| Synopsis   | Restore initial profiles after a host has disconnected   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wpp restore-to-initial-on-disconnect</a> <i>boolean</i> |
| Tree       | <a href="#">restore-to-initial-on-disconnect</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**triggered-hosts** *boolean*

|          |                                |
|----------|--------------------------------|
| Synopsis | Enable/disable triggered hosts |
|----------|--------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wpp triggered-hosts</b> <i>boolean</i> |
| Tree       | <a href="#">triggered-hosts</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **user-db** *reference*

|            |  |
|------------|--|
| Synopsis   | User database  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wpp user-db</b> <i>reference</i> |
| Tree       | <a href="#">user-db</a>  |
| Reference  | <b>configure subscriber-mgmt local-user-db</b> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **hold-time**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>hold-time</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>hold-time</b> |
| Tree       | <a href="#">hold-time</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ipv4**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>hold-time</b> <b>ipv4</b> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **down**

|          |                               |
|----------|-------------------------------|
| Synopsis | Enter the <b>down</b> context |
|----------|-------------------------------|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn string subscriber-interface string hold-time ipv4 down</b>   |
| Tree        | <b>down</b>  |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activating the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the <b>init-only</b> command. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **init-only boolean**

|             |  |
|-------------|--|
| Synopsis    | Apply delay only at interface configuration or reboot  |
| Context     | <b>configure service vprn string subscriber-interface string hold-time ipv4 down init-only boolean</b> |
| Tree        | <b>init-only</b>   |
| Description | This command applies a delay only when the IP interface is first configured or after a system reboot.  |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **seconds number**

|            |   |
|------------|---|
| Synopsis   | Down hold time for the IP interface   |
| Context    | <b>configure service vprn string subscriber-interface string hold-time ipv4 down seconds number</b> |
| Tree       | <b>seconds</b>  |
| Range      | 1 to 1200   |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **up**

|          |  |
|----------|--|
| Synopsis | Enter the <b>up</b> context  |
| Context  | <b>configure service vprn string subscriber-interface string hold-time ipv4 up</b> |
| Tree     | <b>up</b>  |

|             |   |
|-------------|---|
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **seconds** *number*

|            |  |
|------------|--|
| Synopsis   | Up hold time for the IP interface  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">hold-time ipv4</a> <b>seconds</b> <i>number</i> |
| Tree       | <a href="#">seconds</a>  |
| Range      | 1 to 1200  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ipv6**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv6</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">hold-time ipv6</a> |
| Tree       | <a href="#">ipv6</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **down**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>down</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">hold-time ipv6</a> <b>down</b>   |
| Tree        | <a href="#">down</a>  |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the <b>init-only</b> command. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**init-only** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Apply delay only at interface configuration or reboot  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>hold-time</b> <b>ipv6</b> <b>down</b> <b>init-only</b> <i>boolean</i> |
| Tree        | <b>init-only</b>   |
| Description | This command applies the delay only when when the IP interface is first configured or after a system reboot.   |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**seconds** *number*

|            |   |
|------------|---|
| Synopsis   | Down hold time for the IP interface   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>hold-time</b> <b>ipv6</b> <b>down</b> <b>seconds</b> <i>number</i> |
| Tree       | <b>seconds</b>  |
| Range      | 1 to 1200   |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**up**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>up</b> context   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>hold-time</b> <b>ipv6</b> <b>up</b>  |
| Tree        | <b>up</b>   |
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**seconds** *number*

|            |  |
|------------|--|
| Synopsis   | Up hold time for the IP interface  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">hold-time ipv6 up</a> <a href="#">seconds</a> <i>number</i> |
| Tree       | <a href="#">seconds</a>  |
| Range      | 1 to 1200  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipoe-linking**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipoe-linking</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipoe-linking</a> |
| Tree       | <a href="#">ipoe-linking</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**gratuitous-router-advertisement** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send unsolicited router advertisement after DHCP setup   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipoe-linking</a> <a href="#">gratuitous-router-advertisement</a> <i>boolean</i> |
| Tree       | <a href="#">gratuitous-router-advertisement</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipoe-session**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipoe-session</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipoe-session</a> |
| Tree       | <a href="#">ipoe-session</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**session-limit** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of sessions on this group interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipoe-session</a> <a href="#">session-limit</a> <i>number</i> |
| Tree       | <a href="#">session-limit</a>   |
| Range      | 1 to 500000   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipv4**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv4</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> |
| Tree       | <a href="#">ipv4</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**address** [[ipv4-address](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>address</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[[ipv4-address](#)]** *string*

|            |   |
|------------|---|
| Synopsis   | IP address associated with the subscriber subnet  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **gateway string**

|            |   |
|------------|---|
| Synopsis   | Gateway IP address within the subnet for SRRP routing   |
| Context    | <b>configure service vprn string subscriber-interface string ipv4 address string gateway string</b> |
| Tree       | <a href="#">gateway</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **holdup-time number**

|            |   |
|------------|---|
| Synopsis   | Wait time before accepting new state attribute  |
| Context    | <b>configure service vprn string subscriber-interface string ipv4 address string holdup-time number</b> |
| Tree       | <a href="#">holdup-time</a>   |
| Range      | 100 to 5000   |
| Units      | milliseconds  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **populate-host-routes boolean**

|            |   |
|------------|---|
| Synopsis   | Populate subscriber host routes in local FIB  |
| Context    | <b>configure service vprn string subscriber-interface string ipv4 address string populate-host-routes boolean</b> |
| Tree       | <a href="#">populate-host-routes</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **prefix-length number**

|          |   |
|----------|---|
| Synopsis | IPv4 address prefix length  |
| Context  | <b>configure service vprn string subscriber-interface string ipv4 address string prefix-length number</b> |
| Tree     | <a href="#">prefix-length</a>   |
| Range    | 0 to 32   |

|            |   |
|------------|---|
| Notes      | This element is mandatory.                              |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **track-srrp** *number*

|            |   |
|------------|---|
| Synopsis   | SRRP instance whose state is tracked on this IP address   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 address</a> <i>string</i> <a href="#">track-srrp number</a> |
| Tree       | <a href="#">track-srrp</a>  |
| Range      | 1 to 4294967295   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **allow-unmatching-subnets** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow subscriber hosts without a matching subnet   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 allow-unmatching-subnets boolean</a> |
| Tree       | <a href="#">allow-unmatching-subnets</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **arp-host**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>arp-host</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 arp-host</a> |
| Tree       | <a href="#">arp-host</a>   |
| Introduced | 16.0.R6  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|          |                                   |
|----------|-----------------------------------|
| Synopsis | Administrative state of ARP hosts |
|----------|-----------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 arp-host admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Introduced | 16.0.R6   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **host-limit** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of ARP hosts   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 arp-host host-limit</b> <i>number</i> |
| Tree       | <a href="#">host-limit</a>  |
| Range      | 1 to 524287   |
| Introduced | 16.0.R6   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **bfd**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>bfd</b> context  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 bfd</b>   |
| Tree        | <a href="#">bfd</a>   |
| Description | Commands in this context configure the attributes of bidirectional forwarding detection (BFD) sessions that control the state of ESM dynamic BGP peers. |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of BFD sessions   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 bfd admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **echo-receive** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum echo interval over this interface  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 bfd echo-receive</b> <i>number</i> |
| Tree       | <b>echo-receive</b>  |
| Range      | 100 to 100000  |
| Units      | milliseconds   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **multiplier** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of consecutive BFD messages missed from the peer   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 bfd multiplier</b> <i>number</i>  |
| Tree        | <b>multiplier</b>   |
| Description | This command configures the number of missed messages before the BFD session state is changed to down and the upper-level protocol is notified of the fault. A multiplier of less than 3 should not be used in production environments. |
| Range       | 1 to 20   |
| Default     | 3   |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **receive** *number*

|             |  |
|-------------|--|
| Synopsis    | BFD receive interval over this interface   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 bfd receive</b> <i>number</i>  |
| Tree        | <b>receive</b>   |
| Description | This command specifies the receive interval for the BFD session.<br>On the 7750 SR, this command can only be configured to a value less than 100 when the <b>type</b> command is configured to <b>cpm-np</b> . |
| Range       | 10 to 100000   |
| Units       | milliseconds   |
| Default     | 100  |
| Introduced  | 21.10.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **transmit-interval** *number*

Synopsis BFD transmit interval over this interface

Context **configure service vprn** *string* **subscriber-interface** *string* **ipv4 bfd transmit-interval** *number*

Tree **transmit-interval**

Description This command configures the transmit intervals.  
On the 7750 SR, this command can only be configured to a value less than 100 when the **type** command is configured to **cpm-np**.

Range 10 to 100000

Units milliseconds

Default 100

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** *keyword*

Synopsis Local termination point for the BFD session

Context **configure service vprn** *string* **subscriber-interface** *string* **ipv4 bfd type** *keyword*

Tree **type**

Description This command sets the local termination point for the BFD session to allow for fast timers down to 10 ms granularity.  
The options to specify where the BFD session runs are:

- **auto** (default) – the system chooses and uses the line card CPU only for single-hop BFD sessions with timer intervals equal to or greater than 100ms. All others are placed on the **cpm-np**.
- **cpm-np** – BFD session runs on the FP complex associated with the CPM. This is either the FP on the CPM or the one elected on smaller systems.
- **fp** – BFD session runs on the line card CPU. This option can only be used for single-hop BFD sessions with timers equal to or greater than 100ms.

Options cpm-np, auto, fp

Default auto

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

**default-dns** *string*

|                |  |
|----------------|--|
| Synopsis       | Default DNS server addresses   |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <b>default-dns</b> <i>string</i> |
| Tree           | <a href="#">default-dns</a>  |
| Max. Instances | 2  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**dhcp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dhcp</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <b>dhcp</b> |
| Tree       | <a href="#">dhcp</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of DHCP  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <b>dhcp</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**client-applications**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>client-applications</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <b>dhcp</b> <b>client-applications</b> |
| Tree       | <a href="#">client-applications</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **dhcp boolean**

|            |   |
|------------|---|
| Synopsis   | Enable IPoE clients to use the DHCP relay or proxy server   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp client-applications</a> <a href="#">dhcp boolean</a> |
| Tree       | <a href="#">dhcp</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ppp boolean**

|            |  |
|------------|--|
| Synopsis   | Enable PPPoE clients to use DHCP relay or proxy server   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp client-applications</a> <a href="#">ppp boolean</a> |
| Tree       | <a href="#">ppp</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **description string**

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **gi-address string**

|          |   |
|----------|---|
| Synopsis | GI address for the DHCP relay   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp gi-address</a> <i>string</i> |
| Tree     | <a href="#">gi-address</a>  |

|             |   |
|-------------|---|
| Description | <p>This command configures the GI address to distinguish between the different subscriber interfaces (and potentially group interfaces) defined when the router functions as a DHCP relay.</p> <p>By default, the GI address used in the relayed DHCP packet is the primary IP address of a normal IES interface. Specifying the GI address allows the user to choose a secondary address. For group interfaces, a GI address must be specified under the group interface DHCP context or subscriber interface DHCP context for DHCP to function.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### lease-populate

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lease-populate</b> context   |
| Context    | <b>configure service vprn string subscriber-interface string ipv4 dhcp lease-populate</b> |
| Tree       | <a href="#">lease-populate</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                   |

### max-leases *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of DHCPv4 leases  |
| Context    | <b>configure service vprn string subscriber-interface string ipv4 dhcp lease-populate max-leases <i>number</i></b> |
| Tree       | <a href="#">max-leases</a>   |
| Range      | 0 to 511999  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### offer-selection

|            |  |
|------------|--|
| Synopsis   | Enter the <b>offer-selection</b> context   |
| Context    | <b>configure service vprn string subscriber-interface string ipv4 dhcp offer-selection</b> |
| Tree       | <a href="#">offer-selection</a>  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

**client-mac**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>client-mac</b> context   |
| Context    | <b>configure service vprn string subscriber-interface string ipv4 dhcp offer-selection client-mac</b> |
| Tree       | <a href="#">client-mac</a>  |
| Notes      | The following elements are part of a choice: <b>client-mac</b> or <b>server</b> .                     |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**discover-delay number**

|             |   |
|-------------|---|
| Synopsis    | Delay before sending DHCP Discover messages   |
| Context     | <b>configure service vprn string subscriber-interface string ipv4 dhcp offer-selection client-mac discover-delay number</b> |
| Tree        | <a href="#">discover-delay</a>  |
| Description | This command configures the time to delay sending DHCP Discover messages from the specified MAC addresses.                  |
| Range       | 1 to 100  |
| Units       | deciseconds   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**mac-address keyword**

|             |   |
|-------------|---|
| Synopsis    | Designated client MAC addresses for Offer selection   |
| Context     | <b>configure service vprn string subscriber-interface string ipv4 dhcp offer-selection client-mac mac-address keyword</b> |
| Tree        | <a href="#">mac-address</a>   |
| Description | This command specifies the client MAC addresses for which the Discover delay applies.                                     |
| Options     | odd, even   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**discover-delay number**

|          |   |
|----------|---|
| Synopsis | Delay before sending DHCP Discover messages |
|----------|---|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp offer-selection discover-delay</b> <i>number</i>  |
| Tree        | <b>discover-delay</b>  |
| Description | This command configures the time to delay sending DHCP Discover messages. The delay is applied to all DHCP Discover messages for which no per DHCP server or per client MAC delay is configured. |
| Range       | 1 to 100   |
| Units       | deciseconds  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **server** [**ipv4-address**] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>server</b> list instance   |
| Context        | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp offer-selection server</b> <i>string</i> |
| Tree           | <b>server</b>   |
| Max. Instances | 8   |
| Notes          | The following elements are part of a choice: <b>client-mac</b> or <b>server</b> .   |
| Introduced     | 20.10.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **[ipv4-address]** *string*

|            |   |
|------------|---|
| Synopsis   | IP address of the DHCP server   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp offer-selection server</b> <i>string</i> |
| Tree       | <b>server</b>   |
| Notes      | This element is part of a list key.   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **discover-delay** *number*

|          |   |
|----------|---|
| Synopsis | Delay before sending DHCP Discover messages |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp offer-selection server</b> <i>string</i> <b>discover-delay</b> <i>number</i> |
| Tree        | <a href="#">discover-delay</a>  |
| Description | This command configures the time to delay DHCP Discover messages sent to the server.  |
| Range       | 1 to 100  |
| Units       | deciseconds   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## option-82

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>option-82</b> context  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp option-82</b>                                      |
| Tree        | <a href="#">option-82</a>   |
| Description | Commands in this context configure the processing required when the router receives a DHCP request that already has an Option 82 field in the packet. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## vendor-specific-option

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>vendor-specific-option</b> context   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp option-82 vendor-specific-option</b> |
| Tree        | <a href="#">vendor-specific-option</a>  |
| Description | Commands in this context configure the Nokia Vendor-Specific Option (VSO) of the DHCP packet.   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## client-mac-address *boolean*

|          |   |
|----------|---|
| Synopsis | Send the MAC address in the VSO   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp option-82 vendor-specific-option client-mac-address</b> <i>boolean</i> |
| Tree     | <a href="#">client-mac-address</a>  |

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**sap-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send SAP ID in the sub-option of the DHCP relay packet   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 vendor-specific-option</a> <b>sap-id</b> <i>boolean</i> |
| Tree       | <a href="#">sap-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**service-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send the service ID in the Vendor Specific Option  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 vendor-specific-option</a> <b>service-id</b> <i>boolean</i> |
| Tree       | <a href="#">service-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**string** *string*

|               |   |
|---------------|---|
| Synopsis      | User-defined ASCII string for the VSO   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 vendor-specific-option</a> <b>string</b> <i>string</i> |
| Tree          | <a href="#">string</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**system-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send the system ID in the VSO  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 vendor-specific-option</a> <a href="#">system-id</a> <i>boolean</i> |
| Tree       | <a href="#">system-id</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**proxy-server**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>proxy-server</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server</a> |
| Tree       | <a href="#">proxy-server</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the DHCP proxy server  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**emulated-server** *string*

|            |   |
|------------|---|
| Synopsis   | IP address used as DHCP server address in SAP context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server emulated-server</a> <i>string</i> |
| Tree       | <a href="#">emulated-server</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## lease-time

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lease-time</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">proxy-server</a> <a href="#">lease-time</a> |
| Tree       | <a href="#">lease-time</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## radius-override *boolean*

|            |   |
|------------|---|
| Synopsis   | Use lease time information provided by RADIUS server  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">proxy-server</a> <a href="#">lease-time</a> <a href="#">radius-override</a> <i>boolean</i> |
| Tree       | <a href="#">radius-override</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## value *number*

|            |  |
|------------|--|
| Synopsis   | DHCP lease time  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">proxy-server</a> <a href="#">lease-time</a> <a href="#">value</a> <i>number</i> |
| Tree       | <a href="#">value</a>  |
| Range      | 300 to 315446399   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## python-policy *reference*

|          |  |
|----------|--|
| Synopsis | Python policy  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">python-policy</a> <a href="#">reference</a> |
| Tree     | <a href="#">python-policy</a>  |

|            |   |
|------------|---|
| Reference  | <b>configure</b> <a href="#">python python-policy</a> <i>string</i> |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR             |

## relay-proxy

|            |  |
|------------|--|
| Synopsis   | Enable the <b>relay-proxy</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp relay-proxy</a> |
| Tree       | <a href="#">relay-proxy</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## release-update-src-ip *boolean*

|            |   |
|------------|---|
| Synopsis   | Update the source IP address of a DHCP RELEASE message  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp relay-proxy release-update-src-ip</a> <i>boolean</i> |
| Tree       | <a href="#">release-update-src-ip</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## siaddr-override *string*

|            |  |
|------------|--|
| Synopsis   | DHCP server IP address for address hiding function   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp relay-proxy siaddr-override</a> <i>string</i> |
| Tree       | <a href="#">siaddr-override</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## release-include-gi-address *boolean*

|          |  |
|----------|--|
| Synopsis | Include the GI address in DHCP relay messages  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp release-include-gi-address</a> <i>boolean</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">release-include-gi-address</a>              |
| Default    | false   |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**server string**

|                |  |
|----------------|--|
| Synopsis       | DHCP server IP addresses   |
| Context        | <b>configure</b> <a href="#">service vprn string subscriber-interface string ipv4 dhcp server string</a> |
| Tree           | <a href="#">server</a>   |
| Max. Instances | 8  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**src-ip-addr keyword**

|            |  |
|------------|--|
| Synopsis   | Type of source address to use for DHCP relay   |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string ipv4 dhcp src-ip-addr keyword</a> |
| Tree       | <a href="#">src-ip-addr</a>  |
| Options    | auto, gi-address   |
| Default    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**virtual-subnet boolean**

|            |   |
|------------|---|
| Synopsis   | Enable a virtual subnet for DHCPv4 hosts  |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string ipv4 dhcp virtual-subnet boolean</a> |
| Tree       | <a href="#">virtual-subnet</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**export-host-routes** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow export of subscriber management host routes   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">export-host-routes</a> <i>boolean</i> |
| Tree       | <a href="#">export-host-routes</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**unnumbered**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>unnumbered</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">unnumbered</a> |
| Tree       | <a href="#">unnumbered</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ip-address** *string*

|            |   |
|------------|---|
| Synopsis   | IP address for the subscriber interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">unnumbered</a> <a href="#">ip-address</a> <i>string</i> |
| Tree       | <a href="#">ip-address</a>  |
| Notes      | The following elements are part of a choice: <b>ip-address</b> or <b>ip-int-name</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ip-int-name** *string*

|               |  |
|---------------|--|
| Synopsis      | Interface name from which an IPv4 address is borrowed  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">unnumbered</a> <a href="#">ip-int-name</a> <i>string</i> |
| Tree          | <a href="#">ip-int-name</a>  |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>ip-address</b> or <b>ip-int-name</b> .   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## ipv6

|            |  |
|------------|--|
| Synopsis   | Enable the <b>ipv6</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <b>ipv6</b> |
| Tree       | <a href="#">ipv6</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## address [[ipv6-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>address</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <b>address</b> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## [[ipv6-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | IPv6 address for the subscriber interface  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <b>address</b> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## host-type *keyword*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Host type for subscriber interface prefixes |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 address</b> <i>string</i> <b>host-type</b> <i>keyword</i> |
| Tree       | <a href="#">host-type</a>   |
| Options    | pd, wan, pd-wan   |
| Default    | pd  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **prefix-length** *number*

|            |  |
|------------|--|
| Synopsis   | IPv6 address prefix length   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 address</b> <i>string</i> <b>prefix-length</b> <i>number</i> |
| Tree       | <a href="#">prefix-length</a>  |
| Range      | 0 to 128   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **allow-multiple-wan-addresses** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow multiple WAN addresses  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 allow-multiple-wan-addresses</b> <i>boolean</i> |
| Tree       | <a href="#">allow-multiple-wan-addresses</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **allow-unmatching-prefixes** *boolean*

|          |  |
|----------|--|
| Synopsis | Allow subscriber hosts without a matching prefix   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 allow-unmatching-prefixes</b> <i>boolean</i> |
| Tree     | <a href="#">allow-unmatching-prefixes</a>  |
| Default  | false  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **bfd**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>bfd</b> context  |
| Context     | <b>configure service vprn string subscriber-interface string ipv6 bfd</b>   |
| Tree        | <b>bfd</b>  |
| Description | Commands in this context configure the attributes of bidirectional forwarding detection (BFD) sessions that control the state of ESM dynamic BGP peers. |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **admin-state keyword**

|            |   |
|------------|---|
| Synopsis   | Administrative state of BFD sessions  |
| Context    | <b>configure service vprn string subscriber-interface string ipv6 bfd admin-state keyword</b> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                       |

## **echo-receive number**

|            |   |
|------------|---|
| Synopsis   | Minimum echo interval over this interface   |
| Context    | <b>configure service vprn string subscriber-interface string ipv6 bfd echo-receive number</b> |
| Tree       | <b>echo-receive</b>   |
| Range      | 100 to 100000   |
| Units      | milliseconds  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                       |

**multiplier number**

|             |   |
|-------------|---|
| Synopsis    | Number of consecutive BFD messages missed from the peer   |
| Context     | <b>configure service vprn</b> <i>string subscriber-interface string ipv6 bfd multiplier number</i>  |
| Tree        | <b>multiplier</b>   |
| Description | This command configures the number of missed messages before the BFD session state is changed to down and the upper-level protocol is notified of the fault. A multiplier of less than 3 should not be used in production environments. |
| Range       | 1 to 20   |
| Default     | 3   |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**receive number**

|             |  |
|-------------|--|
| Synopsis    | BFD receive interval over this interface   |
| Context     | <b>configure service vprn</b> <i>string subscriber-interface string ipv6 bfd receive number</i>  |
| Tree        | <b>receive</b>   |
| Description | This command specifies the receive interval for the BFD session.<br>On the 7750 SR, this command can only be configured to a value less than 100 when the <b>type</b> command is configured to <b>cpm-np</b> . |
| Range       | 10 to 100000   |
| Units       | milliseconds   |
| Default     | 100  |
| Introduced  | 21.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**transmit-interval number**

|             |   |
|-------------|---|
| Synopsis    | BFD transmit interval over this interface   |
| Context     | <b>configure service vprn</b> <i>string subscriber-interface string ipv6 bfd transmit-interval number</i>   |
| Tree        | <b>transmit-interval</b>  |
| Description | This command configures the transmit intervals.<br>On the 7750 SR, this command can only be configured to a value less than 100 when the <b>type</b> command is configured to <b>cpm-np</b> . |
| Range       | 10 to 100000  |

|            |   |
|------------|---|
| Units      | milliseconds  |
| Default    | 100   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **type** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Local termination point for the BFD session   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 bfd type</b> <i>keyword</i>  |
| Tree        | <b>type</b>   |
| Description | This command sets the local termination point for the BFD session to allow for fast timers down to 10 ms granularity.<br>The options to specify where the BFD session runs are: <ul style="list-style-type: none"> <li>• <b>auto</b> (default) – the system chooses and uses the line card CPU only for single-hop BFD sessions with timer intervals equal to or greater than 100ms. All others are placed on the <b>cpm-np</b>.</li> <li>• <b>cpm-np</b> – BFD session runs on the FP complex associated with the CPM. This is either the FP on the CPM or the one elected on smaller systems.</li> <li>• <b>fp</b> – BFD session runs on the line card CPU. This option can only be used for single-hop BFD sessions with timers equal to or greater than 100ms.</li> </ul> |
| Options     | cpm-np, auto, fp  |
| Default     | auto  |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **default-dns** *string*

|                |  |
|----------------|--|
| Synopsis       | Default DNS server addresses   |
| Context        | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 default-dns</b> <i>string</i> |
| Tree           | <b>default-dns</b>   |
| Max. Instances | 2  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**delegated-prefix-length** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | IPv6 delegated prefix length   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 delegated-prefix-length</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">delegated-prefix-length</a>  |
| Range      | 48 to 64   |
| Options    | variable   |
| Default    | 64   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**dhcp6**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dhcp6</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6</a> |
| Tree       | <a href="#">dhcp6</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**override-slaac** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow WAN address offered by DHCP to overwrite the WAN address acquired from SLAAC  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 override-slaac</a> <i>boolean</i> |
| Tree       | <a href="#">override-slaac</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**pd-managed-route**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>pd-managed-route</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 pd-managed-route</a> |
| Tree       | <a href="#">pd-managed-route</a>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **next-hop** *keyword*

Synopsis Next hop type

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [ipv6 dhcp6 pd-managed-route](#) [next-hop](#) *keyword*

Tree [next-hop](#)

Options ipv4, ipv6

Default ipv6

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **proxy-server**

Synopsis Enter the **proxy-server** context

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [ipv6 dhcp6 proxy-server](#)

Tree [proxy-server](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the DHCPv6 proxy server

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [ipv6 dhcp6 proxy-server admin-state](#) *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **client-applications**

Synopsis Enter the **client-applications** context

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 proxy-server client-applications</b> |
| Tree       | <b>client-applications</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **dhcp boolean**

|            |   |
|------------|---|
| Synopsis   | Enable IPoE clients to use DHCP relay or proxy server   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 proxy-server client-applications dhcp boolean</b> |
| Tree       | <b>dhcp</b>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ppp boolean**

|            |  |
|------------|--|
| Synopsis   | Allow PPPoE clients to use DHCP relay functionality  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 proxy-server client-applications ppp boolean</b> |
| Tree       | <b>ppp</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **preferred-lifetime** (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | Time for prefix to remain preferred on this interface  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 proxy-server preferred-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <b>preferred-lifetime</b>  |
| Range    | 300 to 4294967294  |
| Units    | seconds  |
| Options  | infinite   |
| Default  | 3600   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **rebind-timer** *number*

|            |  |
|------------|--|
| Synopsis   | Rebind timer (T2) for this interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <b>rebind-timer</b> <i>number</i> |
| Tree       | <a href="#">rebind-timer</a>   |
| Range      | 0 to 1209600   |
| Units      | seconds  |
| Default    | 2880   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **renew-timer** *number*

|            |   |
|------------|---|
| Synopsis   | Renew timer (T1)  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <b>renew-timer</b> <i>number</i> |
| Tree       | <a href="#">renew-timer</a>   |
| Range      | 0 to 604800   |
| Units      | seconds   |
| Default    | 1800  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **server-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>server-id</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <b>server-id</b> |
| Tree       | <a href="#">server-id</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **duid-en-ascii** *string*

|               |   |
|---------------|---|
| Synopsis      | Vendor-assigned ID based on Enterprise Number (DUID-EN)   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">server-id</a> <b>duid-en-ascii</b> <i>string</i> |
| Tree          | <a href="#">duid-en-ascii</a>   |
| String Length | 1 to 58   |
| Notes         | The following elements are part of a choice: <b>duid-en-ascii</b> , <b>duid-en-hex</b> , or <b>duid-ll</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **duid-en-hex** *string*

|               |   |
|---------------|---|
| Synopsis      | DUID system ID in hexadecimal format  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">server-id</a> <b>duid-en-hex</b> <i>string</i> |
| Tree          | <a href="#">duid-en-hex</a>   |
| String Length | 1 to 118  |
| Notes         | The following elements are part of a choice: <b>duid-en-ascii</b> , <b>duid-en-hex</b> , or <b>duid-ll</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **duid-ll**

|            |   |
|------------|---|
| Synopsis   | Use link-layer address (DUID-LL) as DUID  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">server-id</a> <b>duid-ll</b> |
| Tree       | <a href="#">duid-ll</a>   |
| Notes      | The following elements are part of a choice: <b>duid-en-ascii</b> , <b>duid-en-hex</b> , or <b>duid-ll</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **valid-lifetime** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | Time for prefix to remain valid on this interface |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 proxy-server valid-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">valid-lifetime</a>   |
| Range      | 300 to 4294967294  |
| Units      | seconds  |
| Options    | infinite   |
| Default    | 86400  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **python-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Python policy  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 python-policy</b> <i>reference</i> |
| Tree       | <a href="#">python-policy</a>  |
| Reference  | <b>configure python</b> <a href="#">python-policy</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **relay**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>relay</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 relay</b> |
| Tree       | <a href="#">relay</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of DHCPv6 Relay   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 relay admin-state</b> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>  |
| Options  | enable, disable  |
| Default  | disable  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### advertise-selection

|            |   |
|------------|---|
| Synopsis   | Enter the <b>advertise-selection</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">advertise-selection</a> |
| Tree       | <a href="#">advertise-selection</a>   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### client-mac

|            |  |
|------------|--|
| Synopsis   | Enter the <b>client-mac</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">advertise-selection</a> <a href="#">client-mac</a> |
| Tree       | <a href="#">client-mac</a>   |
| Notes      | The following elements are part of a choice: <b>client-mac</b> or <b>server</b> .  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### mac-address *keyword*

|            |   |
|------------|---|
| Synopsis   | Designated client MAC addresses for Advertise selection   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">advertise-selection</a> <a href="#">client-mac</a> <a href="#">mac-address</a> <i>keyword</i> |
| Tree       | <a href="#">mac-address</a>   |
| Options    | odd, even   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### preference-option

|          |  |
|----------|--|
| Synopsis | Enter the <b>preference-option</b> context |
|----------|--|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection client-mac preference-option</b> |
| Tree        | <a href="#">preference-option</a>  |
| Description | Commands in this context configure the DHCPv6 preference option that is inserted in the DHCPv6 Advertise message.  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **value** *number*

|            |  |
|------------|--|
| Synopsis   | Preference option value for DHCPv6 Advertise messages  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection client-mac preference-option value</b> <i>number</i> |
| Tree       | <a href="#">value</a>  |
| Range      | 0 to 255   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **solicit-delay** *number*

|             |  |
|-------------|--|
| Synopsis    | Delay before sending DHCPv6 Solicit messages   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection client-mac solicit-delay</b> <i>number</i> |
| Tree        | <a href="#">solicit-delay</a>  |
| Description | This command configures the time to delay DHCPv6 Solicit messages sent from the designated client MAC addresses.   |
| Range       | 1 to 100   |
| Units       | deciseconds  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **preference-option**

|          |   |
|----------|---|
| Synopsis | Enter the <b>preference-option</b> context  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection preference-option</b> |
| Tree     | <a href="#">preference-option</a>   |

|             |   |
|-------------|---|
| Description | Commands in this context configure the DHCPv6 preference option that is inserted in the DHCPv6 Advertise message. |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**value number**

|            |   |
|------------|---|
| Synopsis   | Preference option value for DHCPv6 Advertise messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay advertise-selection preference-option value</a> <i>number</i> |
| Tree       | <a href="#">value</a>   |
| Range      | 0 to 255  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**server [ipv6-address] string**

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>server</b> list instance  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay advertise-selection server</a> <i>string</i> |
| Tree           | <a href="#">server</a>   |
| Max. Instances | 8  |
| Notes          | The following elements are part of a choice: <b>client-mac</b> or <b>server</b> .  |
| Introduced     | 20.10.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[ipv6-address] string**

|            |  |
|------------|--|
| Synopsis   | IP address of the DHCPv6 server  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay advertise-selection server</a> <i>string</i> |
| Tree       | <a href="#">server</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## preference-option

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>preference-option</b> context  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection server</b> <i>string</i> <b>preference-option</b> |
| Tree        | <b>preference-option</b>  |
| Description | Commands in this context configure the DHCPv6 preference option that is inserted in the DHCPv6 Advertise message.   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## value *number*

|            |   |
|------------|---|
| Synopsis   | Preference option value for DHCPv6 Advertise messages   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection server</b> <i>string</i> <b>preference-option value</b> <i>number</i> |
| Tree       | <b>value</b>  |
| Range      | 0 to 255  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## solicit-delay *number*

|             |   |
|-------------|---|
| Synopsis    | Delay before sending DHCPv6 Solicit messages  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection server</b> <i>string</i> <b>solicit-delay</b> <i>number</i> |
| Tree        | <b>solicit-delay</b>  |
| Description | This command configures the time to delay DHCPv6 Solicit messages sent to the server.   |
| Range       | 1 to 100  |
| Units       | deciseconds   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**solicit-delay** *number*

|             |  |
|-------------|--|
| Synopsis    | Delay before sending DHCPv6 Solicit messages   |
| Context     | <b>configure</b> <a href="#">service vprn string subscriber-interface string ipv6 dhcp6 relay advertise-selection solicit-delay number</a>   |
| Tree        | <a href="#">solicit-delay</a>  |
| Description | This command configures the time to delay DHCPv6 Solicit messages. The delay is applied to DHCPv6 Solicit messages for which no overriding value is configured in the <b>server</b> instance or the <b>client-mac</b> context. |
| Range       | 1 to 100   |
| Units       | deciseconds  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**client-applications**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>client-applications</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string ipv6 dhcp6 relay client-applications</a> |
| Tree       | <a href="#">client-applications</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**dhcp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable IPoE clients to use DHCP relay or proxy server  |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string ipv6 dhcp6 relay client-applications dhcp boolean</a> |
| Tree       | <a href="#">dhcp</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ppp** *boolean*

|          |   |
|----------|---|
| Synopsis | Allow PPPoE clients to use DHCP relay functionality   |
| Context  | <b>configure</b> <a href="#">service vprn string subscriber-interface string ipv6 dhcp6 relay client-applications ppp boolean</a> |

|            |   |
|------------|---|
| Tree       | <a href="#">ppp</a>                                     |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay</a> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **lease-split**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>lease-split</b> context  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay</a> <a href="#">lease-split</a>   |
| Tree        | <a href="#">lease-split</a>   |
| Description | <p>Commands in this context configure DHCPv6 lease split.</p> <p>DHCPv6 lease split is active when administratively enabled and for all IA_NA and IA_PD options in the transaction, the configured lease split valid lifetime (short lease time) is less than or equal to one of the following:</p> <ul style="list-style-type: none"> <li>• the renew time T1 committed by the server (long renew time)</li> <li>• half of the preferred lifetime committed by the server when T1 committed by the server equals zero</li> </ul> |
| Introduced  | 21.2.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of DHCPv6 lease split   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay</a> <a href="#">lease-split</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>  |
| Options  | enable, disable  |

|            |   |
|------------|---|
| Default    | disable   |
| Introduced | 21.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**valid-lifetime** *number*

|            |  |
|------------|--|
| Synopsis   | DHCPv6 lease split valid lifetime (short lease time)   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay lease-split</a> <a href="#">valid-lifetime</a> <i>number</i> |
| Tree       | <a href="#">valid-lifetime</a>   |
| Range      | 300 to 315446399   |
| Units      | seconds  |
| Default    | 3600   |
| Introduced | 21.2.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**link-address** *string*

|            |  |
|------------|--|
| Synopsis   | Link address for the DHCPv6 relay messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay link-address</a> <i>string</i> |
| Tree       | <a href="#">link-address</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**server** *string*

|                |  |
|----------------|--|
| Synopsis       | DHCP6 server(s) to which the DHCP6 requests are forwarded  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay server</a> <i>string</i> |
| Tree           | <a href="#">server</a>   |
| Max. Instances | 8  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### source-address *string*

|            |  |
|------------|--|
| Synopsis   | Source IPv6 address for the DHCPv6 relay messages  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay source-address</a> <i>string</i> |
| Tree       | <a href="#">source-address</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### ipoe-bridged-mode *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable IPv6 IPoE bridged mode  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 ipoe-bridged-mode</a> <i>boolean</i> |
| Tree       | <a href="#">ipoe-bridged-mode</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### link-local-address

|            |  |
|------------|--|
| Synopsis   | Enter the <b>link-local-address</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 link-local-address</a> |
| Tree       | <a href="#">link-local-address</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### address *string*

|            |   |
|------------|---|
| Synopsis   | IPv6 link local address   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 link-local-address</a> <i>address</i> <i>string</i> |
| Tree       | <a href="#">address</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**prefix** [ipv6-prefix] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>prefix</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 prefix</a> <i>string</i> |
| Tree       | <a href="#">prefix</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[ipv6-prefix]** *string*

|            |  |
|------------|--|
| Synopsis   | IPv6 address for a router interface  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 prefix</a> <i>string</i> |
| Tree       | <a href="#">prefix</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**holdup-time** *number*

|            |   |
|------------|---|
| Synopsis   | Time to wait before route accepts new state attribute   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 prefix</a> <i>string</i> <b>holdup-time</b> <i>number</i> |
| Tree       | <a href="#">holdup-time</a>   |
| Range      | 100 to 5000   |
| Units      | milliseconds  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**host-type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Host type for subscriber interface prefixes |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 prefix</b> <i>string</i> <b>host-type</b> <i>keyword</i> |
| Tree       | <a href="#">host-type</a>  |
| Options    | pd, wan, pd-wan  |
| Default    | pd   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **track-srrp** *number*

|            |  |
|------------|--|
| Synopsis   | SRRP instance whose state is tracked on this IP address  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 prefix</b> <i>string</i> <b>track-srrp</b> <i>number</i> |
| Tree       | <a href="#">track-srrp</a>   |
| Range      | 1 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **router-advertisements**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>router-advertisements</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6</b> <b>router-advertisements</b> |
| Tree       | <a href="#">router-advertisements</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of router advertisements  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6</b> <b>router-advertisements</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**force-mcast** *keyword*

|            |   |
|------------|---|
| Synopsis   | Protocol with forced multicast  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <b>force-mcast</b> <i>keyword</i> |
| Tree       | <a href="#">force-mcast</a>   |
| Options    | ip, ip-mac  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**max-advertisement-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum advertisement interval  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <b>max-advertisement-interval</b> <i>number</i> |
| Tree       | <a href="#">max-advertisement-interval</a>  |
| Range      | 900 to 1800   |
| Units      | seconds   |
| Default    | 1800  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**min-advertisement-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum advertisement interval  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <b>min-advertisement-interval</b> <i>number</i> |
| Tree       | <a href="#">min-advertisement-interval</a>  |
| Range      | 900 to 1350   |
| Units      | seconds   |
| Default    | 900   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## options

|            |   |
|------------|---|
| Synopsis   | Enter the <b>options</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements options</b> |
| Tree       | <b>options</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## current-hop-limit *number*

|            |   |
|------------|---|
| Synopsis   | Hop limit to be advertised  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements options current-hop-limit</b> <i>number</i> |
| Tree       | <b>current-hop-limit</b>  |
| Range      | 0 to 255  |
| Default    | 64  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## dns

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dns</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements options dns</b> |
| Tree       | <b>dns</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## include-rdnss *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the RDNSS server option 25   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements options dns include-rdnss</b> <i>boolean</i> |
| Tree       | <b>include-rdnss</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rdnss-lifetime** (*number* | *keyword*)

Synopsis Maximum time for the RDNSS address to remain valid

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [ipv6](#) [router-advertisements](#) [options dns rdnss-lifetime](#) (*number* | *keyword*)

Tree [rdnss-lifetime](#)

Range 900 to 3600

Units seconds

Options infinite

Default 3600

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **managed-configuration** *boolean*

Synopsis Managed address configuration flag

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [ipv6](#) [router-advertisements](#) [options managed-configuration](#) *boolean*

Tree [managed-configuration](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mtu** (*number* | *keyword*)

Synopsis Advertised MTU value

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [ipv6](#) [router-advertisements](#) [options mtu](#) (*number* | *keyword*)

Tree [mtu](#)

Range 1280 to 9212

Units bytes

Options not-included

Default not-included

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **other-stateful-configuration** *boolean*

Synopsis Other stateful configuration flag

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [ipv6](#) [router-advertisements](#) [options other-stateful-configuration](#) *boolean*

Tree [other-stateful-configuration](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **reachable-time** *number*

Synopsis Reachable time for advertisements

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [ipv6](#) [router-advertisements](#) [options reachable-time](#) *number*

Tree [reachable-time](#)

Range 0 to 3600000

Units milliseconds

Default 0

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **retransmit-timer** *number*

Synopsis Retransmit time in router advertisements from interface

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [ipv6](#) [router-advertisements](#) [options retransmit-timer](#) *number*

Tree [retransmit-timer](#)

Range 0 to 1800000

Units seconds

Default 0

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**router-lifetime** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Router lifetime  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <a href="#">options router-lifetime</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">router-lifetime</a>  |
| Range      | 2700 to 9000   |
| Units      | seconds  |
| Options    | no-default-router  |
| Default    | 4500   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**prefix-options**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>prefix-options</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <a href="#">prefix-options</a> |
| Tree       | <a href="#">prefix-options</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**autonomous** *boolean*

|            |  |
|------------|--|
| Synopsis   | Value of the autonomous flag   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <a href="#">prefix-options</a> <a href="#">autonomous</a> <i>boolean</i> |
| Tree       | <a href="#">autonomous</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**on-link** *boolean*

|          |   |
|----------|---|
| Synopsis | Assign the prefix to an interface on the specified link |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements</b><br><b>prefix-options on-link</b> <i>boolean</i> |
| Tree       | <b>on-link</b>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **preferred-lifetime** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Time for a prefix to remain preferred  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements</b><br><b>prefix-options preferred-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>preferred-lifetime</b>  |
| Range      | 0 to 4294967294  |
| Units      | seconds  |
| Options    | infinite   |
| Default    | 3600   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **valid-lifetime** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Time for a prefix to remain valid  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements</b><br><b>prefix-options valid-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>valid-lifetime</b>  |
| Range      | 0 to 4294967294  |
| Units      | seconds  |
| Options    | infinite   |
| Default    | 86400  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **router-solicit**

|          |   |
|----------|---|
| Synopsis | Enter the <b>router-solicit</b> context |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-solicit</b> |
| Tree       | <a href="#">router-solicit</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **inactivity-timer** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Time before an inactive host is removed  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-solicit inactivity-timer</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">inactivity-timer</a>   |
| Range      | 1 to 31536000  |
| Units      | seconds  |
| Options    | infinite   |
| Default    | 300  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **local-address-assignment**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>local-address-assignment</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>local-address-assignment</b> |
| Tree       | <a href="#">local-address-assignment</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of Local Address Assignment   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>local-address-assignment admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4

Synopsis Enter the **ipv4** context

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [local-address-assignment](#) [ipv4](#)

Tree [ipv4](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## client-applications

Synopsis Enter the **client-applications** context

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [local-address-assignment](#) [ipv4](#)  
[client-applications](#)

Tree [client-applications](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ppp *boolean*

Synopsis Request local addresses for PPP IPCP hosts

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [local-address-assignment](#) [ipv4](#)  
[client-applications](#) [ppp](#) *boolean*

Tree [ppp](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## default-pool *string*

Synopsis Default pools

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [local-address-assignment](#) [ipv4](#)  
[default-pool](#) *string*

Tree [default-pool](#)

String Length 1 to 32

|                |   |
|----------------|---|
| Max. Instances | 2   |
| Notes          | This element is ordered by the user.                    |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **server reference**

|            |   |
|------------|---|
| Synopsis   | Local DHCPv4 server for local pools management  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">local-address-assignment ipv4 server reference</a> |
| Tree       | <a href="#">server</a>  |
| Reference  | <b>configure</b> <a href="#">service vprn string</a> <a href="#">dhcp-server dhcpv4 string</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipv6**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv6</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">local-address-assignment ipv6</a> |
| Tree       | <a href="#">ipv6</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **client-applications**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>client-applications</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">local-address-assignment ipv6 client-applications</a> |
| Tree       | <a href="#">client-applications</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ipoe-slaac boolean**

|          |  |
|----------|--|
| Synopsis | Request local addresses for IPoE SLAAC hosts |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>local-address-assignment ipv6 client-applications ipoe-slaac</b> <i>boolean</i> |
| Tree       | <a href="#">ipoe-slaac</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ipoe-wan** *boolean*

|            |  |
|------------|--|
| Synopsis   | Request local addresses for IPoE IA NA hosts   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>local-address-assignment ipv6 client-applications ipoe-wan</b> <i>boolean</i> |
| Tree       | <a href="#">ipoe-wan</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ppp-slaac** *boolean*

|            |   |
|------------|---|
| Synopsis   | Request local addresses for PPP SLAAC hosts   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>local-address-assignment ipv6 client-applications ppp-slaac</b> <i>boolean</i> |
| Tree       | <a href="#">ppp-slaac</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **server** *reference*

|            |  |
|------------|--|
| Synopsis   | Local DHCPv6 server for local pools management   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>local-address-assignment ipv6 server</b> <i>reference</i> |
| Tree       | <a href="#">server</a>   |
| Reference  | <b>configure service vprn</b> <i>string</i> <b>dhcp-server dhcpv6</b> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**pppoe**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>pppoe</b> context   |
| Context    | <b>configure service vprn string subscriber-interface string pppoe</b> |
| Tree       | <b>pppoe</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                |

**description string**

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure service vprn string subscriber-interface string pppoe description string</b> |
| Tree          | <b>description</b>  |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                   |

**session-limit number**

|            |   |
|------------|---|
| Synopsis   | Maximum PPPoE sessions  |
| Context    | <b>configure service vprn string subscriber-interface string pppoe session-limit number</b> |
| Tree       | <b>session-limit</b>  |
| Range      | 1 to 333823   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                     |

**private-retail-subnets boolean****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Export subnets to the forwarding service  |
| Context  | <b>configure service vprn string subscriber-interface string private-retail-subnets boolean</b> |
| Tree     | <b>private-retail-subnets</b>   |

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### wan-mode *keyword*

#### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Mode of operation for hosts with /128 WAN IPv6 address  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <b>wan-mode</b> <i>keyword</i> |
| Tree       | <a href="#">wan-mode</a>  |
| Options    | mode64, mode128   |
| Default    | mode64  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### wlan-gw

|            |   |
|------------|---|
| Synopsis   | Enable the <b>wlan-gw</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <b>wlan-gw</b> |
| Tree       | <a href="#">wlan-gw</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### pool-manager

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pool-manager</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <b>wlan-gw</b> <b>pool-manager</b> |
| Tree       | <a href="#">pool-manager</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## dhcp6-client

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dhcp6-client</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client</a> |
| Tree       | <a href="#">dhcp6-client</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## dhcpv4-nat

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dhcpv4-nat</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client dhcpv4-nat</a> |
| Tree       | <a href="#">dhcpv4-nat</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the DHCPv6 client entity   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client dhcpv4-nat admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## link-address *string*

|            |  |
|------------|--|
| Synopsis   | IPv6 address in the link address field of relay header   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client dhcpv4-nat link-address</a> <i>string</i> |
| Tree       | <a href="#">link-address</a>   |
| Default    | ::   |
| Introduced | 16.0.R4  |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **pool-name** *string*

Synopsis Pool name to be sent in the DHCPv6 messages

Context **configure service vprn** *string* **subscriber-interface** *string* **wlan-gw pool-manager dhcp6-client dhcpv4-nat pool-name** *string*

Tree [pool-name](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ia-na**

Synopsis Enter the **ia-na** context

Context **configure service vprn** *string* **subscriber-interface** *string* **wlan-gw pool-manager dhcp6-client ia-na**

Tree [ia-na](#)

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the DHCPv6 client entity

Context **configure service vprn** *string* **subscriber-interface** *string* **wlan-gw pool-manager dhcp6-client ia-na admin-state** *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **link-address** *string*

Synopsis IPv6 address in the link address field of relay header

Context **configure service vprn** *string* **subscriber-interface** *string* **wlan-gw pool-manager dhcp6-client ia-na link-address** *string*

---

|            |                                    |
|------------|------------------------------------|
| Tree       | <a href="#">link-address</a>       |
| Default    | ::                                 |
| Introduced | 16.0.R4                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **pool-name** *string*

|               |  |
|---------------|--|
| Synopsis      | Pool name to be sent in the DHCPv6 messages  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client ia-na</a> <a href="#">pool-name</a> <i>string</i> |
| Tree          | <a href="#">pool-name</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **lease-query**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>lease-query</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client</a> <a href="#">lease-query</a> |
| Tree       | <a href="#">lease-query</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **max-retries** *number*

|            |  |
|------------|--|
| Synopsis   | Retries before lease query assumes no allocated subnets  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client lease-query</a> <a href="#">max-retries</a> <i>number</i> |
| Tree       | <a href="#">max-retries</a>  |
| Range      | 0 to 10  |
| Default    | 2  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**servers** *string*

|                |  |
|----------------|--|
| Synopsis       | DHCPv6 servers that are used for requesting addresses  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client</a> <a href="#">servers</a> <i>string</i> |
| Tree           | <a href="#">servers</a>  |
| Max. Instances | 8  |
| Introduced     | 16.0.R1  |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**slaac**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>slaac</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client</a> <a href="#">slaac</a> |
| Tree       | <a href="#">slaac</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the DHCPv6 client entity  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client</a> <a href="#">slaac</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**link-address** *string*

|          |   |
|----------|---|
| Synopsis | IPv6 address in the link address field of relay header  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager dhcp6-client</a> <a href="#">slaac</a> <a href="#">link-address</a> <i>string</i> |
| Tree     | <a href="#">link-address</a>  |

|            |                                    |
|------------|------------------------------------|
| Default    | ::                                 |
| Introduced | 16.0.R4                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **pool-name** *string*

|               |   |
|---------------|---|
| Synopsis      | Pool name to be sent in the DHCPv6 messages   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">pool-manager</a> <a href="#">dhcp6-client</a> <a href="#">slaac</a> <b>pool-name</b> <i>string</i> |
| Tree          | <a href="#">pool-name</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **source-ip** (*keyword* | *ipv6-address*)

|            |  |
|------------|--|
| Synopsis   | Source IP address that is used by the DHCPv6 client  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">pool-manager</a> <a href="#">dhcp6-client</a> <b>source-ip</b> ( <i>keyword</i>   <i>ipv6-address</i> ) |
| Tree       | <a href="#">source-ip</a>  |
| Options    | use-interface-ip   |
| Default    | use-interface-ip   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **watermarks**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>watermarks</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">pool-manager</a> <b>watermarks</b> |
| Tree       | <a href="#">watermarks</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## high number

|            |   |
|------------|---|
| Synopsis   | High watermark when new prefix is allocated   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager watermarks</a> <a href="#">high</a> <i>number</i> |
| Tree       | <a href="#">high</a>  |
| Range      | 51 to 99  |
| Default    | 95  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## low number

|            |  |
|------------|--|
| Synopsis   | Low watermark when unused prefix is released   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager watermarks</a> <a href="#">low</a> <i>number</i> |
| Tree       | <a href="#">low</a>  |
| Range      | 50 to 98   |
| Default    | 90   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## wlan-gw-group reference

|            |   |
|------------|---|
| Synopsis   | ID of WLAN gateway group where prefixes are installed   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw pool-manager wlan-gw-group</a> <a href="#">reference</a> |
| Tree       | <a href="#">wlan-gw-group</a>   |
| Reference  | <b>configure</b> <a href="#">isa wlan-gw-group</a> <i>number</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## redundancy

|          |   |
|----------|---|
| Synopsis | Enter the <b>redundancy</b> context   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">redundancy</a> |
| Tree     | <a href="#">redundancy</a>  |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of WLAN-GW redundancy  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw redundancy</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **export** *string*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Route to export to peer   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw redundancy</a> <b>export</b> <i>string</i> |
| Tree       | <a href="#">export</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **monitor** *string*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Peer route to monitor  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw redundancy</a> <b>monitor</b> <i>string</i> |
| Tree       | <a href="#">monitor</a>  |
| Introduced | 16.0.R1  |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## subscriber-mgmt

Synopsis Enter the **subscriber-mgmt** context

Context **configure service vprn string subscriber-mgmt**

Tree [subscriber-mgmt](#)

Introduced 22.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## multi-chassis-shunt-id *number*

Synopsis Shunt ID for a pair of resilient nodes

Context **configure service vprn string subscriber-mgmt multi-chassis-shunt-id *number***

Tree [multi-chassis-shunt-id](#)

Description This command configures the shunt ID that is used to shunt downstream traffic from a standby node to an active node. Because this ID identifies the traffic service on the standby node, the same ID must be configured per service on each node.

This configuration is required for BNG CUPS inter-UPF resiliency shunting, but not for non-BNG CUPS shunting. However, when configured, it is also used for shunting non-BNG CUPS sessions in the same service.

Range 1 to 8191

Introduced 22.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## up-resiliency

Synopsis Enter the **up-resiliency** context

Context **configure service vprn string subscriber-mgmt up-resiliency**

Tree [up-resiliency](#)

Introduced 22.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## monitor-oper-group [[oper-group](#)] *reference*

Synopsis Enter the **monitor-oper-group** list instance

|                |   |
|----------------|---|
| Context        | <b>configure service vprn</b> <i>string</i> <b>subscriber-mgmt up-resiliency monitor-oper-group</b> <i>reference</i>  |
| Tree           | <a href="#">monitor-oper-group</a>  |
| Description    | Commands in this context define parameters to derive the service health based on monitored operational groups. The BNG UPF sends the health value to the BNG CPF. The BNG CPF uses the value to determine the need for a BNG UPF status change (active or standby).<br><b>Note:</b><br>The following is only applicable for the <b>configure service vpls capture-sap</b> context. If the configured groups are not the same for all capture SAPs sharing the same underlying port or LAG, the configuration of a Layer 2 access ID alias is required, or else the system chooses arbitrarily one set of configured groups. |
| Max. Instances | 4   |
| Introduced     | 22.2.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[oper-group]** *reference*

|            |  |
|------------|--|
| Synopsis   | Operational group name   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-mgmt up-resiliency monitor-oper-group</b> <i>reference</i> |
| Tree       | <a href="#">monitor-oper-group</a>   |
| Reference  | <b>configure service oper-group</b> <i>string</i>  |
| Notes      | This element is part of a list key.  |
| Introduced | 22.2.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**health-drop** *number*

|             |   |
|-------------|---|
| Synopsis    | Number subtracted from the health value per failure   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-mgmt up-resiliency monitor-oper-group</b> <i>reference</i> <b>health-drop</b> <i>number</i>   |
| Tree        | <a href="#">health-drop</a>   |
| Description | This command configures the drop in the health value for every operational group member failure. Every failure of an operational group member decreases the base health value to a possible minimum of 0. |
| Range       | 1 to 255  |

|            |   |
|------------|---|
| Default    | 1   |
| Introduced | 22.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## ttl-propagate

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ttl-propagate</b> context             |
| Context    | <b>configure service vprn string ttl-propagate</b> |
| Tree       | <b>ttl-propagate</b>                               |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## local keyword

|             |  |
|-------------|--|
| Synopsis    | Local TTL propagation control for the VPRN   |
| Context     | <b>configure service vprn string ttl-propagate local keyword</b>   |
| Tree        | <b>local</b>   |
| Description | This command specifies the local TTL propagation control for the VPRN and overrides the global configuration of the TTL propagation for locally generated packets that are forwarded over MPLS LSPs in a given VPRN service context. |
| Options     | none, all, vc-only, use-base   |
| Default     | use-base   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## transit keyword

|             |  |
|-------------|--|
| Synopsis    | Transit TTL propagation control for the VPRN   |
| Context     | <b>configure service vprn string ttl-propagate transit keyword</b>   |
| Tree        | <b>transit</b>   |
| Description | This command overrides the global configuration of the TTL propagation for in transit packets that are forwarded over MPLS LSPs in a given VPRN service context. |
| Options     | none, all, vc-only, use-base   |
| Default     | use-base   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## twamp-light

|            |  |
|------------|--|
| Synopsis   | Enter the <b>twamp-light</b> context                         |
| Context    | <b>configure service vprn string twamp-light</b>             |
| Tree       | <a href="#">twamp-light</a>                                  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## reflector

|            |  |
|------------|--|
| Synopsis   | Enable the <b>reflector</b> context                          |
| Context    | <b>configure service vprn string twamp-light reflector</b>   |
| Tree       | <a href="#">reflector</a>                                    |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of TWAMP Light functionality                              |
| Context    | <b>configure service vprn string twamp-light reflector admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                   |

## allow-ipv6-udp-checksum-zero *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Process IPv6 packets with a zero UDP checksum   |
| Context  | <b>configure service vprn string twamp-light reflector allow-ipv6-udp-checksum-zero boolean</b> |
| Tree     | <a href="#">allow-ipv6-udp-checksum-zero</a>  |

|             |   |
|-------------|---|
| Description | When configured to <b>true</b> , this command allows the processing of IPv6 packets that arrive with a UDP checksum of zero. The destination UDP ports that are registered as TWAMP Test packets as part of this template allow this behavior.<br><br>When configured to <b>false</b> , IPv6 packets that arrive with a UDP checksum of zero are discarded. |
| Default     | false   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**type keyword**

|             |   |
|-------------|---|
| Synopsis    | Processing behavior type for the reflector  |
| Context     | <b>configure service vprn string twamp-light reflector type keyword</b>   |
| Tree        | <b>type</b>   |
| Description | <p>This command configures the processing behavior of the TWAMP Light reflector. When the value is <b>twamp-light</b> the reflector does not check the received PDU as a traditional base TWAMP Light packet without TLV processing. When the value is <b>stamp</b>, the reflector attempts to find and process supported STAMP TLVs that follow the base STAMP packet.</p> <p>In mixed environments where different types of Session-Senders may be targeting a common TWAMP Light reflector, set the value to <b>stamp</b>. When the reflector is operating in <b>stamp</b> mode, the primary parsing is based on STAMP, checking and processing known TLVs, or determining if the arriving PDU is a TWAMP Light PDU. A Session-Sender launching a TWAMP Light-based packet must use all zeros padding pattern when the pad size is non zero.</p> |
| Options     | stamp, twamp-light  |
| Default     | twamp-light   |
| Introduced  | 22.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

|------------|--|
| Synopsis   | Administrative state of mobility triggered accounting  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">wlan-gw mobility-triggered-accounting</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R4  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**hold-down** *number*

|          |   |
|----------|---|
| Synopsis | Hold additional mobility-triggered update until this timer expires  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">wlan-gw mobility-triggered-accounting</a> <a href="#">hold-down</a> <i>number</i> |
| Tree     | <a href="#">hold-down</a>   |
| Range    | 60 to 86400   |
| Units    | seconds   |

Introduced 16.0.R4  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **include-counters** *boolean*

Synopsis Include counters in interim updates  
Context **configure service vprn string wlan-gw mobility-triggered-accounting include-counters boolean**  
Tree [include-counters](#)  
Default false  
Introduced 16.0.R4  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **xconnect**

Synopsis Enter the **xconnect** context  
Context **configure service vprn string wlan-gw xconnect**  
Tree [xconnect](#)  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the WLAN-GW cross-connect  
Context **configure service vprn string wlan-gw xconnect admin-state keyword**  
Tree [admin-state](#)  
Options enable, disable  
Default disable  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**tunnel-source-ip** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | IPv6 address and prefix for the tunnel source   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">wlan-gw xconnect</a> <a href="#">tunnel-source-ip</a> <i>string</i> |
| Tree       | <a href="#">tunnel-source-ip</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**wlan-gw-group** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | ISA WLAN-GW Group   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">wlan-gw xconnect</a> <a href="#">wlan-gw-group</a> <i>reference</i> |
| Tree       | <a href="#">wlan-gw-group</a>   |
| Reference  | <b>configure</b> <a href="#">isa</a> <a href="#">wlan-gw-group</a> <i>number</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**wpp**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>wpp</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">wpp</a> |
| Tree       | <a href="#">wpp</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                         |

**admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of WPP  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">wpp</a> <a href="#">admin-state</a> <i>keyword</i> |

|            |   |

| Tree       | <a href="#">admin-state</a>                             |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**portal** [[name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>portal</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">wpp portal</a> <i>string</i> |
| Tree       | <a href="#">portal</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Web portal name  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">wpp portal</a> <i>string</i> |
| Tree          | <a href="#">portal</a>   |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ack-auth-retry-count** *number*

|            |  |
|------------|--|
| Synopsis   | Number of retransmissions of an ACK_OUT message  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">wpp portal</a> <i>string</i> <b>ack-auth-retry-count</b> <i>number</i> |
| Tree       | <a href="#">ack-auth-retry-count</a>   |
| Range      | 0 to 5   |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | WPP portal address  |
| Context    | <b>configure service vprn</b> <i>string wpp portal string address</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">address</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the WPP portal server                                     |
| Context    | <b>configure service vprn</b> <i>string wpp portal string admin-state keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                           |

**ntf-logout-retry-count** *number*

|            |   |
|------------|---|
| Synopsis   | Number of retransmissions of an NTF_LOGOUT message  |
| Context    | <b>configure service vprn</b> <i>string wpp portal string ntf-logout-retry-count number</i> |
| Tree       | <a href="#">ntf-logout-retry-count</a>  |
| Range      | 0 to 5  |
| Default    | 5   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                     |

**port-format** *keyword*

|          |   |
|----------|---|
| Synopsis | Format of the port in the ACK_INO message |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string wpp portal string port-format keyword</i> |
| Tree       | <b>port-format</b>  |
| Options    | standard, vendor-specific   |
| Default    | standard  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                           |

### **retry-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time between two consecutive retransmissions  |
| Context    | <b>configure service vprn</b> <i>string wpp portal string retry-interval number</i> |
| Tree       | <b>retry-interval</b>   |
| Range      | 10 to 2000  |
| Units      | milliseconds  |
| Default    | 2000  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                             |

### **secret** *string*

|               |   |
|---------------|---|
| Synopsis      | Message authentication between portal and BRAS by applying the secret used by WPPv2 |
| Context       | <b>configure service vprn</b> <i>string wpp portal string secret string</i>         |
| Tree          | <b>secret</b>   |
| String Length | 1 to 115  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                             |

### **version** *number*

|          |  |
|----------|--|
| Synopsis | Protocol version to be expected by the WPP portal                            |
| Context  | <b>configure service vprn</b> <i>string wpp portal string version number</i> |
| Tree     | <b>version</b>   |
| Range    | 1   2  |
| Default  | 1  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## 3.44 sfm commands

```
configure
- sfm number
- admin-state keyword
- apply-groups reference
- apply-groups-exclude reference
- sfm-type keyword
```

### 3.44.1 sfm command descriptions

#### **sfm** [**sfm-slot**] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sfm</b> list instance   |
| Context    | <b>configure sfm number</b>  |
| Tree       | <b>sfm</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS |

#### **[sfm-slot]** *number*

|            |  |
|------------|--|
| Synopsis   | Unique value to identify this SFM slot within a chassis in the system                  |
| Context    | <b>configure sfm number</b>  |
| Tree       | <b>sfm</b>   |
| Range      | 1 to 16  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS |

#### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of SFM  |
| Context    | <b>configure sfm number admin-state keyword</b>  |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS |

## **sfm-type** keyword

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Provision the SFM type   |
| Context    | <b>configure</b> <i>sfm number sfm-type keyword</i>  |
| Tree       | <a href="#">sfm-type</a>   |
| Options    | sfm-x20, sfm-x20-b, m-sfm5-7, m-sfm5-12, m-sfm5-12e, sfm-x20s-b, sfm-ixr-6, sfm-ixr-10, sfm-s, m-sfm6-12e, sfm2-x20s, sfm-2s, m-sfm6-7/12, sfm-2se, sfm2-s |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

