEnabled</li> <li>debugTraceActive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when the execution of a Call Trace scheduled task has a failure activating or deactivating this Call Trace session.		
<b>Remedial action:</b> Check the call trace session.		

Table 39-139 CAProfileStateChange

Alarm	Attributes	Applicable major releases
Name: CAProfileStateChange (3910) Type: configurationAlarm (11) Package: sitesec Raised on class: sitesec.CertificateAuthProfile	Severity: major Implicitly cleared: true Default probable cause: caProfileStateDown (1497)	Unspecified
<b>Description:</b> The alarm is raised when Certificate Authority profile changes state to 'down' due to tmnxSecNotifFailureReason.		
<b>Remedial action:</b> The Certificate Authority profile changes state to 'down'. Depending on the reason specified, corrective action should be taken		

Table 39-140 CardCPUAboveThreshold

Alarm	Attributes	Applicable major releases
Name: CardCPUAboveThreshold (618) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.CardSlot	Severity: major Implicitly cleared: false Default probable cause: CardCPUUtilizationCrossedAboveThreshold (458)	Unspecified
<b>Description:</b> The alarm is raised when the card CPU usage exceeds the threshold value.		
<b>Remedial action:</b> Informational - The CPU of the card indicated in the alarm is overloaded. If the condition persists then processing load should be transferred from this card to other cards which are more lightly loaded. If the problem persists then please contact Alcatel-Lucent support for assistance.		

Table 39-141 CardMemoryAboveThreshold

Alarm	Attributes	Applicable major releases
Name: CardMemoryAboveThreshold (619) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.CardSlot	Severity: major Implicitly cleared: false Default probable cause: CardMemoryUtilizationCrossedAboveThreshold (459)	Unspecified
<b>Description:</b> The alarm is raised when the card memory usage exceeds the threshold value.		
<b>Remedial action:</b> Informational - The memory of the card indicated in the alarm is over utilized. If the condition persists then processing load should be transferred from this card to other cards which are more lightly loaded in order to reduce memory consumption. If the problem persists then please contact Alcatel-Lucent support for assistance.		

Table 39-142 CardRxAboveThreshold

Alarm	Attributes	Applicable major releases
Name: CardRxAboveThreshold (620) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.CardSlot	Severity: major Implicitly cleared: true Default probable cause: CardRxUtilizationCrossedAboveThreshold (460)	Unspecified
<b>Description:</b> The alarm is raised when the card Rx exceeds the threshold value.		
<b>Remedial action:</b> The utilization of the card is higher than normal. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-143 CardRxTxAboveThreshold

Alarm	Attributes	Applicable major releases
Name: CardRxTxAboveThreshold (621) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.CardSlot	Severity: major Implicitly cleared: true Default probable cause: CardRxTxUtilizationCrossedAboveThreshold (461)	Unspecified
<b>Description:</b> The alarm is raised when the card Tx exceeds the threshold value.		
<b>Remedial action:</b> The utilization of the card is higher than normal. If the problem persists please contact Alcatel-Lucent support for assistance.		

## 39 – Unspecified NE alarms

Table 39-144 CardUnseated

Alarm	Attributes	Applicable major releases
Name: CardUnseated (1161) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.CardSlot	Severity: major Implicitly cleared: true Default probable cause: CardUnseated (864)	Unspecified
<b>Description:</b> The alarm is raised when a card is removed.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-145 CeAddressIncompatible

Alarm	Attributes	Applicable major releases
Name: CeAddressIncompatible (251) Type: configurationAlarm (11) Package: ipipe Raised on class: ipipe.Ipipe	Severity: major Implicitly cleared: true Default probable cause: ceAddressIncompatible (190)	Unspecified
<b>Description:</b> The alarm is raised when two SAPs in an Ipipe have the same CE IP address, or when the CE IP address is not the same as the CE IP address of the peer SDP binding.		
<b>Raising condition:</b> ('ceAddressIncompatible' EQUAL 'true')		
<b>Clearing condition:</b> ('ceAddressIncompatible' EQUAL 'false')		
<b>Remedial action:</b> Modify the CE Address so that it's not same address as other SAPs and it matches the address of the peer SDP binding.		

Table 39-146 CheckpointLimitAt75Percent

Alarm	Attributes	Applicable major releases
Name: CheckpointLimitAt75Percent (425) Type: configurationAlarm (11) Package: topology Raised on class: topology.TopologyManager	Severity: warning Implicitly cleared: false Default probable cause: tooManyCheckpoints (337)	Unspecified
<b>Description:</b> The alarm is raised when the number of check points reaches 75 percent of the maximum allowed value.		
<b>Remedial action:</b> Informational - deprecated 9.0		

Table 39-147 CheckpointLimitReachedOrExceeded

Alarm	Attributes	Applicable major releases
Name: CheckpointLimitReachedOrExceeded (426) Type: configurationAlarm (11) Package: topology Raised on class: topology.TopologyManager	Severity: warning Implicitly cleared: false Default probable cause: tooManyCheckpointObjects (837)	Unspecified
<b>Description:</b> The alarm is raised when the number of check points objects reaches or exceeds the maximum allowed value.		
<b>Remedial action:</b> Maximum number of Checkpoint objects reached, the IGP history cleanup task begins and removes older objects. To keep history increase maximumNumberOfCheckpointObjects in nms-server.xml.		

Table 39-148 ChildTemplateInvalid

Alarm	Attributes	Applicable major releases
Name: ChildTemplateInvalid (193) Type: configurationAlarm (11) Package: template Raised on class: template.TemplateBinding	Severity: major Implicitly cleared: true Default probable cause: referencedObjectInvalid (152)	Unspecified
<b>Description:</b> The alarm is raised when a child template in a template binding is invalid. The alarm is deprecated in the 5620 SAM, Release 6.0 and later.		
<b>Raising condition:</b> ('childTemplateInvalidReference' EQUAL 'true')		
<b>Clearing condition:</b> ('childTemplateInvalidReference' EQUAL 'false')		
<b>Remedial action:</b> Informational - deprecated 6.0		

Table 39-149 CliLoginMaxAttempts

Alarm	Attributes	Applicable major releases
Name: CliLoginMaxAttempts (3701) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: false Default probable cause: cliLoginMaxAttempts (1439)	Unspecified
<b>Description:</b> The alarm is raised when the number of CLI login failures due to an incorrect user name or password using TELNET session exceeds the configured value.		
<b>Remedial action:</b> Informational		

## 39 – Unspecified NE alarms

Table 39-150 ClockFailure

Alarm	Attributes	Applicable major releases
Name: ClockFailure (1162) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: clockFailure (865)	Unspecified
<b>Description:</b> The alarm is raised when an MPT radio clock failure occurs.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-151 CModeRxQueryMismatch

Alarm	Attributes	Applicable major releases
Name: CModeRxQueryMismatch (160) Type: configurationAlarm (11) Package: igmp Raised on class: igmp.Interface	Severity: major Implicitly cleared: false Default probable cause: InvalidCompatibilityModeofQueryReceieved (130)	Unspecified
<b>Description:</b> The alarm is raised when an IGMP interface receives an IGMP query of a higher version than the version configured on the interface, for example, when the interface is configured for IGMPv1 and it receives an IGMPv2 or IGMPv3 query. The interface does not process the received IGMP message.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-152 CommonLOS

Alarm	Attributes	Applicable major releases
Name: CommonLOS (3621) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: commonLOS (1410)	Unspecified
<b>Description:</b> The alarm is raised when a radio interface CLA detects a loss of signal.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-153 CommunityMisconfiguration

Alarm	Attributes	Applicable major releases
Name: CommunityMisconfiguration (442) Type: serviceAlarm (16) Package: vprn Raised on class: vprn.AbstractSite	Severity: major Implicitly cleared: true Default probable cause: CommunityMisconfiguration (347)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a community misconfiguration on a service site.		
<b>Remedial action:</b> Configure the SNMP community String on the VPRN service site		

Table 39-154 ConfigFileSyncFailed

Alarm	Attributes	Applicable major releases
Name: ConfigFileSyncFailed (102) Type: equipmentAlarm (3) Package: sw Raised on class: sw.SoftwareUpgradeManager	Severity: critical Implicitly cleared: true Default probable cause: configFileSyncFailed (88)	Unspecified
<b>Description:</b> The alarm is raised when the configuration file synchronization between the active and standby CPM cards fails.		
<b>Remedial action:</b> Please log into the NE in question via CLI and execute a manual synchronization. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-155 ConfigNotCompatible

Alarm	Attributes	Applicable major releases
Name: ConfigNotCompatible (405) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PhysicalPort	Severity: critical Implicitly cleared: false Default probable cause: DaughterCardConfigNotCompatible (301)	Unspecified
<b>Description:</b> The alarm is raised when an MDA configuration is incompatible with the MDA.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The MDA type configured for the slot identified in the alarm must match the installed MDA type.		

## 39 – Unspecified NE alarms

Table 39-156 Connected2GUEsExceeded

Alarm	Attributes	Applicable major releases
Name: Connected2GUEsExceeded (5041) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: info Implicitly cleared: false Default probable cause: ThresholdExceeded (2052)	Unspecified
<b>Description:</b> The alarm is raised when the number of Connected 2G UEs exceeds the threshold that has been set by the operator.		
<b>Raising condition:</b> (('2G Connected UEs Threshold' NOT EQUAL '0L') AND ('2G Connected UEs' > '2G Connected UEs Threshold'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-157 Connected3GUEsExceeded

Alarm	Attributes	Applicable major releases
Name: Connected3GUEsExceeded (5042) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: info Implicitly cleared: false Default probable cause: ThresholdExceeded (2052)	Unspecified
<b>Description:</b> The alarm is raised when the number of Connected 3G UEs exceeds the threshold that has been set by the operator.		
<b>Raising condition:</b> (('3G Connected UEs Threshold' NOT EQUAL '0L') AND ('3G Idle UEs' > '3G Connected UEs Threshold'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-158 Connected4GUEsExceeded

Alarm	Attributes	Applicable major releases
Name: Connected4GUEsExceeded (5043) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: info Implicitly cleared: false Default probable cause: ThresholdExceeded (2052)	Unspecified
<b>Description:</b> The alarm is raised when the number of 4G Connected UEs exceeds the threshold that has been set by the operator.		
<b>Raising condition:</b> (('4G Connected UEs Threshold' NOT EQUAL '0L') AND ('4G Connected UEs' > '4G Connected UEs Threshold'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-159 ContainingEquipmentMissing

Alarm	Attributes	Applicable major releases
Name: ContainingEquipmentMissing (463) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: ContainingEquipmentMissing (327)	Unspecified
<b>Description:</b> The alarm is raised when the compositeEquipmentState attribute has a value of containingEquipmentMissing.		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Parent Removed') OR ('isTerminatable' NOT EQUAL 'true') OR ('Equipped' EQUAL 'false'))		
<b>Remedial action:</b> Informational - an card has been removed from the system.		

Table 39-160 CorporateAndSecuredCompositeServicesAreNotConnected

Alarm	Attributes	Applicable major releases
Name: CorporateAndSecuredCompositeServicesAreNotConnected (828) Type: serviceAlarm (16) Package: ipsec Raised on class: ipsec.IPSecSecuredVpn	Severity: warning Implicitly cleared: false Default probable cause: CompositeServiceMisconfiguration (591)	Unspecified
<b>Description:</b> The alarm is raised when the corporate and secured services used by an IPsec VPN do not have a connector between them.		
<b>Raising condition:</b> ('corporateToSecureServiceConnector' EQUAL 'Not Connected')		
<b>Clearing condition:</b> (('corporateToSecureServiceConnector' EQUAL 'Connected') OR ('corporateToSecureServiceConnector' EQUAL 'None'))		
<b>Remedial action:</b> Create a connector to connect the Corporate service and Secured service.		

Table 39-161 CorporateAndSecuredCompositeServicesMismatch

Alarm	Attributes	Applicable major releases
Name: CorporateAndSecuredCompositeServicesMismatch (829) Type: serviceAlarm (16) Package: ipsec Raised on class: ipsec.IPSecSecuredVpn	Severity: warning Implicitly cleared: false Default probable cause: CompositeServiceMisconfiguration (591)	Unspecified
<b>Description:</b> The alarm is raised when the corporate and secured services used by an IPsec VPN are in different composite services.		
<b>Remedial action:</b> Informational - no corrective action required.		

## 39 – Unspecified NE alarms

Table 39-162 CorruptedBgpUpdate

Alarm	Attributes	Applicable major releases
Name: CorruptedBgpUpdate (3328) Type: topologyAlarm (34) Package: topology Raised on class: topology.BgpAutonomousSystem	Severity: major Implicitly cleared: false Default probable cause: CorruptedBgpUpdateDetected (1164)	Unspecified
<b>Description:</b> The alarm is raised when a BGP-bad-update-packet-received message is sent from the CPAA against a BGP AS. The alarm is not auto-cleared by CPAM.		
<b>Remedial action:</b> A peer is sending a corrupted BGP update. The information regarding the update can be viewed in the BGP corrupted update record. Action should be taken to fix the offending BGP speaker.		

Table 39-163 CouplingEthernetLinkDown

Alarm	Attributes	Applicable major releases
Name: CouplingEthernetLinkDown (4819) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: LossOfSignal (541)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a coupling Ethernet Link Down		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-164 CouplingLossOfRadioFrame

Alarm	Attributes	Applicable major releases
Name: CouplingLossOfRadioFrame (4820) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: LossOfFrame (1904)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a Loss of Radio Frame from Coupling Path		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-165 CouplingPortSFPCardFailure

Alarm	Attributes	Applicable major releases
Name: CouplingPortSFPCardFailure (4821) Type: equipmentAlarm (3) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: ReplaceableUnitProblem (1905)	Unspecified
<b>Description:</b> This alarm is raised when coupling port SFP Card failure is detected.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-166 CouplingPortSFPMissing

Alarm	Attributes	Applicable major releases
Name: CouplingPortSFPMissing (4822) Type: equipmentAlarm (3) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: ReplaceableUnitMissing (1906)	Unspecified
<b>Description:</b> This alarm is raised when coupling port SFP is missing.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-167 CpaaAreaUnreachableThroughISIS

Alarm	Attributes	Applicable major releases
Name: CpaaAreaUnreachableThroughISIS (5418) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: CPAALinksToAreaDown (2125)	Unspecified
<b>Description:</b> The alarm is raised when all links from CPAA to an area are down.		
<b>Remedial action:</b> 1) The active CPAA cannot reach certain CPAA instance through the ISIS protocol. Please check the links to the unreachable CPAA instance. 2) If the standby CPAA is functional as per your requirements, switch-over might resolve the issue.		

## 39 – Unspecified NE alarms

Table 39-168 CpaAreaUnreachableThroughOSPF

Alarm	Attributes	Applicable major releases
Name: CpaAreaUnreachableThroughOSPF (5419) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpa	Severity: major Implicitly cleared: true Default probable cause: CPAALinksToAreaDown (2125)	Unspecified
<b>Description:</b> The alarm is raised when all links from CPAA to OSPF area are down.		
<b>Remedial action:</b> 1) The active CPAA cannot reach certain area through the OSPF protocol. Please check the links to the unreachable area. 2) If the standby CPAA is functional as per your requirements, switch-over might resolve the issue.		

Table 39-169 CpaAreaUnreachableThroughOSPFv3

Alarm	Attributes	Applicable major releases
Name: CpaAreaUnreachableThroughOSPFv3 (5420) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpa	Severity: major Implicitly cleared: true Default probable cause: CPAALinksToAreaDown (2125)	Unspecified
<b>Description:</b> The alarm is raised when all links from CPAA to OSPFv3 area are down.		
<b>Remedial action:</b> 1) The active CPAA cannot reach certain area through the OSPFv3 protocol. Please check the links to the unreachable area. 2) If the standby CPAA is functional as per your requirements, switch-over might resolve the issue.		

Table 39-170 CpmTimedLicenseExpiryNotice

Alarm	Attributes	Applicable major releases
Name: CpmTimedLicenseExpiryNotice (692) Type: cpmLicensingAlarm (39) Package: security Raised on class: security.CpmLicense	Severity: variable Implicitly cleared: false Default probable cause: timedcpmLicenseExpiryNotice (293)	Unspecified
<b>Description:</b> The alarm is raised when the 5650 CPAM license timer expires. The alarm information includes the license expiry date.		
<b>Remedial action:</b> Informational - the CPAM license key is about to expire. Please contact Alcatel-Lucent Sales to request either an extension for the license or a permanent license key.		

Table 39-171 CpeUnreachable

Alarm	Attributes	Applicable major releases
Name: CpeUnreachable (525) Type: communicationsAlarm (4) Package: rtr Raised on class: rtr.StaticRoute	Severity: major Implicitly cleared: true Default probable cause: CpeUnreachable (334)	Unspecified
<b>Description:</b> The alarm is raised when the CPE associated with a static route is unreachable.		
<b>Remedial action:</b> Please check that the static route is correct or exists for the CPE.		

Table 39-172 CPMPChipMemoryEvent

Alarm	Attributes	Applicable major releases
Name: CPMPChipMemoryEvent (4989) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.ProcessorCard	Severity: warning Implicitly cleared: true Default probable cause: memoryParityError (451)	Unspecified
<b>Description:</b> The alarm is raised when a PChip detects a memory error. The alarm is raised against a 7450 ESS, 7710 SR, 7950 SR, or 7750 SR. The alarm is raised against a Release 11.0 NE at R4 or later.		
<b>Remedial action:</b> A fault has been detected in the hardware if the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-173 CPUInfo\_thermakTripAssert

Alarm	Attributes	Applicable major releases
Name: CPUInfo_thermakTripAssert (5892) Type: equipmentAlarm (3) Package: femto Raised on class: femto.FGWCPUInfo	Severity: minor Implicitly cleared: true Default probable cause: processorProblem (633)	Unspecified
<b>Description:</b> Thermal trip assert		
<b>Remedial action:</b> TBD		

## 39 – Unspecified NE alarms

Table 39-174 CreditControlInsertedFtrEntryDropped

Alarm	Attributes	Applicable major releases
Name: CreditControlInsertedFtrEntryDropped (1150) Type: configurationAlarm (11) Package: acfilter Raised on class: acfilter.FilterDefinition	Severity: warning Implicitly cleared: false Default probable cause: FilterEntryDropped (856)	Unspecified
<b>Description:</b> The alarm is raised when a request to insert a filter entry is not successful for a credit control application.		
<b>Remedial action:</b> A Configuration error has occurred. The request to insert a filter entry was not successful for Credit Control application. Check the configuration filter entry.		

Table 39-175 CreditControlInsertSpaceThresholdAlarm

Alarm	Attributes	Applicable major releases
Name: CreditControlInsertSpaceThresholdAlarm (1149) Type: configurationAlarm (11) Package: acfilter Raised on class: acfilter.FilterDefinition	Severity: major Implicitly cleared: true Default probable cause: UtilizationExceedConfiguredLimit (855)	Unspecified
<b>Description:</b> The alarm is raised when the utilization of a filter entry range that is reserved for filter entry insertion increases to the configured maximum value for a credit control application insert range.		
<b>Remedial action:</b> The filter entry range reserved for filter entry insertion has increased to the configured high watermark for Credit Control application. Make an adjusted to the high watermark or to the filter.		

Table 39-176 CrossConnectionFail

Alarm	Attributes	Applicable major releases
Name: CrossConnectionFail (679) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: crossConnectionFail (494)	Unspecified
<b>Description:</b> The alarm is raised when an MSS TDM cross-connection fails.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

**Table 39-177 CTAuxMisalignmentWhileEnbAutoAllocationDisabled**

Alarm	Attributes	Applicable major releases
Name: CTAuxMisalignmentWhileEnbAutoAllocationDisabled (5423) Type: communicationsAlarm (4) Package: lte Raised on class: lte.CallTraceSessionManager	Severity: major Implicitly cleared: true Default probable cause: eNBsAuxIPMisalignment (2126)	Unspecified
<b>Description:</b> The alarm is raised if automatic AUX allocation is disabled and if there is a discrepancy between the eNB configurations and the AUX assigned to the eNB in SAM. If the automatic AUX allocation is enabled, SAM will automatically set the eNB IP addresses linked to the trace management on the assigned AUX in SAM.		
<b>Remedial action:</b> Manually launch the allocation of the eNBs to the active CT AUX server.		

**Table 39-178 DatabaseServerErrors**

Alarm	Attributes	Applicable major releases
Name: DatabaseServerErrors (5174) Type: databaseAlarm (29) Package: db Raised on class: db.DatabaseManager	Severity: critical Implicitly cleared: false Default probable cause: DatabaseErrors (2090)	Unspecified
<b>Description:</b> The alarm is raised when when a critical Oracle error occurs.		
<b>Remedial action:</b> The probable cause of this alarm is the database server detected a critical error. The EmsDbServerHealth.log and oracle trace files will provide more information.		

**Table 39-179 DataChannelLoopback**

Alarm	Attributes	Applicable major releases
Name: DataChannelLoopback (3945) Type: configurationAlarm (11) Package: tdmequipment Raised on class: tdmequipment.DataChannelSpecifics	Severity: warning Implicitly cleared: true Default probable cause: dataChannelLoopback (1526)	Unspecified
<b>Description:</b> The alarm is raised when an NE reports that a data channel has a loopback alarm condition.		
<b>Remedial action:</b> Informational only.		

## 39 – Unspecified NE alarms

Table 39-180 DataMtReused

Alarm	Attributes	Applicable major releases
Name: DataMtReused (361) Type: dataMtReusedAlarm (37) Package: pim Raised on class: pim.DataMtInterface	Severity: warning Implicitly cleared: false Default probable cause: DataMtReused (258)	Unspecified
<b>Description:</b> The alarm is raised when a data MDT is reused.		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Please check MVPN Selective Tunnel Data MT Interface configuration so that no duplicate C (S,G) is mapped to a data MDT.		

Table 39-181 DaughterCardConfigNotCompatible

Alarm	Attributes	Applicable major releases
Name: DaughterCardConfigNotCompatible (404) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.DaughterCardSlot	Severity: critical Implicitly cleared: false Default probable cause: DaughterCardConfigNotCompatible (301)	Unspecified
<b>Description:</b> The alarm is raised when a supported MDA is inserted into a compatible IOM slot, but the configuration on the MDA ports is not compatible with the MDA.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The configuration of one or more ports must be changed to match the ports on the MDA.		

Table 39-182 DDosCardFpEventOverflow

Alarm	Attributes	Applicable major releases
Name: DDosCardFpEventOverflow (4460) Type: securityServiceOrMechanismViolation (92) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: eventOverflow (1684)	Unspecified
<b>Description:</b> The alarm is raised when a flood of distributed CPU FP protection events occur on a particular card and some of the events are lost due to event throttling mechanism.		
<b>Remedial action:</b> Please reduce the number of distributed DoS FP protection policers configured.		

Table 39-183 DDosCardSapEventOverflow

Alarm	Attributes	Applicable major releases
Name: DDosCardSapEventOverflow (4461) Type: securityServiceOrMechanismViolation (92) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: eventOverflow (1684)	Unspecified
<b>Description:</b> The alarm is raised when a flood of distributed CPU protection SAP events occur on a particular card and some of the events are lost due to event throttling mechanism.		
<b>Remedial action:</b> Please reduce the number of distributed DoS SAP protection policers configured.		

Table 39-184 DDosCardVrtrIfEventOverflow

Alarm	Attributes	Applicable major releases
Name: DDosCardVrtrIfEventOverflow (4462) Type: securityServiceOrMechanismViolation (92) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: eventOverflow (1684)	Unspecified
<b>Description:</b> The alarm is raised when a flood of distributed CPU protection network-interface events occur on a particular card and some of the events are lost due to event throttling mechanism.		
<b>Remedial action:</b> Please reduce the number of distributed DoS Network Interface protection policers configured.		

Table 39-185 DDosFpDynamicPoolUsageHigh

Alarm	Attributes	Applicable major releases
Name: DDosFpDynamicPoolUsageHigh (4463) Type: securityServiceOrMechanismViolation (92) Package: equipment Raised on class: equipment.ForwardingPlane	Severity: warning Implicitly cleared: true Default probable cause: resourceLimitReached (131)	Unspecified
<b>Description:</b> The alarm is raised when the dynamic enforcement policer pool usage on the forwarding plane is nearly exhausted.		
<b>Remedial action:</b> Please adjust the dynamic enforcement policer pool usage.		

39 – Unspecified NE alarms

---

Table 39-186 Degrade

Alarm	Attributes	Applicable major releases
Name: Degrade (622) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: degrade (462)	Unspecified
<b>Description:</b> The alarm is raised when a degraded signal is detected.		
<b>Remedial action:</b> The signal being received on the indicated port is of poor quality. Check to ensure that the physical link is not damaged and that the link is properly connected/seated to the port.		

Table 39-187 DemFail (equipment)

Alarm	Attributes	Applicable major releases
Name: DemFail (680) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: demFail (495)	Unspecified
<b>Description:</b> The alarm is raised when an MSS demodulation function fails.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-188 DemFail (radioequipment)

Alarm	Attributes	Applicable major releases
Name: DemFail (680) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: demFail (495)	Unspecified
<b>Description:</b> The alarm is raised when an MSS demodulation function fails.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-189 DemodulatorUnlocked

Alarm	Attributes	Applicable major releases
Name: DemodulatorUnlocked (4823) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: DemodulationFailure (1907)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects demodulation failure.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-190 DemXpicLOS (equipment)

Alarm	Attributes	Applicable major releases
Name: DemXpicLOS (3622) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: demXpicLos (1411)	Unspecified
<b>Description:</b> The alarm is raised when a loss of signal occurs during XPIC demodulation.		
<b>Remedial action:</b> The alarm is raised when a loss of signal occurs on XPIC demodulation		

Table 39-191 DemXpicLOS (mpr)

Alarm	Attributes	Applicable major releases
Name: DemXpicLOS (3622) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: demXpicLos (1411)	Unspecified
<b>Description:</b> The alarm is raised when a loss of signal occurs during XPIC demodulation.		
<b>Remedial action:</b> The alarm is raised when a loss of signal occurs on XPIC demodulation		

Table 39-192 DependentObjectDeleted

Alarm	Attributes	Applicable major releases
Name: DependentObjectDeleted (192) Type: configurationAlarm (11) Package: template Raised on class: template.Template	Severity: major Implicitly cleared: true Default probable cause: referencedObjectGone (151)	Unspecified

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when an object referenced by a template cannot be found. The alarm is deprecated in the 5620 SAM, Release 6.0 and later.		
<b>Raising condition:</b> ('Invalid References (Reset on Save)' EQUAL 'true')		
<b>Clearing condition:</b> ('Invalid References (Reset on Save)' EQUAL 'false')		
<b>Remedial action:</b> Informational - deprecated 6.0		

(2 of 2)

Table 39-193 DeployProfileFailed

Alarm	Attributes	Applicable major releases
Name: DeployProfileFailed (610) Type: configurationAlarm (11) Package: autoconfig Raised on class: autoconfig.AutoProvisioning	Severity: major Implicitly cleared: false Default probable cause: DeployProfileFailed (453)	Unspecified
<b>Description:</b> The alarm is raised when the deployment of a script to a 7705 SAR fails.		
<b>Remedial action:</b> Informational - Please revisit target node configuration.		

Table 39-194 Deregistered4GUEsExceeded

Alarm	Attributes	Applicable major releases
Name: Deregistered4GUEsExceeded (5044) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: info Implicitly cleared: false Default probable cause: ThresholdExceeded (2052)	Unspecified
<b>Description:</b> The alarm is raised when the number of 4G Deregistered UEs exceeds the threshold that has been set by the operator.		
<b>Raising condition:</b> (('4G Deregistered UEs Threshold' NOT EQUAL '0L') AND ('4G Deregistered UEs' > '4G Deregistered UEs Threshold'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-195 DfPeerDown

Alarm	Attributes	Applicable major releases
Name: DfPeerDown (3304) Type: EpclIAAlarm (102) Package: Iteli Raised on class: Iteli.DfPeer	Severity: major Implicitly cleared: true Default probable cause: DfPeerDown (1151)	Unspecified
<b>Description:</b> The alarm is raised on a Delivery Function that is operationally down.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Raising condition:</b> (('isLocal' EQUAL 'true') AND ('Operational State' NOT EQUAL 'In Service'))		
<b>Clearing condition:</b> NOT (((('isLocal' EQUAL 'true') AND ('Operational State' NOT EQUAL 'In Service'))))		
<b>Remedial action:</b> A TCP connection failure associated with a Delivery Function has occurred. The underlying transport network is unreliable. Please correct the issue within the transport network.		

(2 of 2)

Table 39-196 DHCPFoLeaseUpdateFailedAddressConflict

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedAddressConflict (5159) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpPoolFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedAddressConflict (2079)	Unspecified
<b>Description:</b> This alarm is raised when a address conflict lease update received from the failover peer cannot be processed successfully. This DHCP pool instance has already leased another address to this host.		
<b>Remedial action:</b> This alarm indicates that the Local DHCP Pool Failover lease update has failed. Packets received from the failover peer cannot be processed. This DHCP pool instance has already leased another address to this host. Please ensure all configurations are correct.		

Table 39-197 DHCPFoLeaseUpdateFailedfoShutdown

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedfoShutdown (5167) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpPoolFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedfoShutdown (2087)	Unspecified
<b>Description:</b> This alarm is raised when a shutdown lease update received from the failover peer cannot be processed successfully. The failover state of this DHCP Pool instance is 'shutdown'.		
<b>Remedial action:</b> This alarm indicates that the Local DHCP Pool Failover lease update has failed. Packets received from the failover peer cannot be processed. The failover state of this DHCP Pool instance is 'shutdown'. Please ensure all configurations are correct.		

## 39 – Unspecified NE alarms

Table 39-198 DHCPFoLeaseUpdateFailedHostConflict

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedHostConflict (5160) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpPoolFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedHostConflict (2080)	Unspecified
<b>Description:</b> This alarm is raised when a host conflict lease update received from the failover peer cannot be processed successfully. This DHCP pool instance has already leased this address to another host.		
<b>Remedial action:</b> This alarm indicates that the Local DHCP Pool Failover lease update has failed. Packets received from the failover peer cannot be processed. This DHCP pool instance has already leased this address to another host. Please ensure all configurations are correct.		

Table 39-199 DHCPFoLeaseUpdateFailedLeaseExpired

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedLeaseExpired (5161) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpPoolFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedLeaseExpired (2081)	Unspecified
<b>Description:</b> This alarm is raised when a lease expired lease update received from the failover peer cannot be processed successfully. The lease received from the peer has expired.		
<b>Remedial action:</b> This alarm indicates that the Local DHCP Pool Failover lease update has failed. Packets received from the failover peer cannot be processed. The lease received from the peer has expired. Please ensure all configurations are correct.		

Table 39-200 DHCPFoLeaseUpdateFailedMaxLeaseReached

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedMaxLeaseReached (5162) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpPoolFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedMaxLeaseReached (2082)	Unspecified
<b>Description:</b> This alarm is raised when a maximum reached lease update received from the failover peer cannot be processed successfully. The maximum number of leases is already reached.		
<b>Remedial action:</b> This alarm indicates that the Local DHCP Pool Failover lease update has failed. Packets received from the failover peer cannot be processed. The maximum number of leases is already reached. Please ensure all configurations are correct.		

**Table 39-201 DHCPFoLeaseUpdateFailedPeerConflict**

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedPeerConflict (5163) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpPoolFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedPeerConflict (2083)	Unspecified
<b>Description:</b> This alarm is raised when a peer conflict lease update received from the failover peer cannot be processed successfully. The failover peer has leased an address within a subnet range of which the failover control is set to 'local' on this local DHCP pool instance.		
<b>Remedial action:</b> This alarm indicates that the Local DHCP Pool Failover lease update has failed. Packets received from the failover peer cannot be processed. The failover peer has leased an address within a subnet range of which the failover control is set to 'local' on this local DHCP pool instance. Please ensure all configuration is correct.		

**Table 39-202 DHCPFoLeaseUpdateFailedPersistenceCongested**

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedPersistenceCongested (5164) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpPoolFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedPersistenceCongested (2084)	Unspecified
<b>Description:</b> This alarm is raised when a persistence congested lease update received from the failover peer cannot be processed successfully. The lease received from the peer can not be persistently stored because the persistence subsystem is in overload.		
<b>Remedial action:</b> This alarm indicates that the Local DHCP Pool Failover lease update has failed. Packets received from the failover peer cannot be processed. The lease received from the peer can not be persistently stored because the persistence subsystem is in overload. Please ensure all configuration is correct.		

**Table 39-203 DHCPFoLeaseUpdateFailedRangeNotFound**

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedRangeNotFound (5165) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpPoolFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedRangeNotFound (2085)	Unspecified
<b>Description:</b> This alarm is raised when a range not found lease update received from the failover peer cannot be processed successfully. No valid include range for this lease could be found.		
<b>Remedial action:</b> This alarm indicates that the Local DHCP Pool Failover lease update has failed. Packets received from the failover peer cannot be processed. No valid include range for this lease could be found. Please ensure all configurations are correct.		

## 39 – Unspecified NE alarms

Table 39-204 DHCPFoLeaseUpdateFailedSubnetNotFound

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedSubnetNotFound (5166) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpPoolFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedSubnetNotFound (2086)	Unspecified
<b>Description:</b> This alarm is raised when a subnet not found lease update received from the failover peer cannot be processed successfully. No valid subnet for this lease could be found.		
<b>Remedial action:</b> This alarm indicates that the Local DHCP Pool Failover lease update has failed. Packets received from the failover peer cannot be processed. No valid subnet for this lease could be found. Please ensure all configurations are correct.		

Table 39-205 DHCPFoLeaseUpdateFailedAddressConflict

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedAddressConflict (4977) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpServerFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedAddressConflict (2032)	Unspecified
<b>Description:</b> This alarm is raised when a address conflict lease update received from the failover peer cannot be processed successfully. This DHCP server instance has already leased another address to this host.		
<b>Remedial action:</b> This alarm indicates the Local DHCP Server Failover lease update has failed. Packet received from the failover peer, cannot be processed successfully. This DHCP server instance has already leased another address to this host. Please ensure all configuration is correct.		

Table 39-206 DHCPFoLeaseUpdateFailedfoShutdown

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedfoShutdown (4985) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpServerFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedfoShutdown (2040)	Unspecified
<b>Description:</b> This alarm is raised when a shutdown lease update received from the failover peer cannot be processed successfully. The failover state of this DHCP Server instance is 'shutdown'.		
<b>Remedial action:</b> This alarm indicates the Local DHCP Server Failover lease update has failed. Packet received from the failover peer, cannot be processed successfully. The failover state of this DHCP Server instance is 'shutdown'. Please ensure all configuration is correct.		

Table 39-207 DHCPFoLeaseUpdateFailedHostConflict

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedHostConflict (4978) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpServerFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedHostConflict (2033)	Unspecified
<b>Description:</b> This alarm is raised when a host conflict lease update received from the failover peer cannot be processed successfully. This DHCP server instance has already leased this address to another host.		
<b>Remedial action:</b> This alarm indicates the Local DHCP Server Failover lease update has failed. Packet received from the failover peer, cannot be processed successfully. This DHCP server instance has already leased this address to another host. Please ensure all configuration is correct.		

Table 39-208 DHCPFoLeaseUpdateFailedLeaseExpired

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedLeaseExpired (4979) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpServerFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedLeaseExpired (2034)	Unspecified
<b>Description:</b> This alarm is raised when a lease expired lease update received from the failover peer cannot be processed successfully. The lease received from the peer has expired.		
<b>Remedial action:</b> This alarm indicates the Local DHCP Server Failover lease update has failed. Packet received from the failover peer, cannot be processed successfully. The lease received from the peer has expired. Please ensure all configuration is correct.		

Table 39-209 DHCPFoLeaseUpdateFailedMaxLeaseReached

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedMaxLeaseReached (4980) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpServerFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedMaxLeaseReached (2035)	Unspecified
<b>Description:</b> This alarm is raised when a maximum reached lease update received from the failover peer cannot be processed successfully. The maximum number of leases is already reached.		
<b>Remedial action:</b> This alarm indicates the Local DHCP Server Failover lease update has failed. Packet received from the failover peer, cannot be processed successfully. The maximum number of leases is already reached. Please ensure all configuration is correct.		

## 39 – Unspecified NE alarms

Table 39-210 DHCPFoLeaseUpdateFailedPeerConflict

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedPeerConflict (4981) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpServerFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedPeerConflict (2036)	Unspecified
<b>Description:</b> This alarm is raised when a peer conflict lease update received from the failover peer cannot be processed successfully. The failover peer has leased an address within a subnet range of which the failover control is set to 'local' on this local DHCP server instance.		
<b>Remedial action:</b> This alarm indicates the Local DHCP Server Failover lease update has failed. Packet received from the failover peer, cannot be processed successfully. The failover peer has leased an address within a subnet range of which the failover control is set to 'local' on this local DHCP server instance. Please ensure all configuration is correct.		

Table 39-211 DHCPFoLeaseUpdateFailedPersistenceCongested

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedPersistenceCongested (4982) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpServerFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedPersistenceCongested (2037)	Unspecified
<b>Description:</b> This alarm is raised when a persistence congested lease update received from the failover peer cannot be processed successfully. The lease received from the peer can not be persistently stored because the persistence subsystem is in overload.		
<b>Remedial action:</b> This alarm indicates the Local DHCP Server Failover lease update has failed. Packet received from the failover peer, cannot be processed successfully. The lease received from the peer can not be persistently stored because the persistence subsystem is in overload. Please ensure all configuration is correct.		

Table 39-212 DHCPFoLeaseUpdateFailedRangeNotFound

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedRangeNotFound (4983) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpServerFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedRangeNotFound (2038)	Unspecified
<b>Description:</b> This alarm is raised when a range not found lease update received from the failover peer cannot be processed successfully. No valid include range for this lease could be found.		
<b>Remedial action:</b> This alarm indicates the Local DHCP Server Failover lease update has failed. Packet received from the failover peer, cannot be processed successfully. No valid include range for this lease could be found. Please ensure all configuration is correct.		

Table 39-213 DHCPFoLeaseUpdateFailedSubnetNotFound

Alarm	Attributes	Applicable major releases
Name: DHCPFoLeaseUpdateFailedSubnetNotFound (4984) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcpServerFailover	Severity: warning Implicitly cleared: false Default probable cause: DHCPFoLeaseUpdateFailedSubnetNotFound (2039)	Unspecified
<b>Description:</b> This alarm is raised when a subnet not found lease update received from the failover peer cannot be processed successfully. No valid subnet for this lease could be found.		
<b>Remedial action:</b> This alarm indicates the Local DHCP Server Failover lease update has failed. Packet received from the failover peer, cannot be processed successfully. No valid subnet for this lease could be found. Please ensure all configuration is correct.		

Table 39-214 DiamAppMessageDropped

Alarm	Attributes	Applicable major releases
Name: DiamAppMessageDropped (5175) Type: processingErrorAlarm (81) Package: diameter Raised on class: diameter.DiameterPeer	Severity: minor Implicitly cleared: false Default probable cause: diamAppMessageDropped (2091)	Unspecified
<b>Description:</b> The alarm is raised when the Diameter protocol has dropped a message		
<b>Remedial action:</b> The recovery action depends on the exact cause of the failure. See the Additional Text field in the Alarm Info form for a specific cause for the failure.		

Table 39-215 DiamAppSessionFailure

Alarm	Attributes	Applicable major releases
Name: DiamAppSessionFailure (5410) Type: processingErrorAlarm (81) Package: ressubscr Raised on class: ressubscr.ResidentialSubscriberInstance	Severity: minor Implicitly cleared: false Default probable cause: diamAppSessionFailure (2118)	Unspecified
<b>Description:</b> The alarm is raised when the Diameter protocol has a session failure.		
<b>Remedial action:</b> The recovery action depends on the exact cause of the failure. See the Additional Text field in the Alarm Info form for a specific cause for the failure.		

## 39 – Unspecified NE alarms

Table 39-216 DiskCapacityProblem

Alarm	Attributes	Applicable major releases
Name: DiskCapacityProblem (144) Type: storageAlarm (25) Package: equipment Raised on class: equipment.FlashMemory	Severity: variable Implicitly cleared: false Default probable cause: diskCapacityProblem (115)	Unspecified
<b>Description:</b> The alarm is raised when a compact flash capacity threshold value on an NE is reached or exceeded. The alarm condition is detected during resynchronization or when a tnmxEqFlashDiskFull trap is received. The threshold value is not configurable. The severity of the alarm depends on the percentage of disk capacity used, as listed below: - 75 percent, Minor - 90 percent, Major - 100 percent, Critical		
<b>Remedial action:</b> The usage of the compact flash device must be analysed and old or redundant files must be removed. This operation must be executed using the CLI interface on the NE.		

Table 39-217 DryContactAlarm

Alarm	Attributes	Applicable major releases
Name: DryContactAlarm (460) Type: dryContactAlarm (47) Package: equipment Raised on class: equipment.DryContact	Severity: variable Implicitly cleared: false Default probable cause: dryContactExternalAlarmRaised (351)	Unspecified
<b>Description:</b> The alarm is raised when a device detects a dry contact alarm condition.		
<b>Remedial action:</b> The remedial action for this alarm depends on the condition that the dry contact alarm is configured.		

Table 39-218 DS1E1Loopback

Alarm	Attributes	Applicable major releases
Name: DS1E1Loopback (409) Type: configurationAlarm (11) Package: tdmequipment Raised on class: tdmequipment.DS1E1ChannelSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ds1e1Loopback (305)	Unspecified
<b>Description:</b> The alarm is raised when an NE reports that a specific DS1 or E1 channel has a loopback alarm condition.		
<b>Remedial action:</b> Informational only.		

Table 39-219 DS3E3Loopback

Alarm	Attributes	Applicable major releases
Name: DS3E3Loopback (408) Type: configurationAlarm (11) Package: tdmequipment Raised on class: tdmequipment.DS3E3ChannelSpecifics	Severity: warning Implicitly cleared: true Default probable cause: ds3e3Loopback (304)	Unspecified
<b>Description:</b> The alarm is raised when an NE reports that a specific DS3 or E3 channel has a loopback alarm condition.		
<b>Remedial action:</b> Informational only.		

Table 39-220 DscPlatformLicenseKeyExpiredAlarm

Alarm	Attributes	Applicable major releases
Name: DscPlatformLicenseKeyExpiredAlarm (1133) Type: EpcAlarm (59) Package: Ite Raised on class: Ite.DynamicServicesControllerInstance	Severity: major Implicitly cleared: false Default probable cause: DscPlatformLicenseKeyExpired (841)	Unspecified
<b>Description:</b> The alarm is raised when the DSC platform license key is expired.		
<b>Remedial action:</b> Contact Alcatel-Lucent support to obtain new DSC license key		

Table 39-221 DscPlatformLicenseKeyExpiringAlarm

Alarm	Attributes	Applicable major releases
Name: DscPlatformLicenseKeyExpiringAlarm (1134) Type: EpcAlarm (59) Package: Ite Raised on class: Ite.DynamicServicesControllerInstance	Severity: minor Implicitly cleared: false Default probable cause: DscPlatformLicenseKeyExpiring (842)	Unspecified
<b>Description:</b> The alarm is raised when the DSC platform license key is expiring.		
<b>Remedial action:</b> Contact Alcatel-Lucent support to obtain new DSC license key		

## 39 – Unspecified NE alarms

Table 39-222 DscPlatformLicenseKeyHighWaterAlarm

Alarm	Attributes	Applicable major releases
Name: DscPlatformLicenseKeyHighWaterAlarm (1135) Type: EpcAlarm (59) Package: Ite Raised on class: Ite.DynamicServicesControllerInstance	Severity: minor Implicitly cleared: false Default probable cause: DscPlatformLicenseKeyHighWaterMarkCrossed (843)	Unspecified
<b>Description:</b> The alarm is raised when the 5780 DSC license key crosses the high watermark for a specified threshold.		
<b>Remedial action:</b> Contact Alcatel-Lucent support to obtain new DSC license key		

Table 39-223 DscPlatformLicenseKeyLowWaterAlarm

Alarm	Attributes	Applicable major releases
Name: DscPlatformLicenseKeyLowWaterAlarm (1136) Type: EpcAlarm (59) Package: Ite Raised on class: Ite.DynamicServicesControllerInstance	Severity: info Implicitly cleared: false Default probable cause: DscPlatformLicenseKeyLowWaterMarkCrossed (844)	Unspecified
<b>Description:</b> The alarm is raised when the 5780 DSC license key crosses the low watermark for a specified threshold.		
<b>Remedial action:</b> Contact Alcatel-Lucent support to obtain new DSC license key		

Table 39-224 DscPlatformLicenseKeyThresholdReachedAlarm

Alarm	Attributes	Applicable major releases
Name: DscPlatformLicenseKeyThresholdReachedAlarm (1137) Type: EpcAlarm (59) Package: Ite Raised on class: Ite.DynamicServicesControllerInstance	Severity: major Implicitly cleared: true Default probable cause: DscPlatformLicenseKeyThresholdReached (845)	Unspecified
<b>Description:</b> The alarm is raised when the 5780 DSC license key reaches a specified threshold.		
<b>Remedial action:</b> NContact Alcatel-Lucent support to obtain new DSC license key		

Table 39-225 DualEndedLossNotSupported

Alarm	Attributes	Applicable major releases
Name: DualEndedLossNotSupported (1194) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.MaintAssociation	Severity: warning Implicitly cleared: true Default probable cause: dualEndedLossNotSupported (895)	Unspecified
<b>Description:</b> The alarm is raised when a MEP that does not support Y1731 Dual Ended Loss test is participating in a CFM Continuity Check test that has Y1731 Dual Ended Loss test enabled.		
<b>Remedial action:</b> Informational - The alarm is raised when at least one MEP that does not support Y1731 Dual Ended Loss test is participating in a CFM Continuity Check test that has Y1731 Dual Ended Loss test enabled.		

Table 39-226 DualEndedLossThresholdAlarm

Alarm	Attributes	Applicable major releases
Name: DualEndedLossThresholdAlarm (1195) Type: oamAlarm (18) Package: ethernetToam Raised on class: ethernetToam.Mep	Severity: minor Implicitly cleared: true Default probable cause: dualEndedLossThresholdExceeded (896)	Unspecified
<b>Description:</b> The alarm is raised when a MEP reports that either the Local or Remote loss ratio has exceeded the configured threshold for the specified remote MEP.		
<b>Remedial action:</b> Informational - The alarm is raised when a MEP reports that either the Local or Remote loss ratio has exceeded the configured threshold for the specified remote MEP.		

Table 39-227 DualMaster

Alarm	Attributes	Applicable major releases
Name: DualMaster (420) Type: configurationAlarm (11) Package: srrp Raised on class: srrp.Instance	Severity: major Implicitly cleared: false Default probable cause: dualMaster (313)	Unspecified
<b>Description:</b> The alarm is raised when the local and remote SRRP instances are in the master state.		
<b>Remedial action:</b> Shut down one of the peer SRRP instances, modify the priority to a larger value (lower priority) and then turn it up.		

## 39 – Unspecified NE alarms

Table 39-228 duplicateAdminGroupName

Alarm	Attributes	Applicable major releases
Name: duplicateAdminGroupName (4895) Type: configurationAlarm (11) Package: svt Raised on class: svt.TunnelAdminGroup	Severity: warning Implicitly cleared: true Default probable cause: duplicateNameExists (1953)	Unspecified
<b>Description:</b> The alarm is raised when two or more global Admin Groups share the same group name.		
<b>Remedial action:</b> Either change the admin group name to a different value, or delete this one and recreate it with a new name.		

Table 39-229 DuplicateIpAddress

Alarm	Attributes	Applicable major releases
Name: DuplicateIpAddress (5129) Type: configurationAlarm (11) Package: rtr Raised on class: rtr.VirtualRouterIpAddress	Severity: warning Implicitly cleared: true Default probable cause: duplicateIpAddress (2059)	Unspecified
<b>Description:</b> The alarm is raised when a duplicate routing instance IP Address is found on two or more different NEs.		
<b>Remedial action:</b> Verify to ensure the duplicate routing instance IP Address is not for dual homing or network redundancy configuration. Navigate to the Virtual Router Duplicate IP Addresses listing: (Tools -> Network Resources -> Virtual Router Duplicate IP Addresses), for more information on the duplicate IP address.		

Table 39-230 DuplicateRole

Alarm	Attributes	Applicable major releases
Name: DuplicateRole (470) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.StackConfiguration	Severity: major Implicitly cleared: false Default probable cause: twoElementsWithSameRole (356)	Unspecified
<b>Description:</b> The alarm is raised when a slot has the same primary or secondary role as another slot in the stack. The slot subsequently enters pass-through mode.		
<b>Remedial action:</b> Login to switch console, check and correct configuration and reload stack.		

Table 39-231 DuplicateRouteDistinguisher

Alarm	Attributes	Applicable major releases
Name: DuplicateRouteDistinguisher (4996) Type: configurationAlarm (11) Package: I3fwd Raised on class: I3fwd.ServiceSite	Severity: warning Implicitly cleared: true Default probable cause: duplicateRouteDistinguisher (2050)	Unspecified
<b>Description:</b> The alarm is raised if a duplicate Route Distinguisher is configured on two different NE's on different VPRN Service.		
<b>Remedial action:</b> The Route Distinguisher has been configured on another L3 VPRN Site. Please check the value of Route Distinguisher under Routing tab of VPRN Routing Instance.		

Table 39-232 DuplicateSlot

Alarm	Attributes	Applicable major releases
Name: DuplicateSlot (468) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.StackConfiguration	Severity: major Implicitly cleared: false Default probable cause: duplicateSlotNINumber (354)	Unspecified
<b>Description:</b> The alarm is raised when a slot has the same slot number as another stack element. The slot must relinquish its operational status because it has a higher election key, based on the up time, slot number, and MAC address. Both slots subsequently enter pass-through mode.		
<b>Remedial action:</b> Login to switch console, correct the slot number and reload stack.		

Table 39-233 DuplicateVrfPolicy

Alarm	Attributes	Applicable major releases
Name: DuplicateVrfPolicy (229) Type: configurationAlarm (11) Package: I3fwd Raised on classes: <ul style="list-style-type: none"> <li>I3fwd.ServiceSiteImportPolicy</li> <li>I3fwd.ServiceSiteExportPolicy</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: duplicateVrfPolicyExists (177)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a duplicate VRF policy in a VPRN. The alarm information includes the VRF policy ID and type, and information about the service site. Note: starting from SAM 12.0 R1, SAM no longer raise this alarm since it is not much useful but has performance issue.		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The duplicate VRF policy must be deleted. Note: starting from SAM 12.0 R1, SAM no longer raises this alarm.		

## 39 – Unspecified NE alarms

Table 39-234 DuplicateVrfTarget

Alarm	Attributes	Applicable major releases
Name: DuplicateVrfTarget (230) Type: configurationAlarm (11) Package: I3fwd Raised on class: I3fwd.ServiceSite	Severity: warning Implicitly cleared: true Default probable cause: duplicateVrfTargetExists (178)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a duplicate VRF target in a VPRN. The alarm information includes the VRF policy ID and type, and information about the service site.		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The duplicate VRF target must be deleted.		

Table 39-235 DyingGasp (equipment)

Alarm	Attributes	Applicable major releases
Name: DyingGasp (1164) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.CardSlot	Severity: major Implicitly cleared: false Default probable cause: dyingGaspSignal (463)	Unspecified
<b>Description:</b> The alarm is raised when a Dying Gasp trap is received to indicate a power failure.		
<b>Remedial action:</b> This alarm is raised by the node just before going down, this might be due to the fact that the power supply connected to the node is down or failed. Please make sure the power supply to the specific node is proper.		

Table 39-236 DyingGasp (netw)

Alarm	Attributes	Applicable major releases
Name: DyingGasp (1164) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: dyingGasp (1423)	Unspecified
<b>Description:</b> The alarm is raised when a 7210 SAS node has loss of power.		
<b>Remedial action:</b> This alarm is raised by the node just before going down, this might be due to the fact that the power supply connected to the node is down or failed. Please make sure the power supply to the specific node is proper.		

Table 39-237 DyingGaspSignal

Alarm	Attributes	Applicable major releases
Name: DyingGaspSignal (623) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.PhysicalPort	Severity: major Implicitly cleared: false Default probable cause: dyingGaspSignal (463)	Unspecified
<b>Description:</b> The alarm is raised when a Dying Gasp signal is received from a remote 7210 SAS to indicate a power loss.		
<b>Clearing condition:</b> ('state' EQUAL 'Link Up')		
<b>Remedial action:</b> This alarm is raised by the node to indicate that one of the neighbouring node which is directly connected to the specific port of this node has signaled that it's going down. This might be due to the fact that the power supply connected to the remote node is down or failed, please make sure the power supply to that specific remote node through the specific port (as found in the additional text field) is proper.		

Table 39-238 DynSvcIdRangeConflict

Alarm	Attributes	Applicable major releases
Name: DynSvcIdRangeConflict (4420) Type: DynSvcIdRangeConflict (126) Package: dynsvc Raised on class: dynsvc.DynSvcNeConfig	Severity: warning Implicitly cleared: true Default probable cause: DynSvcIdRangeConflict (1584)	Unspecified
<b>Description:</b> The alarm is raised when the configured Dynamic Service ID Range has conflicts with one or more Range Policies.		
<b>Remedial action:</b> A possible conflict currently exists between the Dynamic Service ID Range specified for this NE and one or more Range Policy entries. To clear the alarm, one of the two must change. This alarm may be benign if the the conflicting Range Policy and Dynamic Service ID Range were intended.		

Table 39-239 DynSvcSapFailure

Alarm	Attributes	Applicable major releases
Name: DynSvcSapFailure (4421) Type: DynSvcSapFailure (127) Package: dynsvc Raised on class: dynsvc.DynSvcNeConfig	Severity: warning Implicitly cleared: false Default probable cause: DynSvcSapFailure (1585)	Unspecified
<b>Description:</b> The DynSvcSapFailure alarm is raised when a Dynamic Services service SAP creation, modification or removal failed. If the SAP does not exist at the time of this notification, the value 'invalid portid' is put in the alarms sapPortId.'		
<b>Remedial action:</b> Ensure that the RADIUS server and python script specified by the Dynamic Service Policy is functioning correctly.		

39 – Unspecified NE alarms

---

**Table 39-240 EarlyWarning (mwa)**

Alarm	Attributes	Applicable major releases
Name: EarlyWarning (681) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: EarlyWarning (1908)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects an early warning event.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

**Table 39-241 EarlyWarning (radioequipment)**

Alarm	Attributes	Applicable major releases
Name: EarlyWarning (681) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: earlyWarning (496)	Unspecified
<b>Description:</b> The alarm is raised when an MSS detects an early warning event.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

**Table 39-242 EcIdRxTxOrMacModified**

Alarm	Attributes	Applicable major releases
Name: EcIdRxTxOrMacModified (802) Type: configurationAlarm (11) Package: mpr Raised on class: mpr.MprVII	Severity: minor Implicitly cleared: false Default probable cause: ecIdRxTxOrMacModified (568)	Unspecified
<b>Description:</b> The alarm is raised when something other than the 5620 SAM deletes a service cross-connect and creates a new service cross-connect whose MAC address, EC ID Rx, or EC ID Tx value does not match the value in the original service.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-243 EMSysTimeOut

Alarm	Attributes	Applicable major releases
Name: EMSysTimeOut (8151) Type: communicationsAlarm (4) Package: hip Raised on class: hip.EMSystem	Severity: warning Implicitly cleared: false Default probable cause: excessiveResponseTime (1141)	Unspecified
<b>Description:</b> The alarm is raised when the time out is raised (the SAM to EMS request take too long time)		
<b>Remedial action:</b> NA#Remedial actions for modelRelease: LR_13_03, supported release: , version: 2.03		

Table 39-244 EncapsulationTypeIncompatible

Alarm	Attributes	Applicable major releases
Name: EncapsulationTypeIncompatible (250) Type: configurationAlarm (11) Package: vll Raised on class: vll.Vll	Severity: major Implicitly cleared: false Default probable cause: sapEncapsulationTypeIncompatible (189)	Unspecified
<b>Description:</b> The alarm is raised when the encapsulation types of two SAPs in the same lpipe are mismatched.		
<b>Raising condition:</b> ('encapsulationTypeIncompatible' EQUAL 'true')		
<b>Clearing condition:</b> ('encapsulationTypeIncompatible' EQUAL 'false')		
<b>Remedial action:</b> Ensure that the encapsulation type of any two SAPs in I-Pipe service are not mismatched.		

Table 39-245 EndpointActiveObjectChanged

Alarm	Attributes	Applicable major releases
Name: EndpointActiveObjectChanged (437) Type: redundancyAlarm (52) Package: service Raised on class: service.Endpoint	Severity: warning Implicitly cleared: false Default probable cause: ServiceEndpointSwitchover (1442) Applicable probable causes: <ul style="list-style-type: none"> <li>ServiceEndpointSwitchover</li> <li>ForceSwitchover</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an automatic or manual endpoint switchover occurs.		
<b>Remedial action:</b> Informational - no corrective action required.		

## 39 – Unspecified NE alarms

Table 39-246 EndpointMacLimitReached

Alarm	Attributes	Applicable major releases
Name: EndpointMacLimitReached (444) Type: resourceAlarm (28) Package: vpls Raised on class: vpls.Endpoint	Severity: warning Implicitly cleared: true Default probable cause: resourceLimitReached (131)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM receives the svcEndpointMacLimitAlarmRaised trap from an NE, which indicates that the number of MAC addresses stored in the FDB for the endpoint exceeds the high watermark for the site FIB. The number of MAC addresses includes the static MAC addresses on the endpoint and the learned MAC addresses in the spoke SDPs that are associated with the endpoint. The alarm clears when the 5620 SAM receives the svcEndpointMacLimitAlarmCleared trap from the NE.		
<b>Remedial action:</b> Increase the high water mark for the site FIB to allow more entries to be added.		

Table 39-247 EPSAbnormalState

Alarm	Attributes	Applicable major releases
Name: EPSAbnormalState (3932) Type: epsAbnormalConditionAlarm (113) Package: mpr Raised on class: mpr.MPRProtection	Severity: variable Implicitly cleared: true Default probable cause: EPSProblem (1515)	Unspecified
<b>Description:</b> The alarm is raised when abnormal state resulted due to force switch/lockout operation in EPS mode.		
<b>Remedial action:</b> This alarm is raised when forced-switch/lockout command in EPS mode which led to an abnormal condition.		

Table 39-248 EPSPathDrillDownFailed

Alarm	Attributes	Applicable major releases
Name: EPSPathDrillDownFailed (847) Type: EpcAlarm (59) Package: lte Raised on class: lte.EPSPath	Severity: major Implicitly cleared: true Default probable cause: EPSPathDrillDownFailed (604)	Unspecified
<b>Description:</b> The alarm is raised when the drilldown of an EPS path fails.		
<b>Raising condition:</b> ('State' EQUAL 'Failed')		
<b>Clearing condition:</b> ('State' NOT EQUAL 'Failed')		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The configured drill down hint does not match the underlying transport connectivity.		

Table 39-249 EPSPathReferencedObjectDeleted

Alarm	Attributes	Applicable major releases
Name: EPSPathReferencedObjectDeleted (848) Type: EpcAlarm (59) Package: lte Raised on class: lte.EPSPathComponent	Severity: major Implicitly cleared: true Default probable cause: EPSPathReferencedObjectDeleted (605)	Unspecified
<b>Description:</b> The alarm is raised when a referenced object is deleted.		
<b>Raising condition:</b> ('componentPointer' EQUAL '\')		
<b>Clearing condition:</b> ('componentPointer' NOT EQUAL '\')		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-250 EthernetPortCrcFailure

Alarm	Attributes	Applicable major releases
Name: EthernetPortCrcFailure (3629) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: ethernetPortCrcFailure (1414)	Unspecified
<b>Description:</b> The alarm is raised when an Ethernet port CRC alarm condition is detected (Signal Degradation Threshold or Signal Failure Threshold exceeded).		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-251 EthernetPortInternalAlarm

Alarm	Attributes	Applicable major releases
Name: EthernetPortInternalAlarm (3630) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.EthernetPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: ethernetPortInternalAlarm (1415)	Unspecified
<b>Description:</b> The alarm is raised when an Ethernet port experiences excessive internal MAC tx errors. It is generated only when downOnInternalError is enabled on the port.		
<b>Remedial action:</b> This alarm indicates that the port (card) in question is likely faulty. Please replace the card with a card known to be functional.		

## 39 – Unspecified NE alarms

Table 39-252 EthernetTunnelDown

Alarm	Attributes	Applicable major releases
Name: EthernetTunnelDown (771) Type: configurationAlarm (11) Package: ethernetTunnel Raised on class: ethernetTunnel.EthernetTunnel	Severity: major Implicitly cleared: true Default probable cause: ethernetTunnelDown (547)	Unspecified
<b>Description:</b> The alarm is raised when the aggregated Ethernet tunnel Operational State is Down.		
<b>Raising condition:</b> (('aggrEndPtOperationalState' EQUAL 'Down'))		
<b>Clearing condition:</b> (('aggrEndPtOperationalState' NOT EQUAL 'Down'))		
<b>Remedial action:</b> Fix the error indicated in the alarm, e.g. port down, MEP down...		

