Options enable, disable

Default disable

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **ignore-mclt-on-takeover** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Ignore maximum client lead during takeover from partner   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover ignore-mclt-on-takeover</a> <i>boolean</i>   |
| Tree        | <a href="#">ignore-mclt-on-takeover</a>   |
| Description | <p>When configured to <b>true</b>, the remote IP address range can be taken over immediately when the intercommunication link enters the PARTNER-DOWN state, without having to wait for the MCLT to expire.</p> <p>When configured to <b>false</b>, the DHCP lease time for new clients is restricted to the MCLT during a failure. For existing clients, the lease time is gradually reduced over time to the MCLT by consecutive DHCP renewals.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **maximum-client-lead-time** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Maximum time that DHCP server can extend client's lease   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover maximum-client-lead-time</a> <i>number</i>   |
| Tree        | <a href="#">maximum-client-lead-time</a>  |
| Description | This command configures the maximum client lead time (MCLT), which is the maximum time that a DHCP server can extend the client's lease time beyond the lease time currently known by the DHCP partner node. In dual-homed environments, the initial lease time for all DHCP clients is restricted to the MCLT by default. Consecutive DHCP renewals can extend the lease time beyond the MCLT. |
| Range       | 600 to 86399  |
| Units       | seconds   |
| Default     | 600   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**partner-down-delay** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Delay to prevent lease duplication during link failure   |
| Context     | <b>configure</b> <i>service vprn string dhcp-server dhcpv6 string pool string failover partner-down-delay number</i>   |
| Tree        | <a href="#">partner-down-delay</a>   |
| Description | This command configures the interval before a failed intercommunication link transitions from the COMM-INT state to the PARTNER-DOWN state. This delay prevents IP lease duplication during link failure by not allowing new IP addresses to be assigned from the remote IP address range. This timer is intended to provide the operator with enough time to remedy the failed situation and avoid duplication of IP addresses and prefixes during the failure. |
| Range       | 0 to 86399   |
| Units       | seconds  |
| Default     | 86399  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

| Reference  | <b>configure</b> <a href="#">redundancy multi-chassis peer</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sync-tag** *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Tag that identifies synchronizing server or pool pairs  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover peer</a> <i>reference</i> <a href="#">sync-tag</a> <i>string</i> |
| Tree          | <a href="#">sync-tag</a>  |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **startup-wait-time** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Time between initialization and assuming active role  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover</a> <a href="#">startup-wait-time</a> <i>number</i>  |
| Tree        | <a href="#">startup-wait-time</a>   |
| Description | This command configures a delay that avoids transient issues during the initialization process. During startup wait time, each failover peer waits after the initialization process before assuming the active role for the prefix designated as local or remote. |
| Range       | 60 to 3600  |
| Units       | seconds   |
| Default     | 120   |

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

| Tree        | <b>preferred-lifetime</b>   |
| Description | <p>This command configures the preferred lifetime of the IPv6 lease address or prefix. When the preferred lifetime expires, any derived addresses are deprecated. The preferred lifetime must be less than or equal to the valid lifetime.</p> <p>Each address or prefix assigned to the client has associated preferred and valid lifetimes specified by the address assignment authority (such as the DHCP server, RADIUS, or ESM). To request an extension of the lifetimes assigned to an address, the client sends a renew message to the addressing authority. The authority sends a reply message to the client with the new lifetimes, allowing the client to continue to use the address/prefix without interruption. The lifetimes are transmitted from the addressing authority to the client in the identity association (IA) option at the top level of the message (not the address or prefix level).</p> |

**rebind-time** *number*

|             |  |
|-------------|--|
| Synopsis    | Rebind time for the lease  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv6</b> <i>string</i> <b>pool</b> <i>string</i> <b>prefix</b> <i>string</i> <b>rebind-time</b> <i>number</i>  |
| Tree        | <b>rebind-time</b>   |
| Description | <p>This command configures the rebind time, known as T2, at which the client contacts the addressing authority to extend the lifetimes of its leases.</p> <p>The IP addressing authority (such as the DHCP server, RADIUS, or ESM) controls the time for extending lifetimes on assigned addresses/prefixes through the T1 and T2 parameters assigned to an identity association (IA). At renew time, T1, the client initiates a renew or reply message exchange to extend the lifetimes of any addresses in the IA. The client includes an IA option with all addresses or prefixes currently assigned to the IA in its renew message.</p> <p>Recommended values for T1 and T2 are 0.5 and 0.8 times the shortest preferred lifetime of the addresses or prefixes in the IA that the addressing authority is willing to extend, respectively. The configured rebind timer value should always be less than or equal to the rebind timer. The T1 and T2 values are carried in the IPV6 address option in the IA.</p> |
| Range       | 0 to 1209600   |
| Units       | seconds  |
| Default     | 2880   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**renew-time** *number*

|             |   |
|-------------|---|
| Synopsis    | Renew time for the lease  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv6</b> <i>string</i> <b>pool</b> <i>string</i> <b>prefix</b> <i>string</i> <b>renew-time</b> <i>number</i>  |
| Tree        | <b>renew-time</b>   |
| Description | <p>This command configures the renew time, known as T1, at which the client makes a transition to the lease-renewal state.</p> <p>The IP addressing authority (such as the DHCP server, RADIUS, or ESM) controls the time for extending lifetimes on assigned addresses/prefixes through the T1 and T2 parameters assigned to an identity association (IA). At renew time, T1, the client initiates a renew/reply message exchange to extend the lifetimes of any addresses in the IA. The client includes an IA option with all addresses/prefixes currently assigned to the IA in its renew message.</p> <p>Recommended values for T1 and T2 are 0.5 and 0.8 times the shortest preferred lifetime of the addresses or prefixes in the IA that the addressing authority is willing to extend, respectively. The configured renew timer value should always be shorter than or</p> |

|            |   |
|------------|---|
|            | equal to the rebind timer. The T1 and T2 values are carried in the IPV6 address option in the IA. |
| Range      | 0 to 604800   |
| Units      | seconds   |
| Default    | 1800  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **valid-lifetime** *number*

|             |  |
|-------------|--|
| Synopsis    | Time for the lease to remain valid   |
| Context     | <b>configure</b> <i>service vprn string dhcp-server dhcpv6 string pool string prefix string valid-lifetime number</i>  |
| Tree        | <i>valid-lifetime</i>  |
| Description | <p>This command configures a valid lifetime for a DHCPv6 lease address or prefix. The valid lifetime is the length of time an address and prefix remains in the valid state. The valid lifetime must be greater than or equal to the preferred lifetime. When the valid lifetime expires, the address and prefix becomes invalid and must not be used in communications. RFC 2461 recommends a default value of 30 days.</p> <p>Each address and prefix assigned to the client has associated preferred and valid lifetimes specified by the address assignment authority (such as the DHCP server, RADIUS, or ESM). To request an extension of the lifetimes assigned to an address, the client sends a renew message to the addressing authority. The authority sends a reply message to the client with the new lifetimes, allowing the client to continue to use the address and prefix without interruption. The lifetimes are transmitted from the addressing authority to the client in the identity association (IA) option at the top level of the message (not the address or prefix level).</p> |
| Range       | 300 to 315446399   |
| Units       | seconds  |
| Default     | 86400  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

| Introduced | 16.0.R1   |
| Platforms  | All   |

**ipv6-source-address** (*keyword | ipv6-unicast-address*)

|            |   |
|------------|---|
| Synopsis   | Source address to contact an IPv6 DNS server  |
| Context    | <b>configure service vprn</b> <i>string dns ipv6-source-address</i> ( <i>keyword   ipv6-unicast-address</i> ) |
| Tree       | <a href="#">ipv6-source-address</a>   |
| Options    | use-interface-ip  |
| Default    | use-interface-ip  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**server** (*ipv4-address-no-zone | ipv6-address-no-zone*)

|                |   |
|----------------|---|
| Synopsis       | DNS server used for DNS name resolution   |
| Context        | <b>configure service vprn</b> <i>string dns server</i> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) |
| Tree           | <a href="#">server</a>  |
| Max. Instances | 3   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

**ecmp number**

|          |   |
|----------|---|
| Synopsis | Maximum equal-cost routes for routing table instance    |
| Context  | <b>configure service vprn</b> <i>string ecmp number</i> |

|             |  |
|-------------|--|
| Tree        | <a href="#">ecmp</a>   |
| Description | <p>This command configures ECMP and defines the number of routes for path sharing. ECMP can be used only for routes learned with the same preference and the same protocol.</p> <p>If available ECMP routes at the best preference exceed the maximum ECMP routes allowed, the system selects the route using the following criteria:</p> <ol style="list-style-type: none"> <li>1. The system selects the lowest next hop router ID.</li> <li>2. If the next hop goes to the same neighbor, the system selects the next hop with the lowest interface index.</li> </ol> |
| Range       | 1 to 64  |
| Default     | 1  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **ecmp-unequal-cost** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable ECMP unequal cost capability  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ecmp-unequal-cost</a> <i>boolean</i> |
| Tree       | <a href="#">ecmp-unequal-cost</a>  |
| Default    | false  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

### **entropy-label** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Use entropy label  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">entropy-label</a> <i>boolean</i>   |
| Tree        | <a href="#">entropy-label</a>  |
| Description | <p>When configured to <b>true</b>, this command enables the use of entropy labels.</p> <p>The entropy label and indicator (EL/ELI) are inserted on relevant packets. Applicable packets are those for which at least one LSP in the stack at the far end has advertised the entropy-label capability. These LSPs are in LDP or RSVP tunnels used by an IGP or BGP shortcut. If the tunnel is of type RSVP, the entropy-label capability must also be enabled under the <b>configure router mpls</b> or <b>configure router mpls lsp</b> context.</p> <p>This command also results in other traffic that is forwarded over an LDP or RSVP LSP for which this router is the LER, and for which there is no explicit service endpoint on this router, to have the EL/ELI enabled, subject to the LSP far-end advertising entropy-label-capability. An example of such traffic includes packets arriving on a stitched LDP LSP forwarded over an RSVP LSP.</p> |

The entropy label and the hash label features are mutually exclusive. The entropy label cannot be configured on a spoke SDP or service where the hash label feature has already been configured.

When configured to **false**, this command disables the use of entropy labels.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## eth-cfm

|            |  |
|------------|--|
| Synopsis   | Enter the <b>eth-cfm</b> context                             |
| Context    | <b>configure service vprn string eth-cfm</b>                 |
| Tree       | <b>eth-cfm</b>   |
| Introduced | 19.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## export-inactive-bgp *boolean*

|             |   |
|-------------|---|
| Synopsis    | Export preferred BGP route even if inactive   |
| Context     | <b>configure service vprn string export-inactive-bgp boolean</b>  |
| Tree        | <b>export-inactive-bgp</b>  |
| Description | <p>When configured to <b>true</b>, the preferred BGP route learned by a VPRN is exported as the VPN-IP route even if it is inactive in the route table because a preferred BGP VPRN route from another PE is present. This overrides the default state in which the VPRN cannot export an inactive BGP route. For the BGP route to be exported, the VRF export policy must accept it. This command applies to both MPLS VPN and SRv6 VPN routes. In SRv6 VPN routes the advertised instruction is an End.DT, while in MPLS VPN routes the advertised label is a per-next-hop label. This “best-external” type of route advertisement is useful in active/standby multi-homing scenarios because it ensures that all PEs know about the backup path provided by the standby PE.</p> <p>When configured to <b>false</b>, the preferred BGP route is not exported if it is inactive.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## fib-priority *keyword*

Platforms All

### **filter-cam-type** *keyword*

Synopsis Filter policy type for FlowSpec embedding

Context **configure** [service](#) [vprn](#) *string* [flowspec](#) [filter-cam-type](#) *keyword*

Tree [filter-cam-type](#)

Description This command specifies the filter type that is required to embed FlowSpec entries. The filter type defines the match criteria that are available in the filter policy.

Options normal, packet-length

Default normal

Introduced 20.7.R1

Platforms All

### **ip-filter-max-size** *number*

Synopsis Maximum number of flowspec rule entries in IPv4 filter

Context **configure** [service](#) [vprn](#) *string* [flowspec](#) [ip-filter-max-size](#) *number*

Tree [ip-filter-max-size](#)

Description This command configures the maximum number of IPv4 flowspec routes, or rules, that can be entered in the auto-created embedded filter, fSpec-X. Flowspec filter entries embedded in a filter policy in this routing instance will use filter entries from the range between the embedding offset and (offset + ip-filter-max-size – 1).

The sum of the maximum-size value and the highest offset in any IPv4 filter that embeds IPv4 flowspec rules from this routing instance (excluding filters that embed at offset 262143) must not exceed 262143.

The maximum size can be adjusted up or down at any time. If the current number of IPv4 flowspec rules is greater than the new maximum, the extra rules are removed immediately but retained in the BGP RIB. If the limit is increased, new rules are programmed only as they are received in new BGP updates.

Range 0 to 262143

Default 512

Introduced 16.0.R1

Platforms All

### **ipv6-filter-max-size** *number*

Synopsis Maximum number of flowspec rule entries in IPv6 filter

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <b>flowspec ipv6-filter-max-size</b> <i>number</i>  |
| Tree        | <a href="#">ipv6-filter-max-size</a>  |
| Description | <p>This command configures the maximum number of IPv6 flowspec routes or rules that can be embedded into an ingress IPv6 filter policy for a specified routing instance. Flowspec filter entries embedded in a filter policy in this routing instance will use filter entries from the range between the embedding offset and (offset + ip-filter-max-size – 1).</p> <p>The sum of the maximum-size value and the highest offset in any IPv6 filter that embeds IPv6 flowspec rules from this routing instance (excluding filters that embed at offset 262143) must not exceed 262143.</p> <p>The maximum size can be adjusted up or down at any time. If the current number of IPv6 flowspec rules is greater than the new maximum, the extra rules are removed immediately but retained in the BGP RIB. If the limit is increased, new rules are programmed only as they are received in new BGP updates.</p> |
| Range       | 0 to 262143   |
| Default     | 512   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

| Introduced | 16.0.R1  |
| Platforms  | All  |

### **dynamic-topology-discovery** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable the ANCP dynamic topology discovery capability   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">gsmp group</a> <i>string</i> <b>ancp</b> <b>dynamic-topology-discovery</b> <i>boolean</i> |
| Tree       | <a href="#">dynamic-topology-discovery</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **oam** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable GSMP ANCP OAM capability at startup of GSMP connection |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">gsmp</a> <a href="#">group</a> <i>string</i> <a href="#">ancp</a> <a href="#">oam</a> <i>boolean</i> |
| Tree       | <a href="#">oam</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">gsmp</a> <a href="#">group</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**hold-multiplier** *number*

|            |  |
|------------|--|
| Synopsis   | Hold-multiplier for the GSMP connections in this group   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">gsmp</a> <a href="#">group</a> <i>string</i> <a href="#">hold-multiplier</a> <i>number</i> |
| Tree       | <a href="#">hold-multiplier</a>  |
| Range      | 1 to 100   |
| Default    | 3  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**idle-filter** *boolean*

|            |   |
|------------|---|
| Synopsis   | Filter ANCP messages from IDLE DSL lines  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">gsmp</a> <a href="#">group</a> <i>string</i> <a href="#">idle-filter</a> <i>boolean</i> |
| Tree       | <a href="#">idle-filter</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**keepalive** *number*

|            |  |
|------------|--|
| Synopsis   | Keepalive value for the GSMP connections in this group                         |
| Context    | <b>configure</b> <i>service vprn string gsmp group string keepalive number</i> |
| Tree       | <i>keepalive</i>   |
| Range      | 1 to 25  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**neighbor** [*remote-address*] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>neighbor</b> list instance                                       |
| Context    | <b>configure</b> <i>service vprn string gsmp group string neighbor string</i> |
| Tree       | <i>neighbor</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[remote-address]** *string*

|            |   |
|------------|---|
| Synopsis   | GSMP neighbor remote IP address   |
| Context    | <b>configure</b> <i>service vprn string gsmp group string neighbor string</i> |
| Tree       | <i>neighbor</i>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the GSMP neighbor   |
| Context    | <b>configure</b> <i>service vprn string gsmp group string neighbor string admin-state keyword</i> |
| Tree       | <i>admin-state</i>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |

Platforms All

### **description** *string*

Synopsis Text description

Context **configure** [service](#) [vpn](#) *string* [gsm](#) [group](#) *string* [neighbor](#) *string* [description](#) *string*

| Introduced | 16.0.R1 |
| Platforms  | All     |

## gtp

|            |  |
|------------|--|
| Synopsis   | Enter the <b>gtp</b> context             |
| Context    | <b>configure service vprn string gtp</b> |
| Tree       | <b>gtp</b>                               |
| Introduced | 16.0.R1                                  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR       |

## s11

|            |  |
|------------|--|
| Synopsis   | Enter the <b>s11</b> context                 |
| Context    | <b>configure service vprn string gtp s11</b> |
| Tree       | <b>s11</b>                                   |
| Introduced | 16.0.R1                                      |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR           |

## interface [[interface-name](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>interface</b> list instance                         |
| Context    | <b>configure service vprn string gtp s11 interface reference</b> |
| Tree       | <b>interface</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                               |

## [[interface-name](#)] *reference*

|           |  |
|-----------|--|
| Synopsis  | Interface name   |
| Context   | <b>configure service vprn string gtp s11 interface reference</b> |
| Tree      | <b>interface</b>   |
| Reference | <b>configure service vprn string interface string</b>            |
| Notes     | This element is part of a list key.                              |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **apn-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Access Point Name (APN) policy for the S11 interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">gtp s11 interface reference</a> <a href="#">apn-policy reference</a> |
| Tree       | <a href="#">apn-policy</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt gtp apn-policy</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **peer-profile-map**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>peer-profile-map</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">gtp s11 peer-profile-map</a> |
| Tree       | <a href="#">peer-profile-map</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **prefix** [[peer-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>prefix</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">gtp s11 peer-profile-map prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">prefix</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **[peer-prefix]** (*ipv4-prefix* | *ipv6-prefix*)

|            |   |
|------------|---|
| Synopsis   | IP prefix and prefix length of the subnet   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">gtp s11 peer-profile-map prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">prefix</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **peer-profile** *reference*

Synopsis Peer profile used for peers in this prefix

Context **configure service vprn** *string* **gtp s11 peer-profile-map prefix** (*ipv4-prefix* | *ipv6-prefix*) **peer-profile** *reference*

Tree **peer-profile**

Reference **configure subscriber-mgmt gtp peer-profile** *string*

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **upf-data-endpoint**

Synopsis Enable the **upf-data-endpoint** context

Context **configure service vprn** *string* **gtp upf-data-endpoint**

Tree **upf-data-endpoint**

Description Commands in this context configure a GTP-U service endpoint used by BNG CUPS FWA sessions.

Introduced 21.2.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **fpe** *reference*

Synopsis FPE used to encapsulate and decapsulate GTP-U traffic

Context **configure service vprn** *string* **gtp upf-data-endpoint fpe** *reference*

Tree **fpe**

Reference **configure fwd-path-ext fpe** *number*

Notes This element is mandatory.

Introduced 21.5.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**interface reference**

|            |  |
|------------|--|
| Synopsis   | Interface on which the GTP-U packets terminate                                 |
| Context    | <b>configure service vprn string gtp upf-data-endpoint interface reference</b> |
| Tree       | <a href="#">interface</a>  |
| Reference  | <b>configure service vprn string interface string</b>                          |
| Notes      | This element is mandatory.   |
| Introduced | 21.2.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**uplink**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>uplink</b> context                |
| Context    | <b>configure service vprn string gtp uplink</b> |
| Tree       | <a href="#">uplink</a>                          |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR              |

**apn string**

|               |  |
|---------------|--|
| Synopsis      | Network Identifier part of APN                             |
| Context       | <b>configure service vprn string gtp uplink apn string</b> |
| Tree          | <a href="#">apn</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                         |

**pdn-type keyword**

|            |  |
|------------|--|
| Synopsis   | Default 3GPP PDN in GTP  |
| Context    | <b>configure service vprn string gtp uplink pdn-type keyword</b> |
| Tree       | <a href="#">pdn-type</a>   |
| Options    | ipv4, ipv6, ipv4v6   |
| Default    | ipv4   |
| Introduced | 16.0.R1  |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## peer-profile-map

Synopsis Enter the **peer-profile-map** context

Context **configure service vprn string gtp uplink peer-profile-map**

Tree [peer-profile-map](#)

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## prefix [[peer-prefix](#)] ([ipv4-prefix](#) | [ipv6-prefix](#))

Synopsis Enter the **prefix** list instance

Context **configure service vprn string gtp uplink peer-profile-map prefix ([ipv4-prefix](#) | [ipv6-prefix](#))**

Tree [prefix](#)

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [[peer-prefix](#)] ([ipv4-prefix](#) | [ipv6-prefix](#))

Synopsis IP prefix and prefix length of the subnet

Context **configure service vprn string gtp uplink peer-profile-map prefix ([ipv4-prefix](#) | [ipv6-prefix](#))**

Tree [prefix](#)

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## peer-profile *reference*

Synopsis Peer profile name

Context **configure service vprn string gtp uplink peer-profile-map prefix ([ipv4-prefix](#) | [ipv6-prefix](#)) [peer-profile reference](#)**

Tree [peer-profile](#)

Reference **configure subscriber-mgmt gtp peer-profile string**

Notes This element is mandatory.

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |

| Tree        | <a href="#">policy</a>   |
| Description | This command configures the name of the global channel bandwidth definition policy that is used for (H)MCAC and HQoS adjustment.   |

Within the scope of HQoS adjustment, the channel definition policy under the group interface is used if redirection is unconfigured. In this case, the HQoS adjustment can be applied to IPoE subscribers in per-SAP replication mode.

If redirection is configured, the channel bandwidth definition policy applied under the Layer 3 redirected interface is in effect.

Hierarchical MCAC (HMCAC) is supported on two levels simultaneously:

- subscriber level and redirected interface when redirection is configured
- subscriber level and group-interface level when redirection is unconfigured

In HMCAC, the subscriber is checked against its bandwidth limits first, then against the bandwidth limits of the redirected or group interface. If redirection is configured but the policy is referenced only under the group interface, no admission control is executed (HMCAC or MCAC).

### **query-source-address** *string*

Synopsis Source address for IGMP queries  
Context **configure** [service vprn](#) *string* [igmp group-interface](#) *reference* [query-source-address](#) *string*

---

|             |  |
|-------------|--|
| Tree        | <a href="#">query-source-address</a>   |
| Description | This command configures the query source IP address for the group interface. This IP address overrides the source IP address configured at the router level. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **router-alert-check** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable router alert checking for IGMP or MLD messages  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">igmp</a> <a href="#">group-interface</a> <i>reference</i> <a href="#">router-alert-check</a> <i>boolean</i> |
| Tree       | <a href="#">router-alert-check</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **sub-hosts-only** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow IGMP traffic from known hosts only   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">igmp</a> <a href="#">group-interface</a> <i>reference</i> <a href="#">sub-hosts-only</a> <i>boolean</i> |
| Tree       | <a href="#">sub-hosts-only</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **subnet-check** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow subnet checking  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">igmp</a> <a href="#">group-interface</a> <i>reference</i> <a href="#">subnet-check</a> <i>boolean</i> |
| Tree       | <a href="#">subnet-check</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**version** *keyword*

|            |  |
|------------|--|
| Synopsis   | IGMP protocol version  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">igmp</a> <a href="#">group-interface</a> <i>reference</i> <a href="#">version</a> <i>keyword</i> |
| Tree       | <a href="#">version</a>  |
| Options    | 1, 2, 3  |
| Default    | 3  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**interface** [[ip-interface-name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>interface</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">igmp</a> <a href="#">interface</a> <i>string</i> |
| Tree       | <a href="#">interface</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[ip-interface-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | IP interface name  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">igmp</a> <a href="#">interface</a> <i>string</i> |
| Tree          | <a href="#">interface</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R2  |
| Platforms     | All  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of IGMP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">igmp</a> <a href="#">interface</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |

Platforms All

### **import-policy** *reference*

Synopsis Import policy that filters IGMP packets

Context **configure** [service vpn](#) *string* [igmp interface](#) *string* [import-policy](#) *reference*

Tree [import-policy](#)

Description This command configures the IGMP import policy, or filter, for an interface subscriber or a group interface. An IGMP filter is also known as a black or white list, and it is defined as a router policy option.

When redirection is applied, only the import policy from the subscriber is in effect. The import policy under the group interface is applicable only for IGMP states received directly on the SAP (AN in IGMP proxy mode).

Reference **configure** [policy-options](#) [policy-statement](#) *string*

Introduced 16.0.R1

Platforms All

### **maximum-number-group-sources** *number*

Synopsis Maximum number of group sources for this interface

Context **configure** [service vpn](#) *string* [igmp interface](#) *string* [maximum-number-group-sources](#) *number*

Tree [maximum-number-group-sources](#)

Description This command configures the maximum number of group sources for which IGMP or MLD can have local receiver information based on received IGMP or MLD reports on this interface. When this configuration is changed dynamically to a lower value than the currently accepted number of group sources, the group sources that are already accepted are not deleted. Only new group sources are not allowed.

Range 1 to 32000

Introduced 16.0.R1

Platforms All

### **maximum-number-groups** *number*

Synopsis Maximum number of groups for this interface

Context **configure** [service vpn](#) *string* [igmp interface](#) *string* [maximum-number-groups](#) *number*

Tree [maximum-number-groups](#)

Range 1 to 16000

Introduced 16.0.R1  
 Platforms All

### **maximum-number-sources** *number*

Synopsis Maximum number of sources that are allowed per group  
 Context **configure** [service vprn string igmp interface string maximum-number-sources number](#)  
 Tree [maximum-number-sources](#)  
 Range 1 to 1000  
 Introduced 16.0.R1  
 Platforms All

### **mcac**

Synopsis Enter the **mcac** context  
 Context **configure** [service vprn string igmp interface string mcac](#)  
 Tree [mcac](#)  
 Introduced 16.0.R1  
 Platforms All

### **bandwidth**

Synopsis Enter the **bandwidth** context  
 Context **configure** [service vprn string igmp interface string mcac bandwidth](#)  
 Tree [bandwidth](#)  
 Introduced 16.0.R1  
 Platforms All

### **mandatory** (*number* | *keyword*)

Synopsis Pre-reserved bandwidth for all mandatory channels  
 Context **configure** [service vprn string igmp interface string mcac bandwidth mandatory \(number | keyword\)](#)  
 Tree [mandatory](#)  
 Range 0 to 2147483647  
 Options unlimited

|            |           |

| Range      | 0 to 2147483647  |
| Units      | kilobps  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**number-down** [*number-lag-port-down*] *number*

|          |  |
|----------|--|
| Synopsis | Enter the <b>number-down</b> list instance   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">igmp</a> <a href="#">interface</a> <i>string</i> <a href="#">mcac</a> <a href="#">mc-constraints</a> <a href="#">number-down</a> <i>number</i> |
| Tree     | <a href="#">number-down</a>  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **[number-lag-port-down]** *number*

|            |  |
|------------|--|
| Synopsis   | Number of ports that are down in this LAG link   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">igmp interface</a> <i>string</i> <a href="#">mcac mc-constraints</a> <a href="#">number-down</a> <i>number</i> |
| Tree       | <a href="#">number-down</a>  |
| Range      | 1 to 64  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **level** *number*

|             |  |
|-------------|--|
| Synopsis    | Level ID to associate with number of down LAG ports  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">igmp interface</a> <i>string</i> <a href="#">mcac mc-constraints</a> <a href="#">number-down</a> <i>number</i> <a href="#">level</a> <i>number</i> |
| Tree        | <a href="#">level</a>  |
| Description | This command specifies the bandwidth for a given level. Level 1 has the highest priority and level 8 has the lowest priority.  |
| Range       | 1 to 8   |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **use-lag-port-weight** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use LAG port weight in calculating MCAC constraints   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">igmp interface</a> <i>string</i> <a href="#">mcac mc-constraints</a> <a href="#">use-lag-port-weight</a> <i>boolean</i>   |
| Tree        | <a href="#">use-lag-port-weight</a>   |
| Description | When configured to <b>true</b> , port weight is used when determining available bandwidth per level when LAG ports go down or come up. This command is required for proper operation on mixed port-speed LAGs and can also be used for unmixed port-speed LAGs. |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **policy reference**

|             |  |
|-------------|--|
| Synopsis    | Multicast CAC policy name  |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">igmp interface string</a> <a href="#">mcac policy reference</a>   |
| Tree        | <a href="#">policy</a>   |
| Description | <p>This command configures the name of the global channel bandwidth definition policy that is used for (H)MCAC and HQoS adjustment.</p> <p>Within the scope of HQoS adjustment, the channel definition policy under the group interface is used if redirection is unconfigured. In this case, the HQoS adjustment can be applied to IPoE subscribers in per-SAP replication mode.</p> <p>If redirection is configured, the channel bandwidth definition policy applied under the Layer 3 redirected interface is in effect.</p> <p>Hierarchical MCAC (HMCAC) is supported on two levels simultaneously:</p> <ul style="list-style-type: none"> <li>• subscriber level and redirected interface when redirection is configured</li> <li>• subscriber level and group-interface level when redirection is unconfigured</li> </ul> <p>In HMCAC, the subscriber is checked against its bandwidth limits first, then against the bandwidth limits of the redirected or group interface. If redirection is configured but the policy is referenced only under the group interface, no admission control is executed (HMCAC or MCAC).</p> |
| Reference   | <b>configure</b> <a href="#">mcac policy string</a>  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **query-interval number**

|            |  |
|------------|--|
| Synopsis   | Time between two consecutive host-query messages   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">igmp interface string</a> <a href="#">query-interval number</a> |
| Tree       | <a href="#">query-interval</a>   |
| Range      | 2 to 1024  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**query-last-member-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time between group-specific query messages  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">igmp interface</a> <i>string</i> <a href="#">query-last-member-interval</a> <i>number</i> |
| Tree       | <a href="#">query-last-member-interval</a>  |
| Range      | 1 to 1023   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**query-response-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time to wait for a response to the host-query messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">igmp interface</a> <i>string</i> <a href="#">query-response-interval</a> <i>number</i> |
| Tree       | <a href="#">query-response-interval</a>  |
| Range      | 1 to 1023  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**redundant-mcast** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use interface as a redundant-pair member for multicast  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">igmp interface</a> <i>string</i> <a href="#">redundant-mcast</a> <i>boolean</i> |
| Tree       | <a href="#">redundant-mcast</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**router-alert-check** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable router alert checking for IGMP or MLD messages  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">igmp interface</a> <i>string</i> <a href="#">router-alert-check</a> <i>boolean</i> |
| Tree       | <a href="#">router-alert-check</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ssm-translate

|            |         |
|------------|---------|
| Introduced | 16.0.R2 |
| Platforms  | All     |

### **group-range** *start string end string step string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>group-range</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">igmp</a> <a href="#">interface</a> <i>string</i> <a href="#">static</a> <a href="#">group-range</a> <a href="#">start</a> <i>string</i> <a href="#">end</a> <i>string</i> <a href="#">step</a> <i>string</i> |
| Tree       | <a href="#">group-range</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **start** *string*

|            |  |
|------------|--|
| Synopsis   | IP address for the start of the static group range   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">igmp</a> <a href="#">interface</a> <i>string</i> <a href="#">static</a> <a href="#">group-range</a> <a href="#">start</a> <i>string</i> <a href="#">end</a> <i>string</i> <a href="#">step</a> <i>string</i> |
| Tree       | <a href="#">group-range</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **end** *string*

|            |  |
|------------|--|
| Synopsis   | IP address for the end of the static group range   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">igmp</a> <a href="#">interface</a> <i>string</i> <a href="#">static</a> <a href="#">group-range</a> <a href="#">start</a> <i>string</i> <a href="#">end</a> <i>string</i> <a href="#">step</a> <i>string</i> |
| Tree       | <a href="#">group-range</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **step** *string*

|          |  |
|----------|--|
| Synopsis | Step interval in the group-range address |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>igmp interface</b> <i>string</i> <b>static group-range start</b> <i>string</i> <b>end</b> <i>string</i> <b>step</b> <i>string</i> |
| Tree       | <a href="#">group-range</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **source** [[source-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>source</b>   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>igmp interface</b> <i>string</i> <b>static group-range start</b> <i>string</i> <b>end</b> <i>string</i> <b>step</b> <i>string</i> <b>source</b> <i>string</i> |
| Tree       | <a href="#">source</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **[source-address]** *string*

|            |  |
|------------|--|
| Synopsis   | Source IP address of multicast channel sending data  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>igmp interface</b> <i>string</i> <b>static group-range start</b> <i>string</i> <b>end</b> <i>string</i> <b>step</b> <i>string</i> <b>source</b> <i>string</i> |
| Tree       | <a href="#">source</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R2  |
| Platforms  | All  |

### **starg**

|            |   |
|------------|---|
| Synopsis   | any source address (*,G)  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>igmp interface</b> <i>string</i> <b>static group-range start</b> <i>string</i> <b>end</b> <i>string</i> <b>step</b> <i>string</i> <b>starg</b> |
| Tree       | <a href="#">starg</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .  |
| Introduced | 16.0.R2   |
| Platforms  | All   |

**subnet-check** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow subnet checking   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>igmp interface</b> <i>string</i> <b>subnet-check</b> <i>boolean</i> |
| Tree       | <b>subnet-check</b>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**version** *keyword*

|            |  |
|------------|--|
| Synopsis   | IGMP protocol version  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>igmp interface</b> <i>string</i> <b>version</b> <i>keyword</i> |
| Tree       | <b>version</b>   |
| Options    | 1, 2, 3  |
| Default    | 3  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**query-interval** *number*

|             |   |
|-------------|---|
| Synopsis    | Time between two consecutive host-query messages  |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>igmp query-interval</b> <i>number</i>   |
| Tree        | <b>query-interval</b>   |
| Description | This command configures the timing of the host-query messages that solicit group membership information. The messages are sent to the all-systems multicast group address, 224.0.0.1. |
| Range       | 2 to 1024   |
| Units       | seconds   |
| Default     | 125   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**query-last-member-interval** *number*

|          |  |
|----------|--|
| Synopsis | Time between group-specific query messages |
|----------|--|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn string igmp query-last-member-interval number</b>   |
| Tree        | <a href="#">query-last-member-interval</a>  |
| Description | This command configures the timing of the query-message interval, defining the interval for leave-group messages among others. The lower the interval that is configured, the faster the detection of the loss of the last member of a group. |
| Range       | 1 to 1023   |
| Units       | seconds   |
| Default     | 1   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **query-response-interval number**

|            |  |
|------------|--|
| Synopsis   | Time to wait for a response to the host-query messages                   |
| Context    | <b>configure service vprn string igmp query-response-interval number</b> |
| Tree       | <a href="#">query-response-interval</a>                                  |
| Range      | 1 to 1023  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **robust-count number**

|             |   |
|-------------|---|
| Synopsis    | Number of retries after expected message loss   |
| Context     | <b>configure service vprn string igmp robust-count number</b>   |
| Tree        | <a href="#">robust-count</a>  |
| Description | This command configures the level of expected packet loss on a subnet. If a subnet anticipates losses, the robust-count can be increased. |
| Range       | 2 to 10   |
| Default     | 2   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## ssm-translate

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ssm-translate</b> context                  |
| Context    | <b>configure service vprn string igmp ssm-translate</b> |
| Tree       | <a href="#">ssm-translate</a>                           |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## group-range [start string end string](#)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>group-range</b> list instance  |
| Context    | <b>configure service vprn string igmp ssm-translate group-range start string end string</b> |
| Tree       | <a href="#">group-range</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## start [string](#)

|            |   |
|------------|---|
| Synopsis   | Lower bound of the IP address group range   |
| Context    | <b>configure service vprn string igmp ssm-translate group-range start string end string</b> |
| Tree       | <a href="#">group-range</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## end [string](#)

|            |   |
|------------|---|
| Synopsis   | Upper bound of the IP address group range   |
| Context    | <b>configure service vprn string igmp ssm-translate group-range start string end string</b> |
| Tree       | <a href="#">group-range</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**source** [[source-address](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Add a list entry for <b>source</b>  |
| Context        | <b>configure service vprn</b> <i>string</i> <a href="#">igmp ssm-translate group-range start string end string</a><br><a href="#">source string</a> |
| Tree           | <a href="#">source</a>  |
| Min. Instances | 1   |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

**[source-address]** *string*

|            |   |
|------------|---|
| Synopsis   | Source IP address of multicast channel sending data   |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">igmp ssm-translate group-range start string end string</a><br><a href="#">source string</a> |
| Tree       | <a href="#">source</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R2   |
| Platforms  | All   |

**igmp-host-tracking**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>igmp-host-tracking</b> context                                    |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">igmp-host-tracking</a> |
| Tree       | <a href="#">igmp-host-tracking</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                        |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of IGMP host tracking  |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">igmp-host-tracking admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **expiry-time** *number*

Synopsis Time that the system continues to track inactive hosts

Context **configure** *service vprn string igmp-host-tracking expiry-time number*

Tree [expiry-time](#)

Range 1 to 65535

Units seconds

Default 260

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ignore-nh-metric** *boolean*

Synopsis Ignore next hop metric

Context **configure** *service vprn string ignore-nh-metric boolean*

Tree [ignore-nh-metric](#)

Default false

Introduced 16.0.R1

Platforms All

### **interface** [[interface-name](#)] *string*

Synopsis Enter the **interface** list instance

Context **configure** *service vprn string interface string*

Tree [interface](#)

Introduced 16.0.R1

Platforms All

### **[interface-name]** *string*

Synopsis Interface name

Context **configure** *service vprn string interface string*

Tree [interface](#)

|               |                                     |
|---------------|-------------------------------------|
| String Length | 1 to 32                             |
| Notes         | This element is part of a list key. |
| Introduced    | 16.0.R1                             |
| Platforms     | All                                 |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **cflowd-parameters**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>cflowd-parameters</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>cflowd-parameters</b> |
| Tree       | <a href="#">cflowd-parameters</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **sampling** [[sampling-type](#)] *keyword*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sampling</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">cflowd-parameters</a> <b>sampling</b> <i>keyword</i> |
| Tree       | <a href="#">sampling</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### [[sampling-type](#)] *keyword*

|          |  |
|----------|--|
| Synopsis | Traffic sampling type  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">cflowd-parameters</a> <b>sampling</b> <i>keyword</i> |

|             |   |
|-------------|---|
| Tree        | <a href="#">sampling</a>  |
| Description | This command configures the type of traffic to be sampled on the associated IP interface. |
| Options     | unicast, multicast, both  |
| Notes       | This element is part of a list key.   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **direction** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Direction of traffic for cflowd sampling   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">cflowd-parameters</a> <a href="#">sampling</a> <i>keyword</i> <a href="#">direction</a> <i>keyword</i> |
| Tree        | <a href="#">direction</a>  |
| Description | This command configures the direction in which sampling occurs on the associated IP interfaces.  |
| Options     | ingress-only, egress-only, both  |
| Default     | ingress-only   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **sample-profile** (*keyword* | *number*)

|             |   |
|-------------|---|
| Synopsis    | Sample profile ID   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">cflowd-parameters</a> <a href="#">sampling</a> <i>keyword</i> <a href="#">sample-profile</a> ( <i>keyword</i>   <i>number</i> ) |
| Tree        | <a href="#">sample-profile</a>  |
| Description | This command defines the sampling rate profile associated with this interface.  |
| Max. Range  | 0 to 4294967295   |
| Options     | 1   |
| Introduced  | 19.5.R1   |
| Platforms   | All   |

### **type** *keyword*

|          |                         |
|----------|-------------------------|
| Synopsis | Type of cflowd analysis |
|----------|-------------------------|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>cflowd-parameters sampling</b> <i>keyword</i> <b>type</b> <i>keyword</i> |
| Tree        | <b>type</b>  |
| Description | This command configures the cflowd sampling type on the associated IP interface.   |
| Options     | acl, interface   |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **cpu-protection** *reference*

|            |   |
|------------|---|
| Synopsis   | CPU protection policy   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>cpu-protection</b> <i>reference</i> |
| Tree       | <b>cpu-protection</b>   |
| Reference  | <b>configure system security</b> <b>cpu-protection</b> <i>policy</i> <i>number</i>                                |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <b>description</b>  |
| String Length | 1 to 255  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **dynamic-tunnel-redundant-nexthop** *string*

|             |  |
|-------------|--|
| Synopsis    | Redundant next-hop address for the dynamic IPsec tunnel  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>dynamic-tunnel-redundant-nexthop</b> <i>string</i>   |
| Tree        | <b>dynamic-tunnel-redundant-nexthop</b>  |
| Description | This command specifies the redundant next-hop address on a public or private IPsec interface (with public or private tunnel SAP) for a dynamic IPsec tunnel. The next-hop address is used by a standby node to shunt traffic to a master if it receives the address. The next-hop address is resolved in the routing table of a corresponding service. |

|            |   |
|------------|---|
| Notes      | The following elements are part of a choice: <b>multi-chassis-shunting-profile</b> or ( <b>dynamic-tunnel-redundant-nexthop</b> and <b>static-tunnel-redundant-nexthop</b> ). |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## hold-time

|            |  |
|------------|--|
| Synopsis   | Enter the <b>hold-time</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>hold-time</b> |
| Tree       | <a href="#">hold-time</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ipv4

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>hold-time</b> <b>ipv4</b> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## down

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>down</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>hold-time</b> <b>ipv4</b> <b>down</b>   |
| Tree        | <a href="#">down</a>   |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activating the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the <b>init-only</b> command. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## init-only *boolean*

|          |   |
|----------|---|
| Synopsis | Apply delay only at interface configuration or reboot |
|----------|---|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>hold-time ipv4 down init-only</b> <i>boolean</i> |
| Tree        | <b>init-only</b>   |
| Description | This command applies a delay only when the IP interface is first configured or after a system reboot.                          |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **seconds** *number*

|            |   |
|------------|---|
| Synopsis   | Down hold time for the IP interface   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>hold-time ipv4 down seconds</b> <i>number</i> |
| Tree       | <b>seconds</b>  |
| Range      | 1 to 1200   |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **up**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>up</b> context   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>hold-time ipv4 up</b>   |
| Tree        | <b>up</b>   |
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **seconds** *number*

|          |   |
|----------|---|
| Synopsis | Up hold time for the IP interface   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>hold-time ipv4 up seconds</b> <i>number</i> |
| Tree     | <b>seconds</b>  |
| Range    | 1 to 1200   |
| Units    | seconds   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

## ipv6

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv6</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">hold-time ipv6</a> |
| Tree       | <a href="#">ipv6</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## down

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>down</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">hold-time ipv6 down</a>   |
| Tree        | <a href="#">down</a>  |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the <b>init-only</b> command. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## init-only *boolean*

|             |   |
|-------------|---|
| Synopsis    | Apply delay only at interface configuration or reboot   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">hold-time ipv6 down</a> <a href="#">init-only boolean</a> |
| Tree        | <a href="#">init-only</a>   |
| Description | This command applies the delay only when when the IP interface is first configured or after a system reboot.  |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**seconds** *number*

|            |   |
|------------|---|
| Synopsis   | Down hold time for the IP interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">hold-time ipv6 down</a> <a href="#">seconds</a> <i>number</i> |
| Tree       | <a href="#">seconds</a>   |
| Range      | 1 to 1200   |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**up**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>up</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">hold-time ipv6 up</a>   |
| Tree        | <a href="#">up</a>  |
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**seconds** *number*

|            |   |
|------------|---|
| Synopsis   | Up hold time for the IP interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">hold-time ipv6 up</a> <a href="#">seconds</a> <i>number</i> |
| Tree       | <a href="#">seconds</a>   |
| Range      | 1 to 1200   |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**if-attribute**

|          |  |
|----------|--|
| Synopsis | Enter the <b>if-attribute</b> context  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">if-attribute</a> |
| Tree     | <a href="#">if-attribute</a>   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **admin-group** *reference*

|                |   |
|----------------|---|
| Synopsis       | Administrative group name for the interface   |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">if-attribute</a> <a href="#">admin-group</a> <i>reference</i> |
| Tree           | <a href="#">admin-group</a>   |
| Reference      | <b>configure</b> <a href="#">routing-options</a> <a href="#">if-attribute</a> <a href="#">admin-group</a> <i>string</i>   |
| Max. Instances | 32  |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

### **srlg-group** [[name](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>srlg-group</b>   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">if-attribute</a> <a href="#">srlg-group</a> <i>reference</i> |
| Tree       | <a href="#">srlg-group</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### [[name](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | SRLG name  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">if-attribute</a> <a href="#">srlg-group</a> <i>reference</i> |
| Tree       | <a href="#">srlg-group</a>   |
| Reference  | <b>configure</b> <a href="#">routing-options</a> <a href="#">if-attribute</a> <a href="#">srlg-group</a> <i>string</i>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **ingress**

|          |                                  |
|----------|----------------------------------|
| Synopsis | Enter the <b>ingress</b> context |
|----------|----------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ingress</b> |
| Tree       | <b>ingress</b>  |
| Introduced | 19.7.R1   |
| Platforms  | All   |

### **destination-class-lookup** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable BGP destination class lookup   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ingress destination-class-lookup</b> <i>boolean</i>   |
| Tree        | <b>destination-class-lookup</b>   |
| Description | When configured to <b>true</b> , the router performs a destination class lookup. This command is supported on FP3-based cards and later and is used in combination with the <b>destination-class</b> match criterion for an IP filter policy to filter egress traffic based on BGP destination classes.<br><br>When configured to <b>false</b> , destination class lookup is not enabled. |
| Default     | false   |
| Introduced  | 20.7.R1   |
| Platforms   | All   |

### **policy-accounting** *reference*

|            |  |
|------------|--|
| Synopsis   | Ingress policy accounting template name  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ingress policy-accounting</b> <i>reference</i> |
| Tree       | <b>policy-accounting</b>   |
| Reference  | <b>configure routing-options policy-accounting policy-acct-template</b> <i>string</i>  |
| Introduced | 19.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS   |

### **ingress-stats** *boolean*

|            |  |
|------------|--|
| Synopsis   | Collect ingress statistics   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ingress-stats</b> <i>boolean</i> |
| Tree       | <b>ingress-stats</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **ip-mtu** *number*

|            |  |
|------------|--|
| Synopsis   | IP MTU applied to outgoing packets   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ip-mtu</a> <i>number</i> |
| Tree       | <a href="#">ip-mtu</a>   |
| Range      | 512 to 9786  |
| Units      | bytes  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **ipsec**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>ipsec</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec</a> |
| Tree       | <a href="#">ipsec</a>   |
| Introduced | 22.7.R1   |
| Platforms  | VSR   |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of IPsec secured interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 22.7.R1  |
| Platforms  | VSR  |

### **ip-exception** *reference*

|             |   |
|-------------|---|
| Synopsis    | IP exception filter   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec</a> <a href="#">ip-exception</a> <i>reference</i> |
| Tree        | <a href="#">ip-exception</a>  |
| Description | This command configures the IP exception filter for the secured interface. All ingress traffic matching the specified filter bypasses IPsec processing.                                 |

|            |  |
|------------|--|
| Reference  | <b>configure</b> <a href="#">filter ip-exception</a> <i>string</i> |
| Introduced | 22.7.R1  |
| Platforms  | VSR  |

### **ipsec-tunnel** [[name](#)] *string*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>ipsec-tunnel</b> list instance  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> |
| Tree        | <a href="#">ipsec-tunnel</a>   |
| Description | Commands in this context configure IPsec tunnels used to secure traffic forwarded over the interface.  |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

### **[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | IPsec tunnel name  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> |
| Tree          | <a href="#">ipsec-tunnel</a>   |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 22.7.R1  |
| Platforms     | VSR  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the IPsec tunnel  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 22.7.R1   |
| Platforms  | VSR   |

## bfd

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bfd</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <a href="#">bfd</a> |
| Tree       | <a href="#">bfd</a>  |
| Introduced | 22.7.R1  |
| Platforms  | VSR  |

## bfd-designate *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Designate IPsec tunnel to carry BFD traffic   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <a href="#">bfd</a> <a href="#">bfd-designate</a> <i>boolean</i> |
| Tree       | <a href="#">bfd-designate</a>   |
| Default    | false   |
| Introduced | 22.7.R1   |
| Platforms  | VSR   |

## bfd-liveness

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>bfd-liveness</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <a href="#">bfd</a> <a href="#">bfd-liveness</a>  |
| Tree        | <a href="#">bfd-liveness</a>   |
| Description | Commands in this context configure a BFD session to provide a heart-beat mechanism for a specified IPsec tunnel. There can be only one BFD session assigned to any given IPsec tunnel, but there can be multiple IPsec tunnels using the same BFD session. |

BFD controls the state of the association tunnel. If the BFD session goes down, the system brings down the associated non-designated IPsec tunnel.

Introduced 22.7.R1  
Platforms VSR

### **dest-ip** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Destination address used for the BFD session  
Context **configure** [service vprn](#) *string* [interface](#) *string* [ipsec ipsec-tunnel](#) *string* [bfd bfd-liveness](#) [dest-ip](#) *string*  
Tree [dest-ip](#)  
Notes This element is mandatory.  
Introduced 22.7.R1  
Platforms VSR

### **interface** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Name of the interface used by the BFD session  
Context **configure** [service vprn](#) *string* [interface](#) *string* [ipsec ipsec-tunnel](#) *string* [bfd bfd-liveness](#) [interface](#) *string*  
Tree [interface](#)  
String Length 1 to 32  
Notes This element is mandatory.  
Introduced 22.7.R1  
Platforms VSR

**service-name** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Administrative service name   |
| Context       | <b>configure</b> <i>service vprn string interface string ipsec ipsec-tunnel string bfd bfd-liveness service-name string</i> |
| Tree          | <i>service-name</i>   |
| Description   | This command configures the name of the service where BFD traffic is forwarded to.  |
| String Length | 1 to 64   |
| Notes         | This element is mandatory.  |
| Introduced    | 22.7.R1   |
| Platforms     | VSR   |

**clear-df-bit** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Reset the DF bit to 0 in all payload IP packets  |
| Context     | <b>configure</b> <i>service vprn string interface string ipsec ipsec-tunnel string clear-df-bit boolean</i>  |
| Tree        | <i>clear-df-bit</i>  |
| Description | When configured to <b>true</b> , the DF bit is set to 0 in all payload IP packets associated with the IPsec tunnel, before any potential fragmentation occurs. |
| Default     | false  |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

**copy-traffic-class-upon-decapsulation** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Enable traffic class copy upon decapsulation |
|----------|--|

|             |   |
|-------------|---|
| Context     | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec ipsec-tunnel</b> <i>string</i> <b>copy-traffic-class-upon-decapsulation</b> <i>boolean</i>                   |
| Tree        | <b>copy-traffic-class-upon-decapsulation</b>  |
| Description | When configured to <b>true</b> , the system copies the traffic class from the outer tunnel IP packet header to the payload IP packet header in the decapsulating direction (public to private). |
| Default     | false   |
| Introduced  | 22.7.R1   |
| Platforms   | VSR   |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec ipsec-tunnel</b> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <b>description</b>   |
| String Length | 1 to 80  |
| Introduced    | 22.7.R1  |
| Platforms     | VSR  |

### **encapsulated-ip-mtu** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Maximum size of the encapsulated tunnel packet  |
| Context     | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec ipsec-tunnel</b> <i>string</i> <b>encapsulated-ip-mtu</b> <i>number</i>  |
| Tree        | <b>encapsulated-ip-mtu</b>  |
| Description | This command specifies the maximum size of the encapsulated tunnel packet to the IPsec tunnel, the IP tunnel, or the dynamic tunnels terminated on the IPsec Gateway. If the encapsulated IPv4 or IPv6 tunnel packet exceeds this value, the system fragments the packet. |
| Range       | 512 to 9000   |
| Units       | bytes   |
| Introduced  | 22.7.R1   |
| Platforms   | VSR   |

## icmp-generation

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>icmp-generation</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipsec ipsec-tunnel string</a> <a href="#">icmp-generation</a> |
| Tree        | <a href="#">icmp-generation</a>   |
| Description | Commands in this context configure settings for ICMPv4 message generation.  |
| Introduced  | 22.7.R1   |
| Platforms   | VSR   |

## frag-required

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>frag-required</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipsec ipsec-tunnel string</a> <a href="#">icmp-generation</a> <a href="#">frag-required</a>  |
| Tree        | <a href="#">frag-required</a>  |
| Description | Commands in this context configure the attributes for sending generated ICMP Destination Unreachable "fragmentation needed and DF set" messages (type 3, code 4) back to the source, if the received size of the IPv4 packet on the private side exceeds the private MTU size. |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

## admin-state *keyword*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Administrative state of sending ICMP messages  |
| Context  | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipsec ipsec-tunnel string</a> <a href="#">icmp-generation</a> <a href="#">frag-required</a> <a href="#">admin-state</a> <i>keyword</i> |

|             |  |
|-------------|--|
| Tree        | <a href="#">admin-state</a>  |
| Description | This command configures the administrative state of sending ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4) messages to the source if the received size of the IPv4 packet on the private side exceeds the private MTU size. |
| Options     | enable, disable  |
| Default     | enable   |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

### **interval** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Interval for sending ICMP messages  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <a href="#">icmp-generation frag-required</a> <a href="#">interval</a> <i>number</i> |
| Tree        | <a href="#">interval</a>  |
| Description | This command configures the interval for sending ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4).   |
| Range       | 1 to 60   |
| Units       | seconds   |
| Default     | 10  |
| Introduced  | 22.7.R1   |
| Platforms   | VSR   |

### **message-count** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Maximum number of ICMP messages that can be sent   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <a href="#">icmp-generation frag-required</a> <a href="#">message-count</a> <i>number</i> |
| Tree     | <a href="#">message-count</a>  |

|             |  |
|-------------|--|
| Description | This command configures the maximum number of ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4) that can be sent during the configured interval. |
| Range       | 10 to 1000   |
| Default     | 100  |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

## icmp6-generation

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>icmp6-generation</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <b>icmp6-generation</b> |
| Tree        | <a href="#">icmp6-generation</a>   |
| Description | Commands in this context configure settings for ICMPv6 message generation.   |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

## packet-too-big

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>packet-too-big</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <a href="#">icmp6-generation</a> <b>packet-too-big</b>   |
| Tree        | <a href="#">packet-too-big</a>  |
| Description | <p>Commands in this context configure the parameters to send ICMPv6 PTB (Packet Too Big) messages on the private side.</p> <p>The system sends PTB messages if a received IPv6 packet on the private side is greater than 1280 bytes and it exceeds the private MTU of the tunnel.</p> <p>The private MTU for the tunnel is configured via the <b>configure router interface ipsec ipsec-tunnel ip-mtu</b> command for the interface.</p> |
| Introduced  | 22.7.R1   |

| Reference  | <b>configure</b> <a href="#">ipsec</a> <a href="#">cert-profile</a> <i>string</i>  |
| Introduced | 22.7.R1  |
| Platforms  | VSR  |

## status-verify

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>status-verify</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic cert</a> <a href="#">status-verify</a> |
| Tree        | <a href="#">status-verify</a>  |
| Description | Commands in this context configure attributes of Certificate Status Verification (CSV).  |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

**default-result** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Default result for Certificate Status Verification   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec</b> <b>ipsec-tunnel</b> <i>string</i> <b>key-exchange</b> <b>dynamic</b> <b>cert</b> <b>status-verify</b> <b>default-result</b> <i>keyword</i> |
| Tree        | <b>default-result</b>  |
| Description | This command specifies the default certificate revocation status result to use when all configured CSV methods fail to return a result.  |
| Options     | revoked, good  |
| Default     | revoked  |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

**primary** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Primary method of CSV to verify the revocation status   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec</b> <b>ipsec-tunnel</b> <i>string</i> <b>key-exchange</b> <b>dynamic</b> <b>cert</b> <b>status-verify</b> <b>primary</b> <i>keyword</i> |
| Tree        | <b>primary</b>  |
| Description | This command configures the primary method of Certificate Status Verification (CSV) that is used to verify the revocation status of the certificate of the peer.  |
| Options     | crl, ojsp   |
| Default     | crl   |
| Introduced  | 22.7.R1   |
| Platforms   | VSR   |

**secondary** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Secondary method used to verify certificate revocation  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec</b> <b>ipsec-tunnel</b> <i>string</i> <b>key-exchange</b> <b>dynamic</b> <b>cert</b> <b>status-verify</b> <b>secondary</b> <i>keyword</i> |
| Tree        | <b>secondary</b>  |
| Description | This command specifies the secondary method of Certificate Status Verification (CSV) that is used to verify the revocation status of the peer certificate.  |
| Options     | none, crl, ojsp   |
| Default     | none  |

Introduced 22.7.R1  
 Platforms VSR

### **trust-anchor-profile** *reference*

Synopsis Trust anchor profile name  
 Context **configure** [service vprn string](#) [interface string](#) [ipsec ipsec-tunnel string](#) [key-exchange dynamic cert trust-anchor-profile reference](#)

| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <b>pmtu-discovery-aging</b> <i>number</i> |
| Tree        | <a href="#">pmtu-discovery-aging</a>   |
| Description | This command configures the temporary public and private MTU expiration time. The temporary MTU is used for MTU propagation.   |
| Range       | 900 to 3600  |
| Units       | seconds  |
| Default     | 900  |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

### **private-sap** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Private SAP ID  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec ipsec-tunnel</a> <i>string</i> <b>private-sap</b> <i>number</i> |
| Tree     | <a href="#">private-sap</a>   |
| Range    | 0 to 4094   |
| Notes    | This element is mandatory.  |

Introduced 22.7.R1  
 Platforms VSR

### private-service *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Private service name  
 Context **configure** [service vpn](#) *string* [interface](#) *string* [ipsec ipsec-tunnel](#) *string* [private-service](#) *string*  
 Tree [private-service](#)  
 Description This command configures the private service name.  
 If unconfigured, the private service is the service where the secured interface resides.  
 String Length 1 to 64  
 Introduced 22.7.R1  
 Platforms VSR

### private-tcp-mss-adjust *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis TCP maximum segment size (MSS) adjustment  
 Context **configure** [service vpn](#) *string* [interface](#) *string* [ipsec ipsec-tunnel](#) *string* [private-tcp-mss-adjust](#) *number*  
 Tree [private-tcp-mss-adjust](#)  
 Description This command specifies the TCP MSS to adjust for the tunnel on the private side.  
 When configured, the system may use the value to update the MSS option in the received TCP SYN packet on the private side.  
 Range 512 to 9000  
 Units bytes

Introduced 22.7.R1  
 Platforms VSR

### **propagate-pmtu-v4** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enable propagation of the path MTU to IPv4 hosts

Context **configure** *service vprn string interface string ipsec ipsec-tunnel string propagate-pmtu-v4 boolean*

Tree [propagate-pmtu-v4](#)

Description When configured to **true**, the system propagates the path MTU learned from the public side to the private side (IPv4 hosts).

Default true

Introduced 22.7.R1

Platforms VSR

### **propagate-pmtu-v6** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enable propagation of the path MTU to IPv6 hosts

Context **configure** *service vprn string interface string ipsec ipsec-tunnel string propagate-pmtu-v6 boolean*

Tree [propagate-pmtu-v6](#)

Description When configured to **true**, the system propagates the path MTU learned from the public side to the private side (IPv6 hosts).

Default true

Introduced 22.7.R1

Platforms VSR

**public-tcp-mss-adjust** (*number | keyword*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | TCP maximum segment size (MSS) on the public network  |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec ipsec-tunnel</b> <i>string</i> <b>public-tcp-mss-adjust</b> ( <i>number   keyword</i> )  |
| Tree        | <b>public-tcp-mss-adjust</b>  |
| Description | This command configures the MSS for the TCP traffic in an IPsec tunnel that is sent from the public network to the private network. The system may use this value to adjust or insert the MSS option in the TCP SYN packet. |
| Range       | 512 to 9000   |
| Units       | bytes   |
| Options     | auto  |
| Introduced  | 22.7.R1   |
| Platforms   | VSR   |

**remote-gateway-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Remote IPsec tunnel endpoint address   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec ipsec-tunnel</b> <i>string</i> <b>remote-gateway-address</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) |
| Tree       | <b>remote-gateway-address</b>  |
| Introduced | 22.7.R1  |
| Platforms  | VSR  |

**replay-window** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |                         |
|----------|-------------------------|
| Synopsis | Anti-replay window size |
|----------|-------------------------|

|             |  |
|-------------|--|
| Context     | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec ipsec-tunnel</b> <i>string</i> <b>replay-window</b> <i>number</i> |
| Tree        | <a href="#">replay-window</a>  |
| Description | This command specifies the size of an IPsec anti-replay window. If unconfigured, IPsec anti-replay is disabled.                                      |
| Range       | 32   64   128   256   512  |
| Units       | packets  |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

## security-policy

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>security-policy</b> context   |
| Context     | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec ipsec-tunnel</b> <i>string</i> <b>security-policy</b> |
| Tree        | <a href="#">security-policy</a>  |
| Description | Commands in this context specify a security policy used by the tunnel.   |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

## id number

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Security policy ID for use by the tunnel  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipsec ipsec-tunnel</b> <i>string</i> <b>security-policy id</b> <i>number</i> |
| Tree       | <a href="#">id</a>  |
| Max. Range | 0 to 4294967295   |
| Introduced | 22.7.R1   |
| Platforms  | VSR   |

**strict-match** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enable strict match of the security policy entry  |
| Context     | <b>configure</b> <i>service vpn</i> <i>string</i> <i>interface</i> <i>string</i> <i>ipsec ipsec-tunnel</i> <i>string</i> <i>security-policy</i> <b>strict-match</b> <i>boolean</i>  |
| Tree        | <b>strict-match</b>   |
| Description | <p>When configured to <b>true</b>, this command enables strict match of the security policy entry.</p> <p>When a CREATE_CHILD exchange request is received for a static IPsec tunnel, and this request is not a rekey request, ISA matches the received TSi and TSr with the configured security policy. This can be a match only when a received TS (in TSi or TSr) address range matches exactly with the subnet in a security policy entry.</p> <p>If there is no match, the setup fails, and TS_UNACCEPTABLE is sent.</p> <p>If there is a match, but there is an existing CHILD_SA for the matched security policy, the setup fails, and NO_PROPOSAL_CHOSEN is sent.</p> <p>If there is a match, and there is not a CHILD_SA for the matched entry, the subnet is sent in the matched security policy entry as TSi and TSr, and the CHILD_SA is created.</p> |
| Default     | false   |
| Introduced  | 22.7.R1   |
| Platforms   | VSR   |

**ipv6-exception** *reference*

|             |  |
|-------------|--|
| Synopsis    | IPv6 filter exception used to bypass encryption  |
| Context     | <b>configure</b> <i>service vpn</i> <i>string</i> <i>interface</i> <i>string</i> <i>ipsec</i> <b>ipv6-exception</b> <i>reference</i>   |
| Tree        | <b>ipv6-exception</b>  |
| Description | <p>This command specifies the IPv6 filter exception for an IPsec-secured IPv6 interface. When an IPv6 filter exception is added, clear text packets that match the exception criteria in the IPv6 filter exception can ingress the interface, even when IPsec is enabled on the interface.</p> |
| Reference   | <b>configure</b> <i>filter</i> <b>ipv6-exception</b> <i>string</i>   |
| Introduced  | 22.7.R1  |
| Platforms   | VSR  |

## public-sap *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Public SAP ID  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec public-sap</a> <i>number</i> |
| Tree       | <a href="#">public-sap</a>   |
| Range      | 0 to 4094  |
| Notes      | This element is mandatory.   |
| Introduced | 22.7.R1  |
| Platforms  | VSR  |

## tunnel-group *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Tunnel group ID   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipsec tunnel-group</a> <i>reference</i> |
| Tree       | <a href="#">tunnel-group</a>  |
| Reference  | <b>configure isa tunnel-group</b> <i>number</i>   |
| Notes      | This element is mandatory.  |

| Platforms  | All   |

**echo-receive** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum echo interval over this interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <b>bfd</b> <b>echo-receive</b> <i>number</i> |
| Tree       | <a href="#">echo-receive</a>  |
| Range      | 100 to 100000   |
| Units      | milliseconds  |
| Introduced | 16.0.R1   |

Platforms All

### **multiplier** *number*

Synopsis Number of consecutive BFD messages missed from the peer

Context **configure** [service vprn](#) *string* [interface](#) *string* [ipv4 bfd multiplier](#) *number*

Tree [multiplier](#)

Description This command configures the number of missed messages before the BFD session state is changed to down and the upper-level protocol is notified of the fault. A multiplier of less than 3 should not be used in production environments.

Range 1 to 20

Default 3

Introduced 16.0.R1

Platforms All

### **receive** *number*

Synopsis BFD receive interval over this interface

Context **configure** [service vprn](#) *string* [interface](#) *string* [ipv4 bfd receive](#) *number*

Tree [receive](#)

Description This command specifies the receive interval for the BFD session.  
On the 7750 SR, this command can only be configured to a value less than 100 when the **type** command is configured to **cpm-np**.

Range 10 to 100000

Units milliseconds

Default 100

Introduced 16.0.R1

Platforms All

### **transmit-interval** *number*

Synopsis BFD transmit interval over this interface

Context **configure** [service vprn](#) *string* [interface](#) *string* [ipv4 bfd transmit-interval](#) *number*

Tree [transmit-interval](#)

Description This command configures the transmit intervals.

On the 7750 SR, this command can only be configured to a value less than 100 when the **type** command is configured to **cpm-np**.

|            |              |
|------------|--------------|
| Range      | 10 to 100000 |
| Units      | milliseconds |
| Default    | 100          |
| Introduced | 16.0.R1      |
| Platforms  | All          |

### **type** keyword

|             |   |
|-------------|---|
| Synopsis    | Local termination point for the BFD session   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">bfd</a> <b>type</b> <i>keyword</i>   |
| Tree        | <a href="#">type</a>  |
| Description | This command sets the local termination point for the BFD session to allow for fast timers down to 10 ms granularity.<br>The options to specify where the BFD session runs are: <ul style="list-style-type: none"> <li>• <b>auto</b> (default) – the system chooses and uses the line card CPU only for single-hop BFD sessions with timer intervals equal to or greater than 100ms. All others are placed on the <b>cpm-np</b>.</li> <li>• <b>cpm-np</b> – BFD session runs on the FP complex associated with the CPM. This is either the FP on the CPM or the one elected on smaller systems.</li> <li>• <b>fp</b> – BFD session runs on the line card CPU. This option can only be used for single-hop BFD sessions with timers equal to or greater than 100ms.</li> </ul> |
| Options     | cpm-np, auto, fp  |
| Default     | auto  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **dhcp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dhcp</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <b>dhcp</b> |
| Tree       | <a href="#">dhcp</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of DHCP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**gi-address** *string*

|             |   |
|-------------|---|
| Synopsis    | GI address for the DHCP relay   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <b>gi-address</b> <i>string</i>   |
| Tree        | <a href="#">gi-address</a>  |
| Description | <p>This command configures the GI address to distinguish between the different subscriber interfaces (and potentially group interfaces) defined when the router functions as a DHCP relay.</p> <p>By default, the GI address used in the relayed DHCP packet is the primary IP address of a normal IES interface. Specifying the GI address allows the user to choose a secondary address. For group interfaces, a GI address must be specified under the group interface DHCP context or subscriber interface DHCP context for DHCP to function.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**lease-populate**

|          |   |
|----------|---|
| Synopsis | Enter the <b>lease-populate</b> context   |

| Introduced | 16.0.R1                        |
| Platforms  | All                            |

### **max-leases** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of DHCPv4 leases allowed   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp lease-populate max-leases</a> <i>number</i> |
| Tree       | <a href="#">max-leases</a>  |
| Range      | 0 to 511999   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **option-82**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>option-82</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82</a>               |
| Tree        | <a href="#">option-82</a>   |
| Description | Commands in this context configure the processing required when the router receives a DHCP request that already has an Option 82 field in the packet. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **action** *keyword*

|            |   |
|------------|---|
| Synopsis   | Action to take with received DHCP Option 82   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 action</a> <i>keyword</i> |
| Tree       | <a href="#">action</a>  |
| Options    | replace, drop, keep   |
| Default    | keep  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## circuit-id

|            |  |
|------------|--|
| Synopsis   | Enter the <b>circuit-id</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 dhcp option-82 circuit-id</b> |
| Tree       | <a href="#">circuit-id</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ascii-tuple

|            |   |
|------------|---|
| Synopsis   | Use the ASCII-encoded tuple for the circuit ID  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 dhcp option-82 circuit-id ascii-tuple</b>                  |
| Tree       | <a href="#">ascii-tuple</a>   |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>ifindex</b> , <b>none</b> , <b>sap-id</b> , or <b>vlan-ascii-tuple</b> . |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ifindex

|            |   |
|------------|---|
| Synopsis   | Use the interface index for the circuit ID  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 dhcp option-82 circuit-id ifindex</b>                      |
| Tree       | <a href="#">ifindex</a>   |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>ifindex</b> , <b>none</b> , <b>sap-id</b> , or <b>vlan-ascii-tuple</b> . |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## none

|            |   |
|------------|---|
| Synopsis   | Do not include the circuit ID   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 dhcp option-82 circuit-id none</b>                         |
| Tree       | <a href="#">none</a>  |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>ifindex</b> , <b>none</b> , <b>sap-id</b> , or <b>vlan-ascii-tuple</b> . |
| Introduced | 16.0.R1   |

Platforms All

## sap-id

Synopsis Use the SAP ID

Context **configure** [service vprn string](#) [interface string](#) [ipv4 dhcp option-82 circuit-id](#) [sap-id](#)

Tree [sap-id](#)

Notes The following elements are part of a choice: **ascii-tuple**, **ifindex**, **none**, **sap-id**, or **vlan-ascii-tuple**.

Introduced 16.0.R1

Platforms All

## vlan-ascii-tuple

Synopsis Include the VLAN ID and dot1p bits in the ASCII tuple

Context **configure** [service vprn string](#) [interface string](#) [ipv4 dhcp option-82 circuit-id](#) [vlan-ascii-tuple](#)

Tree [vlan-ascii-tuple](#)

Description When configured, the router includes the VLAN ID and dot1p bits with the ASCII-tuple information. This only occurs on dot1q and QinQ-encapsulated ports. When the Option 82 bits are stripped, dot1p bits are copied to the Ethernet header of the outgoing packet.  
When unconfigured, the router leaves the circuit ID sub-option of the DHCP packet empty.

Notes The following elements are part of a choice: **ascii-tuple**, **ifindex**, **none**, **sap-id**, or **vlan-ascii-tuple**.

Introduced 16.0.R1

Platforms All

## remote-id

Synopsis Enter the **remote-id** context

Context **configure** [service vprn string](#) [interface string](#) [ipv4 dhcp option-82](#) [remote-id](#)

Tree [remote-id](#)

Description Commands in this context configure the remote IP sub-option of the DHCP packet with the identity of the remote host end (typically the DHCP client).