## 3.45 subscriber-mgmt commands

```

configure

### 3.45.1 subscriber-mgmt command descriptions

#### subscriber-mgmt

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>subscriber-mgmt</b> context   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a>   |
| Tree        | <a href="#">subscriber-mgmt</a>  |
| Description | Commands in this context configure subscriber management attributes, policies, and profiles. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                      |

#### accu-stats-policy [[name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>accu-stats-policy</b> list instance  |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">accu-stats-policy</a> <i>string</i>  |
| Tree           | <a href="#">accu-stats-policy</a>   |
| Description    | <p>Commands in this context configure a storage policy for cumulative statistics for subscribers.</p> <p>The policy defines the direction for the policer or the queue to be stored.</p> <p>The policy stores subscriber statistics even if the subscriber session has ended. The subscriber statistics can be viewed even if the subscriber is offline.</p> <p>When the subscriber session ends, the statistics are added to the past statistics stored in memory so that all previous session statistics are accumulated. The accumulated statistics are not persistent; they are only stored in memory and reset to zero when the chassis reboots.</p> |
| Max. Instances | 32  |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

| Context    | <b>configure subscriber-mgmt accu-stats-policy</b> <i>string ingress keyword id number</i> |
| Tree       | <a href="#">ingress</a>  |
| Options    | queue, policer   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

**id number**

|          |  |
|----------|--|
| Synopsis | Queue or policer ID  |
| Context  | <b>configure subscriber-mgmt accu-stats-policy</b> <i>string ingress keyword id number</i> |
| Tree     | <a href="#">ingress</a>  |
| Range    | 1 to 63  |

|            |   |
|------------|---|
| Notes      | This element is part of a list key.                     |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## ancp

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>ancp</b> context  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt ancp</a>                            |
| Tree        | <a href="#">ancp</a>   |
| Description | Commands in this context configure Access Node Control Protocol (ANCP) settings. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                          |

## ancp-policy [[name](#)] *string*

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>ancp-policy</b> list instance  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i>   |
| Tree        | <a href="#">ancp-policy</a>   |
| Description | <p>Commands in this context configure the specified ANCP policy, which can be associated with either an ANCP string (static) or a subscriber-profile (dynamic), and define the behavior of hosts belonging to these profiles.</p> <p>ANCP policies control rates and subscribers based on port-up/port-down messages from the access node. When configured, the node stops SHCV to a host that is part of a port that is down (by port-down message). When a port-up message is received for the port that was down, the node initiates the SHCV process immediately to verify connectivity.</p> <p>When ANCP is used with ESM, all hosts of a subscriber are updated with the ANCP string last associated with the subscriber.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## [[name](#)] *string*

|               |   |
|---------------|---|
| Synopsis      | Policy name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> |
| Tree          | <a href="#">ancp-policy</a>   |
| String Length | 1 to 32   |

|            |   |
|------------|---|
| Notes      | This element is part of a list key.                     |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## egress

|            |  |
|------------|--|
| Synopsis   | Enter the <b>egress</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> |
| Tree       | <a href="#">egress</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## rate-adjustment *number*

|             |   |
|-------------|---|
| Synopsis    | Rate adjustment for the scheduler   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> <a href="#">rate-adjustment</a> <i>number</i>  |
| Tree        | <a href="#">rate-adjustment</a>   |
| Description | This command configures the rate adjustment for the scheduler. This setting is used when the rate returned by the DSLAM is calculated with a different encapsulation than the SR node. The node adjusts the rate by the percentage specified as:<br><br>$\text{DSLAM\_RATE} * (\text{adjustment rate})/100 - (\text{rate reduction})$ |
| Range       | 1 to 200  |
| Units       | percent   |
| Default     | 100   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## rate-modify

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rate-modify</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> <a href="#">rate-modify</a> |
| Tree       | <a href="#">rate-modify</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**agg-rate**

|             |   |
|-------------|---|
| Synopsis    | Maximum total rate for all subscriber egress queues   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> <a href="#">rate-modify</a> <a href="#">agg-rate</a> |
| Tree        | <a href="#">agg-rate</a>  |
| Description | This command specifies the maximum total rate for all subscriber egress queues for each subscriber associated with the policy.  |
| Notes       | The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**scheduler** *string*

|               |  |
|---------------|--|
| Synopsis      | Scheduler to be applied for rate modification  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> <a href="#">rate-modify</a> <a href="#">scheduler</a> <i>string</i> |
| Tree          | <a href="#">scheduler</a>  |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**rate-monitor**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>rate-monitor</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> <a href="#">rate-monitor</a> |
| Tree       | <a href="#">rate-monitor</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**alarm** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Generate SNMP notification when monitor event is raised  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">egress</a> <a href="#">rate-monitor</a> <a href="#">alarm</a> <i>boolean</i>           |
| Tree        | <a href="#">alarm</a>  |
| Description | When configured to <b>true</b> , the system generates an alarm (trap) to the management system including the rate, the ANCP policy name, and the ANCP string when the monitored rate is below the configured rate. |

When configured to **false**, no alarm is generated.

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **rate number**

|            |   |
|------------|---|
| Synopsis   | Rate below which the system generates an event  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <a href="#">egress rate-monitor rate number</a> |
| Tree       | <a href="#">rate</a>  |
| Range      | 1 to 4294967295   |
| Units      | kilobps   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **rate-reduction number**

|             |  |
|-------------|--|
| Synopsis    | Constant rate reduction to specified DSLAM rate  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <a href="#">egress rate-reduction number</a>   |
| Tree        | <a href="#">rate-reduction</a>   |
| Description | This command configures a constant rate reduction to the rate specified by the DSLAM. This setting is used if the node must adjust the rate to a value that is offset (for example by a fixed multicast dedicated bandwidth) compared to the total available on the DSLAM. The rate is calculated as:<br><br>$\text{DSLAM\_RATE} * (\text{adjustment rate})/100 - (\text{rate reduction})$ |
| Range       | 1 to 4294967295  |
| Units       | kilobps  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ingress**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ingress</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <a href="#">ingress</a> |
| Tree       | <a href="#">ingress</a>   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rate-adjustment** *number*

Synopsis Rate adjustment for the scheduler

Context **configure** [subscriber-mgmt](#) [ancp](#) [ancp-policy](#) *string* [ingress](#) **rate-adjustment** *number*

Tree [rate-adjustment](#)

Description This command configures the rate adjustment for the scheduler. This setting is used when the rate returned by the DSLAM is calculated with a different encapsulation than the SR node. The node adjusts the rate by the percentage specified as:  

$$\text{DSLAM\_RATE} * (\text{adjustment rate})/100 \text{ — (rate reduction)}$$

Range 1 to 200

Units percent

Default 100

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rate-modify**

Synopsis Enter the **rate-modify** context

Context **configure** [subscriber-mgmt](#) [ancp](#) [ancp-policy](#) *string* [ingress](#) **rate-modify**

Tree [rate-modify](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **scheduler** *string*

Synopsis Scheduler to be applied for rate modification

Context **configure** [subscriber-mgmt](#) [ancp](#) [ancp-policy](#) *string* [ingress](#) [rate-modify](#) **scheduler** *string*

Tree [scheduler](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**rate-monitor**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rate-monitor</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">ingress</a> <a href="#">rate-monitor</a> |
| Tree       | <a href="#">rate-monitor</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**alarm** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Generate SNMP notification when monitor event is raised  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">ingress</a> <a href="#">rate-monitor</a> <a href="#">alarm</a> <i>boolean</i>  |
| Tree        | <a href="#">alarm</a>  |
| Description | When configured to <b>true</b> , the system generates an alarm (trap) to the management system including the rate, the ANCP policy name, and the ANCP string when the monitored rate is below the configured rate.<br><br>When configured to <b>false</b> , no alarm is generated. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**rate** *number*

|            |   |
|------------|---|
| Synopsis   | Rate below which the system generates an event  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">ingress</a> <a href="#">rate-monitor</a> <a href="#">rate</a> <i>number</i> |
| Tree       | <a href="#">rate</a>  |
| Range      | 1 to 4294967295   |
| Units      | kilobps   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**rate-reduction** *number*

|          |  |
|----------|--|
| Synopsis | Constant rate reduction to specified DSLAM rate  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">ingress</a> <a href="#">rate-reduction</a> <i>number</i> |
| Tree     | <a href="#">rate-reduction</a>   |

|             |  |
|-------------|--|
| Description | This command configures a constant rate reduction to the rate specified by the DSLAM. This setting is used if the node must adjust the rate to a value that is offset (for example by a fixed multicast dedicated bandwidth) compared to the total available on the DSLAM. The rate is calculated as:<br>$\text{DSLAM\_RATE} * (\text{adjustment rate})/100 - (\text{rate reduction})$ |
| Range       | 1 to 4294967295  |
| Units       | kilobps  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## port-down

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>port-down</b> context   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <b>port-down</b> |
| Tree        | <a href="#">port-down</a>  |
| Description | Commands in this context configure the actions taken on port-down.                               |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## suspend-shcv

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>suspend-shcv</b> context   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <b>port-down suspend-shcv</b>  |
| Tree        | <a href="#">suspend-shcv</a>   |
| Description | Commands in this context specify the configuration to suspend SHCV for the hosts defined with the ANCP policy. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## alarm *boolean*

|          |  |
|----------|--|
| Synopsis | Send an alarm before suspending SHCV   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt ancp ancp-policy</a> <i>string</i> <b>port-down suspend-shcv alarm</b> <i>boolean</i> |
| Tree     | <a href="#">alarm</a>  |
| Default  | false  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **hold-time** *number*

|             |   |
|-------------|---|
| Synopsis    | Time that SHCV is suspended   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-policy</a> <i>string</i> <a href="#">port-down</a> <a href="#">suspend-shcv</a> <b>hold-time</b> <i>number</i> |
| Tree        | <a href="#">hold-time</a>   |
| Description | This command configures the time that the node suspends SHCV.<br>When unconfigured, SHCV is suspended until a port-up message is received.  |
| Range       | 1 to 7200   |
| Units       | seconds   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ancp-static-map**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ancp-static-map</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <b>ancp-static-map</b> |
| Tree       | <a href="#">ancp-static-map</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                      |

### **multi-service-site-entry** [[ancp-string](#)] *string* [customer-name](#) *reference* [customer-site-name](#) *reference*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>multi-service-site-entry</b> list instance  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ancp</a> <a href="#">ancp-static-map</a> <b>multi-service-site-entry</b> <i>string</i> <a href="#">customer-name</a> <i>reference</i> <a href="#">customer-site-name</a> <i>reference</i> |
| Tree        | <a href="#">multi-service-site-entry</a>   |
| Description | Commands in this context configure the ANCP key mapping (usually the circuit ID of the DSLAM port) to a customer, site, and scheduler name when Multi-Service site (MSS) is used.  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[ancp-string]** *string*

|               |  |

|----------------|---|
| Synopsis       | Enter the <b>bgp-peering-policy</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> |
| Tree           | <a href="#">bgp-peering-policy</a>  |
| Max. Instances | 255   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | BGP peer policy name  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> |
| Tree          | <a href="#">bgp-peering-policy</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**advertise-inactive** *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise inactive BGP routes to other BGP peers  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">advertise-inactive</a> <i>boolean</i> |
| Tree       | <a href="#">advertise-inactive</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**aggregator-id-zero** *boolean*

|            |   |
|------------|---|
| Synopsis   | Add router ID to BGP aggregator path attribute  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">aggregator-id-zero</a> <i>boolean</i> |
| Tree       | <a href="#">aggregator-id-zero</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**as-override** *boolean*

|            |   |
|------------|---|
| Synopsis   | Replace the peer ASN with the local ASN in AS Path  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>as-override</b> <i>boolean</i> |
| Tree       | <a href="#">as-override</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**asn-4-byte** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable the use of 4-byte ASNs  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>asn-4-byte</b> <i>boolean</i> |
| Tree       | <a href="#">asn-4-byte</a>   |
| Introduced | 16.0.R3  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**authentication-key** *string*

|               |   |
|---------------|---|
| Synopsis      | BGP authentication key for all peers  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>authentication-key</b> <i>string</i> |
| Tree          | <a href="#">authentication-key</a>  |
| String Length | 1 to 370  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**authentication-keychain** *reference*

|            |   |
|------------|---|
| Synopsis   | Keychain name used for the TCP session  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>authentication-keychain</b> <i>reference</i> |
| Tree       | <a href="#">authentication-keychain</a>   |
| Reference  | <b>configure</b> <a href="#">system security keychains</a> <b>keychain</b> <i>string</i>  |
| Introduced | 16.0.R3   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**bfd-liveness** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable BFD  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <a href="#">bfd-liveness</a> <i>boolean</i>   |
| Tree        | <a href="#">bfd-liveness</a>  |
| Description | <p>When configured to <b>true</b>, this command enables the use of Bi-directional Forwarding Detection (BFD) to control the state of an ESM dynamic BGP peer that is set up with the BGP peering policy. The parameters used for the BFD session are configured in the BFD context of the group interface or retail subscriber interface.</p> <p>When configured to <b>false</b>, this command disables the use of BFD for new ESM dynamic BGP peers that are set up with the BGP peering policy.</p> |
| Default     | false   |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**client-reflect** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable client reflection of routes to all client peers  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <a href="#">client-reflect</a> <i>boolean</i> |
| Tree       | <a href="#">client-reflect</a>  |
| Introduced | 16.0.R3   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**cluster** *string*

|            |   |
|------------|---|
| Synopsis   | Cluster ID for route reflector server   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <a href="#">cluster</a> <i>string</i> |
| Tree       | <a href="#">cluster</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**connect-retry** *number*

|          |   |
|----------|---|
| Synopsis | BGP connect retry timer value   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <a href="#">connect-retry</a> <i>number</i> |
| Tree     | <a href="#">connect-retry</a>   |
| Range    | 1 to 65535  |

|            |   |
|------------|---|
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **damping** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use BGP route damping for learned routes  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>damping</b> <i>boolean</i> |
| Tree       | <a href="#">damping</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **export** *reference*

|                |  |
|----------------|--|
| Synopsis       | Export route policies to control advertised routes   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>export</b> <i>reference</i> |
| Tree           | <a href="#">export</a>   |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>                                   |
| Max. Instances | 15   |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**fast-external-failover** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable/disable BGP fast external failover.   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>fast-external-failover</b> <i>boolean</i> |
| Tree       | <a href="#">fast-external-failover</a>   |
| Introduced | 16.0.R3  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**hold-time** *number*

|            |  |
|------------|--|
| Synopsis   | BGP hold time before closing connection  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>hold-time</b> <i>number</i> |
| Tree       | <a href="#">hold-time</a>  |
| Range      | 0   3 to 65535   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**import** *reference*

|                |  |
|----------------|--|
| Synopsis       | Import route policies to control advertised routes   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>import</b> <i>reference</i> |
| Tree           | <a href="#">import</a>   |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>                                   |
| Max. Instances | 15   |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**keepalive** *number*

|          |  |
|----------|--|
| Synopsis | BGP keepalive timer  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <b>keepalive</b> <i>number</i> |
| Tree     | <a href="#">keepalive</a>  |
| Range    | 0 to 21845   |

|            |   |
|------------|---|
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **local-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | Local IP address used when communicating with BGP peers  |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>local-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">local-address</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **local-as**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>local-as</b> context   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>local-as</b> |
| Tree       | <a href="#">local-as</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **as-number** *number*

|            |  |
|------------|--|
| Synopsis   | AS number to be advertised to peer   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>local-as</b> <b>as-number</b> <i>number</i> |
| Tree       | <a href="#">as-number</a>  |
| Range      | 1 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **private** *boolean*

|          |   |
|----------|---|
| Synopsis | Hide local AS number in paths learned from peering  |
| Context  | <b>configure</b> <b>subscriber-mgmt</b> <b>bgp-peering-policy</b> <i>string</i> <b>local-as</b> <b>private</b> <i>boolean</i> |
| Tree     | <a href="#">private</a>   |
| Default  | false   |

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **local-preference** *number*

Synopsis Local preference for incoming routes if not specified  
 Context **configure** [subscriber-mgmt](#) [bgp-peering-policy](#) *string* [local-preference](#) *number*  
 Tree [local-preference](#)  
 Range 0 to 4294967295  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **loop-detect** *keyword*

Synopsis Strategy for loop detection in the AS path  
 Context **configure** [subscriber-mgmt](#) [bgp-peering-policy](#) *string* [loop-detect](#) *keyword*  
 Tree [loop-detect](#)  
 Options drop-peer, ignore-loop, off, discard-route  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **med-out** (*number* | *keyword*)

Synopsis Multi-Exit Discriminator (MED) advertising  
 Context **configure** [subscriber-mgmt](#) [bgp-peering-policy](#) *string* [med-out](#) (*number* | *keyword*)  
 Tree [med-out](#)  
 Max. Range 0 to 4294967295  
 Options igp-cost  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **min-route-advertisement** *number*

Synopsis Minimum interval for prefix to be advertised to a peer  
 Context **configure** [subscriber-mgmt](#) [bgp-peering-policy](#) *string* [min-route-advertisement](#) *number*

|            |   |
|------------|---|
| Tree       | <a href="#">min-route-advertisement</a>                 |
| Range      | 1 to 255  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **multihop** *number*

|            |   |
|------------|---|
| Synopsis   | TTL value entered in IP header of packets sent to peer  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>multihop</b> <i>number</i> |
| Tree       | <a href="#">multihop</a>  |
| Range      | 1 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **next-hop-self** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set net hop path attribute to self when advertising   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>next-hop-self</b> <i>boolean</i> |
| Tree       | <a href="#">next-hop-self</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **passive** *boolean*

|            |   |
|------------|---|
| Synopsis   | Wait passively for BGP peer to connect  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>passive</b> <i>boolean</i> |
| Tree       | <a href="#">passive</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **peer-as** *number*

|          |  |
|----------|--|
| Synopsis | AS number for remote peer  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>peer-as</b> <i>number</i> |

---

|            |   |
|------------|---|
| Tree       | <a href="#">peer-as</a>                                 |
| Range      | 1 to 4294967295   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **preference** *number*

|            |  |
|------------|--|
| Synopsis   | Route preference for routes learned via configured peer  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">preference</a> <i>number</i> |
| Tree       | <a href="#">preference</a>   |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **prefix-limit** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of routes that can be learned from peer   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">prefix-limit</a> <i>number</i> |
| Tree       | <a href="#">prefix-limit</a>   |
| Range      | 1 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **remove-private**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>remove-private</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">remove-private</a> |
| Tree       | <a href="#">remove-private</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **limited** *boolean*

|          |  |
|----------|--|
| Synopsis | Remove private AS numbers up to first public ASN encountered   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">remove-private</a> <i>limited</i> <i>boolean</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">limited</a>                                 |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## send-communities

|            |  |
|------------|--|
| Synopsis   | Enter the <b>send-communities</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">send-communities</a> |
| Tree       | <a href="#">send-communities</a>   |
| Introduced | 16.0.R3  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## extended *boolean*

|            |   |
|------------|---|
| Synopsis   | Send communities which includes VRF target handling   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">send-communities</a> <b>extended</b> <i>boolean</i> |
| Tree       | <a href="#">extended</a>  |
| Introduced | 16.0.R3   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## standard *boolean*

|            |   |
|------------|---|
| Synopsis   | Send standard communities that existed before VPRNs   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">send-communities</a> <b>standard</b> <i>boolean</i> |
| Tree       | <a href="#">standard</a>  |
| Introduced | 16.0.R3   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ttl-security *number*

|          |  |
|----------|--|
| Synopsis | Minimum TTL value for incoming BGP packet  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">bgp-peering-policy</a> <i>string</i> <a href="#">ttl-security</a> <i>number</i> |
| Tree     | <a href="#">ttl-security</a>   |

|            |   |
|------------|---|
| Range      | 1 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**type keyword**

|            |  |
|------------|--|
| Synopsis   | Peer type  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt bgp-peering-policy</a> <i>string</i> <b>type</b> <i>keyword</i> |
| Tree       | <a href="#">type</a>   |
| Options    | no-type, internal, external  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**category-map** [[category-map-name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>category-map</b> list instance                                 |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> |
| Tree           | <a href="#">category-map</a>  |
| Max. Instances | 255   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                     |

**[category-map-name]** *string*

|               |   |

| Context       | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <b>category</b> <i>string</i> |
| Tree          | <a href="#">category</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**credit-type-override** *keyword*

|          |  |
|----------|--|
| Synopsis | Credit type override in category map   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <b>category</b> <i>string</i> <b>credit-type-override</b> <i>keyword</i> |
| Tree     | <a href="#">credit-type-override</a>   |

|            |   |
|------------|---|
| Options    | volume, time  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### default-credit

|            |  |
|------------|--|
| Synopsis   | Enter the <b>default-credit</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <b>default-credit</b> |
| Tree       | <a href="#">default-credit</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### time *number*

|            |  |
|------------|--|
| Synopsis   | Default time credit  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <b>default-credit</b> <i>time</i> <i>number</i> |
| Tree       | <a href="#">time</a>   |
| Range      | 1 to 4294967295  |
| Units      | seconds  |
| Notes      | The following elements are part of a choice: <b>time</b> or <b>volume</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### volume

|            |  |
|------------|--|
| Synopsis   | Enable the <b>volume</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <b>default-credit</b> <b>volume</b> |
| Tree       | <a href="#">volume</a>   |
| Notes      | The following elements are part of a choice: <b>time</b> or <b>volume</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**unit keyword**

|            |   |
|------------|---|
| Synopsis   | Unit for the default volume credit  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map string category string default-credit volume unit keyword</a> |
| Tree       | <a href="#">unit</a>  |
| Options    | bytes, kilobytes, megabytes, gigabytes  |
| Default    | bytes   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**value number**

|            |   |
|------------|---|
| Synopsis   | Value for the default volume credit   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map string category string default-credit volume value number</a> |
| Tree       | <a href="#">value</a>   |
| Range      | 1 to 4294967295   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**description string**

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt category-map string category string description string</a> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**egress**

|          |   |
|----------|---|
| Synopsis | Enter the <b>egress</b> context   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map string category string egress</a> |
| Tree     | <a href="#">egress</a>  |

---

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **policer** *number*

|                   |   |
|-------------------|---|
| Synopsis          | Egress policers for this category   |
| Context           | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">egress</a> <a href="#">policer</a> <i>number</i> |
| Tree              | <a href="#">policer</a>   |
| Range             | 1 to 63   |
| Max.<br>Instances | 63  |
| Introduced        | 16.0.R1   |
| Platforms         | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **queue** *number*

|                   |   |
|-------------------|---|
| Synopsis          | Egress queues for this category   |
| Context           | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">egress</a> <a href="#">queue</a> <i>number</i> |
| Tree              | <a href="#">queue</a>   |
| Range             | 1 to 8  |
| Max.<br>Instances | 8   |
| Introduced        | 16.0.R1   |
| Platforms         | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **exhausted-credit-service-level**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>exhausted-credit-service-level</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> |
| Tree       | <a href="#">exhausted-credit-service-level</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## egress

|            |  |
|------------|--|
| Synopsis   | Enter the <b>egress</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> |
| Tree       | <a href="#">egress</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ip-filter

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ip-filter</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> |
| Tree       | <a href="#">ip-filter</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## entry [*id*] *number*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>entry</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> |
| Tree           | <a href="#">entry</a>  |
| Max. Instances | 10   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## [*id*] *number*

|          |  |
|----------|--|
| Synopsis | IP filter entry ID   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> |
| Tree     | <a href="#">entry</a>  |
| Range    | 1 to 65535   |
| Notes    | This element is part of a list key.  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## action

|            |  |
|------------|--|
| Synopsis   | Enter the <b>action</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <b>action</b> |
| Tree       | <a href="#">action</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## drop

|            |  |
|------------|--|
| Synopsis   | Packets matching the filter entry are dropped  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <b>action</b> <b>drop</b> |
| Tree       | <a href="#">drop</a>   |
| Notes      | The following elements are part of a choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## forward

|            |   |
|------------|---|
| Synopsis   | Packets matching the filter entry are forwarded   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <b>action</b> <b>forward</b> |
| Tree       | <a href="#">forward</a>   |
| Notes      | The following elements are part of a choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## http-redirect

|          |   |
|----------|---|
| Synopsis | Enable the <b>http-redirect</b> context |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">http-redirect</a> |
| Tree       | <a href="#">http-redirect</a>   |
| Notes      | The following elements are part of a choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **allow-override** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow URL to be overridden by RADIUS/Diameter   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">http-redirect</a> <a href="#">allow-override</a> <i>boolean</i> |
| Tree       | <a href="#">allow-override</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **url** *string*

|               |   |
|---------------|---|
| Synopsis      | URL that is used to redirect the packets  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">http-redirect</a> <a href="#">url</a> <i>string</i> |
| Tree          | <a href="#">url</a>   |
| String Length | 1 to 255  |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## match

Synopsis Enter the **match** context

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level egress ip-filter entry](#) *number* **match**

Tree [match](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dscp keyword

Synopsis DSCP to match

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level egress ip-filter entry](#) *number* **match dscp** *keyword*

Tree [dscp](#)

Options be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dst-port

Synopsis Enter the **dst-port** context

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level egress ip-filter entry](#) *number* **match dst-port**

| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **range**

|          |   |
|----------|---|
| Synopsis | Enable the <b>range</b> context   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match dst-port range</a> |
| Tree     | <a href="#">range</a>   |

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**end number**

|            |   |
|------------|---|
| Synopsis   | Upper bound of the port range to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match dst-port range end</a> <i>number</i> |
| Tree       | <a href="#">end</a>   |
| Range      | 0 to 65535  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**start number**

|            |   |
|------------|---|
| Synopsis   | Lower bound of the port range to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match dst-port range start</a> <i>number</i> |
| Tree       | <a href="#">start</a>   |
| Range      | 0 to 65535  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**fragment keyword**

|            |  |
|------------|--|
| Synopsis   | Fragmentation to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match fragment</a> <i>keyword</i> |
| Tree       | <a href="#">fragment</a>   |
| Options    | false, true  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## icmp

|            |   |
|------------|---|
| Synopsis   | Enter the <b>icmp</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match icmp</a> |
| Tree       | <a href="#">icmp</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## code number

|            |  |
|------------|--|
| Synopsis   | ICMP code to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match icmp code</a> <i>number</i> |
| Tree       | <a href="#">code</a>   |
| Range      | 0 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## type number

|            |  |
|------------|--|
| Synopsis   | ICMP type to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match icmp type</a> <i>number</i> |
| Tree       | <a href="#">type</a>   |
| Range      | 0 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ip-option

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ip-option</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match ip-option</a> |
| Tree       | <a href="#">ip-option</a>  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mask** *number*

Synopsis IP option mask

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* [match](#) [ip-option](#) [mask](#) *number*

Tree [mask](#)

Range 0 to 255

Default 0

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** *number*

Synopsis First IP option value for the IP header

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* [match](#) [ip-option](#) [type](#) *number*

Tree [type](#)

Range 0 to 255

Default 0

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **multiple-option** *boolean*

Synopsis Match the multiple option

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* [match](#) [multiple-option](#) *boolean*

Tree [multiple-option](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **option-present** *boolean*

Synopsis Match the present option

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match option-present</a> <i>boolean</i> |
| Tree       | <a href="#">option-present</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **protocol** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | IPv4 protocol to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match protocol</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">protocol</a>   |
| Range      | 0 to 255   |
| Options    | tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp                                    |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **src-ip** *string*

|            |   |
|------------|---|
| Synopsis   | Source IP address and mask to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match src-ip</a> <i>string</i> |
| Tree       | <a href="#">src-ip</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **src-port**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>src-port</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match src-port</a> |
| Tree       | <a href="#">src-port</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **eq** *number*

|            |   |
|------------|---|
| Synopsis   | Port equal  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>eq</b> <i>number</i> |
| Tree       | <a href="#">eq</a>  |
| Range      | 0 to 65535  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **gt** *number*

|            |   |
|------------|---|
| Synopsis   | Port greater than   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>gt</b> <i>number</i> |
| Tree       | <a href="#">gt</a>  |
| Range      | 0 to 65534  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **lt** *number*

|            |   |
|------------|---|
| Synopsis   | Port less than  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>lt</b> <i>number</i> |
| Tree       | <a href="#">lt</a>  |
| Range      | 1 to 65535  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **range**

|          |                                 |
|----------|---------------------------------|
| Synopsis | Enable the <b>range</b> context |
|----------|---------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match src-port range</a> |
| Tree       | <a href="#">range</a>   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **end number**

|            |  |
|------------|--|
| Synopsis   | Upper bound of the port range to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match src-port range</a> <b>end</b> <i>number</i> |
| Tree       | <a href="#">end</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **start number**

|            |  |
|------------|--|
| Synopsis   | Lower bound of the port range to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match src-port range</a> <b>start</b> <i>number</i> |
| Tree       | <a href="#">start</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **tcp-flags**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>tcp-flags</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ip-filter entry</a> <i>number</i> <a href="#">match tcp-flags</a> |
| Tree       | <a href="#">tcp-flags</a>  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ack** *boolean*

Synopsis Check for ACK bit

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* [match](#) [tcp-flags](#) **ack** *boolean*

Tree [ack](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **syn** *boolean*

Synopsis Check for SYN bit

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ip-filter](#) [entry](#) *number* [match](#) [tcp-flags](#) **syn** *boolean*

Tree [syn](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-filter**

Synopsis Enter the **ipv6-filter** context

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) **ipv6-filter**

Tree [ipv6-filter](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **entry** [*id*] *number*

Synopsis Enter the **entry** list instance

Context **configure** [subscriber-mgmt](#) [category-map](#) *string* [category](#) *string* [exhausted-credit-service-level](#) [egress](#) [ipv6-filter](#) **entry** *number*

Tree [entry](#)

Max. 10

Instances

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**[id]** *number*

|            |  |
|------------|--|
| Synopsis   | IP filter entry ID   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> |
| Tree       | <a href="#">entry</a>  |
| Range      | 1 to 65535   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**action**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>action</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <b>action</b> |
| Tree       | <a href="#">action</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**drop**

|            |   |
|------------|---|
| Synopsis   | Packets matching the filter entry are dropped   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <b>drop</b> |
| Tree       | <a href="#">drop</a>  |
| Notes      | The following elements are part of a choice: <b>drop</b> or <b>forward</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**forward**

|          |   |
|----------|---|
| Synopsis | Packets matching the filter entry are forwarded |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">action forward</a> |
| Tree       | <a href="#">forward</a>   |
| Notes      | The following elements are part of a choice: <b>drop</b> or <b>forward</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **match**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>match</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match</a> |
| Tree       | <a href="#">match</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **dscp** *keyword*

|          |   |
|----------|---|
| Synopsis | DSCP to match   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match</a> <a href="#">dscp</a> <i>keyword</i>  |
| Tree     | <a href="#">dscp</a>  |
| Options  | be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63 |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **dst-port**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dst-port</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-port</b> |
| Tree       | <a href="#">dst-port</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **eq number**

|            |  |
|------------|--|
| Synopsis   | Port equal   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-port</b> <b>eq</b> <i>number</i> |
| Tree       | <a href="#">eq</a>   |
| Range      | 0 to 65535   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **gt number**

|            |  |
|------------|--|
| Synopsis   | Port greater than  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-port</b> <b>gt</b> <i>number</i> |
| Tree       | <a href="#">gt</a>   |
| Range      | 0 to 65534   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**lt number**

|            |   |
|------------|---|
| Synopsis   | Port less than  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>lt</b> <i>number</i> |
| Tree       | <a href="#">lt</a>  |
| Range      | 1 to 65535  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**range**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>range</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>range</b> |
| Tree       | <a href="#">range</a>  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**end number**

|            |  |
|------------|--|
| Synopsis   | Upper bound of the port range to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>range end</b> <i>number</i> |
| Tree       | <a href="#">end</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**start number**

|          |  |
|----------|--|
| Synopsis | Lower bound of the port range to match   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>range start</b> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">start</a>                                   |
| Range      | 0 to 65535  |
| Notes      | This element is mandatory.                              |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## icmp

|            |   |
|------------|---|
| Synopsis   | Enter the <b>icmp</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match icmp</a> |
| Tree       | <a href="#">icmp</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## code number

|            |  |
|------------|--|
| Synopsis   | ICMP code to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match icmp code</a> <i>number</i> |
| Tree       | <a href="#">code</a>   |
| Range      | 0 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## type number

|            |  |
|------------|--|
| Synopsis   | ICMP type to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match icmp type</a> <i>number</i> |
| Tree       | <a href="#">type</a>   |
| Range      | 0 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**next-header** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | IP protocol to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match next-header</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">next-header</a>   |
| Range      | 0 to 255  |
| Options    | tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**src-ip** *string*

|            |   |
|------------|---|
| Synopsis   | Source IP address and mask as the match condition   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match src-ip</a> <i>string</i> |
| Tree       | <a href="#">src-ip</a>  |
| Default    | 0::0 0::0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**src-port**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>src-port</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match src-port</a> |
| Tree       | <a href="#">src-port</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**eq** *number*

|          |  |
|----------|--|
| Synopsis | Port equal   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level egress ipv6-filter entry</a> <i>number</i> <a href="#">match src-port eq</a> <i>number</i> |
| Tree     | <a href="#">eq</a>   |

|            |  |
|------------|--|
| Range      | 0 to 65535   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**gt number**

|            |   |
|------------|---|
| Synopsis   | Port greater than   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>gt</b> <i>number</i> |
| Tree       | <a href="#">gt</a>  |
| Range      | 0 to 65534  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**lt number**

|            |   |
|------------|---|
| Synopsis   | Port less than  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>lt</b> <i>number</i> |
| Tree       | <a href="#">lt</a>  |
| Range      | 1 to 65535  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**range**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>range</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">egress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>range</b> |
| Tree       | <a href="#">range</a>  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **end number**

Synopsis Upper bound of the port range to match

Context **configure** [subscriber-mgmt category-map](#) *string category string* [exhausted-credit-service-level egress ipv6-filter entry](#) *number match src-port range end number*

Tree [end](#)

Range 0 to 65535

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **start number**

Synopsis Lower bound of the port range to match

Context **configure** [subscriber-mgmt category-map](#) *string category string* [exhausted-credit-service-level egress ipv6-filter entry](#) *number match src-port range start number*

Tree [start](#)

Range 0 to 65535

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **tcp-flags**

Synopsis Enter the **tcp-flags** context

Context **configure** [subscriber-mgmt category-map](#) *string category string* [exhausted-credit-service-level egress ipv6-filter entry](#) *number match tcp-flags*

Tree [tcp-flags](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ack boolean**

Synopsis Check for ACK bit

|            |  |
|------------|--|
| Context    | <b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level egress ipv6-filter entry number match tcp-flags ack boolean</i> |
| Tree       | <a href="#">ack</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **syn** *boolean*

|            |  |
|------------|--|
| Synopsis   | Check for SYN bit  |
| Context    | <b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level egress ipv6-filter entry number match tcp-flags syn boolean</i> |
| Tree       | <a href="#">syn</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ingress**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ingress</b> context   |
| Context    | <b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress</i> |
| Tree       | <a href="#">ingress</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ip-filter**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ip-filter</b> context   |
| Context    | <b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ip-filter</i> |
| Tree       | <a href="#">ip-filter</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **entry** [*id*] *number*

|          |                                      |
|----------|--------------------------------------|
| Synopsis | Enter the <b>entry</b> list instance |
|----------|--------------------------------------|

|                |   |
|----------------|---|
| Context        | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> |
| Tree           | <a href="#">entry</a>   |
| Max. Instances | 10  |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[id] number**

|            |   |
|------------|---|
| Synopsis   | IP filter entry ID  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> |
| Tree       | <a href="#">entry</a>   |
| Range      | 1 to 65535  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**action**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>action</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <b>action</b> |
| Tree       | <a href="#">action</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**drop**

|            |  |
|------------|--|
| Synopsis   | Packets matching the filter entry are dropped  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <b>action</b> <a href="#">drop</a> |
| Tree       | <a href="#">drop</a>   |
| Notes      | The following elements are part of a choice: <b>drop</b> , <b>forward</b> , or <b>http-redirect</b> .  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## forward

Synopsis Packets matching the filter entry are forwarded

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level ingress ip-filter entry](#) *number* [action forward](#)

Tree [forward](#)

Notes The following elements are part of a choice: **drop**, **forward**, or **http-redirect**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## http-redirect

Synopsis Enable the **http-redirect** context

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level ingress ip-filter entry](#) *number* [action http-redirect](#)

Tree [http-redirect](#)

Notes The following elements are part of a choice: **drop**, **forward**, or **http-redirect**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## allow-override *boolean*

Synopsis Allow URL to be overridden by RADIUS/Diameter

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level ingress ip-filter entry](#) *number* [action http-redirect allow-override](#) *boolean*

Tree [allow-override](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## url *string*

Synopsis URL that is used to redirect the packets

|               |  |
|---------------|--|
| Context       | <b>configure subscriber-mgmt category-map</b> <i>string</i> <i>category</i> <i>string</i> <i>exhausted-credit-service-level ingress ip-filter entry</i> <i>number</i> <i>action</i> <i>http-redirect url</i> <i>string</i> |
| Tree          | <a href="#">url</a>  |
| String Length | 1 to 255   |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure subscriber-mgmt category-map</b> <i>string</i> <i>category</i> <i>string</i> <i>exhausted-credit-service-level ingress ip-filter entry</i> <i>number</i> <i>description</i> <i>string</i> |

| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **match**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>match</b> context   |
| Context    | <b>configure subscriber-mgmt category-map</b> <i>string</i> <i>category</i> <i>string</i> <i>exhausted-credit-service-level ingress ip-filter entry</i> <i>number</i> <i>match</i> |
| Tree       | <a href="#">match</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **dscp** *keyword*

|          |  |
|----------|--|
| Synopsis | DSCP to match  |
| Context  | <b>configure subscriber-mgmt category-map</b> <i>string</i> <i>category</i> <i>string</i> <i>exhausted-credit-service-level ingress ip-filter entry</i> <i>number</i> <i>match</i> <i>dscp</i> <i>keyword</i>  |
| Tree     | <a href="#">dscp</a>   |
| Options  | be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, |

|            |  |
|------------|--|
|            | cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63 |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**dst-ip string**

|            |  |
|------------|--|
| Synopsis   | Destination IP address and mask to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map string category string</a> <a href="#">exhausted-credit-service-level ingress ip-filter entry number match dst-ip string</a> |
| Tree       | <a href="#">dst-ip</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**dst-port**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dst-port</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map string category string</a> <a href="#">exhausted-credit-service-level ingress ip-filter entry number match dst-port</a> |
| Tree       | <a href="#">dst-port</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**eq number**

|            |   |
|------------|---|
| Synopsis   | Port equal  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map string category string</a> <a href="#">exhausted-credit-service-level ingress ip-filter entry number match dst-port eq number</a> |
| Tree       | <a href="#">eq</a>  |
| Range      | 0 to 65535  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**gt number**

|          |                   |
|----------|-------------------|
| Synopsis | Port greater than |
|----------|-------------------|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>gt</b> <i>number</i> |
| Tree       | <a href="#">gt</a>   |
| Range      | 0 to 65534   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**lt** *number*

|            |  |
|------------|--|
| Synopsis   | Port less than   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>lt</b> <i>number</i> |
| Tree       | <a href="#">lt</a>   |
| Range      | 1 to 65535   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**range**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>range</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>range</b> |
| Tree       | <a href="#">range</a>   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**end** *number*

|          |   |
|----------|---|
| Synopsis | Upper bound of the port range to match  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match dst-port</a> <b>range end</b> <i>number</i> |
| Tree     | <a href="#">end</a>   |
| Range    | 0 to 65535  |

|            |   |
|------------|---|
| Notes      | This element is mandatory.                              |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **start** *number*

|            |  |
|------------|--|
| Synopsis   | Lower bound of the port range to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> <a href="#">start</a> <i>number</i> |
| Tree       | <a href="#">start</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **fragment** *keyword*

|            |   |
|------------|---|
| Synopsis   | Fragmentation to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">fragment</a> <i>keyword</i> |
| Tree       | <a href="#">fragment</a>  |
| Options    | false, true   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **icmp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>icmp</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">icmp</a> |
| Tree       | <a href="#">icmp</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**code number**

|            |   |
|------------|---|
| Synopsis   | ICMP code to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match icmp code</a> <i>number</i> |
| Tree       | <a href="#">code</a>  |
| Range      | 0 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**type number**

|            |   |
|------------|---|
| Synopsis   | ICMP type to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match icmp type</a> <i>number</i> |
| Tree       | <a href="#">type</a>  |
| Range      | 0 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ip-option**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ip-option</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match ip-option</a> |
| Tree       | <a href="#">ip-option</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**mask number**

|          |  |
|----------|--|
| Synopsis | IP option mask   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match ip-option mask</a> <i>number</i> |
| Tree     | <a href="#">mask</a>   |
| Range    | 0 to 255   |
| Default  | 0  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**type** *number*

|            |   |
|------------|---|
| Synopsis   | First IP option value for the IP header   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">ip-option</a> <b>type</b> <i>number</i> |
| Tree       | <a href="#">type</a>  |
| Range      | 0 to 255  |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**multiple-option** *boolean*

|            |  |
|------------|--|
| Synopsis   | Match the multiple option  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">multiple-option</a> <b>boolean</b> |
| Tree       | <a href="#">multiple-option</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**option-present** *boolean*

|            |   |
|------------|---|
| Synopsis   | Match the present option  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">option-present</a> <b>boolean</b> |
| Tree       | <a href="#">option-present</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**protocol** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | IPv4 protocol to match  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">protocol</a> ( <i>number</i>   <i>keyword</i> ) |

|            |   |
|------------|---|
| Tree       | <a href="#">protocol</a>  |
| Range      | 0 to 255  |
| Options    | tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### src-port

|            |  |
|------------|--|
| Synopsis   | Enter the <b>src-port</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port</a> |
| Tree       | <a href="#">src-port</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### eq number

|            |   |
|------------|---|
| Synopsis   | Port equal  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port eq</a> <i>number</i> |
| Tree       | <a href="#">eq</a>  |
| Range      | 0 to 65535  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### gt number

|          |   |
|----------|---|
| Synopsis | Port greater than   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port gt</a> <i>number</i> |
| Tree     | <a href="#">gt</a>  |
| Range    | 0 to 65534  |
| Notes    | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**lt number**

|            |  |
|------------|--|
| Synopsis   | Port less than   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port</a> <b>lt</b> <i>number</i> |
| Tree       | <b>lt</b>  |
| Range      | 1 to 65535   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**range**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>range</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port</a> <b>range</b> |
| Tree       | <b>range</b>  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**end number**

|            |  |
|------------|--|
| Synopsis   | Upper bound of the port range to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port</a> <b>range</b> <b>end</b> <i>number</i> |
| Tree       | <b>end</b>   |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **start** *number*

|            |   |
|------------|---|
| Synopsis   | Lower bound of the port range to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match src-port range</a> <b>start</b> <i>number</i> |
| Tree       | <a href="#">start</a>   |
| Range      | 0 to 65535  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **tcp-flags**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>tcp-flags</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match tcp-flags</a> |
| Tree       | <a href="#">tcp-flags</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ack** *boolean*

|            |   |
|------------|---|
| Synopsis   | Check for ACK bit   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match tcp-flags</a> <b>ack</b> <i>boolean</i> |
| Tree       | <a href="#">ack</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **syn** *boolean*

|            |   |
|------------|---|
| Synopsis   | Check for SYN bit   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ip-filter entry</a> <i>number</i> <a href="#">match tcp-flags</a> <b>syn</b> <i>boolean</i> |
| Tree       | <a href="#">syn</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipv6-filter**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv6-filter</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress</a> <a href="#">ipv6-filter</a> |
| Tree       | <a href="#">ipv6-filter</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**entry** [*id*] *number*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>entry</b> list instance  |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress</a> <a href="#">ipv6-filter entry</a> <i>number</i> |
| Tree           | <a href="#">entry</a>   |
| Max. Instances | 10  |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[id]** *number*

|            |   |
|------------|---|
| Synopsis   | IP filter entry ID  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress</a> <a href="#">ipv6-filter entry</a> <i>number</i> |
| Tree       | <a href="#">entry</a>   |
| Range      | 1 to 65535  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**action**

|          |  |
|----------|--|
| Synopsis | Enter the <b>action</b> context  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress</a> <a href="#">ipv6-filter entry</a> <i>number</i> <a href="#">action</a> |
| Tree     | <a href="#">action</a>   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## drop

|            |   |
|------------|---|
| Synopsis   | Packets matching the filter entry are dropped   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">drop</a> |
| Tree       | <a href="#">drop</a>  |
| Notes      | The following elements are part of a choice: <b>drop</b> or <b>forward</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## forward

|            |  |
|------------|--|
| Synopsis   | Packets matching the filter entry are forwarded  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> |
| Tree       | <a href="#">forward</a>  |
| Notes      | The following elements are part of a choice: <b>drop</b> or <b>forward</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## description *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## match

|          |                                |
|----------|--------------------------------|
| Synopsis | Enter the <b>match</b> context |
|----------|--------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match</i> |
| Tree       | <a href="#">match</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **dscp keyword**

|            |   |
|------------|---|
| Synopsis   | DSCP to match   |
| Context    | <b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match dscp keyword</i>  |
| Tree       | <a href="#">dscp</a>  |
| Options    | be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63 |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **dst-ip string**

|            |   |
|------------|---|
| Synopsis   | Destination IP address and mask to match  |
| Context    | <b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match dst-ip string</i> |
| Tree       | <a href="#">dst-ip</a>  |
| Default    | 0::0 0::0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **dst-port**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dst-port</b> context  |
| Context    | <b>configure subscriber-mgmt category-map</b> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match dst-port</i> |
| Tree       | <a href="#">dst-port</a>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **eq number**

Synopsis Port equal

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level ingress ipv6-filter entry](#) *number match dst-port eq number*

Tree [eq](#)

Range 0 to 65535

Notes The following elements are part of a choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gt number**

Synopsis Port greater than

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level ingress ipv6-filter entry](#) *number match dst-port gt number*

Tree [gt](#)

Range 0 to 65534

Notes The following elements are part of a choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lt number**

Synopsis Port less than

Context **configure** [subscriber-mgmt category-map](#) *string* [category](#) *string* [exhausted-credit-service-level ingress ipv6-filter entry](#) *number match dst-port lt number*

Tree [lt](#)

Range 1 to 65535

Notes The following elements are part of a choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## range

|            |  |
|------------|--|
| Synopsis   | Enable the <b>range</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> |
| Tree       | <a href="#">range</a>  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## end number

|            |  |
|------------|--|
| Synopsis   | Upper bound of the port range to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> <a href="#">end</a> <i>number</i> |
| Tree       | <a href="#">end</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## start number

|            |  |
|------------|--|
| Synopsis   | Lower bound of the port range to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> <a href="#">start</a> <i>number</i> |
| Tree       | <a href="#">start</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## icmp

|          |  |
|----------|--|
| Synopsis | Enter the <b>icmp</b> context  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">icmp</a> |

|            |   |
|------------|---|
| Tree       | <a href="#">icmp</a>                                    |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**code number**

|            |   |
|------------|---|
| Synopsis   | ICMP code to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ipv6-filter entry</a> <i>number</i> <a href="#">match icmp code</a> <i>number</i> |
| Tree       | <a href="#">code</a>  |
| Range      | 0 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**type number**

|            |   |
|------------|---|
| Synopsis   | ICMP type to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ipv6-filter entry</a> <i>number</i> <a href="#">match icmp type</a> <i>number</i> |
| Tree       | <a href="#">type</a>  |
| Range      | 0 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**next-header** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | IP protocol to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level ingress ipv6-filter entry</a> <i>number</i> <a href="#">match next-header</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">next-header</a>  |
| Range      | 0 to 255   |
| Options    | tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## src-port

|            |  |
|------------|--|
| Synopsis   | Enter the <b>src-port</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> |
| Tree       | <a href="#">src-port</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## eq number

|            |   |
|------------|---|
| Synopsis   | Port equal  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">eq</a> <i>number</i> |
| Tree       | <a href="#">eq</a>  |
| Range      | 0 to 65535  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## gt number

|            |   |
|------------|---|
| Synopsis   | Port greater than   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">gt</a> <i>number</i> |
| Tree       | <a href="#">gt</a>  |
| Range      | 0 to 65534  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## lt number

|          |   |
|----------|---|
| Synopsis | Port less than  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">lt</a> <i>number</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">lt</a>   |
| Range      | 1 to 65535   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## range

|            |  |
|------------|--|
| Synopsis   | Enable the <b>range</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match src-port range</i> |
| Tree       | <a href="#">range</a>  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## end number

|            |   |
|------------|---|
| Synopsis   | Upper bound of the port range to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match src-port range end number</i> |
| Tree       | <a href="#">end</a>   |
| Range      | 0 to 65535  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## start number

|          |   |
|----------|---|
| Synopsis | Lower bound of the port range to match  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string exhausted-credit-service-level ingress ipv6-filter entry number match src-port range start number</i> |
| Tree     | <a href="#">start</a>   |
| Range    | 0 to 65535  |
| Notes    | This element is mandatory.  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## tcp-flags

|            |   |
|------------|---|
| Synopsis   | Enter the <b>tcp-flags</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a> |
| Tree       | <a href="#">tcp-flags</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ack *boolean*

|            |  |
|------------|--|
| Synopsis   | Check for ACK bit  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a> <a href="#">ack</a> <i>boolean</i> |
| Tree       | <a href="#">ack</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## syn *boolean*

|            |  |
|------------|--|
| Synopsis   | Check for SYN bit  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">ingress</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a> <a href="#">syn</a> <i>boolean</i> |
| Tree       | <a href="#">syn</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## pir (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | PIR  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <a href="#">exhausted-credit-service-level</a> <a href="#">pir</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">pir</a>  |
| Range    | 1 to 100000000   |

|            |   |
|------------|---|
| Options    | max   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## ingress

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ingress</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string ingress</i> |
| Tree       | <a href="#">ingress</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## *policer number*

|            |  |
|------------|--|
| Synopsis   | Ingress policers used in this category   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string ingress policer number</i> |
| Tree       | <a href="#">policer</a>  |
| Range      | 1 to 63  |
| Max.       | 63   |
| Instances  |  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## *queue number*

|            |  |
|------------|--|
| Synopsis   | Ingress queues used in this category   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string category string ingress queue number</i> |
| Tree       | <a href="#">queue</a>  |
| Range      | 1 to 32  |
| Max.       | 32   |
| Instances  |  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**out-of-credit-action-override** *keyword*

|            |  |
|------------|--|
| Synopsis   | Out of credit action that is overridden in category map  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <b>out-of-credit-action-override</b> <i>keyword</i> |
| Tree       | <a href="#">out-of-credit-action-override</a>  |
| Options    | continue, disconnect-host, block-category, change-service-level  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**rating-group** *number*

|            |  |
|------------|--|
| Synopsis   | Rating group for this category   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <a href="#">category</a> <i>string</i> <b>rating-group</b> <i>number</i> |
| Tree       | <a href="#">rating-group</a>   |
| Range      | 0 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**credit-exhaust-threshold** *number*

|            |   |
|------------|---|
| Synopsis   | Percentage for credit exhaust threshold   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <b>credit-exhaust-threshold</b> <i>number</i> |
| Tree       | <a href="#">credit-exhaust-threshold</a>  |
| Range      | 50 to 100   |
| Units      | percent   |
| Default    | 100   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**credit-type** *keyword*

|          |   |
|----------|---|
| Synopsis | Credit type   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt category-map</a> <i>string</i> <b>credit-type</b> <i>keyword</i> |
| Tree     | <a href="#">credit-type</a>   |
| Options  | volume, time  |

|            |   |
|------------|---|
| Default    | volume  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**gx-session-level-usage** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow Gx session level Usage Monitoring  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">category-map</a> <i>string</i> <b>gx-session-level-usage</b> <i>boolean</i> |
| Tree       | <a href="#">gx-session-level-usage</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**credit-control-policy** [[name](#)] *string*

| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **error-handling-action** *keyword*

|            |   |
|------------|---|
| Synopsis   | Error handling action for the policy  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt credit-control-policy</a> <i>string</i> <a href="#">error-handling-action</a> <i>keyword</i> |
| Tree       | <a href="#">error-handling-action</a>   |
| Options    | continue, block   |
| Default    | continue  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**out-of-credit-action** *keyword*

|            |   |
|------------|---|
| Synopsis   | Action when out of credit is reached  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt credit-control-policy</a> <i>string</i> <b>out-of-credit-action</b> <i>keyword</i> |
| Tree       | <a href="#">out-of-credit-action</a>  |
| Options    | continue, disconnect-host, block-category, change-service-level   |
| Default    | continue  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**server**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>server</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt credit-control-policy</a> <i>string</i> <b>server</b> |
| Tree       | <a href="#">server</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**diameter** *reference*

|            |  |
|------------|--|
| Synopsis   | Diameter policy that specifies Diameter peers to use   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt credit-control-policy</a> <i>string</i> <b>server</b> <a href="#">diameter</a> <i>reference</i> |
| Tree       | <a href="#">diameter</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt diameter-gy-policy</a> <i>string</i>  |
| Notes      | The following elements are part of a choice: <b>diameter</b> or <b>radius</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**radius**

|            |   |
|------------|---|
| Synopsis   | Use RADIUS servers in the authentication policy   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt credit-control-policy</a> <i>string</i> <b>server</b> <a href="#">radius</a> |
| Tree       | <a href="#">radius</a>  |
| Notes      | The following elements are part of a choice: <b>diameter</b> or <b>radius</b> .   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **diameter-gx-policy** [*name*] *string*

Synopsis Enter the **diameter-gx-policy** list instance

| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ccrt-replay**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>ccrt-replay</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">ccrt-replay</a> |
| Tree       | <a href="#">ccrt-replay</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time between consecutive CCR-T replay attempts  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">ccrt-replay</a> <a href="#">interval</a> <i>number</i> |
| Tree       | <a href="#">interval</a>  |
| Range      | 60 to 86400   |
| Default    | 3600  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**max-lifetime** *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum time that CCR-t messages are replayed   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">ccrt-replay</a> <a href="#">max-lifetime</a> <i>number</i> |
| Tree        | <a href="#">max-lifetime</a>  |
| Description | This command specifies the maximum time that CCR-t messages for Diameter Gx sessions that belong to the Diameter application policy are replayed.   |
| Range       | 1 to 24   |
| Units       | hours   |
| Default     | 24  |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**credit-mcs-interval** *number*

|          |  |
|----------|--|
| Synopsis | Volume syncing interval for usage monitoring   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">credit-mcs-interval</a> <i>number</i> |
| Tree     | <a href="#">credit-mcs-interval</a>  |

|             |   |
|-------------|---|
| Description | This command configures the MCS interval at which the accounting data of subscriber hosts is updated. |
| Range       | 5 to 60   |
| Units       | minutes   |
| Default     | 10  |
| Introduced  | 19.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **destination-realm-learning** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Learn the destination realm from the incoming messages  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <b>destination-realm-learning</b> <i>boolean</i>   |
| Tree        | <a href="#">destination-realm-learning</a>  |
| Description | <p>When configured to <b>true</b>, destination realm learning is enabled on the application level. The destination realm is a mandatory configuration parameter used in outgoing Credit Control Request messages (CCR). The configured destination realm is always used in the initial request (CCR-I) message. The consecutive request message of a Gx session can use the destination realm learned from the replies.</p> <p>When configured to <b>false</b>, destination realm learning is disabled and the configured destination realm is used in outgoing request messages.</p> |
| Default     | true  |
| Introduced  | 20.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **features**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>features</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <b>features</b> |
| Tree       | <a href="#">features</a>   |
| Introduced | 20.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **extended-bandwidth** *boolean*

|          |   |
|----------|---|
| Synopsis | Negotiate support for extended bandwidth AVPs |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure subscriber-mgmt diameter-gx-policy</b> <i>string gx features extended-bandwidth boolean</i>  |
| Tree        | <a href="#">extended-bandwidth</a>  |
| Description | <p>When configured to <b>true</b>, negotiation occurs for the support of extended AVPs that are capable of supporting bandwidth values greater than <math>(2^{32} - 1)</math> b/s. The extended AVPs allow bitrates in kb/s and are as follows:</p> <ul style="list-style-type: none"> <li>• Extended-GBR-DL (AVP code 2850)</li> <li>• Extended-GBR-UL (AVP code 2851)</li> <li>• Extended-Max-Requested-BW-DL (AVP code 554)</li> <li>• Extended-Max-Requested-BW-UL (AVP code 555)</li> <li>• Extended-APN-AMBR-DL (AVP code 2848)</li> <li>• Extended-APN-AMBR-UL (AVP code 2849)</li> </ul> <p>When configured to <b>false</b>, the extended AVPs are not supported.</p> |
| Default     | false   |
| Introduced  | 20.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## include-avp

|            |  |
|------------|--|
| Synopsis   | Enter the <b>include-avp</b> context   |
| Context    | <b>configure subscriber-mgmt diameter-gx-policy</b> <i>string gx include-avp</i> |
| Tree       | <a href="#">include-avp</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                          |

## an-gw-address *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the IP address of this gateway   |
| Context    | <b>configure subscriber-mgmt diameter-gx-policy</b> <i>string gx include-avp an-gw-address boolean</i> |
| Tree       | <a href="#">an-gw-address</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**apn-ambr** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the APN aggregate maximum bitrate  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">apn-ambr</a> <i>boolean</i> |
| Tree       | <a href="#">apn-ambr</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**called-station-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the called station ID   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">called-station-id</a> <i>boolean</i> |
| Tree       | <a href="#">called-station-id</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**calling-station-id**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>calling-station-id</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">calling-station-id</a> |
| Tree       | <a href="#">calling-station-id</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Format of the Calling-Station-ID AVP   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">calling-station-id</a> <i>type</i> <i>keyword</i> |
| Tree       | <a href="#">type</a>   |
| Options    | sap-string, mac, sap-id, remote-id, llid   |
| Default    | sap-string   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ip-can-type** *boolean*

Synopsis Include the IP CAN type

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [include-avp](#) [ip-can-type](#) *boolean*

Tree [ip-can-type](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **logical-access-id** *boolean*

Synopsis Include the logical access id

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [include-avp](#) [logical-access-id](#) *boolean*

Tree [logical-access-id](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nas-port**

Synopsis Enable the **nas-port** context

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [include-avp](#) [nas-port](#)

Tree [nas-port](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **bit-spec** *string*

Synopsis NAS-Port AVP format

Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [include-avp](#) [nas-port](#) [bit-spec](#) *string*

Tree [bit-spec](#)

---

|               |   |
|---------------|---|
| String Length | 1 to 255  |
| Notes         | This element is mandatory.                              |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **nas-port-id**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>nas-port-id</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> |
| Tree       | <a href="#">nas-port-id</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **prefix-string** *string*

|               |  |
|---------------|--|
| Synopsis      | Prefix string for NAS-Port-Id AVP  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">prefix-string</a> <i>string</i> |
| Tree          | <a href="#">prefix-string</a>  |
| String Length | 1 to 8   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **suffix**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>suffix</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> |
| Tree       | <a href="#">suffix</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **circuit-id**

|          |  |
|----------|--|
| Synopsis | Add Circuit ID as suffix   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">circuit-id</a> |

|            |   |
|------------|---|
| Tree       | <a href="#">circuit-id</a>  |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### not-included

|            |  |
|------------|--|
| Synopsis   | Do not add a suffix  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">not-included</a> |
| Tree       | <a href="#">not-included</a>   |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### remote-id

|            |   |
|------------|---|
| Synopsis   | Add Remote ID as suffix   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">remote-id</a> |
| Tree       | <a href="#">remote-id</a>   |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### user-string *string*

|               |   |
|---------------|---|
| Synopsis      | Add a user configurable string as suffix  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">user-string</a> <i>string</i> |
| Tree          | <a href="#">user-string</a>   |
| String Length | 1 to 64   |
| Notes         | The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **nas-port-type**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>nas-port-type</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-type</a> |
| Tree       | <a href="#">nas-port-type</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **type number**

|            |  |
|------------|--|
| Synopsis   | NAS-Port-Type AVP value  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">nas-port-type</a> <a href="#">type</a> <a href="#">number</a> |
| Tree       | <a href="#">type</a>   |
| Range      | 0 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **pdn-connection-id boolean**

|            |  |
|------------|--|
| Synopsis   | Include the PDN connection id  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">pdn-connection-id</a> <a href="#">boolean</a> |
| Tree       | <a href="#">pdn-connection-id</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **physical-access-id boolean**

|          |   |
|----------|---|
| Synopsis | Include the physical access ID  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">physical-access-id</a> <a href="#">boolean</a> |

|            |   |
|------------|---|
| Tree       | <a href="#">physical-access-id</a>                      |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**rai boolean**

|            |  |
|------------|--|
| Synopsis   | Include the routing area identity  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx include-avp</a> <a href="#">rai boolean</a> |
| Tree       | <a href="#">rai</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**rat-type boolean**

|            |   |
|------------|---|
| Synopsis   | Include the RAT type  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx include-avp</a> <a href="#">rat-type boolean</a> |
| Tree       | <a href="#">rat-type</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**sgsn-mcc-mnc boolean**

|             |   |
|-------------|---|
| Synopsis    | Include the 3GPP-SGSN-MCC-MNC AVP   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx include-avp</a> <a href="#">sgsn-mcc-mnc boolean</a>                                       |
| Tree        | <a href="#">sgsn-mcc-mnc</a>  |
| Description | When configured to <b>true</b> , this command enables the inclusion of the 3GPP-SGSN-MCC-MNC AVP, which contains the MCC and MNC as configured under <b>configure subscriber-mgmt gtp serving-network</b> . |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**supported-features** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the supported features   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">supported-features</a> <i>boolean</i> |
| Tree       | <a href="#">supported-features</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**user-equipment-info**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>user-equipment-info</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">user-equipment-info</a> |
| Tree       | <a href="#">user-equipment-info</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Information for User-Equipment-Info attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">user-equipment-info</a> <i>type</i> <i>keyword</i> |
| Tree       | <a href="#">type</a>  |
| Options    | imeisv, mac, eui64, modified-eui64  |
| Default    | mac   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**user-location-info** *boolean*

|          |  |
|----------|--|
| Synopsis | Include the 3GPP-User-Location-Information AVP   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">include-avp</a> <a href="#">user-location-info</a> <i>boolean</i> |
| Tree     | <a href="#">user-location-info</a>   |

---

|             |  |
|-------------|--|
| Description | When configured to <b>true</b> , this command enables the inclusion of the 3GPP-User-Location-Information AVP as signaled in the incoming GTP setup message. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **mac-format** *string*

|               |  |
|---------------|--|
| Synopsis      | MAC address format   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <b>mac-format</b> <i>string</i> |
| Tree          | <a href="#">mac-format</a>   |
| String Length | 2 to 7   |
| Default       | aa:  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **report-ip-address-event** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable CCR-u messages on IP address allocation events  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <b>report-ip-address-event</b> <i>boolean</i> |
| Tree       | <a href="#">report-ip-address-event</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **three-gpp-qos-mapping**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>three-gpp-qos-mapping</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <b>three-gpp-qos-mapping</b> |
| Tree       | <a href="#">three-gpp-qos-mapping</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## apn-ambr-dl

|            |  |
|------------|--|
| Synopsis   | Enter the <b>apn-ambr-dl</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-dl</a> |
| Tree       | <a href="#">apn-ambr-dl</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## aggregate-rate

|            |   |
|------------|---|
| Synopsis   | Map to an aggregate rate  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-dl</a> <a href="#">aggregate-rate</a> |
| Tree       | <a href="#">aggregate-rate</a>  |
| Notes      | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .                         |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## arbiter *string*

|               |  |
|---------------|--|
| Synopsis      | Arbiter name to be overridden  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-dl</a> <a href="#">arbiter</a> <i>string</i> |
| Tree          | <a href="#">arbiter</a>  |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .                                |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## hs-sla-agg-rate

|          |  |
|----------|--|
| Synopsis | Map to an HS SLA aggregate rate  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-dl</a> <a href="#">hs-sla-agg-rate</a> |
| Tree     | <a href="#">hs-sla-agg-rate</a>  |

|            |   |
|------------|---|
| Notes      | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### ignore-override

|            |   |
|------------|---|
| Synopsis   | no override on apn-ambr-dl  |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>diameter-gx-policy</b> <i>string</i> <b>gx</b> <b>three-gpp-qos-mapping</b> <b>apn-ambr-dl</b> <b>ignore-override</b>                              |
| Tree       | <a href="#">ignore-override</a>   |
| Notes      | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### policer *number*

|            |   |
|------------|---|
| Synopsis   | Policer ID to be overridden   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>diameter-gx-policy</b> <i>string</i> <b>gx</b> <b>three-gpp-qos-mapping</b> <b>apn-ambr-dl</b> <b>policer</b> <i>number</i>                        |
| Tree       | <a href="#">policer</a>   |
| Range      | 1 to 63   |
| Notes      | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### queue *number*

|          |   |
|----------|---|
| Synopsis | Queue ID to be overridden   |
| Context  | <b>configure</b> <b>subscriber-mgmt</b> <b>diameter-gx-policy</b> <i>string</i> <b>gx</b> <b>three-gpp-qos-mapping</b> <b>apn-ambr-dl</b> <b>queue</b> <i>number</i>                          |
| Tree     | <a href="#">queue</a>   |
| Range    | 1 to 8  |
| Notes    | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>hs-sla-agg-rate</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> . |

Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **scheduler** *string*

Synopsis Name of the scheduler to be overridden  
 Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [three-gpp-qos-mapping](#) [apn-ambr-dl](#) **scheduler** *string*  
 Tree [scheduler](#)  
 String Length 1 to 32  
 Notes The following elements are part of a choice: **aggregate-rate**, **arbiter**, **hs-sla-agg-rate**, **ignore-override**, **policer**, **queue**, or **scheduler**.  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **apn-ambr-ul**

Synopsis Enter the **apn-ambr-ul** context  
 Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [three-gpp-qos-mapping](#) [apn-ambr-ul](#)  
 Tree [apn-ambr-ul](#)  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **arbiter** *string*

Synopsis Arbiter name to be overridden  
 Context **configure** [subscriber-mgmt](#) [diameter-gx-policy](#) *string* [gx](#) [three-gpp-qos-mapping](#) [apn-ambr-ul](#) **arbiter** *string*  
 Tree [arbiter](#)  
 String Length 1 to 32  
 Notes The following elements are part of a choice: **arbiter**, **ignore-override**, **policer**, **queue**, or **scheduler**.  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ignore-override

|            |   |
|------------|---|
| Synopsis   | no override on apn-ambr-ul  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-ul</a> <b>ignore-override</b> |
| Tree       | <a href="#">ignore-override</a>   |
| Notes      | The following elements are part of a choice: <b>arbiter</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## policer *number*

|            |   |
|------------|---|
| Synopsis   | Policer ID to be overridden   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-ul</a> <b>policer</b> <i>number</i> |
| Tree       | <a href="#">policer</a>   |
| Range      | 1 to 63   |
| Notes      | The following elements are part of a choice: <b>arbiter</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## queue *number*

|            |   |
|------------|---|
| Synopsis   | Queue ID to be overridden   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-ul</a> <b>queue</b> <i>number</i> |
| Tree       | <a href="#">queue</a>   |
| Range      | 1 to 32   |
| Notes      | The following elements are part of a choice: <b>arbiter</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**scheduler** *string*

|               |  |
|---------------|--|
| Synopsis      | Name of the scheduler to be overridden   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">gx</a> <a href="#">three-gpp-qos-mapping</a> <a href="#">apn-ambr-ul</a> <a href="#">scheduler</a> <i>string</i> |
| Tree          | <a href="#">scheduler</a>  |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>arbiter</b> , <b>ignore-override</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**node**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>node</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">node</a> |
| Tree       | <a href="#">node</a>   |
| Notes      | The following elements are part of a choice: <b>node</b> or <b>peer-policy</b> .                                       |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**destination-realm** *string*

|               |  |
|---------------|--|
| Synopsis      | Destination-Realm AVP used by the Diameter peer policy   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">node</a> <a href="#">destination-realm</a> <i>string</i> |
| Tree          | <a href="#">destination-realm</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R4  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**origin-host** *reference***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Origin-Host AVP used by the Diameter policy |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">node</a> <a href="#">origin-host</a> <i>reference</i> |
| Tree       | <a href="#">origin-host</a>   |
| Reference  | <b>configure</b> <a href="#">aaa</a> <a href="#">diameter</a> <a href="#">node</a> <i>string</i>  |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **on-failure**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>on-failure</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">on-failure</a> |
| Tree       | <a href="#">on-failure</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **failover** *boolean*

|            |  |
|------------|--|
| Synopsis   | Session peer failover  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">on-failure</a> <a href="#">failover</a> <i>boolean</i> |
| Tree       | <a href="#">failover</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **handling** *keyword*

|            |  |
|------------|--|
| Synopsis   | Session peer failure handling  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i> <a href="#">on-failure</a> <a href="#">handling</a> <i>keyword</i> |
| Tree       | <a href="#">handling</a>   |
| Options    | terminate, continue, retry-and-terminate   |
| Default    | terminate  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**peer-policy** *reference***WARNING:**

This element is deprecated and will be removed in a future release.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Policy for the Diameter peers  |

| Introduced     | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [name] *string*

Synopsis Diameter application policy name  
 Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string*  
 Tree [diameter-gy-policy](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### description *string*

Synopsis Text description  
 Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [description](#) *string*  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### gy

Synopsis Enter the **gy** context  
 Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#)  
 Tree [gy](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### avp-subscription-id

Synopsis Enter the **avp-subscription-id** context  
 Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [avp-subscription-id](#)  
 Tree [avp-subscription-id](#)  
 Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **origin** keyword

Synopsis Origin for the Subscription-Id-Data AVP

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [avp-subscription-id](#) **origin** *keyword*

Tree [origin](#)

Options subscriber-id, circuit-id, imsi, msisdn, imei, dual-stack-remote-id, mac, username, nas-port-id

Default subscriber-id

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** keyword

Synopsis Origin for the Subscription-Id-Type AVP

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [avp-subscription-id](#) **type** *keyword*

Tree [type](#)

Options e164, imsi, nai, private

Default private

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ccrt-replay**

Synopsis Enable the **ccrt-replay** context

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) **ccrt-replay**

Tree [ccrt-replay](#)

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interval** number

Synopsis Interval at which CCR-t messages are replayed

|             |  |
|-------------|--|
| Context     | <b>configure subscriber-mgmt diameter-gy-policy</b> <i>string gy ccrt-replay interval number</i>   |
| Tree        | <a href="#">interval</a>   |
| Description | This command specifies the interval at which CCR-t messages for Diameter Gy sessions that belong to the Diameter application policy are replayed, until a valid CCA-t response is received or until the configured maximum lifetime period expires.<br>When unconfigured, this command is configured to the default value. |
| Range       | 60 to 86400  |
| Default     | 3600   |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **max-lifetime** *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum time that CCR-t messages are replayed   |
| Context     | <b>configure subscriber-mgmt diameter-gy-policy</b> <i>string gy ccrt-replay max-lifetime number</i>  |
| Tree        | <a href="#">max-lifetime</a>  |
| Description | This command specifies the maximum period of time that CCR-t messages for Diameter Gy sessions that belong to the Diameter application policy are replayed. |
| Range       | 1 to 24   |
| Units       | hours   |
| Default     | 24  |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **destination-realm-learning** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Learn the destination realm from the incoming messages  |
| Context     | <b>configure subscriber-mgmt diameter-gy-policy</b> <i>string gy destination-realm-learning boolean</i>   |
| Tree        | <a href="#">destination-realm-learning</a>  |
| Description | When configured to <b>true</b> , destination realm learning is enabled on the application level.<br>The destination realm is a mandatory configuration parameter used in outgoing Credit Control Request messages (CCR). The configured destination realm is always used in the initial request (CCR-I) message. The consecutive request message of a Gy session can use the destination realm learned from the replies.<br>When configured to <b>false</b> , destination realm learning is disabled and the configured destination realm is used in outgoing request messages. |

|            |   |
|------------|---|
| Default    | true  |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **extended-failure-handling**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>extended-failure-handling</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> |
| Tree       | <a href="#">extended-failure-handling</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of Extended Failure Handling   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **interim-credit**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>interim-credit</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> |
| Tree       | <a href="#">interim-credit</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **max-attempts** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | Attempts to retry setting up a session to the OCS |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <a href="#">max-attempts</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">max-attempts</a>  |
| Range      | 1 to 4294967295   |
| Options    | infinite  |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **reporting** *boolean*

|            |  |
|------------|--|
| Synopsis   | Report interim Credit  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <a href="#">reporting</a> <i>boolean</i> |
| Tree       | <a href="#">reporting</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **validity-time** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Validity time for interim credit   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <a href="#">validity-time</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">validity-time</a>  |
| Range      | 1 to 4294967295  |
| Units      | seconds  |
| Options    | none   |
| Default    | 1800   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **volume**

|          |                                 |
|----------|---------------------------------|
| Synopsis | Enter the <b>volume</b> context |
|----------|---------------------------------|

|            |  |
|------------|--|

| Tree       | <a href="#">volume</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**credits** *number*

|            |  |
|------------|--|
| Synopsis   | Default volume credit value  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <a href="#">volume</a> <a href="#">credits</a> <i>number</i> |
| Tree       | <a href="#">credits</a>  |
| Range      | 1 to 4294967295  |
| Default    | 500  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**units** *keyword*

|            |   |
|------------|---|
| Synopsis   | Default volume credit units   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">interim-credit</a> <a href="#">volume</a> <a href="#">units</a> <i>keyword</i> |
| Tree       | <a href="#">units</a>   |
| Options    | bytes, kilobytes, megabytes, gigabytes  |
| Default    | megabytes   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**new-session-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable use of a new session ID for CCR-i messages  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">extended-failure-handling</a> <a href="#">new-session-id</a> <i>boolean</i> |
| Tree       | <a href="#">new-session-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## include-avp

Synopsis Enter the **include-avp** context

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#)

Tree [include-avp](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## aaa-user-name *boolean*

Synopsis Include RADIUS user name AVP in Diameter Gy messages

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [aaa-user-name](#) *boolean*

Tree [aaa-user-name](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## address-avp *boolean*

Synopsis DCCA AVPs that contain the host address or prefix

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [address-avp](#) *boolean*

Tree [address-avp](#)

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## called-station-id

Synopsis Enable the **called-station-id** context

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [called-station-id](#)

Tree [called-station-id](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **id string**

Synopsis Called station ID

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [called-station-id](#) [id](#) *string*

Tree [id](#)

String Length 1 to 64

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **charging-rule-base-name**

Synopsis Enter the **charging-rule-base-name** context

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [charging-rule-base-name](#)

Tree [charging-rule-base-name](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **category-map**

Synopsis Use the category map name in use for this session

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [charging-rule-base-name](#) [category-map](#)

Tree [category-map](#)

Notes The following elements are part of a choice: **category-map**, **not-included**, or **user-string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **not-included**

Synopsis Do not include Charging-Rule-Base-Name AVP in Diameter DCCA CCR messages

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">charging-rule-base-name</a> <a href="#">not-included</a> |
| Tree       | <a href="#">not-included</a>  |
| Notes      | The following elements are part of a choice: <b>category-map</b> , <b>not-included</b> , or <b>user-string</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **user-string** *string*

|               |  |
|---------------|--|
| Synopsis      | String for charging rule base name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">charging-rule-base-name</a> <a href="#">user-string</a> <i>string</i> |
| Tree          | <a href="#">user-string</a>  |
| String Length | 1 to 64  |
| Notes         | The following elements are part of a choice: <b>category-map</b> , <b>not-included</b> , or <b>user-string</b> .   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ggsn-address**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>ggsn-address</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">ggsn-address</a> |
| Tree       | <a href="#">ggsn-address</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **type** *keyword*

|          |   |
|----------|---|
| Synopsis | Address type of GGSN address AVP  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">ggsn-address</a> <a href="#">type</a> <i>keyword</i> |
| Tree     | <a href="#">type</a>  |
| Options  | ipv4, ipv6  |
| Notes    | This element is mandatory.  |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pdp-context-type** *boolean*

Synopsis Include the DCCA PDP-Context-Type AVP Parameter  
Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy include-avp pdp-context-type](#) *boolean*  
Tree [pdp-context-type](#)  
Default true  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ps-information** *boolean*

Synopsis Enable reporting of AVPs in grouped PS-Information AVP  
Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy include-avp ps-information](#) *boolean*  
Tree [ps-information](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **service-context-id**

Synopsis Enable the **service-context-id** context  
Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy include-avp service-context-id](#)  
Tree [service-context-id](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **id** *string*

Synopsis Name for the service context ID AVP  
Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy include-avp service-context-id](#) *id string*

|               |   |
|---------------|---|
| Tree          | <a href="#">id</a>                                      |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.                              |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **three-gpp-charging-characteristics** *boolean*

|            |  |
|------------|--|
| Synopsis   | DCCA 3GPP charging characteristics AVP parameter   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-charging-characteristics</a> <i>boolean</i> |
| Tree       | <a href="#">three-gpp-charging-characteristics</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **three-gpp-charging-id** *keyword*

|            |   |
|------------|---|
| Synopsis   | DCCA 3GPP charging ID AVP parameter   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-charging-id</a> <i>keyword</i> |
| Tree       | <a href="#">three-gpp-charging-id</a>   |
| Options    | false, auto, esm-info, id   |
| Default    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **three-gpp-ggsn-ipv4-address** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Include the 3GPP-GGSN Address in Diameter Gy messages   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-ggsn-ipv4-address</a> <i>boolean</i> |
| Tree        | <a href="#">three-gpp-ggsn-ipv4-address</a>   |
| Description | When configured to <b>true</b> , this command includes the 3GPP GGSN Address AVP in the Diameter Gy messages. The value is set to the source IPv4 address that is used for outgoing diameter messages.      |

|            |   |
|------------|---|
| Default    | true  |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **three-gpp-ggsn-ipv6-address** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the 3GPP-GGSN-Ipv6 address  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-ggsn-ipv6-address</a> <i>boolean</i> |
| Tree       | <a href="#">three-gpp-ggsn-ipv6-address</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **three-gpp-gprs-negotiated-qos-profile** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the 3GPP GPRS-QoS-Negotiated-Profile AVP  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-gprs-negotiated-qos-profile</a> <i>boolean</i> |
| Tree       | <a href="#">three-gpp-gprs-negotiated-qos-profile</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **three-gpp-imsi** *keyword*

|            |  |
|------------|--|
| Synopsis   | Origin of the information to send in the IMSI AVP  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-imsi</a> <i>keyword</i> |
| Tree       | <a href="#">three-gpp-imsi</a>   |
| Options    | false, subscriber-id, circuit-id, imsi   |
| Default    | subscriber-id  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**three-gpp-nsapi** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the 3GPP-NSAPI  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-nsapi</a> <i>boolean</i> |
| Tree       | <a href="#">three-gpp-nsapi</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**three-gpp-rat-type**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>three-gpp-rat-type</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-rat-type</a> |
| Tree       | <a href="#">three-gpp-rat-type</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**type** *number*

|            |   |
|------------|---|
| Synopsis   | Value for 3GPP-RAT-Type AVP   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-rat-type</a> <i>type</i> <i>number</i> |
| Tree       | <a href="#">type</a>  |
| Range      | 1 to 255  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**three-gpp-selection-mode** *boolean*

|            |  |
|------------|--|
| Synopsis   | DCCA 3GPP selection mode AVP parameter   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gy-policy</a> <i>string</i> <a href="#">gy</a> <a href="#">include-avp</a> <a href="#">three-gpp-selection-mode</a> <i>boolean</i> |
| Tree       | <a href="#">three-gpp-selection-mode</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-session-stop-indicator** *boolean*

Synopsis DCCA 3GPP session stop indicator AVP parameter

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [three-gpp-session-stop-indicator](#) *boolean*

Tree [three-gpp-session-stop-indicator](#)

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **three-gpp-user-location-info** *boolean*

Synopsis DCCA 3GPP session stop indicator AVP parameter

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [three-gpp-user-location-info](#) *boolean*

Tree [three-gpp-user-location-info](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **user-equipment-info-type**

Synopsis Enable the **user-equipment-info-type** context

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [user-equipment-info-type](#)

Tree [user-equipment-info-type](#)

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **type** *keyword*

Synopsis Information to include in User-Equipment-Info attribute

Context **configure** [subscriber-mgmt](#) [diameter-gy-policy](#) *string* [gy](#) [include-avp](#) [user-equipment-info-type](#) *type* *keyword*

Tree [type](#)

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**imei** *boolean*

|          |  |
|----------|--|
| Synopsis | Include the IMEI   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">imei</a> <i>boolean</i> |
| Tree     | <a href="#">imei</a>   |
| Default  | false  |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## nas-port

|            |   |
|------------|---|
| Synopsis   | Enable the <b>nas-port</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port</a> |
| Tree       | <a href="#">nas-port</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## bit-spec *string*

|               |  |
|---------------|--|
| Synopsis      | NAS-Port AVP format  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port</a> <a href="#">bit-spec</a> <i>string</i> |
| Tree          | <a href="#">bit-spec</a>   |
| String Length | 1 to 255   |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## nas-port-id

|            |  |
|------------|--|
| Synopsis   | Enable the <b>nas-port-id</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> |
| Tree       | <a href="#">nas-port-id</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## prefix-string *string*

|          |  |
|----------|--|
| Synopsis | Prefix string for NAS-Port-Id AVP  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">prefix-string</a> <i>string</i> |

|               |   |
|---------------|---|
| Tree          | <a href="#">prefix-string</a>                           |
| String Length | 1 to 8  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## suffix

|            |   |
|------------|---|
| Synopsis   | Enter the <b>suffix</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> |
| Tree       | <a href="#">suffix</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## circuit-id

|            |  |
|------------|--|
| Synopsis   | Add Circuit ID as suffix   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">circuit-id</a> |
| Tree       | <a href="#">circuit-id</a>   |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## not-included

|            |  |
|------------|--|
| Synopsis   | Do not add a suffix  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">not-included</a> |
| Tree       | <a href="#">not-included</a>   |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**remote-id**

|            |   |
|------------|---|
| Synopsis   | Add Remote ID as suffix   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">remote-id</a> |
| Tree       | <a href="#">remote-id</a>   |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**user-string** *string*

|               |   |
|---------------|---|
| Synopsis      | Add a user configurable string as suffix  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-id</a> <a href="#">suffix</a> <a href="#">user-string</a> <i>string</i> |
| Tree          | <a href="#">user-string</a>   |
| String Length | 1 to 64   |
| Notes         | The following elements are part of a choice: <b>circuit-id</b> , <b>not-included</b> , <b>remote-id</b> , or <b>user-string</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**nas-port-type**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>nas-port-type</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-type</a> |
| Tree       | <a href="#">nas-port-type</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**type** (*keyword* | *number*)

|          |   |
|----------|---|
| Synopsis | NAS-Port-Type AVP value   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">nas-port-type</a> <i>type</i> ( <i>keyword</i>   <i>number</i> ) |
| Tree     | <a href="#">type</a>  |

|            |   |
|------------|---|
| Range      | 0 to 255  |
| Options    | rfc-aligned   |
| Default    | rfc-aligned   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **rat-type** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the Radio Access Technology (RAT) type AVP   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">rat-type</a> <i>boolean</i> |
| Tree       | <a href="#">rat-type</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **remote-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the agent remote ID AVP   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">remote-id</a> <i>boolean</i> |
| Tree       | <a href="#">remote-id</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **user-location-info** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Include the 3GPP-User-Location-Information AVP   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">include-avp</a> <a href="#">user-location-info</a> <i>boolean</i> |
| Tree        | <a href="#">user-location-info</a>   |
| Description | When configured to <b>true</b> , this command enables the inclusion of the 3GPP-User-Location-Information AVP as signaled in the incoming GTP setup message.   |
| Default     | false  |
| Introduced  | 16.0.R1  |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mac-format** *string*

Synopsis MAC address format

Context **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string* [nasreq](#) [mac-format](#) *string*

Tree [mac-format](#)

String Length 2 to 7

Default aa:

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **password** *string*

Synopsis AA-request password

Context **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string* [nasreq](#) [password](#) *string*

Tree [password](#)

String Length 1 to 115

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **user-name**

Synopsis Enter the **user-name** context

Context **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string* [nasreq](#) [user-name](#)

Tree [user-name](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **domain-name** *string*

Synopsis Domain name

Context **configure** [subscriber-mgmt](#) [diameter-nasreq-policy](#) *string* [nasreq](#) [user-name](#) [domain-name](#) *string*

Tree [domain-name](#)

String Length 1 to 128

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **format** *keyword*

|            |   |
|------------|---|
| Synopsis   | Format type for username  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">user-name</a> <b>format</b> <i>keyword</i> |
| Tree       | <a href="#">format</a>  |
| Options    | mac, circuit-id, tuple, ascii-converted-circuit-id, ascii-converted-tuple, dhcp-client-vendor-opts, mac-giaddr, nas-port-id   |
| Default    | mac   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **operation** *keyword*

|            |  |
|------------|--|
| Synopsis   | Operation to perform   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <a href="#">nasreq</a> <a href="#">user-name</a> <b>operation</b> <i>keyword</i> |
| Tree       | <a href="#">operation</a>  |
| Options    | append, strip, replace, default  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **node**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>node</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i> <b>node</b> |

| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **sla-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | SLA profile name  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">explicit-subscriber-map</a> <a href="#">entry</a> <i>string</i> <a href="#">sla-profile</a> <i>reference</i> |
| Tree       | <a href="#">sla-profile</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sub-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Subscriber profile name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">explicit-subscriber-map</a> <a href="#">entry</a> <i>string</i> <a href="#">sub-profile</a> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **group-interface-statistics**

|          |   |
|----------|---|
| Synopsis | Enter the <b>group-interface-statistics</b> context |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-statistics</a> |
| Tree       | <a href="#">group-interface-statistics</a>  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                     |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state for statistics collection  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-statistics</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **group-interface-template** [[name](#)] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>group-interface-template</b> list instance  |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i>  |
| Tree           | <a href="#">group-interface-template</a>   |
| Description    | Commands in this context configure a template for automatically-generated group interfaces that is used when creating CUPS sessions. A template with the name "default" is used when no other instance is created, however, the "default" template must be explicitly provisioned. |
| Max. Instances | 256  |
| Introduced     | 20.5.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Identifies this group interface template template   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> |
| Tree          | <a href="#">group-interface-template</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |

Introduced 20.5.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
Context **configure** [subscriber-mgmt](#) [group-interface-template](#) *string* [description](#) *string*  
Tree [description](#)  
String Length 1 to 80  
Introduced 20.5.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ip-mtu** *number*

Synopsis IP MTU applied to outgoing packets  
Context **configure** [subscriber-mgmt](#) [group-interface-template](#) *string* [ip-mtu](#) *number*  
Tree [ip-mtu](#)  
Range 512 to 9786  
Units bytes  
Introduced 20.5.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv4**

Synopsis Enter the **ipv4** context  
Context **configure** [subscriber-mgmt](#) [group-interface-template](#) *string* [ipv4](#)  
Tree [ipv4](#)  
Introduced 20.5.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **icmp**

Synopsis Enter the **icmp** context  
Context **configure** [subscriber-mgmt](#) [group-interface-template](#) *string* [ipv4](#) [icmp](#)  
Tree [icmp](#)

|            |   |
|------------|---|
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **mask-reply** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow responses to ICMP mask requests on the interface  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4 icmp mask-reply</a> <i>boolean</i> |
| Tree       | <a href="#">mask-reply</a>  |
| Default    | true  |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **param-problem**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>param-problem</b> context  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4 icmp param-problem</a> |
| Tree        | <a href="#">param-problem</a>   |
| Description | Commands in this context specify the settings for ICMP Parameter Problem messages generated by the interface.                                   |
| Introduced  | 20.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of sent Parameter Problem messages  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4 icmp param-problem</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 20.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**number** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of Parameter Problem messages to send  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">param-problem</a> <b>number</b> <i>number</i> |
| Tree       | <a href="#">number</a>  |
| Range      | 10 to 1000  |
| Default    | 100   |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**seconds** *number*

|            |  |
|------------|--|
| Synopsis   | Time used to limit number of Parameter Problem messages  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">param-problem</a> <b>seconds</b> <i>number</i> |
| Tree       | <a href="#">seconds</a>  |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 20.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**redirects**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>redirects</b> context  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <b>redirects</b>  |
| Tree        | <a href="#">redirects</a>   |
| Description | <p>Commands in this context configure the settings for ICMP redirect messages generated by the interface.</p> <p>The system sends ICMP redirect messages to alert the sending node that a more optimal route is available on another router on the same subnetwork.</p> |
| Introduced  | 20.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |  |

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## unreachables

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>unreachables</b> context  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">unreachables</a> |
| Tree        | <a href="#">unreachables</a>   |
| Description | Commands in this context specify the settings for ICMP host and network destination unreachable messages generated by the interface.   |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of sending unreachable messages  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">unreachables</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## number *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of unreachable messages to send  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">unreachables</a> <a href="#">number</a> <i>number</i> |
| Tree       | <a href="#">number</a>  |
| Range      | 10 to 2000  |
| Default    | 100   |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**seconds** *number*

|            |   |
|------------|---|
| Synopsis   | Time to limit the number of ICMP unreachable messages   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">unreachables</a> <b>seconds</b> <i>number</i> |
| Tree       | <a href="#">seconds</a>   |
| Range      | 1 to 60   |
| Units      | seconds   |
| Default    | 10  |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**neighbor-discovery**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>neighbor-discovery</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">neighbor-discovery</a> |
| Tree       | <a href="#">neighbor-discovery</a>  |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**proxy-arp-policy** *reference*

|                |   |
|----------------|---|
| Synopsis       | Proxy ARP policy name   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">neighbor-discovery</a> <a href="#">proxy-arp-policy</a> <i>reference</i> |
| Tree           | <a href="#">proxy-arp-policy</a>  |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |
| Max. Instances | 5   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 20.5.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**remote-proxy-arp** *boolean*

|          |  |
|----------|--|
| Synopsis | Enable remote proxy ARP on the interface |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">neighbor-discovery</a> <a href="#">remote-proxy-arp</a> <i>boolean</i> |
| Tree       | <a href="#">remote-proxy-arp</a>  |
| Default    | false   |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## urpf-check

|            |   |
|------------|---|
| Synopsis   | Enable the <b>urpf-check</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">urpf-check</a> |
| Tree       | <a href="#">urpf-check</a>  |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## mode *keyword*

|            |  |
|------------|--|
| Synopsis   | Unicast RPF check mode   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv4</a> <a href="#">urpf-check</a> <i>mode</i> <i>keyword</i> |
| Tree       | <a href="#">mode</a>   |
| Options    | strict, loose, strict-no-ecmp  |
| Default    | strict   |
| Introduced | 20.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ipv6

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv6</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv6</a> |
| Tree       | <a href="#">ipv6</a>   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## urpf-check

|            |   |
|------------|---|
| Synopsis   | Enable the <b>urpf-check</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv6</a> <a href="#">urpf-check</a> |
| Tree       | <a href="#">urpf-check</a>  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## mode *keyword*

|            |  |
|------------|--|
| Synopsis   | Unicast RPF check mode   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">group-interface-template</a> <i>string</i> <a href="#">ipv6</a> <a href="#">urpf-check</a> <i>mode</i> <i>keyword</i> |
| Tree       | <a href="#">mode</a>   |
| Options    | strict, loose, strict-no-ecmp  |
| Default    | strict   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## gtp

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>gtp</b> context  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a>                |
| Tree        | <a href="#">gtp</a>   |
| Description | This command enables the context to configure box-wide GTP parameters and profiles. |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## apn-policy [*name*] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>apn-policy</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> |
| Tree           | <a href="#">apn-policy</a>  |
| Max. Instances | 128   |
| Introduced     | 16.0.R1   |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [name] string

Synopsis APN policy name for a new incoming GTP connection

Context **configure** subscriber-mgmt gtp apn-policy string

Tree [apn-policy](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### apn [apn-name] string

Synopsis Enter the **apn** list instance

Context **configure** subscriber-mgmt gtp apn-policy string apn string

Tree [apn](#)

Max. 1024

Instances

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [apn-name] string

Synopsis GTP APN name

Context **configure** subscriber-mgmt gtp apn-policy string apn string

Tree [apn](#)

String Length 1 to 80

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ambr-qos-mapping

Synopsis Enter the **ambr-qos-mapping** context

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> |
| Tree       | <a href="#">ambr-qos-mapping</a>   |
| Introduced | 16.0.R7  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## downlink

|            |   |
|------------|---|
| Synopsis   | Enable the <b>downlink</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">downlink</a> |
| Tree       | <a href="#">downlink</a>  |
| Introduced | 16.0.R7   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## aggregate-rate

|            |  |
|------------|--|
| Synopsis   | Map the downlink APN-AMBR rate to an aggregate rate  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">downlink</a> <a href="#">aggregate-rate</a> |
| Tree       | <a href="#">aggregate-rate</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .  |
| Introduced | 16.0.R7  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## arbiter *string*

|               |   |
|---------------|---|
| Synopsis      | Name of arbiter to be overridden  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">downlink</a> <a href="#">arbiter</a> <i>string</i> |
| Tree          | <a href="#">arbiter</a>   |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a mandatory choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced    | 16.0.R7   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **policer** *number*

|            |   |
|------------|---|
| Synopsis   | ID of policer to be overridden  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">downlink</a> <a href="#">policer</a> <i>number</i> |
| Tree       | <a href="#">policer</a>   |
| Range      | 1 to 63   |
| Notes      | The following elements are part of a mandatory choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced | 16.0.R7   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **queue** *number*

|            |   |
|------------|---|
| Synopsis   | Map the downlink APN-AMBR rate to a queue PIR override  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">downlink</a> <a href="#">queue</a> <i>number</i> |
| Tree       | <a href="#">queue</a>   |
| Range      | 1 to 8  |
| Notes      | The following elements are part of a mandatory choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced | 16.0.R7   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **scheduler** *string*

|               |   |
|---------------|---|
| Synopsis      | Name of the scheduler to be overridden  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">downlink</a> <a href="#">scheduler</a> <i>string</i> |
| Tree          | <a href="#">scheduler</a>   |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a mandatory choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced    | 16.0.R7   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## uplink

|            |   |
|------------|---|
| Synopsis   | Enable the <b>uplink</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">uplink</a> |
| Tree       | <a href="#">uplink</a>  |
| Introduced | 16.0.R7   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## arbiter *string*

|               |   |
|---------------|---|
| Synopsis      | Name of arbiter to be overridden  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">uplink</a> <a href="#">arbiter</a> <i>string</i> |
| Tree          | <a href="#">arbiter</a>   |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a mandatory choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced    | 16.0.R7   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## policer *number*

|            |   |
|------------|---|
| Synopsis   | Map the uplink APN-AMBR rate to a policer PIR override  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">uplink</a> <a href="#">policer</a> <i>number</i> |
| Tree       | <a href="#">policer</a>   |
| Range      | 1 to 63   |
| Notes      | The following elements are part of a mandatory choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced | 16.0.R7   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## queue *number*

|          |   |
|----------|---|
| Synopsis | Map the uplink APN-AMBR rate to a queue PIR override  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">uplink</a> <a href="#">queue</a> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">queue</a>   |
| Range      | 1 to 32   |
| Notes      | The following elements are part of a mandatory choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> . |
| Introduced | 16.0.R7   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **scheduler** *string*

|               |   |
|---------------|---|
| Synopsis      | Name of scheduler to be overridden  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">ambr-qos-mapping</a> <a href="#">uplink</a> <a href="#">scheduler</a> <i>string</i> |
| Tree          | <a href="#">scheduler</a>   |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a mandatory choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced    | 16.0.R7   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **defaults**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>defaults</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">defaults</a> |
| Tree       | <a href="#">defaults</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **group-interface**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>group-interface</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">defaults</a> <a href="#">group-interface</a> |
| Tree       | <a href="#">group-interface</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**name** *string*

|               |   |
|---------------|---|
| Synopsis      | Group interface name  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">defaults</a> <a href="#">group-interface</a> <a href="#">name</a> <i>string</i> |
| Tree          | <a href="#">name</a>  |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**svc-name** *string*

|               |   |
|---------------|---|
| Synopsis      | Service name where the group interface resides  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">defaults</a> <a href="#">group-interface</a> <a href="#">svc-name</a> <i>string</i> |
| Tree          | <a href="#">svc-name</a>  |
| String Length | 1 to 64   |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**diameter-nasreq-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | NASREQ authentication policy name  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">apn-policy</a> <i>string</i> <a href="#">apn</a> <i>string</i> <a href="#">diameter-nasreq-policy</a> <a href="#">reference</a> |
| Tree       | <a href="#">diameter-nasreq-policy</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i>  |
| Notes      | The following elements are part of a choice: <b>diameter-nasreq-policy</b> , <b>radius-auth-policy</b> , or <b>user-db</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**radius-auth-policy** *reference*

|          |                                   |
|----------|-----------------------------------|
| Synopsis | RADIUS authentication policy name |
|----------|-----------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure subscriber-mgmt gtp apn-policy</b> <i>string apn string radius-auth-policy reference</i>                        |
| Tree       | <a href="#">radius-auth-policy</a>   |
| Reference  | <b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i>  |
| Notes      | The following elements are part of a choice: <b>diameter-nasreq-policy</b> , <b>radius-auth-policy</b> , or <b>user-db</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **skip-gtp-ipv4-allocation** *boolean*

|            |   |
|------------|---|
| Synopsis   | defer IPv4 address allocation to DHCP   |
| Context    | <b>configure subscriber-mgmt gtp apn-policy</b> <i>string apn string skip-gtp-ipv4-allocation boolean</i> |
| Tree       | <a href="#">skip-gtp-ipv4-allocation</a>  |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **user-db** *reference*

|            |  |
|------------|--|
| Synopsis   | Local user database name   |
| Context    | <b>configure subscriber-mgmt gtp apn-policy</b> <i>string apn string user-db reference</i>                                   |
| Tree       | <a href="#">user-db</a>  |
| Reference  | <b>configure subscriber-mgmt local-user-db</b> <i>string</i>   |
| Notes      | The following elements are part of a choice: <b>diameter-nasreq-policy</b> , <b>radius-auth-policy</b> , or <b>user-db</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **max-held-uplink-sessions** *number*

|          |   |
|----------|---|
| Synopsis | Maximum GTP sessions held while UE is disconnected                          |
| Context  | <b>configure subscriber-mgmt gtp max-held-uplink-sessions</b> <i>number</i> |
| Tree     | <a href="#">max-held-uplink-sessions</a>                                    |
| Range    | 0 to 500000   |

|            |                                    |
|------------|------------------------------------|
| Default    | 2000                               |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**peer-profile** *[name] string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>peer-profile</b> list instance   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> |
| Tree       | <a href="#">peer-profile</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Peer profile name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> |
| Tree          | <a href="#">peer-profile</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**interface-type** *keyword*

|          |   |
|----------|---|
| Synopsis | 3GPP interface type for connections toward this peer  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">interface-type</a> <i>keyword</i> |

---

|            |                                    |
|------------|------------------------------------|
| Tree       | <a href="#">interface-type</a>     |
| Options    | gn, s2a, s2b, s11                  |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ip-ttl** *number*

|            |  |
|------------|--|
| Synopsis   | IP header TTL value for GTP control messages   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">ip-ttl</a> <i>number</i> |
| Tree       | <a href="#">ip-ttl</a>   |
| Range      | 1 to 255   |
| Default    | 255  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **keep-alive**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>keep-alive</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">keep-alive</a> |
| Tree       | <a href="#">keep-alive</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of GTP-C echo request messages   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">keep-alive</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R4   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **interval** *number*

|            |   |
|------------|---|
| Synopsis   | Frequency for sending keepalives  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">keep-alive</a> <a href="#">interval</a> <i>number</i> |
| Tree       | <a href="#">interval</a>  |
| Range      | 60 to 180   |
| Units      | seconds   |
| Default    | 60  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **retry-count** *number*

|            |  |
|------------|--|
| Synopsis   | Time between echo retries toward the same peer   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">keep-alive</a> <a href="#">retry-count</a> <i>number</i> |
| Tree       | <a href="#">retry-count</a>  |
| Range      | 1 to 15  |
| Default    | 4  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Timeout after which echo request is deemed unanswered  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">keep-alive</a> <a href="#">timeout</a> <i>number</i> |
| Tree       | <a href="#">timeout</a>  |
| Range      | 1 to 20  |
| Units      | seconds  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **message-retransmit**

|          |  |
|----------|--|
| Synopsis | Enter the <b>message-retransmit</b> context  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">message-retransmit</a> |

|            |                                    |
|------------|------------------------------------|
| Tree       | <a href="#">message-retransmit</a> |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **retry-count** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum unanswered retries before message deemed failed  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">message-retransmit</a> <a href="#">retry-count</a> <i>number</i> |
| Tree       | <a href="#">retry-count</a>  |
| Range      | 1 to 8   |
| Default    | 3  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Timeout after which a message is considered unanswered   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">message-retransmit</a> <a href="#">timeout</a> <i>number</i> |
| Tree       | <a href="#">timeout</a>  |
| Range      | 1 to 30  |
| Units      | seconds  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **python-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Python policy for MGW profile packets sent or received   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">python-policy</a> <i>reference</i> |
| Tree       | <a href="#">python-policy</a>  |
| Reference  | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**s11**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>s11</b> context  |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11</i> |
| Tree       | <b>s11</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                  |

**change-reporting-action** (*number* | *keyword*)

|             |  |
|-------------|--|
| Synopsis    | Value of change reporting action IE sends to the peer  |
| Context     | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 change-reporting-action</i> ( <i>number</i>   <i>keyword</i> )   |
| Tree        | <b>change-reporting-action</b>   |
| Description | <p>This command specifies the value of the change reporting action IE sends to the peer in applicable messages. The peer needs to indicate support first using the appropriate flag in the indication IE.</p> <p>This can be overridden by AAA, if AAA explicitly request notification changes for either ECGI, TAI or both. If AAA does not request any notification changes or only the generic location changes, the configured value is used.</p> <p>When unconfigured, this command indicates that the IE is not sent, unless specified by AAA.</p> |
| Range       | 0 to 255   |
| Options     | cgi-sai, rai, tai, ecgi, cgi-sai-rai, tai-ecgi   |
| Introduced  | 16.0.R5  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**end-marker-count** *number*

|             |  |
|-------------|--|
| Synopsis    | Number of GTP-U end marker packets that are sent   |
| Context     | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 end-marker-count</i> <i>number</i>   |
| Tree        | <b>end-marker-count</b>  |
| Description | This command specifies the number of end marker packets that are sent when it is certain no more packets will be sent over the corresponding GTP-U tunnel, such as after a completed mobility event. |
| Range       | 0 to 5   |
| Default     | 1  |
| Introduced  | 16.0.R5  |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ipv4-mtu *number*

Synopsis IPv4-MTU PCO sent in S11 GTP messages  
Context **configure subscriber-mgmt gtp peer-profile** *string s11 ipv4-mtu number*  
Tree [ipv4-mtu](#)  
Range 512 to 9000  
Default 1400  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### qos

Synopsis Enter the **qos** context  
Context **configure subscriber-mgmt gtp peer-profile** *string s11 qos*  
Tree [qos](#)  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ambr

Synopsis Enter the **ambr** context  
Context **configure subscriber-mgmt gtp peer-profile** *string s11 qos ambr*  
Tree [ambr](#)  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### down-link *number*

Synopsis Downlink Aggregated Maximum Bit Rate (AMBR)  
Context **configure subscriber-mgmt gtp peer-profile** *string s11 qos ambr down-link number*  
Tree [down-link](#)  
Range 0 to 10000000  
Units kilobps

---

|            |                                    |
|------------|------------------------------------|
| Default    | 20000                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **up-link number**

|            |   |
|------------|---|
| Synopsis   | Uplink Aggregated Maximum Bit Rate (AMBR)   |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos ambr up-link number</i> |
| Tree       | <a href="#">up-link</a>   |
| Range      | 0 to 10000000   |
| Units      | kilobps   |
| Default    | 10000   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **arp number**

|            |  |
|------------|--|
| Synopsis   | Allocation or retention priority   |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos arp number</i> |
| Tree       | <a href="#">arp</a>  |
| Range      | 1 to 15  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **down-link**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>down-link</b> context  |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos down-link</i> |
| Tree       | <a href="#">down-link</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **gbr number**

|            |  |
|------------|--|
| Synopsis   | Guaranteed Bit Rate (GBR)  |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos down-link gbr number</i> |
| Tree       | <a href="#">gbr</a>  |
| Range      | 0 to 100000  |
| Units      | kilobps  |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **mbr number**

|            |  |
|------------|--|
| Synopsis   | Maximum Bit Rate (MBR)   |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos down-link mbr number</i> |
| Tree       | <a href="#">mbr</a>  |
| Range      | 0 to 100000  |
| Units      | kilobps  |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **qci number**

|            |  |
|------------|--|
| Synopsis   | QoS Class Identifier (QCI) to send in GTP messages                                 |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos qci number</i> |
| Tree       | <a href="#">qci</a>  |
| Range      | 1 to 9   |
| Default    | 8  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **up-link**

|          |   |
|----------|---|
| Synopsis | Enter the <b>up-link</b> context  |
| Context  | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string s11 qos up-link</i> |

|            |                                    |
|------------|------------------------------------|
| Tree       | <a href="#">up-link</a>            |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**gbr number**

|            |   |
|------------|---|
| Synopsis   | Guaranteed Bit Rate (GBR)   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">s11</a> <a href="#">qos</a> <a href="#">up-link</a> <a href="#">gbr</a> <i>number</i> |
| Tree       | <a href="#">gbr</a>   |
| Range      | 0 to 100000   |
| Units      | kilobps   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**mbr number**

|            |   |
|------------|---|
| Synopsis   | Maximum Bit Rate (MBR)  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">s11</a> <a href="#">qos</a> <a href="#">up-link</a> <a href="#">mbr</a> <i>number</i> |
| Tree       | <a href="#">mbr</a>   |
| Range      | 0 to 100000   |

| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**uplink**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>uplink</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> |
| Tree       | <a href="#">uplink</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## charging-characteristics

|            |   |
|------------|---|
| Synopsis   | Enter the <b>charging-characteristics</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> |
| Tree       | <a href="#">charging-characteristics</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## home

|            |  |
|------------|--|
| Synopsis   | Enter the <b>home</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> |
| Tree       | <a href="#">home</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## bit0 *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit0</a> <i>boolean</i> |
| Tree       | <a href="#">bit0</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## bit1 *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit1</a> <i>boolean</i> |
| Tree       | <a href="#">bit1</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit10** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a><br><a href="#">bit10</a> <i>boolean</i> |
| Tree       | <a href="#">bit10</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit11** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a><br><a href="#">bit11</a> <i>boolean</i> |
| Tree       | <a href="#">bit11</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit12** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a><br><a href="#">bit12</a> <i>boolean</i> |
| Tree       | <a href="#">bit12</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit13** *boolean*

|          |  |
|----------|--|
| Synopsis | Set bit in charging characteristics information element  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a><br><a href="#">bit13</a> <i>boolean</i> |
| Tree     | <a href="#">bit13</a>  |
| Default  | false  |

Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit14** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [home](#)  
[bit14](#) *boolean*  
Tree [bit14](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit15** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [home](#)  
[bit15](#) *boolean*  
Tree [bit15](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit2** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [home](#)  
[bit2](#) *boolean*  
Tree [bit2](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit3** *boolean*

Synopsis Set bit in charging characteristics information element

---

|            |   |
|------------|---|
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics home bit3</b> <i>boolean</i> |
| Tree       | <b>bit3</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**bit4** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set bit in charging characteristics information element   |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics home bit4</b> <i>boolean</i> |
| Tree       | <b>bit4</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**bit5** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set bit in charging characteristics information element   |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics home bit5</b> <i>boolean</i> |
| Tree       | <b>bit5</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**bit6** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set bit in charging characteristics information element   |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics home bit6</b> <i>boolean</i> |
| Tree       | <b>bit6</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**bit7** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit7</a> <i>boolean</i> |
| Tree       | <a href="#">bit7</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit8** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit8</a> <i>boolean</i> |
| Tree       | <a href="#">bit8</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit9** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">home</a> <a href="#">bit9</a> <i>boolean</i> |
| Tree       | <a href="#">bit9</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**roaming**

|          |   |
|----------|---|
| Synopsis | Enter the <b>roaming</b> context  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> |
| Tree     | <a href="#">roaming</a>   |

Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit0** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [roaming](#) **bit0** *boolean*  
Tree [bit0](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit1** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [roaming](#) **bit1** *boolean*  
Tree [bit1](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit10** *boolean*

Synopsis Set bit in charging characteristics information element  
Context **configure** [subscriber-mgmt](#) [gtp](#) [peer-profile](#) *string* [uplink](#) [charging-characteristics](#) [roaming](#) **bit10** *boolean*  
Tree [bit10](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bit11** *boolean*

Synopsis Set bit in charging characteristics information element

---

|            |   |
|------------|---|