Table 39-253 ExcessiveEnvironmentTemperature (equipment)

Alarm	Attributes	Applicable major releases
Name: ExcessiveEnvironmentTemperature (1118) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: excessiveEnvironmentTemp (830)	Unspecified
<b>Description:</b> The alarm is raised when MPT is overheated.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-254 ExcessiveEnvironmentTemperature (mpr)

Alarm	Attributes	Applicable major releases
Name: ExcessiveEnvironmentTemperature (1118) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: excessiveEnvironmentTemp (830)	Unspecified
<b>Description:</b> The alarm is raised when MPT is overheated.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-255 ExportPolicyNotFound

Alarm	Attributes	Applicable major releases
Name: ExportPolicyNotFound (231) Type: configurationAlarm (11) Package: I3fwd Raised on class: I3fwd.ServiceSiteExportPolicy	Severity: major Implicitly cleared: true Default probable cause: exportPolicyDoesNotExist (179)	Unspecified
<b>Description:</b> The alarm is raised when a VRF export policy for a VPRN cannot be found. The alarm information includes the policy ID. Note: starting from SAM 12.0 R1, SAM no longer raise this alarm since it is not much useful but has performance issue.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The VRP export policy must be created and distributed to the NE reporting the problem. Note: starting from SAM 12.0 R1, SAM no longer raises this alarm.		

Table 39-256 FanCommunicationProblem

Alarm	Attributes	Applicable major releases
Name: FanCommunicationProblem (5424) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: fanCommunicationProblem (2127)	Unspecified
<b>Description:</b> The alarm is raised when a communication problem with fan is detected.		
<b>Remedial action:</b> The alarm is raised when FAN communication Problem is detected on the subrack. Refer 9500 Node Maintenance manual for remedial action information		

Table 39-257 FanRPMAAlarm

Alarm	Attributes	Applicable major releases
Name: FanRPMAAlarm (1126) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Fan	Severity: variable Implicitly cleared: false Default probable cause: fanFailure (116)	Unspecified
<b>Description:</b> The alarm is raised when a fan alarm usage state is other than Normal.		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

## 39 – Unspecified NE alarms

Table 39-258 FIBHighOccupancy

Alarm	Attributes	Applicable major releases
Name: FIBHighOccupancy (752) Type: resourceAlarm (28) Package: equipment Raised on class: equipment.BaseCard	Severity: warning Implicitly cleared: true Default probable cause: FIBHighOccupancy (528)	Unspecified
<b>Description:</b> The alarm is raised when the FIB occupancy on an IOM card changes from normal to high.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-259 FibOutOfSynch

Alarm	Attributes	Applicable major releases
Name: FibOutOfSynch (625) Type: resourceAlarm (28) Package: equipment Raised on class: equipment.DaughterCard	Severity: critical Implicitly cleared: true Default probable cause: fibUpdateFailed (464)	Unspecified
<b>Description:</b> The alarm is raised when the FIB on an MDA is out of synchronization.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-260 FileTransferFailure

Alarm	Attributes	Applicable major releases
Name: FileTransferFailure (8152) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: fileTransferFailure (89)	Unspecified
<b>Description:</b> The alarm is raised when SAM cannot transfer a file from a Network Element due to one or more of the following causes: unreachable NE, remote file not found, authentication failure, file transfer interrupted, or lack of available local storage space.		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: SAM server has connectivity issue with NE; insufficient disk space on the SAM server to accommodate the file transfer being attempted; loss of connectivity to the NE during transfer; the FTP daemon on the NE may have stopped; FTP security credential issues.		

Table 39-261 FilterApplyPathProblem

Alarm	Attributes	Applicable major releases
Name: FilterApplyPathProblem (4904) Type: configurationAlarm (11) Package: filterprefixlist Raised on class: filterprefixlist.PrefixListApplyPathMember	Severity: minor Implicitly cleared: false Default probable cause: tFilterApplyPathProblem (1960)	Unspecified
<b>Description:</b> The alarm is raised when a problem is encountered for a configured IP PrefixList apply-path rule.		
<b>Remedial action:</b> Clear the alarm and verify the prefix-list configurations which might have reached the maximum limit. Try reducing the prefix-list/ apply-path members.		

Table 39-262 FilterEmbeddingOperStateChange

Alarm	Attributes	Applicable major releases
Name: FilterEmbeddingOperStateChange (4973) Type: configurationAlarm (11) Package: aclfilter Raised on class: aclfilter.FilterEmbeddedRefTable	Severity: minor Implicitly cleared: false Default probable cause: tFilterEmbeddingOperStateChange (2030)	Unspecified
<b>Description:</b> The alarm is raised when the embedding oper state change is other than in-service.		
<b>Remedial action:</b> The alarm is raised when the embedded filter operstate is other than inService. Remove and reapply the embedding to make operstate as inService.		

Table 39-263 FirmwareDownloadOnGoing (equipment)

Alarm	Attributes	Applicable major releases
Name: FirmwareDownloadOnGoing (626) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: firmwareDownloadOnGoing (465)	Unspecified
<b>Description:</b> The alarm is raised when a firmware download is in progress.		
<b>Remedial action:</b> Informational - Firmware for the equipment is downloading.		

## 39 – Unspecified NE alarms

Table 39-264 FirmwareDownloadOnGoing (mpr)

Alarm	Attributes	Applicable major releases
Name: FirmwareDownloadOnGoing (626) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: firmwareDownloadOnGoing (465)	Unspecified
<b>Description:</b> The alarm is raised when a firmware download is in progress.		
<b>Remedial action:</b> Informational - Firmware for the equipment is downloading.		

Table 39-265 FirmwareMismatchAlarm

Alarm	Attributes	Applicable major releases
Name: FirmwareMismatchAlarm (146) Type: firmwareAlarm (26) Package: equipment Raised on class: equipment.Card	Severity: critical Implicitly cleared: true Default probable cause: bootRomVersionMismatch (119) Applicable probable causes: <ul style="list-style-type: none"> <li>bootRomVersionMismatch</li> <li>fpgaVersionMismatch</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when a device detects a mismatch between the firmware version and the device software image. The alarm information includes the expected firmware version.		
<b>Remedial action:</b> Either the firmware or the device SW must be upgraded to compatible versions. The image (firmware or device SW) which is the oldest should be upgraded. Firmware must be upgraded using the NE's CLI. 5620 SAM can be used to upgrade the SW image on the device.		

Table 39-266 FirmwareUpgradeAlarm

Alarm	Attributes	Applicable major releases
Name: FirmwareUpgradeAlarm (212) Type: firmwareAlarm (26) Package: equipment Raised on class: equipment.Card	Severity: info Implicitly cleared: false Default probable cause: firmwareUpgraded (169)	Unspecified
<b>Description:</b> The alarm is raised when a device automatically upgrades the firmware of a hot-inserted IOM or CPM.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-267 FlowRouteInvalid

Alarm	Attributes	Applicable major releases
Name: FlowRouteInvalid (2932) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Peer	Severity: minor Implicitly cleared: false Default probable cause: flowRouteInvalid (1126)	Unspecified
<b>Description:</b> The alarm is raised when the received BGP flow route is invalid. The BGP peer does not create ip filter entry for the received flow route.		
<b>Remedial action:</b> The NE has received an invalid flow route from a 3rd party appliance which is monitoring the network for suspect traffic. This could be the result of corruption or a SW error on the 3rd party appliance. Please refer to the documentation supplied with appliance for assistance.		

Table 39-268 FlowspecUnsupportdComAction

Alarm	Attributes	Applicable major releases
Name: FlowspecUnsupportdComAction (2933) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Site	Severity: minor Implicitly cleared: false Default probable cause: unsupportdComAction (1127)	Unspecified
<b>Description:</b> The alarm is raised when the best route for a FlowSpec NLRI is received from a remote BGP peer with an extended community action that is unsupported.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-269 ForceQTagForwardingMisconfiguration (epipe)

Alarm	Attributes	Applicable major releases
Name: ForceQTagForwardingMisconfiguration (813) Type: configurationAlarm (11) Package: epipe Raised on class: epipe.Epipe	Severity: warning Implicitly cleared: true Default probable cause: forceQTagForwardingInconsistent (576)	Unspecified
<b>Description:</b> The alarm is raised when two I-sites in a service use different Force Q Tag Forwarding values.		
<b>Raising condition:</b> ('operationalFlags'anyBit'Force Q Tag Forwarding Inconsistent')		
<b>Clearing condition:</b> NOT (('operationalFlags'anyBit'Force Q Tag Forwarding Inconsistent'))		
<b>Remedial action:</b> Check configuration so that I-sites in the service use same Force Q-Tag Forwarding values.		

## 39 – Unspecified NE alarms

Table 39-270 ForceQTagForwardingMisconfiguration (vpIs)

Alarm	Attributes	Applicable major releases
Name: ForceQTagForwardingMisconfiguration (813) Type: configurationAlarm (11) Package: vpIs Raised on class: vpIs.AbstractVpIs	Severity: warning Implicitly cleared: true Default probable cause: forceQTagForwardingInconsistent (576)	Unspecified
<b>Description:</b> The alarm is raised when two I-sites in a service use different Force Q Tag Forwarding values.		
<b>Raising condition:</b> ('operationalFlags'anyBit'Force Q Tag Forwarding Inconsistent')		
<b>Clearing condition:</b> NOT (('operationalFlags'anyBit'Force Q Tag Forwarding Inconsistent'))		
<b>Remedial action:</b> Check configuration so that I-sites in the service use same Force Q-Tag Forwarding values.		

Table 39-271 GenericInterfaceLinkDown

Alarm	Attributes	Applicable major releases
Name: GenericInterfaceLinkDown (403) Type: equipmentAlarm (3) Package: genericne Raised on class: genericne.GenericNeInterface	Severity: major Implicitly cleared: true Default probable cause: inoperableEquipment (8)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a communication link failure on a GNE interface. The alarm clears when the link returns to service.		
<b>Raising condition:</b> ('Operational State' EQUAL 'Down')		
<b>Clearing condition:</b> ('Operational State' EQUAL 'Up')		
<b>Remedial action:</b> The Operational State of the generic NE interface is down. The physical port (near end or far end) may have failed - this can be remedied by replacing the interface card in question. The physical links may have been turned down administratively - re-enable the links. A cable failure or disconnect may have occurred - please ensure that the cables are properly connected to the physical port and and that the cable has not been damaged.		

Table 39-272 GlobalAppProfileCreated

Alarm	Attributes	Applicable major releases
Name: GlobalAppProfileCreated (2931) Type: ConfigurationAlarm (15) Package: aapolicy Raised on class: aapolicy.ApplicationProfile	Severity: warning Implicitly cleared: true Default probable cause: globalAppProfileMissing (1125)	Unspecified
<b>Description:</b> The alarm is raised when a global application profile to which a global transit IP policy is referenced does not exist. The alarm notifies the user that a global application profile has been created.		
<b>Remedial action:</b> Informational. A global Application Profile has been created; this object is referenced by a Transit IP Policy or Transit Prefix Policy.		

Table 39-273 globalLicenseViolation

Alarm	Attributes	Applicable major releases
Name: globalLicenseViolation (2909) Type: configurationAlarm (11) Package: ranlicense Raised on class: ranlicense.RANLicenseManager	Severity: critical Implicitly cleared: true Default probable cause: atLeastOneLicenseInViolation (1115)	Unspecified
<b>Description:</b> The alarm is raised when at least one RAN license is in violation.		
<b>Remedial action:</b> Provide a new LKDI license file with a further expiration date and/or more tokens.		

Table 39-274 GneCommunicationAlarm

Alarm	Attributes	Applicable major releases
Name: GneCommunicationAlarm (783) Type: CommunicationAlarm (64) Package: netw Raised on class: netw.NetworkElement	Severity: variable Implicitly cleared: false Default probable cause: User_Defined (558)	Unspecified
<b>Description:</b> This user-definable alarm is raised against a generic NE when the 5620 SAM receives a trap from the generic NE that is mapped to the alarm in a generic NE alarm catalogue. The alarm mapping defines the Probable cause, Severity, and Implicitly cleared values, and optionally contains an extension that is appended to the Name value.		
<b>Remedial action:</b> This alarm is mapped from a GNE trap. Remedial action depends on the specific equipment and trap definition.		

Table 39-275 GneEnvironmentalAlarm

Alarm	Attributes	Applicable major releases
Name: GneEnvironmentalAlarm (784) Type: EnvironmentalAlarm (65) Package: netw Raised on class: netw.NetworkElement	Severity: variable Implicitly cleared: false Default probable cause: User_Defined (558)	Unspecified
<b>Description:</b> This user-definable alarm is raised against a generic NE when the 5620 SAM receives a trap from the generic NE that is mapped to the alarm in a generic NE alarm catalogue. The alarm mapping defines the Probable cause, Severity, and Implicitly cleared values, and optionally contains an extension that is appended to the Name value.		
<b>Remedial action:</b> This alarm is mapped from a GNE trap. Remedial action depends on the specific equipment and trap definition.		

## 39 – Unspecified NE alarms

Table 39-276 GneEquipmentAlarm

Alarm	Attributes	Applicable major releases
Name: GneEquipmentAlarm (785) Type: EquipmentAlarm (66) Package: netw Raised on class: netw.NetworkElement	Severity: variable Implicitly cleared: false Default probable cause: User_Defined (558)	Unspecified
<b>Description:</b> This user-definable alarm is raised against a generic NE when the 5620 SAM receives a trap from the generic NE that is mapped to the alarm in a generic NE alarm catalogue. The alarm mapping defines the Probable cause, Severity, and Implicitly cleared values, and optionally contains an extension that is appended to the Name value.		
<b>Remedial action:</b> This alarm is mapped from a GNE trap. Remedial action depends on the specific equipment and trap definition.		

Table 39-277 GneMTIEAlarm (genericne)

Alarm	Attributes	Applicable major releases
Name: GneMTIEAlarm (3633) Type: EquipmentAlarm (66) Package: genericne Raised on class: genericne.GenericNeInterface	Severity: variable Implicitly cleared: false Default probable cause: User_Defined (558)	Unspecified
<b>Description:</b> This user-definable alarm is raised against a generic NE when the 5620 SAM receives a trap from the generic NE that is mapped to the alarm in a generic NE alarm catalogue. The alarm mapping defines the Probable cause, Severity, and Implicitly cleared values, and optionally contains an extension that is appended to the Name value.		
<b>Remedial action:</b> This alarm is mapped from a GNE trap. Remedial action depends on the specific equipment and trap definition.		

Table 39-278 GneMTIEAlarm (netw)

Alarm	Attributes	Applicable major releases
Name: GneMTIEAlarm (3633) Type: EquipmentAlarm (66) Package: netw Raised on class: netw.NetworkElement	Severity: variable Implicitly cleared: false Default probable cause: User_Defined (558)	Unspecified
<b>Description:</b> This user-definable alarm is raised against a generic NE when the 5620 SAM receives a trap from the generic NE that is mapped to the alarm in a generic NE alarm catalogue. The alarm mapping defines the Probable cause, Severity, and Implicitly cleared values, and optionally contains an extension that is appended to the Name value.		
<b>Remedial action:</b> This alarm is mapped from a GNE trap. Remedial action depends on the specific equipment and trap definition.		

Table 39-279 GneProcessingErrorAlarm

Alarm	Attributes	Applicable major releases
Name: GneProcessingErrorAlarm (786) Type: ProcessingErrorAlarm (67) Package: netw Raised on class: netw.NetworkElement	Severity: variable Implicitly cleared: false Default probable cause: User_Defined (558)	Unspecified
<b>Description:</b> This user-definable alarm is raised against a generic NE when the 5620 SAM receives a trap from the generic NE that is mapped to the alarm in a generic NE alarm catalogue. The alarm mapping defines the Probable cause, Severity, and Implicitly cleared values, and optionally contains an extension that is appended to the Name value.		
<b>Remedial action:</b> This alarm is mapped from a GNE trap. Remedial action depends on the specific equipment and trap definition.		

Table 39-280 GneQualityOfServiceAlarm

Alarm	Attributes	Applicable major releases
Name: GneQualityOfServiceAlarm (787) Type: QualityOfServiceAlarm (68) Package: netw Raised on class: netw.NetworkElement	Severity: variable Implicitly cleared: false Default probable cause: User_Defined (558)	Unspecified
<b>Description:</b> This user-definable alarm is raised against a generic NE when the 5620 SAM receives a trap from the generic NE that is mapped to the alarm in a generic NE alarm catalogue. The alarm mapping defines the Probable cause, Severity, and Implicitly cleared values, and optionally contains an extension that is appended to the Name value.		
<b>Remedial action:</b> This alarm is mapped from a GNE trap. Remedial action depends on the specific equipment and trap definition.		

Table 39-281 GneServiceAlarm

Alarm	Attributes	Applicable major releases
Name: GneServiceAlarm (788) Type: ServiceAlarm (69) Package: netw Raised on class: netw.NetworkElement	Severity: variable Implicitly cleared: false Default probable cause: User_Defined (558)	Unspecified
<b>Description:</b> This user-definable alarm is raised against a generic NE when the 5620 SAM receives a trap from the generic NE that is mapped to the alarm in a generic NE alarm catalogue. The alarm mapping defines the Probable cause, Severity, and Implicitly cleared values, and optionally contains an extension that is appended to the Name value.		
<b>Remedial action:</b> This alarm is mapped from a GNE trap. Remedial action depends on the specific equipment and trap definition.		

## 39 – Unspecified NE alarms

Table 39-282 GneSystemAlarm

Alarm	Attributes	Applicable major releases
Name: GneSystemAlarm (789) Type: SystemAlarm (70) Package: netw Raised on class: netw.NetworkElement	Severity: variable Implicitly cleared: false Default probable cause: User_Defined (558)	Unspecified
<b>Description:</b> This user-definable alarm is raised against a generic NE when the 5620 SAM receives a trap from the generic NE that is mapped to the alarm in a generic NE alarm catalogue. The alarm mapping defines the Probable cause, Severity, and Implicitly cleared values, and optionally contains an extension that is appended to the Name value.		
<b>Remedial action:</b> This alarm is mapped from a GNE trap. Remedial action depends on the specific equipment and trap definition.		

Table 39-283 GneTransportAlarm

Alarm	Attributes	Applicable major releases
Name: GneTransportAlarm (790) Type: TransportAlarm (71) Package: netw Raised on class: netw.NetworkElement	Severity: variable Implicitly cleared: false Default probable cause: User_Defined (558)	Unspecified
<b>Description:</b> This user-definable alarm is raised against a generic NE when the 5620 SAM receives a trap from the generic NE that is mapped to the alarm in a generic NE alarm catalogue. The alarm mapping defines the Probable cause, Severity, and Implicitly cleared values, and optionally contains an extension that is appended to the Name value.		
<b>Remedial action:</b> This alarm is mapped from a GNE trap. Remedial action depends on the specific equipment and trap definition.		

Table 39-284 GponPortInBandAlarm

Alarm	Attributes	Applicable major releases
Name: GponPortInBandAlarm (3697) Type: gponInBandSignallingAlarm (106) Package: equipment Raised on class: equipment.GponPortSpecifics	Severity: major Implicitly cleared: true Default probable cause: InBandSignallingNotEstablishedBetweenSARandONT (1435)	Unspecified
<b>Description:</b> The alarm is raised when in-band signaling between the ONT and SAR for GPON statistics collection is not established after 30 seconds of GPON port uptime.		
<b>Remedial action:</b> Informational - Reachability between SAR and ONT devices has to be checked.		

Table 39-285 GponPortInBandAlarmClear

Alarm	Attributes	Applicable major releases
Name: GponPortInBandAlarmClear (3698) Type: gponInBandSignallingAlarm (106) Package: equipment Raised on class: equipment.GponPortSpecifics	Severity: cleared Implicitly cleared: true Default probable cause: InBandSignallingEstablishedBetweenSARandONT (1436)	Unspecified
<b>Description:</b> The alarm is raised when in-band signaling between the ONT and SAR for GPON statistics collection is established.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-286 GroupInSSMRange

Alarm	Attributes	Applicable major releases
Name: GroupInSSMRange (187) Type: configurationAlarm (11) Package: pim Raised on class: pim.Site	Severity: warning Implicitly cleared: false Default probable cause: STARGGroupInSSMRange (147)	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a PIM register, PIM (*,G) assert, PIM (*,G) join/prune, or an IGMP local membership message for a group defined in the SSM address range.		
<b>Remedial action:</b> Informational - no corrective action required		

Table 39-287 GwAcrFailuresAlarmMajor

Alarm	Attributes	Applicable major releases
Name: GwAcrFailuresAlarmMajor (2955) Type: communicationsAlarm (4) Package: lte Raised on class: lte.AgwrFfPeer	Severity: major Implicitly cleared: false Default probable cause: connectionDown (2)	Unspecified
<b>Description:</b> A tmnxMobGwAcrFailuresAlarmMajor is generated when 2 ACR transmission failures occur in a 10 second interval or 5 ACR transmission failures occur in a 60 second interval to the peer.		
<b>Remedial action:</b> Informational - a threshold for Anonymous Communication Rejection transmission failures has been exceeded. If the condition persists please contact Alcatel-Lucent support for assistance.		

## 39 – Unspecified NE alarms

Table 39-288 GwCdfDownAlarm

Alarm	Attributes	Applicable major releases
Name: GwCdfDownAlarm (2956) Type: communicationsAlarm (4) Package: Ite Raised on class: Ite.RfReferencePoint	Severity: minor Implicitly cleared: false Default probable cause: connectionDown (2)	Unspecified
<b>Description:</b> A tmnxMobGwCdfDownAlarm notification is generated when both the primary and the secondary Charging Data Functions (CDFs) are down for active Rf diameter sessions		
<b>Remedial action:</b> The Charging Data Functions (primary and secondary) are down for a Rf reference point. The CDF function appears down for one of the following reasons: the underlying IP or physical interface is down, the far end diameter peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end diameter peer is operational and check that the underlying transport network is up.		

Table 39-289 GwCfCapacityAlarmMajor

Alarm	Attributes	Applicable major releases
Name: GwCfCapacityAlarmMajor (2957) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.AGWReferencePoint	Severity: major Implicitly cleared: false Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> A tmnxMobGwCfCapacityAlarmMajor notification is generated when compact flash capacity reaches 95% limit.		
<b>Remedial action:</b> The compact flash device of the MGW is approaching capacity. The contents of the device must be analysed to identify redundant content which can be deleted.		

Table 39-290 GwCfCapacityAlarmMinor

Alarm	Attributes	Applicable major releases
Name: GwCfCapacityAlarmMinor (2958) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.AGWReferencePoint	Severity: minor Implicitly cleared: false Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> A tmnxMobGwCfCapacityAlarmMinor notification is generated when compact flash capacity reaches 85% limit		
<b>Remedial action:</b> The compact flash device of the MGW is approaching capacity. The contents of the device must be analysed to identify redundant content which can be deleted.		

Table 39-291 GwDdnThrottlingStart

Alarm	Attributes	Applicable major releases
Name: GwDdnThrottlingStart (4630) Type: communicationsAlarm (4) Package: lte Raised on class: lte.SigAGWGTPPMIPPeer	Severity: warning Implicitly cleared: false Default probable cause: downLinkThrottling (1897)	Unspecified
<b>Description:</b> A GwDdnThrottlingStart notification is generated when the serving gateway (SGW) starts throttling the Downlink Data Notification (DDN) for the low priority traffic towards a peer node (SGSN/MME).		
<b>Remedial action:</b> The serving gateway (SGW) starts throttling the Downlink Data Notification (DDN) for the low priority traffic towards a peer node (SGSN/MME). When the throttling duration is passed, the SGW will stop throttling the DDN.		

Table 39-292 GwDdnThrottlingStop

Alarm	Attributes	Applicable major releases
Name: GwDdnThrottlingStop (4631) Type: communicationsAlarm (4) Package: lte Raised on class: lte.SigAGWGTPPMIPPeer	Severity: warning Implicitly cleared: false Default probable cause: downLinkThrottling (1897)	Unspecified
<b>Description:</b> A GwDdnThrottlingStop notification is generated when the serving gateway (SGW) stops throttling the Downlink Data Notification (DDN) for the low priority traffic towards a peer node (SGSN/MME).		
<b>Remedial action:</b> The serving gateway (SGW) stops throttling the Downlink Data Notification (DDN) for the low priority traffic towards a peer node (SGSN/MME). When another throttling instruction is received from a peer node, the SGW will start throttling the DDN.		

Table 39-293 GwGtpPriSrvGrpStateChange

Alarm	Attributes	Applicable major releases
Name: GwGtpPriSrvGrpStateChange (3635) Type: EpcAlarm (59) Package: lte Raised on class: lte.EPCGateway	Severity: major Implicitly cleared: true Default probable cause: GwGtpPriSrvGrpDown (1419)	Unspecified
<b>Description:</b> An alarm is raised when there has been a change in GPRS Tunneling Protocol (GTP) Prime Server state for all mobile system groups.		
<b>Remedial action:</b> If a GTP Prime server group state is down, CDR packets will be written to CDR files until at least one server becomes available.		

## 39 – Unspecified NE alarms

Table 39-294 GwPoolCapacityAlarmMajor

Alarm	Attributes	Applicable major releases
Name: GwPoolCapacityAlarmMajor (5190) Type: EpcAlarm (59) Package: Ite Raised on class: Ite.IpPool	Severity: major Implicitly cleared: true Default probable cause: Threshold (2104)	Unspecified
<b>Description:</b> A tmnxMobGwPoolCapacityAlarmMajor notification is generated when either the IPv4 or IPv6 address pool usage reaches 95% of the pool size.		
<b>Remedial action:</b> The IPv4 or IPv6 address pool usage reached 95% of the pool size. Need to look at increasing the address pool size.		

Table 39-295 GwPoolCapacityAlarmMinor

Alarm	Attributes	Applicable major releases
Name: GwPoolCapacityAlarmMinor (5191) Type: EpcAlarm (59) Package: Ite Raised on class: Ite.IpPool	Severity: minor Implicitly cleared: true Default probable cause: Threshold (2104)	Unspecified
<b>Description:</b> A tmnxMobGwPoolCapacityAlarmMinor notification is generated when either the IPv4 or IPv6 address pool usage reaches 85% of the pool size.		
<b>Remedial action:</b> Informational: The IPv4 or IPv6 address pool usage reached 85% of the pool size. Need to closely monitor the usage.		

Table 39-296 GwRadGroupFail

Alarm	Attributes	Applicable major releases
Name: GwRadGroupFail (3636) Type: EpcAlarm (59) Package: Ite Raised on class: Ite.EPCGateway	Severity: major Implicitly cleared: false Default probable cause: EPSGroupDown (1420)	Unspecified
<b>Description:</b> A tmnxMobGwRadGrpFailAlarm notification is generated when all the radius servers have failed in the radius server group.		
<b>Remedial action:</b> The Radius server(s) which are configured in the Radius Server are unreachable. This problem may occur in a number of different scenarios. The server(s) may have become unresponsive - please refer to the Radius server documentation for assistance. The network connectivity to the server(s) may have been lost - please investigate why the underlying transport network is unreliable.		

Table 39-297 GwRadPeerFail

Alarm	Attributes	Applicable major releases
Name: GwRadPeerFail (3682) Type: EpcAlarm (59) Package: Iteradius Raised on class: Iteradius.PdnRadiusPeer	Severity: major Implicitly cleared: false Default probable cause: EPSPeerDown (602)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM receives a tmnxMobGwRadPeerFailAlarm notification in response to a RADIUS server failure.		
<b>Remedial action:</b> A Radius peer is operationally down for one of the following reasons: the underlying IP or physical interface is down, the far end peer is down or the underlying transport between this NE and the peer NE is down. To resolve the issue ensure that the IP/physical interface is up, check that the far end peer is operational and check that the underlying transport network is up.		

Table 39-298 HardwareBootFailure

Alarm	Attributes	Applicable major releases
Name: HardwareBootFailure (108) Type: softwareAlarm (19) Package: sw Raised on class: sw.CardSoftware	Severity: critical Implicitly cleared: true Default probable cause: softwareBootProblemDueToHardwareIssues (92)	Unspecified
<b>Description:</b> The alarm is raised when an NE fails to boot because of a hardware problem.		
<b>Remedial action:</b> Please contact Alcatel-Lucent support for assistance.		

Table 39-299 HardwareRedundancyAlarm

Alarm	Attributes	Applicable major releases
Name: HardwareRedundancyAlarm (147) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.ControlProcessor	Severity: major Implicitly cleared: true Default probable cause: primaryCpmFailure (121)	Unspecified
<b>Description:</b> The alarm is raised when the primary CPM fails.		
<b>Remedial action:</b> The CPM card in the chassis may have suffered a failure. Remove and reset the card in question. If this does not resolve the problem replace the card.		

## 39 – Unspecified NE alarms

Table 39-300 HashLabelMismatch (svt)

Alarm	Attributes	Applicable major releases
Name: HashLabelMismatch (1113) Type: configurationAlarm (11) Package: svt Raised on class: svt.SdpBinding	Severity: warning Implicitly cleared: true Default probable cause: hashLabelMismatch (826)	Unspecified
<b>Description:</b> The alarm is raised when an SDP binding hash label is enabled and the return SDP binding hash label is disabled. If this misconfiguration causes the mismatch of the operational hash label on both sides, the receiving site will drop the data packets as a result. This alarm is cleared when the hash label is either enabled or disabled on both sides.		
<b>Remedial action:</b> The hash label must be enabled or disabled on both ends of the SDP		

Table 39-301 HashLabelMismatch (vprn)

Alarm	Attributes	Applicable major releases
Name: HashLabelMismatch (1113) Type: configurationAlarm (11) Package: vprn Raised on class: vprn.Vprn	Severity: warning Implicitly cleared: true Default probable cause: hashLabelMismatch (826)	Unspecified
<b>Description:</b> The alarm is raised when the hash label is enabled on a VPRN site and disabled on another site in the service.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The hash label must be enabled or disabled on both ends of the SDP		

Table 39-302 HashLabelSignalCapabilityMismatch

Alarm	Attributes	Applicable major releases
Name: HashLabelSignalCapabilityMismatch (3327) Type: configurationAlarm (11) Package: svt Raised on class: svt.SdpBinding	Severity: warning Implicitly cleared: true Default probable cause: hashLabelSignalCapabilityMismatch (1163)	Unspecified
<b>Description:</b> The alarm is raised when an SDP binding hash label signal capability is enabled and the return SDP binding hash label signal capability is disabled or not supported. If this misconfiguration causes the mismatch of the operational hash label on both sides, the receiving site will drop the data packets as a result. This alarm is cleared when the hash label signal capability is either enabled or disabled on both sides.		
<b>Remedial action:</b> The hash label signal capability must be enabled or disabled on both ends of the SDP		

Table 39-303 hdmAlarmListenerFailure

Alarm	Attributes	Applicable major releases
Name: hdmAlarmListenerFailure (6305) Type: communicationsAlarm (4) Package: femto Raised on class: femto.HDMCluster	Severity: major Implicitly cleared: true Default probable cause: communicationsSubsystemFailure (915)	Unspecified
<b>Description:</b> This alarm indicates a communication issue with hdmAlarmListenerFailure Listener of HDM.		
<b>Remedial action:</b> TBD		

Table 39-304 hdmDashboardAlarmListenerFailure

Alarm	Attributes	Applicable major releases
Name: hdmDashboardAlarmListenerFailure (6306) Type: communicationsAlarm (4) Package: femto Raised on class: femto.HDMCluster	Severity: major Implicitly cleared: true Default probable cause: communicationsSubsystemFailure (915)	Unspecified
<b>Description:</b> This alarm indicates a communication issue with hdmDashboardAlarmListenerFailure Listener of HDM.		
<b>Remedial action:</b> TBD		

Table 39-305 hdmRegistrationListenerFailure

Alarm	Attributes	Applicable major releases
Name: hdmRegistrationListenerFailure (6308) Type: communicationsAlarm (4) Package: femto Raised on class: femto.HDMCluster	Severity: major Implicitly cleared: true Default probable cause: communicationsSubsystemFailure (915)	Unspecified
<b>Description:</b> This alarm indicates a communication issue with hdmRegistrationListenerFailure Listener of HDM.		
<b>Remedial action:</b> TBD		

Table 39-306 hdmReRegistrationListenerFailure

Alarm	Attributes	Applicable major releases
Name: hdmReRegistrationListenerFailure (6307) Type: communicationsAlarm (4) Package: femto Raised on class: femto.HDMCluster	Severity: major Implicitly cleared: true Default probable cause: communicationsSubsystemFailure (915)	Unspecified

(1 of 2)

**39 – Unspecified NE alarms**

---

Alarm	Attributes	Applicable major releases
<b>Description:</b> This alarm indicates a communication issue with hdmReRegistrationListenerFailure Listener of HDM.		
<b>Remedial action:</b> TBD		

(2 of 2)

**Table 39-307 hdmResynchroListenerFailure**

Alarm	Attributes	Applicable major releases
Name: hdmResynchroListenerFailure (6309) Type: communicationsAlarm (4) Package: femto Raised on class: femto.HDMCluster	Severity: major Implicitly cleared: true Default probable cause: communicationsSubsystemFailure (915)	Unspecified
<b>Description:</b> This alarm indicates a communication issue with hdmResynchroListenerFailure Listener of HDM.		
<b>Remedial action:</b> TBD		

**Table 39-308 hdmWebservicesFailure**

Alarm	Attributes	Applicable major releases
Name: hdmWebservicesFailure (6310) Type: communicationsAlarm (4) Package: femto Raised on class: femto.HDMCluster	Severity: major Implicitly cleared: true Default probable cause: communicationsSubsystemFailure (915)	Unspecified
<b>Description:</b> This alarm indicates a communication issue with hdmWebservicesFailure Listener of HDM.		
<b>Remedial action:</b> TBD		

**Table 39-309 HighBER (mwa)**

Alarm	Attributes	Applicable major releases
Name: HighBER (682) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: HighBER (1909)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a high BER.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-310 HighBER (radioequipment)

Alarm	Attributes	Applicable major releases
Name: HighBER (682) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: highBER (497)	Unspecified
<b>Description:</b> The alarm is raised when an MSS detects a high BER.		
<b>Remedial action:</b> The alarm is raised when an MSS detects a high BER.		

Table 39-311 HighLevelRoutesReached

Alarm	Attributes	Applicable major releases
Name: HighLevelRoutesReached (1197) Type: ProtocolAlarm (1) Package: I3fwd Raised on class: I3fwd.ServiceSite	Severity: minor Implicitly cleared: true Default probable cause: HighLevelRoutesReached (897)	Unspecified
<b>Description:</b> The alarm is raised when the number of routes in a VPRN exceeds the high threshold value. The high threshold value is a percentage of the maximum number of routes specified in the VPRN configuration. The percentage is derived by adding 100 to the threshold value in the VPRN configuration and dividing the result by 2. The alarm information includes the number of routes and this calculated high threshold value.		
<b>Remedial action:</b> Informational. The threshold configured should be revisited to ensure that it is not set to low given the number of routes that are being received. If the threshold is set close to the maximum number of routes supported by the NE then it is probable that there is an issue with another NE or VRF instance in the network. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-312 HistCorrDbSizeThresholdExceeded

Alarm	Attributes	Applicable major releases
Name: HistCorrDbSizeThresholdExceeded (5169) Type: configurationAlarm (11) Package: histcorr Raised on class: histcorr.HistCorrPartitionManager	Severity: variable Implicitly cleared: true Default probable cause: HistCorrEventDBSizesNotSufficient (2089)	Unspecified
<b>Description:</b> The alarm is raised when the actual DB size consumed by Correlation Events exceeds the threshold.		
<b>Remedial action:</b> Correlation Events DB storage reached threshold or exceeded, increase "Max DB Size" in Correlation Partition Manager GUI.		

## 39 – Unspecified NE alarms

Table 39-313 HoldTimeInconsistent

Alarm	Attributes	Applicable major releases
Name: HoldTimeInconsistent (810) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Peer	Severity: major Implicitly cleared: false Default probable cause: holdTimeInconsistent (575)	Unspecified
<b>Description:</b> The alarm is raised when a BGP site tries to establish a peering using a hold time that is less than the configured strict hold time. The peering is rejected as a result.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The hold time must be set to a value greater than the strict hold time.		

Table 39-314 HostConnectivityLostRateExceeded

Alarm	Attributes	Applicable major releases
Name: HostConnectivityLostRateExceeded (276) Type: communicationsAlarm (4) Package: ressubscr Raised on class: ressubscr.ShcvSite	Severity: major Implicitly cleared: false Default probable cause: hostDown (208) Applicable probable causes: <ul style="list-style-type: none"> <li>hostDown</li> <li>trapDropped</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when the trapDroppedRaisesAlarm parameter is enabled and the maximum allowed number of SHCV host connectivity loss events on a SAP is exceeded. The SHCV action in response to the alarm is specified by the maxHostLostConnectivityRate parameter. If the specified action is to remove the host information, the host information is removed and the connectivity of the host is not subsequently verified.		
<b>Remedial action:</b> This may be a transient error condition in the network or possible congestion or could be a sign that the SHCV ping interval is too short. Verify the status of the network for those subscribers and the service SHCV configuration.		

Table 39-315 HostSharedFilterHighWatermarkAlarm

Alarm	Attributes	Applicable major releases
Name: HostSharedFilterHighWatermarkAlarm (4974) Type: configurationAlarm (11) Package: acfilter Raised on class: acfilter.FilterDefinition	Severity: warning Implicitly cleared: true Default probable cause: HostSharedFilterHighWatermarkAlarm (2031)	Unspecified
<b>Description:</b> The alarm is raised when the number of dynamically allocated Host Shared Filters based on the indicated filter reaches or exceeds the configured high watermark. This alarm is cleared when the number of dynamically allocated Host Shared Filters drops to or below the configured low watermark of the indicated filter.		
<b>Remedial action:</b> Please check the watermark configurations on the indicated filter and make an adjustment accordingly.		

Table 39-316 HouseKeeping (equipment)

Alarm	Attributes	Applicable major releases
Name: HouseKeeping (1165) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: houseKeeping (867)	Unspecified
<b>Description:</b> The alarm is raised when a HouseKeeping trap is received.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-317 HouseKeeping (mpr)

Alarm	Attributes	Applicable major releases
Name: HouseKeeping (1165) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.AbstractMprAux	Severity: minor Implicitly cleared: true Default probable cause: HouseKeeping (1564)	Unspecified
<b>Description:</b> Defect detected by an house-keeping interface on AUX card.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-318 Idle2GUEsExceeded

Alarm	Attributes	Applicable major releases
Name: Idle2GUEsExceeded (5045) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: info Implicitly cleared: false Default probable cause: ThresholdExceeded (2052)	Unspecified
<b>Description:</b> The alarm is raised when the number of Idle 2G UEs exceeds the threshold that has been set by the operator.		
<b>Raising condition:</b> (('2G Idle UEs Threshold' NOT EQUAL '0L') AND ('2G Idle UEs' > '2G Idle UEs Threshold'))		
<b>Remedial action:</b> Informational - no corrective action required.		

## 39 – Unspecified NE alarms

Table 39-319 Idle3GUEsExceeded

Alarm	Attributes	Applicable major releases
Name: Idle3GUEsExceeded (5046) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: info Implicitly cleared: false Default probable cause: ThresholdExceeded (2052)	Unspecified
<b>Description:</b> The alarm is raised when the number of Idle 3G UEs exceeds the threshold that has been set by the operator.		
<b>Raising condition:</b> (('3G Idle UEs Threshold' NOT EQUAL '0L') AND ('3G Idle UEs' > '3G Idle UEs Threshold'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-320 Idle4GUEsExceeded

Alarm	Attributes	Applicable major releases
Name: Idle4GUEsExceeded (5047) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: info Implicitly cleared: false Default probable cause: ThresholdExceeded (2052)	Unspecified
<b>Description:</b> The alarm is raised when the number of 4G Idle UEs exceeds the threshold that has been set by the operator.		
<b>Raising condition:</b> (('4G Idle UEs Threshold' NOT EQUAL '0L') AND ('4G Idle UEs' > '4G Idle UEs Threshold'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-321 IgmpGrpIfSapMaxGroupsLimitExceeded

Alarm	Attributes	Applicable major releases
Name: IgmpGrpIfSapMaxGroupsLimitExceeded (3979) Type: configurationAlarm (11) Package: igmp Raised on class: igmp.GroupInterfaceSap	Severity: warning Implicitly cleared: false Default probable cause: IgmpGrpIfSapMaxGroupsLimitExceeded (1556)	Unspecified
<b>Description:</b> This alarm is raised when an IGMP host subscribes to a new multicast group that cannot be installed because the maximum number of active groups on the IGMP group interface SAP has already been reached.		
<b>Remedial action:</b> Increase the value of the 'maxGroups' attribute in the parent IGMP group interface so that the number of active IGMP groups stays under the configured threshold.		

**Table 39-322 IgmpGrpIfSapMaxGrpSrcLimExcd**

Alarm	Attributes	Applicable major releases
Name: IgmpGrpIfSapMaxGrpSrcLimExcd (4622) Type: configurationAlarm (11) Package: igmp Raised on class: igmp.GroupInterfaceSap	Severity: warning Implicitly cleared: false Default probable cause: IgmpGrpIfSapMaxGrpSrcLimExcd (1890)	Unspecified
<b>Description:</b> This alarm is raised when an attempt is made to configure a group source for a group when the number of group sources is equal to vRtrIgmpGrpIfSapMaxGrpSources, the maximum number of group sources per group supported on the SAP.		
<b>Remedial action:</b> Increase the value of the 'maxGrpSources' attribute in the parent IGMP group interface so that the number of active IGMP Group sources stays under the configured threshold.		

**Table 39-323 IgmpGrpIfSapMaxSourcesLimitExceeded**

Alarm	Attributes	Applicable major releases
Name: IgmpGrpIfSapMaxSourcesLimitExceeded (3980) Type: configurationAlarm (11) Package: igmp Raised on class: igmp.GroupInterfaceSap	Severity: warning Implicitly cleared: false Default probable cause: IgmpGrpIfSapMaxSourcesLimitExceeded (1557)	Unspecified
<b>Description:</b> This alarm is raised when an IGMP host subscribes to a multicast group with a source that cannot be installed because the maximum number of active sources on the IGMP group interface SAP has already been reached.		
<b>Remedial action:</b> Increase the value of the 'maxSources' attribute in the parent IGMP group interface so that the number of active IGMP sources stays under the configured threshold.		

**Table 39-324 IgmpHostMaxGrpSrcsLimitExcd**

Alarm	Attributes	Applicable major releases
Name: IgmpHostMaxGrpSrcsLimitExcd (4623) Type: configurationAlarm (11) Package: igmp Raised on class: igmp.GrpInterface	Severity: warning Implicitly cleared: false Default probable cause: IgmpHostMaxGrpSrcsLimitExcd (1891)	Unspecified
<b>Description:</b> This alarm is raised when an attempt is made to configure a source for a group when the number of group sources is equal to vRtrIgmpHostMaxGrpSources, the maximum number of group sources per group supported on the host.		
<b>Remedial action:</b> Increase the value of the 'maxGrpSources' attribute in the parent IGMP group interface so that the number of active IGMP Group sources stays under the configured threshold.		

## 39 – Unspecified NE alarms

Table 39-325 IgmpSnpgGrpDroppedLimitExceeded (svt)

Alarm	Attributes	Applicable major releases
Name: IgmpSnpgGrpDroppedLimitExceeded (392) Type: SdpBindingAlarm (30) Package: svt Raised on class: svt.SdpBindingIgmpSnpgCfg	Severity: warning Implicitly cleared: false Default probable cause: igmpSnpgGrpMaxNbrGrpsReached (292)	Unspecified
<b>Description:</b> The alarm is raised when an IGMP group is removed from an SDP binding because the number of allowed IGMP groups specified by sdpBndIgmpSnpgCfgMaxNbrGrps is reached.		
<b>Remedial action:</b> This can be remedied by increasing the maximum number of allowed IGMP groups on the SDP.		

Table 39-326 IgmpSnpgGrpDroppedLimitExceeded (vpls)

Alarm	Attributes	Applicable major releases
Name: IgmpSnpgGrpDroppedLimitExceeded (392) Type: AccessInterfaceAlarm (32) Package: vpls Raised on class: vpls.L2AccessInterfaceIgmpSnpgCfg	Severity: warning Implicitly cleared: false Default probable cause: igmpSnpgGrpMaxNbrGrpsReached (292)	Unspecified
<b>Description:</b> The alarm is raised when an IGMP group is removed from a SAP because the number of allowed IGMP groups specified by sapIgmpSnpgCfgMaxNbrGrps is reached.		
<b>Remedial action:</b> This can be remedied by increasing the maximum number of allowed IGMP groups on the SAP.		

Table 39-327 IgmpSnpgGrpSrcLimitExceed

Alarm	Attributes	Applicable major releases
Name: IgmpSnpgGrpSrcLimitExceed (4894) Type: SdpBindingAlarm (30) Package: svt Raised on class: svt.SdpBindingIgmpSnpgCfg	Severity: major Implicitly cleared: false Default probable cause: IgmpSnpgGrpSrcLimitExceed (1952)	Unspecified
<b>Description:</b> The alarm is raised when an IGMP group or source is dropped on a given SDP Bind because a user configurable upper limit given by sdpBndIgmpSnpgCfgMaxNbrGrpSrcs is reached		
<b>Remedial action:</b> This can be remedied by increasing the maximum number of allowed IGMP group sources on the SDP.		

Table 39-328 IgmpSnpgGrpSrcLimitExceeded

Alarm	Attributes	Applicable major releases
Name: IgmpSnpgGrpSrcLimitExceeded (4897) Type: AccessInterfaceAlarm (32) Package: vpls Raised on class: vpls.L2AccessInterfaceIgmpSnpgCfg	Severity: major Implicitly cleared: false Default probable cause: igmpSnpgGrpMaxNbrGrpSrcsReached (1954)	Unspecified
<b>Description:</b> The alarm is raised when an IGMP group or source is dropped on a given SAP because a user configurable upper limit given by sapIgmpSnpgCfgMaxNbrGrpSrcs is reached		
<b>Remedial action:</b> This can be remedied by increasing the maximum number of allowed IGMP Group sources on the SAP.		

Table 39-329 IgmpSnpgSrcDroppedLimitExceeded (svt)

Alarm	Attributes	Applicable major releases
Name: IgmpSnpgSrcDroppedLimitExceeded (735) Type: SdpBindingAlarm (30) Package: svt Raised on class: svt.SdpBindingIgmpSnpgCfg	Severity: warning Implicitly cleared: false Default probable cause: igmpSnpgGrpMaxNbrSrcsReached (512)	Unspecified
<b>Description:</b> The alarm is raised when an IGMP source is removed from an SDP binding because the number of allowed IGMP sources specified by sdpBndIgmpSnpgCfgMaxNbrSrcs is reached.		
<b>Remedial action:</b> This can be remedied by increasing the maximum number of allowed IGMP sources on the SDP.		

Table 39-330 IgmpSnpgSrcDroppedLimitExceeded (vpls)

Alarm	Attributes	Applicable major releases
Name: IgmpSnpgSrcDroppedLimitExceeded (735) Type: AccessInterfaceAlarm (32) Package: vpls Raised on class: vpls.L2AccessInterfaceIgmpSnpgCfg	Severity: warning Implicitly cleared: false Default probable cause: igmpSnpgGrpMaxNbrSrcsReached (512)	Unspecified
<b>Description:</b> The alarm is raised when an IGMP source is removed from a SAP because the number of allowed IGMP sources specified by sapIgmpSnpgCfgMaxNbrGrps is reached.		
<b>Remedial action:</b> This can be remedied by increasing the maximum number of allowed IGMP sources on the SAP.		

## 39 – Unspecified NE alarms

Table 39-331 IgpPrefixUnreachable

Alarm	Attributes	Applicable major releases
Name: IgpPrefixUnreachable (5428) Type: virtualSwitchAlarm (136) Package: dctr Raised on class: dctr.AbstractVirtualSwitchGlobal	Severity: critical Implicitly cleared: true Default probable cause: IgpPrefixDown (2129)	Unspecified
<b>Description:</b> The alarm is raised when the IGP Prefix is unreachable i.e. all the advertising routers are down.		
<b>Remedial action:</b> This alarm can be cleared when the IGP Prefix for the Virtual Switch is reachable.		

Table 39-332 IK4003104 - BB SLICE1 FAILURE DUE TO LOSS OF HS DATA LINK

Alarm	Attributes	Applicable major releases
Name: IK4003104 (7963) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: major Specific problem: BB SLICE1 FAILURE DUE TO LOSS OF HS DATA LINK (1871) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates a failure of the BB to CB link, which leads to BB slice 1 failure.		
<b>Impact:</b> LTE service is not possible on this BB's slice 1.		
<b>Remedial action:</b> Reset BB, reset CB, replace BB or CB if problem persists.		

Table 39-333 IK4003105 - BB SLICE2 FAILURE DUE TO LOSS OF HS DATA LINK

Alarm	Attributes	Applicable major releases
Name: IK4003105 (7964) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: major Specific problem: BB SLICE2 FAILURE DUE TO LOSS OF HS DATA LINK (1872) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates a failure of the BB to CB link, which leads to BB slice 2 failure.		
<b>Impact:</b> LTE service is not possible on this BB's slice 2.		
<b>Remedial action:</b> Reset BB, reset CB, replace BB or CB if problem persists.		

**Table 39-334 IK4003106 - BB SLICE3 FAILURE DUE TO LOSS OF HS DATA LINK**

Alarm	Attributes	Applicable major releases
Name: IK4003106 (7965) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: major Specific problem: BB SLICE3 FAILURE DUE TO LOSS OF HS DATA LINK (1873) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates a failure of the BB to CB link, which leads to BB Slice 3 failure		
<b>Impact:</b> LTE service is not possible on this BB's slice 3.		
<b>Remedial action:</b> Reset BB, reset CB, replace BB or CB if problem persists.		

**Table 39-335 IK4003107 - BB TEMPERATURE SENSOR FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4003107 (7966) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: major Specific problem: BB TEMPERATURE SENSOR FAILURE (1874) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates a temperature sensor failure.		
<b>Impact:</b> Temperature read from BB is not precise anymore and fan control cannot work normally. eNB may be in condition of over temperature		
<b>Remedial action:</b> Reset the BB in low traffic hours, if problem persists then replace the BB		

**Table 39-336 IK4004198 - GNSS FIRMWARE UPGRADE MISMATCH**

Alarm	Attributes	Applicable major releases
Name: IK4004198 (7967) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: critical Specific problem: GNSS FIRMWARE UPGRADE MISMATCH (1875) Implicitly cleared: true Default probable cause: versionMismatch (405)	Unspecified
<b>Description:</b> The GNSS firmware is incompatible with the GNSS receiver component.		
<b>Impact:</b> GNSS receiver cannot be programmed. Therefore satellite based synchronization cannot be supported.		
<b>Remedial action:</b> Check the GNSS type and ensure firmware to be downloaded is compatible with GNSS component vendor and part..		

## 39 – Unspecified NE alarms

Table 39-337 IK4004199 - GNSS FIRMWARE UPGRADE FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4004199 (7968) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: critical Specific problem: GNSS FIRMWARE UPGRADE FAILURE (1876) Implicitly cleared: true Default probable cause: versionMismatch (405)	Unspecified
<b>Description:</b> The GNSS firmware fails to be successfully loaded to the GNSS receiver component		
<b>Impact:</b> GNSS receiver cannot be programmed. Therefore satellite based synchronization cannot be supported.		
<b>Remedial action:</b> Check the GNSS type and ensure firmware to be downloaded is compatible with GNSS component..		

Table 39-338 IK4004200 - CB INIT GPS SELF SURVEY INPROGRESS

Alarm	Attributes	Applicable major releases
Name: IK4004200 (7969) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: variable Specific problem: CB INIT GPS SELF SURVEY INPROGRESS (198) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This event indicates that the eNB has started a high accuracy GPS survey for OTDOA, which normally takes 10 hours to complete.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 39-339 IK4004201 - CB INIT GPS SELF SURVEY FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4004201 (7970) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: warning Specific problem: CB INIT GPS SELF SURVEY FAILURE (1877) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates a high accuracy GPS survey has not been successfully completed after 24 hours.		
<b>Impact:</b> Quality of GPS timing source is too low to support OTDOA geolocation.		
<b>Remedial action:</b> Check GPS performance. Ensure good GPS receiver and GPS antenna is installed per Alcatel-Lucent guidelines and located to have a full sky visibility with no local interference or multipath, then power cycle the controller to restart survey. If GPS reception can't be improved then disable OTDOA (isGeoLocPhaseSyncAllowed="False"), which will clear the alarm."		

Table 39-340 IK4007209 - MME M3 SETUP FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4007209 (7971) Type: qualityOfServiceAlarm (82) Package: lte Raised on class: lte.Mce	Severity: major Specific problem: MME M3 SETUP FAILURE (1878) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This alarm indicates that all the attempts initiated by the MCE to set up the M3 AP with a peer MME have failed. The failure can be due to a MME reject (oam intervention or unknown cause) or it can be due to a timer expiration on the MCE side because the MME has not answered on time.		
<b>Impact:</b> The M3MmeAccess Operational state and Availability Status are set to {Disabled, Failed}. So the peer MME concerned by the M3 setup failure can't convey the signaling for eMBMS.		
<b>Remedial action:</b> Correct the issue on the MME; when the issue is solved, lock then unlock the M3MmeAccess.		

Table 39-341 IK4007210 - MME M3 RESET ALL FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4007210 (7972) Type: qualityOfServiceAlarm (82) Package: lte Raised on class: lte.Mce	Severity: major Specific problem: MME M3 RESET ALL FAILURE (1879) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This alarm indicates that all attempts to perform the MCE initiated M3 Reset/All have failed due to no response of the MME.		
<b>Impact:</b> The M3MmeAccess Operational state and Availability Status are set to {Disabled, Failed}. So the peer MME concerned by the M3 setup failure can't convey the signaling for eMBMS.		
<b>Remedial action:</b> Correct the issue on the MME; when the issue is solved, lock then unlock the M3MmeAccess.		

Table 39-342 IK4007212 - ABS DUTY CYCLE IMPACT ON DL PRB CONSUMPTION

Alarm	Attributes	Applicable major releases
Name: IK4007212 (7973) Type: qualityOfServiceAlarm (82) Package: lte Raised on class: lte.ENBEquipment	Severity: variable Specific problem: ABS DUTY CYCLE IMPACT ON DL PRB CONSUMPTION (1880) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This event indicates that an on-line change of the ABS duty cycle leads to increase the downlink percentage of the PRB consumption beyond a configurable threshold called elcicDlAlarmOnAbsDutyCycleThresholdOnPrb in the object called elcicAbsGenerationConf.		
<b>Impact:</b> Increase of the downlink percentage on the PRB consumption		
<b>Remedial action:</b> No action is required.		

## 39 – Unspecified NE alarms

Table 39-343 IK4007214 - END OF INTERRAT CDMA HRPD ANR ACTIVE PHASE

Alarm	Attributes	Applicable major releases
Name: IK4007214 (7974) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: variable Specific problem: END OF INTERRAT CDMA HRPD ANR ACTIVE PHASE (1881) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This event indicates the end of the inter-RAT CDMA HRPD ANR active phase.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 39-344 IK4007215 - END OF INTERRAT CDMA 1xRTT ANR ACTIVE PHASE

Alarm	Attributes	Applicable major releases
Name: IK4007215 (7975) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: variable Specific problem: END OF INTERRAT CDMA 1xRTT ANR ACTIVE PHASE (1882) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This event indicates the end of the inter-RAT CDMA 1xRTT ANR active phase.		
<b>Impact:</b> No impact on eNodeB.		
<b>Remedial action:</b> No action is required.		

Table 39-345 IK4007216 - CDMA HRPD NEIGHBOR RELATION MIB INSTANCE CANNOT BE REMOVED BY ANR

Alarm	Attributes	Applicable major releases
Name: IK4007216 (7976) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: major Specific problem: CDMA HRPD NEIGHBOR RELATION MIB INSTANCE CANNOT BE REMOVED BY ANR (1883) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates the HRPD neighbor relation MIB instance is not removed because the removal is not allowed.		
<b>Impact:</b> Mobility to this HRPD neighbor will be impacted.		
<b>Remedial action:</b> Remove the existing HRPD neighbor relation so that it can be created by ANR under the correct frequency.		

**Table 39-346 IK4007217 - CDMA 1xRTT NEIGHBOR RELATION MIB INSTANCE CANNOT BE REMOVED BY ANR**

Alarm	Attributes	Applicable major releases
Name: IK4007217 (7977) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: major Specific problem: CDMA 1xRTT NEIGHBOR RELATION MIB INSTANCE CANNOT BE REMOVED BY ANR (1884) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates the 1xRTT neighbor relation MIB instance is not removed because the removal is not allowed.		
<b>Impact:</b> Mobility to this 1xRTT neighbor will be impacted.		
<b>Remedial action:</b> Remove the existing 1xRTT neighbor relation so that it can be created by ANR under the correct frequency.		

**Table 39-347 IK4007218 - HRPD NEIGHBOR RELATION REPLACEMENT**

Alarm	Attributes	Applicable major releases
Name: IK4007218 (7978) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: variable Specific problem: HRPD NEIGHBOR RELATION REPLACEMENT (1885) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This event indicates that a HRPD Neighbor Relation has been replaced with another higher priority neighbor.		
<b>Impact:</b> Neighbor Relation replaced		
<b>Remedial action:</b> No action is required.		

**Table 39-348 IK4007219 - 1xRTT NEIGHBOR RELATION REPLACEMENT**

Alarm	Attributes	Applicable major releases
Name: IK4007219 (7979) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: variable Specific problem: 1xRTT NEIGHBOR RELATION REPLACEMENT (1886) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This event indicates that a 1xRTT Neighbor Relation has been replaced with another higher priority neighbor.		
<b>Impact:</b> Neighbor Relation replaced		
<b>Remedial action:</b> No action is required.		

## 39 – Unspecified NE alarms

Table 39-349 IK4007220 - PCI CONFUSION CDMA NEIGHB CELLS

Alarm	Attributes	Applicable major releases
Name: IK4007220 (7980) Type: operationalViolation (93) Package: lte Raised on class: lte.Cell	Severity: major Specific problem: PCI CONFUSION CDMA NEIGHB CELLS (1887) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates this cell is a victim of a CDMA PCI (pnOffset) confusion, it has neighbor cells in a particular CDMA neighboring frequency that have the same PCI. A manual intervention is needed to solve the problem. This issue may affect mobility procedures from LTE to CDMA.		
<b>Impact:</b> Mobility procedure triggered in the eNB towards CDMA may be directed to a wrong neighboring cell.		
<b>Remedial action:</b> The maintenance action is to change the PCI value of one of the neighbor CDMA cells to resolve the conflict.		

Table 39-350 IK4007221 - UTRAN NEIGHBOR RELATION MIB INSTANCE CANNOT BE REMOVED BY ANR

Alarm	Attributes	Applicable major releases
Name: IK4007221 (7981) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.UtraFddNeighboringCellRelation	Severity: major Specific problem: UTRAN NEIGHBOR RELATION MIB INSTANCE CANNOT BE REMOVED BY ANR (585) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates the UTRAN neighbor relation MIB instance is not removed because the removal is not allowed.		
<b>Impact:</b> Mobility to this Neighbor will be impacted.		
<b>Remedial action:</b> Remove the existing UTRAN neighbor relation so that it can be created by ANR under the correct frequency.		

Table 39-351 IK4007222 - PCI OUT OF PCI ALLOWED LIST DETECTED UNDER RESOLUTION

Alarm	Attributes	Applicable major releases
Name: IK4007222 (7982) Type: operationalViolation (93) Package: lte Raised on class: lte.Cell	Severity: warning Specific problem: PCI OUT OF PCI ALLOWED LIST DETECTED UNDER RESOLUTION (1888) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates a PCI out of the related pciAllowedList provided by the operator. The eNodeB attempts for a resolution.		
<b>Impact:</b> The impact is that the PCI used is not in the list provided by the operator, so may use a value reserved for other topic.		
<b>Remedial action:</b> This is due to an operator action. AutoPCI will solve the issue by changing the PCI. So check that pciAllowedList is the one that you really need.		

**Table 39-352 IK4009210 - HW SW CAPABILITY CHECK RADIOCACENB FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4009210 (4689) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: minor Specific problem: HW SW CAPABILITY CHECK RADIOCACENB FAILURE (1889) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> There is a mismatch between MIM configuration data RadioCacEnb and HW reported capabilities detected.		
<b>Impact:</b> The RadioCacEnb algorithm is limited to HW capabilities.		
<b>Remedial action:</b> The operator has to check the MIM configuration of RadioCacEnb object and the installed Controller Type. The MIM configuration must be aligned to the capability of the HW.		