Introduced 16.0.R1

Platforms All

### **ascii-string** *string*

|               |  |
|---------------|--|
| Synopsis      | User-defined ASCII string for the remote ID  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">option-82</a> <a href="#">remote-id</a> <a href="#">ascii-string</a> <i>string</i> |
| Tree          | <a href="#">ascii-string</a>   |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>ascii-string</b> , <b>mac</b> , or <b>none</b> .   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **mac**

|            |   |
|------------|---|
| Synopsis   | Use the MAC address for the remote ID   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">option-82</a> <a href="#">remote-id</a> <a href="#">mac</a> |
| Tree       | <a href="#">mac</a>   |
| Notes      | The following elements are part of a choice: <b>ascii-string</b> , <b>mac</b> , or <b>none</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **none**

|            |  |
|------------|--|
| Synopsis   | Do not include the remote ID   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">option-82</a> <a href="#">remote-id</a> <a href="#">none</a> |
| Tree       | <a href="#">none</a>   |
| Notes      | The following elements are part of a choice: <b>ascii-string</b> , <b>mac</b> , or <b>none</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **vendor-specific-option**

|          |  |
|----------|--|
| Synopsis | Enter the <b>vendor-specific-option</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">option-82</a> <a href="#">vendor-specific-option</a> |
| Tree     | <a href="#">vendor-specific-option</a>   |

---

|             |   |
|-------------|---|
| Description | Commands in this context configure the Nokia Vendor-Specific Option (VSO) of the DHCP packet. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**client-mac-address** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send the MAC address in the VSO  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 vendor-specific-option client-mac-address</a> <i>boolean</i> |
| Tree       | <a href="#">client-mac-address</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**pool-name** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send the pool name in the VSO   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 vendor-specific-option pool-name</a> <i>boolean</i> |
| Tree       | <a href="#">pool-name</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**sap-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send SAP ID in the sub-option of the DHCP relay packet   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 vendor-specific-option sap-id</a> <i>boolean</i> |
| Tree       | <a href="#">sap-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**service-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send the service ID in the Vendor Specific Option   |
| Context    | <b>configure</b> <a href="#">service vprn string interface string ipv4 dhcp option-82 vendor-specific-option service-id boolean</a> |
| Tree       | <a href="#">service-id</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**string** *string*

|               |  |
|---------------|--|
| Synopsis      | User-defined ASCII string for the VSO  |
| Context       | <b>configure</b> <a href="#">service vprn string interface string ipv4 dhcp option-82 vendor-specific-option string string</a> |
| Tree          | <a href="#">string</a>   |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**system-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send the system ID in the VSO  |
| Context    | <b>configure</b> <a href="#">service vprn string interface string ipv4 dhcp option-82 vendor-specific-option system-id boolean</a> |
| Tree       | <a href="#">system-id</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**proxy-server**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>proxy-server</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string interface string ipv4 dhcp proxy-server</a> |
| Tree       | <a href="#">proxy-server</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the DHCP proxy server  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipv4 dhcp proxy-server admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**emulated-server** *string*

|             |  |
|-------------|--|
| Synopsis    | IP address used as the DHCP server address for the SAP   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipv4 dhcp proxy-server emulated-server string</a>  |
| Tree        | <a href="#">emulated-server</a>  |
| Description | This command configures the IP address which will be used as the DHCP server address in the context of the SAP. Typically, the configured address should be in the context of the subnet represented by the service. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**lease-time**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lease-time</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipv4 dhcp proxy-server lease-time</a> |
| Tree       | <a href="#">lease-time</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**radius-override** *boolean*

|          |   |
|----------|---|
| Synopsis | Use lease time information provided by RADIUS server  |
| Context  | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipv4 dhcp proxy-server lease-time radius-override boolean</a> |
| Tree     | <a href="#">radius-override</a>   |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

**value** *number*

|            |   |
|------------|---|
| Synopsis   | DHCP lease time   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server lease-time</a> <i>value number</i> |
| Tree       | <a href="#">value</a>   |
| Range      | 300 to 315446399  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**python-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Python policy  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp python-policy</a> <i>reference</i> |
| Tree       | <a href="#">python-policy</a>  |
| Reference  | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**relay-plain-bootp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable relaying of plain BOOTP packets   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp relay-plain-bootp</a> <i>boolean</i> |
| Tree       | <a href="#">relay-plain-bootp</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## relay-proxy

|            |   |
|------------|---|
| Synopsis   | Enable the <b>relay-proxy</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">relay-proxy</a> |
| Tree       | <a href="#">relay-proxy</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## release-update-src-ip *boolean*

|            |  |
|------------|--|
| Synopsis   | Update the source IP address of a DHCP RELEASE message   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">relay-proxy</a> <a href="#">release-update-src-ip</a> <i>boolean</i> |
| Tree       | <a href="#">release-update-src-ip</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## siaddr-override *string*

|            |   |
|------------|---|
| Synopsis   | DHCP server IP address for address hiding function  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">relay-proxy</a> <a href="#">siaddr-override</a> <i>string</i> |
| Tree       | <a href="#">siaddr-override</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## release-include-gi-address *boolean*

|            |   |
|------------|---|
| Synopsis   | Include gateway IP address in DHCP Release messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">release-include-gi-address</a> <i>boolean</i> |
| Tree       | <a href="#">release-include-gi-address</a>  |
| Default    | false   |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**server string**

|                |  |
|----------------|--|
| Synopsis       | IP addresses for DHCP server requests  |
| Context        | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipv4 dhcp server string</a>  |
| Tree           | <a href="#">server</a>   |
| Description    | This command configures a list of servers that this interface forwards requests to.<br><br>The operator can enter the list of servers as either IP addresses or fully qualified domain names. The operator must specify at least one server specified for DHCP relay to work. If there are multiple servers, the system forwards the request to all the servers in the list. |
| Max. Instances | 8  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

**src-ip-addr keyword**

|            |   |
|------------|---|
| Synopsis   | Type of source address to use for DHCP relay  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipv4 dhcp src-ip-addr keyword</a> |
| Tree       | <a href="#">src-ip-addr</a>   |
| Options    | auto, gi-address  |
| Default    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**trusted boolean**

|             |   |
|-------------|---|
| Synopsis    | Relay untrusted packets   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipv4 dhcp trusted boolean</a>   |
| Tree        | <a href="#">trusted</a>   |
| Description | When configured to <b>true</b> , the router enables the trusted mode on the interface. When enabled, the relay agent changes the existing GI address (of the request) to the ingress interface, and forwards the request.<br><br>A DHCP request that contains a GI address of 0.0.0.0 and an Option 82 field in the packet is discarded unless it arrives on a trusted circuit. |

This behavior only applies if the Relay Agent Information Option action is to keep the existing information. When the Option 82 field is replaced by the relay agent, the original Option 82 information is lost, and there is no reason to enable the trusted option.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **use-arp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use ARP to determine the destination hardware address   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <b>use-arp</b> <i>boolean</i> |
| Tree       | <a href="#">use-arp</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **icmp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>icmp</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <b>icmp</b> |
| Tree       | <a href="#">icmp</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mask-reply** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow responses to ICMP mask requests on the interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 icmp</a> <b>mask-reply</b> <i>boolean</i> |
| Tree       | <a href="#">mask-reply</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **param-problem**

|          |  |
|----------|--|
| Synopsis | Enter the <b>param-problem</b> context |
|----------|--|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn string interface string ipv4 icmp param-problem</b>                                 |
| Tree        | <b>param-problem</b>  |
| Description | Commands in this context specify the settings for ICMP Parameter Problem messages generated by the interface. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of sent Parameter Problem messages   |
| Context    | <b>configure service vprn string interface string ipv4 icmp param-problem admin-state keyword</b> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **number** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of Parameter Problem messages to send  |
| Context    | <b>configure service vprn string interface string ipv4 icmp param-problem number number</b> |
| Tree       | <b>number</b>   |
| Range      | 10 to 1000  |
| Default    | 100   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **seconds** *number*

|          |  |
|----------|--|
| Synopsis | Time used to limit number of Parameter Problem messages                                      |
| Context  | <b>configure service vprn string interface string ipv4 icmp param-problem seconds number</b> |
| Tree     | <b>seconds</b>   |
| Range    | 1 to 60  |
| Units    | seconds  |

|            |         |
|------------|---------|
| Default    | 10      |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## redirects

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>redirects</b> context  |
| Context     | <b>configure service vprn string interface string ipv4 icmp redirects</b>   |
| Tree        | <b>redirects</b>  |
| Description | <p>Commands in this context configure the settings for ICMP redirect messages generated by the interface.</p> <p>The system sends ICMP redirect messages to alert the sending node that a more optimal route is available on another router on the same subnetwork.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of sending ICMP redirect messages  |
| Context    | <b>configure service vprn string interface string ipv4 icmp redirects admin-state keyword</b> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## number *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of ICMP redirect messages to send  |
| Context    | <b>configure service vprn string interface string ipv4 icmp redirects number number</b> |
| Tree       | <b>number</b>   |
| Range      | 10 to 1000  |
| Default    | 100   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**seconds** *number*

|            |  |
|------------|--|
| Synopsis   | Time used to limit the number of ICMP redirect messages  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 icmp redirects</a> <b>seconds</b> <i>number</i> |
| Tree       | <a href="#">seconds</a>  |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**ttl-expired**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>ttl-expired</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 icmp ttl-expired</a> |
| Tree        | <a href="#">ttl-expired</a>   |
| Description | Commands in this context configure the settings for ICMP TTL expired messages generated by the interface.                                 |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of sending TTL expired messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 icmp ttl-expired admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**number** *number*

|          |  |
|----------|--|
| Synopsis | Maximum number of TTL expired messages to send   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 icmp ttl-expired number</a> <i>number</i> |

|            |                        |
|------------|------------------------|
| Tree       | <a href="#">number</a> |
| Range      | 10 to 2000             |
| Default    | 100                    |
| Introduced | 16.0.R1                |
| Platforms  | All                    |

### **seconds** *number*

|            |   |
|------------|---|
| Synopsis   | Time used to limit the number of TTL expired messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 icmp ttl-expired</a> <a href="#">seconds</a> <i>number</i> |
| Tree       | <a href="#">seconds</a>   |
| Range      | 1 to 60   |
| Units      | seconds   |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **unreachables**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>unreachables</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 icmp unreachables</a> |
| Tree        | <a href="#">unreachables</a>   |
| Description | Commands in this context specify the settings for ICMP host and network destination unreachable messages generated by the interface.       |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **admin-state** *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of sending unreachable messages  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 icmp unreachables</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>   |
| Options  | enable, disable   |
| Default  | enable  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

**number** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of unreachable messages to send  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 icmp unreachable</a> <b>number</b> <i>number</i> |
| Tree       | <a href="#">number</a>  |
| Range      | 10 to 2000  |
| Default    | 100   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**seconds** *number*

|            |  |
|------------|--|
| Synopsis   | Time to limit the number of ICMP unreachable messages  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 icmp unreachable</a> <b>seconds</b> <i>number</i> |
| Tree       | <a href="#">seconds</a>  |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**ip-helper-address** *string*

|            |  |
|------------|--|
| Synopsis   | Gateway address  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 ip-helper-address</a> <i>string</i> |
| Tree       | <a href="#">ip-helper-address</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**local-dhcp-server** *reference*

|          |                               |
|----------|-------------------------------|
| Synopsis | DHCP server for the interface |
|----------|-------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 local-dhcp-server</b> <i>reference</i> |
| Tree       | <a href="#">local-dhcp-server</a>   |
| Reference  | <b>configure service vprn</b> <i>string</i> <b>dhcp-server dhcpv4</b> <i>string</i>                                       |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## neighbor-discovery

|            |   |
|------------|---|
| Synopsis   | Enter the <b>neighbor-discovery</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery</b> |
| Tree       | <a href="#">neighbor-discovery</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## host-route

|            |  |
|------------|--|
| Synopsis   | Enter the <b>host-route</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery host-route</b> |
| Tree       | <a href="#">host-route</a>   |
| Introduced | 19.10.R1   |
| Platforms  | All  |

## populate [[route-type](#)] *keyword*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>populate</b> list instance   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery host-route</b><br><a href="#">populate</a> <i>keyword</i> |
| Tree       | <a href="#">populate</a>  |
| Introduced | 19.10.R1  |
| Platforms  | All   |

## [\[route-type\]](#) *keyword*

|          |   |
|----------|---|
| Synopsis | Type of ARP or ND entries that generate host routes   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery host-route</b><br><a href="#">populate</a> <i>keyword</i> |

|            |                                     |
|------------|-------------------------------------|
| Tree       | <a href="#">populate</a>            |
| Options    | static, dynamic, evpn               |
| Notes      | This element is part of a list key. |
| Introduced | 19.10.R1                            |
| Platforms  | All                                 |

### **route-tag** *number*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Tag value used with the host route from an ARP/ND entry   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">neighbor-discovery</a> <a href="#">host-route</a> <a href="#">populate</a> <i>keyword</i> <b>route-tag</b> <i>number</i> |
| Tree        | <a href="#">route-tag</a>   |
| Description | This command specifies the route tag that is added in the route table for ARP or ND host routes. This tag can be matched on BGP VRF export and BGP peer export policies.  |
| Range       | 1 to 255  |
| Introduced  | 19.10.R1  |
| Platforms   | All   |

### **learn-unsolicited** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Learn new entries from any received NA message   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">neighbor-discovery</a> <a href="#">learn-unsolicited</a> <i>boolean</i>   |
| Tree        | <a href="#">learn-unsolicited</a>  |
| Description | <p>When configured to <b>true</b>, the router can learn neighbor entries from received unsolicited Neighbor Advertisement (NA) messages, with or without the solicited (S) flag set. The command can be enabled for global addresses, link-local addresses, or for both.</p> <p>When configured to <b>false</b>, the router follows standard behavior for learning neighbor entries.</p> <ul style="list-style-type: none"> <li>• If an unsolicited NA (regardless of the S flag) is received from a neighbor that is not yet in the Neighbor Discovery (ND) cache, the NA is ignored.</li> <li>• If an NS, RS, RA, or Redirect message with a Link Layer Address (MAC) is received from a neighbor that is not yet in the ND cache, a new neighbor entry is created in the cache to store the received Link Layer MAC. The neighbor is put in the STALE state.</li> </ul> |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

**limit**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>limit</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 neighbor-discovery</a> <b>limit</b> |
| Tree       | <a href="#">limit</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**log-only** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate log entries only if limit is reached  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 neighbor-discovery</a> <b>limit</b> <a href="#">log-only</a> <i>boolean</i> |
| Tree       | <a href="#">log-only</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**max-entries** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of entries learned on an IP interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 neighbor-discovery</a> <b>limit</b> <a href="#">max-entries</a> <i>number</i> |
| Tree       | <a href="#">max-entries</a>  |
| Range      | 0 to 524288  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**threshold** *number*

|          |   |
|----------|---|
| Synopsis | Threshold value that triggers a warning message |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery limit threshold</b> <i>number</i> |
| Tree       | <a href="#">threshold</a>   |
| Range      | 1 to 100  |
| Units      | percent   |
| Default    | 90  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **local-proxy-arp** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable local proxy ARP on interface  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery local-proxy-arp</b> <i>boolean</i>   |
| Tree        | <a href="#">local-proxy-arp</a>  |
| Description | When configured to <b>true</b> , the router enables local proxy ARP on the interface.<br>When configured to <b>false</b> , the router does not respond to ARP requests for addresses on the same subnet. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **populate** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow static and dynamic hosts to be populated in system ARP cache  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery populate</b> <i>boolean</i> |
| Tree       | <a href="#">populate</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **proactive-refresh** *boolean*

|          |  |
|----------|--|
| Synopsis | Send a single refresh message before entry timeout   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery proactive-refresh</b> <i>boolean</i> |
| Tree     | <a href="#">proactive-refresh</a>  |

|             |   |
|-------------|---|
| Description | <p>When configured to <b>true</b>, the router always sends a refresh message 30 seconds before the timeout of the entry (a single refresh message with no retries).</p> <p>When configured to <b>false</b>, the router marks an entry as stale 30 seconds before age-out, and the router only sends an ARP request to refresh the entry if the IOM receives traffic that uses it. Then, the IOM asks the ARP application to send a refresh message. With ARP proactive refresh enabled, the ARP module sends a refresh message regardless of the IOM receiving traffic.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **proxy-arp-policy** *reference*

|                |   |
|----------------|---|
| Synopsis       | Proxy ARP policy name   |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 neighbor-discovery proxy-arp-policy</a> <i>reference</i> |
| Tree           | <a href="#">proxy-arp-policy</a>  |
| Reference      | <b>configure</b> <a href="#">policy-options policy-statement</a> <i>string</i>  |
| Max. Instances | 5   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

### **remote-proxy-arp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable remote proxy ARP on the interface  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 neighbor-discovery remote-proxy-arp</a> <i>boolean</i> |
| Tree       | <a href="#">remote-proxy-arp</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **retry-timer** *number*

|          |                    |
|----------|--------------------|
| Synopsis | ARP retry interval |
|----------|--------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery</b> <b>retry-timer</b> <i>number</i> |
| Tree       | <b>retry-timer</b>   |
| Range      | 1 to 300   |
| Units      | deciseconds  |
| Default    | 50   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **static-neighbor** [**ipv4-address**] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>static-neighbor</b> list instance   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery</b> <b>static-neighbor</b> <i>string</i> |
| Tree       | <b>static-neighbor</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **[ipv4-address]** *string*

|            |  |
|------------|--|
| Synopsis   | IPv4 address that corresponds to the physical address  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery</b> <b>static-neighbor</b> <i>string</i> |
| Tree       | <b>static-neighbor</b>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mac-address** *string*

|            |   |
|------------|---|
| Synopsis   | MAC address for the static neighbor   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery</b> <b>static-neighbor</b> <i>string</i> <b>mac-address</b> <i>string</i> |
| Tree       | <b>mac-address</b>  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## static-neighbor-unnumbered

|            |  |
|------------|--|
| Synopsis   | Enable the <b>static-neighbor-unnumbered</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery static-neighbor-unnumbered</b> |
| Tree       | <b>static-neighbor-unnumbered</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## mac-address *string*

|            |  |
|------------|--|
| Synopsis   | MAC address for the static neighbor  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery static-neighbor-unnumbered mac-address</b> <i>string</i> |
| Tree       | <b>mac-address</b>   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## timeout *number*

|             |   |
|-------------|---|
| Synopsis    | Timeout for an ARP entry learned on the interface   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 neighbor-discovery timeout</b> <i>number</i>   |
| Tree        | <b>timeout</b>  |
| Description | This command configures the minimum time an ARP entry learned on the IP interface is stored in the ARP table. ARP entries are automatically refreshed when an ARP request or gratuitous ARP is seen by an IP host. Otherwise, the ARP entry is aged from the ARP table. |
| Range       | 0 to 65535  |
| Units       | seconds   |
| Default     | 14400   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## primary

|            |  |
|------------|--|
| Synopsis   | Enable the <b>primary</b> context                                  |
| Context    | <b>configure service vprn string interface string ipv4 primary</b> |
| Tree       | <a href="#">primary</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## address *string*

|            |   |
|------------|---|
| Synopsis   | Primary IPv4 address assigned to the interface                                    |
| Context    | <b>configure service vprn string interface string ipv4 primary address string</b> |
| Tree       | <a href="#">address</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## broadcast *keyword*

|            |  |
|------------|--|
| Synopsis   | Broadcast address format   |
| Context    | <b>configure service vprn string interface string ipv4 primary broadcast keyword</b> |
| Tree       | <a href="#">broadcast</a>  |
| Options    | all-ones, host-ones  |
| Default    | host-ones  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## prefix-length *number*

|            |   |
|------------|---|
| Synopsis   | IPv4 address prefix length  |
| Context    | <b>configure service vprn string interface string ipv4 primary prefix-length number</b> |
| Tree       | <a href="#">prefix-length</a>   |
| Range      | 0 to 32   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |

Platforms All

### **track-srrp** *number*

Synopsis SRRP instance whose state is tracked on this IP address  
 Context **configure** [service vprn](#) *string* [interface](#) *string* [ipv4](#) **primary** [track-srrp](#) *number*  
 Tree [track-srrp](#)  
 Range 1 to 4294967295  
 Introduced 16.0.R1  
 Platforms All

### **qos-route-lookup** *keyword*

Synopsis QoS Route lookup  
 Context **configure** [service vprn](#) *string* [interface](#) *string* [ipv4](#) **qos-route-lookup** *keyword*  
 Tree [qos-route-lookup](#)  
 Options destination, source  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **secondary** [[address](#)] *string*

Synopsis Enter the **secondary** list instance  
 Context **configure** [service vprn](#) *string* [interface](#) *string* [ipv4](#) **secondary** *string*  
 Tree [secondary](#)  
 Introduced 16.0.R1  
 Platforms All

### [[address](#)] *string*

Synopsis Secondary IPv4 address assigned to the interface  
 Context **configure** [service vprn](#) *string* [interface](#) *string* [ipv4](#) **secondary** *string*  
 Tree [secondary](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R1

| Introduced | 16.0.R1  |
| Platforms  | All  |

**ignore-default** *boolean*

|            |  |
|------------|--|
| Synopsis   | Ignore default route when performing a uRPF check  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">urpf-check</a> <b>ignore-default</b> <i>boolean</i> |
| Tree       | <a href="#">ignore-default</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**mode** *keyword*

|            |  |
|------------|--|
| Synopsis   | Unicast RPF check mode   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">urpf-check</a> <b>mode</b> <i>keyword</i> |
| Tree       | <a href="#">mode</a>   |
| Options    | strict, loose, strict-no-ecmp  |
| Default    | strict   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**vrrp** [*virtual-router-id*] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>vrrp</b> list instance   |
| Context    | <b>configure</b> <i>service vprn string interface string ipv4 vrrp number</i> |
| Tree       | <b>vrrp</b>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[virtual-router-id]** *number*

|            |   |
|------------|---|
| Synopsis   | Virtual Router Identifier (VRID) for the IP interface                         |
| Context    | <b>configure</b> <i>service vprn string interface string ipv4 vrrp number</i> |
| Tree       | <b>vrrp</b>   |
| Range      | 1 to 255  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Administrative state of VRRP   |
| Context     | <b>configure</b> <i>service vprn string interface string ipv4 vrrp number admin-state keyword</i>  |
| Tree        | <b>admin-state</b>   |
| Description | <p>The command determines the administrative state of non-owner virtual router instances.</p> <p>Non-owner virtual router instances can be administratively disabled. This allows the termination of VRRP participation in the virtual router and stops all routing and other access capabilities with regards to the virtual router IP addresses. Disabling the virtual router instance provides a mechanism to maintain the virtual routers without causing false backup or master state changes.</p> <p>When <b>disabled</b>, no VRRP advertisement messages are generated and all received VRRP advertisement messages are silently discarded with no processing.</p> <p>Whenever the administrative or operational state of a virtual router instance transitions, a log message is generated.</p> <p>An owner virtual router context does not use this command. To administratively disable an owner virtual router instance, use the <b>admin-state</b> command within the parent IP interface node which administratively disables the IP interface.</p> |
| Options     | enable, disable  |

|            |         |
|------------|---------|
| Default    | enable  |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### authentication-key *string*

|               |  |
|---------------|--|
| Synopsis      | Password for simple text authentication  |
| Context       | <b>configure</b> <b>service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 vrrp</b> <i>number</i> <b>authentication-key</b> <i>string</i>   |
| Tree          | <b>authentication-key</b>  |
| Description   | This command optionally assigns a simple text password authentication key to generate master VRRP advertisement messages and validate received VRRP advertisement messages.<br><br>If this command is re-executed with a different password key defined, the new key immediately replaces the old key. This command may be executed at any time. |
| String Length | 1 to 38  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### backup *string*

|             |   |
|-------------|---|
| Synopsis    | Virtual router IP addresses for the interface   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4 vrrp</b> <i>number</i> <b>backup</b> <i>string</i>  |
| Tree        | <b>backup</b>   |
| Description | This command associates virtual router IP addresses with those of the parental IP interface.<br><br>This command has two different functions based on whether it is being executed on an owner or non-owner virtual router instance.<br><br>Non-owner virtual router instances create a routable IP interface address that is operationally dependent on the virtual router instance mode (master or backup). This command, when executed on an owner virtual router instance, does not create a routable IP interface address; it simply defines the existing IP addresses of the parental IP interface that are advertised by the virtual router instance.<br><br>For owner virtual router instances, this command defines the IP addresses that are advertised within VRRP advertisement messages. This communicates the IP addresses that the master is advertising to backup virtual routers receiving the messages. The specified <i>unicast-ipv4-address</i> must be equal to one of the existing IP addresses in the parental IP interface (primary or secondary) or this command fails.<br><br>See "Owner and non-owner VRRP" in the <i>7450 ESS, 7750 SR, 7950 XRS, and VSR Router Configuration Guide</i> for more information about owner and non-owner virtual router instances. |

|                |         |
|----------------|---------|
| Max. Instances | 16      |
| Introduced     | 16.0.R1 |
| Platforms      | All     |

## bfd-liveness

|            |   |
|------------|---|
| Synopsis   | Enable the <b>bfd-liveness</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ipv4 vrrp number</a> <a href="#">bfd-liveness</a> |

### **service-name** *string*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Administrative service name   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 vrrp</a> <i>number</i> <a href="#">bfd-liveness</a> <a href="#">service-name</a> <i>string</i> |
| Tree          | <a href="#">service-name</a>  |
| String Length | 1 to 64   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **init-delay** *number*

|            |  |
|------------|--|
| Synopsis   | VRRP initialization delay timer  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 vrrp</a> <i>number</i> <a href="#">init-delay</a> <i>number</i> |
| Tree       | <a href="#">init-delay</a>   |
| Range      | 1 to 65535   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mac** *string*

|             |   |
|-------------|---|
| Synopsis    | Virtual MAC address to use in ARP responses   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 vrrp</a> <i>number</i> <a href="#">mac</a> <i>string</i>   |
| Tree        | <a href="#">mac</a>   |
| Description | This command sets an explicit MAC address for the virtual router instance that overrides the VRRP default derived from the VRID.<br><br>Changing the default MAC address is useful when an existing HSRP or other non-VRRP default MAC is in use by the IP hosts that use the virtual router IP address. Many |

hosts do not monitor unessential ARPs and continue to use the cached non-VRRP MAC address after the virtual router becomes master of the host's gateway address.

Additionally, this command sets the MAC address used in ARP responses when the virtual router instance is master. Routing of IP packets with *unicast-mac-address* as the destination MAC is also enabled. The MAC must be the same for all virtual routers participating as a virtual router or indeterminate connectivity by the attached IP hosts results. All VRRP advertisement messages are transmitted with *unicast-mac-address* as the source MAC.

An operator can execute this command at any time and it takes effect immediately. When the virtual router MAC on a master virtual router instance changes, a gratuitous ARP is immediately sent with a VRRP advertisement message. If the virtual router instance is disabled or operating as a backup, the gratuitous ARP and VRRP advertisement messages are not sent.

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **master-int-inherit** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow master instance to dictate the master down timer  |
| Context     | <b>configure</b> <i>service vprn string interface string ipv4 vrrp number master-int-inherit boolean</i>  |
| Tree        | <a href="#">master-int-inherit</a>  |
| Description | <p>When configured to <b>true</b>, the virtual router instance inherits the advertisement interval timer of the master VRRP router, which backup routers use to calculate the master down timer.</p> <p>When configured to <b>false</b>, the locally configured message interval must match the master's VRRP advertisement message advertisement interval field value or the message is discarded.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **message-interval** *number*

|             |  |
|-------------|--|
| Synopsis    | Interval for sending VRRP advertisement messages   |
| Context     | <b>configure</b> <i>service vprn string interface string ipv4 vrrp number message-interval number</i>  |
| Tree        | <a href="#">message-interval</a>   |
| Description | This command configures the administrative advertisement message timer used by the master virtual router instance to send VRRP advertisement messages. The backup master down timer is derived from the value configured using this command. |

The usage of this command varies for non-owner virtual router instances, depending on the state of the virtual router (master or backup) and the state of the **master-int-inherit** command:

- When a non-owner is operating as master for the virtual router, the system uses the configured value of this command as the operational advertisement timer, similar to an owner virtual router instance. The **master-int-inherit** command has no effect when operating as master.
- When a non-owner is in the backup state with **master-int-inherit** disabled, the system uses the configured value of this command to match the incoming advertisement interval field of the VRRP advertisement message. If the locally configured message interval does not match the advertisement interval field, the system discards the VRRP advertisement.
- When a non-owner is in the backup state with **master-int-inherit** enabled, the configured value of this command is ignored. The master down timer is indirectly derived from the advertisement interval field value of the incoming VRRP advertisement message.

|            |             |
|------------|-------------|
| Range      | 1 to 2559   |
| Units      | deciseconds |
| Default    | 10          |
| Introduced | 16.0.R1     |
| Platforms  | All         |

## monitor-oper-group *reference*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | VRRP instance to follow a specified operational group   |
| Context     | <b>configure</b> <i>service vprn string interface string ipv4 vrrp number monitor-oper-group reference</i>  |
| Tree        | <i>monitor-oper-group</i>   |
| Description | This command configures VRRP to associate with an operational group. When associated, VRRP notifies the operational group of its state changes so that other protocols can monitor it to provide a redundancy mechanism. When VRRP is the master router, the operational group is up and the operational group is down for all other VRRP states. |
| Reference   | <b>configure</b> <i>service oper-group string</i>   |
| Introduced  | 22.2.R1   |
| Platforms   | All   |

**ntp-reply** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow processing of NTP requests   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">vrrp</a> <i>number</i> <b>ntp-reply</b> <i>boolean</i>  |
| Tree        | <a href="#">ntp-reply</a>  |
| Description | When configured to <b>true</b> , the router redirects NTP requests to the VRRP virtual IP address. This behavior only applies to the router acting as the master VRRP router.<br>When configured to <b>false</b> , the router does not process NTP requests. |
| Default     | false  |
| Introduced  | 20.2.R1  |
| Platforms   | All  |

**oper-group** *reference*

|             |   |
|-------------|---|
| Synopsis    | Operational group name associated with the VRRP   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">vrrp</a> <i>number</i> <b>oper-group</b> <i>reference</i>  |
| Tree        | <a href="#">oper-group</a>  |
| Description | This command configures an operational group to associate with the VRRP. When associated, VRRP notifies the operational group of its state changes so that other protocols can monitor it to provide a redundancy mechanism. When VRRP is the master router (MR), the operational group is up. The operational group is down for all other VRRP states. |
| Reference   | <b>configure</b> <a href="#">service</a> <a href="#">oper-group</a> <i>string</i>   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**owner** *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Designate the virtual router instance as owner  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">vrrp</a> <i>number</i> <b>owner</b> <i>boolean</i> |
| Tree        | <a href="#">owner</a>   |
| Description | When configured to <b>true</b> , the router designates this virtual router instance as the owner of the virtual router IP addresses. Therefore, this virtual router becomes responsible for             |

forwarding packets sent to the virtual router IP addresses. The owner also assumes the role of master virtual router.

When configured to **false**, this virtual router instance is designated as a non-owner.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **passive** *boolean*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Suppress the processing of VRRP advertisement messages  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4</b> <b>vrrp</b> <i>number</i> <b>passive</b> <i>boolean</i>  |
| Tree        | <b>passive</b>  |
| Description | <p>When configured to <b>true</b>, the router identifies this virtual router instance as passive; and therefore the owner of the virtual router IP addresses. A passive virtual router instance does not transmit or receive VRRP advertisement messages and is always in either the master state (if the interface is operationally up) or the init state (if the interface is operationally down).</p> <p>When configured to <b>false</b>, this virtual router instance is not identified as passive, meaning that it transmits and receives VRRP advertisement messages.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **ping-reply** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow non-owner master to reply to ICMP echo requests   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv4</b> <b>vrrp</b> <i>number</i> <b>ping-reply</b> <i>boolean</i>   |
| Tree        | <b>ping-reply</b>   |
| Description | <p>When configured to <b>true</b>, the router allows the non-owner master to reply to ICMP echo requests directed at the IP addresses of the virtual router instance. Any routed interface can receive the ping request. Ping must not have been disabled at the management security level (either on the parental IP interface or on the Ping source host address).</p> <p>When configured to <b>false</b>, ICMP echo requests sent to non-owner master virtual IP addresses are silently discarded.</p> |

Non-owner backup virtual routers never respond to ICMP echo requests, regardless of the configuration of this command.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **policy reference**

|             |  |
|-------------|--|
| Synopsis    | VRRP priority control policy   |
| Context     | <b>configure service vprn string interface string ipv4 vrrp number policy reference</b>  |
| Tree        | <a href="#">policy</a>   |
| Description | <p>This command configures a VRRP priority control policy to associate with the virtual router instance.</p> <p>VRRP priority control policies can override or adjust the base priority value of the virtual router instance, depending on events or conditions within the chassis.</p> <p>An operator can associate a policy with more than one virtual router instance. The priority events within the policy either override or diminish the base priority set with the <b>priority</b> command. As priority events clear in the policy, the in-use priority can eventually be restored to the base priority value.</p> <p>For non-owner virtual router instances, if this command is not executed, the base priority is used as the in-use priority.</p> |
| Reference   | <b>configure vrrp policy number</b>  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **preempt boolean**

|             |  |
|-------------|--|
| Synopsis    | Allow the VRRP to override an existing non-owner master  |
| Context     | <b>configure service vprn string interface string ipv4 vrrp number preempt boolean</b>   |
| Tree        | <a href="#">preempt</a>  |
| Description | <p>When configured to <b>true</b>, this virtual router instance overrides any non-owner master with an in-use message priority value less than the in-use priority value of this virtual router.</p> <p>When configured to <b>false</b>, this virtual router only becomes master if the master down timer expires before a VRRP advertisement message is received from another virtual router.</p> |
| Default     | true   |
| Introduced  | 16.0.R1  |

Platforms All

### **priority number**

Synopsis Base priority for the VRRP

Context **configure service vprn string interface string ipv4 vrrp number priority number**

Tree [priority](#)

Description This command configures the base router priority for the virtual router instance, which defines the selection order of the virtual router in the master election process.

The in-use priority is derived from the base priority. However, the in-use priority is modified by optional VRRP priority control policies. An operator can use VRRP priority control policies to either override or adjust the base priority value depending on events or conditions within the chassis.

Range 1 to 255

Introduced 16.0.R1

Platforms All

### **ssh-reply boolean**

Synopsis Allow the non-owner master to reply to SSH requests

Context **configure service vprn string interface string ipv4 vrrp number ssh-reply boolean**

Tree [ssh-reply](#)

Description When configured to **true**, the router allows the non-owner master to reply to SSH requests directed at the IP addresses of the virtual router instance. Any routed interface can receive the SSH request. SSH cannot be disabled at the management security level (either on the parental IP interface or on the SSH source host address).

When configure to **false**, SSH requests to non-owner master virtual IP addresses are silently discarded.

Default false

Introduced 16.0.R1

Platforms All

### **standby-forwarding boolean**

Synopsis Allow standby router to forward traffic

Context **configure service vprn string interface string ipv4 vrrp number standby-forwarding boolean**

Tree [standby-forwarding](#)

|             |   |
|-------------|---|
| Description | When configured to <b>true</b> , the standby router forwards all traffic.<br>When configured to <b>false</b> , the standby router cannot forward traffic sent to the MAC address of the virtual router. However, the standby router still forwards traffic sent to its own MAC address. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### telnet-reply *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow non-owner master to reply to Telnet requests   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 vrrp</a> <i>number</i> <a href="#">telnet-reply</a> <i>boolean</i>  |
| Tree        | <a href="#">telnet-reply</a>   |
| Description | When configured to <b>true</b> , the router allows the non-owner master to reply to Telnet requests directed at the IP addresses of the virtual router instance. Any routed interface can receive Telnet requests. Telnet cannot be disabled at the management security level (either on the parental IP interface or on the Telnet source host address).<br>When configured to <b>false</b> , the router silently discards Telnet requests sent to non-owner master virtual IP addresses. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### traceroute-reply *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow non-owner master to reply to traceroute requests   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 vrrp</a> <i>number</i> <a href="#">traceroute-reply</a> <i>boolean</i>  |
| Tree        | <a href="#">traceroute-reply</a>   |
| Description | When configured to <b>true</b> , the router allows a non-owner master to reply to traceroute requests directed to the IP addresses of the virtual router instance.<br>When configured to <b>false</b> , the router silently discards traceroute requests sent to non-owner master virtual IP addresses.<br>Traceroute must not have been disabled at the management security level (either on the parental IP interface or the source host address). |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**ipv6**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>ipv6</b> context                             |
| Context    | <b>configure service vprn string interface string ipv6</b> |
| Tree       | <b>ipv6</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**address [ipv6-address] string**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>address</b> list instance                                    |
| Context    | <b>configure service vprn string interface string ipv6 address string</b> |
| Tree       | <b>address</b>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[ipv6-address] string**

|            |   |
|------------|---|
| Synopsis   | IPv6 address assigned to the interface                                    |
| Context    | <b>configure service vprn string interface string ipv6 address string</b> |
| Tree       | <b>address</b>  |
| Notes      | This element is part of a list key.                                       |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**duplicate-address-detection boolean****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enable Duplicate Address Detection  |
| Context     | <b>configure service vprn string interface string ipv6 address string duplicate-address-detection boolean</b> |
| Tree        | <b>duplicate-address-detection</b>  |
| Description | When configured to <b>true</b> , the router enables Duplicate Address Detection (DAD).                        |

When configured to **false**, the router disables DAD and sets the address to preferred, even if there is a duplicated address.

|            |         |
|------------|---------|
| Default    | true    |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **eui-64** *boolean*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Form IPv6 address from prefix and 64-bit interface ID  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">address</a> <i>string</i> <b>eui-64</b> <i>boolean</i>  |
| Tree        | <a href="#">eui-64</a>   |
| Description | When configured to <b>true</b> , the router forms a complete IPv6 address from the supplied prefix and 64-bit interface identifier. The 64-bit interface identifier is derived from the MAC address on Ethernet interfaces. For interfaces without a MAC address, for example POS interfaces, use the base MAC address of the chassis. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **prefix-length** *number*

|            |   |
|------------|---|
| Synopsis   | IPv6 address prefix length  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">address</a> <i>string</i> <b>prefix-length</b> <i>number</i> |
| Tree       | <a href="#">prefix-length</a>   |
| Range      | 4 to 128  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **primary-preference** *number*

|          |   |
|----------|---|
| Synopsis | Index assigned to the IPv6 address of the interface |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 address</b> <i>string</i> <b>primary-preference</b> <i>number</i>  |
| Tree        | <b>primary-preference</b>   |
| Description | <p>This command assigns a primary preference index to an IPv6 address of the interface to enforce the order in which the address is used by control plane protocols and applications that require a fixed address of the interface, such as LDP and Segment Routing. In cases where a fixed address is required when originating packets from the interface, the IPv6 address with the lowest primary preference index is selected. If the selected address is removed, the next IPv6 address with the next lowest primary preference index is selected.</p> <p>If this index is not specified for the IPv6 address, the system assigns the next available index value to the address. The address index space is unique across all addresses of a given interface.</p> |
| Range       | 1 to 4294967295   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **track-srrp** *number*

|            |  |
|------------|--|
| Synopsis   | SRRP ID whose state is tracked on this IP address  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 address</b> <i>string</i> <b>track-srrp</b> <i>number</i> |
| Tree       | <b>track-srrp</b>  |
| Range      | 1 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **bfd**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bfd</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 bfd</b> |
| Tree       | <b>bfd</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **admin-state** *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of BFD sessions  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 bfd admin-state</b> <i>keyword</i> |

|            |                             |
|------------|-----------------------------|
| Tree       | <a href="#">admin-state</a> |
| Options    | enable, disable             |
| Default    | disable                     |
| Introduced | 16.0.R1                     |
| Platforms  | All                         |

### **echo-receive** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum echo interval over this interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 bfd echo-receive</a> <i>number</i> |
| Tree       | <a href="#">echo-receive</a>  |
| Range      | 100 to 100000   |
| Units      | milliseconds  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **multiplier** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of consecutive BFD messages missed from the peer   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 bfd multiplier</a> <i>number</i>   |
| Tree        | <a href="#">multiplier</a>  |
| Description | This command configures the number of missed messages before the BFD session state is changed to down and the upper-level protocol is notified of the fault. A multiplier of less than 3 should not be used in production environments. |
| Range       | 1 to 20   |
| Default     | 3   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **receive** *number*

|             |  |
|-------------|--|
| Synopsis    | BFD receive interval over this interface   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 bfd receive</a> <i>number</i> |
| Tree        | <a href="#">receive</a>  |
| Description | This command specifies the receive interval for the BFD session.   |

On the 7750 SR, this command can only be configured to a value less than 100 when the **type** command is configured to **cpm-np**.

|            |              |
|------------|--------------|
| Range      | 10 to 100000 |
| Units      | milliseconds |
| Default    | 100          |
| Introduced | 16.0.R1      |
| Platforms  | All          |

### **transmit-interval** *number*

|             |   |
|-------------|---|
| Synopsis    | BFD transmit interval over this interface   |
| Context     | <b>configure service vprn string interface string ipv6 bfd transmit-interval number</b>   |
| Tree        | <a href="#">transmit-interval</a>   |
| Description | This command configures the transmit intervals.<br><br>On the 7750 SR, this command can only be configured to a value less than 100 when the <b>type</b> command is configured to <b>cpm-np</b> . |
| Range       | 10 to 100000  |
| Units       | milliseconds  |
| Default     | 100   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **type** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Local termination point for the BFD session   |
| Context     | <b>configure service vprn string interface string ipv6 bfd type keyword</b>   |
| Tree        | <a href="#">type</a>  |
| Description | This command sets the local termination point for the BFD session to allow for fast timers down to 10 ms granularity.<br><br>The options to specify where the BFD session runs are: <ul style="list-style-type: none"> <li>• <b>auto</b> (default) – the system chooses and uses the line card CPU only for single-hop BFD sessions with timer intervals equal to or greater than 100ms. All others are placed on the <b>cpm-np</b>.</li> <li>• <b>cpm-np</b> – BFD session runs on the FP complex associated with the CPM. This is either the FP on the CPM or the one elected on smaller systems.</li> <li>• <b>fp</b> – BFD session runs on the line card CPU. This option can only be used for single-hop BFD sessions with timers equal to or greater than 100ms.</li> </ul> |

|            |  |
|------------|--|
| Options    | cpm-np, auto, fp   |
| Default    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## dhcp6

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dhcp6</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> |
| Tree       | <a href="#">dhcp6</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## relay

|            |  |
|------------|--|
| Synopsis   | Enter the <b>relay</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> |

| Introduced | 16.0.R1  |
| Platforms  | All  |

## na *boolean*

|          |  |
|----------|--|
| Synopsis | Create route based on IA_NA prefix option in relay-reply message |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 dhcp6 relay lease-populate route-populate na</b> <i>boolean</i> |
| Tree       | <b>na</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## pd

|            |   |
|------------|---|
| Synopsis   | Enable the <b>pd</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 dhcp6 relay lease-populate route-populate pd</b> |
| Tree       | <b>pd</b>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## exclude *boolean*

|            |  |
|------------|--|
| Synopsis   | Create back hole route based on prefix exclude option in relay-reply message   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 dhcp6 relay lease-populate route-populate pd exclude</b> <i>boolean</i> |
| Tree       | <b>exclude</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ta *boolean*

|            |  |
|------------|--|
| Synopsis   | Create route based on IA_TA prefix option in relay-reply message   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 dhcp6 relay lease-populate route-populate ta</b> <i>boolean</i> |
| Tree       | <b>ta</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **link-address** *string*

|            |   |
|------------|---|
| Synopsis   | Link address of the DHCPv6 relay messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay</a> <a href="#">link-address</a> <i>string</i> |
| Tree       | <a href="#">link-address</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **neighbor-resolution** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable neighbor resolution via DHCPv6 relay   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay</a> <a href="#">neighbor-resolution</a> <i>boolean</i> |
| Tree       | <a href="#">neighbor-resolution</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **option**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>option</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay</a> <a href="#">option</a> |
| Tree       | <a href="#">option</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **interface-id**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>interface-id</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay</a> <a href="#">option</a> <a href="#">interface-id</a> |
| Tree       | <a href="#">interface-id</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ascii-tuple

|            |  |
|------------|--|
| Synopsis   | Use ASCII-encoded concatenated tuple   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">option</a> <a href="#">interface-id</a> <a href="#">ascii-tuple</a> |
| Tree       | <a href="#">ascii-tuple</a>  |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>if-index</b> , <b>sap-id</b> , or <b>string</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## if-index

|            |   |
|------------|---|
| Synopsis   | Use interface index in the DHCPv6 relay packet  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">option</a> <a href="#">interface-id</a> <a href="#">if-index</a> |
| Tree       | <a href="#">if-index</a>  |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>if-index</b> , <b>sap-id</b> , or <b>string</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## sap-id

|            |   |
|------------|---|
| Synopsis   | Use SAP ID in interface ID option in relay packet   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">option</a> <a href="#">interface-id</a> <a href="#">sap-id</a> |
| Tree       | <a href="#">sap-id</a>  |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>if-index</b> , <b>sap-id</b> , or <b>string</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## string *string*

|               |   |
|---------------|---|
| Synopsis      | String for interface ID option in DHCPv6 relay packet   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">option</a> <a href="#">interface-id</a> <a href="#">string</a> <i>string</i> |
| Tree          | <a href="#">string</a>  |
| String Length | 1 to 80   |
| Notes         | The following elements are part of a choice: <b>ascii-tuple</b> , <b>if-index</b> , <b>sap-id</b> , or <b>string</b> .  |

Introduced 16.0.R1  
 Platforms All

### **remote-id** *boolean*

### **user-db** *reference*

|            |   |
|------------|---|
| Synopsis   | Local user database for authentication  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 dhcp6 relay user-db</b> <i>reference</i> |
| Tree       | <a href="#">user-db</a>   |
| Reference  | <b>configure subscriber-mgmt local-user-db</b> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **server**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>server</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 dhcp6 server</b> |
| Tree       | <a href="#">server</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **max-nbr-of-leases** *number*

|            |   |
|------------|---|
| Synopsis   | DHCPv6 leases allowed   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 dhcp6 server max-nbr-of-leases</b> <i>number</i> |
| Tree       | <a href="#">max-nbr-of-leases</a>   |
| Range      | 0 to 8000   |
| Default    | 8000  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## prefix-delegation

|            |   |
|------------|---|
| Synopsis   | Enter the <b>prefix-delegation</b> context  |
| Context    | <b>configure service vprn string interface string ipv6 dhcp6 server prefix-delegation</b> |
| Tree       | <a href="#">prefix-delegation</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## admin-state keyword

|            |   |
|------------|---|
| Synopsis   | Administrative state of the prefix delegation   |
| Context    | <b>configure service vprn string interface string ipv6 dhcp6 server prefix-delegation admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## prefix [ipv6-prefix] string

|            |   |
|------------|---|
| Synopsis   | Enter the <b>prefix</b> list instance   |
| Context    | <b>configure service vprn string interface string ipv6 dhcp6 server prefix-delegation prefix string</b> |
| Tree       | <a href="#">prefix</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## [ipv6-prefix] string

|            |   |
|------------|---|
| Synopsis   | IPv6 address and prefix   |
| Context    | <b>configure service vprn string interface string ipv6 dhcp6 server prefix-delegation prefix string</b> |
| Tree       | <a href="#">prefix</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**client-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>client-id</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">server</a> <a href="#">prefix-delegation</a> <a href="#">prefix</a> <i>string</i> <b>client-id</b> |
| Tree       | <a href="#">client-id</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**duid string**

|               |  |
|---------------|--|
| Synopsis      | Requesting router ID   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">server</a> <a href="#">prefix-delegation</a> <a href="#">prefix</a> <i>string</i> <a href="#">client-id</a> <b>duid</b> <i>string</i> |
| Tree          | <a href="#">duid</a>   |
| String Length | 1 to 130   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**iaid number**

|             |  |
|-------------|--|
| Synopsis    | IAID from the requesting router to match   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">server</a> <a href="#">prefix-delegation</a> <a href="#">prefix</a> <i>string</i> <a href="#">client-id</a> <b>iaid</b> <i>number</i> |
| Tree        | <a href="#">iaid</a>   |
| Description | This command configures the Identity Association ID (IAID) associated with a prefix delegation entry and must match the IAID sent by the requesting router for the prefix delegation to succeed.   |
| Range       | 1 to 4294967295  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**preferred-lifetime (number | keyword)**

|          |   |
|----------|---|
| Synopsis | Preferred lifetime of the prefix  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">server</a> <a href="#">prefix-delegation</a> <a href="#">prefix</a> <i>string</i> <b>preferred-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |

|             |  |
|-------------|--|
| Tree        | <a href="#">preferred-lifetime</a>   |
| Description | This command configures the preferred lifetime of the prefix. The value cannot be greater than the valid lifetime value. |
| Range       | 1 to 4294967294  |
| Units       | seconds  |
| Options     | infinite   |
| Default     | 604800   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **valid-lifetime** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Valid lifetime of the prefix  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 dhcp6 server prefix-delegation</a> <a href="#">prefix</a> <i>string</i> <b>valid-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">valid-lifetime</a>  |
| Range      | 1 to 4294967294   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 2592000   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **duplicate-address-detection** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable Duplicate Address Detection per interface  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 duplicate-address-detection</a> <i>boolean</i> |
| Tree       | <a href="#">duplicate-address-detection</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **forward-ipv4-packets** *boolean*

|          |                                     |
|----------|-------------------------------------|
| Synopsis | Forward unencapsulated IPv4 packets |
|----------|-------------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 forward-ipv4-packets</b> <i>boolean</i> |
| Tree       | <a href="#">forward-ipv4-packets</a>   |
| Default    | false  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

## icmp6

|            |  |
|------------|--|
| Synopsis   | Enter the <b>icmp6</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 icmp6</b> |
| Tree       | <a href="#">icmp6</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## packet-too-big

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>packet-too-big</b> context   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 icmp6 packet-too-big</b> |
| Tree        | <a href="#">packet-too-big</a>  |
| Description | Commands in this context configure limiting the number of ICMPv6 Packet Too Big messages.                   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of Packet Too Big message sends   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 icmp6 packet-too-big admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**number** *number*

|            |   |
|------------|---|
| Synopsis   | Number of Packet Too big Messages issued per time frame   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">icmp6</a> <a href="#">packet-too-big</a> <b>number</b> <i>number</i> |
| Tree       | <a href="#">number</a>  |
| Range      | 10 to 1000  |
| Default    | 100   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**seconds** *number*

|            |  |
|------------|--|
| Synopsis   | Time used to limit Packet Too Big messages   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">icmp6</a> <a href="#">packet-too-big</a> <b>seconds</b> <i>number</i> |
| Tree       | <a href="#">seconds</a>  |
| Range      | 1 to 60  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**param-problem**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>param-problem</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">icmp6</a> <a href="#">param-problem</a> |
| Tree       | <a href="#">param-problem</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of Parameter Problem message sends  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">icmp6</a> <a href="#">param-problem</a> <b>admin-state</b> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>  |
| Options  | enable, disable  |
| Default  | enable   |

Introduced 16.0.R1  
Platforms All

### **number** *number*

Synopsis Number used to limit ICMPv6 Parameter Problem messages  
Context **configure** [service vprn](#) *string* [interface](#) *string* [ipv6 icmp6 param-problem](#) [number](#) *number*  
Tree [number](#)  
Range 10 to 1000

| Introduced | 16.0.R1  |
| Platforms  | All  |

## link-local-address

|            |   |
|------------|---|
| Synopsis   | Enter the <b>link-local-address</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">link-local-address</a> |
| Tree       | <a href="#">link-local-address</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## address *string*

|            |   |
|------------|---|
| Synopsis   | IPv6 link-local address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">link-local-address</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## duplicate-address-detection *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable Duplicate Address Detection   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">link-local-address</a> <a href="#">duplicate-address-detection</a> <i>boolean</i>             |
| Tree        | <a href="#">duplicate-address-detection</a>  |
| Description | When configured to <b>true</b> , the router enables Duplicate Address Detection (DAD) on the interface.<br><br>When configured to <b>false</b> , the router disables DAD and sets the address to preferred, even if there is a duplicated address. |
| Default     | true   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## local-dhcp-server *reference*

|            |   |
|------------|---|
| Synopsis   | DHCP server for the interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">local-dhcp-server</a> <i>reference</i> |
| Tree       | <a href="#">local-dhcp-server</a>   |
| Reference  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">dhcp-server</a> <a href="#">dhcpv6</a> <i>string</i>  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## neighbor-discovery

Synopsis Enter the **neighbor-discovery** context

Context **configure service vprn** *string* **interface** *string* **ipv6 neighbor-discovery**

Tree [neighbor-discovery](#)

Introduced 16.0.R1

Platforms All

## host-route

Synopsis Enter the **host-route** context

Context **configure service vprn** *string* **interface** *string* **ipv6 neighbor-discovery host-route**

Tree [host-route](#)

Introduced 20.2.R1

Platforms All

## populate [*route-type*] *keyword*

Synopsis Enter the **populate** list instance

Context **configure service vprn** *string* **interface** *string* **ipv6 neighbor-discovery host-route**  
[populate](#) *keyword*

## [*route-type*] *keyword*

Synopsis Type of ARP or ND entries that generate host routes

Context **configure service vprn** *string* **interface** *string* **ipv6 neighbor-discovery host-route**  
[populate](#) *keyword*

Tree [populate](#)

Options static, dynamic, evpn

Notes This element is part of a list key.

Introduced 20.2.R1

Platforms All

## route-tag *number*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Tag value used with the host route from an ARP/ND entry  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 neighbor-discovery host-route populate</a> <i>keyword</i> <a href="#">route-tag</a> <i>number</i> |
| Tree        | <a href="#">route-tag</a>  |
| Description | This command specifies the route tag that is added in the route table for ARP or ND host routes. This tag can be matched on BGP VRF export and BGP peer export policies.   |
| Range       | 1 to 255   |
| Introduced  | 20.2.R1  |
| Platforms   | All  |

## learn-unsolicited *keyword*

|             |   |
|-------------|---|
| Synopsis    | Type of entries learned from unsolicited NA messages  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 neighbor-discovery learn-unsolicited</a> <i>keyword</i>  |
| Tree        | <a href="#">learn-unsolicited</a>   |
| Description | This command enables the ability to learn neighbor entries out of received unsolicited Neighbor Advertisement (NA) messages, with or without the solicited flag set.<br><br>When unconfigured, the router follows standard RFC 4861 behavior for learning of neighbor entries. The neighbor is put in the stale state. This is the standard RFC behavior. |
| Options     | global, link-local, both  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## limit

|          |   |
|----------|---|
| Synopsis | Enter the <b>limit</b> context  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 neighbor-discovery limit</a> |
| Tree     | <a href="#">limit</a>   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **log-only** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Generate log entries when limit is reached   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 neighbor-discovery limit</a> <a href="#">log-only</a> <i>boolean</i>  |
| Tree        | <a href="#">log-only</a>   |
| Description | When configured to <b>true</b> , the router sends the warning message at the specified threshold percentage or upon exceeding the specified limit. Entries that exceed the limit are learned.<br><br>When configured to <b>false</b> , the router does not send the warning message. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **max-entries** *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum number of entries learned on an IP interface  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 neighbor-discovery limit</a> <a href="#">max-entries</a> <i>number</i> |
| Tree        | <a href="#">max-entries</a>   |
| Description | This command configures the maximum number of entries that can be learned on an IP interface.<br><br>When unconfigured, no maximum limit is imposed.  |
| Range       | 0 to 102400   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **threshold** *number*

|          |   |
|----------|---|
| Synopsis | Threshold percentage that triggers a warning message  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 neighbor-discovery limit</a> <a href="#">threshold</a> <i>number</i> |
| Tree     | <a href="#">threshold</a>   |
| Range    | 1 to 100  |

|            |         |
|------------|---------|
| Units      | percent |
| Default    | 90      |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **local-proxy-nd** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable local proxy neighbor discovery on the interface  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 neighbor-discovery</a> <a href="#">local-proxy-nd</a> <i>boolean</i>   |
| Tree        | <a href="#">local-proxy-nd</a>  |
| Description | <p>When configured to <b>true</b>, the router enables local proxy neighbor discovery on the interface and replies to neighbor solicitation requests when both the hosts are on the same subnet. In this case, ICMP redirects are disabled.</p> <p>When configured to <b>false</b>, the router disables local proxy neighbor discovery on the interface and does not reply to neighbor solicitation requests if both the hosts are on the same subnet.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **proactive-refresh** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Proactive refresh of neighbor entries   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 neighbor-discovery</a> <a href="#">proactive-refresh</a> <i>keyword</i>  |
| Tree        | <a href="#">proactive-refresh</a>   |
| Description | This command enables a proactive refresh of the neighbor entries. After the stale timer expires, the router sends an NUD message to the host (regardless of the existence of traffic to the IP address on the IOM), so the entry can be refreshed or removed. |
| Options     | global, link-local, both  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **proxy-nd-policy** *reference*

|          |  |
|----------|--|
| Synopsis | Proxy Neighbor Discovery policy name for the interface |
|----------|--|

|                |  |
|----------------|--|
| Context        | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 neighbor-discovery proxy-nd-policy</b> <i>reference</i> |
| Tree           | <a href="#">proxy-nd-policy</a>  |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>   |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **reachable-time** *number*

|            |  |
|------------|--|
| Synopsis   | Neighbor reachability detection timer  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 neighbor-discovery reachable-time</b> <i>number</i> |
| Tree       | <a href="#">reachable-time</a>   |
| Range      | 30 to 3600   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **secure-nd**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>secure-nd</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 neighbor-discovery secure-nd</b> |
| Tree       | <a href="#">secure-nd</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of Secure Neighbor Discovery  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 neighbor-discovery secure-nd admin-state</b> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>  |
| Options  | enable, disable  |
| Default  | disable  |

Introduced 16.0.R1  
 Platforms All

### **allow-unsecured-msgs** *boolean*

Synopsis Accept unsecured messages  
 Context **configure** [service vprn string](#) [interface string ipv6 neighbor-discovery secure-nd allow-unsecured-msgs](#) *boolean*  
 Tree [allow-unsecured-msgs](#)  
 Description When configured to **true**, the router accepts unsecured messages. When Secure Neighbor Discovery (SeND) is enabled, only secure messages are accepted.  
 When configured to **false**, the router disables the acceptance of unsecured messages.  
 Default true  
 Introduced 16.0.R1  
 Platforms All

### **public-key-min-bits** *number*

Synopsis Minimum acceptable key length for public keys in CGA  
 Context **configure** [service vprn string](#) [interface string ipv6 neighbor-discovery secure-nd public-key-min-bits](#) *number*  
 Tree [public-key-min-bits](#)

**admin-state** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Administrative state of VRRP   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 vrrp</b> <i>number</i> <b>admin-state</b> <i>keyword</i>   |
| Tree        | <b>admin-state</b>   |
| Description | <p>The command determines the administrative state of non-owner virtual router instances.</p> <p>Non-owner virtual router instances can be administratively disabled. This allows the termination of VRRP participation in the virtual router and stops all routing and other access capabilities with regards to the virtual router IP addresses. Disabling the virtual router instance provides a mechanism to maintain the virtual routers without causing false backup or master state changes.</p> <p>When <b>disabled</b>, no VRRP advertisement messages are generated and all received VRRP advertisement messages are silently discarded with no processing.</p> <p>Whenever the administrative or operational state of a virtual router instance transitions, a log message is generated.</p> <p>An owner virtual router context does not use this command. To administratively disable an owner virtual router instance, use the <b>admin-state</b> command within the parent IP interface node which administratively disables the IP interface.</p> |
| Options     | enable, disable  |
| Default     | enable   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**backup** *string*

|             |   |
|-------------|---|
| Synopsis    | Virtual router IP addresses for the interface   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 vrrp</b> <i>number</i> <b>backup</b> <i>string</i>  |
| Tree        | <b>backup</b>   |
| Description | <p>This command associates router IPv6 virtual router IP addresses with those of the parental IP interface.</p> <p>This command has two different functions based on whether it is being executed on an owner or non-owner virtual router instance.</p> <p>Non-owner virtual router instance create a routable IP interface address that is operationally dependent on the virtual router instance mode (master or backup). This command, when executed on an owner virtual router instance, does not create a routable IP interface address; it simply defines the existing IP addresses of the parental IP interface that are advertised by the virtual router instance.</p> <p>For owner virtual router instances, this command defines the IP addresses that are advertised within VRRP advertisement messages. This communicates the IP addresses that the master is representing to backup virtual routers receiving the messages. The specified IPv6 address must be equal to one of the existing parental IP addresses in the parental IP interface (primary or secondary) or this command fails.</p> |

See "Owner and non-owner VRRP" in the *7450 ESS, 7750 SR, 7950 XRS, and VSR Router Configuration Guide* for more information about owner and non-owner virtual router instances.

|                |         |

### **mac** *string*

|          |  |
|----------|--|
| Synopsis | Virtual MAC address to use in ARP responses  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6 vrrp</b> <i>number</i> <b>mac</b> <i>string</i> |

|             |  |
|-------------|--|
| Tree        | <a href="#">mac</a>  |
| Description | <p>This command sets an explicit MAC address for the virtual router instance that overrides the VRRP default derived from the VRID.</p> <p>Changing the default MAC address is useful when an existing HSRP or other non-VRRP default MAC is in use by the IP hosts that use the virtual router IP address. Many hosts do not monitor unessential ARPs and continue to use the cached non-VRRP MAC address after the virtual router becomes master of the host's gateway address.</p> <p>Additionally, this command sets the MAC address used in ARP responses when the virtual router instance is master. Routing of IP packets with <i>unicast-mac-address</i> as the destination MAC is also enabled. The MAC must be the same for all virtual routers participating as a virtual router or indeterminate connectivity by the attached IP hosts results. All VRRP advertisement messages are transmitted with <i>unicast-mac-address</i> as the source MAC.</p> <p>An operator can execute this command at any time and it takes effect immediately. When the virtual router MAC on a master virtual router instance changes, a gratuitous ARP is immediately sent with a VRRP advertisement message. If the virtual router instance is disabled or operating as a backup, the gratuitous ARP and VRRP advertisement messages are not sent.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **master-int-inherit** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow master instance to dictate the master down timer  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 vrrp</a> <i>number</i> <b>master-int-inherit</b> <i>boolean</i>  |
| Tree        | <a href="#">master-int-inherit</a>  |
| Description | <p>When configured to <b>true</b>, the virtual router instance inherits the advertisement interval timer of the master VRRP router, which backup routers use to calculate the master down timer.</p> <p>When configured to <b>false</b>, the locally configured message interval must match the master's VRRP advertisement message advertisement interval field value or the message is discarded.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **message-interval** *number*

|          |   |
|----------|---|
| Synopsis | Interval for sending VRRP advertisement messages  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 vrrp</a> <i>number</i> <b>message-interval</b> <i>number</i> |
| Tree     | <a href="#">message-interval</a>  |

|             |  |
|-------------|--|
| Description | <p>This command configures the administrative advertisement message timer used by the master virtual router instance to send VRRP advertisement messages. The backup master down timer is derived from the value configured using this command.</p> <p>The use of this command varies for non-owner virtual router instances, depending on the state of the virtual router (master or backup) and the state of the <b>master-int-inherit</b> command:</p> <ul style="list-style-type: none"> <li>• When a non-owner is operating as master for the virtual router, the system uses the configured value of this command as the operational advertisement timer, similar to an owner virtual router instance. The <b>master-int-inherit</b> command has no effect when operating as the master.</li> <li>• When a non-owner is in the backup state with <b>master-int-inherit</b> disabled, the system uses the configured value of this command to match the incoming advertisement interval field of the VRRP advertisement message. If the locally configured message interval does not match the advertisement interval field, the system discards the VRRP advertisement.</li> <li>• When a non-owner is in the backup state with <b>master-int-inherit</b> enabled, the configured value of this command is ignored. The master down timer is indirectly derived from the advertisement interval field value of the incoming VRRP advertisement message.</li> </ul> |
| Range       | 10 to 4095   |
| Units       | centiseconds   |
| Default     | 100  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## monitor-oper-group *reference*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | VRRP instance to follow a specified operational group   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ipv6</b> <b>vrrp</b> <i>number</i> <b>monitor-oper-group</b> <i>reference</i>   |
| Tree        | <a href="#">monitor-oper-group</a>  |
| Description | This command configures VRRP to associate with an operational group. When associated, VRRP notifies the operational group of its state changes so that other protocols can monitor it to provide a redundancy mechanism. When VRRP is the master router, the operational group is up and the operational group is down for all other VRRP states. |
| Reference   | <b>configure</b> <b>service</b> <b>oper-group</b> <i>string</i>   |

Introduced 22.2.R1  
 Platforms All

### **ntp-reply** *boolean*

Synopsis Allow processing of NTP requests  
 Context **configure** [service](#) [vprn](#) *string* [interface](#) *string* [ipv6](#) [vrrp](#) *number* **ntp-reply** *boolean*  
 Tree [ntp-reply](#)  
 Description When configured to **true**, the router redirects NTP requests to the VRRP virtual IP address. This behavior only applies to the router acting as the master VRRP router.  
 When configured to **false**, the router does not process NTP requests.  
 Default false  
 Introduced 20.2.R1  
 Platforms All

### **oper-group** *reference*

Synopsis Operational group name associated with the VRRP  
 Context **configure** [service](#) [vprn](#) *string* [interface](#) *string* [ipv6](#) [vrrp](#) *number* **oper-group** *reference*  
 Tree [oper-group](#)  
 Description This command configures an operational group to associate with the VRRP. When associated, VRRP notifies the operational group of its state changes so that other protocols can monitor it to provide a redundancy mechanism. When VRRP is the master router (MR), the operational group is up. The operational group is down for all other VRRP states.  
 Reference **configure** [service](#) **oper-group** *string*  
 Introduced 16.0.R1  
 Platforms All

### **owner** *boolean*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Designate the virtual router instance as owner  
 Context **configure** [service](#) [vprn](#) *string* [interface](#) *string* [ipv6](#) [vrrp](#) *number* **owner** *boolean*

|             |   |
|-------------|---|
| Tree        | <a href="#">owner</a>   |
| Description | When configured to <b>true</b> , the router designates this virtual router instance as the owner of the virtual router IP addresses. Therefore, this virtual router becomes responsible for forwarding packets sent to the virtual router IP addresses. The owner also assumes the role of master virtual router.<br><br>When configured to <b>false</b> , this virtual router instance is designated as a non-owner. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **passive** *boolean*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Suppress the processing of VRRP advertisement messages   |
| Context     | <b>configure</b> <a href="#">service vprn string interface string ipv6 vrrp number passive</a> <i>boolean</i>  |
| Tree        | <a href="#">passive</a>  |
| Description | When configured to <b>true</b> , the router identifies this virtual router instance as passive; and therefore the owner of the virtual router IP addresses. A passive virtual router instance does not transmit or receive VRRP advertisement messages and is always in either the master state (if the interface is operationally up) or the init state (if the interface is operationally down).<br><br>When configured to <b>false</b> , this virtual router instance is not identified as passive, meaning that it transmits and receives VRRP advertisement messages. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **ping-reply** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow non-owner master to reply to ICMP echo requests  |
| Context     | <b>configure</b> <a href="#">service vprn string interface string ipv6 vrrp number ping-reply</a> <i>boolean</i>   |
| Tree        | <a href="#">ping-reply</a>   |
| Description | When configured to <b>true</b> , the router allows the non-owner master to reply to ICMP echo requests directed at the IP addresses of the virtual router instance. Any routed interface can receive the ping request. Ping must not have been disabled at the management security level (either on the parental IP interface or on the Ping source host address). |

When configured to **false**, ICMP echo requests sent to non-owner master virtual IP addresses are silently discarded.

Non-owner backup virtual routers never respond to ICMP echo requests, regardless of the configuration of this command.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### policy reference

|             |  |
|-------------|--|
| Synopsis    | VRRP priority control policy   |
| Context     | <b>configure service vprn string interface string ipv6 vrrp number policy reference</b>  |
| Tree        | <a href="#">policy</a>   |
| Description | <p>This command configures a VRRP priority control policy to associate with the virtual router instance.</p> <p>VRRP priority control policies can override or adjust the base priority value of the virtual router instance, depending on events or conditions within the chassis.</p> <p>An operator can associate a policy with more than one virtual router instance. The priority events within the policy either override or diminish the base priority set with the <b>priority</b> command. As priority events clear in the policy, the in-use priority can eventually be restored to the base priority value.</p> <p>For non-owner virtual router instances, if this command is not executed, the base priority is used as the in-use priority.</p> |
| Reference   | <b>configure vrrp policy number</b>  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### preempt boolean

|             |  |
|-------------|--|
| Synopsis    | Allow the VRRP to override an existing non-owner master  |
| Context     | <b>configure service vprn string interface string ipv6 vrrp number preempt boolean</b>   |
| Tree        | <a href="#">preempt</a>  |
| Description | <p>When configured to <b>true</b>, this virtual router instance overrides any non-owner master with an in-use message priority value less than the in-use priority value of this virtual router.</p> <p>When configured to <b>false</b>, this virtual router only becomes master if the master down timer expires before a VRRP advertisement message is received from another virtual router.</p> |
| Default     | true   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **priority** *number*

|             |  |
|-------------|--|
| Synopsis    | Base priority for the VRRP   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 vrrp</a> <i>number</i> <a href="#">priority</a> <i>number</i>   |
| Tree        | <a href="#">priority</a>   |
| Description | This command configures the base router priority for the virtual router instance, which defines the selection order of the virtual router in the master election process.<br><br>The in-use priority is derived from the base priority. However, the in-use priority is modified by optional VRRP priority control policies. An operator can use VRRP priority control policies to either override or adjust the base priority value depending on events or conditions within the chassis. |
| Range       | 1 to 255   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **standby-forwarding** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow standby router to forward traffic   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 vrrp</a> <i>number</i> <a href="#">standby-forwarding</a> <i>boolean</i>   |
| Tree        | <a href="#">standby-forwarding</a>  |
| Description | When configured to <b>true</b> , the standby router forwards all traffic.<br><br>When configured to <b>false</b> , the standby router cannot forward traffic sent to the MAC address of the virtual router. However, the standby router still forwards traffic sent to its own MAC address. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **telnet-reply** *boolean*

|          |   |
|----------|---|
| Synopsis | Allow non-owner master to reply to Telnet requests  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 vrrp</a> <i>number</i> <a href="#">telnet-reply</a> <i>boolean</i> |
| Tree     | <a href="#">telnet-reply</a>  |

|             |  |
|-------------|--|
| Description | When configured to <b>true</b> , the router allows the non-owner master to reply to Telnet requests directed at the IP addresses of the virtual router instance. Any routed interface can receive Telnet requests. Telnet cannot be disabled at the management security level (either on the parental IP interface or on the Telnet source host address).<br>When configured to <b>false</b> , the router silently discards Telnet requests sent to non-owner master virtual IP addresses. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **traceroute-reply** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow non-owner master to reply to traceroute requests   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv6 vrrp</a> <i>number</i> <b>traceroute-reply</b> <i>boolean</i>   |
| Tree        | <a href="#">traceroute-reply</a>   |
| Description | When configured to <b>true</b> , the router allows a non-owner master to reply to traceroute requests directed to the IP addresses of the virtual router instance.<br>When configured to <b>false</b> , the router silently discards traceroute requests sent to non-owner master virtual IP addresses.<br>Traceroute must not have been disabled at the management security level (either on the parental IP interface or the source host address). |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **load-balancing**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>load-balancing</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>load-balancing</b> |
| Tree       | <a href="#">load-balancing</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **flow-label-load-balancing** *boolean*

|          |  |
|----------|--|
| Synopsis | Enable flow label load balancing   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">load-balancing</a> <b>flow-label-load-balancing</b> <i>boolean</i> |

|             |  |
|-------------|--|
| Tree        | <a href="#">flow-label-load-balancing</a>  |
| Description | When configured to <b>true</b> , the router enables load balancing in ECMP and LAG based on the output of a hash performed on the triplet (SA, DA, flow label) in the header of an IPv6 packet received on an IES, VPRN, R-VPLS, CSC, or network interface.<br>When configured to <b>false</b> , the router disables load balancing in ECMP and LAG. |
| Default     | false  |
| Introduced  | 21.5.R1  |
| Platforms   | All  |

### **ip-load-balancing** *keyword*

|             |  |
|-------------|--|
| Synopsis    | IP load-balancing algorithm  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">load-balancing</a> <a href="#">ip-load-balancing</a> <i>keyword</i>  |
| Tree        | <a href="#">ip-load-balancing</a>  |
| Description | This command specifies whether to include the source address, destination address, or both in LAG or ECMP hash on IP interfaces. Additionally, when the <b>l4-load-balancing</b> command is enabled, this command also includes the source or destination port in the hash inputs. |
| Options     | both, destination, source, inner-ip  |
| Default     | both   |
| Introduced  | 16.0.R3  |
| Platforms   | All  |

### **spi-load-balancing** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable SPI use in hashing  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">load-balancing</a> <a href="#">spi-load-balancing</a> <i>boolean</i> |
| Tree        | <a href="#">spi-load-balancing</a>   |
| Description | When configured to <b>true</b> , the router uses the Security Parameter Index (SPI) in hashing for ESP and AH encrypted IPv4 and IPv6 traffic. This is a per-interface setting.                      |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **teid-load-balancing** *boolean*

|          |                               |
|----------|-------------------------------|
| Synopsis | Enable use of TEID in hashing |
|----------|-------------------------------|

---

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string interface string load-balancing teid-load-balancing boolean</i> |
| Tree       | <a href="#">teid-load-balancing</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **loopback** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use interface as a loopback interface   |
| Context    | <b>configure service vprn</b> <i>string interface string loopback boolean</i> |
| Tree       | <a href="#">loopback</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mac** *string*

|            |   |
|------------|---|
| Synopsis   | MAC address for the interface   |
| Context    | <b>configure service vprn</b> <i>string interface string mac string</i> |
| Tree       | <a href="#">mac</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mac-accounting** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable MAC accounting functionality   |
| Context    | <b>configure service vprn</b> <i>string interface string mac-accounting boolean</i> |
| Tree       | <a href="#">mac-accounting</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **monitor-oper-group** *reference*

|          |                              |
|----------|------------------------------|
| Synopsis | Operational group to monitor |
|----------|------------------------------|

|            |   |
|------------|---|

| Reference  | <b>configure service oper-group</b> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **multi-chassis-shunting-profile** *reference*

|             |   |
|-------------|---|
| Synopsis    | Multi-chassis shunting profile name   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>multi-chassis-shunting-profile</b> <i>reference</i>   |
| Tree        | <a href="#">multi-chassis-shunting-profile</a>  |
| Description | This command configures the name of a multi-chassis shunting profile to use on public or private tunnel interfaces.   |
| Reference   | <b>configure service vprn</b> <i>string</i> <b>ipsec multi-chassis-shunting-profile</b> <i>string</i>   |
| Notes       | The following elements are part of a choice: <b>multi-chassis-shunting-profile</b> or ( <b>dynamic-tunnel-redundant-nexthop</b> and <b>static-tunnel-redundant-nexthop</b> ). |
| Introduced  | 22.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **ping-template**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>ping-template</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ping-template</b> |
| Tree       | <a href="#">ping-template</a>   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                    |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the ping template   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>ping-template</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 20.10.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## destination-address *string*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Ping template destination address

Context **configure** *service vprn string interface string ping-template destination-address string*

Tree *destination-address*

Description This command configures the address to where the ICMP echo requests are directed to test connectivity. The source of the ICMP echo request is the primary IPv4 address of the interface under which the ping-template is configured. The destination address must be on the same subnet as the source IP address. A configuration warning message displays if the primary IPv4 address and the destination are not on the same subnet, INFO: PIP #2092 Ping template misconfiguration - destination-address and primary IP address should fall in the same subnet.

Unnumbered interfaces and loopback addresses are not supported.

The config service ies|vprn interface ping-template must be administratively disabled to remove or change the destination-address ip-address.

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## name *reference*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Ping template name

Context **configure** *service vprn string interface string ping-template name reference*

Tree *name*

Description This command configures the name of the ping template to be assigned to the IP interface.

Reference **configure** *test-oam icmp ping-template string*

Notes This element is mandatory.