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics roaming bit11</b> <i>boolean</i> |
| Tree       | <b>bit11</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **bit12** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set bit in charging characteristics information element   |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics roaming bit12</b> <i>boolean</i> |
| Tree       | <b>bit12</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **bit13** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set bit in charging characteristics information element   |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics roaming bit13</b> <i>boolean</i> |
| Tree       | <b>bit13</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **bit14** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set bit in charging characteristics information element   |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <b>uplink charging-characteristics roaming bit14</b> <i>boolean</i> |
| Tree       | <b>bit14</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**bit15 boolean**

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <a href="#">bit15</a> <i>boolean</i> |
| Tree       | <a href="#">bit15</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit2 boolean**

|            |   |
|------------|---|
| Synopsis   | Set bit in charging characteristics information element   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <a href="#">bit2</a> <i>boolean</i> |
| Tree       | <a href="#">bit2</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**bit3 boolean**

|            |   |
|------------|---|
| Synopsis   | Set bit in charging characteristics information element   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <a href="#">bit3</a> <i>boolean</i> |
| Tree       | <a href="#">bit3</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**bit4 boolean**

|          |   |
|----------|---|
| Synopsis | Set bit in charging characteristics information element   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <a href="#">bit4</a> <i>boolean</i> |
| Tree     | <a href="#">bit4</a>  |

---

|            |                                    |
|------------|------------------------------------|
| Default    | false                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**bit5** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <b>bit5</b> <i>boolean</i> |
| Tree       | <a href="#">bit5</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit6** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <b>bit6</b> <i>boolean</i> |
| Tree       | <a href="#">bit6</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit7** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <b>bit7</b> <i>boolean</i> |
| Tree       | <a href="#">bit7</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit8** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <b>bit8</b> <i>boolean</i> |
| Tree       | <a href="#">bit8</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bit9** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set bit in charging characteristics information element  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">charging-characteristics</a> <a href="#">roaming</a> <b>bit9</b> <i>boolean</i> |
| Tree       | <a href="#">bit9</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**ggsn**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ggsn</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <b>ggsn</b> |
| Tree       | <a href="#">ggsn</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**qos**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>qos</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <b>ggsn</b> <b>qos</b> |
| Tree       | <a href="#">qos</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**ambr**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>ambr</b> context   |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">ambr</a> |
| Tree       | <a href="#">ambr</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**down-link** *number*

|            |  |
|------------|--|
| Synopsis   | Downlink Aggregated Maximum Bit Rate (AMBR)  |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">ambr</a> <a href="#">down-link</a> <i>number</i> |
| Tree       | <a href="#">down-link</a>  |
| Range      | 0 to 10000000  |
| Units      | kilobps  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**up-link** *number*

|            |  |
|------------|--|
| Synopsis   | Uplink Aggregated Maximum Bit Rate (AMBR)  |
| Context    | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">ambr</a> <a href="#">up-link</a> <i>number</i> |
| Tree       | <a href="#">up-link</a>  |
| Range      | 0 to 10000000  |
| Units      | kilobps  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**arp** *number*

|          |   |
|----------|---|
| Synopsis | Allocation or retention priority  |
| Context  | <b>configure subscriber-mgmt gtp peer-profile</b> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">arp</a> <i>number</i> |
| Tree     | <a href="#">arp</a>   |

|            |                                    |
|------------|------------------------------------|
| Range      | 1 to 3                             |
| Default    | 1                                  |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **down-link**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>down-link</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">down-link</a> |
| Tree       | <a href="#">down-link</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **gbr number**

|            |   |
|------------|---|
| Synopsis   | Guaranteed Bit Rate (GBR)   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">down-link</a> <a href="#">gbr</a> <i>number</i> |
| Tree       | <a href="#">gbr</a>   |
| Range      | 0 to 100000   |
| Units      | kilobps   |
| Default    | 2000  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **mbr number**

|            |   |
|------------|---|
| Synopsis   | Maximum Bit Rate (MBR)  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">down-link</a> <a href="#">mbr</a> <i>number</i> |
| Tree       | <a href="#">mbr</a>   |
| Range      | 0 to 100000   |
| Units      | kilobps   |
| Default    | 2000  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## up-link

|            |   |
|------------|---|
| Synopsis   | Enter the <b>up-link</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">up-link</a> |
| Tree       | <a href="#">up-link</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## gbr number

|            |   |
|------------|---|
| Synopsis   | Guaranteed Bit Rate (GBR)   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">up-link</a> <a href="#">gbr</a> <i>number</i> |
| Tree       | <a href="#">gbr</a>   |
| Range      | 0 to 100000   |
| Units      | kilobps   |
| Default    | 5000  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## mbr number

|            |   |
|------------|---|
| Synopsis   | Maximum Bit Rate (MBR)  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">ggsn</a> <a href="#">qos</a> <a href="#">up-link</a> <a href="#">mbr</a> <i>number</i> |
| Tree       | <a href="#">mbr</a>   |
| Range      | 0 to 100000   |
| Units      | kilobps   |
| Default    | 5000  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## pgw

|          |  |
|----------|--|
| Synopsis | Enter the <b>pgw</b> context   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> |
| Tree     | <a href="#">pgw</a>  |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ambr

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ambr</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">ambr</a> |
| Tree       | <a href="#">ambr</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## down-link *number*

|            |   |
|------------|---|
| Synopsis   | Downlink Aggregated Maximum Bit Rate (AMBR)   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">ambr</a> <a href="#">down-link</a> <i>number</i> |
| Tree       | <a href="#">down-link</a>   |
| Range      | 0 to 10000000   |
| Units      | kilobps   |
| Default    | 20000   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## up-link *number*

|          |   |
|----------|---|
| Synopsis | Uplink Aggregated Maximum Bit Rate (AMBR)   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">ambr</a> <a href="#">up-link</a> <i>number</i> |
| Tree     | <a href="#">up-link</a>   |

|            |                                    |
|------------|------------------------------------|
| Range      | 0 to 10000000                      |
| Units      | kilobps                            |
| Default    | 10000                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**arp number**

|            |   |
|------------|---|
| Synopsis   | Allocation or retention priority  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <b>arp</b> <i>number</i> |
| Tree       | <a href="#">arp</a>   |
| Range      | 1 to 15   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**down-link**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>down-link</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <b>down-link</b> |
| Tree       | <a href="#">down-link</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**gbr number**

|            |   |
|------------|---|
| Synopsis   | Guaranteed Bit Rate (GBR)   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">down-link</a> <b>gbr</b> <i>number</i> |
| Tree       | <a href="#">gbr</a>   |
| Range      | 0 to 100000   |
| Units      | kilobps   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **mbr number**

|            |  |
|------------|--|
| Synopsis   | Maximum Bit Rate (MBR)   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">down-link</a> <i>mbr number</i> |
| Tree       | <a href="#">mbr</a>  |
| Range      | 0 to 100000  |
| Units      | kilobps  |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **qci number**

|            |  |
|------------|--|
| Synopsis   | QoS Class Identifier (QCI) to send in GTP messages   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <i>qci number</i> |
| Tree       | <a href="#">qci</a>  |
| Range      | 1 to 9   |
| Default    | 8  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **up-link**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>up-link</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <i>up-link</i> |
| Tree       | <a href="#">up-link</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **gbr number**

|          |  |
|----------|--|
| Synopsis | Guaranteed Bit Rate (GBR)  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">up-link</a> <i>gbr number</i> |
| Tree     | <a href="#">gbr</a>  |
| Range    | 0 to 100000  |

|            |                                    |
|------------|------------------------------------|
| Units      | kilobps                            |
| Default    | 0                                  |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**mbr number**

|            |   |
|------------|---|
| Synopsis   | Maximum Bit Rate (MBR)  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">pgw</a> <a href="#">qos</a> <a href="#">up-link</a> <b>mbr</b> <i>number</i> |
| Tree       | <a href="#">mbr</a>   |
| Range      | 0 to 100000   |
| Units      | kilobps   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**protocol-configuration-options keyword**

|            |  |
|------------|--|
| Synopsis   | Information Element for Protocol Configuration Options   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <a href="#">protocol-configuration-options</a> <i>keyword</i> |
| Tree       | <a href="#">protocol-configuration-options</a>   |
| Options    | pco, apco  |
| Default    | pco  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**rat-type (number | keyword)**

|             |   |
|-------------|---|
| Synopsis    | Default Radio Access Type (RAT) signaled in GTP setup   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">peer-profile</a> <i>string</i> <a href="#">uplink</a> <b>rat-type</b> ( <i>number</i>   <i>keyword</i> )   |
| Tree        | <a href="#">rat-type</a>  |
| Description | This command configures the default Radio Access Technology (RAT) type signaled during GTP setup. RAT identifies the underlying physical connection method for a radio-based communication network. This can be overridden by RADIUS. |
| Range       | 0 to 255  |

|            |  |
|------------|--|
| Options    | utran, geran, wlan, gan, hspa, eutran, virtual |
| Default    | wlan   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR             |

### **report-wlan-location** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Report WLAN or cellular location of UE during setup   |
| Context     | <b>configure</b> <b>subscriber-mgmt</b> <b>gtp</b> <b>peer-profile</b> <i>string</i> <b>uplink</b> <b>report-wlan-location</b> <i>boolean</i>   |
| Tree        | <a href="#">report-wlan-location</a>  |
| Description | When configured to <b>true</b> , this command enables reporting of the WLAN location or cellular location of the UE in the signaling interface (S2a or Gn) between the WLAN GW and the mobile gateway (PGW or GGSN).<br><br>When configured to <b>false</b> , this command disables location reporting. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **session-hold-time** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Time to hold a GTP session after its UE is disconnected  |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>gtp</b> <b>peer-profile</b> <i>string</i> <b>uplink</b> <b>session-hold-time</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">session-hold-time</a>  |
| Range      | 0 to 3600  |
| Units      | seconds  |
| Options    | remaining-lease-time   |
| Default    | 30   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **serving-network**

|          |   |
|----------|---|
| Synopsis | Enable the <b>serving-network</b> context                                 |
| Context  | <b>configure</b> <b>subscriber-mgmt</b> <b>gtp</b> <b>serving-network</b> |
| Tree     | <a href="#">serving-network</a>   |

|             |   |
|-------------|---|
| Description | Commands in this context configure the 3GPP serving network that the node is part of. |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **mcc string**

|               |  |
|---------------|--|
| Synopsis      | Mobile Country Code (MCC) portion of serving network   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">serving-network</a> <a href="#">mcc</a> <i>string</i> |
| Tree          | <a href="#">mcc</a>  |
| String Length | 3  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **mnc string**

|               |  |
|---------------|--|
| Synopsis      | Mobile Network Code (MNC) portion of serving network   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">gtp</a> <a href="#">serving-network</a> <a href="#">mnc</a> <i>string</i> |
| Tree          | <a href="#">mnc</a>  |
| String Length | 2 to 3   |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **host-lockout-policy [name] string**

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>host-lockout-policy</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> |
| Tree           | <a href="#">host-lockout-policy</a>  |
| Max. Instances | 128  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Host lockout policy name to associate with the SAP   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> |
| Tree          | <a href="#">host-lockout-policy</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**host-key** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Parameters in host identification for lockout on a SAP   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">host-key</a> <i>keyword</i> |
| Tree       | <a href="#">host-key</a>   |
| Options    | all, mac   |
| Default    | all  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**lockout-reset-time** *number*

|          |   |
|----------|---|
| Synopsis | Lockout reset time settings   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">lockout-reset-time</a> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">lockout-reset-time</a>                      |
| Range      | 1 to 86400  |
| Units      | seconds   |
| Default    | 60  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## lockout-time

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lockout-time</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">lockout-time</a> |
| Tree       | <a href="#">lockout-time</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## max number

|            |   |
|------------|---|
| Synopsis   | Maximum lockout time  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">lockout-time</a> <i>max number</i> |
| Tree       | <a href="#">max</a>   |
| Range      | 1 to 86400  |
| Units      | seconds   |
| Default    | 3600  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## min number

|            |   |
|------------|---|
| Synopsis   | Minimum lockout time  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i> <a href="#">lockout-time</a> <i>min number</i> |
| Tree       | <a href="#">min</a>   |
| Range      | 1 to 86400  |
| Units      | seconds   |
| Default    | 10  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-lockout-hosts** *number*

Synopsis Max lockout hosts  
 Context **configure** [subscriber-mgmt](#) [host-lockout-policy](#) *string* [max-lockout-hosts](#) *number*  
 Tree [max-lockout-hosts](#)  
 Range 1 to 32000  
 Default 100  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **host-tracking-policy** [[name](#)] *string*

Synopsis Enter the **host-tracking-policy** list instance  
 Context **configure** [subscriber-mgmt](#) [host-tracking-policy](#) *string*  
 Tree [host-tracking-policy](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis Host tracking policy name  
 Context **configure** [subscriber-mgmt](#) [host-tracking-policy](#) *string*  
 Tree [host-tracking-policy](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                              |

### **agg-rate**

|             |  |
|-------------|--|
| Synopsis    | Maximum total rate for all subscriber egress queues  |
| Context     | <b>configure subscriber-mgmt igmp-policy</b> <i>string</i> <b>egress-rate-modify</b> <b>agg-rate</b>                           |
| Tree        | <a href="#">agg-rate</a>   |
| Description | This command specifies the maximum total rate for all subscriber egress queues for each subscriber associated with the policy. |
| Notes       | The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **scheduler** *string*

|               |   |
|---------------|---|
| Synopsis      | Scheduler to be applied for rate modification   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">egress-rate-modify scheduler</a> <i>string</i> |
| Tree          | <a href="#">scheduler</a>   |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **fast-leave** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable fast leave  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">fast-leave</a> <i>boolean</i> |
| Tree       | <a href="#">fast-leave</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **import-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Import policy that filters IGMP packets   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">import-policy</a> <i>reference</i> |
| Tree       | <a href="#">import-policy</a>   |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>                            |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **maximum-number-group-sources** *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum number of group sources for this interface  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">maximum-number-group-sources</a> <i>number</i>   |
| Tree        | <a href="#">maximum-number-group-sources</a>  |
| Description | This command configures the maximum number of group sources for which IGMP or MLD can have local receiver information based on received IGMP or MLD reports on this interface. When this configuration is changed dynamically to a lower value than |

the currently accepted number of group sources, the group sources that are already accepted are not deleted. Only new group sources are not allowed.

|            |   |
|------------|---|
| Range      | 1 to 32000  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **maximum-number-groups** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of groups for this interface   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <b>maximum-number-groups</b> <i>number</i> |
| Tree       | <a href="#">maximum-number-groups</a>   |
| Range      | 1 to 16000  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **maximum-number-sources** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of sources that are allowed per group   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <b>maximum-number-sources</b> <i>number</i> |
| Tree       | <a href="#">maximum-number-sources</a>   |
| Range      | 1 to 1000  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **multicast-reporter**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>multicast-reporter</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <b>multicast-reporter</b> |
| Tree       | <a href="#">multicast-reporter</a>   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of the multicast reporter  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">multicast-reporter</a> <b>admin-state</b> <i>keyword</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">admin-state</a>                             |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **destination** *reference*

|            |   |
|------------|---|
| Synopsis   | Multicast reporter destination  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">multicast-reporter destination reference</a> |
| Tree       | <a href="#">destination</a>   |
| Reference  | <b>configure</b> <a href="#">multicast-management multicast-reporting-destination</a> <i>string</i>                                 |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **optional-fields**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>optional-fields</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">multicast-reporter optional-fields</a> |
| Tree       | <a href="#">optional-fields</a>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **host-mac** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include host mac address  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">multicast-reporter optional-fields host-mac</a> <i>boolean</i> |
| Tree       | <a href="#">host-mac</a>  |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**pppoe-session-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include PPPoE session ID in multicast reporting message   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">multicast-reporter</a> <a href="#">optional-fields</a> <a href="#">pppoe-session-id</a> <i>boolean</i> |

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**svc-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include service ID  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">multicast-reporter</a> <a href="#">optional-fields</a> <a href="#">svc-id</a> <i>boolean</i> |
| Tree       | <a href="#">svc-id</a>  |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**query-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time between two consecutive host-query messages  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">igmp-policy</a> <i>string</i> <a href="#">query-interval</a> <i>number</i> |
| Tree       | <a href="#">query-interval</a>  |
| Range      | 2 to 1024   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-last-member-interval** *number*

Synopsis Time between group-specific query messages  
Context **configure** [subscriber-mgmt igmp-policy](#) *string* [query-last-member-interval](#) *number*  
Tree [query-last-member-interval](#)  
Range 1 to 1023  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-response-interval** *number*

Synopsis Time to wait for a response to the host-query messages  
Context **configure** [subscriber-mgmt igmp-policy](#) *string* [query-response-interval](#) *number*  
Tree [query-response-interval](#)  
Range 1 to 1023  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **redirection-policy** *reference*

Synopsis Multicast redirection action applied to the subscriber  
Context **configure** [subscriber-mgmt igmp-policy](#) *string* [redirection-policy](#) *reference*  
Tree [redirection-policy](#)  
Reference **configure** [policy-options](#) [policy-statement](#) *string*  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **replication** *keyword*

Synopsis Multicast replication mode for subscriber multicast  
Context **configure** [subscriber-mgmt igmp-policy](#) *string* [replication](#) *keyword*  
Tree [replication](#)  
Options per-sap, per-host, per-spi

|            |   |
|------------|---|
| Default    | per-sap   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **router-alert-check** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable router alert checking for IGMP or MLD messages  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">router-alert-check</a> <i>boolean</i> |
| Tree       | <a href="#">router-alert-check</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **static**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>static</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">static</a> |
| Tree       | <a href="#">static</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **group** [[group-address](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>group</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">static group</a> <i>string</i> |
| Tree       | <a href="#">group</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **[group-address]** *string*

|          |   |
|----------|---|
| Synopsis | Group address of static IGMP multicast channel  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">static group</a> <i>string</i> |
| Tree     | <a href="#">group</a>   |

|             |   |
|-------------|---|
| Description | This command configures an address that receives data on an interface. The IP address must be unique for each static group. |
| Notes       | This element is part of a list key.   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **source** [[source-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>source</b>   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">static group</a> <i>string</i> <a href="#">source</a> <i>string</i> |
| Tree       | <a href="#">source</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **[source-address]** *string*

|            |  |
|------------|--|
| Synopsis   | Source IP address of multicast channel sending data  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">static group</a> <i>string</i> <a href="#">source</a> <i>string</i> |
| Tree       | <a href="#">source</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R2  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **starg**

|            |   |
|------------|---|
| Synopsis   | any source address (*,G)  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">static group</a> <i>string</i> <a href="#">starg</a> |
| Tree       | <a href="#">starg</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .  |
| Introduced | 16.0.R2   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**use-multicast-destination-mac** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use multicast destination mac address for outgoing traffic.   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">use-multicast-destination-mac</a> <i>boolean</i> |
| Tree       | <a href="#">use-multicast-destination-mac</a>   |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**version** *keyword*

|            |   |
|------------|---|
| Synopsis   | IGMP protocol version   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt igmp-policy</a> <i>string</i> <a href="#">version</a> <i>keyword</i> |
| Tree       | <a href="#">version</a>   |
| Options    | 1, 2, 3   |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipoe-session-policy** [[name](#)] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>ipoe-session-policy</b> list instance                                 |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i> |
| Tree           | <a href="#">ipoe-session-policy</a>  |
| Max. Instances | 256  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                            |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | IPoE session policy name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i> |
| Tree          | <a href="#">ipoe-session-policy</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **circuit-id-from-auth** *boolean*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Use circuit ID from authentication server to identify session  
 Context **configure** [subscriber-mgmt ipoe-session-policy](#) *string* [circuit-id-from-auth](#) *boolean*  
 Tree [circuit-id-from-auth](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
 Context **configure** [subscriber-mgmt ipoe-session-policy](#) *string* [description](#) *string*  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session-key**

Synopsis Enter the **session-key** context  
 Context **configure** [subscriber-mgmt ipoe-session-policy](#) *string* [session-key](#)  
 Tree [session-key](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cid** *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Use the Circuit ID as part of the index   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i> <a href="#">session-key cid</a> <i>boolean</i> |
| Tree       | <a href="#">cid</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**mac** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use the MAC address as part of the index  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i> <a href="#">session-key mac</a> <i>boolean</i> |
| Tree       | <a href="#">mac</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**rid** *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Use the remote ID as part of the index  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i> <a href="#">session-key rid</a> <i>boolean</i> |
| Tree       | <a href="#">rid</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**sap** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use the SAP ID as part of the index   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i> <a href="#">session-key sap</a> <i>boolean</i> |
| Tree       | <a href="#">sap</a>   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session-timeout** (*number* | *keyword*)

Synopsis Timeout for IPoE sessions

Context **configure** [subscriber-mgmt ipoe-session-policy](#) *string* **session-timeout** (*number* | *keyword*)

Tree [session-timeout](#)

Range 1 to 31104000

Options unlimited

Default unlimited

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **isa-filter** [[name](#)] *string*

Synopsis Enter the **isa-filter** list instance

Context **configure** [subscriber-mgmt isa-filter](#) *string*

Tree [isa-filter](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [[name](#)] *string*

Synopsis ISA filter name

Context **configure** [subscriber-mgmt isa-filter](#) *string*

Tree [isa-filter](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description

## import *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Extended community name for default import policy  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">bgp</a> <a href="#">route-target</a> <a href="#">import</a> <i>string</i> |
| Tree          | <a href="#">import</a>   |
| String Length | 10 to 32   |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## description *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## export

|            |   |
|------------|---|
| Synopsis   | Enter the <b>export</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> |
| Tree       | <a href="#">export</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## advertise-pools

|          |   |
|----------|---|
| Synopsis | Enter the <b>advertise-pools</b> context  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">advertise-pools</a> |

|            |  |
|------------|--|
| Tree       | <a href="#">advertise-pools</a>              |
| Introduced | 16.0.R4                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of NAT pool route advertisement   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">advertise-pools</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **pool** [router-instance](#) *string* [name](#) *string*

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>pool</b>  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">advertise-pools</a> <a href="#">pool</a> <a href="#">router-instance</a> <i>string</i> <a href="#">name</a> <i>string</i> |
| Tree       | <a href="#">pool</a>  |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **router-instance** *string*

|            |   |
|------------|---|
| Synopsis   | Router-instance of the NAT pool   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">advertise-pools</a> <a href="#">pool</a> <a href="#">router-instance</a> <i>string</i> <a href="#">name</a> <i>string</i> |
| Tree       | <a href="#">pool</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**name *string***

|               |   |
|---------------|---|
| Synopsis      | NAT pool name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">advertise-pools</a> <a href="#">pool</a> <a href="#">router-instance</a> <i>string</i> <a href="#">name</a> <i>string</i> |
| Tree          | <a href="#">pool</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R4   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**gateway-address-range**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>gateway-address-range</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">gateway-address-range</a> |
| Tree       | <a href="#">gateway-address-range</a>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**end *string***

|            |  |
|------------|--|
| Synopsis   | Upper bound of the gateway address range   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">gateway-address-range</a> <i>end</i> <i>string</i> |
| Tree       | <a href="#">end</a>  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**start *string***

|          |  |
|----------|--|
| Synopsis | Lower bound of the gateway address range   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <a href="#">export</a> <a href="#">gateway-address-range</a> <i>start</i> <i>string</i> |
| Tree     | <a href="#">start</a>  |
| Notes    | This element is mandatory.   |

|            |  |
|------------|--|
| Introduced | 16.0.R4                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## vxlan

|            |  |
|------------|--|
| Synopsis   | Enter the <b>vxlan</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt isa-service-chaining evpn string export vxlan</a> |
| Tree       | <a href="#">vxlan</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## vni number

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | VNI of the VXLAN created by the EVPN service  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt isa-service-chaining evpn string export vxlan vni number</a> |
| Tree       | <a href="#">vni</a>   |
| Range      | 1 to 16777215   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## import-mode keyword

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Import mode for the EVPN  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt isa-service-chaining evpn string import-mode keyword</a> |
| Tree       | <a href="#">import-mode</a>   |
| Options    | none, bridged, routed   |
| Default    | none  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**prefix-route-resolution** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | How prefix routes should be resolved   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i> <b>prefix-route-resolution</b> <i>keyword</i> |
| Tree       | <a href="#">prefix-route-resolution</a>  |
| Options    | recursive, non-recursive   |
| Default    | recursive  |
| Introduced | 16.0.R6  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**mac-prefix** *string*

|               |  |
|---------------|--|
| Synopsis      | MAC prefix for all NAT groups for Service Chaining   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">mac-prefix</a> <i>string</i> |
| Tree          | <a href="#">mac-prefix</a>   |
| String Length | 8  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**vas-filter** [[name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>vas-filter</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> |
| Tree       | <a href="#">vas-filter</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**[name]** *string*

|          |  |
|----------|--|
| Synopsis | VAS filter name  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> |

|               |  |
|---------------|--|
| Tree          | <a href="#">vas-filter</a>                   |
| String Length | 1 to 32                                      |
| Notes         | This element is part of a list key.          |
| Introduced    | 16.0.R4                                      |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **entry** [*id*] *number*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>entry</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> |
| Tree           | <a href="#">entry</a>  |
| Max. Instances | 64   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **[id]** *number*

|            |  |
|------------|--|
| Synopsis   | VAS filter entry ID  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> |
| Tree       | <a href="#">entry</a>  |
| Range      | 1 to 65535   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**action** [*direction*] *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enter the <b>action</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> |
| Tree       | <a href="#">action</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**[direction]** *keyword*

|            |  |
|------------|--|
| Synopsis   | Direction for the action in a VAS filter entry   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> |
| Tree       | <a href="#">action</a>   |
| Options    | upstream, downstream   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**fail-action** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Action for unresolved SF-IP or ESI  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> <a href="#">fail-action</a> <i>keyword</i> |
| Tree       | <a href="#">fail-action</a>   |
| Options    | drop, accept  |
| Default    | accept  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## forward

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enable the **forward** context

Context **configure** [subscriber-mgmt](#) [isa-service-chaining](#) [vas-filter](#) *string entry number action*  
keyword [forward](#)

Tree [forward](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## esi string

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis ESI for the action in the VAS filter entry

Context **configure** [subscriber-mgmt](#) [isa-service-chaining](#) [vas-filter](#) *string entry number action*  
keyword [forward](#) [esi](#) *string*

Tree [esi](#)

Default 00:00:00:00:00:00:00:00:00

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## sf-ip (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Forwarding SF IP address for the action

Context **configure** [subscriber-mgmt](#) [isa-service-chaining](#) [vas-filter](#) *string entry number action*  
keyword [forward](#) [sf-ip](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [sf-ip](#)

|            |  |
|------------|--|
| Notes      | This element is mandatory.                   |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **svc reference**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | EVPN service used for forwarding packets   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <i>entry</i> <i>number</i> <i>action</i><br><i>keyword</i> <a href="#">forward</a> <a href="#">svc</a> <i>reference</i> |
| Tree       | <a href="#">svc</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">evpn</a> <i>string</i>   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **insert-nsh**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enter the <b>insert-nsh</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <i>entry</i> <i>number</i> <i>action</i><br><i>keyword</i> <a href="#">insert-nsh</a> |
| Tree       | <a href="#">insert-nsh</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **meta-data**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enter the <b>meta-data</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a><br><i>keyword</i> <a href="#">insert-nsh</a> <a href="#">meta-data</a> |
| Tree       | <a href="#">meta-data</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## insert-subscriber-id

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Insert the subscriber-id in the NSH   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a><br><i>keyword</i> <a href="#">insert-nsh</a> <a href="#">meta-data</a> <a href="#">insert-subscriber-id</a> |
| Tree       | <a href="#">insert-subscriber-id</a>  |
| Notes      | The following elements are part of a choice: <b>insert-subscriber-id</b> or <b>opaque-data</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## opaque-data *string*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Opaque meta-data for the NSH   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a><br><i>keyword</i> <a href="#">insert-nsh</a> <a href="#">meta-data</a> <a href="#">opaque-data</a> <i>string</i> |
| Tree          | <a href="#">opaque-data</a>  |
| String Length | 10 18 26 34  |
| Notes         | The following elements are part of a choice: <b>insert-subscriber-id</b> or <b>opaque-data</b> .   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## svc-path

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Enable the <b>svc-path</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a><br><i>keyword</i> <a href="#">insert-nsh</a> <a href="#">svc-path</a> |

| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## path-id *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Path ID in the base part of NSH   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a><br><i>keyword</i> <a href="#">insert-nsh</a> <a href="#">svc-path</a> <a href="#">path-id</a> <i>number</i> |
| Tree       | <a href="#">path-id</a>   |
| Range      | 1 to 16777215   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## svc-index *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Service index inserted in the base part of NSH  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a><br><i>keyword</i> <a href="#">insert-nsh</a> <a href="#">svc-path</a> <a href="#">svc-index</a> <i>number</i> |
| Tree     | <a href="#">svc-index</a>   |
| Range    | 1 to 255  |

|            |  |
|------------|--|
| Notes      | This element is mandatory.                   |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the VAS filter  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <i>entry</i> <i>number</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <i>entry</i> <i>number</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **match**

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enter the <b>match</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <i>entry</i> <i>number</i> <b>match</b> |
| Tree       | <a href="#">match</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**foreign-ip** (*ipv4-unicast-prefix* | *ipv4-unicast-address*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Foreign IP address or prefix for match criterion   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">foreign-ip</a> ( <i>ipv4-unicast-prefix</i>   <i>ipv4-unicast-address</i> ) |
| Tree       | <a href="#">foreign-ip</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**foreign-port** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Foreign TCP or UDP port as the match criterion  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">foreign-port</a> <i>number</i> |
| Tree       | <a href="#">foreign-port</a>  |
| Range      | 1 to 65535  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**protocol** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | IP protocol to match the VAS filter  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-service-chaining</a> <a href="#">vas-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">protocol</a> <i>keyword</i> |
| Tree     | <a href="#">protocol</a>   |
| Options  | tcp-udp, none, icmp, tcp, udp  |

|            |  |
|------------|--|
| Default    | none   |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **local-user-db** *[name]* *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>local-user-db</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> |
| Tree           | <a href="#">local-user-db</a>  |
| Max. Instances | 127  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                      |

### **[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Local user database name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> |
| Tree          | <a href="#">local-user-db</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                      |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the local user database   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipoe**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipoe</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ipoe</a> |
| Tree       | <a href="#">ipoe</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**host** [[host-name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>host</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> |
| Tree       | <a href="#">host</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[host-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Host name  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> |
| Tree          | <a href="#">host</a>   |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the host  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string admin-state keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**authentication**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>authentication</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string authentication</i> |
| Tree       | <a href="#">authentication</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**auth-domain-name** *string*

|               |  |
|---------------|--|
| Synopsis      | Domain name appended to the username for the host  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string authentication auth-domain-name string</i> |
| Tree          | <a href="#">auth-domain-name</a>   |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**gx-policy** *string*

|               |   |
|---------------|---|
| Synopsis      | Diameter application policy   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string authentication gx-policy string</i> |
| Tree          | <a href="#">gx-policy</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nasreq-auth-policy** *string*

Synopsis Diameter NASREQ application policy for authentication

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [authentication](#) [nasreq-auth-policy](#) *string*

Tree [nasreq-auth-policy](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-auth-policy** *string*

Synopsis Host authentication policy

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [authentication](#) [radius-auth-policy](#) *string*

Tree [radius-auth-policy](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gtp-interface**

Synopsis Enable the **gtp-interface** context

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [gtp-interface](#)

Tree [gtp-interface](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **name** *string*

Synopsis IP interface name

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [gtp-interface](#) [name](#) *string*

Tree [name](#)

|               |   |

|------------|---|
| Synopsis   | Enter the <b>address</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> |
| Tree       | <a href="#">address</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## gi-address *keyword*

|            |   |
|------------|---|
| Synopsis   | Use gi-address to select a pool with the given scope  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">gi-address</a> <i>keyword</i> |
| Tree       | <a href="#">gi-address</a>  |
| Options    | subnet-scope, pool-scope  |
| Notes      | The following elements are part of a choice: <b>gi-address</b> , <b>ip-address</b> , <b>pool</b> , or <b>use-pool-from-client</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ip-address *string*

|            |  |
|------------|--|
| Synopsis   | Fixed IPv4 address of the host   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">ip-address</a> <i>string</i> |
| Tree       | <a href="#">ip-address</a>   |
| Notes      | The following elements are part of a choice: <b>gi-address</b> , <b>ip-address</b> , <b>pool</b> , or <b>use-pool-from-client</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## pool

|          |  |
|----------|--|
| Synopsis | Enable the <b>pool</b> context   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">pool</a> |
| Tree     | <a href="#">pool</a>   |

---

|            |   |
|------------|---|
| Notes      | The following elements are part of a choice: <b>gi-address</b> , <b>ip-address</b> , <b>pool</b> , or <b>use-pool-from-client</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **delimiter string**

|               |   |
|---------------|---|
| Synopsis      | Delimiter separating primary and secondary pool names   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">pool</a> <a href="#">delimiter</a> <a href="#">string</a> |
| Tree          | <a href="#">delimiter</a>   |
| String Length | 1   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **primary string**

|               |   |
|---------------|---|
| Synopsis      | Primary pool name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">pool</a> <a href="#">primary</a> <a href="#">string</a> |
| Tree          | <a href="#">primary</a>   |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **secondary string**

|               |   |
|---------------|---|
| Synopsis      | Secondary pool name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">pool</a> <a href="#">secondary</a> <a href="#">string</a> |
| Tree          | <a href="#">secondary</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## use-pool-from-client

|            |   |
|------------|---|
| Synopsis   | Enable the <b>use-pool-from-client</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv4 address use-pool-from-client</i> |
| Tree       | <a href="#">use-pool-from-client</a>  |
| Notes      | The following elements are part of a choice: <b>gi-address</b> , <b>ip-address</b> , <b>pool</b> , or <b>use-pool-from-client</b> .             |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## delimiter *string*

|               |  |
|---------------|--|
| Synopsis      | Delimiter character to combine primary and secondary pool names  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv4 address use-pool-from-client delimiter string</i> |
| Tree          | <a href="#">delimiter</a>  |
| String Length | 1  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## gi-address *string*

|            |  |
|------------|--|
| Synopsis   | GI addresses based on the host entry in the LUDB   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv4 gi-address string</i> |
| Tree       | <a href="#">gi-address</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## option [*number*] (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Enter the <b>option</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string ipoe host string ipv4 option (number   keyword)</i> |
| Tree       | <a href="#">option</a>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [number] (*number* | *keyword*)

Synopsis DHCP option to send identification strings to client

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [ipv4](#) [option](#) (*number* | *keyword*)

Tree [option](#)

Range 1 to 254

Options subnet-mask, default-router, dns-server, domain-name, netbios-name-server, netbios-node-type, lease-time, lease-renew-time, lease-rebind-time

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ascii-string** *string*

Synopsis DHCP option specified as an ASCII string

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [ipv4](#) [option](#) (*number* | *keyword*) [ascii-string](#) *string*

Tree [ascii-string](#)

String Length 1 to 127

Notes The following elements are part of a mandatory choice: **ascii-string**, **duration**, **empty**, **hex-string**, **ipv4-address**, or **netbios-node-type**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **duration** *number*

Synopsis DHCP option as time duration

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [ipv4](#) [option](#) (*number* | *keyword*) [duration](#) *number*

Tree [duration](#)

Range 10 to 315446399

Units seconds

Notes The following elements are part of a mandatory choice: **ascii-string**, **duration**, **empty**, **hex-string**, **ipv4-address**, or **netbios-node-type**.

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## empty

|            |  |
|------------|--|
| Synopsis   | Empty DHCP option.   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <b>empty</b> |
| Tree       | <a href="#">empty</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## hex-string *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP option specified as hexadecimal string   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <b>hex-string</b> <i>string</i> |
| Tree          | <a href="#">hex-string</a>  |
| String Length | 1 to 256  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ipv4-address *string*

|                |   |
|----------------|---|
| Synopsis       | DHCP option as a list of IPv4 addresses   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <b>ipv4-address</b> <i>string</i> |
| Tree           | <a href="#">ipv4-address</a>  |
| Max. Instances | 4   |
| Notes          | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .<br>This element is ordered by the user.   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **netbios-node-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | DHCP option as NetBIOS node type  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> ) <b>netbios-node-type</b> <i>keyword</i> |
| Tree       | <a href="#">netbios-node-type</a>   |
| Options    | b-node, p-node, m-node, h-node  |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **server** *string*

|            |   |
|------------|---|
| Synopsis   | IPv4 address of the DHCP server   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv4</a> <b>server</b> <i>string</i> |
| Tree       | <a href="#">server</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipv6**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv6</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>ipv6</b> |
| Tree       | <a href="#">ipv6</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **address** *string*

|          |  |
|----------|--|
| Synopsis | Fixed IPv6 address of the host   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <b>address</b> <i>string</i> |
| Tree     | <a href="#">address</a>  |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **address-pool** *string*

Synopsis IPv6 address pool name  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string ipoe host string ipv6 address-pool string*  
Tree [address-pool](#)  
String Length 1 to 32  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **delegated-prefix** *string*

Synopsis IPv6 delegated prefix of this host  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string ipoe host string ipv6 delegated-prefix string*  
Tree [delegated-prefix](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **delegated-prefix-length** *number*

Synopsis Delegated prefix length  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string ipoe host string ipv6 delegated-prefix-length number*  
Tree [delegated-prefix-length](#)  
Range 48 to 64  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **delegated-prefix-pool** *string*

Synopsis Delegated prefix pool  
Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string ipoe host string ipv6 delegated-prefix-pool string*

|               |   |
|---------------|---|
| Tree          | <a href="#">delegated-prefix-pool</a>                   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **link-address** *string*

|            |   |
|------------|---|
| Synopsis   | Link address used for prefix selection at DHCP server   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <b>link-address</b> <i>string</i> |
| Tree       | <a href="#">link-address</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **option** [[number](#)] (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Enter the <b>option</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <b>option</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">option</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **[number]** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | The number of the DHCPv6 option.   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <b>option</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">option</a>   |
| Range      | 23   |
| Options    | dns-server   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### hex-string *string*

|               |  |
|---------------|--|
| Synopsis      | DHCP option specified as hexadecimal string  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">hex-string</a> <i>string</i> |
| Tree          | <a href="#">hex-string</a>   |
| String Length | 1 to 256   |
| Notes         | The following elements are part of a mandatory choice: <b>hex-string</b> or <b>ipv6-address</b> .  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### ipv6-address *string*

|                |  |
|----------------|--|
| Synopsis       | DHCP option specified as a list of IPv6 addresses  |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ipv6-address</a> <i>string</i> |
| Tree           | <a href="#">ipv6-address</a>   |
| Max. Instances | 4  |
| Notes          | The following elements are part of a mandatory choice: <b>hex-string</b> or <b>ipv6-address</b> .<br>This element is ordered by the user.  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### router-advertisement-policy *string*

|               |   |
|---------------|---|
| Synopsis      | IPv6 router advertisement policy  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisement-policy</a> <i>string</i> |
| Tree          | <a href="#">router-advertisement-policy</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### server *string*

|          |                                 |
|----------|---------------------------------|
| Synopsis | IPv6 address of the DHCP server |
|----------|---------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">server</a> <i>string</i> |
| Tree       | <a href="#">server</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **slaac-prefix** *string*

|            |  |
|------------|--|
| Synopsis   | IPv6 SLAAC prefix of this host   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">slaac-prefix</a> <i>string</i> |
| Tree       | <a href="#">slaac-prefix</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **slaac-prefix-pool** *string*

|               |   |
|---------------|---|
| Synopsis      | IPv6 SLAAC prefix pool of this host   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">slaac-prefix-pool</a> <i>string</i> |
| Tree          | <a href="#">slaac-prefix-pool</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **timers**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>timers</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> |
| Tree       | <a href="#">timers</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **preferred-lifetime** (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | Time for a lease to remain preferred   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> <a href="#">preferred-lifetime</a> ( <i>number</i>   <i>keyword</i> ) |

|            |   |
|------------|---|
| Tree       | <a href="#">preferred-lifetime</a>                      |
| Range      | 300 to 315446399  |
| Units      | seconds   |
| Options    | infinite  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**rebind** *number*

|            |   |
|------------|---|
| Synopsis   | Rebind timer (T2)   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> <a href="#">rebind</a> <i>number</i> |
| Tree       | <a href="#">rebind</a>  |
| Range      | 0 to 1209600  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**renew** *number*

|            |  |
|------------|--|
| Synopsis   | Renew timer (T1)   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> <a href="#">renew</a> <i>number</i> |
| Tree       | <a href="#">renew</a>  |
| Range      | 0 to 604800  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**valid-lifetime** (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | Time for a lease to remain valid   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> <a href="#">valid-lifetime</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">valid-lifetime</a>   |
| Range    | 300 to 315446399   |

|            |   |
|------------|---|
| Units      | seconds   |
| Options    | infinite  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### match-radius-proxy-cache

|            |  |
|------------|--|
| Synopsis   | Enter the <b>match-radius-proxy-cache</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>match-radius-proxy-cache</b> |
| Tree       | <a href="#">match-radius-proxy-cache</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### fail-action *keyword*

|            |  |
|------------|--|
| Synopsis   | Action when no match is found  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>match-radius-proxy-cache</b> <b>fail-action</b> <i>keyword</i> |
| Tree       | <a href="#">fail-action</a>  |
| Options    | continue, drop   |
| Default    | drop   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### mac-format *string*

|               |  |
|---------------|--|
| Synopsis      | MAC address format   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>match-radius-proxy-cache</b> <b>mac-format</b> <i>string</i> |
| Tree          | <a href="#">mac-format</a>   |
| String Length | 2 to 7   |
| Default       | aa:  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## match

|            |  |
|------------|--|
| Synopsis   | Enter the <b>match</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <b>match</b> |
| Tree       | <a href="#">match</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## circuit-id *boolean*

|            |  |
|------------|--|
| Synopsis   | Match circuit ID in DHCP Option 82   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <b>match</b> <a href="#">circuit-id</a> <i>boolean</i> |
| Tree       | <a href="#">circuit-id</a>   |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , ( <b>ipv4-option</b> and <b>ipv6-option</b> ), <b>mac</b> , or <b>remote-id</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ipv4-option *number*

|            |  |
|------------|--|
| Synopsis   | DHCP option number   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <b>match</b> <a href="#">ipv4-option</a> <i>number</i> |
| Tree       | <a href="#">ipv4-option</a>  |
| Range      | 1 to 254   |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , ( <b>ipv4-option</b> and <b>ipv6-option</b> ), <b>mac</b> , or <b>remote-id</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ipv6-option *number*

|          |  |
|----------|--|
| Synopsis | DHCPv6 option number   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">match-radius-proxy-cache</a> <b>match</b> <a href="#">ipv6-option</a> <i>number</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">ipv6-option</a>  |
| Range      | 1 to 65535   |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , ( <b>ipv4-option</b> and <b>ipv6-option</b> ), <b>mac</b> , or <b>remote-id</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **mac** *boolean*

|            |  |
|------------|--|
| Synopsis   | Match MAC address of DHCP client   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string match-radius-proxy-cache match mac</i> <i>boolean</i>    |
| Tree       | <a href="#">mac</a>  |
| Default    | true   |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , ( <b>ipv4-option</b> and <b>ipv6-option</b> ), <b>mac</b> , or <b>remote-id</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **remote-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Match remote ID in DHCP Option 82   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string match-radius-proxy-cache match remote-id</i> <i>boolean</i> |
| Tree       | <a href="#">remote-id</a>   |
| Notes      | The following elements are part of a choice: <b>circuit-id</b> , ( <b>ipv4-option</b> and <b>ipv6-option</b> ), <b>mac</b> , or <b>remote-id</b> .    |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **server**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>server</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string ipoe host string match-radius-proxy-cache server</i> |
| Tree       | <a href="#">server</a>  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **name** *string*

Synopsis Local user database server name

Context **configure** **subscriber-mgmt** **local-user-db** *string* **ipoe** **host** *string* **match-radius-proxy-cache** **server** **name** *string*

Tree **name**

String Length 1 to 32

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **service** *number*

Synopsis Service ID

Context **configure** **subscriber-mgmt** **local-user-db** *string* **ipoe** **host** *string* **match-radius-proxy-cache** **server** **service** *number*

Tree **service**

Range 1 to 2147483647

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mld-import** [**policy-name**] *string*

Synopsis Add a list entry for **mld-import**

Context **configure** **subscriber-mgmt** **local-user-db** *string* **ipoe** **host** *string* **mld-import** *string*

Tree **mld-import**

Max. Instances 14

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[policy-name]** *string*

Synopsis MLD import policy used to control the multicast group

|               |   |
|---------------|---|
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">mld-import</a> <i>string</i> |
| Tree          | <a href="#">mld-import</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## msap-defaults

|            |  |
|------------|--|
| Synopsis   | Enter the <b>msap-defaults</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> |
| Tree       | <a href="#">msap-defaults</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## group-interface

|            |  |
|------------|--|
| Synopsis   | Enable the <b>group-interface</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> |
| Tree       | <a href="#">group-interface</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## name *string*

|               |   |
|---------------|---|
| Synopsis      | IP interface name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> <a href="#">name</a> <i>string</i> |
| Tree          | <a href="#">name</a>  |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **prefix** *keyword*

|            |  |
|------------|--|
| Synopsis   | Prefix to the IP interface name  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> <a href="#">prefix</a> <i>keyword</i> |
| Tree       | <a href="#">prefix</a>   |
| Options    | port-id  |
| Notes      | The following elements are part of a choice: <b>prefix</b> or <b>suffix</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **suffix** *keyword*

|            |  |
|------------|--|
| Synopsis   | Suffix for the group interface   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> <a href="#">suffix</a> <i>keyword</i> |
| Tree       | <a href="#">suffix</a>   |
| Options    | port-id  |
| Notes      | The following elements are part of a choice: <b>prefix</b> or <b>suffix</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **policy** *string*

|               |   |
|---------------|---|
| Synopsis      | MSAP policy   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">policy</a> <i>string</i> |
| Tree          | <a href="#">policy</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **service** *number*

|          |  |
|----------|--|
| Synopsis | Service ID   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">service</a> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">service</a>   |
| Range      | 1 to 2147483647   2147483648   2147483649   2147483650   2147483651 to 2147483690   2147483691 to 2148007980   2148007981 to 2148012076   2148012077 to 2148016172   2148016173 to 2148278316   2148278317   2148278318 to 2148278381   2148278382   2148278383 to 2148278386 |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### radius-accounting-policy

|            |  |
|------------|--|
| Synopsis   | Enter the <b>radius-accounting-policy</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>radius-accounting-policy</b> |
| Tree       | <a href="#">radius-accounting-policy</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### duplicate *string*

|               |   |
|---------------|---|
| Synopsis      | RADIUS accounting policy for generating duplicate accounting information  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>radius-accounting-policy</b> <b>duplicate</b> <i>string</i> |
| Tree          | <a href="#">duplicate</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### name *string*

|               |  |
|---------------|--|
| Synopsis      | RADIUS accounting policy name  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>radius-accounting-policy</b> <b>name</b> <i>string</i> |
| Tree          | <a href="#">name</a>   |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**retail-service-id** *number*

|            |   |
|------------|---|
| Synopsis   | Configure the retail service-id   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>retail-service-id</b> <i>number</i>   |
| Tree       | <a href="#">retail-service-id</a>   |
| Range      | 1 to 2147483647   2147483648   2147483649   2147483650   2147483651 to 2147483690   2147483691 to 2148007980   2148007981 to 2148012076   2148012077 to 2148016172   2148016173 to 2148278316   2148278317   2148278318 to 2148278381   2148278382   2148278383 to 2148278386 |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**rip-policy** *string*

|               |  |
|---------------|--|
| Synopsis      | RIP policy   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>rip-policy</b> <i>string</i> |
| Tree          | <a href="#">rip-policy</a>   |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**to-client-options**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>to-client-options</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>to-client-options</b> |
| Tree       | <a href="#">to-client-options</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipv4-option** [[number](#)] (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4-option</b> list instance   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <b>to-client-options</b> <a href="#">ipv4-option</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">ipv4-option</a>  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [number] (*number* | *keyword*)

Synopsis DHCP option to send identification strings to client

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [to-client-options](#) [ipv4-option](#) (*number* | *keyword*)

Tree [ipv4-option](#)

Range 1 to 254

Options subnet-mask, default-router, dns-server, domain-name, netbios-name-server, netbios-node-type, lease-time, lease-renew-time, lease-rebind-time

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ascii-string** *string*

Synopsis DHCP option specified as an ASCII string

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [to-client-options](#) [ipv4-option](#) (*number* | *keyword*) [ascii-string](#) *string*

Tree [ascii-string](#)

String Length 1 to 127

Notes The following elements are part of a mandatory choice: **ascii-string**, **duration**, **empty**, **hex-string**, **ipv4-address**, or **netbios-node-type**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **duration** *number*

Synopsis DHCP option as time duration

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [to-client-options](#) [ipv4-option](#) (*number* | *keyword*) [duration](#) *number*

Tree [duration](#)

Range 10 to 315446399

Units seconds

Notes The following elements are part of a mandatory choice: **ascii-string**, **duration**, **empty**, **hex-string**, **ipv4-address**, or **netbios-node-type**.

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## empty

|            |  |
|------------|--|
| Synopsis   | Empty DHCP option  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">to-client-options</a> <a href="#">ipv4-option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <b>empty</b> |
| Tree       | <a href="#">empty</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## hex-string *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP option specified as hexadecimal string   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">to-client-options</a> <a href="#">ipv4-option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <a href="#">hex-string</a> <a href="#">string</a> |
| Tree          | <a href="#">hex-string</a>  |
| String Length | 1 to 256  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ipv4-address *string*

|                |   |
|----------------|---|
| Synopsis       | DHCP option as a list of IPv4 addresses   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">host</a> <a href="#">string</a> <a href="#">to-client-options</a> <a href="#">ipv4-option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <a href="#">ipv4-address</a> <a href="#">string</a> |
| Tree           | <a href="#">ipv4-address</a>  |
| Max. Instances | 4   |
| Notes          | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .<br>This element is ordered by the user.   |

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **netbios-node-type** *keyword*

Synopsis DHCP option as NetBIOS node type  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [to-client-options](#) [ipv4-option](#) (*number* | *keyword*) **netbios-node-type** *keyword*  
 Tree [netbios-node-type](#)  
 Options b-node, p-node, m-node, h-node  
 Notes The following elements are part of a mandatory choice: **ascii-string**, **duration**, **empty**, **hex-string**, **ipv4-address**, or **netbios-node-type**.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-option** [[number](#)] (*number* | *keyword*)

Synopsis Enter the **ipv6-option** list instance  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [to-client-options](#) [ipv6-option](#) (*number* | *keyword*)  
 Tree [ipv6-option](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[number]** (*number* | *keyword*)

Synopsis DHCP option to send as identification string  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ipoe](#) [host](#) *string* [to-client-options](#) [ipv6-option](#) (*number* | *keyword*)  
 Tree [ipv6-option](#)  
 Range 1 to 65535  
 Options dns-server, domain-name  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ascii-string** *string*

|               |  |
|---------------|--|
| Synopsis      | DHCP option specified as an ASCII string   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ascii-string</a> <i>string</i> |
| Tree          | <a href="#">ascii-string</a>   |
| String Length | 1 to 127   |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **domain-string** *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP option specified as a domain name  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">domain-string</a> <i>string</i> |
| Tree          | <a href="#">domain-string</a>   |
| String Length | 1 to 127  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **empty**

|            |   |
|------------|---|
| Synopsis   | Empty DHCP option   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">empty</a> |
| Tree       | <a href="#">empty</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**hex-string** *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP option specified as hexadecimal string   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ipoe host string to-client-options ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <b>hex-string</b> <i>string</i> |
| Tree          | <a href="#">hex-string</a>  |
| String Length | 1 to 256  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .                         |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipv6-address** *string*

|                |   |
|----------------|---|
| Synopsis       | DHCP option specified as a list of IPv6 addresses   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ipoe host string to-client-options ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <b>ipv6-address</b> <i>string</i>               |
| Tree           | <a href="#">ipv6-address</a>  |
| Max. Instances | 4   |
| Notes          | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .<br>This element is ordered by the user. |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**to-server-options**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>to-server-options</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ipoe host string to-server-options</a> |
| Tree       | <a href="#">to-server-options</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipv6-option** [[number](#)] (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | Enter the <b>ipv6-option</b> list instance |
|----------|--|

|            |   |

| Context    | <b>configure subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">ipv6-option</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **[number]** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | DHCP option to send as identification string  |
| Context    | <b>configure subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">ipv6-option</a>   |
| Range      | 1 to 65535  |
| Options    | dns-server, domain-name   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ascii-string** *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP option specified as an ASCII string  |
| Context       | <b>configure subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option</b> ( <i>number</i>   <i>keyword</i> ) <b>ascii-string</b> <i>string</i> |
| Tree          | <a href="#">ascii-string</a>  |
| String Length | 1 to 127  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .           |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **domain-string** *string*

|          |  |
|----------|--|
| Synopsis | DHCP option specified as a domain name   |
| Context  | <b>configure subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option</b> ( <i>number</i>   <i>keyword</i> ) <b>domain-string</b> <i>string</i> |
| Tree     | <a href="#">domain-string</a>  |

|               |   |
|---------------|---|
| String Length | 1 to 127  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> . |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## empty

|            |   |
|------------|---|
| Synopsis   | Empty DHCP option   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option (number   keyword) empty</a>                   |
| Tree       | <a href="#">empty</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> . |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## hex-string *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP option specified as hexadecimal string   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option (number   keyword) hex-string string</a>       |
| Tree          | <a href="#">hex-string</a>  |
| String Length | 1 to 256  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> . |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ipv6-address *string*

|                |   |
|----------------|---|
| Synopsis       | DHCP option specified as a list of IPv6 addresses   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ipoe host string to-server-options ipv6-option (number   keyword) ipv6-address string</a> |
| Tree           | <a href="#">ipv6-address</a>  |
| Max. Instances | 4   |

|            |   |

| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **sub-profile** *string*

|               |  |
|---------------|--|
| Synopsis      | Initial subscriber profile   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <a href="#">initial</a> <a href="#">sub-profile</a> <i>string</i> |
| Tree          | <a href="#">sub-profile</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **portal**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>portal</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <a href="#">portal</a> |
| Tree       | <a href="#">portal</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **name** *string*

|               |  |
|---------------|--|
| Synopsis      | Web portal server name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <a href="#">portal</a> <a href="#">name</a> <i>string</i> |
| Tree          | <a href="#">name</a>   |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>portal-group</b> or ( <b>name</b> and <b>router-instance</b> ).  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**portal-group** *string*

|               |  |
|---------------|--|
| Synopsis      | WPP portal group for this interface  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <a href="#">portal</a> <a href="#">portal-group</a> <i>string</i> |
| Tree          | <a href="#">portal-group</a>   |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>portal-group</b> or ( <b>name</b> and <b>router-instance</b> ).  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**router-instance** (*keyword* | *number*)

|            |  |
|------------|--|
| Synopsis   | Virtual router instance of the WPP portal for the host   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <a href="#">portal</a> <a href="#">router-instance</a> ( <i>keyword</i>   <i>number</i> ) |
| Tree       | <a href="#">router-instance</a>  |
| Range      | 1 to 2147483647  |
| Options    | base   |
| Default    | base   |
| Notes      | The following elements are part of a choice: <b>portal-group</b> or ( <b>name</b> and <b>router-instance</b> ).  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**restore-to-initial-on-disconnect** *keyword*

|            |  |
|------------|--|
| Synopsis   | Restore initial profiles after a host has disconnected   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <a href="#">host</a> <i>string</i> <a href="#">wpp</a> <a href="#">restore-to-initial-on-disconnect</a> <i>keyword</i> |
| Tree       | <a href="#">restore-to-initial-on-disconnect</a>   |
| Options    | restore, no-restore  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**mask type keyword**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mask</b> list instance  |
| Context    | <b>configure subscriber-mgmt local-user-db string ipoe mask type keyword</b> |
| Tree       | <b>mask</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                      |

**type keyword**

|            |  |
|------------|--|
| Synopsis   | Matching type to identify a host   |
| Context    | <b>configure subscriber-mgmt local-user-db string ipoe mask type keyword</b> |
| Tree       | <b>mask</b>  |
| Options    | circuit-id, remote-id, sap-id, string, system-id, option60                   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                      |

**prefix**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>prefix</b> context  |
| Context    | <b>configure subscriber-mgmt local-user-db string ipoe mask type keyword prefix</b> |
| Tree       | <b>prefix</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                             |

**length number**

|            |   |
|------------|---|
| Synopsis   | PPP mask prefix length  |
| Context    | <b>configure subscriber-mgmt local-user-db string ipoe mask type keyword prefix length number</b> |
| Tree       | <b>length</b>   |
| Range      | 1 to 127  |
| Notes      | The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .           |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**string** *string*

|               |   |
|---------------|---|
| Synopsis      | Prefix string   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">mask</a> <a href="#">type</a> <a href="#">keyword</a> <a href="#">prefix</a> <a href="#">string</a> <a href="#">string</a> |
| Tree          | <a href="#">string</a>  |
| String Length | 1 to 127  |
| Notes         | The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**suffix**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>suffix</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">mask</a> <a href="#">type</a> <a href="#">keyword</a> <a href="#">suffix</a> |
| Tree       | <a href="#">suffix</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**length** *number*

|            |   |
|------------|---|
| Synopsis   | PPP mask suffix length  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">mask</a> <a href="#">type</a> <a href="#">keyword</a> <a href="#">suffix</a> <a href="#">length</a> <a href="#">number</a> |
| Tree       | <a href="#">length</a>  |
| Range      | 1 to 127  |
| Notes      | The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**string** *string*

|          |   |
|----------|---|
| Synopsis | Suffix string   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ipoe</a> <a href="#">mask</a> <a href="#">type</a> <a href="#">keyword</a> <a href="#">suffix</a> <a href="#">string</a> <a href="#">string</a> |
| Tree     | <a href="#">string</a>  |

|               |   |
|---------------|---|
| String Length | 1 to 127  |
| Notes         | The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> . |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                 |

### **match-list** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|                |  |
|----------------|--|
| Synopsis       | IPoE host match type   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ipoe</a> <b>match-list</b> <i>keyword</i>           |
| Tree           | <a href="#">match-list</a>   |
| Options        | circuit-id, mac, remote-id, sap-id, service-id, string, system-id, option60, encap-tag-range, dual-stack-remote-id, derived-id, ip, encap-tag-separate-range |
| Max. Instances | 4  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ppp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ppp</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <b>ppp</b> |
| Tree       | <a href="#">ppp</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **host** [[host-name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>host</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <b>host</b> <i>string</i> |
| Tree       | <a href="#">host</a>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [host-name] *string*

Synopsis Host name

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string*

Tree [host](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### access-loop-encapsulation

Synopsis Enable the **access-loop-encapsulation** context

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [access-loop-encapsulation](#)

Tree [access-loop-encapsulation](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### encap-offset

Synopsis Enter the **encap-offset** context

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [access-loop-encapsulation](#) [encap-offset](#)

Tree [encap-offset](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### type *keyword*

Synopsis Egress encapsulation type

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [access-loop-encapsulation](#) [encap-offset](#) *type* *keyword*

Tree [type](#)

|            |  |
|------------|--|
| Options    | pppoa-llc, pppoa-null, pppoeoa-llc, pppoeoa-llc-fcs, pppoeoa-llc-tagged, pppoeoa-llc-tagged-fcs, pppoeoa-null, pppoeoa-null-fcs, pppoeoa-null-tagged, pppoeoa-null-tagged-fcs, ipoa-llc, ipoa-null, ipoeoa-llc, ipoeoa-llc-fcs, ipoeoa-llc-tagged, ipoeoa-llc-tagged-fcs, ipoeoa-null, ipoeoa-null-fcs, ipoeoa-null-tagged, ipoeoa-null-tagged-fcs, pppoe, pppoe-tagged, ipoe, ipoe-tagged |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### rate-down *number*

|            |   |
|------------|---|
| Synopsis   | Last mile link downstream rate in the access loop   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>local-user-db</b> <i>string</i> <b>ppp</b> <b>host</b> <i>string</i> <b>access-loop-encapsulation</b> <b>rate-down</b> <i>number</i> |
| Tree       | <a href="#">rate-down</a>   |
| Range      | 1 to 100000   |
| Units      | kilobps   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### access-loop-information

|            |  |
|------------|--|
| Synopsis   | Enter the <b>access-loop-information</b> context   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>local-user-db</b> <i>string</i> <b>ppp</b> <b>host</b> <i>string</i> <b>access-loop-information</b> |
| Tree       | <a href="#">access-loop-information</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### circuit-id

|            |  |
|------------|--|
| Synopsis   | Enable the <b>circuit-id</b> context   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>local-user-db</b> <i>string</i> <b>ppp</b> <b>host</b> <i>string</i> <b>access-loop-information</b> <b>circuit-id</b> |
| Tree       | <a href="#">circuit-id</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ascii-string** *string*

|               |  |
|---------------|--|
| Synopsis      | Circuit ID as an ASCII string  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">access-loop-information</a> <a href="#">circuit-id</a> <b>ascii-string</b> <i>string</i> |
| Tree          | <a href="#">ascii-string</a>   |
| String Length | 1 to 63  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>sap-id</b> , or <b>use-sap-id</b> .  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **use-sap-id**

|            |  |
|------------|--|
| Synopsis   | Use sap-id as circuit-id.  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">access-loop-information</a> <a href="#">circuit-id</a> <b>use-sap-id</b> |
| Tree       | <a href="#">use-sap-id</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>sap-id</b> , or <b>use-sap-id</b> .  |
| Introduced | 20.2.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **remote-id**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>remote-id</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">access-loop-information</a> <b>remote-id</b> |
| Tree       | <a href="#">remote-id</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ascii-string** *string*

|          |   |
|----------|---|
| Synopsis | String format for the remote ID   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">access-loop-information</a> <a href="#">remote-id</a> <b>ascii-string</b> <i>string</i> |
| Tree     | <a href="#">ascii-string</a>  |

---

|               |   |
|---------------|---|
| String Length | 1 to 63   |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>mac</b> , or <b>use-mac-address</b> . |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## use-mac-address

|            |   |
|------------|---|
| Synopsis   | Use MAC address as remote-id.   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string access-loop-information remote-id use-mac-address</a> |
| Tree       | <a href="#">use-mac-address</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>mac</b> , or <b>use-mac-address</b> .                   |
| Introduced | 20.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the host  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## authentication

|            |  |
|------------|--|
| Synopsis   | Enter the <b>authentication</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string authentication</a> |
| Tree       | <a href="#">authentication</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **gx-policy string**

|               |  |
|---------------|--|
| Synopsis      | Diameter application policy  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">authentication</a> <a href="#">gx-policy</a> <i>string</i> |
| Tree          | <a href="#">gx-policy</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **nasreq-auth-policy string**

|               |   |
|---------------|---|
| Synopsis      | Diameter NASREQ application policy for authentication   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">authentication</a> <a href="#">nasreq-auth-policy</a> <i>string</i> |
| Tree          | <a href="#">nasreq-auth-policy</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **padi-auth-policy string**

|               |   |
|---------------|---|
| Synopsis      | Authentication policy name  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">authentication</a> <a href="#">padi-auth-policy</a> <i>string</i> |
| Tree          | <a href="#">padi-auth-policy</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **pre-auth-policy string**

|               |  |
|---------------|--|
| Synopsis      | Pre-authentication policy of this host   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">authentication</a> <a href="#">pre-auth-policy</a> <i>string</i> |
| Tree          | <a href="#">pre-auth-policy</a>  |
| String Length | 1 to 32  |

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-auth-policy** *string*

Synopsis Host authentication policy  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [authentication](#) [radius-auth-policy](#) *string*  
 Tree [radius-auth-policy](#)  
 String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **user-db** *string*

Synopsis Local user DB to use for PPP PAP/CHAP authentication  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [authentication](#) [user-db](#) *string*  
 Tree [user-db](#)  
 String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **host-identification**

Synopsis Enter the **host-identification** context  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [host-identification](#)  
 Tree [host-identification](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **circuit-id**

Synopsis Enter the **circuit-id** context  
 Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [host-identification](#) [circuit-id](#)

|            |   |
|------------|---|
| Tree       | <a href="#">circuit-id</a>                              |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **ascii-string** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Circuit ID as ASCII string  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">circuit-id</a> <a href="#">ascii-string</a> <i>string</i> |
| Tree          | <a href="#">ascii-string</a>  |
| String Length | 1 to 127  |
| Notes         | The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **hex-string** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Circuit ID as hexadecimal string  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">circuit-id</a> <a href="#">hex-string</a> <i>string</i> |
| Tree          | <a href="#">hex-string</a>  |
| String Length | 1 to 256  |
| Notes         | The following elements are part of a choice: <b>ascii-string</b> or <b>hex-string</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**derived-id string****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Derived ID string   |

| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## end number

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Upper bound of the inner encapsulation tag range   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">encap-tag-separate-range</a> <i>inner</i> <b>end</b> <i>number</i> |
| Tree        | <a href="#">end</a>  |
| Description | This command configures an inner end tag for the range of encapsulation tags used for host identification.   |
| Range       | 0 to 4094  |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## start number

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Lower bound of the inner encapsulation tag range   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">encap-tag-separate-range</a> <i>inner</i> <b>start</b> <i>number</i> |
| Tree        | <a href="#">start</a>  |
| Description | This command configures an inner start tag for the range of encapsulation tags used for host identification.   |
| Range       | 0 to 4094  |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## outer

|            |   |
|------------|---|
| Synopsis   | Enter the <b>outer</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">host-identification</a> <a href="#">encap-tag-separate-range</a> <b>outer</b> |
| Tree       | <a href="#">outer</a>   |
| Introduced | 20.5.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **end number**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Upper bound of the outer encapsulation tag range

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [host-identification](#) [encap-tag-separate-range](#) [outer](#) **end** *number*

Tree [end](#)

Description This command configures an outer end tag for the range of encapsulation tags used for host identification.

Range 0 to 4094

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **start number**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Lower bound of the outer encapsulation tag range

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [host-identification](#) [encap-tag-separate-range](#) [outer](#) **start** *number*

Tree [start](#)

Description This command configures an outer start tag for the range of encapsulation tags used for host identification.

Range 0 to 4094

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mac string****WARNING:**

|---------------|---|
| Tree          | <a href="#">sla-profile-string</a>                      |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **spi-sharing-group-id** *number*

|            |   |
|------------|---|
| Synopsis   | SPI sharing group ID  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">spi-sharing-group-id</a> <i>number</i> |
| Tree       | <a href="#">spi-sharing-group-id</a>  |
| Range      | 0 to 65535  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sub-profile-string** *string*

|               |   |
|---------------|---|
| Synopsis      | Sub profile string  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">sub-profile-string</a> <i>string</i> |
| Tree          | <a href="#">sub-profile-string</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **subscriber-id** *string*

|               |  |
|---------------|--|
| Synopsis      | Subscriber ID  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">identification</a> <a href="#">subscriber-id</a> <i>string</i> |
| Tree          | <a href="#">subscriber-id</a>  |
| String Length | 1 to 64  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ipv4

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4</a> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## address

|            |  |
|------------|--|
| Synopsis   | Enter the <b>address</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> |
| Tree       | <a href="#">address</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## gi-address *keyword*

|            |  |
|------------|--|
| Synopsis   | Use gi-address to select a pool with the given scope   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">gi-address</a> <i>keyword</i> |
| Tree       | <a href="#">gi-address</a>   |
| Options    | subnet-scope, pool-scope   |
| Notes      | The following elements are part of a choice: <b>gi-address</b> , ( <b>ip-address</b> and <b>prefix-length</b> ), <b>pool</b> , or <b>use-pool-from-client</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ip-address *string*

|            |   |
|------------|---|
| Synopsis   | Fixed IPv4 address of the host  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <a href="#">ip-address</a> <i>string</i> |
| Tree       | <a href="#">ip-address</a>  |
| Notes      | The following elements are part of a choice: <b>gi-address</b> , ( <b>ip-address</b> and <b>prefix-length</b> ), <b>pool</b> , or <b>use-pool-from-client</b> .   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pool

Synopsis Enable the **pool** context

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [ipv4](#) [address](#) [pool](#)

Tree [pool](#)

Notes The following elements are part of a choice: **gi-address**, (**ip-address** and **prefix-length**), **pool**, or **use-pool-from-client**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## delimiter *string*

Synopsis Delimiter separating primary and secondary pool names

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [ipv4](#) [address](#) [pool](#) [delimiter](#) *string*

Tree [delimiter](#)

String Length 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## primary *string*

Synopsis Primary pool name

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp](#) [host](#) *string* [ipv4](#) [address](#) [pool](#) [primary](#) *string*

Tree [primary](#)

String Length 1 to 32

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## secondary *string*

Synopsis Secondary pool name

|               |  |
|---------------|--|
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 address pool secondary string</a> |
| Tree          | <a href="#">secondary</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **prefix-length** *number*

|            |   |
|------------|---|
| Synopsis   | IPv4 host address prefix length   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 address prefix-length number</a>         |
| Tree       | <a href="#">prefix-length</a>   |
| Range      | 1 to 32   |
| Default    | 32  |
| Notes      | The following elements are part of a choice: <b>gi-address</b> , ( <b>ip-address</b> and <b>prefix-length</b> ), <b>pool</b> , or <b>use-pool-from-client</b> . |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **use-pool-from-client**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>use-pool-from-client</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 address use-pool-from-client</a>         |
| Tree       | <a href="#">use-pool-from-client</a>  |
| Notes      | The following elements are part of a choice: <b>gi-address</b> , ( <b>ip-address</b> and <b>prefix-length</b> ), <b>pool</b> , or <b>use-pool-from-client</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **delimiter** *string*

|          |  |
|----------|--|
| Synopsis | Delimiter character to combine primary and secondary pool names  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 address use-pool-from-client delimiter string</a> |
| Tree     | <a href="#">delimiter</a>  |

|               |   |
|---------------|---|
| String Length | 1   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **ignore-df-bit** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Ignore the DF bit in the IPv4 header when fragmenting  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv4 ignore-df-bit boolean</a>   |
| Tree        | <a href="#">ignore-df-bit</a>  |
| Description | <p>When configured to <b>true</b>, this command ignores the DF bit in the IPv4 header for frames egressing the subscriber interface. The frames are fragmented according the applicable egress MTU. The DF bit is reset for frames that are fragmented.</p> <p>This command applies to PPPoE PTA and L2TP LNS frames only. It is not applicable for L2TP LAC frames.</p> <p>When configured to <b>false</b>, this command does not ignore the DF bit in the IPv4 header for frames egressing the subscriber interface.</p> |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **option** [[number](#)] (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Enter the <b>option</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv4 option (number   keyword)</a> |
| Tree       | <a href="#">option</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **[number]** (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | DHCP option to send identification strings to client   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv4 option (number   keyword)</a> |
| Tree     | <a href="#">option</a>   |
| Range    | 1 to 254   |

|            |   |
|------------|---|
| Options    | subnet-mask, default-router, dns-server, domain-name, netbios-name-server, netbios-node-type, lease-time, lease-renew-time, lease-rebind-time |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ascii-string** *string*

|               |  |
|---------------|--|
| Synopsis      | DHCP option specified as an ASCII string   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 option (number   keyword)</a> <b>ascii-string</b> <i>string</i> |
| Tree          | <a href="#">ascii-string</a>   |
| String Length | 1 to 127   |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **duration** *number*

|            |   |
|------------|---|
| Synopsis   | DHCP option as time duration  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 option (number   keyword)</a> <b>duration</b> <i>number</i>    |
| Tree       | <a href="#">duration</a>  |
| Range      | 10 to 315446399   |
| Units      | seconds   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **empty**

|          |   |
|----------|---|
| Synopsis | Empty DHCP option.  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">ipv4 option (number   keyword)</a> <b>empty</b> |
| Tree     | <a href="#">empty</a>   |

|            |   |
|------------|---|
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **hex-string** *string*

|               |  |
|---------------|--|
| Synopsis      | DHCP option specified as hexadecimal string  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4 option</a> ( <i>number</i>   <i>keyword</i> ) <b>hex-string</b> <i>string</i> |
| Tree          | <a href="#">hex-string</a>   |
| String Length | 1 to 256   |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ipv4-address** *string*

|                |  |
|----------------|--|
| Synopsis       | DHCP option as a list of IPv4 addresses  |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4 option</a> ( <i>number</i>   <i>keyword</i> ) <b>ipv4-address</b> <i>string</i> |
| Tree           | <a href="#">ipv4-address</a>   |
| Max. Instances | 4  |
| Notes          | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .<br>This element is ordered by the user.        |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **netbios-node-type** *keyword*

|          |  |
|----------|--|
| Synopsis | DHCP option as NetBIOS node type   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv4 option</a> ( <i>number</i>   <i>keyword</i> ) <b>netbios-node-type</b> <i>keyword</i> |
| Tree     | <a href="#">netbios-node-type</a>  |

|            |   |
|------------|---|
| Options    | b-node, p-node, m-node, h-node  |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ipv6

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv6</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv6</a> |
| Tree       | <a href="#">ipv6</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## address *string*

|            |   |
|------------|---|
| Synopsis   | Fixed IPv6 address of the host  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">address</a> <a href="#">string</a> |
| Tree       | <a href="#">address</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## address-pool *string*

|               |  |
|---------------|--|
| Synopsis      | IPv6 address pool name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">address-pool</a> <a href="#">string</a> |
| Tree          | <a href="#">address-pool</a>   |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## delegated-prefix *string*

|          |  |
|----------|--|
| Synopsis | IPv6 delegated prefix of this host   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">host</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">delegated-prefix</a> <a href="#">string</a> |

|            |   |
|------------|---|
| Tree       | <a href="#">delegated-prefix</a>                        |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **delegated-prefix-length** *number*

|            |  |
|------------|--|
| Synopsis   | Delegated prefix length  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">delegated-prefix-length</a> <i>number</i> |
| Tree       | <a href="#">delegated-prefix-length</a>  |
| Range      | 48 to 64   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **delegated-prefix-pool** *string*

|               |  |
|---------------|--|
| Synopsis      | Delegated prefix pool  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">delegated-prefix-pool</a> <i>string</i> |
| Tree          | <a href="#">delegated-prefix-pool</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **force-ipv6cp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Force IPv6 control protocol  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">force-ipv6cp</a> <i>boolean</i> |
| Tree       | <a href="#">force-ipv6cp</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**option** [*number*] (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Enter the <b>option</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv6 option</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">option</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[number]** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | The number of the DHCPv6 option.   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv6 option</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">option</a>   |
| Range      | 23   |
| Options    | dns-server   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**hex-string** *string*

|               |  |
|---------------|--|
| Synopsis      | DHCP option specified as hexadecimal string  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv6 option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">hex-string string</a> |
| Tree          | <a href="#">hex-string</a>   |
| String Length | 1 to 256   |
| Notes         | The following elements are part of a mandatory choice: <b>hex-string</b> or <b>ipv6-address</b> .  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipv6-address** *string*

|          |  |
|----------|--|
| Synopsis | DHCP option specified as a list of IPv6 addresses  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv6 option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ipv6-address string</a> |

|                |   |
|----------------|---|
| Tree           | <a href="#">ipv6-address</a>  |
| Max. Instances | 4   |
| Notes          | The following elements are part of a mandatory choice: <b>hex-string</b> or <b>ipv6-address</b> .<br>This element is ordered by the user. |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **router-advertisement-policy** *string*

|               |  |
|---------------|--|
| Synopsis      | IPv6 router advertisement policy   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6 router-advertisement-policy</a> <i>string</i> |
| Tree          | <a href="#">router-advertisement-policy</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **slaac-prefix** *string*

|            |   |
|------------|---|
| Synopsis   | IPv6 SLAAC prefix of this host  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6 slaac-prefix</a> <i>string</i> |
| Tree       | <a href="#">slaac-prefix</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **slaac-prefix-pool** *string*

|               |  |
|---------------|--|
| Synopsis      | IPv6 SLAAC prefix pool of this host  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">ipv6 slaac-prefix-pool</a> <i>string</i> |
| Tree          | <a href="#">slaac-prefix-pool</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**timers**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>timers</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> |
| Tree       | <a href="#">timers</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**preferred-lifetime** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Time for a lease to remain preferred  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> <a href="#">preferred-lifetime</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">preferred-lifetime</a>  |
| Range      | 300 to 315446399  |
| Units      | seconds   |
| Options    | infinite  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**rebind** *number*

|            |  |
|------------|--|
| Synopsis   | Rebind timer (T2)  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> <a href="#">rebind</a> <i>number</i> |
| Tree       | <a href="#">rebind</a>   |
| Range      | 0 to 1209600   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**renew** *number*

|          |   |
|----------|---|
| Synopsis | Renew timer (T1)  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">ipv6</a> <a href="#">timers</a> <a href="#">renew</a> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">renew</a>                                   |
| Range      | 0 to 604800   |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **valid-lifetime** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Time for a lease to remain valid  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string ipv6 timers valid-lifetime</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">valid-lifetime</a>  |
| Range      | 300 to 315446399  |
| Units      | seconds   |
| Options    | infinite  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **l2tp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>l2tp</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string l2tp</a> |
| Tree       | <a href="#">l2tp</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

### **group**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>group</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string ppp host string l2tp group</a> |
| Tree       | <a href="#">group</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**name string**

|               |  |
|---------------|--|
| Synopsis      | L2TP tunnel group name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp host</a> <a href="#">string</a> <a href="#">l2tp group name</a> <a href="#">string</a> |
| Tree          | <a href="#">name</a>   |
| String Length | 1 to 63  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**service-id number**

|            |  |
|------------|--|
| Synopsis   | Service ID for the L2TP tunnel group   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp host</a> <a href="#">string</a> <a href="#">l2tp group</a> <a href="#">service-id number</a> |
| Tree       | <a href="#">service-id</a>   |
| Range      | 1 to 2147483647  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**Ins-interface**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>Ins-interface</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp host</a> <a href="#">string</a> <a href="#">Ins-interface</a> |
| Tree       | <a href="#">Ins-interface</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**name string**

|               |   |
|---------------|---|
| Synopsis      | IP interface name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp host</a> <a href="#">string</a> <a href="#">Ins-interface</a> <a href="#">name</a> <a href="#">string</a> |
| Tree          | <a href="#">name</a>  |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **service-id** *number*

Synopsis Service ID

Context **configure** **subscriber-mgmt** **local-user-db** *string* **ppp** **host** *string* **lns-interface** **service-id** *number*

Tree **service-id**

Range 1 to 2147483647 | 2147483648 | 2147483649 | 2147483650 | 2147483651 to 2147483690 | 2147483691 to 2148007980 | 2148007981 to 2148012076 | 2148012077 to 2148016172 | 2148016173 to 2148278316 | 2148278317 | 2148278318 to 2148278381 | 2148278382 | 2148278383 to 2148278386

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mld-import** [**policy-name**] *string*

Synopsis Add a list entry for **mld-import**

Context **configure** **subscriber-mgmt** **local-user-db** *string* **ppp** **host** *string* **mld-import** *string*

Tree **mld-import**

Max. 14

Instances

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[policy-name]** *string*

Synopsis MLD import policy used to control the multicast group

Context **configure** **subscriber-mgmt** **local-user-db** *string* **ppp** **host** *string* **mld-import** *string*

Tree **mld-import**

String Length 1 to 32

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## msap-defaults

|            |   |
|------------|---|
| Synopsis   | Enter the <b>msap-defaults</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> |
| Tree       | <a href="#">msap-defaults</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## group-interface

|            |   |
|------------|---|
| Synopsis   | Enable the <b>group-interface</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> |
| Tree       | <a href="#">group-interface</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## name *string*

|               |  |
|---------------|--|
| Synopsis      | IP interface name  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> <a href="#">name</a> <i>string</i> |
| Tree          | <a href="#">name</a>   |
| String Length | 1 to 32  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## prefix *keyword*

|            |   |
|------------|---|
| Synopsis   | Prefix to the IP interface name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">msap-defaults</a> <a href="#">group-interface</a> <a href="#">prefix</a> <i>keyword</i> |
| Tree       | <a href="#">prefix</a>  |
| Options    | port-id   |
| Notes      | The following elements are part of a choice: <b>prefix</b> or <b>suffix</b> .   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suffix** *keyword*

Synopsis Suffix for the group interface

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [msap-defaults](#) [group-interface](#) **suffix** *keyword*

Tree [suffix](#)

Options port-id

Notes The following elements are part of a choice: **prefix** or **suffix**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **policy** *string*

Synopsis MSAP policy

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [msap-defaults](#) [policy](#) *string*

Tree [policy](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **service** *number*

Synopsis Service ID

Context **configure** [subscriber-mgmt](#) [local-user-db](#) *string* [ppp host](#) *string* [msap-defaults](#) [service](#) *number*

Tree [service](#)

Range 1 to 2147483647 | 2147483648 | 2147483649 | 2147483650 | 2147483651 to 2147483690 | 2147483691 to 2148007980 | 2148007981 to 2148012076 | 2148012077 to 2148016172 | 2148016173 to 2148278316 | 2148278317 | 2148278318 to 2148278381 | 2148278382 | 2148278383 to 2148278386

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pado-delay** *number*

|            |  |
|------------|--|
| Synopsis   | Delay timeout before sending a PADO  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">pado-delay</a> <i>number</i> |
| Tree       | <a href="#">pado-delay</a>   |
| Range      | 1 to 30  |
| Units      | deciseconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**password**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>password</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">password</a> |
| Tree       | <a href="#">password</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**chap** *string*

|               |   |
|---------------|---|
| Synopsis      | CHAP protocol   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">password</a> <a href="#">chap</a> <i>string</i> |
| Tree          | <a href="#">chap</a>  |
| String Length | 1 to 115  |
| Notes         | The following elements are part of a choice: <b>chap</b> , <b>ignore</b> , or <b>pap</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ignore**

|            |   |
|------------|---|
| Synopsis   | Ignore the PAP and CHAP passwords   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">password</a> <a href="#">ignore</a> |
| Tree       | <a href="#">ignore</a>  |
| Notes      | The following elements are part of a choice: <b>chap</b> , <b>ignore</b> , or <b>pap</b> .  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pap string**

Synopsis PAP for the password

Context **configure** [subscriber-mgmt local-user-db string](#) [ppp host string](#) [password pap string](#)

Tree [pap](#)

String Length 1 to 115

Notes The following elements are part of a choice: **chap**, **ignore**, or **pap**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ppp-policy-parameters**

Synopsis Enter the **ppp-policy-parameters** context

Context **configure** [subscriber-mgmt local-user-db string](#) [ppp host string](#) [ppp-policy-parameters](#)

Tree [ppp-policy-parameters](#)

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-sessions-per-mac number**

Synopsis Maximum number of sessions per MAC address

Context **configure** [subscriber-mgmt local-user-db string](#) [ppp host string](#) [ppp-policy-parameters](#) [max-sessions-per-mac number](#)

Tree [max-sessions-per-mac](#)

Description This command sets the maximum PPP sessions that can be opened for a specified MAC address.

Range 1 to 8191

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-accounting-policy**

Synopsis Enter the **radius-accounting-policy** context

Context **configure** [subscriber-mgmt local-user-db string](#) [ppp host string](#) [radius-accounting-policy](#)

|            |   |
|------------|---|
| Tree       | <a href="#">radius-accounting-policy</a>                |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **duplicate** *string*

|               |  |
|---------------|--|
| Synopsis      | RADIUS accounting policy for generating duplicate accounting information   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">radius-accounting-policy</a> <a href="#">duplicate</a> <i>string</i> |
| Tree          | <a href="#">duplicate</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **name** *string*

|               |   |
|---------------|---|
| Synopsis      | RADIUS accounting policy name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">radius-accounting-policy</a> <a href="#">name</a> <i>string</i> |
| Tree          | <a href="#">name</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **retail-service-id** *number*

|            |   |
|------------|---|
| Synopsis   | Configure the retail service-id   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">retail-service-id</a> <i>number</i>   |
| Tree       | <a href="#">retail-service-id</a>   |
| Range      | 1 to 2147483647   2147483648   2147483649   2147483650   2147483651 to 2147483690   2147483691 to 2148007980   2148007981 to 2148012076   2148012077 to 2148016172   2148016173 to 2148278316   2148278317   2148278318 to 2148278381   2148278382   2148278383 to 2148278386 |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### rip-policy *string*

|               |   |
|---------------|---|
| Synopsis      | RIP policy  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">rip-policy string</a> |
| Tree          | <a href="#">rip-policy</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### steering-profile *string*

|               |   |
|---------------|---|
| Synopsis      | Steering profile  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">steering-profile string</a> |
| Tree          | <a href="#">steering-profile</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### to-client-options

|            |   |
|------------|---|
| Synopsis   | Enter the <b>to-client-options</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">to-client-options</a> |
| Tree       | <a href="#">to-client-options</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### ipv6-option [[number](#)] (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv6-option</b> list instance   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt local-user-db string</a> <a href="#">ppp host string</a> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">ipv6-option</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[number]** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | DHCP option to send as identification string   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">ipv6-option</a>  |
| Range      | 1 to 65535   |
| Options    | dns-server, domain-name  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ascii-string** *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP option specified as an ASCII string  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ascii-string</a> <i>string</i> |
| Tree          | <a href="#">ascii-string</a>  |
| String Length | 1 to 127  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**domain-string** *string*

|               |  |
|---------------|--|
| Synopsis      | DHCP option specified as a domain name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">domain-string</a> <i>string</i> |
| Tree          | <a href="#">domain-string</a>  |
| String Length | 1 to 127   |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**empty**

|            |   |
|------------|---|
| Synopsis   | Empty DHCP option   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <b>empty</b> |
| Tree       | <a href="#">empty</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**hex-string** *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP option specified as hexadecimal string   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">hex-string</a> <i>string</i> |
| Tree          | <a href="#">hex-string</a>  |
| String Length | 1 to 256  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipv6-address** *string*

|                |   |
|----------------|---|
| Synopsis       | DHCP option specified as a list of IPv6 addresses   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i> <a href="#">ppp</a> <a href="#">host</a> <i>string</i> <a href="#">to-client-options</a> <a href="#">ipv6-option</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">ipv6-address</a> <i>string</i> |
| Tree           | <a href="#">ipv6-address</a>  |
| Max. Instances | 4   |
| Notes          | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>domain-string</b> , <b>empty</b> , <b>hex-string</b> , or <b>ipv6-address</b> .<br>This element is ordered by the user.   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**mask type keyword**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mask</b> list instance   |
| Context    | <b>configure subscriber-mgmt local-user-db string ppp mask type keyword</b> |
| Tree       | <b>mask</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                     |

**type keyword**

|            |   |
|------------|---|
| Synopsis   | Matching type to identify a host  |
| Context    | <b>configure subscriber-mgmt local-user-db string ppp mask type keyword</b> |
| Tree       | <b>mask</b>   |
| Options    | circuit-id, mac, remote-id, user-name, service-name, sap-id                 |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                     |

**prefix**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>prefix</b> context   |
| Context    | <b>configure subscriber-mgmt local-user-db string ppp mask type keyword prefix</b> |
| Tree       | <b>prefix</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                            |

**length number**

|            |  |
|------------|--|
| Synopsis   | PPP mask prefix length   |
| Context    | <b>configure subscriber-mgmt local-user-db string ppp mask type keyword prefix length number</b> |
| Tree       | <b>length</b>  |
| Range      | 1 to 127   |
| Notes      | The following elements are part of a mandatory choice: <b>length</b> or <b>string</b> .          |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**string** *string*

|               |  |
|---------------|--|
| Synopsis      | Prefix string  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <a href="#">string</a> <a href="#">ppp</a> <a href="#">mask</a> <a href="#">type</a> <a href="#">keyword</a> <a href="#">prefix</a> <a href="#">string</a> <a href="#">string</a> |

| Notes      | This element is part of a list key.                     |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **egress-rate-modify**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>egress-rate-modify</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">egress-rate-modify</a> |
| Tree       | <a href="#">egress-rate-modify</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **agg-rate**

|             |   |
|-------------|---|
| Synopsis    | Maximum total rate for all subscriber egress queues   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">egress-rate-modify</a> <a href="#">agg-rate</a> |
| Tree        | <a href="#">agg-rate</a>  |
| Description | This command specifies the maximum total rate for all subscriber egress queues for each subscriber associated with the policy.                        |
| Notes       | The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **scheduler** *string*

|          |   |
|----------|---|
| Synopsis | Scheduler to be applied for rate modification |
|----------|---|

|               |  |
|---------------|--|
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">egress-rate-modify</a> <a href="#">scheduler</a> <i>string</i> |
| Tree          | <a href="#">scheduler</a>  |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>agg-rate</b> or <b>scheduler</b> .   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **fast-leave** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable fast leave   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">fast-leave</a> <i>boolean</i> |
| Tree       | <a href="#">fast-leave</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **import-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Import policy to filter MLD packets  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">import-policy</a> <i>reference</i> |
| Tree       | <a href="#">import-policy</a>  |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **maximum-number-group-sources** *number*

|             |  |
|-------------|--|
| Synopsis    | Maximum number of group sources for this interface   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">maximum-number-group-sources</a> <i>number</i>   |
| Tree        | <a href="#">maximum-number-group-sources</a>   |
| Description | This command configures the maximum number of group sources for which IGMP or MLD can have local receiver information based on received IGMP or MLD reports on this interface. When this configuration is changed dynamically to a lower value than the currently accepted number of group sources, the group sources that are already accepted are not deleted. Only new group sources are not allowed. |
| Range       | 1 to 32000   |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-groups** *number*

Synopsis Maximum number of groups for this interface

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-sources** *number*

Synopsis Maximum number of sources that are allowed per group  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [maximum-number-sources](#) *number*  
Tree [maximum-number-sources](#)  
Range 1 to 1000  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-interval** *number*

Synopsis Time between two consecutive host-query messages  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [query-interval](#) *number*  
Tree [query-interval](#)  
Range 2 to 1024  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **query-last-member-interval** *number*

Synopsis Time between group-specific query messages  
Context **configure** [subscriber-mgmt](#) [mld-policy](#) *string* [query-last-member-interval](#) *number*  
Tree [query-last-member-interval](#)

---

|            |   |
|------------|---|
| Range      | 1 to 1023   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **query-response-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time to wait for a response to the host-query messages  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">query-response-interval</a> <i>number</i> |
| Tree       | <a href="#">query-response-interval</a>   |
| Range      | 1 to 1023   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **redirection-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Multicast redirection action applied to the subscriber  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">redirection-policy</a> <i>reference</i> |
| Tree       | <a href="#">redirection-policy</a>  |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **replication** *keyword*

|            |  |
|------------|--|
| Synopsis   | Multicast replication mode for subscriber multicast  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">replication</a> <i>keyword</i> |
| Tree       | <a href="#">replication</a>  |
| Options    | per-sap, per-host, per-spi   |
| Default    | per-sap  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **router-alert-check** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable router alert checking for IGMP or MLD messages |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure subscriber-mgmt mld-policy</b> <i>string</i> <b>router-alert-check</b> <i>boolean</i> |
| Tree       | <b>router-alert-check</b>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**static**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>static</b> context   |
| Context    | <b>configure subscriber-mgmt mld-policy</b> <i>string</i> <b>static</b> |
| Tree       | <b>static</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                 |

**group** [**group-address**] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>group</b> list instance  |
| Context    | <b>configure subscriber-mgmt mld-policy</b> <i>string</i> <b>static group</b> <i>string</i> |
| Tree       | <b>group</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                     |

**[group-address]** *string*

|            |   |
|------------|---|
| Synopsis   | Group address of multicast channel  |
| Context    | <b>configure subscriber-mgmt mld-policy</b> <i>string</i> <b>static group</b> <i>string</i> |
| Tree       | <b>group</b>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                     |

**source** [**source-address**] *string*

|          |   |
|----------|---|
| Synopsis | Add a list entry for <b>source</b>  |
| Context  | <b>configure subscriber-mgmt mld-policy</b> <i>string</i> <b>static group</b> <i>string</i> <b>source</b> <i>string</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">source</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                |

### **[source-address]** *string*

|            |   |
|------------|---|
| Synopsis   | Source IP address   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">static</a> <a href="#">group</a> <i>string</i> <a href="#">source</a> <i>string</i> |
| Tree       | <a href="#">source</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R2   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **starg**

|            |  |
|------------|--|
| Synopsis   | any source address (*,G)   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">static</a> <a href="#">group</a> <i>string</i> <a href="#">starg</a> |
| Tree       | <a href="#">starg</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .   |
| Introduced | 16.0.R2  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **use-multicast-destination-mac** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use multicast destination mac address for outgoing traffic.  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">use-multicast-destination-mac</a> <i>boolean</i> |
| Tree       | <a href="#">use-multicast-destination-mac</a>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **version** *keyword*

|          |                      |
|----------|----------------------|
| Synopsis | MLD protocol version |
|----------|----------------------|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">mld-policy</a> <i>string</i> <a href="#">version</a> <i>keyword</i> |
| Tree       | <a href="#">version</a>  |
| Options    | 1, 2   |
| Default    | 2  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **msap-policy** [[name](#)] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>msap-policy</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> |
| Tree           | <a href="#">msap-policy</a>  |
| Max. Instances | 256  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

### **[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Managed SAP policy name  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> |
| Tree          | <a href="#">msap-policy</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

### **cpu-protection**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cpu-protection</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">cpu-protection</a> |
| Tree       | <a href="#">cpu-protection</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s   |

## ip-src-monitoring

|            |   |
|------------|---|
| Synopsis   | Apply the IP source monitoring  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">ip-src-monitoring</a> |
| Tree       | <a href="#">ip-src-monitoring</a>   |
| Notes      | The following elements are part of a choice: <b>ip-src-monitoring</b> or <b>mac-monitoring</b> .  |
| Introduced | 16.0.R2   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s   |

## mac-monitoring

|            |  |
|------------|--|
| Synopsis   | Apply the per-source rate limit  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">mac-monitoring</a> |
| Tree       | <a href="#">mac-monitoring</a>   |
| Notes      | The following elements are part of a choice: <b>ip-src-monitoring</b> or <b>mac-monitoring</b> .   |
| Introduced | 16.0.R2  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s  |

## policy-id *reference*

|            |  |
|------------|--|
| Synopsis   | CPM protection policy  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">policy-id</a> <i>reference</i> |
| Tree       | <a href="#">policy-id</a>  |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpu-protection</a> <a href="#">policy</a> <i>number</i>                                 |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s  |

## description *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **dist-cpu-protection** *string*

|               |  |
|---------------|--|
| Synopsis      | Distributed CPU protection policy  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">dist-cpu-protection</a> <i>string</i> |
| Tree          | <a href="#">dist-cpu-protection</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ies-vprn-only-sap-parameters**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ies-vprn-only-sap-parameters</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> |
| Tree       | <a href="#">ies-vprn-only-sap-parameters</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **anti-spoof** *keyword*

|            |   |
|------------|---|
| Synopsis   | Anti-spoof filtering for the MSAP   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> <a href="#">anti-spoof</a> <i>keyword</i> |
| Tree       | <a href="#">anti-spoof</a>  |
| Options    | source-ip-and-mac-addr, next-hop-ip-and-mac-addr  |
| Default    | source-ip-and-mac-addr  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **egress**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>egress</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> <a href="#">egress</a> |
| Tree       | <a href="#">egress</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## qos

|            |   |
|------------|---|
| Synopsis   | Enter the <b>qos</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> <a href="#">egress</a> <b>qos</b> |
| Tree       | <a href="#">qos</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## policy-name *reference*

|            |  |
|------------|--|
| Synopsis   | QoS policy ID or name to associate with the MSAPs  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> <a href="#">egress</a> <b>qos</b> <a href="#">policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>  |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">sap-egress</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ingress

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ingress</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> <a href="#">ingress</a> |
| Tree       | <a href="#">ingress</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters</a> <a href="#">ingress</a> <b>qos</b> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**policy-name** *reference*

|            |  |
|------------|--|
| Synopsis   | QoS policy ID or name to associate with the MSAPs  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters ingress qos policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>  |
| Reference  | <b>configure</b> <a href="#">qos sap-ingress</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**queuing-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Queuing type  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy</a> <i>string</i> <a href="#">ies-vprn-only-sap-parameters ingress qos queuing-type</a> <i>keyword</i> |
| Tree       | <a href="#">queuing-type</a>  |
| Options    | shared, service   |
| Default    | shared  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**igmp-host-tracking**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>igmp-host-tracking</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy</a> <i>string</i> <a href="#">igmp-host-tracking</a> |
| Tree       | <a href="#">igmp-host-tracking</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**expiry-time** *number*

|          |   |
|----------|---|
| Synopsis | Time that the system continues to track inactive hosts  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt msap-policy</a> <i>string</i> <a href="#">igmp-host-tracking expiry-time</a> <i>number</i> |
| Tree     | <a href="#">expiry-time</a>   |
| Range    | 1 to 65535  |
| Units    | seconds   |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **import-policy** *reference*

Synopsis Import policy that filters IGMP packets  
Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [igmp-host-tracking](#) [import-policy](#) *reference*  
Tree [import-policy](#)  
Reference **configure** [policy-options](#) [policy-statement](#) *string*  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-group-sources** *number*

Synopsis Maximum number of multicast groups to track per group  
Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [igmp-host-tracking](#) [maximum-number-group-sources](#) *number*  
Tree [maximum-number-group-sources](#)  
Range 1 to 32000  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-groups** *number*

Synopsis Maximum number of multicast groups to be tracked  
Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [igmp-host-tracking](#) [maximum-number-groups](#) *number*  
Tree [maximum-number-groups](#)  
Range 1 to 16000  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **maximum-number-sources** *number*

Synopsis Maximum number of multicast sources to be tracked

|            |   |
|------------|---|
| Context    | <b>configure subscriber-mgmt msap-policy</b> <i>string</i> <b>igmp-host-tracking maximum-number-sources</b> <i>number</i> |
| Tree       | <a href="#">maximum-number-sources</a>  |
| Range      | 1 to 1000   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **lag-link-map-profile** *number*

|            |  |
|------------|--|
| Synopsis   | Map profile for LAG link   |
| Context    | <b>configure subscriber-mgmt msap-policy</b> <i>string</i> <b>lag-link-map-profile</b> <i>number</i> |
| Tree       | <a href="#">lag-link-map-profile</a>   |
| Range      | 1 to 64  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **sticky-msaps** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Prevent MSAPs from being deleted  |
| Context     | <b>configure subscriber-mgmt msap-policy</b> <i>string</i> <b>sticky-msaps</b> <i>boolean</i>   |
| Tree        | <a href="#">sticky-msaps</a>  |
| Description | <p>When configured to <b>true</b>, MSAPs associated with the specified MSAP policy are not removed unless a manual <b>clear</b> command is issued.</p> <p>This feature is useful if historical statistics records on MSAPs need to be retained. It can also reduce host creation time because the MSAP is already created.</p> <p>When configured to <b>false</b>, MSAPs can be automatically removed when a host creation fails or when a subscriber is no longer associated with the MSAP, for example, when a subscriber ends the session.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sticky-msaps-idle-timeout** *number*

|          |   |
|----------|---|
| Synopsis | Timeout used for sticky MSAPs   |
| Context  | <b>configure subscriber-mgmt msap-policy</b> <i>string</i> <b>sticky-msaps-idle-timeout</b> <i>number</i> |
| Tree     | <a href="#">sticky-msaps-idle-timeout</a>   |

|             |   |
|-------------|---|
| Description | <p>This command configures the timeout interval which determines when idle sticky MSAPs can be removed.</p> <p>By default, MSAPs are deleted shortly after the subscriber session ends. The system is prevented from automatically deleting sticky MSAPs after the session ends, allowing for a faster subsequent subscriber connection without MSAP creation; however, sticky MSAPs require SAP resources. The configuration of this command allows for the removal of sticky MSAPs that are idle for the specified time period.</p> <p>When unconfigured, no timeout interval is applied.</p> |
| Range       | 5 to 604800   |
| Units       | seconds   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### sub-sla-mgmt

|            |   |
|------------|---|
| Synopsis   | Enter the <b>sub-sla-mgmt</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> |
| Tree       | <a href="#">sub-sla-mgmt</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### defaults

|            |  |
|------------|--|
| Synopsis   | Enter the <b>defaults</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> |
| Tree       | <a href="#">defaults</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### app-profile *reference*

|            |   |
|------------|---|
| Synopsis   | Application profile name  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">app-profile</a> <i>reference</i>       |
| Tree       | <a href="#">app-profile</a>   |
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i> |
| Introduced | 21.10.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **int-dest-id**

Synopsis Enter the **int-dest-id** context

Context **configure subscriber-mgmt msap-policy string sub-sla-mgmt defaults int-dest-id**

Tree [int-dest-id](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **string string**

Synopsis String to be used as the int-dest-id

Context **configure subscriber-mgmt msap-policy string sub-sla-mgmt defaults int-dest-id string string**

Tree [string](#)

String Length 1 to 32

Notes The following elements are part of a choice: **string** or **top-q-tag**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **top-q-tag**

Synopsis Derive string from top most delineating Dot1Q tag

Context **configure subscriber-mgmt msap-policy string sub-sla-mgmt defaults int-dest-id top-q-tag tag**

Tree [top-q-tag](#)

Notes The following elements are part of a choice: **string** or **top-q-tag**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sla-profile reference**

Synopsis Default SLA profile

Context **configure subscriber-mgmt msap-policy string sub-sla-mgmt defaults sla-profile reference**

|            |  |
|------------|--|
| Tree       | <a href="#">sla-profile</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

### **sub-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Subscriber profile  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> defaults <a href="#">sub-profile</a> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **subscriber-id**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>subscriber-id</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> defaults <a href="#">subscriber-id</a> |
| Tree       | <a href="#">subscriber-id</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **auto-id**

|            |  |
|------------|--|
| Synopsis   | Autogenerated sub-id as default sub-id   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> defaults <a href="#">subscriber-id</a> <a href="#">auto-id</a> |
| Tree       | <a href="#">auto-id</a>  |
| Notes      | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **sap-id**

|          |                          |
|----------|--------------------------|
| Synopsis | SAP-id as default sub-id |
|----------|--------------------------|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> defaults <a href="#">subscriber-id</a> <a href="#">sap-id</a> |
| Tree       | <a href="#">sap-id</a>  |
| Notes      | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **string** *string*

|               |   |
|---------------|---|
| Synopsis      | String to be used as default sub-id   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> defaults <a href="#">subscriber-id</a> <a href="#">string</a> <i>string</i> |
| Tree          | <a href="#">string</a>  |
| String Length | 1 to 64   |
| Notes         | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **single-sub-parameters**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>single-sub-parameters</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> |
| Tree       | <a href="#">single-sub-parameters</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **non-sub-traffic-profiles**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>non-sub-traffic-profiles</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic-profiles</a> |
| Tree       | <a href="#">non-sub-traffic-profiles</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**app-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Application profile name  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic-profiles</a> <a href="#">app-profile</a> <i>reference</i> |

| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-ident-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **subscriber-limit** (*keyword* | *number*)

|            |   |
|------------|---|
| Synopsis   | Maximum subscribers on this SAP   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">subscriber-limit</a> ( <i>keyword</i>   <i>number</i> ) |
| Tree       | <a href="#">subscriber-limit</a>  |
| Range      | 1 to 131071   |
| Options    | no-limit  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**vpls-only-sap-parameters**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>vpls-only-sap-parameters</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> |
| Tree       | <a href="#">vpls-only-sap-parameters</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**arp-host**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>arp-host</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">arp-host</a> |
| Tree       | <a href="#">arp-host</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**host-limit** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of ARP hosts   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">arp-host</a> <a href="#">host-limit</a> <i>number</i> |
| Tree       | <a href="#">host-limit</a>  |
| Range      | 1 to 131071   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**min-auth-interval** *number*

|          |  |
|----------|--|
| Synopsis | Minimum authentication interval  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">arp-host</a> <a href="#">min-auth-interval</a> <i>number</i> |
| Tree     | <a href="#">min-auth-interval</a>  |
| Range    | 1 to 6000  |
| Units    | minutes  |
| Default  | 15   |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **arp-reply-agent** *keyword*

Synopsis Enable arp-reply-agent function  
Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [arp-reply-agent](#) *keyword*  
Tree [arp-reply-agent](#)  
Options true, with-subscr-ident  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dhcp**

Synopsis Enter the **dhcp** context  
Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [dhcp](#)  
Tree [dhcp](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lease-populate** *number*

Synopsis Maximum number of DHCPv4 leases per managed SAP  
Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [dhcp](#) [lease-populate](#) *number*  
Tree [lease-populate](#)  
Range 1 to 131071  
Default 1  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **option-82**

Synopsis Enter the **option-82** context  
Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [dhcp](#) [option-82](#)

|            |   |
|------------|---|
| Tree       | <a href="#">option-82</a>                               |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**action** *keyword*

|            |  |
|------------|--|
| Synopsis   | DHCP relay forwarding policy action  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp</a> <a href="#">option-82</a> <a href="#">action</a> <i>keyword</i> |
| Tree       | <a href="#">action</a>   |
| Options    | replace, drop, keep  |
| Default    | keep   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**circuit-id** *keyword*

|            |  |
|------------|--|
| Synopsis   | Circuit ID suboption of the IPOE relay   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp</a> <a href="#">option-82</a> <a href="#">circuit-id</a> <i>keyword</i> |
| Tree       | <a href="#">circuit-id</a>   |
| Options    | none, ascii-tuple, vlan-ascii-tuple  |
| Default    | ascii-tuple  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**remote-id**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>remote-id</b> context   |

| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**mac**

|            |   |
|------------|---|
| Synopsis   | MAC address of the remote end encoded in the sub-option   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp option-82</a> <a href="#">remote-id</a> <b>mac</b> |
| Tree       | <a href="#">mac</a>   |
| Notes      | The following elements are part of a choice: <b>mac</b> or <b>string</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**string** *string*

|               |  |
|---------------|--|
| Synopsis      | String to encode in the suboption  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp option-82</a> <a href="#">remote-id</a> <i>string</i> <i>string</i> |
| Tree          | <a href="#">string</a>   |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>mac</b> or <b>string</b> .   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**vendor-specific-option**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>vendor-specific-option</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp option-82</a> <a href="#">vendor-specific-option</a> |
| Tree       | <a href="#">vendor-specific-option</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**client-mac-address** *boolean*

|          |   |
|----------|---|
| Synopsis | Send MAC address in Nokia vendor-specific sub-option  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp option-82</a> <a href="#">vendor-specific-option</a> <a href="#">client-mac-address</a> <i>boolean</i> |
| Tree     | <a href="#">client-mac-address</a>  |
| Default  | false   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **sap-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send SAP ID in the Nokia vendor-specific sub-option  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp option-82</a> <a href="#">vendor-specific-option</a> <b>sap-id</b> <i>boolean</i> |
| Tree       | <a href="#">sap-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **service-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send service ID in the Nokia vendor-specific sub-option  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp option-82</a> <a href="#">vendor-specific-option</a> <b>service-id</b> <i>boolean</i> |
| Tree       | <a href="#">service-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **string** *string*

|               |   |
|---------------|---|
| Synopsis      | String in the sub-option of the DHCP relay packet   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">dhcp option-82</a> <a href="#">vendor-specific-option</a> <b>string</b> <i>string</i> |
| Tree          | <a href="#">string</a>  |
| Description   | This command specifies the string in the Nokia vendor-specific sub-option of the DHCP relay packet.   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**system-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send system ID in the Nokia vendor-specific sub-option  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy string vpls-only-sap-parameters dhcp option-82 vendor-specific-option system-id</a> <i>boolean</i> |
| Tree       | <a href="#">system-id</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**proxy-server**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>proxy-server</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy string vpls-only-sap-parameters dhcp proxy-server</a> |
| Tree       | <a href="#">proxy-server</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the DHCP proxy server   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy string vpls-only-sap-parameters dhcp proxy-server admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**emulated-server** *string*

|            |  |
|------------|--|
| Synopsis   | IP address used as DHCP server address in SAP context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy string vpls-only-sap-parameters dhcp proxy-server emulated-server</a> <i>string</i> |
| Tree       | <a href="#">emulated-server</a>  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## lease-time

Synopsis Enter the **lease-time** context

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [dhcp proxy-server](#) **lease-time**

Tree [lease-time](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## radius-override *boolean*

Synopsis Use lease time information provided by RADIUS server

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [dhcp proxy-server](#) **lease-time** [radius-override](#) *boolean*

Tree [radius-override](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## value *number*

Synopsis DHCP lease time

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) [dhcp proxy-server](#) **lease-time** [value](#) *number*

Tree [value](#)

Range 300 to 315446399

Units seconds

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## egress

Synopsis Enter the **egress** context

Context **configure** [subscriber-mgmt](#) [msap-policy](#) *string* [vpls-only-sap-parameters](#) **egress**

|            |   |
|------------|---|
| Tree       | <a href="#">egress</a>                                  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">egress</a> <a href="#">qos</a> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## policy-name *reference*

|            |   |
|------------|---|