**Table 39-353 IK4009211 - BB TO BB LOSS OF USER PLANE INTERBOARD CONNECTIVITY FOR LEGACY ENB**

Alarm	Attributes	Applicable major releases
Name: IK4009211 (7983) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: major Specific problem: BB TO BB LOSS OF USER PLANE INTERBOARD CONNECTIVITY FOR LEGACY ENB (1890) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This alarm indicates a loss of User Plane inter-board connectivity between this BB board and the peer BB board(s) indicated in the additional info.		
<b>Impact:</b> Telecom: No impact on non-CA calls, Carrier Aggregation calls are no longer possible between this board and the peer board indicated in the additional info.		
<b>Remedial action:</b> Reset the board where the alarm is raised, If it does not clear the alarm, perform an eNodeB reset; If it fails to recover, replace the board.		

**Table 39-354 IK4009212 - BB TO BB LOSS OF USER PLANE INTERBOARD CONNECTIVITY**

Alarm	Attributes	Applicable major releases
Name: IK4009212 (7984) Type: equipmentAlarm (3) Package: lte Raised on class: lte.BBCardSpecifics	Severity: major Specific problem: BB TO BB LOSS OF USER PLANE INTERBOARD CONNECTIVITY (1891) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This alarm indicates a loss of User Plane inter-board connectivity between this BB board and the peer BB board(s) indicated in the additional info.		
<b>Impact:</b> Telecom: No impact on non-CA calls, Carrier Aggregation calls are no longer possible between this board and the peer board indicated in the additional info.		

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Reset the board where the alarm is raised, If it does not clear the alarm, perform an eNodeB reset; If it fails to recover, replace the board.		

(2 of 2)

Table 39-355 IK4009213 - BB TO CB LOSS OF USER PLANE INTERBOARD CONNECTIVITY

Alarm	Attributes	Applicable major releases
Name: IK4009213 (7985) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.BBCardSpecifics	Severity: critical Specific problem: BB TO CB LOSS OF USER PLANE INTERBOARD CONNECTIVITY (1892) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This alarm indicates a loss of User Plane inter-board connectivity between this BB board and the CB board indicated in the additional info.		
<b>Impact:</b> Telecom: The user plane GTP traffic for calls is interrupted.		
<b>Remedial action:</b> Reset the board where the alarm is raised, If it does not clear the alarm, perform an eNodeB reset; If it fails to recover, replace the board.		

Table 39-356 IK4009214 - CB LOSS OF USER PLANE INTERBOARD CONNECTIVITY

Alarm	Attributes	Applicable major releases
Name: IK4009214 (7986) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.CBCardSpecifics	Severity: critical Specific problem: CB LOSS OF USER PLANE INTERBOARD CONNECTIVITY (1893) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This alarm indicates a loss of User Plane inter-board connectivity between this CB board and the peer BB board(s) indicated in the additional info.		
<b>Impact:</b> Telecom: The user plane GTP traffic for calls is interrupted.		
<b>Remedial action:</b> Reset the eNodeB, If it fails to recover, replace the board.		

Table 39-357 IK4009215 - RFM TEMPORARY UNAVAILABLE

Alarm	Attributes	Applicable major releases
Name: IK4009215 (7987) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.RFM	Severity: minor Specific problem: RFM TEMPORARY UNAVAILABLE (1894) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates that the RFM can't execute the request because it is temporary unavailable. The request will be repeated.		
<b>Impact:</b> Telecom: Possible loss of telecom resources. OAM: No impact on OAM service.		
<b>Remedial action:</b> No action is required		

Table 39-358 IK4009216 - RFM UNAVAILABLE

Alarm	Attributes	Applicable major releases
Name: IK4009216 (7988) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.RFM	Severity: critical Specific problem: RFM UNAVAILABLE (1895) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates the scenario failure due to no-response from the module.		
<b>Impact:</b> Telecom: The telecom resources processed by the module are lost as the module is out of service. OAM: No impact on OAM service.		
<b>Remedial action:</b> Reset the module. If the alarm persists replace the module.		

Table 39-359 IK4009217 - RFM PROCESSING ERROR

Alarm	Attributes	Applicable major releases
Name: IK4009217 (7989) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.RFM	Severity: major Specific problem: RFM PROCESSING ERROR (1896) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates the scenario failure due to RFM failure of processing.		
<b>Impact:</b> Telecom: The telecom resources processed by the module are lost as the module is out of service. OAM: No impact on OAM service.		
<b>Remedial action:</b> Reset the module. If the alarm persists replace the module.		

## 39 – Unspecified NE alarms

Table 39-360 IK4009218 - RFM NOT OPERATIONAL

Alarm	Attributes	Applicable major releases
Name: IK4009218 (7990) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.RFM	Severity: major Specific problem: RFM NOT OPERATIONAL (1897) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates that the RFM has been detected as not operational. In most situations a second alarm related to this object should be already raised and an equipment reset already triggered.		
<b>Impact:</b> Telecom: The telecom resources processed by the module are lost as the module is out of service. OAM: No impact on OAM service.		
<b>Remedial action:</b> If the eNodeB recovery action does not fix the alarm then reset the module. If the alarm persists replace the module.		

Table 39-361 IK4012078 - SCB INIT GPS SELF SURVEY FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4012078 (7991) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: warning Specific problem: SCB INIT GPS SELF SURVEY FAILURE (1898) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates that high accuracy GPS self survey for OTDOA sync has not been successfully completed after 24 hours.		
<b>Impact:</b> Synchronization accuracy too low to support OTDOA.		
<b>Remedial action:</b> Check GPS performance. Ensure good GPS receiver and GPS antenna is installed per Alcatel-Lucent guidelines and located to have a full sky visibility with no local interference or multipath, then power cycle the controller to restart survey. If GPS reception can't be improved then disable OTDOA sync (isGeoLocPhaseSyncAllowed="False"), which will clear the alarm."		

Table 39-362 IK4012079 - SCB INIT GPS SELF SURVEY INPROGRESS

Alarm	Attributes	Applicable major releases
Name: IK4012079 (7992) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: variable Specific problem: SCB INIT GPS SELF SURVEY INPROGRESS (880) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This event indicates that the eNB has started a high accuracy GPS survey for OTDOA, which normally takes 10 hours to complete.		
<b>Impact:</b> No impact on eNodeB.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> No action is required.		

(2 of 2)

Table 39-363 IK4022001 - ERRONEOUS BACKHAUL ETHERNET PORT NAME

Alarm	Attributes	Applicable major releases
Name: IK4022001 (7993) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.EthernetPort	Severity: warning Specific problem: ERRONEOUS BACKHAUL ETHERNET PORT NAME (1899) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> The backhaul port name defined in the configuration, received from the EMS by the eNB doesn't match with the identity of the ethernet backhaul port used by the eNB to connect to the EMS.		
<b>Impact:</b> The eNB shall not apply the transport configuration if this configuration involves more than one ethernet port and as long as the cabling doesn't match the configuration. Else the risk will be to not be able to reach anymore the eNB from the EMS		
<b>Remedial action:</b> EthernetPort.ethernetPortName[0] value shall be modified in the EMS configuration.		

Table 39-364 IK4022002 - BAD ETHERNET PORT POLICING CONFIGURATION

Alarm	Attributes	Applicable major releases
Name: IK4022002 (7994) Type: qualityOfServiceAlarm (82) Package: Ite Raised on class: Ite.EthernetPort	Severity: major Specific problem: BAD ETHERNET PORT POLICING CONFIGURATION (1900) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates that the policing ingress CIR exceeds the Ethernet port speed, when policing is requested on the Ethernet port.		
<b>Impact:</b> The policing function has no effect.		
<b>Remedial action:</b> Review the Ethernet port policing configuration and change if necessary.		

## 39 – Unspecified NE alarms

Table 39-365 IK4022003 - ETHERNET PORT NOT OPERATIONAL

Alarm	Attributes	Applicable major releases
Name: IK4022003 (7995) Type: equipmentAlarm (3) Package: lte Raised on class: lte.EthernetPort	Severity: minor Specific problem: ETHERNET PORT NOT OPERATIONAL (1901) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates that a feature involving the use of this Ethernet Port has been activated and the Ethernet Port is not operational.		
<b>Impact:</b> The feature that needs the use of the Ethernet Port cannot be activated.		
<b>Remedial action:</b> The cabling shall be checked as well as the EMS configuration in order cabling and EMS configuration match.		

Table 39-366 IK4022004 - ETHERNET PORT OPERATIONAL

Alarm	Attributes	Applicable major releases
Name: IK4022004 (7996) Type: equipmentAlarm (3) Package: lte Raised on class: lte.EthernetPort	Severity: variable Specific problem: ETHERNET PORT OPERATIONAL (1902) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This event indicates that a feature involving the use of this Ethernet Port has been activated and the Ethernet Port is operational.		
<b>Impact:</b> Traffic can flow through the Ethernet backhaul port.		
<b>Remedial action:</b> No action is required.		

Table 39-367 IK4022005 - ETHERNET PORT FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4022005 (7997) Type: equipmentAlarm (3) Package: lte Raised on class: lte.EthernetPort	Severity: critical Specific problem: ETHERNET PORT FAILURE (777) Implicitly cleared: true Default probable cause: inputOutputDeviceError (703)	Unspecified
<b>Description:</b> This alarm indicates that the eNB failed to send/receive traffic through an Ethernet port.		
<b>Impact:</b> No more traffic can go through the Ethernet port		
<b>Remedial action:</b> The eNB Ethernet port equipment shall be checked and the eNB controller board or the SFP will be replaced if necessary.		

Table 39-368 IK4022006 - BAD ETHERNET PORT SHAPING CONFIGURATION

Alarm	Attributes	Applicable major releases
Name: IK4022006 (7998) Type: qualityOfServiceAlarm (82) Package: Ite Raised on class: Ite.EthernetPort	Severity: major Specific problem: BAD ETHERNET PORT SHAPING CONFIGURATION (1903) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates that either the sum of the egress CIR per VLAN exceeds the Ethernet port speed when shaping per VLAN is requested on this Ethernet port, either the egress CIR exceeds the Ethernet port speed when shaping per port is requested on this Ethernet port.		
<b>Impact:</b> The shaping function has no effect.		
<b>Remedial action:</b> Review the Ethernet port shaping configuration and change if necessary.		

Table 39-369 IK4305187 - TERTIARY CPRI PORT CONFIGURATION MISMATCH

Alarm	Attributes	Applicable major releases
Name: IK4305187 (7999) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.RRH	Severity: minor Specific problem: TERTIARY CPRI PORT CONFIGURATION MISMATCH (1904) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates the misalignment between the tertiary CPRI port position in MIM configuration and the detected tertiary CPRI port position, or the tertiary CPRI port is configured but the RRH cant support 3 ports at all.		
<b>Impact:</b> Telecom: the assigned cell is not operational. OAM: No impact on OAM service.		
<b>Remedial action:</b> Verify and correct the configuration data or Verify and correct the hardware configuration, or verify if RRH support 3 CPRI ports.		

Table 39-370 IK4305188 - CELL OR SECTOR CONFIGURATION MISMATCH VERSUS HARDWARE

Alarm	Attributes	Applicable major releases
Name: IK4305188 (8000) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: critical Specific problem: CELL OR SECTOR CONFIGURATION MISMATCH VERSUS HARDWARE (1905) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates inconsistency in the cell or corresponding sector configuration versus the RRH hardware capacity		
<b>Impact:</b> Telecom: the cell is not operational. OAM: No impact on OAM service.		
<b>Remedial action:</b> Verify and correct the configuration data or Verify and correct the hardware configuration		

## 39 – Unspecified NE alarms

Table 39-371 IK4305189 - LTE NEIGHBOR RELATION MIB INSTANCE CANNOT BE REMOVED BY ANR

Alarm	Attributes	Applicable major releases
Name: IK4305189 (8001) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.Cell	Severity: major Specific problem: LTE NEIGHBOR RELATION MIB INSTANCE CANNOT BE REMOVED BY ANR (603) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates the LTE neighbor relation MIB instance is not removed because the removal is not allowed.		
<b>Impact:</b> Mobility to this Neighbor will be impacted.		
<b>Remedial action:</b> Remove the existing LTE neighbor relation so that it can be created by ANR under the correct frequency.		

Table 39-372 IK4305190 - LICENSE REQUIRED TO SUPPORT THE CONFIGURED LTECELL

Alarm	Attributes	Applicable major releases
Name: IK4305190 (8002) Type: equipmentAlarm (3) Package: lte Raised on class: lte.Cell	Severity: critical Specific problem: LICENSE REQUIRED TO SUPPORT THE CONFIGURED LTECELL (1906) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates that the cell cannot be enabled due to licensing restriction		
<b>Impact:</b> Telecom: The cell is not operational. OAM: No impact on OAM service.		
<b>Remedial action:</b> The operator shall purchase the corresponding license.		

Table 39-373 IK4305191 - 4TX CELL CONFIGURATION FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4305191 (8003) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.Cell	Severity: critical Specific problem: 4TX CELL CONFIGURATION FAILURE (1907) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates a cell is configured with 4 DL antennas, whereas the feature allowing 4 Tx antennas is disabled (is4TxAntennasEnabled="false").		
<b>Impact:</b> Telecom: The telecom service on the cell is disabled. OAM: No impact on OAM service.		
<b>Remedial action:</b> Verify the DL antennas setting for this cell in MIM and verify the is4TxAntennasEnabled flag in MIM.		

**Table 39-374 IK4305192 - CONFIGURATION DATA REJECTED**

Alarm	Attributes	Applicable major releases
Name: IK4305192 (8004) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.RFM	Severity: major Specific problem: CONFIGURATION DATA REJECTED (1908) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates inconsistency in the RFM configuration data.		
<b>Impact:</b> Telecom: Possible loss of telecom resources. OAM: No impact on OAM service.		
<b>Remedial action:</b> Verify and correct the configuration data. Identify from additional info the impacted parameter.		

**Table 39-375 IK4306108 - FEATURE TRI-CARRIER NOT SUPPORTED**

Alarm	Attributes	Applicable major releases
Name: IK4306108 (8005) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.Cell	Severity: critical Specific problem: FEATURE TRI-CARRIER NOT SUPPORTED (1909) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates that the cell configuration with Tri-carrier is not supported by the equipped modem type.		
<b>Impact:</b> Telecom traffic is not enabled for the cell.		
<b>Remedial action:</b> Verify and correct the configuration data.		

**Table 39-376 IK4306109 - CB TWAMP EXCESS CONTROL SESSION REQUEST**

Alarm	Attributes	Applicable major releases
Name: IK4306109 (8006) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.CBCardSpecifics	Severity: warning Specific problem: CB TWAMP EXCESS CONTROL SESSION REQUEST (1910) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates 5 TWAMP Control sessions have been requested in a VLAN. 4 is the maximum supported number.		
<b>Impact:</b> TWAMP Control sessions above the number supported are ignored.		
<b>Remedial action:</b> Check TWAMP client configuration to ensure it matches maximum requirements of the base station server.		

## 39 – Unspecified NE alarms

Table 39-377 IK4306110 - CB TWAMP TEST SESSION FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4306110 (8007) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: warning Specific problem: CB TWAMP TEST SESSION FAILURE (1911) Implicitly cleared: true Default probable cause: informationMissing (792)	Unspecified
<b>Description:</b> A TWAMP session in the VLAN has failed based on lack of incoming Test packets for a period of time configured by SERVWAIT/REFWAIT timers.		
<b>Impact:</b> TWAMP session with loss of packets is terminated.		
<b>Remedial action:</b> Check TWAMP client and the backhaul link between TWAMP client and base station for any backhaul connectivity failure.		

Table 39-378 IK4306111 - CB TWAMP MODE MISMATCH

Alarm	Attributes	Applicable major releases
Name: IK4306111 (8008) Type: equipmentAlarm (3) Package: lte Raised on class: lte.CBCardSpecifics	Severity: warning Specific problem: CB TWAMP MODE MISMATCH (1912) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> The server has a TWAMP Control session Request with an unacceptable Mode value. Only 'Unauthenticated' is acceptable.		
<b>Impact:</b> TWAMP Control sessions will be supported only when mode is Unauthenticated.		
<b>Remedial action:</b> Check TWAMP client configuration to ensure it matches the acceptable 'mode' value for Unauthentication.		

Table 39-379 IK4306112 - SCB TWAMP EXCESS TEST SESSION REQUEST

Alarm	Attributes	Applicable major releases
Name: IK4306112 (8009) Type: equipmentAlarm (3) Package: lte Raised on class: lte.MODULE	Severity: warning Specific problem: SCB TWAMP EXCESS TEST SESSION REQUEST (1913) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates 6 TWAMP test-sessions have been requested in a TWAMP Control-session in a VLAN. 5 is the maximum supported number.		
<b>Impact:</b> TWAMP test sessions above the number supported are ignored.		
<b>Remedial action:</b> Check TWAMP client configuration to ensure it matches maximum requirements of the base station server.		

**Table 39-380 IK4306113 - SCB TWAMP EXCESS CONTROL SESSION REQUEST**

Alarm	Attributes	Applicable major releases
Name: IK4306113 (8010) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: warning Specific problem: SCB TWAMP EXCESS CONTROL SESSION REQUEST (1914) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates 5 TWAMP Control sessions have been requested in a VLAN. 4 is the maximum supported number.		
<b>Impact:</b> TWAMP Control sessions above the number supported are ignored.		
<b>Remedial action:</b> Check TWAMP client configuration to ensure it matches maximum requirements of the base station server.		

**Table 39-381 IK4306114 - SCB TWAMP TEST SESSION FAILURE**

Alarm	Attributes	Applicable major releases
Name: IK4306114 (8011) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: warning Specific problem: SCB TWAMP TEST SESSION FAILURE (1915) Implicitly cleared: true Default probable cause: informationMissing (792)	Unspecified
<b>Description:</b> A TWAMP session in the VLAN has failed based on lack of incoming Test packets for a period of time configured by SERVWAIT/REFWAIT timers.		
<b>Impact:</b> TWAMP session with loss of packets is terminated.		
<b>Remedial action:</b> Check TWAMP client and the backhaul link between TWAMP client and base station for any backhaul connectivity failure.		

**Table 39-382 IK4306115 - SCB TWAMP MODE MISMATCH**

Alarm	Attributes	Applicable major releases
Name: IK4306115 (8012) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.MODULE	Severity: warning Specific problem: SCB TWAMP MODE MISMATCH (1916) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> The server has a TWAMP Control session Request with an unacceptable Mode value. Only 'Unauthenticated' is acceptable.		
<b>Impact:</b> TWAMP Control sessions will be supported only when mode is Unauthenticated.		
<b>Remedial action:</b> Check TWAMP client configuration to ensure it matches the acceptable 'mode' value for Unauthentication.		

## 39 – Unspecified NE alarms

Table 39-383 IK4306116 - SIM HEALTH CHECK PHASE 1 - TX PWR FAILED

Alarm	Attributes	Applicable major releases
Name: IK4306116 (8013) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.Cell	Severity: major Specific problem: SIM HEALTH CHECK PHASE 1 - TX PWR FAILED (1917) Implicitly cleared: true Default probable cause: softwareProgramError (720)	Unspecified
<b>Description:</b> This alarm indicates that the System Integrity Monitor, monitoring the health of the eNodeB cell, has detected an active antenna transmit path (Cell, RFM id, antenna port #) with zero power continually for the Phase 1 detection period.		
<b>Impact:</b> Telecom: The alarm is notice that the cell is degraded. OAM: no impact..		
<b>Remedial action:</b> No action is required. If the degradation persists, SIM may escalate to Local Recovery Action on the implicated cell.		

Table 39-384 IK4306117 - SIM HEALTH CHECK PHASE 1 - LOW RRC SUCCESS RATE

Alarm	Attributes	Applicable major releases
Name: IK4306117 (8014) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.Cell	Severity: major Specific problem: SIM HEALTH CHECK PHASE 1 - LOW RRC SUCCESS RATE (1918) Implicitly cleared: true Default probable cause: softwareProgramError (720)	Unspecified
<b>Description:</b> This alarm indicates that the System Integrity Monitor, monitoring the health of the eNodeB, has detected a degradation in the RRC Success Rate on the cell. This is the SIM Phase 1 detection.		
<b>Impact:</b> Telecom: The alarm is notice that the RRC Success Rate is degraded. OAM: no impact.		
<b>Remedial action:</b> No action is required. If the degradation persists, SIM may escalate to Local Recovery Action.		

Table 39-385 IK4306118 - SIM HEALTH CHECK PHASE 2 - LOW RRC SUCCESS RATE

Alarm	Attributes	Applicable major releases
Name: IK4306118 (8015) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.Cell	Severity: critical Specific problem: SIM HEALTH CHECK PHASE 2 - LOW RRC SUCCESS RATE (1919) Implicitly cleared: true Default probable cause: softwareProgramError (720)	Unspecified
<b>Description:</b> This alarm indicates that the System Integrity Monitor, monitoring the health of the eNodeB, has detected that the RRC Success Rate degradation has persisted beyond the configurable limit. This is the SIM Phase 2 detection.		
<b>Impact:</b> Telecom: The alarm is notice that the RRC Success Rate is degraded. OAM: no impact.		
<b>Remedial action:</b> No action is required. If SIM escalation to Local Recovery Action is allowed, SIM will automatically trigger Local Recovery Action to try to restore service on this cell.		

Table 39-386 IK4306119 - SIM HEALTH CHECK - MAXIMUM NUMBER OF LRA REACHED

Alarm	Attributes	Applicable major releases
Name: IK4306119 (8016) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: variable Specific problem: SIM HEALTH CHECK - MAXIMUM NUMBER OF LRA REACHED (1920) Implicitly cleared: true Default probable cause: softwareProgramError (720)	Unspecified
<b>Description:</b> The OAM System Integrity Monitor has run a SIM Health Check on the cell and has detected a degradation that has escalated to the point of Phase 2 recovery. But, since SIM has already taken the configurable maximum number of SIM triggered Phase 2 recovery actions on this cell in a 24 hour period, SIM is prevented from taking recovery on this detection. Investigation is required to determine the cause for the frequent degradations.		
<b>Impact:</b> Telecom: The cell is degraded according to the health check that is failing. OAM: no impact.		
<b>Remedial action:</b> No action is required.		

Table 39-387 IK4306120 - UNEXPECTED RFME MODULE RESET

Alarm	Attributes	Applicable major releases
Name: IK4306120 (8017) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.RFME	Severity: variable Specific problem: UNEXPECTED RFME MODULE RESET (1921) Implicitly cleared: true Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> This event indicates that the ENB suffered from an unexpected, unplanned failure on the RFME. Specific details are in the Additional Text.		
<b>Impact:</b> Depending on the nature of the failure, some Telecom or OAM functionalities may not be available during recovery. On successful reset, the Telecom and OAM functionalities are available.		
<b>Remedial action:</b> No action is required.		

Table 39-388 IK4306121 - SIM HEALTH CHECK PHASE 2 - TX PWR FAILED

Alarm	Attributes	Applicable major releases
Name: IK4306121 (8018) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.Cell	Severity: critical Specific problem: SIM HEALTH CHECK PHASE 2 - TX PWR FAILED (1922) Implicitly cleared: true Default probable cause: softwareProgramError (720)	Unspecified
<b>Description:</b> This alarm indicates that the System Integrity Monitor, monitoring the health of the eNodeB, has detected an active antenna transmit path (Cell, RFM id, antenna port #) with zero power continually for the Phase 2 detection period.		
<b>Impact:</b> Telecom: The alarm is notice that the cell is degraded. OAM: no impact.		
<b>Remedial action:</b> No action is required. If SIM escalation to Local Recovery Action is allowed, SIM will automatically trigger Local Recovery Action to try to restore service on this cell.		

## 39 – Unspecified NE alarms

Table 39-389 IK4306122 - SMART COLLECTION SERVICE ACTION PLAN COMPLETE

Alarm	Attributes	Applicable major releases
Name: IK4306122 (8019) Type: processingErrorAlarm (81) Package: Ite Raised on class: Ite.ENBEquipment	Severity: variable Specific problem: SMART COLLECTION SERVICE ACTION PLAN COMPLETE (1923) Implicitly cleared: true Default probable cause: unspecifiedReason (802)	Unspecified
<b>Description:</b> This event indicates that the Smart Collection Service initiated a smart data collection and has either 1) created a Local File, 2) streamed DDT to the DTC, and/or 3) used On Demand File Collection to push the ODFC archive to the Snapshots and Postmortem Collector entity (SPC). This was triggered by a fault event or state change. Specific details about the triggering event and the files that were collected are in the Additional Text.		
<b>Impact:</b> Telecom: no impact. OAM: no impact.		
<b>Remedial action:</b> No action is required.		

Table 39-390 IK4306123 - HANDOVER OPTIMIZATION ADJUSTMENT STARTED

Alarm	Attributes	Applicable major releases
Name: IK4306123 (8020) Type: qualityOfServiceAlarm (82) Package: Ite Raised on class: Ite.Cell	Severity: warning Specific problem: HANDOVER OPTIMIZATION ADJUSTMENT STARTED (1924) Implicitly cleared: true Default probable cause: unspecifiedReason (802)	Unspecified
<b>Description:</b> This alarm indicates the SON process that adjusts intra-frequency handover parameters has started adjusting handover parameters.		
<b>Impact:</b> MRO adjustment has begun and tuning of handover parameters is in progress for handover optimization.		
<b>Remedial action:</b> None.		

Table 39-391 IK4306124 - CB TWAMP EXCESS TEST SESSION REQUEST

Alarm	Attributes	Applicable major releases
Name: IK4306124 (8021) Type: equipmentAlarm (3) Package: Ite Raised on class: Ite.CBCardSpecifics	Severity: warning Specific problem: CB TWAMP EXCESS TEST SESSION REQUEST (1925) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm indicates 6 TWAMP test-sessions have been requested in a TWAMP Control-session in a VLAN. 5 is the maximum supported number.		
<b>Impact:</b> TWAMP test sessions above the number supported are ignored.		
<b>Remedial action:</b> Check TWAMP client configuration to ensure it matches maximum requirements of the base station server.		

Table 39-392 IK4306126 - RFM CONFIGURATION FAILURE

Alarm	Attributes	Applicable major releases
Name: IK4306126 (8022) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.RFM	Severity: major Specific problem: RFM CONFIGURATION FAILURE (1926) Implicitly cleared: true Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This alarm indicates the failure to configure the RFM.		
<b>Impact:</b> Telecom: The telecom resources processed by the module are lost as the module is out of service. OAM: No impact on OAM service.		
<b>Remedial action:</b> Reset the module. If the alarm persists, replace the module.		

Table 39-393 IK4901006 - UNSUPPORTED DELEGATION BY OTHER CONTROLLER

Alarm	Attributes	Applicable major releases
Name: IK4901006 (2766) Type: equipmentAlarm (3) Package: lte Raised on class: lte.RFM	Severity: warning Specific problem: UNSUPPORTED DELEGATION BY OTHER CONTROLLER (1347) Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> The primary controller for this RE (CDMA, WCDMA or GSM) has delegated a management function such as 'Software Management' to the LTE controller. This function is not supported by this LTE release.		
<b>Impact:</b> The delegated management function (e.g. software management) is not currently available.		
<b>Remedial action:</b> Reconfigure the RE on the primary controller (CDMA, WCDMA or GSM) to no longer delegate the unsupported management function to LTE.		

Table 39-394 ImportPolicyNotFound

Alarm	Attributes	Applicable major releases
Name: ImportPolicyNotFound (232) Type: configurationAlarm (11) Package: l3fwd Raised on class: l3fwd.ServiceSiteImportPolicy	Severity: major Implicitly cleared: true Default probable cause: importPolicyDoesNotExist (180)	Unspecified
<b>Description:</b> The alarm is raised when a VRF import policy for a VPRN cannot be found. The alarm information includes the policy ID. Note: starting from SAM 12.0 R1, SAM no longer raise this alarm since it is not much useful but has performance issue.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The VRP import policy must be created and distributed to the NE reporting the problem. Note: starting from SAM 12.0 R1, SAM no longer raises this alarm.		

## 39 – Unspecified NE alarms

Table 39-395 IncompatibleCapacity

Alarm	Attributes	Applicable major releases
Name: IncompatibleCapacity (1166) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: incompatibleCapacity (868)	Unspecified
<b>Description:</b> The alarm is raised when there is a radio capacity incompatibility.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-396 IncompatibleChannelSpacing (equipment)

Alarm	Attributes	Applicable major releases
Name: IncompatibleChannelSpacing (1167) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: incompatibleChannelSpacing (869)	Unspecified
<b>Description:</b> The alarm is raised when there is a channel spacing incompatibility.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-397 IncompatibleChannelSpacing (radioequipment)

Alarm	Attributes	Applicable major releases
Name: IncompatibleChannelSpacing (1167) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: incompatibleChannelSpacing (869)	Unspecified
<b>Description:</b> The alarm is raised when a incompatibility of channel spacing value defect raise.		
<b>Remedial action:</b> The alarm is raised when a incompatibility of channel spacing value defect raise.		

Table 39-398 IncompatibleFrequency (mwa)

Alarm	Attributes	Applicable major releases
Name: IncompatibleFrequency (683) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: IncompatibleFrequency (1910)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a provisioned MPT frequency is incompatible with the MPT hardware.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

(2 of 2)

Table 39-399 IncompatibleFrequency (radioequipment)

Alarm	Attributes	Applicable major releases
Name: IncompatibleFrequency (683) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: incompatibleFrequency (498)	Unspecified
<b>Description:</b> The alarm is raised when a provisioned MSS frequency is incompatible with the MSS hardware.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-400 IncompatibleModulation

Alarm	Attributes	Applicable major releases
Name: IncompatibleModulation (4417) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: incompatibleModulation (850)	Unspecified
<b>Description:</b> The alarm is raised when an incompatibility of the modulation value defect raise.		
<b>Remedial action:</b> The alarm is raised when an incompatibility of the modulation value defect raise.		

Table 39-401 IncompatibleModulationParam (mwa)

Alarm	Attributes	Applicable major releases
Name: IncompatibleModulationParam (1144) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: IncompatibleModulationParam (1911)	Unspecified
<b>Description:</b> The alarm is raised when the provisioned modulation parameters are incompatible with the MPT hardware.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

## 39 – Unspecified NE alarms

Table 39-402 IncompatibleModulationParam (radioequipment)

Alarm	Attributes	Applicable major releases
Name: IncompatibleModulationParam (1144) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: incompatibleModulation (850)	Unspecified
<b>Description:</b> The alarm is raised when the configured modulation parameters are not supported by MPT (or) when XPIC is configured on an MPT that does not allow XPIC capability.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-403 IncompatiblePower

Alarm	Attributes	Applicable major releases
Name: IncompatiblePower (3940) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: incompatiblePower (1522)	Unspecified
<b>Description:</b> The alarm is raised when a incompatibility of the power value defect raise.		
<b>Remedial action:</b> The alarm is raised when a incompatibility of the power value defect raise.		

Table 39-404 IncompatibleProtection (equipment)

Alarm	Attributes	Applicable major releases
Name: IncompatibleProtection (4824) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: incompatibleProtection (2076)	Unspecified
<b>Description:</b> The alarm is raised in case of hardware incompatibility for 1+1 radio configuration i.e. MPT-HCv2 without RPS or XPIC equipped.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-405 IncompatibleProtection (mwa)

Alarm	Attributes	Applicable major releases
Name: IncompatibleProtection (4824) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: IncompatibleProtection (1912)	Unspecified
<b>Description:</b> The alarm is raised when a incompatible protection scheme is selected.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-406 IncompatiblePTX

Alarm	Attributes	Applicable major releases
Name: IncompatiblePTX (684) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: incompatiblePTX (499)	Unspecified
<b>Description:</b> The alarm is raised when the provisioned MSS transmit power is incompatible with the MSS hardware.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-407 IncompatibleShifter (mwa)

Alarm	Attributes	Applicable major releases
Name: IncompatibleShifter (685) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: Incompatibleshifter (1913)	Unspecified
<b>Description:</b> The alarm is raised when the provisioned MPT shifter parameters are incompatible with the MPT hardware.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-408 IncompatibleShifter (radioequipment)

Alarm	Attributes	Applicable major releases
Name: IncompatibleShifter (685) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: incompatibleShifter (500)	Unspecified

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the provisioned MSS shifter parameters are incompatible with the MSS hardware.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

(2 of 2)

Table 39-409 IncompatibleTxPower

Alarm	Attributes	Applicable major releases
Name: IncompatibleTxPower (4825) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: IncompatibleTxPower (1914)	Unspecified
<b>Description:</b> The alarm is raised when the provisioned MPT transmit power is incompatible with the MPT hardware.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-410 IncompleteConfig (bundle)

Alarm	Attributes	Applicable major releases
Name: IncompleteConfig (294) Type: configurationAlarm (11) Package: bundle Raised on class: bundle.MultiChassisApsInterface	Severity: major Implicitly cleared: true Default probable cause: incompleteConfig (225)	Unspecified
<b>Description:</b> The alarm is raised when there are not exactly two APS bundles in an APS group.		
<b>Raising condition:</b> (('Number of members' NOT EQUAL '2'))		
<b>Clearing condition:</b> (('Number of members' EQUAL '2'))		
<b>Remedial action:</b> Configure the missing peered object.		

Table 39-411 IncompleteConfig (lag)

Alarm	Attributes	Applicable major releases
Name: IncompleteConfig (294) Type: configurationAlarm (11) Package: lag Raised on class: lag.MultiChassisLag	Severity: major Implicitly cleared: true Default probable cause: incompleteConfig (225)	Unspecified
<b>Description:</b> The alarm is raised when an MC LAG has fewer than two members.		
<b>Raising condition:</b> ('numberOfMembers' NOT EQUAL '2')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('numberOfMembers' EQUAL '2')		
<b>Remedial action:</b> Configure the missing peered object.		

(2 of 2)

Table 39-412 IncompleteConfig (rmon)

Alarm	Attributes	Applicable major releases
Name: IncompleteConfig (294) Type: configurationAlarm (11) Package: rmon Raised on classes: <ul style="list-style-type: none"> <li>rmon.Event</li> <li>rmon.Alarm</li> </ul>	Severity: major Implicitly cleared: true Default probable cause: incompleteConfig (225)	Unspecified
<b>Description:</b> The alarm is raised when an object is created with default values but not yet made active.		
<b>Raising condition:</b> ('Status' EQUAL 'Under Creation')		
<b>Clearing condition:</b> ('Status' NOT EQUAL 'Under Creation')		
<b>Remedial action:</b> The object is created with default values but not yet made active. Please activate.		

Table 39-413 InconsistenciesOnNode

Alarm	Attributes	Applicable major releases
Name: InconsistenciesOnNode (1077) Type: integrityViolation (85) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: inconsistenciesOnNode (813)	Unspecified
<b>Description:</b> The alarm is raised when a device detects one or more configuration inconsistencies. On a 9500 MPR, this can be caused by cross-connect creation failure during service creation.		
<b>Remedial action:</b> Please click on the clear inconsistencies button from the NE properties GUI form to clear the inconsistencies.		

Table 39-414 InstanceIdMismatch

Alarm	Attributes	Applicable major releases
Name: InstanceIdMismatch (416) Type: configurationAlarm (11) Package: srrp Raised on class: srrp.Instance	Severity: major Implicitly cleared: false Default probable cause: instanceIdMismatch (309)	Unspecified

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a local SRRP SAP is backed up by a different SRRP instance on a remote peer.		
<b>Remedial action:</b> Reconfigure the instance so that the peer SRRP instances have the same ID.		

(2 of 2)

Table 39-415 InSufficientBandwidth

Alarm	Attributes	Applicable major releases
Name: InSufficientBandwidth (745) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.VlanPathInstance	Severity: major Implicitly cleared: true Default probable cause: inSufficientBandwidth (521)	Unspecified
<b>Description:</b> The alarm is raised when there is insufficient bandwidth on a radio link between hops in a service.		
<b>Remedial action:</b> Information - Service cannot be deployed because insufficient bandwidth on the port. Use a different port or ensure the required bandwidth.		

Table 39-416 InterfaceDbDescriptAuthFailure

Alarm	Attributes	Applicable major releases
Name: InterfaceDbDescriptAuthFailure (46) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>authTypeMismatch</li> <li>authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a dbDescript packet on a non-virtual interface from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a dbDescript packet has been received on a non-virtual interface from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

Table 39-417 InterfaceDbDescriptConfig

Alarm	Attributes	Applicable major releases
Name: InterfaceDbDescriptConfig (40) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifTypeMismatch</li> <li>• nullRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a dbDescript packet on a non-virtual interface from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a dbDescript packet has been received on a non-virtual interface from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-418 InterfaceHelloAuthFailure

Alarm	Attributes	Applicable major releases
Name: InterfaceHelloAuthFailure (45) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a hello packet on a non-virtual interface from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a hello packet has been received on a non-virtual interface from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

## 39 – Unspecified NE alarms

Table 39-419 InterfaceHelloConfig

Alarm	Attributes	Applicable major releases
Name: InterfaceHelloConfig (39) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifTypeMismatch</li> <li>• nullRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a hello packet on a non-virtual interface from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a hello packet has been received on a non-virtual interface from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-420 InterfaceLsAckAuthFailure

Alarm	Attributes	Applicable major releases
Name: InterfaceLsAckAuthFailure (49) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an lsAck packet on a non-virtual interface from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a lsAck packet has been received on a non-virtual interface from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

Table 39-421 InterfaceLsAckConfig

Alarm	Attributes	Applicable major releases
Name: InterfaceLsAckConfig (43) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifTypeMismatch</li> <li>• nullRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsAck packet on a non-virtual interface from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsAck packet has been received on a non-virtual interface from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-422 InterfaceLsReqAuthFailure

Alarm	Attributes	Applicable major releases
Name: InterfaceLsReqAuthFailure (47) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsReq packet on a non-virtual interface from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsReq packet has been received on a non-virtual interface from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

## 39 – Unspecified NE alarms

Table 39-423 InterfaceLsReqConfig

Alarm	Attributes	Applicable major releases
Name: InterfaceLsReqConfig (41) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifTypeMismatch</li> <li>• nullRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsReq packet on a non-virtual interface from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsReq packet has been received on a non-virtual interface from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-424 InterfaceLsUpdateAuthFailure

Alarm	Attributes	Applicable major releases
Name: InterfaceLsUpdateAuthFailure (48) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsUpdate packet on a non-virtual interface from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsUpdate packet has been received on a non-virtual interface from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

Table 39-425 InterfaceLsUpdateConfig

Alarm	Attributes	Applicable major releases
Name: InterfaceLsUpdateConfig (42) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifTypeMismatch</li> <li>• nullRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an LsUpdate packet on a non-virtual interface from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a LsUpdate packet has been received on a non-virtual interface from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-426 InterfaceNullPacketAuthFailure

Alarm	Attributes	Applicable major releases
Name: InterfaceNullPacketAuthFailure (50) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a null packet on a non-virtual interface from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a null packet has been received on a non-virtual interface from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

## 39 – Unspecified NE alarms

Table 39-427 InterfaceNullPacketConfig

Alarm	Attributes	Applicable major releases
Name: InterfaceNullPacketConfig (44) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifTypeMismatch</li> <li>• nullRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a null packet on a non-virtual interface from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a null packet has been received on a non-virtual interface from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-428 InterfaceRxBadPacket

Alarm	Attributes	Applicable major releases
Name: InterfaceRxBadPacket (51) Type: communicationsAlarm (4) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: hello (47) Applicable probable causes: <ul style="list-style-type: none"> <li>• hello</li> <li>• dbDescript</li> <li>• lsReq</li> <li>• lsUpdate</li> <li>• lsAck</li> <li>• nullPacket</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE cannot parse an OSPF packet that it receives on a non-virtual interface.		
<b>Remedial action:</b> Informational - an NE cannot parse an OSPF packet that it receives on a non-virtual interface.		

**Table 39-429 InternalCommunicationProblem (equipment)**

Alarm	Attributes	Applicable major releases
Name: InternalCommunicationProblem (627) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: internalCommunicationProblem (466)	Unspecified
<b>Description:</b> The alarm is raised when an ODU is unresponsive.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

**Table 39-430 InternalCommunicationProblem (mpr)**

Alarm	Attributes	Applicable major releases
Name: InternalCommunicationProblem (627) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: internalCommunicationProblem (466)	Unspecified
<b>Description:</b> The alarm is raised when an MPTHLv2 is unresponsive.		
<b>Remedial action:</b> The alarm is raised when there is a loss of communication with MPT. Please refer 9500 Node Maintenance manual for remedial action information.		

**Table 39-431 InterRedundantMPTCommunicationFailure**

Alarm	Attributes	Applicable major releases
Name: InterRedundantMPTCommunicationFailure (4826) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: InternalCommunicationProblem (1915)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a Inter Redundant MPTs Communication Failure		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

## 39 – Unspecified NE alarms

Table 39-432 InterXPolarizedMPTCommunicationFailure

Alarm	Attributes	Applicable major releases
Name: InterXPolarizedMPTCommunicationFailure (4827) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: InternalCommunicationProblem (1915)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a Inter X-Polarized MPTs Communication Failure		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-433 InvalidBOFAddress

Alarm	Attributes	Applicable major releases
Name: InvalidBOFAddress (1141) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NodeDiscoveryControl	Severity: warning Implicitly cleared: false Default probable cause: invalidBOF (847)	Unspecified
<b>Description:</b> The alarm is raised during a network topology rescan in which the 5620 SAM does not find a previously configured NE BOF address, and the Management IP Selection of the NE is set to one of the following: - Out Of Band Preferred - In Band Preferred		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The BOF address must be configured on the NE.		

Table 39-434 InvalidJoinPrune

Alarm	Attributes	Applicable major releases
Name: InvalidJoinPrune (185) Type: communicationsAlarm (4) Package: pim Raised on class: pim.Site	Severity: warning Implicitly cleared: false Default probable cause: InvalidJoinPruneReceived (145)	Unspecified
<b>Description:</b> The alarm is raised when the RP address in a Join Prune message is not the RP for the group specified in the message.		
<b>Remedial action:</b> Informational - please make sure the RP address in a Join Prune message is the RP for the group specified		

Table 39-435 InvalidRegister

Alarm	Attributes	Applicable major releases
Name: InvalidRegister (186) Type: communicationsAlarm (4) Package: pim Raised on class: pim.Site	Severity: warning Implicitly cleared: false Default probable cause: InvalidJoinRegisterReceived (146)	Unspecified
<b>Description:</b> The alarm is raised when the RP address in a Register message is not the RP for the group specified in the message.		
<b>Remedial action:</b> Informational - please make sure the RP address in a Register message is the RP for the group specified		

Table 39-436 invalidRPLoopbackInterfaceConfig

Alarm	Attributes	Applicable major releases
Name: invalidRPLoopbackInterfaceConfig (269) Type: configurationAlarm (11) Package: pim Raised on class: pim.VirtualAnyCastRP	Severity: warning Implicitly cleared: true Default probable cause: invalidRPLoopbackIfConfig (201)	Unspecified
<b>Description:</b> The alarm is raised when an RP loopback interface configuration is invalid.		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Please check the global Virtual Anycast RP configuration and its operational status flag so that the loopback is properly configured, PIM is enabled on the loopback interface.		

Table 39-437 IpAddressManaged

Alarm	Attributes	Applicable major releases
Name: IpAddressManaged (4388) Type: IpAddressManaged (124) Package: ptp Raised on class: ptp.SourceEntryPoint	Severity: info Implicitly cleared: false Default probable cause: IpAddressManaged (1571)	Unspecified
<b>Description:</b> The alarm is raised when unmanaged IP address becomes managed virtual router IP address.		
<b>Remedial action:</b> The source entry point unmanaged IP address becomes managed virtual router IP address. Please re-configure source entry point.		

## 39 – Unspecified NE alarms

Table 39-438 IpAddressOverlap

Alarm	Attributes	Applicable major releases
Name: IpAddressOverlap (3318) Type: configurationAlarm (11) Package: rtr Raised on class: rtr.VirtualRouterIpAddress	Severity: warning Implicitly cleared: true Default probable cause: IpAddressOverlap (1157)	Unspecified
<b>Description:</b> The alarm is raised when the IP addresses configured on different VPRN sites within service overlap.		
<b>Remedial action:</b> Please check the IP Addresses configured on different VPRN sites have no overlap.		

Table 39-439 IPListMismatch

Alarm	Attributes	Applicable major releases
Name: IPListMismatch (282) Type: configurationAlarm (11) Package: vrrp Raised on class: vrrp.AbstractInstance	Severity: warning Implicitly cleared: true Default probable cause: nonMatchingBackupAddressList (214)	Unspecified
<b>Description:</b> The alarm is raised when the IP address list in an advertisement message from the current master does not match the configured IP address list.		
<b>Remedial action:</b> Check the configured IP addresses, make sure they match the advertised IP addresses from the master VRRP instance.		

Table 39-440 IpPathDown

Alarm	Attributes	Applicable major releases
Name: IpPathDown (1916) Type: topologyAlarm (34) Package: monpath Raised on class: monpath.MonitoredIpPath	Severity: major Implicitly cleared: true Default probable cause: ipPathDown (918)	Unspecified
<b>Description:</b> This alarm is raised when the re-calculation by the CPAA shows that no IP Path is available.		
<b>Remedial action:</b> Informational - The IP path record provides an Error code which provides a clue on why the path is down.		

**Table 39-441 IpPathMonitorFailedRetryThresholdCrossed**

Alarm	Attributes	Applicable major releases
Name: IpPathMonitorFailedRetryThresholdCrossed (400) Type: topologyAlarm (34) Package: monpath Raised on class: monpath.MonitoredIpPath	Severity: major Implicitly cleared: true Default probable cause: ipPathCouldNotBeDetermined (299)	Unspecified
<b>Description:</b> The alarm is raised when the 5650 CPAM cannot set up an IP path monitor after the number of attempts specified by the cpamManagedRoute problematicThresholdAlarmAfter value in the nms-server.xml file. The alarm is raised if the cpamManagedRoute problematicRetryStrategy value in nms-server.xml is set to countdown. The default problematicRetryStrategy value of reactive prevents the alarm from being raised.		
<b>Remedial action:</b> Informational - The Retry strategy can be modified in nms-server.xml. This alarm is not raised for the default retry strategy, reactive.		

**Table 39-442 IpPathMonitorRetryAttemptsExhausted**

Alarm	Attributes	Applicable major releases
Name: IpPathMonitorRetryAttemptsExhausted (401) Type: topologyAlarm (34) Package: monpath Raised on class: monpath.MonitoredIpPath	Severity: major Implicitly cleared: false Default probable cause: ipPathCouldNotBeDetermined (299)	Unspecified
<b>Description:</b> The alarm is raised when the 5650 CPAM stops trying to set up an IP path monitor after the number of attempts specified by the cpamManagedRoute problematicDeadAfter value in the nms-server.xml file. The alarm is raised if the cpamManagedRoute problematicRetryStrategy value in nms-server.xml is set to countdown. The default problematicRetryStrategy value of reactive prevents the alarm from being raised.		
<b>Remedial action:</b> Informational - The Retry strategy can be modified in nms-server.xml. This alarm is not raised for the default retry strategy, reactive.		

**Table 39-443 IpPathMulticastWarning**

Alarm	Attributes	Applicable major releases
Name: IpPathMulticastWarning (1917) Type: topologyAlarm (34) Package: monpath Raised on class: monpath.MonitoredIpPath	Severity: major Implicitly cleared: true Default probable cause: IpPathSegmentNotMulticastEnabled (919)	Unspecified
<b>Description:</b> If IP Path is enabled for monitoring Multicast, the alarm is raised when at least one IP Path segment is not Multicast enabled. The alarm is cleared when all the segments are Multicast enabled.		
<b>Remedial action:</b> Informational - The segments without PIM interface enabled can be obtained from path record. PIM should be enabled on these interfaces in order for alarm to be cleared.		

## 39 – Unspecified NE alarms

Table 39-444 IPsecInterfaceBfdSessionDown

Alarm	Attributes	Applicable major releases
Name: IPsecInterfaceBfdSessionDown (3324) Type: bfdSessionAlarm (46) Package: service Raised on class: service.IPsecInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionDown (346)	Unspecified
<b>Description:</b> The alarm is raised when a BFD session is operationally down.		
<b>Remedial action:</b> This alarm is raised when a BFD session on an IPsec interface goes down. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the far end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 39-445 IPsecInterfaceBfdSessionFlapped

Alarm	Attributes	Applicable major releases
Name: IPsecInterfaceBfdSessionFlapped (3905) Type: bfdSessionAlarm (46) Package: service Raised on class: service.IPsecInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionFlapped (1491)	Unspecified
<b>Description:</b> The alarm is raised when a BFD session transitions from Up to Down and back to Up within the BFD operational state transition interval.		
<b>Remedial action:</b> The BFD session on an IPsec interface has transitioned from Up to Down and back to Up within the configured BFD Flapping Interval.		

Table 39-446 IPsecInterfaceBfdSessionMissing

Alarm	Attributes	Applicable major releases
Name: IPsecInterfaceBfdSessionMissing (3325) Type: bfdSessionAlarm (46) Package: service Raised on class: service.IPsecInterface	Severity: warning Implicitly cleared: true Default probable cause: bfdSessionMissing (345)	Unspecified
<b>Description:</b> The alarm is raised when a previously present BFD session is absent.		
<b>Remedial action:</b> This alarm is raised when a previously present BFD session on an IPsec interface is absent. The situation may occur if the underlying physical interface is down either because of administrative disabling or a fault on the near end port or due to a cable connection or cable failure. This alarm will also be raised if the underlying transport network fails or is unreliable. Resolving the underlying instability in the transport network will correct this problem.		

Table 39-447 IPSecRUSAFailToAddRoute

Alarm	Attributes	Applicable major releases
Name: IPSecRUSAFailToAddRoute (5185) Type: processingErrorAlarm (81) Package: ipsec Raised on class: ipsec.IPSecSecuredVpnManager	Severity: warning Implicitly cleared: false Default probable cause: IPSecRUSAFailToAddRoute (2101)	Unspecified
<b>Description:</b> The trap tIPsecRUSAFailToAddRoute is sent when adding route to tIPsecRUSARemAddr for the remote-user tunnel fails with reason indicated by tIPsecNotifReason.		
<b>Remedial action:</b> Informational - Please see reason for failure.		

Table 39-448 IPsecRUTnIFailToCreate

Alarm	Attributes	Applicable major releases
Name: IPsecRUTnIFailToCreate (5186) Type: processingErrorAlarm (81) Package: ipsec Raised on class: ipsec.IPSecGateway	Severity: warning Implicitly cleared: false Default probable cause: IPsecRUTnIFailToCreate (2102)	Unspecified
<b>Description:</b> This alarm is sent when creation of a remote-user tunnel fails with reason indicated by notifReason.		
<b>Remedial action:</b> Informational - Please see reason for failure.		

Table 39-449 IsaAaGrpBitRate

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpBitRate (2948) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroup	Severity: warning Implicitly cleared: false Default probable cause: isaAaGrpBitRate (1143)	Unspecified
<b>Description:</b> The alarm is raised when the current bit rate on the MDA in the ISA-AA group is greater than or equal to tmnxBsxBitRateHighWatermark, and the prior bit rate is less than the threshold.		
<b>Remedial action:</b> The current bit rate on the MDA in the ISA-AA group is greater than or equal to the configured Bit Rate High Watermark. The threshold configured should be revisited to ensure that it is not set too low. To disable the notification, set the Packet Rate High Watermark to maximum.		

## 39 – Unspecified NE alarms

Table 39-450 IsaAaGrpCapCostThres

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpCapCostThres (835) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroupMember	Severity: warning Implicitly cleared: false Default probable cause: IsaAaGrpCapCostThres (595)	Unspecified
<b>Description:</b> The alarm is raised when the capacity cost for an MDA in an ISA-AA group reaches the configured threshold.		
<b>Remedial action:</b> The capacity cost high threshold for the MDA in the ISA-AA group has been reached.		

Table 39-451 IsaAaGrpFailure

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpFailure (564) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroup	Severity: warning Implicitly cleared: true Default probable cause: isaAaGrpFailure (434)	Unspecified
<b>Description:</b> The alarm is raised when an ISA-AA Group has no configured primary MDA or the number of active MDAs is not equal to the number of configured primary MDAs.		
<b>Remedial action:</b> There is a failure on the ISA-AA group. Ensure that ISA-AA group has a primary MDA group member configured, and that the number of active MDAs is equal to the number of configured primary MDAs.		

Table 39-452 IsaAaGrpFlowFull

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpFlowFull (566) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroup	Severity: warning Implicitly cleared: false Default probable cause: isaAaGrpFlowFull (436)	Unspecified
<b>Description:</b> The alarm is raised when an ISA-AA group uses a greater number of flow records than the value specified by tmnxBsxFowFullHighWatermark.		
<b>Remedial action:</b> The number of flow records that the ISA-AA group is using is greater than or equal to the configured Flow Full High Watermark. The threshold configured should be revisited to ensure that it is not set too low.		

Table 39-453 IsaAaGrpFlowSetup

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpFlowSetup (2949) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroup	Severity: warning Implicitly cleared: false Default probable cause: isaAaGrpFlowSetup (1144)	Unspecified
<b>Description:</b> The alarm is raised when the current flow setup rate on the MDA in the ISA-AA group is greater than or equal to tmnxBsxFwSetupHighWatermark, and the prior bit rate is less than the threshold.		
<b>Remedial action:</b> The current flow setup rate on the MDA in the ISA-AA group is greater than or equal to the configured Flow Setup High Watermark. The threshold configured should be revisited to ensure that it is not set too low. To disable the notification, set the Flow Setup High Watermark to maximum.		

Table 39-454 IsaAaGrpFmSbWaSBufOvld

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpFmSbWaSBufOvld (2950) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroupMember	Severity: warning Implicitly cleared: true Default probable cause: IsaAaGrpFmSbWaSBufOvld (1145)	Unspecified
<b>Description:</b> The alarm is raised when the current weighted average shared buffer for an ISA in the from subscriber direction is greater than or equal to a high water mark in a normal, non-overloaded, state.		
<b>Remedial action:</b> The ISA-AA Egress From-Subscriber buffer pool has entered an overload state as determined by the configured Buffer Utilization High Watermark. The threshold configured should be revisited to ensure it is not set too low. To disable the notification, set the Buffer Utilization High Watermark to the maximum.		

Table 39-455 IsaAaGrpNonRedundant

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpNonRedundant (565) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroup	Severity: warning Implicitly cleared: false Default probable cause: isaAaGrpNonRedundant (435)	Unspecified
<b>Description:</b> The alarm is raised when an ISA-AA Group has a configured backup MDA but there is no standby MDA available.		
<b>Remedial action:</b> The ISA-AA Group has a configured backup MDA but there is no standby MDA available. Check that the configured standby MDA is active and operationally up. There may be a fault with the ISA Application Assurance MDA.		

## 39 – Unspecified NE alarms

Table 39-456 IsaAaGrpOvrldCutthru

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpOvrldCutthru (2951) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroupMember	Severity: warning Implicitly cleared: true Default probable cause: IsaAaGrpOvrldCutthru (1146)	Unspecified
<b>Description:</b> The alarm is raised when cut through processing starts on an ISA MDA.		
<b>Remedial action:</b> Overload Cut-Through is enabled on the ISA-AA Group. All traffic is cut-through and the ISA-AA MDA is overloaded. Disable Overload Cut-Through if this is not required.		

Table 39-457 IsaAaGrpPacketRate

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpPacketRate (2952) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroup	Severity: warning Implicitly cleared: false Default probable cause: isaAaGrpPacketRate (1147)	Unspecified
<b>Description:</b> The alarm is raised when the current packet rate on the MDA in the ISA-AA group is greater than or equal to tmnxBsxBsxPacketRateHighWatermark, and the prior rate is less than this threshold.		
<b>Remedial action:</b> The current packet rate on the MDA in the ISA-AA group is greater than or equal to the configured Packet Rate High Watermark. The threshold configured should be revisited to ensure that it is not set too low. To disable the notification, set the Packet Rate High Watermark to maximum.		

Table 39-458 IsaAaGrpSwitchover

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpSwitchover (567) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroup	Severity: warning Implicitly cleared: false Default probable cause: isaAaGrpSwitchover (437)	Unspecified
<b>Description:</b> The alarm is raised when an ISA-AA group experiences an activity switch from one ISA-AA to another.		
<b>Remedial action:</b> The ISA-AA Group has performed an activity switch from one ISA-AA MDA to another.		

Table 39-459 IsaAaGrpToSbWaSBufOvld

Alarm	Attributes	Applicable major releases
Name: IsaAaGrpToSbWaSBufOvld (2953) Type: equipmentAlarm (3) Package: isa Raised on class: isa.AaGroupMember	Severity: warning Implicitly cleared: true Default probable cause: IsaAaGrpToSbWaSBufOvld (1148)	Unspecified
<b>Description:</b> The alarm is raised when the current weighted average shared buffer use for an ISA in the To subscriber direction, is greater than or equal to a high water mark, after being in a normal or non-overloaded state.		
<b>Remedial action:</b> The ISA-AA Egress To-Subscriber buffer pool has entered an overload state as determined by the configured Buffer Utilization High Watermark. The threshold configured should be revisited to ensure it is not set too low. To disable the notification, set the Buffer Utilization High Watermark to the maximum.		

Table 39-460 IsidMisconfiguration (epipe)

Alarm	Attributes	Applicable major releases
Name: IsidMisconfiguration (592) Type: configurationAlarm (11) Package: epipe Raised on class: epipe.Epipe	Severity: warning Implicitly cleared: true Default probable cause: isidInconsistent (446)	Unspecified
<b>Description:</b> The alarm is raised when Epipe service sites that are bound to a PBB backbone use different ISID values.		
<b>Raising condition:</b> ('operationalFlags'anyBit'ISID Inconsistent')		
<b>Clearing condition:</b> NOT (('operationalFlags'anyBit'ISID Inconsistent'))		
<b>Remedial action:</b> All service sites must use consistent I-SID values for a PBB backbone.		

Table 39-461 IsidMisconfiguration (vpls)

Alarm	Attributes	Applicable major releases
Name: IsidMisconfiguration (592) Type: configurationAlarm (11) Package: vpls Raised on class: vpls.AbstractVpls	Severity: warning Implicitly cleared: true Default probable cause: isidInconsistent (446)	Unspecified
<b>Description:</b> The alarm is raised when service sites use inconsistent I-SID values for a PBB backbone. The alarm is raised against a VPLS or M-VPLS service.		
<b>Raising condition:</b> ('operationalFlags'anyBit'ISID Inconsistent')		
<b>Clearing condition:</b> NOT (('operationalFlags'anyBit'ISID Inconsistent'))		
<b>Remedial action:</b> All service sites must use consistent I-SID values for a PBB backbone.		

## 39 – Unspecified NE alarms

Table 39-462 IsisAreaMismatch

Alarm	Attributes	Applicable major releases
Name: IsisAreaMismatch (156) Type: configurationAlarm (11) Package: isis Raised on class: isis.Site	Severity: warning Implicitly cleared: true Default probable cause: areaTypeMisconfigured (34)	Unspecified
<b>Description:</b> The alarm is raised when IS-IS receives a Hello PDU from an IS with which it does not share an area address.		
<b>Remedial action:</b> Check whether NET address is configured and the AREA ID between two adjacencies are not the same.		

Table 39-463 IsisAuthFailure

Alarm	Attributes	Applicable major releases
Name: IsisAuthFailure (155) Type: authenticationAlarm (14) Package: isis Raised on class: isis.Site	Severity: ng Implicitly cleared: false Default probable cause: authFailure (46)	Unspecified
<b>Description:</b> The alarm is raised when IS-IS receives a PDU that contains incorrect authentication information.		
<b>Remedial action:</b> The authentication information on the ISIS Site needs to be changed to match its neighbours.		

Table 39-464 IsisAuthTypeFailure

Alarm	Attributes	Applicable major releases
Name: IsisAuthTypeFailure (154) Type: authenticationAlarm (14) Package: isis Raised on class: isis.Site	Severity: warning Implicitly cleared: true Default probable cause: authFailure (46)	Unspecified
<b>Description:</b> The alarm is raised when IS-IS receives a PDU that contains the wrong authentication type.		
<b>Remedial action:</b> The authentication information on the ISIS Site needs to be changed to match its neighbours.		

Table 39-465 IsisExportLimitDropped

Alarm	Attributes	Applicable major releases
Name: IsisExportLimitDropped (838) Type: configurationAlarm (11) Package: isis Raised on class: isis.Site	Severity: warning Implicitly cleared: false Default probable cause: exportLimitDropped (598)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the number of routes exported from the route table to an IS-IS level drops below the Export Limit value for the level.		
<b>Remedial action:</b> Informational.		

(2 of 2)

Table 39-466 IsisExportLimitReached

Alarm	Attributes	Applicable major releases
Name: IsisExportLimitReached (839) Type: configurationAlarm (11) Package: isis Raised on class: isis.Site	Severity: warning Implicitly cleared: false Default probable cause: exportLimitReached (599)	Unspecified
<b>Description:</b> The alarm is raised when the number of routes exported from the route table to an IS-IS level is equal to the Export Limit value for the level.		
<b>Remedial action:</b> Informational - the number of routes exported from the route table to an IS-IS level is equal to the Export Limit value for the level		

Table 39-467 IsisExportLimitWarning

Alarm	Attributes	Applicable major releases
Name: IsisExportLimitWarning (840) Type: configurationAlarm (11) Package: isis Raised on class: isis.Site	Severity: warning Implicitly cleared: false Default probable cause: exportLimitWarning (600)	Unspecified
<b>Description:</b> The alarm is raised when the number of routes exported from the route table to an IS-IS level is equal to the Export Limit percentage specified by the Export Limit Log Percent value.		
<b>Remedial action:</b> Informational - the number of routes exported from the route table to an IS-IS level is equal to the Export Limit percentage specified by the Export Limit Log Percent value.		