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ptp-hw-assist**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ptp-hw-assist</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">ptp-hw-assist</a> |

| Options    | source-ip-addr, source-mac-addr, source-ip-and-mac-addr, next-hop-ip-and-mac-addr                   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**app-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Application profile name  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">app-profile</a> <i>reference</i>  |
| Tree       | <a href="#">app-profile</a>   |
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i> |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**bandwidth** *number*

|            |   |
|------------|---|
| Synopsis   | SAP bandwidth   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">bandwidth</a> <i>number</i> |
| Tree       | <a href="#">bandwidth</a>   |
| Range      | 1 to 6400000000   |
| Units      | kilobps   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**calling-station-id** *string*

|               |  |
|---------------|--|
| Synopsis      | Calling station ID   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">calling-station-id</a> <i>string</i> |
| Tree          | <a href="#">calling-station-id</a>   |
| String Length | 1 to 64  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**collect-stats** *boolean*

|            |  |
|------------|--|
| Synopsis   | Collect accounting statistics  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">collect-stats</a> <i>boolean</i> |
| Tree       | <a href="#">collect-stats</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms All

## cpu-protection

Synopsis Enter the **cpu-protection** context

Context **configure** [service vprn string](#) [interface string](#) [sap string](#) [cpu-protection](#)

Tree [cpu-protection](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## eth-cfm-monitoring

Synopsis Enable the **eth-cfm-monitoring** context

Context **configure** [service vprn string](#) [interface string](#) [sap string](#) [cpu-protection](#) [eth-cfm-monitoring](#)

Tree [eth-cfm-monitoring](#)

Notes The following elements are part of a choice: **eth-cfm-monitoring**, **ip-src-monitoring**, or **mac-monitoring**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## aggregate

Synopsis Apply rate limit to the sum of the per peer packet rates

Context **configure** [service vprn string](#) [interface string](#) [sap string](#) [cpu-protection](#) [eth-cfm-monitoring](#) [aggregate](#)

Tree [aggregate](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## car

Synopsis Ignore Ethernet CFM packets when enforcing overall rate

Context **configure** [service vprn string](#) [interface string](#) [sap string](#) [cpu-protection](#) [eth-cfm-monitoring](#) [car](#)

Tree [car](#)

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS |

## ip-src-monitoring

|            |  |
|------------|--|
| Synopsis   | Enable IP source monitoring for CPU protection   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">ip-src-monitoring</a> |
| Tree       | <a href="#">ip-src-monitoring</a>  |
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> , <b>ip-src-monitoring</b> , or <b>mac-monitoring</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

## mac-monitoring

|            |   |
|------------|---|
| Synopsis   | Monitor MAC for CPU protection  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">mac-monitoring</a> |
| Tree       | <a href="#">mac-monitoring</a>  |
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> , <b>ip-src-monitoring</b> , or <b>mac-monitoring</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

## policy-id *reference*

|            |   |
|------------|---|
| Synopsis   | CPM protection policy   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">cpu-protection</a> <a href="#">policy-id</a> <i>reference</i> |
| Tree       | <a href="#">policy-id</a>   |
| Reference  | <b>configure</b> <a href="#">system security</a> <a href="#">cpu-protection</a> <a href="#">policy</a> <i>number</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

## description *string*

|          |                  |
|----------|------------------|
| Synopsis | Text description |
|----------|------------------|

|               |  |
|---------------|--|
| Context       | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <b>description</b>   |
| String Length | 1 to 160   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **dist-cpu-protection** *reference*

|            |   |
|------------|---|
| Synopsis   | Distributed CPU protection policy for SAP   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>dist-cpu-protection</b> <i>reference</i> |
| Tree       | <b>dist-cpu-protection</b>  |
| Reference  | <b>configure system security dist-cpu-protection</b> <i>policy string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **egress**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>egress</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress</b> |
| Tree       | <b>egress</b>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **agg-rate**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>agg-rate</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress</b> <b>agg-rate</b> |
| Tree       | <b>agg-rate</b>   |
| Notes      | The following elements are part of a choice: <b>agg-rate</b> or <b>percent-agg-rate</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **adaptation-rule** *keyword*

|          |   |
|----------|---|
| Synopsis | Adaptation rule to compute the operational PIR value when an aggregate shaper is used |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress</b> <b>agg-rate</b> <b>adaptation-rule</b> <i>keyword</i> |
| Tree       | <b>adaptation-rule</b>  |
| Options    | max, min, closest   |
| Default    | closest   |
| Introduced | 22.10.R1  |
| Platforms  | 7750 SR-1, 7750 SR-s  |

### **burst-limit** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Shaping burst size when an aggregate shaper is used   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress</b> <b>agg-rate</b> <b>burst-limit</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>burst-limit</b>  |
| Range      | 1 to 14000000   |
| Units      | bytes   |
| Options    | auto  |
| Default    | auto  |
| Introduced | 22.10.R1  |
| Platforms  | 7750 SR-1, 7750 SR-s  |

### **limit-unused-bandwidth** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable aggregate rate overrun protection   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress</b> <b>agg-rate</b> <b>limit-unused-bandwidth</b> <i>boolean</i> |
| Tree       | <b>limit-unused-bandwidth</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **queue-frame-based-accounting** *boolean*

|          |  |
|----------|--|
| Synopsis | Enable frame based accounting on policers and queues   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress</b> <b>agg-rate</b> <b>queue-frame-based-accounting</b> <i>boolean</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">queue-frame-based-accounting</a> |
| Default    | false  |
| Introduced | 16.0.R1                                      |
| Platforms  | All  |

**rate number**

|            |  |
|------------|--|
| Synopsis   | Enforced aggregate rate for all queues   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string sap string egress agg-rate rate number</a> |
| Tree       | <a href="#">rate</a>   |
| Range      | 1 to 6400000000  |
| Units      | kilobps  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**filter**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>filter</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string sap string egress filter</a> |
| Tree       | <a href="#">filter</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**ip reference**

|            |   |
|------------|---|
| Synopsis   | IPv4 filter policy name   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string sap string egress filter ip reference</a> |
| Tree       | <a href="#">ip</a>  |
| Reference  | <b>configure filter ip-filter string</b>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**ipv6 reference**

|          |                         |
|----------|-------------------------|
| Synopsis | IPv6 filter policy name |
|----------|-------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress filter ipv6</b> <i>reference</i> |
| Tree       | <a href="#">ipv6</a>   |
| Reference  | <b>configure filter ipv6-filter</b> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## qos

|            |   |
|------------|---|
| Synopsis   | Enter the <b>qos</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos</b> |
| Tree       | <a href="#">qos</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## policer-control-policy

|            |  |
|------------|--|
| Synopsis   | Enter the <b>policer-control-policy</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos policer-control-policy</b> |
| Tree       | <a href="#">policer-control-policy</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

## overrides

|            |  |
|------------|--|
| Synopsis   | Enable the <b>overrides</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos policer-control-policy overrides</b> |
| Tree       | <a href="#">overrides</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

## root

|          |   |
|----------|---|
| Synopsis | Enter the <b>root</b> context   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos policer-control-policy overrides root</b> |

|            |  |
|------------|--|
| Tree       | <a href="#">root</a>                                   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **max-rate** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Maximum frame-based bandwidth limit  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos policer-control-policy</a> <a href="#">overrides root max-rate</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">max-rate</a>   |
| Range      | 1 to 6400000000  |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **priority-mbs-thresholds**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priority-mbs-thresholds</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos policer-control-policy</a> <a href="#">overrides root priority-mbs-thresholds</a> |
| Tree       | <a href="#">priority-mbs-thresholds</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **min-thresh-separation** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Minimum amount of separation buffer space   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos policer-control-policy</a> <a href="#">overrides root priority-mbs-thresholds min-thresh-separation</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">min-thresh-separation</a>   |
| Range      | 0 to 16777216   |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**priority** [[priority-level](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>priority</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**[priority-level]** *number*

|            |   |
|------------|---|
| Synopsis   | Priority level  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>  |
| Range      | 1 to 8  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**mbs-contribution** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Minimum amount of cumulative buffer space allowed   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> <a href="#">mbs-contribution</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mbs-contribution</a>  |
| Range      | 0 to 16777216   |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**policy-name** *reference*

|          |                             |
|----------|-----------------------------|
| Synopsis | Policer control policy name |
|----------|-----------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos policer-control-policy</b> <i>policy-name</i> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>  |
| Reference  | <b>configure qos policer-control-policy</b> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **qinq-mark-top-only** *boolean*

|            |   |
|------------|---|
| Synopsis   | Mark top Q-tags   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos qinq-mark-top-only</b> <i>boolean</i> |
| Tree       | <a href="#">qinq-mark-top-only</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **sap-egress**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sap-egress</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress</b> |
| Tree       | <a href="#">sap-egress</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **overrides**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>overrides</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress</b> <b>overrides</b> |
| Tree       | <a href="#">overrides</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**hs-secondary-shaper** *string*

|               |  |
|---------------|--|
| Synopsis      | HS Secondary Shaper  |
| Context       | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string sap string egress qos sap-egress</a><br><a href="#">overrides hs-secondary-shaper string</a> |
| Tree          | <a href="#">hs-secondary-shaper</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR-7/12/12e   |

**hs-wrr-group** [[group-id](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>hs-wrr-group</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string sap string egress qos sap-egress</a><br><a href="#">overrides hs-wrr-group reference</a> |
| Tree       | <a href="#">hs-wrr-group</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

**[group-id]** *reference*

|            |  |
|------------|--|
| Synopsis   | HS WRR group identifier  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string sap string egress qos sap-egress</a><br><a href="#">overrides hs-wrr-group reference</a> |
| Tree       | <a href="#">hs-wrr-group</a>   |
| Reference  | <b>configure</b> <a href="#">qos sap-egress string</a> <a href="#">hs-wrr-group number</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

**hs-class-weight** *number*

|          |   |
|----------|---|
| Synopsis | Class weight override of the WRR group  |
| Context  | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string sap string egress qos sap-egress</a><br><a href="#">overrides hs-wrr-group reference</a> <a href="#">hs-class-weight number</a> |
| Tree     | <a href="#">hs-class-weight</a>   |
| Range    | 1   2   4   8   |

Introduced 16.0.R1  
 Platforms 7750 SR-7/12/12e

### **percent-rate** *decimal-number*

Synopsis Percent rate override applied to the HS WRR group  
 Context **configure** [service vprn](#) *string* [interface](#) *string* [sap](#) *string* [egress qos sap-egress](#)  
[overrides hs-wrr-group](#) *reference* [percent-rate](#) *decimal-number*  
 Tree [percent-rate](#)  
 Range 0.01 to 100.00  
 Notes The following elements are part of a choice: **percent-rate** or **rate**.  
 Introduced 16.0.R1  
 Platforms 7750 SR-7/12/12e

### **rate** (*number* | *keyword*)

Synopsis Scheduling rate override applied to the HS WRR group  
 Context **configure** [service vprn](#) *string* [interface](#) *string* [sap](#) *string* [egress qos sap-egress](#)  
[overrides hs-wrr-group](#) *reference* [rate](#) (*number* | *keyword*)  
 Tree [rate](#)  
 Range 1 to 2000000000  
 Units kilobps  
 Options max  
 Notes The following elements are part of a choice: **percent-rate** or **rate**.  
 Introduced 16.0.R1  
 Platforms 7750 SR-7/12/12e

### **policer** [[policer-id](#)] *reference*

Synopsis Enter the **policer** list instance  
 Context **configure** [service vprn](#) *string* [interface](#) *string* [sap](#) *string* [egress qos sap-egress](#)  
[overrides policer](#) *reference*  
 Tree [policer](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

**[policer-id] reference**

|            |  |
|------------|--|
| Synopsis   | Policer unique ID  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">egress qos sap-egress overrides policer reference</a> |
| Tree       | <a href="#">policer</a>  |
| Reference  | <b>configure</b> <a href="#">qos sap-egress string</a> <a href="#">policer number</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**cbs (number | keyword)**

|            |   |
|------------|---|
| Synopsis   | CBS   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">egress qos sap-egress overrides policer reference</a> <a href="#">cbs (number   keyword)</a> |
| Tree       | <a href="#">cbs</a>   |
| Range      | 0 to 268435456  |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**mbs (number | keyword)**

|            |   |
|------------|---|
| Synopsis   | MBS   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">egress qos sap-egress overrides policer reference</a> <a href="#">mbs (number   keyword)</a> |
| Tree       | <a href="#">mbs</a>   |
| Range      | 0 to 268435456  |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**packet-byte-offset** *number*

|            |   |
|------------|---|
| Synopsis   | Packet size modification for policing information   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <i>reference</i> <a href="#">packet-byte-offset</a> <i>number</i> |
| Tree       | <a href="#">packet-byte-offset</a>  |
| Range      | -64 to 31   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**percent-rate**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>percent-rate</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <i>reference</i> <a href="#">percent-rate</a> |
| Tree       | <a href="#">percent-rate</a>  |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**cir** *decimal-number*

|            |   |
|------------|---|
| Synopsis   | CIR percent rate  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <i>reference</i> <a href="#">percent-rate cir</a> <i>decimal-number</i> |
| Tree       | <a href="#">cir</a>   |
| Range      | 0.00 to 100.00  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**pir** *decimal-number*

|          |   |
|----------|---|
| Synopsis | PIR percent rate  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos sap-egress overrides policer</a> <i>reference</i> <a href="#">percent-rate pir</a> <i>decimal-number</i> |
| Tree     | <a href="#">pir</a>   |
| Range    | 0.01 to 100.00  |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

**rate**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rate</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i> <b>rate</b> |
| Tree       | <a href="#">rate</a>   |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**cir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CIR rate   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i> <b>rate</b> <b>cir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cir</a>  |
| Range      | 0 to 6400000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**pir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | PIR rate   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i> <b>rate</b> <b>pir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>  |
| Range      | 1 to 6400000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**stat-mode** *keyword*

|            |  |
|------------|--|
| Synopsis   | Mode of statistics collected by the policer  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i> <b>stat-mode</b> <i>keyword</i> |
| Tree       | <a href="#">stat-mode</a>  |
| Options    | no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-profile-cir, offered-limited-capped-cir, offered-profile-capped-cir, offered-total-cir-exceed, offered-four-profile-no-cir, offered-total-cir-four-profile   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**queue** [[queue-id](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>queue</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> |
| Tree       | <a href="#">queue</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[queue-id]** *reference*

|            |  |
|------------|--|
| Synopsis   | Policer unique ID  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> |
| Tree       | <a href="#">queue</a>  |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">sap-egress</a> <i>string</i> <a href="#">queue</a> <i>number</i>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**adaptation-rule**

|          |   |
|----------|---|
| Synopsis | Enter the <b>adaptation-rule</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> <b>adaptation-rule</b> |

|            |                                 |
|------------|---------------------------------|
| Tree       | <a href="#">adaptation-rule</a> |
| Introduced | 16.0.R1                         |
| Platforms  | All                             |

**cir keyword**

|            |   |
|------------|---|
| Synopsis   | Constraint used when deriving the operational CIR value   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue</a> <i>reference</i> <a href="#">adaptation-rule</a> <a href="#">cir</a> <i>keyword</i> |
| Tree       | <a href="#">cir</a>   |
| Options    | max, min, closest   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**pir keyword**

|            |   |
|------------|---|
| Synopsis   | Constraint used when deriving the operational PIR value   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue</a> <i>reference</i> <a href="#">adaptation-rule</a> <a href="#">pir</a> <i>keyword</i> |
| Tree       | <a href="#">pir</a>   |
| Options    | max, min, closest   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**avg-frame-overhead decimal-number**

|            |   |
|------------|---|
| Synopsis   | Average packet-to-frame encapsulation overhead  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos sap-egress overrides queue</a> <i>reference</i> <a href="#">avg-frame-overhead</a> <i>decimal-number</i> |
| Tree       | <a href="#">avg-frame-overhead</a>  |
| Range      | 0.00 to 100.00  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**burst-limit** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Explicit shaping burst size for the queue  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">egress qos sap-egress overrides queue reference</a> <b>burst-limit</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">burst-limit</a>  |
| Range      | 1 to 14000000  |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**cbs** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CBS  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">egress qos sap-egress overrides queue reference</a> <b>cbs</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cbs</a>  |
| Range      | 0 to 1048576   |
| Units      | kilobytes  |
| Options    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**drop-tail**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>drop-tail</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">egress qos sap-egress overrides queue reference</a> <b>drop-tail</b> |
| Tree       | <a href="#">drop-tail</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**low**

|          |                              |
|----------|------------------------------|
| Synopsis | Enter the <b>low</b> context |
|----------|------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides queue</b> <i>reference</i> <b>drop-tail low</b> |
| Tree       | <a href="#">low</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **percent-reduction-from-mbs** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Percentage reduction from the MBS for a queue drop tail  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides queue</b> <i>reference</i> <b>drop-tail low percent-reduction-from-mbs</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">percent-reduction-from-mbs</a>   |
| Range      | 0 to 100   |
| Options    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **hs-class-weight** *number*

|            |  |
|------------|--|
| Synopsis   | Class weight override for the queue  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides queue</b> <i>reference</i> <b>hs-class-weight</b> <i>number</i> |
| Tree       | <a href="#">hs-class-weight</a>  |
| Range      | 1   2   4   8  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

### **hs-wred-queue**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>hs-wred-queue</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides queue</b> <i>reference</i> <b>hs-wred-queue</b> |
| Tree       | <a href="#">hs-wred-queue</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

**policy reference**

|            |   |
|------------|---|
| Synopsis   | Slope policy applied to the HSQ queue group queue   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">egress qos sap-egress overrides queue reference</a> <a href="#">hs-wred-queue policy reference</a> |
| Tree       | <a href="#">policy</a>  |
| Reference  | <b>configure</b> <a href="#">qos slope-policy string</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR-7/12/12e  |

**hs-wrr-weight number**

|            |   |
|------------|---|
| Synopsis   | WRR weight to parent with the queue into the scheduler  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">egress qos sap-egress overrides queue reference</a> <a href="#">hs-wrr-weight number</a> |
| Tree       | <a href="#">hs-wrr-weight</a>   |
| Range      | 1 to 127  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR-7/12/12e  |

**mbs (number | keyword)**

|            |   |
|------------|---|
| Synopsis   | MBS   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">egress qos sap-egress overrides queue reference</a> <a href="#">mbs (number   keyword)</a> |
| Tree       | <a href="#">mbs</a>   |
| Range      | 0 to 1073741824   |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**monitor-queue-depth**

|          |   |
|----------|---|
| Synopsis | Enable the <b>monitor-queue-depth</b> context |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides queue</b> <i>reference</i> <b>monitor-queue-depth</b> |
| Tree       | <b>monitor-queue-depth</b>   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### **fast-polling** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable fast polling of the queue depth   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides queue</b> <i>reference</i> <b>monitor-queue-depth fast-polling</b> <i>boolean</i>       |
| Tree        | <b>fast-polling</b>  |
| Description | When configured to <b>true</b> , this command enables fast polling of the queue depth. Faster polling allows a more accurate view of the actual depth.<br>When configured to <b>false</b> , fast queue polling is not enabled. |
| Default     | false  |
| Introduced  | 20.10.R1   |
| Platforms   | All  |

### **violation-threshold** *decimal-number*

|             |  |
|-------------|--|
| Synopsis    | Threshold for queue depth before violation is raised   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides queue</b> <i>reference</i> <b>monitor-queue-depth violation-threshold</b> <i>decimal-number</i> |
| Tree        | <b>violation-threshold</b>   |
| Description | This command specifies the threshold for the queue MBS. When the queue depth exceeds the threshold value, a violation is registered.   |
| Range       | 0.01 to 99.99  |
| Introduced  | 20.10.R1   |
| Platforms   | All  |

### **parent**

|          |   |
|----------|---|

| Introduced | 16.0.R1   |
| Platforms  | All   |

**instance** *number*

|            |  |
|------------|--|
| Synopsis   | Instance of port queue group   |
| Context    | <b>configure</b> <a href="#">service vprn string interface string sap string egress qos sap-egress port-redirect-group instance number</a> |
| Tree       | <a href="#">instance</a>   |
| Range      | 1 to 65535   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**scheduler-policy**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>scheduler-policy</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string interface string sap string egress qos scheduler-policy</a> |
| Tree       | <a href="#">scheduler-policy</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**overrides**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>overrides</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string interface string sap string egress qos scheduler-policy overrides</a> |
| Tree       | <a href="#">overrides</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**scheduler** [*scheduler-name*] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>scheduler</b> list instance   |
| Context    | <b>configure</b> <i>service vprn string interface string sap string egress qos scheduler-policy overrides scheduler string</i> |
| Tree       | <i>scheduler</i>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[scheduler-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Scheduler name   |
| Context       | <b>configure</b> <i>service vprn string interface string sap string egress qos scheduler-policy overrides scheduler string</i>   |
| Tree          | <i>scheduler</i>   |
| Description   | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**parent**

|          |   |
|----------|---|
| Synopsis | Enter the <b>parent</b> context   |

## eth-cfm

|            |  |
|------------|--|
| Synopsis   | Enter the <b>eth-cfm</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <b>eth-cfm</b> |
| Tree       | <a href="#">eth-cfm</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## collect-lmm-fc-stats

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>collect-lmm-fc-stats</b> context  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <b>collect-lmm-fc-stats</b>  |
| Tree        | <a href="#">collect-lmm-fc-stats</a>   |
| Description | <p>Commands in this context configure per forwarding class (FC) LMM information collection.</p> <p>The commands <b>fc-in-profile</b> and <b>fc</b> in this context are mutually exclusive. The commands apply to either profile-aware or profile-unaware FCs respectively.</p> <p>This command and the <b>collect-lmm-stats</b> command are mutually exclusive when there is entity resource contention.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## fc keyword

|             |   |
|-------------|---|
| Synopsis    | Forwarding class name for profile-unaware counter   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">collect-lmm-fc-stats</a> <b>fc</b> <i>keyword</i>   |
| Tree        | <a href="#">fc</a>  |
| Description | <p>This command configures individual counters for the specified FCs without regard for profile. The system includes all countable packets that match a configured FC, regardless of profile, in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-aware FC using the <b>fc-in-profile</b> command under the <b>collect-lmm-fc-stats</b> context.</p> |

When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.

|                |  |
|----------------|--|
| Options        | be, l2, af, l1, h2, ef, h1, nc                               |
| Max. Instances | 8  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **fc-in-profile** *keyword*

|                |   |
|----------------|---|
| Synopsis       | Forwarding class name for profile-aware counter   |
| Context        | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm collect-lmm-fc-stats</b> <b>fc-in-profile</b> <i>keyword</i>   |
| Tree           | <b>fc-in-profile</b>  |
| Description    | <p>This command configures individual counters for the specified FCs with regard to profile. The system includes all countable packets that match a configured FC and that are deemed to be in-profile in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-unaware FC using the <b>fc</b> command under the <b>collect-lmm-fc-stats</b> context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options        | be, l2, af, l1, h2, ef, h1, nc  |
| Max. Instances | 8   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **collect-lmm-stats** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Collect statistics for loss measurement message tests  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm collect-lmm-stats</b> <i>boolean</i>  |
| Tree        | <b>collect-lmm-stats</b>   |
| Description | <p>When configured to <b>true</b>, the router instantiates the statistical counter to transmit and receive packets for the LAG facility MEP bindings.</p> <p>The <b>show eth-cfm collect-lmm-stats</b> command displays entities that have been enabled to collect transit and receive counters.</p> |

When configured to **false**, the router does not instantiate the counter and the LMM PDU associated with the MEP does not populate the counters in the packet.

|            |  |
|------------|--|
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

| Units      | centiseconds  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **ccm** *boolean*

|          |                       |
|----------|-----------------------|
| Synopsis | Generate CCM messages |
|----------|-----------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>ccm</b> <i>boolean</i> |
| Tree       | <b>ccm</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **ccm-ltm-priority** *number*

|            |  |
|------------|--|
| Synopsis   | Priority of CCM and LTM messages transmitted by the MEP  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>ccm-ltm-priority</b> <i>number</i> |
| Tree       | <b>ccm-ltm-priority</b>  |
| Range      | 0 to 7   |
| Default    | 7  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **ccm-padding-size** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of octets of padding to insert in CCM packets  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>ccm-padding-size</b> <i>number</i>  |
| Tree        | <b>ccm-padding-size</b>   |
| Description | This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.<br><br>This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through <b>configure eth-cfm domain association ccm-interval</b> ) is less than 1 second. |
| Range       | 3 to 1500   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **csf**

|          |                               |
|----------|-------------------------------|
| Synopsis | Enable the <b>csf</b> context |
|----------|-------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>csf</b> |
| Tree       | <b>csf</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **multiplier** *decimal-number*

|            |  |
|------------|--|
| Synopsis   | Multiplication factor used to clear the CSF condition  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>csf multiplier</b> <i>decimal-number</i> |
| Tree       | <b>multiplier</b>  |
| Range      | 0.0   2.0 to 30.0  |
| Default    | 3.5  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>description</b> <i>string</i> |
| Tree          | <b>description</b>  |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **eth-test**

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>eth-test</b> context   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>eth-test</b> |
| Tree        | <b>eth-test</b>  |
| Description | Commands in this context configure information used by the Ethernet Test (ETH-TST) packet. The commands must be configured on both the sender and the receiver nodes. The test packets are used with the <b>oam eth-cfm eth-test</b> command.  |
| Introduced  | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **bit-error-threshold** *number*

Synopsis Lowest priority defect allowed to generate fault alarm

Context **configure** [service vprn](#) *string* [interface](#) *string* [sap](#) *string* [eth-cfm mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [eth-test bit-error-threshold](#) *number*

Tree [bit-error-threshold](#)

Range 0 to 11840

Units bit errors

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **test-pattern**

Synopsis Enter the **test-pattern** context

Context **configure** [service vprn](#) *string* [interface](#) *string* [sap](#) *string* [eth-cfm mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [eth-test test-pattern](#)

Tree [test-pattern](#)

Description Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **crc-tlv** *boolean*

Synopsis Generate a CRC checksum

Context **configure** [service vprn](#) *string* [interface](#) *string* [sap](#) *string* [eth-cfm mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [eth-test test-pattern](#) [crc-tlv](#) *boolean*

Tree [crc-tlv](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**pattern keyword**

### **tx-eth-vsm-grace** *boolean*

Synopsis Transmit ETH-ED PDUs from the MEP

Context **configure** [service vprn string](#) [interface string](#) [sap string](#) [eth-cfm mep md-admin-name reference](#) [ma-admin-name reference](#) [mep-id number](#) [grace eth-vsm-grace tx-eth-vsm-grace](#) *boolean*

Tree [tx-eth-vsm-grace](#)

Description When configured to **true**, the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.

The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.

The operator must configure the **configure system eth-cfm grace** command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).

When configured to **false**, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.

Default true

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **low-priority-defect** *keyword*

Synopsis Lowest priority defect allowed to generate fault alarm

| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**host-admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the hosts   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">host-admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">host-admin-state</a>  |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**host-lockout-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Host lockout policy  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">host-lockout-policy</a> <i>reference</i> |
| Tree       | <a href="#">host-lockout-policy</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">host-lockout-policy</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ingress**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ingress</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> |
| Tree       | <a href="#">ingress</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## filter

|            |  |
|------------|--|
| Synopsis   | Enter the <b>filter</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">filter</a> |
| Tree       | <a href="#">filter</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ip reference

|            |   |
|------------|---|
| Synopsis   | IPv4 filter policy name   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">filter</a> <a href="#">ip</a> <a href="#">reference</a> |
| Tree       | <a href="#">ip</a>  |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">ip-filter</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ipv6 reference

|            |   |
|------------|---|
| Synopsis   | IPv6 filter policy name   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">filter</a> <a href="#">ipv6</a> <a href="#">reference</a> |
| Tree       | <a href="#">ipv6</a>  |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## qos

|            |   |
|------------|---|
| Synopsis   | Enter the <b>qos</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> |
| Tree       | <a href="#">qos</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**match-qinq-dot1p** *keyword*

|            |   |
|------------|---|
| Synopsis   | Ingress match QinQ Dot1p  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos</a> <a href="#">match-qinq-dot1p</a> <i>keyword</i> |
| Tree       | <a href="#">match-qinq-dot1p</a>  |
| Options    | top, bottom   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**policer-control-policy**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>policer-control-policy</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos</a> <a href="#">policer-control-policy</a> |
| Tree       | <a href="#">policer-control-policy</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**overrides**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>overrides</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> |
| Tree       | <a href="#">overrides</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**root**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>root</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> |
| Tree       | <a href="#">root</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**max-rate** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Maximum frame-based bandwidth limit   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos</a> <a href="#">policer-control-policy overrides</a> <a href="#">root max-rate</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">max-rate</a>  |
| Range      | 1 to 6400000000   |
| Options    | max   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**priority-mbs-thresholds**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>priority-mbs-thresholds</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos</a> <a href="#">policer-control-policy overrides</a> <a href="#">root priority-mbs-thresholds</a> |
| Tree       | <a href="#">priority-mbs-thresholds</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**min-thresh-separation** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Minimum amount of separation buffer space  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos</a> <a href="#">policer-control-policy overrides</a> <a href="#">root priority-mbs-thresholds min-thresh-separation</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">min-thresh-separation</a>  |
| Range      | 0 to 16777216  |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**priority** [[priority-level](#)] *number*

|          |  |
|----------|--|
| Synopsis | Enter the <b>priority</b> list instance  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos</a> <a href="#">policer-control-policy overrides</a> <a href="#">root priority-mbs-thresholds priority</a> <i>number</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">priority</a>                               |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

**[priority-level]** *number*

|            |  |
|------------|--|
| Synopsis   | Priority level   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos policer-control-policy overrides</a> <a href="#">root priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>   |
| Range      | 1 to 8   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**mbs-contribution** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Minimum amount of cumulative buffer space allowed  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos policer-control-policy overrides</a> <a href="#">root priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> <a href="#">mbs-contribution</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mbs-contribution</a>   |
| Range      | 0 to 16777216  |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**policy-name** *reference*

|            |   |
|------------|---|
| Synopsis   | Policer control policy name   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos policer-control-policy</a> <a href="#">policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>   |
| Reference  | <b>configure</b> <a href="#">qos policer-control-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## sap-ingress

Synopsis Enter the **sap-ingress** context

Context **configure** [service](#) [vpn](#) *string* [interface](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#)

Tree [sap-ingress](#)

Introduced 16.0.R1

Platforms All

## fp-redirect-group

Synopsis Enter the **fp-redirect-group** context

Context **configure** [service](#) [vpn](#) *string* [interface](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [fp-redirect-group](#)

Tree [fp-redirect-group](#)

Introduced 16.0.R1

Platforms All

## group-name *reference*

Synopsis Queue group template name created on forwarding plane

Context **configure** [service](#) [vpn](#) *string* [interface](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [fp-redirect-group](#) [group-name](#) *reference*

Tree [group-name](#)

Reference **configure** [qos](#) [queue-group-templates](#) [ingress](#) [queue-group](#) *string*

Introduced 16.0.R1

Platforms All

## instance *number*

Synopsis Queue group instance

Context **configure** [service](#) [vpn](#) *string* [interface](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [fp-redirect-group](#) [instance](#) *number*

Tree [instance](#)

Range 1 to 65535

Introduced 16.0.R1  
 Platforms All

## overrides

Synopsis Enter the **overrides** context  
 Context **configure** [service](#) [vprn](#) *string* [interface](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [overrides](#)  
 Tree [overrides](#)  
 Introduced 16.0.R1  
 Platforms All

## ip-criteria

Synopsis Enter the **ip-criteria** context  
 Context **configure** [service](#) [vprn](#) *string* [interface](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [overrides](#) [ip-criteria](#)  
 Tree [ip-criteria](#)  
 Introduced 20.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## activate-entry-tag *number*

Synopsis Tag ID activated for IPv4 criteria  
 Context **configure** [service](#) [vprn](#) *string* [interface](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [overrides](#) [ip-criteria](#) [activate-entry-tag](#) *number*  
 Tree [activate-entry-tag](#)  
 Range 1 to 255  
 Introduced 20.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## ipv6-criteria

Synopsis Enter the **ipv6-criteria** context  
 Context **configure** [service](#) [vprn](#) *string* [interface](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [overrides](#) [ipv6-criteria](#)  
 Tree [ipv6-criteria](#)

|            |  |
|------------|--|
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **activate-entry-tag** *number*

|            |   |
|------------|---|
| Synopsis   | Tag ID activated for IPv6 criteria  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos sap-ingress</a> <a href="#">overrides ipv6-criteria</a> <b>activate-entry-tag</b> <i>number</i> |
| Tree       | <a href="#">activate-entry-tag</a>  |
| Range      | 1 to 255  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **policer** [[policer-id](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>policer</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos sap-ingress</a> <a href="#">overrides policer</a> <i>reference</i> |
| Tree       | <a href="#">policer</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### [[policer-id](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Policer unique ID  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos sap-ingress</a> <a href="#">overrides policer</a> <i>reference</i> |
| Tree       | <a href="#">policer</a>  |
| Reference  | <b>configure</b> <a href="#">qos sap-ingress</a> <i>string</i> <a href="#">policer</a> <i>number</i>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **cbs** (*number* | *keyword*)

|          |     |
|----------|-----|
| Synopsis | CBS |
|----------|-----|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b> <i>reference</i> <b>cbs</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>cbs</b>  |
| Range      | 0 to 268435456  |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **mbs** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | MBS   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b> <i>reference</i> <b>mbs</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>mbs</b>  |
| Range      | 0 to 268435456  |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **packet-byte-offset** *number*

|            |   |
|------------|---|
| Synopsis   | Packet size modification for policing information   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b> <i>reference</i> <b>packet-byte-offset</b> <i>number</i> |
| Tree       | <b>packet-byte-offset</b>   |
| Range      | -32 to 31   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **percent-rate**

|          |   |
|----------|---|
| Synopsis | Enter the <b>percent-rate</b> context   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b> <i>reference</i> <b>percent-rate</b> |

|            |   |
|------------|---|
| Tree       | <a href="#">percent-rate</a>  |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR                            |

### **cir** *decimal-number*

|            |   |
|------------|---|
| Synopsis   | CIR percent rate  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i> <a href="#">percent-rate</a> <b>cir</b> <i>decimal-number</i> |
| Tree       | <a href="#">cir</a>   |
| Range      | 0.00 to 100.00  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **pir** *decimal-number*

|            |   |
|------------|---|
| Synopsis   | PIR percent rate  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i> <a href="#">percent-rate</a> <b>pir</b> <i>decimal-number</i> |
| Tree       | <a href="#">pir</a>   |
| Range      | 0.01 to 100.00  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **rate**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>rate</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i> <b>rate</b> |
| Tree       | <a href="#">rate</a>  |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**cir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CIR rate   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos sap-ingress</a> <a href="#">overrides policer</a> <i>reference</i> <a href="#">rate cir</a> ( <i>number</i>   <i>keyword</i> ) |

**[scheduler-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Scheduler name   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos scheduler-policy</a> <a href="#">overrides scheduler</a> <i>string</i>   |
| Tree          | <a href="#">scheduler</a>  |
| Description   | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |

### **ip-mtu** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | IP MTU for the interface  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ip-tunnel</a> <i>string</i> <a href="#">ip-mtu</a> <i>number</i>  |
| Tree        | <a href="#">ip-mtu</a>  |
| Description | <p>This command specifies the IP MTU for the interface. If the DF bit is not set in the packet, IP packet fragmentation is performed, if necessary, based on this configured value.</p> <p>When unconfigured, all IP packets, regardless of the packet size or DF bit setting, are allowed into the tunnel without fragmentation.</p> |
| Range       | 512 to 9000   |
| Units       | bytes   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **ipsec-transport-mode-profile** *reference*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | IPsec transport mode profile name   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ip-tunnel</a> <i>string</i> <a href="#">ipsec-transport-mode-profile</a> <i>reference</i> |
| Tree     | <a href="#">ipsec-transport-mode-profile</a>  |

|            |   |
|------------|---|
| Reference  | <b>configure</b> <a href="#">ipsec ipsec-transport-mode-profile</a> <i>string</i> |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                      |

## local-ip-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Local IP address of this tunnel  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ip-tunnel</a> <i>string</i> <a href="#">local-ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )   |
| Tree        | <a href="#">local-ip-address</a>   |
| Description | This command specifies the local IP address to use for the IP tunnel. This configuration applies to the outer IP header of the encapsulated packets. The address must belong to one of the IP subnets associated with the public SAP interface of the tunnel group. The source IP address, the remote IP address, and the backup remote IP address of a tunnel must all belong to the same address family (IPv4 or IPv6).<br><br>When this command specifies an IPv6 address, it must be a global unicast address. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## pmtu-discovery-aging *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Time to age out the learned path MTU   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ip-tunnel</a> <i>string</i> <a href="#">pmtu-discovery-aging</a> <i>number</i> |
| Tree        | <a href="#">pmtu-discovery-aging</a>   |
| Description | This command configures the temporary public MTU expiration time. The temporary public MTU is used for MTU propagation.  |
| Range       | 900 to 3600  |
| Units       | seconds  |
| Default     | 900  |

|            |  |
|------------|--|

|             |  |
|-------------|--|
| Synopsis    | TCP Maximum Segment Size (MSS) on the public side  |
| Context     | <b>configure</b> <i>service</i> <i>vprn</i> <i>string</i> <i>interface</i> <i>string</i> <i>sap</i> <i>string</i> <i>ip-tunnel</i> <i>string</i> <b>public-tcp-mss-adjust</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree        | <a href="#">public-tcp-mss-adjust</a>  |
| Description | This command specifies the TCP MSS for TCP traffic sent from the public network to the private network. The value is used to adjust the TCP MSS option in the TCP SYN packet.                                    |
| Range       | 512 to 9000  |
| Units       | bytes  |
| Options     | auto   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**reassemble** (*number* | *keyword*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |                              |
|----------|------------------------------|
| Synopsis | Maximum reassembly wait time |
|----------|------------------------------|

|             |  |
|-------------|--|
| Context     | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ip-tunnel</b> <i>string</i> <b>reassemble</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree        | <b>reassemble</b>  |
| Description | This command configures the maximum time to wait to receive all fragments of a particular IPsec or GRE packet for reassembly.  |
| Range       | 1 to 5000  |
| Units       | milliseconds   |
| Options     | use-tunnel-group-setting, none   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **remote-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Remote IP address of the tunnel  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ip-tunnel</b> <i>string</i> <b>remote-ip-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <b>remote-ip-address</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **ipsec-gateway** [**name**] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>ipsec-gateway</b> list instance  |
| Context        | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> |
| Tree           | <b>ipsec-gateway</b>  |
| Max. Instances | 1   |
| Introduced     | 16.0.R4   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **[name]** *string*

|          |                    |
|----------|--------------------|
| Synopsis | IPsec gateway name |
|----------|--------------------|

|               |   |
|---------------|---|
| Context       | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> |
| Tree          | <b>ipsec-gateway</b>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R4   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the IPsec gateway   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **cert**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cert</b> context   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>cert</b> |
| Tree       | <b>cert</b>   |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **cert-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Certificate profile name   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>cert</b> <b>cert-profile</b> <i>reference</i> |
| Tree       | <b>cert-profile</b>  |
| Reference  | <b>configure ipsec</b> <b>cert-profile</b> <i>string</i>   |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## status-verify

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>status-verify</b> context  |
| Context     | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>cert status-verify</b> |
| Tree        | <b>status-verify</b>  |
| Description | Commands in this context configure certificate revocation status verification.  |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## default-result *keyword*

|             |   |
|-------------|---|
| Synopsis    | Default result of Certificate Status Verification (CSV)   |
| Context     | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>cert status-verify default-result</b> <i>keyword</i> |
| Tree        | <b>default-result</b>   |
| Description | This command specifies the default result when both the primary and secondary methods fail to provide an answer.  |
| Options     | revoked, good   |
| Default     | revoked   |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## primary *keyword*

|            |  |
|------------|--|
| Synopsis   | Primary method of CSV to verify the revocation status  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>cert status-verify primary</b> <i>keyword</i> |
| Tree       | <b>primary</b>   |
| Options    | crl, ocsp  |
| Default    | crl  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**secondary** *keyword*

|            |  |
|------------|--|
| Synopsis   | Secondary method of CSV to verify the revocation status  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">cert status-verify</a> <b>secondary</b> <i>keyword</i> |
| Tree       | <a href="#">secondary</a>  |
| Options    | none, crl, ocsp  |
| Default    | none   |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**trust-anchor-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Trust anchor profile name  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">cert trust-anchor-profile</a> <i>reference</i> |
| Tree       | <a href="#">trust-anchor-profile</a>   |
| Reference  | <b>configure</b> <a href="#">ipsec trust-anchor-profile</a> <i>string</i>  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**client-db**

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>client-db</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <b>client-db</b> |
| Tree        | <a href="#">client-db</a>  |
| Description | Commands in this context configure the IPsec client database. The client database is used to authenticate the IKEv2 dynamic LAN-to-LAN tunnel.   |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**fallback** *boolean*

|          |  |
|----------|--|
| Synopsis | Fall back to the default authentication policy   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">client-db</a> <b>fallback</b> <i>boolean</i> |
| Tree     | <a href="#">fallback</a>   |

|             |  |
|-------------|--|
| Description | When configured to <b>true</b> , this command specifies whether the IPsec gateway can fall back to the default authentication policy when the IPsec tunnel authentication request fails to match any clients in the IPsec database.<br><br>When configured to <b>false</b> and the client database lookup fails to return a matched result, the system fails the tunnel setup. |
| Default     | true   |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### name reference

|            |  |
|------------|--|
| Synopsis   | Client database name   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>client-db</b> <i>name reference</i> |
| Tree       | <b>name</b>  |
| Reference  | <b>configure ipsec client-db</b> <i>string</i>   |
| Notes      | This element is mandatory.   |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### default-secure-service

|            |   |
|------------|---|
| Synopsis   | Enable the <b>default-secure-service</b> context  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>default-secure-service</b> |
| Tree       | <b>default-secure-service</b>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### interface string

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Private IPsec tunnel interface name   |
| Context  | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>default-secure-service interface</b> <i>string</i> |

| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## dhcpv4

|            |  |
|------------|--|
| Synopsis   | Enable the <b>dhcpv4</b> context   |
| Context    | <b>configure</b> <b>service</b> <b>vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>dhcp-address-assignment</b> <b>dhcpv4</b> |
| Tree       | <b>dhcpv4</b>  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the IPsec DHCPv4 server  |
| Context    | <b>configure</b> <b>service</b> <b>vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>dhcp-address-assignment</b> <b>dhcpv4</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## gi-address *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Gateway IP address of DHCPv4 packets sent by the system  |
| Context    | <b>configure</b> <b>service</b> <b>vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>dhcp-address-assignment</b> <b>dhcpv4</b> <b>gi-address</b> <i>string</i> |
| Tree       | <b>gi-address</b>  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**send-release** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Send DHCPv4 release message when IPsec tunnel removed  |
| Context    | <b>configure</b> <i>service vprn string interface string sap string ipsec-gateway string dhcp-address-assignment dhcpv4 send-release boolean</i> |
| Tree       | <i>send-release</i>  |
| Default    | true   |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**server****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enter the <b>server</b> context  |
| Context    | <b>configure</b> <i>service vprn string interface string sap string ipsec-gateway string dhcp-address-assignment dhcpv4 server</i> |
| Tree       | <i>server</i>  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**address** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | DHCPv4 server addresses   |
| Context     | <b>configure</b> <i>service vprn string interface string sap string ipsec-gateway string dhcp-address-assignment dhcpv4 server address string</i>   |
| Tree        | <i>address</i>  |
| Description | This command specifies DHCPv4 server addresses for the DHCPv4-based address assignment. If multiple server addresses are specified, the first advertised DHCPv4 address received is chosen. |

|                |  |
|----------------|--|
| Max. Instances | 8  |
| Introduced     | 19.7.R1                                      |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### router-instance *string*

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Router instance used to reach the DHCPv4 server   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">dhcp-address-assignment dhcpv4 server router-instance</a> <i>string</i> |

| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">dhcp-address-assignment dhcpv6</a> <a href="#">server address</a> <i>string</i> |
| Tree           | <a href="#">address</a>   |
| Description    | This command specifies DHCPv6 server addresses for the DHCPv6-based address assignment. If multiple server addresses are specified, the first advertised DHCPv6 address received is chosen.   |
| Max. Instances | 8   |
| Introduced     | 19.7.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### router-instance *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Router instance to reach the DHCPv6 server  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">dhcp-address-assignment dhcpv6</a> <a href="#">server router-instance</a> <i>string</i> |
| Tree          | <a href="#">router-instance</a>   |
| String Length | 1 to 64   |
| Introduced    | 19.7.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### ike-policy *reference*

|          |               |
|----------|---------------|
| Synopsis | IKE policy ID |
|----------|---------------|

|            |  |
|------------|--|
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>ike-policy</b> <i>reference</i> |
| Tree       | <a href="#">ike-policy</a>   |
| Reference  | <b>configure ipsec</b> <a href="#">ike-policy</a> <i>number</i>  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## local

|            |  |
|------------|--|
| Synopsis   | Enter the <b>local</b> context   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>local</b> |
| Tree       | <a href="#">local</a>  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## address-assignment

|            |  |
|------------|--|
| Synopsis   | Enable the <b>address-assignment</b> context   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>local</b> <b>address-assignment</b> |
| Tree       | <a href="#">address-assignment</a>   |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of local address assignments  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>local</b> <b>address-assignment</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ipv4

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enable the <b>ipv4</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local</a> <a href="#">address-assignment</a> <a href="#">ipv4</a> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## dhcp-server *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Local DHCPv4 server name   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local</a> <a href="#">address-assignment</a> <a href="#">ipv4</a> <a href="#">dhcp-server</a> <i>string</i> |
| Tree          | <a href="#">dhcp-server</a>  |
| String Length | 1 to 32  |
| Notes         | This element is mandatory.   |
| Introduced    | 19.7.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## pool *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Name of the pool defined in the specified DHCPv4 server   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local</a> <a href="#">address-assignment</a> <a href="#">ipv4</a> <a href="#">pool</a> <i>string</i> |
| Tree          | <a href="#">pool</a>  |
| String Length | 1 to 32   |

|            |  |
|------------|--|
| Notes      | This element is mandatory.                   |
| Introduced | 19.7.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### router-instance *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Router instance ID for the local DHCPv4 server  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local address-assignment ipv4</a> <a href="#">router-instance</a> <i>string</i> |
| Tree          | <a href="#">router-instance</a>   |
| String Length | 1 to 64   |
| Notes         | This element is mandatory.  |
| Introduced    | 19.7.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### secondary-pool *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Name of the secondary pool defined in the DHCPv4 server  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local address-assignment ipv4</a> <a href="#">secondary-pool</a> <i>string</i> |
| Tree          | <a href="#">secondary-pool</a>   |
| String Length | 1 to 32  |
| Introduced    | 19.7.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ipv6

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Enable the <b>ipv6</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local address-assignment ipv6</a> |
| Tree       | <a href="#">ipv6</a>  |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## dhcp-server *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Local DHCPv6 server name  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local address-assignment ipv6 dhcp-server</a> <i>string</i> |
| Tree          | <a href="#">dhcp-server</a>   |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 19.7.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## pool *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Secondary pool name defined in the DHCPv6 server   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local address-assignment ipv6 pool</a> <i>string</i> |
| Tree          | <a href="#">pool</a>   |
| String Length | 1 to 32  |

|            |  |
|------------|--|
| Notes      | This element is mandatory.                   |
| Introduced | 19.7.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### router-instance *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Router instance ID hosting the DHCPv6 connection  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local address-assignment ipv6 router-instance</a> <i>string</i> |
| Tree          | <a href="#">router-instance</a>   |
| String Length | 1 to 64   |
| Notes         | This element is mandatory.  |
| Introduced    | 19.7.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### gateway-address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Local gateway address of the IPsec gateway  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local gateway-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">gateway-address</a>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### id

|          |  |
|----------|--|
| Synopsis | Enter the <b>id</b> context  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local id</a> |
| Tree     | <a href="#">id</a>   |

|             |  |
|-------------|--|
| Description | Commands in this context specify the local ID used for the Identification Indicator (IDi) or Identification Responder (IDr) in the IKEv2 tunnel. |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## auto

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Select ID based on authentication method in IKE policy   |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local id</a> <a href="#">auto</a> |
| Tree       | <a href="#">auto</a>   |
| Notes      | The following elements are part of a choice: <b>auto</b> , <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## fqdn string

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | FQDN as the local ID type  |
| Context       | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">local id</a> <a href="#">fqdn</a> <i>string</i> |
| Tree          | <a href="#">fqdn</a>   |
| String Length | 1 to 255   |
| Notes         | The following elements are part of a choice: <b>auto</b> , <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .  |
| Introduced    | 16.0.R4  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ipv4 string

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | IPv4 address as the local ID type  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">ipsec-gateway string</a> <a href="#">local id ipv4 string</a> |
| Tree       | <a href="#">ipv4</a>   |
| Notes      | The following elements are part of a choice: <b>auto</b> , <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ipv6 (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | IPv6 address as the local ID type   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">ipsec-gateway string</a> <a href="#">local id ipv6 (<i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>)</a> |
| Tree       | <a href="#">ipv6</a>  |
| Notes      | The following elements are part of a choice: <b>auto</b> , <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## max-history-key-records

|            |   |
|------------|---|
| Synopsis   | Enter the <b>max-history-key-records</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">sap string</a> <a href="#">ipsec-gateway string</a> <a href="#">max-history-key-records</a> |
| Tree       | <a href="#">max-history-key-records</a>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**esp number**

|            |  |
|------------|--|
| Synopsis   | Maximum number of recent records   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>max-history-key-records esp</b> <i>number</i> |
| Tree       | <b>esp</b>   |
| Range      | 1 to 48  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**ike number**

|            |  |
|------------|--|
| Synopsis   | Maximum number of historical IKE keys recorded   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>max-history-key-records ike</b> <i>number</i> |
| Tree       | <b>ike</b>   |
| Range      | 1 to 3   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**pre-shared-key string**

|               |   |
|---------------|---|
| Synopsis      | Pre-shared key for the IPsec gateway  |
| Context       | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>pre-shared-key</b> <i>string</i> |
| Tree          | <b>pre-shared-key</b>   |
| String Length | 1 to 115  |
| Introduced    | 16.0.R4   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**radius**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>radius</b> context   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-gateway</b> <i>string</i> <b>radius</b> |
| Tree       | <b>radius</b>   |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### accounting-policy *reference*

|            |   |
|------------|---|
| Synopsis   | RADIUS accounting policy  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">radius accounting-policy</a> <i>reference</i> |
| Tree       | <a href="#">accounting-policy</a>   |
| Reference  | <b>configure</b> <a href="#">ipsec radius accounting-policy</a> <i>string</i>   |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### authentication-policy *reference*

|            |   |
|------------|---|
| Synopsis   | RADIUS authentication policy  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">radius authentication-policy</a> <i>reference</i> |
| Tree       | <a href="#">authentication-policy</a>   |
| Reference  | <b>configure</b> <a href="#">ipsec radius authentication-policy</a> <i>string</i>   |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### ts-list *reference*

|            |  |
|------------|--|
| Synopsis   | TS list used for IKEv2 TS negotiation  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-gateway</a> <i>string</i> <a href="#">ts-list</a> <i>reference</i> |
| Tree       | <a href="#">ts-list</a>  |
| Reference  | <b>configure</b> <a href="#">ipsec ts-list</a> <i>string</i>   |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### ipsec-tunnel [[name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipsec-tunnel</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> |
| Tree       | <a href="#">ipsec-tunnel</a>   |
| Introduced | 19.7.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [name] *string*

Synopsis IPsec tunnel name

Context **configure** [service](#) [vpn](#) *string* [interface](#) *string* [sap](#) *string* [ipsec-tunnel](#) *string*

Tree [ipsec-tunnel](#)

String Length 1 to 32

Notes This element is part of a list key.

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### admin-state *keyword*

Synopsis Administrative state of the IPsec tunnel

Context **configure** [service](#) [vpn](#) *string* [interface](#) *string* [sap](#) *string* [ipsec-tunnel](#) *string* [admin-state](#) *keyword*

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

Synopsis Enter the **bfd** context

Context **configure** [service](#) [vpn](#) *string* [interface](#) *string* [sap](#) *string* [ipsec-tunnel](#) *string* [bfd](#)

Tree [bfd](#)

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**bfd-designate** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Designate IPsec tunnel to carry BFD traffic   |
| Context    | <b>configure</b> <i>service vprn string interface string sap string ipsec-tunnel string bfd bfd-designate boolean</i> |
| Tree       | <i>bfd-designate</i>  |
| Default    | false   |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**bfd-liveness****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>bfd-liveness</b> context  |
| Context     | <b>configure</b> <i>service vprn string interface string sap string ipsec-tunnel string bfd bfd-liveness</i>  |
| Tree        | <i>bfd-liveness</i>   |
| Description | <p>Commands in this context configure a BFD session to provide a heart-beat mechanism for a specified IPsec tunnel. There can be only one BFD session assigned to any given IPsec tunnel, but there can be multiple IPsec tunnels using the same BFD session.</p> <p>BFD controls the state of the association tunnel. If the BFD session goes down, the system brings down the associated non-designated IPsec tunnel.</p> |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**dest-ip** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Destination address used for the BFD session |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>bfd bfd-liveness dest-ip</b> <i>string</i> |
| Tree       | <b>dest-ip</b>  |
| Notes      | This element is mandatory.  |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **interface** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Name of the interface used by the BFD session   |
| Context       | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>bfd bfd-liveness interface</b> <i>string</i> |
| Tree          | <b>interface</b>  |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 19.7.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **service-name** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Administrative service name  |
| Context       | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>bfd bfd-liveness service-name</b> <i>string</i> |
| Tree          | <b>service-name</b>  |
| Description   | This command configures the name of the service where BFD traffic is forwarded to.   |
| String Length | 1 to 64  |
| Notes         | This element is mandatory.   |
| Introduced    | 19.7.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**clear-df-bit** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Reset the DF bit to 0 in all payload IP packets  |
| Context     | <b>configure</b> <b>service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>clear-df-bit</b> <i>boolean</i> |
| Tree        | <b>clear-df-bit</b>  |
| Description | When configured to <b>true</b> , the DF bit is set to 0 in all payload IP packets associated with the IPsec tunnel, before any potential fragmentation occurs.                 |
| Default     | false  |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**copy-traffic-class-upon-decapsulation** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enable traffic class copy upon decapsulation  |
| Context     | <b>configure</b> <b>service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>copy-traffic-class-upon-decapsulation</b> <i>boolean</i> |
| Tree        | <b>copy-traffic-class-upon-decapsulation</b>  |
| Description | When configured to <b>true</b> , the system copies the traffic class from the outer tunnel IP packet header to the payload IP packet header in the decapsulating direction (public to private).         |
| Default     | false   |
| Introduced  | 21.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**description** *string*

|          |  |
|----------|--|
| Synopsis | Text description   |
| Context  | <b>configure</b> <b>service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>description</b> <i>string</i> |

|               |  |
|---------------|--|
| Tree          | <a href="#">description</a>                  |
| String Length | 1 to 80                                      |
| Introduced    | 19.7.R1                                      |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **dest-ip** [[address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|                |  |
|----------------|--|
| Synopsis       | Add a list entry for <b>dest-ip</b>  |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <b>dest-ip</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree           | <a href="#">dest-ip</a>  |
| Max. Instances | 16   |
| Introduced     | 19.7.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | Private IP address of the remote IP tunnel endpoint  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <b>dest-ip</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">dest-ip</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **encapsulated-ip-mtu** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Maximum size of the encapsulated tunnel packet |
|----------|--|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>encapsulated-ip-mtu</b> <i>number</i>  |
| Tree        | <b>encapsulated-ip-mtu</b>  |
| Description | This command specifies the maximum size of the encapsulated tunnel packet to the IPsec tunnel, the IP tunnel, or the dynamic tunnels terminated on the IPsec Gateway. If the encapsulated IPv4 or IPv6 tunnel packet exceeds this value, the system fragments the packet. |
| Range       | 512 to 9000   |
| Units       | bytes   |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## icmp-generation

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>icmp-generation</b> context   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>icmp-generation</b> |
| Tree        | <b>icmp-generation</b>   |
| Description | Commands in this context configure settings for ICMPv4 message generation.   |
| Introduced  | 21.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## frag-required

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>frag-required</b> context   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>icmp-generation frag-required</b> |
| Tree        | <b>frag-required</b>   |
| Description | Commands in this context configure the attributes for sending generated ICMP Destination Unreachable "fragmentation needed and DF set" messages (type 3, code 4)           |

back to the source, if the received size of the IPv4 packet on the private side exceeds the private MTU size.

|            |  |
|------------|--|
| Introduced | 21.5.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Administrative state of sending ICMP messages  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>icmp-generation</b> <b>frag-required</b> <b>admin-state</b> <i>keyword</i>                                  |
| Tree        | <b>admin-state</b>   |
| Description | This command configures the administrative state of sending ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4) messages to the source if the received size of the IPv4 packet on the private side exceeds the private MTU size. |
| Options     | enable, disable  |
| Default     | enable   |
| Introduced  | 21.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **interval** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Interval for sending ICMP messages  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>icmp-generation</b> <b>frag-required</b> <b>interval</b> <i>number</i> |
| Tree        | <b>interval</b>   |
| Description | This command configures the interval for sending ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4).   |
| Range       | 1 to 60   |
| Units       | seconds   |
| Default     | 10  |

|            |  |
|------------|--|
| Introduced | 21.5.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## message-count *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Maximum number of ICMP messages that can be sent   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>icmp-generation frag-required</b> <b>message-count</b> <i>number</i> |
| Tree        | <b>message-count</b>   |
| Description | This command configures the maximum number of ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4) that can be sent during the configured interval.                                 |
| Range       | 10 to 1000   |
| Default     | 100  |
| Introduced  | 21.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## icmp6-generation

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>icmp6-generation</b> context  |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>icmp6-generation</b> |
| Tree        | <b>icmp6-generation</b>  |
| Description | Commands in this context configure settings for ICMPv6 message generation.   |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## packet-too-big

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>packet-too-big</b> context   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>icmp6-generation</b> <b>packet-too-big</b>   |
| Tree        | <b>packet-too-big</b>   |
| Description | <p>Commands in this context configure the parameters to send ICMPv6 PTB (Packet Too Big) messages on the private side.</p> <p>The system sends PTB messages if a received IPv6 packet on the private side is greater than 1280 bytes and it exceeds the private MTU of the tunnel.</p> <p>The private MTU for the tunnel is configured via the <b>configure router interface ipsec ipsec-tunnel ip-mtu</b> command for the interface.</p> |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Administrative state of Packet Too Big message sends  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>icmp6-generation</b> <b>packet-too-big</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## interval *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Interval for sending Packet Too Big messages  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>icmp6-generation</b> <b>packet-too-big</b> <b>interval</b> <i>number</i> |
| Tree       | <b>interval</b>   |
| Range      | 1 to 60   |
| Units      | seconds   |
| Default    | 10  |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **message-count** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Maximum number of ICMPv6 PTB messages that can be sent   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>icmp6-generation</b> <b>packet-too-big</b> <b>message-count</b> <i>number</i> |
| Tree        | <b>message-count</b>   |
| Description | This command configures the maximum number of PTB messages that can be sent during the configured interval.  |
| Range       | 10 to 1000   |
| Default     | 100  |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **ip-mtu** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Private MTU of the IPsec tunnel   |
| Context  | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>ip-mtu</b> <i>number</i> |
| Tree     | <b>ip-mtu</b>   |

|             |   |
|-------------|---|
| Description | This command specifies the private MTU of the IPsec tunnel. The private MTU is used to determine the need for fragmentation before encapsulation of the payload packet. |
| Range       | 512 to 9000   |
| Units       | bytes   |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## key-exchange

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enter the <b>key-exchange</b> context  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>key-exchange</b> |
| Tree       | <b>key-exchange</b>  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## dynamic

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enable the <b>dynamic</b> context  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>key-exchange dynamic</b> |
| Tree       | <b>dynamic</b>   |
| Notes      | The following elements are part of a choice: <b>dynamic</b> or <b>manual</b> .   |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**auto-establish** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Attempt to establish a phase 1 exchange automatically   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic auto-establish</a> <i>boolean</i> |
| Tree       | <a href="#">auto-establish</a>  |
| Default    | false   |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**cert****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>cert</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic cert</a> |
| Tree        | <a href="#">cert</a>   |
| Description | Commands in this context configure the attributes of the dynamic keying certificate.   |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**cert-profile** *reference*

|            |  |

| Synopsis   | Certificate profile name   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic cert cert-profile</a> <i>reference</i> |
| Tree       | <a href="#">cert-profile</a>   |
| Reference  | <b>configure</b> <a href="#">ipsec cert-profile</a> <i>string</i>  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## status-verify

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>status-verify</b> context   |
| Context     | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic cert</a> <b>status-verify</b> |
| Tree        | <a href="#">status-verify</a>  |
| Description | Commands in this context configure attributes of Certificate Status Verification (CSV).  |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## default-result *keyword*

|             |   |
|-------------|---|
| Synopsis    | Default result for Certificate Status Verification  |
| Context     | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic cert</a> <b>status-verify</b> <b>default-result</b> <i>keyword</i> |
| Tree        | <a href="#">default-result</a>  |
| Description | This command specifies the default certificate revocation status result to use when all configured CSV methods fail to return a result.   |
| Options     | revoked, good   |
| Default     | revoked   |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## primary *keyword*

|             |  |
|-------------|--|
| Synopsis    | Primary method of CSV to verify the revocation status  |
| Context     | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic cert</a> <b>status-verify</b> <b>primary</b> <i>keyword</i> |
| Tree        | <a href="#">primary</a>  |
| Description | This command configures the primary method of Certificate Status Verification (CSV) that is used to verify the revocation status of the certificate of the peer.   |
| Options     | crl, ocsp  |
| Default     | crl  |

|            |  |
|------------|--|
| Introduced | 19.7.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **secondary** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Secondary method used to verify certificate revocation  |
| Context     | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic cert status-verify</a> <b>secondary</b> <i>keyword</i> |
| Tree        | <a href="#">secondary</a>   |
| Description | This command specifies the secondary method of Certificate Status Verification (CSV) that is used to verify the revocation status of the peer certificate.  |
| Options     | none, <a href="#">crl</a> , <a href="#">ocsp</a>  |
| Default     | none  |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **trust-anchor-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Trust anchor profile name  |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic cert</a> <b>trust-anchor-profile</b> <i>reference</i> |
| Tree       | <a href="#">trust-anchor-profile</a>   |
| Reference  | <b>configure</b> <a href="#">ipsec</a> <b>trust-anchor-profile</b> <i>string</i>   |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **id**

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>id</b> context  |
| Context     | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <b>dynamic id</b> |
| Tree        | <a href="#">id</a>   |
| Description | Commands in this context specify the local ID used for IDi or IDr for IKEv2 negotiation.   |

The default behavior depends on the local authentication method as follows:

- Psk: local tunnel IP address
- Cert-auth: subject of the local certificate

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## fqdn string

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis FQDN used as the local ID IKE type

Context **configure** service vpn string interface string sap string ipsec-tunnel string key-exchange dynamic id fqdn string

Tree fqdn

String Length 1 to 255

Notes The following elements are part of a choice: **fqdn**, **ipv4**, or **ipv6**.

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ipv4 string

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis IPv4 as the local ID type

Context **configure** service vpn string interface string sap string ipsec-tunnel string key-exchange dynamic id ipv4 string

Tree ipv4

Notes The following elements are part of a choice: **fqdn**, **ipv4**, or **ipv6**.

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ipv6** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | IPv6 used as the local IKE ID type   |
| Context    | <b>configure</b> <i>service vprn string interface string sap string ipsec-tunnel string key-exchange dynamic id ipv6 (ipv4-address-no-zone   ipv6-address-no-zone)</i> |
| Tree       | <a href="#">ipv6</a>   |
| Notes      | The following elements are part of a choice: <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**ike-policy** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | IKE policy ID   |
| Context     | <b>configure</b> <i>service vprn string interface string sap string ipsec-tunnel string key-exchange dynamic ike-policy reference</i>                   |
| Tree        | <a href="#">ike-policy</a>  |
| Description | This command specifies the ID of the IKE policy used for IKE negotiation.<br>The <b>ipsec-transport-mode-profile</b> configuration only supports IKEv2. |
| Reference   | <b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i>   |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**ipsec-transform** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | IPsec transform IDs used by the dynamic key  |
| Context  | <b>configure</b> <i>service vprn string interface string sap string ipsec-tunnel string key-exchange dynamic ipsec-transform reference</i> |

|                |   |
|----------------|---|
| Tree           | <a href="#">ipsec-transform</a>   |
| Description    | This command specifies IPsec transform IDs used for CHILD_SA negotiation. |
| Reference      | <b>configure</b> <a href="#">ipsec ipsec-transform</a> <i>number</i>      |
| Max. Instances | 4   |
| Introduced     | 19.7.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                              |

### pre-shared-key *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Pre-shared key for authentication   |
| Context       | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange dynamic pre-shared-key</a> <i>string</i> |
| Tree          | <a href="#">pre-shared-key</a>  |
| String Length | 1 to 115  |
| Introduced    | 19.7.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### manual

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Enable the <b>manual</b> context  |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange manual</a> |
| Tree       | <a href="#">manual</a>  |
| Notes      | The following elements are part of a choice: <b>dynamic</b> or <b>manual</b> .  |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**keys** [[security-association](#)] *number direction keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>keys</b> list instance   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">manual</a> <a href="#">keys</a> <i>number</i> <a href="#">direction</a> <i>keyword</i> |
| Tree        | <a href="#">keys</a>  |
| Description | Commands in this context configure the security association list for the tunnel.  |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**[security-association]** *number*

|            |   |
|------------|---|
| Synopsis   | SA entry ID   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">manual</a> <a href="#">keys</a> <i>number</i> <a href="#">direction</a> <i>keyword</i> |

| Notes      | This element is mandatory.  |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**spi** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | SPI of inbound and outbound packets   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">manual</a> <a href="#">keys</a> <i>number</i> <a href="#">direction</a> <i>keyword</i> <a href="#">spi</a> <i>number</i>            |
| Tree        | <a href="#">spi</a>   |
| Description | <p>This command specifies the Security Parameter Index (SPI) used to look up the instruction to verify and decrypt the incoming IPsec packets when the direction is inbound. When the direction is outbound, the SPI is used in the encoding of the outgoing packets.</p> <p>The remote node can use the SPI to look up the instruction to verify and decrypt the packet.</p> |
| Range       | 256 to 16383  |

|            |  |
|------------|--|
| Notes      | This element is mandatory.                   |
| Introduced | 19.7.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## max-history-key-records

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>max-history-key-records</b> context  |
| Context     | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">max-history-key-records</a> |
| Tree        | <a href="#">max-history-key-records</a>   |
| Description | Commands in this context configure the settings for recording historical IPsec keys.  |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## esp number

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Maximum number of recent records  |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ipsec-tunnel</a> <i>string</i> <a href="#">max-history-key-records</a> <a href="#">esp</a> <i>number</i> |
| Tree       | <a href="#">esp</a>   |
| Range      | 1 to 48   |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## ike number

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Maximum number of historical IKE key records  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>max-history-key-records</b> <b>ike</b> <i>number</i> |
| Tree       | <b>ike</b>  |
| Range      | 1 to 3  |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **pmtu-discovery-aging** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Aging out time of the learned path MTU  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>pmtu-discovery-aging</b> <i>number</i> |
| Tree        | <b>pmtu-discovery-aging</b>   |
| Description | This command configures the temporary public and private MTU expiration time. The temporary MTU is used for MTU propagation.  |
| Range       | 900 to 3600   |
| Units       | seconds   |
| Default     | 900   |
| Introduced  | 21.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **private-tcp-mss-adjust** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | TCP maximum segment size (MSS) adjustment   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>private-tcp-mss-adjust</b> <i>number</i> |
| Tree        | <b>private-tcp-mss-adjust</b>   |
| Description | This command specifies the TCP MSS to adjust for the tunnel on the private side.  |

When configured, the system may use the value to update the MSS option in the received TCP SYN packet on the private side.

|            |  |
|------------|--|
| Range      | 512 to 9000                                  |
| Units      | bytes  |
| Introduced | 19.7.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **propagate-pmtu-v4** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enable propagation of the path MTU to IPv4 hosts  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>propagate-pmtu-v4</b> <i>boolean</i> |
| Tree        | <b>propagate-pmtu-v4</b>  |
| Description | When configured to <b>true</b> , the system propagates the path MTU learned from the public side to the private side (IPv4 hosts).  |
| Default     | true  |
| Introduced  | 21.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **propagate-pmtu-v6** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Enable propagation of the path MTU to IPv6 hosts  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>propagate-pmtu-v6</b> <i>boolean</i> |
| Tree        | <b>propagate-pmtu-v6</b>  |
| Description | When configured to <b>true</b> , the system propagates the path MTU learned from the public side to the private side (IPv6 hosts).  |
| Default     | true  |
| Introduced  | 21.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**public-tcp-mss-adjust** (*number* | *keyword*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | TCP maximum segment size (MSS) on the public network  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>public-tcp-mss-adjust</b> ( <i>number</i>   <i>keyword</i> )         |
| Tree        | <b>public-tcp-mss-adjust</b>  |
| Description | This command configures the MSS for the TCP traffic in an IPsec tunnel that is sent from the public network to the private network. The system may use this value to adjust or insert the MSS option in the TCP SYN packet. |
| Range       | 512 to 9000   |
| Units       | bytes   |
| Options     | auto  |
| Introduced  | 19.7.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**replay-window** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Anti-replay window size  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>replay-window</b> <i>number</i> |
| Tree        | <b>replay-window</b>   |
| Description | This command specifies the size of an IPsec anti-replay window. If unconfigured, IPsec anti-replay is disabled.  |
| Range       | 32   64   128   256   512  |
| Units       | packets  |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## security-policy

### WARNING:

## strict-match *boolean*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Enable strict match of the security policy entry   |
| Context     | <b>configure service vpn</b> <i>string</i> <b>interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>ipsec-tunnel</b> <i>string</i> <b>security-policy strict-match</b> <i>boolean</i>  |
| Tree        | <b>strict-match</b>  |
| Description | When configured to <b>true</b> , this command enables strict match of the security policy entry.<br>When a CREATE_CHILD exchange request is received for a static IPsec tunnel, and this request is not a rekey request, ISA matches the received TSi and TSr with the |

configured security policy. This can be a match only when a received TS (in TSi or TSr) address range matches exactly with the subnet in a security policy entry.

If there is no match, the setup fails, and TS\_UNACCEPTABLE is sent.

If there is a match, but there is an existing CHILD\_SA for the matched security policy, the setup fails, and NO\_PROPOSAL\_CHOSEN is sent.