| Synopsis   | QoS policy ID or name to associate with the MSAPs   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>   |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">sap-egress</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## igmp-snooping

|            |   |
|------------|---|
| Synopsis   | Enter the <b>igmp-snooping</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> |
| Tree       | <a href="#">igmp-snooping</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## fast-leave *boolean*

|          |   |
|----------|---|
| Synopsis | Allow IGMP fast leave processing  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">fast-leave</a> <i>boolean</i> |
| Tree     | <a href="#">fast-leave</a>  |

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **import-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Import policy that filters IGMP packets  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">import-policy</a> <i>reference</i> |
| Tree       | <a href="#">import-policy</a>  |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **maximum-number-groups** (*keyword* | *number*)

|            |  |
|------------|--|
| Synopsis   | Maximum number of multicast groups   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">maximum-number-groups</a> ( <i>keyword</i>   <i>number</i> ) |
| Tree       | <a href="#">maximum-number-groups</a>  |
| Range      | 1 to 16000   |
| Options    | unlimited  |
| Default    | unlimited  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **mcac**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mcac</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">mcac</a> |
| Tree       | <a href="#">mcac</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**bandwidth**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>bandwidth</b> context  |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b><br><b>mcac</b> <b>bandwidth</b> |
| Tree       | <b>bandwidth</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**mandatory** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Pre-reserved bandwidth for all mandatory channels   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b><br><b>mcac</b> <b>bandwidth</b> <b>mandatory</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>mandatory</b>  |
| Range      | 0 to 2147483647   |
| Options    | unlimited   |
| Default    | unlimited   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**total** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Maximum allowed bandwidth   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b><br><b>mcac</b> <b>bandwidth</b> <b>total</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>total</b>  |
| Range      | 0 to 2147483647   |
| Options    | unlimited   |
| Default    | unlimited   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**interface-policy** *reference*

|          |                            |
|----------|----------------------------|
| Synopsis | MCAC interface policy name |
|----------|----------------------------|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy string</a> <a href="#">vpls-only-sap-parameters igmp-snooping mcac interface-policy reference</a> |
| Tree       | <a href="#">interface-policy</a>   |
| Reference  | <b>configure</b> <a href="#">mcac interface-policy string</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## mc-constraints

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mc-constraints</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy string</a> <a href="#">vpls-only-sap-parameters igmp-snooping mcac mc-constraints</a> |
| Tree       | <a href="#">mc-constraints</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## level [[level-id](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>level</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy string</a> <a href="#">vpls-only-sap-parameters igmp-snooping mcac mc-constraints level number</a> |
| Tree       | <a href="#">level</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## [[level-id](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Bandwidth level ID for an MCAC constraint   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt msap-policy string</a> <a href="#">vpls-only-sap-parameters igmp-snooping mcac mc-constraints level number</a> |
| Tree       | <a href="#">level</a>   |
| Range      | 1 to 8  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**bandwidth** *number*

|            |   |
|------------|---|
| Synopsis   | Bandwidth available for this level  |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b> <b>mcac</b> <b>mc-constraints</b> <b>level</b> <i>number</i> <b>bandwidth</b> <i>number</i> |
| Tree       | <b>bandwidth</b>  |
| Max. Range | 0 to 4294967295   |
| Units      | kilobps   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**number-down** [**number-lag-port-down**] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>number-down</b> list instance   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b> <b>mcac</b> <b>mc-constraints</b> <b>number-down</b> <i>number</i> |
| Tree       | <b>number-down</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[number-lag-port-down]** *number*

|            |  |
|------------|--|
| Synopsis   | Number of lag ports down   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b> <b>mcac</b> <b>mc-constraints</b> <b>number-down</b> <i>number</i> |
| Tree       | <b>number-down</b>   |
| Range      | 1 to 64  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**level** *number*

|          |  |
|----------|--|
| Synopsis | Level to be associated with this number of lag ports that are down |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">mcac</a> <a href="#">mc-constraints</a> <a href="#">number-down</a> <i>number level number</i> |
| Tree       | <a href="#">level</a>  |
| Range      | 1 to 8   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **use-lag-port-weight** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use LAG port weight to calculate MCAC constraints  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">mcac</a> <a href="#">mc-constraints</a> <a href="#">use-lag-port-weight</a> <i>boolean</i> |
| Tree       | <a href="#">use-lag-port-weight</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Multicast CAC policy name  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">mcac</a> <a href="#">policy</a> <i>reference</i> |
| Tree       | <a href="#">policy</a>   |
| Reference  | <b>configure</b> <a href="#">mcac</a> <a href="#">policy</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **mvr**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mvr</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">mvr</a> |
| Tree       | <a href="#">mvr</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **from-vpls** *reference*

|            |   |
|------------|---|
| Synopsis   | MVR VPLS from which the multicast channels are taken  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">mvr</a> <b>from-vpls</b> <i>reference</i> |
| Tree       | <a href="#">from-vpls</a>   |
| Reference  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **query-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time between two consecutive host-query messages   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">query-interval</a> <i>number</i> |
| Tree       | <a href="#">query-interval</a>   |
| Range      | 2 to 1024  |
| Units      | seconds  |
| Default    | 125  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **query-last-member-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time between group-specific query messages   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">query-last-member-interval</a> <i>number</i> |
| Tree       | <a href="#">query-last-member-interval</a>   |
| Range      | 1 to 50  |
| Units      | deciseconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**query-response-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time to wait for a response to the host-query messages   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b> <b>query-response-interval</b> <i>number</i> |
| Tree       | <b>query-response-interval</b>   |
| Range      | 1 to 1023  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**robust-count** *number*

|            |   |
|------------|---|
| Synopsis   | Number of retries after expected message loss   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b> <b>robust-count</b> <i>number</i> |
| Tree       | <b>robust-count</b>   |
| Range      | 2 to 7  |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**send-queries** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate IGMP general queries  |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>msap-policy</b> <i>string</i> <b>vpls-only-sap-parameters</b> <b>igmp-snooping</b> <b>send-queries</b> <i>boolean</i> |
| Tree       | <b>send-queries</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**version** *keyword*

|          |              |
|----------|--------------|
| Synopsis | IGMP version |
|----------|--------------|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">igmp-snooping</a> <a href="#">version</a> <i>keyword</i> |
| Tree       | <a href="#">version</a>  |
| Options    | 1, 2, 3  |
| Default    | 3  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ingress

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ingress</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">ingress</a> |
| Tree       | <a href="#">ingress</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## qos

|            |   |
|------------|---|
| Synopsis   | Enter the <b>qos</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">ingress</a> <a href="#">qos</a> |
| Tree       | <a href="#">qos</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## policy-name *reference*

|            |  |
|------------|--|
| Synopsis   | QoS policy ID or name to associate with the MSAPs  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>  |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">sap-ingress</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**queuing-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Queuing type  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">ingress qos</a> <a href="#">queuing-type</a> <i>keyword</i> |
| Tree       | <a href="#">queuing-type</a>  |
| Options    | multipoint-shared, service  |
| Default    | multipoint-shared   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**mac-da-hashing** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include hashing on MAC DA ISO subscriber ID   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">mac-da-hashing</a> <i>boolean</i> |
| Tree       | <a href="#">mac-da-hashing</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**split-horizon-group** *string*

|               |   |
|---------------|---|
| Synopsis      | Name of the split horizon group for the MSAP  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">msap-policy</a> <i>string</i> <a href="#">vpls-only-sap-parameters</a> <a href="#">split-horizon-group</a> <i>string</i> |
| Tree          | <a href="#">split-horizon-group</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**pfcp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pfcp</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pfcp</a> |
| Tree       | <a href="#">pfcp</a>  |
| Introduced | 20.5.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **association** *[name] string*

Synopsis Enter the **association** list instance

Context **configure subscriber-mgmt pfcf association string**

Tree [association](#)

Description Commands in this context configure a PFCP association towards a BNG CUPS CPF.

Max. Instances 1

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[name] string**

Synopsis PFCP association name

Context **configure subscriber-mgmt pfcf association string**

Tree [association](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the PFCP association

Context **configure subscriber-mgmt pfcf association string admin-state keyword**

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**association-release-timeout** (*keyword | number*)

|             |   |
|-------------|---|
| Synopsis    | Time to wait for a response to a release request  |
| Context     | <b>configure subscriber-mgmt pfcg association</b> <i>string</i> <b>association-release-timeout</b> ( <i>keyword   number</i> )  |
| Tree        | <a href="#">association-release-timeout</a>   |
| Description | <p>This command configures the time to wait to clean up the PFCP association after it has been disabled. After administratively disabling a PFCP association, the system requests a shutdown to the BNG CPF. If the BNG CPF does not gracefully remove the association before expiry of the timer, the full association and all related sessions are forcefully removed.</p> <p>The PFCP protocol encoding does not allow the full range of configured values. The system automatically rounds up the configured value to the nearest value allowed by the protocol. For more information about the protocol encoding, see 3GPP TS 29.244 8.2.78.1.</p> |
| Range       | 30 to 3600  |
| Units       | seconds   |
| Options     | none  |
| Default     | 3600  |
| Introduced  | 20.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**association-setup-retry** *number*

|             |  |
|-------------|--|
| Synopsis    | Time to wait between successive association attempts   |
| Context     | <b>configure subscriber-mgmt pfcg association</b> <i>string</i> <b>association-setup-retry</b> <i>number</i> |
| Tree        | <a href="#">association-setup-retry</a>  |
| Description | This command configures the time to wait before attempting a retry after a PFCP association setup fails.     |
| Range       | 1 to 36000   |
| Units       | seconds  |
| Default     | 10   |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**bfd-expedited-path-down** *boolean*

|          |   |
|----------|---|
| Synopsis | Track BFD sessions to expedite PFCP path down detection |
|----------|---|

|             |  |
|-------------|--|
| Context     | <b>configure subscriber-mgmt pfcf association</b> <i>string</i> <b>bfd-expedited-path-down</b> <i>boolean</i>  |
| Tree        | <b>bfd-expedited-path-down</b>   |
| Description | When configured to <b>true</b> , the system tracks BFD sessions to expedite PFCF path down detection on BFD down events. This requires the configuration of <b>path-restoration-time</b> . |
| Default     | false  |
| Introduced  | 22.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure subscriber-mgmt pfcf association</b> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <b>description</b>   |
| String Length | 1 to 80  |
| Introduced    | 20.5.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **heartbeat**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>heartbeat</b> context   |
| Context     | <b>configure subscriber-mgmt pfcf association</b> <i>string</i> <b>heartbeat</b>                                   |
| Tree        | <b>heartbeat</b>   |
| Description | Commands in this context configure the parameters for transmitting PFCF Heartbeat Request messages to a PFCF peer. |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **interval** *number*

|          |   |
|----------|---|
| Synopsis | Time between two successful heartbeat request messages  |
| Context  | <b>configure subscriber-mgmt pfcf association</b> <i>string</i> <b>heartbeat interval</b> <i>number</i> |
| Tree     | <b>interval</b>   |
| Range    | 5 to 180  |
| Units    | seconds   |
| Default  | 60  |

|            |   |
|------------|---|
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **retries** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of retries after the heartbeat timeout expires   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt pfcg association</a> <i>string</i> <a href="#">heartbeat retries</a> <i>number</i>     |
| Tree        | <a href="#">retries</a>   |
| Description | This command configures the number of times the same Heartbeat Request is sent before the PFCP path to the peer is considered down. |
| Range       | 0 to 15   |
| Default     | 4   |
| Introduced  | 20.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **timeout** *number*

|             |   |
|-------------|---|
| Synopsis    | Time the system waits for a heartbeat response message  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt pfcg association</a> <i>string</i> <a href="#">heartbeat timeout</a> <i>number</i> |
| Tree        | <a href="#">timeout</a>   |
| Description | This command configures the timeout after which a Heartbeat Request is considered unanswered.                                   |
| Range       | 1 to 20   |
| Units       | seconds   |
| Default     | 5   |
| Introduced  | 20.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **interface**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>interface</b> context  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt pfcg association</a> <i>string</i> <a href="#">interface</a>                           |
| Tree        | <a href="#">interface</a>   |
| Description | Commands in this context configure the interface from which PFCP messages will be sent and on which PFCP messages will be received. |
| Introduced  | 20.5.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### name *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Name of the interface to use for the association

Context **configure subscriber-mgmt pfcg association string interface name string**

Tree **name**

String Length 1 to 32

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### router-instance *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Router context for the PFCP association

Context **configure subscriber-mgmt pfcg association string interface router-instance string**

Tree **router-instance**

Description This command configures the name of the interface, along with its routing instance, used as binding interface for PFCP.

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### nat

Synopsis Enter the **nat** context

Context **configure subscriber-mgmt pfcg association string nat**

Tree **nat**

Description Commands in this context configure NAT or WLAN-GW groups for BNG CUPS PFCP association.

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat-group** *reference*

Synopsis NAT group used for CUPS NAT functionality

Context **configure** [subscriber-mgmt pfcf association](#) *string* [nat nat-group](#) *reference*

Tree [nat-group](#)

Reference **configure** [isa nat-group](#) *number*

Notes The following elements are part of a choice: **nat-group** or **wlan-gw-group**.

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **wlan-gw-group** *reference*

Synopsis WLAN gateway group used for CUPS NAT functionality

Context **configure** [subscriber-mgmt pfcf association](#) *string* [nat wlan-gw-group](#) *reference*

Tree [wlan-gw-group](#)

Reference **configure** [isa wlan-gw-group](#) *number*

Notes The following elements are part of a choice: **nat-group** or **wlan-gw-group**.

Introduced 20.10.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **node-id**

Synopsis Enter the **node-id** context

Context **configure** [subscriber-mgmt pfcf association](#) *string* [node-id](#)

Tree [node-id](#)

Description Commands in this context configure the UPF Node Identifier as sent in PFCP. It can either be configured to use the linked interface source IP or a preconfigured FQDN.

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## fqdn string

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | FQDN that identifies the local system for PFCP   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">node-id</a> <a href="#">fqdn</a> <i>string</i> |
| Tree          | <a href="#">fqdn</a>   |
| String Length | 1 to 255   |
| Notes         | The following elements are part of a choice: <b>fqdn</b> or <b>use-ip-address</b> .  |
| Introduced    | 20.5.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## use-ip-address

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Use the IP address of interface for the association  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">node-id</a> <a href="#">use-ip-address</a> |
| Tree        | <a href="#">use-ip-address</a>   |
| Description | When configured, the binding interface address is used as identification of the local system for PFCP.                                 |
| Notes       | The following elements are part of a choice: <b>fqdn</b> or <b>use-ip-address</b> .  |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## path-restoration-time number

|             |  |
|-------------|--|
| Synopsis    | Time to wait before declaring the path down  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt pfcp association</a> <i>string</i> <a href="#">path-restoration-time</a> <i>number</i>  |
| Tree        | <a href="#">path-restoration-time</a>  |
| Description | This command configures the time for which sessions are kept after a PFCP path failure is detected. If the path recovers without a restart before this time expires, the sessions are kept. Otherwise, they are removed. |
| Range       | 5 to 1440  |

|            |   |
|------------|---|
| Units      | minutes   |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## peer

|            |  |
|------------|--|
| Synopsis   | Enter the <b>peer</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt pfcg association</a> <i>string</i> <a href="#">peer</a> |
| Tree       | <a href="#">peer</a>   |
| Introduced | 20.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ip-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | PFCP peer IP address  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt pfcg association</a> <i>string</i> <a href="#">peer ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">ip-address</a>  |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## python-policy *reference*

|            |  |
|------------|--|
| Synopsis   | Python policy to process PFCP messages   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt pfcg association</a> <i>string</i> <a href="#">python-policy</a> <i>reference</i> |
| Tree       | <a href="#">python-policy</a>  |
| Reference  | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>  |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**tx**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>tx</b> context                                    |
| Context     | <b>configure subscriber-mgmt pfcg association string tx</b>    |
| Tree        | <b>tx</b>  |
| Description | Commands in this context configure how PFCP messages are sent. |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR        |

**retries number**

|             |  |
|-------------|--|
| Synopsis    | Number of retries  |
| Context     | <b>configure subscriber-mgmt pfcg association string tx retries number</b>                                       |
| Tree        | <b>retries</b>   |
| Description | This command configures the number of times a message is retried before it is considered lost, also known as N1. |
| Range       | 0 to 7   |
| Default     | 3  |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**timeout number**

|             |  |
|-------------|--|
| Synopsis    | Retransmission timer   |
| Context     | <b>configure subscriber-mgmt pfcg association string tx timeout number</b>                         |
| Tree        | <b>timeout</b>   |
| Description | This command configures the time after which a message is considered unanswered, also known as T1. |
| Range       | 1 to 30  |
| Units       | seconds  |
| Default     | 5  |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ttl number**

|            |   |
|------------|---|
| Synopsis   | TTL value in the IP header of egress PFCP packets   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt pfcg association</a> <i>string tx ttl number</i> |
| Tree       | <a href="#">ttl</a>   |
| Range      | 1 to 255  |
| Default    | 255   |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                       |

**up-resiliency**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>up-resiliency</b> context                              |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt pfcg up-resiliency</a> |
| Tree       | <a href="#">up-resiliency</a>                                       |
| Introduced | 22.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR             |

**pim-policy [name] string**

|                |   |

**force-ppp-mtu-gt-1492 boolean**

|             |  |
|-------------|--|
| Synopsis    | Enable PPPoE MRU negotiations greater than 1492 bytes  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">force-ppp-mtu-gt-1492</a> <i>boolean</i>   |
| Tree        | <a href="#">force-ppp-mtu-gt-1492</a>  |
| Description | <p>When configured to <b>true</b>, this command enables PPPoE MRU negotiations greater than 1492 bytes without the need to receive a “PPP-Max-Payload” tag in PADI/PADR from the client as defined in RFC 4638, <i>Accommodating a Maximum Transit Unit/Maximum Receive Unit (MTU/MRU) Greater Than 1492 in the Point-to-Point Protocol over Ethernet (PPPoE)</i>.</p> <p>When configured to <b>false</b>, this command disables PPPoE MRU negotiations greater than 1492 bytes.</p> |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipcp-subnet-negotiation boolean**

|            |  |
|------------|--|
| Synopsis   | Allow IPCP subnet negotiation for PPPoE hosts  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ipcp-subnet-negotiation</a> <i>boolean</i> |
| Tree       | <a href="#">ipcp-subnet-negotiation</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**keepalive**

|          |                                    |
|----------|------------------------------------|
| Synopsis | Enter the <b>keepalive</b> context |
|----------|------------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">keepalive</a> |
| Tree       | <a href="#">keepalive</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **hold-up-multiplier** *number*

|            |  |
|------------|--|
| Synopsis   | PPP keepalive multiplier   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">keepalive</a> <a href="#">hold-up-multiplier</a> <i>number</i> |
| Tree       | <a href="#">hold-up-multiplier</a>   |
| Range      | 1 to 5   |
| Default    | 3  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **interval** *number*

|            |  |
|------------|--|
| Synopsis   | PPP keepalive interval   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">keepalive</a> <a href="#">interval</a> <i>number</i> |
| Tree       | <a href="#">interval</a>   |
| Range      | 4 to 300   |
| Units      | seconds  |
| Default    | 30   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **lcp-ignore-identifier** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Ignore identifier values in the LCP Echo Reply  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">lcp-ignore-identifier</a> <i>boolean</i>  |
| Tree        | <a href="#">lcp-ignore-identifier</a>   |
| Description | When configured to <b>true</b> , BNG ignores the Identifier field of the Echo-Reply message and keeps the PPP session up.<br>When configured to <b>false</b> , BNG does not ignore the identifier value, discards any incorrect messages, and the PPP session terminates because of the echo timeout. |
| Default     | false   |

Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lcp-ignore-magic-numbers** *boolean*

Synopsis Ignore LCP peer magic number mismatch  
 Context **configure** [subscriber-mgmt](#) [ppp-policy](#) *string* [lcp-ignore-magic-numbers](#) *boolean*  
 Tree [lcp-ignore-magic-numbers](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-sessions-per-cid**

Synopsis Enable the **max-sessions-per-cid** context  
 Context **configure** [subscriber-mgmt](#) [ppp-policy](#) *string* [max-sessions-per-cid](#)  
 Tree [max-sessions-per-cid](#)  
 Introduced 20.5.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **allow-sessions-without-cid** *boolean*

Synopsis Allow PPPoE sessions without an Agent Circuit ID  
 Context **configure** [subscriber-mgmt](#) [ppp-policy](#) *string* [max-sessions-per-cid](#) [allow-sessions-without-cid](#) *boolean*  
 Tree [allow-sessions-without-cid](#)  
 Description When configured to **true**, PPPoE sessions without an Agent Circuit ID can be established on a SAP. The limit configured for the maximum number of sessions allowed per Agent Circuit ID does not apply to these sessions.  
 When configured to **false**, PPPoE sessions without an Agent Circuit ID are denied.  
 The command is valid only when a limit is configured for the maximum sessions per Agent Circuit ID on a SAP.  
 Default false  
 Introduced 20.7.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**limit number**

|             |  |
|-------------|--|
| Synopsis    | Maximum sessions per Agent Circuit ID and per SAP  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">max-sessions-per-cid</a> <a href="#">limit</a> <i>number</i>   |
| Tree        | <a href="#">limit</a>  |
| Description | <p>This command configures the maximum number of PPPoE sessions that can be active with the same Agent Circuit ID on the same SAP or MSAP. This limit is enforced in the discovery phase, prior to PAP or CHAP authentication, based on the Agent Circuit ID sub-option present in the vendor-specific PPPoE access loop identification tag added in PADI and PADR messages by a PPPoE intermediate agent.</p> <p>PPPoE sessions without an Agent Circuit ID are not subject to the configured limit; however, sessions without an Agent Circuit ID can only be established when the <b>allow-sessions-without-cid</b> command is configured to <b>true</b>.</p> |
| Range       | 1 to 8190  |
| Notes       | This element is mandatory.   |
| Introduced  | 20.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**max-sessions-per-mac number**

|             |  |
|-------------|--|
| Synopsis    | Maximum number of sessions per MAC address   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">max-sessions-per-mac</a> <i>number</i>   |
| Tree        | <a href="#">max-sessions-per-mac</a>   |
| Description | <p>This command sets the maximum PPP sessions that can be opened for a specified MAC address.</p> <p>To enable IPv4 address allocation using the internal DHCPv4 client for multiple PPPoE sessions on a single SAP and having the same MAC address and circuit-ID, the optional CLI parameter <b>allow-same-circuit-id-for-dhcp</b> should be added. The SR OS local DHCP server detects the additional vendor-specific options inserted by the internal DHCPv4 client and use an extended unique key for lease allocation.</p> |
| Range       | 1 to 8191  |
| Default     | 1  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**mlppp**

|          |   |

### **ncp-renegotiation** *keyword*

|            |  |
|------------|--|
| Synopsis   | Behavior for subsequent NCP renegotiation messages   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ncp-renegotiation</a> <i>keyword</i> |
| Tree       | <a href="#">ncp-renegotiation</a>  |
| Options    | ignore, terminate-session  |
| Default    | terminate-session  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **pado-ac-name** *string*

|               |  |
|---------------|--|
| Synopsis      | Access Concentrator name used in PPPoE PADO message  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">pado-ac-name</a> <i>string</i> |
| Tree          | <a href="#">pado-ac-name</a>   |
| String Length | 1 to 128   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **pado-delay** *number*

|            |  |
|------------|--|
| Synopsis   | Delay timeout before sending a PADO  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">pado-delay</a> <i>number</i> |
| Tree       | <a href="#">pado-delay</a>   |
| Range      | 1 to 30  |
| Units      | deciseconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ppp-authentication** *keyword*

|            |   |
|------------|---|
| Synopsis   | PPP authentication protocol to negotiate  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-authentication</a> <i>keyword</i> |
| Tree       | <a href="#">ppp-authentication</a>  |
| Options    | pap, chap, pref-chap, pref-pap  |
| Default    | pref-chap   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ppp-chap-challenge-length**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ppp-chap-challenge-length</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-chap-challenge-length</a> |
| Tree       | <a href="#">ppp-chap-challenge-length</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **max** *number*

|          |   |
|----------|---|
| Synopsis | Maximum length for the PPP CHAP challenge   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-chap-challenge-length</a> <a href="#">max</a> <i>number</i> |
| Tree     | <a href="#">max</a>   |
| Range    | 8 to 64   |
| Default  | 64  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **min** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum length for the PPP CHAP challenge  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-chap-challenge-length</a> <i>min</i> <i>number</i> |
| Tree       | <a href="#">min</a>  |
| Range      | 8 to 64  |
| Default    | 32   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ppp-initial-delay** *boolean*

|            |  |
|------------|--|
| Synopsis   | Select delay timeout before starting the PPP stack   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-initial-delay</a> <i>boolean</i> |
| Tree       | <a href="#">ppp-initial-delay</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ppp-mtu** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum PPP MTU size  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-mtu</a> <i>number</i> |
| Tree       | <a href="#">ppp-mtu</a>   |
| Range      | 512 to 9212   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ppp-options**

|          |   |
|----------|---|
| Synopsis | Enter the <b>ppp-options</b> context  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> |

|            |   |
|------------|---|
| Tree       | <a href="#">ppp-options</a>                             |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **custom-option** [protocol](#) *keyword* [option-number](#) *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>custom-option</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a> <i>keyword</i> <a href="#">option-number</a> <i>number</i> |
| Tree       | <a href="#">custom-option</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **protocol** *keyword*

|            |   |
|------------|---|
| Synopsis   | Protocol for the custom PPP option  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a> <i>keyword</i> <a href="#">option-number</a> <i>number</i> |
| Tree       | <a href="#">custom-option</a>   |
| Options    | lcp, ipcp, ipv6cp   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **option-number** *number*

|            |   |
|------------|---|
| Synopsis   | PPP option number   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a> <i>keyword</i> <a href="#">option-number</a> <i>number</i> |
| Tree       | <a href="#">custom-option</a>   |
| Range      | 0 to 255  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**address string**

|            |  |
|------------|--|
| Synopsis   | IP address of the custom PPP option  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a><br><i>keyword</i> <a href="#">option-number</a> <i>number</i> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>address</b> , <b>ascii-string</b> , <b>empty</b> , or <b>hex-string</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ascii-string string**

|               |   |
|---------------|---|
| Synopsis      | ASCII string for the customer PPP option  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a><br><i>keyword</i> <a href="#">option-number</a> <i>number</i> <a href="#">ascii-string</a> <i>string</i> |
| Tree          | <a href="#">ascii-string</a>  |
| String Length | 1 to 127  |
| Notes         | The following elements are part of a mandatory choice: <b>address</b> , <b>ascii-string</b> , <b>empty</b> , or <b>hex-string</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**empty**

|            |  |
|------------|--|
| Synopsis   | Configure an empty PPP option.   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol</a><br><i>keyword</i> <a href="#">option-number</a> <i>number</i> <a href="#">empty</a> |
| Tree       | <a href="#">empty</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>address</b> , <b>ascii-string</b> , <b>empty</b> , or <b>hex-string</b> .  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**hex-string string**

|          |  |
|----------|--|
| Synopsis | Hexadecimal string for the custom PPP option |
|----------|--|

|               |   |
|---------------|---|
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">ppp-options</a> <a href="#">custom-option</a> <a href="#">protocol keyword</a> <a href="#">option-number</a> <i>number</i> <a href="#">hex-string</a> <i>string</i> |
| Tree          | <a href="#">hex-string</a>  |
| String Length | 1 to 256  |
| Notes         | The following elements are part of a mandatory choice: <b>address</b> , <b>ascii-string</b> , <b>empty</b> , or <b>hex-string</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **re-establish-session** *boolean*

|            |   |
|------------|---|
| Synopsis   | Reconnect and override an existing session  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">re-establish-session</a> <i>boolean</i> |
| Tree       | <a href="#">re-establish-session</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **reject-unconfigured-ncp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable/disable reject unconfigured NCP.  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">reject-unconfigured-ncp</a> <i>boolean</i> |
| Tree       | <a href="#">reject-unconfigured-ncp</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **reply-on-padt** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable/disable reply on PADT packets.  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i> <a href="#">reply-on-padt</a> <i>boolean</i> |
| Tree       | <a href="#">reply-on-padt</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**session-timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Session timeout interval   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>ppp-policy</b> <i>string</i> <b>session-timeout</b> <i>number</i> |
| Tree       | <b>session-timeout</b>   |
| Range      | 1 to 31104000  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**sid-allocation** *keyword*

|             |   |
|-------------|---|
| Synopsis    | PPPoE session ID allocation method  |
| Context     | <b>configure</b> <b>subscriber-mgmt</b> <b>ppp-policy</b> <i>string</i> <b>sid-allocation</b> <i>keyword</i>                      |
| Tree        | <b>sid-allocation</b>   |
| Description | This command determines the allocation of session IDs for a PPPoE session with a given MAC address that is active on a given SAP. |
| Options     | sequential, random  |
| Default     | sequential  |
| Introduced  | 20.2.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**unique-sid** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Mode in which a unique session ID is allocated  |
| Context     | <b>configure</b> <b>subscriber-mgmt</b> <b>ppp-policy</b> <i>string</i> <b>unique-sid</b> <i>keyword</i>  |
| Tree        | <b>unique-sid</b>   |
| Description | This command specifies how unique session IDs are assigned to PPPoE sessions that are active on a single SAP.<br><br>This command is used with the <b>sid-allocation</b> command to determine the assignment of session IDs to subsequent PPPoE sessions. |
| Options     | per-sap, per-sap-mac, per-msap  |
| Default     | per-sap-mac   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**pppoe-client-policy** [*name*] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>pppoe-client-policy</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> |
| Tree           | <a href="#">pppoe-client-policy</a>  |
| Max. Instances | 256  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | PPPoE client policy name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> |
| Tree          | <a href="#">pppoe-client-policy</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**keepalive**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>keepalive</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <a href="#">keepalive</a> |
| Tree       | <a href="#">keepalive</a>  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hold-up-multiplier** *number*

Synopsis PPPoE keepalive multiplier

Context **configure** [subscriber-mgmt](#) [pppoe-client-policy](#) *string* [keepalive](#) **hold-up-multiplier** *number*

Tree [hold-up-multiplier](#)

Range 1 to 5

Default 3

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **interval** *number*

Synopsis PPPoE keepalive interval

Context **configure** [subscriber-mgmt](#) [pppoe-client-policy](#) *string* [keepalive](#) **interval** *number*

Tree [interval](#)

Range 10 to 300

Units seconds

Default 30

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mru** *number*

Synopsis PPPoE MRU

Context **configure** [subscriber-mgmt](#) [pppoe-client-policy](#) *string* **mru** *number*

Tree [mru](#)

Range 512 to 9154

Default 1492

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mtu number**

|            |  |
|------------|--|
| Synopsis   | PPPoE MTU  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <a href="#">mtu</a> <i>number</i> |
| Tree       | <a href="#">mtu</a>  |
| Range      | 512 to 9154  |
| Default    | 1492   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **python-policy reference**

|            |   |
|------------|---|
| Synopsis   | Python policy for all messages to and from PPPoE client   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <a href="#">python-policy</a> <i>reference</i> |
| Tree       | <a href="#">python-policy</a>   |
| Reference  | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **restart-backoff**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>restart-backoff</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <a href="#">restart-backoff</a> |
| Tree       | <a href="#">restart-backoff</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **initial-time number**

|            |   |
|------------|---|
| Synopsis   | Initial backoff time  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">pppoe-client-policy</a> <i>string</i> <a href="#">restart-backoff</a> <a href="#">initial-time</a> <i>number</i> |
| Tree       | <a href="#">initial-time</a>  |
| Range      | 10 to 3600  |
| Units      | seconds   |
| Default    | 30  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-time** *number*

Synopsis Maximum backoff time

Context **configure** [subscriber-mgmt pppoe-client-policy](#) *string* [restart-backoff max-time](#) *number*

Tree [max-time](#)

Range 10 to 3600

Units seconds

Default 600

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **stack**

Synopsis Enter the **stack** context

Context **configure** [subscriber-mgmt pppoe-client-policy](#) *string* [stack](#)

Tree [stack](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv4** *boolean*

Synopsis Start IPCP to retrieve an IPv4 address

Context **configure** [subscriber-mgmt pppoe-client-policy](#) *string* [stack ipv4](#) *boolean*

Tree [ipv4](#)

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-slaac** *boolean*

Synopsis Start IPv6CP and use SLAAC to retrieve an IPv6 prefix

Context **configure** [subscriber-mgmt pppoe-client-policy](#) *string* [stack ipv6-slaac](#) *boolean*

Tree [ipv6-slaac](#)

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **radius-accounting-policy** [*name*] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>radius-accounting-policy</b> list instance                                 |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> |
| Tree           | <a href="#">radius-accounting-policy</a>  |
| Max. Instances | 32  |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                 |

### **[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | RADIUS-based accounting policy name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> |
| Tree          | <a href="#">radius-accounting-policy</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                 |

### **acct-tunnel-connection-fmt** *string*

|               |  |
|---------------|--|
| Synopsis      | String sent in the accounting message  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">acct-tunnel-connection-fmt</a> <i>string</i> |
| Tree          | <a href="#">acct-tunnel-connection-fmt</a>   |
| String Length | 1 to 253   |
| Default       | %n   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**custom-record**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>custom-record</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> |
| Tree       | <a href="#">custom-record</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**queue [id] number**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>queue</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i> |
| Tree       | <a href="#">queue</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[id] number**

|            |   |
|------------|---|
| Synopsis   | Queue ID for which counters are collected in the record   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i> |
| Tree       | <a href="#">queue</a>   |
| Range      | 1 to 32   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**e-counters**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>e-counters</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i> <a href="#">e-counters</a> |
| Tree       | <a href="#">e-counters</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**in-profile-octets-discarded-count** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the in-profile octets discarded count   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i> <a href="#">e-counters</a> <a href="#">in-profile-octets-discarded-count</a> <i>boolean</i> |
| Tree       | <a href="#">in-profile-octets-discarded-count</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**in-profile-octets-forwarded-count** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the in-profile octets forwarded count   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i> <a href="#">e-counters</a> <a href="#">in-profile-octets-forwarded-count</a> <i>boolean</i> |
| Tree       | <a href="#">in-profile-octets-forwarded-count</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**in-profile-packets-discarded-count** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the in-profile packets discarded count   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i> <a href="#">e-counters</a> <a href="#">in-profile-packets-discarded-count</a> <i>boolean</i> |
| Tree       | <a href="#">in-profile-packets-discarded-count</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**in-profile-packets-forwarded-count** *boolean*

|          |  |
|----------|--|
| Synopsis | Include the in-profile packets forwarded count   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <i>number</i> <a href="#">e-counters</a> <a href="#">in-profile-packets-forwarded-count</a> <i>boolean</i> |
| Tree     | <a href="#">in-profile-packets-forwarded-count</a>   |

---

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **out-profile-octets-discarded-count** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the out-profile octets discarded count   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <b>out-profile-octets-discarded-count</b> <i>boolean</i> |
| Tree       | <a href="#">out-profile-octets-discarded-count</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **out-profile-octets-forwarded-count** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the out-of-profile octets forwarded count  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <b>out-profile-octets-forwarded-count</b> <i>boolean</i> |
| Tree       | <a href="#">out-profile-octets-forwarded-count</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **out-profile-packets-discarded-count** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the out-profile packets discarded count   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <b>out-profile-packets-discarded-count</b> <i>boolean</i> |
| Tree       | <a href="#">out-profile-packets-discarded-count</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **out-profile-packets-forwarded-count** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the out-of-profile packets forwarded count   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">e-counters</a> <a href="#">out-profile-packets-forwarded-count</a> <i>boolean</i> |
| Tree       | <a href="#">out-profile-packets-forwarded-count</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **i-counters**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>i-counters</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> |
| Tree       | <a href="#">i-counters</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **all-octets-offered-count** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the all octets offered count  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> <a href="#">all-octets-offered-count</a> <i>boolean</i> |
| Tree       | <a href="#">all-octets-offered-count</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **all-packets-offered-count** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include all packets offered count  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">queue</a> <a href="#">number</a> <a href="#">i-counters</a> <a href="#">all-packets-offered-count</a> <i>boolean</i> |
| Tree       | <a href="#">all-packets-offered-count</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-octets-discarded-count** *boolean*

Synopsis Include the high octets discarded count

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#) *number* [i-counters](#) [high-octets-discarded-count](#) *boolean*

Tree [high-octets-discarded-count](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-octets-offered-count** *boolean*

Synopsis Include the high octets offered count

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#) *number* [i-counters](#) [high-octets-offered-count](#) *boolean*

Tree [high-octets-offered-count](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-packets-discarded-count** *boolean*

Synopsis Include the high packets discarded count

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#) *number* [i-counters](#) [high-packets-discarded-count](#) *boolean*

Tree [high-packets-discarded-count](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-packets-offered-count** *boolean*

Synopsis Include the high packets offered count

Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [queue](#) *number* [i-counters](#) [high-packets-offered-count](#) *boolean*

| Synopsis   | Include the out-profile packets discarded count   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a> <a href="#">out-profile-packets-discarded-count</a> <i>boolean</i> |
| Tree       | <a href="#">out-profile-packets-discarded-count</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**out-profile-packets-forwarded-count** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the out-of-profile packets forwarded count  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">e-counters</a> <a href="#">out-profile-packets-forwarded-count</a> <i>boolean</i> |
| Tree       | <a href="#">out-profile-packets-forwarded-count</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**i-counters**

|          |  |
|----------|--|
| Synopsis | Enter the <b>i-counters</b> context  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> |
| Tree     | <a href="#">i-counters</a>   |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **all-octets-offered-count** *boolean*

Synopsis Include the all octets offered count  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [ref-queue](#) [i-counters](#) [all-octets-offered-count](#) *boolean*  
Tree [all-octets-offered-count](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **all-packets-offered-count** *boolean*

Synopsis Include all packets offered count  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [ref-queue](#) [i-counters](#) [all-packets-offered-count](#) *boolean*  
Tree [all-packets-offered-count](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-octets-discarded-count** *boolean*

Synopsis Include the high octets discarded count  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [custom-record](#) [ref-queue](#) [i-counters](#) [high-octets-discarded-count](#) *boolean*  
Tree [high-octets-discarded-count](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-octets-offered-count** *boolean*

Synopsis Include the high octets offered count

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">high-octets-offered-count</a> <i>boolean</i> |
| Tree       | <a href="#">high-octets-offered-count</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **high-packets-discarded-count** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the high packets discarded count   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">high-packets-discarded-count</a> <i>boolean</i> |
| Tree       | <a href="#">high-packets-discarded-count</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **high-packets-offered-count** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the high packets offered count   |

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of per-host accounting |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">host-accounting</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **interim-update** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow interim-update accounting messages to be sent   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">host-accounting</a> <a href="#">interim-update</a> <i>boolean</i> |
| Tree       | <a href="#">interim-update</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **include-radius-attribute**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>include-radius-attribute</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> |
| Tree       | <a href="#">include-radius-attribute</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **access-loop-options** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include access loop information   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">access-loop-options</a> <i>boolean</i> |
| Tree       | <a href="#">access-loop-options</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**acct-authentic** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable/disable include of the acct-authentic attribute.  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute acct-authentic</a> <i>boolean</i> |
| Tree       | <a href="#">acct-authentic</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**acct-delay-time** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the acct-delay-time RADIUS attribute  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute acct-delay-time</a> <i>boolean</i> |
| Tree       | <a href="#">acct-delay-time</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**acct-triggered-reason** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include Alc-Acct-Triggered-Reason attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute acct-triggered-reason</a> <i>boolean</i> |
| Tree       | <a href="#">acct-triggered-reason</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**all-authorized-session-addresses** *boolean*

|          |  |
|----------|--|
| Synopsis | Include all address/prefix attributes  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute all-authorized-session-addresses</a> <i>boolean</i> |
| Tree     | <a href="#">all-authorized-session-addresses</a>   |

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**apn boolean**

|            |   |
|------------|---|
| Synopsis   | Enable/disable include of the APN attribute.  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">apn</a> <i>boolean</i> |
| Tree       | <a href="#">apn</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**bearer-fteid boolean**

|            |  |
|------------|--|
| Synopsis   | Include bearer-fteid attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">bearer-fteid</a> <i>boolean</i> |
| Tree       | <a href="#">bearer-fteid</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bonding-active-connections boolean**

|            |  |
|------------|--|
| Synopsis   | Include the RADIUS Alc-Bonding-Active-Connection VSA   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">bonding-active-connections</a> <i>boolean</i> |
| Tree       | <a href="#">bonding-active-connections</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**bonding-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the Alc-Bonding-Id VSA   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">bonding-id</a> <i>boolean</i> |
| Tree       | <a href="#">bonding-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**brg-num-active-sessions** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the RADIUS Alc-BRG-Num-Active-Sessions VSA  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">brg-num-active-sessions</a> <i>boolean</i> |
| Tree       | <a href="#">brg-num-active-sessions</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**called-station-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include called-station-id attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">called-station-id</a> <i>boolean</i> |
| Tree       | <a href="#">called-station-id</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**calling-station-id**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>calling-station-id</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">calling-station-id</a> |
| Tree       | <a href="#">calling-station-id</a>  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** *keyword*

Synopsis Format of the Calling-Station-ID attribute

Context **configure** **subscriber-mgmt** **radius-accounting-policy** *string* **include-radius-attribute** **calling-station-id** *type* *keyword*

Tree **type**

Options sap-string, mac, sap-id, remote-id, llid

Default sap-string

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **circuit-id** *boolean*

Synopsis Include circuit-id attribute

Context **configure** **subscriber-mgmt** **radius-accounting-policy** *string* **include-radius-attribute** **circuit-id** *boolean*

Tree **circuit-id**

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **delegated-ipv6-prefix** *boolean*

Synopsis Include delegated-ipv6-prefix attribute

Context **configure** **subscriber-mgmt** **radius-accounting-policy** *string* **include-radius-attribute** **delegated-ipv6-prefix** *boolean*

Tree **delegated-ipv6-prefix**

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **detailed-acct-attributes** *boolean*

Synopsis Include more detailed accounting attributes

---

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute detailed-acct-attributes</a> <i>boolean</i> |
| Tree       | <a href="#">detailed-acct-attributes</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **dhcp-vendor-class-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the RADIUS Alc-DHCP-Vendor-Class-Id VSA  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute dhcp-vendor-class-id</a> <i>boolean</i> |
| Tree       | <a href="#">dhcp-vendor-class-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **error-code** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include detailed error codes   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute error-code</a> <i>boolean</i> |
| Tree       | <a href="#">error-code</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **firewall-info** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the Firewall Information VSA in AAA protocols   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute firewall-info</a> <i>boolean</i> |
| Tree       | <a href="#">firewall-info</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**framed-interface-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include framed-interface-id attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">framed-interface-id</a> <i>boolean</i> |
| Tree       | <a href="#">framed-interface-id</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**framed-ip-address** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include framed-ip-address attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">framed-ip-address</a> <i>boolean</i> |
| Tree       | <a href="#">framed-ip-address</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**framed-ip-netmask** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include framed-ip-netmask attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">framed-ip-netmask</a> <i>boolean</i> |
| Tree       | <a href="#">framed-ip-netmask</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**framed-ipv6-prefix** *boolean*

|          |  |
|----------|--|
| Synopsis | Include framed-ipv6-prefix attribute   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">framed-ipv6-prefix</a> <i>boolean</i> |
| Tree     | <a href="#">framed-ipv6-prefix</a>   |

---

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**framed-ipv6-route** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include framed-ipv6-route attribute   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>framed-ipv6-route</b> <i>boolean</i> |
| Tree       | <b>framed-ipv6-route</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**framed-route** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include framed-route attribute   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>framed-route</b> <i>boolean</i> |
| Tree       | <b>framed-route</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**imei** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable/disable include of the IMEI attribute.  |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute</b> <b>imei</b> <i>boolean</i> |
| Tree       | <b>imei</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**imsi *boolean***

|            |  |
|------------|--|
| Synopsis   | Include the IMSI attribute for FWA sessions  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">imsi</a> <i>boolean</i> |
| Tree       | <a href="#">imsi</a>   |
| Default    | false  |
| Introduced | 22.2.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**ipv6-address *boolean***

|            |  |
|------------|--|
| Synopsis   | Include the IPv6 address attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">ipv6-address</a> <i>boolean</i> |
| Tree       | <a href="#">ipv6-address</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**lanext-bridge-id *boolean***

|            |  |
|------------|--|
| Synopsis   | Include Alc-Bridge-Id in RADIUS accounting packets   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">lanext-bridge-id</a> <i>boolean</i> |
| Tree       | <a href="#">lanext-bridge-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**lanext-device-type *boolean***

|          |  |
|----------|--|
| Synopsis | Include Alc-HLE-Device-type in accounting packets  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">lanext-device-type</a> <i>boolean</i> |
| Tree     | <a href="#">lanext-device-type</a>   |
| Default  | false  |

Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lanext-route-distinguisher** *boolean*

Synopsis Include route distinguisher (Alc-RD) in RADIUS packets  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [lanext-route-distinguisher](#) *boolean*  
Tree [lanext-route-distinguisher](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lanext-route-target** *boolean*

Synopsis Include route target (Alc-RT) in RADIUS packets  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [lanext-route-target](#) *boolean*  
Tree [lanext-route-target](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lanext-vni** *boolean*

Synopsis Enable/disable include of the lanext-vni attribute.  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute](#) [lanext-vni](#) *boolean*  
Tree [lanext-vni](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mac-address** *boolean*

Synopsis Include the client MAC address in the RADIUS message

|            |  |
|------------|--|
| Context    | <b>configure subscriber-mgmt radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute mac-address</b> <i>boolean</i> |
| Tree       | <a href="#">mac-address</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**msisdn** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable/disable include of the MSISDN attribute.   |
| Context    | <b>configure subscriber-mgmt radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute msisdn</b> <i>boolean</i> |
| Tree       | <a href="#">msisdn</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**nas-identifier** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable/disable include of the NAS-Identifier attribute.   |
| Context    | <b>configure subscriber-mgmt radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute nas-identifier</b> <i>boolean</i> |
| Tree       | <a href="#">nas-identifier</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**nas-port**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>nas-port</b> context   |
| Context    | <b>configure subscriber-mgmt radius-accounting-policy</b> <i>string</i> <b>include-radius-attribute nas-port</b> |
| Tree       | <a href="#">nas-port</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **bit-spec** *string*

|               |   |
|---------------|---|
| Synopsis      | RADIUS NAS-Port attribute   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port</a> <b>bit-spec</b> <i>string</i> |
| Tree          | <a href="#">bit-spec</a>  |
| String Length | 1 to 255  |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **nas-port-id**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>nas-port-id</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-id</a> |
| Tree       | <a href="#">nas-port-id</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **prefix-string** *string*

|               |   |
|---------------|---|
| Synopsis      | String to be prefixed to the NAS-Port-Id attribute  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-id</a> <b>prefix-string</b> <i>string</i> |
| Tree          | <a href="#">prefix-string</a>   |
| String Length | 1 to 8  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **suffix** *keyword*

|          |   |
|----------|---|
| Synopsis | String to be suffixed to the NAS-Port-Id attribute  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-id</a> <b>suffix</b> <i>keyword</i> |
| Tree     | <a href="#">suffix</a>  |
| Options  | circuit-id, remote-id   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **nas-port-type**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>nas-port-type</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-type</a> |
| Tree       | <a href="#">nas-port-type</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **type** (*keyword* | *number*)

|            |  |
|------------|--|
| Synopsis   | Value for RADIUS NAS-Port-Type attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-type</a> <a href="#">type</a> ( <i>keyword</i>   <i>number</i> ) |
| Tree       | <a href="#">type</a>   |
| Range      | 0 to 255   |
| Options    | rfc-aligned  |
| Default    | rfc-aligned  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **nat-port-range** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include NAT port range attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nat-port-range</a> <i>boolean</i> |
| Tree       | <a href="#">nat-port-range</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**remote-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include remote-id attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">remote-id</a> <i>boolean</i> |
| Tree       | <a href="#">remote-id</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**sla-profile** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include sla-profile attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">sla-profile</a> <i>boolean</i> |
| Tree       | <a href="#">sla-profile</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**spi-sharing-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include spi-sharing-id attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">spi-sharing-id</a> <i>boolean</i> |
| Tree       | <a href="#">spi-sharing-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**std-acct-attributes** *boolean*

|          |   |
|----------|---|
| Synopsis | Include standard accounting attributes  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">std-acct-attributes</a> <i>boolean</i> |
| Tree     | <a href="#">std-acct-attributes</a>   |
| Default  | false   |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **steering-profile** *boolean*

Synopsis Include the RADIUS Alc-Steering-Profile VSA  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute steering-profile](#) *boolean*  
Tree [steering-profile](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-profile** *boolean*

Synopsis Include sub-profile attribute  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute sub-profile](#) *boolean*  
Tree [sub-profile](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **subscriber-id** *boolean*

Synopsis Include subscriber-id attribute  
Context **configure** [subscriber-mgmt](#) [radius-accounting-policy](#) *string* [include-radius-attribute subscriber-id](#) *boolean*  
Tree [subscriber-id](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **tunnel-client-attrs** *boolean*

Synopsis Enable/disable include of tunnel-client attributes.

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">tunnel-client-attrs</a> <i>boolean</i> |
| Tree       | <a href="#">tunnel-client-attrs</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**tunnel-server-attrs** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable/disable include of tunnel-server attributes.   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">tunnel-server-attrs</a> <i>boolean</i> |
| Tree       | <a href="#">tunnel-server-attrs</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**uli** *boolean*

|            |   |
|------------|---|
| Synopsis   | Generate the ULI RADIUS attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">uli</a> <i>boolean</i> |
| Tree       | <a href="#">uli</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**user-name** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the user-name attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">user-name</a> <i>boolean</i> |
| Tree       | <a href="#">user-name</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**v6-aggregate-stats** *boolean*

|            |  |
|------------|--|
| Synopsis   | Report IPv6 aggregated forwarded octet and packet counters   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute v6-aggregate-stats</a> <i>boolean</i> |
| Tree       | <a href="#">v6-aggregate-stats</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**wifi-num-attached-ues** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the RADIUS Alc-Num-Attached-UEs VSA   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute wifi-num-attached-ues</a> <i>boolean</i> |
| Tree       | <a href="#">wifi-num-attached-ues</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**wifi-rssi** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include 802.11 received signal strength indicator   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute wifi-rssi</a> <i>boolean</i> |
| Tree       | <a href="#">wifi-rssi</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**wifi-ssid-vlan** *boolean*

|          |  |
|----------|--|
| Synopsis | Include per-SSID VLAN ID in the Alc-Wlan-SSID-VLAN VSA   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute wifi-ssid-vlan</a> <i>boolean</i> |
| Tree     | <a href="#">wifi-ssid-vlan</a>   |

|            |                                    |
|------------|------------------------------------|
| Default    | false                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **xconnect-tunnel-home-address** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the Alc-Xconnect-Tunnel-Home-Ipv6 attribute  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute xconnect-tunnel-home-address</a> <i>boolean</i> |
| Tree       | <a href="#">xconnect-tunnel-home-address</a>   |
| Default    | false  |
| Introduced | 16.0.R3  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **mcs-interval**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mcs-interval</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">mcs-interval</a> |
| Tree       | <a href="#">mcs-interval</a>   |
| Introduced | 19.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **interval** (*keyword* | *number*)

|             |  |
|-------------|--|
| Synopsis    | MCS synchronization interval of usage counters   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">mcs-interval interval</a> ( <i>keyword</i>   <i>number</i> )   |
| Tree        | <a href="#">interval</a>   |
| Description | This command specifies the interval at which the active BNG in a dual-homed deployment synchronizes subscriber accounting data using MCS to the standby BNG. The MCS interval is a statically configured value or equal to the configured RADIUS accounting update-interval. |
| Range       | 5 to 60  |
| Units       | minutes  |
| Options     | none, use-update-interval  |
| Introduced  | 19.10.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## queue-instance-accounting

Synopsis Enter the **queue-instance-accounting** context

Context **configure subscriber-mgmt radius-accounting-policy** *string* **queue-instance-accounting**

Tree [queue-instance-accounting](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis Administrative state of per-queue instance accounting

Context **configure subscriber-mgmt radius-accounting-policy** *string* **queue-instance-accounting** **admin-state** *keyword*

Tree [admin-state](#)

Options enable, disable

Default enable

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## interim-update *boolean*

Synopsis Send accounting messages for the queue instance

Context **configure subscriber-mgmt radius-accounting-policy** *string* **queue-instance-accounting** **interim-update** *boolean*

Tree [interim-update](#)

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## radius-server-policy *reference*

Synopsis Referenced RADIUS server policy

Context **configure subscriber-mgmt radius-accounting-policy** *string* **radius-server-policy** *reference*

|            |   |
|------------|---|
| Tree       | <a href="#">radius-server-policy</a>                                    |
| Reference  | <b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i> |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                 |

## session-accounting

|            |  |
|------------|--|
| Synopsis   | Enter the <b>session-accounting</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">session-accounting</a> |
| Tree       | <a href="#">session-accounting</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of per-session accounting  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">session-accounting admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## host-update *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow host updates  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i> <a href="#">session-accounting host-update</a> <i>boolean</i> |
| Tree       | <a href="#">host-update</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**interim-update** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow interim-update accounting messages to be sent  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">session-accounting</a> <a href="#">interim-update</a> <i>boolean</i> |
| Tree       | <a href="#">interim-update</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**session-id-format** *keyword*

|            |  |
|------------|--|
| Synopsis   | Format used in accounting session ID attributes  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">session-id-format</a> <i>keyword</i> |
| Tree       | <a href="#">session-id-format</a>  |
| Options    | description, number  |
| Default    | description  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**triggered-updates**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>triggered-updates</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">triggered-updates</a> |
| Tree       | <a href="#">triggered-updates</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**gtp-mobility** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send updates for mobility events  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-accounting-policy</a> <i>string</i> <a href="#">triggered-updates</a> <a href="#">gtp-mobility</a> <i>boolean</i> |
| Tree       | <a href="#">gtp-mobility</a>  |
| Default    | false   |
| Introduced | 16.0.R5   |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## update-interval

Synopsis Enter the **update-interval** context

Context **configure subscriber-mgmt radius-accounting-policy** *string* **update-interval**

Tree **update-interval**

Description Commands in this context configure the attributes of the intermediate update interval.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## interval *number*

Synopsis Intermediate update interval

Context **configure subscriber-mgmt radius-accounting-policy** *string* **update-interval** *interval number*

Tree **interval**

Description This command specifies the interval at which accounting data of subscriber hosts is updated in a RADIUS Accounting Interim-Update message. The **interim-update** option must be enabled when specifying the accounting mode in the RADIUS accounting policy.

A RADIUS-specified interim interval (attribute [85] Acct-Interim-Interval) overrides the CLI configured value.

Range 5 to 259200

Units minutes

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **jitter** (*keyword* | *number*)

Synopsis Maximum random delay for intermediate update interval

Context **configure subscriber-mgmt radius-accounting-policy** *string* **update-interval** **jitter** (*keyword* | *number*)

Tree **jitter**

Description This command specifies the absolute maximum random delay introduced on the update interval between two accounting interim update messages. The effective maximum random delay value is the minimum of the configured absolute jitter value and 10% of the configured update-interval.

A value of zero sends the accounting interim update message without introducing an additional random delay.

|            |   |
|------------|---|
| Range      | 0 to 3600   |
| Units      | seconds   |
| Options    | auto  |
| Default    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

Notes The following elements are part of a choice: **accept** or **user-db**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## user-db *string*

Synopsis Local user database used to authenticate to the server

Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* **fallback** **action** **user-db** *string*

Tree [user-db](#)

String Length 1 to 32

Notes The following elements are part of a choice: **accept** or **user-db**.

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **force-probing** *boolean*

Synopsis Enable force probing  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [fallback](#) [force-probing](#) *boolean*  
Tree [force-probing](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **include-radius-attribute**

Synopsis Enter the **include-radius-attribute** context  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#)  
Tree [include-radius-attribute](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **access-loop-options** *boolean*

Synopsis Include access loop information  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [access-loop-options](#) *boolean*  
Tree [access-loop-options](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **acct-session-id**

Synopsis Enable the **acct-session-id** context  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [acct-session-id](#)

|            |   |
|------------|---|
| Tree       | <a href="#">acct-session-id</a>                         |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**type keyword**

|            |  |
|------------|--|
| Synopsis   | Format of the accounting session ID attribute  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">acct-session-id</a> <i>type keyword</i> |
| Tree       | <a href="#">type</a>   |
| Options    | host, session  |
| Default    | host   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**apn boolean**

|            |   |
|------------|---|
| Synopsis   | Enable/disable include of the APN attribute.  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">apn</a> <i>boolean</i> |
| Tree       | <a href="#">apn</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**called-station-id boolean**

|            |   |
|------------|---|
| Synopsis   | Include called-station-id attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">called-station-id</a> <i>boolean</i> |
| Tree       | <a href="#">called-station-id</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## calling-station-id

|            |   |
|------------|---|
| Synopsis   | Enable the <b>calling-station-id</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">calling-station-id</a> |
| Tree       | <a href="#">calling-station-id</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## type *keyword*

|            |  |
|------------|--|
| Synopsis   | Format of the Calling-Station-ID attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">calling-station-id</a> <i>type</i> <i>keyword</i> |
| Tree       | <a href="#">type</a>   |
| Options    | sap-string, mac, sap-id, remote-id, llid   |
| Default    | sap-string   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## circuit-id *boolean*

|            |  |
|------------|--|
| Synopsis   | Include circuit-id attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">circuit-id</a> <i>boolean</i> |
| Tree       | <a href="#">circuit-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## dhcp-options *boolean*

|          |  |
|----------|--|
| Synopsis | Generate the DHCP options RADIUS attribute   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">dhcp-options</a> <i>boolean</i> |
| Tree     | <a href="#">dhcp-options</a>   |
| Default  | false  |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dhcp-vendor-class-id** *boolean*

Synopsis Include the RADIUS Alc-DHCP-Vendor-Class-Id VSA  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [dhcp-vendor-class-id](#) *boolean*  
Tree [dhcp-vendor-class-id](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dhcp6-options** *boolean*

Synopsis Generate the DHCPv6 options RADIUS attribute  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [dhcp6-options](#) *boolean*  
Tree [dhcp6-options](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gprs-negotiated-qos-profile** *boolean*

Synopsis Generate GPRS negotiated QoS profile RADIUS attribute  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [gprs-negotiated-qos-profile](#) *boolean*  
Tree [gprs-negotiated-qos-profile](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **imei** *boolean*

Synopsis Enable/disable include of the IMEI attribute.

---

|            |   |
|------------|---|
| Context    | <b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute imei</b> <i>boolean</i> |
| Tree       | <b>imei</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **imsi** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the IMSI attribute for FWA sessions   |
| Context    | <b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute imsi</b> <i>boolean</i> |
| Tree       | <b>imsi</b>   |
| Default    | false   |
| Introduced | 22.2.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **mac-address** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the client MAC address in the RADIUS message   |
| Context    | <b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute mac-address</b> <i>boolean</i> |
| Tree       | <b>mac-address</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **msisdn** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable/disable include of the MSISDN attribute.   |
| Context    | <b>configure subscriber-mgmt radius-authentication-policy</b> <i>string</i> <b>include-radius-attribute msisdn</b> <i>boolean</i> |
| Tree       | <b>msisdn</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**nas-identifier** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable/disable include of the NAS-Identifier attribute.  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-identifier</a> <i>boolean</i> |
| Tree       | <a href="#">nas-identifier</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**nas-port**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>nas-port</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port</a> |
| Tree       | <a href="#">nas-port</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**bit-spec** *string*

|               |  |
|---------------|--|
| Synopsis      | RADIUS NAS-Port attribute  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port</a> <a href="#">bit-spec</a> <i>string</i> |
| Tree          | <a href="#">bit-spec</a>   |
| String Length | 1 to 255   |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**nas-port-id**

|          |  |
|----------|--|
| Synopsis | Enable the <b>nas-port-id</b> context  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-id</a> |
| Tree     | <a href="#">nas-port-id</a>  |

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **prefix-string** *string*

Synopsis String to be prefixed to the NAS-Port-Id attribute  
 Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [nas-port-id](#) **prefix-string** *string*  
 Tree [prefix-string](#)  
 String Length 1 to 8  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suffix** *keyword*

Synopsis String to be suffixed to the NAS-Port-Id attribute  
 Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [nas-port-id](#) **suffix** *keyword*  
 Tree [suffix](#)  
 Options circuit-id, remote-id  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-type**

Synopsis Enable the **nas-port-type** context  
 Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [nas-port-type](#)  
 Tree [nas-port-type](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** (*keyword* | *number*)

Synopsis Value for RADIUS NAS-Port-Type attribute  
 Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [include-radius-attribute](#) [nas-port-type](#) **type** (*keyword* | *number*)

---

|            |   |
|------------|---|
| Tree       | <a href="#">type</a>                                    |
| Range      | 0 to 255  |
| Options    | rfc-aligned   |
| Default    | rfc-aligned   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **pppoe-service-name** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate the pppoe-service-name RADIUS attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">pppoe-service-name</a> <i>boolean</i> |
| Tree       | <a href="#">pppoe-service-name</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **rat-type** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate the RAT type RADIUS attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">rat-type</a> <i>boolean</i> |
| Tree       | <a href="#">rat-type</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **remote-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include remote-id attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">remote-id</a> <i>boolean</i> |
| Tree       | <a href="#">remote-id</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**sap-session-index** *boolean*

|            |   |
|------------|---|
| Synopsis   | Generate the per-SAP unique session index   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">sap-session-index</a> <i>boolean</i> |
| Tree       | <a href="#">sap-session-index</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**tunnel-server-attribs** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable/disable include of tunnel-server attributes.   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">tunnel-server-attribs</a> <i>boolean</i> |
| Tree       | <a href="#">tunnel-server-attribs</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**uli** *boolean*

|            |   |
|------------|---|
| Synopsis   | Generate the ULI RADIUS attribute   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">uli</a> <i>boolean</i> |
| Tree       | <a href="#">uli</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**wifi-num-attached-ues** *boolean*

|          |   |
|----------|---|
| Synopsis | Include the RADIUS Alc-Num-Attached-UEs VSA   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">wifi-num-attached-ues</a> <i>boolean</i> |
| Tree     | <a href="#">wifi-num-attached-ues</a>   |

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### wifi-ssid-vlan *boolean*

|            |  |
|------------|--|
| Synopsis   | Include per-SSID VLAN ID in the Alc-Wlan-SSID-VLAN VSA   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute wifi-ssid-vlan</a> <i>boolean</i> |
| Tree       | <a href="#">wifi-ssid-vlan</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### xconnect-tunnel-home-address *boolean*

|            |  |
|------------|--|
| Synopsis   | Include the Alc-Xconnect-Tunnel-Home-Ipv6 attribute  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute xconnect-tunnel-home-address</a> <i>boolean</i> |
| Tree       | <a href="#">xconnect-tunnel-home-address</a>   |
| Default    | false  |
| Introduced | 16.0.R5  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### password *string*

|               |  |
|---------------|--|
| Synopsis      | RADIUS request password  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">password</a> <i>string</i> |
| Tree          | <a href="#">password</a>   |
| String Length | 1 to 115   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### ppp-user-name

|          |  |
|----------|--|
| Synopsis | Enter the <b>ppp-user-name</b> context |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">ppp-user-name</a> |
| Tree       | <a href="#">ppp-user-name</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **domain-name** *string*

|               |   |
|---------------|---|
| Synopsis      | Domain name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">ppp-user-name</a> <a href="#">domain-name</a> <i>string</i> |
| Tree          | <a href="#">domain-name</a>   |
| String Length | 1 to 128  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **domain-operation** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Operation to perform on the PAP or CHAP username  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">ppp-user-name</a> <a href="#">domain-operation</a> <i>keyword</i> |
| Tree        | <a href="#">domain-operation</a>  |
| Description | This command specifies the operation to perform on the PAP or CHAP username.<br>When unconfigured, there is no operation and the PAP or CHAP username is not changed.     |
| Options     | append, strip, replace, default   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **pppoe-access-method** *keyword*

|          |  |
|----------|--|
| Synopsis | PPPoE access method  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt radius-authentication-policy</a> <i>string</i> <a href="#">pppoe-access-method</a> <i>keyword</i> |
| Tree     | <a href="#">pppoe-access-method</a>  |
| Options  | none, padi, pap-chap   |
| Default  | padi   |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-server-policy** *reference*

Synopsis Referenced RADIUS server policy  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [radius-server-policy](#) *reference*  
Tree [radius-server-policy](#)  
Reference **configure** [aaa](#) [radius](#) [server-policy](#) *string*  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **re-authentication** *boolean*

Synopsis Enable re-authentication on IPOE renewal  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [re-authentication](#) *boolean*  
Tree [re-authentication](#)  
Default false  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **send-acct-stop-on-fail**

Synopsis Enter the **send-acct-stop-on-fail** context  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [send-acct-stop-on-fail](#)  
Tree [send-acct-stop-on-fail](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **on-accept-failure** *boolean*

Synopsis Send an accounting stop message when a failure occurs  
Context **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string* [send-acct-stop-on-fail](#) [on-accept-failure](#) *boolean*  
Tree [on-accept-failure](#)

|             |  |
|-------------|--|
| Description | When configured to <b>true</b> , the system sends an accounting stop message when a failure occurs after the reception of a RADIUS Access-Accept message (such as a duplicate IP address). |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **on-reject** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Send an accounting stop message for Access-Reject   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">send-acct-stop-on-fail on-reject</a> <i>boolean</i> |
| Tree        | <a href="#">on-reject</a>   |
| Description | When configured to <b>true</b> , the system sends an accounting stop message when an Access-Reject message is received.   |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **on-request-failure** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Send an accounting stop message for failures   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">send-acct-stop-on-fail on-request-failure</a> <i>boolean</i>       |
| Tree        | <a href="#">on-request-failure</a>   |
| Description | When configured to <b>true</b> , the system sends an accounting stop message when a RADIUS Access-Request message cannot be sent (for example, there is no server configured, or timeout). |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **user-name**

|          |   |
|----------|---|
| Synopsis | Enter the <b>user-name</b> context  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">user-name</a> |
| Tree     | <a href="#">user-name</a>   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **domain-name** *string*

|               |   |
|---------------|---|
| Synopsis      | Domain name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">user-name</a> <a href="#">domain-name</a> <i>string</i> |
| Tree          | <a href="#">domain-name</a>   |
| String Length | 1 to 128  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **domain-operation** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Operation to perform on the username  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">user-name</a> <a href="#">domain-operation</a> <i>keyword</i> |
| Tree        | <a href="#">domain-operation</a>  |
| Description | This command specifies the operation to perform on the username.<br>When unconfigured, there is no operation and the username is not changed.   |
| Options     | append, strip, replace, default   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **format** *keyword*

|            |   |
|------------|---|
| Synopsis   | User name format in the RADIUS message  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">user-name</a> <a href="#">format</a> <i>keyword</i> |
| Tree       | <a href="#">format</a>  |
| Options    | mac, circuit-id, tuple, ascii-converted-circuit-id, ascii-converted-tuple, dhcp-client-vendor-opts, mac-giaddr, ppp-user-name   |
| Default    | mac   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**gtp-format** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Username format used for FWA sessions   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">user-name</a> <a href="#">gtp-format</a> <i>keyword</i>   |
| Tree        | <a href="#">gtp-format</a>  |
| Description | This command specifies the username format to use for FWA sessions. If a PAP message is present in the PCO IE of the Create Session request, the system uses that for authentication instead of the format specified for this command. If you specify a format that includes APN, the separator is an @ character; for example, msisdn@apn. |
| Options     | imsi, imsi-apn, msisdn, msisdn-apn  |
| Default     | imsi  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**mac-format** *string*

|               |  |
|---------------|--|
| Synopsis      | MAC address format when contacting a RADIUS server   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">radius-authentication-policy</a> <i>string</i> <a href="#">user-name</a> <a href="#">mac-format</a> <i>string</i> |
| Tree          | <a href="#">mac-format</a>   |
| String Length | 2 to 7   |
| Default       | aa:  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**rip-policy** [*name*] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>rip-policy</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">rip-policy</a> <i>string</i> |
| Tree           | <a href="#">rip-policy</a>  |
| Max. Instances | 255   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                   |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | RIP policy name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt rip-policy</a> <i>string</i> |
| Tree          | <a href="#">rip-policy</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.                                       |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                   |

**authentication-key** *string*

|               |  |
|---------------|--|
| Synopsis      | Authentication key   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt rip-policy</a> <i>string</i> <a href="#">authentication-key</a> <i>string</i> |
| Tree          | <a href="#">authentication-key</a>   |
| String Length | 1 to 51  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**authentication-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Authentication type used between RIP neighbors   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt rip-policy</a> <i>string</i> <a href="#">authentication-type</a> <i>keyword</i> |
| Tree       | <a href="#">authentication-type</a>  |
| Options    | password, message-digest, message-digest-20  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt rip-policy</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**router-advertisement-policy** [*name*] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>router-advertisement-policy</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> |
| Tree           | <a href="#">router-advertisement-policy</a>  |
| Max. Instances | 16   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Router advertisement policy name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> |
| Tree          | <a href="#">router-advertisement-policy</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**force-mcast** *keyword*

|            |  |
|------------|--|
| Synopsis   | Protocol with forced multicast   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <b>force-mcast</b> <i>keyword</i> |
| Tree       | <a href="#">force-mcast</a>  |
| Options    | ip, ip-mac   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**max-advertisement-interval** *number*

|          |  |
|----------|--|
| Synopsis | Maximum advertisement interval   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <b>max-advertisement-interval</b> <i>number</i> |
| Tree     | <a href="#">max-advertisement-interval</a>   |
| Range    | 900 to 1800  |

---

|            |   |
|------------|---|
| Units      | seconds   |
| Default    | 1800  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **min-advertisement-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum advertisement interval   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>router-advertisement-policy</b> <i>string</i> <b>min-advertisement-interval</b> <i>number</i> |
| Tree       | <a href="#">min-advertisement-interval</a>   |
| Range      | 900 to 1350  |
| Units      | seconds  |
| Default    | 900  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **options**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>options</b> context  |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>router-advertisement-policy</b> <i>string</i> <b>options</b> |
| Tree       | <a href="#">options</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **current-hop-limit** *number*

|            |  |
|------------|--|
| Synopsis   | Hop limit to be advertised   |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>router-advertisement-policy</b> <i>string</i> <b>options</b> <b>current-hop-limit</b> <i>number</i> |
| Tree       | <a href="#">current-hop-limit</a>  |
| Range      | 0 to 255   |
| Default    | 64   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**dns**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dns</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">dns</a> |
| Tree       | <a href="#">dns</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**include-rdnss** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the RDNSS server option 25  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">dns</a> <a href="#">include-rdnss</a> <i>boolean</i> |
| Tree       | <a href="#">include-rdnss</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**rdnss-lifetime** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Maximum time for the RDNSS address to remain valid   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">dns</a> <a href="#">rdnss-lifetime</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">rdnss-lifetime</a>   |
| Range      | 900 to 3600  |
| Units      | seconds  |
| Options    | infinite   |
| Default    | 3600   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**managed-configuration** *boolean*

|          |   |
|----------|---|
| Synopsis | Managed address configuration flag  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">managed-configuration</a> <i>boolean</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">managed-configuration</a>                   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **mtu** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Advertised MTU value   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <b>mtu</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mtu</a>  |
| Range      | 1280 to 9212   |
| Units      | bytes  |
| Options    | not-included   |
| Default    | not-included   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **other-stateful-configuration** *boolean*

|            |   |
|------------|---|
| Synopsis   | Other stateful configuration flag   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <b>other-stateful-configuration</b> <i>boolean</i> |
| Tree       | <a href="#">other-stateful-configuration</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **reachable-time** *number*

|          |  |
|----------|--|
| Synopsis | Reachable time for advertisements  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <b>reachable-time</b> <i>number</i> |
| Tree     | <a href="#">reachable-time</a>   |
| Range    | 0 to 3600000   |
| Units    | milliseconds   |

|            |   |
|------------|---|
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **retransmit-timer** *number*

|            |   |
|------------|---|
| Synopsis   | Retransmit time in router advertisements from interface   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">retransmit-timer</a> <i>number</i> |
| Tree       | <a href="#">retransmit-timer</a>  |
| Range      | 0 to 1800000  |
| Units      | seconds   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **router-lifetime** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Router lifetime   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">options</a> <a href="#">router-lifetime</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">router-lifetime</a>   |
| Range      | 2700 to 9000  |
| Units      | seconds   |
| Options    | no-default-router   |
| Default    | 4500  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **prefix-options**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>prefix-options</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> |
| Tree       | <a href="#">prefix-options</a>  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## stateful

Synopsis Enter the **stateful** context

Context **configure** [subscriber-mgmt](#) [router-advertisement-policy](#) *string* [prefix-options](#) [stateful](#)

Tree [stateful](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## auto-lifetimes *boolean*

Synopsis Use automatic lifetimes for stateful prefixes

Context **configure** [subscriber-mgmt](#) [router-advertisement-policy](#) *string* [prefix-options](#) [stateful](#) [auto-lifetimes](#) *boolean*

Tree [auto-lifetimes](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## on-link *boolean*

Synopsis Assign the prefix to an interface on the specified link

Context **configure** [subscriber-mgmt](#) [router-advertisement-policy](#) *string* [prefix-options](#) [stateful](#) [on-link](#) *boolean*

Tree [on-link](#)

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## preferred-lifetime (*number* | *keyword*)

Synopsis Time for a prefix to remain preferred

Context **configure** [subscriber-mgmt](#) [router-advertisement-policy](#) *string* [prefix-options](#) [stateful](#) [preferred-lifetime](#) (*number* | *keyword*)

Tree [preferred-lifetime](#)

|            |   |
|------------|---|
| Range      | 0 to 4294967294   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 3600  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **valid-lifetime** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Time for a prefix to remain valid   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateful</a> <b>valid-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">valid-lifetime</a>  |
| Range      | 0 to 4294967294   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 86400   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **stateless**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>stateless</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateless</a> |
| Tree       | <a href="#">stateless</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **on-link** *boolean*

|            |   |
|------------|---|
| Synopsis   | Assign the prefix to an interface on the specified link   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">router-advertisement-policy</a> <i>string</i> <a href="#">prefix-options</a> <a href="#">stateless</a> <b>on-link</b> <i>boolean</i> |
| Tree       | <a href="#">on-link</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **preferred-lifetime** (*number* | *keyword*)

Synopsis Time for a prefix to remain preferred

Context **configure** [subscriber-mgmt](#) [router-advertisement-policy](#) *string* [prefix-options](#) [stateless](#) [preferred-lifetime](#) (*number* | *keyword*)

Tree [preferred-lifetime](#)

Range 0 to 4294967294

Units seconds

Options infinite

Default 3600

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **valid-lifetime** (*number* | *keyword*)

Synopsis Time for a prefix to remain valid

Context **configure** [subscriber-mgmt](#) [router-advertisement-policy](#) *string* [prefix-options](#) [stateless](#) [valid-lifetime](#) (*number* | *keyword*)

Tree [valid-lifetime](#)

Range 0 to 4294967294

Units seconds

Options infinite

Default 86400

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sap-template** [[name](#)] *string*

Synopsis Enter the **sap-template** list instance

Context **configure** [subscriber-mgmt](#) [sap-template](#) *string*

Tree [sap-template](#)

Description Commands in this context configure a template for automatically-generated subscriber SAPs that is used when creating CUPS sessions. A template with name "default"

is used when no other instance is created, however, the "default" template must be explicitly provisioned.

|                |   |
|----------------|---|
| Max. Instances | 256   |
| Introduced     | 20.5.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### [name] *string*

|               |   |
|---------------|---|
| Synopsis      | SAP template name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt sap-template</a> <i>string</i> |
| Tree          | <a href="#">sap-template</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 20.5.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                     |

### cpu-protection

|            |  |
|------------|--|
| Synopsis   | Enter the <b>cpu-protection</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sap-template</a> <i>string</i> <a href="#">cpu-protection</a> |
| Tree       | <a href="#">cpu-protection</a>   |
| Introduced | 20.5.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s  |

### ip-src-monitoring

|            |  |
|------------|--|
| Synopsis   | Apply CPU protection policy on IP sources  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sap-template</a> <i>string</i> <a href="#">cpu-protection ip-src-monitoring</a> |
| Tree       | <a href="#">ip-src-monitoring</a>  |
| Notes      | The following elements are part of a choice: <b>ip-src-monitoring</b> or <b>mac-monitoring</b> .                             |
| Introduced | 20.5.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s  |

## mac-monitoring

|            |  |
|------------|--|
| Synopsis   | Apply CPU protection policy on MAC sources   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sap-template string</a> <a href="#">cpu-protection mac-monitoring</a> |
| Tree       | <a href="#">mac-monitoring</a>   |
| Notes      | The following elements are part of a choice: <b>ip-src-monitoring</b> or <b>mac-monitoring</b> .                   |
| Introduced | 20.5.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s  |

## policy-id *reference*

|            |   |
|------------|---|
| Synopsis   | CPU protection policy ID  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sap-template string</a> <a href="#">cpu-protection policy-id reference</a> |
| Tree       | <a href="#">policy-id</a>   |
| Reference  | <b>configure</b> <a href="#">system security cpu-protection policy number</a>   |
| Introduced | 20.5.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s   |

## description *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt sap-template string</a> <a href="#">description string</a> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 20.5.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## dist-cpu-protection *reference*

|            |  |
|------------|--|
| Synopsis   | Distributed CPU protection policy name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sap-template string</a> <a href="#">dist-cpu-protection reference</a> |
| Tree       | <a href="#">dist-cpu-protection</a>  |
| Reference  | <b>configure</b> <a href="#">system security dist-cpu-protection policy string</a>                                 |
| Introduced | 20.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**hold-time** (*number* | *keyword*)

|             |  |
|-------------|--|
| Synopsis    | Time to hold a SAP after last PFCP session is removed  |
| Context     | <b>configure</b> <b>subscriber-mgmt sap-template</b> <i>string</i> <b>hold-time</b> ( <i>number</i>   <i>keyword</i> )   |
| Tree        | <b>hold-time</b>   |
| Description | This command configures the time for which an SAP will be kept after the last session has been removed. Idle SAPs can be forcefully removed by the command <b>clear subscriber-mgmt sap-template template-name idle-saps</b> . |
| Range       | 0   30 to 2592000  |
| Units       | seconds  |
| Options     | infinite   |
| Default     | 30   |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**shcv-policy** [*name*] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>shcv-policy</b> list instance                        |
| Context        | <b>configure</b> <b>subscriber-mgmt shcv-policy</b> <i>string</i> |
| Tree           | <b>shcv-policy</b>  |
| Max. Instances | 64  |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR           |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | SHCV policy name  |
| Context       | <b>configure</b> <b>subscriber-mgmt shcv-policy</b> <i>string</i> |
| Tree          | <b>shcv-policy</b>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.                               |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR           |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **layer-3**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>layer-3</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <a href="#">layer-3</a> |
| Tree       | <a href="#">layer-3</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **source-ip-origin** *keyword*

|            |  |
|------------|--|
| Synopsis   | Source IP address to be used for SHCV messages   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <a href="#">layer-3</a> <a href="#">source-ip-origin</a> <i>keyword</i> |
| Tree       | <a href="#">source-ip-origin</a>   |
| Options    | interface, vrrp  |
| Default    | interface  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **unnumbered-source-ip** *string*

|             |   |
|-------------|---|
| Synopsis    | Source IPv4 address for unnumbered subscriber hosts   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <a href="#">layer-3</a> <a href="#">unnumbered-source-ip</a> <i>string</i>   |
| Tree        | <a href="#">unnumbered-source-ip</a>  |
| Description | This command configures the source IPv4 address (also known as the sender IP address) used in SHCV ARP requests for unnumbered hosts. When unconfigured, 0.0.0.0 is used as the source IPv4 address in SHCV ARP requests. |
| Introduced  | 21.10.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **periodic**

Synopsis Enter the **periodic** context

Context **configure** [subscriber-mgmt shcv-policy](#) *string* **periodic**

Tree [periodic](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **action** *keyword*

Synopsis Action when periodic connectivity verification fails

Context **configure** [subscriber-mgmt shcv-policy](#) *string* **periodic** [action](#) *keyword*

Tree [action](#)

Options alarm, remove

Default alarm

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **admin-state** *keyword*

Synopsis Administrative state of periodic connectivity check

Context **configure** [subscriber-mgmt shcv-policy](#) *string* **periodic** [admin-state](#) *keyword*

Tree [admin-state](#)

Options enable, disable

Default enable

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## **interval** *number*

Synopsis Time interval which all known sources are verified

Context **configure** [subscriber-mgmt shcv-policy](#) *string* **periodic** [interval](#) *number*

Tree [interval](#)

|             |   |
|-------------|---|
| Description | This command specifies the time interval which all known sources are verified. The actual rate is dependent on the number of known hosts and intervals. |
| Range       | 1 to 6000   |
| Units       | minutes   |
| Default     | 30  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **retry-count** *number*

|            |  |
|------------|--|
| Synopsis   | Number of retransmissions in connectivity verification   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">periodic</a> <b>retry-count</b> <i>number</i> |
| Tree       | <a href="#">retry-count</a>  |
| Range      | 1 to 29  |
| Default    | 2  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Timeout before connectivity verification retransmitted   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">periodic</a> <b>timeout</b> <i>number</i> |
| Tree       | <a href="#">timeout</a>  |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **trigger**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>trigger</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <b>trigger</b> |
| Tree       | <a href="#">trigger</a>   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### host-limit-exceeded

Synopsis Enter the **host-limit-exceeded** context

Context **configure** [subscriber-mgmt shcv-policy](#) *string* [trigger host-limit-exceeded](#)

Tree [host-limit-exceeded](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### admin-state *keyword*

Synopsis Administrative state of trigger for host-limit exceeded

Context **configure** [subscriber-mgmt shcv-policy](#) *string* [trigger host-limit-exceeded admin-state](#) *keyword*

Tree [admin-state](#)

Options enable, disable

Default enable

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### retry-count *number*

Synopsis Number of retransmissions in periodic connectivity test

Context **configure** [subscriber-mgmt shcv-policy](#) *string* [trigger host-limit-exceeded retry-count](#) *number*

Tree [retry-count](#)

Range 1 to 29

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### timeout *number*

Synopsis Timeout before a retransmission

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger host-limit-exceeded</a> <i>timeout number</i> |
| Tree       | <a href="#">timeout</a>  |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## inactivity

|            |   |
|------------|---|
| Synopsis   | Enter the <b>inactivity</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger inactivity</a> |
| Tree       | <a href="#">inactivity</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the trigger for inactive hosts  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger inactivity</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## retry-count *number*

|            |  |
|------------|--|
| Synopsis   | Number of retransmissions in periodic connectivity test  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger inactivity</a> <b>retry-count</b> <i>number</i> |
| Tree       | <a href="#">retry-count</a>  |
| Range      | 1 to 29  |
| Default    | 2  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis Timeout before a retransmission

Context **configure** [subscriber-mgmt shcv-policy](#) *string* [trigger inactivity](#) *timeout number*

Tree [timeout](#)

Range 1 to 60

Units seconds

Default 10

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ip-conflict**

Synopsis Enter the **ip-conflict** context

Context **configure** [subscriber-mgmt shcv-policy](#) *string* [trigger ip-conflict](#)

Tree [ip-conflict](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the trigger for IP conflict

Context **configure** [subscriber-mgmt shcv-policy](#) *string* [trigger ip-conflict](#) *admin-state keyword*

Tree [admin-state](#)

Options enable, disable

Default enable

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **retry-count** *number*

Synopsis Number of retransmissions in periodic connectivity test

Context **configure** [subscriber-mgmt shcv-policy](#) *string* [trigger ip-conflict](#) *retry-count number*

|            |   |
|------------|---|
| Tree       | <a href="#">retry-count</a>                             |
| Range      | 1 to 29   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Timeout before a retransmission   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger ip-conflict</a> <b>timeout</b> <i>number</i> |
| Tree       | <a href="#">timeout</a>   |
| Range      | 1 to 60   |
| Units      | seconds   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **mac-learning**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mac-learning</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger mac-learning</a> |
| Tree       | <a href="#">mac-learning</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of trigger for MAC learning  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger mac-learning</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **retry-count** *number*

|            |  |
|------------|--|
| Synopsis   | Number of retransmissions in periodic connectivity test  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger mac-learning</a> <b>retry-count</b> <i>number</i> |
| Tree       | <a href="#">retry-count</a>  |
| Range      | 1 to 29  |
| Default    | 2  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Timeout before a retransmission  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger mac-learning</a> <b>timeout</b> <i>number</i> |
| Tree       | <a href="#">timeout</a>  |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **mobility**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mobility</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger</a> <b>mobility</b> |
| Tree       | <a href="#">mobility</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of trigger for SAP IP/MAC conflict   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt shcv-policy</a> <i>string</i> <a href="#">trigger</a> <a href="#">mobility</a> <b>admin-state</b> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>   |
| Options  | enable, disable   |

|            |   |
|------------|---|
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **retry-count** *number*

|            |  |
|------------|--|
| Synopsis   | Number of retransmissions in periodic connectivity test  |
| Context    | <b>configure</b> <b>subscriber-mgmt shcv-policy</b> <i>string</i> <b>trigger mobility</b> <b>retry-count</b> <i>number</i> |
| Tree       | <b>retry-count</b>   |
| Range      | 1 to 29  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Timeout before a retransmission  |
| Context    | <b>configure</b> <b>subscriber-mgmt shcv-policy</b> <i>string</i> <b>trigger mobility</b> <b>timeout</b> <i>number</i> |
| Tree       | <b>timeout</b>   |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **vpls**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>vpls</b> context   |
| Context    | <b>configure</b> <b>subscriber-mgmt shcv-policy</b> <i>string</i> <b>vpls</b> |
| Tree       | <b>vpls</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                       |

**source-ip** *string*

|            |   |
|------------|---|
| Synopsis   | Source IPv4 address for connectivity verification   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <a href="#">vpls</a> <a href="#">source-ip</a> <i>string</i> |
| Tree       | <a href="#">source-ip</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**source-mac** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Source MAC address for connectivity verification   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">shcv-policy</a> <i>string</i> <a href="#">vpls</a> <a href="#">source-mac</a> <i>string</i> |
| Tree       | <a href="#">source-mac</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**sla-profile** [[name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sla-profile</b> list instance   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> |
| Tree       | <a href="#">sla-profile</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | SLA profile name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> |
| Tree          | <a href="#">sla-profile</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## control

Synopsis Enter the **control** context

Context **configure** [subscriber-mgmt sla-profile](#) *string* **control**

Tree [control](#)

Description Commands in this context determine which sessions can use the SLA profile.  
By default, only sessions set up by the local system can use the SLA profile, but the SLA profile can also be enabled for sessions set up by a BNG CUPS Control Plane Function (CPF).

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## cups *boolean*

Synopsis Allow the CUPS control plane to use the profile

Context **configure** [subscriber-mgmt sla-profile](#) *string* **control cups** *boolean*

Tree [cups](#)

Description When configured to **true**, the profile can be used by sessions set up by a BNG CUPS Control Plane Function (CPF).

Default false

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## local *boolean*

Synopsis Allow the local control plane to use the profile

Context **configure** [subscriber-mgmt sla-profile](#) *string* **control local** *boolean*

Tree [local](#)

Description When configured to **true**, the profile can be used by sessions set up by the local system.

Default true

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**credit-control-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Credit policy for this SLA profile  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">credit-control-policy</a> <i>reference</i> |
| Tree       | <a href="#">credit-control-policy</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">credit-control-policy</a> <i>string</i>                              |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**def-instance-sharing** *keyword*

|            |  |
|------------|--|
| Synopsis   | Default SPI sharing method for IPoE or PPPoE sessions  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">def-instance-sharing</a> <i>keyword</i> |
| Tree       | <a href="#">def-instance-sharing</a>   |
| Options    | per-sap, per-session   |
| Default    | per-sap  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**egress**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>egress</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress</a> |
| Tree       | <a href="#">egress</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **bonding-selection**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>bonding-selection</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection</a> |
| Tree       | <a href="#">bonding-selection</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## **rate-thresholds**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>rate-thresholds</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection rate-thresholds</a> |
| Tree       | <a href="#">rate-thresholds</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## **high number**

|            |  |
|------------|--|
| Synopsis   | High threshold rate percentage   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection rate-thresholds</a><br><a href="#">high number</a> |
| Tree       | <a href="#">high</a>   |
| Range      | 56 to 99   |
| Units      | percent  |
| Default    | 90   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## **low number**

|          |   |
|----------|---|
| Synopsis | Low threshold rate percentage   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection rate-thresholds</a><br><a href="#">low number</a> |
| Tree     | <a href="#">low</a>   |
| Range    | 55 to 98  |
| Units    | percent   |

|            |  |
|------------|--|
| Default    | 80   |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## weight

|            |  |
|------------|--|
| Synopsis   | Enter the <b>weight</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection weight</a> |
| Tree       | <a href="#">weight</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## change number

|            |  |
|------------|--|
| Synopsis   | Weight change of the preferred connection  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection weight change number</a> |
| Tree       | <a href="#">change</a>   |
| Range      | 0 to 10  |
| Units      | percent  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## initial number

|            |   |
|------------|---|
| Synopsis   | Initial weight of the preferred connection  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress bonding-selection weight initial number</a> |
| Tree       | <a href="#">initial</a>   |
| Range      | 1 to 100  |
| Units      | percent   |
| Default    | 100   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **ip-filter** *reference*

|            |  |
|------------|--|
| Synopsis   | IPv4 filter policy name  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress ip-filter</a> <i>reference</i> |
| Tree       | <a href="#">ip-filter</a>  |
| Reference  | <b>configure</b> <a href="#">filter ip-filter</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ipv6-filter** *reference*

|            |  |
|------------|--|
| Synopsis   | IPv6 filter policy name  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress ipv6-filter</a> <i>reference</i> |
| Tree       | <a href="#">ipv6-filter</a>  |
| Reference  | <b>configure</b> <a href="#">filter ipv6-filter</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **qos**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>qos</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos</a> |
| Tree       | <a href="#">qos</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **hs-agg-rate** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum rate for expanded egress HS queues  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos hs-agg-rate</a> <i>number</i> |
| Tree       | <a href="#">hs-agg-rate</a>   |
| Range      | 1 to 100000000  |
| Units      | kilobps   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR-7/12/12e  |

### **qos-marking-from-sap** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set policy where egress QoS marking rules are applied   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos qos-marking-from-sap</a> <i>boolean</i> |
| Tree       | <a href="#">qos-marking-from-sap</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sap-egress**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sap-egress</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress</a> |
| Tree       | <a href="#">sap-egress</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **overrides**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>overrides</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides</a> |
| Tree       | <a href="#">overrides</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **hs-queue-stat-mode** *keyword*

|            |  |
|------------|--|
| Synopsis   | Egress HS queue stats mode   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides hs-queue-stat-mode</a> <i>keyword</i> |
| Tree       | <a href="#">hs-queue-stat-mode</a>   |
| Options    | v4-v6  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

**hs-wrr-group** [*id*] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>hs-wrr-group</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress</a> <a href="#">overrides hs-wrr-group</a> <i>reference</i> |
| Tree       | <a href="#">hs-wrr-group</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

**[id]** *reference*

|            |  |
|------------|--|
| Synopsis   | HS WRR group ID to override in the QoS policy table  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress</a> <a href="#">overrides hs-wrr-group</a> <i>reference</i> |
| Tree       | <a href="#">hs-wrr-group</a>   |
| Reference  | <b>configure</b> <a href="#">qos sap-egress</a> <i>string</i> <a href="#">hs-wrr-group</a> <i>number</i>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

**hs-class-weight** *number*

|            |  |
|------------|--|
| Synopsis   | Class weight override for WRR group  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress</a> <a href="#">overrides hs-wrr-group</a> <i>reference</i> <a href="#">hs-class-weight</a> <i>number</i> |
| Tree       | <a href="#">hs-class-weight</a>  |
| Range      | 1   2   4   8  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

**rate** (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | PIR rate override for WRR group  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress</a> <a href="#">overrides hs-wrr-group</a> <i>reference</i> <a href="#">rate</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">rate</a>   |
| Range    | 1 to 2000000000  |

|            |                  |
|------------|------------------|
| Units      | kilobps          |
| Options    | max              |
| Introduced | 16.0.R1          |
| Platforms  | 7750 SR-7/12/12e |

### **policer** [*id*] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>policer</b> list instance   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides</a> <a href="#">policer reference</a> |
| Tree       | <a href="#">policer</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **[id]** *reference*

|            |  |
|------------|--|
| Synopsis   | Policer ID   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides</a> <a href="#">policer reference</a> |

| Range      | 0 to 2000000000                              |
| Units      | kilobps                                      |
| Options    | max  |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **pir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | PIR override for the packet byte offset  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <b>rate</b> <b>pir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>  |
| Range      | 1 to 2000000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **stat-mode** *keyword*

|            |  |
|------------|--|
| Synopsis   | Stat mode for the policer  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <b>stat-mode</b> <i>keyword</i> |
| Tree       | <a href="#">stat-mode</a>  |
| Options    | no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-profile-cir, offered-limited-capped-cir, offered-profile-capped-cir, v4-v6, offered-total-cir-exceed, offered-four-profile-no-cir, offered-total-cir-four-profile                                      |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **queue** [*id*] *reference*

|          |  |
|----------|--|
| Synopsis | Enter the <b>queue</b> list instance   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> |
| Tree     | <a href="#">queue</a>  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**[id] reference**

|            |  |
|------------|--|
| Synopsis   | Queue ID   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a> |
| Tree       | <a href="#">queue</a>  |
| Reference  | <b>configure</b> <a href="#">qos sap-egress</a> <i>string</i> <a href="#">queue number</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**avg-frame-overhead decimal-number**

|            |  |
|------------|--|
| Synopsis   | Average frame overhead   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference avg-frame-overhead decimal-number</a> |
| Tree       | <a href="#">avg-frame-overhead</a>   |
| Range      | 0.00 to 100.00   |
| Units      | percent  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**cbs (number | keyword)**

|            |   |
|------------|---|
| Synopsis   | CBS   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference cbs (number   keyword)</a> |
| Tree       | <a href="#">cbs</a>   |
| Range      | 0 to 1048576  |
| Units      | kilobytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**high-prio-only** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | High priority burst size  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <b>high-prio-only</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">high-prio-only</a>  |
| Range      | 0 to 100  |
| Units      | percent   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**hs-class-weight** *number*

|            |   |
|------------|---|
| Synopsis   | Class-weight override for expanded egress HS queues   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <b>hs-class-weight</b> <i>number</i> |
| Tree       | <a href="#">hs-class-weight</a>   |
| Range      | 1   2   4   8   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR-7/12/12e  |

**hs-wred-queue**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>hs-wred-queue</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <b>hs-wred-queue</b> |
| Tree       | <a href="#">hs-wred-queue</a>   |
| Introduced | 16.0.R4   |
| Platforms  | 7750 SR-7/12/12e  |

**policy** *reference*

|          |   |
|----------|---|
| Synopsis | Name of the slope-policy override applied to HS queue   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <b>hs-wred-queue</b> <a href="#">policy</a> <i>reference</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">policy</a>  |
| Reference  | <b>configure</b> <a href="#">qos slope-policy</a> <i>string</i> |
| Introduced | 16.0.R4   |
| Platforms  | 7750 SR-7/12/12e  |

### **hs-wrr-weight** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum rate for expanded egress HS queues   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a> <a href="#">hs-wrr-weight</a> <i>number</i> |
| Tree       | <a href="#">hs-wrr-weight</a>  |
| Range      | 1 to 127   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

### **mbs** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | MBS   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a> <a href="#">mbs</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mbs</a>   |
| Range      | 0 to 1073741824   |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **rate**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>rate</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue reference</a> <a href="#">rate</a> |
| Tree       | <a href="#">rate</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**cir** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | CIR for the queue   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <a href="#">rate</a> <b>cir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cir</a>   |
| Range      | 0 to 2000000000   |
| Units      | kilobps   |
| Options    | max   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**pir** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | PIR for the queue   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <a href="#">rate</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>   |
| Range      | 1 to 2000000000   |
| Units      | kilobps   |
| Options    | max   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**stat-mode** *keyword*

|            |   |
|------------|---|
| Synopsis   | Stat mode for the policer   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <a href="#">stat-mode</a> <i>keyword</i> |
| Tree       | <a href="#">stat-mode</a>   |
| Options    | v4-v6   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **policy-name** *reference*

|            |   |
|------------|---|
| Synopsis   | SAP-egress QoS policy   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>   |
| Reference  | <b>configure</b> <a href="#">qos sap-egress</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **port-parent-location** *keyword*

|            |  |
|------------|--|
| Synopsis   | Scheduling type for queued traffic   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos sap-egress port-parent-location</a> <i>keyword</i> |
| Tree       | <a href="#">port-parent-location</a>   |
| Options    | port, vport  |
| Default    | port   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **scheduler-policy**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>scheduler-policy</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress qos scheduler-policy</a> |
| Tree       | <a href="#">scheduler-policy</a>   |

| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**policy-name** *reference*

|            |   |
|------------|---|
| Synopsis   | Scheduler policy name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>   |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">scheduler-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**use-ingress-l2tp-dscp** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Use outer L2TP header for LAC sessions   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">use-ingress-l2tp-dscp</a> <i>boolean</i> |
| Tree        | <a href="#">use-ingress-l2tp-dscp</a>  |
| Description | When configured to <b>true</b> , egress classification is based on the outer L2TP header DSCP instead of the inner IP header for LAC sessions.   |

This command is ignored for non-LAC sessions.

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## report-rate

|            |   |
|------------|---|
| Synopsis   | Enter the <b>report-rate</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress report-rate</a> |
| Tree       | <a href="#">report-rate</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## agg-rate

|            |   |
|------------|---|
| Synopsis   | Report the aggregate rate   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress report-rate</a> <a href="#">agg-rate</a>                        |
| Tree       | <a href="#">agg-rate</a>  |
| Notes      | The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## policer *number*

|            |   |
|------------|---|
| Synopsis   | Report the rate of the specified policer  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress report-rate</a> <a href="#">policer</a> <i>number</i>           |
| Tree       | <a href="#">policer</a>   |
| Range      | 1 to 63   |
| Notes      | The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## pppoe-actual-rate

|            |   |
|------------|---|
| Synopsis   | Report rate from the DSL characteristics PPPoE tags   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress report-rate</a> <a href="#">pppoe-actual-rate</a>               |
| Tree       | <a href="#">pppoe-actual-rate</a>   |
| Notes      | The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## rfc5515-actual-rate

|            |   |
|------------|---|
| Synopsis   | Report the rate as specified in RFC5515   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress report-rate</a> <a href="#">rfc5515-actual-rate</a>             |
| Tree       | <a href="#">rfc5515-actual-rate</a>   |
| Notes      | The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## scheduler *string*

|               |   |
|---------------|---|
| Synopsis      | Report the rate of the specified scheduler  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">egress report-rate</a> <a href="#">scheduler</a> <i>string</i>         |
| Tree          | <a href="#">scheduler</a>   |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> . |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## host-limits

|          |  |
|----------|--|
| Synopsis | Enter the <b>host-limits</b> context   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">host-limits</a> |
| Tree     | <a href="#">host-limits</a>  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## ipv4

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> context  |
| Context    | <b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv4</b> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                            |

## arp *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum number of IPv4 ARP hosts  |
| Context     | <b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv4 arp</b> <i>number</i>  |
| Tree        | <a href="#">arp</a>   |
| Description | This command configures the maximum number of IPv4 ARP hosts per SLA profile instance.<br><br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## dhcp *number*

|             |  |
|-------------|--|
| Synopsis    | Maximum number of IPv4 DHCP hosts  |
| Context     | <b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv4 dhcp</b> <i>number</i>  |
| Tree        | <a href="#">dhcp</a>   |
| Description | This command configures the maximum number of IPv4 DHCP hosts per SLA profile instance.<br><br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**overall number**

|             |   |
|-------------|---|
| Synopsis    | Maximum number of IPv4 hosts  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">host-limits ipv4 overall</a> <i>number</i>   |
| Tree        | <a href="#">overall</a>   |
| Description | This command configures the maximum number of IPv4 hosts per SLA profile instance.<br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ppp number**

|             |   |
|-------------|---|
| Synopsis    | Maximum number of IPv4 PPP hosts  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">host-limits ipv4 ppp</a> <i>number</i>   |
| Tree        | <a href="#">ppp</a>   |
| Description | This command configures the maximum number of IPv4 PPP hosts per SLA profile instance.<br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipv6**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv6</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">host-limits ipv6</a> |
| Tree       | <a href="#">ipv6</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**overall number**

|          |                              |
|----------|------------------------------|
| Synopsis | Maximum number of IPv6 hosts |
|----------|------------------------------|

|             |   |
|-------------|---|
| Context     | <b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv6 overall</b> <i>number</i>  |
| Tree        | <b>overall</b>  |
| Description | This command configures the maximum number of IPv6 hosts per SLA profile instance.<br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **pd-ipoe-dhcp** *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum number of IPv6 IPoE DHCP PD hosts   |
| Context     | <b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv6 pd-ipoe-dhcp</b> <i>number</i>   |
| Tree        | <b>pd-ipoe-dhcp</b>   |
| Description | This command configures the maximum number of IPv6 IPoE DHCP Prefix Delegation hosts (IA-PD) per SLA profile instance.<br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **pd-overall** *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum number of IPv6 DHCP PD hosts  |
| Context     | <b>configure subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits ipv6 pd-overall</b> <i>number</i>   |
| Tree        | <b>pd-overall</b>   |
| Description | The command configures the maximum number of IPv6 DHCP Prefix Delegation hosts (IA-PD) per SLA profile instance.<br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**pd-ppp-dhcp** *number*

|             |  |
|-------------|--|
| Synopsis    | Maximum number of IPv6 PPPoE DHCP PD hosts   |
| Context     | <b>configure</b> <b>subscriber-mgmt sla-profile</b> <i>string</i> <b>host-limits</b> <b>ipv6 pd-ppp-dhcp</b> <i>number</i>   |
| Tree        | <a href="#">pd-ppp-dhcp</a>  |
| Description | This command configures the maximum number of IPv6 PPPoE DHCP Prefix Delegation hosts (IA-PD) per SLA profile instance.<br><br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071  |

|------------|--|
| Synopsis   | Enter the <b>ingress</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress</a> |
| Tree       | <a href="#">ingress</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ip-filter reference

|            |   |
|------------|---|
| Synopsis   | IPv4 filter policy name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress ip-filter</a> <i>reference</i> |
| Tree       | <a href="#">ip-filter</a>   |
| Reference  | <b>configure</b> <a href="#">filter ip-filter</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ipv6-filter reference

|            |   |
|------------|---|
| Synopsis   | IPv6 filter policy name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress ipv6-filter</a> <i>reference</i> |
| Tree       | <a href="#">ipv6-filter</a>   |
| Reference  | <b>configure</b> <a href="#">filter ipv6-filter</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos</a> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## sap-ingress

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sap-ingress</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress</a> |
| Tree       | <a href="#">sap-ingress</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## overrides

|            |  |
|------------|--|
| Synopsis   | Enter the <b>overrides</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides</a> |
| Tree       | <a href="#">overrides</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## policer [*id*] *reference*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>policer</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides policer</a> <i>reference</i> |
| Tree       | <a href="#">policer</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## [*id*] *reference*

|            |   |
|------------|---|
| Synopsis   | Policer ID  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides policer</a> <i>reference</i> |
| Tree       | <a href="#">policer</a>   |
| Reference  | <b>configure</b> <a href="#">qos sap-ingress</a> <i>string</i> <a href="#">policer</a> <i>number</i>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**cbs** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | CBS   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides policer</a><br><i>reference</i> <a href="#">cbs</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cbs</a>   |
| Range      | 0 to 268435456  |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**mbs** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | MBS   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides policer</a><br><i>reference</i> <a href="#">mbs</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mbs</a>   |
| Range      | 0 to 268435456  |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**packet-byte-offset** *number*

|            |   |
|------------|---|
| Synopsis   | Packet byte offset  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides policer</a><br><i>reference</i> <a href="#">packet-byte-offset</a> <i>number</i> |
| Tree       | <a href="#">packet-byte-offset</a>  |
| Range      | -32 to 31   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**rate**

|          |                               |
|----------|-------------------------------|
| Synopsis | Enter the <b>rate</b> context |
|----------|-------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides policer</a> <a href="#">reference rate</a> |
| Tree       | <a href="#">rate</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**cir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CIR override for the packet byte offset  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides policer</a> <a href="#">reference rate</a> <a href="#">cir</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cir</a>  |
| Range      | 0 to 2000000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**pir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | PIR override for the packet byte offset  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides policer</a> <a href="#">reference rate</a> <a href="#">pir</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>  |
| Range      | 1 to 2000000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**stat-mode** *keyword*

|          |   |
|----------|---|
| Synopsis | Stat mode for the policer   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides policer</a> <a href="#">reference</a> <a href="#">stat-mode</a> <i>keyword</i> |
| Tree     | <a href="#">stat-mode</a>   |

|            |  |
|------------|--|
| Options    | no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-priority-no-cir, offered-profile-cir, offered-priority-cir, offered-limited-profile-cir, offered-profile-capped-cir, offered-limited-capped-cir, v4-v6 |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **queue** [*id*] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>queue</b> list instance   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides queue reference</a> |
| Tree       | <a href="#">queue</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **[id]** *reference*

|            |  |
|------------|--|
| Synopsis   | Queue ID   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides queue reference</a> |
| Tree       | <a href="#">queue</a>  |
| Reference  | <b>configure</b> <a href="#">qos sap-ingress</a> <i>string</i> <a href="#">queue number</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **cbs** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | CBS   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides queue reference</a> <a href="#">cbs</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cbs</a>   |
| Range      | 0 to 1048576  |
| Units      | kilobytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **high-prio-only** (*number* | *keyword*)

Synopsis High priority burst size

Context **configure** **subscriber-mgmt sla-profile** *string* [ingress qos sap-ingress overrides queue reference](#) [high-prio-only](#) (*number* | *keyword*)

Tree [high-prio-only](#)

Range 0 to 100

Units percent

Options auto

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mbs** (*number* | *keyword*)

Synopsis MBS

Context **configure** **subscriber-mgmt sla-profile** *string* [ingress qos sap-ingress overrides queue reference](#) [mbs](#) (*number* | *keyword*)

Tree [mbs](#)

Range 0 to 1073741824

Units bytes

Options auto

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rate**

Synopsis Enter the **rate** context

Context **configure** **subscriber-mgmt sla-profile** *string* [ingress qos sap-ingress overrides queue reference](#) [rate](#)

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### agg-rate

|            |   |
|------------|---|
| Synopsis   | Report the aggregate rate   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">report-rate</a> <a href="#">agg-rate</a>       |
| Tree       | <a href="#">agg-rate</a>  |
| Notes      | The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **policer** *number*

|            |  |
|------------|--|
| Synopsis   | Report the rate of the specified policer   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">report-rate</a> <a href="#">policer</a> <i>number</i> |
| Tree       | <a href="#">policer</a>  |
| Range      | 1 to 63  |
| Notes      | The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .        |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **pppoe-actual-rate**

|            |  |
|------------|--|
| Synopsis   | Report rate from the DSL characteristics PPPoE tags  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">report-rate</a> <a href="#">pppoe-actual-rate</a> |
| Tree       | <a href="#">pppoe-actual-rate</a>  |
| Notes      | The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .    |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **rfc5515-actual-rate**

|            |  |
|------------|--|
| Synopsis   | Report the rate as specified in RFC5515  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">report-rate</a> <a href="#">rfc5515-actual-rate</a> |
| Tree       | <a href="#">rfc5515-actual-rate</a>  |
| Notes      | The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> .      |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **scheduler** *string*

|          |  |
|----------|--|
| Synopsis | Report the rate of the specified scheduler   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">ingress</a> <a href="#">report-rate</a> <a href="#">scheduler</a> <i>string</i> |
| Tree     | <a href="#">scheduler</a>  |

|               |   |
|---------------|---|
| String Length | 1 to 32   |
| Notes         | The following elements are part of a choice: <b>agg-rate</b> , <b>policer</b> , <b>pppoe-actual-rate</b> , <b>rfc5515-actual-rate</b> , or <b>scheduler</b> . |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## one-time-http-redirection

|            |  |
|------------|--|
| Synopsis   | Enter the <b>one-time-http-redirection</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">one-time-http-redirection</a> |
| Tree       | <a href="#">one-time-http-redirection</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ip-filter reference

|            |   |
|------------|---|
| Synopsis   | IPv4 filter policy name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">one-time-http-redirection ip-filter</a> <i>reference</i> |
| Tree       | <a href="#">ip-filter</a>   |
| Reference  | <b>configure</b> <a href="#">filter ip-filter</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## pfc-p mappings

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>pfc-p mappings</b> context   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-p mappings</a>   |
| Tree        | <a href="#">pfc-p mappings</a>  |
| Description | Commands in this context configure the mapping of packet forwarding control protocol (PFCP) QoS IEs (such as QoS enforcement rule (QER) GBR/MBR IEs), to local QoS overrides (such as queue and policer rates). |
| Introduced  | 21.10.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## session-qer

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>session-qer</b> context   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings session-qer</a>  |
| Tree        | <a href="#">session-qer</a>  |
| Description | <p>Commands in this context configure the mapping of the PFCP session QER rate to the local QoS rate.</p> <p>If a signaled PFCP QER rate applies to all data-plane rules, it is interpreted as the session QER rate and is mapped to the QoS overrides in the configuration. Examples of such QER rates are APN-AMBR for 4G FWA sessions and session-AMBR for 5G FWA sessions.</p> <p>A QER that contains a QER correlation ID does not use the QER mapping because it is assumed not to be a per-session construct.</p> |
| Introduced  | 21.10.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## downlink

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>downlink</b> context  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings session-qer downlink</a> |
| Tree        | <a href="#">downlink</a>   |
| Description | Commands in this context configure the downlink MBR/GBR to QoS override mapping.   |
| Introduced  | 21.10.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## aggregate-rate

|            |   |
|------------|---|
| Synopsis   | Map MBR/GBR to a rate override for the aggregate rate   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings session-qer downlink aggregate-rate</a> |
| Tree       | <a href="#">aggregate-rate</a>  |
| Notes      | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> . |
| Introduced | 21.10.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **arbiter string**

|               |   |
|---------------|---|
| Synopsis      | Arbiter target of MBR/GBR override  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings</a> <a href="#">session-qer</a> <a href="#">downlink</a> <b>arbiter</b> <i>string</i> |
| Tree          | <a href="#">arbiter</a>   |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced    | 21.10.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **policer number**

|            |   |
|------------|---|
| Synopsis   | Policer target of MBR/GBR override  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings</a> <a href="#">session-qer</a> <a href="#">downlink</a> <b>policer</b> <i>number</i> |
| Tree       | <a href="#">policer</a>   |
| Range      | 1 to 8  |
| Notes      | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced | 21.10.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **queue number**

|            |   |
|------------|---|
| Synopsis   | Queue target of MBR/GBR override  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings</a> <a href="#">session-qer</a> <a href="#">downlink</a> <b>queue</b> <i>number</i> |
| Tree       | <a href="#">queue</a>   |
| Range      | 1 to 8  |
| Notes      | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced | 21.10.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**scheduler** *string*

|               |  |
|---------------|--|
| Synopsis      | Scheduler target of MBR/GBR override   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings session-qer downlink scheduler</a> <i>string</i> |