Table 39-468 IsisLspRateThresholdExceeded

Alarm	Attributes	Applicable major releases
Name: IsisLspRateThresholdExceeded (376) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: unstableIGPNetwork (241)	Unspecified
<b>Description:</b> The alarm is raised when the IS-IS LSP rate exceeds the maximum allowed value because of an unstable IGP network.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. IGP historical map can be used for debugging purpose.		

## 39 – Unspecified NE alarms

Table 39-469 IsisLspThresholdExceeded

Alarm	Attributes	Applicable major releases
Name: IsisLspThresholdExceeded (375) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: largeIGPNetwork (276)	Unspecified
<b>Description:</b> The alarm is raised when the number of IS-IS LSPs exceeds the maximum allowed value because of a large IGP network.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. IGP historical map can be used for debugging purpose.		

Table 39-470 IsisManualAddressDrops

Alarm	Attributes	Applicable major releases
Name: IsisManualAddressDrops (157) Type: configurationAlarm (11) Package: isis Raised on class: isis.Site	Severity: warning Implicitly cleared: false Default probable cause: noError (44)	Unspecified
<b>Description:</b> The alarm is raised when a manual area address assigned to an IS is ignored during a route computation.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-471 IsisReachabilityThresholdExceeded

Alarm	Attributes	Applicable major releases
Name: IsisReachabilityThresholdExceeded (377) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: manyExternalLSAsFloodingIntoIGP (271)	Unspecified
<b>Description:</b> The alarm is raised when the IS-IS reachability value exceeds the maximum allowed value because too many external LSAs are flooding the IGP.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. The advertised routes can be viewed using CPAM IGP prefix list.		

Table 39-472 IsisRejectedAdjacency

Alarm	Attributes	Applicable major releases
Name: IsisRejectedAdjacency (214) Type: adjacencyAlarm (31) Package: isis Raised on class: isis.Interface	Severity: minor Implicitly cleared: true Default probable cause: interfaceMismatch (170)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM receives a vRtrIsisRejectedAdjacency trap, which indicates that an adjacency cannot be established in response to a Hello PDU from an IS because of a lack of resources.		
<b>Remedial action:</b> Informational, might have exceeded the maximum number of adjacencies allowed.		

Table 39-473 luCS\_asplInactive

Alarm	Attributes	Applicable major releases
Name: luCS_asplInactive (6030) Type: communicationsAlarm (4) Package: femto Raised on class: femto.luCS	Severity: critical Implicitly cleared: true Default probable cause: communicationsProtocolError (901)	Unspecified
<b>Description:</b> Notification to inform the application that the FGW's IPSP instance has become inactive		
<b>Remedial action:</b> TBD		

Table 39-474 luPS\_asplInactive

Alarm	Attributes	Applicable major releases
Name: luPS_asplInactive (6044) Type: communicationsAlarm (4) Package: femto Raised on class: femto.luPS	Severity: critical Implicitly cleared: true Default probable cause: communicationsProtocolError (901)	Unspecified
<b>Description:</b> Notification to inform the application that the FGW's IPSP instance has become inactive		
<b>Remedial action:</b> TBD		

## 39 – Unspecified NE alarms

Table 39-475 L2AccessInterfaceChange

Alarm	Attributes	Applicable major releases
Name: L2AccessInterfaceChange (3933) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.VlanPathInstance	Severity: info Implicitly cleared: true Default probable cause: SAPChanged (1516)	Unspecified
<b>Description:</b> The alarm is raised when the SAP is changed in Service for 9500.		
<b>Remedial action:</b> Informational - if SAP is changed this alarm is raised.		

Table 39-476 L2tpLnsSePppSessionFailure

Alarm	Attributes	Applicable major releases
Name: L2tpLnsSePppSessionFailure (3901) Type: processingErrorAlarm (81) Package: rtr Raised on class: rtr.RoutingInstanceSite	Severity: major Implicitly cleared: false Default probable cause: l2tpLnsSePppSessionFailed (1492)	Unspecified
<b>Description:</b> The alarm is raised when an NE notifies the 5620 SAM that it cannot create a new L2TP session.		
<b>Remedial action:</b> The alarm is raised when an NE notifies the 5620 SAM that it cannot create a new L2TP session. Verify the configuration to have LNS group assigned to the group tunnel profile or tunnel profile. Additionally, verify the length of the auto-generated subscriber identification.		

Table 39-477 L2tpTunnelBlacklisted

Alarm	Attributes	Applicable major releases
Name: L2tpTunnelBlacklisted (4625) Type: processingErrorAlarm (81) Package: l2tp Raised on class: l2tp.TunnelStatus	Severity: variable Implicitly cleared: true Default probable cause: tmnxL2tpTunnelBlacklisted (1893)	Unspecified
<b>Description:</b> This alarm is raised when a L2TP tunnel is added to the tunnel-selection-blacklist. It is automatically cleared when the tunnel is removed from the list.		
<b>Remedial action:</b> In most cases the problem is a configuration mismatch between LAC and LNS, or a problem on LNS. Please refer to the additional text and enable the debug log on event lac-session-setup to figure out the root cause.		

Table 39-478 LacpExpired

Alarm	Attributes	Applicable major releases
Name: LacpExpired (3981) Type: equipmentAlarm (3) Package: lag Raised on class: lag.PortTermination	Severity: minor Implicitly cleared: true Default probable cause: LagSubgroupMemberStateChange (1558)	Unspecified
<b>Description:</b> The alarm is raised when Lacp expired on subgroup lag member due to state change.		
<b>Remedial action:</b> The reasons for LACP Expired alarm may vary. The following possible causes of this alarm should be investigated. The partner lag member oper state may have changed or LACP Transmit Standby may have been disabled - this can be remedied by enabling the LACP Transmit Standby on Lag. The partner lag member 802.3ah oper state may have changed - ensure that 802.3ah state is same on both ends. The partner lag member dot1ag state may have changed - ensure that dot1ag state is same on both ends.		

Table 39-479 LagDot1agStateChanged

Alarm	Attributes	Applicable major releases
Name: LagDot1agStateChanged (3982) Type: equipmentAlarm (3) Package: lag Raised on class: lag.PortTermination	Severity: minor Implicitly cleared: true Default probable cause: Dot1agStateChange (1559)	Unspecified
<b>Description:</b> The alarm is raised when the subgroup lag member dot1ag state has changed.		
<b>Remedial action:</b> The lag member dot1ag state may have changed - please ensure that dot1ag state is same on both ends.		

Table 39-480 LagEfmOamStateChanged

Alarm	Attributes	Applicable major releases
Name: LagEfmOamStateChanged (3983) Type: equipmentAlarm (3) Package: lag Raised on class: lag.PortTermination	Severity: minor Implicitly cleared: true Default probable cause: EfmOamStateChange (1560)	Unspecified
<b>Description:</b> The alarm is raised when the subgroup lag member efmOam state has changed.		
<b>Remedial action:</b> The lag member 802.3ah oper state may have changed - please ensure that 802.3ah state is same on both ends.		

## 39 – Unspecified NE alarms

Table 39-481 LagPartnerOperStateChanged

Alarm	Attributes	Applicable major releases
Name: LagPartnerOperStateChanged (3984) Type: equipmentAlarm (3) Package: lag Raised on class: lag.PortTermination	Severity: minor Implicitly cleared: true Default probable cause: PartnerOperStateChange (1561)	Unspecified
<b>Description:</b> The alarm is raised when the subgroup lag member partner oper state has changed.		
<b>Remedial action:</b> The lag member oper state may have changed or LACP Transmit Standby may have been disabled - this can be remedied by enabling the LACP Transmit Standby on Lag.		

Table 39-482 LanFailure

Alarm	Attributes	Applicable major releases
Name: LanFailure (628) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: lanFailure (467)	Unspecified
<b>Description:</b> The alarm is raised when a LAN failure is detected.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-483 LastHopIncorrectLabelAction

Alarm	Attributes	Applicable major releases
Name: LastHopIncorrectLabelAction (352) Type: configurationAlarm (11) Package: mpls Raised on class: mpls.StaticLsp	Severity: warning Implicitly cleared: true Default probable cause: LabelActionIsNotPopOnLastHop (254)	Unspecified
<b>Description:</b> The alarm is raised when the label action specified for the last hop in a static LSP is not a pop action.		
<b>Remedial action:</b> Ensure the last hop configured with a pop label action, if the last hop node is managed by SAM.		

Table 39-484 LastHopNotMatchingDestination

Alarm	Attributes	Applicable major releases
Name: LastHopNotMatchingDestination (351) Type: configurationAlarm (11) Package: mpls Raised on class: mpls.StaticLsp	Severity: warning Implicitly cleared: true Default probable cause: LastHopNotMatchingDestination (253)	Unspecified
<b>Description:</b> The alarm is raised when the last hop in a static LSP is not the destination.		
<b>Remedial action:</b> Ensure the last hop configured in the static LSP match the destination of the LSP, if the last hop node is managed by SAM.		

Table 39-485 LCD

Alarm	Attributes	Applicable major releases
Name: LCD (803) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.IMALink	Severity: major Implicitly cleared: true Default probable cause: lossOfCellDelineation (569)	Unspecified
<b>Description:</b> The alarm is raised when a Loss of Cell Delineation signal is detected on an ASAP MDA.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-486 LdpInterfaceDown

Alarm	Attributes	Applicable major releases
Name: LdpInterfaceDown (21) Type: ProtocolAlarm (1) Package: ldp Raised on class: ldp.Interface	Severity: critical Implicitly cleared: false Default probable cause: protocolDown (1)	Unspecified
<b>Description:</b> The alarm is raised when an LDP interface is operationally down.		
<b>Remedial action:</b> Check operational state down reason and state qualifier, then update accordingly.		

## 39 – Unspecified NE alarms

Table 39-487 LegalReq\_legalReqFileDeliveryFailureclearance

Alarm	Attributes	Applicable major releases
Name: LegalReq_legalReqFileDeliveryFailureclearance (6091) Type: processingErrorAlarm (81) Package: femto Raised on class: femto.LegalReq	Severity: minor Implicitly cleared: true Default probable cause: fileError (700)	Unspecified
<b>Description:</b> This alarm is generated when the FGW succeeds in sending a previously failed legal req file.		
<b>Remedial action:</b> TBD		

Table 39-488 Licensed3RouterLimitExceeded

Alarm	Attributes	Applicable major releases
Name: Licensed3RouterLimitExceeded (694) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: critical Implicitly cleared: true Default probable cause: cpamLicensedLimitExceeded (285)	Unspecified
<b>Description:</b> The alarm is raised when the number of third-party routers in the 5650 CPAM network reaches 100 percent of the license capacity.		
<b>Raising condition:</b> ('isLicensed3RouterLimitExceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('isLicensed3RouterLimitExceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of Third Party Router licenses purchased and available on the CPAM server is insufficient as compared to the number of third party routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-489 Licensed3RouterLimitNearing

Alarm	Attributes	Applicable major releases
Name: Licensed3RouterLimitNearing (695) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: warning Implicitly cleared: true Default probable cause: cpamLicensedLimitNearing (283)	Unspecified
<b>Description:</b> The alarm is raised when the number of third-party routers in the 5650 CPAM network reaches 75 to 90 percent of the license capacity.		
<b>Remedial action:</b> Informational - The number of Third Party Router licenses purchased and available on the CPAM server is insufficient as compared to the number of third party routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

**Table 39-490 Licensed3RouterLimitNearlyExceeded**

Alarm	Attributes	Applicable major releases
Name: Licensed3RouterLimitNearlyExceeded (696) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: major Implicitly cleared: true Default probable cause: cpamLicensedLimitNearlyExceeded (284)	Unspecified
<b>Description:</b> The alarm is raised when the number of third-party routers in the 5650 CPAM network reaches 90 to 100 percent of the license capacity.		
<b>Remedial action:</b> Informational - The number of Third Party Router licenses purchased and available on the CPAM server is insufficient as compared to the number of third party routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

**Table 39-491 LicensedBgpRouteProfileLimitExceeded**

Alarm	Attributes	Applicable major releases
Name: LicensedBgpRouteProfileLimitExceeded (5132) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: critical Implicitly cleared: true Default probable cause: cpamLicensedLimitExceeded (285)	Unspecified
<b>Description:</b> The alarm is raised when the number of BGP Route Profiles in the 5650 CPAM reaches 100 percent of the license capacity.		
<b>Raising condition:</b> ('isLicensedBgpProfileLimitExceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('isLicensedBgpProfileLimitExceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of Bgp Route Profile Module licenses purchased and available on the CPAM server is insufficient as compared to the number of Bgp Route Profiles in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

**Table 39-492 LicensedBgpRouteProfileLimitNearing**

Alarm	Attributes	Applicable major releases
Name: LicensedBgpRouteProfileLimitNearing (5133) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: warning Implicitly cleared: true Default probable cause: cpamLicensedLimitNearing (283)	Unspecified
<b>Description:</b> The alarm is raised when the number of BGP Route Profiles in the 5650 CPAM reaches 75 to 90 percent of the license capacity.		
<b>Remedial action:</b> Informational - The number of Bgp Route Profile Module licenses purchased and available on the CPAM server is insufficient as compared to the number of Bgp Route Profiles in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

## 39 – Unspecified NE alarms

Table 39-493 LicensedBgpRouteProfileLimitNearlyExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedBgpRouteProfileLimitNearlyExceeded (5134) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: major Implicitly cleared: true Default probable cause: cpamLicensedLimitNearlyExceeded (284)	Unspecified
<b>Description:</b> The alarm is raised when the number of BGP Route Profiles in the 5650 CPAM reaches 90 to 100 percent of the license capacity.		
<b>Remedial action:</b> Informational - The number of Bgp Route Profiles Module licenses purchased and available on the CPAM server is insufficient as compared to the number of BGP Route Profiles in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-494 LicensedBigRouterLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedBigRouterLimitExceeded (709) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: critical Implicitly cleared: true Default probable cause: cpamLicensedLimitExceeded (285)	Unspecified
<b>Description:</b> The alarm is raised when the number of Alcatel-Lucent large routers in the network reaches 100 percent of the 5650 CPAM license capacity.		
<b>Raising condition:</b> ('isLicensedBigRouterLimitExceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('isLicensedBigRouterLimitExceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of Big Router licenses purchased and available on the CPAM server is insufficient as compared to the number of big routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-495 LicensedBigRouterLimitNearing

Alarm	Attributes	Applicable major releases
Name: LicensedBigRouterLimitNearing (710) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: warning Implicitly cleared: true Default probable cause: cpamLicensedLimitNearing (283)	Unspecified
<b>Description:</b> The alarm is raised when the number of Alcatel-Lucent large routers in the network reaches 75 to 90 percent of the 5650 CPAM license capacity.		
<b>Remedial action:</b> Informational - The number of Big Router licenses purchased and available on the CPAM server is insufficient as compared to the number of big routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-496 LicensedBigRouterLimitNearlyExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedBigRouterLimitNearlyExceeded (711) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: major Implicitly cleared: true Default probable cause: cpamLicensedLimitNearlyExceeded (284)	Unspecified
<b>Description:</b> The alarm is raised when the number of Alcatel-Lucent large routers in the network reaches 90 to 100 percent of the 5650 CPAM license capacity.		
<b>Remedial action:</b> Informational - The number of Big Router licenses purchased and available on the CPAM server is insufficient as compared to the number of big routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-497 LicensedImpactAnalysisRouterLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedImpactAnalysisRouterLimitExceeded (712) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicenseScenario	Severity: critical Implicitly cleared: true Default probable cause: cpamLicensedLimitExceeded (285)	Unspecified
<b>Description:</b> The alarm is raised when the number of routers in a simulation scenario reaches 100 percent of the license capacity.		
<b>Raising condition:</b> ('isLicensedRouterLimitExceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('isLicensedRouterLimitExceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of licenses purchased and available on the CPAM server for routers in a simulation scenario is insufficient as compared to the number of routers in a simulation scenario. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-498 LicensedImpactAnalysisRouterLimitNearing

Alarm	Attributes	Applicable major releases
Name: LicensedImpactAnalysisRouterLimitNearing (713) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicenseScenario	Severity: warning Implicitly cleared: true Default probable cause: cpamLicensedLimitNearing (283)	Unspecified
<b>Description:</b> The alarm is raised when the number of routers in a simulation scenario reaches 75 to 90 percent of the license capacity.		
<b>Remedial action:</b> Informational - The number of licenses purchased and available on the CPAM server for routers in a simulation scenario is insufficient as compared to the number of routers in a simulation scenario. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

## 39 – Unspecified NE alarms

Table 39-499 LicensedImpactAnalysisRouterLimitNearlyExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedImpactAnalysisRouterLimitNearlyExceeded (714) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicenseScenario	Severity: major Implicitly cleared: true Default probable cause: cpamLicensedLimitNearlyExceeded (284)	Unspecified
<b>Description:</b> The alarm is raised when the number of routers in a simulation scenario reaches 90 to 100 percent of the license capacity.		
<b>Remedial action:</b> Informational - The number of licenses purchased and available on the CPAM server for routers in a simulation scenario is insufficient as compared to the number of routers in a simulation scenario. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-500 LicensedIpPathLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedIpPathLimitExceeded (715) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: critical Implicitly cleared: true Default probable cause: cpamLicensedLimitExceeded (285)	Unspecified
<b>Description:</b> The alarm is raised when the number of IP path monitors in the 5650 CPAM reaches 100 percent of the license capacity.		
<b>Raising condition:</b> ('isLicensedIpPathLimitExceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('isLicensedIpPathLimitExceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of Path Computation Module licenses purchased and available on the CPAM server is insufficient as compared to the number of PCA paths in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-501 LicensedIpPathLimitNearing

Alarm	Attributes	Applicable major releases
Name: LicensedIpPathLimitNearing (716) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: warning Implicitly cleared: true Default probable cause: cpamLicensedLimitNearing (283)	Unspecified
<b>Description:</b> The alarm is raised when the number of IP path monitors in the 5650 CPAM reaches 75 to 90 percent of the license capacity.		
<b>Remedial action:</b> Informational - The number of Path Computation Module licenses purchased and available on the CPAM server is insufficient as compared to the number of PCA paths in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-502 LicensedIpPathLimitNearlyExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedIpPathLimitNearlyExceeded (717) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: major Implicitly cleared: true Default probable cause: cpamLicensedLimitNearlyExceeded (284)	Unspecified
<b>Description:</b> The alarm is raised when the number of IP path monitors in the 5650 CPAM reaches 90 to 100 percent of the license capacity.		
<b>Remedial action:</b> Informational - The number of Path Computation Module licenses purchased and available on the CPAM server is insufficient as compared to the number of PCA paths in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-503 LicensedMcRouterLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedMcRouterLimitExceeded (718) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: critical Implicitly cleared: true Default probable cause: cpamLicensedLimitExceeded (285)	Unspecified
<b>Description:</b> The alarm is raised when the number of multicast routers in the 5650 CPAM reaches 100 percent of the license capacity.		
<b>Raising condition:</b> ('isLicensedMcRouterLimitExceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('isLicensedMcRouterLimitExceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of Multicast Router licenses purchased and available on the CPAM server is insufficient as compared to the number of multicast routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-504 LicensedMcRouterLimitNearing

Alarm	Attributes	Applicable major releases
Name: LicensedMcRouterLimitNearing (719) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: warning Implicitly cleared: true Default probable cause: cpamLicensedLimitNearing (283)	Unspecified
<b>Description:</b> The alarm is raised when the number of multicast routers in the 5650 CPAM reaches 75 to 90 percent of the license capacity.		
<b>Remedial action:</b> Informational - The number of Multicast Router licenses purchased and available on the CPAM server is insufficient as compared to the number of multicast routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

## 39 – Unspecified NE alarms

Table 39-505 LicensedMcRouterLimitNearlyExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedMcRouterLimitNearlyExceeded (720) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: major Implicitly cleared: true Default probable cause: cpamLicensedLimitNearlyExceeded (284)	Unspecified
<b>Description:</b> The alarm is raised when the number of multicast routers in the 5650 CPAM reaches 90 to 100 percent of the license capacity.		
<b>Remedial action:</b> Informational - The number of Multicast Router licenses purchased and available on the CPAM server is insufficient as compared to the number of multicast routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-506 LicensedSmallRouterLimitExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedSmallRouterLimitExceeded (727) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: critical Implicitly cleared: true Default probable cause: cpamLicensedLimitExceeded (285)	Unspecified
<b>Description:</b> The alarm is raised when the number of Alcatel-Lucent small routers in the network reaches 100 percent of the 5650 CPAM license capacity.		
<b>Raising condition:</b> ('isLicensedSmallRouterLimitExceeded' EQUAL 'true')		
<b>Clearing condition:</b> ('isLicensedSmallRouterLimitExceeded' NOT EQUAL 'true')		
<b>Remedial action:</b> Informational - The number of Small Router licenses purchased and available on the CPAM server is insufficient as compared to the number of small routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-507 LicensedSmallRouterLimitNearing

Alarm	Attributes	Applicable major releases
Name: LicensedSmallRouterLimitNearing (728) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: warning Implicitly cleared: true Default probable cause: cpamLicensedLimitNearing (283)	Unspecified
<b>Description:</b> The alarm is raised when the number of Alcatel-Lucent small routers in the network reaches 75 to 90 percent of the 5650 CPAM license capacity.		
<b>Remedial action:</b> Informational - The number of Small Router licenses purchased and available on the CPAM server is insufficient as compared to the number of small routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-508 LicensedSmallRouterLimitNearlyExceeded

Alarm	Attributes	Applicable major releases
Name: LicensedSmallRouterLimitNearlyExceeded (729) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: major Implicitly cleared: true Default probable cause: cpamLicensedLimitNearlyExceeded (284)	Unspecified
<b>Description:</b> The alarm is raised when the number of Alcatel-Lucent small routers in the network reaches 90 to 100 percent of the 5650 CPAM license capacity.		
<b>Remedial action:</b> Informational - The number of Small Router licenses purchased and available on the CPAM server is insufficient as compared to the number of small routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-509 licenseExpiration

Alarm	Attributes	Applicable major releases
Name: licenseExpiration (2911) Type: configurationAlarm (11) Package: ranlicense Raised on class: ranlicense.RANLicense	Severity: variable Implicitly cleared: true Default probable cause: licenseExpired (1117)	Unspecified
<b>Description:</b> The alarm is raised when a RAN license expires.		
<b>Remedial action:</b> Provide a new LKDI license file with a further expiration date.		

Table 39-510 LicenseMisMatch

Alarm	Attributes	Applicable major releases
Name: LicenseMisMatch (693) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: critical Implicitly cleared: false Default probable cause: cpamLicenseMisMatch (507)	Unspecified
<b>Description:</b> The alarm is raised when the primary 5650 CPAM server license does not match the standby 5650 CPAM server license.		
<b>Remedial action:</b> Informational - Please ensure that the same license key is installed on both the active and standby SAM/CPAM servers		

## 39 – Unspecified NE alarms

Table 39-511 liDestinationChangeReject

Alarm	Attributes	Applicable major releases
Name: liDestinationChangeReject (551) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMirrorSiteCfg	Severity: warning Implicitly cleared: false Default probable cause: tMirrorDestinationChangeReject (421)	Unspecified
<b>Description:</b> The alarm is raised when an operator tries to modify a mirror destination that is in use by an LI mirror.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-512 liDestinationEnabled

Alarm	Attributes	Applicable major releases
Name: liDestinationEnabled (550) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMirrorSiteCfg	Severity: warning Implicitly cleared: false Default probable cause: tMirrorDestinationEnabled (420)	Unspecified
<b>Description:</b> The alarm is raised when a mirror destination Operational State changes from Down to Up.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-513 LIF

Alarm	Attributes	Applicable major releases
Name: LIF (804) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.IMALink	Severity: major Implicitly cleared: true Default probable cause: lossOfIMAFrame (570)	Unspecified
<b>Description:</b> The alarm is raised when a Loss of IMA Frame signal is detected on an ASAP MDA.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-514 liFilterAssignToltfWarn

Alarm	Attributes	Applicable major releases
Name: liFilterAssignToltfWarn (556) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMirrorSiteCfg	Severity: warning Implicitly cleared: false Default probable cause: tMirrorFilterAssignToltfWarn (426)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when an operator tries to assign a filter that is in use by LI to an interface.		
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 39-515 liFilterAssignToSapWarn

Alarm	Attributes	Applicable major releases
Name: liFilterAssignToSapWarn (554) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMirrorSiteCfg	Severity: warning Implicitly cleared: false Default probable cause: tMirrorFilterAssignToSapWarn (424)	Unspecified
<b>Description:</b> The alarm is raised when an operator tries to assign a filter that is in use by LI to a SAP.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-516 liFilterAssignToSdpWarn

Alarm	Attributes	Applicable major releases
Name: liFilterAssignToSdpWarn (555) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMirrorSiteCfg	Severity: warning Implicitly cleared: false Default probable cause: tMirrorFilterAssignToSdpWarn (425)	Unspecified
<b>Description:</b> The alarm is raised when an operator tries to assign a filter that is in use by LI to an SDP.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-517 LinkAggMemberMisconfigured

Alarm	Attributes	Applicable major releases
Name: LinkAggMemberMisconfigured (652) Type: InkaggAlarm (56) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagMemberMisconfigured (483)	Unspecified
<b>Description:</b> The alarm is raised when one or more misconfigured LAG members are detected, for example, when some LAG members are in access mode and some are in network mode.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The configuration of the LAG port member should be checked and the configuration error corrected,		

## 39 – Unspecified NE alarms

Table 39-518 LinkAggModeMisconfigured

Alarm	Attributes	Applicable major releases
Name: LinkAggModeMisconfigured (653) Type: InkaggAlarm (56) Package: lag Raised on class: lag.Interface	Severity: critical Implicitly cleared: true Default probable cause: lagModeMisconfigured (484)	Unspecified
<b>Description:</b> The alarm is raised when the LAG mode differs from the mode of one or more LAG members, for example, when the LAG mode is access and the LAG members are in network mode.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The configuration of the LAG port member should be checked and the configuration error corrected,		

Table 39-519 LinkAggPortJoin

Alarm	Attributes	Applicable major releases
Name: LinkAggPortJoin (654) Type: InkaggAlarm (56) Package: lag Raised on class: lag.Interface	Severity: info Implicitly cleared: false Default probable cause: lagPortJoin (485)	Unspecified
<b>Description:</b> The alarm is raised when a LAG port joins a LAG by entering the attached state.		
<b>Remedial action:</b> Informational.		

Table 39-520 LinkAggPortLeave

Alarm	Attributes	Applicable major releases
Name: LinkAggPortLeave (655) Type: InkaggAlarm (56) Package: lag Raised on class: lag.Interface	Severity: info Implicitly cleared: false Default probable cause: lagPortLeave (486)	Unspecified
<b>Description:</b> The alarm is raised when a LAG port leaves a LAG by exiting the attached state.		
<b>Remedial action:</b> Informational.		

Table 39-521 LinkAggPortRemove

Alarm	Attributes	Applicable major releases
Name: LinkAggPortRemove (656) Type: InkaggAlarm (56) Package: lag Raised on class: lag.Interface	Severity: warning Implicitly cleared: false Default probable cause: lagPortRemove (487)	Unspecified
<b>Description:</b> The alarm is raised when a LAG port is removed from a LAG because of an invalid configuration.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. Please check the configuration of the port in question.		

Table 39-522 LinkDown (optical)

Alarm	Attributes	Applicable major releases
Name: LinkDown (12) Type: communicationsAlarm (4) Package: optical Raised on class: optical.OpticalLink	Severity: critical Implicitly cleared: true Default probable cause: OperationalStateDown (1963)	Unspecified
<b>Description:</b> The alarm is raised when any of the Optical Link end point is operationally down.		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on the Link End points to understand why the underlying transport network is unreliable.		

Table 39-523 LinkIdentifierMismatch (mwa)

Alarm	Attributes	Applicable major releases
Name: LinkIdentifierMismatch (686) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: LinkIdentifierMismatch (1916)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a link identifier mismatch.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

## 39 – Unspecified NE alarms

Table 39-524 LinkIdentifierMismatch (radioequipment)

Alarm	Attributes	Applicable major releases
Name: LinkIdentifierMismatch (686) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: linkIdentifierMismatch (501)	Unspecified
<b>Description:</b> The alarm is raised when an MSS detects a link identifier mismatch.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-525 linkLoss

Alarm	Attributes	Applicable major releases
Name: linkLoss (6389) Type: communicationsAlarm (4) Package: femto Raised on class: femto.FemtoNetwork	Severity: critical Implicitly cleared: true Default probable cause: communicationsSubsystemFailure (915)	Unspecified
<b>Description:</b> This alarm indicates that there was a loss of communication link with FileServer.		
<b>Remedial action:</b> TBD		

Table 39-526 liSourceDisabled

Alarm	Attributes	Applicable major releases
Name: liSourceDisabled (563) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LISourceCfg	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceDisabled (433)	Unspecified
<b>Description:</b> The alarm is raised when an LI mirror source Operational State changes from Up to Down.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-527 liSourceEnabled

Alarm	Attributes	Applicable major releases
Name: liSourceEnabled (562) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LISourceCfg	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceEnabled (432)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when an LI mirror source Operational State changes from Down to Up.		
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 39-528 liSourceFilterAssignReject

Alarm	Attributes	Applicable major releases
Name: liSourceFilterAssignReject (557) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMgmtSite	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceFilterAssignReject (427)	Unspecified
<b>Description:</b> The alarm is raised when an operator tries to modify a filter that is in use by LI.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-529 liSourceFilterAssignWarn

Alarm	Attributes	Applicable major releases
Name: liSourceFilterAssignWarn (559) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMgmtSite	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceFilterAssignWarn (429)	Unspecified
<b>Description:</b> The alarm is raised when an operator assigns a mirror filter that is in use by LI and the assignment may be overruled.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-530 liSourceFilterChanged

Alarm	Attributes	Applicable major releases
Name: liSourceFilterChanged (3313) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMgmtSite	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceLiFilterChanged (1152)	Unspecified
<b>Description:</b> The alarm is raised when a parameter of a filter which is referenced by Lawful Intercept (LI), or a parameter of one of its entry is changed. This notification may be triggered only if the LI filter lock is overruled, and one of the following actions occurs: -a filter referenced by LI has been deleted. -one of the parameters (default-action, scope) of a filter which is referenced by LI has been changed. -a filter which is referenced by LI is overwritten. -a new entry is created for a filter which is referenced by LI. -an entry of a filter which is referenced by LI is activated. -an entry is removed from a filter which is referenced by LI. -an entry of a filter which is referenced by LI is renumbered. -one of the parameters of an entry in a filter which is referenced by LI is changed.		
<b>Remedial action:</b> Informational - no corrective action required.		

## 39 – Unspecified NE alarms

Table 39-531 liSourceFilterOverruled

Alarm	Attributes	Applicable major releases
Name: liSourceFilterOverruled (558) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMgmtSite	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceFilterOverruled (428)	Unspecified
<b>Description:</b> The alarm is raised when the assignment of a mirror filter is overruled by another filter assignment.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-532 liSourceIP6FltrChangeReject

Alarm	Attributes	Applicable major releases
Name: liSourceIP6FltrChangeReject (4377) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMirrorSiteCfg	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceIP6FltrChangeReject (1562)	Unspecified
<b>Description:</b> The alarm is raised when an operator tries to modify an IPv6 filter or an IPv6 filter entry that is in use by LI.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-533 liSourceIPFltrChangeReject

Alarm	Attributes	Applicable major releases
Name: liSourceIPFltrChangeReject (552) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMirrorSiteCfg	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceIPFltrChangeReject (422)	Unspecified
<b>Description:</b> The alarm is raised when an operator tries to modify an IP filter or an IP filter entry that is in use by LI.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-534 liSourceMacFltrChangeReject

Alarm	Attributes	Applicable major releases
Name: liSourceMacFltrChangeReject (553) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LIMirrorSiteCfg	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceMacFltrChangeReject (423)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when an operator tries to modify a MAC filter or a MAC filter entry that is in use by LI.		
<b>Remedial action:</b> Informational - no corrective action required.		

(2 of 2)

Table 39-535 liSourceSapChange

Alarm	Attributes	Applicable major releases
Name: liSourceSapChange (560) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LISourceInterface	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceSapChange (430)	Unspecified
<b>Description:</b> The alarm is raised when a SAP that is associated with LI is modified or deleted.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-536 liSourceSubscriberChange

Alarm	Attributes	Applicable major releases
Name: liSourceSubscriberChange (561) Type: ConfigurationAlarm (15) Package: mirrorli Raised on class: mirrorli.LISourceSubscriberHost	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceSubChange (431)	Unspecified
<b>Description:</b> The alarm is raised when a subscriber that is associated with LI is modified or deleted.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-537 LocalRadioTxMuteAbnormalState

Alarm	Attributes	Applicable major releases
Name: LocalRadioTxMuteAbnormalState (3941) Type: localRadioTxMuteABNAlarm (117) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: LocalRadioTxMuteABNProblem (1523)	Unspecified
<b>Description:</b> The alarm is raised when abnormal state resulted due to local radio Tx is muted manually.		
<b>Remedial action:</b> The alarm is raised when abnormal state resulted due to local radio Tx is muted manually.		

## 39 – Unspecified NE alarms

Table 39-538 LODS

Alarm	Attributes	Applicable major releases
Name: LODS (805) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.IMALink	Severity: major Implicitly cleared: true Default probable cause: lossOfDelaySynchronization (571)	Unspecified
<b>Description:</b> The alarm is raised when a Loss of Delay Synchronization signal is detected on an ASAP MDA.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-539 LoopbackActivateAbnormalState (equipment)

Alarm	Attributes	Applicable major releases
Name: LoopbackActivateAbnormalState (3942) Type: loopbackActivateABNAlarm (118) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: LoopbackActivateABNProblem (1524)	Unspecified
<b>Description:</b> The alarm is raised when abnormal state resulted due to loopback activated.		
<b>Remedial action:</b> The alarm is raised when abnormal state resulted due to manual loopback activation by user.		

Table 39-540 LoopbackActivateAbnormalState (radioequipment)

Alarm	Attributes	Applicable major releases
Name: LoopbackActivateAbnormalState (3942) Type: loopbackActivateABNAlarm (118) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: LoopbackActivateABNProblem (1524)	Unspecified
<b>Description:</b> The alarm is raised when abnormal state resulted due to loopback activated.		
<b>Remedial action:</b> The alarm is raised when abnormal state resulted due to manual loopback activation by user.		

Table 39-541 LoopProblem

Alarm	Attributes	Applicable major releases
Name: LoopProblem (1145) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: loopProblem (851)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when there is a loss of communication command path between far end transmitter and local receiver .		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

(2 of 2)

Table 39-542 LossOfAlignment

Alarm	Attributes	Applicable major releases
Name: LossOfAlignment (629) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: lossOfAlignment (468)	Unspecified
<b>Description:</b> The alarm is raised when a Loss of Alignment signal is detected.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-543 LossOfCESoEthFrames

Alarm	Attributes	Applicable major releases
Name: LossOfCESoEthFrames (1168) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: lossOfCESoEthFrames (870)	Unspecified
<b>Description:</b> The alarm is raised when an Ethernet frame loss is detected on a CES.		
<b>Remedial action:</b> The alarm is raised when a loss occurs on CES over Ethernet Frames.		

Table 39-544 LossOfESMC

Alarm	Attributes	Applicable major releases
Name: LossOfESMC (2939) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: lossOfESMC (1131)	Unspecified
<b>Description:</b> The alarm is raised when a loss of ESMC signal failure is detected.		

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

(2 of 2)

Table 39-545 LossOfFrame (equipment)

Alarm	Attributes	Applicable major releases
Name: LossOfFrame (630) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: lossOfFrame (97)	Unspecified
<b>Description:</b> The alarm is raised when an LOF is detected on a port.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-546 LossOfPointer

Alarm	Attributes	Applicable major releases
Name: LossOfPointer (3623) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: lossOfPointer (612)	Unspecified
<b>Description:</b> The alarm is raised when a loss of pointer occurs		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-547 LossOfProtection (equipment)

Alarm	Attributes	Applicable major releases
Name: LossOfProtection (1169) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: lossOfProtection (871)	Unspecified
<b>Description:</b> The alarm is raised when an MPT radio protection loss occurs.		
<b>Remedial action:</b> The alarm is raised when a protection loss occurs on MPT Radio.		

Table 39-548 LossOfProtection (mpr)

Alarm	Attributes	Applicable major releases
Name: LossOfProtection (1169) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.VlanPathInstance	Severity: variable Implicitly cleared: true Default probable cause: lossOfProtection (871)	Unspecified
<b>Description:</b> The alarm is raised when a Loss of Protection occurs		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-549 LossOfRadioFrame

Alarm	Attributes	Applicable major releases
Name: LossOfRadioFrame (4828) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: LossOfFrame (1904)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a Loss of Radio Frame from Radio Path		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-550 LossOfRadioFramesAlignment

Alarm	Attributes	Applicable major releases
Name: LossOfRadioFramesAlignment (4829) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: LossOfAlignment (1917)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a Loss of Radio Frames Alignment		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-551 LossOfSignal (equipment)

Alarm	Attributes	Applicable major releases
Name: LossOfSignal (631) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: lossOfSignal (99)	Unspecified

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a Loss of Signal is detected on a port.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

(2 of 2)

Table 39-552 LowSwitchFabricCap

Alarm	Attributes	Applicable major releases
Name: LowSwitchFabricCap (5178) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.Card	Severity: major Implicitly cleared: true Default probable cause: LowSwitchFabricCapacity (2094)	Unspecified
<b>Description:</b> The alarm is raised when the total switch fabric capacity becomes less than the line card capacity due to link failures. At least one of the taps on the Card is below 100% capacity.		
<b>Remedial action:</b> 1. Make sure that the hardware switching fabric capacity is more than the line card capacity. 2. Please reboot the card and check if it resolves the problem. If problem persists after reboot, please contact Alcatel-Lucent support for assistance.		

Table 39-553 LpsLearnMac

Alarm	Attributes	Applicable major releases
Name: LpsLearnMac (519) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LearnedPortSecurity	Severity: warning Implicitly cleared: true Default probable cause: portLearnedBridgedMAC (394)	Unspecified
<b>Description:</b> The alarm is raised when an LPS port learns a bridged MAC address.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-554 LpsPortUpAfterLearningWindowExpired

Alarm	Attributes	Applicable major releases
Name: LpsPortUpAfterLearningWindowExpired (517) Type: learnedPortSecurityAlarm (51) Package: lps Raised on class: lps.LPSConfiguration	Severity: warning Implicitly cleared: true Default probable cause: portUpAfterLearningWindowExpired (392)	Unspecified
<b>Description:</b> The alarm is raised either when an LPS port is enabled after the learning window expires and MAC address learning on the port is disabled, or when the learning window expires with slice and port values of 0.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-555 LsdbOverflow

Alarm	Attributes	Applicable major releases
Name: LsdbOverflow (53) Type: equipmentAlarm (3) Package: ospf Raised on class: ospf.Site	Severity: major Implicitly cleared: false Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> The alarm is raised when the number of received external LSAs exceeds the configured number allowed. By default, there is no limit. The alarm information includes the configured LSDB limit and one of the following LSDB overflow states: - 0, which means no overflow - 1, which means nearing limit - 2, which means limit exceeded		
<b>Remedial action:</b> Informational - the number of received external LSAs exceeds the configured number allowed. The alarm will also be raised when external LSAs is nearing limit.		

Table 39-556 LudbDhcpHostGroupIfTooLong

Alarm	Attributes	Applicable major releases
Name: LudbDhcpHostGroupIfTooLong (4627) Type: LudbDhcpHostGroupIfTooLongAlarm (129) Package: localuserdb Raised on class: localuserdb.DhcpHost	Severity: major Implicitly cleared: false Default probable cause: ludbDhcpHostGroupIfTooLong (1895)	Unspecified
<b>Description:</b> The alarm is raised when the default MSAP group interface name of a DHCP Host, concatenated with the port ID is longer than 32 characters.		
<b>Remedial action:</b> The string configured in DHCP Host as default MSAP Group Interface Name concatenated with the port-id is longer than 32 characters. It is an invalid configuration since it exceeds the length allowed for a Group Interface Name. (Please) Reconfigure the MSAP Group Interface Name or refer to the Local User Database documentation for assistance.		

Table 39-557 LudbPppHostGroupIfTooLong

Alarm	Attributes	Applicable major releases
Name: LudbPppHostGroupIfTooLong (4628) Type: LudbPppHostGroupIfTooLongAlarm (130) Package: localuserdb Raised on class: localuserdb.PppHost	Severity: major Implicitly cleared: false Default probable cause: ludbPppHostGroupIfTooLong (1896)	Unspecified
<b>Description:</b> The alarm is raised when the default MSAP group interface name of a PPP host, concatenated with the port ID is longer than 32 characters.		
<b>Remedial action:</b> The string configured in PPP Host as default MSAP Group Interface Name concatenated with the port-id is longer than 32 characters. It is an invalid configuration since it exceeds the length allowed for a Group Interface Name. (Please) Reconfigure the MSAP Group Interface Name or refer to the Local User Database documentation for assistance.		

## 39 – Unspecified NE alarms

Table 39-558 MacAccountingLimitReached (rtr)

Alarm	Attributes	Applicable major releases
Name: MacAccountingLimitReached (4907) Type: macAccountingAlarm (132) Package: rtr Raised on class: rtr.NetworkInterface	Severity: warning Implicitly cleared: true Default probable cause: macAccountingLimitReached (1964)	Unspecified
<b>Description:</b> The alarm is raised when the system detects that the MAC accounting table is full.		
<b>Remedial action:</b> This alarm can be cleared when the used MAC entries are deleted by disabling MAC accounting on a particular interface or through manual intervention with a user command such as clear router interface mac.		

Table 39-559 MacAccountingLimitReached (service)

Alarm	Attributes	Applicable major releases
Name: MacAccountingLimitReached (4907) Type: macAccountingAlarm (132) Package: service Raised on class: service.L3AccessInterface	Severity: warning Implicitly cleared: true Default probable cause: macAccountingLimitReached (1964)	Unspecified
<b>Description:</b> The alarm is raised when the system detects that the MAC accounting table is full.		
<b>Remedial action:</b> This alarm can be cleared when the used MAC entries are deleted by disabling MAC accounting on a particular interface or through manual intervention with a user command such as clear router interface mac.		

Table 39-560 MacPinningViolation

Alarm	Attributes	Applicable major releases
Name: MacPinningViolation (443) Type: serviceAlarm (16) Package: vpls Raised on class: vpls.AbstractSite	Severity: warning Implicitly cleared: false Default probable cause: macAddressPinned (348)	Unspecified
<b>Description:</b> The alarm is raised when an attempt is made to assign a pinned MAC address to another L2 access interface or spoke SDP binding in an M-VPLS or VPLS.		
<b>Remedial action:</b> Use a MAC address that is not already pinned.		

Table 39-561 ManagedRouteAddFailed

Alarm	Attributes	Applicable major releases
Name: ManagedRouteAddFailed (5130) Type: processingErrorAlarm (81) Package: rtr Raised on class: rtr.RoutingInstanceSite	Severity: minor Implicitly cleared: false Default probable cause: tmnxVRtrManagedRouteAddFailed (2060)	Unspecified
<b>Description:</b> The alarm is raised when a managed route could not be installed.		
<b>Remedial action:</b> Check the additional text of the alarm for more details.		

Table 39-562 ManagedRouteFailedRetryThresholdCrossed

Alarm	Attributes	Applicable major releases
Name: ManagedRouteFailedRetryThresholdCrossed (397) Type: topologyAlarm (34) Package: topology Raised on class: topology.RouteManager	Severity: major Implicitly cleared: true Default probable cause: managedRouteCouldNotBeSetup (298)	Unspecified
<b>Description:</b> The alarm is raised when the 5650 CPAM cannot set up a managed route after the number of attempts specified by the cpamManagedRoute problematicThresholdAlarmAfter value in the nms-server.xml file. The alarm is raised if the cpamManagedRoute problematicRetryStrategy value in nms-server.xml is set to countdown. The alarm is not raised if the problematicRetryStrategy value is set to the default of reactive.		
<b>Remedial action:</b> Informational - The Retry strategy can be modified in nms-server.xml. This alarm is not raised for the default retry strategy, reactive.		

Table 39-563 ManagedRouteRetryAttemptsExhausted

Alarm	Attributes	Applicable major releases
Name: ManagedRouteRetryAttemptsExhausted (398) Type: topologyAlarm (34) Package: topology Raised on class: topology.RouteManager	Severity: major Implicitly cleared: false Default probable cause: managedRouteCouldNotBeSetup (298)	Unspecified
<b>Description:</b> The alarm is raised when the 5650 CPAM stops trying to set up a managed route after the number of attempts specified by the cpamManagedRoute problematicDeadAfter value in the nms-server.xml file. The alarm is raised if the cpamManagedRoute problematicRetryStrategy value in nms-server.xml is set to countdown. The alarm is not raised if the problematicRetryStrategy value is set to the default value of reactive.		
<b>Remedial action:</b> Informational - The Retry strategy can be modified in nms-server.xml. This alarm is not raised for the default retry strategy, reactive.		

## 39 – Unspecified NE alarms

Table 39-564 ManagementVlanConflict

Alarm	Attributes	Applicable major releases
Name: ManagementVlanConflict (215) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Vlan	Severity: warning Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	Unspecified
<b>Description:</b> The alarm is raised when a management VLAN ID is in use by another service type.		
<b>Raising condition:</b> ('managementVlanConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('managementVlanConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that the VLAN ID of this Management Service is not used on any other type of VLAN Service.		

Table 39-565 ManualCpaaSwitchover

Alarm	Attributes	Applicable major releases
Name: ManualCpaaSwitchover (5143) Type: configurationAlarm (11) Package: topology Raised on class: topology.Cpaa	Severity: warning Implicitly cleared: false Default probable cause: CPAASwitchover (2066)	Unspecified
<b>Description:</b> The alarm is raised when an operator has manually initiated a switchover. This alarm is not self clearing. Another switchover will not be permitted for 10 mins.		
<b>Remedial action:</b> Manual Switchover has been executed.		

Table 39-566 MaxFecLimitReached

Alarm	Attributes	Applicable major releases
Name: MaxFecLimitReached (6448) Type: processingErrorAlarm (81) Package: ldp Raised on class: ldp.Peer	Severity: major Implicitly cleared: true Default probable cause: MaxFecLimitReached (2448)	Unspecified
<b>Description:</b> The alarm is raised when the number of FECs accepted from the peer has reached the value specified by fecLimit. The alarm is cleared when a new MaxFecThresholdChange notification is received.		
<b>Remedial action:</b> Number of FECs accepted from the peer has reached the value specified by FEC Limit. Appropriate configuration changes in local or peer LSR will be required.		

Table 39-567 MaxFecThresholdChange

Alarm	Attributes	Applicable major releases
Name: MaxFecThresholdChange (6449) Type: processingErrorAlarm (81) Package: ldp Raised on class: ldp.Peer	Severity: warning Implicitly cleared: true Default probable cause: MaxFecThresholdChange (2449)	Unspecified
<b>Description:</b> The alarm is raised when the number of FECs accepted from the peer has exceeded the threshold percent of the value specified by fecLimit. The alarm is cleared when the number of FECs received drops below the threshold percent of the value specified by fecLimit.		
<b>Remedial action:</b> Number of FECs accepted from the peer has exceeded or dropped below the threshold percent of the value specified by FEC Limit. Appropriate configuration changes in local or peer LSR will be required.		

Table 39-568 MaxNumExportRoutesReached

Alarm	Attributes	Applicable major releases
Name: MaxNumExportRoutesReached (1116) Type: ProtocolAlarm (1) Package: vprn Raised on class: vprn.AbstractSite	Severity: minor Implicitly cleared: true Default probable cause: MaxNumExportRoutesReached (828)	Unspecified
<b>Description:</b> The alarm is raised when the number of routes exported from a route table to a VRF reaches the configured maximum.		
<b>Remedial action:</b> Informational. The threshold configured should be revisited to ensure that it is not set to low given the number of routes that are being received. If the threshold is set close to the maximum number of routes supported by the NE then it is probable that there is an issue with another NE or VRF instance in the network. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-569 MaxNumIpv6RoutesReached

Alarm	Attributes	Applicable major releases
Name: MaxNumIpv6RoutesReached (505) Type: ProtocolAlarm (1) Package: l3fwd Raised on class: l3fwd.ServiceSite	Severity: major Implicitly cleared: true Default probable cause: MaxNumIpv6RouteReached (389)	Unspecified
<b>Description:</b> The alarm is raised when the number of IPv6 routes in a VPRN exceeds the configured maximum.		
<b>Remedial action:</b> The number of IPv6 routes has exceeded the configured maximum for the VPRN - the route table must be examined to ensure that all of the routes in the table are valid and not the result of a misconfiguration in the VPRN service. If all of the routes appear to be valid then the value used as the maximum value should be revisited.		

## 39 – Unspecified NE alarms

Table 39-570 MaxNumMcastRoutes

Alarm	Attributes	Applicable major releases
Name: MaxNumMcastRoutes (206) Type: ProtocolAlarm (1) Package: I3fwd Raised on class: I3fwd.Site	Severity: major Implicitly cleared: true Default probable cause: MaxNumMcastRoutesReached (160)	Unspecified
<b>Description:</b> The alarm is raised when the number of multicast routes in a VPRN exceeds the configured maximum.		
<b>Remedial action:</b> Informational. The number of multicast routes in a VPRN exceeds the configured maximum. The value used as the threshold value should be revisited.		

Table 39-571 MaxNumRoutesReached

Alarm	Attributes	Applicable major releases
Name: MaxNumRoutesReached (1198) Type: ProtocolAlarm (1) Package: I3fwd Raised on class: I3fwd.ServiceSite	Severity: major Implicitly cleared: false Default probable cause: MaxNumRoutesReached (898)	Unspecified
<b>Description:</b> The alarm is raised when the number of routes in a VPRN reaches the maximum number of routes specified in the VPRN configuration. The alarm information includes the number of routes, the specified maximum, and the route type, which is either IPv4 or IPv6.		
<b>Remedial action:</b> Informational. The threshold configured should be revisited to ensure that it is not set to low given the number of routes that are being received. If the threshold is set close to the maximum number of routes supported by the NE then it is probable that there is an issue with another NE or VRF instance in the network. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-572 MaxNumV6ExportRoutesReached

Alarm	Attributes	Applicable major releases
Name: MaxNumV6ExportRoutesReached (4398) Type: ProtocolAlarm (1) Package: vprn Raised on class: vprn.AbstractSite	Severity: minor Implicitly cleared: true Default probable cause: MaxNumV6ExportRoutesReached (1575)	Unspecified
<b>Description:</b> The alarm is raised when the number of IPv6 routes exported from a route table to a VRF reaches the configured maximum.		
<b>Remedial action:</b> Informational. The threshold configured should be revisited to ensure that it is not set to low given the number of routes that are being received. If the threshold is set close to the maximum number of routes supported by the NE then it is probable that there is an issue with another NE or VRF instance in the network. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-573 MaxPdnConnections

Alarm	Attributes	Applicable major releases
Name: MaxPdnConnections (4795) Type: EpcAlarm (59) Package: lte Raised on class: lte.PdnApn	Severity: major Implicitly cleared: true Default probable cause: thresholdCrossed (12)	Unspecified
<b>Description:</b> The alarm is generated when the maximum number of Packet Data Network (PDN) connections for this Access Point Name (APN) on the gateway is reached.		
<b>Remedial action:</b> Maximum number of PDN connections for this APN on the gateway is reached. To accept new PDN connections, system has to wait until the number of PDN connections goes below the value of PdnApnMaxPdnConnections.		

Table 39-574 McacPolicyDropped (igmp)

Alarm	Attributes	Applicable major releases
Name: McacPolicyDropped (341) Type: communicationsAlarm (4) Package: igmp Raised on class: igmp.Interface	Severity: major Implicitly cleared: false Default probable cause: igmpGroupOnSapDropped (246)	Unspecified
<b>Description:</b> The alarm is raised when an IGMP group is dropped because a multicast CAC policy is applied.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-575 McacPolicyDropped (pim)

Alarm	Attributes	Applicable major releases
Name: McacPolicyDropped (341) Type: communicationsAlarm (4) Package: pim Raised on class: pim.Interface	Severity: major Implicitly cleared: false Default probable cause: pimGroupOnSapDropped (266)	Unspecified
<b>Description:</b> The alarm is raised when a PIM group is dropped because a multicast CAC policy is applied.		
<b>Remedial action:</b> Informational only.		

## 39 – Unspecified NE alarms

Table 39-576 McacPolicyDropped (svt)

Alarm	Attributes	Applicable major releases
Name: McacPolicyDropped (341) Type: communicationsAlarm (4) Package: svt Raised on class: svt.SdpBindingIgmppSnpgCfg	Severity: major Implicitly cleared: false Default probable cause: igmpGroupOnSdpBindDropped (265)	Unspecified
<b>Description:</b> The alarm is raised when an IGMP group is dropped because a multicast CAC policy is applied to an SDP binding.		
<b>Remedial action:</b> Informational only.		

Table 39-577 McacPolicyDropped (vpls)

Alarm	Attributes	Applicable major releases
Name: McacPolicyDropped (341) Type: communicationsAlarm (4) Package: vpls Raised on class: vpls.L2AccessInterfaceIgmppSnpgCfg	Severity: major Implicitly cleared: false Default probable cause: igmpGroupOnSapDropped (246)	Unspecified
<b>Description:</b> The alarm is raised when an IGMP group is removed from a SAP because a multicast CAC policy is applied.		
<b>Remedial action:</b> Informational only.		

Table 39-578 McastRoutesMidLevelThresholdReached

Alarm	Attributes	Applicable major releases
Name: McastRoutesMidLevelThresholdReached (207) Type: ProtocolAlarm (1) Package: I3fwd Raised on class: I3fwd.Site	Severity: minor Implicitly cleared: false Default probable cause: MidLevelThresholdReached (161)	Unspecified
<b>Description:</b> The alarm is raised when the number of multicast routes in a VPRN exceeds the configured threshold value. The alarm information includes the number of multicast routes and the threshold value.		
<b>Remedial action:</b> the number of multicast routes in a VPRN exceeds the configured threshold value. The value used as the threshold value should be revisited.		

Table 39-579 McIPsecTunnelGroupSyncTagMisconfigured

Alarm	Attributes	Applicable major releases
Name: McIPsecTunnelGroupSyncTagMisconfigured (4817) Type: redundancyAlarm (52) Package: multichassis Raised on class: multichassis.MultiChassisIPSecGroup	Severity: major Implicitly cleared: true Default probable cause: ipsecGroupSyncTagMisconfigure (1902)	Unspecified
<b>Description:</b> The alarm is raised when a peer of MC IPsec tunnel groups has unconfigured or mismatched synchronization tag.		
<b>Raising condition:</b> (('Synchronization Tag' NOT EQUAL 'Synchronization Tag') OR (('Synchronization Tag' EQUAL '\\"')) OR ('Synchronization Tag' EQUAL '\\"'))		
<b>Clearing condition:</b> (('Synchronization Tag' EQUAL 'Synchronization Tag') AND (('Synchronization Tag' NOT EQUAL '\\"')) AND ('Synchronization Tag' NOT EQUAL '\\"'))		
<b>Remedial action:</b> Check if the synchronization tag has been configured for the MC IPsec tunnel group peer and they matches.		

Table 39-580 McLagSourceBMacLsbMisconfigured (lag)

Alarm	Attributes	Applicable major releases
Name: McLagSourceBMacLsbMisconfigured (776) Type: configurationAlarm (11) Package: lag Raised on class: lag.MultiChassisLag	Severity: major Implicitly cleared: true Default probable cause: McLagSourceBMacLsbMisconfigured (551)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a mismatch in the last 16 bits of the source backbone MAC address on the peer device. This mismatch prevents PBB access dual homing from operating.		
<b>Raising condition:</b> ('srcBMacLSBMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('srcBMacLSBMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> Check the MAC Address LSB is correct for source backbone address.		

Table 39-581 McLagSourceBMacLsbMisconfigured (multichassis)

Alarm	Attributes	Applicable major releases
Name: McLagSourceBMacLsbMisconfigured (776) Type: configurationAlarm (11) Package: multichassis Raised on class: multichassis.MultiChassisLag	Severity: major Implicitly cleared: true Default probable cause: McLagSourceBMacLsbMisconfigured (551)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a mismatch in the last 16 bits of the source backbone MAC address on the peer device. This mismatch prevents PBB access dual homing from operating.		
<b>Raising condition:</b> ('srcBMacLSBMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('srcBMacLSBMisconfigured' EQUAL 'false')		

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Check the MAC Address LSB is correct for source backbone address.		

(2 of 2)

Table 39-582 McMobileGeoRedChgInfo

Alarm	Attributes	Applicable major releases
Name: McMobileGeoRedChgInfo (4380) Type: equipmentAlarm (3) Package: multichassis Raised on class: multichassis.MultiChassisPeerMobileGateway	Severity: warning Implicitly cleared: false Default probable cause: equipmentAlarm (1565)	Unspecified
<b>Description:</b> The alarm is raised when the mobile-gateway or the CPM has changed its geo-redundancy state or the peer's connection status has changed.		
<b>Remedial action:</b> Check what caused this state change. Bring the peer and/or peer-link up and ensure that the chassis and CPM geo-redundancy states are 'hot'.		

Table 39-583 McMobileIssuStateChange

Alarm	Attributes	Applicable major releases
Name: McMobileIssuStateChange (5119) Type: integrityViolation (85) Package: multichassis Raised on class: multichassis.MultiChassisPeerMobileSpecifics	Severity: warning Implicitly cleared: true Default probable cause: mismatchPeerSets (199)	Unspecified
<b>Description:</b> The alarm is raised when ISSU state between the mobile-gateways participating in the geo-redundancy changes		
<b>Remedial action:</b> Check what caused this change in ISSU state and correct the issue for geo-redundancy to work.		

Table 39-584 McOmcrClientNumEntriesHigh

Alarm	Attributes	Applicable major releases
Name: McOmcrClientNumEntriesHigh (8057) Type: communicationsAlarm (4) Package: multichassis Raised on class: multichassis.PeerSynchronizationProtocol	Severity: minor Implicitly cleared: false Default probable cause: McOmcrClientNumEntriesHigh (2458)	Unspecified
<b>Description:</b> The alarm is raised when the system is configured as an OMCR warm standby system, and the total number of entries in the MCS database for a particular application becomes high. When the 80% and 90% threshold is crossed, there is no effect. When the 100% threshold is exceeded, the peer indicated by the values of tmnxMcPeerIpType and tmnxMcPeerIpAddr is shut down automatically by this system.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Reconfigure the oversubscribed multi chassis redundancy set up to reduce the number of entries protected by this system.		

(2 of 2)

Table 39-585 McPathBlackHole

Alarm	Attributes	Applicable major releases
Name: McPathBlackHole (2940) Type: resourceAlarm (28) Package: equipment Raised on class: equipment.DaughterCard	Severity: critical Implicitly cleared: true Default probable cause: resourceLimitReached (131)	Unspecified
<b>Description:</b> The alarm is raised when a multicast (S,G) specification enters a black-hole state.		
<b>Remedial action:</b> The alarm is raised when a source, group (S,G) goes into a black-hole state. The situation may occur when a certain source, group(S,G) has a bandwidth higher than it's configured maximum and no path/plane that can accommodate for the bandwidth of the new stream. This can be remedied by increasing the path limit(iom2 and older) or plane limit (iom3 and newer) at the Daughter Card tab or by modifying Ingress Multicast Path Management policy which assigned to the card.		

Table 39-586 McPathsBlackHole

Alarm	Attributes	Applicable major releases
Name: McPathsBlackHole (4903) Type: resourceAlarm (28) Package: equipment Raised on class: equipment.DaughterCard	Severity: critical Implicitly cleared: false Default probable cause: resourceLimitReached (131)	Unspecified
<b>Description:</b> The alarm is raised when one or more multicast (S,G) specifications enters a black-hole state.		
<b>Remedial action:</b> The alarm is raised when one or more source, group (S,G) goes into a black-hole state. The situation may occur when a certain source, group (S,G) has a bandwidth higher than it's configured maximum and no path/plane that can accommodate for the bandwidth of the new stream. This can be remedied by increasing the path limit(iom2 and older) or plane limit (iom3 and newer) at the Daughter Card tab or by modifying Ingress Multicast Path Management policy which assigned to the card.		