If there is a match, and there is not a CHILD\_SA for the matched entry, the subnet is sent in the matched security policy entry as TSi and TSr, and the CHILD\_SA is created.

|            |  |
|------------|--|
| Default    | false  |
| Introduced | 19.7.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## tunnel-endpoint

### WARNING:

 Reference **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-profile](#) *string*  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **bfd**

Synopsis Enter the **bfd** context  
 Context **configure** [service](#) [vprn](#) *string* [interface](#) *string* [spoke-sdp](#) *string* [bfd](#)  
 Tree [bfd](#)  
 Introduced 21.2.R1  
 Platforms All

### **bfd-liveness**

Synopsis Enable the **bfd-liveness** context  
 Context **configure** [service](#) [vprn](#) *string* [interface](#) *string* [spoke-sdp](#) *string* [bfd](#) [bfd-liveness](#)  
 Tree [bfd-liveness](#)

|            |         |
|------------|---------|
| Introduced | 21.2.R1 |
| Platforms  | All     |

### **encap** *keyword*

|            |  |
|------------|--|
| Synopsis   | BFD encapsulation used on the SDP binding  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">bfd bfd-liveness</a> <b>encap</b> <i>keyword</i> |
| Tree       | <a href="#">encap</a>  |
| Options    | ipv4   |
| Default    | ipv4   |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **bfd-template** *reference*

|             |   |
|-------------|---|
| Synopsis    | BFD template associated with the SDP binding  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">bfd bfd-template</a> <i>reference</i>   |
| Tree        | <a href="#">bfd-template</a>  |
| Description | This command configures a named BFD template to be used by VCCV BFD on PWs belonging to the VLL service. The template specifies parameters, such as the minimum transmit and receive control packet timer intervals, used by the BFD session. Template parameters are configured under the <b>configure router bfd</b> context. |
| Reference   | <b>configure</b> <a href="#">bfd bfd-template</a> <i>string</i>   |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

### **failure-action** *keyword*

|             |   |
|-------------|---|
| Synopsis    | VCCV BFD action taken on the SDP binding  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">bfd failure-action</a> <i>keyword</i>   |
| Tree        | <a href="#">failure-action</a>  |
| Description | This command configures a named BFD template to be used by VCCV BFD on PWs belonging to the VLL service. The template specifies parameters, such as the minimum transmit and receive control packet timer intervals, used by the BFD session. Template parameters are configured under the <b>configure router bfd</b> context. |

|            |            |
|------------|------------|
| Options    | none, down |
| Default    | none       |
| Introduced | 21.2.R1    |
| Platforms  | All        |

### **wait-for-up-timer** *number*

|             |  |
|-------------|--|
| Synopsis    | Time waited for BFD up status  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>bfd</b> <b>wait-for-up-timer</b> <i>number</i>  |
| Tree        | <b>wait-for-up-timer</b>   |
| Description | This command configures the time interval that is used to wait for a BFD session to come up.<br><br>This command is triggered when a spoke-SDP is first administratively enabled and a VCCV BFD session transitions from up to down. The command is required to allow time for BFD sessions to come up, and for BFD to settle before selecting the active spoke-SDP for use in a redundant set. In the case where a VCCV BFD session is bouncing, the timer prevents excessive flapping of the operational state of a spoke-SDP. |
| Range       | 1 to 60  |
| Units       | seconds  |
| Introduced  | 21.2.R1  |
| Platforms   | All  |

### **collect-stats** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow agent to collect accounting statistics  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>collect-stats</b> <i>boolean</i> |
| Tree       | <b>collect-stats</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **control-word** *boolean*

|          |  |
|----------|--|
| Synopsis | Use the control word as preferred  |
| Context  | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>control-word</b> <i>boolean</i> |
| Tree     | <b>control-word</b>  |

|            |  |
|------------|--|
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## cpu-protection

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cpu-protection</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">spoke-sdp string</a> <a href="#">cpu-protection</a> |
| Tree       | <a href="#">cpu-protection</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

## eth-cfm-monitoring

|            |  |
|------------|--|
| Synopsis   | Enable the <b>eth-cfm-monitoring</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">spoke-sdp string</a> <a href="#">cpu-protection</a> <a href="#">eth-cfm-monitoring</a> |
| Tree       | <a href="#">eth-cfm-monitoring</a>   |
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> , <b>ip-src-monitoring</b> , or <b>mac-monitoring</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

## aggregate

|            |  |
|------------|--|
| Synopsis   | Apply rate limit to the sum of the per peer packet rates   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">spoke-sdp string</a> <a href="#">cpu-protection</a> <a href="#">eth-cfm-monitoring</a> <a href="#">aggregate</a> |
| Tree       | <a href="#">aggregate</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

## car

|          |   |
|----------|---|
| Synopsis | Ignore Ethernet CFM packets when enforcing overall rate |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">cpu-protection eth-cfm-monitoring</a> <i>car</i> |
| Tree       | <a href="#">car</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

## ip-src-monitoring

|            |  |
|------------|--|
| Synopsis   | Enable IP source monitoring for CPU protection   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">cpu-protection ip-src-monitoring</a> |
| Tree       | <a href="#">ip-src-monitoring</a>  |
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> , <b>ip-src-monitoring</b> , or <b>mac-monitoring</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS  |

## mac-monitoring

|            |   |
|------------|---|
| Synopsis   | Monitor MAC for CPU protection  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">cpu-protection mac-monitoring</a> |
| Tree       | <a href="#">mac-monitoring</a>  |
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> , <b>ip-src-monitoring</b> , or <b>mac-monitoring</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

## policy-id *reference*

|            |   |
|------------|---|
| Synopsis   | CPM protection policy   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">cpu-protection policy-id</a> <i>reference</i> |
| Tree       | <a href="#">policy-id</a>   |
| Reference  | <b>configure</b> <a href="#">system security</a> <a href="#">cpu-protection</a> <a href="#">policy</a> <i>number</i>  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

|                |   |
|----------------|---|
| Synopsis       | Forwarding class name for profile-aware counter   |
| Context        | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>eth-cfm collect-lmm-fc-stats</b> <b>fc-in-profile</b> <i>keyword</i>   |
| Tree           | <b>fc-in-profile</b>  |
| Description    | <p>This command configures individual counters for the specified FCs with regard to profile. The system includes all countable packets that match a configured FC and that are deemed to be in-profile in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-unaware FC using the <b>fc</b> command under the <b>collect-lmm-fc-stats</b> context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options        | be, l2, af, l1, h2, ef, h1, nc  |
| Max. Instances | 8   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**collect-lmm-stats** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Collect statistics for loss measurement message tests  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">collect-lmm-stats</a> <i>boolean</i>   |
| Tree        | <a href="#">collect-lmm-stats</a>  |
| Description | <p>When configured to <b>true</b>, the router instantiates the statistical counter to transmit and receive packets for the LAG facility MEP bindings.</p> <p>The <b>show eth-cfm collect-lmm-stats</b> command displays entities that have been enabled to collect transit and receive counters.</p> <p>When configured to <b>false</b>, the router does not instantiate the counter and the LMM PDU associated with the MEP does not populate the counters in the packet.</p> |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**mep** [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mep</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> |
| Tree       | <a href="#">mep</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**md-admin-name** *reference*

|            |  |
|------------|--|
| Synopsis   | Maintenance Domain (MD) name   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> |
| Tree       | <a href="#">mep</a>  |
| Reference  | <b>configure</b> <a href="#">eth-cfm</a> <a href="#">domain</a> <i>string</i>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ma-admin-name** *reference*

|            |  |
|------------|--|
| Synopsis   | Maintenance Association (MA) name  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">spoke-sdp string</a> <a href="#">eth-cfm mep md-admin-name reference</a> <a href="#">ma-admin-name reference</a> <a href="#">mep-id number</a> |
| Tree       | <a href="#">mep</a>  |
| Reference  | <b>configure</b> <a href="#">eth-cfm domain string</a> <a href="#">association string</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**mep-id** *number*

|            |  |
|------------|--|
| Synopsis   | Maintenance Endpoint (MEP) ID  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">spoke-sdp string</a> <a href="#">eth-cfm mep md-admin-name reference</a> <a href="#">ma-admin-name reference</a> <a href="#">mep-id number</a> |
| Tree       | <a href="#">mep</a>  |
| Range      | 1 to 8191  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the MEP  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">spoke-sdp string</a> <a href="#">eth-cfm mep md-admin-name reference</a> <a href="#">ma-admin-name reference</a> <a href="#">mep-id number</a> <a href="#">admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ais** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable the generation and the reception of AIS messages |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ais</a> <i>boolean</i> |
| Tree       | <a href="#">ais</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## alarm-notification

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>alarm-notification</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">alarm-notification</a> |
| Tree        | <a href="#">alarm-notification</a>  |
| Description | <p>Commands in this context configure the Fault Notification Generator (FNG) time values to raise an alarm or reset the CCM defect alarm.</p> <p>Use these timers for network management processes. The timers are not tied into delaying the notification to the fault management system on the network element and do not affect fault propagation mechanisms.</p>          |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## fng-alarm-time *number*

|            |  |
|------------|--|
| Synopsis   | Time that must expire before an FNG alarm is raised  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">alarm-notification</a> <a href="#">fng-alarm-time</a> <i>number</i> |
| Tree       | <a href="#">fng-alarm-time</a>   |
| Range      | 250   500   1000   |
| Units      | centiseconds   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## fng-reset-time *number*

|          |  |
|----------|--|
| Synopsis | Time that must expire before an FNG alarm is reset |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">alarm-notification fng-reset-time</a> <i>number</i> |
| Tree       | <a href="#">fng-reset-time</a>   |
| Range      | 250   500   1000   |
| Units      | centiseconds   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ccm boolean**

|            |   |
|------------|---|
| Synopsis   | Generate CCM messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ccm</a> <i>boolean</i> |
| Tree       | <a href="#">ccm</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**ccm-ltm-priority number**

|            |   |
|------------|---|
| Synopsis   | Priority of CCM and LTM messages transmitted by the MEP   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ccm-ltm-priority</a> <i>number</i> |
| Tree       | <a href="#">ccm-ltm-priority</a>  |
| Range      | 0 to 7  |
| Default    | 7   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**ccm-padding-size number**

|          |   |
|----------|---|
| Synopsis | Number of octets of padding to insert in CCM packets  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ccm-padding-size</a> <i>number</i> |
| Tree     | <a href="#">ccm-padding-size</a>  |

|             |   |
|-------------|---|
| Description | This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.<br><br>This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through <b>configure eth-cfm domain association ccm-interval</b> ) is less than 1 second. |
| Range       | 3 to 1500   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**csf**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>csf</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>csf</b> |
| Tree       | <b>csf</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**multiplier** *decimal-number*

|            |   |
|------------|---|
| Synopsis   | Multiplication factor used to clear the CSF condition   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>csf multiplier</b> <i>decimal-number</i> |
| Tree       | <b>multiplier</b>   |
| Range      | 0.0   2.0 to 30.0   |
| Default    | 3.5   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**description** *string*

|          |  |
|----------|--|
| Synopsis | Text description   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>description</b> <i>string</i> |
| Tree     | <b>description</b>   |

|               |  |
|---------------|--|
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## eth-test

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>eth-test</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>eth-test</b> |
| Tree        | <a href="#">eth-test</a>   |
| Description | Commands in this context configure information used by the Ethernet Test (ETH-TST) packet. The commands must be configured on both the sender and the receiver nodes. The test packets are used with the <b>oam eth-cfm eth-test</b> command.  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## bit-error-threshold *number*

|            |  |
|------------|--|
| Synopsis   | Lowest priority defect allowed to generate fault alarm   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test</a> <b>bit-error-threshold</b> <i>number</i> |
| Tree       | <a href="#">bit-error-threshold</a>  |
| Range      | 0 to 11840   |
| Units      | bit errors   |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## test-pattern

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>test-pattern</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test</a> <b>test-pattern</b> |
| Tree        | <a href="#">test-pattern</a>  |
| Description | Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver.  |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

**crc-tlv** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate a CRC checksum  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test test-pattern</a> <b>crc-tlv</b> <i>boolean</i> |
| Tree       | <a href="#">crc-tlv</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**pattern** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Test pattern for Ethernet Test frames  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test test-pattern</a> <b>pattern</b> <i>keyword</i> |
| Tree        | <a href="#">pattern</a>  |
| Description | This command specifies the test pattern of the Ethernet Test (ETH-TST) frames. This does not have to be configured the same on the sender and the receiver.  |
| Options     | all-zeros, all-ones  |
| Default     | all-zeros  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**fault-propagation** *keyword*

|            |  |
|------------|--|
| Synopsis   | Fault propagation for the MEP  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>fault-propagation</b> <i>keyword</i> |
| Tree       | <a href="#">fault-propagation</a>  |
| Options    | use-if-status-tlv, suspend-ccm   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## grace

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>grace</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> |
| Tree        | <a href="#">grace</a>  |
| Description | Commands in this context configure the Nokia ETH-CFM Grace function and the ITU-T Y.1731 Ethernet Expected Default (ETH-ED) function.  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## eth-ed

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>eth-ed</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a> |
| Tree        | <a href="#">eth-ed</a>  |
| Description | Commands in this context configure the ITU-T Y.1731 ETH-ED function.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## max-rx-defect-window *number*

|            |  |
|------------|--|
| Synopsis   | Maximum received ETH-ED expected defect window duration  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">max-rx-defect-window</a> <i>number</i> |

| Tree     | <a href="#">eth-vsm-grace</a>  |

|             |  |
|-------------|--|
| Description | Commands in this context configure the Nokia ETH-CFM Grace function. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS         |

### **rx-eth-vsm-grace** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Receive and process Nokia ETH-CFM Grace PDU on the MEP   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-vsm-grace</a> <a href="#">rx-eth-vsm-grace</a> <i>boolean</i> |
| Tree        | <a href="#">rx-eth-vsm-grace</a>   |
| Description | When configured to <b>true</b> , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>When configured to <b>false</b> , the router disables the Nokia Grace function.  |
| Default     | true   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **tx-eth-vsm-grace** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Transmit ETH-ED PDUs from the MEP  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-vsm-grace</a> <a href="#">tx-eth-vsm-grace</a> <i>boolean</i>   |
| Tree        | <a href="#">tx-eth-vsm-grace</a>   |
| Description | When configured to <b>true</b> , the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.<br><br>The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>The operator must configure the <b>configure system eth-cfm grace</b> command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).<br><br>When configured to <b>false</b> , the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP. |
| Default     | true   |
| Introduced  | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **low-priority-defect** *keyword*

Synopsis Lowest priority defect allowed to generate fault alarm

Context **configure** [service vprn](#) *string* [interface](#) *string* [spoke-sdp](#) *string* [eth-cfm mep md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* **low-priority-defect** *keyword*

Tree [low-priority-defect](#)

Options all-def, mac-rem-err-xcon, rem-err-xcon, err-xcon, xcon, no-xcon

Default mac-rem-err-xcon

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **one-way-delay-threshold** *number*

Synopsis Threshold time limit for the one-way delay test

Context **configure** [service vprn](#) *string* [interface](#) *string* [spoke-sdp](#) *string* [eth-cfm mep md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* **one-way-delay-threshold** *number*

Tree [one-way-delay-threshold](#)

Range 0 to 600

Units seconds

Default 3

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **squelch-ingress-levels** *number*

Synopsis Levels for which ETH-CFM packets are silently discarded

Context **configure** [service vprn](#) *string* [interface](#) *string* [spoke-sdp](#) *string* [eth-cfm squelch-ingress-levels](#) *number*

Tree [squelch-ingress-levels](#)

Description This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.

The list of levels must be a complete contiguous list from 0 up to the highest level that will be dropped.

|                |  |
|----------------|--|
| Range          | 0 to 7   |
| Max. Instances | 8  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## hash-label

|            |   |
|------------|---|
| Synopsis   | Enable the <b>hash-label</b> context  |

| Tree       | <a href="#">arp</a>   |
| Introduced | 19.10.R1  |
| Platforms  | All   |

## advertise [[route-type](#)] *keyword*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>advertise</b> list instance   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>vpls</b> <i>string</i> <b>evpn</b> <b>arp</b> <b>advertise</b> <i>keyword</i>  |
| Tree        | <a href="#">advertise</a>  |
| Description | Commands in this context specify the configuration to allow ARP or ND entries that are installed in the ARP or ND cache to be advertised in EVPN MAC/IP routes.<br><br>The <b>learn-dynamic</b> command must be set to <b>false</b> when using this functionality. |
| Introduced  | 19.10.R1   |
| Platforms   | All  |

**[route-type] keyword**

|             |  |
|-------------|--|
| Synopsis    | Type of ARP or ND entries that generate host routes  |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">vpls string</a> <a href="#">evpn arp advertise keyword</a> |
| Tree        | <a href="#">advertise</a>  |
| Description | This command specifies the type of ARP or ND entries that are installed in the ARP or ND cache into EVPN MAC/IP routes.                                      |
| Options     | static, dynamic  |
| Notes       | This element is part of a list key.  |
| Introduced  | 19.10.R1   |
| Platforms   | All  |

**route-tag number****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Tag value used with the host route from an ARP/ND entry   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">vpls string</a> <a href="#">evpn arp advertise keyword</a><br><a href="#">route-tag number</a>  |
| Tree        | <a href="#">route-tag</a>   |
| Description | This command specifies the route tag that is added separately to dynamic or static ARP or ND entries that are advertised in EVPN MAC/IP routes. This tag can be matched on BGP vsi-export (in the R-VPLS) and BGP peer export policies. |
| Range       | 0 to 255  |
| Introduced  | 19.10.R1  |
| Platforms   | All   |

**flood-garp-and-unknown-req boolean**

|             |   |
|-------------|---|
| Synopsis    | Allow CPM originated ARP frames to flood R-VPLS service   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">interface string</a> <a href="#">vpls string</a> <a href="#">evpn arp flood-garp-and-unknown-req boolean</a>   |
| Tree        | <a href="#">flood-garp-and-unknown-req</a>  |
| Description | When configured to <b>true</b> , the system allows CPM-originated ARP frames to be flooded in the R-VPLS service. Any frames that are data path flooded such as the ARP messages received on a SAP, are flooded irrespective of this command. |

When configured to **false**, CPM-originated ARP flooding is suppressed.

|            |          |
|------------|----------|
| Default    | true     |
| Introduced | 19.10.R1 |
| Platforms  | All      |

### **learn-dynamic** *boolean*

|            |   |
|------------|---|
| Synopsis   | Process ARP or ND messages on EVPN tunnels  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">vpls</a> <i>string</i> <a href="#">evpn arp</a> <b>learn-dynamic</b> <i>boolean</i> |

| Tree        | <a href="#">advertise</a>  |
| Description | Commands in this context specify the configuration to allow ARP or ND entries that are installed in the ARP or ND cache to be advertised in EVPN MAC/IP routes.<br>The <b>learn-dynamic</b> command must be set to <b>false</b> when using this functionality. |
| Introduced  | 20.5.R1  |
| Platforms   | All  |

### [[route-type](#)] *keyword*

|          |   |
|----------|---|
| Synopsis | Type of ARP or ND entries that generate host routes |
|----------|---|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>vpls</b> <i>string</i> <b>evpn nd advertise</b> <i>keyword</i> |
| Tree        | <b>advertise</b>   |
| Description | This command specifies the type of ARP or ND entries that are installed in the ARP or ND cache into EVPN MAC/IP routes.                      |
| Options     | static, dynamic  |
| Notes       | This element is part of a list key.  |
| Introduced  | 20.5.R1  |
| Platforms   | All  |

### **route-tag** *number*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Tag value used with the host route from an ARP/ND entry   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>vpls</b> <i>string</i> <b>evpn nd advertise</b> <i>keyword</i> <b>route-tag</b> <i>number</i>   |
| Tree        | <b>route-tag</b>  |
| Description | This command specifies the route tag that is added separately to dynamic or static ARP or ND entries that are advertised in EVPN MAC/IP routes. This tag can be matched on BGP vsi-export (in the R-VPLS) and BGP peer export policies. |
| Range       | 0 to 255  |
| Introduced  | 20.5.R1   |
| Platforms   | All   |

### **learn-dynamic** *boolean*

|            |  |
|------------|--|
| Synopsis   | Process ARP or ND messages on EVPN tunnels   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>interface</b> <i>string</i> <b>vpls</b> <i>string</i> <b>evpn nd learn-dynamic</b> <i>boolean</i> |
| Tree       | <b>learn-dynamic</b>   |
| Default    | true   |
| Introduced | 20.5.R1  |
| Platforms  | All  |

## evpn-tunnel

|            |  |
|------------|--|
| Synopsis   | Enable the <b>evpn-tunnel</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">vpls</a> <i>string</i> <a href="#">evpn-tunnel</a> |
| Tree       | <a href="#">evpn-tunnel</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## allow-bfd *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow BFD on the EVPN tunnel  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">vpls</a> <i>string</i> <a href="#">evpn-tunnel</a> <a href="#">allow-bfd</a> <i>boolean</i> |
| Tree       | <a href="#">allow-bfd</a>   |
| Default    | false   |
| Introduced | 22.5.R1   |
| Platforms  | All   |

## ipv6-gateway-address *keyword*

|            |  |
|------------|--|
| Synopsis   | Type of IPv6 gateway address   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">vpls</a> <i>string</i> <a href="#">evpn-tunnel</a> <a href="#">ipv6-gateway-address</a> <i>keyword</i> |
| Tree       | <a href="#">ipv6-gateway-address</a>   |
| Options    | ip, mac  |
| Default    | ip   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

## supplementary-broadcast-domain *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use the EVPN tunnel as a Supplementary Broadcast Domain   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">vpls</a> <i>string</i> <a href="#">evpn-tunnel</a> <a href="#">supplementary-broadcast-domain</a> <i>boolean</i>  |
| Tree        | <a href="#">supplementary-broadcast-domain</a>  |
| Description | When configured to <b>true</b> , this command allows the EVPN tunnel to be used as a Supplementary Broadcast Domain (SBD). The SBD is used in EVPN OISM to advertise the SMET routes and to receive the multicast traffic on egress PEs that are not attached to the source R-VPLS service. |

When configured to **false**, this command disables EVPN tunnel use as an SBD.

|            |          |
|------------|----------|
| Default    | false    |
| Introduced | 19.10.R1 |
| Platforms  | All      |

## ingress

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ingress</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">vpls</a> <i>string</i> <a href="#">ingress</a> |
| Tree       | <a href="#">ingress</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## routed-override-filter

|------------|---|
| Synopsis   | Enter the <b>security-policy</b> list instance  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>ipsec security-policy</b> <i>number</i> |
| Tree       | <b>security-policy</b>  |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**[id] number**

|          |   |
|----------|---|
| Synopsis | IPsec security policy ID  |
| Context  | <b>configure service vpn</b> <i>string</i> <b>ipsec security-policy</b> <i>number</i> |
| Tree     | <b>security-policy</b>  |
| Range    | 1 to 32768  |
| Notes    | This element is part of a list key.   |

|            |  |
|------------|--|
| Introduced | 19.7.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **entry** [**entry-id**] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>entry</b> list instance   |
| Context    | <b>configure service vpn</b> <i>string ipsec security-policy number entry number</i> |
| Tree       | <b>entry</b>   |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **[entry-id]** *number*

|            |  |
|------------|--|
| Synopsis   | IPsec security policy entry ID   |
| Context    | <b>configure service vpn</b> <i>string ipsec security-policy number entry number</i> |
| Tree       | <b>entry</b>   |
| Range      | 1 to 16  |
| Notes      | This element is part of a list key.  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **local-ip**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>local-ip</b> context  |
| Context     | <b>configure service vpn</b> <i>string ipsec security-policy number entry number local-ip</i>  |
| Tree        | <b>local-ip</b>  |
| Description | <p>Commands in this context configure the local (from the VPN) IPv4 prefix/mask for the policy entry.</p> <p>The system evaluates the local IP as the source IP when traffic is examined in the direction of the flows from private to public and as the destination IP when traffic flows from public to private.</p> |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**address string**

|            |   |
|------------|---|
| Synopsis   | Destination IPv4 address of the aggregate route   |
| Context    | <b>configure service vpn string ipsec security-policy number entry number local-ip address string</b> |
| Tree       | <b>address</b>  |
| Notes      | The following elements are part of a choice: <b>address</b> or <b>any</b> .                           |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**any boolean**

|            |  |
|------------|--|
| Synopsis   | Use any IP address   |
| Context    | <b>configure service vpn string ipsec security-policy number entry number local-ip any boolean</b> |
| Tree       | <b>any</b>   |
| Default    | false  |
| Notes      | The following elements are part of a choice: <b>address</b> or <b>any</b> .                        |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**local-ipv6**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>local-ipv6</b> context  |
| Context     | <b>configure service vpn string ipsec security-policy number entry number local-ipv6</b>   |
| Tree        | <b>local-ipv6</b>  |
| Description | <p>Commands in this context configure the local (from the VPN) IPv6 prefix/mask for the policy entry.</p> <p>The system evaluates the local IP as the source IP when traffic is examined in the direction of the flows from private to public and as the destination IP when traffic flows from public to private.</p> |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**address string**

|          |   |
|----------|---|
| Synopsis | Destination IPv6 address of the aggregate route |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vpn</b> <i>string</i> <b>ipsec security-policy</b> <i>number</i> <b>entry</b> <i>number</i> <b>local-ipv6 address</b> <i>string</i> |
| Tree       | <b>address</b>   |
| Notes      | The following elements are part of a choice: <b>address</b> or <b>any</b> .  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **any** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use any IP address  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>ipsec security-policy</b> <i>number</i> <b>entry</b> <i>number</i> <b>local-ipv6 any</b> <i>boolean</i> |
| Tree       | <b>any</b>  |
| Default    | false   |
| Notes      | The following elements are part of a choice: <b>address</b> or <b>any</b> .   |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **remote-ip**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>remote-ip</b> context   |
| Context     | <b>configure service vpn</b> <i>string</i> <b>ipsec security-policy</b> <i>number</i> <b>entry</b> <i>number</i> <b>remote-ip</b>  |
| Tree        | <b>remote-ip</b>   |
| Description | <p>Commands in this context configure the remote (from the tunnel) IP prefix/mask for the policy entry.</p> <p>The system evaluates the remote IP as the source IP when traffic flows public to private and as the destination IP when traffic flows from private to public.</p> |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **address** *string*

|          |   |
|----------|---|
| Synopsis | Destination IPv4 address of the aggregate route   |
| Context  | <b>configure service vpn</b> <i>string</i> <b>ipsec security-policy</b> <i>number</i> <b>entry</b> <i>number</i> <b>remote-ip address</b> <i>string</i> |
| Tree     | <b>address</b>  |

|            |   |
|------------|---|
| Notes      | The following elements are part of a choice: <b>address</b> or <b>any</b> . |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                |

### **any** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use any IP address  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>ipsec</b> <b>security-policy</b> <i>number</i> <b>entry</b> <i>number</i> <b>remote-ip</b> <b>any</b> <i>boolean</i> |
| Tree       | <b>any</b>  |
| Default    | false   |
| Notes      | The following elements are part of a choice: <b>address</b> or <b>any</b> .   |
| Introduced | 19.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **remote-ipv6**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>remote-ipv6</b> context   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>ipsec</b> <b>security-policy</b> <i>number</i> <b>entry</b> <i>number</i> <b>remote-ipv6</b>  |
| Tree        | <b>remote-ipv6</b>   |
| Description | Commands in this context configure the remote (from the tunnel) IPv6 prefix/mask for the policy entry.<br><br>The system evaluates the remote IP as the source IP when traffic flows from public to private and as the destination IP when traffic flows from private to public. |
| Introduced  | 19.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **address** *string*

|            |  |
|------------|--|
| Synopsis   | Destination IPv6 address of the aggregate route  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>ipsec</b> <b>security-policy</b> <i>number</i> <b>entry</b> <i>number</i> <b>remote-ipv6</b> <b>address</b> <i>string</i> |
| Tree       | <b>address</b>   |
| Notes      | The following elements are part of a choice: <b>address</b> or <b>any</b> .  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**any** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use any IP address   |
| Context    | <b>configure</b> <a href="#">service vprn string ipsec security-policy number entry number remote-ipv6 any boolean</a> |
| Tree       | <a href="#">any</a>  |
| Default    | false  |
| Notes      | The following elements are part of a choice: <b>address</b> or <b>any</b> .  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**ipv6**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv6</b> context                             |
| Context    | <b>configure</b> <a href="#">service vprn string ipv6</a> |
| Tree       | <a href="#">ipv6</a>                                      |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**neighbor-discovery**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>neighbor-discovery</b> context                                  |
| Context    | <b>configure</b> <a href="#">service vprn string ipv6 neighbor-discovery</a> |
| Tree       | <a href="#">neighbor-discovery</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**reachable-time** *number*

|            |  |
|------------|--|
| Synopsis   | Neighbor reachability detection timer  |
| Context    | <b>configure</b> <a href="#">service vprn string ipv6 neighbor-discovery reachable-time number</a> |
| Tree       | <a href="#">reachable-time</a>   |
| Range      | 30 to 3600   |
| Default    | 30   |
| Introduced | 16.0.R1  |

Platforms All

### **stale-time** *number*

Synopsis Neighbor discovery cache entry stale time

Context **configure** [service vprn](#) *string* [ipv6 neighbor-discovery](#) **stale-time** *number*

Tree [stale-time](#)

Range 60 to 65535

Default 14400

Introduced 16.0.R1

Platforms All

### **router-advertisement**

Synopsis Enter the **router-advertisement** context

Context **configure** [service vprn](#) *string* [ipv6 router-advertisement](#)

Tree [router-advertisement](#)

Introduced 16.0.R1

Platforms All

### **dns-options**

Synopsis Enable the **dns-options** context

Context **configure** [service vprn](#) *string* [ipv6 router-advertisement dns-options](#)

Tree [dns-options](#)

Introduced 16.0.R1

Platforms All

### **rdnss-lifetime** (*keyword* | *number*)

Synopsis Maximum time over which the RDNSS address is valid

Context **configure** [service vprn](#) *string* [ipv6 router-advertisement dns-options](#) **rdnss-lifetime** (*keyword* | *number*)

Tree [rdnss-lifetime](#)

Description This command specifies the maximum time that the RDNSS address is used for name resolution by the client.

|            |               |
|------------|---------------|
| Range      | 0   4 to 3600 |
| Units      | seconds       |
| Options    | infinite      |
| Default    | infinite      |
| Introduced | 16.0.R1       |
| Platforms  | All           |

### **server** *string*

|                |  |
|----------------|--|
| Synopsis       | RAs that are forwarded to IPv6 DNS servers   |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ipv6 router-advertisement dns-options server</a> <i>string</i> |
| Tree           | <a href="#">server</a>   |
| Max. Instances | 4  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **interface** [[ip-int-name](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>interface</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ipv6 router-advertisement interface</a> <i>reference</i> |
| Tree       | <a href="#">interface</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **[ip-int-name]** *reference*

|            |  |
|------------|--|
| Synopsis   | VPRN interface name  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ipv6 router-advertisement interface</a> <i>reference</i> |
| Tree       | <a href="#">interface</a>  |
| Reference  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i>                              |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of router advertisement  |
| Context    | <b>configure</b> <a href="#">service vprn string ipv6 router-advertisement interface reference</a> <b>admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**current-hop-limit** *number*

|            |  |
|------------|--|
| Synopsis   | Hop limit advertised in RA messages  |
| Context    | <b>configure</b> <a href="#">service vprn string ipv6 router-advertisement interface reference</a> <b>current-hop-limit number</b> |
| Tree       | <a href="#">current-hop-limit</a>  |
| Range      | 0 to 255   |
| Default    | 64   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**dns-options**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>dns-options</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string ipv6 router-advertisement interface reference</a> <b>dns-options</b> |
| Tree       | <a href="#">dns-options</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**include-rdnss** *boolean*

|          |   |
|----------|---|
| Synopsis | Include the RDNSS option in the RA  |
| Context  | <b>configure</b> <a href="#">service vprn string ipv6 router-advertisement interface reference</a> <b>dns-options include-rdnss boolean</b> |
| Tree     | <a href="#">include-rdnss</a>   |

|            |         |
|------------|---------|
| Default    | true    |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **rdnss-lifetime** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Maximum time over which the RDNSS address 25 is valid  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>ipv6 router-advertisement interface</b> <i>reference</i> <b>dns-options rdnss-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">rdnss-lifetime</a>   |
| Range      | 0   4 to 3600  |
| Units      | seconds  |
| Options    | infinite   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **server** *string*

|                |   |
|----------------|---|
| Synopsis       | RAs that are forwarded to IPv6 DNS servers  |
| Context        | <b>configure service vprn</b> <i>string</i> <b>ipv6 router-advertisement interface</b> <i>reference</i> <b>dns-options server</b> <i>string</i> |
| Tree           | <a href="#">server</a>  |
| Max. Instances | 4   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

### **managed-configuration** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set the managed address configuration flag  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>ipv6 router-advertisement interface</b> <i>reference</i> <b>managed-configuration</b> <i>boolean</i> |
| Tree       | <a href="#">managed-configuration</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |

---

Platforms All

### **max-advertisement-interval** *number*

Synopsis Maximum time between sending advertisement messages

Context **configure service vprn** *string* **ipv6 router-advertisement interface** *reference* **max-advertisement-interval** *number*

Tree [max-advertisement-interval](#)

Range 4 to 1800

Units seconds

Default 600

Introduced 16.0.R1

Platforms All

### **min-advertisement-interval** *number*

Synopsis Minimum interval between router advertisement messages

Context **configure service vprn** *string* **ipv6 router-advertisement interface** *reference* **min-advertisement-interval** *number*

Tree [min-advertisement-interval](#)

Range 3 to 1350

Units seconds

Default 200

Introduced 16.0.R1

Platforms All

### **mtu** *number*

Synopsis MTU for sending packets to the router

Context **configure service vprn** *string* **ipv6 router-advertisement interface** *reference* **mtu** *number*

Tree [mtu](#)

Range 1280 to 9800

Introduced 16.0.R1

Platforms All

**other-stateful-configuration** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set the other configuration flag   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ipv6 router-advertisement interface</a> <i>reference</i> <a href="#">other-stateful-configuration</a> <i>boolean</i> |

| Max. Instances | 254   |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

**[ipv6-prefix]** *string*

|            |   |
|------------|---|
| Synopsis   | IPv6 address prefix   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ipv6 router-advertisement interface</a> <i>reference</i> <a href="#">prefix</a> <i>string</i> |
| Tree       | <a href="#">prefix</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**autonomous** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set the autonomous flag value   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ipv6 router-advertisement interface</a> <i>reference</i> <a href="#">prefix</a> <i>string</i> <a href="#">autonomous</a> <i>boolean</i> |
| Tree       | <a href="#">autonomous</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |

Platforms All

### **on-link** *boolean*

Synopsis Use prefix for on-link determination

Context **configure service vprn** *string* **ipv6 router-advertisement interface reference prefix** *string*  
**on-link** *boolean*

Tree **on-link**

Default true

Introduced 16.0.R1

Platforms All

### **preferred-lifetime** (*keyword | number*)

Synopsis Remaining time that the prefix remains preferred

Context **configure service vprn** *string* **ipv6 router-advertisement interface reference prefix** *string*  
**preferred-lifetime** (*keyword | number*)

Tree **preferred-lifetime**

Range 0 to 4294967294

Units seconds

Options infinite

Default 604800

Introduced 16.0.R1

Platforms All

### **valid-lifetime** (*keyword | number*)

Synopsis Remaining time in which the prefix is still valid

Context **configure service vprn** *string* **ipv6 router-advertisement interface reference prefix** *string*  
**valid-lifetime** (*keyword | number*)

Tree **valid-lifetime**

Range 0 to 4294967294

Units seconds

Options infinite

Default 2592000

Introduced 16.0.R1

---

Platforms All

### **reachable-time** *number*

Synopsis Time the router is reachable by other hosts or nodes

Context **configure service vprn** *string* **ipv6 router-advertisement interface** *reference* **reachable-time** *number*

Tree [reachable-time](#)

Range 0 to 3600000

Units milliseconds

Default 0

Introduced 16.0.R1

Platforms All

### **retransmit-time** *number*

Synopsis Time to advertise neighbor advertisement messages

Context **configure service vprn** *string* **ipv6 router-advertisement interface** *reference* **retransmit-time** *number*

Tree [retransmit-time](#)

Range 0 to 1800000

Units milliseconds

Default 0

Introduced 16.0.R1

Platforms All

### **router-lifetime** *number*

Synopsis Lifetime value in neighbor advertisement messages

Context **configure service vprn** *string* **ipv6 router-advertisement interface** *reference* **router-lifetime** *number*

Tree [router-lifetime](#)

Range 0 | 4 to 9000

Units seconds

Default 1800

Introduced 16.0.R1

Platforms All

### **use-virtual-mac** *boolean*

Synopsis Use VRRP virtual MAC address for advertisement message

Context **configure** [service vprn](#) *string* [ipv6 router-advertisement interface reference](#) **use-virtual-mac** *boolean*

Tree [use-virtual-mac](#)

Default false

Introduced 16.0.R1

Platforms All

### **isis** [[isis-instance](#)] *number*

Synopsis Enter the **isis** list instance

Context **configure** [service vprn](#) *string* [isis](#) *number*

Tree [isis](#)

Introduced 16.0.R1

Platforms All

### **[isis-instance]** *number*

Synopsis Instance ID for the IS-IS instance

Context **configure** [service vprn](#) *string* [isis](#) *number*

Tree [isis](#)

Range 0 to 127

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the IS-IS instance

Context **configure** [service vprn](#) *string* [isis](#) *number* **admin-state** *keyword*

Tree [admin-state](#)

|            |                 |
|------------|-----------------|
| Options    | enable, disable |
| Default    | disable         |
| Introduced | 16.0.R1         |
| Platforms  | All             |

### **advertise-passive-only** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise prefixes that belong to passive interfaces   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <b>advertise-passive-only</b> <i>boolean</i> |
| Tree       | <a href="#">advertise-passive-only</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **advertise-router-capability** *keyword*

|            |   |
|------------|---|
| Synopsis   | Router capabilities advertisement to neighbors  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <b>advertise-router-capability</b> <i>keyword</i> |
| Tree       | <a href="#">advertise-router-capability</a>   |
| Options    | area, as  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **all-l1isis** *string*

|            |   |
|------------|---|
| Synopsis   | Destination MAC address for all L1 IS-IS routers  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <b>all-l1isis</b> <i>string</i> |
| Tree       | <a href="#">all-l1isis</a>  |
| Default    | 01:80:C2:00:00:14   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **all-l2isis** *string*

|          |  |
|----------|--|
| Synopsis | Destination MAC address for all L2 IS-IS routers |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service vprn string isis number all-l2isis string</b> |
| Tree       | <a href="#">all-l2isis</a>   |
| Default    | 01:80:C2:00:00:15  |

| Platforms  | All  |

### **area-address** *string*

|                |  |
|----------------|--|
| Synopsis       | Area address portion of the NSAP address                             |
| Context        | <b>configure service vprn string isis number area-address string</b> |
| Tree           | <a href="#">area-address</a>   |
| String Length  | 2 to 38  |
| Max. Instances | 3  |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **authentication-check** *boolean*

|            |   |
|------------|---|
| Synopsis   | Perform authentication check to reject mismatch PDUs                          |
| Context    | <b>configure service vprn string isis number authentication-check boolean</b> |
| Tree       | <a href="#">authentication-check</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **authentication-key** *string*

|               |  |
|---------------|--|
| Synopsis      | Authentication key to verify PDUs sent from neighbors                      |
| Context       | <b>configure service vprn string isis number authentication-key string</b> |
| Tree          | <a href="#">authentication-key</a>   |
| String Length | 1 to 366   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**authentication-keychain** *reference*

|            |  |
|------------|--|
| Synopsis   | Keychain used to sign and authenticate   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">authentication-keychain</a> <i>reference</i> |
| Tree       | <a href="#">authentication-keychain</a>  |
| Reference  | <b>configure</b> <a href="#">system security keychains</a> <a href="#">keychain</a> <i>string</i>  |
| Introduced | 16.0.R3  |
| Platforms  | All  |

**authentication-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Authentication type  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">authentication-type</a> <i>keyword</i> |
| Tree       | <a href="#">authentication-type</a>  |
| Options    | password, message-digest   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**csnp-authentication** *boolean*

|            |  |
|------------|--|
| Synopsis   | Authenticate individual IS-IS packets of the CSNP type   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">csnp-authentication</a> <i>boolean</i> |
| Tree       | <a href="#">csnp-authentication</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**default-route-tag** *number*

|            |   |
|------------|---|
| Synopsis   | Route tag for the default route   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">default-route-tag</a> <i>number</i> |
| Tree       | <a href="#">default-route-tag</a>   |
| Range      | 1 to 4294967295   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**export-limit**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>export-limit</b> context                        |
| Context    | <b>configure service vprn string isis number export-limit</b> |
| Tree       | <a href="#">export-limit</a>                                  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**log-percent number**

|            |  |
|------------|--|
| Synopsis   | Export limit before warning and SNMP notification sent                           |
| Context    | <b>configure service vprn string isis number export-limit log-percent number</b> |
| Tree       | <a href="#">log-percent</a>  |
| Range      | 1 to 100   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**number number**

|            |   |
|------------|---|
| Synopsis   | Maximum routes or prefixes exported from route table                        |
| Context    | <b>configure service vprn string isis number export-limit number number</b> |
| Tree       | <a href="#">number</a>  |
| Range      | 1 to 4294967295   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**export-policy reference**

|             |  |
|-------------|--|
| Synopsis    | Export policies that determine exported routes   |
| Context     | <b>configure service vprn string isis number export-policy reference</b>   |
| Tree        | <a href="#">export-policy</a>  |
| Description | <p>This command configures export routing policies for the routes exported from the routing table to IS-IS.</p> <p>If the export policy is undefined, the system does not export non IS-IS routes from the routing table manager to IS-IS.</p> |

If multiple policy names are specified, the policies are evaluated in the order they are specified. The first policy that matches is applied.

If the **aggregate** command is also configured in the **configure router** context, the aggregation is applied before the export policy is applied.

Routing policies are created in the **configure router policy-options** context.

|                |  |
|----------------|--|
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

## graceful-restart

|            |   |
|------------|---|
| Synopsis   | Enable the <b>graceful-restart</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">graceful-restart</a> |
| Tree       | <a href="#">graceful-restart</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## helper-mode *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable the Graceful Restart helper for IS-IS   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">graceful-restart</a> <a href="#">helper-mode</a> <i>boolean</i> |
| Tree       | <a href="#">helper-mode</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## hello-authentication *boolean*

|            |  |
|------------|--|
| Synopsis   | Authenticate Hello type IS-IS protocol packets   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">hello-authentication</a> <i>boolean</i> |
| Tree       | <a href="#">hello-authentication</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |

Platforms All

### **hello-padding** *keyword*

Synopsis IS-IS Hello message padding  
Context **configure service vprn** *string isis number hello-padding keyword*  
Tree [hello-padding](#)  
Options adaptive, loose, strict, none  
Introduced 16.0.R1  
Platforms All

### **ignore-attached-bit** *boolean*

Synopsis Ignore attached bit on received Layer 1 LSPs  
Context **configure service vprn** *string isis number ignore-attached-bit boolean*  
Tree [ignore-attached-bit](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **ignore-lsp-errors** *boolean*

Synopsis Ignore LSP packets with errors  
Context **configure service vprn** *string isis number ignore-lsp-errors boolean*  
Tree [ignore-lsp-errors](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **ignore-narrow-metric** *boolean*

Synopsis Ignore links with narrow metrics  
Context **configure service vprn** *string isis number ignore-narrow-metric boolean*  
Tree [ignore-narrow-metric](#)  
Default false

Introduced 16.0.R1  
 Platforms All

### **iid-tlv** *boolean*

Synopsis Use IID TLVs with IS-IS multi-instance  
 Context **configure** [service](#) [vpn](#) *string* [isis](#) *number* **iid-tlv** *boolean*  
 Tree [iid-tlv](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

### **import-policy** *reference*

Synopsis Import policy names for routes from IGP to route table  
 Context **configure** [service](#) [vpn](#) *string* [isis](#) *number* **import-policy** *reference*  
 Tree [import-policy](#)  
 Reference **configure** [policy-options](#) [policy-statement](#) *string*  
 Max. Instances 5  
 Notes This element is ordered by the user.  
 Introduced 16.0.R1  
 Platforms All

### **interface** [[interface-name](#)] *string*

Synopsis Enter the **interface** list instance  
 Context **configure** [service](#) [vpn](#) *string* [isis](#) *number* **interface** *string*  
 Tree [interface](#)  
 Introduced 16.0.R1  
 Platforms All

### **[interface-name]** *string*

Synopsis IP interface name

|               |   |
|---------------|---|
| Context       | <b>configure service vprn string isis number interface string</b> |
| Tree          | <b>interface</b>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.                               |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **admin-state keyword**

|            |   |
|------------|---|
| Synopsis   | Administrative state of the IS-IS interface   |
| Context    | <b>configure service vprn string isis number interface string admin-state keyword</b> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **bfd-liveness**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>bfd-liveness</b> context   |
| Context     | <b>configure service vprn string isis number interface string bfd-liveness</b>  |
| Tree        | <b>bfd-liveness</b>   |
| Description | Commands in this context enable the use of bidirectional forwarding (BFD) to control IPv4 and IPv6 adjacencies. Enabling BFD on an IPv4 or IPv6 protocol interface ties the protocol interface state to the BFD session state between the local and remote nodes. BFD must be enabled on the applicable IP interface. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **ipv4**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>ipv4</b> context  |
| Context    | <b>configure service vprn string isis number interface string bfd-liveness ipv4</b> |
| Tree       | <b>ipv4</b>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**include-bfd-tlv** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable IS-IS BFD TLVs on the interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">interface</a> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv4</a> <b>include-bfd-tlv</b> <i>boolean</i> |
| Tree       | <a href="#">include-bfd-tlv</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**ipv6**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>ipv6</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">interface</a> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv6</a> |
| Tree       | <a href="#">ipv6</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**include-bfd-tlv** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable IS-IS BFD TLVs on the interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">interface</a> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv6</a> <b>include-bfd-tlv</b> <i>boolean</i> |
| Tree       | <a href="#">include-bfd-tlv</a>  |

| Options    | password, message-digest  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **hello-padding** *keyword*

|            |   |
|------------|---|
| Synopsis   | Padding on IS-IS Hello packets  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">interface</a> <i>string</i> <b>hello-padding</b> <i>keyword</i> |
| Tree       | <a href="#">hello-padding</a>   |
| Options    | adaptive, loose, strict, none   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **interface-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Interface type to broadcast, point-to-point, or to be default  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">interface</a> <i>string</i> <b>interface-type</b> <i>keyword</i> |
| Tree       | <a href="#">interface-type</a>   |
| Options    | point-to-point, broadcast  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **ipv4-multicast** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable IPv4 multicast routing for the interface |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string isis number interface string ipv4-multicast boolean</i> |
| Tree       | <a href="#">ipv4-multicast</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ipv6-unicast** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable IPv6 unicast routing for the interface   |
| Context    | <b>configure service vprn</b> <i>string isis number interface string ipv6-unicast boolean</i> |
| Tree       | <a href="#">ipv6-unicast</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **level** [[level-number](#)] *keyword*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>level</b> list instance   |
| Context        | <b>configure service vprn</b> <i>string isis number interface string level keyword</i> |
| Tree           | <a href="#">level</a>  |
| Max. Instances | 2  |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **[level-number]** *keyword*

|            |  |
|------------|--|
| Synopsis   | ISIS protocol level number   |
| Context    | <b>configure service vprn</b> <i>string isis number interface string level keyword</i> |
| Tree       | <a href="#">level</a>  |
| Options    | 1, 2   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**hello-authentication-key *string***

|               |   |
|---------------|---|
| Synopsis      | Authentication key for Hello PDUs   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">interface</a> <i>string</i> <a href="#">level</a> <i>keyword</i> <a href="#">hello-authentication-key</a> <i>string</i>   |
| Tree          | <a href="#">hello-authentication-key</a>  |
| Description   | This command configures the authentication key (password) for Hello PDUs. Both the Hello authentication key and the Hello authentication type on a segment must match.<br><br>If both IS-IS and Hello authentication are configured, Hello messages are validated using Hello authentication. If only IS-IS authentication is configured, it is used to authenticate all IS-IS (including Hello) protocol PDUs. |
| String Length | 1 to 366  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**hello-authentication-keychain *reference***

|            |   |
|------------|---|
| Synopsis   | Authentication keychain to use for the session  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">interface</a> <i>string</i> <a href="#">level</a> <i>keyword</i> <a href="#">hello-authentication-keychain</a> <i>reference</i> |
| Tree       | <a href="#">hello-authentication-keychain</a>   |
| Reference  | <b>configure</b> <a href="#">system security keychains</a> <a href="#">keychain</a> <i>string</i>   |
| Introduced | 16.0.R3   |
| Platforms  | All   |

**hello-authentication-type *keyword***

|             |   |
|-------------|---|
| Synopsis    | Hello authentication enabled on the context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">interface</a> <i>string</i> <a href="#">level</a> <i>keyword</i> <a href="#">hello-authentication-type</a> <i>keyword</i>     |
| Tree        | <a href="#">hello-authentication-type</a>   |
| Description | This command enables Hello authentication at the level context. Both the Hello authentication key and the Hello authentication type on a segment must match. The Hello <b>authentication-key</b> statement must also be included. |
| Options     | password, message-digest  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**hello-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Interval between Hello messages sent on this level   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">interface</a> <i>string</i> <a href="#">level</a> <i>keyword</i> <a href="#">hello-interval</a> <i>number</i> |
| Tree       | <a href="#">hello-interval</a>   |
| Range      | 1 to 20000   |
| Units      | seconds  |
| Default    | 9  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**hello-multiplier** *number*

|            |  |
|------------|--|
| Synopsis   | Hello messages missed from neighbor before router declares adjacency down  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">interface</a> <i>string</i> <a href="#">level</a> <i>keyword</i> <a href="#">hello-multiplier</a> <i>number</i> |
| Tree       | <a href="#">hello-multiplier</a>   |
| Range      | 2 to 100   |
| Default    | 3  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**hello-padding** *keyword*

|            |  |
|------------|--|
| Synopsis   | Padding on IS-IS Hello packets   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">interface</a> <i>string</i> <a href="#">level</a> <i>keyword</i> <a href="#">hello-padding</a> <i>keyword</i> |
| Tree       | <a href="#">hello-padding</a>  |
| Options    | adaptive, loose, strict, none  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**ipv4-multicast-metric** *number*

|          |   |
|----------|---|
| Synopsis | IS-IS interface metric applied for IPv4 multicast |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string isis number interface string level</i> keyword <b>ipv4-multicast-metric number</b> |
| Tree       | <b>ipv4-multicast-metric</b>   |
| Range      | 1 to 16777215  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **ipv6-unicast-metric** *number*

|            |  |
|------------|--|
| Synopsis   | IS-IS interface metric applied for IPv6 unicast  |
| Context    | <b>configure service vprn</b> <i>string isis number interface string level</i> keyword <b>ipv6-unicast-metric number</b> |
| Tree       | <b>ipv6-unicast-metric</b>   |
| Range      | 1 to 16777215  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **metric** *number*

|            |   |
|------------|---|
| Synopsis   | IS-IS interface metric applied for IPv4 unicast   |
| Context    | <b>configure service vprn</b> <i>string isis number interface string level</i> keyword <b>metric number</b> |
| Tree       | <b>metric</b>   |
| Range      | 1 to 16777215   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **passive** *boolean*

|            |   |
|------------|---|
| Synopsis   | Passive interface   |
| Context    | <b>configure service vprn</b> <i>string isis number interface string level</i> keyword <b>passive boolean</b> |
| Tree       | <b>passive</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**priority number**

|            |   |
|------------|---|
| Synopsis   | Router to become the designated router on a multi-access network  |
| Context    | <b>configure</b> <a href="#">service vprn string isis number interface string level keyword priority number</a> |
| Tree       | <a href="#">priority</a>  |
| Range      | 0 to 127  |
| Default    | 64  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**sd-offset number**

|            |  |
|------------|--|
| Synopsis   | Value of the signal degrade offset   |
| Context    | <b>configure</b> <a href="#">service vprn string isis number interface string level keyword sd-offset number</a> |
| Tree       | <a href="#">sd-offset</a>  |
| Range      | 1 to 16777215  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**sf-offset number**

|            |  |
|------------|--|
| Synopsis   | Value of the signal fail offset  |
| Context    | <b>configure</b> <a href="#">service vprn string isis number interface string level keyword sf-offset number</a> |
| Tree       | <a href="#">sf-offset</a>  |
| Range      | 1 to 16777215  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**level-capability keyword**

|          |  |
|----------|--|
| Synopsis | IS-IS levels for this interface  |
| Context  | <b>configure</b> <a href="#">service vprn string isis number interface string level-capability keyword</a> |
| Tree     | <a href="#">level-capability</a>   |
| Options  | 1, 2, 1/2  |
| Default  | 1/2  |

Introduced 16.0.R1  
 Platforms All

### **load-balancing-weight** *number*

Synopsis Load balancing weight  
 Context **configure** [service vprn](#) *string* [isis number](#) [interface](#) *string* [load-balancing-weight](#) *number*  
 Tree [load-balancing-weight](#)  
 Max. Range 0 to 4294967295  
 Introduced 16.0.R1  
 Platforms All

### **loopfree-alternate**

Synopsis Enter the **loopfree-alternate** context  
 Context **configure** [service vprn](#) *string* [isis number](#) [interface](#) *string* [loopfree-alternate](#)  
 Tree [loopfree-alternate](#)  
 Introduced 16.0.R3  
 Platforms All

### **exclude** *boolean*

Synopsis Enable/disable Loopfree Alternative at interface level.  
 Context **configure** [service vprn](#) *string* [isis number](#) [interface](#) *string* [loopfree-alternate](#) [exclude](#) *boolean*  
 Tree [exclude](#)  
 Default false  
 Introduced 16.0.R3  
 Platforms All

### **policy-map**

Synopsis Enable the **policy-map** context  
 Context **configure** [service vprn](#) *string* [isis number](#) [interface](#) *string* [loopfree-alternate](#) [policy-map](#)  
 Tree [policy-map](#)  
 Introduced 16.0.R3

Platforms All

### **route-nh-template** *reference*

Synopsis Route next hop policy template name

Context **configure** [service vprn](#) *string* [isis](#) *number* [interface](#) *string* [loopfree-alternate](#) [policy-map](#) [route-nh-template](#) *reference*

Tree [route-nh-template](#)

Reference **configure** [routing-options](#) [route-next-hop-policy](#) [template](#) *string*

Notes This element is mandatory.

Introduced 16.0.R3

Platforms All

### **lsp-pacing-interval** *number*

Synopsis Interval for sending LSPs from interface

Context **configure** [service vprn](#) *string* [isis](#) *number* [interface](#) *string* [lsp-pacing-interval](#) *number*

Tree [lsp-pacing-interval](#)

Range 0 to 65535

Units milliseconds

Default 100

Introduced 16.0.R1

Platforms All

### **mesh-group**

Synopsis Enable the **mesh-group** context

Context **configure** [service vprn](#) *string* [isis](#) *number* [interface](#) *string* [mesh-group](#)

Tree [mesh-group](#)

Introduced 16.0.R1

Platforms All

### **blocked**

Synopsis Prevent the interface from flooding LSPs

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string isis number interface string mesh-group blocked</i> |
| Tree       | <b>blocked</b>  |
| Notes      | The following elements are part of a choice: <b>blocked</b> or <b>value</b> .               |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **value** *number*

|            |  |
|------------|--|
| Synopsis   | Mesh group for the interface   |
| Context    | <b>configure service vprn</b> <i>string isis number interface string mesh-group value number</i> |
| Tree       | <b>value</b>   |
| Range      | 1 to 2000000000  |
| Notes      | The following elements are part of a choice: <b>blocked</b> or <b>value</b> .                    |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **passive** *boolean*

|            |  |
|------------|--|
| Synopsis   | Passive interface  |
| Context    | <b>configure service vprn</b> <i>string isis number interface string passive boolean</i> |
| Tree       | <b>passive</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **retransmit-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum time between LSP PDU retransmissions on point-to-point interface                            |
| Context    | <b>configure service vprn</b> <i>string isis number interface string retransmit-interval number</i> |
| Tree       | <b>retransmit-interval</b>  |
| Range      | 1 to 65535  |
| Units      | seconds   |
| Default    | 5   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**tag number**

|            |  |
|------------|--|
| Synopsis   | Route tag for IP address of interface  |
| Context    | <b>configure service vprn string isis number interface string tag number</b> |
| Tree       | <a href="#">tag</a>  |
| Range      | 1 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**ipv4-multicast-routing keyword**

|            |   |
|------------|---|
| Synopsis   | IS-IS topology for IPv4 multicast routing                                       |
| Context    | <b>configure service vprn string isis number ipv4-multicast-routing keyword</b> |
| Tree       | <a href="#">ipv4-multicast-routing</a>  |
| Options    | false, native, mt   |
| Default    | native  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**ipv4-routing boolean**

|            |   |
|------------|---|
| Synopsis   | Support IPv4 routing for IS-IS instance                               |
| Context    | <b>configure service vprn string isis number ipv4-routing boolean</b> |
| Tree       | <a href="#">ipv4-routing</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**ipv6-routing keyword**

|          |   |
|----------|---|
| Synopsis | Routing topology for IPv6   |
| Context  | <b>configure service vprn string isis number ipv6-routing keyword</b> |
| Tree     | <a href="#">ipv6-routing</a>  |
| Options  | false, native, mt   |
| Default  | false   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **level** [[level-number](#)] *keyword*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>level</b> list instance  |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">level</a> <i>keyword</i> |
| Tree           | <a href="#">level</a>   |
| Max. Instances | 2   |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

### **[level-number]** *keyword*

|            |   |
|------------|---|
| Synopsis   | ISIS protocol level number  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">level</a> <i>keyword</i> |
| Tree       | <a href="#">level</a>   |
| Options    | 1, 2  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **advertise-router-capability** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow router advertisement capabilities  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">level</a> <i>keyword</i> <a href="#">advertise-router-capability</a> <i>boolean</i> |
| Tree       | <a href="#">advertise-router-capability</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **authentication-key** *string*

|          |   |
|----------|---|
| Synopsis | Authentication key to verify PDUs sent on the interface |
|----------|---|

|               |   |
|---------------|---|
| Context       | <b>configure service vprn</b> <i>string isis number level</i> keyword <b>authentication-key</b> <i>string</i>   |
| Tree          | <a href="#">authentication-key</a>  |
| Description   | This command sets the authentication key used to verify PDUs sent by neighboring routers on the interface.<br><br>Neighboring routers use passwords to authenticate PDUs sent from an interface. For authentication to work, both the authentication key and the authentication type on a segment must match. The <b>authentication-type</b> command must also be included. |
| String Length | 1 to 366  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **authentication-keychain** *reference*

|            |   |
|------------|---|
| Synopsis   | Keychain used to sign and authenticate  |
| Context    | <b>configure service vprn</b> <i>string isis number level</i> keyword <b>authentication-keychain</b> <i>reference</i> |
| Tree       | <a href="#">authentication-keychain</a>   |
| Reference  | <b>configure system security keychains</b> <b>keychain</b> <i>string</i>  |
| Introduced | 16.0.R3   |
| Platforms  | All   |

### **authentication-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Authentication type to be used  |
| Context    | <b>configure service vprn</b> <i>string isis number level</i> keyword <b>authentication-type</b> <i>keyword</i> |
| Tree       | <a href="#">authentication-type</a>   |
| Options    | password, message-digest  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **csnp-authentication** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable authentication of CSNP IS-IS protocol packets  |
| Context  | <b>configure service vprn</b> <i>string isis number level</i> keyword <b>csnp-authentication</b> <i>boolean</i> |
| Tree     | <a href="#">csnp-authentication</a>   |
| Default  | true  |

Introduced 16.0.R1  
Platforms All

### **default-ipv4-multicast-metric** *number*

Synopsis Default metric for IPv4 unicast  
Context **configure** [service](#) [vprn](#) *string* [isis](#) *number* [level](#) *keyword* [default-ipv4-multicast-metric](#) *number*  
Tree [default-ipv4-multicast-metric](#)  
Range 1 to 16777215  
Default 10  
Introduced 16.0.R1  
Platforms All

### **default-ipv6-unicast-metric** *number*

Synopsis Default metric for IPv6 unicast  
Context **configure** [service](#) [vprn](#) *string* [isis](#) *number* [level](#) *keyword* [default-ipv6-unicast-metric](#) *number*  
Tree [default-ipv6-unicast-metric](#)  
Range 1 to 16777215  
Default 10  
Introduced 16.0.R1  
Platforms All

### **default-metric** *number*

Synopsis Default metric  
Context **configure** [service](#) [vprn](#) *string* [isis](#) *number* [level](#) *keyword* [default-metric](#) *number*  
Tree [default-metric](#)  
Range 1 to 16777215  
Default 10  
Introduced 16.0.R1  
Platforms All

**external-preference** *number*

|            |  |
|------------|--|
| Synopsis   | External route preference for IS-IS level  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string isis number level</i> <b>keyword</b> <a href="#">external-preference</a> <i>number</i> |
| Tree       | <a href="#">external-preference</a>  |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**hello-authentication** *boolean*

|            |  |
|------------|--|
| Synopsis   | Authenticate Hello type IS-IS protocol packets   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string isis number level</i> <b>keyword</b> <a href="#">hello-authentication</a> <i>boolean</i> |
| Tree       | <a href="#">hello-authentication</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**hello-padding** *keyword*

|            |   |
|------------|---|
| Synopsis   | Padding on IS-IS Hello packets  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string isis number level</i> <b>keyword</b> <a href="#">hello-padding</a> <i>keyword</i> |
| Tree       | <a href="#">hello-padding</a>   |
| Options    | adaptive, loose, strict, none   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**loopfree-alternate-exclude** *boolean*

|            |  |
|------------|--|
| Synopsis   | Exclude interface participating in specific IS-IS level in SPF LFA computation   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string isis number level</i> <b>keyword</b> <a href="#">loopfree-alternate-exclude</a> <i>boolean</i> |
| Tree       | <a href="#">loopfree-alternate-exclude</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**lsp-mtu-size** *number***WARNING:**

Modifying this element requires the **admin-state** of the parent element to be toggled manually for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | LSP MTU size   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">level</a> <i>keyword</i> <a href="#">lsp-mtu-size</a> <i>number</i> |
| Tree       | <a href="#">lsp-mtu-size</a>   |
| Range      | 490 to 9778  |
| Units      | bytes  |
| Default    | 1492   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**preference** *number*

|            |  |
|------------|--|
| Synopsis   | External route preference at level   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">level</a> <i>keyword</i> <a href="#">preference</a> <i>number</i> |
| Tree       | <a href="#">preference</a>   |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**psnp-authentication** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable authentication on PSNP IS-IS protocol packets   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">level</a> <i>keyword</i> <a href="#">psnp-authentication</a> <i>boolean</i> |
| Tree       | <a href="#">psnp-authentication</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**wide-metrics-only** *boolean*

|          |   |
|----------|---|
| Synopsis | Use wide metrics advertisements in the LSPs |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string isis number level keyword wide-metrics-only boolean</i> |
| Tree       | <a href="#">wide-metrics-only</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **level-capability** *keyword*

|            |  |
|------------|--|
| Synopsis   | Routing level for instance   |
| Context    | <b>configure service vprn</b> <i>string isis number level-capability keyword</i> |
| Tree       | <a href="#">level-capability</a>   |
| Options    | 1, 2, 1/2  |
| Default    | 1/2  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **link-group** [[link-group-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>link-group</b> list instance                                 |
| Context    | <b>configure service vprn</b> <i>string isis number link-group string</i> |
| Tree       | <a href="#">link-group</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[link-group-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Link group name for the IS-IS protocol                                    |
| Context       | <b>configure service vprn</b> <i>string isis number link-group string</i> |
| Tree          | <a href="#">link-group</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.                                       |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">link-group</a> <i>string</i> <a href="#">description</a> <i>string</i> |

| Options    | 1, 2   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**ipv4-multicast-metric-offset** *number*

|          |   |
|----------|---|
| Synopsis | Offset value for the IPv4 multicast address family  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">link-group</a> <i>string</i> <a href="#">level</a> <i>keyword</i> <a href="#">ipv4-multicast-metric-offset</a> <i>number</i> |
| Tree     | <a href="#">ipv4-multicast-metric-offset</a>  |
| Range    | 1 to 16777215   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **ipv4-unicast-metric-offset** *number*

|            |   |
|------------|---|
| Synopsis   | Offset value for the IPv4 unicast address family  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">link-group</a> <i>string</i> <a href="#">level</a> <i>keyword</i> <a href="#">ipv4-unicast-metric-offset</a> <i>number</i> |
| Tree       | <a href="#">ipv4-unicast-metric-offset</a>  |
| Range      | 1 to 16777215   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ipv6-unicast-metric-offset** *number*

|            |   |
|------------|---|
| Synopsis   | Offset value for the IPv6 unicast address family  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">link-group</a> <i>string</i> <a href="#">level</a> <i>keyword</i> <a href="#">ipv6-unicast-metric-offset</a> <i>number</i> |
| Tree       | <a href="#">ipv6-unicast-metric-offset</a>  |
| Range      | 1 to 16777215   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **member** [[interface-name](#)] *reference*

|                |  |
|----------------|--|
| Synopsis       | Add a list entry for <b>member</b>   |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">link-group</a> <i>string</i> <a href="#">level</a> <i>keyword</i> <a href="#">member</a> <i>reference</i> |
| Tree           | <a href="#">member</a>   |
| Max. Instances | 8  |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **[interface-name]** *reference*

|          |  |
|----------|--|
| Synopsis | Interface name for the associated link group |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string isis number link-group string level keyword member reference</i> |
| Tree       | <a href="#">member</a>   |
| Reference  | <b>configure service vprn</b> <i>string isis number interface string</i>                                 |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **oper-members** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum number of operational links   |
| Context    | <b>configure service vprn</b> <i>string isis number link-group string level keyword oper-members number</i> |
| Tree       | <a href="#">oper-members</a>  |
| Range      | 1 to 8  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **revert-members** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum number of operational links to return link group to normal state and remove offsets                   |
| Context    | <b>configure service vprn</b> <i>string isis number link-group string level keyword revert-members number</i> |
| Tree       | <a href="#">revert-members</a>  |
| Range      | 1 to 8  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **loopfree-alternate**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>loopfree-alternate</b> context                               |
| Context    | <b>configure service vprn</b> <i>string isis number loopfree-alternate</i> |
| Tree       | <a href="#">loopfree-alternate</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**exclude**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>exclude</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string isis number loopfree-alternate exclude</a> |
| Tree       | <a href="#">exclude</a>   |
| Introduced | 16.0.R3   |
| Platforms  | All   |

**prefix-policy** *reference*

|                |  |
|----------------|--|
| Synopsis       | Policy to exclude prefixes from LFA SPF calculation  |
| Context        | <b>configure</b> <a href="#">service vprn string isis number loopfree-alternate exclude prefix-policy reference</a>  |
| Tree           | <a href="#">prefix-policy</a>  |
| Description    | This command specifies the name of the policy for the prefixes to exclude from the LFA SPF calculation.<br><br>An excluded prefix is not included in LFA calculation regardless of its priority. The prefix tag is, however, used in the main SPF. |
| Reference      | <b>configure</b> <a href="#">policy-options policy-statement string</a>  |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R3  |
| Platforms      | All  |

**lsp-lifetime** *number***WARNING:**

Modifying this element requires the **admin-state** of the parent element to be toggled manually for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Amount of time during which an LSP is considered valid                               |
| Context  | <b>configure</b> <a href="#">service vprn string isis number lsp-lifetime number</a> |
| Tree     | <a href="#">lsp-lifetime</a>   |
| Range    | 350 to 65535   |
| Units    | seconds  |
| Default  | 1200   |

Introduced 16.0.R1  
 Platforms All

### **lsp-minimum-remaining-lifetime** *number*

Synopsis Minimum value for the Remaining Lifetime of an LSP  
 Context **configure** [service vprn string isis number](#) [lsp-minimum-remaining-lifetime number](#)  
 Tree [lsp-minimum-remaining-lifetime](#)  
 Range 350 to 65535  
 Units seconds  
 Introduced 19.7.R1  
 Platforms All

### **lsp-mtu-size** *number*

**WARNING:**

Modifying this element requires the **admin-state** of the parent element to be toggled manually for the new value to take effect.