| Tree          | <a href="#">scheduler</a>  |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>aggregate-rate</b> , <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .          |
| Introduced    | 21.10.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**uplink**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>uplink</b> context  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings session-qer uplink</a> |
| Tree        | <a href="#">uplink</a>   |
| Description | Commands in this context configure the uplink MBR/GBR to QoS override mapping.   |
| Introduced  | 21.10.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**arbiter** *string*

|               |  |
|---------------|--|
| Synopsis      | Arbiter target of MBR/GBR override   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings session-qer uplink arbiter</a> <i>string</i> |
| Tree          | <a href="#">arbiter</a>  |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .                              |
| Introduced    | 21.10.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**policer** *number*

|          |  |
|----------|--|
| Synopsis | Policer target of MBR/GBR override   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-mappings session-qer uplink policer</a> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">policer</a>   |
| Range      | 1 to 63   |
| Notes      | The following elements are part of a choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> . |
| Introduced | 21.10.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **queue number**

|            |   |
|------------|---|
| Synopsis   | Queue target of MBR/GBR override  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-p-mappings</a> <a href="#">session-qer</a> <a href="#">uplink</a> <a href="#">queue number</a> |
| Tree       | <a href="#">queue</a>   |
| Range      | 1 to 32   |
| Notes      | The following elements are part of a choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced | 21.10.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **scheduler string**

|               |   |
|---------------|---|
| Synopsis      | Scheduler target of MBR/GBR override  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">pfc-p-mappings</a> <a href="#">session-qer</a> <a href="#">uplink scheduler string</a> |
| Tree          | <a href="#">scheduler</a>   |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a choice: <b>arbiter</b> , <b>policer</b> , <b>queue</b> , or <b>scheduler</b> .   |
| Introduced    | 21.10.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **session-limits**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>session-limits</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits</a> |
| Tree       | <a href="#">session-limits</a>  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipoe number**

|             |   |
|-------------|---|
| Synopsis    | Maximum number of IPoE sessions   |
| Context     | <b>configure subscriber-mgmt sla-profile string session-limits ipoe number</b>        |
| Tree        | <a href="#">ipoe</a>  |
| Description | This command configures the maximum number of IPoE sessions per SLA profile instance. |
| Range       | 0 to 131071   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                               |

### **l2tp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>l2tp</b> context   |
| Context    | <b>configure subscriber-mgmt sla-profile string session-limits l2tp</b> |
| Tree       | <a href="#">l2tp</a>  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                 |

### **lns number**

|             |   |
|-------------|---|
| Synopsis    | Maximum number of L2TP LNS sessions   |
| Context     | <b>configure subscriber-mgmt sla-profile string session-limits l2tp lns number</b>        |
| Tree        | <a href="#">lns</a>   |
| Description | This command configures the maximum number of L2TP LNS sessions per SLA profile instance. |
| Range       | 0 to 131071   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                   |

### **lts number**

|          |  |
|----------|--|
| Synopsis | Maximum number of L2TP LTS sessions  |
| Context  | <b>configure subscriber-mgmt sla-profile string session-limits l2tp lts number</b> |
| Tree     | <a href="#">lts</a>  |

|             |   |
|-------------|---|
| Description | This command configures the maximum number of L2TP LTS sessions per SLA profile instance. |
| Range       | 0 to 131071   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                   |

### **overall number**

|             |   |
|-------------|---|
| Synopsis    | Maximum number of L2TP sessions   |
| Context     | <b>configure subscriber-mgmt sla-profile</b> <i>string session-limits l2tp overall number</i> |
| Tree        | <a href="#">overall</a>   |
| Description | This command configures the maximum number of L2TP sessions per SLA profile instance.         |
| Range       | 0 to 131071   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                       |

### **overall number**

|            |  |
|------------|--|
| Synopsis   | Maximum number of subscriber sessions  |
| Context    | <b>configure subscriber-mgmt sla-profile</b> <i>string session-limits overall number</i> |
| Tree       | <a href="#">overall</a>  |
| Range      | 0 to 131071  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                  |

### **pppoe**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pppoe</b> context  |
| Context    | <b>configure subscriber-mgmt sla-profile</b> <i>string session-limits pppoe</i> |
| Tree       | <a href="#">pppoe</a>   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                         |

**lac number**

|             |  |
|-------------|--|
| Synopsis    | Maximum number of PPPoE L2TP LAC sessions  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits pppoe lac number</a> |
| Tree        | <a href="#">lac</a>  |
| Description | This command configures the maximum number of PPPoE L2TP LAC sessions per SLA profile instance.                            |
| Range       | 0 to 131071  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**local number**

|             |  |
|-------------|--|
| Synopsis    | Maximum number of PPPoE local terminated sessions  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits pppoe local number</a> |
| Tree        | <a href="#">local</a>  |
| Description | This command configures the maximum number of PPPoE local terminated sessions (PTA) per SLA profile instance.                |
| Range       | 0 to 131071  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**overall number**

|             |  |
|-------------|--|
| Synopsis    | Maximum number of PPPoE sessions   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i> <a href="#">session-limits pppoe overall number</a> |
| Tree        | <a href="#">overall</a>  |
| Description | This command configures the maximum number of PPPoE sessions per SLA profile instance.   |
| Range       | 0 to 131071  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**steering-profile [name] string**

|          |   |
|----------|---|
| Synopsis | Enter the <b>steering-profile</b> list instance |
|----------|---|

|                |   |
|----------------|---|
| Context        | <b>configure subscriber-mgmt steering-profile</b> <i>string</i> |
| Tree           | <a href="#">steering-profile</a>                                |
| Max. Instances | 32  |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR         |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Steering profile name   |
| Context       | <b>configure subscriber-mgmt steering-profile</b> <i>string</i> |
| Tree          | <a href="#">steering-profile</a>                                |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.                             |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR         |

**access**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>access</b> context   |
| Context    | <b>configure subscriber-mgmt steering-profile</b> <i>string</i> <b>access</b> |
| Tree       | <a href="#">access</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                       |

**router-instance** *string*

|            |   |
|------------|---|
| Synopsis   | Router instance to be used as an access VAS router  |
| Context    | <b>configure subscriber-mgmt steering-profile</b> <i>string</i> <b>access router-instance</b> <i>string</i> |
| Tree       | <a href="#">router-instance</a>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt steering-profile</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**network**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>network</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt steering-profile</a> <i>string</i> <a href="#">network</a> |
| Tree       | <a href="#">network</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**next-hop** *string*

|            |  |
|------------|--|
| Synopsis   | Next-hop IP address used for network next-hop  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt steering-profile</a> <i>string</i> <a href="#">network</a> <a href="#">next-hop</a> <i>string</i> |
| Tree       | <a href="#">next-hop</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**router-instance** *string*

|            |   |
|------------|---|
| Synopsis   | Router instance to be used as an access VAS router  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt steering-profile</a> <i>string</i> <a href="#">network</a> <a href="#">router-instance</a> <i>string</i> |
| Tree       | <a href="#">router-instance</a>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**sub-ident-policy** [[name](#)] *string*

|          |   |
|----------|---|
| Synopsis | Enter the <b>sub-ident-policy</b> list instance |
|----------|---|

---

|            |   |

|-------------|--|
| Synopsis    | Enter the <b>control</b> context   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <b>control</b>   |
| Tree        | <a href="#">control</a>  |
| Description | Commands in this context determine which sessions can use the subscriber profile.<br>By default, only sessions set up by the local system can use the profile, however, the profile can also be enabled for sessions set up by a BNG CUPS CPF. |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## cups *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow the CUPS control plane to use the profile   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <b>control cups</b> <i>boolean</i>                  |
| Tree        | <a href="#">cups</a>  |
| Description | When configured to <b>true</b> , the profile can be used by sessions set up by a BNG CUPS Control Plane Function (CPF). |
| Default     | false   |
| Introduced  | 20.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## local *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow the local control plane to use the profile  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <b>control local</b> <i>boolean</i> |
| Tree        | <a href="#">local</a>   |
| Description | When configured to <b>true</b> , the profile can be used by sessions set up by the local system.        |
| Default     | true  |
| Introduced  | 20.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## description *string*

|          |  |
|----------|--|
| Synopsis | Text description   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <b>description</b> <i>string</i> |

---

|               |   |
|---------------|---|
| Tree          | <a href="#">description</a>                             |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **egress**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>egress</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress</a> |
| Tree       | <a href="#">egress</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **lag-per-link-hash**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lag-per-link-hash</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress lag-per-link-hash</a> |
| Tree       | <a href="#">lag-per-link-hash</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **class *number***

|            |   |
|------------|---|
| Synopsis   | Class used to select a LAG link   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress lag-per-link-hash class</a> <i>number</i> |
| Tree       | <a href="#">class</a>   |
| Range      | 1 to 3  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **weight *number***

|          |  |
|----------|--|
| Synopsis | Weight associated with SAP when selecting a LAG link   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress lag-per-link-hash weight</a> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">weight</a>                                  |
| Range      | 1 to 1024   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string egress qos</a> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                        |

## agg-rate

|            |   |
|------------|---|
| Synopsis   | Enter the <b>agg-rate</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string egress qos agg-rate</a> |
| Tree       | <a href="#">agg-rate</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                 |

## adaptation-rule *keyword*

|             |  |
|-------------|--|
| Synopsis    | Adaptation rule for operational PIR value of subscriber  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string egress qos agg-rate adaptation-rule keyword</a>  |
| Tree        | <a href="#">adaptation-rule</a>  |
| Description | This command configures the adaptation rule for the PIR value of the subscriber aggregate rate. This rule determines which configured value is adapted to <b>oper-agg-rate</b> based on hardware capabilities. |
| Options     | max, min, closest  |
| Default     | closest  |
| Introduced  | 21.7.R1  |
| Platforms   | 7750 SR-1, 7750 SR-s   |

**burst-limit** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Burst limit of the subscriber aggregate rate   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">agg-rate</a> <b>burst-limit</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">burst-limit</a>  |
| Range      | 1 to 14000000  |
| Units      | bytes  |
| Options    | auto   |
| Default    | auto   |
| Introduced | 21.7.R1  |
| Platforms  | 7750 SR-1, 7750 SR-s   |

**min-resv-bw** *number*

|            |   |
|------------|---|
| Synopsis   | Reserved minimum total rate of all egress queues  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">agg-rate</a> <b>min-resv-bw</b> <i>number</i> |
| Tree       | <a href="#">min-resv-bw</a>   |
| Range      | 0 to 8000000000   |
| Units      | kilobps   |
| Default    | 1   |
| Introduced | 19.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**queue-frame-based-accounting** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use frame-based accounting to evaluate rate limit   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">agg-rate</a> <b>queue-frame-based-accounting</b> <i>boolean</i> |
| Tree       | <a href="#">queue-frame-based-accounting</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**rate number**

|            |   |
|------------|---|
| Synopsis   | Maximum total rate of all egress queues   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos agg-rate rate number</a> |
| Tree       | <a href="#">rate</a>  |
| Range      | 1 to 800000000  |
| Units      | kilobps   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**encap-offset**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>encap-offset</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos encap-offset</a> |
| Tree       | <a href="#">encap-offset</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**type keyword**

|            |  |
|------------|--|
| Synopsis   | Offset type  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos encap-offset type keyword</a>   |
| Tree       | <a href="#">type</a>   |
| Options    | pppoa-llc, pppoa-null, pppoeoa-llc, pppoeoa-llc-fcs, pppoeoa-llc-tagged, pppoeoa-llc-tagged-fcs, pppoeoa-null, pppoeoa-null-fcs, pppoeoa-null-tagged, pppoeoa-null-tagged-fcs, ipoa-llc, ipoa-null, ipoeoa-llc, ipoeoa-llc-fcs, ipoeoa-llc-tagged, ipoeoa-llc-tagged-fcs, ipoeoa-null, ipoeoa-null-fcs, ipoeoa-null-tagged, ipoeoa-null-tagged-fcs, pppoe, pppoe-tagged, ipoe, ipoe-tagged |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**hs-agg-rate number**

|          |   |
|----------|---|
| Synopsis | Maximum rate for single egress HS queues  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos hs-agg-rate number</a> |
| Tree     | <a href="#">hs-agg-rate</a>   |
| Range    | 1 to 100000000  |

|            |                  |
|------------|------------------|
| Units      | kilobps          |
| Introduced | 16.0.R1          |
| Platforms  | 7750 SR-7/12/12e |

### **hs-low-burst-max-class** *number*

|            |   |
|------------|---|
| Synopsis   | Scheduling classes to map the low burst limit threshold   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos</a> <b>hs-low-burst-max-class</b> <i>number</i> |
| Tree       | <a href="#">hs-low-burst-max-class</a>  |
| Range      | 1 to 6  |
| Default    | 6   |
| Introduced | 16.0.R4   |
| Platforms  | 7750 SR-7/12/12e  |

### **hs-min-resv-bw** *number*

|            |   |
|------------|---|
| Synopsis   | Reserved minimum total rate of all egress queues  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos</a> <b>hs-min-resv-bw</b> <i>number</i> |
| Tree       | <a href="#">hs-min-resv-bw</a>  |
| Range      | 0 to 100000000  |
| Units      | kilobps   |
| Default    | 1   |
| Introduced | 19.10.R1  |
| Platforms  | 7750 SR-7/12/12e  |

### **policer-control-policy**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>policer-control-policy</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos</a> <b>policer-control-policy</b> |
| Tree       | <a href="#">policer-control-policy</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## overrides

|            |  |
|------------|--|
| Synopsis   | Enter the <b>overrides</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos policer-control-policy overrides</a> |
| Tree       | <a href="#">overrides</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## root

|            |  |
|------------|--|
| Synopsis   | Enable the <b>root</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos policer-control-policy overrides</a><br><a href="#">root</a> |
| Tree       | <a href="#">root</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## max-rate (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Maximum rate   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos policer-control-policy overrides</a><br><a href="#">root max-rate</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">max-rate</a>   |
| Range      | 1 to 2000000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## priority-mbs-thresholds

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priority-mbs-thresholds</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos policer-control-policy overrides</a><br><a href="#">root priority-mbs-thresholds</a> |
| Tree       | <a href="#">priority-mbs-thresholds</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**min-thresh-separation** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Minimum threshold separation  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <b>min-thresh-separation</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">min-thresh-separation</a>   |
| Range      | 0 to 16777216   |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**priority** [[level](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>priority</b> list instance   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <b>priority</b> <i>number</i> |
| Tree       | <a href="#">priority</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**[level]** *number*

|            |   |
|------------|---|
| Synopsis   | Strict priority level   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <b>priority</b> <i>number</i> |
| Tree       | <a href="#">priority</a>  |
| Range      | 1 to 8  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**mbs-contribution** (*number* | *keyword*)

|          |          |
|----------|----------|
| Synopsis | MBS size |
|----------|----------|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos policer-control-policy overrides</a> <a href="#">root priority-mbs-thresholds priority</a> <i>number</i> <a href="#">mbs-contribution</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mbs-contribution</a>   |
| Range      | 0 to 16777216  |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **policy-name** *reference*

|            |   |
|------------|---|
| Synopsis   | Policer control policy name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos policer-control-policy</a> <a href="#">policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>   |
| Reference  | <b>configure</b> <a href="#">qos policer-control-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **scheduler-policy**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>scheduler-policy</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos scheduler-policy</a> |
| Tree       | <a href="#">scheduler-policy</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **overrides**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>overrides</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">egress qos scheduler-policy overrides</a> |
| Tree       | <a href="#">overrides</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**scheduler** [[scheduler-name](#)] *reference*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>scheduler</b> list instance  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos scheduler-policy overrides scheduler reference</a> |
| Tree       | <a href="#">scheduler</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[scheduler-name]** *reference*

|            |   |
|------------|---|
| Synopsis   | Scheduler policy name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos scheduler-policy overrides scheduler reference</a> |
| Tree       | <a href="#">scheduler</a>   |
| Reference  | <b>configure</b> <a href="#">qos scheduler-policy string tier number scheduler string</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**rate**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rate</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos scheduler-policy overrides scheduler reference rate</a> |
| Tree       | <a href="#">rate</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**cir** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | CIR to override administrative CIR used by scheduler  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos scheduler-policy overrides scheduler reference rate cir (number   keyword)</a> |
| Tree     | <a href="#">cir</a>   |
| Range    | 0 to 3200000000   |
| Units    | kilobps   |

|            |   |
|------------|---|
| Options    | sum, max  |
| Default    | sum   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **pir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | PIR to override administrative PIR used by scheduler   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos scheduler-policy overrides scheduler reference rate</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>  |
| Range      | 1 to 3200000000  |
| Units      | kilobps  |
| Options    | max  |
| Default    | max  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **policy-name** *reference*

|            |   |
|------------|---|
| Synopsis   | Scheduler policy name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">egress qos scheduler-policy policy-name reference</a> |
| Tree       | <a href="#">policy-name</a>   |

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **firewall-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Firewall policy   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">firewall-policy reference</a> |
| Tree       | <a href="#">firewall-policy</a>   |
| Reference  | <b>configure</b> <a href="#">service nat firewall-policy string</a>   |
| Introduced | 16.0.R1   |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## host-limits

Synopsis Enter the **host-limits** context

Context **configure** [subscriber-mgmt sub-profile string](#) **host-limits**

Tree [host-limits](#)

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4

Synopsis Enter the **ipv4** context

Context **configure** [subscriber-mgmt sub-profile string](#) **host-limits ipv4**

Tree [ipv4](#)

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## arp number

Synopsis Maximum number of IPv4 ARP hosts

Context **configure** [subscriber-mgmt sub-profile string](#) **host-limits ipv4 arp number**

Tree [arp](#)

Description This command configures the maximum number of IPv4 ARP hosts per subscriber instance.

The operational maximum value may be smaller due to equipped hardware dependencies.

Range 0 to 131071

Introduced 20.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dhcp number

Synopsis Maximum number of IPv4 DHCP hosts

Context **configure** [subscriber-mgmt sub-profile string](#) **host-limits ipv4 dhcp number**

Tree [dhcp](#)

|             |   |
|-------------|---|
| Description | This command configures the maximum number of IPv4 DHCP hosts per subscriber instance.<br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071   |
| Introduced  | 20.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **overall number**

|             |  |
|-------------|--|
| Synopsis    | Maximum number of IPv4 hosts   |
| Context     | <b>configure subscriber-mgmt sub-profile string host-limits ipv4 overall number</b>  |
| Tree        | <b>overall</b>   |
| Description | This command configures the maximum number of IPv4 hosts per subscriber instance.<br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071  |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ppp number**

|             |  |
|-------------|--|
| Synopsis    | Maximum number of IPv4 PPP hosts   |
| Context     | <b>configure subscriber-mgmt sub-profile string host-limits ipv4 ppp number</b>  |
| Tree        | <b>ppp</b>   |
| Description | This command configures the maximum number of IPv4 PPP hosts per subscriber instance.<br>The operational maximum value may be smaller due to equipped hardware dependencies. |
| Range       | 0 to 131071  |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ipv6**

| Tree      | <a href="#">scheduler</a>  |
| Reference | <b>configure qos scheduler-policy</b> <i>string</i> tier number scheduler <i>string</i>  |

|            |   |
|------------|---|
| Notes      | This element is part of a list key.                     |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## rate

|            |   |
|------------|---|
| Synopsis   | Enter the <b>rate</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string ingress qos scheduler-policy overrides scheduler reference rate</a> |
| Tree       | <a href="#">rate</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## cir (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CIR to override administrative CIR used by scheduler   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string ingress qos scheduler-policy overrides scheduler reference rate cir (<i>number</i>   <i>keyword</i>)</a> |
| Tree       | <a href="#">cir</a>  |
| Range      | 0 to 3200000000  |
| Units      | kilobps  |
| Options    | sum, max   |
| Default    | sum  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## pir (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | PIR to override administrative PIR used by scheduler   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string ingress qos scheduler-policy overrides scheduler reference rate pir (<i>number</i>   <i>keyword</i>)</a> |
| Tree     | <a href="#">pir</a>  |
| Range    | 1 to 3200000000  |
| Units    | kilobps  |
| Options  | max  |
| Default  | max  |

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **policy-name** *reference*

Synopsis Scheduler policy name  
 Context **configure** [subscriber-mgmt sub-profile](#) *string* [ingress qos scheduler-policy policy-name reference](#)  
 Tree [policy-name](#)  
 Reference **configure** [qos scheduler-policy](#) *string*  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mld-policy** *reference*

Synopsis MLD policy  
 Context **configure** [subscriber-mgmt sub-profile](#) *string* [mld-policy reference](#)  
 Tree [mld-policy](#)  
 Reference **configure** [subscriber-mgmt mld-policy](#) *string*  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nat**

Synopsis Enter the **nat** context  
 Context **configure** [subscriber-mgmt sub-profile](#) *string* [nat](#)  
 Tree [nat](#)  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **access-mode** *keyword*

Synopsis The subscriber NAT access mode  
 Context **configure** [subscriber-mgmt sub-profile](#) *string* [nat access-mode keyword](#)  
 Tree [access-mode](#)

|            |  |
|------------|--|
| Options    | auto, bridged                                |
| Default    | auto   |
| Introduced | 19.10.R1                                     |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **allow-bypass** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow traffic to bypass NAT   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string nat allow-bypass</a> <i>boolean</i>   |
| Tree        | <a href="#">allow-bypass</a>  |
| Description | When configured to <b>true</b> , the system enables L2-Aware NAT subscribers for NAT bypass. When enabled, the IP filter configuration applied in the subscriber profile determines whether the traffic is bypassed.<br><br>When configured to <b>false</b> , traffic is subject to L2-Aware NAT operation. |
| Default     | false   |
| Introduced  | 20.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **policy** *reference*

|            |   |
|------------|---|
| Synopsis   | NAT policy associated with the subscriber profile   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string nat policy</a> <i>reference</i> |
| Tree       | <a href="#">policy</a>  |
| Reference  | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i>                           |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **prefix-list** *reference*

|            |  |
|------------|--|
| Synopsis   | NAT prefix list name   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string nat prefix-list</a> <i>reference</i> |
| Tree       | <a href="#">prefix-list</a>  |
| Reference  | <b>configure</b> <a href="#">service nat prefix-list</a> <i>string</i>                               |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **pim-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Protocol Independent Multicast (PIM) policy   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">pim-policy reference</a> |
| Tree       | <a href="#">pim-policy</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt pim-policy</a> <i>string</i>                                       |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **preference** *number*

|            |  |
|------------|--|
| Synopsis   | Relative preference value for the subscriber profile   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">preference number</a> |
| Tree       | <a href="#">preference</a>   |
| Range      | 1 to 10  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **radius-accounting**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>radius-accounting</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">radius-accounting</a> |
| Tree       | <a href="#">radius-accounting</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **policy** *reference*

|                |   |
|----------------|---|
| Synopsis       | RADIUS accounting policies  |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">radius-accounting policy reference</a> |
| Tree           | <a href="#">policy</a>  |
| Reference      | <b>configure</b> <a href="#">subscriber-mgmt radius-accounting-policy</a> <i>string</i>                                       |
| Max. Instances | 5   |

|            |   |
|------------|---|
| Notes      | This element is ordered by the user.                    |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **session-optimized-stop** *boolean*

|            |  |
|------------|--|
| Synopsis   | Optimize PPPoE session accounting stop behavior  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">radius-accounting session-optimized-stop</a> <i>boolean</i> |
| Tree       | <a href="#">session-optimized-stop</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **secondary-shaper-hashing** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include LAG hashing on secondary shaper  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">secondary-shaper-hashing</a> <i>boolean</i> |
| Tree       | <a href="#">secondary-shaper-hashing</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **session-limits**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>session-limits</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">session-limits</a> |
| Tree       | <a href="#">session-limits</a>  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipoe** *number*

|          |  |
|----------|--|
| Synopsis | Maximum number of IPoE sessions  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i> <a href="#">session-limits ipoe</a> <i>number</i> |

|             |  |
|-------------|--|
| Tree        | <a href="#">ipoe</a>   |
| Description | This command configures the maximum number of IPoE sessions per subscriber instance. |
| Range       | 0 to 131071  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                              |

## **I2tp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>I2tp</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">session-limits I2tp</a> |
| Tree       | <a href="#">I2tp</a>  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **Ins number**

|             |   |
|-------------|---|
| Synopsis    | Maximum number of L2TP LNS sessions   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">session-limits I2tp Ins</a> <i>number</i> |
| Tree        | <a href="#">Ins</a>   |
| Description | This command configures the maximum number of L2TP LNS sessions per subscriber instance.                                  |
| Range       | 0 to 131071   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **Its number**

|             |   |
|-------------|---|
| Synopsis    | Maximum number of L2TP LTS sessions   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">session-limits I2tp Its</a> <i>number</i> |
| Tree        | <a href="#">Its</a>   |
| Description | This command configures the maximum number of L2TP LTS sessions per subscriber instance.                                  |
| Range       | 0 to 131071   |
| Introduced  | 20.10.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **overall number**

Synopsis Maximum number of L2TP sessions

Context **configure** [subscriber-mgmt sub-profile](#) *string* [session-limits l2tp overall](#) *number*

Tree [overall](#)

Description This command configures the maximum number of L2TP sessions per subscriber instance.

Range 0 to 131071

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **overall number**

Synopsis Maximum number of subscriber sessions

Context **configure** [subscriber-mgmt sub-profile](#) *string* [session-limits overall](#) *number*

Tree [overall](#)

Description This command configures the maximum number of subscriber sessions per subscriber instance.

Range 0 to 131071

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pppoe**

Synopsis Enter the **pppoe** context

Context **configure** [subscriber-mgmt sub-profile](#) *string* [session-limits pppoe](#)

Tree [pppoe](#)

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lac number**

Synopsis Maximum number of PPPoE L2TP LAC sessions

Context **configure** [subscriber-mgmt sub-profile](#) *string* [session-limits pppoe lac](#) *number*

|             |  |
|-------------|--|
| Tree        | <a href="#">lac</a>  |
| Description | This command configures the maximum number of PPPoE L2TP LAC sessions per subscriber instance. |
| Range       | 0 to 131071  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **local number**

|             |   |
|-------------|---|
| Synopsis    | Maximum number of PPPoE local-terminated sessions   |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a> <a href="#">session-limits</a> <a href="#">pppoe local number</a> |
| Tree        | <a href="#">local</a>   |
| Description | This command configures the maximum number of PPPoE local-terminated sessions (PTA) per subscriber instance.                          |
| Range       | 0 to 131071   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **overall number**

|             |   |

Context **configure** [subscriber-mgmt svlan-statistics](#)  
Tree [svlan-statistics](#)  
Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of statistics collection

Context **configure** [subscriber-mgmt](#) [svlan-statistics](#) **admin-state** *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **system-behavior**

Synopsis Enter the **system-behavior** context

Context **configure** [subscriber-mgmt](#) [system-behavior](#)

Tree [system-behavior](#)

Description Commands in this context configure the attributes of system-wide subscriber management behavior.

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **legacy-dns-nbns** *boolean*

Synopsis Restrict authentication origins for name servers

Context **configure** [subscriber-mgmt](#) [system-behavior](#) **legacy-dns-nbns** *boolean*

Tree [legacy-dns-nbns](#)

Description When configured to **true**, this command enables legacy DNS NBNS behavior, which restricts the supported default extended authentication origins for DNS and NBNS name servers. The main differences include:

- only support DHCP server as origin for DHCP relay: IPoE DHCPv4/DHCPv6 and PPPoE DHCPv6
- Local Address Assignment (LAA) is highest priority origin: IPoE and PPPoE SLAAC DNSv6 and PPPoE DNSv4
- no default DNS for IPoE DHCPv4 proxy

When configured to **false**, this command reverts to the recommended default extended DNS and NBNS name server origin priorities.

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## up-resiliency

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>up-resiliency</b> context  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt up-resiliency</a>                |
| Tree        | <a href="#">up-resiliency</a>   |
| Description | Commands in this context configure the inter-UPF resiliency in a CUPS system. |
| Introduced  | 22.2.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                       |

## fate-sharing-group-template [[name](#)] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>fate-sharing-group-template</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt up-resiliency fate-sharing-group-template</a> <i>string</i> |
| Tree           | <a href="#">fate-sharing-group-template</a>  |
| Description    | Commands in this context configure resiliency parameters per FSG.  |
| Max. Instances | 256  |
| Introduced     | 22.2.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## [\[name\]](#) *string*

|               |  |
|---------------|--|
| Synopsis      | FSG template ID  |

| String Length | 1 to 80  |
| Introduced    | 22.2.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**gratuitous-arp** *keyword*

|            |  |
|------------|--|
| Synopsis   | Granularity for sending GARP packets on switchover   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> <a href="#">fate-sharing-group-template</a> <i>string</i> <a href="#">gratuitous-arp</a> <i>keyword</i> |
| Tree       | <a href="#">gratuitous-arp</a>   |
| Options    | one-per-outer-tag, one-per-sap   |
| Default    | one-per-sap  |
| Introduced | 22.2.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**redundant-interface**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>redundant-interface</b> context  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> <a href="#">fate-sharing-group-template</a> <i>string</i> <a href="#">redundant-interface</a>  |
| Tree        | <a href="#">redundant-interface</a>   |
| Description | Commands in this context configure downstream traffic shunting from a standby BNG UPF to an active BNG UPF. Downstream traffic that is received for standby sessions is sent over the redundant interface to the active BNG UPF. This requires the configuration of the <b>multi-chassis-shunt-id</b> in the service that receives the session traffic. |
| Introduced  | 22.2.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**name** *string*

|          |                          |
|----------|--------------------------|
| Synopsis | Redundant interface name |
|----------|--------------------------|

---

|               |  |
|---------------|--|
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> <a href="#">fate-sharing-group-template</a> <i>string</i> <a href="#">redundant-interface</a> <i>name</i> <i>string</i> |
| Tree          | <a href="#">name</a>   |
| Description   | This command configures the name of the redundant interface. It must exist in the service that contains the redundant interface.   |
| String Length | 1 to 32  |
| Introduced    | 22.2.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **service** *string*

|               |   |
|---------------|---|
| Synopsis      | Service that contains the redundant interface   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> <a href="#">fate-sharing-group-template</a> <i>string</i> <a href="#">redundant-interface</a> <i>service</i> <i>string</i> |
| Tree          | <a href="#">service</a>   |
| Description   | This command configures the service that contains the redundant interface. It can be different from the service where the session traffic is terminated.  |
| String Length | 1 to 64   |
| Introduced    | 22.2.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **uplink-forwarding-while-standby** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allows a standby BNG UPF to forward packets  |
| Context     | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> <a href="#">fate-sharing-group-template</a> <i>string</i> <a href="#">uplink-forwarding-while-standby</a> <i>boolean</i>  |
| Tree        | <a href="#">uplink-forwarding-while-standby</a>  |
| Description | This command allows a standby BNG UPF to forward uplink traffic. To prevent the possibility of packet replication towards the network, this command should only be enabled if the access network is provisioned not to replicate unicast packets to the BNG UPF. |
| Default     | false  |
| Introduced  | 22.2.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## vrgw

|            |   |
|------------|---|
| Synopsis   | Enter the <b>vrgw</b> context                           |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw</a>   |
| Tree       | <a href="#">vrgw</a>                                    |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## brg-profile [[brg-profile-name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>brg-profile</b> list instance                                      |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> |
| Tree           | <a href="#">brg-profile</a>   |
| Max. Instances | 16  |
| Introduced     | 16.0.R4   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                         |

## [[brg-profile-name](#)] *string*

|               |   |
|---------------|---|
| Synopsis      | BRG profile name  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> |
| Tree          | <a href="#">brg-profile</a>   |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R4   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                         |

## connectivity-verification

|            |   |
|------------|---|
| Synopsis   | Enter the <b>connectivity-verification</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">connectivity-verification</a> |
| Tree       | <a href="#">connectivity-verification</a>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of BRG connectivity verification  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">connectivity-verification</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**count** *number*

|            |   |
|------------|---|
| Synopsis   | Connection attempts before BRG is considered down   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">connectivity-verification</a> <a href="#">count</a> <i>number</i> |
| Tree       | <a href="#">count</a>   |
| Range      | 1 to 5  |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**retry-time** *number*

|            |  |
|------------|--|
| Synopsis   | Wait time before a new connectivity verification cycle   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">connectivity-verification</a> <a href="#">retry-time</a> <i>number</i> |
| Tree       | <a href="#">retry-time</a>   |
| Range      | 300 to 3600  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**timeout** *number*

|          |   |
|----------|---|
| Synopsis | Timeout after which a message is considered unanswered  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">connectivity-verification</a> <a href="#">timeout</a> <i>number</i> |

|            |   |

| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R4   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **hold-time** *number*

|            |   |
|------------|---|
| Synopsis   | The time to hold on to a BRG after it went down   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">hold-time</a> <i>number</i> |
| Tree       | <a href="#">hold-time</a>   |
| Range      | 0   30 to 2592000   |
| Units      | seconds   |
| Default    | 0   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **home-pool**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>home-pool</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool</a> |
| Tree       | <a href="#">home-pool</a>   |
| Introduced | 16.0.R7   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**lease-time** *number*

|            |  |
|------------|--|
| Synopsis   | Lease time used when allocating addresses from the pool  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool lease-time</a> <i>number</i> |
| Tree       | <a href="#">lease-time</a>   |
| Range      | 300 to 315446399   |
| Units      | seconds  |
| Default    | 21600  |
| Introduced | 16.0.R7  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**option** [[number](#)] (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>option</b> list instance   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool option</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">option</a>  |
| Introduced | 16.0.R7   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[number]** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | DHCP option to send identification strings to client  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool option</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">option</a>  |
| Range      | 1 to 254  |
| Options    | subnet-mask, default-router, dns-server, domain-name, netbios-name-server, netbios-node-type, lease-time, lease-renew-time, lease-rebind-time       |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R7   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ascii-string** *string*

|          |   |
|----------|---|
| Synopsis | ASCII string of the DHCP option   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool option</a> ( <i>number</i>   <i>keyword</i> )<br><a href="#">ascii-string</a> <i>string</i> |

|               |   |
|---------------|---|
| Tree          | <a href="#">ascii-string</a>  |
| String Length | 1 to 127  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . |
| Introduced    | 16.0.R7   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **duration** *number*

|            |   |
|------------|---|
| Synopsis   | DHCP option as time duration.   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool option</a> ( <i>number</i>   <i>keyword</i> )<br><a href="#">duration</a> <i>number</i> |
| Tree       | <a href="#">duration</a>  |
| Range      | 10 to 315446399   |
| Units      | seconds   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .         |
| Introduced | 16.0.R7   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **empty**

|            |   |
|------------|---|
| Synopsis   | Empty DHCP option.  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool option</a> ( <i>number</i>   <i>keyword</i> )<br><a href="#">empty</a>          |
| Tree       | <a href="#">empty</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . |
| Introduced | 16.0.R7   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **hex-string** *string*

|          |   |
|----------|---|
| Synopsis | DHCP option as a hexadecimal string   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool option</a> ( <i>number</i>   <i>keyword</i> )<br><a href="#">hex-string</a> <i>string</i> |
| Tree     | <a href="#">hex-string</a>  |

|               |   |
|---------------|---|
| String Length | 1 to 256  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . |
| Introduced    | 16.0.R7   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipv4-address** *string*

|                |   |
|----------------|---|
| Synopsis       | DHCP option as a list of IPv4 addresses   |
| Context        | <b>configure</b> <b>subscriber-mgmt</b> <b>vrgw</b> <b>brg-profile</b> <i>string</i> <b>home-pool</b> <b>option</b> ( <i>number</i>   <i>keyword</i> ) <b>ipv4-address</b> <i>string</i>                                      |
| Tree           | <a href="#">ipv4-address</a>  |
| Max. Instances | 4   |
| Notes          | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .<br>This element is ordered by the user. |
| Introduced     | 16.0.R7   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **netbios-node-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | DHCP option as NetBIOS node type.  |
| Context    | <b>configure</b> <b>subscriber-mgmt</b> <b>vrgw</b> <b>brg-profile</b> <i>string</i> <b>home-pool</b> <b>option</b> ( <i>number</i>   <i>keyword</i> ) <b>netbios-node-type</b> <i>keyword</i> |
| Tree       | <a href="#">netbios-node-type</a>  |
| Options    | b-node, p-node, m-node, h-node   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .          |
| Introduced | 16.0.R7  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **standby-ip-lifetime** *number*

|          |  |
|----------|--|
| Synopsis | The lifetime of the standby IP addresses   |
| Context  | <b>configure</b> <b>subscriber-mgmt</b> <b>vrgw</b> <b>brg-profile</b> <i>string</i> <b>home-pool</b> <b>standby-ip-lifetime</b> <i>number</i> |

---

|            |   |
|------------|---|
| Tree       | <a href="#">standby-ip-lifetime</a>                     |
| Range      | 300 to 315446399  |
| Units      | seconds   |
| Default    | 21600   |
| Introduced | 16.0.R7   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## subnet

|            |  |
|------------|--|
| Synopsis   | Enter the <b>subnet</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool subnet</a> |
| Tree       | <a href="#">subnet</a>   |
| Introduced | 16.0.R7  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## end string

|            |  |
|------------|--|
| Synopsis   | Upper bound of the IP address range  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool subnet end</a> <i>string</i> |
| Tree       | <a href="#">end</a>  |
| Default    | 192.168.0.254  |
| Introduced | 16.0.R7  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## prefix string

|            |   |
|------------|---|
| Synopsis   | Prefix and default-gateway to be used inside the home   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool subnet prefix</a> <i>string</i> |
| Tree       | <a href="#">prefix</a>  |
| Default    | 192.168.0.1/24  |
| Introduced | 16.0.R7   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**start string**

|            |  |
|------------|--|
| Synopsis   | Lower bound of the IP address range  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">home-pool subnet start</a> <i>string</i> |
| Tree       | <a href="#">start</a>  |
| Default    | 192.168.0.2  |
| Introduced | 16.0.R7  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**initial-hold-time number**

|            |   |
|------------|---|
| Synopsis   | Hold time for BRG instances created without any hosts   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">initial-hold-time</a> <i>number</i> |
| Tree       | <a href="#">initial-hold-time</a>   |
| Range      | 0 to 900  |
| Units      | seconds   |
| Default    | 300   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**radius-authentication**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>radius-authentication</b> context  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">radius-authentication</a> |
| Tree       | <a href="#">radius-authentication</a>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**password string**

|               |  |
|---------------|--|
| Synopsis      | Password used for authentication   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">radius-authentication password</a> <i>string</i> |
| Tree          | <a href="#">password</a>   |
| String Length | 1 to 115   |
| Introduced    | 16.0.R4  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**server-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Radius servers to be used for authentication  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">radius-authentication server-policy reference</a> |
| Tree       | <a href="#">server-policy</a>   |
| Reference  | <b>configure</b> <a href="#">aaa radius server-policy</a> <i>string</i>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**radius-proxy-server** [[router-instance](#)] *string name string*

|                |   |
|----------------|---|
| Synopsis       | Add a list entry for <b>radius-proxy-server</b>   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">radius-proxy-server</a> <i>string name string</i> |
| Tree           | <a href="#">radius-proxy-server</a>   |
| Max. Instances | 4   |
| Introduced     | 16.0.R4   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[router-instance]** *string*

|            |   |
|------------|---|
| Synopsis   | router-instance   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">radius-proxy-server</a> <i>string name string</i> |
| Tree       | <a href="#">radius-proxy-server</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**name** *string*

|          |   |
|----------|---|
| Synopsis | RADIUS proxy server name  |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt vrgw brg-profile</a> <i>string</i> <a href="#">radius-proxy-server</a> <i>string name string</i> |

|               |   |
|---------------|---|
| Tree          | <a href="#">radius-proxy-server</a>                     |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.                     |
| Introduced    | 16.0.R4   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **sla-profile-string** *string*

|               |  |
|---------------|--|
| Synopsis      | Default for SLA-profile lookup   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">sla-profile-string</a> <i>string</i> |
| Tree          | <a href="#">sla-profile-string</a>   |
| String Length | 0 to 32  |
| Introduced    | 16.0.R4  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **sub-profile-string** *string*

|               |  |
|---------------|--|
| Synopsis      | Default for subscriber-profile lookup  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">sub-profile-string</a> <i>string</i> |
| Tree          | <a href="#">sub-profile-string</a>   |
| String Length | 0 to 32  |
| Introduced    | 16.0.R4  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **uplink-initial-wait** *number*

|            |   |
|------------|---|
| Synopsis   | Wait time for non-routed uplink to become operational   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">vrgw</a> <a href="#">brg-profile</a> <i>string</i> <a href="#">uplink-initial-wait</a> <i>number</i> |
| Tree       | <a href="#">uplink-initial-wait</a>   |
| Range      | 10 to 300   |
| Units      | seconds   |
| Default    | 30  |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## lanext

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lanext</b> context                              |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw lanext</a> |
| Tree       | <a href="#">lanext</a>                                       |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                           |

## router-target-as-number *number*

|            |  |
|------------|--|
| Synopsis   | AS number to derive RT and RD for the HLE service  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt vrgw lanext router-target-as-number</a> <i>number</i> |
| Tree       | <a href="#">router-target-as-number</a>  |
| Range      | 1 to 65535   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## wlan-gw

|            |  |
|------------|--|
| Synopsis   | Enter the <b>wlan-gw</b> context                         |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw</a> |
| Tree       | <a href="#">wlan-gw</a>                                  |
| Introduced | 16.0.R4  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                       |

## queries

|            |  |
|------------|--|
| Synopsis   | Enter the <b>queries</b> context                                 |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries</a> |
| Tree       | <a href="#">queries</a>  |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                               |

**tunnel** [*name*] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>tunnel</b> list instance   |
| Context        | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> |
| Tree           | <a href="#">tunnel</a>  |
| Max. Instances | 1024  |
| Introduced     | 19.5.R1   |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Tunnel query name   |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> |
| Tree          | <a href="#">tunnel</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 19.5.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**access-point-mac-address-learning-status** *keyword*

|            |   |
|------------|---|
| Synopsis   | Matching criteria of tunnels based on learning status   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <a href="#">access-point-mac-address-learning-status</a> <i>keyword</i> |
| Tree       | <a href="#">access-point-mac-address-learning-status</a>  |
| Options    | failed, succeeded   |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**calculate-counts** *boolean*

|          |   |
|----------|---|
| Synopsis | Count the number of tunnels matching the criteria   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string</i> <a href="#">calculate-counts</a> <i>boolean</i> |
| Tree     | <a href="#">calculate-counts</a>  |
| Default  | false   |

Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## encapsulation

Synopsis Enable the **encapsulation** context  
Context **configure** [subscriber-mgmt wlan-gw queries tunnel](#) *string* [encapsulation](#)  
Tree [encapsulation](#)  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## gre *boolean*

Synopsis Controls whether the query returns Soft GRE tunnels  
Context **configure** [subscriber-mgmt wlan-gw queries tunnel](#) *string* [encapsulation gre](#) *boolean*  
Tree [gre](#)  
Default true  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## l2 *boolean*

Synopsis Enable matching on Layer 2 tunnels  
Context **configure** [subscriber-mgmt wlan-gw queries tunnel](#) *string* [encapsulation l2](#) *boolean*  
Tree [l2](#)  
Default true  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## l2tp *boolean*

Synopsis Controls whether the query returns Soft L2TPv3 tunnels  
Context **configure** [subscriber-mgmt wlan-gw queries tunnel](#) *string* [encapsulation l2tp](#) *boolean*  
Tree [l2tp](#)  
Default true

Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **vxlan boolean**

Synopsis Controls whether the query returns VXLAN tunnels  
Context **configure subscriber-mgmt wlan-gw queries tunnel** *string encapsulation vxlan boolean*  
Tree [vxlan](#)  
Default true  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **I2**

Synopsis Enter the **I2** context  
Context **configure subscriber-mgmt wlan-gw queries tunnel** *string I2*  
Tree [I2](#)  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **inner-vlan number**

Synopsis Value to match the Layer 2 access point of the tunnel  
Context **configure subscriber-mgmt wlan-gw queries tunnel** *string I2 inner-vlan number*  
Tree [inner-vlan](#)  
Range 0 to 4095  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **outer-vlan number**

Synopsis Layer 2 access point matching with a specified S-VLAN  
Context **configure subscriber-mgmt wlan-gw queries tunnel** *string I2 outer-vlan number*  
Tree [outer-vlan](#)  
Range 0 to 4095

|            |                                    |
|------------|------------------------------------|
| Introduced | 19.5.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **sap string**

|               |  |
|---------------|--|
| Synopsis      | Value to match the L2-AP Access Point of the tunnel  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel string l2 sap string</a> |
| Tree          | <a href="#">sap</a>  |
| String Length | 1 to 45  |
| Introduced    | 19.5.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **l3**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>l3</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel string l3</a> |
| Tree       | <a href="#">l3</a>  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **address-type keyword**

|            |  |
|------------|--|
| Synopsis   | Address type to match  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel string l3 address-type keyword</a> |
| Tree       | <a href="#">address-type</a>   |
| Options    | ipv4, ipv6   |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **local-address (ipv4-address-no-zone | ipv6-address-no-zone)**

|            |   |
|------------|---|
| Synopsis   | IP address as local endpoint to match   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel string l3 local-address (ipv4-address-no-zone   ipv6-address-no-zone)</a> |
| Tree       | <a href="#">local-address</a>   |
| Introduced | 19.5.R1   |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **remote-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address as remote endpoint to match

Context **configure** [subscriber-mgmt](#) [wlan-gw](#) [queries](#) [tunnel](#) *string* [l3](#) **remote-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [remote-address](#)

Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **router-instance** *string*

Synopsis Router instance to match

Context **configure** [subscriber-mgmt](#) [wlan-gw](#) [queries](#) [tunnel](#) *string* [l3](#) **router-instance** *string*

Tree [router-instance](#)

Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ues**

Synopsis Enter the **ues** context

Context **configure** [subscriber-mgmt](#) [wlan-gw](#) [queries](#) [tunnel](#) *string* **ues**

Tree [ues](#)

Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **maximum** *number*

Synopsis Maximum number of UEs

Context **configure** [subscriber-mgmt](#) [wlan-gw](#) [queries](#) [tunnel](#) *string* **ues** **maximum** *number*

Tree [maximum](#)

Max. Range 0 to 4294967295

Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**minimum number**

|            |  |
|------------|--|
| Synopsis   | Minimum number of UEs  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string ues minimum number</i> |
| Tree       | <a href="#">minimum</a>  |
| Max. Range | 0 to 4294967295  |
| Default    | 1  |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**state**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>state</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string ues state</i> |
| Tree       | <a href="#">state</a>   |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**cross-connect boolean**

|            |   |
|------------|---|
| Synopsis   | Match on tunnels with cross-connect UEs   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string ues state cross-connect boolean</i> |
| Tree       | <a href="#">cross-connect</a>   |
| Default    | true  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**dsm boolean**

|            |   |
|------------|---|
| Synopsis   | Match on DSM UEs  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries tunnel</a> <i>string ues state dsm boolean</i> |
| Tree       | <a href="#">dsm</a>   |
| Default    | true  |
| Introduced | 19.5.R1   |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **esm** *boolean*

Synopsis Match on ESM UEs  
Context **configure** [subscriber-mgmt](#) [wlan-gw](#) [queries](#) [tunnel](#) *string* [ues](#) [state](#) **esm** *boolean*  
Tree [esm](#)  
Default true  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **l2** *boolean*

Synopsis Match on tunnels with L2W UEs  
Context **configure** [subscriber-mgmt](#) [wlan-gw](#) [queries](#) [tunnel](#) *string* [ues](#) [state](#) **l2** *boolean*  
Tree [l2](#)  
Default true  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **migrant** *boolean*

Synopsis Match on tunnels with migrant UEs  
Context **configure** [subscriber-mgmt](#) [wlan-gw](#) [queries](#) [tunnel](#) *string* [ues](#) [state](#) **migrant** *boolean*  
Tree [migrant](#)  
Default true  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ue** [[name](#)] *string*

Synopsis Enter the **ue** list instance  
Context **configure** [subscriber-mgmt](#) [wlan-gw](#) [queries](#) **ue** *string*  
Tree [ue](#)  
Max. Instances 1024

Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis UE query name  
Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string*  
Tree [ue](#)  
String Length 1 to 32  
Notes This element is part of a list key.  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **address**

Synopsis Enter the **address** context  
Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string* **address**  
Tree [address](#)  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dhcp6-na** *string*

Synopsis DHCPv6 IA-NA address to match for UEs  
Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string* **address dhcp6-na** *string*  
Tree [dhcp6-na](#)  
Introduced 19.5.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipv4** *string*

Synopsis IPv4 address to match for UEs  
Context **configure** [subscriber-mgmt wlan-gw queries ue](#) *string* **address ipv4** *string*  
Tree [ipv4](#)  
Introduced 19.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **slaac string**

Synopsis SLAAC prefix to match for UEs  
 Context **configure subscriber-mgmt wlan-gw queries ue string address slaac string**  
 Tree [slaac](#)  
 Introduced 19.5.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **type keyword**

Synopsis Address type to match for UEs  
 Context **configure subscriber-mgmt wlan-gw queries ue string address type keyword**  
 Tree [type](#)  
 Options ipv4, ipv6, ipv4-only, ipv6-only, ipv4v6  
 Introduced 19.5.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bridge-domain number**

Synopsis Bridge Domain to match for UEs  
 Context **configure subscriber-mgmt wlan-gw queries ue string bridge-domain number**  
 Tree [bridge-domain](#)  
 Range 0 to 4294967294  
 Introduced 19.5.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **connection-state**

Synopsis Enable the **connection-state** context  
 Context **configure subscriber-mgmt wlan-gw queries ue string connection-state**  
 Tree [connection-state](#)  
 Introduced 19.5.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**already-signed-in** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable matching on UEs that are already signed in   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state already-signed-in</a> <i>boolean</i> |
| Tree       | <a href="#">already-signed-in</a>   |
| Default    | true  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**authorized-only** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable matching on UEs in an authorized state   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state authorized-only</a> <i>boolean</i> |
| Tree       | <a href="#">authorized-only</a>   |
| Default    | true  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**cross-connect** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable matching on cross-connected UEs  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state cross-connect</a> <i>boolean</i> |
| Tree       | <a href="#">cross-connect</a>   |
| Default    | true  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**data-triggered** *boolean*

|          |  |
|----------|--|
| Synopsis | Enable matching on UEs in a data-triggered state   |
| Context  | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state data-triggered</a> <i>boolean</i> |
| Tree     | <a href="#">data-triggered</a>   |

---

|            |                                    |
|------------|------------------------------------|
| Default    | true                               |
| Introduced | 19.5.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**delete-pending** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable matching on UEs in a delete-pending state   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state delete-pending</a> <i>boolean</i> |
| Tree       | <a href="#">delete-pending</a>   |
| Default    | true   |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**dhcp-triggered** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable matching on UEs in DHCP-triggered state   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state dhcp-triggered</a> <i>boolean</i> |
| Tree       | <a href="#">dhcp-triggered</a>   |
| Default    | true   |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**dsm** *boolean*

|            |   |
|------------|---|
| Synopsis   | Controls whether the query returns UEs in DSM state   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state dsm</a> <i>boolean</i> |
| Tree       | <a href="#">dsm</a>   |
| Default    | true  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**esm** *boolean*

|          |   |
|----------|---|
| Synopsis | Controls whether the query returns UEs in ESM state |
|----------|---|

---

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">wlan-gw</a> <a href="#">queries</a> <a href="#">ue</a> <i>string</i> <a href="#">connection-state</a> <a href="#">esm</a> <i>boolean</i> |
| Tree       | <a href="#">esm</a>   |
| Default    | true  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **gtp-authorized** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable matching on UEs in GTP-authorized state   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">wlan-gw</a> <a href="#">queries</a> <a href="#">ue</a> <i>string</i> <a href="#">connection-state</a> <a href="#">gtp-authorized</a> <i>boolean</i> |
| Tree       | <a href="#">gtp-authorized</a>   |
| Default    | true   |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **ip-assigned** *boolean*

|            |   |
|------------|---|
| Synopsis   | Match on UEs in an IP-assigned state  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">wlan-gw</a> <a href="#">queries</a> <a href="#">ue</a> <i>string</i> <a href="#">connection-state</a> <a href="#">ip-assigned</a> <i>boolean</i> |
| Tree       | <a href="#">ip-assigned</a>   |
| Default    | true  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **ip-assigned-authorized** *boolean*

|            |  |
|------------|--|
| Synopsis   | Match on UEs in an IP-assigned and authorized state  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">wlan-gw</a> <a href="#">queries</a> <a href="#">ue</a> <i>string</i> <a href="#">connection-state</a> <a href="#">ip-assigned-authorized</a> <i>boolean</i> |
| Tree       | <a href="#">ip-assigned-authorized</a>   |
| Default    | true   |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ***l2 boolean***

|            |   |
|------------|---|
| Synopsis   | Match on Layer-2 wholesale state for UEs  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state l2 boolean</a> |
| Tree       | <a href="#">l2</a>  |
| Default    | true  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## ***portal boolean***

|            |   |
|------------|---|
| Synopsis   | Controls whether the query returns UEs in portal state  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">connection-state portal boolean</a> |
| Tree       | <a href="#">portal</a>  |
| Default    | true  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## ***mac-address string***

|            |  |
|------------|--|
| Synopsis   | MAC address to use for matching on UEs   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">mac-address string</a> |
| Tree       | <a href="#">mac-address</a>  |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ***soft-quota-exhausted boolean***

|            |  |
|------------|--|
| Synopsis   | Send interim update message when the quota is reached  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">soft-quota-exhausted boolean</a> |
| Tree       | <a href="#">soft-quota-exhausted</a>   |
| Default    | false  |
| Introduced | 21.7.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## tunnel

|            |   |
|------------|---|
| Synopsis   | Enter the <b>tunnel</b> context                                   |
| Context    | <b>configure subscriber-mgmt wlan-gw queries ue string tunnel</b> |
| Tree       | <b>tunnel</b>   |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                |

## encapsulation *keyword*

|            |   |
|------------|---|
| Synopsis   | Tunnel type to match for active UEs   |
| Context    | <b>configure subscriber-mgmt wlan-gw queries ue string tunnel encapsulation keyword</b> |
| Tree       | <b>encapsulation</b>  |
| Options    | gre, l2tp, l2, vxlan  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## local-address (*ipv4-address-no-zone | ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | IP address as local tunnel endpoint to match for UEs   |
| Context    | <b>configure subscriber-mgmt wlan-gw queries ue string tunnel local-address (<i>ipv4-address-no-zone   ipv6-address-no-zone</i>)</b> |
| Tree       | <b>local-address</b>   |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## remote-address (*ipv4-address-no-zone | ipv6-address-no-zone*)

|            |   |
|------------|---|
| Synopsis   | IP address as remote tunnel endpoint to match for UEs   |
| Context    | <b>configure subscriber-mgmt wlan-gw queries ue string tunnel remote-address (<i>ipv4-address-no-zone   ipv6-address-no-zone</i>)</b> |
| Tree       | <b>remote-address</b>   |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **router-instance** *string*

|            |  |
|------------|--|
| Synopsis   | Router instance of tunnels to match for UEs  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">tunnel router-instance</a> <i>string</i> |
| Tree       | <a href="#">router-instance</a>  |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **vlan** *number*

|            |  |
|------------|--|
| Synopsis   | VLAN tag within the tunnel to match for UEs  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">vlan</a> <i>number</i> |
| Tree       | <a href="#">vlan</a>   |
| Range      | 0 to 4095  |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **wlan-gw-group**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>wlan-gw-group</b> context   |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">wlan-gw-group</a> |
| Tree       | <a href="#">wlan-gw-group</a>   |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **id** *number*

|            |   |
|------------|---|
| Synopsis   | WLAN-GW ISA group ID  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt wlan-gw queries ue</a> <i>string</i> <a href="#">wlan-gw-group</a> <i>id</i> <i>number</i> |
| Tree       | <a href="#">id</a>  |
| Range      | 1 to 4  |
| Notes      | This element is mandatory.  |
| Introduced | 19.5.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**member number**

|            |  |
|------------|--|
| Synopsis   | The member of the WLAN-GW ISA group  |
| Context    | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">wlan-gw</a> <a href="#">queries</a> <a href="#">ue</a> <i>string</i> <a href="#">wlan-gw-group</a> <a href="#">member</a> <i>number</i> |
| Tree       | <a href="#">member</a>   |
| Range      | 1 to 1024  |
| Introduced | 19.5.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**virtual-chassis-identifier string**

|               |   |
|---------------|---|
| Synopsis      | WLAN Gateway virtual chassis ID or dual homing key  |
| Context       | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">wlan-gw</a> <a href="#">virtual-chassis-identifier</a> <i>string</i> |
| Tree          | <a href="#">virtual-chassis-identifier</a>  |
| String Length | 1 to 16   |
| Introduced    | 16.0.R4   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### 3.46.1 system command descriptions

#### system

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>system</b> context  |
| Context     | <b>configure system</b>  |
| Tree        | <a href="#">system</a>   |
| Description | Commands in this context enable configuring of general system level functions and router management protocols. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

#### alarm-contact-in-power *boolean*

|            |   |
|------------|---|
| Synopsis   | Power the output pin on the CPM alarm interface port          |
| Context    | <b>configure system alarm-contact-in-power <i>boolean</i></b> |
| Tree       | <a href="#">alarm-contact-in-power</a>                        |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR-a   |

#### alarm-contact-input [[input-pin-number](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>alarm-contact-input</b> list instance        |
| Context    | <b>configure system alarm-contact-input <i>number</i></b> |
| Tree       | <a href="#">alarm-contact-input</a>                       |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR-a   |

#### [[input-pin-number](#)] *number*

|          |   |
|----------|---|
| Synopsis | Alarm contact input pin                                   |
| Context  | <b>configure system alarm-contact-input <i>number</i></b> |
| Tree     | <a href="#">alarm-contact-input</a>                       |
| Range    | 1 to 4  |

|            |                                     |
|------------|-------------------------------------|
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R1                             |
| Platforms  | 7750 SR-a                           |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the alarm contact input  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">alarm-contact-input</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-a  |

### **clear-message** *string*

|               |  |
|---------------|--|
| Synopsis      | Text message sent in the log event when an alarm clears  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">alarm-contact-input</a> <i>number</i> <a href="#">clear-message</a> <i>string</i>  |
| Tree          | <a href="#">clear-message</a>  |
| Description   | This command configures a text message to be included in the log event that is sent when the system clears an alarm.<br><br>The system generates the default "Alarm Input Cleared" message if no message is configured. The <b>clear-message</b> string is included in the log event when the pin changes to the normal state. |
| String Length | 1 to 80  |
| Default       | Alarm Input Cleared  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR-a  |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">alarm-contact-input</a> <i>number</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 160  |
| Introduced    | 16.0.R1   |

Platforms 7750 SR-a

### **normal-state** *keyword*

Synopsis Normal state associated with the alarm contact input

Context **configure** [system](#) [alarm-contact-input](#) *number* [normal-state](#) *keyword*

Tree [normal-state](#)

Options open, closed

Default open

Introduced 16.0.R1

Platforms 7750 SR-a

### **trigger-message** *string*

Synopsis Text message sent in the log event when input changes

Context **configure** [system](#) [alarm-contact-input](#) *number* [trigger-message](#) *string*

Tree [trigger-message](#)

Description This command configures a text message to be included in the log event that is sent when the system generates an alarm.

The system generates the default message "Alarm Input Triggered" if no message is configured. This command's message string is included in the log event when the pin changes from the normal state.

String Length 1 to 80

Default Alarm Input Triggered

Introduced 16.0.R1

Platforms 7750 SR-a

### **alarms**

Synopsis Enter the **alarms** context

Context **configure** [system](#) [alarms](#)

Tree [alarms](#)

Introduced 16.0.R4

Platforms All

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the system alarm   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">alarms</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**max-cleared** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of cleared alarms  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">alarms</a> <b>max-cleared</b> <i>number</i> |
| Tree       | <a href="#">max-cleared</a>   |
| Range      | 0 to 500  |
| Default    | 500   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**allow-boot-license-violations** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow boot license violations in boot-up configuration                                      |
| Context    | <b>configure</b> <a href="#">system</a> <b>allow-boot-license-violations</b> <i>boolean</i> |
| Tree       | <a href="#">allow-boot-license-violations</a>   |
| Default    | true  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**bluetooth**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bluetooth</b> context                       |
| Context    | <b>configure</b> <a href="#">system</a> <b>bluetooth</b> |
| Tree       | <a href="#">bluetooth</a>                                |

| String Length | 1 to 32                                |
| Introduced    | 16.0.R1                                |
| Platforms     | 7750 SR-1, 7750 SR-s, 7950 XRS-20e     |

### **pairing-button** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable the pairing button   |
| Context    | <b>configure</b> <a href="#">system bluetooth pairing-button</a> <i>boolean</i> |
| Tree       | <a href="#">pairing-button</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR-1, 7750 SR-s, 7950 XRS-20e  |

### **passkey** *string*

|               |   |
|---------------|---|
| Synopsis      | Bluetooth passkey   |
| Context       | <b>configure</b> <a href="#">system bluetooth passkey</a> <i>string</i> |
| Tree          | <a href="#">passkey</a>   |
| String Length | 6   |
| Default       | 123456  |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR-1, 7750 SR-s, 7950 XRS-20e                                      |

### **power-mode** *keyword*

|            |   |
|------------|---|
| Synopsis   | Bluetooth module power mode   |
| Context    | <b>configure</b> <a href="#">system bluetooth power-mode</a> <i>keyword</i> |
| Tree       | <a href="#">power-mode</a>  |
| Options    | manual, automatic   |
| Default    | automatic   |
| Introduced | 20.2.R1   |
| Platforms  | 7750 SR-1, 7750 SR-s, 7950 XRS-20e  |

### **boot-bad-exec** *string*

|               |  |
|---------------|--|
| Synopsis      | CLI script file to execute following a failed boot-up  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">boot-bad-exec</a> <i>string</i>  |
| Tree          | <a href="#">boot-bad-exec</a>  |
| Description   | This command configures the name of the CLI script file to be run following the failure of a boot-up configuration.<br><b>Note:</b> This command has no effect in model-driven mode. |
| String Length | 1 to 180   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **boot-good-exec** *string*

|               |  |
|---------------|--|
| Synopsis      | CLI script file to execute following successful boot-up                              |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">boot-good-exec</a> <i>string</i> |
| Tree          | <a href="#">boot-good-exec</a>   |
| String Length | 1 to 180   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **central-frequency-clock**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>central-frequency-clock</b> context                                |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> |
| Tree       | <a href="#">central-frequency-clock</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                    |

### **bits**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bits</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> |
| Tree       | <a href="#">bits</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## input

|            |  |
|------------|--|
| Synopsis   | Enter the <b>input</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">input</a> |
| Tree       | <a href="#">input</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the BITS input timing reference   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">input</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## interface-type *keyword*

|            |  |
|------------|--|
| Synopsis   | Interface type of the BITS timing reference  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">interface-type</a> <i>keyword</i> |
| Tree       | <a href="#">interface-type</a>   |
| Options    | ds1-esf, ds1-sf, e1-pcm30crc, e1-pcm31crc, g703-2048khz  |
| Default    | ds1-esf  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## output

|            |   |
|------------|---|
| Synopsis   | Enter the <b>output</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> |
| Tree       | <a href="#">output</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of BITS output timing reference   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**line-length** *keyword*

|            |  |
|------------|--|
| Synopsis   | Line length for the BITS output timing reference   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> <a href="#">line-length</a> <i>keyword</i> |
| Tree       | <a href="#">line-length</a>  |
| Options    | length-not-applicable, 110, 220, 330, 440, 550, 660  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ql-minimum** *keyword*

|            |   |
|------------|---|
| Synopsis   | Minimum signal quality level for BITSout port   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> <a href="#">ql-minimum</a> <i>keyword</i> |
| Tree       | <a href="#">ql-minimum</a>  |
| Options    | unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec, eec1, eec2   |
| Default    | unused  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**source** *keyword*

|          |   |
|----------|---|
| Synopsis | Source of the BITS output timing reference  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> <a href="#">source</a> <i>keyword</i> |
| Tree     | <a href="#">source</a>  |
| Options  | line-ref, internal-clock  |
| Default  | line-ref  |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **squelch** *boolean*

|            |  |
|------------|--|
| Synopsis   | Squelch the signal of the BITS output timing reference   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">output</a> <a href="#">squelch</a> <i>boolean</i> |
| Tree       | <a href="#">squelch</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **ql-override** *keyword*

|            |   |
|------------|---|
| Synopsis   | Override for the quality level of the timing reference  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">ql-override</a> <i>keyword</i> |
| Tree       | <a href="#">ql-override</a>   |
| Options    | unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec   |
| Default    | unused  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **ssm-bit** *number*

|            |  |
|------------|--|
| Synopsis   | Sa bit to convey SSM information   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">bits</a> <a href="#">ssm-bit</a> <i>number</i> |
| Tree       | <a href="#">ssm-bit</a>  |
| Range      | 4 to 8   |
| Default    | 8  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **gnss**

|          |                               |
|----------|-------------------------------|
| Synopsis | Enter the <b>gnss</b> context |
|----------|-------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure system central-frequency-clock gnss</b>   |
| Tree       | <a href="#">gnss</a>   |
| Introduced | 22.10.R1   |
| Platforms  | 7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the gnss timing reference  |
| Context    | <b>configure system central-frequency-clock gnss admin-state</b> <i>keyword</i>                                      |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 22.10.R1   |
| Platforms  | 7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se |

### **ql-override** *keyword*

|            |  |
|------------|--|
| Synopsis   | Quality level override for a timing reference  |
| Context    | <b>configure system central-frequency-clock gnss ql-override</b> <i>keyword</i>                                      |
| Tree       | <a href="#">ql-override</a>  |
| Options    | unused, prs, stu, st2, tnc, st3e, st3  |
| Default    | unused   |
| Introduced | 22.10.R1   |
| Platforms  | 7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se |

### **ptp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ptp</b> context                                 |
| Context    | <b>configure system central-frequency-clock ptp</b>          |
| Tree       | <a href="#">ptp</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the PTP timing reference   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ptp</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ql-override** *keyword*

|            |  |
|------------|--|
| Synopsis   | Quality level of a timing reference that overrides any value provided by the reference's SSM process   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ptp</a> <a href="#">ql-override</a> <i>keyword</i> |
| Tree       | <a href="#">ql-override</a>  |
| Options    | unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec  |
| Default    | unused   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ql-minimum** *keyword*

|            |   |
|------------|---|
| Synopsis   | Minimum signal quality level for system timing module   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ql-minimum</a> <i>keyword</i> |
| Tree       | <a href="#">ql-minimum</a>  |
| Options    | unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec, eec1, eec2   |
| Default    | unused  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**ql-selection** *boolean*

|          |   |
|----------|---|
| Synopsis | Consider quality level in system and BITS output timing   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ql-selection</a> <i>boolean</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">ql-selection</a>                                 |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## ref-order

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>ref-order</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref-order</a>   |
| Tree        | <a href="#">ref-order</a>   |
| Description | <p>Commands in this context specify the priority order of the synchronous equipment timing subsystem.</p> <p>If a reference source is disabled, this command defines the next reference source for the clock. If all reference sources are disabled, clocking is derived from a local oscillator.</p> <p>If a timing reference is linked to a source port that is operationally down, the port is no longer a qualified, valid reference.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## fifth keyword

|            |  |
|------------|--|
| Synopsis   | Fifth preferred timing reference source  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref-order</a> <i>fifth keyword</i> |
| Tree       | <a href="#">fifth</a>  |
| Options    | ref1, ref2, bits, ptp, none, synce, gnss   |
| Introduced | 19.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## first keyword

|            |  |
|------------|--|
| Synopsis   | First preferred timing reference source  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref-order</a> <i>first keyword</i> |
| Tree       | <a href="#">first</a>  |
| Options    | ref1, ref2, bits, ptp, none, synce, gnss   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **fourth keyword**

|            |  |
|------------|--|
| Synopsis   | Fourth preferred timing reference source                                 |
| Context    | <b>configure system central-frequency-clock ref-order fourth keyword</b> |
| Tree       | <a href="#">fourth</a>   |
| Options    | ref1, ref2, bits, ptp, none, synce, gnss                                 |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS             |

### **second keyword**

|            |  |
|------------|--|
| Synopsis   | Second preferred timing reference source                                 |
| Context    | <b>configure system central-frequency-clock ref-order second keyword</b> |
| Tree       | <a href="#">second</a>   |
| Options    | ref1, ref2, bits, ptp, none, synce, gnss                                 |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS             |

### **sixth keyword**

|            |  |
|------------|--|
| Synopsis   | Sixth preferred timing reference source  |
| Context    | <b>configure system central-frequency-clock ref-order sixth keyword</b>  |
| Tree       | <a href="#">sixth</a>  |
| Options    | ref1, ref2, bits, ptp, none, synce, gnss   |
| Introduced | 22.10.R1   |
| Platforms  | 7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se |

### **third keyword**

|            |   |
|------------|---|
| Synopsis   | Third preferred timing reference source                                 |
| Context    | <b>configure system central-frequency-clock ref-order third keyword</b> |
| Tree       | <a href="#">third</a>   |
| Options    | ref1, ref2, bits, ptp, none, synce, gnss                                |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ref1

Synopsis Enter the **ref1** context

Context **configure** system central-frequency-clock ref1

Tree [ref1](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## admin-state *keyword*

Synopsis Administrative state of the first timing reference

Context **configure** system central-frequency-clock ref1 admin-state *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ql-override *keyword*

Synopsis Quality level override of a timing reference

Context **configure** system central-frequency-clock ref1 ql-override *keyword*

Tree [ql-override](#)

Options unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec, eec1, eec2

Default unused

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## source-port *string*

Synopsis Source port for the first timing reference

Context **configure** system central-frequency-clock ref1 source-port *string*

Tree [source-port](#)

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

**ref2**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ref2</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>ref2</b> |
| Tree       | <a href="#">ref2</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the second timing reference  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref2</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ql-override** *keyword*

|            |  |
|------------|--|
| Synopsis   | Quality level override of a timing reference   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref2</a> <b>ql-override</b> <i>keyword</i> |
| Tree       | <a href="#">ql-override</a>  |
| Options    | unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec, eec1, eec2  |
| Default    | unused   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**source-port** *string*

|          |   |
|----------|---|
| Synopsis | Source port for the second timing reference   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">ref2</a> <b>source-port</b> <i>string</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">source-port</a>                                  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

**revert *boolean***

|            |  |
|------------|--|
| Synopsis   | Revert to higher-priority reference source   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>revert</b> <i>boolean</i> |
| Tree       | <a href="#">revert</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**synce**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>synce</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>synce</b> |
| Tree       | <a href="#">synce</a>  |
| Introduced | 19.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                 |

**admin-state *keyword***

|            |  |
|------------|--|
| Synopsis   | Administrative state of the SyncE timing reference   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>synce</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 19.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ql-override *keyword***

|          |  |
|----------|--|
| Synopsis | Override the quality level of a timing reference   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <b>synce</b> <b>ql-override</b> <i>keyword</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">ql-override</a>   |
| Options    | unused, prs, stu, st2, tnc, st3e, st3, prc, ssua, ssub, sec, eec1, eec2 |
| Default    | unused  |
| Introduced | 19.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS            |

### **wait-to-restore** *number*

|            |   |
|------------|---|
| Synopsis   | Time to re-validate a previously failed input reference   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">central-frequency-clock</a> <a href="#">wait-to-restore</a> <i>number</i> |
| Tree       | <a href="#">wait-to-restore</a>   |
| Range      | 1 to 12   |
| Units      | minutes   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **cli-code** *string*

|               |  |
|---------------|--|
| Synopsis      | CLLI code value for the system   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">cli-code</a> <i>string</i> |
| Tree          | <a href="#">cli-code</a>   |
| String Length | 11   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **congestion-management** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable Virtual Service Router congestion management  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">congestion-management</a> <i>boolean</i> |
| Tree       | <a href="#">congestion-management</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | VSR  |

**contact string**

|               |  |
|---------------|--|
| Synopsis      | Contact information for the managed node |
| Context       | <b>configure system contact string</b>   |
| Tree          | <a href="#">contact</a>                  |
| String Length | 1 to 80                                  |
| Introduced    | 16.0.R1                                  |
| Platforms     | All                                      |

**coordinates string**

|               |  |
|---------------|--|
| Synopsis      | GPS coordinates for the system location    |
| Context       | <b>configure system coordinates string</b> |
| Tree          | <a href="#">coordinates</a>                |
| String Length | 1 to 80                                    |
| Introduced    | 16.0.R1                                    |
| Platforms     | All  |

**cpm-http-redirect**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>cpm-http-redirect</b> context |
| Context    | <b>configure system cpm-http-redirect</b>  |
| Tree       | <a href="#">cpm-http-redirect</a>          |
| Introduced | 16.0.R4                                    |
| Platforms  | All  |

**optimized-mode boolean**

|            |  |
|------------|--|
| Synopsis   | Enable optimized mode for CPM HTTP redirect messages             |
| Context    | <b>configure system cpm-http-redirect optimized-mode boolean</b> |
| Tree       | <a href="#">optimized-mode</a>                                   |
| Default    | true   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**cron**

|            |                               |
|------------|-------------------------------|
| Synopsis   | Enter the <b>cron</b> context |
| Context    | <b>configure system cron</b>  |
| Tree       | <a href="#">cron</a>          |
| Introduced | 16.0.R1                       |
| Platforms  | All                           |

**schedule** [[schedule-name](#)] *string owner string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>schedule</b> list instance                          |
| Context        | <b>configure system cron schedule</b> <i>string owner string</i> |
| Tree           | <a href="#">schedule</a>   |
| Max. Instances | 255  |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

**[schedule-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Schedule name  |
| Context       | <b>configure system cron schedule</b> <i>string owner string</i> |
| Tree          | <a href="#">schedule</a>   |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.                              |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**owner** *string*

|               |  |
|---------------|--|
| Synopsis      | Schedule owner   |
| Context       | <b>configure system cron schedule</b> <i>string owner string</i> |
| Tree          | <a href="#">schedule</a>   |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.                              |
| Introduced    | 16.0.R1  |

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the CRON schedule  
 Context **configure** [system cron schedule](#) *string* [owner](#) *string* **admin-state** *keyword*  
 Tree [admin-state](#)  
 Options enable, disable  
 Default disable  
 Introduced 16.0.R1

Introduced 16.0.R1  
Platforms All

### **ad-validation** *keyword*

Synopsis Validation of AD-bit presence in DNS server responses  
Context **configure** [system dns dnssec ad-validation](#) *keyword*  
Tree [ad-validation](#)  
Options fall-through, drop  
Introduced 16.0.R1  
Platforms All

### **efm-oam**

Synopsis Enter the **efm-oam** context  
Context **configure** [system efm-oam](#)  
Tree [efm-oam](#)  
Introduced 16.0.R1  
Platforms All

### **dying-gasp-tx-on-reset** *boolean*

Synopsis Generate Information OAM PDU on soft reset notification  
Context **configure** [system efm-oam dying-gasp-tx-on-reset](#) *boolean*  
Tree [dying-gasp-tx-on-reset](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **grace-tx** *boolean*

Synopsis Send Grace TLVs for soft reset graceful recovery events  
Context **configure** [system efm-oam grace-tx](#) *boolean*  
Tree [grace-tx](#)

|             |   |
|-------------|---|
| Description | <p>When configured to <b>true</b>, the system sends the Nokia Vendor specific Grace TLV in the information PDU after an ISSU or a soft reset. The Grace TLV informs a remote peer to ignore the negotiated interval and multiplier and instead use the new timeout interval.</p> <p>By default, the command is disabled at the system level and enabled at the port level. Both the system and port level must be enabled to support grace on a specific port. When configured to <b>true</b>, the EFM-OAM protocol does not enter a non-operational state when both nodes acknowledge the grace function. This feature minimizes service interruption by giving the restarting router time to become operationally and administratively up within the grace period.</p> <p>The peer receiving the Grace TLV must be able to parse and process the vendor-specific messaging. Do not configure grace if the Nokia Vendor Specific Grace TLV is not supported on the remote peer.</p> <p>When configured to <b>false</b>, the Nokia Vendor Specific Grace TLV is not sent.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## eth-cfm

|            |  |
|------------|--|
| Synopsis   | Enter the <b>eth-cfm</b> context                             |
| Context    | <b>configure system eth-cfm</b>                              |
| Tree       | <a href="#">eth-cfm</a>                                      |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## grace *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow system level capability of grace messaging             |
| Context    | <b>configure system eth-cfm grace <i>boolean</i></b>         |
| Tree       | <a href="#">grace</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## md-auto-id

|          |  |
|----------|--|
| Synopsis | Enter the <b>md-auto-id</b> context        |
| Context  | <b>configure system eth-cfm md-auto-id</b> |

|            |  |
|------------|--|
| Tree       | <a href="#">md-auto-id</a>                                   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## ma-index-range

|            |   |
|------------|---|
| Synopsis   | Enable the <b>ma-index-range</b> context                                  |
| Context    | <b>configure</b> <a href="#">system eth-cfm md-auto-id ma-index-range</a> |
| Tree       | <a href="#">ma-index-range</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS              |

## end number

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Upper bound of the range   |
| Context    | <b>configure</b> <a href="#">system eth-cfm md-auto-id ma-index-range end number</a> |
| Tree       | <a href="#">end</a>  |
| Range      | 1 to 4294967295  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                         |

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## propagate-hold-time (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Delay timer value for the fault propagation  |
| Context    | <b>configure system eth-cfm redundancy mc-lag propagate-hold-time</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">propagate-hold-time</a>  |
| Range      | 1 to 60  |
| Units      | seconds  |
| Options    | none   |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## standby-mep *boolean*

|          |  |
|----------|--|
| Synopsis | Allow standby MC-LAG MEPs to act administratively down |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure system eth-cfm redundancy mc-lag standby-mep</b> <i>boolean</i> |
| Tree       | <a href="#">standby-mep</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                 |

### **sender-id**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sender-id</b> context                           |
| Context    | <b>configure system eth-cfm sender-id</b>                    |
| Tree       | <a href="#">sender-id</a>                                    |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **local-name** *string*

|               |  |
|---------------|--|
| Synopsis      | Local name used in CFM PDUs  |
| Context       | <b>configure system eth-cfm sender-id local-name</b> <i>string</i> |
| Tree          | <a href="#">local-name</a>   |
| String Length | 1 to 45  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS       |

### **type** *keyword*

|            |   |
|------------|---|
| Synopsis   | ETH-CFM sender ID to be used in CFM PDUs                      |
| Context    | <b>configure system eth-cfm sender-id type</b> <i>keyword</i> |
| Tree       | <a href="#">type</a>  |
| Options    | system, local   |
| Default    | system  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## slm

|            |  |
|------------|--|
| Synopsis   | Enter the <b>slm</b> context                                 |
| Context    | <b>configure system eth-cfm slm</b>                          |
| Tree       | <a href="#">slm</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## inactivity-timer *number*

|            |  |
|------------|--|
| Synopsis   | SLR inactivity timer to maintain the stale test data               |
| Context    | <b>configure system eth-cfm slm inactivity-timer <i>number</i></b> |
| Tree       | <a href="#">inactivity-timer</a>                                   |
| Range      | 10 to 100  |
| Units      | seconds  |
| Default    | 100  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS       |

## grpc

|            |                               |
|------------|-------------------------------|
| Synopsis   | Enter the <b>grpc</b> context |
| Context    | <b>configure system grpc</b>  |
| Tree       | <a href="#">grpc</a>          |
| Introduced | 16.0.R1                       |
| Platforms  | All                           |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the gRPC server                 |
| Context    | <b>configure system grpc admin-state <i>keyword</i></b> |
| Tree       | <a href="#">admin-state</a>                             |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## allow-unsecure-connection

|             |  |
|-------------|--|
| Synopsis    | Allow connection without secured transport protocol  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">allow-unsecure-connection</a>   |
| Tree        | <a href="#">allow-unsecure-connection</a>  |
| Description | When configured, this command allows an unsecured connection to remote managers; TCP connections are not encrypted, including username and password information. |
| Notes       | The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-server-profile</b> .   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## gnmi

|            |   |
|------------|---|
| Synopsis   | Enter the <b>gnmi</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">gnmi</a> |
| Tree       | <a href="#">gnmi</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the gNMI service   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">gnmi</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## auto-config-save *boolean*

|          |   |
|----------|---|
| Synopsis | Automatically save configuration as part of commit  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">gnmi</a> <a href="#">auto-config-save</a> <i>boolean</i> |
| Tree     | <a href="#">auto-config-save</a>  |

|             |   |
|-------------|---|
| Description | When configured to <b>true</b> , the system automatically writes the running configuration to the save configuration file as part of a successful commit operation. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## gnoi

|            |                                   |
|------------|-----------------------------------|
| Synopsis   | Enter the <b>gnoi</b> context     |
| Context    | <b>configure system grpc gnoi</b> |
| Tree       | <a href="#">gnoi</a>              |
| Introduced | 19.10.R1                          |
| Platforms  | All                               |

## cert-mgmt

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cert-mgmt</b> context          |
| Context    | <b>configure system grpc gnoi cert-mgmt</b> |
| Tree       | <a href="#">cert-mgmt</a>                   |
| Introduced | 19.10.R1                                    |
| Platforms  | All   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of gNOI CertificateManagement                     |
| Context    | <b>configure system grpc gnoi cert-mgmt admin-state <i>keyword</i></b> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

## file

|          |                               |
|----------|-------------------------------|
| Synopsis | Enter the <b>file</b> context |
|----------|-------------------------------|

---

|            |  |
|------------|--|
| Context    | <b>configure system grpc gnoi file</b> |
| Tree       | <a href="#">file</a>                   |
| Introduced | 21.2.R1                                |
| Platforms  | All                                    |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the gNOI File service                     |
| Context    | <b>configure system grpc gnoi file admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>                                       |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 21.2.R1   |
| Platforms  | All   |

### **system**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>system</b> context          |
| Context    | <b>configure system grpc gnoi system</b> |
| Tree       | <a href="#">system</a>                   |
| Introduced | 20.5.R1                                  |
| Platforms  | All                                      |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the gNOI System service                     |
| Context    | <b>configure system grpc gnoi system admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 20.5.R1   |
| Platforms  | All   |

**max-msg-size** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum size of received message  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">max-msg-size</a> <i>number</i> |
| Tree       | <a href="#">max-msg-size</a>  |
| Range      | 1 to 1024   |
| Units      | megabytes   |
| Default    | 512   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**md-cli**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>md-cli</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">md-cli</a> |
| Tree       | <a href="#">md-cli</a>  |
| Introduced | 20.5.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the MD-CLI service   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">md-cli</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 20.5.R1  |
| Platforms  | All  |

**rib-api**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rib-api</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">rib-api</a> |
| Tree       | <a href="#">rib-api</a>  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the RIB API service  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">rib-api</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**purge-timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Time until stale entries are purged   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">rib-api</a> <b>purge-timeout</b> <i>number</i> |
| Tree       | <a href="#">purge-timeout</a>   |
| Range      | 1 to 100000   |
| Units      | seconds   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**tcp-keepalive**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>tcp-keepalive</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <b>tcp-keepalive</b> |
| Tree       | <a href="#">tcp-keepalive</a>   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of the TCP keepalive algorithm  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">grpc</a> <a href="#">tcp-keepalive</a> <b>admin-state</b> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>  |
| Options  | enable, disable  |
| Default  | disable  |

|            |         |
|------------|---------|
| Introduced | 16.0.R4 |
| Platforms  | All     |

### **idle-time** *number*

|             |   |
|-------------|---|
| Synopsis    | Time until the first TCP keepalive probe is sent  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">grpc tcp-keepalive</a> <i>idle-time</i> <i>number</i> |
| Tree        | <a href="#">idle-time</a>   |
| Description | This command configures the amount of time the connection must be idle before TCP keepalives are sent.    |
| Range       | 1 to 100000   |
| Units       | seconds   |
| Default     | 600   |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

### **interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time between TCP keep-alive probes   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc tcp-keepalive</a> <i>interval</i> <i>number</i> |
| Tree       | <a href="#">interval</a>   |
| Range      | 1 to 100000  |
| Units      | seconds  |
| Default    | 15   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **retries** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of probe retries before closing the connection   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">grpc tcp-keepalive</a> <i>retries</i> <i>number</i>   |
| Tree        | <a href="#">retries</a>   |
| Description | This command configures the number of missed TCP keepalive probes before closing the TCP connection and attempting to reach the other destinations within the same destination group. |
| Range       | 3 to 100  |

|            |         |
|------------|---------|
| Default    | 4       |
| Introduced | 16.0.R4 |
| Platforms  | All     |

### **tls-server-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Preferred TLS server profile   |
| Context    | <b>configure</b> <a href="#">system grpc tls-server-profile</a> <i>reference</i>                             |
| Tree       | <a href="#">tls-server-profile</a>   |
| Reference  | <b>configure</b> <a href="#">system security tls server-tls-profile</a> <i>string</i>                        |
| Notes      | The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-server-profile</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **grpc-tunnel**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>grpc-tunnel</b> context                |
| Context    | <b>configure</b> <a href="#">system grpc-tunnel</a> |
| Tree       | <a href="#">grpc-tunnel</a>                         |
| Introduced | 22.2.R1   |
| Platforms  | All   |

### **destination-group** [[name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>destination-group</b> list instance                                    |
| Context        | <b>configure</b> <a href="#">system grpc-tunnel destination-group</a> <i>string</i> |
| Tree           | <a href="#">destination-group</a>   |
| Description    | Commands in this context configure parameters for destination groups.               |
| Max. Instances | 4   |
| Introduced     | 22.2.R1   |
| Platforms      | All   |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Destination group name   |
| Context       | <b>configure</b> <b>system</b> <b>grpc-tunnel</b> <b>destination-group</b> <i>string</i> |
| Tree          | <b>destination-group</b>   |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 22.2.R1  |
| Platforms     | All  |

**allow-unsecure-connection**

|             |   |
|-------------|---|
| Synopsis    | Allow unsecured operation of gRPC connections   |
| Context     | <b>configure</b> <b>system</b> <b>grpc-tunnel</b> <b>destination-group</b> <i>string</i> <b>allow-unsecure-connection</b> |
| Tree        | <b>allow-unsecure-connection</b>  |
| Description | This command allows a gRPC tunnel to run without a secured transport protocol. Data is transferred in unencrypted form.   |
| Notes       | The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-client-profile</b> .              |
| Introduced  | 22.2.R1   |
| Platforms   | All   |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <b>system</b> <b>grpc-tunnel</b> <b>destination-group</b> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <b>description</b>  |
| String Length | 1 to 80   |
| Introduced    | 22.2.R1   |
| Platforms     | All   |

**destination** [**address**] (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *fully-qualified-domain-name*) **port** *number*

|          |  |
|----------|--|
| Synopsis | Enter the <b>destination</b> list instance   |
| Context  | <b>configure</b> <b>system</b> <b>grpc-tunnel</b> <b>destination-group</b> <i>string</i> <b>destination</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>fully-qualified-domain-name</i> ) <b>port</b> <i>number</i> |

|                |                                      |
|----------------|--------------------------------------|
| Tree           | <a href="#">destination</a>          |
| Max. Instances | 4                                    |
| Notes          | This element is ordered by the user. |
| Introduced     | 22.2.R1                              |
| Platforms      | All                                  |

### **[address]** (*ipv4-address-no-zone | ipv6-address-no-zone | fully-qualified-domain-name*)

|               |  |
|---------------|--|
| Synopsis      | Address of the destination within the destination group  |
| Context       | <b>configure</b> <b>system</b> <b>grpc-tunnel</b> <b>destination-group</b> <i>string</i> <b>destination</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone   fully-qualified-domain-name</i> ) <b>port</b> <i>number</i> |
| Tree          | <a href="#">destination</a>  |
| String Length | 1 to 255   |
| Notes         | This element is part of a list key.  |
| Introduced    | 22.2.R1  |
| Platforms     | All  |

### **port number**

|            |  |
|------------|--|
| Synopsis   | TCP port number for the destination  |
| Context    | <b>configure</b> <b>system</b> <b>grpc-tunnel</b> <b>destination-group</b> <i>string</i> <b>destination</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone   fully-qualified-domain-name</i> ) <b>port</b> <i>number</i> |
| Tree       | <a href="#">destination</a>  |
| Range      | 1 to 65535   |
| Notes      | This element is part of a list key.  |
| Introduced | 22.2.R1  |
| Platforms  | All  |

### **local-source-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

|          |   |
|----------|---|
| Synopsis | Local IP address of packets sent from the source  |
| Context  | <b>configure</b> <b>system</b> <b>grpc-tunnel</b> <b>destination-group</b> <i>string</i> <b>destination</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone   fully-qualified-domain-name</i> ) <b>port</b> <i>number</i> <b>local-source-address</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) |
| Tree     | <a href="#">local-source-address</a>  |

Introduced 22.2.R1  
 Platforms All

### **originated-qos-marking** *keyword*

Synopsis QoS marking used for gRPC tunnel packets

Context **configure** **system** **grpc-tunnel** **destination-group** *string* **destination** (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *fully-qualified-domain-name*) **port** *number* **originated-qos-marking** *keyword*

Default disable

Introduced 22.2.R1

Platforms All

**port number**

|            |   |
|------------|---|
| Synopsis   | TCP port number the handler listens to internally   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">port</a> <i>number</i> |
| Tree       | <a href="#">port</a>  |
| Range      | 1 to 65535  |
| Introduced | 22.2.R1   |
| Platforms  | All   |

**target-type**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>target-type</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">target-type</a> |
| Tree       | <a href="#">target-type</a>  |
| Introduced | 22.2.R1  |
| Platforms  | All  |

**custom-type** *string*

|               |  |
|---------------|--|
| Synopsis      | Custom string for target type  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">target-type</a> <a href="#">custom-type</a> <i>string</i>   |
| Tree          | <a href="#">custom-type</a>  |
| Description   | This command configures a custom string for the target type. This string can correspond to specific values used by the gRPC tunnel protocol, such as GNMI_GNOI or SSH. If a custom string is defined, the gRPC tunnel client must specify the string to request a session for that handler. The string must be unique within a tunnel. |
| String Length | 1 to 64  |
| Notes         | The following elements are part of a choice: <b>custom-type</b> , <b>grpc-server</b> , or <b>ssh-server</b> .  |
| Introduced    | 22.2.R1  |
| Platforms     | All  |

**grpc-server**

|          |  |
|----------|--|
| Synopsis | Target type set to GNMI_GNOI   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">target-type</a> <a href="#">grpc-server</a> |
| Tree     | <a href="#">grpc-server</a>  |

|             |   |
|-------------|---|
| Description | When configured, this command assigns the gRPC server as a handler for all tunnels sessions. At the gRPC tunnel protocol level, this corresponds to a value of GNMI_GNOI. |
| Notes       | The following elements are part of a choice: <b>custom-type</b> , <b>grpc-server</b> , or <b>ssh-server</b> .   |
| Introduced  | 22.2.R1   |
| Platforms   | All   |

### ssh-server

|             |   |
|-------------|---|
| Synopsis    | Target type is SSH  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">handler</a> <i>string</i> <a href="#">target-type</a> <a href="#">ssh-server</a> |
| Tree        | <a href="#">ssh-server</a>  |
| Description | When configured, this command assigns the SSH server as a handler for all tunnels sessions. At the gRPC tunnel protocol level, this corresponds to a value of SSH.                                    |
| Notes       | The following elements are part of a choice: <b>custom-type</b> , <b>grpc-server</b> , or <b>ssh-server</b> .   |
| Introduced  | 22.2.R1   |
| Platforms   | All   |

### target-name

|            |  |
|------------|--|
| Synopsis   | Enter the <b>target-name</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">target-name</a> |
| Tree       | <a href="#">target-name</a>  |
| Introduced | 22.2.R1  |
| Platforms  | All  |

### custom-string *string*

|               |  |
|---------------|--|
| Synopsis      | Custom target name   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">target-name</a> <a href="#">custom-string</a> <i>string</i> |
| Tree          | <a href="#">custom-string</a>  |
| String Length | 1 to 64  |
| Notes         | The following elements are part of a choice: <b>custom-string</b> , <b>node-name</b> , or <b>user-agent</b> .  |
| Introduced    | 22.2.R1  |
| Platforms     | All  |

## node-name

|             |  |
|-------------|--|
| Synopsis    | Set the node name as target name   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">target-name</a> <a href="#">node-name</a> |
| Tree        | <a href="#">node-name</a>  |
| Description | When configured, this command uses the node name as the target name. The node name is configured by the <b>configure system name</b> command.                  |
| Notes       | The following elements are part of a choice: <b>custom-string</b> , <b>node-name</b> , or <b>user-agent</b> .  |
| Introduced  | 22.2.R1  |
| Platforms   | All  |

## user-agent

|             |   |
|-------------|---|
| Synopsis    | Set the user agent as the target name   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">grpc-tunnel</a> <a href="#">tunnel</a> <i>string</i> <a href="#">target-name</a> <a href="#">user-agent</a> |
| Tree        | <a href="#">user-agent</a>  |
| Description | When configured, this command uses the user agent as the target name. The agent is a string consisting of <i>node-name:vendor:model:software-version</i> .      |
| Notes       | The following elements are part of a choice: <b>custom-string</b> , <b>node-name</b> , or <b>user-agent</b> .   |
| Introduced  | 22.2.R1   |
| Platforms   | All   |

## icmp-vse *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable vendor-specific extensions to ICMP                                       |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">icmp-vse</a> <i>boolean</i> |
| Tree       | <a href="#">icmp-vse</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ip

|          |                             |
|----------|-----------------------------|
| Synopsis | Enter the <b>ip</b> context |
|----------|-----------------------------|

---

|            |                            |
|------------|----------------------------|
| Context    | <b>configure system ip</b> |
| Tree       | <a href="#">ip</a>         |
| Introduced | 16.0.R1                    |
| Platforms  | All                        |

### **allow-qinq-network-interface** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow QinQ encapsulation for network interfaces                        |
| Context    | <b>configure system ip allow-qinq-network-interface</b> <i>boolean</i> |
| Tree       | <a href="#">allow-qinq-network-interface</a>                           |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS           |

### **enforce-unique-if-index** *boolean*

|            |   |
|------------|---|
| Synopsis   | Force creation of globally unique IP interface indexes            |
| Context    | <b>configure system ip enforce-unique-if-index</b> <i>boolean</i> |
| Tree       | <a href="#">enforce-unique-if-index</a>                           |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **forward-6in4** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow forwarding of IPv6 over IPv4 to system IP address |
| Context    | <b>configure system ip forward-6in4</b> <i>boolean</i>  |
| Tree       | <a href="#">forward-6in4</a>                            |
| Default    | false   |
| Introduced | 19.10.R1  |
| Platforms  | All   |

### **forward-ip-over-gre** *boolean*

|          |  |
|----------|--|
| Synopsis | Allow forwarding of IP over GRE to system IP address |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure system ip forward-ip-over-gre</b> <i>boolean</i> |
| Tree       | <a href="#">forward-ip-over-gre</a>                           |
| Default    | false   |
| Introduced | 19.10.R1  |
| Platforms  | All   |

### **ipv6-eh** *keyword*

|            |   |
|------------|---|
| Synopsis   | Number of IPv6 extension headers parsed in line cards |
| Context    | <b>configure system ip ipv6-eh</b> <i>keyword</i>     |
| Tree       | <a href="#">ipv6-eh</a>                               |
| Options    | max, limited  |
| Default    | max   |
| Introduced | 20.5.R1   |
| Platforms  | All   |

### **mpls**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mpls</b> context                                |
| Context    | <b>configure system ip mpls</b>                              |
| Tree       | <a href="#">mpls</a>   |
| Introduced | 19.10.R3   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **label-stack-statistics-count** *number*

|            |  |
|------------|--|
| Synopsis   | Collect traffic statistics on labels of the MPLS stack                     |
| Context    | <b>configure system ip mpls label-stack-statistics-count</b> <i>number</i> |
| Tree       | <a href="#">label-stack-statistics-count</a>                               |
| Range      | 1 to 2   |
| Default    | 1  |
| Introduced | 19.10.R3   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS               |

## **l2tp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>l2tp</b> context                           |
| Context    | <b>configure system l2tp</b>                            |
| Tree       | <a href="#">l2tp</a>                                    |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **non-multi-chassis-tunnel-id-range**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>non-multi-chassis-tunnel-id-range</b> context     |
| Context    | <b>configure system l2tp non-multi-chassis-tunnel-id-range</b> |
| Tree       | <a href="#">non-multi-chassis-tunnel-id-range</a>              |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR        |

## **end number**

|            |   |
|------------|---|
| Synopsis   | Upper bound of the range  |
| Context    | <b>configure system l2tp non-multi-chassis-tunnel-id-range end number</b> |
| Tree       | <a href="#">end</a>   |
| Range      | 0 to 16383  |
| Default    | 16383   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                   |

## **start number**

|            |   |
|------------|---|
| Synopsis   | Lower bound of the range  |
| Context    | <b>configure system l2tp non-multi-chassis-tunnel-id-range start number</b> |
| Tree       | <a href="#">start</a>   |
| Range      | 0 to 16383  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                     |

## lACP

|            |                               |
|------------|-------------------------------|
| Synopsis   | Enter the <b>lACP</b> context |
| Context    | <b>configure system lACP</b>  |
| Tree       | <a href="#">lACP</a>          |
| Introduced | 16.0.R1                       |
| Platforms  | All                           |

## system-priority *number*

|            |  |
|------------|--|
| Synopsis   | LACP system priority on aggregated Ethernet interfaces     |
| Context    | <b>configure system lACP system-priority <i>number</i></b> |
| Tree       | <a href="#">system-priority</a>                            |
| Range      | 1 to 65535   |
| Default    | 32768  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## lldp

|            |                               |
|------------|-------------------------------|
| Synopsis   | Enter the <b>lldp</b> context |
| Context    | <b>configure system lldp</b>  |
| Tree       | <a href="#">lldp</a>          |
| Introduced | 16.0.R1                       |
| Platforms  | All                           |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of LLDP                            |
| Context    | <b>configure system lldp admin-state <i>keyword</i></b> |
| Tree       | <a href="#">admin-state</a>                             |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**message-fast-tx** *number*

|             |  |
|-------------|--|
| Synopsis    | Interval at which LLDP frames are transmitted  |
| Context     | <b>configure</b> <a href="#">system lldp message-fast-tx</a> <i>number</i>   |
| Tree        | <a href="#">message-fast-tx</a>  |
| Description | This command configures the interval at which LLDP frames are transmitted on behalf of the LLDP during a fast transmission period. |
| Range       | 1 to 3600  |
| Units       | seconds  |
| Default     | 1  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**message-fast-tx-init** *number*

|            |   |
|------------|---|
| Synopsis   | PDU's to transmit during the fast transmission period                           |
| Context    | <b>configure</b> <a href="#">system lldp message-fast-tx-init</a> <i>number</i> |
| Tree       | <a href="#">message-fast-tx-init</a>  |
| Range      | 1 to 8  |
| Default    | 4   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**notification-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum interval between change notifications                                    |
| Context    | <b>configure</b> <a href="#">system lldp notification-interval</a> <i>number</i> |
| Tree       | <a href="#">notification-interval</a>  |
| Range      | 5 to 3600  |
| Units      | seconds  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**reinit-delay** *number*

|            |   |
|------------|---|
| Synopsis   | Time required before re-initializing LLDP on a port                     |
| Context    | <b>configure</b> <a href="#">system lldp reinit-delay</a> <i>number</i> |
| Tree       | <a href="#">reinit-delay</a>  |
| Range      | 1 to 10   |
| Units      | seconds   |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**tx-credit-max** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum consecutive LLDPDUs that can be transmitted                      |
| Context    | <b>configure</b> <a href="#">system lldp tx-credit-max</a> <i>number</i> |
| Tree       | <a href="#">tx-credit-max</a>  |
| Range      | 1 to 100   |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**tx-hold-multiplier** *number*

|            |   |
|------------|---|
| Synopsis   | Transmit interval multiplier  |
| Context    | <b>configure</b> <a href="#">system lldp tx-hold-multiplier</a> <i>number</i> |
| Tree       | <a href="#">tx-hold-multiplier</a>  |
| Range      | 2 to 10   |
| Default    | 4   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**tx-interval** *number*

|          |  |
|----------|--|
| Synopsis | LLDP transmit interval   |
| Context  | <b>configure</b> <a href="#">system lldp tx-interval</a> <i>number</i> |
| Tree     | <a href="#">tx-interval</a>  |

---

|            |            |
|------------|------------|
| Range      | 5 to 32768 |
| Units      | seconds    |
| Default    | 30         |
| Introduced | 16.0.R1    |
| Platforms  | All        |

## load-balancing

|            |  |
|------------|--|
| Synopsis   | Enter the <b>load-balancing</b> context                |
| Context    | <b>configure</b> <a href="#">system load-balancing</a> |
| Tree       | <a href="#">load-balancing</a>                         |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## l2tp-load-balancing *boolean*

|            |   |
|------------|---|
| Synopsis   | Include L2TP header information for load balancing  |
| Context    | <b>configure</b> <a href="#">system load-balancing l2tp-load-balancing</a> <i>boolean</i> |
| Tree       | <a href="#">l2tp-load-balancing</a>   |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

## l4-load-balancing *boolean*

|            |   |
|------------|---|
| Synopsis   | Use load balancing based on Layer 4 fields  |
| Context    | <b>configure</b> <a href="#">system load-balancing l4-load-balancing</a> <i>boolean</i> |
| Tree       | <a href="#">l4-load-balancing</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## lsr-load-balancing *keyword*

|          |  |
|----------|--|
| Synopsis | Algorithm for system-wide LSR load balancing   |
| Context  | <b>configure</b> <a href="#">system load-balancing lsr-load-balancing</a> <i>keyword</i> |

---

|            |   |
|------------|---|
| Tree       | <a href="#">lsr-load-balancing</a>                                      |
| Options    | lbl-only, lbl-ip, ip-only, eth-encap-ip, lbl-ip-l4-teid, lbl-ip-or-teid |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mc-enh-load-balancing** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable enhanced egress multicast load balancing   |
| Context    | <b>configure</b> <a href="#">system load-balancing mc-enh-load-balancing</a> <i>boolean</i> |
| Tree       | <a href="#">mc-enh-load-balancing</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **service-id-lag-hashing** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable enhanced VLL LAG service ID hashing   |
| Context    | <b>configure</b> <a href="#">system load-balancing service-id-lag-hashing</a> <i>boolean</i> |
| Tree       | <a href="#">service-id-lag-hashing</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **system-ip-load-balancing** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use system IP address for ECMP and LAG load balancing  |
| Context    | <b>configure</b> <a href="#">system load-balancing system-ip-load-balancing</a> <i>boolean</i> |
| Tree       | <a href="#">system-ip-load-balancing</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **location** *string*

|          |  |
|----------|--|
| Synopsis | Site location of the system                                    |
| Context  | <b>configure</b> <a href="#">system location</a> <i>string</i> |

---

|               |                          |
|---------------|--------------------------|
| Tree          | <a href="#">location</a> |
| String Length | 1 to 80                  |
| Introduced    | 16.0.R1                  |
| Platforms     | All                      |

## **login-control**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>login-control</b> context                |
| Context    | <b>configure</b> <a href="#">system login-control</a> |
| Tree       | <a href="#">login-control</a>                         |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **exponential-backoff** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable exponential-backoff of the login prompt   |
| Context    | <b>configure</b> <a href="#">system login-control exponential-backoff</a> <i>boolean</i> |
| Tree       | <a href="#">exponential-backoff</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **ftp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ftp</b> context                              |
| Context    | <b>configure</b> <a href="#">system login-control ftp</a> |
| Tree       | <a href="#">ftp</a>                                       |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **inbound-max-sessions** *number*

|          |  |
|----------|--|
| Synopsis | Maximum number of concurrent inbound FTP sessions  |
| Context  | <b>configure</b> <a href="#">system login-control ftp inbound-max-sessions</a> <i>number</i> |
| Tree     | <a href="#">inbound-max-sessions</a>   |

---

|            |         |
|------------|---------|
| Range      | 0 to 5  |
| Default    | 3       |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **idle-timeout** (*keyword* | *number*)

|            |   |
|------------|---|
| Synopsis   | Idle timeout for FTP, console, or Telnet sessions   |
| Context    | <b>configure</b> <a href="#">system login-control idle-timeout</a> ( <i>keyword</i>   <i>number</i> ) |
| Tree       | <a href="#">idle-timeout</a>  |
| Range      | 1 to 1440   |
| Units      | minutes   |
| Options    | none  |
| Default    | 30  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **login-banner** *boolean*

|            |   |
|------------|---|
| Synopsis   | Display login banner  |
| Context    | <b>configure</b> <a href="#">system login-control login-banner</a> <i>boolean</i> |
| Tree       | <a href="#">login-banner</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **login-scripts**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>login-scripts</b> context                              |
| Context    | <b>configure</b> <a href="#">system login-control login-scripts</a> |
| Tree       | <a href="#">login-scripts</a>                                       |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**global-script** *string*

|               |   |
|---------------|---|
| Synopsis      | URL of the global CLI login script  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">login-scripts</a> <a href="#">global-script</a> <i>string</i> |
| Tree          | <a href="#">global-script</a>   |
| String Length | 1 to 180  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**per-user-script**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>per-user-script</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">login-scripts</a> <a href="#">per-user-script</a> |
| Tree       | <a href="#">per-user-script</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**file-name** *string*

|               |   |
|---------------|---|
| Synopsis      | File name of the per-user login script  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">login-scripts</a> <a href="#">per-user-script</a> <a href="#">file-name</a> <i>string</i> |
| Tree          | <a href="#">file-name</a>   |
| String Length | 1 to 180  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**user-directory** *string*

|               |  |
|---------------|--|
| Synopsis      | Directory name of user-defined login script  |

| Synopsis   | Enter the <b>pre-login-message</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">login-control</a> <a href="#">pre-login-message</a> |
| Tree       | <a href="#">pre-login-message</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**message** *string*

|               |   |
|---------------|---|
| Synopsis      | Message displayed prior to the login prompt   |
| Context       | <b>configure</b> <a href="#">system login-control pre-login-message message</a> <i>string</i> |
| Tree          | <a href="#">message</a>   |
| String Length | 1 to 900  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**name** *boolean*

|            |   |
|------------|---|
| Synopsis   | Display the system name before the pre-login message  |
| Context    | <b>configure</b> <a href="#">system login-control pre-login-message name</a> <i>boolean</i> |
| Tree       | <a href="#">name</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**ssh**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ssh</b> context                              |
| Context    | <b>configure</b> <a href="#">system login-control ssh</a> |
| Tree       | <a href="#">ssh</a>                                       |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**graceful-shutdown** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow graceful shutdown of SSH sessions  |
| Context    | <b>configure</b> <a href="#">system login-control ssh graceful-shutdown</a> <i>boolean</i> |
| Tree       | <a href="#">graceful-shutdown</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**inbound-max-sessions** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of concurrent inbound sessions  |
| Context    | <b>configure</b> <a href="#">system login-control ssh inbound-max-sessions</a> <i>number</i> |
| Tree       | <a href="#">inbound-max-sessions</a>   |
| Range      | 0 to 50  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**outbound-max-sessions** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of concurrent outbound sessions  |
| Context    | <b>configure</b> <a href="#">system login-control ssh outbound-max-sessions</a> <i>number</i> |
| Tree       | <a href="#">outbound-max-sessions</a>   |
| Range      | 0 to 15   |
| Default    | 5   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**tll-security** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum TTL value for incoming packets   |
| Context    | <b>configure</b> <a href="#">system login-control ssh tll-security</a> <i>number</i> |
| Tree       | <a href="#">tll-security</a>   |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**telnet**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>telnet</b> context                              |
| Context    | <b>configure</b> <a href="#">system login-control telnet</a> |
| Tree       | <a href="#">telnet</a>                                       |
| Introduced | 16.0.R1  |

Platforms All

### **graceful-shutdown** *boolean*

Synopsis Allow graceful shutdown of Telnet sessions  
Context **configure** [system login-control telnet graceful-shutdown](#) *boolean*  
Tree [graceful-shutdown](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **inbound-max-sessions** *number*

Synopsis Maximum number of concurrent inbound sessions  
Context **configure** [system login-control telnet inbound-max-sessions](#) *number*  
Tree [inbound-max-sessions](#)  
Range 0 to 50  
Default 5  
Introduced 16.0.R1  
Platforms All

### **outbound-max-sessions** *number*

Synopsis Maximum number of concurrent outbound sessions  
Context **configure** [system login-control telnet outbound-max-sessions](#) *number*  
Tree [outbound-max-sessions](#)  
Range 0 to 15  
Default 5  
Introduced 16.0.R1  
Platforms All

### **ttl-security** *number*

Synopsis Minimum TTL value for incoming packets  
Context **configure** [system login-control telnet ttl-security](#) *number*

---

|            |                              |
|------------|------------------------------|
| Tree       | <a href="#">ttl-security</a> |
| Range      | 1 to 255                     |
| Introduced | 16.0.R1                      |
| Platforms  | All                          |

## management-interface

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>management-interface</b> context  |
| Context     | <b>configure</b> <a href="#">system management-interface</a>   |
| Tree        | <a href="#">management-interface</a>   |
| Description | Commands in this context configure the capabilities of router management interfaces such as CLI and NETCONF. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## cli

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>cli</b> context                                      |
| Context     | <b>configure</b> <a href="#">system management-interface cli</a>  |
| Tree        | <a href="#">cli</a>   |
| Description | Commands in this context configure the CLI management interfaces. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## classic-cli

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>classic-cli</b> context   |
| Context     | <b>configure</b> <a href="#">system management-interface cli classic-cli</a> |
| Tree        | <a href="#">classic-cli</a>  |
| Description | Commands in this context configure the classic CLI management interface.     |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**allow-immediate** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow writable access in classic CLI configure branch  |
| Context     | <b>configure</b> <a href="#">system management-interface cli classic-cli allow-immediate</a> <i>boolean</i>  |
| Tree        | <a href="#">allow-immediate</a>  |
| Description | When configured to <b>true</b> , this command enables write access in the classic CLI configuration branch without having to use the classic CLI <b>candidate edit</b> functionality.<br>When configured to <b>false</b> , this command blocks write access and configuration changes in the classic CLI configuration branch, and the classic CLI configuration branch is read-only. This enforces using the classic CLI <b>candidate edit</b> functionality, including <b>candidate commit</b> , to modify the router configuration, instead of allowing immediate line-by-line configuration changes. |
| Default     | true   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**rollback**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>rollback</b> context  |
| Context     | <b>configure</b> <a href="#">system management-interface cli classic-cli rollback</a>  |
| Tree        | <a href="#">rollback</a>   |
| Description | Commands in this context control classic CLI configuration rollback functionality, such as the maximum number of rollback checkpoints the system maintains. Configuration rollback allows the operator to revert to previous router configuration states while minimizing impacts to services. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**local-checkpoints** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of rollback files on local storage   |
| Context    | <b>configure</b> <a href="#">system management-interface cli classic-cli rollback local-checkpoints</a> <i>number</i> |
| Tree       | <a href="#">local-checkpoints</a>   |
| Range      | 1 to 50   |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**location string**

|               |   |
|---------------|---|
| Synopsis      | Path and filename prefix for rollback checkpoint files  |
| Context       | <b>configure</b> <a href="#">system management-interface cli classic-cli rollback location string</a>   |
| Tree          | <a href="#">location</a>  |
| Description   | This command configures the local (for example, compact flash) or remote location and name of the classic CLI rollback checkpoint files. The filename must not contain a suffix. The suffixes for rollback checkpoint files are, for example, .rb, .rb.1, .rb.2, and so on. The suffixes are automatically appended to rollback checkpoint files. |
| String Length | 1 to 180  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**remote-checkpoints number**

|            |   |
|------------|---|
| Synopsis   | Maximum rollback files saved at a remote location   |
| Context    | <b>configure</b> <a href="#">system management-interface cli classic-cli rollback remote-checkpoints number</a> |
| Tree       | <a href="#">remote-checkpoints</a>  |
| Range      | 1 to 200  |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**rescue**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rescue</b> context  |
| Context    | <b>configure</b> <a href="#">system management-interface cli classic-cli rollback rescue</a> |
| Tree       | <a href="#">rescue</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**location string**

|          |  |
|----------|--|
| Synopsis | Location of the rescue configuration file  |
| Context  | <b>configure</b> <a href="#">system management-interface cli classic-cli rollback rescue location string</a> |

|               |   |
|---------------|---|
| Tree          | <a href="#">location</a>  |
| Description   | This command configures the local or remote location and filename of the classic CLI rescue configuration file. The suffix (.rc) is automatically appended to the filename when a rescue configuration file is saved. Trivial FTP (TFTP) is not supported for remote locations. |
| String Length | 1 to 180  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **cli-engine** *keyword*

|                |  |
|----------------|--|
| Synopsis       | System-wide CLI engine access  |
| Context        | <b>configure</b> <a href="#">system management-interface cli cli-engine</a> <i>keyword</i>   |
| Tree           | <a href="#">cli-engine</a>   |
| Description    | This command configures the system-wide CLI engine. The operator can configure one or both engines. For the configuration to take effect, exit the running CLI session and start a new session after committing the new value. |
| Options        | classic-cli, md-cli  |
| Default        | md-cli   |
| Max. Instances | 2  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **md-cli**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>md-cli</b> context   |
| Context     | <b>configure</b> <a href="#">system management-interface cli md-cli</a> |
| Tree        | <a href="#">md-cli</a>  |
| Description | Commands in this context configure the MD-CLI management interface.     |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**auto-config-save** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Automatically save configuration as part of commit  |
| Context     | <b>configure</b> <a href="#">system management-interface cli md-cli auto-config-save</a> <i>boolean</i>   |
| Tree        | <a href="#">auto-config-save</a>  |
| Description | When configured to <b>true</b> , the system automatically writes the running configuration to the save configuration file as part of a successful commit operation. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**environment**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>environment</b> context  |
| Context    | <b>configure</b> <a href="#">system management-interface cli md-cli environment</a> |
| Tree       | <a href="#">environment</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**command-alias**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>command-alias</b> context  |
| Context    | <b>configure</b> <a href="#">system management-interface cli md-cli environment command-alias</a> |
| Tree       | <a href="#">command-alias</a>   |
| Introduced | 21.7.R1   |
| Platforms  | All   |

**alias** [*alias-name*] *string*

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>alias</b> list instance  |
| Context     | <b>configure</b> <a href="#">system management-interface cli md-cli environment command-alias</a> <i>alias string</i>   |
| Tree        | <a href="#">alias</a>   |
| Description | <p>Commands in this context create aliases to existing MD-CLI commands or to Python applications.</p> <p>Aliases may be mounted for use globally or for selected context paths. Arguments and output modifiers may be provided to aliases at configuration or run time.</p> |

Introduced 21.7.R1  
 Platforms All

### **[alias-name]** *string*

Synopsis Alias name  
 Context **configure** [system](#) [management-interface](#) [cli](#) [md-cli](#) [environment](#) [command-alias](#) [alias](#)  
*string*  
 Tree [alias](#)  
 String Length 1 to 64  
 Notes This element is part of a list key.  
 Introduced 21.7.R1  
 Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the alias  
 Context **configure** [system](#) [management-interface](#) [cli](#) [md-cli](#) [environment](#) [command-alias](#) [alias](#)  
*string* [admin-state](#) *keyword*  
 Tree [admin-state](#)  
 Description This command controls the administrative state of the MD-CLI alias.  
 MD-CLI aliases that are administratively disabled cannot be executed, are not displayed in command completion, and do not appear in ? help.  
 Options enable, disable  
 Default disable  
 Introduced 21.10.R1  
 Platforms All

### **cli-command** *string*

Synopsis CLI command to run when executing the alias

| Introduced | 16.0.R1 |
| Platforms  | All     |

## info-output

|            |   |
|------------|---|
| Synopsis   | Enter the <b>info-output</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">info-output</a> |
| Tree       | <a href="#">info-output</a>   |
| Introduced | 22.2.R1   |
| Platforms  | All   |

## always-display

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>always-display</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">info-output</a> <a href="#">always-display</a> |
| Tree        | <a href="#">always-display</a>   |
| Description | Commands in this context specify elements that are always displayed in the <b>info</b> output, regardless of whether the <b>detail</b> option is used.   |
| Introduced  | 22.2.R1  |
| Platforms   | All  |

## admin-state *boolean*

|             |   |
|-------------|---|
| Synopsis    | Always display admin-state elements   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">info-output</a> <a href="#">always-display</a> <a href="#">admin-state</a> <i>boolean</i> |
| Tree        | <a href="#">admin-state</a>   |
| Description | When configured to <b>true</b> , the values of the <b>admin-state</b> elements in <b>info</b> output (without the <b>detail</b> option) are always displayed, even if they are the default values.  |
| Default     | false   |
| Introduced  | 22.2.R1   |
| Platforms   | All   |

## message-severity-level

|            |  |
|------------|--|
| Synopsis   | Enter the <b>message-severity-level</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">message-severity-level</a> |
| Tree       | <a href="#">message-severity-level</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## cli keyword

|            |   |
|------------|---|
| Synopsis   | Message severity threshold for CLI messages   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">message-severity-level</a><br><a href="#">cli keyword</a> |
| Tree       | <a href="#">cli</a>   |
| Options    | warning, info   |
| Default    | info  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## more boolean

|            |   |
|------------|---|
| Synopsis   | Activate the pager when output is longer than a screen  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">more</a> <i>boolean</i> |
| Tree       | <a href="#">more</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## progress-indicator

|            |  |
|------------|--|
| Synopsis   | Enter the <b>progress-indicator</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">progress-indicator</a> |
| Tree       | <a href="#">progress-indicator</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the progress indicator   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">progress-indicator</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**delay** *number*

|            |   |
|------------|---|
| Synopsis   | Delay before the progress indicator is displayed  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">progress-indicator</a> <b>delay</b> <i>number</i> |
| Tree       | <a href="#">delay</a>   |
| Range      | 0 to 10000  |
| Units      | milliseconds  |
| Default    | 1000  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Progress indicator output style   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">progress-indicator</a> <b>type</b> <i>keyword</i> |
| Tree       | <a href="#">type</a>  |
| Options    | dots  |
| Default    | dots  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**prompt**

|          |                                 |
|----------|---------------------------------|