Table 39-587 MD5AuthFailure

Alarm	Attributes	Applicable major releases
Name: MD5AuthFailure (2934) Type: communicationsAlarm (4) Package: bgp Raised on class: bgp.Md5Key	Severity: major Implicitly cleared: false Default probable cause: md5AuthFailure (1128)	Unspecified
<b>Description:</b> The alarm is raised when an incoming packet is dropped because of BGP MD5 key authentication failure.		

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has been made which must be corrected. The MD5 authentication key configured is incorrect.		

(2 of 2)

Table 39-588 MFibTableSizeLimitReached

Alarm	Attributes	Applicable major releases
Name: MFibTableSizeLimitReached (190) Type: resourceAlarm (28) Package: vpls Raised on classes: <ul style="list-style-type: none"> <li>vpls.AbstractTlsSite</li> <li>vpls.AbstractBSite</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: resourceLimitReached (131)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM receives a svcTlsMfibTableFullAlarmRaised trap for a VPLS site. The alarm clears when the 5620 SAM receives a svcTlsMfibTableFullAlarmCleared trap for the site.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why		

Table 39-589 MGMCSwitchOverStatusNotify

Alarm	Attributes	Applicable major releases
Name: MGMCSwitchOverStatusNotify (4814) Type: processingErrorAlarm (81) Package: multichassis Raised on class: multichassis.MultiChassisPeerMobileGateway	Severity: info Implicitly cleared: false Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> The alarm is raised when the status of switchover enforced on the mobile-gateway in geo-redundancy changes		
<b>Remedial action:</b> Check switchover failure reason and correct the issue in order to perform switchover.		

Table 39-590 MgwPeerConnectionStateAlarm

Alarm	Attributes	Applicable major releases
Name: MgwPeerConnectionStateAlarm (4399) Type: connectionStateChangeAlarm (125) Package: wlangw Raised on class: wlangw.MgwPeer	Severity: minor Implicitly cleared: false Default probable cause: MgwPeerConnectionStateAlarm (1576)	Unspecified
<b>Description:</b> This alarm is raised when the state of a connection with a Mobile Gateway has changed. [CAUSE] The state of a connection with a Mobile Gateway has changed to Fault. [EFFECT] The effect depends on the new state. [RECOVERY] No recovery is required on this system.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Fault occurred on the connection with Mobile Gateway. Check the physical connection and interfaces between Mobile Gateway and WLAN Gateway.		

(2 of 2)

Table 39-591 MgwPeerGtpMismatchAlarm

Alarm	Attributes	Applicable major releases
Name: MgwPeerGtpMismatchAlarm (5144) Type: configurationAlarm (11) Package: wlangw Raised on class: wlangw.MgwPeer	Severity: minor Implicitly cleared: false Default probable cause: MgwPeerGtpMismatchAlarm (2067)	Unspecified
<b>Description:</b> This alarm is raised when the Negotiated QoS profile RADIUS attribute contains a release indicator either for GGSN or PGW that does not correspond to the interface type actually used in GTP. e.g. the release indicator is for GGSN and the interface type used in GTP is S2a/S2b while it should be Gn.		
<b>Remedial action:</b> The RADIUS Server configuration should be corrected to match the MgwPeer interface type actually used in GTP.		

Table 39-592 MicroBFDSessionDown

Alarm	Attributes	Applicable major releases
Name: MicroBFDSessionDown (4997) Type: InkaggAlarm (56) Package: lag Raised on class: lag.Interface	Severity: minor Implicitly cleared: true Default probable cause: LagMemberMicroBfdSessionStateChanged (2051)	Unspecified
<b>Description:</b> The alarm is raised when there is a change in the state of the micro-BFD session of a link (port) of the LAG. When the state is 'idle', 'failed', 'waitingFwd', 'up', then the port is forwarding traffic. When the state is 'waiting', 'down', then the port is not forwarding traffic.		
<b>Remedial action:</b> Micro BFD Session state of one of the LAG links is changed. Please check the LAG's BFD configuration or the configuration of the LAG and the Ports in it.		

Table 39-593 MidLevelIPv6RoutesReached

Alarm	Attributes	Applicable major releases
Name: MidLevelIPv6RoutesReached (506) Type: ProtocolAlarm (1) Package: I3fwd Raised on class: I3fwd.ServiceSite	Severity: minor Implicitly cleared: false Default probable cause: MidLevelIPv6RoutesReached (390)	Unspecified
<b>Description:</b> The alarm is raised when the number of IPv6 routes in a VPRN exceeds the configured threshold value. The alarm information includes the number of IPv6 routes and the threshold value.		

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> The number of IPv6 routes has exceeded the configured maximum for the VPRN - the route table must be examined to ensure that all of the routes in the table are valid and not the result of a misconfiguration in the VPRN service. If all of the routes appear to be valid then the value used as the threshold value should be revisited.		

(2 of 2)

Table 39-594 MidLevelRoutesReached

Alarm	Attributes	Applicable major releases
Name: MidLevelRoutesReached (1199) Type: ProtocolAlarm (1) Package: I3fwd Raised on class: I3fwd.ServiceSite	Severity: minor Implicitly cleared: false Default probable cause: MidLevelRoutesReached (899)	Unspecified
<b>Description:</b> The alarm is raised when the number of routes in a VPRN exceeds the threshold specified in the VPRN configuration. The threshold value is a percentage of the maximum number of routes specified in the VPRN configuration. The alarm information includes the number of routes and the threshold value.		
<b>Remedial action:</b> Informational. The threshold configured should be revisited to ensure that it is not set to low given the number of routes that are being received. If the threshold is set close to the maximum number of routes supported by the NE then it is probable that there is an issue with another NE or VRF instance in the network. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-595 MirrorDestinationMisconfigured

Alarm	Attributes	Applicable major releases
Name: MirrorDestinationMisconfigured (209) Type: configurationAlarm (11) Package: mirror Raised on class: mirror.Mirror	Severity: major Implicitly cleared: true Default probable cause: mirrorDestinationMisconfigured (162)	Unspecified
<b>Description:</b> The alarm is raised when more than two destination Sites are configured for a service mirror.		
<b>Raising condition:</b> ('destinationMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('destinationMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> Delete destination site so that there are two or less destination sites in one Mirror service.		

Table 39-596 MirrorEncapsulationTypeInconsistent

Alarm	Attributes	Applicable major releases
Name: MirrorEncapsulationTypeInconsistent (217) Type: configurationAlarm (11) Package: mirror Raised on class: mirror.Mirror	Severity: major Implicitly cleared: true Default probable cause: mirrorEncapsulationTypeInconsistent (171)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when the encapsulation types of the mirror sites differ.		
<b>Raising condition:</b> ('encapsulationTypeInconsistent' EQUAL 'true')		
<b>Clearing condition:</b> ('encapsulationTypeInconsistent' EQUAL 'false')		
<b>Remedial action:</b> Reconfigure the 'Encapsulation Type' for the sites (delete and re-add the sites if not configurable) so that the 'Encapsulation Type' are the same in one Mirror service.		

(2 of 2)

Table 39-597 MisconfiguredInflow

Alarm	Attributes	Applicable major releases
Name: MisconfiguredInflow (1067) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.VlanPathInstance	Severity: major Implicitly cleared: true Default probable cause: misconfiguredInflow (809)	Unspecified
<b>Description:</b> The alarm is raised when the ports in a service use different inflow clock sources.		
<b>Remedial action:</b> Configured inflow is not in sync with the configuration on the NE. Please check for Mismatch.		

Table 39-598 mismatchAnyCastRPTypes

Alarm	Attributes	Applicable major releases
Name: mismatchAnyCastRPTypes (270) Type: configurationAlarm (11) Package: pim Raised on class: pim.AnyCastRP	Severity: warning Implicitly cleared: false Default probable cause: mismatchAnyCastRPTypes (202)	Unspecified
<b>Description:</b> The alarm is raised when there is an anycast RP type mismatch.		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Please check to make sure the global Virtual Anycast RP service type and this PIM Anycast RP service type are consistent.		

Table 39-599 mismatchBackupAddress

Alarm	Attributes	Applicable major releases
Name: mismatchBackupAddress (279) Type: configurationAlarm (11) Package: vrrp Raised on class: vrrp.VRInstance	Severity: minor Implicitly cleared: false Default probable cause: mismatchBackupAddress (212)	Unspecified
<b>Description:</b> The alarm is raised when two VR instances in a VR have different backup addresses.		

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Reconfigure the backup addresses for the peer VRRP instances so that they are the same.		

(2 of 2)

Table 39-600 mismatchSubnets

Alarm	Attributes	Applicable major releases
Name: mismatchSubnets (280) Type: configurationAlarm (11) Package: vrrp Raised on class: vrrp.VRInstance	Severity: major Implicitly cleared: true Default probable cause: mismatchSubnets (213)	Unspecified
<b>Description:</b> The alarm is raised when two VR Instances in a VR have backup addresses that are in different subnets.		
<b>Remedial action:</b> Reconfigure the ip addresses for the peer VRRP instances so that they are in the same subnets.		

Table 39-601 mismatchVrrpTypes

Alarm	Attributes	Applicable major releases
Name: mismatchVrrpTypes (278) Type: configurationAlarm (11) Package: vrrp Raised on class: vrrp.VRInstance	Severity: minor Implicitly cleared: true Default probable cause: mismatchVrrpTypes (211)	Unspecified
<b>Description:</b> The alarm is raised when two VR instances in a VR are of different types, for example, when one VR instance type is Network and the other is IES.		
<b>Raising condition:</b> (('VRRP Type' NOT EQUAL 'VRRP Type'))		
<b>Clearing condition:</b> (('VRRP Type' EQUAL 'VRRP Type'))		
<b>Remedial action:</b> Reconfigure the VRRP instance peers so that they are from the same type of interfaces (Network, IES or VPRN).		

Table 39-602 MissingFallingEvent

Alarm	Attributes	Applicable major releases
Name: MissingFallingEvent (414) Type: configurationAlarm (11) Package: rmon Raised on class: rmon.Alarm	Severity: major Implicitly cleared: false Default probable cause: incompleteConfig (225)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM cannot find the falling event object that is named in an RMON policy alarm definition.		
<b>Raising condition:</b> ('Missing Falling Event' EQUAL 'true')		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Clearing condition:</b> ('Missing Falling Event' EQUAL 'false')		
<b>Remedial action:</b> Cannot find the falling event object that is named in an RMON policy alarm definition. Please create the required event.		

(2 of 2)

Table 39-603 MissingHopConfiguration

Alarm	Attributes	Applicable major releases
Name: MissingHopConfiguration (350) Type: configurationAlarm (11) Package: mpls Raised on class: mpls.StaticLsp	Severity: warning Implicitly cleared: true Default probable cause: MissingHopConfiguration (252)	Unspecified
<b>Description:</b> The alarm is raised when a static LSP is created without hops.		
<b>Remedial action:</b> Need to configure static hops to the destination.		

Table 39-604 MissingRisingEvent

Alarm	Attributes	Applicable major releases
Name: MissingRisingEvent (413) Type: configurationAlarm (11) Package: rmon Raised on class: rmon.Alarm	Severity: major Implicitly cleared: false Default probable cause: incompleteConfig (225)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM cannot find the rising event object that is named in an RMON policy alarm definition.		
<b>Raising condition:</b> ('Missing Rising Event' EQUAL 'true')		
<b>Clearing condition:</b> ('Missing Rising Event' EQUAL 'false')		
<b>Remedial action:</b> Cannot find the rising event object that is named in an RMON policy alarm definition. Please create the required event.		

Table 39-605 missingStaticRPConfigurations

Alarm	Attributes	Applicable major releases
Name: missingStaticRPConfigurations (268) Type: configurationAlarm (11) Package: pim Raised on class: pim.VirtualAnyCastRP	Severity: warning Implicitly cleared: true Default probable cause: missingStaticRPConfigurations (200)	Unspecified
<b>Description:</b> The alarm is raised when a static RP configuration is missing.		

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Please check the global Virtual Anycast RP configuration and its operational status flag so that the Static RP and Group Range(s) are all configured.		

(2 of 2)

Table 39-606 MissSpokeConfiguration

Alarm	Attributes	Applicable major releases
Name: MissSpokeConfiguration (218) Type: configurationAlarm (11) Package: vpls Raised on class: vpls.AbstractVpls	Severity: warning Implicitly cleared: true Default probable cause: missSpokeConfiguration (172)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a spoke SDP binding between two sites in one M-VPLS or VPLS. The alarm is not raised by the 5620 SAM, Release 4.0 or later.		
<b>Raising condition:</b> ('missSpokeConfiguration' EQUAL 'true')		
<b>Clearing condition:</b> ('missSpokeConfiguration' EQUAL 'false')		
<b>Remedial action:</b> Deprecated since Rel.4.0		

Table 39-607 MldGrpIfSapCModeRxQueryMism

Alarm	Attributes	Applicable major releases
Name: MldGrpIfSapCModeRxQueryMism (5390) Type: configurationAlarm (11) Package: mld Raised on class: mld.GrpInterfaceSap	Severity: warning Implicitly cleared: false Default probable cause: InvalidCompatibilityModeofQueryReceived (2106)	Unspecified
<b>Description:</b> The alarm is raised when there is a mismatch between the compatible mode of the MLD SAP and the version of the received query. It is generated when the SAP is in MLDv1 compatible mode but it receives an MLDv2. It will include information on the configured version of the compatibility mode of the SAP, and the version of the received query.		
<b>Remedial action:</b> Change the MLD Version attribute on the MLD Group Interface to match the MLD host version.		

Table 39-608 MldGrpIfSapMaxGroupsLimitExceeded

Alarm	Attributes	Applicable major releases
Name: MldGrpIfSapMaxGroupsLimitExceeded (5391) Type: configurationAlarm (11) Package: mld Raised on class: mld.GrpInterfaceSap	Severity: warning Implicitly cleared: false Default probable cause: MldGrpIfSapMaxGroupsLimitExceeded (2107)	Unspecified
<b>Description:</b> 'This alarm is raised when an attempt is made to configure a group when the number of groups configured on the SAP, is equal to the 'Maximum Number of Groups' supported on the SAP.'		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Increase the value of the 'Maximum Number of Groups' attribute in the parent MLD group interface so that the number of active MLD groups stays under the configured threshold.		

(2 of 2)

Table 39-609 MldGrpIfSapMaxGrpSrcLimExcd

Alarm	Attributes	Applicable major releases
Name: MldGrpIfSapMaxGrpSrcLimExcd (5392) Type: configurationAlarm (11) Package: mld Raised on class: mld.GrpInterfaceSap	Severity: warning Implicitly cleared: false Default probable cause: MldGrpIfSapMaxGrpSrcLimExcd (2108)	Unspecified
<b>Description:</b> This alarm is raised when an attempt is made to configure a group source for a group when the number of group sources is equal to the 'Maximum Number of Group Sources' per group supported on the SAP.		
<b>Remedial action:</b> Increase the value of the 'Maximum Number Of Group Sources' attribute in the parent MLD group interface so that the number of active MLD Group sources stays under the configured threshold.		

Table 39-610 MldGrpIfSapMaxSourcesLimitExceeded

Alarm	Attributes	Applicable major releases
Name: MldGrpIfSapMaxSourcesLimitExceeded (5393) Type: configurationAlarm (11) Package: mld Raised on class: mld.GrpInterfaceSap	Severity: warning Implicitly cleared: false Default probable cause: MldGrpIfSapMaxSourcesLimitExceeded (2109)	Unspecified
<b>Description:</b> 'This alarm is raised when an attempt is made to configure a source for a group when the number of sources for this group is equal to the 'Maximum Number of Sources' per group supported on the SAP.'		
<b>Remedial action:</b> Increase the value of the 'Maximum Number Of Sources' attribute in the parent MLD group interface so that the number of active MLD sources stays under the configured threshold.		

Table 39-611 MldGrpIfSapRxQueryVerMism

Alarm	Attributes	Applicable major releases
Name: MldGrpIfSapRxQueryVerMism (5394) Type: configurationAlarm (11) Package: mld Raised on class: mld.GrpInterfaceSap	Severity: warning Implicitly cleared: false Default probable cause: InvalidVersionofQueryMessageReceived (129)	Unspecified
<b>Description:</b> The alarm is raised when the MLD host SAP is configured as MLDv2 but receives an MLDv1 Query. It will include information on the configured version of the SAP, and the version of the received query.		
<b>Remedial action:</b> Change the MLD Version attribute on the MLD Group Interface to match the MLD host version.		

## 39 – Unspecified NE alarms

Table 39-612 MldHostCModeRxQueryMismatch

Alarm	Attributes	Applicable major releases
Name: MldHostCModeRxQueryMismatch (8051) Type: configurationAlarm (11) Package: mld Raised on class: mld.Site	Severity: warning Implicitly cleared: false Default probable cause: InvalidCompatibilityModeOfQueryReceived (2452)	Unspecified
<b>Description:</b> The alarm is raised when there is a mismatch between the compatible mode of the MLD Host and the version of the received query, i.e. the Host is in MLDv1 compatible mode but it receives a MLDv2 Query.		
<b>Remedial action:</b> Change the MLD Version attribute on the MLD Group Interface to match the MLD host version.		

Table 39-613 MldHostInstantiationFail

Alarm	Attributes	Applicable major releases
Name: MldHostInstantiationFail (8052) Type: configurationAlarm (11) Package: mld Raised on class: mld.GrplInterface	Severity: warning Implicitly cleared: false Default probable cause: MldHostInstantiationFailed (2453)	Unspecified
<b>Description:</b> This alarm is generated when a host is eligible for running MLD, but MLD cannot be started on the host.		
<b>Remedial action:</b> A host is eligible for running MLD, but MLD cannot be started on the given host.		

Table 39-614 MldHostMaxGroupsLimitExceeded

Alarm	Attributes	Applicable major releases
Name: MldHostMaxGroupsLimitExceeded (8053) Type: configurationAlarm (11) Package: mld Raised on class: mld.GrplInterface	Severity: warning Implicitly cleared: false Default probable cause: MldHostMaxGroupsLimitExceeded (2454)	Unspecified
<b>Description:</b> This alarm is generated when an attempt is made to configure a group when the number of groups configured on the PIM interface is equal to the maximum number of groups supported on the host.		
<b>Remedial action:</b> Increase the value of the 'Maximum Number of Groups' attribute in the MLD group interface so that the number of active MLD groups stays under the configured threshold.		

Table 39-615 MldHostMaxGrpSrcsLimitExceeded

Alarm	Attributes	Applicable major releases
Name: MldHostMaxGrpSrcsLimitExceeded (8054) Type: configurationAlarm (11) Package: mld Raised on class: mld.GrpInterface	Severity: major Implicitly cleared: false Default probable cause: MldHostMaxGrpSrcsLimitExceeded (2455)	Unspecified
<b>Description:</b> The alarm is generated when an attempt is made to configure a source for a group when the number of group sources is equal to the maximum number of group sources per group supported on the host.		
<b>Remedial action:</b> Increase the value of the 'Maximum Number Of Group Sources' attribute in the MLD group interface so that the number of active MLD Group sources stays under the configured threshold.		

Table 39-616 MldHostMaxSrcsLimitExceeded

Alarm	Attributes	Applicable major releases
Name: MldHostMaxSrcsLimitExceeded (8055) Type: configurationAlarm (11) Package: mld Raised on class: mld.GrpInterface	Severity: warning Implicitly cleared: false Default probable cause: MldHostMaxSrcsLimitExceeded (2456)	Unspecified
<b>Description:</b> The alarm is generated when an attempt is made to configure a source for a group when the number of sources for this group is equal to the maximum number of sources per group supported on the host.		
<b>Remedial action:</b> Increase the value of the 'Maximum Number Of Sources' attribute in the MLD group interface so that the number of active MLD sources stays under the configured threshold.		

Table 39-617 MldHostRxQueryVerMismatch

Alarm	Attributes	Applicable major releases
Name: MldHostRxQueryVerMismatch (8056) Type: configurationAlarm (11) Package: mld Raised on class: mld.Site	Severity: warning Implicitly cleared: false Default probable cause: InvalidVersionOfQueryMessageReceived (2457)	Unspecified
<b>Description:</b> The alarm is raised when the MLD host is configured as MLDv2 but receives an MLDv1 Query. It will include information on the configured version of MLD Host, and the version of the received query.		
<b>Remedial action:</b> Change the MLD Version attribute on the MLD Group Interface to match the MLD host version.		

## 39 – Unspecified NE alarms

Table 39-618 MldSnpgGrpDroppedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: MldSnpgGrpDroppedLimitExceeded (537) Type: AccessInterfaceAlarm (32) Package: vpls Raised on class: vpls.L2AccessInterfaceMldSnpgCfg	Severity: warning Implicitly cleared: false Default probable cause: mldSnpgGrpMaxNbrGrpsReached (406)	Unspecified
<b>Description:</b> The alarm is raised when a SAP drops an MLD group because the configurable maximum number of MLD groups on the SAP is reached.		
<b>Remedial action:</b> Increasing the maximum number of MLD Groups to prevent groups from being dropped.		

Table 39-619 MlpppBundleInterleavingDisabled

Alarm	Attributes	Applicable major releases
Name: MlpppBundleInterleavingDisabled (4383) Type: other (123) Package: netw Raised on class: netw.NetworkElement	Severity: minor Implicitly cleared: true Default probable cause: mlpppBundleInterleavingDisabled (1567)	Unspecified
<b>Description:</b> The alarm is raised when the 'Link Fragmentation and LFI' bit is set but LFI isn't active for MLPPP Bundle. It is cleared for other cases. If LFI is not desired, disable it in the L2TP MLPPP configuration of the related routing instance. Or, ensure that the MLPPP bundle only contains a single link.		
<b>Remedial action:</b> If LFI is not desired, disable it in the L2TP MLPPP configuration of the related routing instance. Or, ensure that the MLPPP bundle only contains a single link.		

Table 39-620 MobGwSysGrpWriteCdrToCfAlarm

Alarm	Attributes	Applicable major releases
Name: MobGwSysGrpWriteCdrToCfAlarm (3634) Type: MgGroupAlarm (75) Package: isa Raised on class: isa.MglSaGroup	Severity: major Implicitly cleared: true Default probable cause: MobGwSysGrpWriteCdrToCfStop (1418)	Unspecified
<b>Description:</b> The alarm is raised when the SGW or PGW writes Charging Data Record (CDR) packets to the local compact flash for the mobile system group.		
<b>Remedial action:</b> Retrieve Charging Data Record (CDR) files from compact flash.		

Table 39-621 ModFail

Alarm	Attributes	Applicable major releases
Name: ModFail (1171) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: modFail (872)	Unspecified
<b>Description:</b> The alarm is raised when a modulation failure is detected.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-622 ModLOS

Alarm	Attributes	Applicable major releases
Name: ModLOS (1172) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: modLOS (873)	Unspecified
<b>Description:</b> The alarm is raised when a modulation loss of signal is detected.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-623 ModuleOutOfMemory

Alarm	Attributes	Applicable major releases
Name: ModuleOutOfMemory (180) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: false Default probable cause: outOfMemory (142)	Unspecified
<b>Description:</b> The alarm is raised when the available NE memory is insufficient for allocation to a task.		
<b>Remedial action:</b> Informational - If the alarm persists please contact Alcatel-Lucent support for assistance		

Table 39-624 MonitoredObjectsCrossThreshold

Alarm	Attributes	Applicable major releases
Name: MonitoredObjectsCrossThreshold (8146) Type: processingErrorAlarm (81) Package: sup Raised on class: sup.SupervisionManager	Severity: variable Implicitly cleared: true Default probable cause: MonitoredObjectsCrossThreshold (2542)	Unspecified

(1 of 2)

**39 – Unspecified NE alarms**

Alarm	Attributes	Applicable major releases
<b>Description:</b> This alarm is raised when total monitored objects count cross certain threshold. It is in warning when the total count exceeds 90% of the limit, and in critical when the total count reaches the limit. It is automatically cleared when the total count is back under the limit and threshold.		
<b>Remedial action:</b> Please remove unnecessary supervision groups or change the inclusion filters of supervision groups to reduce monitored objects.		

(2 of 2)

**Table 39-625 MplsResignalTimerExpired**

Alarm	Attributes	Applicable major releases
Name: MplsResignalTimerExpired (1121) Type: ProtocolAlarm (1) Package: mpls Raised on class: mpls.Site	Severity: info Implicitly cleared: false Default probable cause: resignalTimerExpired (833)	Unspecified
<b>Description:</b> The alarm is raised when an MPLS instance resignal timer expires.		
<b>Remedial action:</b> Informational only.		

**Table 39-626 MprVIIDown**

Alarm	Attributes	Applicable major releases
Name: MprVIIDown (1139) Type: serviceDown (88) Package: mpr Raised on class: mpr.MprVII	Severity: major Implicitly cleared: true Default probable cause: vlanPathInstanceDown (524)	Unspecified
<b>Description:</b> The alarm is raised when the Operational State of a VLAN path instance is Down. It could be caused by one of the following conditions: - The radio link is down. - A cross connect is deleted. - The Operational State of one or more ports in the cross connect is Down.		
<b>Remedial action:</b> Components of the VLL service, site, ports and or links may be down. Please check the components for root cause.		

**Table 39-627 MPTCardFailure**

Alarm	Attributes	Applicable major releases
Name: MPTCardFailure (4830) Type: equipmentAlarm (3) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: ReplaceableUnitProblem (1905)	Unspecified
<b>Description:</b> This alarm is raised when MPT card failure is detected.		

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

(2 of 2)

Table 39-628 MPTPlugInCardFailure

Alarm	Attributes	Applicable major releases
Name: MPTPlugInCardFailure (4831) Type: equipmentAlarm (3) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: ReplaceableUnitProblem (1905)	Unspecified
<b>Description:</b> This alarm is raised when RPS/XPIC Plug-in card failure is detected.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-629 MPTPowerSupplyFailure

Alarm	Attributes	Applicable major releases
Name: MPTPowerSupplyFailure (1170) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: powerSupplyFailure (117)	Unspecified
<b>Description:</b> The alarm is raised when an MPT radio power source has a power supply failure.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-630 msapCreationFailure

Alarm	Attributes	Applicable major releases
Name: msapCreationFailure (740) Type: ConfigurationAlarm (15) Package: vpls Raised on class: vpls.L2AccessInterface	Severity: warning Implicitly cleared: false Default probable cause: creationFailure (515) Applicable probable causes: <ul style="list-style-type: none"> <li>creationFailure</li> <li>radiusAuthFailed</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE notifies the 5620 SAM that it cannot create an MSAP.		
<b>Remedial action:</b> This warning is raised when the NE fails to create an MSAP. Please review the alarm's additional text to obtain information about the error condition. Possible problems can be mis-configuration of the capture SAP, authentication failures, a missing target service or interface, illegal trigger packets and more.		

39 – Unspecified NE alarms

---

Table 39-631 MsdpActSrcLimExcd

Alarm	Attributes	Applicable major releases
Name: MsdpActSrcLimExcd (380) Type: communicationsAlarm (4) Package: msdp Raised on class: msdp.Site	Severity: warning Implicitly cleared: false Default probable cause: MsdpActiveSourcesLimitExceeded (279)	Unspecified
<b>Description:</b> The alarm is raised when an MSDP site receives a number of source active messages that exceeds the configured maximum.		
<b>Remedial action:</b> Increase the configurable maximum number of source active messages if possible.		

Table 39-632 MsdpGroupSrcActMsgsExcd

Alarm	Attributes	Applicable major releases
Name: MsdpGroupSrcActMsgsExcd (378) Type: communicationsAlarm (4) Package: msdp Raised on class: msdp.PeerGroup	Severity: warning Implicitly cleared: false Default probable cause: MsdpGroupActiveSourcesLimitExceeded (277)	Unspecified
<b>Description:</b> The alarm is raised when an MSDP group receives a number of source active messages that exceeds the configured maximum.		
<b>Remedial action:</b> Increase the configurable maximum number of source active messages if possible.		

Table 39-633 MsdpPeerActSrcLimExcd

Alarm	Attributes	Applicable major releases
Name: MsdpPeerActSrcLimExcd (379) Type: communicationsAlarm (4) Package: msdp Raised on classes: <ul style="list-style-type: none"> <li>msdp.GroupPeer</li> <li>msdp.Peer</li> </ul>	Severity: warning Implicitly cleared: false Default probable cause: MsdpPeerActiveSourcesLimitExceeded (278)	Unspecified
<b>Description:</b> The alarm is raised when an MSDP peer receives a number of source active messages that exceeds the configured maximum.		
<b>Remedial action:</b> Increase the configurable maximum number of source active messages if possible.		

Table 39-634 MsdpRPFFailure

Alarm	Attributes	Applicable major releases
Name: MsdpRPFFailure (354) Type: communicationsAlarm (4) Package: msdp Raised on class: msdp.Site	Severity: warning Implicitly cleared: false Default probable cause: MsdpRPFFailure (275)	Unspecified
<b>Description:</b> The alarm is raised when an MSDP site experiences an RPF failure.		
<b>Remedial action:</b> Informational.		

Table 39-635 MsdpSourceSrcActMsgsExcd

Alarm	Attributes	Applicable major releases
Name: MsdpSourceSrcActMsgsExcd (381) Type: communicationsAlarm (4) Package: msdp Raised on class: msdp.Source	Severity: warning Implicitly cleared: false Default probable cause: MsdpSourceActiveSourcesLimitExceeded (280)	Unspecified
<b>Description:</b> The alarm is raised when an MSDP source receives a number of source active messages that exceeds the configured maximum.		
<b>Remedial action:</b> Increase the configurable maximum number of source active messages if possible.		

Table 39-636 MsPwFecMisConfig

Alarm	Attributes	Applicable major releases
Name: MsPwFecMisConfig (3691) Type: serviceAlarm (16) Package: svt Raised on class: svt.SpokeSdpFec	Severity: major Implicitly cleared: true Default probable cause: msPwFecMisConfig (1430)	Unspecified
<b>Description:</b> The alarm is raised when a misconfiguration is discovered between two signaling multi-segment pseudowires. For example, configuring both multi-segment pseudowires as master would cause this notification.		
<b>Clearing condition:</b> ('Administrative State' EQUAL 'Up')		
<b>Remedial action:</b> Configure multi-segment pseudo-wires such that both are not configured to be master.		

39 – Unspecified NE alarms

---

**Table 39-637 MultiChassisStpBlockingStatus**

Alarm	Attributes	Applicable major releases
Name: MultiChassisStpBlockingStatus (4902) Type: communicationsAlarm (4) Package: aosredundancy Raised on class: aosredundancy.AOSMultiChassis	Severity: minor Implicitly cleared: false Default probable cause: PrimarybridgeSTPPriorityishigherthansecondarybridge (1959)	Unspecified
<b>Description:</b> Primary bridge STP Priority is higher than secondary bridge		
<b>Remedial action:</b> This Alarm can be cleared by setting primary bridge STP Priority lower then secondary bridge stp priority		

**Table 39-638 MultipleOwners**

Alarm	Attributes	Applicable major releases
Name: MultipleOwners (283) Type: configurationAlarm (11) Package: vrrp Raised on class: vrrp.AbstractInstance	Severity: major Implicitly cleared: false Default probable cause: multipleOwnersConfigured (215)	Unspecified
<b>Description:</b> The alarm is raised when an owner VR instance detects another instance that advertises itself as an owner.		
<b>Remedial action:</b> Shut down one of the peer VRRP instances and change the owner to false and then turn it up.		

**Table 39-639 multipleRPLowner**

Alarm	Attributes	Applicable major releases
Name: multipleRPLowner (2946) Type: configurationAlarm (11) Package: ethring Raised on class: ethring.Element	Severity: major Implicitly cleared: false Default probable cause: multiplerpl (1135)	Unspecified
<b>Description:</b> The alarm is raised on RPL elements configured as RPL owners, when there are multiple RPL owners detected in the ring topology.		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The duplicate RPL owners must be deleted.		

Table 39-640 MVPNDuplicateVrfPolicy

Alarm	Attributes	Applicable major releases
Name: MVPNDuplicateVrfPolicy (649) Type: configurationAlarm (11) Package: I3fwd Raised on classes: <ul style="list-style-type: none"> <li>I3fwd.ServiceSiteMVPNImportPolicy</li> <li>I3fwd.ServiceSiteMVPNExportPolicy</li> </ul>	Severity: warning Implicitly cleared: true Default probable cause: duplicateVrfPolicyExists (177)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a duplicate VRF policy in a multicast VPRN. The alarm information includes the VRF policy ID and type, and information about the service site. Note: starting from SAM 12.0 R1, SAM no longer raise this alarm since it is not much useful but has performance issue.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The duplicate VRF policy must be removed. Note: starting from SAM 12.0 R1, SAM no longer raises this alarm.		

Table 39-641 MVPNExportPolicyNotFound

Alarm	Attributes	Applicable major releases
Name: MVPNExportPolicyNotFound (650) Type: configurationAlarm (11) Package: I3fwd Raised on class: I3fwd.ServiceSiteMVPNExportPolicy	Severity: major Implicitly cleared: true Default probable cause: exportPolicyDoesNotExist (179)	Unspecified
<b>Description:</b> The alarm is raised when a VRF export policy for a multicast VPRN cannot be found. The alarm information includes the policy ID. Note: starting from SAM 12.0 R1, SAM no longer raise this alarm since it is not much useful but has performance issue.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. A VRF export policy with the appropriate ID must be configured. Note: starting from SAM 12.0 R1, SAM no longer raises this alarm.		

Table 39-642 MVPNImportPolicyNotFound

Alarm	Attributes	Applicable major releases
Name: MVPNImportPolicyNotFound (651) Type: configurationAlarm (11) Package: I3fwd Raised on class: I3fwd.ServiceSiteMVPNImportPolicy	Severity: major Implicitly cleared: true Default probable cause: importPolicyDoesNotExist (180)	Unspecified
<b>Description:</b> The alarm is raised when a VRF import policy for a multicast VPRN cannot be found. The alarm information includes the policy ID. Note: starting from SAM 12.0 R1, SAM no longer raise this alarm since it is not much useful but has performance issue.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. A VRF import policy with the appropriate ID must be configured. Note: starting from SAM 12.0 R1, SAM no longer raises this alarm.		

## 39 – Unspecified NE alarms

Table 39-643 MwLinkEPSActivityChange

Alarm	Attributes	Applicable major releases
Name: MwLinkEPSActivityChange (4945) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.MwLink	Severity: major Implicitly cleared: false Default probable cause: EPSActivityChange (2002)	Unspecified
<b>Description:</b> This alarm is raised when a microwave link changes activity for EPS.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-644 MwLinkMaintenanceChange

Alarm	Attributes	Applicable major releases
Name: MwLinkMaintenanceChange (4946) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.MwLink	Severity: info Implicitly cleared: false Default probable cause: MaintenanceCommandChange (2003)	Unspecified
<b>Description:</b> This alarm is raised when a microwave link maintenance command changes.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-645 MwLinkPeerChange

Alarm	Attributes	Applicable major releases
Name: MwLinkPeerChange (4832) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.MwLink	Severity: major Implicitly cleared: false Default probable cause: PeerChange (1918)	Unspecified
<b>Description:</b> This alarm is raised when a microwave link discovered peer changes.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-646 MwLinkRPSActivityChange

Alarm	Attributes	Applicable major releases
Name: MwLinkRPSActivityChange (4947) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.MwLink	Severity: major Implicitly cleared: false Default probable cause: RPSActivityChange (2004)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> This alarm is raised when a microwave link changes activity for RPS.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

(2 of 2)

Table 39-647 MwLinkTPSActivityChange

Alarm	Attributes	Applicable major releases
Name: MwLinkTPSActivityChange (4948) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.MwLink	Severity: major Implicitly cleared: false Default probable cause: TPSActivityChange (2005)	Unspecified
<b>Description:</b> This alarm is raised when a microwave link changes activity for TPS.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-648 NatIsaMemberSessionUsageHi

Alarm	Attributes	Applicable major releases
Name: NatIsaMemberSessionUsageHi (3937) Type: equipmentAlarm (3) Package: nat Raised on class: nat.IsaMember	Severity: major Implicitly cleared: true Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> The alarm is raised when the session usage of an ISA-NAT group member reaches the high watermark. The alarm clears when the session usage reaches the low watermark.		
<b>Remedial action:</b> Review the watermarks configuration to make sure it matches the capacity of your network. If required, deploy extra equipment to deal with the demand.		

Table 39-649 NatIsaMemberSessionUsageHigh

Alarm	Attributes	Applicable major releases
Name: NatIsaMemberSessionUsageHigh (1070) Type: equipmentAlarm (3) Package: nat Raised on class: nat.IsaMda	Severity: major Implicitly cleared: true Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> Deprecated in 10.0, Use {NatIsaMemberSessionUsageHi on nat.IsaMember} instead. The alarm is raised when the session usage of an ISA-NAT group member reaches the high watermark. The alarm clears when the session usage reaches the low watermark.		
<b>Remedial action:</b> Review the watermarks configuration to make sure it matches the capacity of your network. If required, deploy extra equipment to deal with the demand.		

## 39 – Unspecified NE alarms

Table 39-650 NatL2AwSublcmpPortUsageHigh

Alarm	Attributes	Applicable major releases
Name: NatL2AwSublcmpPortUsageHigh (1086) Type: equipmentAlarm (3) Package: ressubscr Raised on class: ressubscr.ResidentialSubscriberInstance	Severity: warning Implicitly cleared: true Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> The alarm is raised when the ICMP port usage of an L2-aware NAT subscriber reaches the high or low watermark.		
<b>Remedial action:</b> Review the watermarks configuration to make sure it matches the capacity of the network. If required, deploy extra equipment to deal with the demand.		

Table 39-651 NatL2AwSubSessionUsageHigh

Alarm	Attributes	Applicable major releases
Name: NatL2AwSubSessionUsageHigh (1087) Type: equipmentAlarm (3) Package: ressubscr Raised on class: ressubscr.ResidentialSubscriberInstance	Severity: warning Implicitly cleared: true Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> The alarm is raised when the session usage of an L2-aware NAT subscriber reaches the high or low watermark.		
<b>Remedial action:</b> Review the watermarks configuration to make sure it matches the capacity of your network. If required, deploy extra equipment to deal with the demand.		

Table 39-652 NatL2AwSubTcpPortUsageHigh

Alarm	Attributes	Applicable major releases
Name: NatL2AwSubTcpPortUsageHigh (1088) Type: equipmentAlarm (3) Package: ressubscr Raised on class: ressubscr.ResidentialSubscriberInstance	Severity: warning Implicitly cleared: true Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> The alarm is raised when the TCP port usage of an L2-aware NAT subscriber reaches the high or low watermark.		
<b>Remedial action:</b> Review the watermarks configuration to make sure it matches the capacity of your network. If required, deploy extra equipment to deal with the demand.		

Table 39-653 NatL2AwSubUdpPortUsageHigh

Alarm	Attributes	Applicable major releases
Name: NatL2AwSubUdpPortUsageHigh (1089) Type: equipmentAlarm (3) Package: ressubscr Raised on class: ressubscr.ResidentialSubscriberInstance	Severity: warning Implicitly cleared: true Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> The alarm is raised when the UDP port usage of an L2-aware NAT subscriber reaches the high or low watermark.		
<b>Remedial action:</b> Review the watermarks configuration to make sure it matches the capacity of your network. If required, deploy extra equipment to deal with the demand.		

Table 39-654 NatPIL2AwBlockUsageHigh

Alarm	Attributes	Applicable major releases
Name: NatPIL2AwBlockUsageHigh (1074) Type: equipmentAlarm (3) Package: nat Raised on class: nat.NatPool	Severity: warning Implicitly cleared: true Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> The alarm is raised when the block usage of an L2-aware NAT address pool reaches the high watermark. The alarm clears when the block usage reaches the low watermark.		
<b>Remedial action:</b> This alarm indicates the block usage of a L2-aware NAT address pool reaches its threshold on a particular member MDA of its ISA group. Please ensure the address pool block usage configuration adequate for the system requirement. This alarm will be cleared automatically once the block usage is below the watermark.		

Table 39-655 NatPILsnMemberBlockUsageHigh

Alarm	Attributes	Applicable major releases
Name: NatPILsnMemberBlockUsageHigh (1075) Type: equipmentAlarm (3) Package: nat Raised on class: nat.NatPool	Severity: warning Implicitly cleared: true Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> The alarm is raised when the block usage of a large-scale NAT address pool reaches the high watermark. The alarm clears when the block usage reaches the low watermark.		
<b>Remedial action:</b> This alarm indicates the block usage of a Large Scale NAT address pool reaches its threshold on a particular member MDA of its ISA group. Please ensure the address pool block usage configuration adequate for the system requirement. This alarm will be cleared automatically once the block usage is below the watermark.		

**39 – Unspecified NE alarms****Table 39-656 NeighborLoss (pim)**

Alarm	Attributes	Applicable major releases
Name: NeighborLoss (188) Type: communicationsAlarm (4) Package: pim Raised on class: pim.Interface	Severity: warning Implicitly cleared: true Default probable cause: NeighborConnectionLost (148)	Unspecified
<b>Description:</b> The alarm is raised when the connection to a neighbor is lost.		
<b>Remedial action:</b> Informational - please check the connection to the neighbor is fine, e.g the peer is not in shutdown state. The alarm will be cleared when the neighbor is discovered up.		

**Table 39-657 NeighborLoss (vpls)**

Alarm	Attributes	Applicable major releases
Name: NeighborLoss (188) Type: communicationsAlarm (4) Package: vpls Raised on class: vpls.InterfacePimSnooping	Severity: warning Implicitly cleared: true Default probable cause: NeighborConnectionLost (148)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a loss of connection to a PIM neighbor.		
<b>Remedial action:</b> There is a lost connection to the PIM Neighbor. Check the PIM Neighbor to ensure it is still operational and that underlying transport of the SAP or SDP is operationally up.		

**Table 39-658 netconfEventReplayFailure**

Alarm	Attributes	Applicable major releases
Name: netconfEventReplayFailure (5389) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: critical Implicitly cleared: false Default probable cause: MmInternalProcessingError (1421)	Unspecified
<b>Description:</b> Replay of the NETCONF notification event buffer has failed and 5620 SAM is no longer attempting to replay old events. Any Performance Measurement Statistics files that 5620 SAM was trying to replay must be manually retrieved from the 9471 WMM. The additionalText field of the alarm displays the timestamp of the last successful NETCONF notification that 5620 SAM has processed after server startup. If the additionalText field is empty, we have not processed any NETCONF notifications since the 5620 SAM started and any missing files need to be manually retrieved from the 9471 WMM. New NETCONF event notifications are still processed as normal.		
<b>Remedial action:</b> Replay of the NETCONF notification event buffer has failed and 5620 SAM is no longer attempting to replay old events. Any Performance Measurement Statistics files that 5620 SAM was trying to replay must be manually retrieved from the 9471 WMM. The additionalText field of the alarm displays the timestamp of the last successful NETCONF notification that 5620 SAM has processed after server startup. If the additionalText field is empty, we have not processed any NETCONF notifications since the 5620 SAM started and any missing files need to be manually retrieved from the 9471 WMM. New NETCONF event notifications are still processed as normal.		

Table 39-659 NetConfEventSubscriptionProblem

Alarm	Attributes	Applicable major releases
Name: NetConfEventSubscriptionProblem (4864) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: NetConfEventSubscriptionFailed (1932)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to subscribe for Netconf event notification from a network element. For a WMM: if this problem persists it may result in a loss of PM file collection.		
<b>Remedial action:</b> Informational -if the alarm persists or is occurring frequently then investigation is required to understand why the Netconf event subscription configuration is failing.		

Table 39-660 NetworkElementChassisTypeMismatch

Alarm	Attributes	Applicable major releases
Name: NetworkElementChassisTypeMismatch (1946) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: mismatchOfNetworkElementChassisType (934)	Unspecified
<b>Description:</b> The alarm is raised when the chassis type of the shadow network element does not match with the chassis type of the discovered NE.		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The pre-provisioned NE chassis type defined must match the chassis type of the node being discovered.		

Table 39-661 NetworkElementTypeMismatch

Alarm	Attributes	Applicable major releases
Name: NetworkElementTypeMismatch (1947) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: mismatchOfNetworkElementType (935)	Unspecified
<b>Description:</b> The alarm is raised when the type of the shadow network element does not match with the type of the discovered NE.		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The pre-provisioned NE type defined must match the type of the node being discovered.		

## 39 – Unspecified NE alarms

Table 39-662 NetworkElementVersionMismatch

Alarm	Attributes	Applicable major releases
Name: NetworkElementVersionMismatch (1948) Type: communicationsAlarm (4) Package: netw Raised on class: netw.DiscoveredNode	Severity: major Implicitly cleared: true Default probable cause: mismatchOfNetworkElementVersion (936)	Unspecified
<b>Description:</b> The alarm is raised when the version of the shadow network element does not match with the version of the discovered NE.		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The pre-provisioned NE version defined must match the version of the node being discovered.		

Table 39-663 NodeDatabaseCorruptionDetected

Alarm	Attributes	Applicable major releases
Name: NodeDatabaseCorruptionDetected (1961) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: nodeDatabaseCorrupted (948)	Unspecified
<b>Description:</b> This alarm is raised when an error in the node causes the node to lose its configuration and come up in an inconsistent/incomplete state. To overcome this it might be necessary to reconfigure the node.		
<b>Remedial action:</b> The node configuration is inconsistent. You may have to do a Reconfigure. However if it's a first discovery, you have to delete the node, then create a pre-provisioned NE instance, create a new discovery rule with a self-configuration policy and discover the node.		

Table 39-664 NodeSoftwareMisalignmentDetected

Alarm	Attributes	Applicable major releases
Name: NodeSoftwareMisalignmentDetected (4906) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: true Default probable cause: nodeSoftwareMisalignment (1962)	Unspecified
<b>Description:</b> The alarm is raised when a software misalignment has been detected on the node and comes back up with an unexpected software version (software change triggered by external tool) To correct this situation it is necessary to download and activate on the node the software referenced by SAM and then reconfigure the node with the 5620 SAM's current configuration.		
<b>Remedial action:</b> the NE software is misaligned. Perform a Download and Activate Software operation with the software version known by SAM which is the reference.		

Table 39-665 noFunctioningScript

Alarm	Attributes	Applicable major releases
Name: noFunctioningScript (275) Type: configurationAlarm (11) Package: subscriber Raised on class: subscriber.Policy	Severity: critical Implicitly cleared: true Default probable cause: primaryBackupDown (207)	Unspecified
<b>Description:</b> The alarm is raised when all subscriber identification scripts are operationally down.		
<b>Raising condition:</b> (('isLocal' EQUAL 'true') AND ('Primary Script Operational State' NOT EQUAL 'Up') AND ('Secondary Script Operational State' NOT EQUAL 'Up') AND ('Tertiary Script Operational State' NOT EQUAL 'Up'))		
<b>Clearing condition:</b> (('isLocal' EQUAL 'true') AND (('Primary Script Operational State' EQUAL 'Up') OR ('Secondary Script Operational State' EQUAL 'Up') OR ('Tertiary Script Operational State' EQUAL 'Up')))		
<b>Remedial action:</b> If the DHCP ACK Python script processing behaviour is desired, please make sure that primary, secondary and tertiary scripts are installed and operationally up.		

Table 39-666 NoRPLOwner

Alarm	Attributes	Applicable major releases
Name: NoRPLOwner (3700) Type: configurationAlarm (11) Package: ethring Raised on class: ethring.RadioRing	Severity: major Implicitly cleared: false Default probable cause: norpltype (1438)	Unspecified
<b>Description:</b> The alarm is raised when there is No RPL Owner selected on a Radio Ring.		
<b>Remedial action:</b> Operator has to configure at least one of the Elements belonging to a Radio Ring as RPL Owner.		

Table 39-667 NotEnoughContiguousBlocks

Alarm	Attributes	Applicable major releases
Name: NotEnoughContiguousBlocks (4987) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.LocalDhcp6Server	Severity: warning Implicitly cleared: false Default probable cause: notEnoughContiguousBlocks (2042)	Unspecified
<b>Description:</b> The alarm is raised when a lease cannot be created because not enough contiguous blocks are found for the requested delegated prefix size.		
<b>Remedial action:</b> This alarm is raised when a lease cannot be created because not enough contiguous blocks are found for the requested delegated prefix size. Please adjust the associated pools.		

## 39 – Unspecified NE alarms

Table 39-668 NTPNoServersAvail

Alarm	Attributes	Applicable major releases
Name: NTPNoServersAvail (4878) Type: communicationsAlarm (4) Package: ntp Raised on class: ntp.NTP	Severity: major Implicitly cleared: true Default probable cause: NTPNoServersAvail (1942)	Unspecified
<b>Description:</b> The alarm is generated when no NTP Servers are available.		
<b>Remedial action:</b> Please check if the configured servers are physically reachable (IP ping) from the node (Or) check if the configured servers are enabled as NTP Server (NTP Server attribute on General Tab) and their Operational state is Up (Or) check if the authentication keys are correctly defined on the client and the NTP server node.		

Table 39-669 NTPServerChange

Alarm	Attributes	Applicable major releases
Name: NTPServerChange (4880) Type: communicationsAlarm (4) Package: ntp Raised on class: ntp.NTP	Severity: info Implicitly cleared: false Default probable cause: NTPServerChange (1944)	Unspecified
<b>Description:</b> The alarm generated when more than one NTP servers are configured in a system and a different NTP server is selected because the operational status of the earlier NTP server has changed.		
<b>Remedial action:</b> This is informational alarm to indicate that the current clock source has changed for the node. Alarm needs to be manually cleared.		

Table 39-670 OCHTrailDown

Alarm	Attributes	Applicable major releases
Name: OCHTrailDown (3891) Type: communicationsAlarm (4) Package: optical Raised on class: optical.OCHTrail	Severity: critical Implicitly cleared: true Default probable cause: OperationalStateDown (1963)	Unspecified
<b>Description:</b> The alarm is raised when the termination point(s) of the OCH trail are operationally down.		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on the hops to understand why the underlying transport network is unreliable.		

Table 39-671 OCHTrailMisConfigured

Alarm	Attributes	Applicable major releases
Name: OCHTrailMisConfigured (5125) Type: communicationsAlarm (4) Package: optical Raised on class: optical.OCHTrail	Severity: critical Implicitly cleared: false Default probable cause: OchCrossConnectionTrailNameMismatch (1391)	Unspecified
<b>Description:</b> The alarm is raised when all the OCh cross connections (XCs) of an OCh trail do not have the same trail name. In order for the auto wavekey processing to work properly, the XC name should be the same on all NEs of the OCh trail.		
<b>Remedial action:</b> Recreate the OCH Cross Connects with same OCH Trail name else Wave Tracker does not work properly.		

Table 39-672 ODUTrailDown

Alarm	Attributes	Applicable major releases
Name: ODUTrailDown (3892) Type: communicationsAlarm (4) Package: optical Raised on class: optical.ODUTrail	Severity: critical Implicitly cleared: true Default probable cause: OperationalStateDown (1963)	Unspecified
<b>Description:</b> The alarm is raised when the termination point(s) of the ODU trail are operationally down.		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on the hops to understand why the underlying transport network is unreliable.		

Table 39-673 ODUTrailMisConfigured

Alarm	Attributes	Applicable major releases
Name: ODUTrailMisConfigured (3893) Type: communicationsAlarm (4) Package: optical Raised on class: optical.ODUTrail	Severity: critical Implicitly cleared: false Default probable cause: OchCrossConnectionTrailNameMismatch (1391)	Unspecified
<b>Description:</b> The alarm is raised when all the OCh cross connections (XCs) of an OCh trail do not have the same trail name. In order for the auto wavekey processing to work properly, the XC name should be the same on all NEs of the OCh trail.		
<b>Remedial action:</b> Recreate the OCH Cross Connects with same OCH Trail name else Wave Tracker does not work properly.		

39 – Unspecified NE alarms

---

Table 39-674 OlcStateChangeAlarm

Alarm	Attributes	Applicable major releases
Name: OlcStateChangeAlarm (3740) Type: communicationsAlarm (4) Package: generic Raised on class: generic.GenericObject	Severity: info Implicitly cleared: false Default probable cause: unknown (1097)	Unspecified
<b>Description:</b> The alarm is raised to notify the user, when an OLC State change takes place at the specified revert time.		
<b>Remedial action:</b> Informational - This is a notification alarm to indicate that the object will revert it's OLC state.		

Table 39-675 OMSTrailDown

Alarm	Attributes	Applicable major releases
Name: OMSTrailDown (8082) Type: communicationsAlarm (4) Package: optical Raised on class: optical.OMSTrail	Severity: critical Implicitly cleared: true Default probable cause: OperationalStateDown (1963)	Unspecified
<b>Description:</b> The alarm is raised when termination point(s) of the OMS trail are operationally down.		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on the hops to understand why the underlying transport network is unreliable.		

Table 39-676 OperDownInvalidMac

Alarm	Attributes	Applicable major releases
Name: OperDownInvalidMac (8144) Type: configurationAlarm (11) Package: srrp Raised on class: srrp.Instance	Severity: minor Implicitly cleared: true Default probable cause: invalidMacAddress (2540)	Unspecified
<b>Description:</b> This Alarm is generated when the operational virtual MAC of an SRRP instance conflicts with the MAC of the parent interface.		
<b>Remedial action:</b> The alarm is generated when the operational virtual MAC of an SRRP instance conflicts with the MAC of the parent interface. The SRRP virtual router instance is not allowed to become operationally 'up'.		

Table 39-677 OperDownInvalidMacClear

Alarm	Attributes	Applicable major releases
Name: OperDownInvalidMacClear (8145) Type: configurationAlarm (11) Package: srrp Raised on class: srrp.Instance	Severity: minor Implicitly cleared: true Default probable cause: invalidMacAddressCleared (2541)	Unspecified
<b>Description:</b> The Alarm is generated when a previously occurring OperDownInvalidMac notification has been cleared. Operational virtual MAC of an IPv4 SRRP instance does not have any conflict with the MAC of the parent interface.		
<b>Remedial action:</b> The alarm is generated when a previously occurring OperDownInvalidMac notification has been cleared. Operational virtual MAC of an IPv4 SRRP instance does not have any conflict with the MAC of the parent interface.		

Table 39-678 OpticalAmplifierLossOfInputOpticalPower

Alarm	Attributes	Applicable major releases
Name: OpticalAmplifierLossOfInputOpticalPower (1185) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.WaveLengthTracker	Severity: major Implicitly cleared: true Default probable cause: AmplifierLossOfInputOpticalPower (886)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an Amplifier Loss of input optical power on an optical amplifier interface.		
<b>Remedial action:</b> Ensure that the input optical power at the face plate is greater than the minimum required		

Table 39-679 OpticalAmplifierLossOfOutputPower

Alarm	Attributes	Applicable major releases
Name: OpticalAmplifierLossOfOutputPower (1186) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.WaveLengthTracker	Severity: major Implicitly cleared: true Default probable cause: AmplifierLossOfOutputPower (887)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an Amplifier Loss of output power on an optical amplifier interface.		
<b>Remedial action:</b> If the alarm is persistent: 1. clear the mda, 2. clear card 3. replace the card		

## 39 – Unspecified NE alarms

Table 39-680 OpticalAmplifierModuleCaseTemperatureHigh

Alarm	Attributes	Applicable major releases
Name: OpticalAmplifierModuleCaseTemperatureHigh (1180) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.WaveLengthTracker	Severity: major Implicitly cleared: true Default probable cause: AmplifierModuleCaseTemperatureHigh (881)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an Amplifier Module Case Temperature High on an optical amplifier interface.		
<b>Remedial action:</b> Decrease the ambient temperature		

Table 39-681 OpticalAmplifierModuleCaseTemperatureLow

Alarm	Attributes	Applicable major releases
Name: OpticalAmplifierModuleCaseTemperatureLow (1181) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.WaveLengthTracker	Severity: major Implicitly cleared: true Default probable cause: AmplifierModuleCaseTemperatureLow (882)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an Amplifier Module Case Temperature Low on an optical amplifier interface.		
<b>Remedial action:</b> Increase the ambient temperature		

Table 39-682 OpticalAmplifierModuleCommunicationFailure

Alarm	Attributes	Applicable major releases
Name: OpticalAmplifierModuleCommunicationFailure (1187) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.WaveLengthTracker	Severity: major Implicitly cleared: true Default probable cause: AmplifierModuleCommunicationFailure (888)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an Amplifier Module Communication Failure on a tunable dispersion compensation module's interface.		
<b>Remedial action:</b> If the alarm is persistent: 1. clear the mda, 2. clear card 3. replace the card		

Table 39-683 OpticalAmplifierPumpCurrent

Alarm	Attributes	Applicable major releases
Name: OpticalAmplifierPumpCurrent (1188) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.WaveLengthTracker	Severity: major Implicitly cleared: true Default probable cause: AmplifierPumpcurrent (889)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an Amplifier Pump over current on an optical amplifier interface.		
<b>Remedial action:</b> If the alarm is persistent: 1. clear the mda, 2. clear card 3. replace the card		

Table 39-684 OpticalAmplifierPumpTemperature

Alarm	Attributes	Applicable major releases
Name: OpticalAmplifierPumpTemperature (1182) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.WaveLengthTracker	Severity: major Implicitly cleared: true Default probable cause: AmplifierPumpTemperature (883)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an Amplifier Pump Temperature on an optical amplifier interface.		
<b>Remedial action:</b> Decrease the ambient temperature		

Table 39-685 OpticalTdcMEEPROMInvalid

Alarm	Attributes	Applicable major releases
Name: OpticalTdcMEEPROMInvalid (1189) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.WaveLengthTracker	Severity: major Implicitly cleared: true Default probable cause: TdcMEEPROMInvalid (890)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a TdcM EEPROM invalid on a tunable dispersion compensation module's interface.		
<b>Remedial action:</b> Replace the card		

## 39 – Unspecified NE alarms

Table 39-686 OpticalTdcModuleCommunicationFailure

Alarm	Attributes	Applicable major releases
Name: OpticalTdcModuleCommunicationFailure (1190) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.WavelengthTracker	Severity: major Implicitly cleared: true Default probable cause: TdcModuleCommunicationFailure (891)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a Tdc Module Communication Failure on a tunable dispersion compensation module's interface.		
<b>Remedial action:</b> If the alarm is persistent: 1. clear the mda, 2. clear card 3. replace the card		

Table 39-687 OpticalTdcModuleTemperatureHigh

Alarm	Attributes	Applicable major releases
Name: OPTicalTdcModuleTemperatureHigh (1183) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.WavelengthTracker	Severity: major Implicitly cleared: true Default probable cause: TdcModuleTemperatureHigh (884)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a Tdc Module Temperature High on a tunable dispersion compensation module's interface.		
<b>Remedial action:</b> Decrease the ambient temperature		

Table 39-688 OpticalTdcModuleTemperatureLow

Alarm	Attributes	Applicable major releases
Name: OPTicalTdcModuleTemperatureLow (1184) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.WavelengthTracker	Severity: major Implicitly cleared: true Default probable cause: TdcModuleTemperatureLow (885)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a Tdc Module Temperature Low on a tunable dispersion compensation module's interface.		
<b>Remedial action:</b> Increase the ambient temperature		

Table 39-689 OpticalTdcnNotReady

Alarm	Attributes	Applicable major releases
Name: OpticalTdcnNotReady (1191) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.WavelengthTracker	Severity: major Implicitly cleared: true Default probable cause: TdcnNotReady (892)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a Tdcn Not Ready on a tunable dispersion compensation module's interface.		
<b>Remedial action:</b> This is a transient condition that should clear under normal operation but if it causes the link to fail and persists: 1. clear the mda, 2. clear card 3. replace the card		

Table 39-690 OpticalTdcnThermalControlTemperatureLimit

Alarm	Attributes	Applicable major releases
Name: OpticalTdcnThermalControlTemperatureLimit (1192) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.WavelengthTracker	Severity: major Implicitly cleared: true Default probable cause: TdcnThermalControlTemperatureLimit (893)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a Tdcn Thermal Control Temperature Limit on a tunable dispersion compensation module's interface.		
<b>Remedial action:</b> If this alarm persists: 1. clear the mda, 2. clear card 3. replace the card		

Table 39-691 OpticalTdcnThermalControlUnlocked

Alarm	Attributes	Applicable major releases
Name: OpticalTdcnThermalControlUnlocked (1193) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.WavelengthTracker	Severity: major Implicitly cleared: true Default probable cause: TdcnThermalControlUnlocked (894)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a Tdcn Thermal Control Unlocked on a tunable dispersion compensation module's interface.		
<b>Remedial action:</b> This is a transient condition that should clear under normal operation but if it causes the link to fail and persists: 1. clear the mda, 2. clear card 3. replace the card		

## 39 – Unspecified NE alarms

Table 39-692 OspfExportLimitDropped

Alarm	Attributes	Applicable major releases
Name: OspfExportLimitDropped (1924) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Site	Severity: warning Implicitly cleared: false Default probable cause: exportLimitDropped (598)	Unspecified
<b>Description:</b> The alarm is raised when the total number of exported routes to the OSPF level, drops below the configured limit.		
<b>Remedial action:</b> Informational - the total number of exported routes from the route table to this OSPF level drops below the configured export limit.		