Synopsis LSP MTU size  
 Context **configure** [service vprn string isis number](#) [lsp-mtu-size number](#)  
 Tree [lsp-mtu-size](#)  
 Range 490 to 9778  
 Units bytes  
 Default 1492  
 Introduced 16.0.R1  
 Platforms All

### **lsp-refresh**

Synopsis Enter the **lsp-refresh** context  
 Context **configure** [service vprn string isis number](#) [lsp-refresh](#)  
 Tree [lsp-refresh](#)  
 Introduced 16.0.R1  
 Platforms All

**half-lifetime** *boolean*

|            |   |
|------------|---|
| Synopsis   | Set the refresh interval to always be half the LSP lifetime                               |
| Context    | <b>configure service vprn</b> <i>string isis number lsp-refresh half-lifetime boolean</i> |
| Tree       | <a href="#">half-lifetime</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**interval** *number*

|            |   |
|------------|---|
| Synopsis   | Refresh timer interval  |
| Context    | <b>configure service vprn</b> <i>string isis number lsp-refresh interval number</i> |
| Tree       | <a href="#">interval</a>  |
| Range      | 150 to 65535  |
| Units      | seconds   |
| Default    | 600   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**mru-mismatch-detection** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable detection of MRU mismatch   |
| Context     | <b>configure service vprn</b> <i>string isis number mru-mismatch-detection boolean</i>   |
| Tree        | <a href="#">mru-mismatch-detection</a>   |
| Description | <p>When configured to <b>true</b>, this command verifies that the received IS-IS Hello (IIH) packet size does not exceed the configured maximum port MTU size. The received IIH packet is dropped when its size exceeds the maximum port MTU size.</p> <p>When configured to <b>false</b>, the IS-IS router instance will not drop oversized IIH packets.</p> <p>By default, FP-based hardware can receive oversized packets but it will not originate them.</p> |
| Default     | false  |
| Introduced  | 21.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## multi-topology

|            |   |
|------------|---|
| Synopsis   | Enable the <b>multi-topology</b> context                        |
| Context    | <b>configure service vprn string isis number multi-topology</b> |
| Tree       | <a href="#">multi-topology</a>                                  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ipv4-multicast *boolean*

|            |  |
|------------|--|
| Synopsis   | Support IPv4 topology (MT3)  |
| Context    | <b>configure service vprn string isis number multi-topology ipv4-multicast boolean</b> |
| Tree       | <a href="#">ipv4-multicast</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ipv6-unicast *boolean*

|            |  |
|------------|--|
| Synopsis   | Support multi-topology TLVs  |
| Context    | <b>configure service vprn string isis number multi-topology ipv6-unicast boolean</b> |
| Tree       | <a href="#">ipv6-unicast</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## multicast-import

|            |   |
|------------|---|
| Synopsis   | Enter the <b>multicast-import</b> context                         |
| Context    | <b>configure service vprn string isis number multicast-import</b> |
| Tree       | <a href="#">multicast-import</a>                                  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ipv4 *boolean***

|            |   |
|------------|---|
| Synopsis   | Submit IPv4 routes into the multicast RPF of the RTM                                  |
| Context    | <b>configure service vprn string isis number multicast-import ipv4 <i>boolean</i></b> |
| Tree       | <a href="#">ipv4</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **overload**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>overload</b> context                        |
| Context    | <b>configure service vprn string isis number overload</b> |
| Tree       | <a href="#">overload</a>                                  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **max-metric *boolean***

|            |   |
|------------|---|
| Synopsis   | Advertise transit links with maximum metric instead of setting overload bit         |
| Context    | <b>configure service vprn string isis number overload max-metric <i>boolean</i></b> |
| Tree       | <a href="#">max-metric</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **overload-export-external *boolean***

|            |  |
|------------|--|
| Synopsis   | Advertise the external routes when router is in overloaded                               |
| Context    | <b>configure service vprn string isis number overload-export-external <i>boolean</i></b> |
| Tree       | <a href="#">overload-export-external</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **overload-export-interlevel** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise the inter-level routes when router is overloaded   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string isis number</i> <b>overload-export-interlevel</b> <i>boolean</i> |
| Tree       | <a href="#">overload-export-interlevel</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **overload-on-boot**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>overload-on-boot</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string isis number</i> <b>overload-on-boot</b> |
| Tree       | <a href="#">overload-on-boot</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **max-metric** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise transit links with maximum metric instead of setting overload bit  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string isis number</i> <b>overload-on-boot</b> <b>max-metric</b> <i>boolean</i> |
| Tree       | <a href="#">max-metric</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Time during which the router operates in overload state after reboot   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string isis number</i> <b>overload-on-boot</b> <b>timeout</b> <i>number</i> |
| Tree       | <a href="#">timeout</a>  |
| Range      | 60 to 1800   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**poi-tlv** *boolean*

|            |   |
|------------|---|
| Synopsis   | Purge Originator Identification TLV   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">poi-tlv</a> <i>boolean</i> |
| Tree       | <a href="#">poi-tlv</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**prefix-attributes-tlv** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use IS-IS Prefix Attributes TLV to exchange extended IPv4 and IPv6 reachability information   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">prefix-attributes-tlv</a> <i>boolean</i> |
| Tree       | <a href="#">prefix-attributes-tlv</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**prefix-limit**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>prefix-limit</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">prefix-limit</a> |
| Tree       | <a href="#">prefix-limit</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**limit** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of prefixes for IS-IS instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">prefix-limit</a> <a href="#">limit</a> <i>number</i> |
| Tree       | <a href="#">limit</a>   |
| Range      | 1 to 4294967295   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |

Platforms All

### **log-only** *boolean*

Synopsis Send warning message when the prefix limit is reached  
 Context **configure** *service vprn string isis number prefix-limit log-only boolean*  
 Tree [log-only](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

### **overload-timeout** (*number | keyword*)

Synopsis Time in overload state when prefix limit is reached  
 Context **configure** *service vprn string isis number prefix-limit overload-timeout (number | keyword)*  
 Tree [overload-timeout](#)  
 Range 1 to 1800  
 Units seconds  
 Options forever  
 Default forever  
 Introduced 16.0.R1  
 Platforms All

### **warning-threshold** *number*

Synopsis Threshold value to trigger a warning message to be sent  
 Context **configure** *service vprn string isis number prefix-limit warning-threshold number*  
 Tree [warning-threshold](#)  
 Range 0 to 100  
 Units percent  
 Default 0  
 Introduced 16.0.R1  
 Platforms All

**psnp-authentication** *boolean*

|            |   |
|------------|---|
| Synopsis   | Authenticate individual IS-IS protocol packets of partial sequence number PDU (PSNP) type   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">psnp-authentication</a> <i>boolean</i> |
| Tree       | <a href="#">psnp-authentication</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**reference-bandwidth** *number*

|            |  |
|------------|--|
| Synopsis   | Reference bandwidth for bandwidth relative costing   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">reference-bandwidth</a> <i>number</i> |
| Tree       | <a href="#">reference-bandwidth</a>  |
| Range      | 1 to 18446744073709551615  |
| Units      | kilobps  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**rib-priority**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>rib-priority</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">rib-priority</a> |
| Tree       | <a href="#">rib-priority</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**high**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>high</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">rib-priority</a> <a href="#">high</a> |
| Tree       | <a href="#">high</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**prefix-list** *reference*

|            |  |
|------------|--|
| Synopsis   | List used to select routes processed at higher priority through OSPF route calculation process   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">rib-priority high</a> <a href="#">prefix-list</a> <i>reference</i> |
| Tree       | <a href="#">prefix-list</a>  |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">prefix-list</a> <i>string</i>  |
| Notes      | The following elements are part of a choice: <b>prefix-list</b> or <b>tag</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**tag** *number*

|            |   |
|------------|---|
| Synopsis   | Tag value that is used to match IS-IS routes  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">rib-priority high</a> <a href="#">tag</a> <i>number</i> |
| Tree       | <a href="#">tag</a>   |
| Range      | 1 to 4294967295   |
| Notes      | The following elements are part of a choice: <b>prefix-list</b> or <b>tag</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**router-id** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Unique router ID for the ISIS instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">router-id</a> <i>string</i> |
| Tree       | <a href="#">router-id</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**standard-multi-instance** *boolean*

|          |  |
|----------|--|
| Synopsis | Enable RFC standards compliant multi-instance behavior   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis number</a> <a href="#">standard-multi-instance</a> <i>boolean</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">standard-multi-instance</a> |
| Default    | false                                   |
| Introduced | 16.0.R1                                 |
| Platforms  | All                                     |

### **strict-adjacency-check** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable strict checking of address families for IS-IS adjacencies  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <b>strict-adjacency-check</b> <i>boolean</i> |
| Tree       | <a href="#">strict-adjacency-check</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **summary-address** [[ip-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>summary-address</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <b>summary-address</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">summary-address</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[ip-prefix]** (*ipv4-prefix* | *ipv6-prefix*)

|            |   |
|------------|---|
| Synopsis   | IP prefix for the summary address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <b>summary-address</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">summary-address</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **level-capability** *keyword*

|          |                                     |
|----------|-------------------------------------|
| Synopsis | IS-IS level for the summary address |
|----------|-------------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string isis number summary-address (ipv4-prefix   ipv6-prefix) level-capability keyword</i> |
| Tree       | <b>level-capability</b>  |
| Options    | 1, 2, 1/2  |
| Default    | 1/2  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **route-tag** *number*

|            |  |
|------------|--|
| Synopsis   | Route tag assigned to the summary address  |
| Context    | <b>configure service vprn</b> <i>string isis number summary-address (ipv4-prefix   ipv6-prefix) route-tag number</i> |
| Tree       | <b>route-tag</b>   |
| Range      | 1 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **suppress-attached-bit** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow IS-IS to suppress setting attached bit on LSPs                                  |
| Context    | <b>configure service vprn</b> <i>string isis number suppress-attached-bit boolean</i> |
| Tree       | <b>suppress-attached-bit</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **system-id** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element requires the **admin-state** of the parent element to be toggled manually for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | System ID  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">system-id</a> <i>string</i> |
| Tree          | <a href="#">system-id</a>  |
| String Length | 14   |
| Default       | 0000.0000.0000   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

## timers

|            |   |
|------------|---|
| Synopsis   | Enter the <b>timers</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">timers</a> |
| Tree       | <a href="#">timers</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## lsp-wait

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lsp-wait</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">timers</a> <a href="#">lsp-wait</a> |
| Tree       | <a href="#">lsp-wait</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## lsp-initial-wait *number*

|            |   |
|------------|---|
| Synopsis   | Initial LSP generation delay  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">timers</a> <a href="#">lsp-wait</a> <a href="#">lsp-initial-wait</a> <i>number</i> |
| Tree       | <a href="#">lsp-initial-wait</a>  |
| Range      | 10 to 100000  |
| Units      | milliseconds  |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **lsp-max-wait** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum time between two consecutive LSP occurrences   |
| Context    | <b>configure</b> <a href="#">service vprn string isis number timers lsp-wait lsp-max-wait number</a> |
| Tree       | <a href="#">lsp-max-wait</a>   |
| Range      | 10 to 120000   |
| Units      | milliseconds   |
| Default    | 5000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **lsp-second-wait** *number*

|            |   |
|------------|---|
| Synopsis   | Delay between first and second LSP generation   |
| Context    | <b>configure</b> <a href="#">service vprn string isis number timers lsp-wait lsp-second-wait number</a> |
| Tree       | <a href="#">lsp-second-wait</a>   |
| Range      | 10 to 100000  |
| Units      | milliseconds  |
| Default    | 1000  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **spf-wait**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>spf-wait</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string isis number timers spf-wait</a> |
| Tree       | <a href="#">spf-wait</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **spf-initial-wait** *number*

|          |  |
|----------|--|
| Synopsis | Initial SPF calculation delay after topology change  |
| Context  | <b>configure</b> <a href="#">service vprn string isis number timers spf-wait spf-initial-wait number</a> |
| Tree     | <a href="#">spf-initial-wait</a>   |

|            |              |
|------------|--------------|
| Range      | 10 to 100000 |
| Units      | milliseconds |
| Default    | 1000         |
| Introduced | 16.0.R1      |
| Platforms  | All          |

### **spf-max-wait** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum interval amid two consecutive SPF calculations  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">timers</a> <a href="#">spf-wait</a> <a href="#">spf-max-wait</a> <i>number</i> |
| Tree       | <a href="#">spf-max-wait</a>  |
| Range      | 10 to 120000  |
| Units      | milliseconds  |
| Default    | 10000   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **spf-second-wait** *number*

|            |  |
|------------|--|
| Synopsis   | Hold time between first and second SPF calculations  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">timers</a> <a href="#">spf-wait</a> <a href="#">spf-second-wait</a> <i>number</i> |
| Tree       | <a href="#">spf-second-wait</a>  |
| Range      | 10 to 100000   |
| Units      | milliseconds   |
| Default    | 1000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **unicast-import**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>unicast-import</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">unicast-import</a> |
| Tree       | <a href="#">unicast-import</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ipv4** *boolean*

|            |   |
|------------|---|
| Synopsis   | Submit IPv4 routes into unicast RTM   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">unicast-import ipv4</a> <i>boolean</i> |
| Tree       | <a href="#">ipv4</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ipv6** *boolean*

|            |   |
|------------|---|
| Synopsis   | Submit IPv6 routes into unicast RTM   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">isis</a> <i>number</i> <a href="#">unicast-import ipv6</a> <i>boolean</i> |
| Tree       | <a href="#">ipv6</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **l2tp**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>l2tp</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp</a> |
| Tree       | <a href="#">l2tp</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                          |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of L2TP   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**avp-hiding** *keyword*

|            |  |
|------------|--|
| Synopsis   | Attribute of the Value Pair (AVP) hiding algorithm                           |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp avp-hiding keyword</a> |
| Tree       | <a href="#">avp-hiding</a>   |
| Options    | sensitive, always  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                      |

**challenge** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use challenge-response authentication                                       |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp challenge boolean</a> |
| Tree       | <a href="#">challenge</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                     |

**destruct-timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Destruction timeout   |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp destruct-timeout number</a> |
| Tree       | <a href="#">destruct-timeout</a>  |
| Range      | 60 to 86400   |
| Units      | seconds   |
| Default    | 60  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                           |

**ethernet-tunnel**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ethernet-tunnel</b> context                                  |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp ethernet-tunnel</a> |
| Tree       | <a href="#">ethernet-tunnel</a>   |
| Introduced | 16.0.R4   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **reconnect-timeout** (*number* | *keyword*)

Synopsis Timeout for a session setup retry

Context **configure service vprn** *string* **l2tp ethernet-tunnel reconnect-timeout** (*number* | *keyword*)

Tree **reconnect-timeout**

Range 10 to 3600

Units seconds

Options infinite

Default infinite

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **exclude-avps**

Synopsis Enter the **exclude-avps** context

Context **configure service vprn** *string* **l2tp exclude-avps**

Tree **exclude-avps**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **calling-number** *boolean*

Synopsis Calling Number AVP to exclude

Context **configure service vprn** *string* **l2tp exclude-avps calling-number** *boolean*

Tree **calling-number**

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **initial-rx-lcp-conf-req** *boolean*

Synopsis Exclude the Initial Received LCP CONFREQ AVP

Context **configure service vprn** *string* **l2tp exclude-avps initial-rx-lcp-conf-req** *boolean*

|            |   |
|------------|---|
| Tree       | <a href="#">initial-rx-lcp-conf-req</a>                 |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## failover

|            |  |
|------------|--|
| Synopsis   | Enter the <b>failover</b> context                                  |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp failover</a> |
| Tree       | <a href="#">failover</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR            |

## recovery-max-session-lifetime *number*

|            |   |
|------------|---|
| Synopsis   | Subset of sessions that this system attempts to synchronize in the Session State Synchronization phase  |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp failover recovery-max-session-lifetime number</a> |
| Tree       | <a href="#">recovery-max-session-lifetime</a>   |
| Range      | 2 to 4294967295   |
| Units      | centiseconds  |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## recovery-method *keyword*

|            |  |
|------------|--|
| Synopsis   | Recovery method of the sequence numbers after failover                                     |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp failover recovery-method keyword</a> |
| Tree       | <a href="#">recovery-method</a>  |
| Options    | mcs, recovery-tunnel   |
| Default    | mcs  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

**recovery-time** *number*

|            |  |
|------------|--|
| Synopsis   | Time requested from the L2TP peer before assuming failover as failed   |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">l2tp failover recovery-time</a> <i>number</i> |
| Tree       | <a href="#">recovery-time</a>  |
| Range      | 0 to 900   |
| Units      | seconds  |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**track-srrp** [*id*] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>track-srrp</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">l2tp failover track-srrp</a> <i>reference</i> |
| Tree       | <a href="#">track-srrp</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[id]** *reference*

|            |  |
|------------|--|
| Synopsis   | SRRP instance ID for multi-chassis redundancy failover   |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">l2tp failover track-srrp</a> <i>reference</i>   |
| Tree       | <a href="#">track-srrp</a>   |
| Reference  | <b>configure</b> <a href="#">redundancy multi-chassis peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">sync track-srrp</a> <i>number</i> |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**peer** *reference*

|          |  |
|----------|--|
| Synopsis | Multi-chassis peer address   |
| Context  | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">l2tp failover track-srrp</a> <i>reference</i> <a href="#">peer</a> <i>reference</i> |
| Tree     | <a href="#">peer</a>   |

|            |  |
|------------|--|
| Reference  | <b>configure</b> <a href="#">redundancy multi-chassis peer</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **sync-tag** *string*

|               |   |
|---------------|---|
| Synopsis      | Synchronization tag on the multi-chassis peer   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp failover track-srrp</a> <a href="#">reference sync-tag</a> <i>string</i> |
| Tree          | <a href="#">sync-tag</a>  |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **group** [[tunnel-group-name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>group</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> |
| Tree       | <a href="#">group</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### [[tunnel-group-name](#)] *string*

|               |  |
|---------------|--|
| Synopsis      | Tunnel group name  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> |
| Tree          | <a href="#">group</a>  |
| String Length | 1 to 63  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the L2TP tunnel group   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**avp-hiding** *keyword*

|            |  |
|------------|--|
| Synopsis   | The AVP hiding algorithm   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <b>avp-hiding</b> <i>keyword</i> |
| Tree       | <a href="#">avp-hiding</a>   |
| Options    | never, sensitive, always   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**challenge** *keyword*

|            |   |
|------------|---|
| Synopsis   | Enable use of challenge-response authentication   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <b>challenge</b> <i>keyword</i> |
| Tree       | <a href="#">challenge</a>   |
| Options    | false, true   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## **destruct-timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Destruction timeout  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <b>destruct-timeout</b> <i>number</i> |
| Tree       | <a href="#">destruct-timeout</a>   |
| Range      | 60 to 86400  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## **ethernet-tunnel**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ethernet-tunnel</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <b>ethernet-tunnel</b> |
| Tree       | <a href="#">ethernet-tunnel</a>   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **reconnect-timeout** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Timeout for a session setup retry at group level  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <b>ethernet-tunnel</b> <b>reconnect-timeout</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">reconnect-timeout</a>   |
| Range      | 10 to 3600  |
| Units      | seconds   |
| Options    | infinite  |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **failover**

|          |  |
|----------|--|
| Synopsis | Enter the <b>failover</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <b>failover</b> |
| Tree     | <a href="#">failover</a>   |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **recovery-method** *keyword*

Synopsis Recovery method of the sequence numbers after failover  
Context **configure** [service vprn](#) *string* [l2tp group](#) *string* [failover recovery-method](#) *keyword*  
Tree [recovery-method](#)  
Options mcs, recovery-tunnel  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **recovery-time** *number*

Synopsis Time requested from the L2TP peer before assuming failover as failed  
Context **configure** [service vprn](#) *string* [l2tp group](#) *string* [failover recovery-time](#) *number*  
Tree [recovery-time](#)  
Range 0 to 900  
Units seconds  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hello-interval** (*number* | *keyword*)

Synopsis Hello interval  
Context **configure** [service vprn](#) *string* [l2tp group](#) *string* [hello-interval](#) (*number* | *keyword*)  
Tree [hello-interval](#)  
Range 10 to 3600  
Units seconds  
Options infinite  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**idle-timeout** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Idle timeout   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>idle-timeout</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>idle-timeout</b>  |
| Range      | 0 to 3600  |
| Units      | seconds  |
| Options    | infinite   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**l2tpv3**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>l2tpv3</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>l2tpv3</b> |
| Tree       | <b>l2tpv3</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                   |

**cookie-length** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Cookie field length   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>l2tpv3</b> <b>cookie-length</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>cookie-length</b>  |
| Range      | 4   8   |
| Options    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**digest-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Hashing algorithm that calculates the message digest  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>l2tpv3</b> <b>digest-type</b> <i>keyword</i> |
| Tree       | <b>digest-type</b>  |
| Options    | none, md5, sha1   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **nonce-length** *number*

Synopsis Length for the local L2TPv3 nonce (random number)  
 Context **configure service vpn** *string* **l2tp group** *string* **l2tpv3 nonce-length** *number*  
 Tree [nonce-length](#)  
 Range 0 | 16 to 64  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **password** *string*

Synopsis L2TPv3 password  
 Context **configure service vpn** *string* **l2tp group** *string* **l2tpv3 password** *string*  
 Tree [password](#)  
 String Length 1 to 115  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **private-tcp-mss-adjust** (*number* | *keyword*)

Synopsis TCP maximum segment size (MSS) on private network  
 Context **configure service vpn** *string* **l2tp group** *string* **l2tpv3 private-tcp-mss-adjust** (*number* | *keyword*)  
 Tree [private-tcp-mss-adjust](#)  
 Range 512 to 9000  
 Units octets  
 Options disable  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **public-tcp-mss-adjust** (*number* | *keyword*)

Synopsis TCP Maximum Segment Size (MSS) on public network

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>l2tpv3 public-tcp-mss-adjust</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">public-tcp-mss-adjust</a>  |
| Range      | 512 to 9000  |
| Units      | octets   |
| Options    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **pw-cap-list**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pw-cap-list</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>l2tpv3 pw-cap-list</b> |
| Tree       | <a href="#">pw-cap-list</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ethernet** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Advertise Ethernet pseudowire type  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>l2tpv3 pw-cap-list ethernet</b> <i>boolean</i> |
| Tree       | <a href="#">ethernet</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ethernet-vlan** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Advertise Ethernet VLAN pseudowire type |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>l2tpv3 pw-cap-list ethernet-vlan</b> <i>boolean</i> |
| Tree       | <b>ethernet-vlan</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **rem-router-id** *string*

|            |   |
|------------|---|
| Synopsis   | Filter on remote router ID  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>l2tpv3 rem-router-id</b> <i>string</i> |
| Tree       | <b>rem-router-id</b>  |
| Default    | 0.0.0.0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **track-password-change** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable tracking of password changes  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>l2tpv3 track-password-change</b> <i>boolean</i> |
| Tree       | <b>track-password-change</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **lac**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lac</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>lac</b> |
| Tree       | <b>lac</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                |

### **df-bit** *keyword*

|          |   |
|----------|---|
| Synopsis | DF (do not fragment) bit in data traffic transmitted as LAC |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string l2tp group string lac df-bit keyword</i> |
| Tree       | <a href="#">df-bit</a>   |
| Options    | false, true  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                          |

## Ins

|            |   |
|------------|---|
| Synopsis   | Enter the <b>Ins</b> context                                      |
| Context    | <b>configure service vprn</b> <i>string l2tp group string Ins</i> |
| Tree       | <a href="#">Ins</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                      |

## Ins-group *reference*

|            |   |
|------------|---|
| Synopsis   | ISA LNS group   |
| Context    | <b>configure service vprn</b> <i>string l2tp group string Ins Ins-group reference</i> |
| Tree       | <a href="#">Ins-group</a>   |
| Reference  | <b>configure isa</b> <i>Ins-group number</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## load-balance-method *keyword*

|            |   |
|------------|---|
| Synopsis   | New sessions for L2TP ISA MDA   |
| Context    | <b>configure service vprn</b> <i>string l2tp group string Ins load-balance-method keyword</i> |
| Tree       | <a href="#">load-balance-method</a>   |
| Options    | per-session, per-tunnel   |
| Default    | per-session   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## mlppp

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mlppp</b> context                                   |
| Context    | <b>configure service vprn string l2tp group string lns mlppp</b> |
| Tree       | <b>mlppp</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s                          |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of MLPPP in the L2TP tunnel group                               |
| Context    | <b>configure service vprn string l2tp group string lns mlppp admin-state keyword</b> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s  |

## endpoint

|            |   |
|------------|---|
| Synopsis   | Enter the <b>endpoint</b> context   |
| Context    | <b>configure service vprn string l2tp group string lns mlppp endpoint</b> |
| Tree       | <b>endpoint</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s                                   |

## ip (*ipv4-address* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Endpoint ID as an IP address  |
| Context    | <b>configure service vprn string l2tp group string lns mlppp endpoint ip (ipv4-address   keyword)</b> |
| Tree       | <b>ip</b>   |
| Options    | system  |
| Notes      | The following elements are part of a choice: <b>ip</b> or <b>mac</b> .                                |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s   |

**mac** (*mac-address* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Endpoint ID as a MAC address  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <a href="#">endpoint</a> <a href="#">mac</a> ( <i>mac-address</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mac</a>   |
| Options    | system  |
| Notes      | The following elements are part of a choice: <b>ip</b> or <b>mac</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s   |

**interleave** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable link fragmentation and interleaving   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <a href="#">interleave</a> <i>boolean</i> |
| Tree       | <a href="#">interleave</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s  |

**max-fragment-delay** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Maximum fragment delay caused by transmission on a link  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <a href="#">max-fragment-delay</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">max-fragment-delay</a>   |
| Range      | 5 to 1000  |
| Units      | milliseconds   |
| Options    | no-fragmentation   |
| Default    | no-fragmentation   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s  |

**max-links** *number*

|          |                     |
|----------|---------------------|
| Synopsis | Maximum MLPPP links |
|----------|---------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>lns mlppp max-links</b> <i>number</i> |
| Tree       | <a href="#">max-links</a>  |
| Range      | 1 to 8   |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s  |

### **reassemble-timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Reassembly timeout  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>lns mlppp reassemble-timeout</b> <i>number</i> |
| Tree       | <a href="#">reassemble-timeout</a>  |
| Range      | 100   1000  |
| Units      | milliseconds  |
| Default    | 1000  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s   |

### **short-sequence-numbers** *boolean*

|            |  |
|------------|--|
| Synopsis   | Request a peer to send short sequence numbers  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>lns mlppp short-sequence-numbers</b> <i>boolean</i> |
| Tree       | <a href="#">short-sequence-numbers</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s  |

### **ppp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ppp</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>lns ppp</b> |
| Tree       | <a href="#">ppp</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **authentication** *keyword*

|            |   |
|------------|---|
| Synopsis   | PPP authentication protocol to negotiate  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">ins</a> <a href="#">ppp</a> <a href="#">authentication</a> <i>keyword</i> |
| Tree       | <a href="#">authentication</a>  |
| Options    | pap, chap, pref-chap, pref-pap  |
| Default    | pref-chap   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **authentication-policy** *string*

|               |   |
|---------------|---|
| Synopsis      | Authentication policy when a DHCP message is received   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">ins</a> <a href="#">ppp</a> <a href="#">authentication-policy</a> <i>string</i> |
| Tree          | <a href="#">authentication-policy</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **chap-challenge-length**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>chap-challenge-length</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">ins</a> <a href="#">ppp</a> <a href="#">chap-challenge-length</a> |
| Tree       | <a href="#">chap-challenge-length</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **end** *number*

|          |  |
|----------|--|
| Synopsis | Upper bound of the PPP CHAP challenge length   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">ins</a> <a href="#">ppp</a> <a href="#">chap-challenge-length</a> <i>end</i> <i>number</i> |
| Tree     | <a href="#">end</a>  |
| Range    | 8 to 64  |
| Units    | octets   |

|            |  |
|------------|--|
| Default    | 64   |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**start number**

|            |   |
|------------|---|
| Synopsis   | Lower bound of the PPP CHAP challenge length  |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp group string lns ppp chap-challenge-length start number</a> |
| Tree       | <a href="#">start</a>   |
| Range      | 8 to 64   |
| Units      | octets  |
| Default    | 32  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**default-group-interface**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>default-group-interface</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp group string lns ppp default-group-interface</a> |
| Tree       | <a href="#">default-group-interface</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**interface string**

|               |   |
|---------------|---|
| Synopsis      | Group interface   |
| Context       | <b>configure</b> <a href="#">service vprn string l2tp group string lns ppp default-group-interface interface string</a> |
| Tree          | <a href="#">interface</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**service-name** *string*

|               |  |
|---------------|--|
| Synopsis      | Administrative service name  |
| Context       | <b>configure</b> <a href="#">service vprn string</a> <a href="#">l2tp group string</a> <a href="#">lns ppp default-group-interface service-name string</a> |
| Tree          | <a href="#">service-name</a>   |
| String Length | 1 to 64  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**ipcp-subnet-negotiation** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow IPCP subnet negotiation for PPPoE hosts  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">l2tp group string</a> <a href="#">lns ppp ipcp-subnet-negotiation boolean</a> |
| Tree       | <a href="#">ipcp-subnet-negotiation</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**keepalive**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>keepalive</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">l2tp group string</a> <a href="#">lns ppp keepalive</a> |
| Tree       | <a href="#">keepalive</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**interval** *number*

|            |  |
|------------|--|
| Synopsis   | PPP keepalive interval   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">l2tp group string</a> <a href="#">lns ppp keepalive interval number</a> |
| Tree       | <a href="#">interval</a>   |
| Range      | 10 to 300  |
| Units      | seconds  |
| Default    | 30   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **multiplier** *number*

Synopsis PPP keepalive multiplier

Context **configure** [service vprn string l2tp group string lns ppp keepalive multiplier number](#)

Tree [multiplier](#)

Range 1 to 5

Default 3

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lcp-force-ack-accm** *boolean*

Synopsis Force acknowledgement of the LCP Asynchronous Control Character Map (ACCM) option

Context **configure** [service vprn string l2tp group string lns ppp lcp-force-ack-accm boolean](#)

Tree [lcp-force-ack-accm](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lcp-ignore-magic-numbers** *boolean*

Synopsis Check magic number in echo request and reply messages

Context **configure** [service vprn string l2tp group string lns ppp lcp-ignore-magic-numbers boolean](#)

Tree [lcp-ignore-magic-numbers](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mtu** *number*

Synopsis Maximum PPP MTU size

Context **configure** [service vprn string l2tp group string lns ppp mtu number](#)

|            |  |
|------------|--|
| Tree       | <a href="#">mtu</a>                          |
| Range      | 512 to 9212                                  |
| Units      | octets                                       |
| Default    | 1500   |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **proxy-authentication** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use authentication AVPs that are received from LAC   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <a href="#">string l2tp group</a> <a href="#">string lns ppp</a> <a href="#">proxy-authentication</a> <i>boolean</i> |
| Tree       | <a href="#">proxy-authentication</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **proxy-lcp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Proxy LCP AVPs that are received from LAC   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <a href="#">string l2tp group</a> <a href="#">string lns ppp</a> <a href="#">proxy-lcp</a> <i>boolean</i> |
| Tree       | <a href="#">proxy-lcp</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **reject-disabled-ncp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Force LCP Protocol Reject for IPv6CP Configure Request  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <a href="#">string l2tp group</a> <a href="#">string lns ppp</a> <a href="#">reject-disabled-ncp</a> <i>boolean</i> |
| Tree       | <a href="#">reject-disabled-ncp</a>   |
| Default    | false   |
| Introduced | 16.0.R6   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**user-db string**

|               |   |
|---------------|---|
| Synopsis      | Local user database for PPP PAP and CHAP authentication                       |
| Context       | <b>configure service vprn string l2tp group string lns ppp user-db string</b> |
| Tree          | <b>user-db</b>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                  |

**local-address string**

|            |   |
|------------|---|
| Synopsis   | Local address   |
| Context    | <b>configure service vprn string l2tp group string local-address string</b> |
| Tree       | <b>local-address</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                     |

**local-name string**

|               |  |
|---------------|--|
| Synopsis      | Local host name used to distinguish tunnels                              |
| Context       | <b>configure service vprn string l2tp group string local-name string</b> |
| Tree          | <b>local-name</b>  |
| String Length | 1 to 64  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                  |

**max-retries-estab number**

|            |   |
|------------|---|
| Synopsis   | Maximum retries for established tunnels   |
| Context    | <b>configure service vprn string l2tp group string max-retries-estab number</b> |
| Tree       | <b>max-retries-estab</b>  |
| Range      | 2 to 7  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                         |

**max-retries-not-estab** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum retries for unestablished tunnels  |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <b>max-retries-not-estab</b> <i>number</i> |
| Tree       | <a href="#">max-retries-not-estab</a>  |
| Range      | 2 to 7   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**password** *string*

|               |   |
|---------------|---|
| Synopsis      | Password between L2TP LAC and LNS   |
| Context       | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <b>password</b> <i>string</i> |
| Tree          | <a href="#">password</a>  |
| String Length | 1 to 115  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**protocol** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Protocol version   |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <b>protocol</b> <i>keyword</i> |
| Tree       | <a href="#">protocol</a>   |
| Options    | v2, v3, v3draft  |
| Default    | v2   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**radius-accounting-policy** *reference*

|          |  |
|----------|--|
| Synopsis | RADIUS accounting policy   |
| Context  | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <b>radius-accounting-policy</b> <i>reference</i> |
| Tree     | <a href="#">radius-accounting-policy</a>   |

Reference **configure** [aaa radius l2tp-accounting-policy](#) *string*  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **receive-window-size** *number*

Synopsis L2TP receive window size  
 Context **configure** [service vprn](#) *string* [l2tp group](#) *string* [receive-window-size](#) *number*  
 Tree [receive-window-size](#)  
 Range 4 to 1024  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session-assign-method** *keyword*

Synopsis Session assignment method  
 Context **configure** [service vprn](#) *string* [l2tp group](#) *string* [session-assign-method](#) *keyword*  
 Tree [session-assign-method](#)  
 Options existing-first, weighted, weighted-random  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **session-limit** (*number* | *keyword*)

Synopsis Session limit  
 Context **configure** [service vprn](#) *string* [l2tp group](#) *string* [session-limit](#) (*number* | *keyword*)  
 Tree [session-limit](#)  
 Range 1 to 250000  
 Options unlimited  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **tunnel** [[tunnel-name](#)] *string*

Synopsis Enter the **tunnel** list instance

|                |  |
|----------------|--|
| Context        | <b>configure service vpn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> |
| Tree           | <b>tunnel</b>  |
| Max. Instances | 31   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[tunnel-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Tunnel name  |
| Context       | <b>configure service vpn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> |
| Tree          | <b>tunnel</b>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the L2TP tunnel  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**auto-establish** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow the tunnel to be automatically set up by the system   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> <b>auto-establish</b> <i>boolean</i> |
| Tree       | <b>auto-establish</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**avp-hiding** *keyword*

|            |   |
|------------|---|
| Synopsis   | The AVP hiding algorithm  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <b>avp-hiding</b> <i>keyword</i> |
| Tree       | <a href="#">avp-hiding</a>  |
| Options    | never, sensitive, always  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**challenge** *keyword*

|            |  |
|------------|--|
| Synopsis   | Enable use of challenge-response authentication  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <b>challenge</b> <i>keyword</i> |
| Tree       | <a href="#">challenge</a>  |
| Options    | false, true  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**destruct-timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Destruction timeout  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <b>destruct-timeout</b> <i>number</i> |
| Tree       | <a href="#">destruct-timeout</a>   |
| Range      | 60 to 86400  |
| Units      | seconds  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## failover

Synopsis Enter the **failover** context

Context **configure service vpn** *string* **l2tp group** *string* **tunnel** *string* **failover**

Tree **failover**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## recovery-method *keyword*

Synopsis Recovery method of the sequence numbers after failover

Context **configure service vpn** *string* **l2tp group** *string* **tunnel** *string* **failover recovery-method** *keyword*

Tree **recovery-method**

Options mcs, recovery-tunnel

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## recovery-time *number*

Synopsis Time requested from the L2TP peer before assuming failover as failed

Context **configure service vpn** *string* **l2tp group** *string* **tunnel** *string* **failover recovery-time** *number*

Tree **recovery-time**

Range 0 to 900

Units seconds

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## hello-interval (*number* | *keyword*)

Synopsis Hello interval

Context **configure service vpn** *string* **l2tp group** *string* **tunnel** *string* **hello-interval** (*number* | *keyword*)

|            |   |
|------------|---|
| Tree       | <a href="#">hello-interval</a>                          |
| Range      | 10 to 3600  |
| Units      | seconds   |
| Options    | infinite  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **idle-timeout** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Idle timeout   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <b>idle-timeout</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">idle-timeout</a>   |
| Range      | 0 to 3600  |
| Units      | seconds  |
| Options    | infinite   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **l2tpv3**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>l2tpv3</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <b>l2tpv3</b> |
| Tree       | <a href="#">l2tpv3</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **private-tcp-mss-adjust** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | TCP maximum segment size (MSS) on private network   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">l2tpv3</a> <b>private-tcp-mss-adjust</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">private-tcp-mss-adjust</a>  |
| Range    | 512 to 9000   |
| Units    | octets  |
| Options  | disable   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **public-tcp-mss-adjust** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | TCP maximum segment size (MSS) on public network   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">l2tpv3</a> <b>public-tcp-mss-adjust</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">public-tcp-mss-adjust</a>  |
| Range      | 512 to 9000  |
| Units      | octets   |
| Options    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **lac**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lac</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <b>lac</b> |
| Tree       | <a href="#">lac</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **df-bit** *keyword*

|            |   |
|------------|---|
| Synopsis   | DF (do not fragment) bit in data traffic transmitted as LAC   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <b>lac</b> <b>df-bit</b> <i>keyword</i> |
| Tree       | <a href="#">df-bit</a>  |
| Options    | false, true   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **Ins**

|          |  |
|----------|--|
| Synopsis | Enter the <b>Ins</b> context   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <b>Ins</b> |

|            |  |
|------------|--|
| Tree       | <a href="#">Ins</a>                          |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **Ins-group** *reference*

|            |  |
|------------|--|
| Synopsis   | ISA LNS group  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">Ins</a> <a href="#">Ins-group</a> <i>reference</i> |
| Tree       | <a href="#">Ins-group</a>  |
| Reference  | <b>configure</b> <a href="#">isa</a> <a href="#">Ins-group</a> <i>number</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **load-balance-method** *keyword*

|            |  |
|------------|--|
| Synopsis   | New sessions for L2TP ISA MDA  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">Ins</a> <a href="#">load-balance-method</a> <i>keyword</i> |
| Tree       | <a href="#">load-balance-method</a>  |
| Options    | per-session, per-tunnel  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **mlppp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mlppp</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">Ins</a> <a href="#">mlppp</a> |
| Tree       | <a href="#">mlppp</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s   |

### **admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of MLPPP in the L2TP tunnel   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">Ins</a> <a href="#">mlppp</a> <a href="#">admin-state</a> <i>keyword</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">admin-state</a>             |
| Options    | enable, disable                         |
| Introduced | 16.0.R1                                 |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s |

## endpoint

|            |   |
|------------|---|
| Synopsis   | Enter the <b>endpoint</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <b>endpoint</b> |
| Tree       | <a href="#">endpoint</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s   |

## ip (*ipv4-address* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Endpoint ID as an IP address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <b>endpoint</b> <b>ip</b> ( <i>ipv4-address</i>   <i>keyword</i> ) |
| Tree       | <a href="#">ip</a>   |
| Options    | system   |
| Notes      | The following elements are part of a choice: <b>ip</b> or <b>mac</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s  |

## mac (*mac-address* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Endpoint ID as a MAC address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <b>endpoint</b> <b>mac</b> ( <i>mac-address</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mac</a>  |
| Options    | system   |
| Notes      | The following elements are part of a choice: <b>ip</b> or <b>mac</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s  |

**interleave** *keyword*

|            |  |
|------------|--|
| Synopsis   | Use of Link fragmentation and interleaving   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <b>interleave</b> <i>keyword</i> |
| Tree       | <a href="#">interleave</a>   |
| Options    | false, true  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s  |

**max-fragment-delay** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum fragment delay caused by transmission on a link   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <b>max-fragment-delay</b> <i>number</i> |
| Tree       | <a href="#">max-fragment-delay</a>  |
| Range      | 5 to 1000   |
| Units      | milliseconds  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s   |

**max-links** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum MLPPP links  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <b>max-links</b> <i>number</i> |
| Tree       | <a href="#">max-links</a>  |
| Range      | 1 to 8   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s  |

**reassemble-timeout** *number*

|          |   |
|----------|---|
| Synopsis | Reassembly timeout  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <b>reassemble-timeout</b> <i>number</i> |
| Tree     | <a href="#">reassemble-timeout</a>  |
| Range    | 100   1000  |

|            |   |
|------------|---|
| Units      | milliseconds                            |
| Introduced | 16.0.R1                                 |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s |

### **short-sequence-numbers** *keyword*

|            |  |
|------------|--|
| Synopsis   | Request a peer to send short sequence numbers  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">mlppp</a> <b>short-sequence-numbers</b> <i>keyword</i> |
| Tree       | <a href="#">short-sequence-numbers</a>   |
| Options    | false, true  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s  |

### **ppp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ppp</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <b>ppp</b> |
| Tree       | <a href="#">ppp</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **authentication** *keyword*

|            |   |
|------------|---|
| Synopsis   | PPP authentication protocol to negotiate  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <b>ppp</b> <b>authentication</b> <i>keyword</i> |
| Tree       | <a href="#">authentication</a>  |
| Options    | pap, chap, pref-chap, pref-pap  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **authentication-policy** *string*

|          |   |
|----------|---|
| Synopsis | Authentication policy when a DHCP message is received |
|----------|---|

|               |  |
|---------------|--|
| Context       | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> <b>lns ppp authentication-policy</b> <i>string</i> |
| Tree          | <a href="#">authentication-policy</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### chap-challenge-length

|            |  |
|------------|--|
| Synopsis   | Enter the <b>chap-challenge-length</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> <b>lns ppp chap-challenge-length</b> |
| Tree       | <a href="#">chap-challenge-length</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### end number

|            |  |
|------------|--|
| Synopsis   | Upper bound of the PPP CHAP challenge length   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> <b>lns ppp chap-challenge-length end</b> <i>number</i> |
| Tree       | <a href="#">end</a>  |
| Range      | 8 to 64  |
| Units      | octets   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### start number

|            |  |
|------------|--|
| Synopsis   | Lower bound of the PPP CHAP challenge length   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> <b>lns ppp chap-challenge-length start</b> <i>number</i> |
| Tree       | <a href="#">start</a>  |
| Range      | 8 to 64  |
| Units      | octets   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## default-group-interface

Synopsis Enter the **default-group-interface** context

Context **configure service vprn** *string* **l2tp group** *string* **tunnel** *string* **lns ppp default-group-interface**

Tree [default-group-interface](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## interface *string*

Synopsis Group interface

Context **configure service vprn** *string* **l2tp group** *string* **tunnel** *string* **lns ppp default-group-interface interface** *string*

Tree [interface](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## service-name *string*

Synopsis Administrative service name

Context **configure service vprn** *string* **l2tp group** *string* **tunnel** *string* **lns ppp default-group-interface service-name** *string*

Tree [service-name](#)

String Length 1 to 64

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ipcp-subnet-negotiation *keyword*

Synopsis Use of IPCP subnet negotiation for PPPoE hosts

Context **configure service vprn** *string* **l2tp group** *string* **tunnel** *string* **lns ppp ipcp-subnet-negotiation** *keyword*

Tree [ipcp-subnet-negotiation](#)

|            |  |
|------------|--|
| Options    | false, true                                  |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## keepalive

|            |  |
|------------|--|
| Synopsis   | Enter the <b>keepalive</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp group string tunnel string lns ppp keepalive</a> |
| Tree       | <a href="#">keepalive</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## interval *number*

|            |  |
|------------|--|
| Synopsis   | PPP keepalive interval   |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp group string tunnel string lns ppp keepalive interval number</a> |
| Tree       | <a href="#">interval</a>   |
| Range      | 10 to 300  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## multiplier *number*

|            |  |
|------------|--|
| Synopsis   | PPP keepalive multiplier   |
| Context    | <b>configure</b> <a href="#">service vprn string l2tp group string tunnel string lns ppp keepalive multiplier number</a> |
| Tree       | <a href="#">multiplier</a>   |
| Range      | 1 to 5   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**lcp-force-ack-accm** *keyword*

|            |  |
|------------|--|
| Synopsis   | Forced acknowledgement of the LCP Asynchronous Control Character Map (ACCM) option   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">ppp</a> <b>lcp-force-ack-accm</b> <i>keyword</i> |
| Tree       | <a href="#">lcp-force-ack-accm</a>   |
| Options    | false, true  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**lcp-ignore-magic-numbers** *keyword*

|            |  |
|------------|--|
| Synopsis   | Magic-Number field in LCP Echo-Request and LCP Echo-Reply messages that are checked  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">ppp</a> <b>lcp-ignore-magic-numbers</b> <i>keyword</i> |
| Tree       | <a href="#">lcp-ignore-magic-numbers</a>   |
| Options    | false, true  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**mtu** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum PPP MTU size   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">ppp</a> <b>mtu</b> <i>number</i> |
| Tree       | <a href="#">mtu</a>  |
| Range      | 512 to 9212  |
| Units      | octets   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**proxy-authentication** *keyword*

|          |  |
|----------|--|
| Synopsis | Authentication AVPs that are received from LAC   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">ppp</a> <b>proxy-authentication</b> <i>keyword</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">proxy-authentication</a>         |
| Options    | false, true                                  |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **proxy-lcp** *keyword*

|            |   |
|------------|---|
| Synopsis   | Use the Proxy LCP AVPs that are received from the LAC   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">ppp</a> <a href="#">proxy-lcp</a> <i>keyword</i> |
| Tree       | <a href="#">proxy-lcp</a>   |
| Options    | false, true   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **reject-disabled-ncp** *keyword*

|            |   |
|------------|---|
| Synopsis   | Force LCP Project Reject for IPv6CP Configure Request   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">ppp</a> <a href="#">reject-disabled-ncp</a> <i>keyword</i> |
| Tree       | <a href="#">reject-disabled-ncp</a>   |
| Options    | false, true   |
| Introduced | 16.0.R6   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **user-db** *string*

|               |  |
|---------------|--|
| Synopsis      | Local user database for PPP PAP and CHAP authentication  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">lns</a> <a href="#">ppp</a> <a href="#">user-db</a> <i>string</i> |
| Tree          | <a href="#">user-db</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **local-address** *string*

|          |               |
|----------|---------------|
| Synopsis | Local address |
|----------|---------------|

Context        **configure service vpn** *string l2tp group string tunnel string local-address string*  
 Tree            [local-address](#)  
 Introduced     16.0.R1  
 Platforms     7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **local-name** *string*

Synopsis        Local host name used to distinguish tunnels  
 Context        **configure service vpn** *string l2tp group string tunnel string local-name string*  
 Tree            [local-name](#)  
 String Length 1 to 64  
 Introduced     16.0.R1  
 Platforms     7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-retries-estab** *number*

Synopsis        Maximum retries for established tunnels  
 Context        **configure service vpn** *string l2tp group string tunnel string max-retries-estab number*  
 Tree            [max-retries-estab](#)  
 Range          2 to 7  
 Introduced     16.0.R1  
 Platforms     7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-retries-not-estab** *number*

Synopsis        Maximum retries for unestablished tunnels  
 Context        **configure service vpn** *string l2tp group string tunnel string max-retries-not-estab number*  
 Tree            [max-retries-not-estab](#)  
 Range          2 to 7  
 Introduced     16.0.R1  
 Platforms     7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **password** *string*

Synopsis        Password between L2TP LAC and LNS

|               |  |
|---------------|--|
| Context       | <b>configure service vpn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> <b>password</b> <i>string</i> |
| Tree          | <b>password</b>  |
| String Length | 1 to 115   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**peer string**

|            |  |
|------------|--|
| Synopsis   | Peer address   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> <b>peer</b> <i>string</i> |
| Tree       | <b>peer</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**preference number**

|            |  |
|------------|--|
| Synopsis   | Tunnel preference number with its group  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> <b>preference</b> <i>number</i> |
| Tree       | <b>preference</b>  |
| Range      | 0 to 16777215  |
| Default    | 50   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**radius-accounting-policy reference**

|            |   |
|------------|---|
| Synopsis   | RADIUS accounting policy  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>l2tp group</b> <i>string</i> <b>tunnel</b> <i>string</i> <b>radius-accounting-policy</b> <i>reference</i> |
| Tree       | <b>radius-accounting-policy</b>   |
| Reference  | <b>configure aaa radius</b> <b>l2tp-accounting-policy</b> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**receive-window-size** *number*

|            |   |
|------------|---|
| Synopsis   | L2TP receive window size  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">receive-window-size</a> <i>number</i> |
| Tree       | <a href="#">receive-window-size</a>   |
| Range      | 4 to 1024   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**remote-name** *string*

|               |   |
|---------------|---|
| Synopsis      | Remote tunnel host name   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">remote-name</a> <i>string</i> |
| Tree          | <a href="#">remote-name</a>   |
| String Length | 1 to 64   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**session-limit** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | L2TP session limit for each tunnel of this router  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group</a> <i>string</i> <a href="#">tunnel</a> <i>string</i> <a href="#">session-limit</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">session-limit</a>  |
| Range      | 1 to 65534   |
| Options    | unlimited  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**group-session-limit** *number*

|            |  |
|------------|--|
| Synopsis   | L2TP session limit for each group of this router   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp group-session-limit</a> <i>number</i> |
| Tree       | <a href="#">group-session-limit</a>  |
| Range      | 1 to 250000  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **hello-interval** (*number* | *keyword*)

Synopsis Hello interval

Context **configure service vprn** *string* **l2tp hello-interval** (*number* | *keyword*)

Tree [hello-interval](#)

Range 10 to 3600

Units seconds

Options infinite

Default 300

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **idle-timeout** (*number* | *keyword*)

Synopsis Idle timeout

Context **configure service vprn** *string* **l2tp idle-timeout** (*number* | *keyword*)

Tree [idle-timeout](#)

Range 0 to 3600

Units seconds

Options infinite

Default infinite

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ignore-avps**

Synopsis Enter the **ignore-avps** context

Context **configure service vprn** *string* **l2tp ignore-avps**

Tree [ignore-avps](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**sequencing-required** *boolean*

|            |   |
|------------|---|
| Synopsis   | Ignore Sequencing Required AVP  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">ignore-avps</a> <a href="#">sequencing-required</a> <i>boolean</i> |
| Tree       | <a href="#">sequencing-required</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**l2tpv3**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>l2tpv3</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">l2tpv3</a> |
| Tree       | <a href="#">l2tpv3</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**cookie-length** *number*

|            |   |
|------------|---|
| Synopsis   | Cookie field length   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">l2tpv3</a> <a href="#">cookie-length</a> <i>number</i> |
| Tree       | <a href="#">cookie-length</a>   |
| Range      | 4   8   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**digest-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Hashing algorithm that calculates the message digest   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">l2tpv3</a> <a href="#">digest-type</a> <i>keyword</i> |
| Tree       | <a href="#">digest-type</a>  |
| Options    | md5, sha1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**nonce-length** *number*

|            |   |
|------------|---|
| Synopsis   | Length of the local L2TPv3 nonce (random number)  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp l2tpv3 nonce-length</b> <i>number</i> |
| Tree       | <b>nonce-length</b>   |
| Range      | 0   16 to 64  |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                   |

**password** *string*

|               |   |
|---------------|---|
| Synopsis      | L2TPv3 password   |
| Context       | <b>configure service vprn</b> <i>string</i> <b>l2tp l2tpv3 password</b> <i>string</i> |
| Tree          | <b>password</b>   |
| String Length | 1 to 115  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                               |

**private-tcp-mss-adjust** *number*

|            |   |
|------------|---|
| Synopsis   | TCP maximum segment size (MSS) on private network   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>l2tp l2tpv3 private-tcp-mss-adjust</b> <i>number</i> |
| Tree       | <b>private-tcp-mss-adjust</b>   |
| Range      | 512 to 9000   |
| Units      | octets  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**public-tcp-mss-adjust** *number*

|          |  |
|----------|--|
| Synopsis | TCP maximum segment size (MSS) on public network   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>l2tp l2tpv3 public-tcp-mss-adjust</b> <i>number</i> |
| Tree     | <b>public-tcp-mss-adjust</b>   |
| Range    | 512 to 9000  |
| Units    | octets   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **transport-type**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>transport-type</b> context                         |
| Context    | <b>configure service vprn string l2tp l2tpv3 transport-type</b> |
| Tree       | <a href="#">transport-type</a>                                  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR         |

### **ip boolean**

|            |  |
|------------|--|
| Synopsis   | Use IP as the transport type for the L2TPv3 tunnel                         |
| Context    | <b>configure service vprn string l2tp l2tpv3 transport-type ip boolean</b> |
| Tree       | <a href="#">ip</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                    |

### **lac**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lac</b> context                            |
| Context    | <b>configure service vprn string l2tp lac</b>           |
| Tree       | <a href="#">lac</a>                                     |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **calling-number-format string**

|               |  |
|---------------|--|
| Synopsis      | Calling Number AVP for L2TP control messages                               |
| Context       | <b>configure service vprn string l2tp lac calling-number-format string</b> |
| Tree          | <a href="#">calling-number-format</a>                                      |
| String Length | 1 to 255   |
| Default       | %S %s  |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **cisco-nas-port**

Synopsis Enter the **cisco-nas-port** context  
Context **configure service vprn string l2tp lac cisco-nas-port**  
Tree [cisco-nas-port](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ethernet string**

Synopsis L2TP Cisco NAS port AVP with binary patterns for Ethernet  
Context **configure service vprn string l2tp lac cisco-nas-port ethernet string**  
Tree [ethernet](#)  
String Length 1 to 255  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **df-bit boolean**

Synopsis Send all L2TP packets with DF bit set to 1  
Context **configure service vprn string l2tp lac df-bit boolean**  
Tree [df-bit](#)  
Default true  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **local-address string**

Synopsis Local address  
Context **configure service vprn string l2tp local-address string**  
Tree [local-address](#)  
Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **local-name** *string*

Synopsis Local host name  
Context **configure service vprn** *string* **l2tp local-name** *string*  
Tree **local-name**  
String Length 1 to 64  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-retries-estab** *number*

Synopsis Maximum retries for established tunnels  
Context **configure service vprn** *string* **l2tp max-retries-estab** *number*  
Tree **max-retries-estab**  
Range 2 to 7  
Default 5  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **max-retries-not-estab** *number*

Synopsis Maximum retries for unestablished tunnels  
Context **configure service vprn** *string* **l2tp max-retries-not-estab** *number*  
Tree **max-retries-not-estab**  
Range 2 to 7  
Default 5  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **next-attempt** *keyword*

Synopsis Tunnel that is selected when previous session setup failed  
Context **configure service vprn** *string* **l2tp next-attempt** *keyword*

---

|            |   |
|------------|---|
| Tree       | <a href="#">next-attempt</a>                            |

| Reference  | <b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">l2tp-accounting-policy</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**receive-window-size** *number*

|            |  |
|------------|--|
| Synopsis   | L2TP receive window size   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp receive-window-size</a> <i>number</i> |
| Tree       | <a href="#">receive-window-size</a>  |
| Range      | 4 to 1024  |
| Default    | 64   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**replace-result-code**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>replace-result-code</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp replace-result-code</a> |
| Tree       | <a href="#">replace-result-code</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**cdn-invalid-dst** *boolean*

|            |   |
|------------|---|
| Synopsis   | Replace result code with general error code   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp replace-result-code</a> <a href="#">cdn-invalid-dst</a> <i>boolean</i> |
| Tree       | <a href="#">cdn-invalid-dst</a>   |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**cdn-permanent-no-facilities** *boolean*

|            |   |
|------------|---|
| Synopsis   | Replace result code with general error  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp replace-result-code</a> <a href="#">cdn-permanent-no-facilities</a> <i>boolean</i> |
| Tree       | <a href="#">cdn-permanent-no-facilities</a>   |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**cdn-temporary-no-facilities** *boolean*

|            |   |
|------------|---|
| Synopsis   | Replace result code with general error  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">replace-result-code</a> <a href="#">cdn-temporary-no-facilities</a> <i>boolean</i> |
| Tree       | <a href="#">cdn-temporary-no-facilities</a>   |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**rtm-debounce-time** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Debounce timer that declares L2TP action for route table management events  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">rtm-debounce-time</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">rtm-debounce-time</a>   |
| Range      | 0 to 5000   |
| Units      | milliseconds  |
| Options    | infinite  |
| Default    | infinite  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**session-assign-method** *keyword*

|            |   |
|------------|---|
| Synopsis   | Session assignment method   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">session-assign-method</a> <i>keyword</i> |
| Tree       | <a href="#">session-assign-method</a>   |
| Options    | existing-first, weighted, weighted-random   |
| Default    | existing-first  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**session-limit** *number*

|          |                                   |
|----------|-----------------------------------|
| Synopsis | L2TP session limit of this router |
|----------|-----------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vpn</b> <i>string</i> <b>l2tp session-limit</b> <i>number</i> |
| Tree       | <a href="#">session-limit</a>  |
| Range      | 1 to 250000  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                            |

### tunnel-selection-blacklist

|            |   |
|------------|---|
| Synopsis   | Enter the <b>tunnel-selection-blacklist</b> context                               |
| Context    | <b>configure service vpn</b> <i>string</i> <b>l2tp tunnel-selection-blacklist</b> |
| Tree       | <a href="#">tunnel-selection-blacklist</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                           |

### add-tunnel-on

|            |   |
|------------|---|
| Synopsis   | Enter the <b>add-tunnel-on</b> context  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>l2tp tunnel-selection-blacklist add-tunnel-on</b> |
| Tree       | <a href="#">add-tunnel-on</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### address-change-timeout *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable a timed-out tunnel to be forced to the denylist  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>l2tp tunnel-selection-blacklist add-tunnel-on address-change-timeout</b> <i>boolean</i> |
| Tree       | <a href="#">address-change-timeout</a>  |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### cdn-err-code *boolean*

|          |   |
|----------|---|
| Synopsis | Add to deny if CDN is received with code: General error |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn string l2tp tunnel-selection-blacklist add-tunnel-on cdn-err-code boolean</b> |
| Tree       | <a href="#">cdn-err-code</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **cdn-invalid-dst boolean**

|            |  |
|------------|--|
| Synopsis   | Force tunnel to the denylist in case of Result Codes 6   |
| Context    | <b>configure service vprn string l2tp tunnel-selection-blacklist add-tunnel-on cdn-invalid-dst boolean</b> |
| Tree       | <a href="#">cdn-invalid-dst</a>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **cdn-permanent-no-facilities boolean**

|            |  |
|------------|--|
| Synopsis   | Force tunnel to the denylist in case of Result Codes 5   |
| Context    | <b>configure service vprn string l2tp tunnel-selection-blacklist add-tunnel-on cdn-permanent-no-facilities boolean</b> |
| Tree       | <a href="#">cdn-permanent-no-facilities</a>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **cdn-temporary-no-facilities boolean**

|            |  |
|------------|--|
| Synopsis   | Force tunnel to the denylist in case of Result Codes 4   |
| Context    | <b>configure service vprn string l2tp tunnel-selection-blacklist add-tunnel-on cdn-temporary-no-facilities boolean</b> |
| Tree       | <a href="#">cdn-temporary-no-facilities</a>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**stop-ccn-err-code** *boolean*

|            |  |
|------------|--|
| Synopsis   | Add to denylist if received with general error code  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp tunnel-selection-blacklist add-tunnel-on stop-ccn-err-code</a> <i>boolean</i> |
| Tree       | <a href="#">stop-ccn-err-code</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**stop-ccn-other** *boolean*

|            |   |
|------------|---|
| Synopsis   | Add to denylist if StopCCN received with general error  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp tunnel-selection-blacklist add-tunnel-on stop-ccn-other</a> <i>boolean</i> |
| Tree       | <a href="#">stop-ccn-other</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**tx-cdn-not-established-in-time** *boolean*

|            |   |
|------------|---|
| Synopsis   | Add to denylist if CDN transmitted with result code   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp tunnel-selection-blacklist add-tunnel-on tx-cdn-not-established-in-time</a> <i>boolean</i> |
| Tree       | <a href="#">tx-cdn-not-established-in-time</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**max-list-length** (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | Number of tunnels or peers in the denylist   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">l2tp tunnel-selection-blacklist max-list-length</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">max-list-length</a>  |

|            |   |
|------------|---|
| Range      | 1 to 65535  |
| Options    | infinite  |
| Default    | infinite  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **max-time** *number*

|            |   |
|------------|---|
| Synopsis   | Time that a tunnel or peer can remain in the denylist   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">tunnel-selection-blacklist</a> <b>max-time</b> <i>number</i> |
| Tree       | <a href="#">max-time</a>  |
| Range      | 1 to 60   |
| Units      | minutes   |
| Default    | 5   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **timeout-action** *keyword*

|            |  |
|------------|--|
| Synopsis   | Action when a tunnel or peer exceeds time in denylist  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">tunnel-selection-blacklist</a> <b>timeout-action</b> <i>keyword</i> |
| Tree       | <a href="#">timeout-action</a>   |
| Options    | remove-from-blacklist, try-one-session   |
| Default    | remove-from-blacklist  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **tunnel-session-limit** *number*

|            |   |
|------------|---|
| Synopsis   | L2TP session limit for each tunnel of this router   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">l2tp</a> <a href="#">tunnel-session-limit</a> <i>number</i> |
| Tree       | <a href="#">tunnel-session-limit</a>  |
| Range      | 1 to 65534  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**label-mode** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Allocation mode for VPRN service labels   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>label-mode</b> <i>keyword</i> |
| Tree       | <a href="#">label-mode</a>  |
| Options    | vrf, next-hop   |
| Default    | vrf   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**local-routes-domain-id** *string*

|             |  |
|-------------|--|
| Synopsis    | Local routes domain ID   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>local-routes-domain-id</b> <i>string</i>   |
| Tree        | <a href="#">local-routes-domain-id</a>   |
| Description | <p>This command specifies the domain ID that is used in the D-PATH attribute for local routes before those routes are exported to a BGP neighbor using BGP-IPVPN, EVPN-IFF, EVPN-IFL, or PE-CE BGP. A local route is a non-BGP route installed in the VPRN route table and learned using static route or an IGP.</p> <p>The domain IDs are used in the D-PATH attribute, in accordance with draft-ietf-bess-evpn-ipvpn-interworking. Gateway routers modify the D-PATH attribute. A gateway is a PE where a VPRN is instantiated. The VPRN in this case advertises or receives routes from multiple BGP owners (for example, EVPN IFL and BGP IPVPN).</p> <p>Gateways use the D-PATH attribute to detect loops (for received routes where the D-PATH contains a local domain ID) and to make BGP best-path selection decisions based on the D-PATH length (shorter D-PATH is preferred).</p> |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

**log**

|          |   |
|----------|---|
| Synopsis | Enter the <b>log</b> context                                  |

### **match**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>match</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log filter</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">match</a> |
| Tree       | <a href="#">match</a>  |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **application**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>application</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log filter</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">match</a> <a href="#">application</a> |
| Tree       | <a href="#">application</a>  |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **eq** *keyword*

|          |  |
|----------|--|
| Synopsis | Application to match   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log filter</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">match</a> <a href="#">application</a> <a href="#">eq</a> <i>keyword</i> |
| Tree     | <a href="#">eq</a>   |

|            |  |
|------------|--|
| Options    | application-assurance, aps, atm, bgp, cflowd, chassis, debug, dhcp, dhcps, diameter, dot1x, efm-oam, elmi, ering, eth-cfm, etun, filter, gsmp, igh, igmp, igmp-snooping, ip, ipsec, isis, l2tp, lag, ldp, li, lldp, logger, mcpath, mc-redundancy, mirror, mld, mld-snooping, mpls, msdp, nat, ntp, oam, ospf, pim, pim-snooping, port, ppp, pppoe, ptp, rip, route-policy, rsvp, security, snmp, stp, svcmgr, system, user, video, vrrp, vrtr, radius, wpp, wlan-gw, dynsvc, mpls-tp, bfd, python, ripng, openflow, sflow, rpki, gmpls, lmp, pcep, calltrace, satellite, ldap, pppoe-clnt, tls, adp, mgmt-core, macsec, pcap, auto-prov, bier, pfc, tree-sid, srv6, sr-mpls |
| Notes      | The following elements are part of a choice: <b>eq</b> or <b>neq</b> .   |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### neq keyword

|            |  |
|------------|--|
| Synopsis   | Application to be filtered out   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log filter</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">match</a> <a href="#">application</a> <b>neq</b> <i>keyword</i>   |
| Tree       | <a href="#">neq</a>  |
| Options    | application-assurance, aps, atm, bgp, cflowd, chassis, debug, dhcp, dhcps, diameter, dot1x, efm-oam, elmi, ering, eth-cfm, etun, filter, gsmp, igh, igmp, igmp-snooping, ip, ipsec, isis, l2tp, lag, ldp, li, lldp, logger, mcpath, mc-redundancy, mirror, mld, mld-snooping, mpls, msdp, nat, ntp, oam, ospf, pim, pim-snooping, port, ppp, pppoe, ptp, rip, route-policy, rsvp, security, snmp, stp, svcmgr, system, user, video, vrrp, vrtr, radius, wpp, wlan-gw, dynsvc, mpls-tp, bfd, python, ripng, openflow, sflow, rpki, gmpls, lmp, pcep, calltrace, satellite, ldap, pppoe-clnt, tls, adp, mgmt-core, macsec, pcap, auto-prov, bier, pfc, tree-sid, srv6, sr-mpls |
| Notes      | The following elements are part of a choice: <b>eq</b> or <b>neq</b> .   |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### event

|            |  |
|------------|--|
| Synopsis   | Enter the <b>event</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log filter</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">match</a> <a href="#">event</a> |
| Tree       | <a href="#">event</a>  |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **eq number**

|            |   |
|------------|---|
| Synopsis   | Log event message to match  |
| Context    | <b>configure service vprn string log filter string named-entry string match event eq number</b> |
| Tree       | <a href="#">eq</a>  |
| Range      | 1 to 4294967295   |
| Notes      | The following elements are part of a choice: <b>eq, gt, gte, lt, lte</b> , or <b>neq</b> .      |
| Introduced | 21.2.R1   |
| Platforms  | All   |

### **gt number**

|            |   |
|------------|---|
| Synopsis   | Number of the log event to match  |
| Context    | <b>configure service vprn string log filter string named-entry string match event gt number</b> |
| Tree       | <a href="#">gt</a>  |
| Range      | 1 to 4294967295   |
| Notes      | The following elements are part of a choice: <b>eq, gt, gte, lt, lte</b> , or <b>neq</b> .      |
| Introduced | 21.2.R1   |
| Platforms  | All   |

### **gte number**

|            |  |
|------------|--|
| Synopsis   | Number of the log event to match   |
| Context    | <b>configure service vprn string log filter string named-entry string match event gte number</b> |
| Tree       | <a href="#">gte</a>  |
| Range      | 1 to 4294967295  |
| Notes      | The following elements are part of a choice: <b>eq, gt, gte, lt, lte</b> , or <b>neq</b> .       |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **lt number**

|          |   |
|----------|---|
| Synopsis | Number of the log event to match  |
| Context  | <b>configure service vprn string log filter string named-entry string match event lt number</b> |
| Tree     | <a href="#">lt</a>  |

---

|            |  |
|------------|--|
| Range      | 1 to 4294967295  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>gte</b> , <b>lt</b> , <b>lte</b> , or <b>neq</b> . |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **lte number**

|            |  |
|------------|--|
| Synopsis   | Number of the log event to match   |
| Context    | <b>configure service vprn string log filter string named-entry string match event lte number</b>                           |
| Tree       | <a href="#">lte</a>  |
| Range      | 1 to 4294967295  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>gte</b> , <b>lt</b> , <b>lte</b> , or <b>neq</b> . |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **neq number**

|            |  |
|------------|--|
| Synopsis   | Log event message to filter out  |
| Context    | <b>configure service vprn string log filter string named-entry string match event neq number</b>                           |
| Tree       | <a href="#">neq</a>  |
| Range      | 1 to 4294967295  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>gte</b> , <b>lt</b> , <b>lte</b> , or <b>neq</b> . |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **message**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>message</b> context  |
| Context    | <b>configure service vprn string log filter string named-entry string match message</b> |
| Tree       | <a href="#">message</a>   |
| Introduced | 21.2.R1   |
| Platforms  | All   |

**eq string**

|               |   |
|---------------|---|
| Synopsis      | Log event message to match  |
| Context       | <b>configure service vprn string log filter string named-entry string match message eq string</b> |
| Tree          | <a href="#">eq</a>  |
| String Length | 1 to 400  |
| Notes         | The following elements are part of a choice: <b>eq</b> or <b>neq</b> .                            |
| Introduced    | 21.2.R1   |
| Platforms     | All   |

**neq string**

|               |  |
|---------------|--|
| Synopsis      | Log event message to be filtered out   |
| Context       | <b>configure service vprn string log filter string named-entry string match message neq string</b> |
| Tree          | <a href="#">neq</a>  |
| String Length | 1 to 400   |
| Notes         | The following elements are part of a choice: <b>eq</b> or <b>neq</b> .                             |
| Introduced    | 21.2.R1  |
| Platforms     | All  |

**regexp boolean**

|            |  |
|------------|--|
| Synopsis   | String comparison to determine if the log event matches the value of pattern                           |
| Context    | <b>configure service vprn string log filter string named-entry string match message regexp boolean</b> |
| Tree       | <a href="#">regexp</a>   |
| Default    | false  |
| Introduced | 21.2.R1  |
| Platforms  | All  |

**severity**

|          |  |
|----------|--|
| Synopsis | Enter the <b>severity</b> context  |
| Context  | <b>configure service vprn string log filter string named-entry string match severity</b> |
| Tree     | <a href="#">severity</a>   |

Introduced 21.2.R1  
Platforms All

### **eq** keyword

Synopsis Log event severity level to match  
Context **configure service vprn string log filter string named-entry string match severity eq keyword**  
Tree **eq**  
Options cleared, indeterminate, critical, major, minor, warning  
Notes The following elements are part of a choice: **eq, gt, gte, lt, lte, or neq.**  
Introduced 21.2.R1  
Platforms All

### **gt** keyword

Synopsis Log event severity level  
Context **configure service vprn string log filter string named-entry string match severity gt keyword**  
Tree **gt**  
Options cleared, indeterminate, critical, major, minor, warning  
Notes The following elements are part of a choice: **eq, gt, gte, lt, lte, or neq.**  
Introduced 21.2.R1  
Platforms All

### **gte** keyword

Synopsis Log event severity level  
Context **configure service vprn string log filter string named-entry string match severity gte keyword**  
Tree **gte**  
Options cleared, indeterminate, critical, major, minor, warning  
Notes The following elements are part of a choice: **eq, gt, gte, lt, lte, or neq.**  
Introduced 21.2.R1  
Platforms All

### **lt** keyword

|            |   |
|------------|---|
| Synopsis   | Log event severity level  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>log filter</b> <i>string</i> <b>named-entry</b> <i>string</i> <b>match severity</b> <b>lt</b> <i>keyword</i> |
| Tree       | <b>lt</b>   |
| Options    | cleared, indeterminate, critical, major, minor, warning   |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>gte</b> , <b>lt</b> , <b>lte</b> , or <b>neq</b> .                                  |
| Introduced | 21.2.R1   |
| Platforms  | All   |

### **lte** keyword

|            |  |
|------------|--|
| Synopsis   | Log event severity level   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>log filter</b> <i>string</i> <b>named-entry</b> <i>string</i> <b>match severity</b> <b>lte</b> <i>keyword</i> |
| Tree       | <b>lte</b>   |
| Options    | cleared, indeterminate, critical, major, minor, warning  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>gte</b> , <b>lt</b> , <b>lte</b> , or <b>neq</b> .                                   |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **neq** keyword

|            |  |
|------------|--|
| Synopsis   | Log event severity level to filter out   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>log filter</b> <i>string</i> <b>named-entry</b> <i>string</i> <b>match severity</b> <b>neq</b> <i>keyword</i> |
| Tree       | <b>neq</b>   |
| Options    | cleared, indeterminate, critical, major, minor, warning  |
| Notes      | The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>gte</b> , <b>lt</b> , <b>lte</b> , or <b>neq</b> .                                   |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **subject**

|          |                                  |
|----------|----------------------------------|
| Synopsis | Enter the <b>subject</b> context |
|----------|----------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn string log filter string named-entry string match subject</b> |
| Tree       | <b>subject</b>  |
| Introduced | 21.2.R1   |
| Platforms  | All   |

**eq string**

|               |   |
|---------------|---|
| Synopsis      | Log event subject string to match   |
| Context       | <b>configure service vprn string log filter string named-entry string match subject eq string</b> |
| Tree          | <b>eq</b>   |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a choice: <b>eq</b> or <b>neq</b> .                            |
| Introduced    | 21.2.R1   |
| Platforms     | All   |

**neq string**

|               |  |
|---------------|--|
| Synopsis      | Log event subject string to filter out   |
| Context       | <b>configure service vprn string log filter string named-entry string match subject neq string</b> |
| Tree          | <b>neq</b>   |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>eq</b> or <b>neq</b> .                             |
| Introduced    | 21.2.R1  |
| Platforms     | All  |

**regexp boolean**

|            |  |
|------------|--|
| Synopsis   | String comparison to determine if the log event matches the value of subject                           |
| Context    | <b>configure service vprn string log filter string named-entry string match subject regexp boolean</b> |
| Tree       | <b>regexp</b>  |
| Default    | false  |
| Introduced | 21.2.R1  |
| Platforms  | All  |

**log-id** [*name*] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>log-id</b> list instance                         |
| Context        | <b>configure</b> <i>service vprn string log log-id string</i> |
| Tree           | <i>log-id</i>   |
| Max. Instances | 30  |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Log ID  |
| Context       | <b>configure</b> <i>service vprn string log log-id string</i> |
| Tree          | <i>log-id</i>   |
| String Length | 1 to 64   |
| Notes         | This element is part of a list key.                           |
| Introduced    | 21.2.R1   |
| Platforms     | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the log   |
| Context    | <b>configure</b> <i>service vprn string log log-id string admin-state keyword</i> |
| Tree       | <i>admin-state</i>  |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**description** *string*

|          |  |
|----------|--|
| Synopsis | Text description   |
| Context  | <b>configure</b> <i>service vprn string log log-id string description string</i> |
| Tree     | <i>description</i>   |

|               |         |
|---------------|---------|
| String Length | 1 to 80 |
| Introduced    | 16.0.R1 |
| Platforms     | All     |

## destination

|            |  |
|------------|--|
| Synopsis   | Enter the <b>destination</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">log log-id</a> <i>string</i> <a href="#">destination</a> |
| Tree       | <a href="#">destination</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## netconf

|            |  |
|------------|--|
| Synopsis   | Enable the <b>netconf</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">log log-id</a> <i>string</i> <a href="#">destination</a> <a href="#">netconf</a> |
| Tree       | <a href="#">netconf</a>  |
| Notes      | The following elements are part of a choice: <b>netconf</b> , <b>snmp</b> , or <b>syslog</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## max-entries *number*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Number of events stored in the NETCONF log   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">log log-id</a> <i>string</i> <a href="#">destination</a> <a href="#">netconf</a> <a href="#">max-entries</a> <i>number</i> |
| Tree       | <a href="#">max-entries</a>  |
| Range      | 50 to 3000   |
| Default    | 100  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## snmp

|            |  |
|------------|--|
| Synopsis   | Enable the <b>snmp</b> context   |
| Context    | <b>configure service vprn string log log-id string destination snmp</b>                        |
| Tree       | <b>snmp</b>  |
| Notes      | The following elements are part of a choice: <b>netconf</b> , <b>snmp</b> , or <b>syslog</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## max-entries *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Number of events stored in the memory log  |
| Context    | <b>configure service vprn string log log-id string destination snmp max-entries number</b> |
| Tree       | <b>max-entries</b>   |
| Range      | 50 to 3000   |
| Default    | 100  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## syslog *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Index with the information to format event messages sent to a specific SYSLOG collector        |
| Context    | <b>configure service vprn string log log-id string destination syslog reference</b>            |
| Tree       | <b>syslog</b>  |
| Reference  | <b>configure service vprn string log syslog string</b>   |
| Notes      | The following elements are part of a choice: <b>netconf</b> , <b>snmp</b> , or <b>syslog</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **filter** *reference*

|            |  |
|------------|--|
| Synopsis   | Event filter policy with the log destination   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">filter</a> <i>reference</i> |
| Tree       | <a href="#">filter</a>   |
| Reference  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">filter</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **netconf-stream** *string*

|               |   |
|---------------|---|
| Synopsis      | Destination NETCONF stream name   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">netconf-stream</a> <i>string</i> |
| Tree          | <a href="#">netconf-stream</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **python-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Python policy name  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">python-policy</a> <i>reference</i> |
| Tree       | <a href="#">python-policy</a>   |
| Reference  | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **source**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>source</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">source</a> |
| Tree       | <a href="#">source</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **change** *boolean*

|            |   |
|------------|---|
| Synopsis   | Collect log events from the change event stream   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">source</a> <a href="#">change</a> <i>boolean</i> |
| Tree       | <a href="#">change</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **debug** *boolean*

|            |  |
|------------|--|
| Synopsis   | Collect log events from the debug event stream   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">source</a> <a href="#">debug</a> <i>boolean</i> |
| Tree       | <a href="#">debug</a>  |
| Default    | false  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

### **main** *boolean*

|            |   |
|------------|---|
| Synopsis   | Collect log events from the main event stream   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">source</a> <a href="#">main</a> <i>boolean</i> |
| Tree       | <a href="#">main</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **security** *boolean*

|            |   |
|------------|---|
| Synopsis   | Collect log events from the security event stream   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">source</a> <a href="#">security</a> <i>boolean</i> |
| Tree       | <a href="#">security</a>  |
| Default    | false   |
| Introduced | 19.10.R1  |
| Platforms  | All   |

**time-format** *keyword*

|            |  |
|------------|--|
| Synopsis   | Time zone output for file log contents and syslog  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">log log-id</a> <i>string</i> <b>time-format</b> <i>keyword</i> |
| Tree       | <a href="#">time-format</a>  |
| Options    | utc, local   |
| Default    | utc  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**snmp-trap-group** [[log-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>snmp-trap-group</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">log snmp-trap-group</a> <i>string</i> |
| Tree       | <a href="#">snmp-trap-group</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[log-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Log ID  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">log snmp-trap-group</a> <i>string</i> |
| Tree          | <a href="#">snmp-trap-group</a>   |
| String Length | 1 to 17   |
| Notes         | This element is part of a list key.   |
| Introduced    | 21.2.R1   |
| Platforms     | All   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">log snmp-trap-group</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |

Platforms All

### **trap-target** [*name*] *string*

Synopsis Enter the **trap-target** list instance

Context **configure service vprn** *string* **log snmp-trap-group** *string* **trap-target** *string*

Tree **trap-target**

Max. Instances 25

Introduced 16.0.R1

Platforms All

### **[name]** *string*

Synopsis Trap target name

Context **configure service vprn** *string* **log snmp-trap-group** *string* **trap-target** *string*

Tree **trap-target**

String Length 1 to 28

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address of the trap receiver

Context **configure service vprn** *string* **log snmp-trap-group** *string* **trap-target** *string* **address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree **address**

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **description** *string*

Synopsis Text description

|               |   |
|---------------|---|
| Context       | <b>configure service vprn string log snmp-trap-group string trap-target string description string</b> |
| Tree          | <b>description</b>  |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **notify-community string**

|               |  |
|---------------|--|
| Synopsis      | SNMPv1 or SNMPv2c community name string, or SNMPv3 security name, for sending a notification               |
| Context       | <b>configure service vprn string log snmp-trap-group string trap-target string notify-community string</b> |
| Tree          | <b>notify-community</b>  |
| String Length | 1 to 31  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **port number**

|            |  |
|------------|--|
| Synopsis   | UDP port number to send messages to this remote SNMP notification collector                    |
| Context    | <b>configure service vprn string log snmp-trap-group string trap-target string port number</b> |
| Tree       | <b>port</b>  |
| Range      | 0   1 to 65535   |
| Default    | 162  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **replay boolean**

|          |   |
|----------|---|
| Synopsis | Retransmit missed notifications   |
| Context  | <b>configure service vprn string log snmp-trap-group string trap-target string replay boolean</b> |
| Tree     | <b>replay</b>   |
| Default  | false   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **security-level** *keyword*

|            |  |
|------------|--|
| Synopsis   | Security level at which SNMP notification messages are sent to SNMP notification collector   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i> <b>security-level</b> <i>keyword</i> |
| Tree       | <a href="#">security-level</a>   |
| Options    | no-auth-no-privacy, auth-no-privacy, privacy   |
| Default    | no-auth-no-privacy   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **version** *keyword*

|            |   |
|------------|---|
| Synopsis   | SNMP version to format notification messages sent to this SNMP notification collector   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i> <b>version</b> <i>keyword</i> |
| Tree       | <a href="#">version</a>   |
| Options    | snmpv1, snmpv2c, snmpv3   |
| Default    | snmpv3  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **syslog** [[syslog-name](#)] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>syslog</b> list instance  |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">syslog</a> <i>string</i> |
| Tree           | <a href="#">syslog</a>   |
| Max. Instances | 30   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

**[syslog-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Syslog name  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">syslog</a> <i>string</i> |
| Tree          | <a href="#">syslog</a>   |
| String Length | 1 to 64  |
| Notes         | This element is part of a list key.  |
| Introduced    | 21.2.R1  |
| Platforms     | All  |

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |   |
|------------|---|
| Synopsis   | IP address of the Syslog target host  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">syslog</a> <i>string</i> <b>address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">address</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">syslog</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**facility** *keyword*

|          |   |
|----------|---|
| Synopsis | Facility code for messages  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">log</a> <a href="#">syslog</a> <i>string</i> <b>facility</b> <i>keyword</i>                     |
| Tree     | <a href="#">facility</a>  |
| Options  | kernel, user, mail, systemd, auth, syslogd, printer, netnews, uucp, cron, authpriv, ftp, ntp, logaudit, logalert, cron2, local0, local1, local2, local3, local4, local5, local6, local7 |
| Default  | local7  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **log-prefix** (*keyword* | *string*)

|               |  |
|---------------|--|
| Synopsis      | String that is prepended to every log message sent to this target syslog host  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">log syslog</a> <i>string</i> <a href="#">log-prefix</a> ( <i>keyword</i>   <i>string</i> ) |
| Tree          | <a href="#">log-prefix</a>   |
| String Length | 1 to 32  |
| Options       | no-prefix  |
| Default       | TMNX   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **port number**

|            |  |
|------------|--|
| Synopsis   | Destination port when sending syslog over UDP  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">log syslog</a> <i>string</i> <a href="#">port number</a> |
| Tree       | <a href="#">port</a>   |
| Range      | 0   1 to 65535   |
| Default    | 514  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **severity keyword**

|            |  |
|------------|--|
| Synopsis   | Severity level threshold for the syslog message  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">log syslog</a> <i>string</i> <a href="#">severity</a> <i>keyword</i> |
| Tree       | <a href="#">severity</a>   |
| Options    | emergency, alert, critical, error, warning, notice, info, debug  |
| Default    | info   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**tls-client-profile** *reference***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | TLS client profile used to encrypt syslog communication  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>log syslog</b> <i>string</i> <b>tls-client-profile</b> <i>reference</i>   |
| Tree        | <a href="#">tls-client-profile</a>   |
| Description | This command specifies the Transport Layer Security (TLS) client profile used to encrypt syslog communications. When configured, syslog messages are sent using TLS.<br><br>Any change to this command results in a brief interruption of the event log, which may cause the loss of a few syslog messages.<br><br>When this command is unconfigured, the syslog messages are sent over UDP. |
| Reference   | <b>configure system security tls client-tls-profile</b> <i>string</i>  |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