| Synopsis | Enter the <b>prompt</b> context |
|----------|---------------------------------|

---

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">prompt</a> |
| Tree       | <a href="#">prompt</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **context** *boolean*

|            |   |
|------------|---|
| Synopsis   | Show the current command context in the prompt  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">prompt</a> <a href="#">context</a> <i>boolean</i> |
| Tree       | <a href="#">context</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **newline** *boolean*

|            |   |
|------------|---|
| Synopsis   | Add a new line before every prompt line   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">prompt</a> <a href="#">newline</a> <i>boolean</i> |
| Tree       | <a href="#">newline</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **timestamp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Show the timestamp before the first prompt line   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">prompt</a> <a href="#">timestamp</a> <i>boolean</i> |
| Tree       | <a href="#">timestamp</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **uncommitted-changes-indicator** *boolean*

|          |   |
|----------|---|
| Synopsis | Show an asterisk (*) when uncommitted changes exist |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">prompt</a> <a href="#">uncommitted-changes-indicator</a> <i>boolean</i> |
| Tree       | <a href="#">uncommitted-changes-indicator</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## python

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>python</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">python</a> |
| Tree        | <a href="#">python</a>   |
| Description | Commands in this context customize Python settings used with the Python 3 interpreter in MD-CLI applications such as pyexec, command aliases, EHS, and CRON.               |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

## memory-reservation *number*

|            |   |
|------------|---|
| Synopsis   | Memory reserved per Python interpreter  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">python</a> <a href="#">memory-reservation</a> <i>number</i> |
| Tree       | <a href="#">memory-reservation</a>  |
| Range      | 1 to 500  |
| Units      | megabytes   |
| Introduced | 21.10.R1  |
| Platforms  | All   |

## minimum-available-memory *number*

|          |   |
|----------|---|
| Synopsis | Minimum memory requirement to run a Python interpreter  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">cli</a> <a href="#">md-cli</a> <a href="#">environment</a> <a href="#">python</a> <a href="#">minimum-available-memory</a> <i>number</i> |
| Tree     | <a href="#">minimum-available-memory</a>  |
| Range    | 5 to 50   |
| Units    | percent   |

|            |          |
|------------|----------|
| Introduced | 21.10.R1 |
| Platforms  | All      |

### **timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum run time before a Python application is stopped   |
| Context    | <b>configure</b> <a href="#">system management-interface cli md-cli environment python timeout number</a> |
| Tree       | <a href="#">timeout</a>   |
| Range      | 30 to 86400   |
| Units      | seconds   |
| Default    | 3600  |
| Introduced | 21.10.R1  |
| Platforms  | All   |

### **time-display** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Time zone to display time  |
| Context     | <b>configure</b> <a href="#">system management-interface cli md-cli environment time-display keyword</a>   |
| Tree        | <a href="#">time-display</a>   |
| Description | <p>This command configures the time zone for a timestamp displayed in outputs, such as event logs and <b>show</b> commands for the current CLI session.</p> <p>In event logs, the selected time is used to control the timestamps in the CLI output of <b>show log log-id</b> and in YANG state in the /state/log/log-id branch (for logs such as session, cli, memory, SNMP, and NETCONF).</p> <p>Also see the <b>configure log log-id time-format</b> command.</p> |
| Options     | local, utc   |
| Default     | local  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **time-format** *keyword*

|          |   |
|----------|---|
| Synopsis | Format to display the date and time   |
| Context  | <b>configure</b> <a href="#">system management-interface cli md-cli environment time-format keyword</a> |
| Tree     | <a href="#">time-format</a>   |

|             |   |
|-------------|---|
| Description | This command specifies the format of the time display in configuration, state, and certain <b>show</b> command output in the current CLI session. |
| Options     | iso-8601, rfc-1123, rfc-3339  |
| Default     | rfc-3339  |
| Introduced  | 20.5.R1   |
| Platforms   | All   |

### **commit-history** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of commit history IDs to store   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <b>commit-history</b> <i>number</i>        |
| Tree        | <a href="#">commit-history</a>  |
| Description | This command sets the number of IDs to store in the commit history. Setting the value to 0 disables the commit history. |
| Range       | 0 to 200  |
| Default     | 50  |
| Introduced  | 21.10.R1  |
| Platforms   | All   |

### **configuration-mode** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Management interfaces allowed to edit the configuration  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <b>configuration-mode</b> <i>keyword</i>  |
| Tree        | <a href="#">configuration-mode</a>   |
| Description | <p>This command controls which of the classic or model-driven management interfaces can modify the configuration of the router.</p> <p>Any management interface can be used in any configuration mode (to gather state information or perform operations, for example), but only specific management interfaces (CLI, NETCONF, and so on) are allowed to edit the configuration of the router in different modes. For example, only classic CLI and SNMP can be used to edit the configuration when in classic mode.</p> |
| Options     | classic, model-driven, mixed   |
| Default     | classic  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## configuration-save

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>configuration-save</b> context                                      |
| Context     | <b>configure</b> <a href="#">system management-interface configuration-save</a>  |
| Tree        | <a href="#">configuration-save</a>   |
| Description | Commands in this context configure the attributes for saved configuration files. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## configuration-backups *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum number of configuration versions maintained   |
| Context     | <b>configure</b> <a href="#">system management-interface configuration-save configuration-backups</a> <i>number</i>   |
| Tree        | <a href="#">configuration-backups</a>   |
| Description | <p>This command configures the maximum number of saved configuration file versions the router maintains.</p> <p>When the configuration is saved, configuration file names are appended with a numeric extension. Each subsequent configuration save creates a new configuration file version with an incremented numeric extension until the maximum count is reached, after which the next configuration save overwrites the oldest file version.</p> <p>Each persistent index file is updated at the same time as the associated configuration file. The system synchronizes the active and standby CPM for all configurations and their associated persistent index files.</p> |
| Range       | 1 to 200  |
| Default     | 5   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## incremental-saves *boolean*

|             |  |
|-------------|--|
| Synopsis    | Use incremental saved configuration files  |
| Context     | <b>configure</b> <a href="#">system management-interface configuration-save incremental-saves</a> <i>boolean</i>   |
| Tree        | <a href="#">incremental-saves</a>  |
| Description | When configured to <b>true</b> , the system saves each commit to the <b>configure</b> configuration region in a separate incremental saved configuration file, which allows for faster commits, instead of saving a complete saved configuration file each time. |
| Default     | false  |

---

|            |         |
|------------|---------|
| Introduced | 22.7.R1 |
| Platforms  | All     |

## netconf

|            |  |
|------------|--|
| Synopsis   | Enter the <b>netconf</b> context                                     |
| Context    | <b>configure</b> <a href="#">system management-interface netconf</a> |
| Tree       | <a href="#">netconf</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of NETCONF   |
| Context    | <b>configure</b> <a href="#">system management-interface netconf admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## auto-config-save *boolean*

|             |   |
|-------------|---|
| Synopsis    | Automatically save configuration as part of commit  |
| Context     | <b>configure</b> <a href="#">system management-interface netconf auto-config-save</a> <i>boolean</i>  |
| Tree        | <a href="#">auto-config-save</a>  |
| Description | When configured to <b>true</b> , the system automatically writes the running configuration to the save configuration file as part of a successful commit operation. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## capabilities

|          |                                       |
|----------|---------------------------------------|
| Synopsis | Enter the <b>capabilities</b> context |
|----------|---------------------------------------|

|             |  |
|-------------|--|
| Context     | <b>configure system management-interface netconf capabilities</b>                |
| Tree        | <a href="#">capabilities</a>   |
| Description | Commands in this context configure explicit capabilities for the NETCONF server. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **candidate** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow the NETCONF server to access candidate datastore   |
| Context     | <b>configure system management-interface netconf capabilities candidate</b> <i>boolean</i>   |
| Tree        | <a href="#">candidate</a>  |
| Description | <p>When configured to <b>true</b>, this command allows the SR OS NETCONF server to access the candidate configuration datastore. Configuring this command to <b>true</b> also enables using <b>commit</b> and <b>discard-changes</b>.</p> <p>When <b>configure system management-interface configuration-mode</b> is set to <b>classic</b>, the candidate capability is disabled, even if this command is configured to <b>true</b>.</p> <p>When configured to <b>false</b>, this command disables the SR OS NETCONF server from accessing the candidate datastore. If the candidate is disabled, requests that reference the candidate datastore return an error, and when a NETCONF client establishes a new session, the candidate capability is not advertised in the SR OS NETCONF Hello message.</p> |
| Default     | true   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **writable-running** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow NETCONF server to access the running datastore  |
| Context     | <b>configure system management-interface netconf capabilities writable-running</b> <i>boolean</i>   |
| Tree        | <a href="#">writable-running</a>  |
| Description | <p>When configured to <b>true</b>, this command allows the SR OS NETCONF server to access the running configuration datastore.</p> <p>When <b>configure system management-interface configuration-mode</b> is set to <b>model-driven</b>, the writable-running capability is disabled, even if this command is configured to <b>true</b>.</p> <p>When configured to <b>false</b>, this command disables the SR OS NETCONF server from accessing the running datastore. Requests that reference the running datastore as a</p> |

target return an error. When a NETCONF client establishes a new session, the writable-running capability is not advertised in the SR OS NETCONF Hello message.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **port number**

|             |   |
|-------------|---|
| Synopsis    | Port on which NETCONF server listens for connections  |
| Context     | <b>configure</b> <a href="#">system management-interface netconf port number</a>  |
| Tree        | <a href="#">port</a>  |
| Description | <p>This command specifies the port on which the SR OS NETCONF server listens for new connections. One port can be configured for NETCONF management.</p> <p>The configured port applies to both non-VPRN and VPRN management. New NETCONF connections are able to use the configured port.</p> <p>For NETCONF connections not using VPRN management, active NETCONF connections are not disconnected if the connection port changes. For NETCONF connections using VPRN management, active NETCONF connections are disconnected if the connection port changes.</p> |
| Range       | 22   830  |
| Default     | 830   |
| Introduced  | 19.10.R1  |
| Platforms   | All   |

### **operations**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>operations</b> context  |
| Context     | <b>configure</b> <a href="#">system management-interface operations</a>  |
| Tree        | <a href="#">operations</a>   |
| Description | Commands in this context configure parameters associated with operational commands in model-driven interfaces. |
| Introduced  | 21.5.R1  |
| Platforms   | All  |

### **global-timeouts**

|          |  |
|----------|--|
| Synopsis | Enter the <b>global-timeouts</b> context |
|----------|--|

|             |   |
|-------------|---|
| Context     | <b>configure system management-interface operations global-timeouts</b>   |
| Tree        | <a href="#">global-timeouts</a>   |
| Description | <p>Commands in this context configure system timeout parameters for operational commands.</p> <p>Timeout parameters provide default system-level control for various types of operational commands in model-driven interfaces. The timeout values are used when specific execution and retention timeouts are not requested for a specific operation.</p> |
| Introduced  | 21.5.R1   |
| Platforms   | All   |

### **asynchronous-execution** (*number* | *keyword*)

|             |  |
|-------------|--|
| Synopsis    | Timeout for asynchronous operation execution   |
| Context     | <b>configure system management-interface operations global-timeouts asynchronous-execution</b> ( <i>number</i>   <i>keyword</i> )  |
| Tree        | <a href="#">asynchronous-execution</a>   |
| Description | <p>This command configures the period of time that operations launched as “asynchronous” are allowed to execute before being automatically stopped by the SR OS.</p> <p>An asynchronous operation is not deleted from the system when it is stopped. See the <b>asynchronous-retention</b> command.</p> <p>If a specific execution timeout is not included in the request for a particular asynchronous operation, this system-level timeout applies.</p> <p><b>Note:</b> This execution timeout is part of the general global operations infrastructure and is separate and independent from any operation-specific timeouts (for example, the <b>ping</b> operation also has its own timeout parameter).</p> |
| Range       | 1 to 604800  |
| Units       | seconds  |
| Options     | never  |
| Default     | 3600   |
| Introduced  | 21.5.R1  |
| Platforms   | All  |

### **asynchronous-retention** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | Timeout for asynchronous operation data retention   |
| Context  | <b>configure system management-interface operations global-timeouts asynchronous-retention</b> ( <i>number</i>   <i>keyword</i> ) |

|             |   |
|-------------|---|
| Tree        | <a href="#">asynchronous-retention</a>  |
| Description | <p>This command configures the period of time that data related to operations launched as “asynchronous” is retained in the system. After the retention timeout expires, all information related to the operation is deleted, including any status information and result data.</p> <p>If a specific retention timeout is not included in the request for a particular asynchronous operation, this system-level timeout applies.</p> |
| Range       | 1 to 604800   |
| Units       | seconds   |
| Options     | never   |
| Default     | 86400   |
| Introduced  | 21.5.R1   |
| Platforms   | All   |

### **synchronous-execution** (*number* | *keyword*)

|             |  |
|-------------|--|
| Synopsis    | Timeout for synchronous operation execution  |
| Context     | <b>configure</b> <a href="#">system management-interface operations global-timeouts synchronous-execution</a> ( <i>number</i>   <i>keyword</i> )   |
| Tree        | <a href="#">synchronous-execution</a>  |
| Description | <p>This command configures the period of time that operations launched as “synchronous” (the default method for all operations) are allowed to execute before they are automatically stopped, and their associated data is deleted.</p> <p>If a specific execution timeout is not included in the request for a particular synchronous operation, this system-level timeout applies.</p> <p><b>Note:</b> This execution timeout is part of the general global operations infrastructure and is separate and independent from any operation-specific timeouts (for example, the <b>ping</b> operation also has its own timeout parameter).</p> <p><b>Caution:</b> If this command is set with a specific time value, MD-CLI operations are subject to the timeout and are interrupted if they execute longer than the time value. This situation can arise because the timeout also applies to operations requested in the MD-CLI interface (for example, <b>ping</b>, <b>file dir</b>, and so on).</p> |
| Range       | 1 to 604800  |
| Units       | seconds  |
| Options     | never  |
| Default     | never  |
| Introduced  | 21.5.R1  |
| Platforms   | All  |

## remote-management

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>remote-management</b> context  |
| Context     | <b>configure</b> <a href="#">system management-interface remote-management</a>  |
| Tree        | <a href="#">remote-management</a>   |
| Description | Commands in this context configure the SR OS node to use the remote management service. Configuring remote management enables the SR OS node to report itself to a remote manager service running on a remote server, so that it is included in the dynamic list of available nodes. The manager service streamlines the management of multiple SR OS nodes running different SR OS versions using the same client application providing a similar shell to the MD-CLI. |
| Introduced  | 20.5.R1   |
| Platforms   | All   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of remote management registration  |

## admin-state *keyword*

|             |   |
|-------------|---|
| Synopsis    | Administrative state of the SNMP agent  |
| Context     | <b>configure</b> <a href="#">system management-interface snmp admin-state</a> <i>keyword</i>  |
| Tree        | <a href="#">admin-state</a>   |
| Description | <p>This command administratively enables or disables SNMP agent operations. Disabling SNMP does not prevent the agent from sending SNMP notifications to configured SNMP trap destinations.</p> <p>In classic and mixed configuration mode, the agent is administratively disabled in the event of a reboot when the processing of the configuration file fails to complete or when an SNMP persistent index file fails while the <b>bof system persistent-indices</b> command is set to <b>true</b>. This prevents an SNMP-based management system from accessing and possibly synchronizing with a partially booted or incomplete network element. This auto-disable behavior is not applicable to model-driven configuration mode.</p> |
| Options     | enable, disable   |
| Default     | enable  |
| Introduced  | 16.0.R1   |

Platforms All

### **engine-id** *string*

**Synopsis** SNMP engine ID that identifies the SNMPv3 node

**Context** **configure** [system management-interface snmp engine-id](#) *string*

**Tree** [engine-id](#)

**Description** This command sets the SNMP engine ID that uniquely identifies the SNMPv3 node. If unconfigured, the system uses an engine ID based on the information from the system backplane.

If the SNMP engine ID is changed, the current configuration must be saved and a reboot must be executed. Otherwise, the previously configured SNMP communities and logger trap-target notify communities will not be valid for the new engine ID.

**Note:** Changing the SNMP engine ID invalidates all SNMPv3 MD5 and SHA security digest keys, which may render the node unmanageable.

When replacing a chassis, configure the new router to use the same engine ID as the previous router. This preserves SNMPv3 security keys and allows management stations to use their existing authentication keys for the new router.

Ensure that the engine ID of each router is unique. A management domain can only maintain one instance of a specific engine ID.

**String Length** 10 to 64

**Introduced** 16.0.R1

**Platforms** All

### **general-port** *number*

**Synopsis** Port number used to send general SNMP messages

**Context** **configure** [system management-interface snmp general-port](#) *number*

**Tree** [general-port](#)

**Description** This command configures the port number used to receive SNMP request messages and send replies.

For the port used for SNMP notifications, configure the **configure log snmp-trap-group trap-target port** command.

**Range** 0 | 1 to 65535

**Default** 161

**Introduced** 16.0.R1

**Platforms** All

### **packet-size** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum SNMP packet size generated by the node  |

| Tree        | <a href="#">nmda-support</a>   |
| Description | When configured to <b>true</b> , this command enables the advertisement of NMDA support over NETCONF through the use of YANG library 1.1.<br>When configured to <b>false</b> , this command disables NMDA advertisement over NETCONF and YANG library 1.0 is used. |
| Default     | false  |
| Introduced  | 21.7.R1  |
| Platforms   | All  |

**nokia-combined-modules** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Support access to combined Nokia YANG models   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">yang-modules</a> <a href="#">nokia-combined-modules</a> <i>boolean</i>  |
| Tree        | <a href="#">nokia-combined-modules</a>   |
| Description | When configured to <b>true</b> , the system supports the combined Nokia YANG files for both configuration and state data in the NETCONF server.<br>When the system is operating in classic configuration mode, attempts to access (read or write) the configuration using the Nokia configuration modules or namespace via NETCONF result in errors, even if this command is set to <b>true</b> .<br>When configured to <b>false</b> , access to the combined Nokia YANG files is not supported.<br>This command and the <b>nokia-submodules</b> command cannot both be set to <b>true</b> at the same time. |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**nokia-submodules** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Support submodule-based packaging of Nokia YANG models  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">yang-modules</a> <a href="#">nokia-submodules</a> <i>boolean</i>                           |
| Tree        | <a href="#">nokia-submodules</a>  |
| Description | When configured to <b>true</b> , the system supports the alternative submodule-based packaging of the Nokia YANG files for both configuration and state data in the NETCONF server. |

When the system is operating in classic configuration mode, attempts to access (read or write) the configuration using the Nokia configuration modules or namespace via NETCONF result in errors, even if this command is set to **true**.

When configured to **false**, access to the submodule-based packaging of the Nokia YANG files is not supported.

This command and the **nokia-combined-modules** command cannot both be set to **true** at the same time.

|            |         |
|------------|---------|
| Introduced | 21.2.R1 |
| Platforms  | All     |

### **openconfig-modules** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Support access to OpenConfig YANG models  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">management-interface</a> <a href="#">yang-modules</a> <a href="#">openconfig-modules</a> <i>boolean</i> |
| Tree        | <a href="#">openconfig-modules</a>  |
| Description | When configured to <b>true</b> , this command allows access to OpenConfig YANG models in all model-driven interfaces.                                       |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **name** *string*

|               |  |
|---------------|--|
| Synopsis      | Administrative name assigned to the system                                 |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">name</a> <i>string</i> |
| Tree          | <a href="#">name</a>   |
| String Length | 1 to 64  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **network-element-discovery**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>network-element-discovery</b> context                                |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> |
| Tree       | <a href="#">network-element-discovery</a>   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**generate-traps** *boolean*

|            |   |
|------------|---|
| Synopsis   | Generate NE discovery traps   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">generate-traps</a> <i>boolean</i> |
| Tree       | <a href="#">generate-traps</a>  |
| Default    | false   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**profile** [[name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>profile</b> list instance  |
| Context        | <b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i> |
| Tree           | <a href="#">profile</a>   |
| Max. Instances | 1   |
| Introduced     | 19.5.R1   |
| Platforms      | All   |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Profile name  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i> |
| Tree          | <a href="#">profile</a>   |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 19.5.R1   |
| Platforms     | All   |

**neid** *string*

|               |  |
|---------------|--|
| Synopsis      | Network element ID of the advertised node  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <a href="#">profile</a> <i>string</i> <a href="#">neid</a> <i>string</i> |
| Tree          | <a href="#">neid</a>   |
| String Length | 7 to 8   |

|            |         |
|------------|---------|
| Introduced | 19.5.R1 |
| Platforms  | All     |

## neip

|            |   |
|------------|---|
| Synopsis   | Enter the <b>neip</b> context   |
| Context    | <b>configure</b> <a href="#">system network-element-discovery profile</a> <i>string</i> <b>neip</b> |
| Tree       | <a href="#">neip</a>  |
| Introduced | 19.5.R1   |
| Platforms  | All   |

## auto-generate

|            |   |
|------------|---|
| Synopsis   | Enter the <b>auto-generate</b> context  |
| Context    | <b>configure</b> <a href="#">system network-element-discovery profile</a> <i>string</i> <b>neip auto-generate</b> |
| Tree       | <a href="#">auto-generate</a>   |
| Introduced | 21.2.R1   |
| Platforms  | All   |

## ipv4

|            |  |
|------------|--|
| Synopsis   | Enable the <b>ipv4</b> context   |
| Context    | <b>configure</b> <a href="#">system network-element-discovery profile</a> <i>string</i> <b>neip auto-generate ipv4</b> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 21.2.R1  |
| Platforms  | All  |

## vendor-id-value *number*

|            |   |
|------------|---|
| Synopsis   | Most significant byte if the NE IPv4 address  |
| Context    | <b>configure</b> <a href="#">system network-element-discovery profile</a> <i>string</i> <b>neip auto-generate ipv4</b><br><a href="#">vendor-id-value</a> <i>number</i> |
| Tree       | <a href="#">vendor-id-value</a>   |
| Range      | 1 to 255  |
| Default    | 140   |
| Introduced | 21.2.R1   |

Platforms All

## ipv6

Synopsis Enable the **ipv6** context

Context **configure** [system network-element-discovery profile](#) *string* [neip auto-generate ipv6](#)

Tree [ipv6](#)

Introduced 21.2.R1

Platforms All

## vendor-id-value *number*

Synopsis Most significant byte of the NE IPv6 address

Context **configure** [system network-element-discovery profile](#) *string* [neip auto-generate ipv6](#)  
[vendor-id-value](#) *number*

Tree [vendor-id-value](#)

Range 1 to 255

Default 140

Introduced 21.2.R1

Platforms All

## ipv4 *string*

Synopsis NEIP IPv4 address

Context **configure** [system network-element-discovery profile](#) *string* [neip ipv4](#) *string*

Tree [ipv4](#)

Introduced 19.5.R1

Platforms All

## ipv6 *string*

Synopsis NEIP IPv6 address

Context **configure** [system network-element-discovery profile](#) *string* [neip ipv6](#) *string*

Tree [ipv6](#)

Introduced 19.5.R1

Platforms All

### **platform-type** *string*

Synopsis Platform name and chassis type to be advertised  
Context **configure** [system](#) [network-element-discovery](#) [profile](#) *string* [platform-type](#) *string*  
Tree [platform-type](#)  
String Length 1 to 255  
Introduced 19.5.R1  
Platforms All

### **system-mac** *string*

Synopsis MAC address of the advertised node  
Context **configure** [system](#) [network-element-discovery](#) [profile](#) *string* [system-mac](#) *string*  
Tree [system-mac](#)  
Introduced 19.5.R1  
Platforms All

### **vendor-id** *string*

Synopsis Vendor ID to be advertised  
Context **configure** [system](#) [network-element-discovery](#) [profile](#) *string* [vendor-id](#) *string*  
Tree [vendor-id](#)  
String Length 1 to 255  
Default Nokia  
Introduced 19.5.R1  
Platforms All

### **ospf-dynamic-hostnames** *boolean*

Synopsis Process received OSPF dynamic hostname information  
Context **configure** [system](#) [ospf-dynamic-hostnames](#) *boolean*  
Tree [ospf-dynamic-hostnames](#)

|             |  |
|-------------|--|
| Description | When configured to <b>true</b> , OSPF dynamic hostnames are enabled. The router receiving the new dynamic hostname within the OSPF Router Information (RI) LSA is instructed to process the received dynamic hostname information.<br>When configured to <b>false</b> , dynamic hostname information is not processed. |
| Default     | false  |
| Introduced  | 20.2.R1  |
| Platforms   | All  |

## **persistence**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>persistence</b> context   |
| Context     | <b>configure</b> <a href="#">system persistence</a>  |
| Tree        | <a href="#">persistence</a>  |
| Description | Commands in this context configure persistence on the system.<br><br>The persistence feature enables the system to retain state information learned through DHCP snooping across reboots. This information includes data such as the IP address and MAC binding information, lease-length information, and ingress SAP information (required for VPLS snooping to identify the ingress interface).<br><br>If persistence is enabled when there are no DHCP relay or snooping commands enabled, the system creates an empty file. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## **ancp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ancp</b> context                            |
| Context    | <b>configure</b> <a href="#">system persistence ancp</a> |
| Tree       | <a href="#">ancp</a>                                     |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **description string**

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">system persistence ancp description string</a> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |

Introduced 16.0.R1  
Platforms All

### **location** *keyword*

Synopsis CPM flash card where the information is stored  
Context **configure** [system](#) [persistence](#) [ancp](#) [location](#) *keyword*  
Tree [location](#)  
Options cf1, cf2, cf3  
Introduced 16.0.R1  
Platforms All

### **application-assurance**

Synopsis Enter the **application-assurance** context  
Context **configure** [system](#) [persistence](#) [application-assurance](#)  
Tree [application-assurance](#)  
Description Commands in this context configure AA persistence on the system.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description

|             |   |
|-------------|---|
| Synopsis    | PTP domain  |
| Context     | <b>configure system ptp domain</b> <i>number</i>  |
| Tree        | <a href="#">domain</a>  |
| Description | <p>This command configures the PTP domain. The default and valid range of the domain depend on the configured PTP profile.</p> <ul style="list-style-type: none"> <li>• IEEE 1588-2008 - domain range of 0 to 255 (default 0)</li> <li>• G.8265.1 - domain range of 0 to 255 (default 4)</li> <li>• G.8275.1 - domain range of 24 to 43 (default 24)</li> <li>• G.8275.2 - domain range of 0 to 255 (default 44)</li> </ul> |
| Range       | 0 to 255  |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**local-priority** *number*

|             |  |
|-------------|--|
| Synopsis    | PTP clock local priority   |
| Context     | <b>configure system ptp local-priority</b> <i>number</i>   |
| Tree        | <a href="#">local-priority</a>   |
| Description | <p>This command configures the local priority used to choose between PTP time Transmitters in the best timeTransmitter clock algorithm (BTCA). This setting applies when the PTP profile is either configured for G.8275.1 or G.8275.2 and is ignored for any other profile.</p> <p>For G.8275.1 or G.8275.2, this command configures the localPriority parameter associated with the local clock (<b>ptp</b> context). See G.8275.1 or G.8275.2 for detailed information.</p> |
| Range       | 1 to 255   |
| Default     | 128  |
| Introduced  | 21.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**log-announce-interval** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Announce message interval in log form   |
| Context     | <b>configure system ptp log-announce-interval</b> <i>number</i>   |
| Tree        | <a href="#">log-announce-interval</a>   |
| Description | <p>This command configures the Announce message interval used for both unicast and multicast messages.</p> <p>For unicast messages, the Announce message interval is requested during unicast negotiation to any peer. This controls the Announce message rate sent from remote peers to the local node. It does not affect the announce message rate that may be sent from the local node to remote peers. Remote peers may request an Announce message rate within the acceptable grant range.</p> <p>For multicast messages used on PTP Ethernet ports, this command specifies the message interval used for Announce messages transmitted by the local node.</p> <p>This value also defines the interval between executions of the BTCA within the node.</p> <p>To minimize BTCA driven reconfigurations, IEEE recommends that the announce interval should be consistent across the entire 1588 network.</p> |
| Range       | -3 to 4   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**network-type** *keyword*

|-------------|---|
| Synopsis    | PTP network type  |
| Context     | <b>configure system ptp network-type</b> <i>keyword</i>   |
| Tree        | <a href="#">network-type</a>  |
| Description | <p>This command configures the codeset to be used for the encoding of QL values into PTP clockClass values and vice versa when the profile is configured for G.8265.1 or G.8275.2.</p> <p>This setting only applies to the range of values observed in the clockClass values transmitted out of the node in Announce messages. The router supports the reception of any valid value in Table 1/G.8265.1 and Table 2/G.8275.2.</p> |
| Options     | sonet, sdh  |
| Default     | sdh   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**port [port-id] reference**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>port</b> list instance  |
| Context     | <b>configure system ptp port reference</b>   |
| Tree        | <b>port</b>  |
| Description | <p>Commands in this context configure PTP over Ethernet on the physical port. The PTP process transmits and receives PTP messages through the port using Ethernet encapsulation (as opposed to UDP/IPv4 encapsulation).</p> <p>Frames are transmitted with no VLAN tags, even if the port is configured for dot1q or qinq modes for encap-type. The received frames from the external PTP clock must also be untagged.</p> <p>Two reserved multicast addresses are allocated for PTP messages (see Annex F IEEE Std 1588-2008). Either address can be configured for the PTP messages sent through the port.</p> <p>A PTP port cannot be created if the PTP profile is configured for G.8265.1.</p> <p>If the port supports 1588 port-based timestamping, Synchronous Ethernet must be enabled on the MDA when PTP over Ethernet is enabled.</p> <p>De-provisioning of the card or MDA containing the specified port is not permitted while the port is configured within PTP.</p> <p>Changing the encapsulation or the port type of the Ethernet port is not permitted when PTP Ethernet Multicast operation is configured on the port.</p> <p>To allocate an Ethernet satellite client port as a PTP port, the Ethernet satellite must first be enabled for the transparent clock function. For more information, see the <b>configure satellite ethernet-satellite ptp-tc</b> command.</p> <p>The SyncE/1588 ports of the CPM and CCMs can be specified as PTP ports. These use the 'A/3' and 'B/3' designation and both must be specified as two PTP ports if both are used. The active CPM sends and receives messages on both ports if they are specified and enabled.</p> |
| Introduced  | 21.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**[port-id] reference**

### **address string**

Synopsis Destination MAC address of the transmitted PTP messages

Context **configure system ptp port reference address string**

Tree [address](#)

Description This command specifies the destination MAC address of the transmitted PTP messages. IEEE Std 1588-2008 Annex F defines two reserved addresses for 1588 messages, which include:

- **01-1B-19-00-00-00** — all except the peer delay mechanism messages
- **01-80-C2-00-00-0E** — peer delay mechanism messages

Both addresses are supported for reception, independent of the address configured by this command.

Default 01:1B:19:00:00:00

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state keyword**

Synopsis Administrative state of the PTP port

Context **configure system ptp port reference admin-state keyword**

Tree [admin-state](#)

Options enable, disable

Default enable

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **alternate-profile reference**

Synopsis Alternate profile for the PTP port

Context **configure system ptp port reference alternate-profile reference**

Tree [alternate-profile](#)

Description This command creates the alternate profile that is used in communications with the port or peer. If no alternate profile is specified, the primary profile is used.

Reference **configure system ptp alternate-profile string**

|            |  |
|------------|--|
| Introduced | 22.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **local-priority** *number*

|             |   |
|-------------|---|
| Synopsis    | PTP port local priority   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">ptp port</a> <i>reference</i> <a href="#">local-priority</a> <i>number</i>  |
| Tree        | <a href="#">local-priority</a>  |
| Description | <p>This command configures the local priority used to choose between PTP time Transmitters in the best timeTransmitter clock algorithm (BTCA). This setting applies when the PTP profile is either configured for G.8275.1 or G.8275.2 and is ignored for any other profile.</p> <p>For G.8275.1 or G.8275.2, this command configures the localPriority parameter associated with the Announce messages received from the external clocks (<b>ptp port</b> context). See G.8275.1 or G.8275.2 for detailed information.</p> |
| Range       | 1 to 255  |
| Default     | 128   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **log-delay-interval** *number*

|             |  |
|-------------|--|
| Synopsis    | Minimum interval for Delay_Req messages in log form  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">ptp port</a> <i>reference</i> <a href="#">log-delay-interval</a> <i>number</i>   |
| Tree        | <a href="#">log-delay-interval</a>   |
| Description | <p>This command configures the minimum interval used for multicast Delay_Req messages for the port. For ports in a slave state, the interval is used, unless the parent port indicates a longer interval. For a port in master state, the interval is advertised to external slave ports as the minimum acceptable interval for Delay_Req messages from the slave ports.</p> <p>The router supports the 1588 standard requirement for a port in slave state to check the logMessageInterval field of received multicast Delay_Resp messages. If the value of the logMessageInterval field of the messages is greater than the value configured locally for the generation of Delay_Req messages, the slave must use the longer interval for the generation of Delay_Req messages.</p> <p>The interval value is specified as the logarithm to the base 2.</p> |
| Range       | -6 to 0  |
| Introduced  | 21.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

| Context     | <b>configure system ptp ptsf</b>   |
| Tree        | <a href="#">ptsf</a>   |
| Description | Commands in this context configure the attributes of Packet Timing Signal Fail (PTSF). |
| Introduced  | 21.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                           |

## monitor-ptsf-unusable

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>monitor-ptsf-unusable</b> context   |
| Context     | <b>configure system ptp ptsf monitor-ptsf-unusable</b>   |
| Tree        | <a href="#">monitor-ptsf-unusable</a>  |
| Description | <p>Commands in this context configure monitoring of neighbor clocks for the PTSF-unusable state (condition) when the profile is set to g8275dot1-2014.</p> <p>When administratively enabled, the local clock monitors the noise level of PTP event messages between external neighbor PTP ports and the local clock. If it detects a high variation in the network path between the external neighbor port and the local port, it considers the neighbor port unusable. Announce messages from the neighbor are discarded and excluded from the BTCA and the port cannot be selected as the parent clock. The unusable condition must be manually cleared.</p> <p>When administratively disabled, the monitor PTSF function of the PTP clock clears PTSF-unusable states from all neighbor PTP ports. If no PTP messages are received from a neighbor for 15 minutes, the neighbor information is purged and the PTSF-unusable state is cleared.</p> |
| Introduced  | 21.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## admin-state *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of PTSF unusable monitoring                                  |
| Context  | <b>configure system ptp ptsf monitor-ptsf-unusable admin-state <i>keyword</i></b> |
| Tree     | <a href="#">admin-state</a>   |

| Tree       | <a href="#">router</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 21.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                     |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of PTP on the router instance  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <a href="#">router</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **peer** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|          |                                     |
|----------|-------------------------------------|
| Synopsis | Enter the <b>peer</b> list instance |
|----------|-------------------------------------|

|             |   |
|-------------|---|
| Context     | <b>configure system ptp router</b> <i>string peer</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree        | <a href="#">peer</a>  |
| Description | Commands in this context configure a remote PTP peer.   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|             |   |
|-------------|---|
| Synopsis    | IP address of the remote PTP peer   |
| Context     | <b>configure system ptp router</b> <i>string peer</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )               |
| Tree        | <a href="#">peer</a>  |
| Description | This command specifies the IP address of the remote PTP peer.<br>In the current release, the system supports PTP using IPv4 only. |
| Notes       | This element is part of a list key.   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the PTP peer  |
| Context    | <b>configure system ptp router</b> <i>string peer</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )<br><a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **local-priority** *number*

|             |  |
|-------------|--|
| Synopsis    | PTP peer local priority  |
| Context     | <b>configure system ptp router</b> <i>string peer</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )<br><a href="#">local-priority</a> <i>number</i>    |
| Tree        | <a href="#">local-priority</a>   |
| Description | This command configures the local priority for the peer, which is used to choose between PTP timeTransmitters in the best timeTransmitter clock algorithm (BTCA). This |

setting applies when the PTP profile is configured for G.8265.1, G.8275.1, or G.8275.2 and is ignored for any other profile.

For G.8265.1, this command configures the priority used to choose between time Transmitter clocks with the same quality (see G.8265.1 for more details).

For G.8275.1 or G.8275.2, this command configures the localPriority parameter associated with the Announce messages received from the external clocks (**ptp router peer** context). See G.8275.1 or G.8275.2 for detailed information.

|            |  |
|------------|--|
| Range      | 1 to 255   |
| Default    | 128  |
| Introduced | 21.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### log-sync-interval *number*

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | PTP peer interval for Sync messages in log form  |
| Context     | <b>configure system ptp router</b> <i>string peer (ipv4-address-no-zone   ipv6-address-no-zone) log-sync-interval number</i>   |
| Tree        | <a href="#">log-sync-interval</a>  |
| Description | This command configures the message interval used for Sync and Delay_Resp messages that are requested during unicast negotiation to the peer. The setting controls messages sent from remote peers to the local node but the packet rate from the local node to remote peers is not affected. Remote peers may request a packet rate within the acceptable range.<br><br>The interval value is specified as the logarithm to the base 2. |
| Range       | -6 to 0  |
| Introduced  | 21.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### peer-limit *number*

|             |   |
|-------------|---|
| Synopsis    | Number of discovered peers allowed for routing instance   |
| Context     | <b>configure system ptp router</b> <i>string peer-limit number</i>  |
| Tree        | <a href="#">peer-limit</a>  |
| Description | This command specifies the maximum number of discovered peers permitted within the routing instance. This ensures that a routing instance does not consume all the possible |

discovered peers and prevents the routing instance from blocking discovered peers in other routing instances.

The sum of all peer limit values for all routing instances cannot exceed the maximum number of discovered peers supported by the system.

|            |  |
|------------|--|
| Range      | 0 to 512   |
| Introduced | 21.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **tx-while-sync-uncertain** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Send Announce messages while clock is unsynchronized   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">ptp</a> <b>tx-while-sync-uncertain</b> <i>boolean</i>  |
| Tree        | <a href="#">tx-while-sync-uncertain</a>  |
| Description | <p>When configured to <b>true</b>, the local PTP clock transmits Announce messages to downstream clocks to indicate it has not yet stabilized on the recovered synchronization source (upstream clocks or GM clock). While the PTP clock is unsynchronized, the Sync Uncertain state is true.</p> <p>When configured to <b>false</b>, the local PTP clock does not send Announce messages to downstream clocks to indicate it is not synchronized to a valid timing source. If the Sync Uncertain state of the clock is true while this command is configured to <b>false</b>, unicast negotiation grant requests are not granted and current grants are canceled.</p> |
| Default     | true   |
| Introduced  | 22.2.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **script-control**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>script-control</b> context                                |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">script-control</a> |
| Tree       | <a href="#">script-control</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **script** [[script-name](#)] *string* **owner** *string*

|          |  |
|----------|--|
| Synopsis | Enter the <b>script</b> list instance  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">script-control</a> <a href="#">script</a> <i>string</i> <b>owner</b> <i>string</i> |
| Tree     | <a href="#">script</a>   |

|                |         |
|----------------|---------|
| Max. Instances | 1500    |
| Introduced     | 16.0.R1 |
| Platforms      | All     |

**[script-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Script name   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">script-control</a> <a href="#">script</a> <i>string</i> <a href="#">owner</a> <i>string</i> |

|------------|--|
| Synopsis   | gNOI System SwitchControlProcessor RPC authorization   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-system-switchcontrolprocessor</a> <i>keyword</i> |
| Tree       | <a href="#">gnoi-system-switchcontrolprocessor</a>   |
| Options    | permit, deny   |
| Default    | deny   |
| Introduced | 20.5.R1  |
| Platforms  | All  |

### **gnoi-system-time** *keyword*

|            |  |
|------------|--|
| Synopsis   | gNOI System Time RPC authorization   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">gnoi-system-time</a> <i>keyword</i> |
| Tree       | <a href="#">gnoi-system-time</a>   |
| Options    | permit, deny   |
| Default    | permit   |
| Introduced | 21.7.R1  |

Platforms All

### **gnoi-system-traceroute** *keyword*

Synopsis gNOI System Traceroute RPC authorization

Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [grpc](#) [rpc-authorization](#) [gnoi-system-traceroute](#) *keyword*

Tree [gnoi-system-traceroute](#)

Options permit, deny

Default permit

Introduced 21.7.R1

Platforms All

### **md-cli-session** *keyword*

Synopsis gNOI MdCli Session RPC authorization

Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [grpc](#) [rpc-authorization](#) [md-cli-session](#) *keyword*

Tree [md-cli-session](#)

Options permit, deny

Default permit

Introduced 20.5.R1

Platforms All

### **rib-api-getversion** *keyword*

Synopsis RibApi GetVersion RPC authorization

Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [grpc](#) [rpc-authorization](#) [rib-api-getversion](#) *keyword*

Tree [rib-api-getversion](#)

Options permit, deny

Default permit

Introduced 16.0.R4

Platforms All

**rib-api-modify** *keyword*

|            |  |
|------------|--|
| Synopsis   | RibApi Modify RPC authorization  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">grpc</a> <a href="#">rpc-authorization</a> <a href="#">rib-api-modify</a> <i>keyword</i> |
| Tree       | <a href="#">rib-api-modify</a>   |
| Options    | permit, deny   |
| Default    | permit   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**li** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow lawful intercept profile ID   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">li</a> <i>boolean</i> |
| Tree       | <a href="#">li</a>  |
| Default    | false   |
| Introduced | 19.10.R1  |
| Platforms  | All   |

**netconf**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>netconf</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> |
| Tree       | <a href="#">netconf</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**base-op-authorization**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>base-op-authorization</b> context   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a>                                    |
| Tree        | <a href="#">base-op-authorization</a>  |
| Description | <p>Commands in this context configure the permission to use NETCONF operations at the base operation level for the specified profile.</p> <p>The NETCONF operations are authorized by default in the built-in system-generated administrative profile.</p> |

Introduced 16.0.R1  
Platforms All

### **action** *boolean*

Synopsis Allow NETCONF action operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#) [action](#) *boolean*  
Tree [action](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **cancel-commit** *boolean*

Synopsis Allow NETCONF cancel-commit operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#) [cancel-commit](#) *boolean*  
Tree [cancel-commit](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **close-session** *boolean*

Synopsis Allow NETCONF close-session operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#) [close-session](#) *boolean*  
Tree [close-session](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **commit** *boolean*

Synopsis Allow NETCONF commit operation

|            |  |
|------------|--|
| Context    | <b>configure system security aaa local-profiles profile</b> <i>string</i> <b>netconf base-op-authorization</b><br><b>commit</b> <i>boolean</i> |
| Tree       | <b>commit</b>  |
| Default    | false  |
| Introduced | 21.7.R1  |
| Platforms  | All  |

**copy-config** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow NETCONF copy-config operation   |
| Context    | <b>configure system security aaa local-profiles profile</b> <i>string</i> <b>netconf base-op-authorization</b><br><b>copy-config</b> <i>boolean</i> |
| Tree       | <b>copy-config</b>  |
| Default    | false   |
| Introduced | 21.7.R1   |
| Platforms  | All   |

**create-subscription** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow NETCONF create-subscription operation  |
| Context     | <b>configure system security aaa local-profiles profile</b> <i>string</i> <b>netconf base-op-authorization</b><br><b>create-subscription</b> <i>boolean</i>  |
| Tree        | <b>create-subscription</b>   |
| Description | <p>When configured to <b>true</b>, this command enables the NETCONF create-subscription operation in the default profile.</p> <p>The <b>base-op-authorization create-subscription</b> configuration is not pre-emptive, which means that it is checked only at the time of the initial subscription. Configuration changes to <b>base-op-authorization</b> do not cancel any in-progress subscriptions and operators who successfully subscribed continue to receive messages.</p> <p>When configured to <b>false</b>, this command disables the NETCONF create-subscription operation in the default profile.</p> <p>The operation is enabled by default in the built-in system-generated administrative profile.</p> |
| Default     | false  |
| Introduced  | 21.7.R1  |
| Platforms   | All  |

**delete-config** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow NETCONF delete-config operation   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a><br><a href="#">delete-config</a> <i>boolean</i> |
| Tree       | <a href="#">delete-config</a>   |
| Default    | false   |
| Introduced | 21.7.R1   |
| Platforms  | All   |

**discard-changes** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow NETCONF discard-changes operation   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a><br><a href="#">discard-changes</a> <i>boolean</i> |
| Tree       | <a href="#">discard-changes</a>   |
| Default    | false   |
| Introduced | 21.7.R1   |
| Platforms  | All   |

**edit-config** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow NETCONF edit-config operation   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a><br><a href="#">edit-config</a> <i>boolean</i> |
| Tree       | <a href="#">edit-config</a>   |
| Default    | false   |
| Introduced | 21.7.R1   |
| Platforms  | All   |

**get** *boolean*

|          |   |
|----------|---|
| Synopsis | Allow NETCONF get operation   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a><br><a href="#">get</a> <i>boolean</i> |
| Tree     | <a href="#">get</a>   |
| Default  | false   |

Introduced 21.7.R1  
Platforms All

### **get-config** *boolean*

Synopsis Allow NETCONF get-config operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#)  
[get-config](#) *boolean*  
Tree [get-config](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **get-data** *boolean*

Synopsis Allow NETCONF get-data operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#)  
[get-data](#) *boolean*  
Tree [get-data](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **get-schema** *boolean*

Synopsis Allow NETCONF get-schema operation  
Context **configure** [system](#) [security](#) [aaa](#) [local-profiles](#) [profile](#) *string* [netconf](#) [base-op-authorization](#)  
[get-schema](#) *boolean*  
Tree [get-schema](#)  
Default false  
Introduced 21.7.R1  
Platforms All

### **kill-session** *boolean*

Synopsis Allow NETCONF kill-session operation

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a> <a href="#">kill-session</a> <i>boolean</i> |
| Tree       | <a href="#">kill-session</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**lock** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow NETCONF lock and unlock operations  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a> <a href="#">lock</a> <i>boolean</i> |
| Tree       | <a href="#">lock</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**validate** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow NETCONF validate operation  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">netconf</a> <a href="#">base-op-authorization</a> <a href="#">validate</a> <i>boolean</i> |
| Tree       | <a href="#">validate</a>  |
| Default    | false   |
| Introduced | 21.7.R1   |
| Platforms  | All   |

**ssh-max-sessions** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of concurrent SSH sessions  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i> <a href="#">ssh-max-sessions</a> <i>number</i> |
| Tree       | <a href="#">ssh-max-sessions</a>   |
| Range      | 0 to 50  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**telnet-max-sessions** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of concurrent Telnet sessions   |
| Context    | <b>configure</b> <a href="#">system security aaa local-profiles profile</a> <i>string</i> <b>telnet-max-sessions</b> <i>number</i> |
| Tree       | <a href="#">telnet-max-sessions</a>  |
| Range      | 0 to 50  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**management-interface**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>management-interface</b> context                             |
| Context    | <b>configure</b> <a href="#">system security aaa management-interface</a> |
| Tree       | <a href="#">management-interface</a>                                      |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**md-cli**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>md-cli</b> context  |
| Context    | <b>configure</b> <a href="#">system security aaa management-interface md-cli</a> |
| Tree       | <a href="#">md-cli</a>   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**command-accounting-during-load** *boolean*

|            |  |
|------------|--|
| Synopsis   | Perform file command accounting for load or rollback   |
| Context    | <b>configure</b> <a href="#">system security aaa management-interface md-cli command-accounting-during-load</a> <i>boolean</i> |
| Tree       | <a href="#">command-accounting-during-load</a>   |
| Default    | true   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## output-authorization

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>output-authorization</b> context   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">management-interface</a> <a href="#">output-authorization</a>  |
| Tree        | <a href="#">output-authorization</a>  |
| Description | <p>Commands in this context configure output authorization for model-driven interfaces and telemetry.</p> <p>When output authorization is performed, commands that display configuration or state output must authorize every element in the output. If a remote AAA server is configured, there may be delays in displaying output while the output is authorized. The remote AAA server may receive a large volume of authorization requests when substantial output displays are needed, such as for system configuration details.</p> <p>Input to edit the configuration is always authorized, and is not affected by commands in this context.</p> |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

## md-interfaces *boolean*

|             |   |
|-------------|---|
| Synopsis    | Authorize output in model-driven interfaces   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">management-interface</a> <a href="#">output-authorization</a> <a href="#">md-interfaces</a> <i>boolean</i>   |
| Tree        | <a href="#">md-interfaces</a>   |
| Description | <p>When configured to <b>true</b>, output is authorized for the following:</p> <ul style="list-style-type: none"> <li>• MD-CLI <b>info</b> and <b>compare</b> commands</li> <li>• MD-CLI command completion of list key values</li> <li>• NETCONF &lt;get&gt; and &lt;get-config&gt; RPC</li> <li>• gRPC/gNMI Get RPCs</li> </ul> |
| Default     | true  |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

## telemetry-data *boolean*

|          |  |
|----------|--|
| Synopsis | Authorize telemetry data in gNMI Subscribe RPC response  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">management-interface</a> <a href="#">output-authorization</a> <a href="#">telemetry-data</a> <i>boolean</i> |
| Tree     | <a href="#">telemetry-data</a>   |

---

|            |          |
|------------|----------|
| Default    | false    |
| Introduced | 20.10.R1 |
| Platforms  | All      |

### **remote-servers**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>remote-servers</b> context                             |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers</a> |
| Tree       | <a href="#">remote-servers</a>                                      |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ldap**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ldap</b> context  |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers ldap</a> |
| Tree       | <a href="#">ldap</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the LDAP operation protocol   |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers ldap admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **public-key-authentication** *boolean*

|          |   |
|----------|---|
| Synopsis | Allow SSH public key authentication from LDAP server  |
| Context  | <b>configure</b> <a href="#">system security aaa remote-servers ldap public-key-authentication</a> <i>boolean</i> |
| Tree     | <a href="#">public-key-authentication</a>   |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **route-preference** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Route preference to reach the AAA server  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">ldap</a> <b>route-preference</b> <i>keyword</i>   |
| Tree        | <a href="#">route-preference</a>  |
| Description | This command specifies the routing preference to reach the AAA server. If the configured option is to use both in-band and out-of-band routes, the out-of-band routes in the Base routing instance are used to reach the server before the in-band routes in the management routing instance. |
| Options     | both, inband, outband   |
| Default     | both  |
| Introduced  | 21.5.R1   |
| Platforms   | All   |

### **server** [[index](#)] *number*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>server</b> list instance  |
| Context        | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">ldap</a> <b>server</b> <i>number</i> |
| Tree           | <a href="#">server</a>   |
| Max. Instances | 5  |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **[index]** *number*

|            |  |
|------------|--|
| Synopsis   | LDAP server ID   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">ldap</a> <b>server</b> <i>number</i> |
| Tree       | <a href="#">server</a>   |

## tls-profile *reference*

Synopsis TLS client profile used to encrypt the LDAP connection

Context **configure** [system](#) [security](#) [aaa](#) [remote-servers](#) [ldap](#) [server](#) *number* [tls-profile](#) *reference*

Tree [tls-profile](#)

Reference **configure** [system](#) [security](#) [tls](#) [client-tls-profile](#) *string*

---

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **server-retry** *number*

|            |   |
|------------|---|
| Synopsis   | Number of attempts to retry contacting the LDAP server  |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers ldap server-retry</a> <i>number</i> |
| Tree       | <a href="#">server-retry</a>  |
| Range      | 1 to 10   |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **server-timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Timeout for a response from the LDAP server   |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers ldap server-timeout</a> <i>number</i> |
| Tree       | <a href="#">server-timeout</a>  |
| Range      | 1 to 90   |
| Units      | seconds   |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **use-default-template** *boolean*

|            |  |
|------------|--|
| Synopsis   | Apply the default template to LDAP   |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers ldap use-default-template</a> <i>boolean</i> |
| Tree       | <a href="#">use-default-template</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## radius

|            |  |
|------------|--|
| Synopsis   | Enter the <b>radius</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> |
| Tree       | <a href="#">radius</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## access-algorithm *keyword*

|            |  |
|------------|--|
| Synopsis   | Algorithm used to access the set of RADIUS servers   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">access-algorithm</a> <i>keyword</i> |
| Tree       | <a href="#">access-algorithm</a>   |
| Options    | direct, round-robin  |
| Default    | direct   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## accounting *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable RADIUS command accounting   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">accounting</a> <i>boolean</i> |
| Tree       | <a href="#">accounting</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## accounting-port *number*

|            |  |
|------------|--|
| Synopsis   | Port number on RADIUS server for accounting requests   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">accounting-port</a> <i>number</i> |
| Tree       | <a href="#">accounting-port</a>  |
| Range      | 1 to 65535   |
| Default    | 1813   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the authentication server  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**authorization** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable RADIUS authorization  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <b>authorization</b> <i>boolean</i> |
| Tree       | <a href="#">authorization</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**interactive-authentication** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable RADIUS interactive authentication  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <b>interactive-authentication</b> <i>boolean</i> |
| Tree       | <a href="#">interactive-authentication</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**port** *number*

|          |  |
|----------|--|
| Synopsis | UDP port number on which to contact RADIUS server  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <b>port</b> <i>number</i> |
| Tree     | <a href="#">port</a>   |
| Range    | 1 to 65535   |
| Default  | 1812   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **route-preference** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Route preference to reach the AAA server  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <b>route-preference</b> <i>keyword</i>   |
| Tree        | <a href="#">route-preference</a>  |
| Description | This command specifies the routing preference to reach the AAA server. If the configured option is to use both in-band and out-of-band routes, the out-of-band routes in the Base routing instance are used to reach the server before the in-band routes in the management routing instance. |
| Options     | both, inband, outband   |
| Default     | both  |
| Introduced  | 21.5.R1   |
| Platforms   | All   |

### **server** [[index](#)] *number*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>server</b> list instance   |
| Context        | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">server</a> <i>number</i> |
| Tree           | <a href="#">server</a>  |
| Max. Instances | 5   |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

### **[index]** *number*

|            |   |
|------------|---|
| Synopsis   | RADIUS server ID  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">server</a> <i>number</i> |
| Tree       | <a href="#">server</a>  |
| Range      | 1 to 5  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |   |
|------------|---|
| Synopsis   | IP address of the RADIUS server   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">server</a> <i>number</i> <a href="#">address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">address</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**authenticator** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Authenticator hash algorithm for the RADIUS server   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">server</a> <i>number</i> <a href="#">authenticator</a> <i>keyword</i> |
| Tree        | <a href="#">authenticator</a>  |
| Description | This command specifies the hash algorithm used to authenticate RADIUS Access-Request, Access-Accept, Access-Reject, Access-Challenge, Accounting-Request, and Accounting-Response packets.                                   |
| Options     | md5, sm3   |
| Default     | md5  |
| Introduced  | 22.10.R1   |
| Platforms   | All  |

**secret** *string*

|               |  |
|---------------|--|
| Synopsis      | Secret key to access the RADIUS server   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">radius</a> <a href="#">server</a> <i>number</i> <a href="#">secret</a> <i>string</i> |
| Tree          | <a href="#">secret</a>   |
| String Length | 1 to 115   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**tls-client-profile** *reference*

|          |  |
|----------|--|
| Synopsis | TLS client profile for the RADIUS server |
|----------|--|

|             |  |
|-------------|--|
| Context     | <b>configure system security aaa remote-servers radius server <i>number</i> tls-client-profile <i>reference</i></b>                      |
| Tree        | <a href="#">tls-client-profile</a>   |
| Description | This command specifies the TLS client profile used to encrypt RADIUS communication. When configured, RADIUS messages are sent using TLS. |
| Reference   | <b>configure system security tls client-tls-profile <i>string</i></b>  |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

### **server-retry *number***

|            |   |
|------------|---|
| Synopsis   | Number of attempts to retry contacting RADIUS server                                  |
| Context    | <b>configure system security aaa remote-servers radius server-retry <i>number</i></b> |
| Tree       | <a href="#">server-retry</a>  |
| Range      | 1 to 10   |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **server-timeout *number***

|            |   |
|------------|---|
| Synopsis   | Time to wait for a response from the RADIUS server                                      |
| Context    | <b>configure system security aaa remote-servers radius server-timeout <i>number</i></b> |
| Tree       | <a href="#">server-timeout</a>  |
| Range      | 1 to 90   |
| Units      | seconds   |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **use-default-template *boolean***

|          |  |
|----------|--|
| Synopsis | Apply the RADIUS default user template to RADIUS user  |
| Context  | <b>configure system security aaa remote-servers radius use-default-template <i>boolean</i></b> |
| Tree     | <a href="#">use-default-template</a>   |

---

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## **tacplus**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>tacplus</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> |
| Tree       | <a href="#">tacplus</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **accounting**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>accounting</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">accounting</a> |
| Tree       | <a href="#">accounting</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **record-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Type of accounting record packet sent to TACACS+ server   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">accounting</a> <a href="#">record-type</a> <i>keyword</i> |
| Tree       | <a href="#">record-type</a>   |
| Options    | start-stop, stop-only   |
| Default    | stop-only   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **admin-control**

|          |   |
|----------|---|
| Synopsis | Enter the <b>admin-control</b> context  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">admin-control</a> |
| Tree     | <a href="#">admin-control</a>   |

Introduced 16.0.R1  
Platforms All

### **tacplus-map-to-priv-lvl** *number*

Synopsis Interactive authentication from node to TACACS+ server  
Context **configure** [system security aaa remote-servers tacplus admin-control tacplus-map-to-priv-lvl number](#)  
Tree [tacplus-map-to-priv-lvl](#)  
Range 0 to 15  
Introduced 16.0.R1  
Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the TACACS+ protocol  
Context **configure** [system security aaa remote-servers tacplus admin-state keyword](#)  
Tree [admin-state](#)  
Options enable, disable  
Default enable  
Introduced 16.0.R1  
Platforms All

### **authorization**

Synopsis Enable the **authorization** context  
Context **configure** [system security aaa remote-servers tacplus authorization](#)  
Tree [authorization](#)  
Introduced 16.0.R1  
Platforms All

### **request-format**

Synopsis Enter the **request-format** context  
Context **configure** [system security aaa remote-servers tacplus authorization request-format](#)  
Tree [request-format](#)

|             |  |
|-------------|--|
| Description | Commands in this context configure access operations that are sent to the TACACS+ server during authorization. |
| Introduced  | 21.10.R3   |
| Platforms   | All  |

### **access-operation-cmd** *keyword*

|                |   |
|----------------|---|
| Synopsis       | Access operations sent in authorization requests  |
| Context        | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">authorization</a> <a href="#">request-format</a> <b>access-operation-cmd</b> <i>keyword</i>   |
| Tree           | <a href="#">access-operation-cmd</a>  |
| Description    | This command sends an operation argument in authorization requests.<br><br>In model-driven interfaces, this command configures the system to send the operation in the cmd argument, and the path in the cmd-args argument, in TACACS+ authorization requests. This command does not apply to authorization requests in classic interfaces. |
| Options        | delete  |
| Max. Instances | 1   |
| Introduced     | 21.10.R3  |
| Platforms      | All   |

### **use-priv-lvl** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow privilege level mapping  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">authorization</a> <b>use-priv-lvl</b> <i>boolean</i>   |
| Tree        | <a href="#">use-priv-lvl</a>   |
| Description | When configured to <b>true</b> , this command automatically performs a single authorization request to the TACACS+ server for cmd* (all commands) immediately after login, and then uses the local profile associated (via the <b>priv-lvl-map</b> ) with the priv-lvl returned by the TACACS+ server for all subsequent authorization (except <b>enable-admin</b> ). After the initial authorization for cmd*, no further authorization requests are sent to the TACACS+ server (except <b>enable-admin</b> ).<br><br>When configured to <b>false</b> , each command is sent to the TACACS+ server for authorization (this is true regardless of whether the <b>tacplus use-default-template</b> setting is enabled). |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**interactive-authentication** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allows TACACS+ interactive authentication   |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers tacplus interactive-authentication</a> <i>boolean</i> |
| Tree       | <a href="#">interactive-authentication</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**priv-lvl-map**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priv-lvl-map</b> context  |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers tacplus priv-lvl-map</a> |
| Tree       | <a href="#">priv-lvl-map</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**priv-lvl** [[level](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>priv-lvl</b> list instance   |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers tacplus priv-lvl-map priv-lvl</a> <i>number</i> |
| Tree       | <a href="#">priv-lvl</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[level]** *number*

|            |   |
|------------|---|
| Synopsis   | Privilege level for the mapping   |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers tacplus priv-lvl-map priv-lvl</a> <i>number</i> |
| Tree       | <a href="#">priv-lvl</a>  |
| Range      | 0 to 15   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**user-profile-name** *reference*

|            |  |
|------------|--|
| Synopsis   | User profile for the mapping   |
| Context    | <b>configure</b> <a href="#">system security aaa remote-servers tacplus priv-lvl-map priv-lvl</a> <i>number</i> <a href="#">user-profile-name</a> <i>reference</i> |
| Tree       | <a href="#">user-profile-name</a>  |
| Reference  | <b>configure</b> <a href="#">system security aaa local-profiles profile</a> <i>string</i>  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**route-preference** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Route preference to reach the AAA server  |
| Context     | <b>configure</b> <a href="#">system security aaa remote-servers tacplus</a> <a href="#">route-preference</a> <i>keyword</i>   |
| Tree        | <a href="#">route-preference</a>  |
| Description | This command specifies the routing preference to reach the AAA server. If the configured option is to use both in-band and out-of-band routes, the out-of-band routes in the Base routing instance are used to reach the server before the in-band routes in the management routing instance. |
| Options     | both, inband, outband   |
| Default     | both  |
| Introduced  | 21.5.R1   |
| Platforms   | All   |

**server** [[index](#)] *number*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>server</b> list instance  |

| Tree           | <a href="#">server</a>   |
| Max. Instances | 5  |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

**[index] number**

|            |  |
|------------|--|
| Synopsis   | TACACS+ server ID  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">server</a> <i>number</i> |
| Tree       | <a href="#">server</a>   |
| Range      | 1 to 5   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | IP address of the TACACS+ server   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">server</a> <i>number</i> <a href="#">address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">address</a>  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**port number**

|            |   |
|------------|---|
| Synopsis   | TCP port ID on which to contact TACACS+ server  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">server</a> <i>number</i> <a href="#">port</a> <i>number</i> |
| Tree       | <a href="#">port</a>  |
| Range      | 0   1 to 65535  |
| Default    | 49  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**secret string**

|               |   |
|---------------|---|
| Synopsis      | Secret key to access the TACACS+ server   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">server</a> <i>number</i> <a href="#">secret</a> <i>string</i> |
| Tree          | <a href="#">secret</a>  |
| String Length | 1 to 199  |

|            |                            |
|------------|----------------------------|
| Notes      | This element is mandatory. |
| Introduced | 16.0.R1                    |
| Platforms  | All                        |

### **server-timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Time to wait for a response from the TACACS+ server   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <b>server-timeout</b> <i>number</i> |
| Tree       | <a href="#">server-timeout</a>  |
| Range      | 1 to 90   |
| Units      | seconds   |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **use-default-template** *boolean*

|            |  |
|------------|--|
| Synopsis   | Apply TACACS+ default user-template to TACACS+ user  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <b>use-default-template</b> <i>boolean</i> |
| Tree       | <a href="#">use-default-template</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **vprn-server**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>vprn-server</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">remote-servers</a> <b>vprn-server</b> |
| Tree       | <a href="#">vprn-server</a>  |
| Introduced | 22.2.R1  |
| Platforms  | All  |

### **inband** *reference*

|          |   |
|----------|---|
| Synopsis | VPRN service used for AAA by in-band sessions |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure system security aaa remote-servers vprn-server inband</b> <i>reference</i>   |
| Tree        | <a href="#">inband</a>  |
| Description | This command configures TACACS+ or RADIUS servers in a VPRN to be used for AAA by that VPRN and by sessions in the Base routing instance. |
| Reference   | <b>configure service vprn</b> <i>string</i>   |
| Introduced  | 22.2.R1   |
| Platforms   | All   |

### **outband** *reference*

|             |  |
|-------------|--|
| Synopsis    | VPRN service used for AAA by out-of-band sessions  |
| Context     | <b>configure system security aaa remote-servers vprn-server outband</b> <i>reference</i>   |
| Tree        | <a href="#">outband</a>  |
| Description | This command configures TACACS+ and RADIUS servers in a VPRN to be used for AAA by that VPRN and by sessions on the console or out-of-band (OOB) Ethernet ports. |
| Reference   | <b>configure service vprn</b> <i>string</i>  |
| Introduced  | 22.2.R1  |
| Platforms   | All  |

### **vprn** *reference*

|             |   |
|-------------|---|
| Synopsis    | VPRN used for AAA in VPRNs without a AAA server   |
| Context     | <b>configure system security aaa remote-servers vprn-server vprn</b> <i>reference</i>   |
| Tree        | <a href="#">vprn</a>  |
| Description | This command configures TACACS+ or RADIUS servers in a VPRN to be used for AAA by that VPRN and by sessions in VPRNs without a AAA server configured. |
| Reference   | <b>configure service vprn</b> <i>string</i>   |
| Introduced  | 22.2.R1   |
| Platforms   | All   |

### **user-template** [[user-template-name](#)] *keyword*

|          |   |
|----------|---|
| Synopsis | Enter the <b>user-template</b> list instance                      |
| Context  | <b>configure system security aaa user-template</b> <i>keyword</i> |
| Tree     | <a href="#">user-template</a>                                     |

Introduced 16.0.R1  
Platforms All

### **[user-template-name]** *keyword*

Synopsis Default user template applied to the system user  
Context **configure** [system](#) [security](#) [aaa](#) [user-template](#) *keyword*  
Tree [user-template](#)  
Options ldap-default, radius-default, tacplus-default  
Notes This element is part of a list key.  
Introduced 16.0.R1  
Platforms All

### **access**

Synopsis Enter the **access** context  
Context **configure** [system](#) [security](#) [aaa](#) [user-template](#) *keyword* **access**  
Tree [access](#)  
Introduced 16.0.R1  
Platforms All

### **console** *boolean*

Synopsis Allow console access (serial port or Telnet)  
Context **configure** [system](#) [security](#) [aaa](#) [user-template](#) *keyword* **access** [console](#) *boolean*  
Tree [console](#)  
Default true  
Introduced 16.0.R1  
Platforms All

### **ftp** *boolean*

Synopsis Allow FTP access  
Context **configure** [system](#) [security](#) [aaa](#) [user-template](#) *keyword* **access** [ftp](#) *boolean*  
Tree [ftp](#)

---

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **grpc** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow gRPC access  |
| Context    | <b>configure</b> <a href="#">system security aaa user-template</a> <i>keyword</i> <a href="#">access grpc</a> <i>boolean</i> |
| Tree       | <a href="#">grpc</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **li** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow access to lawful intercept   |
| Context    | <b>configure</b> <a href="#">system security aaa user-template</a> <i>keyword</i> <a href="#">access li</a> <i>boolean</i> |
| Tree       | <a href="#">li</a>   |
| Default    | false  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

### **netconf** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow NETCONF session access  |
| Context    | <b>configure</b> <a href="#">system security aaa user-template</a> <i>keyword</i> <a href="#">access netconf</a> <i>boolean</i> |
| Tree       | <a href="#">netconf</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **console**

|          |   |
|----------|---|
| Synopsis | Enter the <b>console</b> context  |
| Context  | <b>configure</b> <a href="#">system security aaa user-template</a> <i>keyword</i> <a href="#">console</a> |

|            |                         |
|------------|-------------------------|
| Tree       | <a href="#">console</a> |
| Introduced | 16.0.R1                 |
| Platforms  | All                     |

### **login-exec** *string*

|               |  |
|---------------|--|
| Synopsis      | File to execute for a successful user login via console  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">user-template</a> <i>keyword</i> <a href="#">console</a> <a href="#">login-exec</a> <i>string</i> |
| Tree          | <a href="#">login-exec</a>   |
| String Length | 1 to 200   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **home-directory** (*sat-url* | *cflash-without-slot-url*)

|               |  |
|---------------|--|
| Synopsis      | User local home directory based on the template  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">user-template</a> <i>keyword</i> <a href="#">home-directory</a> ( <i>sat-url</i>   <i>cflash-without-slot-url</i> ) |
| Tree          | <a href="#">home-directory</a>   |
| String Length | 1 to 200   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **profile** *string*

|               |   |
|---------------|---|
| Synopsis      | User profile based on the template  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">user-template</a> <i>keyword</i> <a href="#">profile</a> <i>string</i> |
| Tree          | <a href="#">profile</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **restricted-to-home** *boolean*

|          |   |
|----------|---|
| Synopsis | Restrict file access to the home directory of the user  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">user-template</a> <i>keyword</i> <a href="#">restricted-to-home</a> <i>boolean</i> |

---

|            |                                    |
|------------|------------------------------------|
| Tree       | <a href="#">restricted-to-home</a> |
| Default    | false                              |
| Introduced | 16.0.R1                            |
| Platforms  | All                                |

### **save-when-restricted** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Save configurations when the user is restricted to home  |
| Context     | <b>configure</b> <a href="#">system security aaa user-template</a> <i>keyword</i> <a href="#">save-when-restricted</a> <i>boolean</i>  |
| Tree        | <a href="#">save-when-restricted</a>   |
| Description | When configured to <b>true</b> , the system permits all configuration save operations (such as <b>admin save</b> ) via any management interface (such as CLI and NETCONF) even if <b>restricted-to-home</b> is set to <b>true</b> . The home directory does not need to be configured. |
| Default     | false  |
| Introduced  | 22.10.R1   |
| Platforms   | All  |

### **cli-script**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cli-script</b> context                         |
| Context    | <b>configure</b> <a href="#">system security cli-script</a> |
| Tree       | <a href="#">cli-script</a>                                  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **authorization**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>authorization</b> context                                    |
| Context    | <b>configure</b> <a href="#">system security cli-script authorization</a> |
| Tree       | <a href="#">authorization</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **cron**

|          |                               |
|----------|-------------------------------|
| Synopsis | Enter the <b>cron</b> context |
|----------|-------------------------------|

|             |  |
|-------------|--|
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cli-script</a> <a href="#">authorization</a> <a href="#">cron</a> |
| Tree        | <a href="#">cron</a>   |
| Description | Commands in this context configure authorization for the cron job scheduler.   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **cli-user** *reference*

|            |  |
|------------|--|
| Synopsis   | User profile name for CLI command script authorization   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cli-script</a> <a href="#">authorization</a> <a href="#">cron</a> <a href="#">cli-user</a> <i>reference</i> |
| Tree       | <a href="#">cli-user</a>   |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i>                               |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **event-handler**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>event-handler</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cli-script</a> <a href="#">authorization</a> <a href="#">event-handler</a>   |
| Tree        | <a href="#">event-handler</a>   |
| Description | Commands in this context configure authorization for the Event Handling System (EHS). EHS allows user-controlled programmatic exception handling by allowing a CLI script to be executed upon the detection of a log event. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **cli-user** *reference*

|            |   |
|------------|---|
| Synopsis   | User profile name for CLI command script authorization  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cli-script</a> <a href="#">authorization</a> <a href="#">event-handler</a> <a href="#">cli-user</a> <i>reference</i> |
| Tree       | <a href="#">cli-user</a>  |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **vsd**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>vsd</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cli-script</a> <a href="#">authorization</a> <a href="#">vsd</a> |
| Tree        | <a href="#">vsd</a>   |
| Description | Commands in this context configure authorization for the VSD server.  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## **cli-user** *reference*

|            |   |
|------------|---|
| Synopsis   | User profile name for CLI command script authorization  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cli-script</a> <a href="#">authorization</a> <a href="#">vsd</a> <a href="#">cli-user</a> <i>reference</i> |
| Tree       | <a href="#">cli-user</a>  |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i>                              |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **cpm-filter**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cpm-filter</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> |
| Tree       | <a href="#">cpm-filter</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                |

## **default-action** *keyword*

|            |   |
|------------|---|
| Synopsis   | Action for packets that do not match any filter entries   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">default-action</a> <i>keyword</i> |
| Tree       | <a href="#">default-action</a>  |
| Options    | drop, accept  |
| Default    | accept  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## ip-filter

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ip-filter</b> context                                    |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter</a> |
| Tree       | <a href="#">ip-filter</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS          |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the CPM filter   |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                     |

## entry [[entry-id](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>entry</b> list instance  |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number</i> |
| Tree       | <a href="#">entry</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                              |

## [[entry-id](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Filter entry ID   |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number</i> |
| Tree       | <a href="#">entry</a>   |
| Range      | 1 to 131072   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                              |

## action

|            |   |
|------------|---|
| Synopsis   | Enter the <b>action</b> context   |
| Context    | <b>configure system security cpm-filter ip-filter entry</b> <i>number</i> <b>action</b> |
| Tree       | <b>action</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                            |

## accept

|            |   |
|------------|---|
| Synopsis   | Forward matching packets  |
| Context    | <b>configure system security cpm-filter ip-filter entry</b> <i>number</i> <b>action accept</b>                |
| Tree       | <b>accept</b>   |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## default

|            |   |
|------------|---|
| Synopsis   | Use default action for matching packets   |
| Context    | <b>configure system security cpm-filter ip-filter entry</b> <i>number</i> <b>action default</b>               |
| Tree       | <b>default</b>  |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## drop

|            |   |
|------------|---|
| Synopsis   | Drop matching packets   |
| Context    | <b>configure system security cpm-filter ip-filter entry</b> <i>number</i> <b>action drop</b>                  |
| Tree       | <b>drop</b>   |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### queue reference

|            |  |
|------------|--|
| Synopsis   | Forward matching packets to the CPM hardware queue   |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number</i> <a href="#">action queue reference</a> |
| Tree       | <a href="#">queue</a>  |
| Reference  | <b>configure</b> <a href="#">system security cpm-queue queue</a> <i>number</i>   |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .                    |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### description string

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number</i> <a href="#">description string</a> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### log reference

|            |   |
|------------|---|
| Synopsis   | Log ID where matching packets are entered   |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number</i> <a href="#">log reference</a> |
| Tree       | <a href="#">log</a>   |
| Reference  | <b>configure</b> <a href="#">filter log</a> <i>number</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### match

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>match</b> context  |
| Context     | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number</i> <a href="#">match</a>   |
| Tree        | <a href="#">match</a>   |
| Description | Commands in this context specify match criteria for the entry. When the match criteria have been satisfied, the action associated with the entry is executed. |

If more than one match criterion is configured, all criteria must be met before the action associated with the entry is executed.

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **dscp keyword**

|            |   |
|------------|---|
| Synopsis   | DSCP used as the match criterion on the packet  |
| Context    | <b>configure system security cpm-filter ip-filter entry number match dscp keyword</b>   |
| Tree       | <a href="#">dscp</a>  |
| Options    | be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63 |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **dst-ip**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dst-ip</b> context   |
| Context    | <b>configure system security cpm-filter ip-filter entry number match dst-ip</b> |
| Tree       | <a href="#">dst-ip</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                    |

### **address (ipv4-address | ipv4-prefix-with-host-bits)**

|            |   |
|------------|---|
| Synopsis   | IPv4 address used as the match criterion  |
| Context    | <b>configure system security cpm-filter ip-filter entry number match dst-ip address (ipv4-address   ipv4-prefix-with-host-bits)</b> |
| Tree       | <a href="#">address</a>   |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .                          |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**ip-prefix-list** *reference*

|            |  |
|------------|--|
| Synopsis   | IPv4 address prefix list used as match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a> <a href="#">ip-prefix-list</a> <i>reference</i> |
| Tree       | <a href="#">ip-prefix-list</a>   |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ip-prefix-list</a> <i>string</i>  |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**mask** *string*

|            |   |
|------------|---|
| Synopsis   | IPv4 address mask used as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a> <a href="#">mask</a> <i>string</i> |
| Tree       | <a href="#">mask</a>  |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**dst-port**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dst-port</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> |
| Tree       | <a href="#">dst-port</a>   |
| Notes      | The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**eq** *number*

|          |   |
|----------|---|
| Synopsis | Port number as the match criterion  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">eq</a> <i>number</i> |
| Tree     | <a href="#">eq</a>  |
| Range    | 0 to 65535  |
| Notes    | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .  |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **mask** *number*

|            |  |
|------------|--|
| Synopsis   | Port mask as the match criterion   |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number match dst-port mask number</i> |
| Tree       | <a href="#">mask</a>   |
| Range      | 1 to 65535   |
| Default    | 65535  |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .     |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **port-list** *reference*

|            |  |
|------------|--|
| Synopsis   | Port list as the match criterion   |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number match dst-port port-list reference</i> |
| Tree       | <a href="#">port-list</a>  |
| Reference  | <b>configure</b> <a href="#">filter match-list port-list string</a>  |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .             |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **range**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>range</b> context  |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number match dst-port range</i>   |
| Tree       | <a href="#">range</a>  |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**end number**

|            |  |
|------------|--|
| Synopsis   | Upper bound of the port number to match  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> <a href="#">end</a> <i>number</i> |
| Tree       | <a href="#">end</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**start number**

|            |  |
|------------|--|
| Synopsis   | Lower bound of the port number to match  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> <a href="#">start</a> <i>number</i> |
| Tree       | <a href="#">start</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**fragment keyword**

|             |  |
|-------------|--|
| Synopsis    | Match criterion based on presence of fragmented packets  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">fragment</a> <i>keyword</i>  |
| Tree        | <a href="#">fragment</a>   |
| Description | <p>This command specifies the match criterion based on the existence or absence of fragmented IP packets.</p> <p>Matching on fragmented IPv4 packets occurs when all packets have either the MF (more fragment) bit set or have the Fragment Offset field of the IP header set to a non-zero value. For IPv6, the existence of the IPv6 Fragmentation Extension Header results in a fragmented packet match.</p> <p>Matching on non-fragmented IPv4 packets occurs when all packets have the MF bit set to zero and the Fragment Offset field is also set to zero. For IPv6, the absence of an IPv6 Fragmentation Extension Header results in a non-fragmented packet match.</p> |
| Options     | false, true  |
| Introduced  | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## icmp

Synopsis Enter the **icmp** context

Context **configure** [system security cpm-filter ip-filter entry](#) *number match icmp*

Tree [icmp](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## code number

Synopsis ICMP code to match

Context **configure** [system security cpm-filter ip-filter entry](#) *number match icmp code number*

Tree [code](#)

Range 0 to 255

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## type number

Synopsis ICMP type to match

Context **configure** [system security cpm-filter ip-filter entry](#) *number match icmp type number*

Tree [type](#)

Range 0 to 255

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ip-option

Synopsis Enable the **ip-option** context

Context **configure** [system security cpm-filter ip-filter entry](#) *number match ip-option*

Tree [ip-option](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mask** *number*

|            |   |
|------------|---|
| Synopsis   | Range of option numbers for the mask match criterion  |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number match ip-option mask number</i> |
| Tree       | <a href="#">mask</a>  |
| Range      | 1 to 255  |
| Default    | 255   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **type** *number*

|            |   |
|------------|---|
| Synopsis   | Specific IP option to match   |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number match ip-option type number</i> |
| Tree       | <a href="#">type</a>  |
| Range      | 0 to 255  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **multiple-option** *boolean*

|            |   |
|------------|---|
| Synopsis   | Match on packets containing multiple option fields  |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number match multiple-option boolean</i> |
| Tree       | <a href="#">multiple-option</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **option-present** *boolean*

|            |  |
|------------|--|
| Synopsis   | Match on packets with option field present   |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number match option-present boolean</i> |
| Tree       | <a href="#">option-present</a>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## port

Synopsis Enter the **port** context

Context **configure system security cpm-filter ip-filter entry number match port**

Tree [port](#)

Notes The following elements are part of a choice: **port** or (**dst-port** and **src-port**).

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## eq number

Synopsis Port number as the match criterion

Context **configure system security cpm-filter ip-filter entry number match port eq number**

Tree [eq](#)

Range 0 to 65535

Notes The following elements are part of a choice: (**eq** and **mask**), **port-list**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## mask number

Synopsis Port mask as the match criterion

Context **configure system security cpm-filter ip-filter entry number match port mask number**

Tree [mask](#)

Range 1 to 65535

Default 65535

Notes The following elements are part of a choice: (**eq** and **mask**), **port-list**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## port-list reference

Synopsis Port list as the match criterion

|            |  |
|------------|--|
| Context    | <b>configure system security cpm-filter ip-filter entry</b> <i>number match port port-list reference</i>         |
| Tree       | <a href="#">port-list</a>  |
| Reference  | <b>configure filter match-list port-list</b> <i>string</i>   |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **ip-prefix-list** *reference*

|            |  |
|------------|--|
| Synopsis   | IP4 address prefix list used as match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">ip-prefix-list</a> <i>reference</i> |
| Tree       | <a href="#">ip-prefix-list</a>   |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ip-prefix-list</a> <i>string</i>  |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **mask** *string*

|            |   |
|------------|---|
| Synopsis   | IPv4 address mask used as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">mask</a> <i>string</i> |
| Tree       | <a href="#">mask</a>  |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **src-port**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>src-port</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> |
| Tree       | <a href="#">src-port</a>   |
| Notes      | The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**eq number**

|            |   |
|------------|---|
| Synopsis   | Port number as the match criterion  |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number</i> <a href="#">match src-port eq</a> <i>number</i> |
| Tree       | <a href="#">eq</a>  |
| Range      | 0 to 65535  |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .                          |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**mask number**

|            |   |
|------------|---|
| Synopsis   | Port mask as the match criterion  |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number</i> <a href="#">match src-port mask</a> <i>number</i> |
| Tree       | <a href="#">mask</a>  |
| Range      | 1 to 65535  |
| Default    | 65535   |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .                            |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**port-list reference**

|            |  |
|------------|--|
| Synopsis   | Port list as the match criterion   |
| Context    | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number</i> <a href="#">match src-port port-list reference</a> |
| Tree       | <a href="#">port-list</a>  |
| Reference  | <b>configure</b> <a href="#">filter match-list port-list</a> <i>string</i>   |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .                             |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**range**

|          |  |
|----------|--|
| Synopsis | Enable the <b>range</b> context  |
| Context  | <b>configure</b> <a href="#">system security cpm-filter ip-filter entry</a> <i>number</i> <a href="#">match src-port range</a> |

|            |  |
|------------|--|
| Tree       | <a href="#">range</a>  |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **end number**

|            |  |
|------------|--|
| Synopsis   | Upper bound of the port number to match  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a> <a href="#">end</a> <i>number</i> |
| Tree       | <a href="#">end</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **start number**

|            |  |
|------------|--|
| Synopsis   | Lower bound of the port number to match  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a> <a href="#">start</a> <i>number</i> |
| Tree       | <a href="#">start</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **tcp-flags**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>tcp-flags</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a> |
| Tree       | <a href="#">tcp-flags</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**ack *boolean***

|            |  |
|------------|--|
| Synopsis   | ACK bit in TCP header control bits as match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a> <a href="#">ack</a> <i>boolean</i> |
| Tree       | <a href="#">ack</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**syn *boolean***

|            |  |
|------------|--|
| Synopsis   | SYN bit in TCP header control bits as match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">tcp-flags</a> <a href="#">syn</a> <i>boolean</i> |
| Tree       | <a href="#">syn</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ipv6-filter**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv6-filter</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> |
| Tree       | <a href="#">ipv6-filter</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**admin-state *keyword***

|            |  |
|------------|--|
| Synopsis   | Administrative state of the CPM filter   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**entry** [*entry-id*] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>entry</b> list instance  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> |
| Tree       | <a href="#">entry</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**[entry-id]** *number*

|            |   |
|------------|---|
| Synopsis   | Filter entry ID   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> |
| Tree       | <a href="#">entry</a>   |
| Range      | 1 to 131072   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**action**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>action</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> |
| Tree       | <a href="#">action</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**accept**

|            |   |
|------------|---|
| Synopsis   | Forward matching packets  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">accept</a> |
| Tree       | <a href="#">accept</a>  |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**default**

|            |  |
|------------|--|
| Synopsis   | Use default action for matching packets  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">default</a> |
| Tree       | <a href="#">default</a>  |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**drop**

|            |   |
|------------|---|
| Synopsis   | Drop matching packets   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">drop</a> |
| Tree       | <a href="#">drop</a>  |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**queue reference**

|            |  |
|------------|--|
| Synopsis   | Forward matching packets to the CPM hardware queue   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">queue</a> <a href="#">reference</a> |
| Tree       | <a href="#">queue</a>  |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-queue</a> <a href="#">queue</a> <i>number</i>   |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**description string**

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">description</a> <a href="#">string</a> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### log reference

Synopsis Log ID where matching packets are entered

Context **configure system security cpm-filter ipv6-filter entry number log reference**

Tree [log](#)

Reference **configure filter log number**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### match

Synopsis Enter the **match** context

Context **configure system security cpm-filter ipv6-filter entry number match**

Tree [match](#)

Description Commands in this context specify match criteria for the entry. When the match criteria have been satisfied, the action associated with the entry is executed.

If more than one match criterion is configured, all criteria must be met before the action associated with the entry is executed.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### dscp keyword

Synopsis DSCP used as the match criterion on the packet

Context **configure system security cpm-filter ipv6-filter entry number match dscp keyword**

Tree [dscp](#)

Options be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## dst-ip

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dst-ip</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-ip</b> |
| Tree       | <a href="#">dst-ip</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## address (*ipv6-address* | *ipv6-prefix-with-host-bits*)

|            |  |
|------------|--|
| Synopsis   | IPv6 address used as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-ip</b> <b>address</b> ( <i>ipv6-address</i>   <i>ipv6-prefix-with-host-bits</i> ) |
| Tree       | <a href="#">address</a>  |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## ipv6-prefix-list *reference*

|            |  |
|------------|--|
| Synopsis   | IPv6 address prefix list used as match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-ip</b> <b>ipv6-prefix-list</b> <i>reference</i> |
| Tree       | <a href="#">ipv6-prefix-list</a>   |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <b>ipv6-prefix-list</b> <i>string</i>   |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## mask *string*

|            |   |
|------------|---|
| Synopsis   | IPv6 address mask used as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-ip</b> <b>mask</b> <i>string</i> |
| Tree       | <a href="#">mask</a>  |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## **dst-port**

Synopsis Enter the **dst-port** context

Context **configure** [system security cpm-filter ipv6-filter entry](#) *number* [match dst-port](#)

Tree [dst-port](#)

Notes The following elements are part of a choice: **port** or (**dst-port** and **src-port**).

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## **eq number**

Synopsis Port number as the match criterion

Context **configure** [system security cpm-filter ipv6-filter entry](#) *number* [match dst-port eq](#) *number*

Tree [eq](#)

Range 0 to 65535

Notes The following elements are part of a choice: (**eq** and **mask**), **port-list**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## **mask number**

Synopsis Port mask as the match criterion

Context **configure** [system security cpm-filter ipv6-filter entry](#) *number* [match dst-port mask](#) *number*

Tree [mask](#)

Range 1 to 65535

Default 65535

Notes The following elements are part of a choice: (**eq** and **mask**), **port-list**, or **range**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**port-list** *reference*

|            |  |
|------------|--|
| Synopsis   | Port list as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">port-list</a> <a href="#">reference</a> |
| Tree       | <a href="#">port-list</a>  |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i>   |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**range**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>range</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> |
| Tree       | <a href="#">range</a>  |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**end** *number*

|            |   |
|------------|---|
| Synopsis   | Upper bound of the port number to match   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> <a href="#">end</a> <a href="#">number</a> |
| Tree       | <a href="#">end</a>   |
| Range      | 0 to 65535  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**start** *number*

|          |   |
|----------|---|
| Synopsis | Lower bound of the port number to match   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">range</a> <a href="#">start</a> <a href="#">number</a> |

|            |  |
|------------|--|
| Tree       | <a href="#">start</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.                                   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## extension-header

|            |  |
|------------|--|
| Synopsis   | Enter the <b>extension-header</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">extension-header</a> |
| Tree       | <a href="#">extension-header</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## hop-by-hop *boolean*

|             |  |
|-------------|--|
| Synopsis    | Match on existence of Hop-By-Hop Options Header  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">extension-header</a> <a href="#">hop-by-hop</a> <i>boolean</i> |
| Tree        | <a href="#">hop-by-hop</a>   |
| Description | When configured to <b>true</b> , a match occurs when the Hop-by-Hop Options Extension Header is present.<br>When configured to <b>false</b> , a match occurs when the Hop-by-Hop Options Extension Header is not present.                                    |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## flow-label *number*

|            |  |
|------------|--|
| Synopsis   | Flow label in the IPv6 header as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">flow-label</a> <i>number</i> |
| Tree       | <a href="#">flow-label</a>   |
| Range      | 0 to 1048575   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**fragment keyword**

|             |  |
|-------------|--|
| Synopsis    | Match criterion based on presence of fragmented packets  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>fragment</b> <i>keyword</i>   |
| Tree        | <a href="#">fragment</a>   |
| Description | <p>This command specifies the match criterion based on the existence or absence of fragmented IP packets.</p> <p>Matching on fragmented IPv4 packets occurs when all packets have either the MF (more fragment) bit set or have the Fragment Offset field of the IP header set to a non-zero value. For IPv6, the existence of the IPv6 Fragmentation Extension Header results in a fragmented packet match.</p> <p>Matching on non-fragmented IPv4 packets occurs when all packets have the MF bit set to zero and the Fragment Offset field is also set to zero. For IPv6, the absence of an IPv6 Fragmentation Extension Header results in a non-fragmented packet match.</p> |
| Options     | false, true  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**icmp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>icmp</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>icmp</b> |
| Tree       | <a href="#">icmp</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**code number**

|            |   |
|------------|---|
| Synopsis   | ICMP code as the match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>icmp</b> <i>code</i> <i>number</i> |
| Tree       | <a href="#">code</a>  |
| Range      | 0 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**type number**

|            |   |
|------------|---|
| Synopsis   | ICMP type as the match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">icmp</a> <a href="#">type</a> <i>number</i> |
| Tree       | <a href="#">type</a>  |
| Range      | 0 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**next-header (number | keyword)**

|            |  |
|------------|--|
| Synopsis   | IP protocol to match   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">next-header</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">next-header</a>  |
| Range      | 0 to 255   |
| Options    | tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp            |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**port**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>port</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> |
| Tree       | <a href="#">port</a>   |
| Notes      | The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**eq number**

|          |   |
|----------|---|
| Synopsis | Port number as the match criterion  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">eq</a> <i>number</i> |
| Tree     | <a href="#">eq</a>  |
| Range    | 0 to 65535  |

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **mask number**

|            |   |
|------------|---|
| Synopsis   | Port mask as the match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">mask</a> <i>number</i> |
| Tree       | <a href="#">mask</a>  |
| Range      | 1 to 65535  |
| Default    | 65535   |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **port-list reference**

|            |  |
|------------|--|
| Synopsis   | Port list as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">port-list</a> <a href="#">reference</a> |
| Tree       | <a href="#">port-list</a>  |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i>   |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **range**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>range</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">range</a> |
| Tree       | <a href="#">range</a>  |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**end number**

|            |  |
|------------|--|
| Synopsis   | Upper bound of the port number to match  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">range</a> <a href="#">end</a> <i>number</i> |
| Tree       | <a href="#">end</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**start number**

|            |  |
|------------|--|
| Synopsis   | Lower bound of the port number to match  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">port</a> <a href="#">range</a> <a href="#">start</a> <i>number</i> |
| Tree       | <a href="#">start</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**router-instance string**

|               |   |
|---------------|---|
| Synopsis      | Router instance as the match criteria   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">router-instance</a> <i>string</i> |
| Tree          | <a href="#">router-instance</a>   |
| String Length | 1 to 64   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**src-ip**

|          |  |
|----------|--|
| Synopsis | Enter the <b>src-ip</b> context  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> |

|            |  |
|------------|--|
| Tree       | <a href="#">src-ip</a>                                       |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **address** (*ipv6-address* | *ipv6-prefix-with-host-bits*)

|            |  |
|------------|--|
| Synopsis   | IPv6 address used as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">address</a> ( <i>ipv6-address</i>   <i>ipv6-prefix-with-host-bits</i> ) |
| Tree       | <a href="#">address</a>  |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **ipv6-prefix-list** *reference*

|            |  |
|------------|--|
| Synopsis   | IPv6 address prefix list used as match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">ipv6-prefix-list</a> <i>reference</i> |
| Tree       | <a href="#">ipv6-prefix-list</a>   |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ipv6-prefix-list</a> <i>string</i>  |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **mask** *string*

|            |   |
|------------|---|
| Synopsis   | IPv6 address mask used as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a> <a href="#">mask</a> <i>string</i> |
| Tree       | <a href="#">mask</a>  |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## src-port

|            |  |
|------------|--|
| Synopsis   | Enter the <b>src-port</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> |
| Tree       | <a href="#">src-port</a>   |
| Notes      | The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## eq *number*

|            |   |
|------------|---|
| Synopsis   | Port number as the match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">eq</a> <i>number</i> |
| Tree       | <a href="#">eq</a>  |
| Range      | 0 to 65535  |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## mask *number*

|            |   |
|------------|---|
| Synopsis   | Port mask as the match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">mask</a> <i>number</i> |
| Tree       | <a href="#">mask</a>  |
| Range      | 1 to 65535  |
| Default    | 65535   |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## port-list *reference*

|          |  |
|----------|--|
| Synopsis | Port list as the match criterion   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">port-list</a> <a href="#">reference</a> |

|            |  |
|------------|--|
| Tree       | <a href="#">port-list</a>  |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i>       |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## range

|            |  |
|------------|--|
| Synopsis   | Enable the <b>range</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a> |
| Tree       | <a href="#">range</a>  |
| Notes      | The following elements are part of a choice: ( <b>eq</b> and <b>mask</b> ), <b>port-list</b> , or <b>range</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## end number

|            |  |
|------------|--|
| Synopsis   | Upper bound of the port number to match  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a> <a href="#">end</a> <i>number</i> |
| Tree       | <a href="#">end</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## start number

|            |  |
|------------|--|
| Synopsis   | Lower bound of the port number to match  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a> <a href="#">start</a> <i>number</i> |
| Tree       | <a href="#">start</a>  |
| Range      | 0 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## tcp-flags

Synopsis Enter the **tcp-flags** context  
Context **configure system security cpm-filter ipv6-filter entry number match tcp-flags**  
Tree [tcp-flags](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ack boolean

Synopsis ACK bit in TCP header control bits as match criterion  
Context **configure system security cpm-filter ipv6-filter entry number match tcp-flags ack boolean**  
Tree [ack](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## syn boolean

Synopsis SYN bit in TCP header control bits as match criterion  
Context **configure system security cpm-filter ipv6-filter entry number match tcp-flags syn boolean**  
Tree [syn](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## mac-filter

Synopsis Enter the **mac-filter** context  
Context **configure system security cpm-filter mac-filter**  
Tree [mac-filter](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the CPM filter   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**entry** [[entry-id](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>entry</b> list instance  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <b>entry</b> <i>number</i> |
| Tree       | <a href="#">entry</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**[entry-id]** *number*

|            |   |
|------------|---|
| Synopsis   | Filter entry ID   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <b>entry</b> <i>number</i> |
| Tree       | <a href="#">entry</a>   |
| Range      | 1 to 131072   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**action**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>action</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <b>entry</b> <i>number</i> <b>action</b> |
| Tree       | <a href="#">action</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## accept

|            |  |
|------------|--|
| Synopsis   | Forward matching packets   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">accept</a> |
| Tree       | <a href="#">accept</a>   |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## default

|            |   |
|------------|---|
| Synopsis   | Use default action for matching packets   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">default</a> |
| Tree       | <a href="#">default</a>   |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## drop

|            |  |
|------------|--|
| Synopsis   | Drop matching packets  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">drop</a> |
| Tree       | <a href="#">drop</a>   |
| Notes      | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## queue reference

|           |  |
|-----------|--|
| Synopsis  | Forward matching packets to the CPM hardware queue   |
| Context   | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">queue</a> <i>reference</i> |
| Tree      | <a href="#">queue</a>  |
| Reference | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-queue</a> <a href="#">queue</a> <i>number</i>   |
| Notes     | The following elements are part of a choice: <b>accept</b> , <b>default</b> , <b>drop</b> , or <b>queue</b> .  |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **log** *reference*

|            |   |
|------------|---|
| Synopsis   | Log ID where matching packets are entered   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">log</a> <i>reference</i> |
| Tree       | <a href="#">log</a>   |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **match**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>match</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a>  |
| Tree        | <a href="#">match</a>   |
| Description | <p>Commands in this context specify match criteria for the entry. When the match criteria have been satisfied, the action associated with the entry is executed.</p> <p>If more than one match criterion is configured, all criteria must be met before the action associated with the entry is executed.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **cfm-opcode**

|          |                                     |
|----------|-------------------------------------|
| Synopsis | Enter the <b>cfm-opcode</b> context |
|----------|-------------------------------------|

|             |   |
|-------------|---|
| Context     | <b>configure system security cpm-filter mac-filter entry</b> <i>number match cfm-opcode</i> |
| Tree        | <a href="#">cfm-opcode</a>  |
| Description | Commands in this context specify match criteria based on the CFM opcode.                    |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                |

### **eq** *number*

|            |   |
|------------|---|
| Synopsis   | Equal to comparison operator for the CFM opcode   |
| Context    | <b>configure system security cpm-filter mac-filter entry</b> <i>number match cfm-opcode eq number</i> |
| Tree       | <a href="#">eq</a>  |
| Range      | 0 to 255  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .    |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **gt** *number*

|            |   |
|------------|---|
| Synopsis   | Greater than comparison operator for the CFM opcode   |
| Context    | <b>configure system security cpm-filter mac-filter entry</b> <i>number match cfm-opcode gt number</i> |
| Tree       | <a href="#">gt</a>  |
| Range      | 0 to 254  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .    |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **lt** *number*

|          |   |
|----------|---|
| Synopsis | Less than comparison operator for the CFM opcode  |
| Context  | <b>configure system security cpm-filter mac-filter entry</b> <i>number match cfm-opcode lt number</i> |
| Tree     | <a href="#">lt</a>  |
| Range    | 1 to 255  |

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                       |

## range

|            |  |
|------------|--|
| Synopsis   | Enable the <b>range</b> context  |
| Context    | <b>configure system security cpm-filter mac-filter entry number match cfm-opcode range</b>         |
| Tree       | <b>range</b>   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                       |

## end number

|            |   |
|------------|---|
| Synopsis   | Upper bound of the Opcode range to match  |
| Context    | <b>configure system security cpm-filter mac-filter entry number match cfm-opcode range end number</b> |
| Tree       | <b>end</b>  |
| Range      | 1 to 255  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## start number

|            |   |
|------------|---|
| Synopsis   | Lower bound of the OpCode range to match  |
| Context    | <b>configure system security cpm-filter mac-filter entry number match cfm-opcode range start number</b> |
| Tree       | <b>start</b>  |
| Range      | 0 to 254  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**dst-mac**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>dst-mac</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-mac</a> |
| Tree       | <a href="#">dst-mac</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**address string**

|            |   |
|------------|---|
| Synopsis   | MAC address used as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-mac</a> <a href="#">address</a> <a href="#">string</a> |
| Tree       | <a href="#">address</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**mask string**

|            |  |
|------------|--|
| Synopsis   | MAC address mask as the match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-mac</a> <a href="#">mask</a> <a href="#">string</a> |
| Tree       | <a href="#">mask</a>   |
| Default    | ff:ff:ff:ff:ff   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**etype string**

|               |   |
|---------------|---|
| Synopsis      | Ethernet type as the match criterion  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">etype</a> <a href="#">string</a>     |
| Tree          | <a href="#">etype</a>   |
| Description   | This command specifies an Ethernet type II Ethertype value to be used as a MAC filter match criterion.<br><br>The Ethernet type field is used by the Ethernet version-II frames and does not apply to IEEE 802.3 Ethernet frames. |
| String Length | 5 to 6  |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **frame-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | MAC frame type as the match criterion  |
| Context    | <b>configure</b> <a href="#">system security cpm-filter mac-filter entry number match frame-type keyword</a> |
| Tree       | <a href="#">frame-type</a>   |
| Options    | 802dot2-llc, ethernet-ii   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **llc-dsap**

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>llc-dsap</b> context  |
| Context     | <b>configure</b> <a href="#">system security cpm-filter mac-filter entry number match llc-dsap</a>    |
| Tree        | <a href="#">llc-dsap</a>  |
| Description | Commands in this context specify match criteria based on the Destination Service Access Point (DSAP). |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **dsap** *number*

|            |  |
|------------|--|
| Synopsis   | 8-bit DSAP as the match criterion  |
| Context    | <b>configure</b> <a href="#">system security cpm-filter mac-filter entry number match llc-dsap dsap number</a> |
| Tree       | <a href="#">dsap</a>   |
| Range      | 0 to 255   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **mask** *number*

|          |  |
|----------|--|
| Synopsis | Mask for DSAP value as the match criterion |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">system security cpm-filter mac-filter entry</a> <i>number</i> <a href="#">match llc-dsap mask</a><br><i>number</i> |
| Tree       | <a href="#">mask</a>  |
| Range      | 1 to 255  |
| Default    | 255   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## llc-ssap

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>llc-ssap</b> context  |
| Context     | <b>configure</b> <a href="#">system security cpm-filter mac-filter entry</a> <i>number</i> <a href="#">match llc-ssap</a> |
| Tree        | <a href="#">llc-ssap</a>  |
| Description | Commands in this context specify match criteria based on the Source Service Access Point (SSAP).                          |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## mask *number*

|            |   |
|------------|---|
| Synopsis   | Mask for SSAP value as the match criterion  |
| Context    | <b>configure</b> <a href="#">system security cpm-filter mac-filter entry</a> <i>number</i> <a href="#">match llc-ssap mask</a><br><i>number</i> |
| Tree       | <a href="#">mask</a>  |
| Range      | 1 to 255  |
| Default    | 255   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## ssap *number*

|          |   |
|----------|---|
| Synopsis | 8-bit SSAP as the match criterion   |
| Context  | <b>configure</b> <a href="#">system security cpm-filter mac-filter entry</a> <i>number</i> <a href="#">match llc-ssap ssap</a><br><i>number</i> |
| Tree     | <a href="#">ssap</a>  |
| Range    | 0 to 255  |

---

|            |  |
|------------|--|
| Notes      | This element is mandatory.                                   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **service reference**

|            |   |
|------------|---|
| Synopsis   | Service ID used as the match condition  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">service</a> <i>reference</i> |
| Tree       | <a href="#">service</a>   |
| Reference  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **src-mac**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>src-mac</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-mac</a> |
| Tree       | <a href="#">src-mac</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **address string**

|            |  |
|------------|--|
| Synopsis   | MAC address used as the match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-mac</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **mask string**

|          |   |
|----------|---|
| Synopsis | MAC address mask as the match criterion   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-mac</a> <a href="#">mask</a> <i>string</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">mask</a>   |
| Default    | ff:ff:ff:ff:ff:ff  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## cpm-queue

|            |  |
|------------|--|
| Synopsis   | Enter the <b>cpm-queue</b> context                           |
| Context    | <b>configure</b> <a href="#">system security cpm-queue</a>   |
| Tree       | <a href="#">cpm-queue</a>                                    |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## queue [[queue-id](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>queue</b> list instance   |
| Context    | <b>configure</b> <a href="#">system security cpm-queue queue</a> <i>number</i> |
| Tree       | <a href="#">queue</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                   |

## [[queue-id](#)] *number*

|            |  |
|------------|--|
| Synopsis   | CPM queue ID   |
| Context    | <b>configure</b> <a href="#">system security cpm-queue queue</a> <i>number</i> |
| Tree       | <a href="#">queue</a>  |
| Range      | 33 to 2000   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                   |

## **cbs** *number*

|          |   |
|----------|---|
| Synopsis | Buffer size that can be drawn from queue buffer pool  |
| Context  | <b>configure</b> <a href="#">system security cpm-queue queue</a> <i>number</i> <b>cbs</b> <i>number</i> |

|             |   |
|-------------|---|
| Tree        | <a href="#">cbs</a>   |
| Description | This command specifies the amount of buffer that can be drawn from the reserved buffer portion of the buffer pool of the queue. |
| Range       | 0 to 131072   |
| Units       | kilobps   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **mbs** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum queue depth to which the queue can grow   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-queue</a> <a href="#">queue</a> <i>number</i> <b>mbs</b> <i>number</i> |
| Tree       | <a href="#">mbs</a>   |
| Range      | 0 to 131072   |
| Units      | kilobps   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **rate**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rate</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-queue</a> <a href="#">queue</a> <i>number</i> <b>rate</b> |
| Tree       | <a href="#">rate</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **cir** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | Amount of bandwidth committed to the queue  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-queue</a> <a href="#">queue</a> <i>number</i> <a href="#">rate</a> <b>cir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">cir</a>   |
| Range    | 0 to 100000000  |
| Units    | kilobps   |
| Options  | max   |
| Default  | max   |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **pir** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Peak Information Rate for the queue   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpm-queue</a> <a href="#">queue</a> <i>number</i> <a href="#">rate</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>   |
| Range      | 1 to 100000000  |
| Units      | kilobps   |
| Options    | max   |
| Default    | max   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **cpu-protection**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>cpu-protection</b> context   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpu-protection</a> |
| Tree        | <a href="#">cpu-protection</a>  |
| Description | Commands in this context configure CPU protection policies.                                     |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS                                   |

### **ip-src-monitoring**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ip-src-monitoring</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">cpu-protection</a> <a href="#">ip-src-monitoring</a> |
| Tree       | <a href="#">ip-src-monitoring</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

### **included-protocols**

|          |   |
|----------|---|
| Synopsis | Enter the <b>included-protocols</b> context |
|----------|---|

---

|             |  |
|-------------|--|
| Context     | <b>configure system security cpu-protection ip-src-monitoring included-protocols</b>   |
| Tree        | <a href="#">included-protocols</a>   |
| Description | Commands in this context specify the protocols included in IP source monitoring. The protocol packets will be subject to the per-source-rate of CPU protection policies.<br>This configuration applies system wide and applies to CPU protection globally. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

### **dhcp boolean**

|            |   |
|------------|---|
| Synopsis   | Include extracted DHCP packets for IP source monitoring   |
| Context    | <b>configure system security cpu-protection ip-src-monitoring included-protocols dhcp boolean</b> |
| Tree       | <a href="#">dhcp</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS                                     |

### **gtp boolean**

|            |  |
|------------|--|
| Synopsis   | Include extracted GTP packets for IP source monitoring   |
| Context    | <b>configure system security cpu-protection ip-src-monitoring included-protocols gtp boolean</b> |
| Tree       | <a href="#">gtp</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS                                    |

### **icmp boolean**

|            |   |
|------------|---|
| Synopsis   | Include extracted ICMP packets for IP source monitoring   |
| Context    | <b>configure system security cpu-protection ip-src-monitoring included-protocols icmp boolean</b> |
| Tree       | <a href="#">icmp</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **igmp boolean**

Synopsis Include extracted IGMP packets for IP source monitoring

Context **configure system security cpu-protection ip-src-monitoring included-protocols igmp boolean**

Tree [igmp](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **link-specific-rate (number | keyword)**

Synopsis Packet arrival rate limit for link level protocols

Context **configure system security cpu-protection link-specific-rate (number | keyword)**

Tree [link-specific-rate](#)

Description This command configures a link-specific rate for CPU protection. The limit is applied to all ports within the system. The CPU receives no more than the configured packet rate for all link level protocols, such as LACP, from any one port.  
The measurement is cleared each second and is based on the ingress port.

Range 1 to 65535

Units packets per second

Options max

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **policy [policy-id] number**

Synopsis Enter the **policy** list instance

Context **configure system security cpu-protection policy number**

Tree [policy](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

**[policy-id] number**

|            |   |
|------------|---|
| Synopsis   | Policy ID   |
| Context    | <b>configure</b> <a href="#">system security cpu-protection policy number</a> |
| Tree       | <a href="#">policy</a>  |
| Range      | 1 to 255  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS                 |

**alarm boolean**

|             |   |
|-------------|---|
| Synopsis    | Generate an event when the rate is exceeded   |
| Context     | <b>configure</b> <a href="#">system security cpu-protection policy number alarm boolean</a>   |
| Tree        | <a href="#">alarm</a>   |
| Description | When configured to <b>true</b> , an event is generated when the rate is exceeded. The event includes information about the offending source. Only one event is generated per monitor period.<br><br>When configured to <b>false</b> , notifications are disabled. |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

**description string**

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">system security cpu-protection policy number description string</a> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS                                    |

**eth-cfm**

|          |   |
|----------|---|
| Synopsis | Enter the <b>eth-cfm</b> context  |
| Context  | <b>configure</b> <a href="#">system security cpu-protection policy number eth-cfm</a> |

|             |  |
|-------------|--|
| Tree        | <a href="#">eth-cfm</a>  |
| Description | Commands in this context configure CPU policy entries that determine match criteria and overall arrival rate of the Ethernet Connectivity and Fault Management (ETH-CFM) packets at the CPU. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

### **entry** [*id*] *number*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>entry</b> list instance   |
| Context        | <b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <a href="#">eth-cfm entry</a> <i>number</i> |
| Tree           | <a href="#">entry</a>  |
| Max. Instances | 10   |

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **end number**

Synopsis Upper bound of the OpCode range

Context **configure system security cpu-protection policy number eth-cfm entry number opcode start number end number**

Tree [opcode](#)

Range 0 to 255

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

### **pir (number | keyword)**

Synopsis Packet arrival rate limit

Context **configure system security cpu-protection policy number eth-cfm entry number pir (number | keyword)**

Tree [pir](#)

Range 0 to 65534

Units packets per second

Options max

Default max

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## out-profile-rate

|            |  |
|------------|--|
| Synopsis   | Enter the <b>out-profile-rate</b> context  |
| Context    | <b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <b>out-profile-rate</b> |
| Tree       | <a href="#">out-profile-rate</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

## log-events *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate a log event when the packet rate is exceeded  |
| Context    | <b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <a href="#">out-profile-rate</a> <b>log-events</b> <i>boolean</i> |
| Tree       | <a href="#">log-events</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

## pir (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Packet arrival rate limit   |
| Context    | <b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <a href="#">out-profile-rate</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>   |
| Range      | 1 to 65534  |
| Units      | packets per second  |
| Options    | max   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

## overall-rate (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | Packet arrival rate limit for all packets   |
| Context  | <b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <b>overall-rate</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">overall-rate</a>  |
| Range    | 1 to 65534  |

|            |   |
|------------|---|
| Units      | packets per second  |
| Options    | max   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS |

### per-source-parameters

|            |  |
|------------|--|
| Synopsis   | Enter the <b>per-source-parameters</b> context   |
| Context    | <b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <a href="#">per-source-parameters</a> |
| Tree       | <a href="#">per-source-parameters</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

### ip-src-monitoring

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ip-src-monitoring</b> context   |
| Context    | <b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <a href="#">per-source-parameters ip-src-monitoring</a> |
| Tree       | <a href="#">ip-src-monitoring</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

### limit-dhcp-ci-addr-zero *boolean*

|            |   |
|------------|---|
| Synopsis   | Apply rate limiting to packets with client IP address 0   |
| Context    | <b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i> <a href="#">per-source-parameters ip-src-monitoring limit-dhcp-ci-addr-zero</a> <i>boolean</i> |
| Tree       | <a href="#">limit-dhcp-ci-addr-zero</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

### per-source-rate (*number* | *keyword*)

|          |                                      |
|----------|--------------------------------------|
| Synopsis | Per-source packet arrival rate limit |
|----------|--------------------------------------|

|             |  |
|-------------|--|
| Context     | <b>configure system security cpu-protection policy number per-source-rate</b> ( <i>number   keyword</i> )  |
| Tree        | <a href="#">per-source-rate</a>  |
| Description | <p>This command configures the per-source packet arrival rate limit.</p> <p>A source is defined as a unique combination of SAP and MAC source address or SAP and source IP address. The CPU receives no more than the specified packet rate from each source. The measurement is cleared every second.</p> <p>This configuration is applicable only if the policy is assigned to an interface (such as SAPs, subscriber interfaces, and spoke SDPs), and MAC monitoring or IP source monitoring is specified in the CPU protection configuration of the interface.</p> |
| Range       | 1 to 65534   |
| Units       | packets per second   |
| Options     | max  |
| Default     | max  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

### port-overall-rate

|            |   |
|------------|---|
| Synopsis   | Enter the <b>port-overall-rate</b> context                        |
| Context    | <b>configure system security cpu-protection port-overall-rate</b> |
| Tree       | <a href="#">port-overall-rate</a>                                 |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS     |

### action-low-priority *boolean*

|             |  |
|-------------|--|
| Synopsis    | Mark packets that exceed the rate as low-priority  |
| Context     | <b>configure system security cpu-protection port-overall-rate action-low-priority</b> <i>boolean</i>   |
| Tree        | <a href="#">action-low-priority</a>  |
| Description | When configured to <b>true</b> , packets that exceed the per-port packet arrival rate limit are marked as low priority for preferential discard later (if there is congestion in the control plane) rather than discarded immediately. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

**pir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Per-port packet arrival rate limit   |
| Context    | <b>configure</b> <a href="#">system security cpu-protection port-overall-rate pir</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>  |
| Range      | 1 to 65535   |
| Units      | packets per second   |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

**protocol-protection**

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>protocol-protection</b> context   |
| Context     | <b>configure</b> <a href="#">system security cpu-protection protocol-protection</a>   |
| Tree        | <a href="#">protocol-protection</a>   |
| Description | <p>When enabled, the network processor on the CPM discards all packets received for protocols that are not configured on the interface. This action helps to mitigate DoS attacks by filtering invalid control traffic before it ingresses the CPU. For example, if IS-IS is not configured on an interface, protocol protection discards any IS-IS packets received on the interface.</p> <p>Commands in this context further define the action when the context is enabled.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

**allow-sham-links** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow OSPF sham link traffic  |
| Context     | <b>configure</b> <a href="#">system security cpu-protection protocol-protection allow-sham-links</a> <i>boolean</i>   |
| Tree        | <a href="#">allow-sham-links</a>  |
| Description | When configured to <b>true</b> , tunneled OSPF packets received over the backbone network must be explicitly allowed when OSPF sham links form an adjacency over the MPLS-VP RN backbone network. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

**block-pim-tunneled** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Block extraction and processing of PIM packets   |
| Context     | <b>configure</b> <a href="#">system security cpu-protection protocol-protection block-pim-tunneled</a> <i>boolean</i>  |
| Tree        | <a href="#">block-pim-tunneled</a>   |
| Description | When configured to <b>true</b> , PIM packets arriving at the SR OS node inside a tunnel (for example, MPLS or GRE) on a network interface are blocked and not processed. PIM in an mVPN on the egress DR will not switch traffic from the (*,G) to the (S,G) tree. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

**dist-cpu-protection**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>dist-cpu-protection</b> context                                    |
| Context     | <b>configure</b> <a href="#">system security dist-cpu-protection</a>            |
| Tree        | <a href="#">dist-cpu-protection</a>   |
| Description | Commands in this context configure distributed CPU protection (DCP) attributes. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**policy** [[policy-name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>policy</b> list instance   |
| Context        | <b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i>   |
| Tree           | <a href="#">policy</a>  |
| Description    | Commands in this context configure the attributes of DCP policies. These policies can be applied to objects such as SAPs, network interfaces or ports |
| Max. Instances | 130   |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

**[policy-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Policy name   |
| Context       | <b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> |
| Tree          | <a href="#">policy</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |

| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**exceed-action** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Action taken when policer rates are exceeded   |
| Context     | <b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <b>exceed-action</b> <i>keyword</i> |
| Tree        | <a href="#">exceed-action</a>  |
| Description | This command specifies the action taken on the extracted control packets when the configured policer rates are exceeded.   |
| Options     | discard, low-priority, none  |
| Default     | none   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**log-events** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Control of log events creation for status and activity  |
| Context     | <b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <b>log-events</b> <i>keyword</i> |
| Tree        | <a href="#">log-events</a>  |
| Description | This command controls the creation of log events related to the status and activity of the local monitoring policer.  |
| Options     | false, true, verbose  |
| Default     | true  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

## rate

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>rate</b> context  |
| Context     | <b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <a href="#">rate</a>  |
| Tree        | <a href="#">rate</a>   |
| Description | Commands in this context specify the rate and burst tolerance for the policer.<br>The actual hardware may not be able to perfectly rate limit to the exact configured parameters. In this case, the configured parameters will be adapted to the closest supported rate. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## kbps

|            |  |
|------------|--|
| Synopsis   | Enter the <b>kbps</b> context  |
| Context    | <b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <a href="#">rate</a> <a href="#">kbps</a> |
| Tree       | <a href="#">kbps</a>   |
| Notes      | The following elements are part of a choice: <b>kbps</b> or <b>packets</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## limit (*keyword* | *number*)

|          |   |
|----------|---|
| Synopsis | Rate limit  |
| Context  | <b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <a href="#">rate</a> <a href="#">kbps</a> <a href="#">limit</a> ( <i>keyword</i>   <i>number</i> ) |
| Tree     | <a href="#">limit</a>   |
| Range    | 1 to 20000000   |
| Units    | kilobps   |
| Options  | max   |
| Default  | max   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

**mbs** *number*

|            |  |
|------------|--|
| Synopsis   | Tolerance for the rate   |
| Context    | <b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <a href="#">rate</a> <a href="#">kbps</a> <a href="#">mbs</a> <i>number</i> |
| Tree       | <a href="#">mbs</a>  |
| Range      | 0 to 4194304   |