Table 39-693 OspfExportLimitReached

Alarm	Attributes	Applicable major releases
Name: OspfExportLimitReached (1925) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Site	Severity: warning Implicitly cleared: false Default probable cause: exportLimitReached (599)	Unspecified
<b>Description:</b> The alarm is raised when the total number of routes to the OSPF level is equal to the configured limit for exported routes.		
<b>Remedial action:</b> Informational - the total number of routes for the level is equal to the configured limit for exported routes		

Table 39-694 OspfExportLimitWarning

Alarm	Attributes	Applicable major releases
Name: OspfExportLimitWarning (1926) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.Site	Severity: warning Implicitly cleared: false Default probable cause: exportLimitWarning (600)	Unspecified
<b>Description:</b> The alarm is raised when the total number of exported routes to the OSPF level is equal to the configured percentage, vRtrIsisExportLimitLogPercent of the export limit.		
<b>Remedial action:</b> Informational - the total number of exported routes or the level is equal to the configured Export Limit Log Percent		

Table 39-695 OspfExternalLsaThresholdExceeded

Alarm	Attributes	Applicable major releases
Name: OspfExternalLsaThresholdExceeded (372) Type: topologyAlarm (34) Package: topology Raised on class: topology.Cpaa	Severity: major Implicitly cleared: true Default probable cause: manyExternalLSAsFloodingIntoIGP (271)	Unspecified
<b>Description:</b> The alarm is raised when the number of OSPF external LSAs exceeds the maximum threshold because a large number of external LSAs flooding into the IGP.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. The advertised external routes can be viewed using CPAM IGP prefix list.		

Table 39-696 OspfIfTxRetransmit

Alarm	Attributes	Applicable major releases
Name: OspfIfTxRetransmit (662) Type: communicationsAlarm (4) Package: ospf Raised on class: ospf.Interface	Severity: warning Implicitly cleared: false Default probable cause: hello (47) Applicable probable causes: <ul style="list-style-type: none"> <li>• hello</li> <li>• dbDescript</li> <li>• lsReq</li> <li>• lsUpdate</li> <li>• lsAck</li> <li>• nullIPacket</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE retransmits an OSPF packet. The alarm information includes the NE ID of the OSPF neighbor. The alarm is not raised against a Release 4.0 or later NE.		
<b>Remedial action:</b> Informational - an NE retransmits an OSPF packet. The alarm information includes the NE ID of the OSPF neighbor. The alarm is not raised against a Release 4.0 or later NE.		

Table 39-697 OspfInternalLsaRateThresholdExceededPerArea

Alarm	Attributes	Applicable major releases
Name: OspfInternalLsaRateThresholdExceededPerArea (310) Type: topologyAlarm (34) Package: topology Raised on class: topology.Area	Severity: major Implicitly cleared: true Default probable cause: unstableIGPNetwork (241)	Unspecified
<b>Description:</b> The alarm is raised when the OSPF internal LSA rate for an area exceeds the maximum allowed value because of an unstable IGP network.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. IGP historical map can be used for debugging purpose.		

## 39 – Unspecified NE alarms

Table 39-698 OspfInternalLsaThresholdExceededPerArea

Alarm	Attributes	Applicable major releases
Name: OspfInternalLsaThresholdExceededPerArea (309) Type: topologyAlarm (34) Package: topology Raised on class: topology.Area	Severity: major Implicitly cleared: true Default probable cause: largeIgpNetwork (240)	Unspecified
<b>Description:</b> The alarm is raised when the number of OSPF internal LSAs for an area exceeds the maximum allowed value because of a large IGP network.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. IGP historical map can be used for debugging purpose.		

Table 39-699 OspfLsaRateThresholdExceededPerRouter

Alarm	Attributes	Applicable major releases
Name: OspfLsaRateThresholdExceededPerRouter (308) Type: topologyAlarm (34) Package: topology Raised on class: topology.Router	Severity: major Implicitly cleared: true Default probable cause: unstableLinksOnRouter (239)	Unspecified
<b>Description:</b> The alarm is raised when the OSPF LSA rate for an NE exceeds the maximum allowed value because of an unstable NE link.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. IGP historical map can be used for debugging purpose.		

Table 39-700 OspfLsaThresholdExceededPerRouter

Alarm	Attributes	Applicable major releases
Name: OspfLsaThresholdExceededPerRouter (374) Type: topologyAlarm (34) Package: topology Raised on class: topology.Router	Severity: major Implicitly cleared: true Default probable cause: routerAdvertisingManyLSAs (273)	Unspecified
<b>Description:</b> The alarm is raised when the number of OSPF LSAs for an NE exceeds the maximum allowed value because the NE advertises too many LSAs.		
<b>Remedial action:</b> User configured alarm for monitoring purpose. IGP historical map can be used for debugging purpose.		

Table 39-701 OTSTrailDown

Alarm	Attributes	Applicable major releases
Name: OTSTrailDown (8084) Type: communicationsAlarm (4) Package: optical Raised on class: optical.OTSTrail	Severity: critical Implicitly cleared: true Default probable cause: OperationalStateDown (1963)	Unspecified
<b>Description:</b> The alarm is raised when the termination point(s) of the OTS trail are operationally down.		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on the hops to understand why the underlying transport network is unreliable.		

Table 39-702 OTUAlarmIndicationSignal

Alarm	Attributes	Applicable major releases
Name: OTUAlarmIndicationSignal (755) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: AlarmIndicationSignal (531)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an AIS on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-703 OTUBackwardDefectIndication

Alarm	Attributes	Applicable major releases
Name: OTUBackwardDefectIndication (756) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: BackwardDefectIndication (532)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a BDI on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

## 39 – Unspecified NE alarms

Table 39-704 OTUBackwardIncomingAlignmentError

Alarm	Attributes	Applicable major releases
Name: OTUBackwardIncomingAlignmentError (815) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: BackwardIncomingAlignmentError (578)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an ODU alarm indication signal on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-705 OTUBitErrorRateSignalDegradation

Alarm	Attributes	Applicable major releases
Name: OTUBitErrorRateSignalDegradation (757) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: BitErrorRateSignalDegradation (533)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a BER-SD on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-706 OTUBitErrorRateSignalFail

Alarm	Attributes	Applicable major releases
Name: OTUBitErrorRateSignalFail (758) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: critical Implicitly cleared: true Default probable cause: BitErrorRateSignalFail (534)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a BER-SF on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-707 OTUFECRxTxModeMismatch

Alarm	Attributes	Applicable major releases
Name: OTUFECRxTxModeMismatch (759) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: critical Implicitly cleared: true Default probable cause: FECRxTxModeMismatch (535)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a FEC Rx/Tx mode mismatch on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-708 OTUFECSignalDegradation

Alarm	Attributes	Applicable major releases
Name: OTUFECSignalDegradation (760) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: FECSignalDegradation (536)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a FEC-SD on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-709 OTUFECSignalFailure

Alarm	Attributes	Applicable major releases
Name: OTUFECSignalFailure (761) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: FECSignalFailure (537)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a FEC-SF on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

## 39 – Unspecified NE alarms

Table 39-710 OTUIncomingAlignmentError

Alarm	Attributes	Applicable major releases
Name: OTUIncomingAlignmentError (816) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: IncomingAlignmentError (579)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an ODU open connection indication on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-711 OTULossOfClock

Alarm	Attributes	Applicable major releases
Name: OTULossOfClock (762) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: critical Implicitly cleared: true Default probable cause: LossOfClock (538)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an LOC on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-712 OTULossOfFraming

Alarm	Attributes	Applicable major releases
Name: OTULossOfFraming (763) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: critical Implicitly cleared: true Default probable cause: LossOfFraming (539)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an LOF on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-713 OTULossOfMultiFrame

Alarm	Attributes	Applicable major releases
Name: OTULossOfMultiFrame (764) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: LossOfMultiFrame (540)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an LOM on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-714 OTULossOfSignal

Alarm	Attributes	Applicable major releases
Name: OTULossOfSignal (765) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: critical Implicitly cleared: true Default probable cause: LossOfSignal (541)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an LOS on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-715 OTUODUAlarmIndicationSignal

Alarm	Attributes	Applicable major releases
Name: OTUODUAlarmIndicationSignal (766) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: ODUAlarmIndicationSignal (542)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an ODU AIS on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

## 39 – Unspecified NE alarms

Table 39-716 OTUODULocked

Alarm	Attributes	Applicable major releases
Name: OTUODULocked (767) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.OtuInterface	Severity: critical Implicitly cleared: true Default probable cause: ODULocked (543)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an ODU locked on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-717 OTUODUOpenConnectionIndication

Alarm	Attributes	Applicable major releases
Name: OTUODUOpenConnectionIndication (768) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.OtuInterface	Severity: critical Implicitly cleared: true Default probable cause: OTUODUOpenConnectionIndication (544)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an ODU-OCI on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-718 OTUOPUSIPayloadTypeMismatch

Alarm	Attributes	Applicable major releases
Name: OTUOPUSIPayloadTypeMismatch (817) Type: communicationsAlarm (4) Package: ethernetequipment Raised on class: ethernetequipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: OPUSIPayloadTypeMismatch (580)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a PM backward defect indication on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-719 OTUOPUPSITraceMismatch

Alarm	Attributes	Applicable major releases
Name: OTUOPUPSITraceMismatch (818) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: OPUPSITraceMismatch (581)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an ODU locked indication on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-720 OTUPMBackwardDefectIndication

Alarm	Attributes	Applicable major releases
Name: OTUPMBackwardDefectIndication (769) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: PMBackwardDefectIndication (545)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a PM BDI on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-721 OTUPMTraceIDMismatch

Alarm	Attributes	Applicable major releases
Name: OTUPMTraceIDMismatch (819) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: PMTraceIDMismatch (582)	Unspecified
<b>Description:</b> The alarm is raised when a device reports an ODU open connection indication on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

## 39 – Unspecified NE alarms

Table 39-722 OTUTraceIdMismatch

Alarm	Attributes	Applicable major releases
Name: OTUTraceIdMismatch (820) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: TraceIdMismatch (583)	Unspecified
<b>Description:</b> The alarm is raised when a device reports a trace ID mismatch on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-723 OTUTrailDown

Alarm	Attributes	Applicable major releases
Name: OTUTrailDown (5126) Type: communicationsAlarm (4) Package: optical Raised on class: optical.OTUTrail	Severity: critical Implicitly cleared: true Default probable cause: OperationalStateDown (1963)	Unspecified
<b>Description:</b> The alarm is raised when the termination point(s) of the OTU trail are operationally down.		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on the hops to understand why the underlying transport network is unreliable.		

Table 39-724 OTUTrailMisConfigured

Alarm	Attributes	Applicable major releases
Name: OTUTrailMisConfigured (5127) Type: communicationsAlarm (4) Package: optical Raised on class: optical.OTUTrail	Severity: critical Implicitly cleared: false Default probable cause: OchCrossConnectionTrailNameMisMatch (1391)	Unspecified
<b>Description:</b> The alarm is raised when all the OCh cross connections (XCs) of an OTU trail do not have the same trail name. In order for the auto wavekey processing to work properly, the XC name should be the same on all NEs of the OTU trail.		
<b>Remedial action:</b> Recreate the OCH Cross Connects with same Trail name else Wave Tracker does not work properly.		

Table 39-725 OTUUncorrectableFECErrors

Alarm	Attributes	Applicable major releases
Name: OTUUncorrectableFECErrors (770) Type: communicationsAlarm (4) Package: ethernetEquipment Raised on class: ethernetEquipment.OtuInterface	Severity: major Implicitly cleared: true Default probable cause: UncorrectableFECErrors (546)	Unspecified
<b>Description:</b> The alarm is raised when a device reports one or more uncorrectable FEC errors on an OTU-enabled interface.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-726 OutOfSlots

Alarm	Attributes	Applicable major releases
Name: OutOfSlots (462) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: false Default probable cause: noAvailableSlotNumbers (352)	Unspecified
<b>Description:</b> The alarm is raised when a stack element enters pass-through mode because there is no slot number for the element.		
<b>Remedial action:</b> Login to switch console, correct the slot number and reload stack.		

Table 39-727 ParentTemplateInvalid

Alarm	Attributes	Applicable major releases
Name: ParentTemplateInvalid (194) Type: configurationAlarm (11) Package: template Raised on class: template.TemplateBinding	Severity: major Implicitly cleared: true Default probable cause: referencedObjectInvalid (152)	Unspecified
<b>Description:</b> The alarm is raised when a parent template in a template binding is invalid. The alarm is deprecated in the 5620 SAM, Release 6.0 and later.		
<b>Raising condition:</b> ('parentTemplateInvalidReference' EQUAL 'true')		
<b>Clearing condition:</b> ('parentTemplateInvalidReference' EQUAL 'false')		
<b>Remedial action:</b> Informational - deprecated 6.0		

## 39 – Unspecified NE alarms

Table 39-728 PathReoptimized

Alarm	Attributes	Applicable major releases
Name: PathReoptimized (28) Type: pathAlarm (12) Package: mpls Raised on class: mpls.Tunnel	Severity: warning Implicitly cleared: false Default probable cause: pathReoptimized (21)	Unspecified
<b>Description:</b> The alarm is raised when an MPLS path generates an mplsTunnelReoptimized trap.		
<b>Remedial action:</b> Informational only.		

Table 39-729 PathRerouted

Alarm	Attributes	Applicable major releases
Name: PathRerouted (29) Type: pathAlarm (12) Package: mpls Raised on class: mpls.Tunnel	Severity: warning Implicitly cleared: false Default probable cause: pathRerouted (22)	Unspecified
<b>Description:</b> The alarm is raised when an MPLS path generates an mplsTunnelRerouted trap.		
<b>Remedial action:</b> Informational only.		

Table 39-730 PbbSiteMisconfiguration

Alarm	Attributes	Applicable major releases
Name: PbbSiteMisconfiguration (571) Type: configurationAlarm (11) Package: vpls Raised on class: vpls.AbstractVpls	Severity: warning Implicitly cleared: true Default probable cause: includeBothBAndISite (440)	Unspecified
<b>Description:</b> The alarm is raised when a VPLS contains a B-Site and an I-Site.		
<b>Raising condition:</b> (('Include B-Site(s)' EQUAL 'true') AND ('Include I-Site(s)' EQUAL 'true'))		
<b>Clearing condition:</b> (('Include B-Site(s)' NOT EQUAL 'true') OR ('Include I-Site(s)' NOT EQUAL 'true'))		
<b>Remedial action:</b> A configuration error has occurred which needs to be corrected. The service can have only an I-site or a B-site but not both.		

Table 39-731 PChipCAMEvent

Alarm	Attributes	Applicable major releases
Name: PChipCAMEvent (814) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: true Default probable cause: camError (577)	Unspecified
<b>Description:</b> The alarm is raised when an IOM or CPM experiences a P-chip CAM error.		
<b>Remedial action:</b> Informational - if the condition persists then the card indicated in the alarm should be replaced.		

Table 39-732 PChipError

Alarm	Attributes	Applicable major releases
Name: PChipError (593) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.BaseCard	Severity: minor Implicitly cleared: true Default probable cause: pChipError (447)	Unspecified
<b>Description:</b> The alarm is raised when persistent FCS errors are detected on the specified complex in the specified direction.		
<b>Remedial action:</b> A fault has been detected in the hardware. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-733 PChipMemoryEvent

Alarm	Attributes	Applicable major releases
Name: PChipMemoryEvent (608) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.BaseCard	Severity: warning Implicitly cleared: true Default probable cause: memoryParityError (451)	Unspecified
<b>Description:</b> The alarm is raised when a P chip detects a memory parity error. The alarm is raised against a 7450 ESS, 7710 SR, or 7750 SR. The alarm is raised against a Release 6.0 NE at R10 or later and a Release 6.1 NE at R5 or later.		
<b>Remedial action:</b> A fault has been detected in the hardware if the problem persists please contact Alcatel-Lucent support for assistance.		

## 39 – Unspecified NE alarms

Table 39-734 peerSetConfigurationIssue

Alarm	Attributes	Applicable major releases
Name: peerSetConfigurationIssue (267) Type: configurationAlarm (11) Package: pim Raised on class: pim.VirtualAnyCastRP	Severity: major Implicitly cleared: true Default probable cause: mismatchPeerSets (199)	Unspecified
<b>Description:</b> The alarm is raised when a peer set is misconfigured.		
<b>Remedial action:</b> A configuration error has occurred that must be corrected. Please check the global Virtual Anycast RP configuration and its operational status flag so that the Inconsistent Peer Sets and Only one peer bits are reset.		

Table 39-735 PeerUnreachable

Alarm	Attributes	Applicable major releases
Name: PeerUnreachable (842) Type: ProtocolAlarm (1) Package: l2tp Raised on class: l2tp.Peer	Severity: variable Implicitly cleared: true Default probable cause: protocolDown (1)	Unspecified
<b>Description:</b> The alarm is raised when an L2TP peer becomes unreachable.		
<b>Remedial action:</b> This alarm is raised when L2TP peer is unreachable. Please verify the L2TP tunnel profile configuration to ensure that the peer is properly configured. Also verify that the peer is actually reachable from this network element. This alarm is cleared automatically when L2TP Peer becomes reachable.		

Table 39-736 PersistenceRestoreProblem

Alarm	Attributes	Applicable major releases
Name: PersistenceRestoreProblem (5141) Type: processingErrorAlarm (81) Package: sw Raised on class: sw.NodePersistence	Severity: minor Implicitly cleared: false Default probable cause: persistenceRestoreProblem (2064)	Unspecified
<b>Description:</b> The alarm is raised when an error is detected while processing a persistence record.		
<b>Remedial action:</b> Check the node persistence configuration.		

Table 39-737 PersistencyFileSysThresRaised

Alarm	Attributes	Applicable major releases
Name: PersistencyFileSysThresRaised (5142) Type: equipmentAlarm (3) Package: sw Raised on class: sw.NodePersistence	Severity: major Implicitly cleared: true Default probable cause: persistencyFileSysThresRaised (2065)	Unspecified
<b>Description:</b> The alarm is raised when the filesystem reaches 90 percent usage.		
<b>Remedial action:</b> Delete unnecessary files on the compact flash disk. This operation must be executed using CLI interface on the NE.		

Table 39-738 PhysicalLinkDown

Alarm	Attributes	Applicable major releases
Name: PhysicalLinkDown (1140) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.VlanPath	Severity: major Implicitly cleared: true Default probable cause: PhysicalLinkDown (846)	Unspecified
<b>Description:</b> The alarm is raised when the physical link between two hops of a VLAN path is down.		
<b>Remedial action:</b> Check if the port that is used in the physical link is operationally up.		

Table 39-739 PkiCertVerificationFailed

Alarm	Attributes	Applicable major releases
Name: PkiCertVerificationFailed (3743) Type: configurationAlarm (11) Package: ipsec Raised on class: ipsec.IPSecBaseEntity	Severity: major Implicitly cleared: true Default probable cause: pkiCertInvalid (1478)	Unspecified
<b>Description:</b> The alarm is raised when an attempt to verify the certificate fails.		
<b>Remedial action:</b> An attempt to verify the certificate fails. Please make sure the certificate specified exists under the node cf3:system-pki and is a valid certificate		

## 39 – Unspecified NE alarms

Table 39-740 PkiFileReadFailed (ipsec)

Alarm	Attributes	Applicable major releases
Name: PkiFileReadFailed (3744) Type: configurationAlarm (11) Package: ipsec Raised on class: ipsec.IPSecBaseEntity	Severity: major Implicitly cleared: true Default probable cause: pkiFileReadCorrupted (1479)	Unspecified
<b>Description:</b> The alarm is raised when an attempt to read the file fails.		
<b>Remedial action:</b> An attempt to read the PKI file fails. Please make sure the path specified is correct and the file exists under the node cf3:system-pki		

Table 39-741 PkiFileReadFailed (sitesec)

Alarm	Attributes	Applicable major releases
Name: PkiFileReadFailed (3744) Type: configurationAlarm (11) Package: sitesec Raised on class: sitesec.CertificateAuthProfile	Severity: major Implicitly cleared: true Default probable cause: pkiFileReadCorrupted (1479)	Unspecified
<b>Description:</b> The alarm is raised when an attempt to read the file fails.		
<b>Remedial action:</b> An attempt to read the PKI file fails. Please make sure the path specified is correct and the file exists under the node cf3:system-pki		

Table 39-742 PlcyAcctStatsEventOvrflw

Alarm	Attributes	Applicable major releases
Name: PlcyAcctStatsEventOvrflw (5640) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Card	Severity: minor Implicitly cleared: true Default probable cause: PlcyAcctStatsPoolInUseExcAndLow (2415)	Unspecified
<b>Description:</b> The alarm is raised because of resource usage fluctuation that happens when the number of in-use stats resource usage exceeds 95 percent and deprecates below 85 percent of the specified stats pool limit more than 200 times.		
<b>Remedial action:</b> Notifications will resume once the resource usage fluctuation is in control i.e when the occurrence of tmnxPlcyAcctStatsPoolExcResource and tmnxPlcyAcctStatsPoolLowResource is less than 200.		

Table 39-743 PMFileRecovery

Alarm	Attributes	Applicable major releases
Name: PMFileRecovery (4867) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: false Default probable cause: netconfDown (1935)	Unspecified
<b>Description:</b> The alarm is raised when a 5620 SAM main server loses connectivity to an NE and as a result retrieves PM files that were not previously collected.		
<b>Remedial action:</b> Informational		

Table 39-744 PoolMinFreeExc

Alarm	Attributes	Applicable major releases
Name: PoolMinFreeExc (3696) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.AddressPool	Severity: warning Implicitly cleared: false Default probable cause: actualFreeAddrBelowPoolMin (1434)	Unspecified
<b>Description:</b> The alarm is raised when the actual number of free addresses in a pool falls below the desired minimum number specified in the address pool configuration.		
<b>Remedial action:</b> The alarm is raised when the actual number of free addresses in a pool falls below the desired minimum number specified in the address pool configuration.		

Table 39-745 PortsSeggregated

Alarm	Attributes	Applicable major releases
Name: PortsSeggregated (746) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.VlanPathInstance	Severity: major Implicitly cleared: true Default probable cause: portsSeggregated (522)	Unspecified
<b>Description:</b> The alarm is raised when the two ports that are to be part of a service cross-connect are segregated.		
<b>Remedial action:</b> Segregated ports are being used in service. Remove the port from Segregation or use a port that is not involved in Segregation.		

## 39 – Unspecified NE alarms

Table 39-746 PowerModule\_voltageALocalFailure

Alarm	Attributes	Applicable major releases
Name: PowerModule_voltageALocalFailure (6171) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCAPowerModule	Severity: major Implicitly cleared: true Default probable cause: powerProblem (911)	Unspecified
<b>Description:</b> This Alarm is raised when the 48V Voltage Failure happens in the power supply A of the local Shelf.		
<b>Remedial action:</b> TBD		

Table 39-747 PowerModule\_voltageARemoteFailure

Alarm	Attributes	Applicable major releases
Name: PowerModule_voltageARemoteFailure (6172) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCAPowerModule	Severity: major Implicitly cleared: true Default probable cause: powerProblem (911)	Unspecified
<b>Description:</b> This Alarm is raised when the 48V Voltage Failure happens in the power supply A of the remote Shelf.		
<b>Remedial action:</b> TBD		

Table 39-748 PowerModule\_voltageBLocalFailure

Alarm	Attributes	Applicable major releases
Name: PowerModule_voltageBLocalFailure (6173) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCAPowerModule	Severity: major Implicitly cleared: true Default probable cause: powerProblem (911)	Unspecified
<b>Description:</b> This Alarm is raised when the 48V Voltage Failure happens in the power supply B of the local Shelf.		
<b>Remedial action:</b> TBD		

Table 39-749 PowerModule\_voltageBRemoteFailure

Alarm	Attributes	Applicable major releases
Name: PowerModule_voltageBRemoteFailure (6174) Type: environmentalAlarm (2) Package: femto Raised on class: femto.SCATCAPowerModule	Severity: major Implicitly cleared: true Default probable cause: powerProblem (911)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> This Alarm is raised when the 48V Voltage Failure happens in the power supply B of the remote Shelf.		
<b>Remedial action:</b> TBD		

(2 of 2)

Table 39-750 PowerSupplyACRectifierFailure

Alarm	Attributes	Applicable major releases
Name: PowerSupplyACRectifierFailure (5181) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupplyTray	Severity: minor Implicitly cleared: true Default probable cause: PowerSupplyACRectifierFailedorMissing (2097)	Unspecified
<b>Description:</b> This alarm is generated if any one of the AC rectifiers for a given power supply is in a failed state or is missing. When the alarm is raised during device discovery, one or both AC Rectifiers of the Power Supply Tray may be not equipped. When the alarm is raised while the device is in the managed state, one or both AC Rectifiers of the Power Supply Tray might be removed or they have a fault condition. The alarm clears when the status changes to OK.		
<b>Remedial action:</b> Ensure that the NE is properly connected to power. There is an increased risk of the power supply failing, causing insufficient power to the system. Please bring the AC rectifiers back online by equipping them properly. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-751 PowerSupplyVoltageAlarm

Alarm	Attributes	Applicable major releases
Name: PowerSupplyVoltageAlarm (1129) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.PowerSupply	Severity: variable Implicitly cleared: false Default probable cause: powerSupplyFailure (117)	Unspecified
<b>Description:</b> The alarm is raised when the power supply voltage alarm state changes to a value other than Normal.		
<b>Remedial action:</b> Check the status of the site power supply.		

Table 39-752 PPPFail

Alarm	Attributes	Applicable major releases
Name: PPPFail (632) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: pppFail (469)	Unspecified
<b>Description:</b> The alarm is raised when a PPP IP Fail condition is detected.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

## 39 – Unspecified NE alarms

Table 39-753 PppNcpFailure

Alarm	Attributes	Applicable major releases
Name: PppNcpFailure (3689) Type: processingErrorAlarm (81) Package: service Raised on class: service.ServiceAccessPoint	Severity: major Implicitly cleared: false Default probable cause: sapAtmPppNcpFailure (1428)	Unspecified
<b>Description:</b> The alarm is raised when there is an NCP phase setup problem.		
<b>Remedial action:</b> This alarm indicates the NCP phase setup failed, thus IP protocol can not be configured for the user that attempted to set up the PPP session. Please verify NCP setup configuration.		

Table 39-754 PPPoASessionFailure

Alarm	Attributes	Applicable major releases
Name: PPPoASessionFailure (3688) Type: processingErrorAlarm (81) Package: service Raised on class: service.AccessInterface	Severity: major Implicitly cleared: false Default probable cause: sapAtmPppSessionFailure (1427)	Unspecified
<b>Description:</b> The alarm is raised when an NE notifies the 5620 SAM that it cannot create a PPPoA Session.		
<b>Remedial action:</b> This alarm indicates the problem encountered by NE while trying to create a new PPPoA session. Please review the alarm's additional text to obtain information about the error condition. Possible problems include authentication failures, LCP or IPCP layer problems during the session establishment, or possible mis-configuration on the service interface or PPP policy.		

Table 39-755 PPPoESessionFailure

Alarm	Attributes	Applicable major releases
Name: PPPoESessionFailure (2915) Type: processingErrorAlarm (81) Package: service Raised on class: service.ServiceAccessPoint	Severity: major Implicitly cleared: false Default probable cause: pppoeSessionFailed (1119)	Unspecified
<b>Description:</b> The alarm is raised when an NE notifies the 5620 SAM that it cannot create a PPPoE Session.		
<b>Remedial action:</b> This alarm indicates the problem encountered by NE while trying to create a new PPPoE session. Please review the alarm's additional text to obtain information about the error condition. Possible problems include authentication failures, LCP or IPCP layer problems during the session establishment, or possible mis-configuration on the service interface or PPP policy.		

Table 39-756 PrefixLimitExceeded

Alarm	Attributes	Applicable major releases
Name: PrefixLimitExceeded (4) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Peer	Severity: critical Implicitly cleared: false Default probable cause: prefixLimitExceeded (4)	Unspecified
<b>Description:</b> The alarm is raised when a BGP instance learns the maximum number of peer routes.		
<b>Remedial action:</b> Informational. The threshold configured should be revisited to ensure that it is not set to low given the number of peer routes that are being received. If the threshold is set close to the maximum number of routes supported by the NE then it is probable that there is an issue with another NE in the network. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-757 PrefixLimitNearing

Alarm	Attributes	Applicable major releases
Name: PrefixLimitNearing (3) Type: ProtocolAlarm (1) Package: bgp Raised on class: bgp.Peer	Severity: major Implicitly cleared: false Default probable cause: prefixLimitNearing (3)	Unspecified
<b>Description:</b> The alarm is raised when a BGP instance exceeds the threshold percentage of the configured maximum.		
<b>Remedial action:</b> Informational. The threshold configured should be revisited to ensure that it is not set to low given the number of peer routes that are being received. If the threshold is set close to the maximum number of routes supported by the NE then it is probable that there is an issue with another NE in the network. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-758 PrimaryVirtualSwitchControllerFailed

Alarm	Attributes	Applicable major releases
Name: PrimaryVirtualSwitchControllerFailed (5429) Type: virtualSwitchAlarm (136) Package: dctr Raised on class: dctr.VirtualSwitch	Severity: major Implicitly cleared: true Default probable cause: PrimaryControllerFailOver (2130)	Unspecified
<b>Description:</b> The alarm is raised when communication between the virtual switch to the primary controller has failed.		
<b>Remedial action:</b> This alarm can be cleared when primary virtual switch is operationally up.		

39 – Unspecified NE alarms

---

**Table 39-759 ProbeFailedAlarm (atm)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: atm Raised on class: atm.PvcConnection	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

**Table 39-760 ProbeFailedAlarm (bgp)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: bgp Raised on class: bgp.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

**Table 39-761 ProbeFailedAlarm (ethernetoam)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: ethernetoam Raised on class: ethernetoam.MaintAssociation	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAMtest on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-762 ProbeFailedAlarm (Idp)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: Idp Raised on class: Idp.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-763 ProbeFailedAlarm (Ite)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: Ite Raised on class: Ite.EPSPath	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when ProbeFailedAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-764 ProbeFailedAlarm (Iteservice)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: Iteservice Raised on class: Iteservice.MobileService	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

39 – Unspecified NE alarms

---

**Table 39-765 ProbeFailedAlarm (mirror)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: mirror Raised on class: mirror.Mirror	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-766 ProbeFailedAlarm (monpath)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: monpath Raised on class: monpath.MonitoredIpPath	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-767 ProbeFailedAlarm (mpls)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: mpls Raised on class: mpls.Lsp	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-768 ProbeFailedAlarm (mplstp)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: mplstp Raised on class: mplstp.TPLsp	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-769 ProbeFailedAlarm (netw)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-770 ProbeFailedAlarm (pim)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: pim Raised on class: pim.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

39 – Unspecified NE alarms

---

Table 39-771 ProbeFailedAlarm (rtr)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: rtr Raised on class: rtr.VirtualRouter	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAMtest on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-772 ProbeFailedAlarm (service)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: service Raised on class: service.SpokeConnector	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when ProbeFailedAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-773 ProbeFailedAlarm (svt)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: svt Raised on class: svt.Tunnel	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-774 ProbeFailedAlarm (vll)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: vll Raised on class: vll.Vll	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-775 ProbeFailedAlarm (vpis)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: vpis Raised on class: vpis.AbstractVpis	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-776 ProbeFailedAlarm (vprn)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm (3707) Type: oamAlarm (18) Package: vprn Raised on class: vprn.Vprn	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

39 – Unspecified NE alarms

---

**Table 39-777 ProbeFailedAlarm2 (ethernetoam)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm2 (3738) Type: oamAlarm (18) Package: ethernetoam Raised on class: ethernetoam.Mep	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

**Table 39-778 ProbeFailedAlarm2 (lte)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm2 (3738) Type: oamAlarm (18) Package: lte Raised on class: lte.EPSPeer	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when ProbeFailedAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

**Table 39-779 ProbeFailedAlarm2 (mpls)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm2 (3738) Type: oamAlarm (18) Package: mpls Raised on class: mpls.P2MPDynamicLsp	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-780 ProbeFailedAlarm2 (rtr)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm2 (3738) Type: oamAlarm (18) Package: rtr Raised on class: rtr.LDPTunnelInterface	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-781 ProbeFailedAlarm2 (service)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm2 (3738) Type: oamAlarm (18) Package: service Raised on class: service.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when ProbeFailedAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-782 ProbeFailedAlarm2 (svt)

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm2 (3738) Type: oamAlarm (18) Package: svt Raised on class: svt.SdpBinding	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAMtest on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

39 – Unspecified NE alarms

---

**Table 39-783 ProbeFailedAlarm3 (mpls)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm3 (3885) Type: oamAlarm (18) Package: mpls Raised on class: mpls.LspPath	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-784 ProbeFailedAlarm3 (service)**

Alarm	Attributes	Applicable major releases
Name: ProbeFailedAlarm3 (3885) Type: oamAlarm (18) Package: service Raised on class: service.CompositeService	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports a probe failure.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-785 ProbeFailureAlarm**

Alarm	Attributes	Applicable major releases
Name: ProbeFailureAlarm (3902) Type: oamAlarm (18) Package: sas Raised on class: sas.Test	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> This alarm is raised when a probe failure trap is received from the node.		
<b>Remedial action:</b> Fix network connections issues.		

Table 39-786 ProvisioningMismatch

Alarm	Attributes	Applicable major releases
Name: ProvisioningMismatch (634) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: provisioningMismatch (470)	Unspecified
<b>Description:</b> The alarm is raised when a license mismatch is detected for provisioned equipment.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-787 PTPCardNotSupportedAlarm

Alarm	Attributes	Applicable major releases
Name: PTPCardNotSupportedAlarm (3603) Type: equipmentAlarm (3) Package: ptp Raised on class: ptp.IEEEPTPClock	Severity: minor Implicitly cleared: true Default probable cause: PTPCardNotSupported (1392)	Unspecified
<b>Description:</b> The alarm is raised when the Precision Timing Protocol (PTP) is enabled on a card that does not support clock recovery.		
<b>Remedial action:</b> Please enable PTP on CPM which supports OCX0 oscillator type		

Table 39-788 PTPClockRecoveryStateAlarm

Alarm	Attributes	Applicable major releases
Name: PTPClockRecoveryStateAlarm (3605) Type: communicationsAlarm (4) Package: ptp Raised on class: ptp.IEEEPTPClock	Severity: info Implicitly cleared: false Default probable cause: PTPClockRecoveryStateChange (1394)	Unspecified
<b>Description:</b> The alarm is raised when the aluPtpClockRecoveryState changes for an IEEE 1588 Precision Timing Protocol (PTP) clock.		
<b>Remedial action:</b> Informational		

## 39 – Unspecified NE alarms

Table 39-789 PTPMasterChangeAlarm

Alarm	Attributes	Applicable major releases
Name: PTPMasterChangeAlarm (3606) Type: communicationsAlarm (4) Package: ptp Raised on class: ptp.IEEEPTPClock	Severity: info Implicitly cleared: false Default probable cause: PTPMasterChange (1395)	Unspecified
<b>Description:</b> The alarm is raised when there is a change in the synchronization source for a Precision Timing Protocol (PTP) clock.		
<b>Remedial action:</b> Informational		

Table 39-790 PTPOutOfResourcesAlarm

Alarm	Attributes	Applicable major releases
Name: PTPOutOfResourcesAlarm (3607) Type: equipmentAlarm (3) Package: ptp Raised on class: ptp.IEEEPTPClock	Severity: minor Implicitly cleared: true Default probable cause: PTPOutOfResources (1396)	Unspecified
<b>Description:</b> The alarm is raised when the Precision Timing Protocol (PTP) process on the card is out of resources. This may occur in either of two situations: 1. The number of PTP peers exceeds the system limit. 2. The total unicast packet rate negotiated with all PTP peers reaches the maximum packet rate supported by the system.		
<b>Remedial action:</b> Informational		

Table 39-791 PTPPortDSPortStateAlarm

Alarm	Attributes	Applicable major releases
Name: PTPPortDSPortStateAlarm (3610) Type: communicationsAlarm (4) Package: ptp Raised on class: ptp.IEEEPTPPort	Severity: info Implicitly cleared: true Default probable cause: PTPPortDSPortState (1399)	Unspecified
<b>Description:</b> The alarm is raised when the aluPtpPortDSPortState changes for an IEEE 1588 Precision Timing Protocol (PTP) port.		
<b>Remedial action:</b> Informational.		

Table 39-792 PTPQualityLevelChangedAlarm

Alarm	Attributes	Applicable major releases
Name: PTPQualityLevelChangedAlarm (3612) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: false Default probable cause: PTPQualityLevelChanged (1401)	Unspecified
<b>Description:</b> The alarm is raised when there is a change of the received quality level on the Precision Timing Protocol (PTP).		
<b>Remedial action:</b> Informational only.		

Table 39-793 QChipBufferMemoryEvent

Alarm	Attributes	Applicable major releases
Name: QChipBufferMemoryEvent (4990) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.Card	Severity: minor Implicitly cleared: true Default probable cause: bufMemoryError (2044)	Unspecified
<b>Description:</b> The alarm is raised when a Q-chip experiences an occurrence of a buffer memory error on IOM or CPM.		
<b>Remedial action:</b> A fault has been detected in the hardware if the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-794 QChipIfCellEvent

Alarm	Attributes	Applicable major releases
Name: QChipIfCellEvent (4991) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.Card	Severity: minor Implicitly cleared: true Default probable cause: ifCellError (2045)	Unspecified
<b>Description:</b> The alarm is raised when an inter-chip interface (XPL2 bundle) experiences internal datapath cell errors on IOM or CPM.		
<b>Remedial action:</b> A fault has been detected in the hardware if the problem persists please contact Alcatel-Lucent support for assistance.		

## 39 – Unspecified NE alarms

Table 39-795 QChipIfDownEvent

Alarm	Attributes	Applicable major releases
Name: QChipIfDownEvent (4992) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.Card	Severity: minor Implicitly cleared: true Default probable cause: ifDownError (2046)	Unspecified
<b>Description:</b> The alarm is raised when an inter-chip interface (XPL2 bundle) experiences an internal datapath problem on IOM or CPM.		
<b>Remedial action:</b> A fault has been detected in the hardware if the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-796 QChipIntMemoryEvent

Alarm	Attributes	Applicable major releases
Name: QChipIntMemoryEvent (4993) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.Card	Severity: minor Implicitly cleared: true Default probable cause: intMemoryError (2047)	Unspecified
<b>Description:</b> The alarm is raised when a Q-chip experiences an occurrence of an internal memory error on IOM or CPM.		
<b>Remedial action:</b> A fault has been detected in the hardware if the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-797 QChipResetProtImpact

Alarm	Attributes	Applicable major releases
Name: QChipResetProtImpact (5642) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.Card	Severity: minor Implicitly cleared: true Default probable cause: qChipResetProtocolTimeout (2418)	Unspecified
<b>Description:</b> The alarm is raised when a slot experienced a data path failure due to Qchip reset on IOM/CPM which caused a timeout on short BFD or ETH-CFM protocol timers.		
<b>Remedial action:</b> Informational. The alarm is raised when a slot experienced a data path failure due to Qchip reset on IOM/CPM which caused a timeout on short BFD or ETH-OAM protocol timers. Services-related data associated with the impacted protocol may be lost.		

Table 39-798 QChipStatsMemoryEvent

Alarm	Attributes	Applicable major releases
Name: QChipStatsMemoryEvent (4994) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.Card	Severity: minor Implicitly cleared: true Default probable cause: statsMemoryError (2048)	Unspecified
<b>Description:</b> The alarm is raised when a Q-chip experiences an occurrence of a statistics memory error on IOM or CPM.		
<b>Remedial action:</b> A fault has been detected in the hardware if the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-799 QueryVerMismatch

Alarm	Attributes	Applicable major releases
Name: QueryVerMismatch (159) Type: configurationAlarm (11) Package: igmp Raised on class: igmp.Interface	Severity: warning Implicitly cleared: false Default probable cause: InvalidVersionofQueryMessageReceived (129)	Unspecified
<b>Description:</b> The alarm is raised when an interface configured for IGMPv3 receives a query message for an earlier IGMP version. The interface subsequently enters an IGMP mode that is compatible with the earlier version. The alarm information includes the IGMP version on the interface and the IGMP version of the received query.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-800 RadAcctOnOngoing

Alarm	Attributes	Applicable major releases
Name: RadAcctOnOngoing (4971) Type: radiusAccountingPolicyAlarm (38) Package: aaa Raised on class: aaa.RadiusServerPolicy	Severity: minor Implicitly cleared: false Default probable cause: TooManyUnacknowledgedRadiusAccountingOnMessages (2025) Applicable probable causes: <ul style="list-style-type: none"> <li>• TooManyUnacknowledgedRadiusAccountingOnMessages</li> <li>• MisconfiguredPolicy</li> <li>• RadiusServerUnreachable</li> <li>• MissingClientInformation</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised each time when the RADIUS client has sent 10 RADIUS Accounting-On messages without receiving any acknowledgement from the RADIUS server.		
<b>Remedial action:</b> Ensure that: 1.The RADIUS server is up and running. 2.The RADIUS server policy configuration is correct. Please note that this system will keep on retrying indefinitely until it receives an acknowledgement from the RADIUS server.		

39 – Unspecified NE alarms

---

**Table 39-801 RadioHop15TCA**

Alarm	Attributes	Applicable major releases
Name: RadioHop15TCA (4835) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: ThresholdCrossed (1920)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a threshold crossing - Radio hop 15 minutes TCA		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

**Table 39-802 RadioHop15UAT**

Alarm	Attributes	Applicable major releases
Name: RadioHop15UAT (4836) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: UnavailableTime (1921)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a threshold crossing - Radio hop 15 minutes UAT		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

**Table 39-803 RadioHop24TCA**

Alarm	Attributes	Applicable major releases
Name: RadioHop24TCA (4837) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: ThresholdCrossed (1920)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a threshold crossing - Radio hop 24 Hours TCA		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

**Table 39-804 RadioHop24UAT**

Alarm	Attributes	Applicable major releases
Name: RadioHop24UAT (4838) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: UnavailableTime (1921)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a MPT detects a threshold crossing - Radio hop 24 Hours UAT		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

(2 of 2)

Table 39-805 RadioLink15TCA

Alarm	Attributes	Applicable major releases
Name: RadioLink15TCA (4839) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: ThresholdCrossed (1920)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a threshold crossing - Radio Link 15 minutes TCA		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-806 RadioLink15UAT

Alarm	Attributes	Applicable major releases
Name: RadioLink15UAT (4840) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: UnavailableTime (1921)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a threshold crossing - Radio Link 15 minutes UAT		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-807 RadioLink24TCA

Alarm	Attributes	Applicable major releases
Name: RadioLink24TCA (4841) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: ThresholdCrossed (1920)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a threshold crossing - Radio Link 24 Hours TCA		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

## 39 – Unspecified NE alarms

Table 39-808 RadioLink24UAT

Alarm	Attributes	Applicable major releases
Name: RadioLink24UAT (4842) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: UnavailableTime (1921)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a threshold crossing - Radio Link 24 Hours UAT		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-809 RadioLinkAMAbnormalState

Alarm	Attributes	Applicable major releases
Name: RadioLinkAMAbnormalState (3943) Type: radiolinkAMABNAlarm (119) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: inate Implicitly cleared: true Default probable cause: RadiolinkAMABNProblem (1525)	Unspecified
<b>Description:</b> The alarm is raised when abnormal state resulted due to Radio link AM mode.		
<b>Remedial action:</b> The alarm is raised when abnormal state resulted due to Radio link AM mode.		

Table 39-810 RadioLinkDown

Alarm	Attributes	Applicable major releases
Name: RadioLinkDown (747) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.VlanPath	Severity: major Implicitly cleared: true Default probable cause: radioLinkDown (523)	Unspecified
<b>Description:</b> The alarm is raised when the radio link between two hops of a VLAN path is down.		
<b>Remedial action:</b> Check if the port that is used in the Radio link is operationally up.		

Table 39-811 RadioLoopProblemCh1

Alarm	Attributes	Applicable major releases
Name: RadioLoopProblemCh1 (4843) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: LoopProblem (1922)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a MPT detects a ATPC/ACM Loop problem - CH1 Radio Loop Problem		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

(2 of 2)

Table 39-812 RadioLoopProblemChx

Alarm	Attributes	Applicable major releases
Name: RadioLoopProblemChx (4844) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: LoopProblem (1922)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a ATPC/ACM Loop problem - CHX Radio Loop Problem		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-813 RadioRdi

Alarm	Attributes	Applicable major releases
Name: RadioRdi (4846) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: major Implicitly cleared: true Default probable cause: Rdi (1888)	Unspecified
<b>Description:</b> The alarm is raised when a microwave radio device receives a remote defect indication from the far end microwave radio.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-814 RadioSwPackageMissing

Alarm	Attributes	Applicable major releases
Name: RadioSwPackageMissing (4848) Type: integrityViolation (85) Package: mwa Raised on class: mwa.PortTermination	Severity: warning Implicitly cleared: true Default probable cause: SwPackageMissing (1925)	Unspecified
<b>Description:</b> The alarm is raised when a valid microwave radio software package is not present at startup.		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

## 39 – Unspecified NE alarms

Table 39-815 RadiusAcctPlcyFailure

Alarm	Attributes	Applicable major releases
Name: RadiusAcctPlcyFailure (363) Type: radiusAccountingPolicyAlarm (38) Package: radiusaccounting Raised on class: radiusaccounting.Policy	Severity: major Implicitly cleared: false Default probable cause: radiusAccountingRequestFailure (260)	Unspecified
<b>Description:</b> The alarm is raised when a RADIUS accounting request is not successfully sent to any of the RADIUS servers specified in the RADIUS accounting policy.		
<b>Remedial action:</b> The Radius server(s) which are configured in the accounting policy are unreachable. This may occur in a number of different scenarios. The server(s) may have become unresponsive - please refer to the Radius server documentation for assistance. The network connectivity to the server(s) may have been lost - please investigate why the underlying transport network is unreliable.		

Table 39-816 RadiusInsertedFtrEntryDropped

Alarm	Attributes	Applicable major releases
Name: RadiusInsertedFtrEntryDropped (1152) Type: configurationAlarm (11) Package: acfilter Raised on class: acfilter.FilterDefinition	Severity: warning Implicitly cleared: false Default probable cause: FilterEntryDropped (856)	Unspecified
<b>Description:</b> The alarm is raised when a request to insert a filter entry is not successful for a RADIUS application.		
<b>Remedial action:</b> A Configuration error has occurred. The request to insert a filter entry was not successful for Radius application. Check the configuration filter entry.		

Table 39-817 RadiusInsertSpaceThresholdAlarm

Alarm	Attributes	Applicable major releases
Name: RadiusInsertSpaceThresholdAlarm (1151) Type: configurationAlarm (11) Package: acfilter Raised on class: acfilter.FilterDefinition	Severity: major Implicitly cleared: true Default probable cause: UtilizationExceedConfiguredLimit (855)	Unspecified
<b>Description:</b> The alarm is raised when the utilization of a filter entry range that is reserved for filter entry insertion increases to the configured maximum value for a RADIUS application insert range.		
<b>Remedial action:</b> The filter entry range reserved for filter entry insertion has increased to the configured high watermark for Radius application. Make an adjusted to the watermarks or to the filter.		

Table 39-818 radiusServerOverloaded

Alarm	Attributes	Applicable major releases
Name: radiusServerOverloaded (3913) Type: communicationsAlarm (4) Package: subscrauth Raised on class: subscrauth.RadiusEntry	Severity: major Implicitly cleared: true Default probable cause: radiusServerRequestLimitReached (1499)	Unspecified
<b>Description:</b> The alarm is raised when the RADIUS server is overloaded.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Over Loaded'))		
<b>Clearing condition:</b> (('Operational State' NOT EQUAL 'Over Loaded'))		
<b>Remedial action:</b> Verify the RADIUS server is properly configured to process pending authentication requests at the desired rate and ensure that this rate matches the authentication request limit defined for this RADIUS server on the network element.		

Table 39-819 RadRouteDownloadFailed

Alarm	Attributes	Applicable major releases
Name: RadRouteDownloadFailed (4418) Type: communicationsAlarm (4) Package: aaa Raised on class: aaa.RouteDownloadPolicy	Severity: warning Implicitly cleared: false Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when a RADIUS route-download process fails.		
<b>Remedial action:</b> Ensure that: 1.The routes defined in the RADIUS Server have a valid syntax. 2.The number of downloaded routes is less than the maximum. 3.There are no issues affecting the node's ability to populate the routes into the routing table.		

Table 39-820 RDI (mpr)

Alarm	Attributes	Applicable major releases
Name: RDI (806) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.IMALink	Severity: minor Implicitly cleared: true Default probable cause: remoteDefectIndication (572)	Unspecified
<b>Description:</b> The alarm is raised when a Remote Defect Indication signal is detected on an ASAP MDA.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

## 39 – Unspecified NE alarms

Table 39-821 RDICH1

Alarm	Attributes	Applicable major releases
Name: RDICH1 (4833) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: RemoteDefectIndication (1919)	Unspecified
<b>Description:</b> The alarm is raised when a MPT receives a remote MPT CH1 remote defect indication		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-822 RDICHx

Alarm	Attributes	Applicable major releases
Name: RDICHx (4834) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: RemoteDefectIndication (1919)	Unspecified
<b>Description:</b> The alarm is raised when a MPT receives a remote MPT CHX remote defect indication		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

Table 39-823 ReceivedHigherBridgePriority

Alarm	Attributes	Applicable major releases
Name: ReceivedHigherBridgePriority (504) Type: SdpBindingAlarm (30) Package: I2fwd Raised on class: I2fwd.CircuitStp	Severity: warning Implicitly cleared: false Default probable cause: customerDeviceMisconfigured (332)	Unspecified
<b>Description:</b> The alarm is raised when a customer NE is configured with a bridge priority of zero. The SDP binding that connects to the customer device is subsequently blocked.		
<b>Remedial action:</b> Remove the customer's device or reconfigure the customer's bridge priority with value greater than zero.		

Table 39-824 RedundancySwitchover

Alarm	Attributes	Applicable major releases
Name: RedundancySwitchover (181) Type: equipmentAlarm (3) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: false Default probable cause: CPMSwitchover (1440)	Unspecified
<b>Description:</b> The alarm is raised when a 5620 SAM main server receives a CPMSwitchover trap from an NE, which indicates that the standby CPM detects an active CPM failure and is preparing to take over as the new active CPM.		
<b>Remedial action:</b> Informational.		

Table 39-825 RedundantIfMismatch

Alarm	Attributes	Applicable major releases
Name: RedundantIfMismatch (419) Type: configurationAlarm (11) Package: srrp Raised on class: srrp.Instance	Severity: major Implicitly cleared: false Default probable cause: redundantIfNotProperlyPaired (312)	Unspecified
<b>Description:</b> The alarm is raised when the local and remote redundant interfaces are not correctly paired.		
<b>Remedial action:</b> Reconfigure the redundant interfaces for the peer SRRP instances so that they match each other.		

Table 39-826 RedundantRadioLink

Alarm	Attributes	Applicable major releases
Name: RedundantRadioLink (1081) Type: configurationAlarm (11) Package: netw Raised on class: netw.RadioPhysicalLink	Severity: minor Implicitly cleared: false Default probable cause: redundantRadioLinkConfigured (819)	Unspecified
<b>Description:</b> The alarm is raised when a radio link is discovered between two nodes when there is already a physical link(s) between the same nodes.		
<b>Remedial action:</b> Informational-this alarm indicates that there is another radio link between the nodes involved.		

## 39 – Unspecified NE alarms

Table 39-827 ReferenceOneLossOfSignal

Alarm	Attributes	Applicable major releases
Name: ReferenceOneLossOfSignal (1953) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: ReferenceOneLossOfSignal (941)	Unspecified
<b>Description:</b> The alarm is raised when the Timing Reference One on an NE is not qualified due to Loss of Signal.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'LOS'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'LOS'))))		
<b>Remedial action:</b> Make sure that peer connected to Reference One is properly configured.		

Table 39-828 ReferenceOneOutOfFrequency

Alarm	Attributes	Applicable major releases
Name: ReferenceOneOutOfFrequency (1954) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: ReferenceOneOutOfFrequency (942)	Unspecified
<b>Description:</b> The alarm is raised when the Timing Reference One on an NE is not qualified due to Out of frequency.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'OOF'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'OOF'))))		
<b>Remedial action:</b> Check the communication path is up between the local PTP slave clock and its selected master		

Table 39-829 ReferenceOneOutOfPollInRange

Alarm	Attributes	Applicable major releases
Name: ReferenceOneOutOfPollInRange (1955) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: ReferenceOneOutOfPollInRange (943)	Unspecified
<b>Description:</b> The alarm is raised when the Timing Reference One on an NE is not qualified due to Out of poll in range.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'OOPIR'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'OOPIR'))))		
<b>Remedial action:</b> Check the timing reference is configured correctly. Check the SONET port is configured correctly and that the physical layer cabling is operating correctly. Call customer support if necessary.		

Table 39-830 ReferenceTwoLossOfSignal

Alarm	Attributes	Applicable major releases
Name: ReferenceTwoLossOfSignal (1956) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: ReferenceTwoLossOfSignal (944)	Unspecified
<b>Description:</b> The alarm is raised when the Timing Reference Two on an NE is not qualified due to Loss of Signal.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'LOS'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'LOS'))))		
<b>Remedial action:</b> Make sure that peer connected to Reference Two is properly configured.		

Table 39-831 ReferenceTwoOutOfFrequency

Alarm	Attributes	Applicable major releases
Name: ReferenceTwoOutOfFrequency (1957) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: ReferenceTwoOutOfFrequency (945)	Unspecified
<b>Description:</b> The alarm is raised when the Timing Reference Two on an NE is not qualified due to Out of frequency.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'OOF'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'OOF'))))		
<b>Remedial action:</b> Make sure that frequency configured for Reference Two is correct.		

Table 39-832 ReferenceTwoOutOfPollInRange

Alarm	Attributes	Applicable major releases
Name: ReferenceTwoOutOfPollInRange (1958) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: ReferenceTwoOutOfPollInRange (946)	Unspecified
<b>Description:</b> The alarm is raised when the Timing Reference Two on an NE is not qualified due to Out of poll in range.		
<b>Raising condition:</b> (('Not Qualified Due To'anyBit'OOPIR'))		
<b>Clearing condition:</b> NOT (((('Not Qualified Due To'anyBit'OOPIR'))))		
<b>Remedial action:</b> Check the timing reference is configured correctly. Check the SONET port is configured correctly and that the physical layer cabling is operating correctly. Call customer support if necessary.		

## 39 – Unspecified NE alarms

Table 39-833 Registered4GUEsExceeded

Alarm	Attributes	Applicable major releases
Name: Registered4GUEsExceeded (5048) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: info Implicitly cleared: false Default probable cause: ThresholdExceeded (2052)	Unspecified
<b>Description:</b> The alarm is raised when the number of 4G Registered UEs exceeds the threshold that has been set by the operator.		
<b>Raising condition:</b> (('4G Registered UEs Threshold' NOT EQUAL '0L') AND ('4G Registered UEs' > '4G Registered UEs Threshold'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-834 RegisteredIdle4GUEsExceeded

Alarm	Attributes	Applicable major releases
Name: RegisteredIdle4GUEsExceeded (5049) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: info Implicitly cleared: false Default probable cause: ThresholdExceeded (2052)	Unspecified
<b>Description:</b> The alarm is raised when the number of 4G Registered Idle UEs exceeds the threshold that has been set by the operator.		
<b>Raising condition:</b> (('4G Registered Idle UEs Threshold' NOT EQUAL '0L') AND ('4G Registered Idle UEs' > '4G Registered Idle UEs Threshold'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-835 RemoteDefectIndication

Alarm	Attributes	Applicable major releases
Name: RemoteDefectIndication (2942) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: remoteDefectIndication (572)	Unspecified
<b>Description:</b> The alarm is raised when a RDI occurs.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-836 RemoteNEFailure

Alarm	Attributes	Applicable major releases
Name: RemoteNEFailure (1173) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: remoteNEFailure (874)	Unspecified
<b>Description:</b> The alarm is raised when a remote NE failure is detected.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-837 ReplaceableUnitMissing

Alarm	Attributes	Applicable major releases
Name: ReplaceableUnitMissing (635) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: cardMissing (471)	Unspecified
<b>Description:</b> The alarm is raised when a device detects that a provisioned card is not physically present.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-838 ReplaceableUnitProblem (equipment)

Alarm	Attributes	Applicable major releases
Name: ReplaceableUnitProblem (636) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: cardFail (472)	Unspecified
<b>Description:</b> The alarm is raised when a card fails.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-839 ReplaceableUnitProblem (mpr)

Alarm	Attributes	Applicable major releases
Name: ReplaceableUnitProblem (636) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: cardFail (472)	Unspecified

(1 of 2)

## 39 – Unspecified NE alarms

Alarm	Attributes	Applicable major releases
<b>Description:</b> The alarm is raised when a card fails.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

(2 of 2)

Table 39-840 ReplaceableUnitTypeMismatch (equipment)

Alarm	Attributes	Applicable major releases
Name: ReplaceableUnitTypeMismatch (637) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: equipmentMismatch (473)	Unspecified
<b>Description:</b> The alarm is raised when there is a mismatch between the installed card type and the expected card type.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 39-841 ReplaceableUnitTypeMismatch (mpr)

Alarm	Attributes	Applicable major releases
Name: ReplaceableUnitTypeMismatch (637) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: equipmentMismatch (473)	Unspecified
<b>Description:</b> The alarm is raised when there is a mismatch between the installed equipment type and the expected equipment type.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card type configured for the slot identified in the alarm must match the installed card type.		

Table 39-842 ReplicationLmtExceeded

Alarm	Attributes	Applicable major releases
Name: ReplicationLmtExceeded (3968) Type: resourceAlarm (28) Package: equipment Raised on class: equipment.BaseCard	Severity: info Implicitly cleared: false Default probable cause: resourceLimitReached (131)	Unspecified
<b>Description:</b> The alarm is raised when an IOM fails to program an OIF for an (S,G) record because the replication limit for that (S,G) on that IOM has been reached. The replication limit per (S,G) entry on an IOM is currently 127.		
<b>Remedial action:</b> Informational - no corrective action required		

Table 39-843 ReservedRouteTargetMismatch

Alarm	Attributes	Applicable major releases
Name: ReservedRouteTargetMismatch (6446) Type: configurationAlarm (11) Package: I3fwd Raised on class: I3fwd.ServiceSite	Severity: warning Implicitly cleared: true Default probable cause: reservedRouteTargetChanged (2446)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a pre-assigned route target on this VPRN has been modified. The alarm information includes the source, i.e., import or export, and the conflict reserved VPRN RT entry distinguished name.		
<b>Remedial action:</b> A configuration error has occurred which should be corrected. This VPRN's route target has been modified from its pre-reserved value defined in the Reserved VPRN Route Target Table.		

Table 39-844 ResiliencySapDeleted

Alarm	Attributes	Applicable major releases
Name: ResiliencySapDeleted (688) Type: resiliencyAlarm (58) Package: resiliency Raised on class: resiliency.HsdpaResiliency	Severity: major Implicitly cleared: true Default probable cause: resiliencySapDeleted (503)	Unspecified
<b>Description:</b> The alarm is raised when a SAP that is used for resiliency is deleted.		
<b>Remedial action:</b> Informational.		

Table 39-845 ResiliencyServiceSwitch

Alarm	Attributes	Applicable major releases
Name: ResiliencyServiceSwitch (689) Type: resiliencyAlarm (58) Package: resiliency Raised on class: resiliency.HsdpaResiliency	Severity: major Implicitly cleared: true Default probable cause: secondaryServiceSiteActive (504)	Unspecified
<b>Description:</b> The alarm is raised when a secondary service becomes active.		
<b>Remedial action:</b> Informational.		

## 39 – Unspecified NE alarms

Table 39-846 ResiliencySiteDeleted

Alarm	Attributes	Applicable major releases
Name: ResiliencySiteDeleted (690) Type: resiliencyAlarm (58) Package: resiliency Raised on class: resiliency.HsdpaResiliency	Severity: major Implicitly cleared: true Default probable cause: secondaryServiceSiteDeleted (505)	Unspecified
<b>Description:</b> The alarm is raised when a secondary service site is deleted.		
<b>Remedial action:</b> Informational.		

Table 39-847 restoreFailureAlarm

Alarm	Attributes	Applicable major releases
Name: restoreFailureAlarm (535) Type: softwareAlarm (19) Package: sw Raised on class: sw.SoftwareControlModule	Severity: major Implicitly cleared: false Default probable cause: restoreFailureAlarm (404)	Unspecified
<b>Description:</b> The alarm is raised when the software restore process on an NE fails.		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

Table 39-848 RetimingBufferOverflow

Alarm	Attributes	Applicable major releases
Name: RetimingBufferOverflow (1130) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: bufferOverflow (839)	Unspecified
<b>Description:</b> The alarm is raised when an retiming buffer overflow occurs.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-849 RevertiveMismatch

Alarm	Attributes	Applicable major releases
Name: RevertiveMismatch (4899) Type: pathAlarm (12) Package: mplstp Raised on class: mplstp.PathMep	Severity: warning Implicitly cleared: true Default probable cause: RevertiveMismatch (1956)	Unspecified
<b>Description:</b> This alarm is generated when an MPLS-TP LSP revertive mode mismatch is detected on the protection MEP. The revertive mode must match on the local node and the far-end node.		
<b>Remedial action:</b> This alarm is generated when an MPLS-TP LSP revertive mode mismatch is detected on the protection MEP. The revertive mode must match on the local node and the far-end node.		