**management**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>management</b> context                          |
| Context    | <b>configure service vprn</b> <i>string</i> <b>management</b> |
| Tree       | <a href="#">management</a>                                    |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**allow-ftp** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow access to the FTP server  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>management allow-ftp</b> <i>boolean</i>  |
| Tree        | <a href="#">allow-ftp</a>   |
| Description | When configured to <b>true</b> , this command allows FTP access to the SR OS router via the VPRN router instance.<br><br>When configured to <b>false</b> , this command disallows access to the SR OS FTP server. |
| Default     | false   |
| Introduced  | 16.0.R6   |
| Platforms   | All   |

### **allow-grpc** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow access to the gRPC server  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">management</a> <b>allow-grpc</b> <i>boolean</i>  |
| Tree        | <a href="#">allow-grpc</a>   |
| Description | When configured to <b>true</b> , this command allows access to the gRPC server via the VPRN router instance.<br>When configured to <b>false</b> , this command disallows gRPC server access. |
| Default     | false  |
| Introduced  | 19.5.R1  |
| Platforms   | All  |

### **allow-netconf** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow access to the NETCONF server   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">management</a> <b>allow-netconf</b> <i>boolean</i>   |
| Tree        | <a href="#">allow-netconf</a>  |
| Description | When configured to <b>true</b> , this command allows NETCONF server access to the SR OS router via the VPRN router instance.<br>When configured to <b>false</b> , this command disallows access to the NETCONF server. |
| Default     | false  |
| Introduced  | 19.5.R1  |
| Platforms   | All  |

### **allow-ssh** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow access to the SSH server  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">management</a> <b>allow-ssh</b> <i>boolean</i>  |
| Tree        | <a href="#">allow-ssh</a>   |
| Description | When configured to <b>true</b> , this command allows SSH server access to the SR OS router via the VPRN router instance.<br>When configured to <b>false</b> , this command disallows SSH server access. |
| Default     | false   |
| Introduced  | 16.0.R5   |
| Platforms   | All   |

### **allow-telnet** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow access to the IPv4 Telnet server   |
| Context     | <b>configure service vprn string management allow-telnet boolean</b>   |
| Tree        | <a href="#">allow-telnet</a>   |
| Description | When configured to <b>true</b> , this command allows IPv4 Telnet server access to the SR OS router via the VPRN router instance.<br>When configured to <b>false</b> , this command disallows access to the IPv4 Telnet server. |
| Default     | false  |
| Introduced  | 16.0.R5  |
| Platforms   | All  |

### **allow-telnet6** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow access to the Telnet IPv6 server   |
| Context     | <b>configure service vprn string management allow-telnet6 boolean</b>  |
| Tree        | <a href="#">allow-telnet6</a>  |
| Description | When configured to <b>true</b> , this command allows IPv6 Telnet server access to the SR OS router via the VPRN router instance.<br>When configured to <b>false</b> , this command removes access to the IPv6 Telnet server. |
| Default     | false  |
| Introduced  | 16.0.R5  |
| Platforms   | All  |

### **maximum-ipv4-routes**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>maximum-ipv4-routes</b> context             |
| Context    | <b>configure service vprn string maximum-ipv4-routes</b> |
| Tree       | <a href="#">maximum-ipv4-routes</a>                      |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **log-only** *boolean*

|          |   |
|----------|---|
| Synopsis | Action when the maximum number of routes, held within a VRF context, is reached |
| Context  | <b>configure service vprn string maximum-ipv4-routes log-only boolean</b>       |

|            |                          |
|------------|--------------------------|
| Tree       | <a href="#">log-only</a> |
| Default    | false                    |
| Introduced | 16.0.R1                  |
| Platforms  | All                      |

### **threshold** *number*

|            |   |
|------------|---|
| Synopsis   | Mid-level water marker for the number of routes which this VRF holds  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">maximum-ipv4-routes</a> <a href="#">threshold</a> <i>number</i> |
| Tree       | <a href="#">threshold</a>   |
| Range      | 1 to 100  |
| Units      | percent   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **value** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Maximum number of routes that are configured on this virtual router   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">maximum-ipv4-routes</a> <a href="#">value</a> <i>number</i> |
| Tree       | <a href="#">value</a>   |
| Range      | 1 to 2147483647   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **maximum-ipv6-routes**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>maximum-ipv6-routes</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">maximum-ipv6-routes</a> |
| Tree       | <a href="#">maximum-ipv6-routes</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**log-only** *boolean*

|            |   |
|------------|---|
| Synopsis   | Action when the maximum number of routes, held within a VRF context, is reached                       |
| Context    | <b>configure service vprn</b> <i>string</i> <b>maximum-ipv6-routes</b> <b>log-only</b> <i>boolean</i> |
| Tree       | <b>log-only</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**threshold** *number*

|            |   |
|------------|---|
| Synopsis   | Mid-level water marker for the number of routes which this VRF holds                                  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>maximum-ipv6-routes</b> <b>threshold</b> <i>number</i> |
| Tree       | <b>threshold</b>  |
| Range      | 1 to 100  |
| Units      | percent   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**value** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Maximum number of routes that are configured on this virtual router                               |
| Context    | <b>configure service vprn</b> <i>string</i> <b>maximum-ipv6-routes</b> <b>value</b> <i>number</i> |
| Tree       | <b>value</b>  |
| Range      | 1 to 2147483647   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**mc-maximum-routes**

|          |  |
|----------|--|
| Synopsis | Enter the <b>mc-maximum-routes</b> context                           |
| Context  | <b>configure service vprn</b> <i>string</i> <b>mc-maximum-routes</b> |

|            |                                   |
|------------|-----------------------------------|
| Tree       | <a href="#">mc-maximum-routes</a> |
| Introduced | 16.0.R1                           |
| Platforms  | All                               |

**log-only** *boolean*

|            |  |
|------------|--|
| Synopsis   | Log and allow learning of new multicast routes   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mc-maximum-routes</a> <b>log-only</b> <i>boolean</i> |
| Tree       | <a href="#">log-only</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**threshold** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum multicast routes which the VRF holds   |

| Tree       | <a href="#">mld</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of MLD   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <a href="#">string</a> <a href="#">mld</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **forwarding-group-interface** [forwarding-service](#) [string](#) [group-interface-name](#) *reference*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>forwarding-group-interface</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <a href="#">string</a> <a href="#">mld</a> <a href="#">forwarding-group-interface</a> <a href="#">forwarding-service</a> <a href="#">string</a> <a href="#">group-interface-name</a> <i>reference</i> |
| Tree       | <a href="#">forwarding-group-interface</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **forwarding-service** *string*

|               |   |
|---------------|---|
| Synopsis      | Forwarding service for a subscriber interface in a retailer context   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <a href="#">string</a> <a href="#">mld</a> <a href="#">forwarding-group-interface</a> <a href="#">forwarding-service</a> <a href="#">string</a> <a href="#">group-interface-name</a> <i>reference</i> |
| Tree          | <a href="#">forwarding-group-interface</a>  |
| String Length | 1 to 64   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**group-interface-name** *reference*

|            |   |
|------------|---|
| Synopsis   | Group interface name  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mld forwarding-group-interface forwarding-service</a> <i>string</i> <a href="#">group-interface-name</a> <i>reference</i> |
| Tree       | <a href="#">forwarding-group-interface</a>  |
| Reference  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i>                                      |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the MLD interface  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mld forwarding-group-interface forwarding-service</a> <i>string</i> <a href="#">group-interface-name</a> <i>reference</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**import-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Import policy to filter MLD packets  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mld forwarding-group-interface forwarding-service</a> <i>string</i> <a href="#">group-interface-name</a> <i>reference</i> <a href="#">import-policy</a> <i>reference</i> |
| Tree       | <a href="#">import-policy</a>  |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**maximum-number-group-sources** *number*

|          |  |
|----------|--|
| Synopsis | Maximum number of group sources for this interface   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mld forwarding-group-interface forwarding-service</a> <i>string</i> <a href="#">group-interface-name</a> <i>reference</i> <a href="#">maximum-number-group-sources</a> <i>number</i> |

|             |  |
|-------------|--|
| Tree        | <a href="#">maximum-number-group-sources</a>   |
| Description | This command configures the maximum number of group sources for which IGMP or MLD can have local receiver information based on received IGMP or MLD reports on this interface. When this configuration is changed dynamically to a lower value than the currently accepted number of group sources, the group sources that are already accepted are not deleted. Only new group sources are not allowed. |
| Range       | 1 to 32000   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **maximum-number-groups** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of groups for this interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mld</a> <a href="#">forwarding-group-interface</a> <a href="#">forwarding-service</a> <i>string</i> <a href="#">group-interface-name</a> <i>reference</i> <a href="#">maximum-number-groups</a> <i>number</i> |
| Tree       | <a href="#">maximum-number-groups</a>  |
| Range      | 1 to 16000   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **maximum-number-sources** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of sources that are allowed per group  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mld</a> <a href="#">forwarding-group-interface</a> <a href="#">forwarding-service</a> <i>string</i> <a href="#">group-interface-name</a> <i>reference</i> <a href="#">maximum-number-sources</a> <i>number</i> |
| Tree       | <a href="#">maximum-number-sources</a>  |
| Range      | 1 to 1000   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **mcac**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mcac</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mld</a> <a href="#">forwarding-group-interface</a> <a href="#">forwarding-service</a> <i>string</i> <a href="#">group-interface-name</a> <i>reference</i> <b>mcac</b> |
| Tree       | <a href="#">mcac</a>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## bandwidth

Synopsis Enter the **bandwidth** context

Context **configure service vprn string mld forwarding-group-interface forwarding-service string group-interface-name reference mcac bandwidth**

Tree [bandwidth](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## mandatory (*number* | *keyword*)

Synopsis Pre-reserved bandwidth for all mandatory channels

Context **configure service vprn string mld forwarding-group-interface forwarding-service string group-interface-name reference mcac bandwidth mandatory (*number* | *keyword*)**

Tree [mandatory](#)

Range 0 to 2147483647

Options unlimited

Default unlimited

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## total (*number* | *keyword*)

Synopsis Maximum allowed bandwidth

Context **configure service vprn string mld forwarding-group-interface forwarding-service string group-interface-name reference mcac bandwidth total (*number* | *keyword*)**

Tree [total](#)

Range 0 to 2147483647

Options unlimited

Default unlimited

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**interface-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Name of multicast CAC interface policy   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">mld forwarding-group-interface forwarding-service string</a> <a href="#">group-interface-name reference</a> <a href="#">mcac interface-policy reference</a> |
| Tree       | <a href="#">interface-policy</a>   |
| Reference  | <b>configure</b> <a href="#">mcac interface-policy string</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**policy** *reference*

|             |   |
|-------------|---|
| Synopsis    | Multicast CAC policy name   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">mld forwarding-group-interface forwarding-service string</a> <a href="#">group-interface-name reference</a> <a href="#">mcac policy reference</a>  |
| Tree        | <a href="#">policy</a>  |
| Description | <p>This command configures the name of the global channel bandwidth definition policy that is used for (H)MCAC and HQoS adjustment.</p> <p>Within the scope of HQoS adjustment, the channel definition policy under the group interface is used if redirection is unconfigured. In this case, the HQoS adjustment can be applied to IPE subscribers in per-SAP replication mode.</p> <p>If redirection is configured, the channel bandwidth definition policy applied under the Layer 3 redirected interface is in effect.</p> <p>Hierarchical MCAC (HMCAC) is supported on two levels simultaneously:</p> <ul style="list-style-type: none"> <li>• subscriber level and redirected interface when redirection is configured</li> <li>• subscriber level and group-interface level when redirection is unconfigured</li> </ul> <p>In HMCAC, the subscriber is checked against its bandwidth limits first, then against the bandwidth limits of the redirected or group interface. If redirection is configured but the policy is referenced only under the group interface, no admission control is executed (HMCAC or MCAC).</p> |
| Reference   | <b>configure</b> <a href="#">mcac policy string</a>   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**query-interval** *number*

### **policy** *reference*

|             |   |
|-------------|---|
| Synopsis    | Multicast CAC policy name   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">group-interface</a> <i>reference</i> <a href="#">mcac</a> <a href="#">policy</a> <i>reference</i>   |
| Tree        | <a href="#">policy</a>  |
| Description | <p>This command configures the name of the global channel bandwidth definition policy that is used for (H)MCAC and HQoS adjustment.</p> <p>Within the scope of HQoS adjustment, the channel definition policy under the group interface is used if redirection is unconfigured. In this case, the HQoS adjustment can be applied to IPoE subscribers in per-SAP replication mode.</p> |

If redirection is configured, the channel bandwidth definition policy applied under the Layer 3 redirected interface is in effect.

Hierarchical MCAC (HMCAC) is supported on two levels simultaneously:

- subscriber level and redirected interface when redirection is configured
- subscriber level and group-interface level when redirection is unconfigured

In HMCAC, the subscriber is checked against its bandwidth limits first, then against the bandwidth limits of the redirected or group interface. If redirection is configured but the policy is referenced only under the group interface, no admission control is executed (HMCAC or MCAC).

|            |   |

| Introduced | 16.0.R1   |
| Platforms  | All   |

**maximum-number-group-sources** *number*

|             |  |
|-------------|--|
| Synopsis    | Maximum number of group sources for this interface   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <b>maximum-number-group-sources</b> <i>number</i>  |
| Tree        | <a href="#">maximum-number-group-sources</a>   |
| Description | This command configures the maximum number of group sources for which IGMP or MLD can have local receiver information based on received IGMP or MLD reports on this interface. When this configuration is changed dynamically to a lower value than the currently accepted number of group sources, the group sources that are already accepted are not deleted. Only new group sources are not allowed. |
| Range       | 1 to 32000   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**maximum-number-groups** *number*

|          |   |
|----------|---|
| Synopsis | Maximum number of groups for this interface |

| Range      | 1 to 64   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **level number**

|             |   |
|-------------|---|
| Synopsis    | Level ID to associate with number of down LAG ports   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <a href="#">mcac</a> <a href="#">mc-constraints</a> <a href="#">number-down</a> <i>number</i> <a href="#">level</a> <i>number</i> |
| Tree        | <a href="#">level</a>   |
| Description | This command specifies the bandwidth for a given level. Level 1 has the highest priority and level 8 has the lowest priority.   |
| Range       | 1 to 8  |
| Notes       | This element is mandatory.  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **use-lag-port-weight boolean**

|             |  |
|-------------|--|
| Synopsis    | Use LAG port weight in calculating MCAC constraints  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <a href="#">mcac</a> <a href="#">mc-constraints</a> <a href="#">use-lag-port-weight</a> <i>boolean</i> |
| Tree        | <a href="#">use-lag-port-weight</a>  |
| Description | When configured to <b>true</b> , port weight is used when determining available bandwidth per level when LAG ports go down or come up. This command is required for proper   |

operation on mixed port-speed LAGs and can also be used for unmixed port-speed LAGs.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **policy reference**

|             |   |
|-------------|---|
| Synopsis    | Multicast CAC policy name   |
| Context     | <b>configure service vprn string mld interface string mcac policy reference</b>   |
| Tree        | <a href="#">policy</a>  |
| Description | <p>This command configures the name of the global channel bandwidth definition policy that is used for (H)MCAC and HQoS adjustment.</p> <p>Within the scope of HQoS adjustment, the channel definition policy under the group interface is used if redirection is unconfigured. In this case, the HQoS adjustment can be applied to IPE subscribers in per-SAP replication mode.</p> <p>If redirection is configured, the channel bandwidth definition policy applied under the Layer 3 redirected interface is in effect.</p> <p>Hierarchical MCAC (HMCAC) is supported on two levels simultaneously:</p> <ul style="list-style-type: none"> <li>• subscriber level and redirected interface when redirection is configured</li> <li>• subscriber level and group-interface level when redirection is unconfigured</li> </ul> <p>In HMCAC, the subscriber is checked against its bandwidth limits first, then against the bandwidth limits of the redirected or group interface. If redirection is configured but the policy is referenced only under the group interface, no admission control is executed (HMCAC or MCAC).</p> |
| Reference   | <b>configure mcac policy string</b>   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **query-interval number**

|            |   |
|------------|---|
| Synopsis   | Time between two consecutive host-query messages                                |
| Context    | <b>configure service vprn string mld interface string query-interval number</b> |
| Tree       | <a href="#">query-interval</a>  |
| Range      | 2 to 1024   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**query-last-member-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time between group-specific query messages  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <b>query-last-member-interval</b> <i>number</i> |
| Tree       | <a href="#">query-last-member-interval</a>  |
| Range      | 1 to 1023   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**query-response-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time to wait for a response to the host-query messages   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <b>query-response-interval</b> <i>number</i> |
| Tree       | <a href="#">query-response-interval</a>  |
| Range      | 1 to 1023  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**router-alert-check** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable router alert checking for IGMP or MLD messages  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <b>router-alert-check</b> <i>boolean</i> |
| Tree       | <a href="#">router-alert-check</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**ssm-translate**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ssm-translate</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <b>ssm-translate</b> |
| Tree       | <a href="#">ssm-translate</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**group-range** *start string end string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>group-range</b> list instance   |
| Context    | <b>configure</b> <i>service vprn string mld interface string ssm-translate group-range start string end string</i> |
| Tree       | <i>group-range</i>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**start string**

|            |  |
|------------|--|
| Synopsis   | Lower bound of the group range   |
| Context    | <b>configure</b> <i>service vprn string mld interface string ssm-translate group-range start string end string</i> |
| Tree       | <i>group-range</i>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**end string**

|            |  |
|------------|--|
| Synopsis   | Upper bound of the group range   |
| Context    | <b>configure</b> <i>service vprn string mld interface string ssm-translate group-range start string end string</i> |
| Tree       | <i>group-range</i>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**source** [*source-address*] *string*

|          |  |
|----------|--|
| Synopsis | Add a list entry for <b>source</b>   |
| Context  | <b>configure</b> <i>service vprn string mld interface string ssm-translate group-range start string end string source string</i> |
| Tree     | <i>source</i>  |

|                |         |
|----------------|---------|
| Min. Instances | 1       |
| Introduced     | 16.0.R1 |
| Platforms      | All     |

**[source-address] string**

|            |   |
|------------|---|
| Synopsis   | Source IP address   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">mld interface string</a> <a href="#">ssm-translate group-range start string</a> <a href="#">end string</a> <a href="#">source string</a> |
| Tree       | <a href="#">source</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R2   |
| Platforms  | All   |

**static**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>static</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">mld interface string</a> <a href="#">static</a> |
| Tree       | <a href="#">static</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**group [group-address] string**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>group</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">mld interface string</a> <a href="#">static group string</a> |
| Tree       | <a href="#">group</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[group-address] string**

|          |   |
|----------|---|
| Synopsis | Group address of multicast channel  |
| Context  | <b>configure</b> <a href="#">service vprn string</a> <a href="#">mld interface string</a> <a href="#">static group string</a> |
| Tree     | <a href="#">group</a>   |

|            |                                     |
|------------|-------------------------------------|
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R1                             |
| Platforms  | All                                 |

### **source** [[source-address](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>source</b>  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mld interface</a> <i>string</i> <a href="#">static group</a> <i>string</i> <a href="#">source</a> <i>string</i> |
| Tree       | <a href="#">source</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[source-address]** *string*

|            |   |
|------------|---|
| Synopsis   | Source IP address   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mld interface</a> <i>string</i> <a href="#">static group</a> <i>string</i> <a href="#">source</a> <i>string</i> |
| Tree       | <a href="#">source</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R2   |
| Platforms  | All   |

### **starg**

|            |  |
|------------|--|
| Synopsis   | any source address (*,G)   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mld interface</a> <i>string</i> <a href="#">static group</a> <i>string</i> <a href="#">starg</a> |
| Tree       | <a href="#">starg</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .   |
| Introduced | 16.0.R2  |
| Platforms  | All  |

### **group-range** [start](#) *string* [end](#) *string* [step](#) *string*

|          |  |
|----------|--|
| Synopsis | Enter the <b>group-range</b> list instance |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure</b> service vprn <i>string</i> mld interface <i>string</i> static group-range start <i>string</i> end <i>string</i> step <i>string</i> |
| Tree       | group-range   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**start string**

|            |   |
|------------|---|
| Synopsis   | Lower bound of the static multicast group   |
| Context    | <b>configure</b> service vprn <i>string</i> mld interface <i>string</i> static group-range start <i>string</i> end <i>string</i> step <i>string</i> |
| Tree       | group-range   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**end string**

|            |   |
|------------|---|
| Synopsis   | Upper bound of the static multicast group   |
| Context    | <b>configure</b> service vprn <i>string</i> mld interface <i>string</i> static group-range start <i>string</i> end <i>string</i> step <i>string</i> |
| Tree       | group-range   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**step string**

|            |   |
|------------|---|
| Synopsis   | Step interval for the group-range addresses   |
| Context    | <b>configure</b> service vprn <i>string</i> mld interface <i>string</i> static group-range start <i>string</i> end <i>string</i> step <i>string</i> |
| Tree       | group-range   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**source** [[source-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>source</b>   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <a href="#">static</a> <a href="#">group-range</a> <a href="#">start</a> <i>string</i> <a href="#">end</a> <i>string</i> <a href="#">step</a> <i>string</i> <a href="#">source</a> <i>string</i> |
| Tree       | <a href="#">source</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[source-address]** *string*

|            |  |
|------------|--|
| Synopsis   | Source IP address  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <a href="#">static</a> <a href="#">group-range</a> <a href="#">start</a> <i>string</i> <a href="#">end</a> <i>string</i> <a href="#">step</a> <i>string</i> <a href="#">source</a> <i>string</i> |
| Tree       | <a href="#">source</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R2  |
| Platforms  | All  |

**starg**

|            |   |
|------------|---|
| Synopsis   | any source address (*,G)  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <a href="#">static</a> <a href="#">group-range</a> <a href="#">start</a> <i>string</i> <a href="#">end</a> <i>string</i> <a href="#">step</a> <i>string</i> <a href="#">starg</a> |
| Tree       | <a href="#">starg</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .  |
| Introduced | 16.0.R2   |
| Platforms  | All   |

**version** *keyword*

|          |  |
|----------|--|
| Synopsis | MLD protocol version   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mld</a> <a href="#">interface</a> <i>string</i> <a href="#">version</a> <i>keyword</i> |
| Tree     | <a href="#">version</a>  |
| Options  | 1, 2   |

---

|            |         |
|------------|---------|
| Default    | 2       |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **query-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time between two consecutive host-query messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mld query-interval</a> <i>number</i> |
| Tree       | <a href="#">query-interval</a>   |
| Range      | 2 to 1024  |
| Units      | seconds  |
| Default    | 125  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **query-last-member-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time between group-specific query messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mld query-last-member-interval</a> <i>number</i> |
| Tree       | <a href="#">query-last-member-interval</a>   |
| Range      | 1 to 1023  |
| Units      | seconds  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **query-response-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time to wait for a response to the host-query messages  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mld query-response-interval</a> <i>number</i> |
| Tree       | <a href="#">query-response-interval</a>   |
| Range      | 1 to 1023   |
| Units      | seconds   |
| Default    | 10  |
| Introduced | 16.0.R1   |

Platforms All

### **robust-count** *number*

Synopsis Number of retries after expected message loss  
 Context **configure** [service vprn](#) *string* **mld** **robust-count** *number*  
 Tree [robust-count](#)  
 Range 2 to 10  
 Default 2  
 Introduced 16.0.R1  
 Platforms All

### **ssm-translate**

Synopsis Enter the **ssm-translate** context  
 Context **configure** [service vprn](#) *string* **mld** **ssm-translate**  
 Tree [ssm-translate](#)  
 Introduced 16.0.R1  
 Platforms All

### **group-range** [start](#) *string* [end](#) *string*

Synopsis Enter the **group-range** list instance  
 Context **configure** [service vprn](#) *string* **mld** [ssm-translate](#) [group-range](#) [start](#) *string* [end](#) *string*  
 Tree [group-range](#)  
 Introduced 16.0.R1  
 Platforms All

### **start** *string*

Synopsis Lower bound of the group range  
 Context **configure** [service vprn](#) *string* **mld** [ssm-translate](#) [group-range](#) [start](#) *string* [end](#) *string*  
 Tree [group-range](#)  
 Notes This element is part of a list keys.  
 Introduced 16.0.R1

Platforms All

### **end string**

Synopsis Upper bound of the group range  
 Context **configure service vpn string mld ssm-translate group-range start string end string**  
 Tree [group-range](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **source [source-address] string**

Synopsis Add a list entry for **source**  
 Context **configure service vpn string mld ssm-translate group-range start string end string source string**  
 Tree [source](#)  
 Min. Instances 1  
 Introduced 16.0.R1  
 Platforms All

### **[source-address] string**

Synopsis Source IP address  
 Context **configure service vpn string mld ssm-translate group-range start string end string source string**  
 Tree [source](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R2  
 Platforms All

### **msdp**

Synopsis Enable the **msdp** context  
 Context **configure service vpn string msdp**

---

|            |                      |
|------------|----------------------|
| Tree       | <a href="#">msdp</a> |

| Introduced | 16.0.R1  |
| Platforms  | All  |

### **udp-port** *number*

|          |  |
|----------|--|
| Synopsis | Destination and listening port for the mtrace2 command   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mtrace2</a> <a href="#">udp-port</a> <i>number</i> |

|            |                          |
|------------|--------------------------|
| Tree       | <a href="#">udp-port</a> |
| Range      | 1024 to 49151            |
| Default    | 5000                     |
| Introduced | 16.0.R1                  |
| Platforms  | All                      |

### **multicast-info-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Multicast policy name for virtual router   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">multicast-info-policy</a> <i>reference</i> |
| Tree       | <a href="#">multicast-info-policy</a>  |
| Reference  | <b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i>          |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mvpn**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>mvpn</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn</a> |
| Tree       | <a href="#">mvpn</a>   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **auto-discovery**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>auto-discovery</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">auto-discovery</a> |
| Tree       | <a href="#">auto-discovery</a>  |
| Introduced | 19.5.R1   |
| Platforms  | All   |

### **source-address** *string*

|          |  |
|----------|--|
| Synopsis | IPv4 source address  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">auto-discovery</a> <a href="#">source-address</a> <i>string</i> |

---

|            |                                |
|------------|--------------------------------|
| Tree       | <a href="#">source-address</a> |
| Default    | 0.0.0.0                        |
| Introduced | 19.5.R1                        |
| Platforms  | All                            |

### **type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Status of multicast VPN membership auto-discovery   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">auto-discovery</a> <b>type</b> <i>keyword</i> |
| Tree       | <a href="#">type</a>  |
| Options    | bgp, mdt-safi   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

### **c-mcast-signaling** *keyword*

|            |  |
|------------|--|
| Synopsis   | Protocol for PE-to-PE signaling of CE multicast states   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">c-mcast-signaling</a> <i>keyword</i> |
| Tree       | <a href="#">c-mcast-signaling</a>  |
| Options    | bgp, pim   |
| Default    | pim  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **intersite-shared**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>intersite-shared</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">intersite-shared</a>  |
| Tree        | <a href="#">intersite-shared</a>  |
| Description | Commands in this context configure whether to use inter-site shared C-trees. Optional parameters allow enabling additional intersite shared functionality. Not specifying an optional parameter when executing the command disables that parameter. |
| Introduced  | 19.5.R1   |
| Platforms   | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of inter-site shared C-trees use  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">intersite-shared</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**kat-type5-advertisement-withdraw** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable KATs on source PEs for ng-MVPN deployments   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">intersite-shared</a> <b>kat-type5-advertisement-withdraw</b> <i>boolean</i> |
| Tree        | <a href="#">kat-type5-advertisement-withdraw</a>  |
| Description | When configured to <b>true</b> , this command specifies that the MVPN Type-5 “Source Active AD routes” are not removed even if all receivers are removed from the tree.                 |
| Default     | false   |
| Introduced  | 19.5.R1   |
| Platforms   | All   |

**persistent-type5-advertisement** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Ensure Type-5 S-A routes are generated for MCAST source  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">intersite-shared</a> <b>persistent-type5-advertisement</b> <i>boolean</i>            |
| Tree        | <a href="#">persistent-type5-advertisement</a>   |
| Description | When configured to <b>true</b> , this command removes the MVPN Type-5 “Source Active AD routes” even if receivers are present but the keepalive timer (KAT) has timed out because of no traffic. |
| Default     | false  |
| Introduced  | 19.5.R1  |
| Platforms   | All  |

### **mdt-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | MVPN instance type per PE node                                    |
| Context    | <b>configure service vprn</b> <i>string mvpn mdt-type keyword</i> |
| Tree       | <a href="#">mdt-type</a>  |
| Options    | sender-only, receiver-only, sender-receiver                       |
| Default    | sender-receiver   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

### **provider-tunnel**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>provider-tunnel</b> context                         |
| Context    | <b>configure service vprn</b> <i>string mvpn provider-tunnel</i> |
| Tree       | <a href="#">provider-tunnel</a>                                  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **inclusive**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>inclusive</b> context   |
| Context    | <b>configure service vprn</b> <i>string mvpn provider-tunnel inclusive</i> |
| Tree       | <a href="#">inclusive</a>  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **bier**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>bier</b> context  |
| Context    | <b>configure service vprn</b> <i>string mvpn provider-tunnel inclusive bier</i>   |
| Tree       | <a href="#">bier</a>  |
| Notes      | The following elements are part of a choice: <b>bier</b> , <b>mldp</b> , <b>p2mp-sr</b> , <b>pim</b> , or <b>rsvp</b> . |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of BIER  |
| Context    | <b>configure service vprn</b> <i>string mvpn provider-tunnel inclusive bier admin-state keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**sub-domain** *number*

|            |   |
|------------|---|
| Synopsis   | Sub-domain used to attach the BIER provider tunnel  |
| Context    | <b>configure service vprn</b> <i>string mvpn provider-tunnel inclusive bier sub-domain number</i> |
| Tree       | <a href="#">sub-domain</a>  |
| Range      | 0 to 255  |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**bsr** *keyword*

|            |  |
|------------|--|
| Synopsis   | BSR signaling type   |
| Context    | <b>configure service vprn</b> <i>string mvpn provider-tunnel inclusive bsr keyword</i> |
| Tree       | <a href="#">bsr</a>  |
| Options    | unicast, spmsi   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**mldp**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>mldp</b> context  |
| Context    | <b>configure service vprn</b> <i>string mvpn provider-tunnel inclusive mldp</i>   |
| Tree       | <a href="#">mldp</a>  |
| Notes      | The following elements are part of a choice: <b>bier</b> , <b>mldp</b> , <b>p2mp-sr</b> , <b>pim</b> , or <b>rsvp</b> . |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of MLDP LSP use for tunnels  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">inclusive</a> <a href="#">mldp</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**p2mp-sr**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>p2mp-sr</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">inclusive</a> <b>p2mp-sr</b> |
| Tree       | <a href="#">p2mp-sr</a>   |
| Notes      | The following elements are part of a choice: <b>bier</b> , <b>mldp</b> , <b>p2mp-sr</b> , <b>pim</b> , or <b>rsvp</b> .   |
| Introduced | 21.5.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state for P2MP SR   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">inclusive</a> <a href="#">p2mp-sr</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 21.5.R1  |
| Platforms  | All  |

**bfd-leaf** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable unidirectional multipoint BFD on the leaf PE   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">inclusive</a> <a href="#">p2mp-sr</a> <b>bfd-leaf</b> <i>boolean</i> |
| Tree     | <a href="#">bfd-leaf</a>  |

|             |  |
|-------------|--|
| Description | When configured to <b>true</b> , this command enables unidirectional multipoint BFD sessions on a receiver (leaf) PE node for upstream fast failure detection over P2MP SR tree LSP. |
| Default     | false  |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

### **bfd-root**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>bfd-root</b> context  |
| Context    | <b>configure service vpn string mvpn provider-tunnel inclusive p2mp-sr bfd-root</b> |
| Tree       | <a href="#">bfd-root</a>  |
| Introduced | 21.10.R1  |
| Platforms  | All   |

### **multiplier number**

|             |  |
|-------------|--|
| Synopsis    | Multiplier for the transmit interval of the BFD session  |
| Context     | <b>configure service vpn string mvpn provider-tunnel inclusive p2mp-sr bfd-root multiplier number</b>  |
| Tree        | <a href="#">multiplier</a>   |
| Description | This command configures the multiplier for the transmit interval. The interval and the multiplier are used to calculate the detection time, which is the period of time without receiving BFD packets after which the session failure is determined. |
| Range       | 1 to 20  |
| Default     | 3  |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

### **transmit-interval number**

|             |   |
|-------------|---|
| Synopsis    | Transmit interval of the BFD session  |
| Context     | <b>configure service vpn string mvpn provider-tunnel inclusive p2mp-sr bfd-root transmit-interval number</b>  |
| Tree        | <a href="#">transmit-interval</a>   |
| Description | This command configures the transmit interval. The interval and the multiplier are used to calculate the detection time, which is the period of time without receiving BFD packets after which the session failure is determined. |

|            |                            |
|------------|----------------------------|
| Range      | 10 to 100000               |
| Notes      | This element is mandatory. |
| Introduced | 21.10.R1                   |
| Platforms  | All                        |

### **p2mp-policy** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use P2MP policy for inclusive MVPN provider tunnel  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel inclusive p2mp-sr</a> <a href="#">p2mp-policy</a> <i>boolean</i> |
| Tree       | <a href="#">p2mp-policy</a>   |
| Default    | false   |
| Introduced | 21.5.R1   |
| Platforms  | All   |

### **static-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Static policy for inclusive MVPN provider tunnel  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel inclusive p2mp-sr</a> <a href="#">static-policy</a> <i>reference</i> |
| Tree       | <a href="#">static-policy</a>   |
| Reference  | <b>configure</b> <a href="#">router</a> <i>string</i> <a href="#">p2mp-sr-tree</a> <a href="#">p2mp-policy</a> <i>string</i>                                      |
| Introduced | 21.5.R1   |
| Platforms  | All   |

### **pim**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>pim</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel inclusive</a> <a href="#">pim</a> |
| Tree       | <a href="#">pim</a>  |
| Notes      | The following elements are part of a choice: <b>bier</b> , <b>mldp</b> , <b>p2mp-sr</b> , <b>pim</b> , or <b>rsvp</b> .        |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of PIM use for provider tunnels   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">inclusive</a> <a href="#">pim</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**group-address** *string*

|            |   |
|------------|---|
| Synopsis   | Multicast group address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">inclusive</a> <a href="#">pim</a> <b>group-address</b> <i>string</i> |
| Tree       | <a href="#">group-address</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**hello-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Frequency at which PIM Hello messages are transmitted  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">inclusive</a> <a href="#">pim</a> <b>hello-interval</b> <i>number</i> |
| Tree       | <a href="#">hello-interval</a>   |
| Range      | 0 to 255   |
| Default    | 30   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**hello-multiplier** *number*

|          |  |
|----------|--|
| Synopsis | Multiplier to determine the holdtime for a PIM neighbor  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">inclusive</a> <a href="#">pim</a> <b>hello-multiplier</b> <i>number</i> |
| Tree     | <a href="#">hello-multiplier</a>   |
| Range    | 20 to 100  |
| Default  | 35   |

Introduced 19.5.R1  
Platforms All

### **improved-assert** *boolean*

Synopsis Enable the improved assert procedure  
Context **configure** [service](#) [vprn](#) *string* [mvpn](#) [provider-tunnel](#) [inclusive](#) [pim](#) [improved-assert](#) *boolean*  
Tree [improved-assert](#)  
Default true  
Introduced 19.5.R1  
Platforms All

### **mode** *keyword*

Synopsis PIM mode for the inclusive provider tunnel  
Context **configure** [service](#) [vprn](#) *string* [mvpn](#) [provider-tunnel](#) [inclusive](#) [pim](#) [mode](#) *keyword*  
Tree [mode](#)  
Options asm, ssm  
Notes This element is mandatory.  
Introduced 19.5.R1  
Platforms All

### **three-way-hello** *boolean*

Synopsis Enable PIM three-way hello  
Context **configure** [service](#) [vprn](#) *string* [mvpn](#) [provider-tunnel](#) [inclusive](#) [pim](#) [three-way-hello](#) *boolean*  
Tree [three-way-hello](#)  
Default false  
Introduced 19.5.R1  
Platforms All

### **tracking-support** *boolean*

Synopsis Enable the T bit in the LAN Prune Delay option

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>mvpn provider-tunnel inclusive pim tracking-support</b> <i>boolean</i> |
| Tree       | <a href="#">tracking-support</a>  |
| Default    | false   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

## rsvp

|            |   |
|------------|---|
| Synopsis   | Enable the <b>rsvp</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>mvpn provider-tunnel inclusive rsvp</b>                                  |
| Tree       | <a href="#">rsvp</a>  |
| Notes      | The following elements are part of a choice: <b>bier</b> , <b>mldp</b> , <b>p2mp-sr</b> , <b>pim</b> , or <b>rsvp</b> . |
| Introduced | 19.5.R1   |
| Platforms  | All   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of RSVP use for provider tunnels   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>mvpn provider-tunnel inclusive rsvp admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

## bfd-leaf *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable unidirectional multi-point BFD on a receiver  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>mvpn provider-tunnel inclusive rsvp bfd-leaf</b> <i>boolean</i> |
| Tree       | <a href="#">bfd-leaf</a>   |
| Default    | false  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**bfd-root**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>bfd-root</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel inclusive rsvp</a> <a href="#">bfd-root</a> |
| Tree       | <a href="#">bfd-root</a>   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**multiplier number**

|            |  |
|------------|--|
| Synopsis   | Enable unidirectional multi-point BFD on a sender  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel inclusive rsvp</a> <a href="#">bfd-root multiplier number</a> |
| Tree       | <a href="#">multiplier</a>   |
| Range      | 1 to 20  |
| Default    | 3  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**transmit-interval number**

|            |   |
|------------|---|
| Synopsis   | Transmit interval for the BFD session   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel inclusive rsvp</a> <a href="#">bfd-root transmit-interval number</a> |
| Tree       | <a href="#">transmit-interval</a>   |
| Range      | 10 to 100000  |
| Notes      | This element is mandatory.  |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**Isp-template reference**

|           |  |
|-----------|--|
| Synopsis  | P2MP LSP created as the provider tunnel  |
| Context   | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel inclusive rsvp</a> <a href="#">Isp-template reference</a> |
| Tree      | <a href="#">Isp-template</a>   |
| Reference | <b>configure</b> <a href="#">router</a> <i>string</i> <a href="#">mpls</a> <a href="#">Isp-template</a> <i>string</i>                                  |

Introduced 19.5.R1  
 Platforms All

### **umh-rate-monitoring**

Synopsis Enter the **umh-rate-monitoring** context  
 Context **configure service vprn string mvpn provider-tunnel inclusive umh-rate-monitoring**  
 Tree [umh-rate-monitoring](#)  
 Introduced 21.5.R1  
 Platforms All

### **revertive-timer number**

Synopsis Time until switch to primary PMSI after recovering rate  
 Context **configure service vprn string mvpn provider-tunnel inclusive umh-rate-monitoring revertive-timer number**  
 Tree [revertive-timer](#)  
 Range 0 to 3600  
 Introduced 21.5.R1  
 Platforms All

### **traffic-rate-delta number**

Synopsis Rate delta between PMSIs under which traffic switches  
 Context **configure service vprn string mvpn provider-tunnel inclusive umh-rate-monitoring traffic-rate-delta number**  
 Tree [traffic-rate-delta](#)  
 Range 0 to 4294967294  
 Introduced 21.5.R1  
 Platforms All

### **wildcard-spmsi boolean**

Synopsis Enable RFC 6625 S-PMSI functionality for NG-MVPN  
 Context **configure service vprn string mvpn provider-tunnel inclusive wildcard-spmsi boolean**  
 Tree [wildcard-spmsi](#)

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 19.5.R1 |
| Platforms  | All     |

### **selective**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>selective</b> context                                  |
| Context    | <b>configure service vprn string mvpn provider-tunnel selective</b> |
| Tree       | <a href="#">selective</a>   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

### **asm-mdt *boolean***

|            |  |
|------------|--|
| Synopsis   | Enable Data MDT with PIM-ASM mode on receiver PE node                                      |
| Context    | <b>configure service vprn string mvpn provider-tunnel selective asm-mdt <i>boolean</i></b> |
| Tree       | <a href="#">asm-mdt</a>  |
| Default    | false  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **auto-discovery *boolean***

|            |   |
|------------|---|
| Synopsis   | Enable C-trees to P-tunnel binding auto-discovery   |
| Context    | <b>configure service vprn string mvpn provider-tunnel selective auto-discovery <i>boolean</i></b> |
| Tree       | <a href="#">auto-discovery</a>  |
| Default    | false   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

### **bier**

|          |  |
|----------|--|
| Synopsis | Enable the <b>bier</b> context   |
| Context  | <b>configure service vprn string mvpn provider-tunnel selective bier</b> |
| Tree     | <a href="#">bier</a>   |

|            |   |
|------------|---|
| Notes      | The following elements are part of a choice: <b>bier</b> , <b>mldp</b> , <b>p2mp-sr</b> , <b>pim</b> , or <b>rsvp</b> . |
| Introduced | 19.5.R1   |
| Platforms  | All   |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of BIER   |
| Context    | <b>configure service vprn string mvpn provider-tunnel selective bier admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **sub-domain** *number*

|            |  |
|------------|--|
| Synopsis   | Sub-domain used to attach the BIER provider tunnel   |
| Context    | <b>configure service vprn string mvpn provider-tunnel selective bier sub-domain number</b> |
| Tree       | <a href="#">sub-domain</a>   |
| Range      | 0 to 255   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **data-delay-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Interval a PE switches from inclusive to selective   |
| Context    | <b>configure service vprn string mvpn provider-tunnel selective data-delay-interval number</b> |
| Tree       | <a href="#">data-delay-interval</a>  |
| Range      | 3 to 180   |
| Default    | 3  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**data-threshold**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>data-threshold</b> context  |
| Context    | <b>configure service vprn string mvpn provider-tunnel selective data-threshold</b> |
| Tree       | <a href="#">data-threshold</a>   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**group-prefix [ip-group-prefix] (ipv4-prefix | ipv6-prefix)**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>group-prefix</b> list instance   |
| Context    | <b>configure service vprn string mvpn provider-tunnel selective data-threshold group-prefix (ipv4-prefix   ipv6-prefix)</b> |
| Tree       | <a href="#">group-prefix</a>  |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**[ip-group-prefix] (ipv4-prefix | ipv6-prefix)**

|            |   |
|------------|---|
| Synopsis   | IPv4 or IPv6 multicast group address and prefix   |
| Context    | <b>configure service vprn string mvpn provider-tunnel selective data-threshold group-prefix (ipv4-prefix   ipv6-prefix)</b> |
| Tree       | <a href="#">group-prefix</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**pe-threshold-add number**

|            |   |
|------------|---|
| Synopsis   | PE add threshold  |
| Context    | <b>configure service vprn string mvpn provider-tunnel selective data-threshold group-prefix (ipv4-prefix   ipv6-prefix) pe-threshold-add number</b> |
| Tree       | <a href="#">pe-threshold-add</a>  |
| Range      | 1 to 65535  |
| Default    | 65535   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**pe-threshold-delete** *number*

|            |  |
|------------|--|
| Synopsis   | PE delete threshold  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">data-threshold</a> <a href="#">group-prefix</a> ( <a href="#">ipv4-prefix</a>   <a href="#">ipv6-prefix</a> ) <a href="#">pe-threshold-delete</a> <i>number</i> |
| Tree       | <a href="#">pe-threshold-delete</a>  |
| Range      | 2 to 65535   |
| Default    | 65535  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**threshold** *number*

|            |  |
|------------|--|
| Synopsis   | S-PMSI threshold   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">data-threshold</a> <a href="#">group-prefix</a> ( <a href="#">ipv4-prefix</a>   <a href="#">ipv6-prefix</a> ) <a href="#">threshold</a> <i>number</i> |
| Tree       | <a href="#">threshold</a>  |
| Range      | 0 to 4294967294  |
| Units      | kilobps  |
| Notes      | This element is mandatory.   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**join-tlv-packing** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable packing of MDT join TLVs into a single PDU  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">join-tlv-packing</a> <i>boolean</i> |
| Tree       | <a href="#">join-tlv-packing</a>   |
| Default    | true   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**mldp**

|          |  |
|----------|--|
| Synopsis | Enable the <b>mldp</b> context   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <b>mldp</b> |

|            |   |
|------------|---|
| Tree       | <a href="#">mldp</a>  |
| Notes      | The following elements are part of a choice: <b>bier</b> , <b>mldp</b> , <b>p2mp-sr</b> , <b>pim</b> , or <b>rsvp</b> . |
| Introduced | 19.5.R1   |
| Platforms  | All   |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of MLDP LSP use for tunnels  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">mldp</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

### **maximum-p2mp-spmsi** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of RSVP P2MP or LDP P2MP S-PMSI tunnels  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">mldp</a> <b>maximum-p2mp-spmsi</b> <i>number</i> |
| Tree       | <a href="#">maximum-p2mp-spmsi</a>  |
| Range      | 1 to 4000   |
| Default    | 10  |
| Introduced | 19.5.R1   |
| Platforms  | All   |

### **multistream-spmsi** [[multistream-id](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>multistream-spmsi</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">multistream-spmsi</a> <i>number</i> |
| Tree       | <a href="#">multistream-spmsi</a>  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**[multistream-id]** *number*

|            |  |
|------------|--|
| Synopsis   | Multistream spmsi id   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">multistream-spmsi</a> <i>number</i> |
| Tree       | <a href="#">multistream-spmsi</a>  |
| Range      | 1 to 1024  |
| Notes      | This element is part of a list key.  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of multi-stream S-PMSI   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">multistream-spmsi</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**group-prefix** [[ip-group-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*) [source-prefix](#) (*ipv4-prefix* | *ipv6-prefix*)

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>group-prefix</b>  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">multistream-spmsi</a> <i>number</i> <a href="#">group-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">source-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">group-prefix</a>  |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**[ip-group-prefix]** (*ipv4-prefix* | *ipv6-prefix*)

|          |   |
|----------|---|
| Synopsis | IPv4 or IPv6 multicast group address and prefix   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">multistream-spmsi</a> <i>number</i> <a href="#">group-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">source-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree     | <a href="#">group-prefix</a>  |

| Introduced | 19.5.R1 |
| Platforms  | All     |

### **maximum-p2mp-spmsi** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of RSVP P2MP or LDP P2MP S-PMSI tunnels   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel selective rsvp maximum-p2mp-spmsi</a> <i>number</i> |
| Tree       | <a href="#">maximum-p2mp-spmsi</a>   |
| Range      | 1 to 4000  |
| Default    | 10   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **umh-rate-monitoring**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>umh-rate-monitoring</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel selective umh-rate-monitoring</a> |
| Tree       | <a href="#">umh-rate-monitoring</a>  |
| Introduced | 21.5.R1  |
| Platforms  | All  |

### **group** [[group-ip-address](#)] (*ipv4-prefix* | *ipv6-prefix*) [source](#) (*ipv4-prefix* | *ipv6-prefix*)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>group</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel selective umh-rate-monitoring group</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">source</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">group</a>   |
| Introduced | 21.5.R1   |
| Platforms  | All   |

### **[group-ip-address]** (*ipv4-prefix* | *ipv6-prefix*)

|          |   |
|----------|---|
| Synopsis | Group IP address  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvpn provider-tunnel selective umh-rate-monitoring group</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">source</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |

|            |                                     |
|------------|-------------------------------------|
| Tree       | <a href="#">group</a>               |
| Notes      | This element is part of a list key. |
| Introduced | 21.5.R1                             |
| Platforms  | All                                 |

### **source** (*ipv4-prefix* | *ipv6-prefix*)

|            |   |
|------------|---|
| Synopsis   | Source IP address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">umh-rate-monitoring</a> <a href="#">group</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>source</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">group</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 21.5.R1   |
| Platforms  | All   |

### **revertive-timer** *number*

|            |  |
|------------|--|
| Synopsis   | Time until switch to primary PMSI after recovering rate  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">umh-rate-monitoring</a> <a href="#">group</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>source</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>revertive-timer</b> <i>number</i> |
| Tree       | <a href="#">revertive-timer</a>  |
| Range      | 0 to 3600  |
| Introduced | 21.5.R1  |
| Platforms  | All  |

### **traffic-rate-delta** *number*

|            |   |
|------------|---|
| Synopsis   | Rate delta between PMSIs under which traffic switches   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">provider-tunnel</a> <a href="#">selective</a> <a href="#">umh-rate-monitoring</a> <a href="#">group</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>source</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>traffic-rate-delta</b> <i>number</i> |
| Tree       | <a href="#">traffic-rate-delta</a>  |
| Range      | 0 to 4294967294   |
| Introduced | 21.5.R1   |
| Platforms  | All   |

## redundant-source-list

|            |  |
|------------|--|
| Synopsis   | Enter the <b>redundant-source-list</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvprn</a> <b>redundant-source-list</b> |
| Tree       | <a href="#">redundant-source-list</a>  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

## source-prefix [[ip-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

|                |   |
|----------------|---|
| Synopsis       | Add a list entry for <b>source-prefix</b>   |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvprn</a> <b>redundant-source-list</b> <b>source-prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree           | <a href="#">source-prefix</a>   |
| Max. Instances | 16  |
| Introduced     | 19.5.R1   |
| Platforms      | All   |

## [[ip-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

|            |   |
|------------|---|
| Synopsis   | Unicast address prefix and mask   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvprn</a> <b>redundant-source-list</b> <b>source-prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">source-prefix</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

## rpf-select

|            |   |
|------------|---|
| Synopsis   | Enter the <b>rpf-select</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">mvprn</a> <b>rpf-select</b> |
| Tree       | <a href="#">rpf-select</a>  |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**core-mvpn** [[core-mvpn-service-name](#)] *reference*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>core-mvpn</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">rpf-select</a> <a href="#">core-mvpn</a> <i>reference</i> |
| Tree       | <a href="#">core-mvpn</a>   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**[core-mvpn-service-name]** *reference*

|            |   |
|------------|---|
| Synopsis   | Core MVPN service name  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">rpf-select</a> <a href="#">core-mvpn</a> <i>reference</i> |
| Tree       | <a href="#">core-mvpn</a>   |
| Reference  | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i>  |
| Notes      | This element is part of a list key.   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**group-prefix** [[ip-group-prefix](#)] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>group-prefix</b> list instance  |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">rpf-select</a> <a href="#">core-mvpn</a> <i>reference</i> <a href="#">group-prefix</a> <i>string</i> |
| Tree           | <a href="#">group-prefix</a>   |
| Min. Instances | 1  |
| Introduced     | 19.5.R1  |
| Platforms      | All  |

**[ip-group-prefix]** *string*

|            |  |
|------------|--|
| Synopsis   | IPv4 multicast address prefix and mask   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">mvpn</a> <a href="#">rpf-select</a> <a href="#">core-mvpn</a> <i>reference</i> <a href="#">group-prefix</a> <i>string</i> |
| Tree       | <a href="#">group-prefix</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 19.5.R1  |

Platforms All

## starg *boolean*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Starg flag.

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**min-first-fragment-size-rx number**

|             |   |
|-------------|---|
| Synopsis    | Minimum MTU size for upstream packets   |
| Context     | <b>configure service vprn string nat inside large-scale dual-stack-lite endpoint string min-first-fragment-size-rx number</b>   |
| Tree        | <a href="#">min-first-fragment-size-rx</a>  |
| Description | This command configures the minimum MTU size for the first fragment in the upstream direction. This command can be used to enable processing of first IPv6 fragments smaller than 1280 bytes. RFC 8200 recommends the minimum MTU in IPv6 be 1280 bytes which allows fragmentation only for packets that are larger than 1280 bytes. If a first fragment is smaller than 1280 bytes, DS-lite implementation in the SR OS, by default, drops the first fragment. |
| Range       | 512 to 1280   |
| Default     | 1280  |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**reassemble** *boolean*

|            |   |
|------------|---|
| Synopsis   | Reassembly of IPv6 payload datagrams  |

| Synopsis | Enter the <b>policy-map</b> list instance |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn string nat inside large-scale nat44 deterministic policy-map string</b>   |
| Tree        | <a href="#">policy-map</a>  |
| Description | Commands in this context configure the attributes of the policy map. The operator must fully specify the map statement, however the <b>tools perform nat deterministic calculate-maps</b> command is available to produce system generated maps, if desired. The <b>calculate-maps</b> command outputs a set of system-generated map statements and the operator can copy the map parameters into the MD-CLI candidate configuration. |

| Tree       | <a href="#">subscriber-identification</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state keyword**

|          |   |
|----------|---|
| Synopsis | Administrative state of subscriber identification |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn string nat inside large-scale subscriber-identification admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## attribute

|            |   |
|------------|---|
| Synopsis   | Enter the <b>attribute</b> context  |
| Context    | <b>configure service vprn string nat inside large-scale subscriber-identification attribute</b> |
| Tree       | <a href="#">attribute</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## type keyword

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | RADIUS attribute used as subscriber identifier   |
| Context    | <b>configure service vprn string nat inside large-scale subscriber-identification attribute type keyword</b> |
| Tree       | <a href="#">type</a>   |
| Options    | alc-sub-string, user-name, class, station-id, imsi, imei   |
| Default    | alc-sub-string   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## vendor keyword

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | The RADIUS Vendor  |
| Context    | <b>configure service vprn string nat inside large-scale subscriber-identification attribute vendor keyword</b> |
| Tree       | <a href="#">vendor</a>   |
| Options    | standard, nokia, 3gpp  |
| Default    | nokia  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **description string**

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure service vprn string nat inside large-scale subscriber-identification description string</b> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **drop-unidentified-traffic boolean**

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Drop traffic from unidentified flows  |
| Context    | <b>configure service vprn string nat inside large-scale subscriber-identification drop-unidentified-traffic boolean</b> |
| Tree       | <a href="#">drop-unidentified-traffic</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **radius-proxy-server**

|          |   |
|----------|---|
| Synopsis | Enable the <b>radius-proxy-server</b> context |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn string nat inside large-scale subscriber-identification radius-proxy-server</b> |
| Tree       | <a href="#">radius-proxy-server</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### router-instance *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Router instance  |
| Context    | <b>configure service vprn string nat inside large-scale subscriber-identification radius-proxy-server router-instance string</b> |
| Tree       | <a href="#">router-instance</a>  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### server *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Server name   |
| Context       | <b>configure service vprn string nat inside large-scale subscriber-identification radius-proxy-server server string</b> |
| Tree          | <a href="#">server</a>  |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## map

|            |  |
|------------|--|
| Synopsis   | Enter the <b>map</b> context                 |
| Context    | <b>configure service vprn string nat map</b> |
| Tree       | <a href="#">map</a>                          |
| Introduced | 16.0.R1                                      |
| Platforms  | VSR  |

## map-domain [[domain-name](#)] *reference*

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>map-domain</b>                            |
| Context    | <b>configure service vprn string nat map map-domain reference</b> |
| Tree       | <a href="#">map-domain</a>  |
| Introduced | 16.0.R1   |
| Platforms  | VSR   |

## [[domain-name](#)] *reference*

|            |   |
|------------|---|
| Synopsis   | MAP domain template name  |
| Context    | <b>configure service vprn string nat map map-domain reference</b> |
| Tree       | <a href="#">map-domain</a>  |
| Reference  | <b>configure service nat map-t domain string</b>                  |
| Notes      | This element is part of a list key.                               |
| Introduced | 16.0.R1   |
| Platforms  | VSR   |

## outside

|            |  |
|------------|--|
| Synopsis   | Enter the <b>outside</b> context                 |
| Context    | <b>configure service vprn string nat outside</b> |
| Tree       | <a href="#">outside</a>                          |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR     |

## dnat-only

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dnat-only</b> context                         |
| Context    | <b>configure service vprn string nat outside dnat-only</b> |
| Tree       | <a href="#">dnat-only</a>                                  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR               |

## route-limit *number*

|            |   |
|------------|---|
| Synopsis   | Limit for internal routes for downstream traffic                              |
| Context    | <b>configure service vprn string nat outside dnat-only route-limit number</b> |
| Tree       | <a href="#">route-limit</a>   |
| Range      | 1 to 131072   |
| Default    | 32768   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                  |

## filters

|            |  |
|------------|--|
| Synopsis   | Enter the <b>filters</b> context                         |
| Context    | <b>configure service vprn string nat outside filters</b> |
| Tree       | <a href="#">filters</a>                                  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR             |

## downstream

|            |   |
|------------|---|
| Synopsis   | Enter the <b>downstream</b> context                                 |
| Context    | <b>configure service vprn string nat outside filters downstream</b> |
| Tree       | <a href="#">downstream</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                        |

### ipv4 reference

|            |  |
|------------|--|
| Synopsis   | IPv4 filter policy name  |
| Context    | <b>configure</b> <a href="#">service vprn string nat outside filters downstream ipv4 reference</a> |
| Tree       | <a href="#">ipv4</a>   |
| Reference  | <b>configure</b> <a href="#">filter ip-filter string</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### ipv6 reference

|            |  |
|------------|--|
| Synopsis   | IPv6 filter policy name  |
| Context    | <b>configure</b> <a href="#">service vprn string nat outside filters downstream ipv6 reference</a> |

**icmp-echo-reply** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow NAT pool IP addresses to respond to ICMP PINGS  |
| Context     | <b>configure</b> <a href="#">service vprn string nat outside pool string icmp-echo-reply</a> <i>boolean</i>   |
| Tree        | <a href="#">icmp-echo-reply</a>   |
| Description | <p>This command allows IP addresses in the NAT pool to respond to ICMP Echo requests (PINGs). The configuration can be toggled while the pool is in use.</p> <p>In L2-aware NAT when port-block-extensions is disabled, the reply from an outside IP address is generated only when this IP address has at least one host (binding) behind it.</p> <p>In L2-aware NAT when port-block-extensions is enabled, the reply from an outside IP address is generated regardless if a binding is present.</p> <p>In LSN, the reply from an outside IP address is generated regardless if a binding is present.</p> |

|            |  |
|------------|--|
| Default    | false  |
| Introduced | 21.10.R1                                     |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## I2-aware

|            |   |
|------------|---|
| Synopsis   | Enter the <b>I2-aware</b> context                                     |
| Context    | <b>configure service vprn string nat outside pool string I2-aware</b> |
| Tree       | <b>I2-aware</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                          |

## default-host

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>default-host</b> context   |
| Context     | <b>configure service vprn string nat outside pool string I2-aware default-host</b>   |
| Tree        | <b>default-host</b>  |
| Description | <p>Commands in this context configure the default DMZ host options. A default DMZ host is a node on the inside to which all unknown traffic is redirected by changing the destination IPv4 address in the traffic header. During this operation, the checksums in the Layer 3 and Layer 4 header (UDP and TCP) are recalculated.</p> <p>Unknown traffic in NAT represent all unmatched traffic arriving from the outside (where there is no pinhole or a matching flow record created by traffic initiated from the inside). The purpose of the default DMZ host is to capture and analyze the unknown traffic as part of threat analysis.</p> <p>The rate of redirected unknown traffic can be restricted by configuration.</p> |
| Introduced  | 22.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## inside-router-instance *string*

|             |  |
|-------------|--|
| Synopsis    | Router instance of the DMZ   |
| Context     | <b>configure service vprn string nat outside pool string I2-aware default-host inside-router-instance string</b> |
| Tree        | <b>inside-router-instance</b>  |
| Description | This command configures the router instance on the inside where the default DMZ host resides.                    |

|            |  |
|------------|--|
| Introduced | 22.10.R1                                     |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **ip-address** *string*

|             |   |
|-------------|---|
| Synopsis    | IP address of the default DMZ host  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">nat outside pool</a> <i>string</i> <a href="#">l2-aware default-host ip-address</a> <i>string</i>   |
| Tree        | <a href="#">ip-address</a>  |
| Description | This command configures the IP address of the default DMZ host. Redirection to the default DMZ host is achieved by replacing the destination IP address in the traffic header in the unknown traffic initiated from the outside with the one of the default DMZ host. |
| Introduced  | 22.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **rate-limit** *number*

|             |  |
|-------------|--|
| Synopsis    | Rate limit for unknown traffic sent to default DMZ host  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">nat outside pool</a> <i>string</i> <a href="#">l2-aware default-host rate-limit</a> <i>number</i>  |
| Tree        | <a href="#">rate-limit</a>   |
| Description | This command configures the rate limit of the unknown traffic sent to the default DMZ host.<br><br>Unknown traffic sent to the default DMZ host is rate limited by a configurable value expressed in mbps. The rate limit is configurable per NAT pool per ISA, vISA, or ESA-VM. |
| Range       | 1 to 10000   |
| Default     | 10   |
| Introduced  | 22.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **external-assignment** *boolean*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

## default-host

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>default-host</b> context   |
| Context     | <b>configure service vprn string nat outside pool string large-scale default-host</b>  |
| Tree        | <a href="#">default-host</a>   |
| Description | <p>Commands in this context configure the default DMZ host options. A default DMZ host is a node on the inside to which all unknown traffic is redirected by changing the destination IPv4 address in the traffic header. During this operation, the checksums in the Layer 3 and Layer 4 header (UDP and TCP) are recalculated.</p> <p>Unknown traffic in NAT represent all unmatched traffic arriving from the outside (where there is no pinhole or a matching flow record created by traffic initiated from the inside). The purpose of the default DMZ host is to capture and analyze the unknown traffic as part of threat analysis.</p> <p>The rate of redirected unknown traffic can be restricted by configuration.</p> |
| Introduced  | 22.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## inside-router-instance *string*

|             |   |
|-------------|---|
| Synopsis    | Router instance of the DMZ  |
| Context     | <b>configure service vprn string nat outside pool string large-scale default-host inside-router-instance string</b> |
| Tree        | <a href="#">inside-router-instance</a>  |
| Description | This command configures the router instance on the inside where the default DMZ host resides.                       |
| Introduced  | 22.10.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-address** *string*

Synopsis IP address of the default DMZ host

Context **configure** [service vprn](#) *string* [nat outside pool](#) *string* [large-scale default-host ip-address](#) *string*

Tree [ip-address](#)

Description This command configures the IP address of the default DMZ host. Redirection to the default DMZ host is achieved by replacing the destination IP address in the traffic header in the unknown traffic initiated from the outside with the one of the default DMZ host.

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **rate-limit** *number*

Synopsis Rate limit for unknown traffic sent to default DMZ host

Context **configure** [service vprn](#) *string* [nat outside pool](#) *string* [large-scale default-host rate-limit](#) *number*

Tree [rate-limit](#)

Description This command configures the rate limit of the unknown traffic sent to the default DMZ host.

Unknown traffic sent to the default DMZ host is rate limited by a configurable value expressed in mbps. The rate limit is configurable per NAT pool per ISA, vISA, or ESA-VM.

Range 1 to 10000

Default 10

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **deterministic**

Synopsis Enter the **deterministic** context

Context **configure** [service vprn](#) *string* [nat outside pool](#) *string* [large-scale deterministic](#)

Tree [deterministic](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### port-reservation *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis Number of ports per deterministic port-block

Context **configure service vprn** *string nat outside pool string large-scale deterministic port-reservation number*

Tree [port-reservation](#)

Range 1 to 65536

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### watermarks

Synopsis Enable the **watermarks** context

Context **configure service vprn** *string nat outside pool string large-scale deterministic watermarks*

Tree [watermarks](#)

Description Commands in this context monitor extended (dynamic) port-block utilization per outside IP in a NAT pool in deterministic LSN.

High and low thresholds are configured in percentages of total available extended port-blocks per outside IP in a pool. Both values represent extended port-block utilization or occupancy per outside IP in a pool.

For the system to generate those events, the NAT event-id 2045 must be enabled through configuration in the log event-control.

Introduced 22.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dynamic-block-reservation** *boolean*

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Reserve dynamic block for subscriber  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>nat</b> <b>outside</b> <b>pool</b> <i>string</i> <b>port-forwarding</b> <b>dynamic-block-reservation</b> <i>boolean</i>  |
| Tree        | <b>dynamic-block-reservation</b>  |
| Description | <p>When configured to <b>true</b>, the system reserves dynamic port block when the first port forward for the subscriber is created. The dynamic port block allocation is logged only if the block is being used and mappings are created. Dynamic port block reservation due to the port forward creation but without any dynamic mapping, is not logged.</p> <p>The reserved port block is released only when the last mapping in the block expires and there are no port forwards associated with the subscriber. The de-allocation log (syslog or RADIUS) is generated when the dynamic port block is completely released.</p> <p>Dynamic port block reservations can be enabled only if the configured maximum number of subscribers per outside IP addresses are less than or equal to the maximum number of configured port blocks per outside IP address.</p> <p>When configured to <b>false</b>, dynamic port blocks are not reserved when the first port forward for the subscriber is created.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **range-end** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | End of the wildcard range for port forwards   |
| Context  | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>nat</b> <b>outside</b> <b>pool</b> <i>string</i> <b>port-forwarding</b> <b>range-end</b> <i>number</i> |
| Tree     | <b>range-end</b>  |

|             |   |
|-------------|---|
| Description | <p>This command configures the upper boundary of the wildcard port range dedicated to port forwarding in a NAT pool, whereas the <b>range-start</b> command configures the lower boundary (the starting port) of the wildcard port range dedicated to port forwarding in a NAT pool.</p> <p>If left unconfigured, the <b>range-end</b> implicit value is set to 1023, that represents the end of the well-known port range that is always enabled.</p> <p>Port forwards are supported only in pools in NAPT mode. Pools in 1:1 mode do not support port-forwards.</p> |
| Range       | 0   1023 to 65535   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **range-start** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Start of the wildcard range for port forwards   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>nat outside pool</b> <i>string</i> <b>port-forwarding</b> <b>range-start</b> <i>number</i>  |
| Tree        | <b>range-start</b>  |
| Description | <p>This command configures the lower boundary (the starting port) of the wildcard port range dedicated to port forwarding in a NAT pool, whereas the <b>range-end</b> command configures the upper boundary of the wildcard port range dedicated to port forwarding in a NAT pool.</p> <p>If left unconfigured, the <b>range-start</b> implicit value is set to 1. Port 0 is always excluded from the port forwarding range.</p> <p>Port forwards are supported only in pools in Network Address and Port Translation (NAPT) mode. Pools in 1:1 mode do not support configured port forwards.</p> |
| Range       | 0   1   1025 to 65535   |

| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>nat outside pool</b> <i>string</i> <b>port-reservation</b> |
| Tree       | <b>port-reservation</b>  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### port-blocks *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Port block size for NAT subscribers   |
| Context     | <b>configure</b> <a href="#">service vprn string nat outside pool string port-reservation port-blocks number</a>  |
| Tree        | <a href="#">port-blocks</a>   |
| Description | <p>In CGN, this specifies the number of port-blocks per outside IP address in the NAT pool. The available ports per outside IP address (the end port minus the upper bound value of the static port-forwarding range) are divided into the number of port blocks specified in this command. This implicitly determines the size of each port block.</p> <p>For L2-aware NAT, this command can be configured only if the port block extensions (extended port blocks) are disabled. You must disable the <b>l2-aware port-block-extension</b> hierarchy in the NAT pool.</p> |
| Range       | 1 to 64512  |
| Notes       | The following elements are part of a choice: <b>port-blocks</b> or <b>ports</b> .   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### ports *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Size of the port block for NAT subscribers   |
| Context     | <b>configure</b> <a href="#">service vprn string nat outside pool string port-reservation ports number</a>       |
| Tree        | <a href="#">ports</a>  |
| Description | For carrier-grade NAT (CGN), this command specifies the size of port blocks for NAT subscribers in the NAT pool. |

For L2-aware NAT, this command specifies the size of the initial port-block of a subscriber in the pool. Additional port blocks (extended port blocks) for the L2-aware subscriber must be explicitly enabled under the **I2-aware port-block-extension** hierarchy in the NAT pool.

This command does not affect the size of extended port blocks.

|            |   |
|------------|---|
| Range      | 1 to 64512  |
| Notes      | The following elements are part of a choice: <b>port-blocks</b> or <b>ports</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                      |

### **type** keyword

#### **WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ip-mtu *number*

|            |  |
|------------|--|
| Synopsis   | IP MTU applied to outgoing packets   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">ip-mtu</a> <i>number</i> |
| Tree       | <a href="#">ip-mtu</a>   |
| Range      | 512 to 9786  |
| Units      | bytes  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ipv4

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> context                                      |
| Context    | <b>configure service vprn string network-interface string ipv4</b> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## allow-directed-broadcasts *boolean*

|            |  |
|------------|--|
| Synopsis   | Accept broadcasts that are directed to this interface  |
| Context    | <b>configure service vprn string network-interface string ipv4 allow-directed-broadcasts boolean</b> |
| Tree       | <a href="#">allow-directed-broadcasts</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## bfd

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bfd</b> context   |
| Context    | <b>configure service vprn string network-interface string ipv4 bfd</b> |
| Tree       | <a href="#">bfd</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of BFD sessions   |
| Context    | <b>configure service vprn string network-interface string ipv4 bfd admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **echo-receive** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum echo interval over this interface   |
| Context    | <b>configure service vprn</b> <i>string network-interface string ipv4 bfd echo-receive number</i> |
| Tree       | <a href="#">echo-receive</a>  |
| Range      | 100 to 100000   |
| Units      | milliseconds  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **multiplier** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of consecutive BFD messages missed from the peer   |
| Context     | <b>configure service vprn</b> <i>string network-interface string ipv4 bfd multiplier number</i>   |
| Tree        | <a href="#">multiplier</a>  |
| Description | This command configures the number of missed messages before the BFD session state is changed to down and the upper-level protocol is notified of the fault. A multiplier of less than 3 should not be used in production environments. |
| Range       | 1 to 20   |
| Default     | 3   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **receive** *number*

|             |  |
|-------------|--|
| Synopsis    | BFD receive interval over this interface   |
| Context     | <b>configure service vprn</b> <i>string network-interface string ipv4 bfd receive number</i>   |
| Tree        | <a href="#">receive</a>  |
| Description | This command specifies the receive interval for the BFD session.<br>On the 7750 SR, this command can only be configured to a value less than 100 when the <b>type</b> command is configured to <b>cpm-np</b> . |
| Range       | 10 to 100000   |
| Units       | milliseconds   |
| Default     | 100  |
| Introduced  | 16.0.R1  |

Platforms All

### **transmit-interval** *number*

Synopsis BFD transmit interval over this interface

Context **configure service vprn** *string network-interface string ipv4 bfd transmit-interval number*

Tree **transmit-interval**

Description This command configures the transmit intervals.  
On the 7750 SR, this command can only be configured to a value less than 100 when the **type** command is configured to **cpm-np**.

Range 10 to 100000

Units milliseconds

Default 100

Introduced 16.0.R1

Platforms All

### **type** *keyword*

Synopsis Local termination point for the BFD session

Context **configure service vprn** *string network-interface string ipv4 bfd type keyword*

Tree **type**

Description This command sets the local termination point for the BFD session to allow for fast timers down to 10 ms granularity.  
The options to specify where the BFD session runs are:

- **auto** (default) – the system chooses and uses the line card CPU only for single-hop BFD sessions with timer intervals equal to or greater than 100ms. All others are placed on the **cpm-np**.
- **cpm-np** – BFD session runs on the FP complex associated with the CPM. This is either the FP on the CPM or the one elected on smaller systems.
- **fp** – BFD session runs on the line card CPU. This option can only be used for single-hop BFD sessions with timers equal to or greater than 100ms.

Options cpm-np, auto, fp

Default auto

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## icmp

|            |   |
|------------|---|
| Synopsis   | Enter the <b>icmp</b> context   |
| Context    | <b>configure service vprn string network-interface string ipv4 icmp</b> |
| Tree       | <a href="#">icmp</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## mask-reply *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow responses to ICMP mask requests on the interface                                     |
| Context    | <b>configure service vprn string network-interface string ipv4 icmp mask-reply boolean</b> |
| Tree       | <a href="#">mask-reply</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## param-problem

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>param-problem</b> context  |
| Context     | <b>configure service vprn string network-interface string ipv4 icmp param-problem</b>                         |
| Tree        | <a href="#">param-problem</a>   |
| Description | Commands in this context specify the settings for ICMP Parameter Problem messages generated by the interface. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of sent Parameter Problem messages   |
| Context    | <b>configure service vprn string network-interface string ipv4 icmp param-problem admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |

Platforms All

### **number** *number*

Synopsis Maximum number of Parameter Problem messages to send

Context **configure** [service vprn](#) *string* [network-interface](#) *string* [ipv4 icmp param-problem](#) *number*

Tree [number](#)

Range 10 to 1000

Default 100

Introduced 16.0.R1

Context **configure** [service vprn](#) *string* [network-interface](#) *string* [ipv4 secondary](#) *string* **igp-inhibit** *boolean*

Tree [igp-inhibit](#)

Description When configured to **true**, the running IGP does not recognize the secondary IP address as a local interface.