| Units      | bytes  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**packets**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>packets</b> context  |
| Context    | <b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <a href="#">rate</a> <a href="#">packets</a> |
| Tree       | <a href="#">packets</a>   |
| Notes      | The following elements are part of a choice: <b>kbps</b> or <b>packets</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**initial-delay** *number*

|             |  |
|-------------|--|
| Synopsis    | Additional packets allowed in an initial burst   |
| Context     | <b>configure</b> <a href="#">system security dist-cpu-protection policy</a> <i>string</i> <a href="#">local-monitoring-policer</a> <i>string</i> <a href="#">rate</a> <a href="#">packets</a> <a href="#">initial-delay</a> <i>number</i>  |
| Tree        | <a href="#">initial-delay</a>  |
| Description | This command specifies the number of packets allowed in an initial burst (or a burst after the policer bucket has drained to zero) in addition to the packets per interval limit. The typical setting would be a value equal to the number of received packets in several full handshakes or negotiations of the protocol. |
| Range       | 0 to 255   |
| Units       | packets  |
| Default     | 0  |

Introduced 16.0.R1  
 Platforms All

### **limit** (*keyword* | *number*)

Synopsis Packets per interval limit

|------------|---|
| Synopsis   | UDP port to contact the RADIUS server for accounting  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i> <a href="#">accounting-port</a> <i>number</i> |
| Tree       | <a href="#">accounting-port</a>   |
| Range      | 1 to 65535  |
| Default    | 1813  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**address** *string*

|            |   |
|------------|---|
| Synopsis   | IP address of the RADIUS dot1x server   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**authentication-port** *number*

|            |   |
|------------|---|
| Synopsis   | UDP port to contact RADIUS server for authentication  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i> <a href="#">authentication-port</a> <i>number</i> |
| Tree       | <a href="#">authentication-port</a>   |
| Range      | 1 to 65535  |
| Default    | 1812  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**secret** *string*

|          |  |
|----------|--|
| Synopsis | Secret key associated with the RADIUS server   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">dot1x</a> <a href="#">radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i> <a href="#">secret</a> <i>string</i> |
| Tree     | <a href="#">secret</a>   |

---

|               |                            |
|---------------|----------------------------|
| String Length | 1 to 54                    |
| Notes         | This element is mandatory. |
| Introduced    | 16.0.R1                    |
| Platforms     | All                        |

**type** *keyword*

|            |  |
|------------|--|
| Synopsis   | RADIUS server type   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security dot1x radius-policy</a> <i>string</i> <a href="#">server</a> <i>number</i> <b>type</b> <i>keyword</i> |
| Tree       | <a href="#">type</a>   |
| Options    | authorization, accounting, combined  |
| Default    | authorization  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**source-address** *string*

|            |   |
|------------|---|
| Synopsis   | Source address of the RADIUS packet   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security dot1x radius-policy</a> <i>string</i> <a href="#">source-address</a> <i>string</i> |
| Tree       | <a href="#">source-address</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Time to wait for a response from the RADIUS server   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security dot1x radius-policy</a> <i>string</i> <a href="#">timeout</a> <i>number</i> |
| Tree       | <a href="#">timeout</a>  |
| Range      | 1 to 90  |
| Units      | seconds  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ftp-server *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable FTP servers running on the system   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">ftp-server</a> <i>boolean</i> |
| Tree       | <a href="#">ftp-server</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## hash-control

|            |   |
|------------|---|
| Synopsis   | Enter the <b>hash-control</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> |
| Tree       | <a href="#">hash-control</a>  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

## management-interface

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>management-interface</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> |
| Tree        | <a href="#">management-interface</a>   |
| Description | Commands in this context configure encryption parameters for different management interfaces.                                      |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

## classic-cli

|            |  |
|------------|--|
| Synopsis   | Enter the <b>classic-cli</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <a href="#">classic-cli</a> |
| Tree       | <a href="#">classic-cli</a>  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**read-algorithm** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Input encryption algorithm for configuration secrets  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <a href="#">classic-cli</a> <a href="#">read-algorithm</a> <i>keyword</i>                      |
| Tree        | <a href="#">read-algorithm</a>  |
| Description | This command specifies how encrypted configuration secrets are interpreted and which encryption types are accepted when secrets are input into the system or read from a configuration file (for example, at system bootup time). |
| Options     | all-hash, hash, hash2, custom   |
| Default     | all-hash  |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

**write-algorithm** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Output encryption algorithm for configuration secrets   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <a href="#">classic-cli</a> <a href="#">write-algorithm</a> <i>keyword</i> |
| Tree        | <a href="#">write-algorithm</a>   |
| Description | This command specifies the format of the output for encrypted configuration secrets (for example, in the saved configuration file, or in the output of the <b>info</b> or <b>show</b> commands).              |
| Options     | cleartext, hash, hash2, custom  |
| Default     | hash2   |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

**grpc**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>grpc</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <a href="#">grpc</a> |
| Tree       | <a href="#">grpc</a>  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**hash-algorithm** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Encryption algorithm for configuration secrets   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <a href="#">grpc</a> <b>hash-algorithm</b> <i>keyword</i> |
| Tree        | <a href="#">hash-algorithm</a>   |
| Description | This command specifies the format of the input and output for encrypted configuration secrets.   |
| Options     | cleartext, hash, hash2, custom   |
| Default     | hash2  |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**md-cli**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>md-cli</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <b>md-cli</b> |
| Tree       | <a href="#">md-cli</a>   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**hash-algorithm** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Encryption algorithm for configuration secrets   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <a href="#">md-cli</a> <b>hash-algorithm</b> <i>keyword</i> |
| Tree        | <a href="#">hash-algorithm</a>   |
| Description | This command specifies the format of the input and output for encrypted configuration secrets.   |
| Options     | cleartext, hash, hash2, custom   |
| Default     | hash2  |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**netconf**

|          |                                  |
|----------|----------------------------------|
| Synopsis | Enter the <b>netconf</b> context |
|----------|----------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <a href="#">netconf</a> |
| Tree       | <a href="#">netconf</a>  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **hash-algorithm** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Encryption algorithm for configuration secrets   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">hash-control</a> <a href="#">management-interface</a> <a href="#">netconf</a> <a href="#">hash-algorithm</a> <i>keyword</i> |
| Tree        | <a href="#">hash-algorithm</a>   |
| Description | This command specifies the format of the input and output for encrypted configuration secrets.   |
| Options     | cleartext, hash, hash2, custom   |
| Default     | hash2  |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **keychains**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>keychains</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> |
| Tree       | <a href="#">keychains</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **keychain** [[keychain-name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>keychain</b> list instance   |
| Context        | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> |
| Tree           | <a href="#">keychain</a>  |
| Max. Instances | 256   |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

**[keychain-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Keychain name   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> |
| Tree          | <a href="#">keychain</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the keychain  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**bidirectional**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bidirectional</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <b>bidirectional</b> |
| Tree       | <a href="#">bidirectional</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**entry** [[keychain-entry-index](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>entry</b> list instance  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <b>bidirectional</b> <b>entry</b> <i>number</i> |
| Tree       | <a href="#">entry</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[keychain-entry-index]** *number*

|            |   |
|------------|---|
| Synopsis   | Keychain identifier   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">bidirectional</a> <a href="#">entry</a> <i>number</i> |
| Tree       | <a href="#">entry</a>   |
| Range      | 0 to 63   255   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the keychain entry   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">bidirectional</a> <a href="#">entry</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**algorithm** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Encryption algorithm used by the keychain key  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">bidirectional</a> <a href="#">entry</a> <i>number</i> <a href="#">algorithm</a> <i>keyword</i> |
| Tree       | <a href="#">algorithm</a>  |
| Options    | aes-128-cmac-96, hmac-sha-1-96, password, message-digest, hmac-md5, hmac-sha-1, hmac-sha-256, aes-128-gcm-16   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**authentication-key *string*****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Authentication key used by the encryption algorithm   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">bidirectional</a> <a href="#">entry</a> <i>number</i> <b>authentication-key</b> <i>string</i> |
| Tree          | <a href="#">authentication-key</a>  |
| String Length | 1 to 54   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**begin-time *string***

|            |   |
|------------|---|
| Synopsis   | Calendar date and time to start using the key   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">bidirectional</a> <a href="#">entry</a> <i>number</i> <b>begin-time</b> <i>string</i> |
| Tree       | <a href="#">begin-time</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**option *keyword***

|            |  |
|------------|--|
| Synopsis   | Keychain key option  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">bidirectional</a> <a href="#">entry</a> <i>number</i> <b>option</b> <i>keyword</i> |
| Tree       | <a href="#">option</a>   |
| Options    | none, basic, isis-enhanced   |
| Default    | none   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**tolerance (*number* | *keyword*)**

|          |   |
|----------|---|
| Synopsis | Time eligible receive key overlaps with active send key |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure system security keychains keychain</b> <i>string</i> <b>bidirectional entry</b> <i>number tolerance</i> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>tolerance</b>  |
| Range      | 0 to 4294967294   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 300   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure system security keychains keychain</b> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <b>description</b>   |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **receive**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>receive</b> context   |
| Context    | <b>configure system security keychains keychain</b> <i>string</i> <b>receive</b> |
| Tree       | <b>receive</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **entry** [**keychain-entry-index**] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>entry</b> list instance   |
| Context    | <b>configure system security keychains keychain</b> <i>string</i> <b>receive entry</b> <i>number</i> |

|------------|-----------------|
| Range      | 0 to 4294967294 |
| Units      | seconds         |
| Options    | infinite        |
| Default    | 300             |
| Introduced | 16.0.R1         |
| Platforms  | All             |

## send

|            |   |
|------------|---|
| Synopsis   | Enter the <b>send</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <b>send</b> |
| Tree       | <a href="#">send</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## entry [[keychain-entry-index](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>entry</b> list instance   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <b>send</b> <b>entry</b> <i>number</i> |
| Tree       | <a href="#">entry</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## [[keychain-entry-index](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Keychain identifier  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <b>send</b> <b>entry</b> <i>number</i> |
| Tree       | <a href="#">entry</a>  |
| Range      | 0 to 63   255  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the keychain entry   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">send</a> <a href="#">entry</a> <i>number</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**algorithm** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Encryption algorithm used by the keychain key  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">send</a> <a href="#">entry</a> <i>number</i> <b>algorithm</b> <i>keyword</i> |
| Tree       | <a href="#">algorithm</a>  |
| Options    | aes-128-cmac-96, hmac-sha-1-96, password, message-digest, hmac-md5, hmac-sha-1, hmac-sha-256, aes-128-gcm-16   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**authentication-key** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Authentication key used by the encryption algorithm  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i> <a href="#">send</a> <a href="#">entry</a> <i>number</i> <b>authentication-key</b> <i>string</i> |
| Tree          | <a href="#">authentication-key</a>   |
| String Length | 1 to 54  |
| Introduced    | 16.0.R1  |

Platforms All

### **begin-time** *string*

Synopsis Calendar date and time to start using the key

Context **configure** [system](#) [security](#) [keychains](#) [keychain](#) *string* [send](#) [entry](#) *number* [begin-time](#) *string*

Tree [begin-time](#)

Introduced 16.0.R1

Platforms All

### **tcp-option-number**

Synopsis Enter the **tcp-option-number** context

Context **configure** [system](#) [security](#) [keychains](#) [keychain](#) *string* [tcp-option-number](#)

Tree [tcp-option-number](#)

Introduced 16.0.R1

Platforms All

### **receive** *keyword*

Synopsis TCP option accepted in received TCP packets

Context **configure** [system](#) [security](#) [keychains](#) [keychain](#) *string* [tcp-option-number](#) [receive](#) *keyword*

Tree [receive](#)

Options option-253, option-254, both, tcp-ao

Default option-254

Introduced 16.0.R1

Platforms All

### **send** *keyword*

Synopsis TCP option accepted in sent TCP packets

Context **configure** [system](#) [security](#) [keychains](#) [keychain](#) *string* [tcp-option-number](#) [send](#) *keyword*

Tree [send](#)

Options option-253, option-254, tcp-ao

|            |            |
|------------|------------|
| Default    | option-254 |
| Introduced | 16.0.R1    |
| Platforms  | All        |

## management

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>management</b> context  |
| Context     | <b>configure system security management</b>  |
| Tree        | <a href="#">management</a>   |
| Description | Commands in this context control which management protocols can be used to access the SR OS router via the 'Base' and 'management' router instances. |
| Introduced  | 16.0.R5  |
| Platforms   | All  |

## allow-ftp *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow access to the FTP server  |
| Context     | <b>configure system security management allow-ftp <i>boolean</i></b>  |
| Tree        | <a href="#">allow-ftp</a>   |
| Description | When configured to <b>true</b> , this command allows FTP access to the SR OS router via the 'Base' and 'management' router instances.<br>When configured to <b>false</b> , this command disallows access to the SR OS FTP server. |
| Default     | true  |
| Introduced  | 16.0.R6   |
| Platforms   | All   |

## allow-grpc *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow access to the gRPC server  |
| Context     | <b>configure system security management allow-grpc <i>boolean</i></b>  |
| Tree        | <a href="#">allow-grpc</a>   |
| Description | When configured to <b>true</b> , the system allows access to the gRPC server via the 'Base' and 'management' router instances. |
| Default     | true   |
| Introduced  | 19.5.R1  |
| Platforms   | All  |

### **allow-netconf** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow access to the NETCONF server   |
| Context     | <b>configure</b> <a href="#">system security management allow-netconf</a> <i>boolean</i>   |
| Tree        | <a href="#">allow-netconf</a>  |
| Description | When configured to <b>true</b> , the system allows NETCONF server access to the SR OS router via the 'Base' and 'management' router instances. |
| Default     | true   |
| Introduced  | 19.5.R1  |
| Platforms   | All  |

### **allow-ssh** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow access to the SSH server  |
| Context     | <b>configure</b> <a href="#">system security management allow-ssh</a> <i>boolean</i>  |
| Tree        | <a href="#">allow-ssh</a>   |
| Description | When configured to <b>true</b> , this command allows SSH server access to the SR OS router via the 'Base' and 'management' router instances.<br>When configured to <b>false</b> , this command disallows SSH server access. |
| Default     | true  |
| Introduced  | 16.0.R5   |
| Platforms   | All   |

### **allow-telnet** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow access to the IPv4 Telnet server   |
| Context     | <b>configure</b> <a href="#">system security management allow-telnet</a> <i>boolean</i>  |
| Tree        | <a href="#">allow-telnet</a>   |
| Description | When configured to <b>true</b> , this command allows IPv4 Telnet server access to the SR OS router via the 'Base' and 'management' router instances.<br>When configured to <b>false</b> , this command disallows access to the IPv4 Telnet server. |
| Default     | true   |
| Introduced  | 16.0.R5  |
| Platforms   | All  |

**allow-telnet6** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow access to the Telnet IPv6 server   |
| Context     | <b>configure</b> <a href="#">system security management allow-telnet6</a> <i>boolean</i>   |
| Tree        | <a href="#">allow-telnet6</a>  |
| Description | When configured to <b>true</b> , this command allows IPv6 Telnet server access to the SR OS router via the 'Base' and 'management' router instances.<br>When configured to <b>false</b> , this command disallows access to the IPv6 Telnet server. |
| Default     | true   |
| Introduced  | 16.0.R5  |
| Platforms   | All  |

**management-access-filter**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>management-access-filter</b> context   |
| Context     | <b>configure</b> <a href="#">system security management-access-filter</a>   |
| Tree        | <a href="#">management-access-filter</a>  |
| Description | Commands in this context configure the attributes for management access filters.<br>Management access filters control all traffic in and out of the CPM. The filters can be used to restrict management of the router by other nodes outside of specific networks (or sub-networks) or through designated ports.<br>Management filters are enforced by the system software. |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

**ip-filter**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ip-filter</b> context  |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ip-filter</a> |
| Tree       | <a href="#">ip-filter</a>   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of management-access filters  |
| Context  | <b>configure</b> <a href="#">system security management-access-filter ip-filter admin-state</a> <i>keyword</i> |

|            |                             |
|------------|-----------------------------|
| Tree       | <a href="#">admin-state</a> |
| Options    | enable, disable             |
| Default    | enable                      |
| Introduced | 16.0.R4                     |
| Platforms  | All                         |

### **default-action** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Default action for the management access filter  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ip-filter</a> <b>default-action</b> <i>keyword</i> |
| Tree        | <a href="#">default-action</a>   |
| Description | This command specifies the default action for management access in the absence of a specific management access filter match.   |
| Options     | ignore-match, accept, drop, reject   |
| Default     | ignore-match   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **entry** [[entry-id](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>entry</b> list instance   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ip-filter</a> <b>entry</b> <i>number</i> |
| Tree       | <a href="#">entry</a>  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **[entry-id]** *number*

|             |  |
|-------------|--|
| Synopsis    | Entry ID to identify the match criteria and the action   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ip-filter</a> <b>entry</b> <i>number</i>   |
| Tree        | <a href="#">entry</a>  |
| Description | This command specifies the entry ID to identify the match criteria and the corresponding action. It is recommended that entries are numbered in staggered increments. This allows users to insert a new entry in an existing policy without having to renumber the existing entries. |
| Range       | 1 to 9999  |

|            |                                     |
|------------|-------------------------------------|
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R4                             |
| Platforms  | All                                 |

### **action** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Action associated with the management access filter  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <b>action</b> <i>keyword</i>         |
| Tree        | <a href="#">action</a>   |
| Description | This command specifies the action associated with the management access filter match criteria entry.<br><br>If the packet does not meet any of the match criteria, the configured default action is applied. |
| Options     | ignore-match, accept, drop, reject   |
| Default     | ignore-match   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R4  |
| Platforms     | All  |

### **log-events** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable match logging   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ip-filter</a> <a href="#">entry</a> <i>number</i> <b>log-events</b> <i>boolean</i> |
| Tree        | <a href="#">log-events</a>   |
| Description | When configured to <b>true</b> , this command enables match logging. When enabled, matches on the entry cause the Security event mafEntryMatch to be raised.   |

When configured to **false**, match logging is disabled.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R4 |
| Platforms  | All     |

## match

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>match</b> context   |
| Context     | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <b>match</b> |
| Tree        | <a href="#">match</a>  |
| Description | Commands in this context specify match criteria for the entry.   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

## dst-port

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>dst-port</b> context   |
| Context     | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <b>match</b> <b>dst-port</b> |
| Tree        | <a href="#">dst-port</a>   |
| Description | Commands in this context specify match criteria based on the destination port.   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

## mask *number*

|            |  |
|------------|--|
| Synopsis   | IP address mask as the match criterion   |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <b>match</b> <b>dst-port</b> <b>mask</b> <i>number</i> |
| Tree       | <a href="#">mask</a>   |
| Range      | 1 to 65535   |
| Default    | 65535  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **port number**

|            |  |
|------------|--|
| Synopsis   | TCP or UDP port number as the match criterion  |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match dst-port port number</a> |
| Tree       | <a href="#">port</a>   |
| Range      | 1 to 65535   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **mgmt-port**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>mgmt-port</b> context  |
| Context     | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match mgmt-port</a> |
| Tree        | <a href="#">mgmt-port</a>   |
| Description | Commands in this context specify match criteria based on the Ethernet port.   |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

### **cpm**

|            |   |
|------------|---|
| Synopsis   | Match any traffic received on any Ethernet port   |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match mgmt-port cpm</a> |
| Tree       | <a href="#">cpm</a>   |
| Notes      | The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> .                             |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **lag string**

|          |  |
|----------|--|
| Synopsis | LAG ID as the match criterion  |
| Context  | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match mgmt-port lag string</a> |
| Tree     | <a href="#">lag</a>  |

|               |   |
|---------------|---|
| String Length | 1 to 27   |
| Notes         | The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> . |
| Introduced    | 21.2.R1   |
| Platforms     | All   |

**port-id string**

|            |   |
|------------|---|
| Synopsis   | Port ID as the match criterion  |
| Context    | <b>configure system security management-access-filter ip-filter entry number match mgmt-port port-id string</b> |
| Tree       | <a href="#">port-id</a>   |
| Notes      | The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> . |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**protocol (number | keyword)**

|            |   |
|------------|---|
| Synopsis   | IP protocol as the match criterion  |
| Context    | <b>configure system security management-access-filter ip-filter entry number match protocol (number   keyword)</b>  |
| Tree       | <a href="#">protocol</a>  |
| Range      | 0 to 255  |
| Options    | tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**router-instance string**

|            |   |
|------------|---|
| Synopsis   | Router instance as the match criterion  |
| Context    | <b>configure system security management-access-filter ip-filter entry number match router-instance string</b> |
| Tree       | <a href="#">router-instance</a>   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**src-ip**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>src-ip</b> context  |
| Context     | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match src-ip</a> |
| Tree        | <a href="#">src-ip</a>   |
| Description | Commands in this context specify match criteria based on the source IP address.  |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**address** (*ipv4-prefix* | *ipv4-address*)

|            |   |
|------------|---|
| Synopsis   | IP address or IP prefix as the match criterion  |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match src-ip address</a> ( <i>ipv4-prefix</i>   <i>ipv4-address</i> ) |
| Tree       | <a href="#">address</a>   |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**ip-prefix-list** *reference*

|            |   |
|------------|---|
| Synopsis   | IP prefix list as the match criterion   |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match src-ip ip-prefix-list reference</a> |
| Tree       | <a href="#">ip-prefix-list</a>  |
| Reference  | <b>configure</b> <a href="#">filter match-list ip-prefix-list</a> <i>string</i>   |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> .  |
| Introduced | 20.7.R1   |
| Platforms  | All   |

**mask** *string*

|          |   |
|----------|---|
| Synopsis | IP address mask as the match criterion  |
| Context  | <b>configure</b> <a href="#">system security management-access-filter ip-filter entry</a> <i>number</i> <a href="#">match src-ip mask</a> <i>string</i> |
| Tree     | <a href="#">mask</a>  |

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ip-prefix-list</b> . |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **src-port**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>src-port</b> context   |
| Context    | <b>configure system security management-access-filter ip-filter entry <i>number</i> match src-port</b> |
| Tree       | <a href="#">src-port</a>   |
| Introduced | 21.7.R1  |
| Platforms  | All  |

### **mask *number***

|            |   |
|------------|---|
| Synopsis   | IP address mask as the match criterion  |
| Context    | <b>configure system security management-access-filter ip-filter entry <i>number</i> match src-port mask <i>number</i></b> |
| Tree       | <a href="#">mask</a>  |
| Range      | 1 to 65535  |
| Default    | 65535   |
| Introduced | 21.7.R1   |
| Platforms  | All   |

### **port *number***

|            |   |
|------------|---|
| Synopsis   | TCP or UDP port number as the match criterion   |
| Context    | <b>configure system security management-access-filter ip-filter entry <i>number</i> match src-port port <i>number</i></b> |
| Tree       | <a href="#">port</a>  |
| Range      | 1 to 65535  |
| Notes      | This element is mandatory.  |
| Introduced | 21.7.R1   |
| Platforms  | All   |

## ipv6-filter

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv6-filter</b> context  |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ipv6-filter</a> |
| Tree       | <a href="#">ipv6-filter</a>   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of management-access filters   |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ipv6-filter admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

## default-action *keyword*

|             |  |
|-------------|--|
| Synopsis    | Default action for the management access filter  |
| Context     | <b>configure</b> <a href="#">system security management-access-filter ipv6-filter default-action keyword</a>                 |
| Tree        | <a href="#">default-action</a>   |
| Description | This command specifies the default action for management access in the absence of a specific management access filter match. |
| Options     | ignore-match, accept, drop, reject   |
| Default     | ignore-match   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

## entry [[entry-id](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>entry</b> list instance   |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ipv6-filter entry number</a> |
| Tree       | <a href="#">entry</a>  |
| Introduced | 16.0.R4  |

Platforms All

### **[entry-id]** *number*

Synopsis Entry ID to identify the match criteria and the action

Context **configure** [system security management-access-filter ipv6-filter entry](#) *number*

Tree [entry](#)

Description This command specifies the entry ID to identify the match criteria and the corresponding action. It is recommended that entries are numbered in staggered increments. This allows users to insert a new entry in an existing policy without having to renumber the existing entries.

Range 1 to 9999

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms All

### **action** *keyword*

Synopsis Action associated with the management access filter

Context **configure** [system security management-access-filter ipv6-filter entry](#) *number* **action** *keyword*

Tree [action](#)

Description This command specifies the action associated with the management access filter match criteria entry.

If the packet does not meet any of the match criteria, the configured default action is applied.

Options ignore-match, accept, drop, reject

Default ignore-match

Introduced 16.0.R4

Platforms All

### **description** *string*

Synopsis Text description

Context **configure** [system security management-access-filter ipv6-filter entry](#) *number* **description** *string*

Tree [description](#)

---

|               |         |
|---------------|---------|
| String Length | 1 to 80 |
| Introduced    | 16.0.R4 |
| Platforms     | All     |

### **log-events** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable match logging   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <b>log-events</b> <i>boolean</i>                   |
| Tree        | <a href="#">log-events</a>   |
| Description | When configured to <b>true</b> , this command enables match logging. When enabled, matches on the entry cause the Security event mafEntryMatch to be raised.<br>When configured to <b>false</b> , match logging is disabled. |
| Default     | false  |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **match**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>match</b> context   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <b>match</b> |
| Tree        | <a href="#">match</a>  |
| Description | Commands in this context specify match criteria for the entry.   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **dst-port**

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>dst-port</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <b>dst-port</b> |
| Tree        | <a href="#">dst-port</a>  |
| Description | Commands in this context specify match criteria based on the destination port.  |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

### **mask** *number*

|            |   |
|------------|---|
| Synopsis   | IP address mask as the match criterion  |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ipv6-filter entry</a> <i>number</i> <a href="#">match dst-port mask</a> <i>number</i> |
| Tree       | <a href="#">mask</a>  |
| Range      | 1 to 65535  |
| Default    | 65535   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **port** *number*

|            |   |
|------------|---|
| Synopsis   | TCP or UDP port number as the match criterion   |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ipv6-filter entry</a> <i>number</i> <a href="#">match dst-port port</a> <i>number</i> |
| Tree       | <a href="#">port</a>  |
| Range      | 1 to 65535  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **flow-label** *number*

|            |  |
|------------|--|
| Synopsis   | Flow identifier used to discriminate traffic flows   |
| Context    | <b>configure</b> <a href="#">system security management-access-filter ipv6-filter entry</a> <i>number</i> <a href="#">match flow-label</a> <i>number</i> |
| Tree       | <a href="#">flow-label</a>   |
| Range      | 0 to 1048575   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **mgmt-port**

|          |                                    |
|----------|------------------------------------|
| Synopsis | Enter the <b>mgmt-port</b> context |
|----------|------------------------------------|

|             |   |
|-------------|---|
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">mgmt-port</a> |
| Tree        | <a href="#">mgmt-port</a>   |
| Description | Commands in this context specify match criteria based on the Ethernet port.   |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

## cpm

|            |   |
|------------|---|
| Synopsis   | Match any traffic received on any Ethernet port   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">mgmt-port</a> <a href="#">cpm</a> |
| Tree       | <a href="#">cpm</a>   |
| Notes      | The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> .   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

## lag string

|               |  |
|---------------|--|
| Synopsis      | LAG ID as the match criterion  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">mgmt-port</a> <a href="#">lag</a> <a href="#">string</a> |
| Tree          | <a href="#">lag</a>  |
| String Length | 1 to 27  |
| Notes         | The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> .  |
| Introduced    | 21.2.R1  |
| Platforms     | All  |

## port-id string

|            |  |
|------------|--|
| Synopsis   | Port ID as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">ipv6-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">mgmt-port</a> <a href="#">port-id</a> <a href="#">string</a> |
| Tree       | <a href="#">port-id</a>  |
| Notes      | The following elements are part of a choice: <b>cpm</b> , ( <b>lag</b> and <b>lag-id</b> ), or <b>port-id</b> .  |
| Introduced | 16.0.R4  |

Platforms All

### **next-header** (*number* | *keyword*)

Synopsis IP protocol to match

Context **configure** [system](#) [security](#) [management-access-filter](#) [ipv6-filter](#) [entry](#) *number* [match](#) [next-header](#) (*number* | *keyword*)

Tree [next-header](#)

Range 0 to 255

Options tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp

Introduced 16.0.R4

Platforms All

### **router-instance** *string*

Synopsis Router instance as the match criterion

Context **configure** [system](#) [security](#) [management-access-filter](#) [ipv6-filter](#) [entry](#) *number* [match](#) [router-instance](#) *string*

Tree [router-instance](#)

Introduced 16.0.R4

Platforms All

### **src-ip**

Synopsis Enter the **src-ip** context

Context **configure** [system](#) [security](#) [management-access-filter](#) [ipv6-filter](#) [entry](#) *number* [match](#) [src-ip](#)

Tree [src-ip](#)

Description Commands in this context specify match criteria based on the source port.

Introduced 16.0.R4

Platforms All

### **address** (*ipv6-prefix* | *ipv6-address*)

Synopsis IPv6 address or IPv6 prefix to match

|            |  |
|------------|--|
| Context    | <b>configure system security management-access-filter ipv6-filter entry</b> <i>number match src-ip address</i> ( <i>ipv6-prefix   ipv6-address</i> ) |
| Tree       | <a href="#">address</a>  |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### ipv6-prefix-list *reference*

|            |   |
|------------|---|
| Synopsis   | IPv6 prefix list as the match criterion   |
| Context    | <b>configure system security management-access-filter ipv6-filter entry</b> <i>number match src-ip ipv6-prefix-list reference</i> |
| Tree       | <a href="#">ipv6-prefix-list</a>  |
| Reference  | <b>configure filter match-list ipv6-prefix-list</b> <i>string</i>   |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .                      |
| Introduced | 20.7.R1   |
| Platforms  | All   |

### mask *string*

|            |  |
|------------|--|
| Synopsis   | IP address mask as the match criterion   |
| Context    | <b>configure system security management-access-filter ipv6-filter entry</b> <i>number match src-ip mask string</i> |
| Tree       | <a href="#">mask</a>   |
| Notes      | The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .       |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### src-port

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>src-port</b> context   |
| Context     | <b>configure system security management-access-filter ipv6-filter entry</b> <i>number match src-port</i> |
| Tree        | <a href="#">src-port</a>   |
| Description | Commands in this context specify match criteria based on the source port.                                |
| Introduced  | 21.7.R1  |

Platforms All

### **mask** *number*

Synopsis IP address mask as the match criterion

Context **configure** [system security management-access-filter ipv6-filter entry](#) *number match src-port mask number*

Tree [mask](#)

Range 1 to 65535

Default 65535

Introduced 21.7.R1

Platforms All

### **port** *number*

Synopsis TCP or UDP port number as the match criterion

Context **configure** [system security management-access-filter ipv6-filter entry](#) *number match src-port port number*

Tree [port](#)

Range 1 to 65535

Notes This element is mandatory.

Introduced 21.7.R1

Platforms All

### **mac-filter**

Synopsis Enter the **mac-filter** context

Context **configure** [system security management-access-filter mac-filter](#)

Tree [mac-filter](#)

Introduced 16.0.R4

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of management access MAC filter

Context **configure** [system security management-access-filter mac-filter admin-state](#) *keyword*

|            |                             |
|------------|-----------------------------|
| Tree       | <a href="#">admin-state</a> |
| Options    | enable, disable             |
| Default    | enable                      |
| Introduced | 16.0.R4                     |
| Platforms  | All                         |

### **default-action** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Default action for the management access filter  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">default-action</a> <i>keyword</i> |
| Tree        | <a href="#">default-action</a>   |
| Description | This command specifies the default action for management access in the absence of a specific management access filter match.   |
| Options     | ignore-match, accept, drop   |
| Default     | ignore-match   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **entry** [[entry-id](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>entry</b> list instance   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> |
| Tree       | <a href="#">entry</a>  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **[entry-id]** *number*

|             |  |
|-------------|--|
| Synopsis    | Entry ID to identify the match criteria and the action   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i>   |
| Tree        | <a href="#">entry</a>  |
| Description | This command specifies the entry ID to identify the match criteria and the corresponding action. It is recommended that entries are numbered in staggered increments. This allows users to insert a new entry in an existing policy without having to renumber the existing entries. |
| Range       | 1 to 9999  |

|            |                                     |
|------------|-------------------------------------|
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R4                             |
| Platforms  | All                                 |

### **action** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Action associated with the management access filter  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <i>keyword</i> |
| Tree        | <a href="#">action</a>   |
| Description | This command specifies the action associated with the management access filter match criteria entry.<br><br>If the packet does not meet any of the match criteria, the configured default action is applied.   |
| Options     | ignore-match, accept, drop   |
| Default     | ignore-match   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R4  |
| Platforms     | All  |

### **log-events** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable match logging   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">log-events</a> <i>boolean</i> |
| Tree        | <a href="#">log-events</a>   |
| Description | When configured to <b>true</b> , this command enables match logging. When enabled, matches on the entry cause the Security event mafEntryMatch to be raised.   |

|            |  |
|------------|--|
|            | When configured to <b>false</b> , match logging is disabled. |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

## match

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>match</b> context  |
| Context     | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i> <b>match</b> |
| Tree        | <a href="#">match</a>   |
| Description | Commands in this context specify match criteria for the entry.  |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

## cfm-opcode

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>cfm-opcode</b> context   |
| Context     | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i> <b>match</b><br><a href="#">cfm-opcode</a> |
| Tree        | <a href="#">cfm-opcode</a>  |
| Description | Commands in this context specify match criteria based on the CFM opcode.  |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

## eq *number*

|            |  |
|------------|--|
| Synopsis   | Equal to comparison operator for the CFM opcode  |
| Context    | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry</a> <i>number</i> <b>match</b><br><a href="#">cfm-opcode eq</a> <i>number</i> |
| Tree       | <a href="#">eq</a>   |
| Range      | 0 to 255   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **gt** *number*

|            |  |
|------------|--|
| Synopsis   | Greater than comparison operator for the CFM opcode  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">cfm-opcode</a> <a href="#">gt</a> <i>number</i> |
| Tree       | <a href="#">gt</a>   |
| Range      | 0 to 254   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **lt** *number*

|            |  |
|------------|--|
| Synopsis   | Less than comparison operator for the CFM opcode   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">cfm-opcode</a> <a href="#">lt</a> <i>number</i> |
| Tree       | <a href="#">lt</a>   |
| Range      | 1 to 255   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **range**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>range</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">cfm-opcode</a> <a href="#">range</a> |
| Tree       | <a href="#">range</a>   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **end** *number*

|          |   |
|----------|---|
| Synopsis | Upper bound of the range for the OpCode to match  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">cfm-opcode</a> <a href="#">range</a> <a href="#">end</a> <i>number</i> |

|            |                            |
|------------|----------------------------|
| Tree       | <a href="#">end</a>        |
| Range      | 1 to 255                   |
| Notes      | This element is mandatory. |
| Introduced | 16.0.R4                    |
| Platforms  | All                        |

### **start number**

|            |   |
|------------|---|
| Synopsis   | Lower bound of the range for the OpCode to match  |
| Context    | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match cfm-opcode range start number</a> |
| Tree       | <a href="#">start</a>   |
| Range      | 0 to 254  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **dot1p**

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>dot1p</b> context   |
| Context     | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match dot1p</a> |
| Tree        | <a href="#">dot1p</a>   |
| Description | Commands in this context specify match criteria based on the IEEE 802.1p value.                               |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

### **mask number**

|            |   |
|------------|---|
| Synopsis   | 3-bit mask as the match criterion   |
| Context    | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match dot1p mask number</a> |
| Tree       | <a href="#">mask</a>  |
| Range      | 1 to 7  |
| Default    | 7   |
| Introduced | 16.0.R4   |

Platforms All

### **priority number**

Synopsis IEEE 802.1p value as the match criterion

Context **configure system security management-access-filter mac-filter entry number match dot1p priority number**

Tree [priority](#)

Range 0 to 7

Notes This element is mandatory.

Introduced 16.0.R4

Platforms All

### **dst-mac**

Synopsis Enable the **dst-mac** context

Context **configure system security management-access-filter mac-filter entry number match dst-mac**

Tree [dst-mac](#)

Description Commands in this context specify match criteria based on the destination MAC.

Introduced 16.0.R4

Platforms All

### **address string**

Synopsis MAC address used as the match criterion

Context **configure system security management-access-filter mac-filter entry number match dst-mac address string**

Tree [address](#)

Notes This element is mandatory.

Introduced 16.0.R4

Platforms All

### **mask string**

Synopsis MAC address mask as the match criterion

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-mac</a> <a href="#">mask</a> <i>string</i> |
| Tree       | <a href="#">mask</a>  |
| Default    | ff:ff:ff:ff:ff:ff   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **etype** *string*

|               |  |
|---------------|--|
| Synopsis      | Ethernet type II Ethertype value as the match criterion  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">etype</a> <i>string</i> |
| Tree          | <a href="#">etype</a>  |
| Description   | This command specifies an Ethernet type II Ethertype value to be used as a MAC filter match criterion.<br><br>The Ethernet type field is used by the Ethernet version-II frames and does not apply to IEEE 802.3 Ethernet frames.  |
| String Length | 5 to 6   |
| Introduced    | 16.0.R4  |
| Platforms     | All  |

### **frame-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | MAC frame type as the match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">frame-type</a> <i>keyword</i> |
| Tree       | <a href="#">frame-type</a>   |
| Options    | 802dot3, 802dot2-llc, 802dot2-snap, ethernet-ii, 802dot1-ag  |
| Default    | 802dot3  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **llc-dsap**

|          |   |
|----------|---|
| Synopsis | Enable the <b>llc-dsap</b> context  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">llc-dsap</a> |

|             |   |
|-------------|---|
| Tree        | <a href="#">llc-dsap</a>  |
| Description | Commands in this context specify match criteria based on the Destination Service Access Point (DSAP). |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

### **dsap number**

|            |  |
|------------|--|
| Synopsis   | 8-bit DSAP as the match criterion  |
| Context    | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match llc-dsap dsap number</a> |
| Tree       | <a href="#">dsap</a>   |
| Range      | 0 to 255   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **mask number**

|            |  |
|------------|--|
| Synopsis   | Mask for DSAP value as the match criterion   |
| Context    | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match llc-dsap mask number</a> |
| Tree       | <a href="#">mask</a>   |
| Range      | 1 to 255   |
| Default    | 255  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **llc-ssap**

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>llc-ssap</b> context   |
| Context     | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match llc-ssap</a> |
| Tree        | <a href="#">llc-ssap</a>   |
| Description | Commands in this context specify match criteria based on the Source Service Access Point (SSAP).                 |

---

|            |         |
|------------|---------|
| Introduced | 16.0.R4 |
| Platforms  | All     |

### **mask number**

|            |  |
|------------|--|
| Synopsis   | Mask for SSAP value as the match criterion   |
| Context    | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match llc-ssap mask number</a> |
| Tree       | <a href="#">mask</a>   |
| Range      | 1 to 255   |
| Default    | 255  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **ssap number**

|            |  |
|------------|--|
| Synopsis   | 8-bit SSAP as the match criterion  |
| Context    | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match llc-ssap ssap number</a> |
| Tree       | <a href="#">ssap</a>   |
| Range      | 0 to 255   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **service string**

|               |  |
|---------------|--|
| Synopsis      | Service ID used as the match condition   |
| Context       | <b>configure</b> <a href="#">system security management-access-filter mac-filter entry number match service string</a> |
| Tree          | <a href="#">service</a>  |
| String Length | 1 to 64  |
| Introduced    | 16.0.R4  |
| Platforms     | All  |

**snap-oui** *keyword*

|             |  |
|-------------|--|
| Synopsis    | IEEE 802.3 LLC SNAP Ethernet Frame OUI value for match   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">snap-oui</a> <i>keyword</i> |
| Tree        | <a href="#">snap-oui</a>   |
| Description | This command specifies the IEEE 802.3 LLC SNAP Ethernet Frame OUI value as the MAC filter match criterion.   |
| Options     | zero, non-zero   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**snap-pid** *number*

|             |   |
|-------------|---|
| Synopsis    | IEEE 802.3 LLC SNAP Ethernet Frame PID as the match   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">snap-pid</a> <i>number</i>   |
| Tree        | <a href="#">snap-pid</a>  |
| Description | This command specifies an IEEE 802.3 LLC SNAP Ethernet Frame PID value used as the MAC filter match criterion.<br><br>The SNAP PID match criterion is independent of the OUI field within the SNAP header. Two packets with different 3-byte OUI fields but the same PID field match the same filter entry based on a SNAP PID match criterion. |
| Range       | 0 to 65535  |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

**src-mac**

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>src-mac</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-mac</a> |
| Tree        | <a href="#">src-mac</a>  |
| Description | Commands in this context specify match criteria based on the source MAC.   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**address string**

|            |  |
|------------|--|
| Synopsis   | MAC address used as the match criterion  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-mac</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**mask string**

|            |   |
|------------|---|
| Synopsis   | MAC address mask as the match criterion   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">management-access-filter</a> <a href="#">mac-filter</a> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-mac</a> <a href="#">mask</a> <i>string</i> |
| Tree       | <a href="#">mask</a>  |
| Default    | ff:ff:ff:ff:ff:ff   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**per-peer-queuing boolean**

|             |  |
|-------------|--|
| Synopsis    | Allow CPM hardware queuing per peer  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">per-peer-queuing</a> <i>boolean</i>   |
| Tree        | <a href="#">per-peer-queuing</a>   |
| Description | When configured to <b>true</b> , the router automatically allocates a separate CPM hardware queue for the peer when a peering session is established.<br>When configured to <b>false</b> , a separate CPM hardware queue is not allowed. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**pki**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>pki</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> |
| Tree       | <a href="#">pki</a>  |
| Introduced | 16.0.R1  |

Platforms All

| Tree        | <a href="#">after-issue</a>   |
| Description | This command configures the time for scheduler updates after the certificate issue time.  |
| Range       | 864000 to 157680000   |
| Units       | seconds   |
| Notes       | The following elements are part of a choice: <b>after-issue</b> or <b>before-expiry</b> .   |

Introduced 22.10.R1  
 Platforms All

### **before-expiry** *number*

Synopsis Time scheduler updates before certificate expiry  
 Context **configure** [system security pki certificate-update-profile](#) *string* **before-expiry** *number*  
 Tree [before-expiry](#)  
 Description This command configures the time that the scheduler updates before the certificate expiration time.  
 Range 3600 to 157680000  
 Units seconds  
 Default 86400  
 Notes The following elements are part of a choice: **after-issue** or **before-expiry**.  
 Introduced 22.10.R1  
 Platforms All

### **cmpv2**

Synopsis Enter the **cmpv2** context  
 Context **configure** [system security pki certificate-update-profile](#) *string* **cmpv2**  
 Tree [cmpv2](#)  
 Notes The following elements are part of a choice: **cmpv2** or **est**.  
 Introduced 22.10.R1  
 Platforms All

### **ca-profile** *reference*

Synopsis CA profile name  
 Context **configure** [system security pki certificate-update-profile](#) *string* **cmpv2** [ca-profile](#) *reference*  
 Tree [ca-profile](#)  
 Description This command specifies the use of CMPv2 as the protocol to update the certificate. The CMPv2 configuration is derived from the referenced CA profile.  
 Reference **configure** [system security pki ca-profile](#) *string*  
 Introduced 22.10.R1

Platforms All

## dsa

Synopsis Enter the **dsa** context

Context **configure** [system](#) [security](#) [pki](#) [certificate-update-profile](#) *string* **dsa**

Tree [dsa](#)

Notes The following elements are part of a choice: **dsa**, **ecdsa**, **rsa**, or **same-as-existing-key**.

Introduced 22.10.R1

Platforms All

## key-size *number*

Synopsis Length of the generated DSA key

Context **configure** [system](#) [security](#) [pki](#) [certificate-update-profile](#) *string* **dsa** *key-size* *number*

Tree [key-size](#)

Description This command specifies that the newly generated key is an DSA key with the specified key length in bits.

Range 512 to 8192

Default 2048

Introduced 22.10.R1

Platforms All

## ecdsa

Synopsis Enter the **ecdsa** context

Context **configure** [system](#) [security](#) [pki](#) [certificate-update-profile](#) *string* **ecdsa**

Tree [ecdsa](#)

Notes The following elements are part of a choice: **dsa**, **ecdsa**, **rsa**, or **same-as-existing-key**.

Introduced 22.10.R1

Platforms All

## curve *keyword*

Synopsis Elliptic curve to be used in ECDSA key generation

|             |   |
|-------------|---|
| Context     | <b>configure system security pki certificate-update-profile</b> <i>string ecdsa curve keyword</i> |
| Tree        | <a href="#">curve</a>   |
| Description | This command specifies that the newly generated key is an ECDSA key with the specified curve.     |
| Options     | secp256r1, secp384r1, secp521r1   |
| Default     | secp256r1   |
| Introduced  | 22.10.R1  |
| Platforms   | All   |

## est

|            |   |
|------------|---|
| Synopsis   | Enter the <b>est</b> context  |
| Context    | <b>configure system security pki certificate-update-profile</b> <i>string est</i> |
| Tree       | <a href="#">est</a>   |
| Notes      | The following elements are part of a choice: <b>cmpv2</b> or <b>est</b> .         |
| Introduced | 22.10.R1  |
| Platforms  | All   |

## est-profile *reference*

|             |  |
|-------------|--|
| Synopsis    | EST profile name   |
| Context     | <b>configure system security pki certificate-update-profile</b> <i>string est est-profile reference</i>  |
| Tree        | <a href="#">est-profile</a>  |
| Description | This command specifies the use of EST as the protocol to update the certificate. The EST configuration is derived from the referenced EST profile. |
| Reference   | <b>configure system security pki est-profile</b> <i>string</i>   |
| Introduced  | 22.10.R1   |
| Platforms   | All  |

## hash-algorithm *keyword*

|             |  |
|-------------|--|
| Synopsis    | Hash algorithm for a certificate request   |
| Context     | <b>configure system security pki certificate-update-profile</b> <i>string hash-algorithm keyword</i> |
| Tree        | <a href="#">hash-algorithm</a>   |
| Description | This command specifies the hash algorithm used to generate a certificate request.                    |

|            |   |
|------------|---|
| Options    | md5, sha1, sha224, sha256, sha384, sha512 |
| Default    | sha256                                    |
| Introduced | 22.10.R1                                  |
| Platforms  | All                                       |

### **retry-interval** *number*

|             |   |
|-------------|---|
| Synopsis    | Retry interval after a failed update  |
| Context     | <b>configure</b> <a href="#">system security pki certificate-update-profile</a> <i>string</i> <b>retry-interval</b> <i>number</i> |
| Tree        | <a href="#">retry-interval</a>  |
| Description | This command configures the retry interval after the update fails.  |
| Range       | 60 to 36000   |
| Units       | seconds   |
| Default     | 3600  |
| Introduced  | 22.10.R1  |
| Platforms   | All   |

### **rsa**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rsa</b> context   |
| Context    | <b>configure</b> <a href="#">system security pki certificate-update-profile</a> <i>string</i> <b>rsa</b>               |
| Tree       | <a href="#">rsa</a>  |
| Notes      | The following elements are part of a choice: <b>dsa</b> , <b>ecdsa</b> , <b>rsa</b> , or <b>same-as-existing-key</b> . |
| Introduced | 22.10.R1   |
| Platforms  | All  |

### **key-size** *number*

|             |  |
|-------------|--|
| Synopsis    | Length of the generated RSA key  |
| Context     | <b>configure</b> <a href="#">system security pki certificate-update-profile</a> <i>string</i> <b>rsa</b> <b>key-size</b> <i>number</i> |
| Tree        | <a href="#">key-size</a>   |
| Description | This command specifies that the newly generated key is a RSA key with the specified key length in bits.                                |
| Range       | 512 to 8192  |
| Default     | 2048   |

Introduced 22.10.R1  
 Platforms All

### same-as-existing-key

Synopsis Generate the new key to same type and key length  
 Context **configure** [system security pki certificate-update-profile](#) *string* [same-as-existing-key](#)  
 Tree [same-as-existing-key](#)  
 Description When configured, this command specifies that the newly generated key is the same type and key length as the existing key.  
 Notes The following elements are part of a choice: **dsa**, **ecdsa**, **rsa**, or **same-as-existing-key**.  
 Introduced 22.10.R1  
 Platforms All

### common-name-list [[cn-list-name](#)] *string*

Synopsis Enter the **common-name-list** list instance  
 Context **configure** [system security pki common-name-list](#) *string*  
 Tree [common-name-list](#)  
 Max. Instances 64  
 Introduced 16.0.R1  
 Platforms All

### [\[cn-list-name\]](#) *string*

Synopsis CN list name  
 Context **configure** [system security pki common-name-list](#) *string*  
 Tree [common-name-list](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

**common-name** [[cn-index](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>common-name</b> list instance  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">common-name-list</a> <i>string</i> <a href="#">common-name</a> <i>number</i> |
| Tree       | <a href="#">common-name</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[cn-index]** *number*

|            |   |
|------------|---|
| Synopsis   | Common name index   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">common-name-list</a> <i>string</i> <a href="#">common-name</a> <i>number</i> |
| Tree       | <a href="#">common-name</a>   |
| Range      | 1 to 128  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**cn-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Common name type   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">common-name-list</a> <i>string</i> <a href="#">common-name</a> <i>number</i> <a href="#">cn-type</a> <i>keyword</i> |
| Tree       | <a href="#">cn-type</a>  |
| Options    | ip-address, domain-name  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**cn-value** *string*

|               |  |
|---------------|--|
| Synopsis      | Common name value  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">common-name-list</a> <i>string</i> <a href="#">common-name</a> <i>number</i> <a href="#">cn-value</a> <i>string</i> |
| Tree          | <a href="#">cn-value</a>   |
| String Length | 1 to 255   |

---

|            |                            |
|------------|----------------------------|
| Notes      | This element is mandatory. |
| Introduced | 16.0.R1                    |
| Platforms  | All                        |

### **crl-expiration-warning**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>crl-expiration-warning</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">crl-expiration-warning</a> |
| Tree       | <a href="#">crl-expiration-warning</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **hours** *number*

|            |  |
|------------|--|
| Synopsis   | Time before system generates CRL expiration warning trap   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">crl-expiration-warning</a> <b>hours</b> <i>number</i> |
| Tree       | <a href="#">hours</a>  |
| Range      | 0 to 8760  |
| Units      | hours  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **repeat-hours** *number*

|            |   |
|------------|---|
| Synopsis   | Time system repeats CRL expiration warning trap   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">crl-expiration-warning</a> <b>repeat-hours</b> <i>number</i> |
| Tree       | <a href="#">repeat-hours</a>  |
| Range      | 0 to 8760   |
| Units      | hours   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**est-profile** [*name*] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>est-profile</b> list instance   |
| Context        | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> |
| Tree           | <a href="#">est-profile</a>  |
| Description    | Commands in this context configure an Enrollment over Secure Transport (EST) profile.  |
| Max. Instances | 128  |
| Introduced     | 21.10.R1   |
| Platforms      | All  |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Enrollment over Secured Transport profile name   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> |
| Tree          | <a href="#">est-profile</a>  |
| Description   | This command configures the EST profile name.  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 21.10.R1   |
| Platforms     | All  |

**check-id-kp-cmcra-only** *boolean*

|            |  |
|------------|--|
| Synopsis   | Check id-kp-cmcra in the EST certificate   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">check-id-kp-cmcra-only</a> <i>boolean</i> |
| Tree       | <a href="#">check-id-kp-cmcra-only</a>   |
| Default    | false  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

**client-tls-profile** *string*

|          |   |
|----------|---|
| Synopsis | TLS client profile assigned to applications   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">client-tls-profile</a> <i>string</i> |
| Tree     | <a href="#">client-tls-profile</a>  |

|               |  |
|---------------|--|
| Description   | This command specifies the TLS client profile to be assigned to applications for encryption. The profile creates the TLS connection to the EST server. |
| String Length | 1 to 32  |
| Introduced    | 21.10.R1   |
| Platforms     | All  |

## http-authentication

|            |  |
|------------|--|
| Synopsis   | Enter the <b>http-authentication</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">http-authentication</a> |
| Tree       | <a href="#">http-authentication</a>  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

## password *string*

|               |   |
|---------------|---|
| Synopsis      | Password for EST authentication   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">http-authentication</a> <a href="#">password</a> <i>string</i> |
| Tree          | <a href="#">password</a>  |
| String Length | 1 to 115  |
| Introduced    | 21.10.R1  |
| Platforms     | All   |

## username *string*

|               |   |
|---------------|---|
| Synopsis      | Username for the EST authentication   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">http-authentication</a> <a href="#">username</a> <i>string</i> |
| Tree          | <a href="#">username</a>  |
| String Length | 1 to 32   |
| Introduced    | 21.10.R1  |
| Platforms     | All   |

## server

|          |                                 |
|----------|---------------------------------|
| Synopsis | Enter the <b>server</b> context |
|----------|---------------------------------|

|             |  |
|-------------|--|
| Context     | <b>configure system security pki est-profile string server</b> |
| Tree        | <b>server</b>  |
| Description | Commands in this context configure EST server parameters.      |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

### **fqdn string**

|               |   |
|---------------|---|
| Synopsis      | Fully Qualified Domain Name (FQDN) of the EST server                                      |
| Context       | <b>configure system security pki est-profile string server fqdn string</b>                |
| Tree          | <b>fqdn</b>   |
| Description   | This command specifies to use the FQDN of the EST server.                                 |
| String Length | 1 to 255  |
| Notes         | The following elements are part of a choice: <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> . |
| Introduced    | 21.10.R1  |
| Platforms     | All   |

### **ipv4 string**

|            |   |
|------------|---|
| Synopsis   | IPv4 address of the EST server  |
| Context    | <b>configure system security pki est-profile string server ipv4 string</b>                |
| Tree       | <b>ipv4</b>   |
| Notes      | The following elements are part of a choice: <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> . |
| Introduced | 21.10.R1  |
| Platforms  | All   |

### **ipv6 (ipv4-address-no-zone | ipv6-address-no-zone)**

|            |   |
|------------|---|
| Synopsis   | IPv6 address of the EST server  |
| Context    | <b>configure system security pki est-profile string server ipv6 (ipv4-address-no-zone   ipv6-address-no-zone)</b> |
| Tree       | <b>ipv6</b>   |
| Notes      | The following elements are part of a choice: <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .                         |
| Introduced | 21.10.R1  |
| Platforms  | All   |

**port number**

|            |  |
|------------|--|
| Synopsis   | Port number of the EST server  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">server</a> <i>port number</i> |
| Tree       | <a href="#">port</a>   |
| Range      | 1 to 65535   |
| Default    | 443  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

**transmission-profile string**

|               |   |
|---------------|---|
| Synopsis      | Transmission profile name for EST   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">est-profile</a> <i>string</i> <a href="#">transmission-profile</a> <i>string</i>   |
| Tree          | <a href="#">transmission-profile</a>  |
| Description   | This command associates a file transmission profile to the EST profile.<br>The transmission profile defines transport parameters for protocol such as HTTP, include routing instance, source address, timeout value, and so on. |
| String Length | 1 to 32   |
| Introduced    | 21.10.R1  |
| Platforms     | All   |

**imported-format keyword**

|            |   |
|------------|---|
| Synopsis   | The supported encrypted file formats  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">imported-format</a> <i>keyword</i> |
| Tree       | <a href="#">imported-format</a>   |
| Options    | any, secure   |
| Default    | any   |
| Introduced | 16.0.R6   |
| Platforms  | All   |

**maximum-cert-chain-depth number**

|          |   |
|----------|---|
| Synopsis | Maximum depth of certificate chain verification |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">system security pki maximum-cert-chain-depth</a> <i>number</i> |
| Tree       | <a href="#">maximum-cert-chain-depth</a>  |
| Range      | 1 to 7  |
| Default    | 7   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## python-script

|            |  |
|------------|--|
| Synopsis   | Enter the <b>python-script</b> context                         |
| Context    | <b>configure</b> <a href="#">system security python-script</a> |
| Tree       | <a href="#">python-script</a>                                  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

## authorization

|            |  |
|------------|--|
| Synopsis   | Enter the <b>authorization</b> context                                       |
| Context    | <b>configure</b> <a href="#">system security python-script authorization</a> |
| Tree       | <a href="#">authorization</a>  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

## cron

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cron</b> context   |
| Context    | <b>configure</b> <a href="#">system security python-script authorization cron</a> |
| Tree       | <a href="#">cron</a>  |
| Introduced | 21.10.R1  |
| Platforms  | All   |

## cli-user reference

|          |   |
|----------|---|
| Synopsis | User profile name when executing a Python application   |
| Context  | <b>configure</b> <a href="#">system security python-script authorization cron cli-user</a> <i>reference</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">cli-user</a>   |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> |
| Introduced | 21.10.R1   |
| Platforms  | All  |

## event-handler

|            |  |
|------------|--|
| Synopsis   | Enter the <b>event-handler</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">python-script</a> <a href="#">authorization</a> <a href="#">event-handler</a> |
| Tree       | <a href="#">event-handler</a>  |

## source-address

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>source-address</b> context  |
| Context     | <b>configure system security source-address</b>  |
| Tree        | <a href="#">source-address</a>   |
| Description | <p>Commands in this context configure the IP source address that is used in all unsolicited packets sent by the specified applications.</p> <p>This configuration applies to packets transmitted in-band (for example, a network port on an IOM) and does not apply to packets transmitted out-of-band on the management interface on the CPM Ethernet port. Packets transmitted using the CPM Ethernet port use the address of the CPM Ethernet port as the IP source address in the packet.</p> <p>When a source address is specified for the PTP application, the port-based 1588 hardware timestamping assist function is applied to PTP packets matching the IPv4 address of the router interface used to ingress the SR/ESS or IP address specified in this command. If the IP address is removed, the port-based 1588 hardware timestamping assist function is only applied to PTP packets matching the IPv4 address of the router interface.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## ipv4 [[application](#)] *keyword*

|            |   |

## client-kex-list-v2

Synopsis Enter the **client-kex-list-v2** context

Context **configure** [system security ssh client-kex-list-v2](#)

Tree [client-kex-list-v2](#)

Introduced 19.10.R3

Platforms All

## **kex** [[index](#)] *number*

Synopsis Enter the **kex** list instance

Context **configure** [system security ssh client-kex-list-v2 kex number](#)

Tree [kex](#)

Description Commands in this context configure SSH Key Exchange (KEX) algorithms for SR OS as a client.

If a list is configured, SSH uses the list with the first-listed algorithm having the highest priority.

By default, the client list is empty. The default list contains the following:

- diffie-hellman-group16-sha512
- diffie-hellman-group14-sha256
- diffie-hellman-group14-sha1
- diffie-hellman-group1-sha1

Introduced 19.10.R3

Platforms All

## [\[index\]](#) *number*

Synopsis SSHv2 KEX algorithm index

Context **configure** [system security ssh client-kex-list-v2 kex number](#)

Tree [kex](#)

Description This command configures the index of the KEX algorithm in the list. The lowest index in the list is negotiated first on the SSH negotiation list, while the highest index is at the bottom of the SSH negotiation list.

Range 1 to 255

Introduced 16.0.R1

Platforms All

### **admin-password** *string*

Synopsis Context to configure system passwords

Context **configure** [system](#) [security](#) [system-passwords](#) [admin-password](#) *string*

Tree [admin-password](#)

Description This command allows a user with administrative permissions to configure a password that enables a user to become an administrator.

This password is valid only for one session. When enabled, no authorization to TACACS + or RADIUS is performed and the user is locally regarded as an administrative user.

If the **admin-password** is configured in the **configure system security system-passwords admin-password** context, then any user can enter the special mode by entering the **enable** command.

**enable** is in the default profile. By default, all users are given access to this command.

After the **enable** command is entered, the user is prompted for a password. If the password matches, user is given unrestricted access to all commands.

The minimum length of the password is determined by the **minimum-length** command. The complexity requirements for the password are determined by the **complexity** command.

**Note:** This command applies to a local user, in addition to users on RADIUS, TACACS, and LDAP.

|               |          |

Options [tls-ecdhe-256](#), [tls-ecdhe-384](#), [tls-ecdhe-521](#), [tls-x25519](#), [tls-x448](#)

Notes This element is mandatory.

Introduced 22.7.R1

Platforms All

### **server-signature-list** [[server-signature-list-name](#)] *string*

Synopsis Enter the **server-signature-list** list instance

Context **configure** [system](#) [security](#) [tls](#) [server-signature-list](#) *string*

Tree [server-signature-list](#)

Description Commands in this context configure the list of TLS 1.3-supported signature suite codes for the digital signature that the server sends in a server Hello message.

Max. Instances 16

Introduced 22.7.R1

Platforms All

### **[server-signature-list-name]** *string*

Synopsis Name of the TLS 1.3 server signature list

Context **configure** [system](#) [security](#) [tls](#) [server-signature-list](#) *string*

Tree [server-signature-list](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 22.7.R1

Platforms All

**tls13-signature** [[index](#)] *number*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>tls13-signature</b> list instance   |
| Context     | <b>configure</b> <a href="#">system security tls server-signature-list</a> <i>string</i> <a href="#">tls13-signature</a> <i>number</i> |
| Tree        | <a href="#">tls13-signature</a>  |
| Description | Commands in this context configure the TLS 1.3-supported signature suite codes sent by the server in its Hello messages.               |
| Introduced  | 22.7.R1  |
| Platforms   | All  |

**[index]** *number*

|            |  |
|------------|--|
| Synopsis   | Index number of the TLS 1.3 signature  |
| Context    | <b>configure</b> <a href="#">system security tls server-signature-list</a> <i>string</i> <a href="#">tls13-signature</a> <i>number</i> |
| Tree       | <a href="#">tls13-signature</a>  |
| Range      | 1 to 255   |
| Notes      | This element is part of a list key.  |
| Introduced | 22.7.R1  |
| Platforms  | All  |

**name** *keyword*

|            |   |
|------------|---|
| Synopsis   | Name of the TLS 1.3 signature suite code  |
| Context    | <b>configure</b> <a href="#">system security tls server-signature-list</a> <i>string</i> <a href="#">tls13-signature</a> <i>number</i> <b>name</b> <i>keyword</i>   |
| Tree       | <a href="#">name</a>  |
| Options    | tls-rsa-pkcs1-sha256, tls-ecdsa-secp256r1-sha256, tls-rsa-pkcs1-sha384, tls-ecdsa-secp384r1-sha384, tls-rsa-pkcs1-sha512, tls-ecdsa-secp521r1-sha512, tls-rsa-pss-rsae-sha256, tls-rsa-pss-rsae-sha384, tls-rsa-pss-rsae-sha512, tls-ed25519, tls-ed448, tls-rsa-pss-pss-sha256, tls-rsa-pss-pss-sha384, tls-rsa-pss-pss-sha512 |
| Notes      | This element is mandatory.  |
| Introduced | 22.7.R1   |
| Platforms  | All   |

**server-tls-profile** [[server-profile-name](#)] *string*

|          |   |
|----------|---|
| Synopsis | Enter the <b>server-tls-profile</b> list instance |
|----------|---|

|                |   |
|----------------|---|
| Context        | <b>configure system security tls server-tls-profile</b> <i>string</i> |
| Tree           | <a href="#">server-tls-profile</a>                                    |

| Introduced     | 16.0.R1   |
| Platforms      | All   |

### **[server-profile-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | TLS server profile name   |
| Context       | <b>configure system security tls server-tls-profile</b> <i>string</i> |
| Tree          | <a href="#">server-tls-profile</a>                                    |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.                                   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the server TLS profile  |
| Context    | <b>configure system security tls server-tls-profile</b> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **authenticate-client**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>authenticate-client</b> context   |
| Context    | <b>configure system security tls server-tls-profile</b> <i>string</i> <b>authenticate-client</b> |
| Tree       | <a href="#">authenticate-client</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **common-name-list** *reference*

|            |   |
|------------|---|
| Synopsis   | Common name list for client certificate authentication  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">authenticate-client</a> <a href="#">common-name-list</a> <i>reference</i> |
| Tree       | <a href="#">common-name-list</a>  |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">pki</a> <a href="#">common-name-list</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **trust-anchor-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Trust anchor profile for client authentication  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">authenticate-client</a> <a href="#">trust-anchor-profile</a> <i>reference</i> |
| Tree       | <a href="#">trust-anchor-profile</a>  |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">trust-anchor-profile</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **cert-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Certificate profile ID  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">cert-profile</a> <i>reference</i> |
| Tree       | <a href="#">cert-profile</a>  |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">cert-profile</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **cipher-list** *reference*

|            |  |
|------------|--|
| Synopsis   | Cipher list used by the TLS server profile   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-tls-profile</a> <i>string</i> <a href="#">cipher-list</a> <i>reference</i> |
| Tree       | <a href="#">cipher-list</a>  |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">server-cipher-list</a> <i>string</i>  |
| Introduced | 16.0.R1  |

Platforms All

### **group-list** *reference*

Synopsis Name of the list of supported group suite codes

Context **configure** [system](#) [security](#) [tls](#) [server-tls-profile](#) *string* [group-list](#) *reference*

Tree [group-list](#)

Description This command assigns an existing TLS 1.3 group list to the TLS server profile.

Reference **configure** [system](#) [security](#) [tls](#) [server-group-list](#) *string*

Introduced 22.7.R1

Platforms All

### **protocol-version** *keyword*

Synopsis TLS protocol version used by the TLS server profile

Context **configure** [system](#) [security](#) [tls](#) [server-tls-profile](#) *string* [protocol-version](#) *keyword*

Tree [protocol-version](#)

Description This command configures the TLS version to be negotiated between the server and the client.  
The server adds the specified version as a supported version in its Hello message to the client.

Options [tls-version-all](#), [tls-version-12](#), [tls-version-13](#)

Default [tls-version-12](#)

Introduced 22.7.R1

Platforms All

### **signature-list** *reference*

Synopsis Name of the list of supported signature suite codes

Context **configure** [system](#) [security](#) [tls](#) [server-tls-profile](#) *string* [signature-list](#) *reference*

Tree [signature-list](#)

Description This command assigns an existing TLS 1.3 signature list to the TLS server profile.

Reference **configure** [system](#) [security](#) [tls](#) [server-signature-list](#) *string*

Introduced 22.7.R1

Platforms All

**tls-re-negotiate-timer** *number*

|            |   |
|------------|---|
| Synopsis   | TLS HELLO request timer   |
| Context    | <b>configure</b> <a href="#">system security tls server-tls-profile</a> <i>string</i> <b>tls-re-negotiate-timer</b> <i>number</i> |
| Tree       | <a href="#">tls-re-negotiate-timer</a>  |
| Range      | 0 to 65000  |
| Units      | minutes   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**trust-anchor-profile** [[trust-anchor-profile-name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>trust-anchor-profile</b> list instance                                     |
| Context        | <b>configure</b> <a href="#">system security tls trust-anchor-profile</a> <i>string</i> |
| Tree           | <a href="#">trust-anchor-profile</a>  |
| Max. Instances | 16  |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

**[trust-anchor-profile-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Trust anchor profile name   |
| Context       | <b>configure</b> <a href="#">system security tls trust-anchor-profile</a> <i>string</i> |
| Tree          | <a href="#">trust-anchor-profile</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**trust-anchor** [[ca-profile-name](#)] *reference*

|          |  |
|----------|--|
| Synopsis | Add a list entry for <b>trust-anchor</b>   |
| Context  | <b>configure</b> <a href="#">system security tls trust-anchor-profile</a> <i>string</i> <b>trust-anchor</b> <i>reference</i> |

|                |                              |
|----------------|------------------------------|
| Tree           | <a href="#">trust-anchor</a> |
| Max. Instances | 8                            |
| Introduced     | 16.0.R1                      |
| Platforms      | All                          |

### [ca-profile-name] *reference*

|            |   |
|------------|---|
| Synopsis   | Trusted CA profile name   |
| Context    | <b>configure</b> <a href="#">system security tls trust-anchor-profile</a> <i>string</i> <a href="#">trust-anchor</a> <i>reference</i> |
| Tree       | <a href="#">trust-anchor</a>  |
| Reference  | <b>configure</b> <a href="#">system security pki ca-profile</a> <i>string</i>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### user-params

|            |  |
|------------|--|
| Synopsis   | Enter the <b>user-params</b> context                         |
| Context    | <b>configure</b> <a href="#">system security user-params</a> |
| Tree       | <a href="#">user-params</a>                                  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### attempts

|            |   |
|------------|---|
| Synopsis   | Enter the <b>attempts</b> context                                     |
| Context    | <b>configure</b> <a href="#">system security user-params attempts</a> |
| Tree       | <a href="#">attempts</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### count *number*

|          |                                       |
|----------|---------------------------------------|
| Synopsis | Number of unsuccessful login attempts |
|----------|---------------------------------------|

---

|            |   |
|------------|---|
| Context    | <b>configure system security user-params attempts count</b> <i>number</i> |
| Tree       | <a href="#">count</a>   |
| Range      | 1 to 64   |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **lockout** *number*

|            |   |
|------------|---|
| Synopsis   | Lockout period after unsuccessful login attempts                            |
| Context    | <b>configure system security user-params attempts lockout</b> <i>number</i> |
| Tree       | <a href="#">lockout</a>   |
| Range      | 0 to 1440   |
| Units      | minutes   |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **time** *number*

|            |  |
|------------|--|
| Synopsis   | Time frame of unsuccessful login attempts                                |
| Context    | <b>configure system security user-params attempts time</b> <i>number</i> |
| Tree       | <a href="#">time</a>   |
| Range      | 0 to 60  |
| Units      | minutes  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **authentication-order**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>authentication-order</b> context                     |
| Context    | <b>configure system security user-params authentication-order</b> |
| Tree       | <a href="#">authentication-order</a>                              |
| Introduced | 16.0.R1   |

Platforms All

### **exit-on-reject** *boolean*

Synopsis Ignore subsequent AAA methods after a reject  
Context **configure** [system](#) [security](#) [user-params](#) [authentication-order](#) **exit-on-reject** *boolean*  
Tree [exit-on-reject](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **order** *keyword*

Synopsis Preferred order of password authentication  
Context **configure** [system](#) [security](#) [user-params](#) [authentication-order](#) **order** *keyword*  
Tree [order](#)  
Options local, radius, tacplus, ldap  
Max. Instances 4  
Notes This element is ordered by the user.  
Introduced 16.0.R1  
Platforms All

### **local-user**

Synopsis Enter the **local-user** context  
Context **configure** [system](#) [security](#) [user-params](#) **local-user**  
Tree [local-user](#)  
Introduced 16.0.R1  
Platforms All

### **password**

Synopsis Enter the **password** context  
Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) **password**

---

|            |                          |
|------------|--------------------------|

| Notes      | The following elements are part of a choice: <b>credits</b> or <b>required</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **lowercase** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum credits for the use of lowercase letters   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">credits</a><br><a href="#">lowercase</a> <i>number</i> |
| Tree       | <a href="#">lowercase</a>  |
| Range      | 1 to 10  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **numeric** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum credits for the use of numeric characters  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">credits</a><br><a href="#">numeric</a> <i>number</i> |
| Tree       | <a href="#">numeric</a>  |
| Range      | 1 to 10  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **special-character** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum credits for the use of special characters  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">credits</a><br><a href="#">special-character</a> <i>number</i> |
| Tree       | <a href="#">special-character</a>  |
| Range      | 1 to 10  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**uppercase** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum credits for the use of uppercase letters   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">credits</a><br><a href="#">uppercase</a> <i>number</i> |
| Tree       | <a href="#">uppercase</a>  |
| Range      | 1 to 10  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**minimum-classes** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum number of different character classes to use  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">minimum-classes</a> <i>number</i> |
| Tree       | <a href="#">minimum-classes</a>   |
| Range      | 2 to 4  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**minimum-length** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum length required for local passwords  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">minimum-length</a> <i>number</i> |
| Tree       | <a href="#">minimum-length</a>   |
| Range      | 6 to 50  |
| Default    | 6  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**repeated-characters** *number*

|          |   |
|----------|---|
| Synopsis | Number of times same character can repeat consecutively   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">repeated-characters</a> <i>number</i> |
| Tree     | <a href="#">repeated-characters</a>   |

---

|            |         |
|------------|---------|
| Range      | 2 to 8  |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **required**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>required</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">required</a> |
| Tree       | <a href="#">required</a>   |
| Notes      | The following elements are part of a choice: <b>credits</b> or <b>required</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **lowercase number**

|            |  |
|------------|--|
| Synopsis   | Number of lowercase letters required   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">required</a> <a href="#">lowercase</a> <i>number</i> |
| Tree       | <a href="#">lowercase</a>  |
| Range      | 1 to 10  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **numeric number**

|            |  |
|------------|--|
| Synopsis   | Number of numeric characters required  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">required</a> <a href="#">numeric</a> <i>number</i> |
| Tree       | <a href="#">numeric</a>  |
| Range      | 1 to 10  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **special-character number**

|          |                                       |
|----------|---------------------------------------|
| Synopsis | Number of special characters required |
|----------|---------------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">required</a> <a href="#">special-character</a> <i>number</i> |
| Tree       | <a href="#">special-character</a>  |
| Range      | 1 to 10  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **uppercase** *number*

|            |  |
|------------|--|
| Synopsis   | Number of uppercase letters required   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">complexity-rules</a> <a href="#">required</a> <a href="#">uppercase</a> <i>number</i> |
| Tree       | <a href="#">uppercase</a>  |
| Range      | 1 to 10  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **hashing** *keyword*

|            |   |
|------------|---|
| Synopsis   | Hashing algorithm for user passwords  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">hashing</a> <i>keyword</i> |
| Tree       | <a href="#">hashing</a>   |
| Options    | bcrypt, sha2-pbkdf2, sha3-pbkdf2  |
| Default    | bcrypt  |
| Introduced | 20.7.R1   |
| Platforms  | All   |

### **history-size** *number*

|            |   |
|------------|---|
| Synopsis   | Number of previous passwords to compare against   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">password</a> <a href="#">history-size</a> <i>number</i> |
| Tree       | <a href="#">history-size</a>  |
| Range      | 0 to 20   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**minimum-age** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum age required for a password before changing it   |
| Context    | <b>configure</b> <a href="#">system security user-params local-user password minimum-age</a> <i>number</i> |
| Tree       | <a href="#">minimum-age</a>  |
| Range      | 0 to 86400   |
| Units      | seconds  |
| Default    | 600  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**minimum-change** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum character differences between passwords   |
| Context    | <b>configure</b> <a href="#">system security user-params local-user password minimum-change</a> <i>number</i> |
| Tree       | <a href="#">minimum-change</a>  |
| Range      | 1 to 20   |
| Default    | 5   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**user** [[user-name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>user</b> list instance  |
| Context    | <b>configure</b> <a href="#">system security user-params local-user user</a> <i>string</i> |
| Tree       | <a href="#">user</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[user-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Local user name  |
| Context       | <b>configure</b> <a href="#">system security user-params local-user user</a> <i>string</i> |
| Tree          | <a href="#">user</a>   |
| String Length | 1 to 32  |

---

|            |                                     |
|------------|-------------------------------------|
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R1                             |
| Platforms  | All                                 |

### **access**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>access</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <b>access</b> |
| Tree       | <a href="#">access</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **console** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow console port, Telnet, and SSH access  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>console</b> <i>boolean</i> |
| Tree       | <a href="#">console</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ftp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow FTP access  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>ftp</b> <i>boolean</i> |
| Tree       | <a href="#">ftp</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **grpc** *boolean*

|          |  |
|----------|--|
| Synopsis | Allow gRPC access  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>grpc</b> <i>boolean</i> |
| Tree     | <a href="#">grpc</a>   |

---

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **li** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow access to LI   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>li</b> <i>boolean</i> |
| Tree       | <a href="#">li</a>   |
| Default    | false  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

### **netconf** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow NETCONF access  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>netconf</b> <i>boolean</i> |
| Tree       | <a href="#">netconf</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **snmp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow SNMP access  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">access</a> <b>snmp</b> <i>boolean</i> |
| Tree       | <a href="#">snmp</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **cli-engine** *keyword*

|          |   |
|----------|---|
| Synopsis | User level override for CLI engine access   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <b>cli-engine</b> <i>keyword</i> |

|                |                                      |
|----------------|--------------------------------------|
| Tree           | <a href="#">cli-engine</a>           |
| Options        | classic-cli, md-cli                  |
| Default        | md-cli                               |
| Max. Instances | 2                                    |
| Notes          | This element is ordered by the user. |
| Introduced     | 16.0.R1                              |
| Platforms      | All                                  |

## console

|            |   |
|------------|---|
| Synopsis   | Enter the <b>console</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <b>console</b> |
| Tree       | <a href="#">console</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## cannot-change-password *boolean*

|            |  |
|------------|--|
| Synopsis   | Change password privileges   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <b>console</b> <b>cannot-change-password</b> <i>boolean</i> |
| Tree       | <a href="#">cannot-change-password</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## login-exec (*sat-url* | *cflash-url* | *ftp-tftp-url* | *filename*)

|               |  |
|---------------|--|
| Synopsis      | File to execute when a user successfully logs in   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <b>console</b> <b>login-exec</b> ( <i>sat-url</i>   <i>cflash-url</i>   <i>ftp-tftp-url</i>   <i>filename</i> ) |
| Tree          | <a href="#">login-exec</a>   |
| String Length | 1 to 200   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**member** *reference*

|                |  |
|----------------|--|
| Synopsis       | User profiles for this user  |
| Context        | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">console</a> <a href="#">member</a> <i>reference</i> |
| Tree           | <a href="#">member</a>   |
| Reference      | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">aaa</a> <a href="#">local-profiles</a> <a href="#">profile</a> <i>string</i>  |
| Max. Instances | 8  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

**new-password-at-login** *boolean*

|            |   |
|------------|---|
| Synopsis   | Prompt a user to change password at next console login  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">console</a> <a href="#">new-password-at-login</a> <i>boolean</i> |
| Tree       | <a href="#">new-password-at-login</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**home-directory** (*sat-url* | *cflash-without-slot-url*)

|               |   |
|---------------|---|
| Synopsis      | Home directory for the user   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">home-directory</a> ( <i>sat-url</i>   <i>cflash-without-slot-url</i> ) |
| Tree          | <a href="#">home-directory</a>  |
| String Length | 1 to 200  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**password** *string*

|          |  |
|----------|--|
| Synopsis | User password for console and FTP access |
|----------|--|

|               |   |
|---------------|---|
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">password</a> <i>string</i> |
| Tree          | <a href="#">password</a>  |
| String Length | 3 to 136  |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

## public-keys

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>public-keys</b> context   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> |
| Tree        | <a href="#">public-keys</a>  |
| Description | Commands in this context configure public keys for SSH.  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## ecdsa

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>ecdsa</b> context   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">ecdsa</a> |
| Tree        | <a href="#">ecdsa</a>  |
| Description | Commands in this context configure Elliptic Curve Digital Signature Algorithm (ECDSA) public keys.   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## ecdsa-key [[ecdsa-public-key-id](#)] *number*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>ecdsa-key</b> list instance   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">ecdsa</a> <a href="#">ecdsa-key</a> <i>number</i> |
| Tree        | <a href="#">ecdsa-key</a>  |
| Description | Commands in this context configure an ECDSA public key and associate the key with a username. A user can associate multiple public keys with a username. The key ID identifies these keys for the user.  |
| Introduced  | 16.0.R1  |

Platforms All

### **[ecdsa-public-key-id] number**

Synopsis ECDSA public key identifier

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [user](#) *string* [public-keys](#) [ecdsa](#) [ecdsa-key](#) *number*

Tree [ecdsa-key](#)

Range 1 to 32

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **description string**

Synopsis Text description

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [user](#) *string* [public-keys](#) [ecdsa](#) [ecdsa-key](#) *number* [description](#) *string*

Tree [description](#)

String Length 1 to 80

Introduced 16.0.R1

Platforms All

### **key-value string**

Synopsis ECDSA public key value

Context **configure** [system](#) [security](#) [user-params](#) [local-user](#) [user](#) *string* [public-keys](#) [ecdsa](#) [ecdsa-key](#) *number* [key-value](#) *string*

Tree [key-value](#)

Description This command configures a value for the ECDSA public key. The public key must be enclosed in quotation marks. For ECDSA, the key is between 1 and 1024 bits.

String Length 1 to 255

Introduced 16.0.R1

Platforms All

**rsa**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>rsa</b> context   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">rsa</a> |
| Tree        | <a href="#">rsa</a>  |
| Description | Commands in this context configure RSA public keys.  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**rsa-key** [[rsa-public-key-id](#)] *number*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>rsa-key</b> list instance   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">rsa</a> <a href="#">rsa-key</a> <i>number</i> |
| Tree        | <a href="#">rsa-key</a>  |
| Description | Commands in this context configure an RSA public key and associate the key with a username. A user can associate multiple public keys with a username. The key ID identifies these keys for the user.  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**[rsa-public-key-id]** *number*

|            |  |
|------------|--|
| Synopsis   | RSA public key identifier  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">rsa</a> <a href="#">rsa-key</a> <i>number</i> |
| Tree       | <a href="#">rsa-key</a>  |
| Range      | 1 to 32  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**description** *string*

|          |  |
|----------|--|
| Synopsis | Text description   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">rsa</a> <a href="#">rsa-key</a> <i>number</i> <a href="#">description</a> <i>string</i> |

|               |                             |
|---------------|-----------------------------|
| Tree          | <a href="#">description</a> |
| String Length | 1 to 80                     |
| Introduced    | 16.0.R1                     |
| Platforms     | All                         |

### **key-value** *string*

|               |   |
|---------------|---|
| Synopsis      | RSA public key value  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">public-keys</a> <a href="#">rsa</a> <a href="#">rsa-key</a> <a href="#">number</a> <a href="#">key-value</a> <i>string</i> |
| Tree          | <a href="#">key-value</a>   |
| Description   | This command configures a value for the RSA public key. The public key must be enclosed in quotation marks. For RSA, the key is between 768 and 4096 bits.  |
| String Length | 1 to 800  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **restricted-to-home** *boolean*

|            |  |
|------------|--|
| Synopsis   | Restrict file access to the home directory of the user   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">restricted-to-home</a> <i>boolean</i> |
| Tree       | <a href="#">restricted-to-home</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **save-when-restricted** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Save configurations when the user is restricted to home  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">save-when-restricted</a> <i>boolean</i>   |
| Tree        | <a href="#">save-when-restricted</a>   |
| Description | When configured to <b>true</b> , the system permits all configuration save operations (such as <b>admin save</b> ) via any management interface (such as CLI and NETCONF) even if <b>restricted-to-home</b> is set to <b>true</b> . The home directory does not need to be configured. |
| Default     | false  |

|            |          |
|------------|----------|
| Introduced | 22.10.R1 |
| Platforms  | All      |

## snmp

|            |  |
|------------|--|
| Synopsis   | Enter the <b>snmp</b> context  |
| Context    | <b>configure</b> <a href="#">system security user-params local-user user string snmp</a> |
| Tree       | <a href="#">snmp</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## authentication

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>authentication</b> context   |
| Context     | <b>configure</b> <a href="#">system security user-params local-user user string snmp authentication</a>  |
| Tree        | <a href="#">authentication</a>   |
| Description | <p>Commands in this context configure the SNMPv3 authentication and privacy protocols for the user to communicate with the router. The keys are stored in an encrypted format in the configuration.</p> <p>The keys configured with these commands must be localized keys, which are a hash of the SNMP engine ID and a password. The password is not entered directly in this command. Use the <b>tools perform system management-interface snmp generate-key</b> command to generate localized authentication and privacy keys.</p> <p>If authentication is not configured, only the username is required to allow and authenticate SNMPv3 operations.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## authentication-key *string*

|             |  |
|-------------|--|
| Synopsis    | Localized authentication key   |
| Context     | <b>configure</b> <a href="#">system security user-params local-user user string snmp authentication authentication-key string</a>  |
| Tree        | <a href="#">authentication-key</a>   |
| Description | <p>This command specifies the authentication key for the authentication protocol. The key must be a localized key, which is a hash of the SNMP engine ID and a password. The password is not entered directly in this command. Use the <b>tools perform system</b></p> |

**management-interface snmp generate-key** command to generate a localized authentication key.

|               |          |
|---------------|----------|
| String Length | 1 to 115 |
| Introduced    | 16.0.R1  |
| Platforms     | All      |

### **authentication-protocol** *keyword*

|            |   |
|------------|---|
| Synopsis   | Authentication protocol   |
| Context    | <b>configure</b> <a href="#">system security user-params local-user user</a> <i>string</i> <a href="#">snmp authentication authentication-protocol</a> <i>keyword</i> |
| Tree       | <a href="#">authentication-protocol</a>   |
| Options    | hmac-md5-96, hmac-sha1-96, hmac-sha2-224, hmac-sha2-256, hmac-sha2-384, hmac-sha2-512   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **privacy**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>privacy</b> context  |
| Context    | <b>configure</b> <a href="#">system security user-params local-user user</a> <i>string</i> <a href="#">snmp authentication privacy</a> |
| Tree       | <a href="#">privacy</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **privacy-key** *string*

|               |   |
|---------------|---|
| Synopsis      | Localized privacy key   |
| Context       | <b>configure</b> <a href="#">system security user-params local-user user</a> <i>string</i> <a href="#">snmp authentication privacy privacy-key</a> <i>string</i>  |
| Tree          | <a href="#">privacy-key</a>   |
| Description   | This command specifies the privacy key for the privacy protocol. The key must be a localized key, which is a hash of the SNMP engine ID and a password. The password is not entered directly in this command. Use the <b>tools perform system management-interface snmp generate-key</b> command to generate a localized privacy key. |
| String Length | 1 to 71   |

|            |                            |
|------------|----------------------------|
| Notes      | This element is mandatory. |
| Introduced | 16.0.R1                    |
| Platforms  | All                        |

### privacy-protocol *keyword*

|            |  |
|------------|--|
| Synopsis   | Privacy protocol   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">snmp</a> <a href="#">authentication</a> <a href="#">privacy</a> <a href="#">privacy-protocol</a> <i>keyword</i> |
| Tree       | <a href="#">privacy-protocol</a>   |
| Options    | cbc-des, cfb128-aes-128, cfb128-aes-192, cfb128-aes-256  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### group *string*

|               |   |
|---------------|---|
| Synopsis      | User to associate with a group name   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">user-params</a> <a href="#">local-user</a> <a href="#">user</a> <i>string</i> <a href="#">snmp</a> <a href="#">group</a> <i>string</i> |
| Tree          | <a href="#">group</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### vprn-network-exceptions

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>vprn-network-exceptions</b> context   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">vprn-network-exceptions</a>  |
| Tree        | <a href="#">vprn-network-exceptions</a>   |
| Description | <p>Commands in this context configure the rate limiting attributes for processing packets with label TTL expiry received within an LSP shortcut or VPRN instances in the system and from all network IP interfaces. This includes labeled user and control plan packets, ping, and traceroute packets within GRT and VPRN, and ICMP replies.</p> <p>These commands do not rate limit MPLS or service OAM packets.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**count** *number*

|             |  |
|-------------|--|
| Synopsis    | Limit of exception messages received   |
| Context     | <b>configure</b> <a href="#">system security vprn-network-exceptions count</a> <i>number</i>   |
| Tree        | <a href="#">count</a>  |
| Description | This command specifies the threshold limit of exception messages. If the threshold value is exceeded within the configured time interval, packets are dropped. |
| Range       | 10 to 1000   |
| Default     | 100  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**window** *number*

|             |   |
|-------------|---|
| Synopsis    | Time interval to measure exception messages   |
| Context     | <b>configure</b> <a href="#">system security vprn-network-exceptions window</a> <i>number</i>   |
| Tree        | <a href="#">window</a>  |
| Description | This command configures the time interval within which exception messages are counted. If the threshold value is exceeded within the configured time interval, packets are dropped. |
| Range       | 1 to 60   |
| Units       | seconds   |
| Default     | 10  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**selective-fib** *boolean*

|            |  |
|------------|--|
| Synopsis   | FIB assigned to the system   |
| Context    | <b>configure</b> <a href="#">system selective-fib</a> <i>boolean</i> |
| Tree       | <a href="#">selective-fib</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS         |

**software-repository** [[repository-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>software-repository</b> list instance  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i> |
| Tree       | <a href="#">software-repository</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                              |

**[repository-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Software repository name  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i> |
| Tree          | <a href="#">software-repository</a>   |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                              |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**primary-location** *string*

|               |  |
|---------------|--|
| Synopsis      | Primary location for files in the software repository  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i> <a href="#">primary-location</a> <i>string</i> |
| Tree          | <a href="#">primary-location</a>   |
| String Length | 1 to 180   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **secondary-location** *string*

|               |  |
|---------------|--|
| Synopsis      | Secondary location for files in the software repository  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i> <a href="#">secondary-location</a> <i>string</i> |
| Tree          | <a href="#">secondary-location</a>   |
| String Length | 1 to 180   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **tertiary-location** *string*

|               |   |
|---------------|---|
| Synopsis      | Tertiary location for files in the software repository  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">software-repository</a> <i>string</i> <a href="#">tertiary-location</a> <i>string</i> |
| Tree          | <a href="#">tertiary-location</a>   |
| String Length | 1 to 180  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **switch-fabric**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>switch-fabric</b> context   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">switch-fabric</a>                    |
| Tree        | <a href="#">switch-fabric</a>  |
| Description | Commands in this context configure system level attributes related to the switch fabric. |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR-7, 7750 SR-7s, 7750 SR-14s, 7950 XRS-20, 7950 XRS-40                   |

### **failure-recovery**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>failure-recovery</b> context   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">switch-fabric</a> <a href="#">failure-recovery</a>  |
| Tree        | <a href="#">failure-recovery</a>  |
| Description | Commands in this context configure the attributes related to the automatic switch fabric recovery process. This process is triggered when there are two resets of an IOM/XCM due to ICC failures within a small time frame. The recovery process involves the sequential resetting of SFM in case the issues are due to one of the SFM in the ICC |

communication path. As the final step in the recovery process, a CPM switchover is triggered to reset the active CPM.

|            |   |
|------------|---|
| Introduced | 21.2.R1                                       |
| Platforms  | 7450 ESS, 7750 SR-7, 7950 XRS-20, 7950 XRS-40 |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the failure recovery process   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">switch-fabric</a> <a href="#">failure-recovery</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 21.2.R1  |
| Platforms  | 7450 ESS, 7750 SR-7, 7950 XRS-20, 7950 XRS-40  |

### **sfm-loss-threshold** *number*

|             |  |
|-------------|--|
| Synopsis    | Number of SFMs that can fail before SFM overload state   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">switch-fabric</a> <b>sfm-loss-threshold</b> <i>number</i>  |
| Tree        | <a href="#">sfm-loss-threshold</a>   |
| Description | This command specifies the number of SFMs that are permitted to fail before the system goes into SFM overload state.<br><br>The default value for the 7750 SR-7s is 1 and the default value for the 7750 SR-14s is 2. Users can select the SFM limit based on the number possible for the system minus one. For the 7750 SR-7s, the limit is 3 and the limit for the 7750 SR-14s is 7. |
| Range       | 1 to 7   |
| Introduced  | 20.5.R1  |
| Platforms   | 7750 SR-7s, 7750 SR-14s  |

### **telemetry**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>telemetry</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <b>telemetry</b>                                    |
| Tree        | <a href="#">telemetry</a>   |
| Description | Commands in this context configure the parameters for the dial-out telemetry functionality. |

|            |         |
|------------|---------|
| Introduced | 20.2.R1 |
| Platforms  | All     |

### **destination-group** [*name*] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>destination-group</b> list instance  |
| Context        | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">destination-group</a> <i>string</i> |
| Tree           | <a href="#">destination-group</a>   |
| Description    | Commands in this context configure parameters for destination groups.   |
| Max. Instances | 225   |
| Introduced     | 20.5.R1   |
| Platforms      | All   |

### **[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Destination group name  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">destination-group</a> <i>string</i> |
| Tree          | <a href="#">destination-group</a>   |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 20.5.R1   |
| Platforms     | All   |

### **allow-unsecure-connection**

|             |  |
|-------------|--|
| Synopsis    | Allow connection without secured transport protocol  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">destination-group</a> <i>string</i> <a href="#">allow-unsecure-connection</a>      |
| Tree        | <a href="#">allow-unsecure-connection</a>  |
| Description | When configured, this command allows an unsecured connection to remote managers; TCP connections are not encrypted, including username and password information. |
| Notes       | The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-client-profile</b> .   |
| Introduced  | 20.5.R1  |
| Platforms   | All  |

**description string**

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">system telemetry destination-group</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 20.5.R1   |
| Platforms     | All   |

**destination** [[address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *fully-qualified-domain-name*) [port](#) *number*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>destination</b> list instance  |
| Context        | <b>configure</b> <a href="#">system telemetry destination-group</a> <i>string</i> <a href="#">destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>fully-qualified-domain-name</i> ) <a href="#">port</a> <i>number</i> |
| Tree           | <a href="#">destination</a>   |
| Max. Instances | 4   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 20.5.R1   |
| Platforms      | All   |

**[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *fully-qualified-domain-name*)

|               |   |
|---------------|---|
| Synopsis      | Address of the destination within the destination group   |
| Context       | <b>configure</b> <a href="#">system telemetry destination-group</a> <i>string</i> <a href="#">destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>fully-qualified-domain-name</i> ) <a href="#">port</a> <i>number</i> |
| Tree          | <a href="#">destination</a>   |
| String Length | 1 to 255  |
| Notes         | This element is part of a list key.   |
| Introduced    | 20.5.R1   |
| Platforms     | All   |

**port number**

|          |                                     |
|----------|-------------------------------------|
| Synopsis | TCP port number for the destination |
|----------|-------------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure system telemetry destination-group</b> <i>string</i> <b>destination</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone   fully-qualified-domain-name</i> ) <b>port</b> <i>number</i> |
| Tree       | <a href="#">destination</a>   |
| Range      | 0   1 to 65535  |
| Notes      | This element is part of a list key.   |
| Introduced | 20.5.R1   |
| Platforms  | All   |

### **router-instance** *string*

|            |  |
|------------|--|
| Synopsis   | Router name or VPRN service name   |
| Context    | <b>configure system telemetry destination-group</b> <i>string</i> <b>destination</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone   fully-qualified-domain-name</i> ) <b>port</b> <i>number</i> <b>router-instance</b> <i>string</i> |
| Tree       | <a href="#">router-instance</a>  |
| Introduced | 20.5.R1  |
| Platforms  | All  |

### **tcp-keepalive**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>tcp-keepalive</b> context   |
| Context    | <b>configure system telemetry destination-group</b> <i>string</i> <b>tcp-keepalive</b> |
| Tree       | <a href="#">tcp-keepalive</a>  |
| Introduced | 20.5.R1  |
| Platforms  | All  |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the TCP keep-alive algorithm   |
| Context    | <b>configure system telemetry destination-group</b> <i>string</i> <b>tcp-keepalive</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 20.5.R1  |
| Platforms  | All  |

**idle-time** *number*

|            |   |
|------------|---|
| Synopsis   | Time until the first TCP keepalive probe is sent  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">telemetry destination-group</a> <i>string</i> <a href="#">tcp-keepalive</a> <a href="#">idle-time</a> <i>number</i> |
| Tree       | <a href="#">idle-time</a>   |
| Range      | 1 to 100000   |
| Units      | seconds   |
| Default    | 600   |
| Introduced | 20.5.R1   |
| Platforms  | All   |

**interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time between TCP keepalive probes  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">telemetry destination-group</a> <i>string</i> <a href="#">tcp-keepalive</a> <a href="#">interval</a> <i>number</i> |
| Tree       | <a href="#">interval</a>   |
| Range      | 1 to 100000  |
| Units      | seconds  |
| Default    | 15   |
| Introduced | 20.5.R1  |
| Platforms  | All  |

**retries** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of probe retries before closing the connection   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">telemetry destination-group</a> <i>string</i> <a href="#">tcp-keepalive</a> <a href="#">retries</a> <i>number</i>                 |
| Tree        | <a href="#">retries</a>   |
| Description | This command configures the number of missed TCP keepalive probes before closing the TCP connection and attempting to reach the other destinations within the same destination group. |
| Range       | 3 to 100  |
| Default     | 4   |
| Introduced  | 20.5.R1   |
| Platforms   | All   |

**tls-client-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | TLS client profile assigned to the destination group  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">destination-group</a> <i>string</i> <a href="#">tls-client-profile</a> <i>reference</i> |
| Tree       | <a href="#">tls-client-profile</a>  |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">tls</a> <a href="#">client-tls-profile</a> <i>string</i>                                 |
| Notes      | The following elements are part of a choice: <b>allow-unsecure-connection</b> or <b>tls-client-profile</b> .  |
| Introduced | 20.5.R1   |
| Platforms  | All   |

**notification-bundling**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>notification-bundling</b> context  |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">notification-bundling</a> |
| Tree        | <a href="#">notification-bundling</a>   |
| Description | Commands in this context configure the bundling of multiple notifications into one telemetry message.   |
| Introduced  | 21.10.R1  |
| Platforms   | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of notification bundling  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">notification-bundling</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

**max-msg-count** *number*

|          |   |
|----------|---|
| Synopsis | Maximum notifications count in telemetry message bundle   |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">notification-bundling</a> <a href="#">max-msg-count</a> <i>number</i> |
| Tree     | <a href="#">max-msg-count</a>   |

|            |           |
|------------|-----------|
| Range      | 2 to 1000 |
| Default    | 100       |
| Introduced | 21.10.R1  |
| Platforms  | All       |

### **max-time-granularity** *number*

|             |  |
|-------------|--|
| Synopsis    | Maximum interval when bundling of notifications occurs   |
| Context     | <b>configure</b> <a href="#">system telemetry notification-bundling max-time-granularity</a> <i>number</i>   |
| Tree        | <a href="#">max-time-granularity</a>   |
| Description | This command sets the maximum time interval during which telemetry notifications are bundled. All bundled notifications have the same timestamp, which is the timestamp of the bundle. |
| Range       | 1 to 1000  |
| Units       | milliseconds   |
| Default     | 100  |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

### **persistent-subscriptions**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>persistent-subscriptions</b> context                          |
| Context    | <b>configure</b> <a href="#">system telemetry persistent-subscriptions</a> |
| Tree       | <a href="#">persistent-subscriptions</a>                                   |
| Introduced | 20.5.R1  |
| Platforms  | All  |

### **subscription** [[name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>subscription</b> list instance   |
| Context        | <b>configure</b> <a href="#">system telemetry persistent-subscriptions subscription</a> <i>string</i> |
| Tree           | <a href="#">subscription</a>  |
| Max. Instances | 225   |
| Introduced     | 20.5.R1   |
| Platforms      | All   |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Persistent subscription name  |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> |
| Tree          | <a href="#">subscription</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 20.5.R1   |
| Platforms     | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the persistent subscription   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 20.5.R1   |
| Platforms  | All   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 20.5.R1  |
| Platforms     | All  |

**destination-group** *reference*

|          |   |
|----------|---|
| Synopsis | Name of the destination group used in the subscription  |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">telemetry</a> <a href="#">persistent-subscriptions</a> <a href="#">subscription</a> <i>string</i> <b>destination-group</b> <i>reference</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">destination-group</a>   |
| Reference  | <b>configure</b> <a href="#">system telemetry destination-group</a> <i>string</i> |
| Introduced | 20.5.R1   |
| Platforms  | All   |

### **encoding** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Encoding used for telemetry notifications  |
| Context     | <b>configure</b> <a href="#">system telemetry persistent-subscriptions subscription</a> <i>string encoding keyword</i> |
| Tree        | <a href="#">encoding</a>   |
| Description | This command specifies the encoding used for telemetry notifications as defined by the gNMI OpenConfig standard.       |
| Options     | json, bytes, proto, json-ietf  |
| Default     | json   |
| Introduced  | 20.5.R1  |
| Platforms   | All  |

### **local-source-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | Local IP address of packets sent from the source   |
| Context    | <b>configure</b> <a href="#">system telemetry persistent-subscriptions subscription</a> <i>string local-source-address (ipv4-address-no-zone   ipv6-address-no-zone)</i> |
| Tree       | <a href="#">local-source-address</a>   |
| Introduced | 20.5.R1  |
| Platforms  | All  |

### **mode** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Mode for telemetry notifications  |
| Context     | <b>configure</b> <a href="#">system telemetry persistent-subscriptions subscription</a> <i>string mode keyword</i>      |
| Tree        | <a href="#">mode</a>  |
| Description | This command specifies the subscription path mode for telemetry notifications sent out for the persistent subscription. |
| Options     | target-defined, on-change, sample   |
| Introduced  | 20.5.R1   |

Platforms All

### **originated-qos-marking** *keyword*

Synopsis QoS marking used for telemetry notification packets

Context **configure** [system](#) [telemetry](#) [persistent-subscriptions](#) [subscription](#) *string* **originated-qos-marking** *keyword*

Tree [originated-qos-marking](#)

Options be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Introduced 20.5.R1

Platforms All

### **sample-interval** *number*

Synopsis Sampling interval for the persistent subscription

Context **configure** [system](#) [telemetry](#) [persistent-subscriptions](#) [subscription](#) *string* **sample-interval** *number*

Tree [sample-interval](#)

Description This command configures the sampling interval for the persistent subscription. The interval applies only in sampling or target-defined modes.

Range 1000 to 18446744073709551615

Units milliseconds

Default 10000

Introduced 20.5.R1

Platforms All

### **sensor-group** *reference*

Synopsis Sensor group used in the persistent subscription

Context **configure** [system](#) [telemetry](#) [persistent-subscriptions](#) [subscription](#) *string* **sensor-group** *reference*

Tree [sensor-group](#)

|             |  |
|-------------|--|
| Description | This command specifies the sensor group to be used in the persistent subscription. If no valid paths exist in the sensor group, the configuration is accepted, however, no gRPC connection is established when persistent subscription is activated. |
| Reference   | <b>configure</b> <a href="#">system telemetry sensor-groups sensor-group</a> <i>string</i>   |
| Introduced  | 20.5.R1  |
| Platforms   | All  |

## sensor-groups

|            |   |
|------------|---|
| Synopsis   | Enter the <b>sensor-groups</b> context                          |
| Context    | <b>configure</b> <a href="#">system telemetry sensor-groups</a> |
| Tree       | <a href="#">sensor-groups</a>                                   |
| Introduced | 20.5.R1   |
| Platforms  | All   |

## sensor-group [[name](#)] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>sensor-group</b> list instance  |
| Context        | <b>configure</b> <a href="#">system telemetry sensor-groups sensor-group</a> <i>string</i> |
| Tree           | <a href="#">sensor-group</a>   |
| Max. Instances | 225  |
| Introduced     | 20.5.R1  |
| Platforms      | All  |

## [[name](#)] *string*

|               |  |
|---------------|--|
| Synopsis      | Sensor group name  |

| Tree          | <a href="#">path</a>  |
| Description   | The command specifies the path from which data is streamed to the collector. Streamed data includes all descendants of the tree indicated by the path.                        |
| String Length | 1 to 512  |
| Notes         | This element is part of a list key.   |
| Introduced    | 20.5.R1   |
| Platforms     | All   |

**thresholds**

|          |  |
|----------|--|
| Synopsis | Enter the <b>thresholds</b> context                                |
| Context  | <b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> |
| Tree     | <a href="#">thresholds</a>   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **cflash-cap-alarm-percent** [[cflash-id](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cflash-cap-alarm-percent</b> list instance   |
| Context    | <b>configure</b> <a href="#">system thresholds</a> <a href="#">cflash-cap-alarm-percent</a> <i>string</i> |
| Tree       | <a href="#">cflash-cap-alarm-percent</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[cflash-id]** *string*

|               |   |
|---------------|---|
| Synopsis      | cflash device name monitored for capacity   |
| Context       | <b>configure</b> <a href="#">system thresholds</a> <a href="#">cflash-cap-alarm-percent</a> <i>string</i> |
| Tree          | <a href="#">cflash-cap-alarm-percent</a>  |
| String Length | 1 to 200  |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **falling-threshold** *number*

|             |  |
|-------------|--|
| Synopsis    | Falling threshold for the sampled statistic  |
| Context     | <b>configure</b> <a href="#">system thresholds</a> <a href="#">cflash-cap-alarm-percent</a> <i>string</i> <a href="#">falling-threshold</a> <i>number</i>  |
| Tree        | <a href="#">falling-threshold</a>  |
| Description | <p>This command specifies a falling threshold for the sampled statistic. When the current sampled value is less than or equal to this threshold, and the value at the last sampling interval was greater than this threshold, a single threshold-crossing event is generated. A single threshold-crossing event is also generated if the first sample taken is less than or equal to this threshold and the associated <b>startup-alarm</b> command is equal to the <b>falling</b> or <b>either</b> values.</p> <p>After a falling threshold-crossing event is generated, another such event is not generated until the sampled value rises above this threshold and reaches greater than or equal to the <b>rising-threshold</b> command.</p> |
| Range       | 0 to 100   |
| Units       | percent  |

|            |         |
|------------|---------|
| Introduced | 16.0.R4 |
| Platforms  | All     |

### **interval** *number*

|             |   |
|-------------|---|
| Synopsis    | Polling period over which data is sampled and compared  |
| Context     | <b>configure</b> <b>system</b> <b>thresholds</b> <b>cflash-cap-alarm-percent</b> <i>string</i> <b>interval</b> <i>number</i>    |
| Tree        | <b>interval</b>   |
| Description | This command specifies the polling interval over which the data is sampled and compared with the rising and falling thresholds. |
| Range       | 1 to 2147483647   |
| Notes       | This element is mandatory.  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **rising-threshold** *number*

|             |   |
|-------------|---|
| Synopsis    | Rising threshold for the sampled statistic  |
| Context     | <b>configure</b> <b>system</b> <b>thresholds</b> <b>cflash-cap-alarm-percent</b> <i>string</i> <b>rising-threshold</b> <i>number</i>  |
| Tree        | <b>rising-threshold</b>   |
| Description | <p>This command specifies a rising threshold for the sampled statistic. When the current sampled value is greater than or equal to this threshold, and the value at the last sampling interval was less than this threshold, a single threshold-crossing event is generated. A single threshold crossing event is also generated if the first sample taken is greater than or equal to this threshold and the associated <b>startup-alarm</b> command is equal to the <b>rising</b> or <b>either</b> values.</p> <p>After a rising threshold-crossing event is generated, another such event is not generated until the sampled value falls below this threshold and reaches less than or equal the <b>falling-threshold</b> command.</p> |
| Range       | 0 to 100  |
| Units       | percent   |
| Notes       | This element is mandatory.  |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

**rmon-event-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Notification type specifying action when event occurs   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> <a href="#">cflash-cap-alarm-percent</a> <i>string</i> <b>rmon-event-type</b> <i>keyword</i> |
| Tree       | <a href="#">rmon-event-type</a>   |
| Options    | none, log, trap, both   |
| Default    | both  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**startup-alarm** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Alarm type when the alarm is first created   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">thresholds</a> <a href="#">cflash-cap-alarm-percent</a> <i>string</i> <b>startup-alarm</b> <i>keyword</i>  |
| Tree        | <a href="#">startup-alarm</a>  |
| Description | This command specifies the alarm type that may be sent when this alarm is first created.<br><br>If the first sample is greater than or equal to the rising threshold value and <b>startup-alarm</b> is equal to <b>rising</b> or <b>either</b> , a single rising threshold crossing event is generated.<br><br>If the first sample is less than or equal to the falling threshold value and <b>startup-alarm</b> is equal to <b>falling</b> or <b>either</b> , a single falling threshold crossing event is generated. |
| Options     | rising, falling, either  |
| Default     | either   |
| Introduced  | 16.0.R1  |

### **rising-threshold** *number*

Synopsis Rising threshold for the sampled statistic

Context **configure** [system](#) [thresholds](#) [rmon](#) [alarm](#) *number* [rising-threshold](#) *number*

Tree [rising-threshold](#)

Description This command specifies the rising threshold for the sampled statistic. When the current sampled value is greater than or equal to this threshold and the value at the last sampling interval was below this threshold, a single threshold crossing event is generated. A single threshold crossing event is also generated if the first sample taken is greater than or equal to this threshold and the associated **startup-alarm** command is set to **rising** or **either**.

After a rising threshold crossing event is generated, another such event is not generated until the sampled value falls below this threshold and reaches or falls below the **falling-threshold** command setting.

Range -2147483648 to 2147483647

Introduced 16.0.R1

Platforms All

| Tree       | <a href="#">broadcast-client</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **[router-instance]** *string*

|            |  |
|------------|--|
| Synopsis   | Router name or VPRN service name   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">time ntp broadcast-client</a> <i>string</i> <a href="#">interface-name</a> <i>string</i> |
| Tree       | <a href="#">broadcast-client</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **interface-name** *string*

|               |  |
|---------------|--|
| Synopsis      | Interface to transmit or receive NTP broadcast packets   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">time ntp broadcast-client</a> <i>string</i> <a href="#">interface-name</a> <i>string</i> |
| Tree          | <a href="#">broadcast-client</a>   |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **authenticate** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enforce authentication of NTP PDUs  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">time ntp broadcast-client</a> <i>string</i> <a href="#">interface-name</a> <i>string</i> <b>authenticate</b> <i>boolean</i> |
| Tree       | <a href="#">authenticate</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **multicast**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>multicast</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">time ntp multicast</a> |
| Tree       | <a href="#">multicast</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **key-id** *reference*

|            |  |
|------------|--|
| Synopsis   | Authentication key and type used by the node   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">time ntp multicast key-id</a> <i>reference</i> |
| Tree       | <a href="#">key-id</a>   |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">time ntp authentication-key</a> <i>number</i>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **version** *number*

|             |  |
|-------------|--|
| Synopsis    | NTP version number generated by the node   |
| Context     | <b>configure</b> <a href="#">system</a> <a href="#">time ntp multicast version</a> <i>number</i>   |
| Tree        | <a href="#">version</a>  |
| Description | This command specifies the NTP version number that is generated by the node. This command does not need to be configured when in client mode, in which case all three versions are accepted. |
| Range       | 2 to 4   |
| Default     | 4  |

Introduced 16.0.R1  
Platforms All

### **multicast-client**

Synopsis Enable the **multicast-client** context  
Context **configure** [system](#) [time](#) [ntp](#) [multicast-client](#)  
Tree [multicast-client](#)  
Introduced 16.0.R1  
Platforms All

### **authenticate** *boolean*

Synopsis Enforce authentication of NTP PDUs  
Context **configure** [system](#) [time](#) [ntp](#) [multicast-client](#) [authenticate](#) *boolean*  
Tree [authenticate](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **ntp-server**

Synopsis Enable the **ntp-server** context  
Context **configure** [system](#) [time](#) [ntp](#) [ntp-server](#)  
Tree [ntp-server](#)  
Introduced 16.0.R1  
Platforms All

### **authenticate** *boolean*

Synopsis Authentication of NTP PDUs when acting as a server  
Context **configure** [system](#) [time](#) [ntp](#) [ntp-server](#) [authenticate](#) *boolean*  
Tree [authenticate](#)  
Default false  
Introduced 16.0.R1

Platforms All

### **peer** [*ip-address*] (*ipv4-address-no-zone* | *ipv6-address-no-zone*) *router-instance string*

Synopsis Enter the **peer** list instance

Context **configure system time ntp peer** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) *router-instance string*

Tree [peer](#)

Introduced 16.0.R1

Platforms All

### **[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address of the peer for a peering relationship

Context **configure system time ntp peer** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) *router-instance string*

Tree [peer](#)

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **router-instance string**

Synopsis Router name or VPRN service name

Context **configure system time ntp peer** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) *router-instance string*

Tree [peer](#)

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **key-id reference**

Synopsis Authentication key and type used by the node

Context **configure system time ntp peer** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) *router-instance string key-id reference*

|            |   |
|------------|---|
| Tree       | <a href="#">key-id</a>  |

| Introduced | 16.0.R1  |
| Platforms  | All  |

### **version** *number*

|             |  |
|-------------|--|
| Synopsis    | NTP version number generated by the node   |
| Context     | <b>configure system time ntp peer</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">router-instance</a> <i>string</i> <b>version</b> <i>number</i>               |
| Tree        | <a href="#">version</a>  |
| Description | This command specifies the NTP version number that is generated by the node. This command does not need to be configured when in client mode, in which case all three versions are accepted. |
| Range       | 2 to 4   |
| Default     | 4  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **server** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *keyword*) [router-instance](#) *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>server</b> list instance  |
| Context    | <b>configure system time ntp server</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>keyword</i> ) <a href="#">router-instance</a> <i>string</i> |
| Tree       | <a href="#">server</a>   |
| Introduced | 16.0.R1  |

Platforms All

### [ip-address] (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *keyword*)

Synopsis IP address of an external NTP server

Context **configure system time ntp server** (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *keyword*) **router-instance string**

Tree **server**

Options ptp

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **router-instance string**

Synopsis Router name or VPRN service name

Context **configure system time ntp server** (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *keyword*) **router-instance string**

Tree **server**

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **key-id reference**

Synopsis Authentication key and type used by the node

Context **configure system time ntp server** (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *keyword*) **router-instance string key-id reference**

Tree **key-id**

Reference **configure system time ntp authentication-key number**

Introduced 16.0.R1

Platforms All

### **prefer boolean**

Synopsis Set NTP server as preferred to receive time

|            |   |
|------------|---|
| Context    | <b>configure system time ntp server</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone   keyword</i> ) <i>router-instance string prefer boolean</i> |
| Tree       | <a href="#">prefer</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **version number**

|             |  |
|-------------|--|
| Synopsis    | NTP version number generated by the node   |
| Context     | <b>configure system time ntp server</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone   keyword</i> ) <i>router-instance string version number</i>  |
| Tree        | <a href="#">version</a>  |
| Description | This command specifies the NTP version number that is generated by the node. This command does not need to be configured when in client mode, in which case all three versions are accepted. |
| Range       | 2 to 4   |
| Default     | 4  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **prefer-local-time boolean**

|             |   |
|-------------|---|
| Synopsis    | Use local time over UTC time in the system  |
| Context     | <b>configure system time prefer-local-time</b> <i>boolean</i>   |
| Tree        | <a href="#">prefer-local-time</a>   |
| Description | <p>When configured to <b>true</b>, the system uses local time. This preference is applied to objects such as log file names, created and completed times reported in log files, NETCONF and gRPC date-and-time leafs, and rollback times displayed in <b>show</b> command outputs.</p> <p>When configured to <b>false</b>, the system uses UTC time.</p> <p><b>Note:</b> The timezone used for <b>show</b> command outputs during a CLI session can be controlled using the <b>environment time-display</b> command.</p> <p><b>Note:</b> The format used for the date-time strings may change, depending on the command setting. For example, when this command is set to <b>true</b>, all date-time strings include a suffix of three to five characters that indicates the timezone used.</p> <p><b>Note:</b> The time format for timestamps on log events is controlled on a per-log basis, using the <b>configure log log-id time-format</b> command.</p> |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## sntp

|            |                                   |
|------------|-----------------------------------|
| Synopsis   | Enter the <b>sntp</b> context     |
| Context    | <b>configure system time sntp</b> |
| Tree       | <a href="#">sntp</a>              |
| Introduced | 16.0.R1                           |
| Platforms  | All                               |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of SNTP                                 |
| Context    | <b>configure system time sntp admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>                                  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## server [[ip-address](#)] (*ipv4-address-no-zone | ipv6-address-no-zone*)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>server</b> list instance   |
| Context    | <b>configure system time sntp server</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">server</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## [\[ip-address\]](#) (*ipv4-address-no-zone | ipv6-address-no-zone*)

|          |   |
|----------|---|
| Synopsis | IP address of the SNTP server   |
| Context  | <b>configure system time sntp server</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) |
| Tree     | <a href="#">server</a>  |

|            |                                     |
|------------|-------------------------------------|
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R1                             |
| Platforms  | All                                 |

### **interval** *number*

|            |  |
|------------|--|
| Synopsis   | Frequency of querying the server   |
| Context    | <b>configure system time sntp server</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )<br><b>interval</b> <i>number</i> |
| Tree       | <b>interval</b>  |
| Range      | 64 to 1024   |
| Units      | seconds  |
| Default    | 64   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **prefer** *boolean*

|            |   |
|------------|---|
| Synopsis   | Preference value for this SNTP server   |
| Context    | <b>configure system time sntp server</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )<br><b>prefer</b> <i>boolean</i> |
| Tree       | <b>prefer</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **version** *number*

|            |   |
|------------|---|
| Synopsis   | SNTP version supported by this server   |
| Context    | <b>configure system time sntp server</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )<br><b>version</b> <i>number</i> |
| Tree       | <b>version</b>  |
| Range      | 1 to 3  |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**sntp-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Mode for Simple Network Time Protocol (SNTP)  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">time</a> <a href="#">sntp</a> <a href="#">sntp-state</a> <i>keyword</i> |
| Tree       | <a href="#">sntp-state</a>  |
| Options    | unicast, broadcast  |
| Default    | unicast   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**zone**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>zone</b> context   |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">time</a> <a href="#">zone</a> |
| Tree       | <a href="#">zone</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**non-standard**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>non-standard</b> context  |
| Context    | <b>configure</b> <a href="#">system</a> <a href="#">time</a> <a href="#">zone</a> <a href="#">non-standard</a> |
| Tree       | <a href="#">non-standard</a>   |
| Notes      | The following elements are part of a choice: <b>non-standard</b> or <b>standard</b> .                          |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**name** *string*

|               |   |
|---------------|---|
| Synopsis      | Non-standard time zone name   |
| Context       | <b>configure</b> <a href="#">system</a> <a href="#">time</a> <a href="#">zone</a> <a href="#">non-standard</a> <a href="#">name</a> <i>string</i> |
| Tree          | <a href="#">name</a>  |
| String Length | 1 to 5  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**offset string**

|               |  |
|---------------|--|
| Synopsis      | Offset from UTC  |
| Context       | <b>configure system time zone non-standard offset string</b> |
| Tree          | <a href="#">offset</a>                                       |
| String Length | 5 to 6   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**standard**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>standard</b> context   |
| Context    | <b>configure system time zone standard</b>  |
| Tree       | <a href="#">standard</a>  |
| Notes      | The following elements are part of a choice: <b>non-standard</b> or <b>standard</b> . |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**name keyword**

|            |  |
|------------|--|
| Synopsis   | Standard time zone name  |
| Context    | <b>configure system time zone standard name keyword</b>  |
| Tree       | <a href="#">name</a>   |
| Options    | hst, akst, pst, mst, cst, est, ast, nst, utc, gmt, wet, cet, eet, msk, msd, awst, acst, aest, nzst |
| Default    | utc  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**transmission-profile [[name](#)] string**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>transmission-profile</b> list instance |
| Context    | <b>configure system transmission-profile string</b> |
| Tree       | <a href="#">transmission-profile</a>                |
| Introduced | 16.0.R4   |

Platforms All

### **[name]** *string*

Synopsis File transmission profile name  
Context **configure** [system](#) [transmission-profile](#) *string*  
Tree [transmission-profile](#)  
String Length 1 to 32  
Notes This element is part of a list key.  
Introduced 16.0.R4  
Platforms All

### **ipv4-source-address** *string*

Synopsis IPv4 source address used for the transport protocol  
Context **configure** [system](#) [transmission-profile](#) *string* [ipv4-source-address](#) *string*  
Tree [ipv4-source-address](#)  
Introduced 16.0.R4  
Platforms All

### **ipv6-source-address** *string*

Synopsis IPv6 source address used for the transport protocol  
Context **configure** [system](#) [transmission-profile](#) *string* [ipv6-source-address](#) *string*  
Tree [ipv6-source-address](#)  
Introduced 16.0.R4  
Platforms All

### **redirection** *number*

Synopsis Maximum level of redirection  
Context **configure** [system](#) [transmission-profile](#) *string* [redirection](#) *number*  
Tree [redirection](#)  
Range 1 to 8  
Introduced 16.0.R4

---

Platforms All

### **retry** *number*

Synopsis Number of attempts to reconnecting to the server  
Context **configure** [system](#) [transmission-profile](#) *string* **retry** *number*  
Tree [retry](#)  
Range 1 to 256  
Introduced 16.0.R4  
Platforms All

### **router-instance** *string*

Synopsis Router instance used by the transport protocol  
Context **configure** [system](#) [transmission-profile](#) *string* **router-instance** *string*  
Tree [router-instance](#)  
String Length 1 to 64  
Default Base  
Introduced 16.0.R4  
Platforms All

### **timeout** *number*

Synopsis Timeout for a response from the server  
Context **configure** [system](#) [transmission-profile](#) *string* **timeout** *number*  
Tree [timeout](#)  
Range 1 to 3600  
Units seconds  
Default 60  
Introduced 16.0.R4  
Platforms All

### **usb** [[usb-cflash](#)] *keyword*

Synopsis Enter the **usb** list instance

---

|             |  |
|-------------|--|
| Context     | <b>configure system usb</b> <i>keyword</i>   |
| Tree        | <b>usb</b>   |
| Description | Commands in this context configure the operational state of the USB port.  |
| Introduced  | 22.10.R1   |
| Platforms   | 7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se |

**[usb-cflash]** *keyword*

|            |  |
|------------|--|
| Synopsis   | Specifies the compact flash ID   |
| Context    | <b>configure system usb</b> <i>keyword</i>   |
| Tree       | <b>usb</b>   |
| Options    | cf2  |
| Notes      | This element is part of a list key.  |
| Introduced | 22.10.R1   |
| Platforms  | 7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the USB port   |
| Context    | <b>configure system usb</b> <i>keyword</i> <b>admin-state</b> <i>keyword</i>   |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 22.10.R1   |
| Platforms  | 7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se, 7750 SR-2se |

### 3.47 test-oam commands