Table 39-850 RFSwitchFail (equipment)

Alarm	Attributes	Applicable major releases
Name: RFSwitchFail (5425) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: rFSwitchFail (2128)	Unspecified
<b>Description:</b> The alarm is raised when a RF switch failure is detected.		
<b>Remedial action:</b> The alarm is raised when RF switch failure is detected. Refer 9500 Node Maintenance manual for remedial action information		

Table 39-851 RFSwitchFail (mpr)

Alarm	Attributes	Applicable major releases
Name: RFSwitchFail (5425) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: rFSwitchFail (2128)	Unspecified
<b>Description:</b> The alarm is raised when a RF switch failure is detected.		
<b>Remedial action:</b> The alarm is raised when RF switch failure is detected. Refer 9500 Node Maintenance manual for remedial action information		

39 – Unspecified NE alarms

---

**Table 39-852 RingAuditProblem**

Alarm	Attributes	Applicable major releases
Name: RingAuditProblem (4995) Type: configurationAlarm (11) Package: ethring Raised on class: ethring.Ring	Severity: major Implicitly cleared: false Default probable cause: invalidConfiguration (2049)	Unspecified
<b>Description:</b> The alarm is raised when the Ring Audit has detected a problem.		
<b>Remedial action:</b> A configuration error has been made which must be corrected. Please see the additional test for more details.		

**Table 39-853 RipAuthenticationFailure**

Alarm	Attributes	Applicable major releases
Name: RipAuthenticationFailure (70) Type: authenticationAlarm (14) Package: rip Raised on class: rip.Interface	Severity: warning Implicitly cleared: false Default probable cause: authFailure (46)	Unspecified
<b>Description:</b> The alarm is raised when a peer authentication failure occurs. The alarm information includes the peer address.		
<b>Remedial action:</b> Informational - please check that RIP neighbor is sending the RIPv2 packet with the matching authentication key with this router.		

**Table 39-854 RipAuthenticationMismatch**

Alarm	Attributes	Applicable major releases
Name: RipAuthenticationMismatch (71) Type: authenticationAlarm (14) Package: rip Raised on class: rip.Interface	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45)	Unspecified
<b>Description:</b> The alarm is raised when a peer authentication mismatch occurs. The alarm indicates the peer address.		
<b>Remedial action:</b> Informational - please check that RIP neighbor is sending the RIPv2 packet with the matching authentication type with this router.		

Table 39-855 RipExportLimitDropped

Alarm	Attributes	Applicable major releases
Name: RipExportLimitDropped (1927) Type: configurationAlarm (11) Package: rip Raised on class: rip.Site	Severity: warning Implicitly cleared: false Default probable cause: exportLimitDropped (598)	Unspecified
<b>Description:</b> The alarm is raised when the total number of exported routes from the route table to this RIP level drops below the configured export limit		
<b>Remedial action:</b> Informational.		

Table 39-856 RipExportLimitReached

Alarm	Attributes	Applicable major releases
Name: RipExportLimitReached (1928) Type: configurationAlarm (11) Package: rip Raised on class: rip.Site	Severity: warning Implicitly cleared: false Default probable cause: exportLimitReached (599)	Unspecified
<b>Description:</b> The alarm is raised when the total number of routes for the level is equal to the configured limit for exported routes		
<b>Remedial action:</b> Informational - Additional routes would not be exported into RIP from the route table.		

Table 39-857 RipExportLimitWarning

Alarm	Attributes	Applicable major releases
Name: RipExportLimitWarning (1929) Type: configurationAlarm (11) Package: rip Raised on class: rip.Site	Severity: warning Implicitly cleared: false Default probable cause: exportLimitWarning (600)	Unspecified
<b>Description:</b> The alarm is raised when the number of exported routes for the RIP level equals the percentage of the export limit configured in the Export Limit Log Percent parameter.		
<b>Remedial action:</b> Informational - Additional routes will continue to be exported into RIP from the route table till the export limit is reached.		

## 39 – Unspecified NE alarms

Table 39-858 ripRouteMaxLimitReached

Alarm	Attributes	Applicable major releases
Name: ripRouteMaxLimitReached (1090) Type: ProtocolAlarm (1) Package: rip Raised on class: rip.Site	Severity: warning Implicitly cleared: true Default probable cause: maxRouteReached (825)	Unspecified
<b>Description:</b> The alarm is raised when the number of RIP routes learned by an NE exceeds the maximum specified in the RIP configuration of the NE.		
<b>Remedial action:</b> Informational - no corrective action required		

Table 39-859 RootDirMaxFilesReached

Alarm	Attributes	Applicable major releases
Name: RootDirMaxFilesReached (3699) Type: storageAlarm (25) Package: equipment Raised on class: equipment.FlashMemory	Severity: variable Implicitly cleared: false Default probable cause: rootDirMaxFilesReached (1437)	Unspecified
<b>Description:</b> The alarm is raised when the number of files in the root directory reaches the maximum.		
<b>Remedial action:</b> This alarm has been raised due the fact that the number of files in the root directory of the compact flash has gone beyond the pre-defined limit. To rectify this issue please remove unused files from the root directory.		

Table 39-860 RouterLimitExceedDueToMultiAdditions

Alarm	Attributes	Applicable major releases
Name: RouterLimitExceedDueToMultiAdditions (602) Type: cpamLicensingAlarm (39) Package: security Raised on class: security.CpamLicense	Severity: critical Implicitly cleared: true Default probable cause: cpamRouterLimitExceedDueToMultiAdditions (448)	Unspecified
<b>Description:</b> The alarm is raised when the 5650 CPAM cannot discover one or more routers because the license capacity is reached.		
<b>Raising condition:</b> ('License violation due to multiple routers addition' EQUAL 'true')		
<b>Clearing condition:</b> ('License violation due to multiple routers addition' EQUAL 'false')		
<b>Remedial action:</b> Informational - The number of router (Big/Small/Multicast/Third Party) licenses purchased and available on the CPAM server is insufficient as compared to the number of big/small/multicast/third party routers under management in the network. Please contact Alcatel-Lucent Sales to purchase additional licenses.		

Table 39-861 RouteTargetConflict

Alarm	Attributes	Applicable major releases
Name: RouteTargetConflict (6447) Type: configurationAlarm (11) Package: I3fwd Raised on class: I3fwd.ServiceSite	Severity: warning Implicitly cleared: true Default probable cause: routeTargetConflictWithOtherService (2447)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects a conflict between the configured route target on VPRN and the Reserved VPRN Table. The alarm information includes the source, i.e., import or export, and the conflict reserved VPRN RT entry distinguished name.		
<b>Remedial action:</b> A configuration error has occurred which should be corrected. The configured VPRN route target has a conflict with the Reserved VPRN Route Target Table. This route target has been reserved by another service.		

Table 39-862 RouteTargetMisConfigured

Alarm	Attributes	Applicable major releases
Name: RouteTargetMisConfigured (8139) Type: configurationAlarm (11) Package: service Raised on class: service.SvcResourceReservation	Severity: warning Implicitly cleared: false Default probable cause: routeTargetMisConfigured (2535)	Unspecified
<b>Description:</b> This alarm is raised when the configured route targets associated with this Reserved Route Target entry has been misconfigured; i.e. the route target RT1 or RT2 is not configured when they are needed for associated VPRN service site creation. The affected route target's relative distinguished name is included in the alarm.		
<b>Remedial action:</b> A configuration error has occurred which should be corrected. This Reserved VPRN Route Target Table does not have all the configured route targets that are needed for the associated VPRN. This alarm needs to be explicitly cleared.		

Table 39-863 RPSAbnormalState

Alarm	Attributes	Applicable major releases
Name: RPSAbnormalState (3934) Type: rpsAbnormalConditionAlarm (114) Package: mpr Raised on class: mpr.MPRProtection	Severity: variable Implicitly cleared: true Default probable cause: RPSProblem (1517)	Unspecified
<b>Description:</b> The alarm is raised when abnormal state resulted due to force switch/lockout operation in RPS mode.		
<b>Remedial action:</b> This alarm is raised when forced-switch/lockout command in RPS mode which led to an abnormal condition.		

## 39 – Unspecified NE alarms

Table 39-864 RPSPPathFail

Alarm	Attributes	Applicable major releases
Name: RPSPPathFail (8133) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: receiverProtectionFail (824)	Unspecified
<b>Description:</b> The alarm is raised when a receiver protection switchover fails.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-865 RTM\_rtmMP3\_3V

Alarm	Attributes	Applicable major releases
Name: RTM_rtmMP3_3V (6191) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCARTM	Severity: major Implicitly cleared: false Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when failure happens to RTM 3.3V monitoring from the carrier.		
<b>Remedial action:</b> TBD		

Table 39-866 RTM\_rtmPower12V

Alarm	Attributes	Applicable major releases
Name: RTM_rtmPower12V (6192) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCARTM	Severity: major Implicitly cleared: false Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when failure happens to RTM 12V monitoring from the carrier.		
<b>Remedial action:</b> TBD		

Table 39-867 RTM\_rtmPowerCurrent

Alarm	Attributes	Applicable major releases
Name: RTM_rtmPowerCurrent (6193) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCARTM	Severity: major Implicitly cleared: false Default probable cause: equipmentMalfunction (698)	Unspecified

(1 of 2)

Alarm	Attributes	Applicable major releases
<b>Description:</b> This Alarm is raised when failure happens to RTM current monitoring from the carrier.		
<b>Remedial action:</b> TBD		

(2 of 2)

Table 39-868 RTM\_rtmPowerPGD

Alarm	Attributes	Applicable major releases
Name: RTM_rtmPowerPGD (6194) Type: equipmentAlarm (3) Package: femto Raised on class: femto.SCATCARTM	Severity: major Implicitly cleared: false Default probable cause: equipmentMalfunction (698)	Unspecified
<b>Description:</b> This Alarm is raised when failure happens to Power supply status, from the RTM point of view.		
<b>Remedial action:</b> TBD		

Table 39-869 RxFail

Alarm	Attributes	Applicable major releases
Name: RxFail (687) Type: communicationsAlarm (4) Package: radioequipment Raised on class: radioequipment.RadioPortSpecifics	Severity: variable Implicitly cleared: true Default probable cause: rxFail (502)	Unspecified
<b>Description:</b> The alarm is raised when an MSS detects a receive failure.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-870 SapDHCPLeaseEntriesExceeded

Alarm	Attributes	Applicable major releases
Name: SapDHCPLeaseEntriesExceeded (386) Type: communicationsAlarm (4) Package: service Raised on class: service.AccessInterface	Severity: major Implicitly cleared: false Default probable cause: sapDHCPLeaseEntriesExceeded (290)	Unspecified
<b>Description:</b> The alarm is raised when the number of DHCP lease-state entries on a SAP reaches the configured maximum value. This value is defined by sapTlsDhcpLeasePopulate for a TLS VLAN service, and by vRtrIfDHCPLeasePopulate for an IES or VPRN service.		
<b>Remedial action:</b> The Number of DHCP lease-state entries (e.g. subscribers) on the affected interface has crossed the leasePopulate threshold defined in the DHCP Relay configuration of that interface. Please review the DHCP leasePopulate configuration and adjust the number of allowed leases to meet the network requirements. Alternately, the DHCP leases can be spread out across extra interfaces.		

## 39 – Unspecified NE alarms

Table 39-871 sapDHCPLeaseStatePopulateErr

Alarm	Attributes	Applicable major releases
Name: sapDHCPLeaseStatePopulateErr (3908) Type: processingErrorAlarm (81) Package: service Raised on class: service.AccessInterface	Severity: major Implicitly cleared: false Default probable cause: sapDHCPLeaseStatePopulateError (1495)	Unspecified
<b>Description:</b> The alarm is raised when an NE notifies the 5620 SAM that it cannot update the DHCP Lease State table upon reception of a DHCP ACK message.		
<b>Remedial action:</b> The alarm is raised when an NE notifies the 5620 SAM that it cannot update the DHCP Lease State table upon reception of a DHCP ACK message. Verify the local DHCP server configuration or the DHCP relay configuration. Additionally, verify the length of the auto-generated subscriber identification.		

Table 39-872 sapDHCPProxyServerError

Alarm	Attributes	Applicable major releases
Name: sapDHCPProxyServerError (387) Type: communicationsAlarm (4) Package: service Raised on class: service.AccessInterface	Severity: major Implicitly cleared: false Default probable cause: UnableProxyDHCPRequest (291)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to proxy a DHCP request.		
<b>Remedial action:</b> Please verify your DHCP relay configuration. The local proxy server will not become operational without the emulated-server address being specified. Also ensure the Proxy server state is enabled on this SAP.		

Table 39-873 SapMismatch

Alarm	Attributes	Applicable major releases
Name: SapMismatch (417) Type: configurationAlarm (11) Package: srrp Raised on class: srrp.Instance	Severity: major Implicitly cleared: false Default probable cause: remoteSapMismatch (310)	Unspecified
<b>Description:</b> The alarm is raised when the SRRP SAPs on the local interface do not match the SRRP SAPs on the remote interface.		
<b>Remedial action:</b> Reconfigure the Service Access Interfaces for the Group Interface so that they connecting to each other for the peer SRRPs.		

Table 39-874 sapReceivedProtSrcMac

Alarm	Attributes	Applicable major releases
Name: sapReceivedProtSrcMac (393) Type: accessInterfaceAlarm (40) Package: l2fwd Raised on class: l2fwd.AccessInterfaceFib	Severity: minor Implicitly cleared: false Default probable cause: ProtectedSourceMacLearned (294)	Unspecified
<b>Description:</b> The alarm is raised when a restricted SAP receives a re-learn request for a protected MAC address.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-875 SapStaticHostDynamicMacConflict

Alarm	Attributes	Applicable major releases
Name: SapStaticHostDynamicMacConflict (313) Type: configurationAlarm (11) Package: antispoof Raised on class: antispoof.AntiSpoofingStaticHosts	Severity: minor Implicitly cleared: false Default probable cause: LearnedDynamicMacAlreadyLearned (243)	Unspecified
<b>Description:</b> The alarm is raised when an NE tries to learn a dynamic MAC address from an IP-only static host.		
<b>Remedial action:</b> Informational - The NE has detected an existing FIB entry with the same MAC address, created for another static host. Clearing the FIB entries could fix it.		

Table 39-876 SapTagMismatch

Alarm	Attributes	Applicable major releases
Name: SapTagMismatch (418) Type: configurationAlarm (11) Package: srrp Raised on class: srrp.Instance	Severity: major Implicitly cleared: false Default probable cause: remoteSyncTagMismatch (311)	Unspecified
<b>Description:</b> The alarm is raised when the tag of a local SAP does not match the tag of a remote SAP.		
<b>Remedial action:</b> Reconfigure the SAPs for the peer SRRP instances so that their tags match each other.		

## 39 – Unspecified NE alarms

Table 39-877 SapVlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: SapVlanSubTypeConflict (290) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Site	Severity: warning Implicitly cleared: false Default probable cause: topologyMisconfigured (81)	Unspecified
<b>Description:</b> The alarm is raised when a SAP resynchronization indicates that the VLAN subtype of the SAP is different from the site subtype. The alarm information includes the ID of the associated port.		
<b>Remedial action:</b> Ensure that the VLAN Subtype of the SAP matches the VLAN Subtype of the Site.		

Table 39-878 SasAccountingAlarm

Alarm	Attributes	Applicable major releases
Name: SasAccountingAlarm (691) Type: oamAlarm (18) Package: sas Raised on class: sas.TestSuite	Severity: minor Implicitly cleared: true Default probable cause: noAccountingPolicy (506)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM cannot find an SAA Accounting Policy.		
<b>Remedial action:</b> A configuration error has been made which must be corrected. An SAA Accounting policy is required but has not been configured - please perform the required configuration.		

Table 39-879 SasPmBinAlarmLimitReached

Alarm	Attributes	Applicable major releases
Name: SasPmBinAlarmLimitReached (5413) Type: configurationAlarm (11) Package: server Raised on class: server.SamServer	Severity: variable Implicitly cleared: false Default probable cause: tooManyAlarmsRaisedByBinStats (2121)	Unspecified
<b>Description:</b> The alarm is raised when PM Bin Statistics has exceeded the limit of alarms for an interval.		
<b>Remedial action:</b> Informational - the maximum number of bin threshold alarms that can be raised in the reset interval has been reached. After the Bin alarm reset interval has passed, alarms can be raised again for the next interval until the number of alarms reaches the limit again.		

Table 39-880 SasPmBinStatThresholdExceeded

Alarm	Attributes	Applicable major releases
Name: SasPmBinStatThresholdExceeded (5412) Type: misConfiguration (53) Package: sas Raised on class: sas.TestManager	Severity: variable Implicitly cleared: false Default probable cause: SasPmBinStatThresholdExceeded (2120)	Unspecified
<b>Description:</b> The alarm is raised if sas pm bin stats count exceeds threshold limit. This Alarm has to be cleared Manually.		
<b>Remedial action:</b> The alarm is raised if sas pm bin stats count exceeds Threshold Limit.This Alarm has to be cleared Manually.		

Table 39-881 SasResultCollectionThresholdExceeded

Alarm	Attributes	Applicable major releases
Name: SasResultCollectionThresholdExceeded (5158) Type: misConfiguration (53) Package: sas Raised on class: sas.TestManager	Severity: major Implicitly cleared: false Default probable cause: sasResultCollectionThresholdExceeded (2078)	Unspecified
<b>Description:</b> The alarm is raised if test result count exceeds maximum allowed Limit.		
<b>Remedial action:</b> collection Rate Greater Than expected.		

Table 39-882 SasResyncWorkerQueueOverflow

Alarm	Attributes	Applicable major releases
Name: SasResyncWorkerQueueOverflow (8137) Type: misConfiguration (53) Package: sas Raised on class: sas.TestManager	Severity: variable Implicitly cleared: false Default probable cause: tooManySasResyncTasks (2533)	Unspecified
<b>Description:</b> The alarm is raised when incoming OAM traps can not be handled because the number of tasks that await processing on the SasResyncWorkerPool queue by the 5620 SAM surpasses the servers capacity to process them. The trap tasks mainly include incoming test results and threshold crossing events.		
<b>Remedial action:</b> Consider stopping some SNMP based tests or using accounting-file based tests instead. The alarm has to be cleared manually.		

## 39 – Unspecified NE alarms

Table 39-883 SasThresholdExceededAlarm

Alarm	Attributes	Applicable major releases
Name: SasThresholdExceededAlarm (272) Type: oamAlarm (18) Package: sas Raised on class: sas.Test	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when a rising or falling threshold is crossed by a jitter, latency, or loss value. The alarm is raised only against a scheduled test. The alarm information includes the threshold type, the threshold setting, and the current rising or falling value.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-884 SasTooManyTestsOnNodeAlarm

Alarm	Attributes	Applicable major releases
Name: SasTooManyTestsOnNodeAlarm (287) Type: oamAlarm (18) Package: sas Raised on class: sas.NeAgent	Severity: major Implicitly cleared: true Default probable cause: tooManyTestsDeployedOnNode (220)	Unspecified
<b>Description:</b> The alarm is raised when an NE reaches 60 percent of the allowed number of created or simultaneously executed OAM tests. An attempt to create or execute an NE schedulable test on an NE fails when the number of tests reaches 95 percent of the NE capacity. The alarm information includes the following: - the NE ID - the number of deployed tests on the NE - the allowed number of deployed tests on the NE		
<b>Remedial action:</b> Informational - 5620 SAM is close to or at the maximum number of OAM tests it can support.		

Table 39-885 ScriptAlarm

Alarm	Attributes	Applicable major releases
Name: ScriptAlarm (5131) Type: serverAlarm (94) Package: script Raised on class: script.AbstractScript	Severity: variable Implicitly cleared: false Default probable cause: ScriptAlarm (2061)	Unspecified
<b>Description:</b> This alarm was raised from within a SAM user script when certain conditions were met, as implemented by the script author. See the alarm's 'Additional Text' for any informative details the script author may have supplied.		
<b>Remedial action:</b> This is an alarm generated from within a SAM user script, and therefore the remedial action will vary. See the alarm's "Additional Text" for any remedial action the script author may have supplied.		

Table 39-886 scriptBackupLost

Alarm	Attributes	Applicable major releases
Name: scriptBackupLost (273) Type: configurationAlarm (11) Package: subscriber Raised on class: subscriber.Policy	Severity: warning Implicitly cleared: true Default probable cause: backupDown (205)	Unspecified
<b>Description:</b> The alarm is raised when the primary subscriber identification script URL is operationally up, but a lower-priority script or URL is operationally down.		
<b>Raising condition:</b> (('isLocal' EQUAL 'true') AND ('Primary Script Operational State' EQUAL 'Up') AND (('Secondary Script Operational State' NOT EQUAL 'Up') OR ('Tertiary Script Operational State' NOT EQUAL 'Up')))		
<b>Clearing condition:</b> (('isLocal' EQUAL 'true') AND (('Primary Script Operational State' NOT EQUAL 'Up') OR (('Secondary Script Operational State' EQUAL 'Up') AND ('Tertiary Script Operational State' EQUAL 'Up'))))		
<b>Remedial action:</b> If the DHCP ACK Python script processing behaviour is desired, please make sure that primary, secondary and tertiary scripts are installed and operationally up.		

Table 39-887 SdpBindingMisconfigured

Alarm	Attributes	Applicable major releases
Name: SdpBindingMisconfigured (293) Type: SdpBindingAlarm (30) Package: svt Raised on class: svt.SdpBinding	Severity: critical Implicitly cleared: true Default probable cause: returnSdpBindingTypeMismatch (224)	Unspecified
<b>Description:</b> The alarm is raised when the return SDP binding type does not match the originating SDP binding type, for example, when the return SDP binding is spoke and the originating SDP binding is mesh.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The configuration on the endpoints of the SDP does not match causing the SDP to be down. Correct the configuration error and the SDP will come up.		

Table 39-888 sdpBindReceivedProtSrcMac

Alarm	Attributes	Applicable major releases
Name: sdpBindReceivedProtSrcMac (3746) Type: SdpBindingAlarm (30) Package: l2fwd Raised on class: l2fwd.AbstractCircuitFib	Severity: minor Implicitly cleared: false Default probable cause: ProtectedSourceMacLearned (294)	Unspecified
<b>Description:</b> The alarm is raised when a restricted SDP receives a re-learn request for a protected MAC address.		
<b>Remedial action:</b> Informational - no corrective action required.		

## 39 – Unspecified NE alarms

Table 39-889 SdpMldSnpgGrpDroppedLimitExceeded

Alarm	Attributes	Applicable major releases
Name: SdpMldSnpgGrpDroppedLimitExceeded (738) Type: SdpBindingAlarm (30) Package: vpls Raised on class: vpls.SdpBindingMldSnpgCfg	Severity: warning Implicitly cleared: false Default probable cause: igmpSnpgGrpMaxNbrGrpsReached (292)	Unspecified
<b>Description:</b> The alarm is raised when an SDP binding drops an MLD group because the configurable maximum number of MLD groups on the SDP binding is reached.		
<b>Remedial action:</b> Increase the maximum number of MLD groups for the SDP binding.		

Table 39-890 sdpPbbActvPwWithNonActvCtrlPwChg

Alarm	Attributes	Applicable major releases
Name: sdpPbbActvPwWithNonActvCtrlPwChg (5416) Type: processingErrorAlarm (81) Package: svt Raised on class: svt.Tunnel	Severity: warning Implicitly cleared: true Default probable cause: sdpPbbActvPwWithNonActvCtrlPwChg (2123)	Unspecified
<b>Description:</b> The alarm is raised when last pseudo-wire (PW) goes standby or down and when first PW becomes active on the Backbone Edge Bridge (BEB) where control PW is standby or down on that SDP.		
<b>Remedial action:</b> sdpPbbActvPwWithNonActvCtrlPwChg event with sdpPbbActvPwWithNonActvCtrlPw set to 'false' indicate clearing of sdpPbbActvPwWithNonActvCtrlPwChg with sdpPbbActvPwWithNonActvCtrlPw set to 'true'.		

Table 39-891 SecondaryBatteryFail (equipment)

Alarm	Attributes	Applicable major releases
Name: SecondaryBatteryFail (3624) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: secondaryBatteryFail (1412)	Unspecified
<b>Description:</b> The alarm is raised when a secondary battery failure is detected.		
<b>Remedial action:</b> The battery on the CPM should be replaced or re-installed.		

Table 39-892 SecondaryBatteryFail (mpr)

Alarm	Attributes	Applicable major releases
Name: SecondaryBatteryFail (3624) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: secondaryBatteryFail (1412)	Unspecified
<b>Description:</b> The alarm is raised when a secondary battery failure is detected.		
<b>Remedial action:</b> The battery on the subrack element(MPT) should be replaced or re-installed.		

Table 39-893 SectionTraceMismatch

Alarm	Attributes	Applicable major releases
Name: SectionTraceMismatch (2943) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: sectionTraceMismatch (1133)	Unspecified
<b>Description:</b> The alarm is raised when a trace mismatch is detected on a SONET section.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-894 SerialChannelLoopback

Alarm	Attributes	Applicable major releases
Name: SerialChannelLoopback (807) Type: configurationAlarm (11) Package: tdmequipment Raised on class: tdmequipment.SerialChannelSpecifics	Severity: warning Implicitly cleared: false Default probable cause: serialChannelLoopback (573)	Unspecified
<b>Description:</b> The alarm is raised when an NE reports that a serial channel has a loopback alarm condition.		
<b>Remedial action:</b> Informational only.		

## 39 – Unspecified NE alarms

Table 39-895 ServerDeclineStaticAddr

Alarm	Attributes	Applicable major releases
Name: ServerDeclineStaticAddr (3951) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.AbstractDhcpServer	Severity: warning Implicitly cleared: false Default probable cause: DhcpClientHasStaticIpAddress (1530)	Unspecified
<b>Description:</b> The tmnxDhcpSvrDeclineStaticAddr notification is generated when a DHCP decline message is received from a DHCP client that has a static IP address assigned.		
<b>Remedial action:</b> DHCP client has a static IP address. Make sure that the DHCP client has a dynamic IP address		

Table 39-896 ServerHardware\_dnsServerDown

Alarm	Attributes	Applicable major releases
Name: ServerHardware_dnsServerDown (6223) Type: processingErrorAlarm (81) Package: femto Raised on class: femto.ServerHardware	Severity: major Implicitly cleared: true Default probable cause: outOfService (798)	Unspecified
<b>Description:</b> This fault is generated when the DNS server within FGW hardware is out of service.		
<b>Remedial action:</b> TBD		

Table 39-897 ServerHardware\_snmpServerDown

Alarm	Attributes	Applicable major releases
Name: ServerHardware_snmpServerDown (6241) Type: equipmentAlarm (3) Package: femto Raised on class: femto.ServerHardware	Severity: major Implicitly cleared: true Default probable cause: outOfService (798)	Unspecified
<b>Description:</b> This fault is generated when the ToD server within FGW hardware is out of service		
<b>Remedial action:</b> TBD		

Table 39-898 ServerLeaseDefaultTimers

Alarm	Attributes	Applicable major releases
Name: ServerLeaseDefaultTimers (2937) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.AbstractDhcpServer	Severity: warning Implicitly cleared: false Default probable cause: LeaseTimerInconsistent (1129)	Unspecified
<b>Description:</b> The alarm is raised when the system has reverted to default lease timer values for a particular DHCP client because the configuration of the lease timers was inconsistent.		
<b>Remedial action:</b> This warning is generated when configuration of the lease timers of a particular DHCP client is inconsistent; the system has reverted to default lease timer values. The lease renew time T1 and lease rebind time T2 have been reverted to the default value of 1/2 and 2/3 of the lease time. Please check the lease timers configuration on the local DHCP server to ensure the timers are compatible.		

Table 39-899 ServerMaxLeasesReached

Alarm	Attributes	Applicable major releases
Name: ServerMaxLeasesReached (3316) Type: configurationAlarm (11) Package: netw Raised on class: netw.NetworkElement	Severity: critical Implicitly cleared: false Default probable cause: DhcpSvrMaxLeasesReached (1155)	Unspecified
<b>Description:</b> The alarm is raised when the maximum number of leases allocated by local DHCP server is reached.		
<b>Remedial action:</b> Informational - this alarm indicates that the maximum number of leases allocated by a local DHCP server was reached. The address ranges for existing address pools should be extended or a new address pool should be configured for the local DHCP server.		

Table 39-900 ServerMsgTooLong

Alarm	Attributes	Applicable major releases
Name: ServerMsgTooLong (2938) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.AbstractDhcpServer	Severity: warning Implicitly cleared: false Default probable cause: DhcpSvrMsgTooLong (1130)	Unspecified
<b>Description:</b> The alarm is raised when a DHCP message is generated but the message size exceeds either the maximum DHCP message size, or the size provided by the client in the option maximum DHCP message size.		
<b>Remedial action:</b> Review the access network DHCP configuration to ensure all parties send DHCP packets with appropriate message size.		

## 39 – Unspecified NE alarms

Table 39-901 ServerUserDatabaseUnknown

Alarm	Attributes	Applicable major releases
Name: ServerUserDatabaseUnknown (3952) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.AbstractDhcpServer	Severity: warning Implicitly cleared: false Default probable cause: CannotFindUserDatabase (1531)	Unspecified
<b>Description:</b> The tmnxDhcpSvrUserDbUnknown notification is generated when the local DHCP server instance drops a DHCP message because a local user database with the name specified for this server instance could not be found.		
<b>Remedial action:</b> Please specify a valid local user database for this server instance.		

Table 39-902 ServiceMisConfigured

Alarm	Attributes	Applicable major releases
Name: ServiceMisConfigured (8140) Type: configurationAlarm (11) Package: service Raised on class: service.SvcResourceReservation	Severity: warning Implicitly cleared: true Default probable cause: serviceMisConfigured (2536)	Unspecified
<b>Description:</b> This alarm is raised when the VPRN service associated with a route target reservation entry has been modified, i.e., the service name is changed, or the service is deleted, or there is duplicate VPRN service with the same service and customer name detected. The associated service manager ID is attached with the alarm.		
<b>Remedial action:</b> A configuration error has occurred which should be corrected. The VPRN service associated with this Route Target Reservation entry has been modified, or there is duplicate VPRN service with the same service name detected.		

Table 39-903 SflowCpEntrySampling

Alarm	Attributes	Applicable major releases
Name: SflowCpEntrySampling (8142) Type: communicationsAlarm (4) Package: sflow Raised on class: sflow.Receiver	Severity: major Implicitly cleared: true Default probable cause: SflowCpSamplingInterruptedorStarted (2538)	Unspecified
<b>Description:</b> The alarm is raised when the sampling of an sFlow counter poller is interrupted or started.		
<b>Remedial action:</b> Counter sampling may not be available. Make sure counter poller is reachable from NE and no counter poller sequence reset happened.		

Table 39-904 SflowPacketTransmissionFailure

Alarm	Attributes	Applicable major releases
Name: SflowPacketTransmissionFailure (8143) Type: communicationsAlarm (4) Package: sflow Raised on class: sflow.Receiver	Severity: major Implicitly cleared: true Default probable cause: SflowPacketTxFailure (2539)	Unspecified
<b>Description:</b> The alarm is raised when an sFlow packet fails to transmit from an active sFlow receiver.		
<b>Remedial action:</b> Packet transmission failed.Flow data may be lost. Please check the Receiver configurations and make sure it is up and running.		

Table 39-905 SGLimitExceeded

Alarm	Attributes	Applicable major releases
Name: SGLimitExceeded (456) Type: resourceAlarm (28) Package: equipment Raised on class: equipment.Card	Severity: warning Implicitly cleared: false Default probable cause: pimSnpgSGGroupMaxSupportedLimitExceeded (350)	Unspecified
<b>Description:</b> The alarm is raised when the number of PIM snooping source group records on a card exceeds the maximum.		
<b>Remedial action:</b> Informational - The alarm is raised when the number of PIM snooping source group records on a card exceeds the maximum. To rectify this issue please increase the max number of groups for the pim snooping associated with the card. The maximum number allowed is 16,000 (S,G) entries.		

Table 39-906 ShamLinkDbDescriptAuthFailure

Alarm	Attributes	Applicable major releases
Name: ShamLinkDbDescriptAuthFailure (663) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>authTypeMismatch</li> <li>authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a dbDescript packet on a sham link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a dbDescript packet has been received on a sham link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

## 39 – Unspecified NE alarms

Table 39-907 ShamLinkDbDescriptConfig

Alarm	Attributes	Applicable major releases
Name: ShamLinkDbDescriptConfig (664) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a dbDescript packet on a sham link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a dbDescript packet has been received on a sham link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-908 ShamLinkHelloAuthFailure

Alarm	Attributes	Applicable major releases
Name: ShamLinkHelloAuthFailure (666) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a hello packet on a sham link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a hello packet has been received on a sham link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

Table 39-909 ShamLinkHelloConfig

Alarm	Attributes	Applicable major releases
Name: ShamLinkHelloConfig (667) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a hello packet on a sham link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a hello packet has been received on a sham link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-910 ShamLinkLsAckAuthFailure

Alarm	Attributes	Applicable major releases
Name: ShamLinkLsAckAuthFailure (668) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an lsAck packet on a sham link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a lsAck packet has been received on a sham link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

## 39 – Unspecified NE alarms

Table 39-911 ShamLinkLsAckConfig

Alarm	Attributes	Applicable major releases
Name: ShamLinkLsAckConfig (669) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsAck packet on a sham link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsAck packet has been received on a sham link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-912 ShamLinkLsReqAuthFailure

Alarm	Attributes	Applicable major releases
Name: ShamLinkLsReqAuthFailure (670) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsReq packet on a sham link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsReq packet has been received on a sham link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

Table 39-913 ShamLinkLsReqConfig

Alarm	Attributes	Applicable major releases
Name: ShamLinkLsReqConfig (671) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsReq packet on a sham link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsReq packet has been received on a sham link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-914 ShamLinkLsUpdateAuthFailure

Alarm	Attributes	Applicable major releases
Name: ShamLinkLsUpdateAuthFailure (672) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsUpdate packet on a sham link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsUpdate packet has been received on a sham link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

## 39 – Unspecified NE alarms

Table 39-915 ShamLinkLsUpdateConfig

Alarm	Attributes	Applicable major releases
Name: ShamLinkLsUpdateConfig (673) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsUpdate packet on a sham link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsUpdate packet has been received on a sham link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-916 ShamLinkNullPacketAuthFailure

Alarm	Attributes	Applicable major releases
Name: ShamLinkNullPacketAuthFailure (674) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a null packet on a sham link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a null packet has been received on a sham link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

Table 39-917 ShamLinkNullPacketConfig

Alarm	Attributes	Applicable major releases
Name: ShamLinkNullPacketConfig (675) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a null packet on a sham link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a null packet has been received on a sham link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-918 ShamLinkRxBadPacket

Alarm	Attributes	Applicable major releases
Name: ShamLinkRxBadPacket (676) Type: communicationsAlarm (4) Package: ospf Raised on class: ospf.ShamLink	Severity: warning Implicitly cleared: false Default probable cause: hello (47) Applicable probable causes: <ul style="list-style-type: none"> <li>• hello</li> <li>• dbDescript</li> <li>• lsReq</li> <li>• lsUpdate</li> <li>• lsAck</li> <li>• nullPacket</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE cannot parse an OSPF packet that it receives on a sham link.		
<b>Remedial action:</b> Informational - an NE cannot parse an OSPF packet that it receives on a sham link.		

## 39 – Unspecified NE alarms

Table 39-919 ShelfCPUAboveThreshold

Alarm	Attributes	Applicable major releases
Name: ShelfCPUAboveThreshold (638) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.HealthMonitoring	Severity: major Implicitly cleared: false Default probable cause: ShelfCPUUtilizationCrossedAboveThreshold (474)	Unspecified
<b>Description:</b> The alarm is raised when shelf CPU usage exceeds the threshold value.		
<b>Remedial action:</b> Informational - Please contact Alcatel-Lucent support for assistance.		

Table 39-920 ShelfMemoryAboveThreshold

Alarm	Attributes	Applicable major releases
Name: ShelfMemoryAboveThreshold (639) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.HealthMonitoring	Severity: major Implicitly cleared: false Default probable cause: ShelfMemoryUtilizationCrossedAboveThreshold (475)	Unspecified
<b>Description:</b> The alarm is raised when shelf memory usage exceeds the threshold value.		
<b>Remedial action:</b> Informational - Please contact Alcatel-Lucent support for assistance.		

Table 39-921 ShelfRxAboveThreshold

Alarm	Attributes	Applicable major releases
Name: ShelfRxAboveThreshold (640) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.HealthMonitoring	Severity: major Implicitly cleared: false Default probable cause: ShelfRxUtilizationCrossedAboveThreshold (476)	Unspecified
<b>Description:</b> The alarm is raised when shelf Rx exceeds the threshold value.		
<b>Remedial action:</b> Informational - Please contact Alcatel-Lucent support for assistance.		

Table 39-922 ShelfRxTxAboveThreshold

Alarm	Attributes	Applicable major releases
Name: ShelfRxTxAboveThreshold (641) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.HealthMonitoring	Severity: major Implicitly cleared: false Default probable cause: ShelfRxTxUtilizationCrossedAboveThreshold (477)	Unspecified
<b>Description:</b> The alarm is raised when shelf Tx exceeds the threshold value.		
<b>Remedial action:</b> Informational - Please contact Alcatel-Lucent support for assistance.		

Table 39-923 ShelfTemperatureAboveThreshold

Alarm	Attributes	Applicable major releases
Name: ShelfTemperatureAboveThreshold (642) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.HealthMonitoring	Severity: major Implicitly cleared: false Default probable cause: ShelfTemperatureUtilizationCrossedAboveThreshold (478)	Unspecified
<b>Description:</b> The alarm is raised when shelf temperature exceeds the threshold value.		
<b>Remedial action:</b> The NE has detected internal temperatures which are abnormally high. This could be caused by a failed fan unit or one or more dirty fan filters. Replacing the failed unit or filters should resolve the problem. Alternately the environment that the NE is operating in may not be within specifications found in the NE user guides.		

Table 39-924 SignalLabelMismatch

Alarm	Attributes	Applicable major releases
Name: SignalLabelMismatch (3625) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: signalLabelMismatch (619)	Unspecified
<b>Description:</b> The alarm is raised when a signal label mismatch is detected.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

## 39 – Unspecified NE alarms

Table 39-925 SiteBgpAdVplsIdMisconfiguration

Alarm	Attributes	Applicable major releases
Name: SiteBgpAdVplsIdMisconfiguration (739) Type: configurationAlarm (11) Package: vpls Raised on class: vpls.BgpAdSite	Severity: major Implicitly cleared: true Default probable cause: bgpAdVplsIdInconsistent (439)	Unspecified
<b>Description:</b> The alarm is raised when the configured VPLS ID on a BGP AD object differs from the VPLS ID configured for the VPLS site.		
<b>Remedial action:</b> The VPLS ID on a BGP AD object must match the VPLS ID configured for the VPLS site.		

Table 39-926 SiteSyncDeploymentFailure

Alarm	Attributes	Applicable major releases
Name: SiteSyncDeploymentFailure (589) Type: equipmentAlarm (3) Package: sonet Raised on class: sonet.SiteSync	Severity: major Implicitly cleared: false Default probable cause: siteSyncFailure (441)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM tries to deploy a value for an object when a transaction that involves the object is in progress from a different context.		
<b>Remedial action:</b> Another transaction is updating the object, Please try after some time.		

Table 39-927 SnmpTrapDropped

Alarm	Attributes	Applicable major releases
Name: SnmpTrapDropped (179) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: false Default probable cause: snmpDaemonOverloaded (141)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM receives a tmnxTrapDropped notification from an NE to indicate that the NE has dropped a trap. As a result, the 5620 SAM resynchronizes the table associated with the dropped trap.		
<b>Remedial action:</b> Informational.		

Table 39-928 SoftwareBootFailure

Alarm	Attributes	Applicable major releases
Name: SoftwareBootFailure (107) Type: softwareAlarm (19) Package: sw Raised on class: sw.CardSoftware	Severity: major Implicitly cleared: true Default probable cause: softwareBootProblem (91)	Unspecified
<b>Description:</b> The alarm is raised when an NE fails to boot because of a software problem.		
<b>Remedial action:</b> Please contact Alcatel-Lucent support for assistance.		

Table 39-929 SoftwareDownloading

Alarm	Attributes	Applicable major releases
Name: SoftwareDownloading (109) Type: softwareAlarm (19) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: softwareDownloading (93)	Unspecified
<b>Description:</b> The alarm is raised when an NE begins to download software to a IOM or CPM card.		
<b>Remedial action:</b> Informational		

Table 39-930 SoftwareFailureAlarm

Alarm	Attributes	Applicable major releases
Name: SoftwareFailureAlarm (149) Type: softwareAlarm (19) Package: equipment Raised on class: equipment.ReplaceableUnit	Severity: critical Implicitly cleared: true Default probable cause: loadFailed (124)	Unspecified
<b>Description:</b> The alarm is raised when the CPM fails to load the software from the specified location. The alarm information includes the software location.		
<b>Remedial action:</b> The CPM card did not find the SW in the expected location. Reinstall the SW using 5620 SAM.		

## 39 – Unspecified NE alarms

Table 39-931 SoftwareInitialized

Alarm	Attributes	Applicable major releases
Name: SoftwareInitialized (111) Type: softwareAlarm (19) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: softwareinitialized (95)	Unspecified
<b>Description:</b> The alarm is raised when software initialization on an IOM or CPM card completes.		
<b>Remedial action:</b> Informational		

Table 39-932 SoftwareInitializing

Alarm	Attributes	Applicable major releases
Name: SoftwareInitializing (110) Type: softwareAlarm (19) Package: sw Raised on class: sw.CardSoftware	Severity: warning Implicitly cleared: true Default probable cause: softwareinitializing (94)	Unspecified
<b>Description:</b> The alarm is raised when software initialization on an IOM or CPM card begins.		
<b>Remedial action:</b> Informational		

Table 39-933 SoftwareUpgradeDownloadFailed

Alarm	Attributes	Applicable major releases
Name: SoftwareUpgradeDownloadFailed (3695) Type: communicationsAlarm (4) Package: lte Raised on class: lte.ENBEquipment	Severity: warning Implicitly cleared: true Default probable cause: linkFailure (740)	Unspecified
<b>Description:</b> This alarm is raised when the transfer of software scheduled by a Self Config policy fails due to communication problem (communication timeout, cable disconnected). It is automatically cleared before starting a new upgrade scheduled by a Self Config policy.		
<b>Remedial action:</b> Check what happened during the File Transfer. Possible issues: Loss of NE Connectivity, FTP daemon down, FTP credential issues		

**Table 39-934 SoftwareUpgradeOperationNotAttempted**

Alarm	Attributes	Applicable major releases
Name: SoftwareUpgradeOperationNotAttempted (1963) Type: communicationsAlarm (4) Package: lte Raised on class: lte.ENBEquipment	Severity: warning Implicitly cleared: true Default probable cause: bsCommunicationOffline (904)	Unspecified
<b>Description:</b> This alarm is raised when the BS Communication State goes 'offline'. While BS communication state is 'offline' none of the Software Upgrade Operations can be attempted		
<b>Clearing condition:</b> (('bsCommunicationState' EQUAL 'omcManaged'))		
<b>Remedial action:</b> Release NEM sessions		

**Table 39-935 SonetSDHLoopback**

Alarm	Attributes	Applicable major releases
Name: SonetSDHLoopback (407) Type: configurationAlarm (11) Package: sonetequipment Raised on class: sonetequipment.SonetPortSpecifics	Severity: warning Implicitly cleared: true Default probable cause: sonetSDHLoopback (303)	Unspecified
<b>Description:</b> The alarm is raised when a loopback test is provisioned on a SONET/SDH port.		
<b>Remedial action:</b> Remove the loopback test from the SONET/SDH port.		

**Table 39-936 SONEventsProcessingDelayed**

Alarm	Attributes	Applicable major releases
Name: SONEventsProcessingDelayed (3874) Type: integrityViolation (85) Package: lte Raised on class: lte.ENBEquipment	Severity: warning Implicitly cleared: true Default probable cause: UnableToAcquireLock (949)	Unspecified
<b>Description:</b> This alarm is raised when a SON events cannot be handled (CM session is running). It is automatically cleared.		
<b>Remedial action:</b> Informational only - self-correcting condition.		

39 – Unspecified NE alarms

---

Table 39-937 sourceSapChange

Alarm	Attributes	Applicable major releases
Name: sourceSapChange (4813) Type: ConfigurationAlarm (15) Package: mirror Raised on class: mirror.SourceInterface	Severity: warning Implicitly cleared: false Default probable cause: tMirrorSourceSapChange (430)	Unspecified
<b>Description:</b> The alarm is raised when a SAP that is associated with this mirror source is modified or deleted.		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-938 SpbNbrMultAdjExists

Alarm	Attributes	Applicable major releases
Name: SpbNbrMultAdjExists (4394) Type: configurationAlarm (11) Package: spb Raised on class: spb.Site	Severity: major Implicitly cleared: true Default probable cause: multiAdj (1573)	Unspecified
<b>Description:</b> The alarm is sent when IS-IS SPB instance detects a neighbor to which it already has a direct adjacency on another interface.		
<b>Remedial action:</b> Check number of links to neighbor to make sure there is only one SPB link.		

Table 39-939 SpbRejectedAdjacency

Alarm	Attributes	Applicable major releases
Name: SpbRejectedAdjacency (4395) Type: adjacencyAlarm (31) Package: spb Raised on class: spb.AbstractInterface	Severity: minor Implicitly cleared: true Default probable cause: interfaceMismatch (170)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM receives a vRtrIsisRejectedAdjacency trap, which indicates that an adjacency cannot be established in response to a Hello PDU from an IS because of a lack of resources.		
<b>Remedial action:</b> Informational, might have exceeded the maximum number of adjacencies allowed.		

Table 39-940 SSHLoginMaxAttempts

Alarm	Attributes	Applicable major releases
Name: SSHLoginMaxAttempts (3702) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: false Default probable cause: sshLoginMaxAttempts (1441)	Unspecified
<b>Description:</b> The alarm is raised when the number of CLI login failures due incorrect user name or password using SSH session exceeds the configured value.		
<b>Remedial action:</b> Informational		

Table 39-941 StandbyVersionMismatch (equipment)

Alarm	Attributes	Applicable major releases
Name: StandbyVersionMismatch (1174) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: standbyVersionMismatch (875)	Unspecified
<b>Description:</b> The alarm is raised when a standby device software version mismatch is detected.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-942 StandbyVersionMismatch (mpr)

Alarm	Attributes	Applicable major releases
Name: StandbyVersionMismatch (1174) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: standbyVersionMismatch (875)	Unspecified
<b>Description:</b> The alarm is raised when a standby device software version mismatch is detected.		
<b>Remedial action:</b> This alarm is raised when standby Software version on the MPT does not match the software version on the core. Please refer 9500 Node Maintenance manual for remedial action information.		

## 39 – Unspecified NE alarms

Table 39-943 StatsPollerProblem

Alarm	Attributes	Applicable major releases
Name: StatsPollerProblem (5404) Type: communicationsAlarm (4) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: resyncFailed (24)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM is unable to poll a network stats object, for example, because of intermittent or no IP connectivity to an NE, incorrect SNMP security parameters, or disabled SNMP on the NE.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand a) why the underlying transport network is unreliable or b) why the NE is too busy to respond to 5620 SAM or c) has SNMP been disabled on the NE. Once the issue has been resolved SAM will automatically re-attempt.		

Table 39-944 STMSysSystemMultiAuxAvailable

Alarm	Attributes	Applicable major releases
Name: STMSysSystemMultiAuxAvailable (527) Type: misConfiguration (53) Package: sas Raised on class: sas.TestManager	Severity: critical Implicitly cleared: false Default probable cause: multiAuxiliaryServersAvailable (399)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects multiple available auxiliary servers for test execution.		
<b>Remedial action:</b> Reserved for future use		

Table 39-945 STMSysSystemNotAvailable

Alarm	Attributes	Applicable major releases
Name: STMSysSystemNotAvailable (526) Type: communicationsAlarm (4) Package: sas Raised on class: sas.TestManager	Severity: critical Implicitly cleared: false Default probable cause: noAuxiliaryServersAvailable (256)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects no available auxiliary servers for test execution.		
<b>Remedial action:</b> Reserved for future use		

Table 39-946 STMTesIdRangeMismatch

Alarm	Attributes	Applicable major releases
Name: STMTesIdRangeMismatch (792) Type: oamAlarm (18) Package: sas Raised on class: sas.TestManager	Severity: major Implicitly cleared: true Default probable cause: testIdRangeMismatch (560)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects an STM test ID range mismatch between the primary and standby main servers.		
<b>Remedial action:</b> The configuration on the primary and standby servers must be aligned to resolve this problem. Please contact Alcatel-Lucent support for assistance.		

Table 39-947 STMTestsOutsideRange

Alarm	Attributes	Applicable major releases
Name: STMTestsOutsideRange (793) Type: oamAlarm (18) Package: sas Raised on class: sas.TestManager	Severity: major Implicitly cleared: false Default probable cause: testsOutsideRange (561)	Unspecified
<b>Description:</b> The alarm is raised when the 5620 SAM detects one or more STM Tests that have IDs outside the specified range.		
<b>Remedial action:</b> A configuration error has been made which must be corrected. The testId in a STM test definition must be within the testId range specified within the nms-server.xml file		

Table 39-948 subHostInconsistentAtmTdOvr

Alarm	Attributes	Applicable major releases
Name: subHostInconsistentAtmTdOvr (3685) Type: configurationAlarm (11) Package: ressubscr Raised on class: ressubscr.ResidentialSubscriberInstance	Severity: minor Implicitly cleared: false Default probable cause: tmnxSubHostInconsistentAtmTdOvr (1424)	Unspecified
<b>Description:</b> The alarm is raised when an AAA server (e.g. a RADIUS server) specifies an ATM Traffic Descriptor override for a subscriber host while it has already specified another one for another host on the same ATM Virtual Circuit.		
<b>Remedial action:</b> Modify the AAA configuration so that all subscriber hosts sharing the same ATM Virtual circuit use the same ATM Traffic Descriptor Override VSA. If different overrides are required, then the subscribers must be in different ATM Virtual Circuits.		

## 39 – Unspecified NE alarms

Table 39-949 SubnetBindingFailed

Alarm	Attributes	Applicable major releases
Name: SubnetBindingFailed (4988) Type: processingErrorAlarm (81) Package: dhcp Raised on class: dhcp.AddressPool	Severity: major Implicitly cleared: false Default probable cause: tmnxDhcpSvrSubnetBindingFailed (2043)	Unspecified
<b>Description:</b> This alarm is raised when a DHCP server instance cannot offer an IP address to a host, because a subnet binding with its access node (service) is required but not available anymore in the pool.		
<b>Remedial action:</b> The configuration of the Local DHCP Server IP Address Pool and/or the access node (service) must be changed in order to make more subnets available.		

Table 39-950 SubnetFailCtrlError

Alarm	Attributes	Applicable major releases
Name: SubnetFailCtrlError (5156) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.Subnet	Severity: major Implicitly cleared: false Default probable cause: leaseWithInconsistentFailoverConfiguration (2075)	Unspecified
<b>Description:</b> The alarm is raised each time a lease is created in a subnet with an inconsistent failover configuration		
<b>Remedial action:</b> A subnet lease has an inconsistent failover configuration, where the failover control type is not identical for all subnet ranges while the pool subnet binding key is not equal to 'none'. Please restore consistency of the failover control configuration for all subnet ranges in this subnet.		

Table 39-951 SubnetMinFreeExc

Alarm	Attributes	Applicable major releases
Name: SubnetMinFreeExc (516) Type: configurationAlarm (11) Package: dhcp Raised on class: dhcp.Subnet	Severity: warning Implicitly cleared: false Default probable cause: actualFreeAddrBelowSubnetMin (391)	Unspecified
<b>Description:</b> The alarm is raised when the actual number of free addresses in a subnet falls below the desired minimum number specified in the subnet configuration		
<b>Remedial action:</b> Please ensure that an adequate free address threshold is configured or create a new subnet to meet the system requirements. This warning is raised on IPv4 DHCP servers only.		

Table 39-952 SubnetMismatch

Alarm	Attributes	Applicable major releases
Name: SubnetMismatch (415) Type: configurationAlarm (11) Package: srrp Raised on class: srrp.Instance	Severity: major Implicitly cleared: true Default probable cause: ipAddressListMismatch (308)	Unspecified
<b>Description:</b> The alarm is raised when the IP address list received from the master does not match the local IP address list.		
<b>Remedial action:</b> Check the IP address of the Subscriber interface and make sure the address for the peer SRRP instances are in the same subnet.		

Table 39-953 SubRackBatteryFail

Alarm	Attributes	Applicable major releases
Name: SubRackBatteryFail (5426) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRack	Severity: variable Implicitly cleared: true Default probable cause: batteryFail (457)	Unspecified
<b>Description:</b> The alarm is raised when the battery fails or is missing on SubRack.		
<b>Remedial action:</b> The battery on the subrack should be replaced or re-installed.		

Table 39-954 SubRackSecondaryBatteryFail

Alarm	Attributes	Applicable major releases
Name: SubRackSecondaryBatteryFail (5427) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRack	Severity: variable Implicitly cleared: true Default probable cause: secondaryBatteryFail (1412)	Unspecified
<b>Description:</b> The alarm is raised when a secondary battery failure is detected on SubRack.		
<b>Remedial action:</b> The battery on the subrack should be replaced or re-installed.		

## 39 – Unspecified NE alarms

Table 39-955 SubscrAuthPolicyMisconfigured (rtr)

Alarm	Attributes	Applicable major releases
Name: SubscrAuthPolicyMisconfigured (271) Type: ConfigurationAlarm (15) Package: rtr Raised on class: rtr.VirtualInterfaceConfiguration	Severity: warning Implicitly cleared: true Default probable cause: SubscrAuthPolicyNotFound (203)	Unspecified
<b>Description:</b> The alarm is raised when a subscriber authentication policy for DHCP relay is misconfigured.		
<b>Remedial action:</b> This alarm is raised on L2 and L3 access interfaces when the authentication policy specified for DHCP Relay does not exist. Please make sure to select an authentication policy that exists or to configure a new authentication policy with that name.		

Table 39-956 SubscrAuthPolicyMisconfigured (vpls)

Alarm	Attributes	Applicable major releases
Name: SubscrAuthPolicyMisconfigured (271) Type: ConfigurationAlarm (15) Package: vpls Raised on class: vpls.L2AccessItfDhcpRelayCfg	Severity: warning Implicitly cleared: true Default probable cause: SubscrAuthPolicyNotFound (203)	Unspecified
<b>Description:</b> The alarm is raised when a subscriber authentication policy for DHCP relay is misconfigured.		
<b>Remedial action:</b> Check the local and global configuration for the subscriber authentication policy for DHCP relay.		

Table 39-957 SubscriberMisConfigured

Alarm	Attributes	Applicable major releases
Name: SubscriberMisConfigured (8141) Type: configurationAlarm (11) Package: service Raised on class: service.SvcResourceReservation	Severity: warning Implicitly cleared: true Default probable cause: subscriberMisConfigured (2537)	Unspecified
<b>Description:</b> This alarm is raised when the customer associated with a route target reservation entry has been modified, i.e., the customer name can be changed, or the customer is deleted.		
<b>Remedial action:</b> A configuration error has occurred which should be corrected. This customer associated with the Reserved VPRN Route Target Table has been modified.		

Table 39-958 SubSlaacOverride

Alarm	Attributes	Applicable major releases
Name: SubSlaacOverride (5414) Type: processingErrorAlarm (81) Package: service Raised on class: service.ServiceAccessPoint	Severity: major Implicitly cleared: true Default probable cause: subSlaacAddressOverlap (2122)	Unspecified
<b>Description:</b> The alarm is raised when an NE notifies the 5620 SAM that an IPv6 client requests a DHCPv6 non-temporary address (IA_NA) which overrides an existing SLAAC prefix that is assigned to a host. This configuration causes the SLAAC host to be removed from the system.		
<b>Remedial action:</b> Provide a non-overlapping IPv6 Address for the SLAAC host.		

Table 39-959 SubSlaacSetupFailure

Alarm	Attributes	Applicable major releases
Name: SubSlaacSetupFailure (3906) Type: processingErrorAlarm (81) Package: service Raised on class: service.ServiceAccessPoint	Severity: major Implicitly cleared: false Default probable cause: SubSlaacSetupFailure (1494)	Unspecified
<b>Description:</b> The alarm is raised when an NE notifies the 5620 SAM that it cannot create or update a SLAAC host in the tmnxSubSlaacTable.		
<b>Remedial action:</b> The alarm is raised when an NE notifies SAM that it cannot create or update a SLAAC host in the tmnxSubSlaacTable. Verify the service configuration.		

Table 39-960 SubVirtualSubnetHostsDeleted

Alarm	Attributes	Applicable major releases
Name: SubVirtualSubnetHostsDeleted (5411) Type: configurationAlarm (11) Package: ressubscr Raised on class: ressubscr.ResidentialSubscriberInstance	Severity: warning Implicitly cleared: false Default probable cause: subVirtualSubnetHostsDeleted (2119)	Unspecified
<b>Description:</b> This alarm is raised when the NE deletes all existing hosts for a subscriber associated with a virtual subnet because a new default router and/or subnet were assigned. This is the consequence of a configuration change on the server that assigns the subnet.		
<b>Remedial action:</b> The hosts must transmit DHCP requests if they require a connection.		

## 39 – Unspecified NE alarms

Table 39-961 svcArpHostPopulateErr

Alarm	Attributes	Applicable major releases
Name: svcArpHostPopulateErr (3909) Type: processingErrorAlarm (81) Package: service Raised on class: service.AccessInterface	Severity: major Implicitly cleared: false Default probable cause: svcArpHostPopulateError (1496)	Unspecified
<b>Description:</b> The alarm is raised when an NE notifies the 5620 SAM that it cannot update the ARP Host table upon reception of an ARP message.		
<b>Remedial action:</b> The alarm is raised when an NE notifies the 5620 SAM that it cannot update the ARP Host table upon reception of an ARP message. Verify the service configuration. Additionally, verify the length of the auto-generated subscriber identification.		

Table 39-962 svcFdbMimDestTableFull

Alarm	Attributes	Applicable major releases
Name: svcFdbMimDestTableFull (588) Type: resourceAlarm (28) Package: netw Raised on class: netw.NetworkElement	Severity: warning Implicitly cleared: true Default probable cause: resourceLimitReached (131)	Unspecified
<b>Description:</b> The alarm is raised when the number of backbone MAC address indices on an NE reaches the maximum allowed value. The alarm clears when the number of backbone MAC address indices on the NE falls below 95 percent of the maximum allowed value.		
<b>Remedial action:</b> Informational		

Table 39-963 SWIncompatibility

Alarm	Attributes	Applicable major releases
Name: SWIncompatibility (471) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.StackConfiguration	Severity: major Implicitly cleared: false Default probable cause: elementNotCompatibleWithExistingStack (357)	Unspecified
<b>Description:</b> The alarm is raised when a slot is not compatible with the current stack. The slot subsequently enters pass-through mode.		
<b>Remedial action:</b> Login to switch console, and install same software load on primary and secondary slot and synchronize them and reload switch.		

Table 39-964 SynchronizationLossOfSignal

Alarm	Attributes	Applicable major releases
Name: SynchronizationLossOfSignal (799) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Shelf	Severity: major Implicitly cleared: true Default probable cause: lossOfSignal (99)	Unspecified
<b>Description:</b> The alarm is raised when an SLOS signal is detected on a PDH tributary.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

Table 39-965 SyncCertFailed

Alarm	Attributes	Applicable major releases
Name: SyncCertFailed (3912) Type: equipmentAlarm (3) Package: sitesec Raised on class: sitesec.SiteSystemSecurityPublicKey	Severity: major Implicitly cleared: true Default probable cause: SyncCertFailed (1498)	Unspecified
<b>Description:</b> The alarm is raised when the synchronization of certificate files between the primary and secondary CPMs is stopped due to errors.		
<b>Remedial action:</b> The synchronization of certificate files between the primary and secondary CPMs is stopped due to errors. Depending on the reason specified, corrective action should be taken		

Table 39-966 synchroFailureAlarm

Alarm	Attributes	Applicable major releases
Name: synchroFailureAlarm (534) Type: softwareAlarm (19) Package: sw Raised on class: sw.SoftwareControlModule	Severity: major Implicitly cleared: false Default probable cause: synchroFailureAlarm (403)	Unspecified
<b>Description:</b> The alarm is raised when the flash card synchronization on an NE fails.		
<b>Remedial action:</b> The SW image on the NE may have been inadvertently corrupted. Download a new copy of the SW image to the NE. If the problem persists contact Alcatel-Lucent support for assistance.		