Default false

Introduced 16.0.R1

Platforms All

### **prefix-length** *number*

Synopsis IPv4 address prefix length

Context **configure** [service vprn](#) *string* [network-interface](#) *string* [ipv4 secondary](#) *string* **prefix-length** *number*

Tree [prefix-length](#)

Range 0 to 32

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **tcp-mss** *number*

Synopsis TCP maximum segment size for the interface

Context **configure** [service vprn](#) *string* [network-interface](#) *string* [ipv4](#) **tcp-mss** *number*

Tree [tcp-mss](#)

Range 384 to 9746

Introduced 16.0.R1

Platforms All

## urpf-check

|            |   |
|------------|---|
| Synopsis   | Enable the <b>urpf-check</b> context  |
| Context    | <b>configure service vprn string network-interface string ipv4 urpf-check</b> |
| Tree       | <a href="#">urpf-check</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ignore-default *boolean*

|            |  |
|------------|--|
| Synopsis   | Ignore default route when performing a uRPF check  |
| Context    | <b>configure service vprn string network-interface string ipv4 urpf-check ignore-default boolean</b> |
| Tree       | <a href="#">ignore-default</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## mode *keyword*

|            |  |
|------------|--|
| Synopsis   | Unicast RPF check mode   |
| Context    | <b>configure service vprn string network-interface string ipv4 urpf-check mode keyword</b> |
| Tree       | <a href="#">mode</a>   |
| Options    | strict, loose, strict-no-ecmp  |
| Default    | strict   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## lag

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lag</b> context                                      |
| Context    | <b>configure service vprn string network-interface string lag</b> |
| Tree       | <a href="#">lag</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**link-map-profile** *number*

|             |  |
|-------------|--|
| Synopsis    | LAG link map profile for a SAP or network interface  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">lag link-map-profile</a> <i>number</i>   |
| Tree        | <a href="#">link-map-profile</a>   |
| Description | This command assigns a preconfigured LAG link map profile to a SAP or network interface configured on a LAG or a PW port that exists on a LAG. After an operator assigns a LAG link map profile, the system rehashes the SAP or network interface egress traffic over the LAG as required by the new configuration.<br><br>If the LAG link map profile for a SAP or network interface is deleted, the system reverts back to per-flow hashing. |
| Range       | 1 to 64  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**per-link-hash**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>per-link-hash</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">lag per-link-hash</a> |
| Tree       | <a href="#">per-link-hash</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**class** *number*

|            |   |
|------------|---|
| Synopsis   | Class used on LAG egress using weighted per-link-hash   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">lag per-link-hash class</a> <i>number</i> |
| Tree       | <a href="#">class</a>   |
| Range      | 1 to 3  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**weight** *number*

|          |  |
|----------|--|
| Synopsis | Weight used on LAG egress using weighted per-link-hash   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">lag per-link-hash weight</a> <i>number</i> |

|            |                        |
|------------|------------------------|
| Tree       | <a href="#">weight</a> |
| Range      | 1 to 1024              |
| Default    | 1                      |
| Introduced | 16.0.R1                |
| Platforms  | All                    |

## load-balancing

|            |  |
|------------|--|
| Synopsis   | Enter the <b>load-balancing</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string network-interface string load-balancing</a> |
| Tree       | <a href="#">load-balancing</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## flow-label-load-balancing *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable flow label load balancing   |
| Context     | <b>configure</b> <a href="#">service vprn string network-interface string load-balancing flow-label-load-balancing boolean</a>   |
| Tree        | <a href="#">flow-label-load-balancing</a>  |
| Description | When configured to <b>true</b> , the router enables load balancing in ECMP and LAG based on the output of a hash performed on the triplet (SA, DA, flow label) in the header of an IPv6 packet received on an IES, VPRN, R-VPLS, CSC, or network interface.<br><br>When configured to <b>false</b> , the router disables load balancing in ECMP and LAG. |
| Default     | false  |
| Introduced  | 21.5.R1  |
| Platforms   | All  |

## ip-load-balancing *keyword*

|             |  |
|-------------|--|
| Synopsis    | IP load-balancing algorithm  |
| Context     | <b>configure</b> <a href="#">service vprn string network-interface string load-balancing ip-load-balancing keyword</a>   |
| Tree        | <a href="#">ip-load-balancing</a>  |
| Description | This command specifies whether to include the source address, destination address, or both in LAG or ECMP hash on IP interfaces. Additionally, when the <b>l4-load-balancing</b> |

command is enabled, this command also includes the source or destination port in the hash inputs.

|            |                                     |
|------------|-------------------------------------|
| Options    | both, destination, source, inner-ip |
| Default    | both                                |
| Introduced | 16.0.R3                             |
| Platforms  | All                                 |

### **lsr-load-balancing** *keyword*

|             |  |
|-------------|--|
| Synopsis    | LSR load-balancing algorithm   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">load-balancing</a> <a href="#">lsr-load-balancing</a> <i>keyword</i> |
| Tree        | <a href="#">lsr-load-balancing</a>   |
| Description | This command specifies whether the IP header is used in the LAG and ECMP LSR hashing algorithm. This is the per-interface setting.   |
| Options     | lbl-only, lbl-ip, ip-only, eth-encap-ip, lbl-ip-l4-teid  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **spi-load-balancing** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable SPI use in hashing  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">load-balancing</a> <a href="#">spi-load-balancing</a> <i>boolean</i> |
| Tree        | <a href="#">spi-load-balancing</a>   |
| Description | When configured to <b>true</b> , the router uses the Security Parameter Index (SPI) in hashing for ESP and AH encrypted IPv4 and IPv6 traffic. This is a per-interface setting.              |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **teid-load-balancing** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable use of TEID in hashing   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">load-balancing</a> <a href="#">teid-load-balancing</a> <i>boolean</i> |
| Tree     | <a href="#">teid-load-balancing</a>   |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## loopback

|            |  |
|------------|--|
| Synopsis   | Use interface as a loopback interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">loopback</a> |
| Tree       | <a href="#">loopback</a>   |
| Notes      | The following elements are part of a choice: <b>loopback</b> or <b>port</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## mac string

|            |   |
|------------|---|
| Synopsis   | MAC address for the interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">mac</a> <i>string</i> |
| Tree       | <a href="#">mac</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## port string

|               |  |
|---------------|--|
| Synopsis      | Port to bind the interface   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">port</a> <i>string</i> |
| Tree          | <a href="#">port</a>   |
| String Length | 1 to 45  |
| Notes         | The following elements are part of a choice: <b>loopback</b> or <b>port</b> .  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

## qos

|          |   |
|----------|---|
| Synopsis | Enter the <b>qos</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">qos</a> |

|            |                     |
|------------|---------------------|
| Tree       | <a href="#">qos</a> |
| Introduced | 16.0.R1             |
| Platforms  | All                 |

### **egress-instance** *number*

|             |   |
|-------------|---|
| Synopsis    | Port egress queue group instance for this interface   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">qos egress-instance</a> <i>number</i>                       |
| Tree        | <a href="#">egress-instance</a>   |
| Description | This command specifies which instance to associate with this specific network IP interface since multiple instances of the same egress queue-group can be applied to the same port. |
| Range       | 1 to 65535  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **egress-port-redirect-group** *reference*

|             |   |
|-------------|---|
| Synopsis    | QoS queue group name  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">qos egress-port-redirect-group</a> <i>reference</i>   |
| Tree        | <a href="#">egress-port-redirect-group</a>  |
| Description | This command configures the egress queue group used for all egress forwarding-class redirections specified within the network QoS policy ID. The specified queue group name must exist as an egress queue group applied to the egress context of the port associated with the IP interface. |
| Reference   | <b>configure</b> <a href="#">qos queue-group-templates egress</a> <a href="#">queue-group</a> <i>string</i>   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **ingress-fp-redirect-group** *reference*

|          |  |
|----------|--|
| Synopsis | Forwarding plane queue group policy for the interface  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">network-interface</a> <i>string</i> <a href="#">qos ingress-fp-redirect-group</a> <i>reference</i> |
| Tree     | <a href="#">ingress-fp-redirect-group</a>  |

|             |   |
|-------------|---|
| Description | This command configures the ingress queue-group used for all ingress forwarding-class redirections specified within the network QoS policy ID. The specified queue group name must exist as an ingress queue group applied to the ingress context of the forwarding plane associated with the IP interface. |
| Reference   | <b>configure qos queue-group-templates ingress queue-group</b> <i>string</i>  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **ingress-instance** *number*

|             |   |
|-------------|---|
| Synopsis    | Forwarding plane ingress queue group for this interface   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>network-interface</b> <i>string</i> <b>qos ingress-instance</b> <i>number</i>  |
| Tree        | <a href="#">ingress-instance</a>  |
| Description | This command configures which instance to associate with this specific network IP interface. An operator can apply multiple instances of the same ingress queue group to the same forwarding plane. |
| Range       | 1 to 65535  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **network-policy** *reference*

|             |   |
|-------------|---|
| Synopsis    | Network policy name associated with a network interface   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>network-interface</b> <i>string</i> <b>qos network-policy</b> <i>reference</i> |
| Tree        | <a href="#">network-policy</a>  |
| Description | This command associates an existing network policy name with the IP interface.  |
| Reference   | <b>configure qos network</b> <i>string</i>  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **tos-marking-state** *keyword*

|          |  |
|----------|--|
| Synopsis | TOS marking state  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>network-interface</b> <i>string</i> <b>tos-marking-state</b> <i>keyword</i> |
| Tree     | <a href="#">tos-marking-state</a>  |
| Options  | trusted, untrusted   |

---

|            |         |
|------------|---------|
| Default    | trusted |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## ntp

|            |  |
|------------|--|
| Synopsis   | Enable the <b>ntp</b> context            |
| Context    | <b>configure service vprn string ntp</b> |
| Tree       | <b>ntp</b>                               |
| Introduced | 16.0.R1                                  |
| Platforms  | All                                      |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of NTP execution                        |
| Context    | <b>configure service vprn string ntp admin-state keyword</b> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## authenticate *boolean*

|            |   |
|------------|---|
| Synopsis   | Authentication of NTP PDUs when acting as a server            |
| Context    | <b>configure service vprn string ntp authenticate boolean</b> |
| Tree       | <b>authenticate</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## authentication-check *boolean*

|          |   |
|----------|---|
| Synopsis | Authenticate NTP PDUs and reject mismatches                           |
| Context  | <b>configure service vprn string ntp authentication-check boolean</b> |

---

|            |                                      |
|------------|--------------------------------------|
| Tree       | <a href="#">authentication-check</a> |
| Default    | true                                 |
| Introduced | 16.0.R1                              |
| Platforms  | All                                  |

### **authentication-key** [[key-id](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>authentication-key</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ntp</a> <a href="#">authentication-key</a> <i>number</i> |
| Tree       | <a href="#">authentication-key</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **[key-id]** *number*

|            |  |
|------------|--|
| Synopsis   | Authentication key ID used for NTP packets   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ntp</a> <a href="#">authentication-key</a> <i>number</i> |
| Tree       | <a href="#">authentication-key</a>   |
| Range      | 1 to 255   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **key** *string*

|               |  |
|---------------|--|
| Synopsis      | Key to authenticate NTP packets  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ntp</a> <a href="#">authentication-key</a> <i>number</i> <a href="#">key</a> <i>string</i> |
| Tree          | <a href="#">key</a>  |
| String Length | 1 to 71  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**type keyword**

|            |  |
|------------|--|
| Synopsis   | Authentication method to authenticate NTP packet                               |
| Context    | <b>configure service vpn string ntp authentication-key number type keyword</b> |
| Tree       | <a href="#">type</a>   |
| Options    | des, message-digest  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**broadcast [interface-name] reference**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>broadcast</b> list instance                    |
| Context    | <b>configure service vpn string ntp broadcast reference</b> |
| Tree       | <a href="#">broadcast</a>                                   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[interface-name] reference**

|            |   |
|------------|---|
| Synopsis   | Local interface used to transmit NTP broadcast packets      |
| Context    | <b>configure service vpn string ntp broadcast reference</b> |
| Tree       | <a href="#">broadcast</a>                                   |
| Reference  | <b>configure service vpn string interface string</b>        |
| Notes      | This element is part of a list key.                         |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**key-id reference**

|            |  |
|------------|--|
| Synopsis   | Authentication key and type used by the node                                 |
| Context    | <b>configure service vpn string ntp broadcast reference key-id reference</b> |
| Tree       | <a href="#">key-id</a>   |
| Reference  | <b>configure service vpn string ntp authentication-key number</b>            |
| Introduced | 16.0.R1  |

Platforms All

### **t***ttl number*

Synopsis TTL of messages transmitted by the broadcast address  
 Context **configure** [service vprn](#) *string ntp broadcast reference ttl number*  
 Tree [ttl](#)  
 Range 1 to 255  
 Default 127  
 Introduced 16.0.R1

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the OSPF instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **advertise-router-capability** *keyword*

|            |  |
|------------|--|
| Synopsis   | Allow router advertisement capabilities  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>advertise-router-capability</b> <i>keyword</i> |
| Tree       | <a href="#">advertise-router-capability</a>  |
| Options    | false, link, area, as  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **area** [[area-id](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>area</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>area</b> <i>string</i> |
| Tree       | <a href="#">area</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[area-id] string**

|            |   |
|------------|---|
| Synopsis   | Area-ID attribute   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> |
| Tree       | <a href="#">area</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**advertise-ne-profile reference**

|            |   |
|------------|---|
| Synopsis   | Network element profile to be advertised  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">advertise-ne-profile</a> <i>reference</i> |
| Tree       | <a href="#">advertise-ne-profile</a>  |
| Reference  | <b>configure</b> <a href="#">system</a> <a href="#">network-element-discovery</a> <i>profile</i> <i>string</i>  |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**advertise-router-capability boolean**

|            |  |
|------------|--|
| Synopsis   | Allow router advertisement capabilities  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">advertise-router-capability</a> <i>boolean</i> |
| Tree       | <a href="#">advertise-router-capability</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**area-range [ip-prefix-mask] string**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>area-range</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">area-range</a> <i>string</i> |
| Tree       | <a href="#">area-range</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[ip-prefix-mask]** *string*

|            |  |
|------------|--|
| Synopsis   | IPv4 unicast address prefix and mask   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">area-range</a> <i>string</i> |
| Tree       | <a href="#">area-range</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**advertise** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise summarized range of addresses to other areas   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">area-range</a> <i>string</i> <b>advertise</b> <i>boolean</i> |
| Tree       | <a href="#">advertise</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**blackhole-aggregate** *boolean*

|            |  |
|------------|--|
| Synopsis   | Install a low priority blackhole route to avoid loops  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">blackhole-aggregate</a> <i>boolean</i> |
| Tree       | <a href="#">blackhole-aggregate</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**export-policy** *reference*

|           |  |
|-----------|--|
| Synopsis  | Type 3 Summary-LSA/OSPFv3 inter-area-prefix-LSA route  |
| Context   | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">export-policy</a> <i>reference</i> |
| Tree      | <a href="#">export-policy</a>  |
| Reference | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>   |

|                |                                      |
|----------------|--------------------------------------|
| Max. Instances | 5                                    |
| Notes          | This element is ordered by the user. |
| Introduced     | 16.0.R1                              |
| Platforms      | All                                  |

### **import-policy** *reference*

|                |  |
|----------------|--|
| Synopsis       | Route imported as Summary Type 3/Inter-Area-Prefix-LSA   |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <b>import-policy</b> <i>reference</i> |
| Tree           | <a href="#">import-policy</a>  |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>   |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **interface** [[interface-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>interface</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <b>interface</b> <i>string</i> |
| Tree       | <a href="#">interface</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[interface-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | IP interface name   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <b>interface</b> <i>string</i> |
| Tree          | <a href="#">interface</a>   |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the OSPF interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**advertise-router-capability** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow router advertisement capabilities   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>advertise-router-capability</b> <i>boolean</i> |
| Tree       | <a href="#">advertise-router-capability</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**advertise-subnet** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise point-to-point interfaces as subnet routes   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>advertise-subnet</b> <i>boolean</i> |
| Tree       | <a href="#">advertise-subnet</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**authentication-key** *string*

|          |   |
|----------|---|
| Synopsis | Authentication key  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>authentication-key</b> <i>string</i> |

|               |                                    |
|---------------|------------------------------------|
| Tree          | <a href="#">authentication-key</a> |
| String Length | 1 to 38                            |
| Introduced    | 16.0.R1                            |
| Platforms     | All                                |

### **authentication-keychain** *reference*

|            |   |
|------------|---|
| Synopsis   | TCP authentication keychain for the session   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">authentication-keychain</a> <i>reference</i> |
| Tree       | <a href="#">authentication-keychain</a>   |
| Reference  | <b>configure</b> <a href="#">system security keychains</a> <a href="#">keychain</a> <i>string</i>   |
| Introduced | 16.0.R3   |
| Platforms  | All   |

### **authentication-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Authentication type used on OSPF interface  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">authentication-type</a> <i>keyword</i> |
| Tree       | <a href="#">authentication-type</a>   |
| Options    | password, message-digest  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **bfd-liveness**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>bfd-liveness</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">bfd-liveness</a> |
| Tree       | <a href="#">bfd-liveness</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **remain-down-on-failure** *boolean*

|          |   |
|----------|---|
| Synopsis | Force adjacency down on failure until session returns |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>ospf</b> <i>number</i> <b>area</b> <i>string</i> <b>interface</b> <i>string</i> <b>bfd-liveness</b><br><b>remain-down-on-failure</b> <i>boolean</i> |
| Tree       | <b>remain-down-on-failure</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**dead-interval** *number*

|            |  |
|------------|--|
| Synopsis   | OSPF wait time for Hellos before neighbor declared down  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>ospf</b> <i>number</i> <b>area</b> <i>string</i> <b>interface</b> <i>string</i> <b>dead-interval</b><br><i>number</i> |
| Tree       | <b>dead-interval</b>   |
| Range      | 2 to 65535   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**hello-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time between OSPF Hellos of this interface  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>ospf</b> <i>number</i> <b>area</b> <i>string</i> <b>interface</b> <i>string</i> <b>hello-interval</b><br><i>number</i> |
| Tree       | <b>hello-interval</b>   |
| Range      | 1 to 65535  |
| Units      | seconds   |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**interface-type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |                |
|----------|----------------|
| Synopsis | Interface type |
|----------|----------------|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string ospf number area string interface string interface-type keyword</i>   |
| Tree        | <a href="#">interface-type</a>  |
| Description | This command specifies the interface type.<br><br><b>broadcast</b> - Broadcast network<br><br>To significantly improve adjacency forming and network convergence, configure a network as point-to-point if only two routers are connected, even if the network is a broadcast media such as Ethernet.<br><br><b>non-broadcast</b> - Non-broadcast network<br><br><b>point-to-point</b> - Point-to-point link<br><br>Set the interface type of an Ethernet link to <b>point-to-point</b> to avoid having to carry the broadcast adjacency maintenance overhead if the Ethernet link provided is used as a point-to-point. Set the interface type of an Ethernet link to <b>point-to-point</b> to avoid having to carry the broadcast adjacency maintenance overhead if the Ethernet link provided is used as a point-to-point.<br><br><b>secondary</b> - Multiple secondary adjacencies allowed<br><br>A <b>secondary</b> interface allows multiple secondary adjacencies, in addition to the primary adjacency, to be established over a single IP interface. This interface type can also be applied to the system interface and to loopback interfaces to allow them to participate in multiple areas, although no adjacencies are formed over these types of interfaces. |
| Options     | broadcast, non-broadcast, point-to-point, secondary   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### load-balancing-weight *number*

|            |   |
|------------|---|
| Synopsis   | Configure load-balancing-weight.  |
| Context    | <b>configure service vprn</b> <i>string ospf number area string interface string load-balancing-weight number</i> |
| Tree       | <a href="#">load-balancing-weight</a>   |
| Range      | 1 to 4294967295   |
| Introduced | 20.2.R1   |
| Platforms  | All   |

### loopfree-alternate

|          |   |
|----------|---|
| Synopsis | Enter the <b>loopfree-alternate</b> context   |
| Context  | <b>configure service vprn</b> <i>string ospf number area string interface string loopfree-alternate</i> |
| Tree     | <a href="#">loopfree-alternate</a>  |

|            |         |
|------------|---------|
| Introduced | 16.0.R3 |
| Platforms  | All     |

### **exclude** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable fast reroute at OSPF primary interface level  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">loopfree-alternate</a> <b>exclude</b> <i>boolean</i> |
| Tree       | <a href="#">exclude</a>  |
| Default    | false  |
| Introduced | 16.0.R3  |
| Platforms  | All  |

### **policy-map**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>policy-map</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">loopfree-alternate</a> <b>policy-map</b> |
| Tree       | <a href="#">policy-map</a>   |
| Introduced | 16.0.R3  |
| Platforms  | All  |

### **route-nh-template** *reference*

|            |   |
|------------|---|
| Synopsis   | Route next hop policy template name   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">loopfree-alternate</a> <a href="#">policy-map</a> <b>route-nh-template</b> <i>reference</i> |
| Tree       | <a href="#">route-nh-template</a>   |
| Reference  | <b>configure</b> <a href="#">routing-options</a> <a href="#">route-next-hop-policy</a> <a href="#">template</a> <i>string</i>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R3   |
| Platforms  | All   |

### **lsa-filter-out** *keyword*

|          |                        |
|----------|------------------------|
| Synopsis | LSA flooding reduction |
|----------|------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string ospf number area string interface string isa-filter-out keyword</i> |
| Tree       | <a href="#">isa-filter-out</a>  |
| Options    | none, all, except-own-rtrlsa, except-own-rtrlsa-and-defaults  |
| Default    | none  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **message-digest-key** [[key-id](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>message-digest-key</b> list instance  |
| Context    | <b>configure service vprn</b> <i>string ospf number area string interface string message-digest-key number</i> |
| Tree       | <a href="#">message-digest-key</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **[key-id]** *number*

|            |  |
|------------|--|
| Synopsis   | Message digest index   |
| Context    | <b>configure service vprn</b> <i>string ospf number area string interface string message-digest-key number</i> |
| Tree       | <a href="#">message-digest-key</a>   |
| Range      | 1 to 255   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **md5** *string*

|               |   |
|---------------|---|
| Synopsis      | MD5 hash key  |
| Context       | <b>configure service vprn</b> <i>string ospf number area string interface string message-digest-key number md5 string</i> |
| Tree          | <a href="#">md5</a>   |
| String Length | 1 to 51   |
| Notes         | This element is mandatory.  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

**metric number**

|            |  |
|------------|--|
| Synopsis   | Route cost metric for the interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">metric</a> <i>number</i> |
| Tree       | <a href="#">metric</a>   |
| Range      | 1 to 65535   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**mtu number**

|            |   |
|------------|---|
| Synopsis   | MTU for the OSPF to use on the interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">mtu</a> <i>number</i> |
| Tree       | <a href="#">mtu</a>   |
| Range      | 512 to 9786   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**neighbor [address] string**

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>neighbor</b>   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">neighbor</a> <i>string</i> |
| Tree       | <a href="#">neighbor</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[address] string**

|          |  |
|----------|--|
| Synopsis | IPv4 address of the OSPFv2 neighbor  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">neighbor</a> <i>string</i> |
| Tree     | <a href="#">neighbor</a>   |
| Notes    | This element is part of a list key.  |

Introduced 16.0.R1  
 Platforms All

### **passive** *boolean*

Synopsis Advertise passive interfaces as OSPF interfaces  
 Context **configure** [service vprn](#) *string* [ospf number area](#) *string* [interface](#) *string* [passive](#) *boolean*  
 Tree [passive](#)  
 Introduced 16.0.R1  
 Platforms All

### **poll-interval** *number*

Synopsis Interval for Hellos to non-adjacent OSPF NBMA neighbor  
 Context **configure** [service vprn](#) *string* [ospf number area](#) *string* [interface](#) *string* [poll-interval](#) *number*  
 Tree [poll-interval](#)  
 Max. Range 0 to 4294967295  
 Units seconds  
 Default 120  
 Introduced 16.0.R1  
 Platforms All

### **priority** *number*

Synopsis Interface priority in the DR election on the subnet  
 Context **configure** [service vprn](#) *string* [ospf number area](#) *string* [interface](#) *string* [priority](#) *number*  
 Tree [priority](#)  
 Range 0 to 255  
 Default 1  
 Introduced 16.0.R1  
 Platforms All

### **retransmit-interval** *number*

Synopsis Time before OSPF retransmits an unacknowledged LSA

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>ospf</b> <i>number</i> <b>area</b> <i>string</i> <b>interface</b> <i>string</i> <b>retransmit-interval</b> <i>number</i> |
| Tree       | <b>retransmit-interval</b>  |
| Range      | 1 to 1800   |
| Units      | seconds   |
| Default    | 5   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **rib-priority** *keyword*

|            |   |
|------------|---|
| Synopsis   | RIB priority for OSPF   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>ospf</b> <i>number</i> <b>area</b> <i>string</i> <b>interface</b> <i>string</i> <b>rib-priority</b> <i>keyword</i> |
| Tree       | <b>rib-priority</b>   |
| Options    | high  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **transit-delay** *number*

|            |   |
|------------|---|
| Synopsis   | Required LSA transmit time  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>ospf</b> <i>number</i> <b>area</b> <i>string</i> <b>interface</b> <i>string</i> <b>transit-delay</b> <i>number</i> |
| Tree       | <b>transit-delay</b>  |
| Range      | 1 to 1800   |
| Units      | seconds   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **loopfree-alternate-exclude** *boolean*

|          |  |
|----------|--|
| Synopsis | Exclude interfaces in OSPF areas in SPF LFA computation  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>ospf</b> <i>number</i> <b>area</b> <i>string</i> <b>loopfree-alternate-exclude</b> <i>boolean</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">loopfree-alternate-exclude</a> |
| Default    | false                                      |
| Introduced | 16.0.R1                                    |
| Platforms  | All  |

**nssa**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>nssa</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string ospf number area string nssa</a> |
| Tree       | <a href="#">nssa</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**area-range** [\[ip-prefix-mask\] string](#)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>area-range</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn string ospf number area string nssa area-range string</a> |
| Tree       | <a href="#">area-range</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[ip-prefix-mask] string**

|            |   |
|------------|---|
| Synopsis   | IPv4 unicast address prefix and mask  |
| Context    | <b>configure</b> <a href="#">service vprn string ospf number area string nssa area-range string</a> |
| Tree       | <a href="#">area-range</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**advertise** *boolean*

|          |   |
|----------|---|
| Synopsis | Advertise summarized range of addresses to other areas  |
| Context  | <b>configure</b> <a href="#">service vprn string ospf number area string nssa area-range string advertise boolean</a> |

|            |                           |
|------------|---------------------------|
| Tree       | <a href="#">advertise</a> |
| Default    | true                      |
| Introduced | 16.0.R1                   |
| Platforms  | All                       |

### **originate-default-route**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>originate-default-route</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">nssa</a> <a href="#">originate-default-route</a> |
| Tree       | <a href="#">originate-default-route</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **adjacency-check** *boolean*

|            |   |
|------------|---|
| Synopsis   | Perform adjacency checks before originating a default route   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">nssa</a> <a href="#">originate-default-route</a> <a href="#">adjacency-check</a> <i>boolean</i> |
| Tree       | <a href="#">adjacency-check</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **type-nssa** *boolean*

|            |   |
|------------|---|
| Synopsis   | Generate a default route using NSSA-LSA type  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">nssa</a> <a href="#">originate-default-route</a> <a href="#">type-nssa</a> <i>boolean</i> |
| Tree       | <a href="#">type-nssa</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **redistribute-external** *boolean*

|          |  |
|----------|--|
| Synopsis | Redistribute external routes into the NSSA |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string ospf number area string nssa redistribute-external</i> <i>boolean</i> |
| Tree       | <a href="#">redistribute-external</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**summaries** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send summary (Type 3) LSAs into the NSSA on an ABR  |
| Context    | <b>configure service vprn</b> <i>string ospf number area string nssa summaries</i> <i>boolean</i> |
| Tree       | <a href="#">summaries</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**sham-link** [[interface](#)] *string ip-address string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sham-link</b> list instance   |
| Context    | <b>configure service vprn</b> <i>string ospf number area string sham-link string ip-address string</i> |
| Tree       | <a href="#">sham-link</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[interface]** *string*

|               |  |
|---------------|--|
| Synopsis      | Local interface name used for the sham-link  |
| Context       | <b>configure service vprn</b> <i>string ospf number area string sham-link string ip-address string</i> |
| Tree          | <a href="#">sham-link</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**ip-address** *string*

|            |   |
|------------|---|
| Synopsis   | IP address of the sham-link neighbor  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">sham-link</a> <i>string</i> <a href="#">ip-address</a> <i>string</i> |
| Tree       | <a href="#">sham-link</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the OSPF interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">sham-link</a> <i>string</i> <a href="#">ip-address</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**authentication-key** *string*

|               |  |
|---------------|--|
| Synopsis      | Authentication key to send and receive OSPF packets  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">sham-link</a> <i>string</i> <a href="#">ip-address</a> <i>string</i> <a href="#">authentication-key</a> <i>string</i> |
| Tree          | <a href="#">authentication-key</a>   |
| String Length | 1 to 38  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**authentication-keychain** *reference*

|           |  |
|-----------|--|
| Synopsis  | TCP authentication keychain for the session  |
| Context   | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">sham-link</a> <i>string</i> <a href="#">ip-address</a> <i>string</i> <a href="#">authentication-keychain</a> <i>reference</i> |
| Tree      | <a href="#">authentication-keychain</a>  |
| Reference | <b>configure</b> <a href="#">system</a> <a href="#">security</a> <a href="#">keychains</a> <a href="#">keychain</a> <i>string</i>  |

Introduced 16.0.R3  
Platforms All

### **authentication-type** *keyword*

Synopsis Authentication type to be used  
Context **configure** **service vprn** *string* **ospf** *number* **area** *string* **sham-link** *string* **ip-address** *string* **authentication-type** *keyword*  
Tree **authentication-type**  
Options password, message-digest  
Introduced 16.0.R1  
Platforms All

### **dead-interval** *number*

Synopsis OSPF wait time for Hellos before neighbor declared down  
Context **configure** **service vprn** *string* **ospf** *number* **area** *string* **sham-link** *string* **ip-address** *string* **dead-interval** *number*  
Tree **dead-interval**  
Range 2 to 65535  
Units seconds  
Introduced 16.0.R1  
Platforms All

### **hello-interval** *number*

Synopsis Time between OSPF Hellos of this interface  
Context **configure** **service vprn** *string* **ospf** *number* **area** *string* **sham-link** *string* **ip-address** *string* **hello-interval** *number*  
Tree **hello-interval**  
Range 1 to 65535  
Units seconds  
Default 10  
Introduced 16.0.R1  
Platforms All

**message-digest-key** [*key-id*] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>message-digest-key</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">sham-link</a> <i>string</i> <a href="#">ip-address</a> <i>string</i> <b>message-digest-key</b> <i>number</i> |
| Tree       | <a href="#">message-digest-key</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[key-id]** *number*

|            |   |
|------------|---|
| Synopsis   | Message digest index  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">sham-link</a> <i>string</i> <a href="#">ip-address</a> <i>string</i> <b>message-digest-key</b> <i>number</i> |
| Tree       | <a href="#">message-digest-key</a>  |
| Range      | 1 to 255  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**md5** *string*

|               |  |
|---------------|--|
| Synopsis      | MD5 key or hash key  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">sham-link</a> <i>string</i> <a href="#">ip-address</a> <i>string</i> <b>message-digest-key</b> <i>number</i> <b>md5</b> <i>string</i> |
| Tree          | <a href="#">md5</a>  |
| String Length | 1 to 51  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**metric** *number*

|          |   |
|----------|---|
| Synopsis | Explicit route cost metric that is applied to the sham link   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">sham-link</a> <i>string</i> <a href="#">ip-address</a> <i>string</i> <b>metric</b> <i>number</i> |

|            |                        |
|------------|------------------------|
| Tree       | <a href="#">metric</a> |
| Range      | 1 to 65535             |
| Default    | 1                      |
| Introduced | 16.0.R1                |
| Platforms  | All                    |

### **retransmit-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time before OSPF retransmits an unacknowledged LSA   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">sham-link</a> <i>string</i> <a href="#">ip-address</a> <i>string</i> <a href="#">retransmit-interval</a> <i>number</i> |
| Tree       | <a href="#">retransmit-interval</a>  |
| Range      | 1 to 1800  |
| Units      | seconds  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **transit-delay** *number*

|            |  |
|------------|--|
| Synopsis   | Required LSA transmit time   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">sham-link</a> <i>string</i> <a href="#">ip-address</a> <i>string</i> <a href="#">transit-delay</a> <i>number</i> |
| Tree       | <a href="#">transit-delay</a>  |
| Range      | 1 to 1800  |
| Units      | seconds  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **stub**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>stub</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">stub</a> |
| Tree       | <a href="#">stub</a>   |
| Introduced | 16.0.R1  |

Platforms All

### **default-metric** *number*

Synopsis Metric used by ABR for default route into the stub area

Context **configure service vprn** *string ospf number area string stub default-metric number*

Tree [default-metric](#)

Range 1 to 16777214

Default 1

Introduced 16.0.R1

Platforms All

### **summaries** *boolean*

Synopsis Send summary (Type 3) LSAs into the stub area on an ABR

Context **configure service vprn** *string ospf number area string stub summaries boolean*

Tree [summaries](#)

Default true

Introduced 16.0.R1

Platforms All

### **virtual-link** [[router-id](#)] *string transit-area reference*

Synopsis Enter the **virtual-link** list instance

Context **configure service vprn** *string ospf number area string virtual-link string transit-area reference*

Tree [virtual-link](#)

Introduced 16.0.R1

Platforms All

### **[router-id]** *string*

Synopsis Router identity of the virtual link neighbor

Context **configure service vprn** *string ospf number area string virtual-link string transit-area reference*

Tree [virtual-link](#)

|            |                                     |
|------------|-------------------------------------|
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R1                             |
| Platforms  | All                                 |

### **transit-area** *reference*

|            |  |
|------------|--|
| Synopsis   | Transit area that links backbone area to area without physical connection with the backbone  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area reference</a> |
| Tree       | <a href="#">virtual-link</a>   |
| Reference  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the OSPF interface  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area reference</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **authentication-key** *string*

|               |   |
|---------------|---|
| Synopsis      | Authentication key  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area reference</a> <a href="#">authentication-key</a> <i>string</i> |
| Tree          | <a href="#">authentication-key</a>  |
| String Length | 1 to 38   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**authentication-keychain** *reference*

|            |  |
|------------|--|
| Synopsis   | TCP authentication keychain for the session  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area</a> <i>reference</i> <a href="#">authentication-keychain</a> <i>reference</i> |
| Tree       | <a href="#">authentication-keychain</a>  |
| Reference  | <b>configure</b> <a href="#">system security keychains keychain</a> <i>string</i>  |
| Introduced | 16.0.R3  |
| Platforms  | All  |

**authentication-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Authentication type used on OSPF interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area</a> <i>reference</i> <a href="#">authentication-type</a> <i>keyword</i> |
| Tree       | <a href="#">authentication-type</a>  |
| Options    | password, message-digest   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**dead-interval** *number*

|            |   |
|------------|---|
| Synopsis   | OSPF wait time for Hellos before neighbor declared down   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area</a> <i>reference</i> <a href="#">dead-interval</a> <i>number</i> |
| Tree       | <a href="#">dead-interval</a>   |
| Range      | 2 to 65535  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**hello-interval** *number*

|          |  |
|----------|--|
| Synopsis | Time between OSPF Hellos of this interface   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area</a> <i>reference</i> <a href="#">hello-interval</a> <i>number</i> |

|            |                                |
|------------|--------------------------------|
| Tree       | <a href="#">hello-interval</a> |
| Range      | 1 to 65535                     |
| Units      | seconds                        |
| Default    | 10                             |
| Introduced | 16.0.R1                        |
| Platforms  | All                            |

### **message-digest-key** [[key-id](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>message-digest-key</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area</a> <i>reference</i> <a href="#">message-digest-key</a> <i>number</i> |
| Tree       | <a href="#">message-digest-key</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[key-id]** *number*

|            |   |
|------------|---|
| Synopsis   | Message digest index  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area</a> <i>reference</i> <a href="#">message-digest-key</a> <i>number</i> |
| Tree       | <a href="#">message-digest-key</a>  |
| Range      | 1 to 255  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **md5** *string*

|               |  |
|---------------|--|
| Synopsis      | MD5 hash key   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area</a> <i>reference</i> <a href="#">message-digest-key</a> <i>number</i> <b>md5</b> <i>string</i> |
| Tree          | <a href="#">md5</a>  |
| String Length | 1 to 51  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |

Platforms All

### **retransmit-interval** *number*

Synopsis Time before OSPF retransmits an unacknowledged LSA

Context **configure** [service vprn](#) *string* [ospf](#) *number* [area](#) *string* [virtual-link](#) *string* [transit-area](#) *reference* **retransmit-interval** *number*

Tree [retransmit-interval](#)

Range 1 to 1800

Units seconds

Default 5

Introduced 16.0.R1

Platforms All

### **transit-delay** *number*

Synopsis Required LSA transmit time

Context **configure** [service vprn](#) *string* [ospf](#) *number* [area](#) *string* [virtual-link](#) *string* [transit-area](#) *reference* **transit-delay** *number*

Tree [transit-delay](#)

Range 1 to 1800

Units seconds

Default 1

Introduced 16.0.R1

### **compatible-rfc1583** *boolean*

Synopsis OSPF summary and external route calculations

Context **configure** [service vprn](#) *string* [ospf](#) *number* **compatible-rfc1583** *boolean*

Tree [compatible-rfc1583](#)

Default true

Introduced 16.0.R1

Platforms All

**export-limit**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>export-limit</b> context                        |
| Context    | <b>configure service vprn string ospf number export-limit</b> |
| Tree       | <a href="#">export-limit</a>                                  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**log-percent number**

|            |  |
|------------|--|
| Synopsis   | Export limit before warning and SNMP notification sent                           |
| Context    | <b>configure service vprn string ospf number export-limit log-percent number</b> |
| Tree       | <a href="#">log-percent</a>  |
| Range      | 1 to 100   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**number number**

|            |   |
|------------|---|
| Synopsis   | Maximum routes or prefixes exported from route table                        |
| Context    | <b>configure service vprn string ospf number export-limit number number</b> |
| Tree       | <a href="#">number</a>  |
| Range      | 1 to 4294967295   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**export-policy reference**

|             |  |
|-------------|--|
| Synopsis    | Export policies that determine exported routes   |
| Context     | <b>configure service vprn string ospf number export-policy reference</b>   |
| Tree        | <a href="#">export-policy</a>  |
| Description | <p>This command configures export routing policies for the routes exported from the routing table to IS-IS.</p> <p>If the export policy is undefined, the system does not export non IS-IS routes from the routing table manager to IS-IS.</p> |

If multiple policy names are specified, the policies are evaluated in the order they are specified. The first policy that matches is applied.

If the **aggregate** command is also configured in the **configure router** context, the aggregation is applied before the export policy is applied.

Routing policies are created in the **configure router policy-options** context.

|                |  |
|----------------|--|
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### external-db-overflow

|            |   |
|------------|---|
| Synopsis   | Enable the <b>external-db-overflow</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">external-db-overflow</a> |
| Tree       | <a href="#">external-db-overflow</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### interval *number*

|            |  |
|------------|--|
| Synopsis   | Time during which the router operates in overload  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">external-db-overflow</a> <a href="#">interval</a> <i>number</i> |
| Tree       | <a href="#">interval</a>   |
| Range      | 0 to 2147483647  |
| Units      | seconds  |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### limit *number*

|          |   |
|----------|---|
| Synopsis | Number of external LSA at which overload is triggered   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">external-db-overflow</a> <a href="#">limit</a> <i>number</i> |
| Tree     | <a href="#">limit</a>   |

---

|            |                 |
|------------|-----------------|
| Range      | 0 to 2147483647 |
| Default    | 0               |
| Introduced | 16.0.R1         |
| Platforms  | All             |

### **external-preference** *number*

|            |  |
|------------|--|
| Synopsis   | Preference for OSPF external routes  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">external-preference</a> <i>number</i> |
| Tree       | <a href="#">external-preference</a>  |
| Range      | 1 to 255   |
| Default    | 150  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **graceful-restart**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>graceful-restart</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">graceful-restart</a> |
| Tree       | <a href="#">graceful-restart</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **helper-mode** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable graceful restart helper for OSPF  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">graceful-restart</a> <a href="#">helper-mode</a> <i>boolean</i> |
| Tree       | <a href="#">helper-mode</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **strict-lsa-checking** *boolean*

|          |   |
|----------|---|
| Synopsis | Perform strict LSA checking during graceful restart |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string ospf number graceful-restart strict-lsa-checking boolean</i> |
| Tree       | <a href="#">strict-lsa-checking</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **ignore-dn-bit** *boolean*

|            |   |
|------------|---|
| Synopsis   | Ignore the DN bit for OSPF LSA packets for the instance                       |
| Context    | <b>configure service vprn</b> <i>string ospf number ignore-dn-bit boolean</i> |
| Tree       | <a href="#">ignore-dn-bit</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **import-policy** *reference*

|                |   |
|----------------|---|
| Synopsis       | Import policy names for routes from IGP to route table                          |
| Context        | <b>configure service vprn</b> <i>string ospf number import-policy reference</i> |
| Tree           | <a href="#">import-policy</a>   |
| Reference      | <b>configure policy-options policy-statement</b> <i>string</i>                  |
| Max. Instances | 5   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

### **loopfree-alternate**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>loopfree-alternate</b> context                               |
| Context    | <b>configure service vprn</b> <i>string ospf number loopfree-alternate</i> |
| Tree       | <a href="#">loopfree-alternate</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**exclude**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>exclude</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string ospf number loopfree-alternate</a> <b>exclude</b> |
| Tree       | <a href="#">exclude</a>  |
| Introduced | 16.0.R3  |
| Platforms  | All  |

**prefix-policy** *reference*

|                |  |
|----------------|--|
| Synopsis       | Policy to exclude prefixes from LFA SPF calculation  |
| Context        | <b>configure</b> <a href="#">service vprn string ospf number loopfree-alternate</a> <b>exclude</b> <a href="#">prefix-policy reference</a>   |
| Tree           | <a href="#">prefix-policy</a>  |
| Description    | This command specifies the name of the policy for the prefixes to exclude from the LFA SPF calculation.<br><br>An excluded prefix is not included in LFA calculation regardless of its priority. The prefix tag is, however, used in the main SPF. |
| Reference      | <b>configure</b> <a href="#">policy-options policy-statement string</a>  |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R3  |
| Platforms      | All  |

**multicast-import** *boolean*

|            |   |
|------------|---|
| Synopsis   | Submit routes into the multicast Route Table Manager  |
| Context    | <b>configure</b> <a href="#">service vprn string ospf number</a> <b>multicast-import</b> <i>boolean</i> |
| Tree       | <a href="#">multicast-import</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**overload** *boolean*

|            |   |
|------------|---|
| Synopsis   | Change local router state to appear overloaded  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>overload</b> <i>boolean</i> |
| Tree       | <a href="#">overload</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**overload-include-ext-1** *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise routes with maximum metric value for overload   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>overload-include-ext-1</b> <i>boolean</i> |
| Tree       | <a href="#">overload-include-ext-1</a>  |
| Default    | false   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

**overload-include-ext-2** *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise routes with maximum metric value for overload   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>overload-include-ext-2</b> <i>boolean</i> |
| Tree       | <a href="#">overload-include-ext-2</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**overload-include-stub** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise all stub interfaces with max metric value  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>overload-include-stub</b> <i>boolean</i> |
| Tree       | <a href="#">overload-include-stub</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## overload-on-boot

|            |   |
|------------|---|
| Synopsis   | Enable the <b>overload-on-boot</b> context                        |
| Context    | <b>configure service vprn string ospf number overload-on-boot</b> |
| Tree       | <a href="#">overload-on-boot</a>                                  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## timeout *number*

|            |   |
|------------|---|
| Synopsis   | Time during which the router operates in overload state before reestablishing normal operations |
| Context    | <b>configure service vprn string ospf number overload-on-boot timeout number</b>                |
| Tree       | <a href="#">timeout</a>   |
| Range      | 60 to 1800  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## preference *number*

|            |  |
|------------|--|
| Synopsis   | Preference for OSPF internal routes                                |
| Context    | <b>configure service vprn string ospf number preference number</b> |
| Tree       | <a href="#">preference</a>   |
| Range      | 1 to 255   |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## reference-bandwidth *number*

|          |   |
|----------|---|
| Synopsis | Bandwidth to reference default costing of interfaces                        |
| Context  | <b>configure service vprn string ospf number reference-bandwidth number</b> |
| Tree     | <a href="#">reference-bandwidth</a>   |
| Range    | 1 to 18446744073709551615   |

|            |           |
|------------|-----------|
| Units      | kilobps   |
| Default    | 100000000 |
| Introduced | 16.0.R1   |
| Platforms  | All       |

## rib-priority

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rib-priority</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>rib-priority</b> |
| Tree       | <a href="#">rib-priority</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## high

|            |   |
|------------|---|
| Synopsis   | Enter the <b>high</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">rib-priority</a> <b>high</b> |
| Tree       | <a href="#">high</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## prefix-list *reference*

|            |   |
|------------|---|
| Synopsis   | Higher priority list used during OSPF route calculation   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">rib-priority</a> <a href="#">high</a> <a href="#">prefix-list</a> <i>reference</i> |
| Tree       | <a href="#">prefix-list</a>   |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">prefix-list</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## router-id *string*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Unique router ID for the OSPF instance                                   |
| Context    | <b>configure service vprn</b> <i>string ospf number router-id string</i> |
| Tree       | <a href="#">router-id</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **rtr-adv-lsa-limit**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>rtr-adv-lsa-limit</b> context                               |
| Context    | <b>configure service vprn</b> <i>string ospf number rtr-adv-lsa-limit</i> |
| Tree       | <a href="#">rtr-adv-lsa-limit</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **log-only** *boolean*

|            |  |
|------------|--|
| Synopsis   | Log the event without triggering overload  |
| Context    | <b>configure service vprn</b> <i>string ospf number rtr-adv-lsa-limit log-only boolean</i> |
| Tree       | <a href="#">log-only</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **max-lsa-count** *number*

|            |  |
|------------|--|
| Synopsis   | Max number of LSAs one router can advertise  |
| Context    | <b>configure service vprn</b> <i>string ospf number rtr-adv-lsa-limit max-lsa-count number</i> |
| Tree       | <a href="#">max-lsa-count</a>  |
| Range      | 1 to 4294967295  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**overload-timeout** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Maximum time in overload after LSA limit is reached   |
| Context    | <b>configure service vprn</b> <i>string ospf number rtr-adv-lsa-limit overload-timeout</i> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">overload-timeout</a>  |
| Range      | 1 to 1800   |
| Units      | seconds   |
| Options    | forever   |
| Default    | forever   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**warning-threshold** *number*

|            |   |
|------------|---|
| Synopsis   | Percentage of the max LSA count that causes a warning   |
| Context    | <b>configure service vprn</b> <i>string ospf number rtr-adv-lsa-limit warning-threshold</i> <i>number</i> |
| Tree       | <a href="#">warning-threshold</a>   |
| Range      | 0 to 100  |
| Units      | percent   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**super-backbone** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable/disable super-backbone functionality.  |
| Context    | <b>configure service vprn</b> <i>string ospf number super-backbone</i> <i>boolean</i> |
| Tree       | <a href="#">super-backbone</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**suppress-dn-bit** *boolean*

|          |  |
|----------|--|
| Synopsis | Suppress the DN bit setting for OSPF LSA packets |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string ospf number suppress-dn-bit boolean</i> |
| Tree       | <a href="#">suppress-dn-bit</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## timers

|            |  |
|------------|--|
| Synopsis   | Enter the <b>timers</b> context                                |
| Context    | <b>configure service vprn</b> <i>string ospf number timers</i> |
| Tree       | <a href="#">timers</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## incremental-spf-wait *number*

|            |  |
|------------|--|
| Synopsis   | Delay time before an incremental SPF calculation starts                                    |
| Context    | <b>configure service vprn</b> <i>string ospf number timers incremental-spf-wait number</i> |
| Tree       | <a href="#">incremental-spf-wait</a>   |
| Range      | 0 to 1000  |
| Units      | milliseconds   |
| Default    | 1000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## lsa-accumulate *number*

|            |  |
|------------|--|
| Synopsis   | Delay to gather LSAs before advertising to neighbors                                 |
| Context    | <b>configure service vprn</b> <i>string ospf number timers lsa-accumulate number</i> |
| Tree       | <a href="#">lsa-accumulate</a>   |
| Range      | 0 to 1000  |
| Units      | milliseconds   |
| Default    | 1000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **Isa-arrival** *number*

|            |  |
|------------|--|
| Synopsis   | Min delay between receipt of same LSAs from neighbors  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">timers</a> <b>Isa-arrival</b> <i>number</i> |
| Tree       | <a href="#">Isa-arrival</a>  |
| Range      | 0 to 600000  |
| Units      | milliseconds   |
| Default    | 1000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **Isa-generate**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>Isa-generate</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">timers</a> <b>Isa-generate</b> |
| Tree       | <a href="#">Isa-generate</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **Isa-initial-wait** *number*

|            |  |
|------------|--|
| Synopsis   | First wait period between OSPF LSA generation  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">timers</a> <a href="#">Isa-generate</a> <b>Isa-initial-wait</b> <i>number</i> |
| Tree       | <a href="#">Isa-initial-wait</a>   |
| Range      | 10 to 600000   |
| Units      | milliseconds   |
| Default    | 5000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **Isa-second-wait** *number*

|          |   |
|----------|---|
| Synopsis | Hold time between the first and second LSA generation   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">timers</a> <a href="#">Isa-generate</a> <b>Isa-second-wait</b> <i>number</i> |
| Tree     | <a href="#">Isa-second-wait</a>   |

|            |              |
|------------|--------------|
| Range      | 10 to 600000 |
| Units      | milliseconds |
| Default    | 5000         |
| Introduced | 16.0.R1      |
| Platforms  | All          |

### **max-lsa-wait** *number*

|            |  |
|------------|--|
| Synopsis   | Max time between two LSAs being generated  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">timers lsa-generate</a> <b>max-lsa-wait</b> <i>number</i> |
| Tree       | <a href="#">max-lsa-wait</a>   |
| Range      | 10 to 600000   |
| Units      | milliseconds   |
| Default    | 5000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **redistribute-delay** *number*

|            |  |
|------------|--|
| Synopsis   | Hold down timer for external routes into OSPF  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">timers redistribute-delay</a> <i>number</i> |
| Tree       | <a href="#">redistribute-delay</a>   |
| Range      | 0 to 1000  |
| Units      | milliseconds   |
| Default    | 1000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **spf-wait**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>spf-wait</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">timers spf-wait</a> |
| Tree       | <a href="#">spf-wait</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**spf-initial-wait** *number*

|            |  |
|------------|--|
| Synopsis   | Initial SPF calculation delay after a topology change  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number</a> <a href="#">timers spf-wait</a> <a href="#">spf-initial-wait</a> <i>number</i> |
| Tree       | <a href="#">spf-initial-wait</a>   |
| Range      | 10 to 100000   |
| Units      | milliseconds   |
| Default    | 1000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**spf-max-wait** *number*

|            |  |
|------------|--|
| Synopsis   | Max interval between two consecutive SPF calculations  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number</a> <a href="#">timers spf-wait</a> <a href="#">spf-max-wait</a> <i>number</i> |
| Tree       | <a href="#">spf-max-wait</a>   |
| Range      | 10 to 120000   |
| Units      | milliseconds   |
| Default    | 10000  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**spf-second-wait** *number*

|            |   |
|------------|---|
| Synopsis   | Hold time between the first and second SPF calculation  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf number</a> <a href="#">timers spf-wait</a> <a href="#">spf-second-wait</a> <i>number</i> |
| Tree       | <a href="#">spf-second-wait</a>   |
| Range      | 10 to 100000  |
| Units      | milliseconds  |
| Default    | 1000  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**unicast-import** *boolean*

|            |  |
|------------|--|
| Synopsis   | Submit routes into the unicast Route Table Manager   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>unicast-import</b> <i>boolean</i> |
| Tree       | <a href="#">unicast-import</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**vpn-domain**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>vpn-domain</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>vpn-domain</b> |
| Tree       | <a href="#">vpn-domain</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**id** *string*

|               |   |
|---------------|---|
| Synopsis      | OSPF VPN domain ID  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>vpn-domain</b> <b>id</b> <i>string</i> |
| Tree          | <a href="#">id</a>  |
| Description   | This command specifies the OSPF VPN domain. This is exchanged using BGP in the Extended Community attribute associated with a prefix.                   |
| String Length | 14  |
| Default       | 0000.0000.0000  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**type** *keyword*

|          |  |
|----------|--|
| Synopsis | VPN domain type  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <b>vpn-domain</b> <b>type</b> <i>keyword</i> |
| Tree     | <a href="#">type</a>   |
| Options  | 0005, 0105, 0205, 8005   |
| Notes    | This element is mandatory.   |

---

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **vpn-tag** *number*

|            |  |
|------------|--|
| Synopsis   | OSPF VPN tag   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf</a> <i>number</i> <a href="#">vpn-tag</a> <i>number</i> |
| Tree       | <a href="#">vpn-tag</a>  |
| Max. Range | 0 to 4294967295  |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **ospf3** [[ospf-instance](#)] *number*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>ospf3</b> list instance  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> |
| Tree           | <a href="#">ospf3</a>   |
| Max. Instances | 32  |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

### **[ospf-instance]** *number*

|            |   |
|------------|---|
| Synopsis   | Specifies the value of the integrated OSPF instance.  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> |
| Tree       | <a href="#">ospf3</a>   |
| Range      | 0 to 31   64 to 95  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the OSPF instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**advertise-router-capability** *keyword*

|            |  |
|------------|--|
| Synopsis   | Allow router advertisement capabilities  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">advertise-router-capability</a> <i>keyword</i> |
| Tree       | <a href="#">advertise-router-capability</a>  |
| Options    | false, link, area, as  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**area** [[area-id](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>area</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> |
| Tree       | <a href="#">area</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[area-id]** *string*

|            |  |
|------------|--|
| Synopsis   | Area-ID attribute  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> |
| Tree       | <a href="#">area</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**advertise-router-capability** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow router advertisement capabilities   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">advertise-router-capability</a> <i>boolean</i> |
| Tree       | <a href="#">advertise-router-capability</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**area-range** [[ip-prefix-mask](#)] (*ipv4-prefix* | *ipv6-prefix*)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>area-range</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">area-range</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">area-range</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[ip-prefix-mask]** (*ipv4-prefix* | *ipv6-prefix*)

|            |   |
|------------|---|
| Synopsis   | Address ranges to create on an ABR for route summarization or suppression   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">area-range</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">area-range</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**advertise** *boolean*

|          |  |
|----------|--|
| Synopsis | Advertise summarized range of addresses to other areas   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">area-range</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">advertise</a> <i>boolean</i> |
| Tree     | <a href="#">advertise</a>  |
| Default  | true   |

Introduced 16.0.R1  
 Platforms All

### **blackhole-aggregate** *boolean*

Synopsis Install a low priority blackhole route to avoid loops  
 Context **configure** [service](#) [vprn](#) *string* [ospf3](#) *number* [area](#) *string* **blackhole-aggregate** *boolean*  
 Tree [blackhole-aggregate](#)

| Platforms  | All     |

### **interface-type** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Interface type   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>ospf3</b> <i>number</i> <b>area</b> <i>string</i> <b>interface</b> <i>string</i> <b>interface-type</b> <i>keyword</i>   |
| Tree        | <b>interface-type</b>  |
| Description | <p>This command specifies the interface type.</p> <p><b>broadcast</b> - Broadcast network</p> <p>To significantly improve adjacency forming and network convergence, configure a network as point-to-point if only two routers are connected, even if the network is a broadcast media such as Ethernet.</p> <p><b>non-broadcast</b> - Non-broadcast network</p> <p><b>point-to-point</b> - Point-to-point link</p> <p>Set the interface type of an Ethernet link to <b>point-to-point</b> to avoid having to carry the broadcast adjacency maintenance overhead if the Ethernet link provided is used as a point-to-point. Set the interface type of an Ethernet link to <b>point-to-point</b> to avoid having to carry the broadcast adjacency maintenance overhead if the Ethernet link provided is used as a point-to-point.</p> <p><b>secondary</b> - Multiple secondary adjacencies allowed</p> <p>A <b>secondary</b> interface allows multiple secondary adjacencies, in addition to the primary adjacency, to be established over a single IP interface. This interface type can also be applied to the system interface and to loopback interfaces to allow them to participate in multiple areas, although no adjacencies are formed over these types of interfaces.</p> |
| Options     | broadcast, non-broadcast, point-to-point, secondary  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **load-balancing-weight** *number*

|          |                                  |
|----------|----------------------------------|
| Synopsis | Configure load-balancing-weight. |
|----------|----------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string ospf3 number area string interface string load-balancing-weight number</i> |
| Tree       | <a href="#">load-balancing-weight</a>  |
| Range      | 1 to 4294967295  |
| Introduced | 20.2.R1  |
| Platforms  | All  |

## loopfree-alternate

|            |  |
|------------|--|
| Synopsis   | Enter the <b>loopfree-alternate</b> context  |
| Context    | <b>configure service vprn</b> <i>string ospf3 number area string interface string loopfree-alternate</i> |
| Tree       | <a href="#">loopfree-alternate</a>   |
| Introduced | 16.0.R3  |
| Platforms  | All  |

## exclude *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable fast reroute at OSPF primary interface level  |
| Context    | <b>configure service vprn</b> <i>string ospf3 number area string interface string loopfree-alternate exclude boolean</i> |
| Tree       | <a href="#">exclude</a>  |
| Default    | false  |
| Introduced | 16.0.R3  |
| Platforms  | All  |

## policy-map

|            |   |
|------------|---|
| Synopsis   | Enable the <b>policy-map</b> context  |
| Context    | <b>configure service vprn</b> <i>string ospf3 number area string interface string loopfree-alternate policy-map</i> |
| Tree       | <a href="#">policy-map</a>  |
| Introduced | 16.0.R3   |
| Platforms  | All   |

**route-nh-template** *reference*

|            |   |
|------------|---|
| Synopsis   | Route next hop policy template name   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">loopfree-alternate</a> <a href="#">policy-map</a> <a href="#">route-nh-template</a> <i>reference</i> |
| Tree       | <a href="#">route-nh-template</a>   |
| Reference  | <b>configure</b> <a href="#">routing-options</a> <a href="#">route-next-hop-policy</a> <a href="#">template</a> <i>string</i>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R3   |
| Platforms  | All   |

**lsa-filter-out** *keyword*

|            |  |
|------------|--|
| Synopsis   | LSA flooding reduction   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">lsa-filter-out</a> <i>keyword</i> |
| Tree       | <a href="#">lsa-filter-out</a>   |
| Options    | none, all, except-own-rtrlsa, except-own-rtrlsa-and-defaults   |
| Default    | none   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**metric** *number*

|            |   |
|------------|---|
| Synopsis   | Route cost metric for the interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">metric</a> <i>number</i> |
| Tree       | <a href="#">metric</a>  |
| Range      | 1 to 65535  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**mtu** *number*

|          |  |
|----------|--|
| Synopsis | MTU for the OSPF to use on the interface   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">mtu</a> <i>number</i> |
| Tree     | <a href="#">mtu</a>  |

|            |             |
|------------|-------------|
| Range      | 512 to 9786 |
| Introduced | 16.0.R1     |
| Platforms  | All         |

### **neighbor** [[address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>neighbor</b>   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>neighbor</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">neighbor</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | IPv6 link local address of the OSPFv3 neighbor   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>neighbor</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">neighbor</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **passive** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise passive interfaces as OSPF interfaces  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>passive</b> <i>boolean</i> |
| Tree       | <a href="#">passive</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **poll-interval** *number*

|          |   |
|----------|---|
| Synopsis | Interval for Hellos to non-adjacent OSPF NBMA neighbor  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>poll-interval</b> <i>number</i> |

|            |                               |
|------------|-------------------------------|
| Tree       | <a href="#">poll-interval</a> |
| Max. Range | 0 to 4294967295               |
| Units      | seconds                       |
| Default    | 120                           |
| Introduced | 16.0.R1                       |
| Platforms  | All                           |

### **priority** *number*

|            |  |
|------------|--|
| Synopsis   | Interface priority in the DR election on the subnet  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>priority</b> <i>number</i> |
| Tree       | <a href="#">priority</a>   |
| Range      | 0 to 255   |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **retransmit-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time before OSPF retransmits an unacknowledged LSA  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>retransmit-interval</b> <i>number</i> |
| Tree       | <a href="#">retransmit-interval</a>   |
| Range      | 1 to 1800   |
| Units      | seconds   |
| Default    | 5   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **rib-priority** *keyword*

|          |   |
|----------|---|
| Synopsis | RIB priority for OSPF   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>rib-priority</b> <i>keyword</i> |
| Tree     | <a href="#">rib-priority</a>  |
| Options  | high  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **transit-delay** *number*

|            |   |
|------------|---|
| Synopsis   | Required LSA transmit time  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">interface</a> <i>string</i> <b>transit-delay</b> <i>number</i> |
| Tree       | <a href="#">transit-delay</a>   |
| Range      | 1 to 1800   |
| Units      | seconds   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **key-rollover-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Key rollover interval   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <b>key-rollover-interval</b> <i>number</i> |
| Tree       | <a href="#">key-rollover-interval</a>   |
| Range      | 10 to 300   |
| Units      | seconds   |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **loopfree-alternate-exclude** *boolean*

|            |   |
|------------|---|
| Synopsis   | Exclude interfaces in OSPF areas in SPF LFA computation   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <b>loopfree-alternate-exclude</b> <i>boolean</i> |
| Tree       | <a href="#">loopfree-alternate-exclude</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**nssa**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>nssa</b> context                                     |
| Context    | <b>configure service vprn string ospf3 number area string nssa</b> |
| Tree       | <b>nssa</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**area-range [ip-prefix-mask] (ipv4-prefix | ipv6-prefix)**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>area-range</b> list instance   |
| Context    | <b>configure service vprn string ospf3 number area string nssa area-range (ipv4-prefix   ipv6-prefix)</b> |
| Tree       | <b>area-range</b>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[ip-prefix-mask] (ipv4-prefix | ipv6-prefix)**

|            |   |
|------------|---|
| Synopsis   | Address ranges to create on an ABR for route summarization or suppression                                 |
| Context    | <b>configure service vprn string ospf3 number area string nssa area-range (ipv4-prefix   ipv6-prefix)</b> |
| Tree       | <b>area-range</b>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**advertise boolean**

|            |   |
|------------|---|
| Synopsis   | Advertise summarized range of addresses to other areas  |
| Context    | <b>configure service vprn string ospf3 number area string nssa area-range (ipv4-prefix   ipv6-prefix) advertise boolean</b> |
| Tree       | <b>advertise</b>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## originate-default-route

|            |  |
|------------|--|
| Synopsis   | Enable the <b>originate-default-route</b> context  |
| Context    | <b>configure service vprn string ospf3 number area string nssa originate-default-route</b> |
| Tree       | <a href="#">originate-default-route</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## adjacency-check *boolean*

|            |  |
|------------|--|
| Synopsis   | Perform adjacency checks before originating a default route  |
| Context    | <b>configure service vprn string ospf3 number area string nssa originate-default-route adjacency-check boolean</b> |
| Tree       | <a href="#">adjacency-check</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## type-nssa *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate a default route using NSSA-LSA type   |
| Context    | <b>configure service vprn string ospf3 number area string nssa originate-default-route type-nssa boolean</b> |
| Tree       | <a href="#">type-nssa</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## redistribute-external *boolean*

|            |  |
|------------|--|
| Synopsis   | Redistribute external routes into the NSSA   |
| Context    | <b>configure service vprn string ospf3 number area string nssa redistribute-external boolean</b> |
| Tree       | <a href="#">redistribute-external</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |

Platforms All

### **summaries** *boolean*

Synopsis Send summary (Type 3) LSAs into the NSSA on an ABR  
 Context **configure service vprn** *string ospf3 number area string nssa summaries boolean*  
 Tree [summaries](#)  
 Default true  
 Introduced 16.0.R1  
 Platforms All

### **stub**

Synopsis Enable the **stub** context  
 Context **configure service vprn** *string ospf3 number area string stub*  
 Tree [stub](#)  
 Introduced 16.0.R1  
 Platforms All

### **default-metric** *number*

Synopsis Metric used by ABR for default route into the stub area  
 Context **configure service vprn** *string ospf3 number area string stub default-metric number*  
 Tree [default-metric](#)  
 Range 1 to 16777214  
 Default 1  
 Introduced 16.0.R1  
 Platforms All

### **summaries** *boolean*

Synopsis Send summary (Type 3) LSAs into the stub area on an ABR  
 Context **configure service vprn** *string ospf3 number area string stub summaries boolean*  
 Tree [summaries](#)  
 Default true

Introduced 16.0.R1  
 Platforms All

### **virtual-link** [**router-id**] *string transit-area reference*

Synopsis Enter the **virtual-link** list instance  
 Context **configure service vprn string ospf3 number area string virtual-link string transit-area reference**  
 Tree **virtual-link**  
 Introduced 16.0.R1  
 Platforms All

### **[router-id]** *string*

Synopsis Router identity of the virtual link neighbor  
 Context **configure service vprn string ospf3 number area string virtual-link string transit-area reference**  
 Tree **virtual-link**  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **transit-area** *reference*

Synopsis Transit area that links backbone area to area without physical connection with the backbone  
 Context **configure service vprn string ospf3 number area string virtual-link string transit-area reference**  
 Tree **virtual-link**  
 Reference **configure service vprn string ospf3 number area string**  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the OSPF interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number area string virtual-link string transit-area reference</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**authentication**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>authentication</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number area string virtual-link string transit-area reference</i> <a href="#">authentication</a> |
| Tree       | <a href="#">authentication</a>   |
| Introduced | 16.0.R6  |
| Platforms  | All  |

**inbound** *reference*

|            |   |
|------------|---|
| Synopsis   | sa-name   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number area string virtual-link string transit-area reference</i> <a href="#">authentication inbound</a> <i>reference</i> |
| Tree       | <a href="#">inbound</a>   |
| Reference  | <b>configure</b> <a href="#">ipsec static-sa</a> <i>string</i>  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R6   |
| Platforms  | All   |

**outbound** *reference*

|          |  |
|----------|--|
| Synopsis | sa-name  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number area string virtual-link string transit-area reference</i> <a href="#">authentication outbound</a> <i>reference</i> |
| Tree     | <a href="#">outbound</a>   |

|            |  |
|------------|--|
| Reference  | <b>configure ipsec static-sa</b> <i>string</i> |
| Notes      | This element is mandatory.                     |
| Introduced | 16.0.R6  |
| Platforms  | All  |

### **dead-interval** *number*

|            |  |
|------------|--|
| Synopsis   | OSPF wait time for Hellos before neighbor declared down  |
| Context    | <b>configure service vprn</b> <i>string ospf3 number area string virtual-link string transit-area reference dead-interval number</i> |
| Tree       | <a href="#">dead-interval</a>  |
| Range      | 2 to 65535   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **hello-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time between OSPF Hellos of this interface  |
| Context    | <b>configure service vprn</b> <i>string ospf3 number area string virtual-link string transit-area reference hello-interval number</i> |
| Tree       | <a href="#">hello-interval</a>  |
| Range      | 1 to 65535  |
| Units      | seconds   |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **retransmit-interval** *number*

|          |  |
|----------|--|
| Synopsis | Time before OSPF retransmits an unacknowledged LSA   |
| Context  | <b>configure service vprn</b> <i>string ospf3 number area string virtual-link string transit-area reference retransmit-interval number</i> |
| Tree     | <a href="#">retransmit-interval</a>  |
| Range    | 1 to 1800  |
| Units    | seconds  |

|            |         |
|------------|---------|
| Default    | 5       |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **transit-delay** *number*

|            |  |
|------------|--|
| Synopsis   | Required LSA transmit time   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">area</a> <i>string</i> <a href="#">virtual-link</a> <i>string</i> <a href="#">transit-area</a> <i>reference</i> <b>transit-delay</b> <i>number</i> |
| Tree       | <a href="#">transit-delay</a>  |
| Range      | 1 to 1800  |
| Units      | seconds  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **export-limit**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>export-limit</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <b>export-limit</b> |
| Tree       | <a href="#">export-limit</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **log-percent** *number*

|            |   |
|------------|---|
| Synopsis   | Export limit before warning and SNMP notification sent  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">export-limit</a> <b>log-percent</b> <i>number</i> |
| Tree       | <a href="#">log-percent</a>   |
| Range      | 1 to 100  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **number** *number*

|          |  |
|----------|--|
| Synopsis | Maximum routes or prefixes exported from route table |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string ospf3 number export-limit number number</i> |
| Tree       | <a href="#">number</a>  |
| Range      | 1 to 4294967295   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **export-policy** *reference*

|                |  |
|----------------|--|
| Synopsis       | Export policies that determine exported routes   |
| Context        | <b>configure service vprn</b> <i>string ospf3 number export-policy reference</i>   |
| Tree           | <a href="#">export-policy</a>  |
| Description    | <p>This command configures export routing policies for the routes exported from the routing table to IS-IS.</p> <p>If the export policy is undefined, the system does not export non IS-IS routes from the routing table manager to IS-IS.</p> <p>If multiple policy names are specified, the policies are evaluated in the order they are specified. The first policy that matches is applied.</p> <p>If the <b>aggregate</b> command is also configured in the <b>configure router</b> context, the aggregation is applied before the export policy is applied.</p> <p>Routing policies are created in the <b>configure router policy-options</b> context.</p> |
| Reference      | <b>configure</b> <a href="#">policy-options policy-statement</a> <i>string</i>   |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **external-db-overflow**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>external-db-overflow</b> context                                |
| Context    | <b>configure service vprn</b> <i>string ospf3 number external-db-overflow</i> |
| Tree       | <a href="#">external-db-overflow</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time during which the router operates in overload   |
| Context    | <b>configure service vprn</b> <i>string ospf3 number external-db-overflow interval number</i> |
| Tree       | <a href="#">interval</a>  |
| Range      | 0 to 2147483647   |
| Units      | seconds   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **limit** *number*

|            |  |
|------------|--|
| Synopsis   | Number of external LSA at which overload is triggered                                      |
| Context    | <b>configure service vprn</b> <i>string ospf3 number external-db-overflow limit number</i> |
| Tree       | <a href="#">limit</a>  |
| Range      | 0 to 2147483647  |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **external-preference** *number*

|            |   |
|------------|---|
| Synopsis   | Preference for OSPF external routes   |
| Context    | <b>configure service vprn</b> <i>string ospf3 number external-preference number</i> |
| Tree       | <a href="#">external-preference</a>   |
| Range      | 1 to 255  |
| Default    | 150   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **graceful-restart**

|          |   |
|----------|---|
| Synopsis | Enable the <b>graceful-restart</b> context                                |
| Context  | <b>configure service vprn</b> <i>string ospf3 number graceful-restart</i> |

---

|            |                                  |
|------------|----------------------------------|
| Tree       | <a href="#">graceful-restart</a> |
| Introduced | 16.0.R1                          |
| Platforms  | All                              |

### **helper-mode** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable graceful restart helper for OSPF   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number graceful-restart helper-mode boolean</i> |
| Tree       | <a href="#">helper-mode</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **strict-lsa-checking** *boolean*

|            |   |
|------------|---|
| Synopsis   | Perform strict LSA checking during graceful restart   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number graceful-restart strict-lsa-checking boolean</i> |
| Tree       | <a href="#">strict-lsa-checking</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ignore-dn-bit** *boolean*

|            |  |
|------------|--|
| Synopsis   | Ignore the DN bit for OSPF LSA packets for the instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number ignore-dn-bit boolean</i> |
| Tree       | <a href="#">ignore-dn-bit</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **import-policy** *reference*

|          |  |
|----------|--|
| Synopsis | Import policy names for routes from IGP to route table   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number import-policy reference</i> |

|                |  |
|----------------|--|
| Tree           | <a href="#">import-policy</a>  |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

## loopfree-alternate

|            |   |
|------------|---|
| Synopsis   | Enable the <b>loopfree-alternate</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">loopfree-alternate</a> |
| Tree       | <a href="#">loopfree-alternate</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## exclude

|            |   |
|------------|---|
| Synopsis   | Enter the <b>exclude</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">loopfree-alternate</a> <a href="#">exclude</a> |
| Tree       | <a href="#">exclude</a>   |
| Introduced | 16.0.R3   |
| Platforms  | All   |

## prefix-policy *reference*

|             |  |
|-------------|--|
| Synopsis    | Policy to exclude prefixes from LFA SPF calculation  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">loopfree-alternate</a> <a href="#">exclude</a> <a href="#">prefix-policy</a> <i>reference</i>                           |
| Tree        | <a href="#">prefix-policy</a>  |
| Description | This command specifies the name of the policy for the prefixes to exclude from the LFA SPF calculation.<br><br>An excluded prefix is not included in LFA calculation regardless of its priority. The prefix tag is, however, used in the main SPF. |
| Reference   | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>   |

---

|                |                                      |
|----------------|--------------------------------------|
| Max. Instances | 5                                    |
| Notes          | This element is ordered by the user. |
| Introduced     | 16.0.R3                              |
| Platforms      | All                                  |

### **multicast-import** *boolean*

|            |   |
|------------|---|
| Synopsis   | Submit routes into the multicast Route Table Manager                              |
| Context    | <b>configure</b> <i>service vprn string ospf3 number multicast-import boolean</i> |
| Tree       | <a href="#">multicast-import</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **overload** *boolean*

|            |   |
|------------|---|
| Synopsis   | Change local router state to appear overloaded                            |
| Context    | <b>configure</b> <i>service vprn string ospf3 number overload boolean</i> |
| Tree       | <a href="#">overload</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **overload-include-ext-1** *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise routes with maximum metric value for overload                                 |
| Context    | <b>configure</b> <i>service vprn string ospf3 number overload-include-ext-1 boolean</i> |
| Tree       | <a href="#">overload-include-ext-1</a>  |
| Default    | false   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