```

configure
- test-oam
  - apply-groups reference

### 3.47.1 test-oam command descriptions

#### test-oam

|            |                                   |
|------------|-----------------------------------|
| Synopsis   | Enter the <b>test-oam</b> context |
| Context    | <b>configure test-oam</b>         |
| Tree       | <a href="#">test-oam</a>          |
| Introduced | 16.0.R4                           |
| Platforms  | All                               |

#### icmp

|            |                                |
|------------|--------------------------------|
| Synopsis   | Enter the <b>icmp</b> context  |
| Context    | <b>configure test-oam icmp</b> |
| Tree       | <a href="#">icmp</a>           |
| Introduced | 20.10.R1                       |
| Platforms  | All                            |

#### ipv6

|            |                                     |
|------------|-------------------------------------|
| Synopsis   | Enter the <b>ipv6</b> context       |
| Context    | <b>configure test-oam icmp ipv6</b> |
| Tree       | <a href="#">ipv6</a>                |
| Introduced | 22.7.R1                             |
| Platforms  | All                                 |

#### length-field *boolean*

|            |  |
|------------|--|
| Synopsis   | Use length field in ICMPv6 responses                     |
| Context    | <b>configure test-oam icmp ipv6 length-field boolean</b> |
| Tree       | <a href="#">length-field</a>                             |
| Default    | false  |
| Introduced | 22.7.R1  |
| Platforms  | All  |

**maximum-original-datagram** *boolean*

|             |   |
|-------------|---|
| Synopsis    | ICMPv6 traceroute responses with largest datagram   |
| Context     | <b>configure test-oam icmp ipv6 maximum-original-datagram</b> <i>boolean</i>  |
| Tree        | <a href="#">maximum-original-datagram</a>   |
| Description | When configured to <b>true</b> , this command enables the original datagram field of the ICMPv6 error message to be a maximum of 1232 bytes.<br><br>When configured to <b>false</b> , the original datagram field of the ICMPv6 error message smaller than 1232 bytes be built smaller. |
| Default     | false   |
| Introduced  | 22.7.R1   |
| Platforms   | All   |

**ping-template** [[name](#)] *string*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>ping-template</b> list instance   |
| Context     | <b>configure test-oam icmp ping-template</b> <i>string</i>   |
| Tree        | <a href="#">ping-template</a>  |
| Description | Commands in this context define ping timers and thresholds that verify connectivity and the the operational state of the IP interface. |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Ping template name   |
| Context       | <b>configure test-oam icmp ping-template</b> <i>string</i>   |
| Tree          | <a href="#">ping-template</a>                                |
| String Length | 1 to 64  |
| Notes         | This element is part of a list key.                          |
| Introduced    | 20.10.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

**description** *string*

|          |                  |
|----------|------------------|
| Synopsis | Text description |
|----------|------------------|

|               |   |
|---------------|---|
| Context       | <b>configure test-oam icmp ping-template</b> <i>string description string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 20.10.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                  |

### **dot1p** *number*

|            |   |
|------------|---|
| Synopsis   | Dot1p in Ethernet header of outgoing ping packets                       |
| Context    | <b>configure test-oam icmp ping-template</b> <i>string dot1p number</i> |
| Tree       | <a href="#">dot1p</a>   |
| Range      | 0 to 7  |
| Default    | 7   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS            |

### **dscp** *keyword*

|            |   |
|------------|---|
| Synopsis   | DSCP value used in the outgoing ping packet   |
| Context    | <b>configure test-oam icmp ping-template</b> <i>string dscp keyword</i>   |
| Tree       | <a href="#">dscp</a>  |
| Options    | be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63 |
| Default    | nc1   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **failure-threshold** *number*

|          |   |
|----------|---|
| Synopsis | Failure threshold to declare inter-connectivity down                                |
| Context  | <b>configure test-oam icmp ping-template</b> <i>string failure-threshold number</i> |
| Tree     | <a href="#">failure-threshold</a>   |
| Range    | 2 to 10   |

|            |  |
|------------|--|
| Default    | 3  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **interval** *number*

|            |   |
|------------|---|
| Synopsis   | Packet transmit interval  |
| Context    | <b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">interval</a> <i>number</i> |
| Tree       | <a href="#">interval</a>  |
| Range      | 1 to 60   |
| Units      | seconds   |
| Default    | 60  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **reactivation-failure-threshold** *number*

|             |   |
|-------------|---|
| Synopsis    | Threshold of consecutive failures at reactivation   |
| Context     | <b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">reactivation-failure-threshold</a> <i>number</i>   |
| Tree        | <a href="#">reactivation-failure-threshold</a>  |
| Description | This command configures the number of consecutive failures that must occur when transmitting at the reactivation interval without success before the transmission interval is changed to the standard interval. |
| Range       | 1 to 10   |
| Default     | 4   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **reactivation-interval** *number*

|             |  |
|-------------|--|
| Synopsis    | Ping reactivation interval   |
| Context     | <b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">reactivation-interval</a> <i>number</i>   |
| Tree        | <a href="#">reactivation-interval</a>  |
| Description | This command configures the packet transmit interval used when the IP interface becomes operationally down because of a ping template failure after receiving a successful response to the previous ICMP echo request. |

|            |  |
|------------|--|
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 1  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **reactivation-threshold** *number*

|             |   |
|-------------|---|
| Synopsis    | Success threshold to declare inter-connectivity up  |
| Context     | <b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">reactivation-threshold</a> <i>number</i>   |
| Tree        | <a href="#">reactivation-threshold</a>  |
| Description | This command configures the minimum number of consecutive successful responses of ICMP replies that must occur before the IP interface transitions from operationally down (due to ping validation failure) to operationally up. This value is a stability metric intended to prevent flapping. |
| Range       | 1 to 10   |
| Default     | 3   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **reactivation-timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Reactivation wait time before packet is declared lost   |
| Context    | <b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">reactivation-timeout</a> <i>number</i> |
| Tree       | <a href="#">reactivation-timeout</a>  |
| Range      | 1 to 60   |
| Units      | seconds   |
| Default    | 1   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **size** *number*

|          |   |
|----------|---|
| Synopsis | Data field size of the outgoing ICMP echo packet  |
| Context  | <b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <a href="#">size</a> <i>number</i> |
| Tree     | <a href="#">size</a>  |

|            |  |
|------------|--|
| Range      | 12 to 9786   |
| Units      | octets   |
| Default    | 56   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Wait time before ICMP echo request is declared lost   |
| Context    | <b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <b>timeout</b> <i>number</i> |
| Tree       | <a href="#">timeout</a>   |
| Range      | 1 to 60   |
| Units      | seconds   |
| Default    | 5   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **ttl** *number*

|             |   |
|-------------|---|
| Synopsis    | TTL value for the outgoing ping packet  |
| Context     | <b>configure</b> <a href="#">test-oam icmp ping-template</a> <i>string</i> <b>tll</b> <i>number</i>   |
| Tree        | <a href="#">ttl</a>   |
| Description | This command configures the TTL value used in the outgoing ping packet. The tested interface must be directly connected on the same subnet. |
| Range       | 1 to 255  |
| Default     | 1   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **link-measurement**

|          |  |
|----------|--|
| Synopsis | Enter the <b>link-measurement</b> context                  |
| Context  | <b>configure</b> <a href="#">test-oam link-measurement</a> |
| Tree     | <a href="#">link-measurement</a>                           |

|             |   |
|-------------|---|
| Description | Commands in this context configure the link measurement template attributes that are inherited on associated IP interfaces for delay reporting to the routing engine. |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **measurement-template** [[template-name](#)] *string*

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>measurement-template</b> list instance   |
| Context     | <b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i>   |
| Tree        | <a href="#">measurement-template</a>  |
| Description | <p>Commands in this context configure the attributes of the measurement template that can be assigned to an IP interface.</p> <p>Changes can be made without disabling the template, although some modifications cause the test on associated IP interfaces to terminate and restart.</p> <p>A measurement template can be removed if no interfaces reference it.</p> |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **[template-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Measurement template name   |
| Context       | <b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> |
| Tree          | <a href="#">measurement-template</a>  |
| String Length | 1 to 64   |
| Notes         | This element is part of a list key.   |
| Introduced    | 21.7.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of the measurement template   |
| Context  | <b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>  |
| Options  | enable, disable  |
| Default  | disable  |

|            |  |
|------------|--|
| Introduced | 21.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## aggregate-sample-window

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>aggregate-sample-window</b> context  |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window</a>   |
| Tree        | <a href="#">aggregate-sample-window</a>   |
| Description | Commands in this context configure the attributes of the aggregate sample window used with the measurement template assigned to an IP interface. The aggregate sample window is the collection of sample windows. |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## multiplier *number*

|            |  |
|------------|--|
| Synopsis   | Number of sample windows in the aggregate sample window  |
| Context    | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window multiplier</a> <i>number</i> |
| Tree       | <a href="#">multiplier</a>   |
| Range      | 1 to 12  |
| Default    | 12   |
| Introduced | 21.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## threshold

|            |   |
|------------|---|
| Synopsis   | Enter the <b>threshold</b> context  |
| Context    | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window threshold</a> |
| Tree       | <a href="#">threshold</a>   |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**absolute number**

|             |   |
|-------------|---|
| Synopsis    | Absolute delta for delay measurement reporting  |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window threshold absolute number</a>   |
| Tree        | <a href="#">absolute</a>  |
| Description | This command configures the absolute minimum delta by which a new delay measurement must differ from the previously reported measurement to be reported to the routing engine.<br><br>If an absolute value is not configured the threshold is disabled. |
| Range       | 1 to 100000   |
| Units       | microseconds  |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**relative number**

|             |   |
|-------------|---|
| Synopsis    | Relative delta for measurement reporting  |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window threshold relative number</a>   |
| Tree        | <a href="#">relative</a>  |
| Description | This command configures the relative minimum delta by which a new delay measurement must differ from the previously reported measurement to be reported to the routing engine.<br><br>If a relative value is not configured, the threshold is disabled. |
| Range       | 1 to 100  |
| Units       | percent   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**window-integrity number**

|             |  |
|-------------|--|
| Synopsis    | Sample percentage required for window integrity report   |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">aggregate-sample-window window-integrity number</a>  |
| Tree        | <a href="#">window-integrity</a>   |
| Description | This command configures the percentage value that is used to determine whether the aggregate sample window is integral, by comparing the number of samples received from the sample window to the percentage configured. |

The configured percentage translates to a required sample window count that must be included in the aggregate sample window. The number of samples is computed as follows:

$$(\text{window-integrity (\%)}) \times (((\text{aggregate-sample-window length (s)}) / (\text{sample-window length (s)}))$$

If the number of samples in the aggregate sample window is equal to or greater than the computed number of required samples, the sample window has integrity and the aggregate sample window result is compared to the configured sample window thresholds.

If the count is less than the computed number of required samples, the aggregate sample window does not have integrity and the value is not considered as representative. In this case the aggregate sample window results are not compared to the configured sample window thresholds.

If this parameter is not configured, integrity checking is disabled and all results are compared to the configured thresholds.

|            |  |
|------------|--|
| Range      | 1 to 100   |
| Units      | percent  |
| Introduced | 21.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **delay** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Delay measurement statistic type  |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <b>delay</b> <i>keyword</i> |
| Tree        | <a href="#">delay</a>   |
| Description | This command configures the type of delay measurement statistic used in the sample window and aggregate sample window.    |
| Options     | min, max, avg   |
| Default     | min   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |

|            |  |
|------------|--|
| Introduced | 21.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **interval** *number*

|            |   |
|------------|---|
| Synopsis   | Interval between test packet transmissions  |
| Context    | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string interval number</i> |
| Tree       | <a href="#">interval</a>  |
| Range      | 1 to 10   |
| Units      | seconds   |
| Default    | 1   |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **last-reported-delay-hold** *number*

|             |   |
|-------------|---|
| Synopsis    | Time to wait to flush the last reported delay   |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string last-reported-delay-hold number</i>   |
| Tree        | <a href="#">last-reported-delay-hold</a>  |
| Description | <p>This command configures the timer that specifies the wait time before the last reported delay measurement is flushed after a link measurement test enters the operationally down state.</p> <p>The aging timer delays the flushing of the last reported delay metric to the routing engine. This timer starts a countdown to zero when an administrative function causes the operational state of the test on that specific interface to transition from up to down. If the timer expires before the operational state transitions to up, the previously reported value is flushed. The Delay Measurement Last Reported indicates “Cleared”. The timestamp indicates the time of the clear event. The Triggered By indicates “Expired”. If the administrative state recovers to operationally up before the expiration of the timer, the previous reported value is not flushed.</p> <p>The aging timer does not apply to failure conditions that do not affect the administrative state of the interface, for example interface failure or routing changes.</p> |
| Range       | 0   1 to 86400  |
| Units       | seconds   |
| Default     | 86400   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**reporting** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Report behavior for values for the configured threshold  |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">reporting</a> <i>boolean</i>   |
| Tree        | <a href="#">reporting</a>  |
| Description | <p>When configured to <b>true</b>, the system reports a reached threshold to the routing engine. Reaching a configured <b>sample-window</b> or <b>aggregate-sample-window</b> indicates a value of interest.</p> <p>When configured to <b>false</b>, values reaching thresholds are not reported to the routing engine. In both enabled and disabled cases, the sample-window and aggregate-sample-window information and computed values are stored on the node until overwriting occurs.</p> |
| Default     | true   |
| Introduced  | 22.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**sample-window**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>sample-window</b> context  |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">sample-window</a>   |
| Tree        | <a href="#">sample-window</a>   |
| Description | Commands in this context configure sample window attributes used when the measurement template is assigned to an IP interface. The sample window is the collection of individual probe results over a defined period. |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**multiplier** *number*

|             |   |
|-------------|---|
| Synopsis    | Multiplier of interval used for sample window length  |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">sample-window</a> <a href="#">multiplier</a> <i>number</i>  |
| Tree        | <a href="#">multiplier</a>  |
| Description | This command configures the number of probe results that should be in the sample window. For example, a multiplier of 10 and an interval of 5 equals 50 probes being transmitted from an individual sample window. Consequently, 50 probe results are expected within the 50 second duration that the sample window is "In-progress". |
| Range       | 1 to 900  |

|            |  |
|------------|--|
| Default    | 10   |
| Introduced | 21.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## threshold

|            |   |
|------------|---|
| Synopsis   | Enter the <b>threshold</b> context  |
| Context    | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">sample-window threshold</a> |
| Tree       | <a href="#">threshold</a>   |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## absolute *number*

|             |   |
|-------------|---|
| Synopsis    | Absolute delta for delay measurement reporting  |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">sample-window threshold absolute</a> <i>number</i>  |
| Tree        | <a href="#">absolute</a>  |
| Description | This command configures the absolute minimum delta by which a new delay measurement must differ from the previously reported measurement to be reported to the routing engine.<br><br>If an absolute value is not configured the threshold is disabled. |
| Range       | 1 to 100000   |
| Units       | microseconds  |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## relative *number*

|             |  |
|-------------|--|
| Synopsis    | Relative delta for delay measurement reporting   |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">sample-window threshold relative</a> <i>number</i>                   |
| Tree        | <a href="#">relative</a>   |
| Description | This command configures the relative minimum delta by which a new delay measurement must differ from the previously reported measurement to be reported to the routing engine. |

|            |   |
|------------|---|
|            | If a relative value is not configured, the threshold is disabled. |
| Range      | 1 to 500  |
| Units      | percent   |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS      |

### **window-integrity** *number*

|             |  |
|-------------|--|
| Synopsis    | Sample percentage required for window integrity report   |
| Context     | <b>configure</b> <b>test-oam</b> <b>link-measurement</b> <b>measurement-template</b> <i>string</i> <b>sample-window</b> <b>window-integrity</b> <i>number</i>  |
| Tree        | <a href="#">window-integrity</a>   |
| Description | <p>This command configures the percentage value that is used to determine whether the sample window has enough samples to be considered representative for that window (integrity), by comparing the number of samples received from the sample window to the percentage configured.</p> <p>The configured percentage considers the interval of probes and the length of the sample window to determine the number of packets required in the sample:</p> $(\text{window-integrity } (\%)) \times ((\text{sample-window length } (s)) / \text{pps per test (interval)})$ <p>If the count is less than the computed number of required samples, the sample window does not have integrity and the sample window results are not compared to configured sample window thresholds.</p> <p>If the count is equal to or greater than the computed number of required samples, the sample window has integrity and the aggregate sample window result is compared to the configured sample window thresholds.</p> <p>If the count is less than the computed number of required samples, the sample window does not have integrity and the value is not considered as representative. In this case the sample window results are not compared to the configured sample window thresholds.</p> <p>If this parameter is not configured, integrity checking is disabled and all results are compared to the configured thresholds.</p> |
| Range       | 1 to 100   |
| Units       | percent  |
| Introduced  | 21.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **twamp-light**

|          |                                      |
|----------|--------------------------------------|
| Synopsis | Enter the <b>twamp-light</b> context |
|----------|--------------------------------------|

|             |   |
|-------------|---|
| Context     | <b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">twamp-light</a> |
| Tree        | <a href="#">twamp-light</a>   |
| Description | Commands in this context configure TWAMP Light attributes that are used with the measurement template when assigned to IP interfaces.                     |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **allow-egress-remark-dscp** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow overwrite of DSCP value by the egress QoS policy  |
| Context     | <b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <a href="#">allow-egress-remark-dscp</a> <i>boolean</i>   |
| Tree        | <a href="#">allow-egress-remark-dscp</a>  |
| Description | <p>When configured to <b>true</b>, the egress QoS process is able to modify the DSCP based on the egress QoS configuration and expose the DSCP to egress DSCP processing rules.</p> <p>When configured to <b>false</b>, the egress QoS process uses the DSCP as configured and bypasses egress QoS DSCP marking.</p> <p>If the <b>configure qos network egress remark-trusted force-egress-marking</b> command is configured for the network egress QoS profile, the egress QoS process is applied and the DSCP can be overwritten regardless of the <b>allow-egress-remark-dscp</b> configuration.</p> |
| Default     | false   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **allow-ipv6-udp-checksum-zero** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Process IPv6 packets with UDP check sum zero   |
| Context     | <b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <a href="#">allow-ipv6-udp-checksum-zero</a> <i>boolean</i>  |
| Tree        | <a href="#">allow-ipv6-udp-checksum-zero</a>   |
| Description | <p>When configured to <b>true</b>, processing of IPv6 packets that arrive with a UDP checksum of zero is allowed. The destination UDP ports that are registered as TWAMP Test packets in the template allow this behavior.</p> <p>When configured to <b>false</b>, IPv6 packets that arrive with a UDP checksum of zero are discarded.</p> |
| Default     | false  |
| Introduced  | 21.7.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dest-udp-port** *number*

Synopsis Destination UDP port used by link measurement tests

Context **configure** [test-oam link-measurement measurement-template](#) *string* [twamp-light dest-udp-port](#) *number*

Tree [dest-udp-port](#)

Description This command configures the destination UDP port on outbound TWAMP Light measurement packets sent from the session controller. The destination UDP port must match the UDP port value configured on the TWAMP Light reflector that responds to this specific TWAMP Light test.

Range 1 to 65535

Default 862

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dscp** *keyword*

Synopsis DSCP copied to TWAMP Light echo request packet header

Context **configure** [test-oam link-measurement measurement-template](#) *string* [twamp-light dscp](#) *keyword*

Tree [dscp](#)

Description This command configures the DSCP to be copied into the IP header of each TWAMP Light echo request packet launched for the test.

Options be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63

Default nc1

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fc** *keyword*

Synopsis Forwarding class name for the TWAMP Light packets

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <i>fc</i> <i>keyword</i> |
| Tree       | <a href="#">fc</a>   |
| Options    | be, l2, af, l1, h2, ef, h1, nc   |
| Default    | h1   |
| Introduced | 21.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## ipv6-destination-discovery

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>ipv6-destination-discovery</b> context  |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <a href="#">ipv6-destination-discovery</a> |
| Tree        | <a href="#">ipv6-destination-discovery</a>   |
| Description | Commands in this context configure IPv6 discovery of a directly-connected IPv6 peer address.   |
| Introduced  | 22.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of IPv6 auto destination discovery  |
| Context    | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <a href="#">ipv6-destination-discovery</a> <i>admin-state</i> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 22.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## discovery-interval *number*

|          |  |
|----------|--|
| Synopsis | Transmission frequency for discovery packets   |
| Context  | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light</a> <a href="#">ipv6-destination-discovery</a> <i>discovery-interval</i> <i>number</i> |
| Tree     | <a href="#">discovery-interval</a>   |

|             |   |
|-------------|---|
| Description | This command configures transmission frequency of the discovery packet to the all-routers multicast group (ff02::2) to discover the link-local address of the peer. This frequency is used during the <b>discover-timer</b> interval. |
| Range       | 1 to 10   |
| Units       | seconds   |
| Default     | 10  |
| Introduced  | 22.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **discover-timer** *number*

|             |  |
|-------------|--|
| Synopsis    | Maximum time to remain in the discovery phase  |
| Context     | <b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">twamp-light ipv6-destination-discovery</a> <b>discover-timer</b> <i>number</i>   |
| Tree        | <a href="#">discover-timer</a>   |
| Description | This command configures the amount of time to transmit peer discovery packets at the <b>discover-interval</b> .<br><br>The timer starts when the IPv6 protocols is enabled under the <b>configure router interface if-attribute delay dynamic twamp-light ipv6</b> context. At the expiration of the <b>discover-interval</b> or when a peer is discovered, whichever comes first, the probe interval changes to the value configured for the <b>update-interval</b> . |
| Range       | 1 to 1800  |
| Units       | seconds  |
| Default     | 60   |
| Introduced  | 22.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **update-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Transmission frequency to maintain the peer address   |
| Context    | <b>configure</b> <a href="#">test-oam</a> <a href="#">link-measurement</a> <a href="#">measurement-template</a> <i>string</i> <a href="#">twamp-light ipv6-destination-discovery</a> <b>update-interval</b> <i>number</i> |
| Tree       | <a href="#">update-interval</a>   |
| Range      | 0   1 to 3600   |
| Units      | seconds   |
| Default    | 600   |
| Introduced | 22.7.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **pad-tlv-size** *number*

Synopsis Optional PAD TLV size

Context **configure** [test-oam link-measurement measurement-template](#) *string* [twamp-light pad-tlv-size](#) *number*

Tree [pad-tlv-size](#)

Description This command enables a STAMP PDU to include the PAD TLV. This increases the size of the STAMP PDU by the size of the added TLV. The PAD TLV includes an all zeros pattern.

Range 4 to 9714

Units bytes

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **profile** *keyword*

Synopsis QoS profile for packet treatment in local node

Context **configure** [test-oam link-measurement measurement-template](#) *string* [twamp-light profile](#) *keyword*

Tree [profile](#)

Description This command specifies if the packets should be treated as in or out of profile as they move through the local node.

Options in, out

Default in

Introduced 21.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **return-path**

Synopsis Enter the **return-path** context

Context **configure** [test-oam link-measurement measurement-template](#) *string* [twamp-light return-path](#)

Tree [return-path](#)

Description Commands in this context configure the return-path TLV carried in the STAMP PDU.

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### link *boolean*

Synopsis The Return Path sub-TLV specifying link

Context **configure test-oam link-measurement measurement-template** *string twamp-light return-path link* *boolean*

Tree [link](#)

Description When configured to **true**, the system includes the **return-path** TLV link. The link sub-tlv instructs a Session-Reflector configured for type **stamp** to use the receiving logical IP interface for the transmission of the response packet from the reflector to the **session-sender**. The destination of the reflected packet must be installed in the forwarding table and reachable out the IP interface or the packet is dropped by the Session-Reflector. When there are parallel non-equal cost return paths between the Session-Reflector and the Session-Sender the response packet can only be returned on the lowest cost path.

When configured to **false**, the Return Path TLV carried in the STAMP PDU is not included with the test packet.

Default false

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### src-udp-port *number*

Synopsis Fixed source UDP port for link measurement tests

Context **configure test-oam link-measurement measurement-template** *string twamp-light src-udp-port* *number*

Tree [src-udp-port](#)

Description This command specifies a source UDP port for link measurement tests.

Unless required, Nokia suggests that the link measurement dynamically select an available source UDP port from the dynamic range. Before a UDP port in the configurable range can be configured as a source it must be owned by the application. Use the **configure test-oam twamp twamp-light source-udp-port-pools port pool-type** command to map the port range to the application.

By default a source UDP port allocates from the dynamic range. The configuration of the source port should only be configured when required for interoperability. When the source IP, destination IP, and destination UPD port are the same for a test, the source UDP port must be different in order to uniquely identify the session.

Range 64374 to 64383

Introduced 22.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**timestamp-format** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Format of the timestamp used in TWAMP Light PDU   |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light timestamp-format</a> <i>keyword</i>   |
| Tree        | <a href="#">timestamp-format</a>  |
| Description | This command configures the format of the timestamp used in the TWAMP Light PDU and places the requested timestamp format in the packet using the appropriate epoch. This is unrelated to any time distribution protocol used to synchronize time between clocks. |
| Options     | ntp, ptp  |
| Default     | ntp   |
| Introduced  | 21.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**tll** *number*

|            |   |
|------------|---|
| Synopsis   | Time to live value used in the TWAMP Light test packet  |
| Context    | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">twamp-light tll</a> <i>number</i> |
| Tree       | <a href="#">tll</a>   |
| Range      | 1 to 255  |
| Default    | 1   |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**unidirectional-measurement** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Method used to compute the unidirectional delay value   |
| Context     | <b>configure</b> <a href="#">test-oam link-measurement measurement-template</a> <i>string</i> <a href="#">unidirectional-measurement</a> <i>keyword</i>   |
| Tree        | <a href="#">unidirectional-measurement</a>  |
| Description | This command specifies the unidirectional delay computation method as the actual forward delay (calculated using T2-T1 timestamps) or as derived using the round-trip delay divided by two (required if nodal clocks are not synchronized using an accurate time-synchronization method or protocol such as PTP). |
| Options     | derived, actual   |

---

|            |  |
|------------|--|
| Default    | derived  |
| Introduced | 21.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## **mpls-dm**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mpls-dm</b> context                             |
| Context    | <b>configure test-oam mpls-dm</b>                            |
| Tree       | <a href="#">mpls-dm</a>                                      |
| Introduced | 16.0.R6  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of MPLS DM packet processing            |
| Context    | <b>configure test-oam mpls-dm admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>                                  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R6  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                      |

### **port** [[port-number](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>port</b> list instance  |
| Context    | <b>configure</b> <a href="#">test-oam twamp twamp-light source-udp-port-pools</a> <a href="#">port</a> <i>number</i> |
| Tree       | <a href="#">port</a>   |
| Introduced | 22.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **[port-number]** *number*

|            |  |
|------------|--|
| Synopsis   | Source UDP port pools port number  |
| Context    | <b>configure</b> <a href="#">test-oam twamp twamp-light source-udp-port-pools</a> <a href="#">port</a> <i>number</i> |
| Tree       | <a href="#">port</a>   |
| Range      | 64374 to 64383   |
| Notes      | This element is part of a list key.  |
| Introduced | 22.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **pool-type** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Pool type of an application pool   |
| Context     | <b>configure</b> <a href="#">test-oam twamp twamp-light source-udp-port-pools</a> <a href="#">port</a> <i>number</i> <a href="#">pool-type</a> <i>keyword</i>  |
| Tree        | <a href="#">pool-type</a>  |
| Description | <p>This command maps the specified source UDP port to the TWAMP Light application allowed to configure the source UDP port. OAM-PM IP tests can only configure the source UDP port when the port pool UDP source port is configured with a <b>pool-type oam-pm</b>. The <b>test-oam link-measurement measurement-template</b> can only configure the <b>src-udp-port</b> when the port pool UDP source port is configured with <b>pool-type link-measurement</b>.</p> <p>This command maps the specified source UDP port to the application allowed to configure the source UDP port. The OAM-PM IP family of tests can only configure the source UDP port when the port pool UDP source port is configured with a pool-type</p> |

---

oam-pm. The test-oam link-measurement measurement-template can only configure the src-udp-port when the port pool UDP source port is configured with a pool-type link-measurement. A pool-type cannot be changed if its current application is a test (either an oam-pm session or link-measurement template) and is configured to use the specified port, regardless of the administrative or operational state. The configuration reference linking to the source UDP prevents the change.

|            |  |
|------------|--|
| Options    | oam-pm, link-measurement                                     |
| Default    | oam-pm   |
| Introduced | 22.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### 3.48.1 vrrp command descriptions

#### **vrrp**

|            |                               |
|------------|-------------------------------|
| Synopsis   | Enter the <b>vrrp</b> context |
| Context    | <b>configure vrrp</b>         |
| Tree       | <a href="#">vrrp</a>          |
| Introduced | 16.0.R1                       |
| Platforms  | All                           |

#### **policy** [[policy-id](#)] *number*

|            |                                       |
|------------|---------------------------------------|
| Synopsis   | Enter the <b>policy</b> list instance |
| Context    | <b>configure vrrp policy number</b>   |
| Tree       | <a href="#">policy</a>                |
| Introduced | 16.0.R1                               |
| Platforms  | All                                   |

#### **[policy-id]** *number*

|            |                                     |
|------------|-------------------------------------|
| Synopsis   | Policy ID                           |
| Context    | <b>configure vrrp policy number</b> |
| Tree       | <a href="#">policy</a>              |
| Range      | 1 to 9999                           |
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R1                             |
| Platforms  | All                                 |

#### **admin-state** *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of VRRP priority control policy    |
| Context  | <b>configure vrrp policy number admin-state keyword</b> |
| Tree     | <a href="#">admin-state</a>                             |
| Options  | enable, disable   |
| Default  | enable  |

Introduced 16.0.R1  
Platforms All

### **context** *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Service name to which this policy applies  
Context **configure vrrp policy number context string**  
Tree [context](#)  
String Length 1 to 64  
Introduced 16.0.R1  
Platforms All

### **delta-in-use-limit** *number*

Synopsis Limit on the delta priority control events  
Context **configure vrrp policy number delta-in-use-limit number**  
Tree [delta-in-use-limit](#)  
Range 1 to 254  
Default 1  
Introduced 16.0.R1  
Platforms All

### **description** *string*

Synopsis Text description  
Context **configure vrrp policy number description string**  
Tree [description](#)  
String Length 1 to 80  
Introduced 16.0.R1  
Platforms All

## priority-event

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priority-event</b> context            |
| Context    | <b>configure vrrp policy number priority-event</b> |
| Tree       | <a href="#">priority-event</a>                     |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## host-unreachable [[ip-address](#)] (*ipv4-address-with-zone* | *ipv6-address-with-zone*)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>host-unreachable</b> list instance   |
| Context    | <b>configure vrrp policy number priority-event host-unreachable</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) |
| Tree       | <a href="#">host-unreachable</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## [[ip-address](#)] (*ipv4-address-with-zone* | *ipv6-address-with-zone*)

|             |  |
|-------------|--|
| Synopsis    | Host IP address that receives a constant ping probe  |
| Context     | <b>configure vrrp policy number priority-event host-unreachable</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> )                                      |
| Tree        | <a href="#">host-unreachable</a>   |
| Description | This command configures the host IP address for which the specific host unreachable priority event monitors connectivity with a continuous ICMP echo request (ping) probe. |
| Notes       | This element is part of a list key.  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## drop-count *number*

|          |  |
|----------|--|
| Synopsis | Threshold for consecutive message send attempts  |
| Context  | <b>configure vrrp policy number priority-event host-unreachable</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>drop-count number</b> |
| Tree     | <a href="#">drop-count</a>   |
| Range    | 1 to 60  |
| Default  | 3  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **hold-clear** *number*

|            |   |
|------------|---|
| Synopsis   | Delay time for a cleared event on the router instance   |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event host-unreachable</a> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>hold-clear</b> <i>number</i> |
| Tree       | <a href="#">hold-clear</a>  |
| Range      | 1 to 86400  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **hold-set** *number*

|            |   |
|------------|---|
| Synopsis   | Hold time before transitioning to cleared state   |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event host-unreachable</a> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>hold-set</b> <i>number</i> |
| Tree       | <a href="#">hold-set</a>  |
| Range      | 1 to 86400  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **padding-size** *number*

|            |   |
|------------|---|
| Synopsis   | Packet length padding of the ICMP packet  |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event host-unreachable</a> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>padding-size</b> <i>number</i> |
| Tree       | <a href="#">padding-size</a>  |
| Range      | 0 to 16384  |
| Units      | bytes   |
| Default    | 56  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## priority

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priority</b> context  |
| Context    | <b>configure</b> <a href="#">vrrp policy number</a> <a href="#">priority-event host-unreachable</a> ( <a href="#">ipv4-address-with-zone</a>   <a href="#">ipv6-address-with-zone</a> ) <a href="#">priority</a> |
| Tree       | <a href="#">priority</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## event-type *keyword*

|            |   |
|------------|---|
| Synopsis   | Effect of priority-level value on base priority value   |
| Context    | <b>configure</b> <a href="#">vrrp policy number</a> <a href="#">priority-event host-unreachable</a> ( <a href="#">ipv4-address-with-zone</a>   <a href="#">ipv6-address-with-zone</a> ) <a href="#">priority event-type keyword</a> |
| Tree       | <a href="#">event-type</a>  |
| Options    | delta, explicit   |
| Default    | delta   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## priority-level *number*

|            |  |
|------------|--|
| Synopsis   | Priority level associated with this event  |
| Context    | <b>configure</b> <a href="#">vrrp policy number</a> <a href="#">priority-event host-unreachable</a> ( <a href="#">ipv4-address-with-zone</a>   <a href="#">ipv6-address-with-zone</a> ) <a href="#">priority priority-level number</a> |
| Tree       | <a href="#">priority-level</a>   |
| Range      | 1 to 254   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## request-interval *number*

|          |   |
|----------|---|
| Synopsis | Time interval between consecutive ICMP echo requests  |
| Context  | <b>configure</b> <a href="#">vrrp policy number</a> <a href="#">priority-event host-unreachable</a> ( <a href="#">ipv4-address-with-zone</a>   <a href="#">ipv6-address-with-zone</a> ) <a href="#">request-interval number</a> |
| Tree     | <a href="#">request-interval</a>  |

|            |         |
|------------|---------|
| Range      | 1 to 60 |
| Units      | seconds |
| Default    | 1       |
| Introduced | 16.0.R1 |
| Platforms  | All     |

**timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Timeout for ICMP echo request messages   |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">host-unreachable</a> ( <a href="#">ipv4-address-with-zone</a>   <a href="#">ipv6-address-with-zone</a> ) <a href="#">timeout</a> <i>number</i> |
| Tree       | <a href="#">timeout</a>  |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**lag-port-down** [[lag-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lag-port-down</b> list instance  |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">lag-port-down</a> <i>string</i> |
| Tree       | <a href="#">lag-port-down</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[lag-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | LAG name  |
| Context       | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">lag-port-down</a> <i>string</i> |
| Tree          | <a href="#">lag-port-down</a>   |
| String Length | 1 to 27   |
| Notes         | This element is part of a list key.   |
| Introduced    | 21.2.R1   |
| Platforms     | All   |

**hold-clear** *number*

|            |   |
|------------|---|
| Synopsis   | Delay time for a cleared event on the router instance   |
| Context    | <b>configure</b> <i>vrp policy number priority-event lag-port-down string hold-clear number</i> |
| Tree       | <a href="#">hold-clear</a>  |
| Range      | 1 to 86400  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**hold-set** *number*

|            |   |
|------------|---|
| Synopsis   | Hold time before transitioning to cleared state   |
| Context    | <b>configure</b> <i>vrp policy number priority-event lag-port-down string hold-set number</i> |
| Tree       | <a href="#">hold-set</a>  |
| Range      | 1 to 86400  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**number-down** [[number-of-lag-ports-down](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>number-down</b> list instance   |
| Context    | <b>configure</b> <i>vrp policy number priority-event lag-port-down string number-down number</i> |
| Tree       | <a href="#">number-down</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[number-of-lag-ports-down]** *number*

|          |  |
|----------|--|
| Synopsis | Threshold of down LAG ports that create a set event  |
| Context  | <b>configure</b> <i>vrp policy number priority-event lag-port-down string number-down number</i> |
| Tree     | <a href="#">number-down</a>  |
| Range    | 1 to 64  |
| Notes    | This element is part of a list key.  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

## priority

|            |   |
|------------|---|
| Synopsis   | Enter the <b>priority</b> context   |
| Context    | <b>configure</b> <a href="#">vrrp policy number</a> <a href="#">priority-event lag-port-down string</a> <a href="#">number-down number</a> <a href="#">priority</a> |
| Tree       | <a href="#">priority</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## event-type *keyword*

|            |  |
|------------|--|
| Synopsis   | Effect of priority-level value on base priority value  |
| Context    | <b>configure</b> <a href="#">vrrp policy number</a> <a href="#">priority-event lag-port-down string</a> <a href="#">number-down number</a> <a href="#">priority event-type keyword</a> |
| Tree       | <a href="#">event-type</a>   |
| Options    | delta, explicit  |
| Default    | delta  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## priority-level *number*

|            |   |
|------------|---|
| Synopsis   | Priority level associated with this event   |
| Context    | <b>configure</b> <a href="#">vrrp policy number</a> <a href="#">priority-event lag-port-down string</a> <a href="#">number-down number</a> <a href="#">priority priority-level number</a> |

| Range      | 1 to 254  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## weight-down [[lag-ports-down-weight](#)] *number*

|          |  |
|----------|--|
| Synopsis | Enter the <b>weight-down</b> list instance |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure</b> <i>vrrp policy number priority-event lag-port-down string weight-down number</i> |
| Tree       | <a href="#">weight-down</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[lag-ports-down-weight]** *number*

|            |   |
|------------|---|
| Synopsis   | LAG name for the reduced LAG ports  |
| Context    | <b>configure</b> <i>vrrp policy number priority-event lag-port-down string weight-down number</i> |
| Tree       | <a href="#">weight-down</a>   |
| Range      | 1 to 64   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **priority**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priority</b> context  |
| Context    | <b>configure</b> <i>vrrp policy number priority-event lag-port-down string weight-down number priority</i> |
| Tree       | <a href="#">priority</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **event-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Effect of priority-level value on base priority value   |
| Context    | <b>configure</b> <i>vrrp policy number priority-event lag-port-down string weight-down number priority event-type keyword</i> |
| Tree       | <a href="#">event-type</a>  |
| Options    | delta, explicit   |
| Default    | delta   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**priority-level** *number*

|            |   |
|------------|---|
| Synopsis   | Priority level associated with this event   |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event lag-port-down</a> <i>string</i> <a href="#">weight-down</a> <i>number</i> <a href="#">priority</a> <a href="#">priority-level</a> <i>number</i> |
| Tree       | <a href="#">priority-level</a>  |
| Range      | 1 to 254  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**mc-ipsec-non-forwarding** [[tunnel-group-id](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mc-ipsec-non-forwarding</b> list instance  |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> |
| Tree       | <a href="#">mc-ipsec-non-forwarding</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**[tunnel-group-id]** *number*

|            |   |
|------------|---|
| Synopsis   | IPSEC tunnel group monitored by priority control event  |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> |
| Tree       | <a href="#">mc-ipsec-non-forwarding</a>   |
| Range      | 1 to 16   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**hold-clear** *number*

|          |  |
|----------|--|
| Synopsis | Delay time for a cleared event on the router instance  |
| Context  | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> <a href="#">hold-clear</a> <i>number</i> |
| Tree     | <a href="#">hold-clear</a>   |
| Range    | 1 to 86400   |
| Units    | seconds  |

|            |  |
|------------|--|
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **hold-set** *number*

|            |   |
|------------|---|
| Synopsis   | Hold time before transitioning to cleared state   |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> <b>hold-set</b> <i>number</i> |
| Tree       | <a href="#">hold-set</a>  |
| Range      | 1 to 86400  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **priority**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>priority</b> context   |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> <b>priority</b> |
| Tree       | <a href="#">priority</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **event-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Event type  |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> <b>priority</b> <a href="#">event-type</a> <i>keyword</i> |
| Tree       | <a href="#">event-type</a>  |
| Options    | delta, explicit   |
| Default    | delta   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **priority-level** *number*

|          |   |
|----------|---|
| Synopsis | Priority level associated with this event |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event mc-ipsec-non-forwarding</a> <i>number</i> <a href="#">priority</a> <a href="#">priority-level</a> <i>number</i> |
| Tree       | <a href="#">priority-level</a>  |
| Range      | 1 to 254  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **port-down** [\[port-id\]](#) *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>port-down</b> list instance  |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> |
| Tree       | <a href="#">port-down</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[port-id]** *string*

|            |   |
|------------|---|
| Synopsis   | Port ID for the reduced LAG ports   |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> |
| Tree       | <a href="#">port-down</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **hold-clear** *number*

|            |  |
|------------|--|
| Synopsis   | Delay time for a cleared event on the router instance  |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> <a href="#">hold-clear</a> <i>number</i> |
| Tree       | <a href="#">hold-clear</a>   |
| Range      | 1 to 86400   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**hold-set** *number*

|            |  |
|------------|--|
| Synopsis   | Hold time before transitioning to cleared state  |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> <a href="#">hold-set</a> <i>number</i> |
| Tree       | <a href="#">hold-set</a>   |
| Range      | 1 to 86400   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**priority**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priority</b> context  |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> <a href="#">priority</a> |
| Tree       | <a href="#">priority</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**event-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Effect of priority-level value on base priority value  |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> <a href="#">priority</a> <a href="#">event-type</a> <i>keyword</i> |
| Tree       | <a href="#">event-type</a>   |
| Options    | delta, explicit  |
| Default    | delta  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**priority-level** *number*

|            |   |
|------------|---|
| Synopsis   | Priority level associated with this event   |
| Context    | <b>configure</b> <a href="#">vrrp policy</a> <i>number</i> <a href="#">priority-event</a> <a href="#">port-down</a> <i>string</i> <a href="#">priority</a> <a href="#">priority-level</a> <i>number</i> |
| Tree       | <a href="#">priority-level</a>  |
| Range      | 1 to 254  |
| Introduced | 16.0.R1   |

Platforms All

### **route-unknown** [[ip-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

Synopsis Enter the **route-unknown** list instance

Context **configure** [vrrp policy](#) *number* [priority-event](#) [route-unknown](#) (*ipv4-prefix* | *ipv6-prefix*)

Tree [route-unknown](#)

Introduced 16.0.R1

Platforms All

### **[ip-prefix]** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis IP prefix of route monitored by priority control event

Context **configure** [vrrp policy](#) *number* [priority-event](#) [route-unknown](#) (*ipv4-prefix* | *ipv6-prefix*)

Tree [route-unknown](#)

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **hold-clear** *number*

Synopsis Delay time for a cleared event on the router instance

Context **configure** [vrrp policy](#) *number* [priority-event](#) [route-unknown](#) (*ipv4-prefix* | *ipv6-prefix*)  
[hold-clear](#) *number*

Tree [hold-clear](#)

Range 1 to 86400

Units seconds

Introduced 16.0.R1

Platforms All

### **hold-set** *number*

Synopsis Hold time before transitioning to cleared state

Context **configure** [vrrp policy](#) *number* [priority-event](#) [route-unknown](#) (*ipv4-prefix* | *ipv6-prefix*)  
[hold-set](#) *number*

Tree [hold-set](#)

|            |            |
|------------|------------|
| Range      | 1 to 86400 |
| Units      | seconds    |
| Introduced | 16.0.R1    |
| Platforms  | All        |

## less-specific

|            |   |
|------------|---|
| Synopsis   | Enable the <b>less-specific</b> context   |
| Context    | <b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> )<br><b>less-specific</b> |
| Tree       | <b>less-specific</b>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## allow-default *boolean*

|            |  |
|------------|--|
| Synopsis   | Match on default route   |
| Context    | <b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> )<br><b>less-specific allow-default <i>boolean</i></b> |
| Tree       | <b>allow-default</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## next-hop [*ip-address*] (*ipv4-address-with-zone | ipv6-address-with-zone*)

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>next-hop</b>  |
| Context    | <b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> )<br><b>next-hop</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) |
| Tree       | <b>next-hop</b>   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

## [*ip-address*] (*ipv4-address-with-zone | ipv6-address-with-zone*)

|          |   |
|----------|---|
| Synopsis | Next-hop IP address for a returned route prefix |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> )<br><b>next-hop</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) |
| Tree        | <b>next-hop</b>   |
| Description | This command configures the next-hop IP address used to match the route prefix being monitored by the priority control event with the results of a route table lookup.              |
| Notes       | This element is part of a list key.   |
| Introduced  | 19.5.R1   |
| Platforms   | All   |

## priority

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priority</b> context  |
| Context    | <b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> )<br><b>priority</b> |
| Tree       | <b>priority</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## event-type keyword

|            |   |
|------------|---|
| Synopsis   | Effect of priority-level value on base priority value   |
| Context    | <b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> )<br><b>priority event-type keyword</b> |
| Tree       | <b>event-type</b>   |
| Options    | delta, explicit   |
| Default    | delta   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## priority-level number

|          |  |
|----------|--|
| Synopsis | Priority level associated with this event  |
| Context  | <b>configure vrrp policy number priority-event route-unknown</b> ( <i>ipv4-prefix   ipv6-prefix</i> )<br><b>priority priority-level number</b> |
| Tree     | <b>priority-level</b>  |
| Range    | 1 to 254   |

---

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **protocol** *keyword*

|                   |   |
|-------------------|---|
| Synopsis          | Routing protocol as match criterion   |
| Context           | <b>configure</b> <b>vrp policy</b> <i>number</i> <b>priority-event</b> <b>route-unknown</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )<br><b>protocol</b> <i>keyword</i> |
| Tree              | <b>protocol</b>   |
| Options           | bgp, ospf, isis, rip, static, bgp-vpn   |
| Max.<br>Instances | 6   |
| Introduced        | 16.0.R1   |
| Platforms         | All   |

## 4 Deprecated and obsolete commands

This section lists the deprecated and obsolete commands in this major release.

## 4.1 Deprecated commands

This chapter provides a list of commands that are marked as “status deprecated” in the Nokia YANG models and the MD-CLI and should no longer be used. Only releases in which commands are initially deprecated are included in this section. If applicable, the equivalent configuration groups command is also deprecated (but not explicitly listed).

See the SR OS Software Release Notes for more information.

### 4.1.1 22.7.R1

#### router commands:

- configure router nat inside large-scale dual-stack-lite deterministic policy-map
- configure router nat inside large-scale dual-stack-lite deterministic policy-map admin-state
- configure router nat inside large-scale dual-stack-lite deterministic policy-map apply-groups
- configure router nat inside large-scale dual-stack-lite deterministic policy-map apply-groups-exclude
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map apply-groups
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map apply-groups-exclude
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map first-outside-address
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map from
- configure router nat inside large-scale dual-stack-lite deterministic policy-map map to
- configure router nat inside large-scale dual-stack-lite deterministic policy-map nat-policy
- configure router nat inside large-scale dual-stack-lite deterministic policy-map source-prefix
- configure router nat inside large-scale nat44 deterministic policy-map
- configure router nat inside large-scale nat44 deterministic policy-map admin-state
- configure router nat inside large-scale nat44 deterministic policy-map apply-groups
- configure router nat inside large-scale nat44 deterministic policy-map apply-groups-exclude
- configure router nat inside large-scale nat44 deterministic policy-map map
- configure router nat inside large-scale nat44 deterministic policy-map map apply-groups
- configure router nat inside large-scale nat44 deterministic policy-map map apply-groups-exclude
- configure router nat inside large-scale nat44 deterministic policy-map map first-outside-address
- configure router nat inside large-scale nat44 deterministic policy-map map from
- configure router nat inside large-scale nat44 deterministic policy-map map to
- configure router nat inside large-scale nat44 deterministic policy-map nat-policy
- configure router nat inside large-scale nat44 deterministic policy-map source-prefix

#### service commands:

- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map admin-state
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map apply-groups
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map apply-groups-exclude
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map apply-groups
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map apply-groups-exclude
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map first-outside-address
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map from
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map map to
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map nat-policy
- configure service vprn nat inside large-scale dual-stack-lite deterministic policy-map source-prefix
- configure service vprn nat inside large-scale nat44 deterministic policy-map
- configure service vprn nat inside large-scale nat44 deterministic policy-map admin-state
- configure service vprn nat inside large-scale nat44 deterministic policy-map apply-groups
- configure service vprn nat inside large-scale nat44 deterministic policy-map apply-groups-exclude
- configure service vprn nat inside large-scale nat44 deterministic policy-map map
- configure service vprn nat inside large-scale nat44 deterministic policy-map map apply-groups
- configure service vprn nat inside large-scale nat44 deterministic policy-map map apply-groups-exclude
- configure service vprn nat inside large-scale nat44 deterministic policy-map map first-outside-address
- configure service vprn nat inside large-scale nat44 deterministic policy-map map from
- configure service vprn nat inside large-scale nat44 deterministic policy-map map to
- configure service vprn nat inside large-scale nat44 deterministic policy-map nat-policy
- configure service vprn nat inside large-scale nat44 deterministic policy-map source-prefix

#### 4.1.2 22.10.R1

##### lag commands:

- configure lag port-weight-speed
- configure lag weight-threshold
- configure lag weight-threshold action
- configure lag weight-threshold cost
- configure lag weight-threshold value

### 4.1.3 22.10.R3

**isa commands:**

- configure isa video-group ad-insert
- configure isa video-group rt-client

**service commands:**

- configure service ies video-interface adi
- configure service ies video-interface adi scte30
- configure service ies video-interface adi scte30 ad-server
- configure service ies video-interface adi scte30 ad-server address
- configure service ies video-interface adi scte30 local-address
- configure service ies video-interface adi scte30 local-address apply-groups
- configure service ies video-interface adi scte30 local-address apply-groups-exclude
- configure service ies video-interface adi scte30 local-address control
- configure service ies video-interface adi scte30 local-address data
- configure service ies video-interface rt-client
- configure service ies video-interface rt-client apply-groups
- configure service ies video-interface rt-client apply-groups-exclude
- configure service ies video-interface rt-client src-address
- configure service vprn video-interface adi
- configure service vprn video-interface adi scte30
- configure service vprn video-interface adi scte30 ad-server
- configure service vprn video-interface adi scte30 ad-server address
- configure service vprn video-interface adi scte30 local-address
- configure service vprn video-interface adi scte30 local-address apply-groups
- configure service vprn video-interface adi scte30 local-address apply-groups-exclude
- configure service vprn video-interface adi scte30 local-address control
- configure service vprn video-interface adi scte30 local-address data
- configure service vprn video-interface rt-client
- configure service vprn video-interface rt-client apply-groups
- configure service vprn video-interface rt-client apply-groups-exclude
- configure service vprn video-interface rt-client src-address

## 4.2 Obsolete commands

This chapter provides a list of commands that are marked as “status obsolete” in the Nokia YANG models and the MD-CLI. These commands can no longer be used and are considered invalid. Only releases in which commands are initially obsoleted are included in this section. If applicable, the equivalent configuration groups command is also obsoleted (but not explicitly listed).

See the SR OS Software Release Notes for more information.

### 4.2.1 22.2.R1

#### card commands:

- configure card mda access egress pool
- configure card mda access egress pool amber-alarm-threshold
- configure card mda access egress pool apply-groups
- configure card mda access egress pool apply-groups-exclude
- configure card mda access egress pool name
- configure card mda access egress pool red-alarm-threshold
- configure card mda access egress pool resv-cbs
- configure card mda access egress pool resv-cbs amber-alarm-action
- configure card mda access egress pool resv-cbs amber-alarm-action max
- configure card mda access egress pool resv-cbs amber-alarm-action step
- configure card mda access egress pool resv-cbs cbs
- configure card mda access egress pool slope-policy
- configure card mda access ingress pool
- configure card mda access ingress pool amber-alarm-threshold