## 39 – Unspecified NE alarms

Table 39-967 SynchronizationSignalFailure

Alarm	Attributes	Applicable major releases
Name: SynchronizationSignalFailure (2944) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: synchronizationSignalFailure (1134)	Unspecified
<b>Description:</b> The alarm is raised when a synchronization signal failure is detected.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-968 SystemModeChange

Alarm	Attributes	Applicable major releases
Name: SystemModeChange (1923) Type: equipmentAlarm (3) Package: optical Raised on class: optical.OpticalNeProperties	Severity: major Implicitly cleared: false Default probable cause: systemModeChange (923)	Unspecified
<b>Description:</b> The alarm is raised when an NE undergoes a system mode change, for example, from SONET to SDH mode. The alarm information includes the Site ID, old system mode value and new system mode value.		
<b>Remedial action:</b> Informational. The alarm is raised when an NE undergoes a system mode change, for ex. from SONET to SDH mode.		

Table 39-969 TChipMemoryError

Alarm	Attributes	Applicable major releases
Name: TChipMemoryError (5183) Type: hardwareAnomaly (55) Package: equipment Raised on class: equipment.BaseCard	Severity: minor Implicitly cleared: true Default probable cause: tchipMemoryParityError (2099)	Unspecified
<b>Description:</b> This Alarm is raised when a T-chip experiences an occurrence of an internal memory parity error.		
<b>Remedial action:</b> A fault has been detected in the hardware. If the problem persists please contact Alcatel-Lucent support for assistance.		

Table 39-970 TemporaryCommunicationFailure

Alarm	Attributes	Applicable major releases
Name: TemporaryCommunicationFailure (800) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: temporaryCommunicationProblem (566)	Unspecified
<b>Description:</b> The alarm is raised when a temporary communication failure is detected.		
<b>Remedial action:</b> 5620 SAM has temporarily lost contact with an NE. This may have been caused by the NE restarting, the NE being taken off-line via operator intervention or by a loss of connectivity to the NE. If the NE restarted then there will be an alarm indicating th		

Table 39-971 TestFailedAlarm (atm)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: atm Raised on class: atm.PvcConnection	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-972 TestFailedAlarm (bgp)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: bgp Raised on class: bgp.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

## 39 – Unspecified NE alarms

Table 39-973 TestFailedAlarm (ethernetoam)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: ethernetoam Raised on class: ethernetoam.MaintAssociation	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-974 TestFailedAlarm (ldp)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: ldp Raised on class: ldp.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-975 TestFailedAlarm (lte)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: lte Raised on class: lte.EPSPath	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when TestFailedAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-976 TestFailedAlarm (Iteservice)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: Iteservice Raised on class: Iteservice.MobileService	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-977 TestFailedAlarm (mirror)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: mirror Raised on class: mirror.Mirror	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-978 TestFailedAlarm (monpath)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: monpath Raised on class: monpath.MonitoredIpPath	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

39 – Unspecified NE alarms

---

**Table 39-979 TestFailedAlarm (mpls)**

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: mpls Raised on class: mpls.Lsp	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-980 TestFailedAlarm (mplstp)**

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: mplstp Raised on class: mplstp.TPLsp	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-981 TestFailedAlarm (netw)**

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when TestFailedAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-982 TestFailedAlarm (pim)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: pim Raised on class: pim.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-983 TestFailedAlarm (rtr)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: rtr Raised on class: rtr.VirtualRouter	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-984 TestFailedAlarm (service)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: service Raised on class: service.SpokeConnector	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when TestFailedAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

39 – Unspecified NE alarms

---

Table 39-985 TestFailedAlarm (svt)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: svt Raised on class: svt.Tunnel	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-986 TestFailedAlarm (vll)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: vll Raised on class: vll.Vll	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-987 TestFailedAlarm (vpls)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: vpls Raised on class: vpls.AbstractVpls	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-988 TestFailedAlarm (vprn)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm (3708) Type: oamAlarm (18) Package: vprn Raised on class: vprn.Vprn	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-989 TestFailedAlarm2 (ethernetoam)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm2 (3739) Type: oamAlarm (18) Package: ethernetoam Raised on class: ethernetoam.Mep	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-990 TestFailedAlarm2 (lte)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm2 (3739) Type: oamAlarm (18) Package: lte Raised on class: lte.EPSPeer	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when TestFailedAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

39 – Unspecified NE alarms

---

**Table 39-991 TestFailedAlarm2 (mpls)**

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm2 (3739) Type: oamAlarm (18) Package: mpls Raised on class: mpls.P2MPDynamicLsp	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-992 TestFailedAlarm2 (rtr)**

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm2 (3739) Type: oamAlarm (18) Package: rtr Raised on class: rtr.LDPTunnelInterface	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-993 TestFailedAlarm2 (service)**

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm2 (3739) Type: oamAlarm (18) Package: service Raised on class: service.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when TestFailedAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-994 TestFailedAlarm2 (svt)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm2 (3739) Type: oamAlarm (18) Package: svt Raised on class: svt.SdpBinding	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-995 TestFailedAlarm3 (mpls)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm3 (3886) Type: oamAlarm (18) Package: mpls Raised on class: mpls.LspPath	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-996 TestFailedAlarm3 (service)

Alarm	Attributes	Applicable major releases
Name: TestFailedAlarm3 (3886) Type: oamAlarm (18) Package: service Raised on class: service.CompositeService	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object fails.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

39 – Unspecified NE alarms

---

**Table 39-997 TestFailureAlarm**

Alarm	Attributes	Applicable major releases
Name: TestFailureAlarm (3903) Type: oamAlarm (18) Package: sas Raised on class: sas.Test	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> This alarm is raised when a test failure trap is received from the node.		
<b>Remedial action:</b> Fix network connections issues.		

**Table 39-998 TestThresholdExceededAlarm (atm)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: atm Raised on class: atm.PvcConnection	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

**Table 39-999 TestThresholdExceededAlarm (bgp)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: bgp Raised on class: bgp.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

**Table 39-1000 TestThresholdExceededAlarm (ethernetoam)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: ethernetoam Raised on class: ethernetoam.MaintAssociation	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

**Table 39-1001 TestThresholdExceededAlarm (ldp)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: ldp Raised on class: ldp.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

**Table 39-1002 TestThresholdExceededAlarm (lte)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: lte Raised on class: lte.EPSPath	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

## 39 – Unspecified NE alarms

Table 39-1003 TestThresholdExceededAlarm (Iteservice)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: Iteservice Raised on class: Iteservice.MobileService	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-1004 TestThresholdExceededAlarm (mirror)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: mirror Raised on class: mirror.Mirror	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-1005 TestThresholdExceededAlarm (monpath)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: monpath Raised on class: monpath.MonitoredIpPath	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-1006 TestThresholdExceededAlarm (mpls)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: mpls Raised on class: mpls.Lsp	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-1007 TestThresholdExceededAlarm (mplstp)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: mplstp Raised on class: mplstp.TPLsp	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-1008 TestThresholdExceededAlarm (netw)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: netw Raised on class: netw.NetworkElement	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

## 39 – Unspecified NE alarms

Table 39-1009 TestThresholdExceededAlarm (pim)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: pim Raised on class: pim.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-1010 TestThresholdExceededAlarm (rtr)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: rtr Raised on class: rtr.VirtualRouter	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports that the test threshold has been exceeded.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-1011 TestThresholdExceededAlarm (service)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: service Raised on class: service.SpokeConnector	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-1012 TestThresholdExceededAlarm (svt)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: svt Raised on class: svt.Tunnel	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-1013 TestThresholdExceededAlarm (vlan)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: vlan Raised on class: vlan.Vlan	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-1014 TestThresholdExceededAlarm (vll)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: vll Raised on class: vll.Vll	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

39 – Unspecified NE alarms

---

**Table 39-1015 TestThresholdExceededAlarm (vpIs)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: vpIs Raised on class: vpIs.AbstractVpIs	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-1016 TestThresholdExceededAlarm (vprn)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm (1154) Type: oamAlarm (18) Package: vprn Raised on class: vprn.Vprn	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-1017 TestThresholdExceededAlarm2 (ethernetoam)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm2 (1918) Type: oamAlarm (18) Package: ethernetoam Raised on class: ethernetoam.Mep	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports that the test threshold has been exceeded.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-1018 TestThresholdExceededAlarm2 (lte)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm2 (1918) Type: oamAlarm (18) Package: lte Raised on class: lte.EPSPeer	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is un-reliable.		

Table 39-1019 TestThresholdExceededAlarm2 (mpls)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm2 (1918) Type: oamAlarm (18) Package: mpls Raised on class: mpls.P2MPDynamicLsp	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports that the test threshold has been exceeded.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-1020 TestThresholdExceededAlarm2 (rtr)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm2 (1918) Type: oamAlarm (18) Package: rtr Raised on class: rtr.LDPTunnelInterface	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

## 39 – Unspecified NE alarms

Table 39-1021 TestThresholdExceededAlarm2 (service)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm2 (1918) Type: oamAlarm (18) Package: service Raised on class: service.Site	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-1022 TestThresholdExceededAlarm2 (svt)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm2 (1918) Type: oamAlarm (18) Package: svt Raised on class: svt.SdpBinding	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports that the test threshold has been exceeded.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

Table 39-1023 TestThresholdExceededAlarm3 (mpls)

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm3 (1919) Type: oamAlarm (18) Package: mpls Raised on class: mpls.LspPath	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when an OAM test on the object reports that a test threshold is exceeded.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-1024 TestThresholdExceededAlarm3 (service)**

Alarm	Attributes	Applicable major releases
Name: TestThresholdExceededAlarm3 (1919) Type: oamAlarm (18) Package: service Raised on class: service.CompositeService	Severity: major Implicitly cleared: true Default probable cause: networkDegradation (204)	Unspecified
<b>Description:</b> The alarm is raised when SasThresholdExceededAlarm is raised for any test on this object.		
<b>Remedial action:</b> Informational - if the alarm persists or is occurring frequently then investigation is required to understand why the underlying transport network is unreliable.		

**Table 39-1025 ThresholdCrossingAlarmCard**

Alarm	Attributes	Applicable major releases
Name: ThresholdCrossingAlarmCard (2097) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.BaseCard	Severity: warning Implicitly cleared: false Default probable cause: thresholdCrossed (12)	Unspecified
<b>Description:</b> The alarm is raised when a card value crosses a TCA threshold.		
<b>Remedial action:</b> A condition set when a counter exceeds a user-selected high or low threshold. A TCA does not generate an alarm but is available on demand through the CIT. Please refer 1830 PSS TroubleShooting guide for more details.		

**Table 39-1026 ThresholdCrossingAlarmOduk**

Alarm	Attributes	Applicable major releases
Name: ThresholdCrossingAlarmOduk (4949) Type: thresholdCrossed (6) Package: oth Raised on class: oth.Oduk	Severity: warning Implicitly cleared: false Default probable cause: thresholdCrossed (12)	Unspecified
<b>Description:</b> The alarm is raised when a ODUK value crosses a TCA threshold.		
<b>Remedial action:</b> A condition set when a counter exceeds a user-selected high or low threshold. A TCA does not generate an alarm but is available on demand through the CIT. Please refer 1830 PSS TroubleShooting guide for more details.		

## 39 – Unspecified NE alarms

Table 39-1027 ThresholdCrossingAlarmOtuk

Alarm	Attributes	Applicable major releases
Name: ThresholdCrossingAlarmOtuk (4950) Type: thresholdCrossed (6) Package: oth Raised on class: oth.Otuk	Severity: warning Implicitly cleared: false Default probable cause: thresholdCrossed (12)	Unspecified
<b>Description:</b> The alarm is raised when a OTUK value crosses a TCA threshold.		
<b>Remedial action:</b> A condition set when a counter exceeds a user-selected high or low threshold. A TCA does not generate an alarm but is available on demand through the CIT. Please refer 1830 PSS TroubleShooting guide for more details.		

Table 39-1028 ThresholdCrossingAlarmPort

Alarm	Attributes	Applicable major releases
Name: ThresholdCrossingAlarmPort (2098) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.PhysicalPort	Severity: warning Implicitly cleared: false Default probable cause: thresholdCrossed (12)	Unspecified
<b>Description:</b> The alarm is raised when a port value crosses a TCA threshold.		
<b>Remedial action:</b> A condition set when a counter exceeds a user-selected high or low threshold. A TCA does not generate an alarm but is available on demand through the CIT. Please refer 1830 PSS TroubleShooting guide for more details.		

Table 39-1029 ThresholdCrossingMDAResvCBSAlarm

Alarm	Attributes	Applicable major releases
Name: ThresholdCrossingMDAResvCBSAlarm (3626) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.DaughterCard	Severity: variable Implicitly cleared: true Default probable cause: thresholdCrossed (12)	Unspecified
<b>Description:</b> The alarm is raised when the reserved CBS of an MDA crosses a threshold.		
<b>Remedial action:</b> This alarm is raised when the traffic rates being received on an MDA are exceeding the amount of buffer allocated for the MDA in the committed burst size configuration parameter. In all probability the QoS being delivered by the MDA is degraded. Steps must be taken to shed traffic from the ports/links associated with the MDA.		

**Table 39-1030 ThresholdCrossingPortResvCBSAlarm**

Alarm	Attributes	Applicable major releases
Name: ThresholdCrossingPortResvCBSAlarm (3627) Type: thresholdCrossed (6) Package: equipment Raised on class: equipment.PhysicalPort	Severity: variable Implicitly cleared: true Default probable cause: thresholdCrossed (12)	Unspecified
<b>Description:</b> The alarm is raised when the reserved CBS of a port crosses a threshold.		
<b>Remedial action:</b> This alarm is raised when the traffic rates being received on a port are exceeding the amount of buffer allocated for the port in the committed burst size configuration parameter. In all probability the QoS being delivered by the port is degraded. Steps must be taken to shed traffic from the port in question..		

**Table 39-1031 TimeRefDisqualified**

Alarm	Attributes	Applicable major releases
Name: TimeRefDisqualified (8072) Type: communicationsAlarm (4) Package: netw Raised on class: netw.Time	Severity: info Implicitly cleared: true Default probable cause: TimeRefDisqualified (2474)	Unspecified
<b>Description:</b> The alarm is raised when a system time input reference is disqualified.		
<b>Remedial action:</b> Informational- no corrective action required.		

**Table 39-1032 TimeRefSelect**

Alarm	Attributes	Applicable major releases
Name: TimeRefSelect (8073) Type: communicationsAlarm (4) Package: netw Raised on class: netw.TimeSource	Severity: info Implicitly cleared: false Default probable cause: TimeRefSelect (2475)	Unspecified
<b>Description:</b> The alarm is raised when a system time input reference is selected.		
<b>Remedial action:</b> Informational - no corrective action required.		

## 39 – Unspecified NE alarms

Table 39-1033 TimingHoldover

Alarm	Attributes	Applicable major releases
Name: TimingHoldover (734) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: major Implicitly cleared: true Default probable cause: timingHoldover (511)	Unspecified
<b>Description:</b> The alarm is raised when the timing of an NE is in the Holdover state.		
<b>Raising condition:</b> (('Status' EQUAL 'Master Holdover'))		
<b>Clearing condition:</b> (('Status' NOT EQUAL 'Master Holdover'))		
<b>Remedial action:</b> Informational only.		

Table 39-1034 TimingReferenceOneNotQualified

Alarm	Attributes	Applicable major releases
Name: TimingReferenceOneNotQualified (545) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: timingReferenceNotQualified (418)	Unspecified
<b>Description:</b> The alarm is raised when Timing Reference One on an NE is not in the Qualified state.		
<b>Raising condition:</b> (('Qualified For Use' EQUAL 'Not Qualified') AND ('Administrative State' NOT EQUAL 'Down'))		
<b>Clearing condition:</b> (('Qualified For Use' NOT EQUAL 'Not Qualified') OR ('Administrative State' EQUAL 'Down'))		
<b>Remedial action:</b> Make sure that Timing Reference One is qualified.		

Table 39-1035 TimingReferenceTwoNotQualified

Alarm	Attributes	Applicable major releases
Name: TimingReferenceTwoNotQualified (546) Type: communicationsAlarm (4) Package: sonet Raised on class: sonet.SiteSync	Severity: minor Implicitly cleared: true Default probable cause: timingReferenceNotQualified (418)	Unspecified
<b>Description:</b> The alarm is raised when Timing Reference Two on an NE is not in the Qualified state.		
<b>Raising condition:</b> (('Qualified For Use' EQUAL 'Not Qualified') AND ('Administrative State' NOT EQUAL 'Down'))		
<b>Clearing condition:</b> (('Qualified For Use' NOT EQUAL 'Not Qualified') OR ('Administrative State' EQUAL 'Down'))		
<b>Remedial action:</b> Make sure that Timing Reference Two is qualified.		

Table 39-1036 TMNLossofSignal

Alarm	Attributes	Applicable major releases
Name: TMNLossofSignal (1920) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.MprTMN	Severity: variable Implicitly cleared: true Default probable cause: tmnLOS (920)	Unspecified
<b>Description:</b> The alarm is raised when a Loss of Signal occurs on the TMN Interface.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-1037 tmnxMcSyncClientAlarm

Alarm	Attributes	Applicable major releases
Name: tmnxMcSyncClientAlarm (423) Type: communicationsAlarm (4) Package: multichassis Raised on class: multichassis.PeerSynchronizationProtocol	Severity: warning Implicitly cleared: true Default probable cause: locallyDeletedEntryInMCSyncDatabase (407)	Unspecified
<b>Description:</b> The alarm is raised when a MC synchronization database entry is deleted locally.		
<b>Remedial action:</b> Informational only.		

Table 39-1038 TooManyCpaaPerIsisArea

Alarm	Attributes	Applicable major releases
Name: TooManyCpaaPerIsisArea (385) Type: configurationAlarm (11) Package: topology Raised on class: topology.Cpaa	Severity: critical Implicitly cleared: true Default probable cause: tooManyCpaaPelsisArea (930)	Unspecified
<b>Description:</b> The alarm is raised when there are too many 7701 CPAA's for an ISIS L1 area.		
<b>Remedial action:</b> Check the configuration of CPAA and make sure there is at most one CPAA configured for an ISIS area within an administrative domain.		

## 39 – Unspecified NE alarms

Table 39-1039 TopologyIsisSystemError

Alarm	Attributes	Applicable major releases
Name: TopologyIsisSystemError (373) Type: topologyAlarm (34) Package: topology Raised on class: topology.AutonomousSystem	Severity: major Implicitly cleared: true Default probable cause: isisSystemNotAdvertisingTeRouterId (272)	Unspecified
<b>Description:</b> The alarm is raised when an IS-IS topology system error is detected.		
<b>Remedial action:</b> Alarm contains the systemId of the router which is not advertising ISIS TE RouterId. User should either configure the ISIS TE routerId on the node or configure a routerId for that system in "ISIS System ID Mapping" menu. Configuring the routerId in systemId mapping will not clear the alarm.		

Table 39-1040 TopologyMisconfigured

Alarm	Attributes	Applicable major releases
Name: TopologyMisconfigured (95) Type: configurationAlarm (11) Package: service Raised on class: service.Service	Severity: critical Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	Unspecified
<b>Description:</b> This alarm is raised when service sites are not fully connected.		
<b>Raising condition:</b> ('topologyMisconfigured' EQUAL 'true')		
<b>Clearing condition:</b> ('topologyMisconfigured' EQUAL 'false')		
<b>Remedial action:</b> Connect the service sites with SDP Bindings, Vlan Uplinks, or PBB tunnels.		

Table 39-1041 TPSAbnormalState

Alarm	Attributes	Applicable major releases
Name: TPSAbnormalState (3935) Type: tpsAbnormalConditionAlarm (115) Package: mpr Raised on class: mpr.MPRProtection	Severity: variable Implicitly cleared: true Default probable cause: TPSProblem (1518)	Unspecified
<b>Description:</b> The alarm is raised when abnormal state resulted due to force switch/lockout operation in TPS mode.		
<b>Remedial action:</b> This alarm is raised when forced-switch/lockout command in TPS mode which led to an abnormal condition.		

Table 39-1042 TrailDegrade

Alarm	Attributes	Applicable major releases
Name: TrailDegrade (8101) Type: communicationsAlarm (4) Package: optical Raised on class: optical.Trail	Severity: major Implicitly cleared: true Default probable cause: ProtectionDegrade (2499)	Unspecified
<b>Description:</b> The alarm is raised when either Trail Path of Protected Trail is Operationally down.		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on APS Group's work and protect TPs to understand why trail protection is degraded.		

Table 39-1043 TrailPathDown

Alarm	Attributes	Applicable major releases
Name: TrailPathDown (5128) Type: communicationsAlarm (4) Package: optical Raised on class: optical.TrailPath	Severity: critical Implicitly cleared: true Default probable cause: OperationalStateDown (1963)	Unspecified
<b>Description:</b> The alarm is raised when the termination point(s) of the trail path are operationally down.		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on the hops to understand why the underlying transport network is unreliable.		

Table 39-1044 TrailSignalFail

Alarm	Attributes	Applicable major releases
Name: TrailSignalFail (798) Type: communicationsAlarm (4) Package: bundle Raised on class: bundle.Interface	Severity: major Implicitly cleared: true Default probable cause: trailSignalFailure (565)	Unspecified
<b>Description:</b> The alarm is raised when a local or remote failure in an IMA group generates a Trail Signal Fail message.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

## 39 – Unspecified NE alarms

Table 39-1045 TransportServerFailure

Alarm	Attributes	Applicable major releases
Name: TransportServerFailure (8104) Type: communicationsAlarm (4) Package: optical Raised on class: optical.TransportService	Severity: critical Implicitly cleared: true Default probable cause: UnderlyingServerDown (2502)	Unspecified
<b>Description:</b> The alarm is raised when any of the server trails in the service is operationally down		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on Server Trails to understand why transport service protection is unreliable.		

Table 39-1046 TransportServiceDegrade

Alarm	Attributes	Applicable major releases
Name: TransportServiceDegrade (8105) Type: communicationsAlarm (4) Package: optical Raised on class: optical.TransportService	Severity: major Implicitly cleared: true Default probable cause: ProtectionDegrade (2499)	Unspecified
<b>Description:</b> The alarm is raised when either work or protect path of Protected Transport Service is operationally down		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on APS Group's work and protect TPs to understand why transport service protection is degraded.		

Table 39-1047 TransportServiceDown

Alarm	Attributes	Applicable major releases
Name: TransportServiceDown (2906) Type: communicationsAlarm (4) Package: optical Raised on class: optical.TransportService	Severity: critical Implicitly cleared: true Default probable cause: OperationalStateDown (1963)	Unspecified
<b>Description:</b> The alarm is raised when: 1. The termination point(s) or VTS XC's of the service path(s) are operationally down. 2. There are missing VTS XCs in any of the service path(s) of this transport service.		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on the hops to understand why the underlying transport network is unreliable.		

Table 39-1048 TransportServicePathDown

Alarm	Attributes	Applicable major releases
Name: TransportServicePathDown (4402) Type: communicationsAlarm (4) Package: optical Raised on class: optical.ServicePath	Severity: critical Implicitly cleared: true Default probable cause: OperationalStateDown (1963)	Unspecified
<b>Description:</b> The alarm is raised when the termination point(s) of the service path are operationally down.		
<b>Remedial action:</b> Informational - If the alarm persists or is occurring frequently then investigation is required by looking at the active alarms on the hops to understand why the underlying transport network is unreliable.		

Table 39-1049 TunnelOverbooked

Alarm	Attributes	Applicable major releases
Name: TunnelOverbooked (590) Type: resourceAlarm (28) Package: svt Raised on class: svt.Tunnel	Severity: warning Implicitly cleared: false Default probable cause: tunnelOverbooked (442)	Unspecified
<b>Description:</b> The alarm is raised when the allocated SDP binding bandwidth specified by sdpBookedBandwidth exceeds the sdpMaxBookableBandwidth value.		
<b>Clearing condition:</b> ('SDP Available Bandwidth' NOT EQUAL '0')		
<b>Remedial action:</b> Please set the maximum bookable bandwidth parameter to a more appropriate value or offload traffic from the SDP in question to another SDP.		

Table 39-1050 TunnelSelBlacklistFull

Alarm	Attributes	Applicable major releases
Name: TunnelSelBlacklistFull (4626) Type: processingErrorAlarm (81) Package: l2tp Raised on class: l2tp.Site	Severity: major Implicitly cleared: true Default probable cause: tmnxL2tpTunnelSelBlacklistFull (1894)	Unspecified
<b>Description:</b> This alarm is raised when the number of tunnels and peers in the tunnel-selection-blacklist reaches the limit configured on the L2TP Site, and is cleared when the limit is no longer reached.		
<b>Remedial action:</b> Either increase Max List Length in Tunnel Selection Blacklist configuration or fix blacklisted tunnels or peers.		

## 39 – Unspecified NE alarms

Table 39-1051 TwampReflectorAlarm

Alarm	Attributes	Applicable major releases
Name: TwampReflectorAlarm (8138) Type: oamAlarm (18) Package: sas Raised on class: sas.TWLSession	Severity: info Implicitly cleared: true Default probable cause: missingTwlReflectorConfiguration (2534)	Unspecified
<b>Description:</b> This alarm is raised when a Twamp-Light Session is configured without a matching Reflector Prefix.		
<b>Remedial action:</b> This alarm is raised when a Twamp-Light Session is configured without a matching Reflector Prefix.		

Table 39-1052 TwampSrvInactivityTimeout

Alarm	Attributes	Applicable major releases
Name: TwampSrvInactivityTimeout (3319) Type: communicationsAlarm (4) Package: sas Raised on class: sas.TwampSrv	Severity: major Implicitly cleared: true Default probable cause: TWAMPServerInactivityTimeout (1158)	Unspecified
<b>Description:</b> The alarm is raised when a TWAMP control connection is disconnected by the TWAMP server due to the connection being inactive for a period exceeding the server's inactivity timeout, which generates a TWAMP Server InactivityTimeout notification.		
<b>Remedial action:</b> Verify the value of the inactivity-timeout parameter and modify it according to the operational needs.		

Table 39-1053 TwampSrvMaxConnsExceeded

Alarm	Attributes	Applicable major releases
Name: TwampSrvMaxConnsExceeded (3320) Type: communicationsAlarm (4) Package: sas Raised on class: sas.TwampSrv	Severity: major Implicitly cleared: true Default probable cause: TWAMPServerMaxConnsExceeded (1159)	Unspecified
<b>Description:</b> The alarm is raised when the maximum number of concurrent TWAMP control connections for the server has been reached. [EFFECT] The TWAMP client cannot request test runs on the rejected connection. [RECOVERY] Configure the system-level maximum number of concurrent TWAMP control connections to a larger value, or disconnect any TWAMP control connection.'		
<b>Remedial action:</b> Verify the value of the max-conn-server parameter and modify it according to the operational needs.		

Table 39-1054 TwampSrvMaxSessExceeded

Alarm	Attributes	Applicable major releases
Name: TwampSrvMaxSessExceeded (3321) Type: communicationsAlarm (4) Package: sas Raised on class: sas.TwampSrv	Severity: major Implicitly cleared: true Default probable cause: TWAMPServerMaxSessExceeded (1160)	Unspecified
<b>Description:</b> The alarm is raised when the maximum number of concurrent TWAMP sessions for the server has been reached. [EFFECT] The TWAMP client cannot request test runs on the rejected session. [RECOVERY] Configure the system-level maximum number of concurrent TWAMP sessions to a larger value, or disconnect any TWAMP session.'		
<b>Remedial action:</b> Verify the max-sess-server parameter and modify it according to the operational needs.		

Table 39-1055 TwampSrvPfxMaxConnsExceeded

Alarm	Attributes	Applicable major releases
Name: TwampSrvPfxMaxConnsExceeded (3322) Type: communicationsAlarm (4) Package: sas Raised on class: sas.TwampSrv	Severity: major Implicitly cleared: true Default probable cause: TWAMPServerPrefixMaxConnsExceeded (1161)	Unspecified
<b>Description:</b> The alarm is raised when the maximum number of concurrent TWAMP control connections for a TWAMP client prefix has been reached. [EFFECT] The TWAMP client cannot request test runs on the rejected connection. [RECOVERY] Configure the prefix's maximum number of concurrent TWAMP control connections to a larger value, or disconnect a TWAMP control connection which uses the prefix.		
<b>Remedial action:</b> Verify the max-conn-prefix parameter and modify it according to the operational needs.		

Table 39-1056 TwampSrvPfxMaxSessExceeded

Alarm	Attributes	Applicable major releases
Name: TwampSrvPfxMaxSessExceeded (3323) Type: communicationsAlarm (4) Package: sas Raised on class: sas.TwampSrv	Severity: major Implicitly cleared: true Default probable cause: TWAMPServerPrefixMaxSessExceeded (1162)	Unspecified
<b>Description:</b> The alarm is raised when the maximum number of concurrent TWAMP sessions for a TWAMP client prefix has been reached. [EFFECT] The TWAMP client cannot request test runs on the rejected session. [RECOVERY] Configure the prefix's maximum number of concurrent TWAMP sessions to a larger value, or disconnect a TWAMP session which uses the prefix.'		
<b>Remedial action:</b> Verify the max sess-prefix parameter and modify it according to the operational needs.		

## 39 – Unspecified NE alarms

Table 39-1057 TxFail

Alarm	Attributes	Applicable major releases
Name: TxFail (1175) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: txFail (876)	Unspecified
<b>Description:</b> The alarm is raised when a transmission failure is detected.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-1058 TxFailure

Alarm	Attributes	Applicable major releases
Name: TxFailure (3931) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: true Default probable cause: txFail (876)	Unspecified
<b>Description:</b> The alarm is raised when a txFail (a fail of the Tx subfunction) defect raise.		
<b>Remedial action:</b> The alarm is raised when a txFail (a fail of the Tx subfunction) defect raise.		

Table 39-1059 TxRetransmit

Alarm	Attributes	Applicable major releases
Name: TxRetransmit (266) Type: communicationsAlarm (4) Package: ospf Raised on classes: <ul style="list-style-type: none"> <li>ospf.ShamLink</li> <li>ospf.VirtualLink</li> </ul>	Severity: warning Implicitly cleared: false Default probable cause: hello (47) Applicable probable causes: <ul style="list-style-type: none"> <li>hello</li> <li>dbDescript</li> <li>IsReq</li> <li>IsUpdate</li> <li>IsAck</li> <li>nullPacket</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE retransmits an OSPF packet on a non-virtual interface. The alarm information includes the NE ID of the OSPF neighbor.		
<b>Remedial action:</b> Informational - an NE retransmits an OSPF packet on a non-virtual interface. The alarm information includes the NE ID of the OSPF neighbor.		

Table 39-1060 TypeMismatch

Alarm	Attributes	Applicable major releases
Name: TypeMismatch (96) Type: configurationAlarm (11) Package: service Raised on class: service.Service	Severity: critical Implicitly cleared: true Default probable cause: serviceSiteTypeMisconfigured (82)	Unspecified
<b>Description:</b> The alarm is raised when a VLAN type for a Site doesn't match what has been configured on the Service.		
<b>Raising condition:</b> ('serviceTypeInconsistent' EQUAL 'true')		
<b>Clearing condition:</b> ('serviceTypeInconsistent' EQUAL 'false')		
<b>Remedial action:</b> Configure the VLAN subtype on the site same as the service VLAN subtype.		

Table 39-1061 UDPPortAssignmentProblem

Alarm	Attributes	Applicable major releases
Name: UDPPortAssignmentProblem (8026) Type: processingErrorAlarm (81) Package: lte Raised on class: lte.CallTraceSessionManager	Severity: warning Implicitly cleared: true Default probable cause: configurationOrCustomizationError (902)	Unspecified
<b>Description:</b> This alarm is raised when a NE's TCE UDP port cannot be updated.		
<b>Remedial action:</b> Ensure the NE is managed, reachable and that no configuration operation is in progress on that NE and relaunch the operation.		

Table 39-1062 UnavailableTime

Alarm	Attributes	Applicable major releases
Name: UnavailableTime (644) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: unavailableTime (480)	Unspecified
<b>Description:</b> The alarm is raised when a port experiences 10 consecutive SES.		
<b>Remedial action:</b> One of the following conditions exists on the referenced physical interface which must be corrected. A cable/fiber fault exists which must be corrected - check to ensure that the cable is not faulty and is properly connected. The port is faulty - run diagnostics on the port to determine the nature of the fault. If the problem cannot be resolved swap the card containing the port with a card which is known be functional.		

## 39 – Unspecified NE alarms

Table 39-1063 UnconfiguredEquipmentPresent

Alarm	Attributes	Applicable major releases
Name: UnconfiguredEquipmentPresent (645) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: unconfiguredEquipmentPresent (481)	Unspecified
<b>Description:</b> The alarm is raised when unconfigured equipment is detected.		
<b>Remedial action:</b> A configuration error has occurred which must be corrected. The card slot has not been configured		

Table 39-1064 UndefinedSchedulerReference

Alarm	Attributes	Applicable major releases
Name: UndefinedSchedulerReference (118) Type: configurationAlarm (11) Package: vs Raised on class: vs.ServiceTypeDefinition	Severity: warning Implicitly cleared: true Default probable cause: undefinedSchedulerReference (101)	Unspecified
<b>Description:</b> The alarm is raised when a queue specified in the access ingress or access egress policy of an L2 access interface is not referenced by the scheduler policy for the interface.		
<b>Raising condition:</b> (('numberReferences' > '0') AND ('numberOfDefinitions' EQUAL '0'))		
<b>Clearing condition:</b> (('numberReferences' EQUAL '0') OR ('numberOfDefinitions' > '0'))		
<b>Remedial action:</b> A queue specified in the access ingress/egress policy used by an L2 access interface is not referencing a scheduler policy. Ensure all required queues created in the access ingress/egress policy is referencing a scheduler.		

Table 39-1065 UnderlyingResourceDegrade

Alarm	Attributes	Applicable major releases
Name: UnderlyingResourceDegrade (1176) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: underlyingResourceDegrade (877)	Unspecified
<b>Description:</b> The alarm is raised when degradation of an underlying radio interface resource is detected.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-1066 UnderlyingResourceUnavailable

Alarm	Attributes	Applicable major releases
Name: UnderlyingResourceUnavailable (1131) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: underlyingResourceUnavailable (724)	Unspecified
<b>Description:</b> The alarm is raised when an underlying resource is unavailable on an E1, radio, or Ethernet interface.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-1067 UnderlyingResourceUnavailableService

Alarm	Attributes	Applicable major releases
Name: UnderlyingResourceUnavailableService (1177) Type: communicationsAlarm (4) Package: equipment Raised on class: equipment.Port	Severity: variable Implicitly cleared: true Default probable cause: underlyingResourceUnavailableService (878)	Unspecified
<b>Description:</b> The alarm is raised when an underlying E1, radio, or Ethernet interface resource service is unavailable.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-1068 UnmanagedMplsTpSDPTunnelSite

Alarm	Attributes	Applicable major releases
Name: UnmanagedMplsTpSDPTunnelSite (8147) Type: configurationAlarm (11) Package: svt Raised on class: svt.Tunnel	Severity: warning Implicitly cleared: true Default probable cause: unmanagedMplsTpSDPTunnelSite (2543)	Unspecified
<b>Description:</b> The alarm is raised when the MPLS-TP SDP Tunnel has configured with a non-managed site.		
<b>Remedial action:</b> Investigation is required to resolve the following possible scenarios: The far-end site at the MPLS-TP SDP Tunnel is non-managed Site. Please start to manage the NE with SAM or change the far-end site id to a correct MPLS-TP site at MPLS-TP SDP Tunnel form.		

## 39 – Unspecified NE alarms

Table 39-1069 UnresolvedVirtualPortConfiguration

Alarm	Attributes	Applicable major releases
Name: UnresolvedVirtualPortConfiguration (4908) Type: virtualPortAlarm (133) Package: dctr Raised on class: dctr.AbstractVirtualPort	Severity: minor Implicitly cleared: true Default probable cause: UnableToResolveNetworkConfiguration (1965)	Unspecified
<b>Description:</b> The alarm is raised when VSD was not able to resolve network configuration for this virtual port. The virtual port will not be assigned an ip address and there is no service associated with it.		
<b>Raising condition:</b> (('Active' EQUAL 'true') AND ('Resolved State' EQUAL 'false'))		
<b>Clearing condition:</b> (('Active' EQUAL 'false') OR ('Resolved State' EQUAL 'true'))		
<b>Remedial action:</b> This alarm can be cleared when VSD is able to resolve the network configuration of the virtual port. This notification reports that VSD cannot assign service objects to this virtual port. This could be one or more of the domain, zone, subnet, user, or permission are missing, mismatched or not properly configured in VSD. Please make sure the settings in VSD are correct for this virtual port.		

Table 39-1070 UpgradeApplicationLockNotObtained

Alarm	Attributes	Applicable major releases
Name: UpgradeApplicationLockNotObtained (1964) Type: integrityViolation (85) Package: lte Raised on class: lte.ENBEquipment	Severity: warning Implicitly cleared: true Default probable cause: UnableToAcquireLock (949)	Unspecified
<b>Description:</b> This alarm is raised when the Software Upgrade Application is unable to acquire lock to start the operation. Retry the Software Upgrade Operation once the lock is released by the other application.		
<b>Remedial action:</b> Retry the Software Management Operation once the lock is released by the other application.		

Table 39-1071 VersionMismatch (equipment)

Alarm	Attributes	Applicable major releases
Name: VersionMismatch (646) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.Equipment	Severity: variable Implicitly cleared: true Default probable cause: versionMismatch (405)	Unspecified
<b>Description:</b> The alarm is raised when an ODU software version mismatch is detected.		
<b>Remedial action:</b> Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-1072 VersionMismatch (mpr)

Alarm	Attributes	Applicable major releases
Name: VersionMismatch (646) Type: equipmentAlarm (3) Package: mpr Raised on class: mpr.SubRackElements	Severity: variable Implicitly cleared: true Default probable cause: versionMismatch (405)	Unspecified
<b>Description:</b> The alarm is raised when an ODU software version mismatch is detected.		
<b>Remedial action:</b> This alarm is raised when the software version on the MPT does not match the software version on the core. Please refer 9500 Node Maintenance manual for remedial action information.		

Table 39-1073 VirtualLinkDbDescriptAuthFailure

Alarm	Attributes	Applicable major releases
Name: VirtualLinkDbDescriptAuthFailure (61) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>authTypeMismatch</li> <li>authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a dbDescript packet on a virtual link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a dbDescript packet has been received on a virtual link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

## 39 – Unspecified NE alarms

Table 39-1074 VirtualLinkDbDescriptConfig

Alarm	Attributes	Applicable major releases
Name: VirtualLinkDbDescriptConfig (55) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a dbDescript packet on a virtual link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a dbDescript packet has been received on a virtual link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-1075 VirtualLinkHelloAuthFailure

Alarm	Attributes	Applicable major releases
Name: VirtualLinkHelloAuthFailure (60) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a hello packet on a virtual link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a hello packet has been received on a virtual link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

Table 39-1076 VirtualLinkHelloConfig

Alarm	Attributes	Applicable major releases
Name: VirtualLinkHelloConfig (54) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a hello packet on a virtual link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a hello packet has been received on a virtual link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-1077 VirtualLinkLsAckAuthFailure

Alarm	Attributes	Applicable major releases
Name: VirtualLinkLsAckAuthFailure (64) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an lsAck packet on a virtual link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a lsAck packet has been received on a virtual link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

## 39 – Unspecified NE alarms

Table 39-1078 VirtualLinkIsAckConfig

Alarm	Attributes	Applicable major releases
Name: VirtualLinkIsAckConfig (58) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsAck packet on a virtual link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsAck packet has been received on a virtual link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-1079 VirtualLinkIsReqAuthFailure

Alarm	Attributes	Applicable major releases
Name: VirtualLinkIsReqAuthFailure (62) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsReq packet on a virtual link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsReq packet has been received on a virtual link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

Table 39-1080 VirtualLinkIsReqConfig

Alarm	Attributes	Applicable major releases
Name: VirtualLinkIsReqConfig (56) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsReq packet on a virtual link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsReq packet has been received on a virtual link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-1081 VirtualLinkIsUpdateAuthFailure

Alarm	Attributes	Applicable major releases
Name: VirtualLinkIsUpdateAuthFailure (63) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an IsReq packet on a virtual link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a IsUpdate packet has been received on a virtual link from the network whose authentication key or authentication type conflicts with the local NE's configuration.		

## 39 – Unspecified NE alarms

Table 39-1082 VirtualLinkLsUpdateConfig

Alarm	Attributes	Applicable major releases
Name: VirtualLinkLsUpdateConfig (57) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives an LsUpdate packet on a virtual link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a LsUpdate packet has been received on a virtual link from the network whose configuration parameters conflict with the local NE's configurations.		

Table 39-1083 VirtualLinkNullPacketAuthFailure

Alarm	Attributes	Applicable major releases
Name: VirtualLinkNullPacketAuthFailure (65) Type: authenticationAlarm (14) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: authTypeMismatch (45) Applicable probable causes: <ul style="list-style-type: none"> <li>• authTypeMismatch</li> <li>• authFailure</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a null packet on a virtual link from an NE whose authentication key or authentication type conflicts with the local NE authentication key or authentication type.		
<b>Remedial action:</b> Informational - The alarm signifies that a null packet has been received on a virtual link which authentication key or authentication type conflicts with the local NE's configuration.		

Table 39-1084 VirtualLinkNullPacketConfig

Alarm	Attributes	Applicable major releases
Name: VirtualLinkNullPacketConfig (59) Type: configurationAlarm (11) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: badVersion (35) Applicable probable causes: <ul style="list-style-type: none"> <li>• badVersion</li> <li>• areaMismatch</li> <li>• unknownNbmaNbr</li> <li>• unknownVirtualNbr</li> <li>• netMaskMismatch</li> <li>• helloIntervalMismatch</li> <li>• deadIntervalMismatch</li> <li>• optionMismatch</li> <li>• mtuMismatch</li> <li>• noError</li> <li>• duplicateRouterId</li> <li>• ifAdminDown</li> <li>• ifPassive</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE receives a null packet on a virtual link from an NE whose configuration parameters conflict with the local NE configuration parameters.		
<b>Remedial action:</b> Informational - The alarm signifies that a null packet has been received on a virtual link which configuration parameters conflict with the local NE's configurations.		

Table 39-1085 VirtualLinkRxBadPacket

Alarm	Attributes	Applicable major releases
Name: VirtualLinkRxBadPacket (66) Type: communicationsAlarm (4) Package: ospf Raised on class: ospf.VirtualLink	Severity: warning Implicitly cleared: false Default probable cause: hello (47) Applicable probable causes: <ul style="list-style-type: none"> <li>• hello</li> <li>• dbDescript</li> <li>• lsReq</li> <li>• lsUpdate</li> <li>• lsAck</li> <li>• nullPacket</li> </ul>	Unspecified
<b>Description:</b> The alarm is raised when an NE cannot parse an OSPF packet that it receives on a virtual interface.		
<b>Remedial action:</b> Informational - an NE cannot parse an OSPF packet that it receives on a virtual interface.		

## 39 – Unspecified NE alarms

Table 39-1086 VirtualMachineDown

Alarm	Attributes	Applicable major releases
Name: VirtualMachineDown (4909) Type: vmAlarm (134) Package: dctr Raised on class: dctr.VirtualMachine	Severity: info Implicitly cleared: true Default probable cause: VirtualMachineShutDownOrDeletedOrCrashed (1966)	Unspecified
<b>Description:</b> The alarm is raised when VM is shutdown.		
<b>Remedial action:</b> This alarm can be cleared when virtual machine is up.		

Table 39-1087 VirtualMachineSuspended

Alarm	Attributes	Applicable major releases
Name: VirtualMachineSuspended (4911) Type: vmAlarm (134) Package: dctr Raised on class: dctr.VirtualMachine	Severity: info Implicitly cleared: true Default probable cause: UserInitiatedOrRequiredResourceIdBeingBlocked (1968)	Unspecified
<b>Description:</b> The alarm is raised when VM state changes to Paused on this object.		
<b>Raising condition:</b> (('Virtual Machine State' EQUAL 'Paused'))		
<b>Clearing condition:</b> (('Virtual Machine State' NOT EQUAL 'Paused'))		
<b>Remedial action:</b> This alarm can be cleared when the virtual machine is resumed.		

Table 39-1088 VirtualPortDown

Alarm	Attributes	Applicable major releases
Name: VirtualPortDown (5434) Type: virtualPortAlarm (133) Package: dctr Raised on class: dctr.AbstractVirtualPort	Severity: info Implicitly cleared: true Default probable cause: VirtualPortDownOrDeleted (2135)	Unspecified
<b>Description:</b> The alarm is raised when VP is shutdown.		
<b>Remedial action:</b> This alarm can be cleared when virtual port is up.		

Table 39-1089 VirtualRouterDown

Alarm	Attributes	Applicable major releases
Name: VirtualRouterDown (277) Type: configurationAlarm (11) Package: vrrp Raised on class: vrrp.VrrpVirtualRouter	Severity: major Implicitly cleared: true Default probable cause: virtualRouterDown (210)	Unspecified
<b>Description:</b> The alarm is raised when the aggregated Operational State of a VR is Down.		
<b>Raising condition:</b> (('Aggregated Operational State' EQUAL 'Down'))		
<b>Clearing condition:</b> (('Aggregated Operational State' NOT EQUAL 'Down'))		
<b>Remedial action:</b> Check the configuration of both VRRP instances for the VRRP virtual router.		

Table 39-1090 VirtualSwitchControllerDown

Alarm	Attributes	Applicable major releases
Name: VirtualSwitchControllerDown (4912) Type: virtualSwitchControllerAlarm (135) Package: dctr Raised on class: dctr.VirtualSwitchController	Severity: major Implicitly cleared: true Default probable cause: ControllerNotOperationallyUp (1969)	Unspecified
<b>Description:</b> The alarm is raised when Virtual Switch Controller is not operationally up.		
<b>Raising condition:</b> (('Operational State' EQUAL 'Down'))		
<b>Clearing condition:</b> (('Operational State' EQUAL 'Up'))		
<b>Remedial action:</b> This alarm can be cleared when virtual switch controller is operationally up.		

Table 39-1091 VirtualSwitchDown

Alarm	Attributes	Applicable major releases
Name: VirtualSwitchDown (4913) Type: virtualSwitchAlarm (136) Package: dctr Raised on class: dctr.AbstractVirtualSwitchGlobal	Severity: major Implicitly cleared: true Default probable cause: ControllerDownOrPhysicalPortDownOrInterfaceDown (1970)	Unspecified
<b>Description:</b> The alarm is raised when Openflow session to the virtual switch is lost.		
<b>Remedial action:</b> This alarm can be cleared when virtual switch is operationally up.		

## 39 – Unspecified NE alarms

Table 39-1092 VirtualSwitchIpAddressDuplicated

Alarm	Attributes	Applicable major releases
Name: VirtualSwitchIpAddressDuplicated (5435) Type: virtualSwitchAlarm (136) Package: dctr Raised on class: dctr.AbstractVirtualSwitchGlobal	Severity: critical Implicitly cleared: false Default probable cause: VirtualSwitchIpAddressMisConfiguration (2136)	Unspecified
<b>Description:</b> The alarm is raised when more than one virtual switches in the same domain have the same ip address. Virtual switches that are not belong or have not been associated to any domain are considered to be in 'undefined' domain.		
<b>Remedial action:</b> This might have caused by a network configuration. Please check the status of the Admin Domain and/or the Virtual Switch ip address and controller state. Please make sure the CPAA is managed, Admin Domain is operational, then unmanage the node with duplicate virtual switch ip address and remanage it again. This alarm must be cleared manually.		

Table 39-1093 VirtVpnBGPPrefixConflict

Alarm	Attributes	Applicable major releases
Name: VirtVpnBGPPrefixConflict (5431) Type: virtualPortAlarm (133) Package: dctr Raised on class: dctr.VirtualPort	Severity: major Implicitly cleared: true Default probable cause: DuplicateVswNextHop_VmExistsOnTwoLocations (2132)	Unspecified
<b>Description:</b> The alarm is raised when routes or service context could be stuck in compute or the network.		
<b>Remedial action:</b> Routes or service context could be stuck in compute or the network. Reapply compute or network policies to reset the network attachment.		

Table 39-1094 VirtVpnBGPPrefixUnreachable

Alarm	Attributes	Applicable major releases
Name: VirtVpnBGPPrefixUnreachable (5432) Type: virtualPortAlarm (133) Package: dctr Raised on class: dctr.VirtualPort	Severity: major Implicitly cleared: true Default probable cause: VportCannotBeReachedFromBgpVpn (2133)	Unspecified
<b>Description:</b> The alarm is raised when there is no route for the VPN regardless of routing on the virtual port.		
<b>Remedial action:</b> There is no route for the VPN regardless of routing on the virtual port. This may be an RR/VSC policy issue or internal VSD policy issue; e.g. no route assigned.		

Table 39-1095 VirtVpnBGPPrefixWithdrawnNotReceived

Alarm	Attributes	Applicable major releases
Name: VirtVpnBGPPrefixWithdrawnNotReceived (5433) Type: virtualPortAlarm (133) Package: dctr Raised on class: dctr.VirtualPort	Severity: major Implicitly cleared: true Default probable cause: VportAddressMismatchWithBgpRoute (2134)	Unspecified
<b>Description:</b> The alarm is raised when there is no route on virtual port whereas BGP RIB has a route or routes which do not match.		
<b>Remedial action:</b> There is no route on virtual port whereas BGP RIB has a route or routes which do not match. Check compute and Nuage virtualization policies.		

Table 39-1096 VlanPathModified (mpr)

Alarm	Attributes	Applicable major releases
Name: VlanPathModified (3936) Type: communicationsAlarm (4) Package: mpr Raised on class: mpr.MprVII	Severity: minor Implicitly cleared: true Default probable cause: PathChanged (1519)	Unspecified
<b>Description:</b> The alarm is raised when the radio link between two hops of a VLAN path is down.		
<b>Remedial action:</b> Informational - If VLAN Path changed.alarmRemedialAction.mpr.		

Table 39-1097 VlanPathModified (vlan)

Alarm	Attributes	Applicable major releases
Name: VlanPathModified (3936) Type: communicationsAlarm (4) Package: vlan Raised on class: vlan.Vlan	Severity: minor Implicitly cleared: true Default probable cause: PathChanged (1519)	Unspecified
<b>Description:</b> The alarm is raised when the radio link between two hops of a VLAN path is down.		
<b>Remedial action:</b> Informational - if the VLAN Path Changed.		

## 39 – Unspecified NE alarms

Table 39-1098 VlanSubTypeConflict

Alarm	Attributes	Applicable major releases
Name: VlanSubTypeConflict (227) Type: configurationAlarm (11) Package: vlan Raised on class: vlan.Vlan	Severity: major Implicitly cleared: true Default probable cause: topologyMisconfigured (81)	Unspecified
<b>Description:</b> The alarm is raised when more than one type of VLAN service has the same VLAN ID. The alarm is raised against a service.		
<b>Raising condition:</b> ('vlanSubTypeConflict' EQUAL 'true')		
<b>Clearing condition:</b> ('vlanSubTypeConflict' EQUAL 'false')		
<b>Remedial action:</b> Ensure that the VLAN Subtype of the Site matches the VLAN Subtype of the Service.		

Table 39-1099 VlanUplinkDown

Alarm	Attributes	Applicable major releases
Name: VlanUplinkDown (1146) Type: VlanUplinkAlarm (89) Package: service Raised on class: service.VlanUplink	Severity: major Implicitly cleared: true Default probable cause: VlanUplinkDown (852)	Unspecified
<b>Description:</b> The alarm is raised when a VLAN uplink is operationally down.		
<b>Raising condition:</b> (('Aggregation Operational State' EQUAL 'Partially Down') OR ('Aggregation Operational State' EQUAL 'Down'))		
<b>Clearing condition:</b> (('Aggregation Operational State' NOT EQUAL 'Partially Down') AND ('Aggregation Operational State' NOT EQUAL 'Down'))		
<b>Remedial action:</b> Check the underlying physical link for the SAPs.		

Table 39-1100 VlanUplinkNotCreated

Alarm	Attributes	Applicable major releases
Name: VlanUplinkNotCreated (1147) Type: VlanUplinkAlarm (89) Package: service Raised on class: service.Service	Severity: major Implicitly cleared: true Default probable cause: VlanUplinkNotCreated (853)	Unspecified
<b>Description:</b> The alarm is raised when an expected VLAN uplink does not exist.		
<b>Remedial action:</b> Make sure the two participating ports which hold the uplink SAPs of the service are physically connected and operationally up. And make sure a physical link is created and is operationally up either by enabling LLDP or manually creating a physical link between those ports. If the physical link already exists and operationally up, make sure the uplink SAPs has been created with matching encapsulation values, in case the uplink SAPs has already been created with different encapsulation values, please delete those uplink SAPs and create the uplink SAPs with same encapsulation values.		

Table 39-1101 VoiceChannelLoopback

Alarm	Attributes	Applicable major releases
Name: VoiceChannelLoopback (1148) Type: configurationAlarm (11) Package: tdmequipment Raised on class: tdmequipment.VoiceChannelSpecifics	Severity: warning Implicitly cleared: true Default probable cause: voiceChannelLoopback (854)	Unspecified
<b>Description:</b> The alarm is raised when an NE reports that a voice channel has a loopback alarm condition.		
<b>Remedial action:</b> Informational only.		

Table 39-1102 vPortHostMatchFailure

Alarm	Attributes	Applicable major releases
Name: vPortHostMatchFailure (3628) Type: configurationAlarm (11) Package: equipment Raised on class: equipment.Port	Severity: major Implicitly cleared: false Default probable cause: tPortEgrVPortHostMatchFailure (1413)	Unspecified
<b>Description:</b> The alarm is raised when a host match lookup fails to resolve the egress virtual port.		
<b>Remedial action:</b> This alarm is raised when the subscriber host with an intermediate destination ID that does not match the host-match destination set under the V-port. Modify the intermediate destination ID of the subscriber host to match the host-match defined in the v-port; Or modify the host-match destination ID to match the intermediate destination ID of the subscriber host.		

Table 39-1103 VprnTypeMismatched

Alarm	Attributes	Applicable major releases
Name: VprnTypeMismatched (8149) Type: configurationAlarm (11) Package: vprn Raised on class: vprn.Vprn	Severity: major Implicitly cleared: false Default probable cause: vprnTypeMismatched (2545)	Unspecified
<b>Description:</b> The alarm is raised when the newly created VPRN Site has a VPRN type that is of a different topology from existing VPRN Sites of the service, i.e, mesh vs hub/spoke, or vice versa.		
<b>Remedial action:</b> A configuration error has occurred which should be corrected. The VPRN type of the created site is of a different topology type from the existing VPRN Sites of the service, i.e., mesh and hub/spoke sites shall not be mixed in the same service. The service shall be deleted and re-created with consistent type.		

## 39 – Unspecified NE alarms

Table 39-1104 VSiteServiceImpacted

Alarm	Attributes	Applicable major releases
Name: VSiteServiceImpacted (5430) Type: serviceAlarm (16) Package: dctr Raised on class: dctr.AbstractVirtualSite	Severity: info Implicitly cleared: true Default probable cause: VirtualPortReachability (2131)	Unspecified
<b>Description:</b> The alarm is raised on the VSite object when there is an alarm on VPort that affects service.		
<b>Remedial action:</b> One or more virtual ports are down or have BGP reachability problem such as stuck or unreachable prefix. This alarm can be cleared when the corresponding alarms on virtual ports are cleared.		

Table 39-1105 VwmShelfCardRemoved

Alarm	Attributes	Applicable major releases
Name: VwmShelfCardRemoved (5661) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.VWMCARDSlot	Severity: major Implicitly cleared: true Default probable cause: VwmShelfCardRemoved (2438)	Unspecified
<b>Description:</b> The alarm is raised when a vwm card is removed.		
<b>Remedial action:</b> Informational - a vwm shelf card has been removed from the NE		

Table 39-1106 VwmShelfMismatch

Alarm	Attributes	Applicable major releases
Name: VwmShelfMismatch (4941) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.VwmShelf	Severity: major Implicitly cleared: true Default probable cause: VwmShelfMismatch (2000)	Unspecified
<b>Description:</b> The alarm is raised when the configured vwm shelf id is different than the equipped vwm shelf.		
<b>Remedial action:</b> This alarm is raised when the detected VWM shelf id does not match the provisioned id. Please follow the below steps to clear this alarm: a. Check the id on the rotary dial on the VWM Shelf. b. Use any of the following commands to clear the alarm. c. To change the VWM shelf id("config system vwm-shelf <shelf-id> . d. To delete an existing shelf("config system no vwm-shelf <shelf-id>").		

Table 39-1107 VwmShelfRemoved

Alarm	Attributes	Applicable major releases
Name: VwmShelfRemoved (4942) Type: equipmentAlarm (3) Package: equipment Raised on class: equipment.VwmShelf	Severity: major Implicitly cleared: true Default probable cause: VwmShelfRemoved (2001)	Unspecified
<b>Description:</b> The alarm is raised when a vwm shelf is removed.		
<b>Remedial action:</b> Informational - a vwm shelf has been removed from the NE		

Table 39-1108 WlanGwTuQosProblem

Alarm	Attributes	Applicable major releases
Name: WlanGwTuQosProblem (3915) Type: resourceAlarm (28) Package: wlangw Raised on class: wlangw.IsaMember	Severity: minor Implicitly cleared: true Default probable cause: resourceFull (53)	Unspecified
<b>Description:</b> The alarm is raised when a resource issue occurs while creating a WLAN Gateway tunnel QoS infrastructure instance.		
<b>Remedial action:</b> This may be a temporary phenomenon. If it persists, the QoS configuration or the scaling may have to be modified to ensure enough resources are available for the UE QoS.		

Table 39-1109 WMMPMFileNotificationMissing

Alarm	Attributes	Applicable major releases
Name: WMMPMFileNotificationMissing (5387) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: critical Implicitly cleared: false Default probable cause: PMFileNotificationMissing (2105)	Unspecified
<b>Description:</b> This alarm is raised when a PM File notification is expected from the node, but has not been received after a certain period of time.		
<b>Remedial action:</b> SAM has not received a PM File notification from the node, and may have missed retrieving PM Files. Ensure that the node has PMEnabled and PMFileEvent values set to true. Ensure a PM job is active with an intended schedule. If the problem persists please contact Alcatel-Lucent support for assistance. This alarm notification can be turned off under the General tab in the MME Instance.		

## 39 – Unspecified NE alarms

Table 39-1110 WMMUEOccupiedSlotsExceeded

Alarm	Attributes	Applicable major releases
Name: WMMUEOccupiedSlotsExceeded (5050) Type: communicationsAlarm (4) Package: Itemme Raised on class: Itemme.MmeInstance	Severity: info Implicitly cleared: false Default probable cause: ThresholdExceeded (2052)	Unspecified
<b>Description:</b> The alarm is raised when the number of WMM UE Occupied Slots exceeds the threshold that has been set by the operator.		
<b>Raising condition:</b> (('WMM UE Occupied Slots Threshold' NOT EQUAL '0L') AND ('WMM UE Occupied Slots' > 'WMM UE Occupied Slots Threshold'))		
<b>Remedial action:</b> Informational - no corrective action required.		

Table 39-1111 WppHostAuthenticationFailed

Alarm	Attributes	Applicable major releases
Name: WppHostAuthenticationFailed (3916) Type: processingErrorAlarm (81) Package: wpp Raised on class: wpp.Portal	Severity: major Implicitly cleared: false Default probable cause: portalWppHostAuthenticationFailure (1501)	Unspecified
<b>Description:</b> The alarm is raised when a WPP host cannot be authenticated.		
<b>Remedial action:</b> The recovery action will depend on the exact failure cause as given by the failureReason.		

Table 39-1112 WppPortalUnreachable

Alarm	Attributes	Applicable major releases
Name: WppPortalUnreachable (5421) Type: ProtocolAlarm (1) Package: wpp Raised on class: wpp.Portal	Severity: minor Implicitly cleared: false Default probable cause: protocolDown (1)	Unspecified
<b>Description:</b> This alarm is raised when WPP protocol messages are sent out after a node is restarted but no route to the web portal is available. This notification is sent every minute while the portal remains unreachable up to a certain time. After that, all WPP messages to that portal are dropped.		
<b>Remedial action:</b> Initially no recovery is required as it is expected that the WPP portal can be unreachable for some time after a node restart. When the problem remains, the operator should check the routing table.		

**Table 39-1113 XPICCableLoss**

Alarm	Attributes	Applicable major releases
Name: XPICCableLoss (4851) Type: communicationsAlarm (4) Package: mwa Raised on class: mwa.PortTermination	Severity: variable Implicitly cleared: true Default probable cause: DemodulatorXPICLossOfSignal (1928)	Unspecified
<b>Description:</b> The alarm is raised when a MPT detects a XPIC plug-in cable loss		
<b>Remedial action:</b> Please refer to either 9500 or 7705 Node Maintenance manual for remedial action information.		

39 – *Unspecified NE alarms*