**overload-include-ext-2** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise routes with maximum metric value for overload  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number</i> <a href="#">overload-include-ext-2</a> <i>boolean</i> |
| Tree       | <a href="#">overload-include-ext-2</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**overload-include-stub** *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise all stub interfaces with max metric value   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number</i> <a href="#">overload-include-stub</a> <i>boolean</i> |
| Tree       | <a href="#">overload-include-stub</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**overload-on-boot**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>overload-on-boot</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number</i> <a href="#">overload-on-boot</a> |
| Tree       | <a href="#">overload-on-boot</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Time during which the router operates in overload state before reestablishing normal operations   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string ospf3 number</i> <a href="#">overload-on-boot</a> <a href="#">timeout</a> <i>number</i> |
| Tree       | <a href="#">timeout</a>   |
| Range      | 60 to 1800  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**preference number**

|            |   |
|------------|---|
| Synopsis   | Preference for OSPF internal routes                                 |
| Context    | <b>configure service vprn string ospf3 number preference number</b> |
| Tree       | <a href="#">preference</a>  |
| Range      | 1 to 255  |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**reference-bandwidth number**

|            |  |
|------------|--|
| Synopsis   | Bandwidth to reference default costing of interfaces                         |
| Context    | <b>configure service vprn string ospf3 number reference-bandwidth number</b> |
| Tree       | <a href="#">reference-bandwidth</a>  |
| Range      | 1 to 18446744073709551615  |
| Units      | kilobps  |
| Default    | 100000000  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**rib-priority**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rib-priority</b> context                          |
| Context    | <b>configure service vprn string ospf3 number rib-priority</b> |
| Tree       | <a href="#">rib-priority</a>                                   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**high**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>high</b> context                                       |
| Context    | <b>configure service vprn string ospf3 number rib-priority high</b> |
| Tree       | <a href="#">high</a>  |
| Introduced | 16.0.R1   |

Platforms All

### **prefix-list** *reference*

Synopsis Higher priority list used during OSPF route calculation  
 Context **configure** [service vprn](#) *string* [ospf3](#) *number* [rib-priority high](#) [prefix-list reference](#)  
 Tree [prefix-list](#)  
 Reference **configure** [policy-options prefix-list](#) *string*  
 Introduced 16.0.R1  
 Platforms All

### **router-id** *string*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Unique router ID for the OSPF instance  
 Context **configure** [service vprn](#) *string* [ospf3](#) *number* [router-id](#) *string*  
 Tree [router-id](#)  
 Introduced 16.0.R1  
 Platforms All

### **rtr-adv-lsa-limit**

Synopsis Enable the **rtr-adv-lsa-limit** context  
 Context **configure** [service vprn](#) *string* [ospf3](#) *number* [rtr-adv-lsa-limit](#)  
 Tree [rtr-adv-lsa-limit](#)  
 Introduced 16.0.R1  
 Platforms All

### **log-only** *boolean*

Synopsis Log the event without triggering overload  
 Context **configure** [service vprn](#) *string* [ospf3](#) *number* [rtr-adv-lsa-limit](#) [log-only](#) *boolean*  
 Tree [log-only](#)

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

**max-lsa-count** *number*

|            |  |
|------------|--|
| Synopsis   | Max number of LSAs one router can advertise  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">rtr-adv-lsa-limit</a> <b>max-lsa-count</b> <i>number</i> |
| Tree       | <a href="#">max-lsa-count</a>  |
| Range      | 1 to 4294967295  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**overload-timeout** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Maximum time in overload after LSA limit is reached  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">rtr-adv-lsa-limit</a> <b>overload-timeout</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">overload-timeout</a>   |
| Range      | 1 to 1800  |
| Units      | seconds  |
| Options    | forever  |
| Default    | forever  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**warning-threshold** *number*

|          |  |
|----------|--|
| Synopsis | Percentage of the max LSA count that causes a warning  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">rtr-adv-lsa-limit</a> <b>warning-threshold</b> <i>number</i> |
| Tree     | <a href="#">warning-threshold</a>  |
| Range    | 0 to 100   |
| Units    | percent  |
| Default  | 0  |

Introduced 16.0.R1  
 Platforms All

### **suppress-dn-bit** *boolean*

Synopsis Suppress the DN bit setting for OSPF LSA packets  
 Context **configure** [service vprn](#) *string* [ospf3](#) *number* **suppress-dn-bit** *boolean*  
 Tree [suppress-dn-bit](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

### **timers**

Synopsis Enter the **timers** context  
 Context **configure** [service vprn](#) *string* [ospf3](#) *number* **timers**  
 Tree [timers](#)  
 Introduced 16.0.R1  
 Platforms All

### **incremental-spf-wait** *number*

Synopsis Delay time before an incremental SPF calculation starts  
 Context **configure** [service vprn](#) *string* [ospf3](#) *number* [timers](#) **incremental-spf-wait** *number*  
 Tree [incremental-spf-wait](#)  
 Range 0 to 1000  
 Units milliseconds  
 Default 1000  
 Introduced 16.0.R1  
 Platforms All

### **lsa-accumulate** *number*

Synopsis Delay to gather LSAs before advertising to neighbors  
 Context **configure** [service vprn](#) *string* [ospf3](#) *number* [timers](#) **lsa-accumulate** *number*

|            |                                |
|------------|--------------------------------|
| Tree       | <a href="#">lsa-accumulate</a> |
| Range      | 0 to 1000                      |
| Units      | milliseconds                   |
| Default    | 1000                           |
| Introduced | 16.0.R1                        |
| Platforms  | All                            |

### **lsa-arrival** *number*

|            |  |
|------------|--|
| Synopsis   | Min delay between receipt of same LSAs from neighbors  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">timers</a> <a href="#">lsa-arrival</a> <i>number</i> |
| Tree       | <a href="#">lsa-arrival</a>  |
| Range      | 0 to 600000  |
| Units      | milliseconds   |
| Default    | 1000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **lsa-generate**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lsa-generate</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">timers</a> <a href="#">lsa-generate</a> |
| Tree       | <a href="#">lsa-generate</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **lsa-initial-wait** *number*

|            |  |
|------------|--|
| Synopsis   | First wait period between OSPF LSA generation  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">timers</a> <a href="#">lsa-generate</a> <a href="#">lsa-initial-wait</a> <i>number</i> |
| Tree       | <a href="#">lsa-initial-wait</a>   |
| Range      | 10 to 600000   |
| Units      | milliseconds   |
| Default    | 5000   |
| Introduced | 16.0.R1  |

Platforms All

### **lsa-second-wait** *number*

Synopsis Hold time between the first and second LSA generation

Context **configure** [service vprn](#) *string* [ospf3](#) *number* [timers lsa-generate lsa-second-wait](#) *number*

Tree [lsa-second-wait](#)

Range 10 to 600000

Units milliseconds

Default 5000

Introduced 16.0.R1

Platforms All

### **max-lsa-wait** *number*

Synopsis Max time between two LSAs being generated

Context **configure** [service vprn](#) *string* [ospf3](#) *number* [timers lsa-generate max-lsa-wait](#) *number*

Tree [max-lsa-wait](#)

Range 10 to 600000

Units milliseconds

Default 5000

Introduced 16.0.R1

Platforms All

### **redistribute-delay** *number*

Synopsis Hold down timer for external routes into OSPF

Context **configure** [service vprn](#) *string* [ospf3](#) *number* [timers redistribute-delay](#) *number*

Tree [redistribute-delay](#)

Range 0 to 1000

Units milliseconds

Default 1000

Introduced 16.0.R1

Platforms All

## spf-wait

|            |  |
|------------|--|
| Synopsis   | Enter the <b>spf-wait</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">timers</a> <b>spf-wait</b> |
| Tree       | <a href="#">spf-wait</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## spf-initial-wait *number*

|            |   |
|------------|---|
| Synopsis   | Initial SPF calculation delay after a topology change   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">timers</a> <a href="#">spf-wait</a> <b>spf-initial-wait</b> <i>number</i> |
| Tree       | <a href="#">spf-initial-wait</a>  |
| Range      | 10 to 100000  |
| Units      | milliseconds  |
| Default    | 1000  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## spf-max-wait *number*

|            |   |
|------------|---|
| Synopsis   | Max interval between two consecutive SPF calculations   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">timers</a> <a href="#">spf-wait</a> <b>spf-max-wait</b> <i>number</i> |
| Tree       | <a href="#">spf-max-wait</a>  |
| Range      | 10 to 120000  |
| Units      | milliseconds  |
| Default    | 10000   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## spf-second-wait *number*

|          |  |
|----------|--|
| Synopsis | Hold time between the first and second SPF calculation   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <a href="#">timers</a> <a href="#">spf-wait</a> <b>spf-second-wait</b> <i>number</i> |
| Tree     | <a href="#">spf-second-wait</a>  |

|            |              |
|------------|--------------|
| Range      | 10 to 100000 |
| Units      | milliseconds |
| Default    | 1000         |
| Introduced | 16.0.R1      |
| Platforms  | All          |

### **unicast-import** *boolean*

|            |  |
|------------|--|
| Synopsis   | Submit routes into the unicast Route Table Manager   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ospf3</a> <i>number</i> <b>unicast-import</b> <i>boolean</i> |
| Tree       | <a href="#">unicast-import</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **pcp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>pcp</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <b>pcp</b> |
| Tree       | <a href="#">pcp</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                           |

### **server** [*name*] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>server</b> list instance   |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pcp</a> <b>server</b> <i>string</i> |
| Tree           | <a href="#">server</a>  |
| Max. Instances | 8   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **[name]** *string*

|          |                 |
|----------|-----------------|
| Synopsis | PCP server name |
|----------|-----------------|

---

|               |  |

| Tree          | <b>server</b>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.                    |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR           |

### **admin-state keyword**

|            |  |
|------------|--|
| Synopsis   | Administrative state of the PCP server                                     |
| Context    | <b>configure service vprn string pcp server string admin-state keyword</b> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                               |

### **description string**

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure service vprn string pcp server string description string</b> |
| Tree          | <b>description</b>  |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                              |

### **dual-stack-lite-address string**

|            |   |
|------------|---|
| Synopsis   | Inside Dual Stack Lite AFTR address   |
| Context    | <b>configure service vprn string pcp server string dual-stack-lite-address string</b> |
| Tree       | <b>dual-stack-lite-address</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**fwd-inside-router** *string*

|            |   |
|------------|---|
| Synopsis   | PCP forwarding inside virtual router instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pcp server</a> <i>string</i> <b>fwd-inside-router</b> <i>string</i> |
| Tree       | <a href="#">fwd-inside-router</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**interface** [[name](#)] *reference*

|                |  |
|----------------|--|
| Synopsis       | Add a list entry for <b>interface</b>  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pcp server</a> <i>string</i> <b>interface</b> <i>reference</i> |
| Tree           | <a href="#">interface</a>  |
| Max. Instances | 32   |
| Introduced     | 16.0.R4  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**[name]** *reference*

|            |  |
|------------|--|
| Synopsis   | Interface name   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pcp server</a> <i>string</i> <b>interface</b> <i>reference</i> |
| Tree       | <a href="#">interface</a>  |
| Reference  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <b>interface</b> <i>string</i>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**policy** *reference*

|            |   |
|------------|---|
| Synopsis   | PCP server policy   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pcp server</a> <i>string</i> <b>policy</b> <i>reference</i> |
| Tree       | <a href="#">policy</a>  |
| Reference  | <b>configure</b> <a href="#">service nat</a> <a href="#">pcp-server-policy</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**pim**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>pim</b> context            |
| Context    | <b>configure service vprn string pim</b> |
| Tree       | <b>pim</b>                               |
| Introduced | 16.0.R1                                  |
| Platforms  | All                                      |

**admin-state keyword**

|            |  |
|------------|--|
| Synopsis   | Administrative state of PIM                                  |
| Context    | <b>configure service vprn string pim admin-state keyword</b> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**apply-to keyword**

|            |   |
|------------|---|
| Synopsis   | IES and non-IES interfaces to create in PIM               |
| Context    | <b>configure service vprn string pim apply-to keyword</b> |
| Tree       | <b>apply-to</b>   |
| Options    | all, none   |
| Default    | none  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**bgp-nh-override boolean**

|             |   |
|-------------|---|
| Synopsis    | Disable VRF import EC support for next-hop resolution   |
| Context     | <b>configure service vprn string pim bgp-nh-override boolean</b>  |
| Tree        | <b>bgp-nh-override</b>  |
| Description | When configured to <b>true</b> , the RPF check is performed using IPv4 VPN AF next-hop instead of IPv4 AF VRF import extended community (EC). |

When configured to **false**, the RPF check is performed using IPv4 AF VRF import EC.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 19.7.R1 |
| Platforms  | All     |

## import

|            |   |
|------------|---|
| Synopsis   | Enter the <b>import</b> context                 |
| Context    | <b>configure service vprn string pim import</b> |
| Tree       | <b>import</b>                                   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## join-policy *reference*

|                |   |
|----------------|---|
| Synopsis       | Policy name   |
| Context        | <b>configure service vprn string pim import join-policy reference</b> |
| Tree           | <b>join-policy</b>  |
| Reference      | <b>configure policy-options policy-statement string</b>               |
| Max. Instances | 5   |
| Notes          | This element is ordered by the user.                                  |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

## register-policy *reference*

|                |   |
|----------------|---|
| Synopsis       | Policy name   |
| Context        | <b>configure service vprn string pim import register-policy reference</b> |
| Tree           | <b>register-policy</b>  |
| Reference      | <b>configure policy-options policy-statement string</b>                   |
| Max. Instances | 5   |
| Notes          | This element is ordered by the user.                                      |
| Introduced     | 16.0.R1   |

Platforms All

### **interface** [[interface-name](#)] *string*

Synopsis Enter the **interface** list instance  
 Context **configure** [service vprn string pim interface string](#)  
 Tree [interface](#)  
 Introduced 16.0.R1  
 Platforms All

### **[interface-name]** *string*

Synopsis Interface name  
 Context **configure** [service vprn string pim interface string](#)  
 Tree [interface](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the PIM interface  
 Context **configure** [service vprn string pim interface string admin-state keyword](#)  
 Tree [admin-state](#)  
 Options enable, disable  
 Default enable  
 Introduced 16.0.R1  
 Platforms All

### **assert-period** *number*

Synopsis Time for periodic refreshes of PIM Assert messages on an interface  
 Context **configure** [service vprn string pim interface string assert-period number](#)  
 Tree [assert-period](#)

---

|            |          |
|------------|----------|
| Range      | 1 to 300 |
| Default    | 60       |
| Introduced | 16.0.R1  |
| Platforms  | All      |

### **bfd-liveness**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bfd-liveness</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pim interface</a> <i>string</i> <a href="#">bfd-liveness</a> |

| Tree       | <a href="#">bsm-check-rtr-alert</a> |
| Default    | false                               |
| Introduced | 16.0.R1                             |
| Platforms  | All                                 |

### **hello-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Frequency at which PIM Hello messages are sent over this interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim interface</a> <i>string</i> <a href="#">hello-interval</a> <i>number</i> |
| Tree       | <a href="#">hello-interval</a>   |
| Range      | 0 to 255   |
| Default    | 30   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **hello-multiplier** *number*

|            |  |
|------------|--|
| Synopsis   | Multiplier to determine the hold time for PIM neighbor   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim interface</a> <i>string</i> <a href="#">hello-multiplier</a> <i>number</i> |
| Tree       | <a href="#">hello-multiplier</a>   |
| Range      | 20 to 100  |
| Default    | 35   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **improved-assert** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow improved assert processing on interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim interface</a> <i>string</i> <a href="#">improved-assert</a> <i>boolean</i> |
| Tree       | <a href="#">improved-assert</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**instant-prune-echo** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow PIM to send an instant prune echo when router starts the prune pending timer for PIM interface  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pim interface</a> <i>string</i> <a href="#">instant-prune-echo</a> <i>boolean</i> |
| Tree       | <a href="#">instant-prune-echo</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**ipv4**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pim interface</a> <i>string</i> <a href="#">ipv4</a> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**monitor-oper-group**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>monitor-oper-group</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pim interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">monitor-oper-group</a> |
| Tree       | <a href="#">monitor-oper-group</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**name** *reference*

|            |   |
|------------|---|
| Synopsis   | Operational group identifier  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pim interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">monitor-oper-group</a> <a href="#">name</a> <i>reference</i> |
| Tree       | <a href="#">name</a>  |

| Synopsis   | Bandwidth level ID for an MCAC constraint  |
| Context    | <b>configure service vprn string pim interface string mcac mc-constraints level number</b> |
| Tree       | <a href="#">level</a>  |
| Range      | 1 to 8   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**bandwidth** *number*

|            |  |
|------------|--|
| Synopsis   | Bandwidth available for this level   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">interface</a> <i>string</i> <a href="#">mcac</a> <a href="#">mc-constraints</a> <a href="#">level</a> <i>number</i><br><a href="#">bandwidth</a> <i>number</i> |
| Tree       | <a href="#">bandwidth</a>  |
| Range      | 0 to 2147483647  |
| Units      | kilobps  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**number-down** [[number-lag-port-down](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>number-down</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">interface</a> <i>string</i> <a href="#">mcac</a> <a href="#">mc-constraints</a> <a href="#">number-down</a><br><i>number</i> |
| Tree       | <a href="#">number-down</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[number-lag-port-down]** *number*

|            |  |
|------------|--|
| Synopsis   | Number of ports that are down in this LAG link   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">interface</a> <i>string</i> <a href="#">mcac</a> <a href="#">mc-constraints</a> <a href="#">number-down</a><br><i>number</i> |
| Tree       | <a href="#">number-down</a>  |
| Range      | 1 to 64  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**level** *number*

|          |   |
|----------|---|
| Synopsis | Level ID to associate with number of down LAG ports |
|----------|---|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn</b> <i>string</i> <b>pim interface</b> <i>string</i> <b>mcac mc-constraints number-down</b> <i>number</i> <b>level</b> <i>number</i> |
| Tree        | <b>level</b>   |
| Description | This command specifies the bandwidth for a given level. Level 1 has the highest priority and level 8 has the lowest priority.                                  |
| Range       | 1 to 8   |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **use-lag-port-weight** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use LAG port weight in calculating MCAC constraints   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>pim interface</b> <i>string</i> <b>mcac mc-constraints use-lag-port-weight</b> <i>boolean</i>  |
| Tree        | <b>use-lag-port-weight</b>  |
| Description | When configured to <b>true</b> , port weight is used when determining available bandwidth per level when LAG ports go down or come up. This command is required for proper operation on mixed port-speed LAGs and can also be used for unmixed port-speed LAGs. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **policy** *reference*

|             |  |
|-------------|--|
| Synopsis    | Multicast CAC policy name  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>pim interface</b> <i>string</i> <b>mcac policy</b> <i>reference</i>   |
| Tree        | <b>policy</b>  |
| Description | <p>This command configures the name of the global channel bandwidth definition policy that is used for (H)MCAC and HQoS adjustment.</p> <p>Within the scope of HQoS adjustment, the channel definition policy under the group interface is used if redirection is unconfigured. In this case, the HQoS adjustment can be applied to IPoE subscribers in per-SAP replication mode.</p> <p>If redirection is configured, the channel bandwidth definition policy applied under the Layer 3 redirected interface is in effect.</p> <p>Hierarchical MCAC (HMCAC) is supported on two levels simultaneously:</p> <ul style="list-style-type: none"> <li>• subscriber level and redirected interface when redirection is configured</li> </ul> |

- subscriber level and group-interface level when redirection is unconfigured

In HMCAC, the subscriber is checked against its bandwidth limits first, then against the bandwidth limits of the redirected or group interface. If redirection is configured but the policy is referenced only under the group interface, no admission control is executed (HMCAC or MCAC).

|            |  |
|------------|--|
| Reference  | <b>configure mcac policy</b> <i>string</i> |
| Introduced | 16.0.R1                                    |
| Platforms  | All  |

### **multicast-senders** *keyword*

|            |   |
|------------|---|
| Synopsis   | Subnet matching for the incoming data packets   |
| Context    | <b>configure service vpn</b> <i>string pim interface string multicast-senders keyword</i> |
| Tree       | <a href="#">multicast-senders</a>   |
| Options    | auto, always, never   |
| Default    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **p2mp-ldp-tree-join**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>p2mp-ldp-tree-join</b> context  |
| Context    | <b>configure service vpn</b> <i>string pim interface string p2mp-ldp-tree-join</i> |
| Tree       | <a href="#">p2mp-ldp-tree-join</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                       |

### **ipv4** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow dynamic mLDP in-band signaling for IPv4 PIM joins   |
| Context    | <b>configure service vpn</b> <i>string pim interface string p2mp-ldp-tree-join ipv4 boolean</i> |
| Tree       | <a href="#">ipv4</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                    |

### **ipv6** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow dynamic mLDP in-band signaling for IPv6 PIM joins  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">interface</a> <i>string</i> <a href="#">p2mp-ldp-tree-join</a> <a href="#">ipv6</a> <i>boolean</i> |
| Tree       | <a href="#">ipv6</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **priority** *number*

|            |  |
|------------|--|
| Synopsis   | DR election priority for this interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">interface</a> <i>string</i> <a href="#">priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>   |

|------------|---|
| Synopsis   | Candidate BSR IP address for Bootstrap Router election  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pim rp ipv4</a> <a href="#">bsr-candidate</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the Candidate BSR  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pim rp ipv4</a> <a href="#">bsr-candidate</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**hash-mask-len** *number*

|            |  |
|------------|--|
| Synopsis   | Length for bootstrap hash mask   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pim rp ipv4 bsr-candidate</a> <b>hash-mask-len</b> <i>number</i> |
| Tree       | <a href="#">hash-mask-len</a>  |
| Range      | 0 to 32  |
| Default    | 30   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**priority** *number*

|            |   |
|------------|---|
| Synopsis   | Bootstrap priority of the router  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pim rp ipv4 bsr-candidate</a> <b>priority</b> <i>number</i> |
| Tree       | <a href="#">priority</a>  |
| Range      | 0 to 255  |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**candidate** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable auto-RP to advertise candidate RP information   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">pim rp ipv4</a> <b>candidate</b> <i>boolean</i>  |
| Tree        | <a href="#">candidate</a>  |
| Description | When configured to <b>true</b> , the auto-RP is enabled to advertise the candidate RP information. The auto-RP candidate RP announces the candidate RP messages on the 224.0.1.39 multicast address. This functionality is in addition to the listener functionality enabled by the auto RP discovery.<br><br>When configured to <b>false</b> , the candidate RP information is not specified. |
| Default     | false  |
| Introduced  | 20.10.R1   |
| Platforms   | All  |

**mapping-agent** *boolean*

|          |                                      |
|----------|--------------------------------------|
| Synopsis | Enable the mapping agent on the node |
|----------|--------------------------------------|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <b>pim rp ipv4 mapping-agent</b> <i>boolean</i>   |
| Tree        | <a href="#">mapping-agent</a>   |
| Description | When configured to <b>true</b> , the mapping agent is enabled on the node. The auto-RP MA observes the <b>auto-rp-announcement</b> messages, selects the RP and generates the RP discovery 224.0.1.40 messages. This functionality is in addition to the auto-RP discovery functionality. |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

### rp-candidate

|            |   |
|------------|---|
| Synopsis   | Enter the <b>rp-candidate</b> context                                       |
| Context    | <b>configure service vprn</b> <i>string</i> <b>pim rp ipv4 rp-candidate</b> |
| Tree       | <a href="#">rp-candidate</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### address *string*

|             |  |
|-------------|--|
| Synopsis    | Local RP address   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>pim rp ipv4 rp-candidate</b> <b>address</b> <i>string</i>             |
| Tree        | <a href="#">address</a>  |
| Description | This command specifies the local RP address that is sent in the RP candidate advertisements to the Bootstrap Router. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the Candidate RP  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>pim rp ipv4 rp-candidate</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |

Platforms All

### **group-range** [[ipv4-prefix](#)] *string*

Synopsis Add a list entry for **group-range**  
 Context **configure service vprn** *string* **pim rp ipv4 rp-candidate group-range** *string*  
 Tree [group-range](#)  
 Introduced 16.0.R1  
 Platforms All

### **[ipv4-prefix]** *string*

Synopsis IPv4 address and prefix length  
 Context **configure service vprn** *string* **pim rp ipv4 rp-candidate group-range** *string*  
 Tree [group-range](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **holdtime** *number*

Synopsis Time during which the neighboring router considers this router to be up  
 Context **configure service vprn** *string* **pim rp ipv4 rp-candidate holdtime** *number*  
 Tree [holdtime](#)  
 Range 5 to 255  
 Units seconds  
 Default 150  
 Introduced 16.0.R1  
 Platforms All

### **priority** *number*

Synopsis Candidate RP priority  
 Context **configure service vprn** *string* **pim rp ipv4 rp-candidate priority** *number*  
 Tree [priority](#)

|            |          |
|------------|----------|
| Range      | 0 to 255 |
| Default    | 192      |
| Introduced | 16.0.R1  |
| Platforms  | All      |

## static

|            |   |
|------------|---|
| Synopsis   | Enter the <b>static</b> context                         |
| Context    | <b>configure service vprn string pim rp ipv4 static</b> |
| Tree       | <b>static</b>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## address [ipv4-address] string

|            |  |
|------------|--|
| Synopsis   | Enter the <b>address</b> list instance                                 |
| Context    | <b>configure service vprn string pim rp ipv4 static address string</b> |
| Tree       | <b>address</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## [ipv4-address] string

|            |  |
|------------|--|
| Synopsis   | IPv4 address for the static RP   |
| Context    | <b>configure service vprn string pim rp ipv4 static address string</b> |
| Tree       | <b>address</b>   |
| Notes      | This element is part of a list key.                                    |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## group-prefix [ipv4-prefix] string

|          |  |
|----------|--|
| Synopsis | Add a list entry for <b>group-prefix</b>   |
| Context  | <b>configure service vprn string pim rp ipv4 static address string group-prefix string</b> |
| Tree     | <b>group-prefix</b>  |

Introduced 16.0.R1  
 Platforms All

### **[ipv4-prefix]** *string*

Synopsis IPv4 address and prefix length  
 Context **configure** [service vprn string](#) [pim rp ipv4 static address string](#) [group-prefix string](#)  
 Tree [group-prefix](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **override** *boolean*

Synopsis Change the precedence for static RP over dynamically learnt RP  
 Context **configure** [service vprn string](#) [pim rp ipv4 static address string](#) [override boolean](#)  
 Tree [override](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

## **ipv6**

Synopsis Enter the **ipv6** context  
 Context **configure** [service vprn string](#) [pim rp ipv6](#)  
 Tree [ipv6](#)  
 Introduced 16.0.R1  
 Platforms All

### **anycast** [[ipv6-address](#)] *string rp-set-peer string*

Synopsis Add a list entry for **anycast**  
 Context **configure** [service vprn string](#) [pim rp ipv6 anycast string](#) [rp-set-peer string](#)  
 Tree [anycast](#)  
 Introduced 16.0.R1

Platforms All

### **[ipv6-address]** *string*

Synopsis Loopback IP address shared by routes in RP set  
 Context **configure** [service](#) [vprn](#) *string* [pim](#) [rp](#) [ipv6](#) [anycast](#) *string* [rp-set-peer](#) *string*  
 Tree [anycast](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **rp-set-peer** *string*

Synopsis Peer in the anycast RP set  
 Context **configure** [service](#) [vprn](#) *string* [pim](#) [rp](#) [ipv6](#) [anycast](#) *string* [rp-set-peer](#) *string*  
 Tree [anycast](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **bsr-candidate**

Synopsis Enter the **bsr-candidate** context  
 Context **configure** [service](#) [vprn](#) *string* [pim](#) [rp](#) [ipv6](#) [bsr-candidate](#)  
 Tree [bsr-candidate](#)  
 Introduced 16.0.R1  
 Platforms All

### **address** *string*

Synopsis Candidate BSR IP address for Bootstrap Router election  
 Context **configure** [service](#) [vprn](#) *string* [pim](#) [rp](#) [ipv6](#) [bsr-candidate](#) [address](#) *string*  
 Tree [address](#)  
 Introduced 16.0.R1  
 Platforms All

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the Candidate BSR   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <a href="#">bsr-candidate</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **hash-mask-len** *number*

|            |  |
|------------|--|
| Synopsis   | Length for bootstrap hash mask   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <a href="#">bsr-candidate</a> <b>hash-mask-len</b> <i>number</i> |
| Tree       | <a href="#">hash-mask-len</a>  |
| Range      | 0 to 128   |
| Default    | 126  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **priority** *number*

|            |   |
|------------|---|
| Synopsis   | Bootstrap priority of the router  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <a href="#">bsr-candidate</a> <b>priority</b> <i>number</i> |
| Tree       | <a href="#">priority</a>  |
| Range      | 0 to 255  |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **embedded-rp**

|          |  |
|----------|--|
| Synopsis | Enable the <b>embedded-rp</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <b>embedded-rp</b> |
| Tree     | <a href="#">embedded-rp</a>  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of embedded RP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <a href="#">embedded-rp</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **group-range** [[ipv6-prefix](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>group-range</b>  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <a href="#">embedded-rp</a> <b>group-range</b> <i>string</i> |
| Tree       | <a href="#">group-range</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### [[ipv6-prefix](#)] *string*

|            |  |
|------------|--|
| Synopsis   | IPv6 address and prefix length   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <a href="#">embedded-rp</a> <b>group-range</b> <i>string</i> |
| Tree       | <a href="#">group-range</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **rp-candidate**

|          |   |
|----------|---|
| Synopsis | Enter the <b>rp-candidate</b> context   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <b>rp-candidate</b> |
| Tree     | <a href="#">rp-candidate</a>  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

**address** *string*

|            |  |
|------------|--|
| Synopsis   | Local RP address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <a href="#">rp-candidate</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the Candidate RP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <a href="#">rp-candidate</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**group-range** [[ipv6-prefix](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>group-range</b>  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">rp</a> <a href="#">ipv6</a> <a href="#">rp-candidate</a> <a href="#">group-range</a> <i>string</i> |

| Range      | 1 to 4294967294   |
| Units      | kilobps   |
| Options    | infinity  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ssm-groups

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ssm-groups</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">ssm-groups</a> |
| Tree       | <a href="#">ssm-groups</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## group-range [[ip-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>group-range</b>  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">ssm-groups</a> <a href="#">group-range</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">group-range</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## [[ip-prefix](#)] (*ipv4-prefix* | *ipv6-prefix*)

|            |  |
|------------|--|
| Synopsis   | IP address and mask length   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">pim</a> <a href="#">ssm-groups</a> <a href="#">group-range</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) |
| Tree       | <a href="#">group-range</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## radius

|            |  |
|------------|--|
| Synopsis   | Enter the <b>radius</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> |
| Tree       | <a href="#">radius</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**proxy** [*name*] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>proxy</b> list instance   |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> |
| Tree           | <a href="#">proxy</a>  |
| Max. Instances | 8  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | RADIUS proxy name  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> |
| Tree          | <a href="#">proxy</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of RADIUS proxy   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**attribute-matching**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>attribute-matching</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <b>attribute-matching</b> |
| Tree       | <a href="#">attribute-matching</a>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **entry** [[index](#)] *number*

Synopsis Enter the **entry** list instance

Context **configure** [service](#) [vpn](#) *string* [radius](#) [proxy](#) *string* [attribute-matching](#) [entry](#) *number*

Tree [entry](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[index]** *number*

Synopsis Index of this entry

Context **configure** [service](#) [vpn](#) *string* [radius](#) [proxy](#) *string* [attribute-matching](#) [entry](#) *number*

Tree [entry](#)

Range 1 to 32

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **accounting-server-policy** *string*

Synopsis Accounting server policy

Context **configure** [service](#) [vpn](#) *string* [radius](#) [proxy](#) *string* [attribute-matching](#) [entry](#) *number*  
[accounting-server-policy](#) *string*

Tree [accounting-server-policy](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **authentication-server-policy** *string*

Synopsis Authentication server policy

Context **configure** [service](#) [vpn](#) *string* [radius](#) [proxy](#) *string* [attribute-matching](#) [entry](#) *number*  
[authentication-server-policy](#) *string*

Tree [authentication-server-policy](#)

String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **prefix-string** *string*

Synopsis Prefix string  
 Context **configure** [service vprn](#) *string* [radius proxy](#) *string* [attribute-matching entry](#) *number* [prefix-string](#) *string*  
 Tree [prefix-string](#)  
 String Length 1 to 128  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suffix-string** *string*

Synopsis Prefix string  
 Context **configure** [service vprn](#) *string* [radius proxy](#) *string* [attribute-matching entry](#) *number* [suffix-string](#) *string*  
 Tree [suffix-string](#)  
 String Length 1 to 128  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **type** *number*

Synopsis Matching attribute type to RADIUS server policy  
 Context **configure** [service vprn](#) *string* [radius proxy](#) *string* [attribute-matching type](#) *number*  
 Tree [type](#)  
 Range 1 to 255  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **vendor** (*number* | *keyword*)

Synopsis Matching Vendor ID to RADIUS server policy

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>attribute-matching</b> <i>vendor (number   keyword)</i> |
| Tree       | <b>vendor</b>  |
| Range      | 1 to 16777215  |
| Options    | nokia  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## cache

|            |  |
|------------|--|
| Synopsis   | Enter the <b>cache</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>cache</b> |
| Tree       | <b>cache</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the RADIUS proxy cache  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>cache admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## key

|            |  |
|------------|--|
| Synopsis   | Enable the <b>key</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>cache key</b> |
| Tree       | <b>key</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**attribute-type** *number*

|            |  |
|------------|--|
| Synopsis   | RADIUS attribute type to cache for this RADIUS proxy server  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">cache</a> <a href="#">key</a> <a href="#">attribute-type</a> <i>number</i> |
| Tree       | <a href="#">attribute-type</a>   |
| Range      | 1 to 255   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**packet-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Packet type of the RADIUS messages   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">cache</a> <a href="#">key</a> <a href="#">packet-type</a> <i>keyword</i> |
| Tree       | <a href="#">packet-type</a>  |
| Options    | access-request, access-accept  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**vendor** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | RADIUS Vendor ID  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">cache</a> <a href="#">key</a> <a href="#">vendor</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">vendor</a>  |
| Range      | 1 to 16777215   |
| Options    | nokia   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**timeout** *number*

|          |   |
|----------|---|
| Synopsis | Idle timeout value  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">cache</a> <a href="#">timeout</a> <i>number</i> |
| Tree     | <a href="#">timeout</a>   |
| Range    | 60 to 3600  |

---

|            |   |
|------------|---|
| Units      | seconds   |
| Default    | 300   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **track-accounting**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>track-accounting</b> context                                       |
| Context    | <b>configure service vprn string radius proxy string cache track-accounting</b> |
| Tree       | <a href="#">track-accounting</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                         |

### **accounting-off *boolean***

|            |   |
|------------|---|
| Synopsis   | Remove all ESM hosts associated with the RADIUS client  |
| Context    | <b>configure service vprn string radius proxy string cache track-accounting accounting-off <i>boolean</i></b> |
| Tree       | <a href="#">accounting-off</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **accounting-on *boolean***

|            |  |
|------------|--|
| Synopsis   | Remove all ESM hosts associated with the RADIUS client   |
| Context    | <b>configure service vprn string radius proxy string cache track-accounting accounting-on <i>boolean</i></b> |
| Tree       | <a href="#">accounting-on</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **interim-update *boolean***

|          |  |
|----------|--|
| Synopsis | Update the ESM host with the RADIUS client that generated the interim update |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>cache track-accounting interim-update</b> <i>boolean</i> |
| Tree       | <a href="#">interim-update</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**start** *boolean*

|            |  |
|------------|--|
| Synopsis   | Update host with client that generated accounting-start  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>cache track-accounting start</b> <i>boolean</i> |
| Tree       | <a href="#">start</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**stop** *boolean*

|            |   |
|------------|---|
| Synopsis   | Remove ESM host and forward accounting-stop packet  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>cache track-accounting stop</b> <i>boolean</i> |
| Tree       | <a href="#">stop</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**track-authentication**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>track-authentication</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>cache track-authentication</b> |
| Tree       | <a href="#">track-authentication</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**accept** *boolean*

|          |  |
|----------|--|
| Synopsis | Track Access-Accept message for mobility |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>cache track-authentication accept</b> <i>boolean</i> |
| Tree       | <a href="#">accept</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **track-delete-hold-time** *number*

|            |   |
|------------|---|
| Synopsis   | Delete hold time  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>cache track-delete-hold-time</b> <i>number</i> |
| Tree       | <a href="#">track-delete-hold-time</a>  |
| Range      | 0 to 6000   |
| Units      | seconds   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **defaults**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>defaults</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>defaults</b> |
| Tree       | <a href="#">defaults</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                       |

### **accounting-server-policy** *string*

|               |  |
|---------------|--|
| Synopsis      | Default accounting RADIUS server policy  |
| Context       | <b>configure service vprn</b> <i>string</i> <b>radius proxy</b> <i>string</i> <b>defaults accounting-server-policy</b> <i>string</i> |
| Tree          | <a href="#">accounting-server-policy</a>   |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**authentication-server-policy** *string*

|               |  |
|---------------|--|
| Synopsis      | Default authentication RADIUS server policy  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">defaults authentication-server-policy</a> <i>string</i> |
| Tree          | <a href="#">authentication-server-policy</a>   |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**interface** [[interface-name](#)] *reference*

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>interface</b>   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">interface</a> <i>reference</i> |
| Tree       | <a href="#">interface</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[interface-name]** *reference*

|            |   |
|------------|---|
| Synopsis   | IP interface name   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">interface</a> <i>reference</i> |
| Tree       | <a href="#">interface</a>   |
| Reference  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## load-balance-key

|            |   |
|------------|---|
| Synopsis   | Enter the <b>load-balance-key</b> context                                 |
| Context    | <b>configure service vprn string radius proxy string load-balance-key</b> |
| Tree       | <a href="#">load-balance-key</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                   |

## attribute-1

|            |   |
|------------|---|
| Synopsis   | Enter the <b>attribute-1</b> context  |
| Context    | <b>configure service vprn string radius proxy string load-balance-key attribute-1</b>   |
| Tree       | <a href="#">attribute-1</a>   |
| Notes      | The following elements are part of a choice: ( <b>attribute-1</b> , <b>attribute-2</b> , <b>attribute-3</b> , <b>attribute-4</b> , and <b>attribute-5</b> ) or <b>source-ip-udp</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## type *number*

|            |  |
|------------|--|
| Synopsis   | Attribute type to cache for this RADIUS Proxy server   |
| Context    | <b>configure service vprn string radius proxy string load-balance-key attribute-1 type <i>number</i></b> |
| Tree       | <a href="#">type</a>   |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## vendor (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | Vendor-Id attribute   |
| Context  | <b>configure service vprn string radius proxy string load-balance-key attribute-1 vendor (<i>number</i>   <i>keyword</i>)</b> |
| Tree     | <a href="#">vendor</a>  |
| Range    | 1 to 16777215   |
| Options  | nokia   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## **attribute-2**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>attribute-2</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-2</a> |
| Tree       | <a href="#">attribute-2</a>   |
| Notes      | The following elements are part of a choice: ( <b>attribute-1</b> , <b>attribute-2</b> , <b>attribute-3</b> , <b>attribute-4</b> , and <b>attribute-5</b> ) or <b>source-ip-udp</b> .               |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **type** *number*

|            |  |
|------------|--|
| Synopsis   | Attribute type to cache for this RADIUS Proxy server   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-2</a> <a href="#">type</a> <i>number</i> |
| Tree       | <a href="#">type</a>   |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## **vendor** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Vendor-Id attribute   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-2</a> <a href="#">vendor</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">vendor</a>  |
| Range      | 1 to 16777215   |
| Options    | nokia   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**attribute-3**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>attribute-3</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-3</a> |
| Tree       | <a href="#">attribute-3</a>   |
| Notes      | The following elements are part of a choice: ( <b>attribute-1</b> , <b>attribute-2</b> , <b>attribute-3</b> , <b>attribute-4</b> , and <b>attribute-5</b> ) or <b>source-ip-udp</b> .               |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**type number**

|            |  |
|------------|--|
| Synopsis   | Attribute type to cache for this RADIUS Proxy server   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-3</a> <a href="#">type</a> <i>number</i> |
| Tree       | <a href="#">type</a>   |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**vendor (number | keyword)**

|            |   |
|------------|---|
| Synopsis   | Vendor-Id attribute   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-3</a> <a href="#">vendor</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">vendor</a>  |
| Range      | 1 to 16777215   |
| Options    | nokia   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**attribute-4**

|          |   |
|----------|---|
| Synopsis | Enter the <b>attribute-4</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-4</a> |
| Tree     | <a href="#">attribute-4</a>   |

|            |   |
|------------|---|
| Notes      | The following elements are part of a choice: ( <b>attribute-1</b> , <b>attribute-2</b> , <b>attribute-3</b> , <b>attribute-4</b> , and <b>attribute-5</b> ) or <b>source-ip-udp</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **type number**

|            |   |
|------------|---|
| Synopsis   | Attribute type to cache for this RADIUS Proxy server  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-4</a> <b>type</b> <i>number</i> |
| Tree       | <a href="#">type</a>  |
| Range      | 1 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **vendor (number | keyword)**

|            |   |
|------------|---|
| Synopsis   | Vendor-Id attribute   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-4</a> <b>vendor</b> <i>(number   keyword)</i> |
| Tree       | <a href="#">vendor</a>  |
| Range      | 1 to 16777215   |
| Options    | nokia   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **attribute-5**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>attribute-5</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius proxy</a> <i>string</i> <a href="#">load-balance-key</a> <b>attribute-5</b>                            |
| Tree       | <a href="#">attribute-5</a>   |
| Notes      | The following elements are part of a choice: ( <b>attribute-1</b> , <b>attribute-2</b> , <b>attribute-3</b> , <b>attribute-4</b> , and <b>attribute-5</b> ) or <b>source-ip-udp</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**type** *number*

|            |  |
|------------|--|
| Synopsis   | Attribute type to cache for this RADIUS Proxy server   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-5</a> <b>type</b> <i>number</i> |
| Tree       | <a href="#">type</a>   |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**vendor** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Vendor-Id attribute   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">load-balance-key</a> <a href="#">attribute-5</a> <b>vendor</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">vendor</a>  |
| Range      | 1 to 16777215   |
| Options    | nokia   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**source-ip-udp**

|            |   |
|------------|---|
| Synopsis   | Key to consist of the source IP address and source UDP port of the RADIUS message   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">load-balance-key</a> <b>source-ip-udp</b> |
| Tree       | <a href="#">source-ip-udp</a>   |
| Notes      | The following elements are part of a choice: ( <b>attribute-1</b> , <b>attribute-2</b> , <b>attribute-3</b> , <b>attribute-4</b> , and <b>attribute-5</b> ) or <b>source-ip-udp</b> .       |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**purpose** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Purpose of the RADIUS proxy   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">purpose</a> <i>keyword</i> |
| Tree       | <a href="#">purpose</a>   |
| Options    | accounting, authentication, accounting-authentication   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **python-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Python policy   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">python-policy</a> <i>reference</i> |
| Tree       | <a href="#">python-policy</a>   |
| Reference  | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **secret** *string*

|               |   |
|---------------|---|
| Synopsis      | Format of the secret key to access the RADIUS proxy server  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">secret</a> <i>string</i> |
| Tree          | <a href="#">secret</a>  |
| String Length | 1 to 115  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **send-accounting-response** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow RADIUS proxy server to respond to Accounting-Response messages   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">radius</a> <a href="#">proxy</a> <i>string</i> <a href="#">send-accounting-response</a> <i>boolean</i> |
| Tree       | <a href="#">send-accounting-response</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**wlan-gw**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>wlan-gw</b> context                                 |
| Context    | <b>configure service vprn string radius proxy string wlan-gw</b> |
| Tree       | <b>wlan-gw</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                               |

**address string**

|             |   |
|-------------|---|
| Synopsis    | IPv4 address of the distributed RADIUS proxy server   |
| Context     | <b>configure service vprn string radius proxy string wlan-gw address string</b>                               |
| Tree        | <b>address</b>  |
| Description | This command configures the IPv4 address of the distributed RADIUS proxy server for use by the access points. |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**ipv6-address string**

|             |   |
|-------------|---|
| Synopsis    | IPv6 address of the distributed RADIUS proxy server   |
| Context     | <b>configure service vprn string radius proxy string wlan-gw ipv6-address string</b>                          |
| Tree        | <b>ipv6-address</b>   |
| Description | This command configures the IPv6 address of the distributed RADIUS proxy server for use by the access points. |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**wlan-gw-group reference****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | ISA WLAN gateway group   |
| Context  | <b>configure service vprn string radius proxy string wlan-gw-group reference</b> |

|            |  |
|------------|--|
| Tree       | <a href="#">wlan-gw-group</a>                                    |
| Reference  | <b>configure</b> <a href="#">isa wlan-gw-group</a> <i>number</i> |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                               |

**server** [[name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>server</b> list instance   |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius server</a> <i>string</i> |
| Tree           | <a href="#">server</a>  |
| Max. Instances | 64  |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | External RADIUS server name   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius server</a> <i>string</i> |
| Tree          | <a href="#">server</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**accept-coa** *boolean*

|            |  |
|------------|--|
| Synopsis   | Process Change of Authorization (CoA) messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">radius server</a> <i>string</i> <b>accept-coa</b> <i>boolean</i> |
| Tree       | <a href="#">accept-coa</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**acct-port number**

|            |  |
|------------|--|
| Synopsis   | UDP port number of the RADIUS for accounting events  |
| Context    | <b>configure</b> <a href="#">service vprn string radius server string acct-port number</a> |
| Tree       | <a href="#">acct-port</a>  |
| Range      | 1 to 65535   |
| Default    | 1813   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

**address (ipv4-address-no-zone | ipv6-address-no-zone)**

|            |   |
|------------|---|
| Synopsis   | IP address of the RADIUS server   |
| Context    | <b>configure</b> <a href="#">service vprn string radius server string address (ipv4-address-no-zone   ipv6-address-no-zone)</a> |
| Tree       | <a href="#">address</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**auth-port number**

|            |  |
|------------|--|
| Synopsis   | UDP port number of the RADIUS to be used as match criteria                                 |
| Context    | <b>configure</b> <a href="#">service vprn string radius server string auth-port number</a> |
| Tree       | <a href="#">auth-port</a>  |
| Range      | 1 to 65535   |
| Default    | 1812   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

**description string**

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service vprn string radius server string description string</a> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pending-requests-limit** *number*

Synopsis Limit of the number for pending RADIUS requests  
Context **configure** [service vprn](#) *string* [radius server](#) *string* **pending-requests-limit** *number*  
Tree [pending-requests-limit](#)  
Range 1 to 4096  
Default 4096  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **python-policy** *reference*

Synopsis Python script policy to modify CoA messages  
Context **configure** [service vprn](#) *string* [radius server](#) *string* **python-policy** *reference*  
Tree [python-policy](#)  
Reference **configure** [python](#) **python-policy** *string*  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **secret** *string*

Synopsis Secret key associated with this RADIUS server  
Context **configure** [service vprn](#) *string* [radius server](#) *string* **secret** *string*  
Tree [secret](#)  
String Length 1 to 115  
Notes This element is mandatory.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **reassembly**

Synopsis Enable the **reassembly** context

|            |   |
|------------|---|
| Context    | <b>configure service vprn string reassembly</b> |
| Tree       | <a href="#">reassembly</a>                      |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR    |

### **nat-group** *number*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | NAT group (including WLAN Gateway group) that executes the reassembly |
| Context    | <b>configure service vprn string reassembly nat-group number</b>      |
| Tree       | <a href="#">nat-group</a>   |
| Max. Range | 0 to 4294967295   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                          |

### **to-base-network** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow reassembled traffic sent to network interface                     |
| Context    | <b>configure service vprn string reassembly to-base-network boolean</b> |
| Tree       | <a href="#">to-base-network</a>   |
| Default    | false   |
| Introduced | 19.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                            |

### **redundant-interface** [[interface-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>redundant-interface</b> list instance              |
| Context    | <b>configure service vprn string redundant-interface string</b> |
| Tree       | <a href="#">redundant-interface</a>                             |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR         |

**[interface-name] string**

|               |   |
|---------------|---|
| Synopsis      | Interface name  |
| Context       | <b>configure service vprn string redundant-interface string</b> |
| Tree          | <a href="#">redundant-interface</a>                             |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.                             |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR         |

**admin-state keyword**

|            |   |
|------------|---|
| Synopsis   | Administrative state of the interface   |
| Context    | <b>configure service vprn string redundant-interface string admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                             |

**description string**

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure service vprn string redundant-interface string description string</b> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 255   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                            |

**hold-time**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>hold-time</b> context  |
| Context    | <b>configure service vprn string redundant-interface string hold-time</b> |
| Tree       | <a href="#">hold-time</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                   |

## ipv4

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> context  |
| Context    | <b>configure service vprn string redundant-interface string hold-time ipv4</b> |
| Tree       | <b>ipv4</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                        |

## down

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>down</b> context  |
| Context     | <b>configure service vprn string redundant-interface string hold-time ipv4 down</b>  |
| Tree        | <b>down</b>  |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activating the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the <b>init-only</b> command. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## init-only *boolean*

|             |   |
|-------------|---|
| Synopsis    | Apply delay only at interface configuration or reboot   |
| Context     | <b>configure service vprn string redundant-interface string hold-time ipv4 down init-only boolean</b> |
| Tree        | <b>init-only</b>  |
| Description | This command applies a delay only when the IP interface is first configured or after a system reboot. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## seconds *number*

|          |  |
|----------|--|
| Synopsis | Down hold time for the IP interface  |
| Context  | <b>configure service vprn string redundant-interface string hold-time ipv4 down seconds number</b> |

|            |   |
|------------|---|
| Tree       | <a href="#">seconds</a>                                 |
| Range      | 1 to 1200   |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## up

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>up</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">redundant-interface string</a> <a href="#">hold-time ipv4 up</a>   |
| Tree        | <a href="#">up</a>  |
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## seconds *number*

|            |  |
|------------|--|
| Synopsis   | Up hold time for the IP interface  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">redundant-interface string</a> <a href="#">hold-time ipv4 up seconds number</a> |
| Tree       | <a href="#">seconds</a>  |
| Range      | 1 to 1200  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ip-mtu *number*

|            |   |
|------------|---|
| Synopsis   | IP MTU applied to outgoing packets  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">redundant-interface string</a> <a href="#">ip-mtu number</a> |
| Tree       | <a href="#">ip-mtu</a>  |
| Range      | 512 to 9786   |
| Units      | bytes   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipv4

Synopsis Enter the **ipv4** context  
Context **configure service vprn string redundant-interface string ipv4**  
Tree [ipv4](#)  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## primary

Synopsis Enable the **primary** context  
Context **configure service vprn string redundant-interface string ipv4 primary**  
Tree [primary](#)  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## address *string*

Synopsis IPv4 address to be assigned to the interface  
Context **configure service vprn string redundant-interface string ipv4 primary address string**  
Tree [address](#)  
Notes This element is mandatory.  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## prefix-length *number*

Synopsis IPv4 address prefix length  
Context **configure service vprn string redundant-interface string ipv4 primary prefix-length number**  
Tree [prefix-length](#)  
Range 0 to 32  
Notes This element is mandatory.

Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **remote-ip** *string*

Synopsis Remote IP address for the interface  
 Context **configure** [service](#) [vpn](#) *string* [redundant-interface](#) *string* [ipv4](#) [primary](#) [remote-ip](#) *string*  
 Tree [remote-ip](#)  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **spoke-sdp** [[sdp-bind-id](#)] *string*

Synopsis Enter the **spoke-sdp** list instance  
 Context **configure** [service](#) [vpn](#) *string* [redundant-interface](#) *string* [spoke-sdp](#) *string*  
 Tree [spoke-sdp](#)  
 Max. Instances 1  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[sdp-bind-id]** *string*

Synopsis SDP binding ID  
 Context **configure** [service](#) [vpn](#) *string* [redundant-interface](#) *string* [spoke-sdp](#) *string*  
 Tree [spoke-sdp](#)  
 String Length 3 to 16  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the SDP binding to the service  
 Context **configure** [service](#) [vpn](#) *string* [redundant-interface](#) *string* [spoke-sdp](#) *string* [admin-state](#) *keyword*

|            |   |
|------------|---|
| Tree       | <a href="#">admin-state</a>                             |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**control-word** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use the control word as preferred   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">redundant-interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <b>control-word</b> <i>boolean</i> |
| Tree       | <a href="#">control-word</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">redundant-interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**egress**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>egress</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">redundant-interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <b>egress</b> |
| Tree       | <a href="#">egress</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## filter

|            |   |
|------------|---|
| Synopsis   | Enter the <b>filter</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">redundant-interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">egress filter</a> |
| Tree       | <a href="#">filter</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ip reference

|            |  |
|------------|--|
| Synopsis   | IPv4 filter policy name  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">redundant-interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">egress filter ip reference</a> |
| Tree       | <a href="#">ip</a>   |
| Reference  | <b>configure</b> <a href="#">filter ip-filter</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## vc-label *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Egress MPLS VC label to send packets to the far end   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">redundant-interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">egress vc-label</a> <i>number</i> |
| Tree       | <a href="#">vc-label</a>  |
| Range      | 16 to 1048575   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ingress

|          |   |
|----------|---|
| Synopsis | Enter the <b>ingress</b> context  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">redundant-interface</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">ingress</a> |
| Tree     | <a href="#">ingress</a>   |

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## filter

Synopsis Enter the **filter** context  
 Context **configure** [service](#) [vpn](#) *string* [redundant-interface](#) *string* [spoke-sdp](#) *string* [ingress](#) [filter](#)  
 Tree [filter](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ip reference

Synopsis IPv4 filter policy name  
 Context **configure** [service](#) [vpn](#) *string* [redundant-interface](#) *string* [spoke-sdp](#) *string* [ingress](#) [filter](#) [ip](#) [reference](#)  
 Tree [ip](#)  
 Reference **configure** [filter](#) [ip-filter](#) *string*  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## vc-label number

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Ingress MPLS VC label to send packets to the far end  
 Context **configure** [service](#) [vpn](#) *string* [redundant-interface](#) *string* [spoke-sdp](#) *string* [ingress](#) [vc-label](#) *number*  
 Tree [vc-label](#)  
 Range 1 to 1048575  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## rip

|            |  |
|------------|--|
| Synopsis   | Enable the <b>rip</b> context            |
| Context    | <b>configure service vprn string rip</b> |
| Tree       | <a href="#">rip</a>                      |
| Introduced | 16.0.R4                                  |
| Platforms  | All                                      |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the RIP instance                     |
| Context    | <b>configure service vprn string rip admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>                                  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

## authentication-key *string*

|               |   |
|---------------|---|
| Synopsis      | Authentication password passed between RIP neighbors  |
| Context       | <b>configure service vprn string rip authentication-key string</b>  |
| Tree          | <a href="#">authentication-key</a>  |
| Description   | <p>This command sets the authentication password to be passed between RIP neighbors. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes.</p> <p>The authentication type and authentication key must match exactly for the RIP message to be considered authentic and processed.</p> <p>When unconfigured, this command removes the authentication password from the configuration and disables authentication.</p> |
| String Length | 1 to 51   |
| Introduced    | 16.0.R4   |
| Platforms     | All   |

## authentication-type *keyword*

|          |  |
|----------|--|
| Synopsis | Authentication type used between RIP neighbors |
|----------|--|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn</b> <i>string rip authentication-type keyword</i>  |
| Tree        | <a href="#">authentication-type</a>  |
| Description | This command sets the type of authentication to be used between RIP neighbors.<br>The authentication type and authentication key must match exactly for the RIP message to be considered authentic and processed.<br>When unconfigured, this command removes the authentication type from the configuration and effectively disables authentication. |
| Options     | none, password, md5, md20  |
| Default     | none   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **bfd-liveness** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable BFD to control the state of protocol adjacency  |
| Context     | <b>configure service vprn</b> <i>string rip bfd-liveness boolean</i>   |
| Tree        | <a href="#">bfd-liveness</a>   |
| Description | When configured to <b>true</b> , this command enables BFD to control the state of the associated protocol adjacency.<br>When configured to <b>false</b> , this command removes BFD from the associated protocol adjacency. |
| Default     | false  |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **check-zero** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable checking of mandatory zero fields  |
| Context     | <b>configure service vprn</b> <i>string rip check-zero boolean</i>  |
| Tree        | <a href="#">check-zero</a>  |
| Description | When configured to <b>true</b> , this command enables checking of the mandatory zero fields in the RIPv1 and RIPv2 specifications and rejecting non-compliant RIP messages.<br>When configured to <b>false</b> , this command disables the check and allows the receipt of RIP messages even if the mandatory zero fields are non-zero. |
| Default     | false   |
| Introduced  | 16.0.R4   |

Platforms All

### **description** *string*

Synopsis Text description  
 Context **configure** [service](#) [vprn](#) *string* [rip](#) [description](#) *string*  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 16.0.R4

| Introduced    | 16.0.R4   |
| Platforms     | All   |

**authentication-type** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Authentication type   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip group</a> <i>string</i> <b>authentication-type</b> <i>keyword</i>   |
| Tree        | <a href="#">authentication-type</a>   |
| Description | <p>This command configures the type of authentication to be used.</p> <p>The authentication type and authentication key must match exactly for the RIP message to be considered authentic and processed.</p> <p>When unconfigured, this command removes the authentication type from the configuration and effectively disables authentication.</p> |
| Options     | none, password, md5, md20   |

|            |         |
|------------|---------|
| Introduced | 16.0.R4 |
| Platforms  | All     |

### **bfd-liveness** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable BFD to control the state of protocol adjacency  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip group</a> <i>string</i> <a href="#">bfd-liveness</a> <i>boolean</i>  |
| Tree        | <a href="#">bfd-liveness</a>   |
| Description | When configured to <b>true</b> , this command enables BFD to control the state of the associated protocol adjacency.<br>When configured to <b>false</b> , this command removes BFD from the associated protocol adjacency. |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **check-zero** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable checking of mandatory zero fields  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip group</a> <i>string</i> <a href="#">check-zero</a> <i>boolean</i>   |
| Tree        | <a href="#">check-zero</a>  |
| Description | When configured to <b>true</b> , this command enables checking of the mandatory zero fields in the RIPv1 and RIPv2 specifications and rejecting non-compliant RIP messages.<br>When configured to <b>false</b> , this command disables the check and allows the receipt of RIP messages even if the mandatory zero fields are non-zero. |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip group</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R4   |
| Platforms     | All   |

**export-policy** *reference*

|                |   |
|----------------|---|
| Synopsis       | Policies used to rule which routes are exported to RIP  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip group</a> <i>string</i> <a href="#">export-policy</a> <i>reference</i>  |
| Tree           | <a href="#">export-policy</a>   |
| Description    | This command specifies the export route policies used to determine which routes are exported to RIP.<br><br>If multiple policy names are specified, the policies are evaluated in the order they are specified. The first policy that matches is applied. |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |
| Max. Instances | 5   |

| Range      | 25 to 255 |
| Introduced | 16.0.R4   |
| Platforms  | All       |

**metric-in** *number*

|            |  |
|------------|--|
| Synopsis   | Metric added to routes received from a RIP neighbor  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip group</a> <i>string</i> <b>metric-in</b> <i>number</i> |
| Tree       | <a href="#">metric-in</a>  |
| Range      | 1 to 16  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**metric-out** *number*

|            |   |
|------------|---|
| Synopsis   | Metric added to routes exported into RIP  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip group</a> <i>string</i> <b>metric-out</b> <i>number</i> |
| Tree       | <a href="#">metric-out</a>  |
| Range      | 1 to 16   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**neighbor** [[interface-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>neighbor</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip group</a> <i>string</i> <b>neighbor</b> <i>string</i> |
| Tree       | <a href="#">neighbor</a>  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**[interface-name]** *string*

|          |   |
|----------|---|
| Synopsis | IP interface name   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip group</a> <i>string</i> <b>neighbor</b> <i>string</i> |
| Tree     | <a href="#">neighbor</a>  |

|               |                                     |
|---------------|-------------------------------------|
| String Length | 1 to 32                             |
| Notes         | This element is part of a list key. |
| Introduced    | 16.0.R4                             |
| Platforms     | All                                 |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the RIP neighbor interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">rip</a> <a href="#">group</a> <i>string</i> <a href="#">neighbor</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **authentication-key** *string*

|               |   |
|---------------|---|
| Synopsis      | Authentication password passed between RIP neighbors  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">rip</a> <a href="#">group</a> <i>string</i> <a href="#">neighbor</a> <i>string</i> <b>authentication-key</b> <i>string</i>  |
| Tree          | <a href="#">authentication-key</a>  |
| Description   | <p>This command sets the authentication password to be passed between RIP neighbors. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes.</p> <p>The authentication type and authentication key must match exactly for the RIP message to be considered authentic and processed.</p> <p>When unconfigured, this command removes the authentication password from the configuration and disables authentication.</p> |
| String Length | 1 to 51   |
| Introduced    | 16.0.R4   |
| Platforms     | All   |

### **authentication-type** *keyword*

|          |  |
|----------|--|
| Synopsis | Authentication type  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">rip</a> <a href="#">group</a> <i>string</i> <a href="#">neighbor</a> <i>string</i> <b>authentication-type</b> <i>keyword</i> |

|             |  |
|-------------|--|
| Tree        | <a href="#">authentication-type</a>  |
| Description | This command configures the type of authentication to be used.<br><br>The authentication type and authentication key must match exactly for the RIP message to be considered authentic and processed.<br><br>When unconfigured, this command removes the authentication type from the configuration and effectively disables authentication. |
| Options     | none, password, md5, md20  |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**bfd-liveness** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable BFD to control the state of protocol adjacency  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string rip group</i> <i>string neighbor</i> <i>string bfd-liveness</i> <i>boolean</i>   |
| Tree        | <a href="#">bfd-liveness</a>   |
| Description | When configured to <b>true</b> , this command enables BFD to control the state of the associated protocol adjacency.<br><br>When configured to <b>false</b> , this command removes BFD from the associated protocol adjacency. |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**check-zero** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable checking of mandatory zero fields  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string rip group</i> <i>string neighbor</i> <i>string check-zero</i> <i>boolean</i>  |
| Tree        | <a href="#">check-zero</a>  |
| Description | When configured to <b>true</b> , this command enables checking of the mandatory zero fields in the RIPv1 and RIPv2 specifications and rejecting non-compliant RIP messages.<br><br>When configured to <b>false</b> , this command disables the check and allows the receipt of RIP messages even if the mandatory zero fields are non-zero. |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

**description** *string*

| Synopsis   | Timer that controls the frequency of updates  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip group</a> <i>string</i> <a href="#">timers</a> <a href="#">update</a> <i>number</i> |
| Tree       | <a href="#">update</a>  |
| Range      | 1 to 600  |
| Units      | seconds   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **import-policy** *reference*

|                |  |
|----------------|--|
| Synopsis       | Import policies to decide routes for routing table   |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip</a> <a href="#">import-policy</a> <i>reference</i> |
| Tree           | <a href="#">import-policy</a>  |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>                                 |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R4  |
| Platforms      | All  |

### **message-size** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of routes in the RIP message  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip</a> <a href="#">message-size</a> <i>number</i> |
| Tree       | <a href="#">message-size</a>   |
| Range      | 25 to 255  |
| Default    | 25   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **metric-in** *number*

|          |   |
|----------|---|
| Synopsis | Metric added to routes received from a RIP neighbor |
|----------|---|

---

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string rip metric-in number</i> |
| Tree       | <a href="#">metric-in</a>  |
| Range      | 1 to 16  |
| Default    | 1  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **metric-out** *number*

|            |   |
|------------|---|
| Synopsis   | Metric added to routes exported into RIP                          |
| Context    | <b>configure service vprn</b> <i>string rip metric-out number</i> |
| Tree       | <a href="#">metric-out</a>  |
| Range      | 1 to 16   |
| Default    | 1   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **preference** *number*

|            |   |
|------------|---|
| Synopsis   | Route preference  |
| Context    | <b>configure service vprn</b> <i>string rip preference number</i> |
| Tree       | <a href="#">preference</a>  |
| Range      | 1 to 255  |
| Default    | 100   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **propagate-metric** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable the BGP MED used to configure the RIP metric  |
| Context     | <b>configure service vprn</b> <i>string rip propagate-metric boolean</i>   |
| Tree        | <a href="#">propagate-metric</a>   |
| Description | When configured to <b>true</b> , this command enables the BGP MED to be used to configure the RIP metric at the BGP to RIP transition on egress routers.<br><br>When configured to <b>false</b> , this command sets the RIP metric to the optional value configured with the <b>metric-out</b> command plus one. |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R4 |
| Platforms  | All     |

### **receive** *keyword*

|            |  |
|------------|--|
| Synopsis   | Accepted version on received packets                                   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string rip receive keyword</i> |
| Tree       | <b>receive</b>   |
| Options    | version-1, version-2, both, none                                       |
| Default    | both   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **send** *keyword*

|            |   |
|------------|---|
| Synopsis   | RIP version and method used to send RIP updates                     |
| Context    | <b>configure</b> <b>service vprn</b> <i>string rip send keyword</i> |
| Tree       | <b>send</b>   |
| Options    | none, version-1, broadcast, multicast                               |
| Default    | broadcast   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **split-horizon** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable split horizon and poison reverse   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string rip split-horizon boolean</i>  |
| Tree        | <b>split-horizon</b>  |
| Description | <p>When configured to <b>true</b>, this command enables the use of split horizon with poison reverse. Split-horizon with poison reverse means that routes learned from a neighbor through a given interface are advertised in updates out of the same interface but with a metric of 16 (infinity).</p> <p>When configured to <b>false</b>, this command enables split horizon without poison reverse. This allows the routes to be re-advertised on interfaces other than the interface that learned the route, with the advertised metric equaling an increment of the metric-in value.</p> |

|            |         |
|------------|---------|
| Default    | true    |
| Introduced | 16.0.R4 |
| Platforms  | All     |

## timers

|            |   |
|------------|---|
| Synopsis   | Enable the <b>timers</b> context                |
| Context    | <b>configure service vprn string rip timers</b> |
| Tree       | <b>timers</b>                                   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

## flush number

|             |  |
|-------------|--|
| Synopsis    | RIP flush timer  |
| Context     | <b>configure service vprn string rip timers flush number</b>   |
| Tree        | <b>flush</b>   |
| Description | This command specifies the time a route is maintained in the RIP database after it has been declared invalid. When the timer expires, the route is flushed from the RIP database completely. |
| Range       | 1 to 1200  |
| Units       | seconds  |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

## timeout number

|             |  |
|-------------|--|
| Synopsis    | RIP timeout timer  |
| Context     | <b>configure service vprn string rip timers timeout number</b>   |
| Tree        | <b>timeout</b>   |
| Description | This command specifies the RIP timeout timer. If a route is not updated by the time the timer expires, the route is declared invalid, but the route is maintained in the RIP database. |
| Range       | 1 to 1200  |
| Units       | seconds  |

|            |                            |
|------------|----------------------------|
| Notes      | This element is mandatory. |
| Introduced | 16.0.R4                    |
| Platforms  | All                        |

### **update** *number*

|            |   |
|------------|---|
| Synopsis   | Timer that controls the frequency of updates  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">rip timers</a> <a href="#">update</a> <i>number</i> |
| Tree       | <a href="#">update</a>  |
| Range      | 1 to 600  |
| Units      | seconds   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **ripng**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>ripng</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng</a> |
| Tree       | <a href="#">ripng</a>   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the RIPng instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**bfd-liveness** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable BFD to control the state of protocol adjacency  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string ripng</i> <b>bfd-liveness</b> <i>boolean</i>   |
| Tree        | <a href="#">bfd-liveness</a>   |
| Description | When configured to <b>true</b> , this command enables BFD to control the state of the associated protocol adjacency.<br>When configured to <b>false</b> , this command removes BFD from the associated protocol adjacency. |
| Default     | false  |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**check-zero** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable checking of mandatory zero fields  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string ripng</i> <b>check-zero</b> <i>boolean</i>  |
| Tree        | <a href="#">check-zero</a>  |
| Description | When configured to <b>true</b> , this command enables checking of the mandatory zero fields in the RIPv1 and RIPv2 specifications and rejecting non-compliant RIP messages.<br>When configured to <b>false</b> , this command disables the check and allows the receipt of RIP messages even if the mandatory zero fields are non-zero. |
| Default     | false   |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string ripng</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R4  |
| Platforms     | All  |

**export-limit**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>export-limit</b> context                  |
| Context    | <b>configure service vprn string ripng export-limit</b> |
| Tree       | <a href="#">export-limit</a>                            |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**log-percent number**

|            |  |
|------------|--|
| Synopsis   | Export limit before warning and SNMP notification sent                     |
| Context    | <b>configure service vprn string ripng export-limit log-percent number</b> |
| Tree       | <a href="#">log-percent</a>  |
| Range      | 1 to 100   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**number number**

|            |   |
|------------|---|
| Synopsis   | Maximum routes or prefixes exported from route table                  |
| Context    | <b>configure service vprn string ripng export-limit number number</b> |
| Tree       | <a href="#">number</a>  |
| Range      | 1 to 4294967295   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**export-policy reference**

|                |  |
|----------------|--|
| Synopsis       | Policies to determine exported routes                              |
| Context        | <b>configure service vprn string ripng export-policy reference</b> |
| Tree           | <a href="#">export-policy</a>                                      |
| Reference      | <b>configure policy-options policy-statement string</b>            |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.                               |

Introduced 16.0.R4  
 Platforms All

### **group** [*group-name*] *string*

Synopsis Enter the **group** list instance  
 Context **configure** *service vprn string ripng group string*  
 Tree *group*  
 Introduced 16.0.R4  
 Platforms All

### **[group-name]** *string*

Synopsis RIP group name  
 Context **configure** *service vprn string ripng group string*  
 Tree *group*  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R4  
 Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of RIPng neighbor interface group  
 Context **configure** *service vprn string ripng group string admin-state keyword*  
 Tree *admin-state*  
 Options enable, disable  
 Default enable  
 Introduced 16.0.R4  
 Platforms All

### **bfd-liveness** *boolean*

Synopsis Enable BFD to control the state of protocol adjacency  
 Context **configure** *service vprn string ripng group string bfd-liveness boolean*

|             |  |
|-------------|--|
| Tree        | <a href="#">bfd-liveness</a>   |
| Description | When configured to <b>true</b> , this command enables BFD to control the state of the associated protocol adjacency.<br>When configured to <b>false</b> , this command removes BFD from the associated protocol adjacency. |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **check-zero** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable checking of mandatory zero fields  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <b>check-zero</b> <i>boolean</i>  |
| Tree        | <a href="#">check-zero</a>  |
| Description | When configured to <b>true</b> , this command enables checking of the mandatory zero fields in the RIPv1 and RIPv2 specifications and rejecting non-compliant RIP messages.<br>When configured to <b>false</b> , this command disables the check and allows the receipt of RIP messages even if the mandatory zero fields are non-zero. |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R4  |
| Platforms     | All  |

### **export-policy** *reference*

|             |   |
|-------------|---|
| Synopsis    | Policies used to rule which routes are exported to RIP  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <b>export-policy</b> <i>reference</i> |
| Tree        | <a href="#">export-policy</a>   |
| Description | This command specifies the export route policies used to determine which routes are exported to RIP.  |

If multiple policy names are specified, the policies are evaluated in the order they are specified. The first policy that matches is applied.

|                |  |
|----------------|--|
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R4  |
| Platforms      | All  |

### **import-policy** *reference*

|                |   |
|----------------|---|
| Synopsis       | Policies to decide routes accepted from RIP neighbors   |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ripng</a> <a href="#">group</a> <i>string</i> <b>import-policy</b> <i>reference</i>   |
| Tree           | <a href="#">import-policy</a>   |
| Description    | This command configures import route policies to determine which routes are accepted from RIP neighbors.<br><br>If multiple policy names are specified, the policies are evaluated in the order they are specified. The first policy that matches is applied. |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |
| Max. Instances | 5   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R4   |
| Platforms      | All   |

### **message-size** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of routes in the message   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ripng</a> <a href="#">group</a> <i>string</i> <b>message-size</b> <i>number</i> |
| Tree       | <a href="#">message-size</a>  |
| Range      | 25 to 255   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**metric-in** *number*

|            |  |
|------------|--|
| Synopsis   | Metric added to routes received from the neighbor  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>ripng group</b> <i>string</i> <b>metric-in</b> <i>number</i> |
| Tree       | <b>metric-in</b>   |
| Range      | 1 to 16  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**metric-out** *number*

|            |   |
|------------|---|
| Synopsis   | Metric added to routes exported into RIPng  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>ripng group</b> <i>string</i> <b>metric-out</b> <i>number</i> |
| Tree       | <b>metric-out</b>   |
| Range      | 1 to 16   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**neighbor** [**interface-name**] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>neighbor</b> list instance  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>ripng group</b> <i>string</i> <b>neighbor</b> <i>reference</i> |
| Tree       | <b>neighbor</b>  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**[interface-name]** *reference*

|            |  |
|------------|--|
| Synopsis   | IP interface name  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>ripng group</b> <i>string</i> <b>neighbor</b> <i>reference</i> |
| Tree       | <b>neighbor</b>  |
| Reference  | <b>configure</b> <b>service vprn</b> <i>string</i> <b>interface</b> <i>string</i>                                    |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the RIPng neighbor   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**bfd-liveness** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable BFD to control the state of protocol adjacency  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <b>bfd-liveness</b> <i>boolean</i>  |
| Tree        | <a href="#">bfd-liveness</a>   |
| Description | When configured to <b>true</b> , this command enables BFD to control the state of the associated protocol adjacency.<br><br>When configured to <b>false</b> , this command removes BFD from the associated protocol adjacency. |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**check-zero** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable checking of mandatory zero fields  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <b>check-zero</b> <i>boolean</i>   |
| Tree        | <a href="#">check-zero</a>  |
| Description | When configured to <b>true</b> , this command enables checking of the mandatory zero fields in the RIPv1 and RIPv2 specifications and rejecting non-compliant RIP messages.<br><br>When configured to <b>false</b> , this command disables the check and allows the receipt of RIP messages even if the mandatory zero fields are non-zero. |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R4  |
| Platforms     | All  |

**export-policy** *reference*

|                |   |
|----------------|---|
| Synopsis       | Policies used to rule which routes are exported to RIP  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <a href="#">export-policy</a> <i>reference</i>   |
| Tree           | <a href="#">export-policy</a>   |
| Description    | This command specifies the export route policies used to determine which routes are exported to RIP.<br><br>If multiple policy names are specified, the policies are evaluated in the order they are specified. The first policy that matches is applied. |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |
| Max. Instances | 5   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R4   |
| Platforms      | All   |

**import-policy** *reference*

|             |   |
|-------------|---|
| Synopsis    | Policies to decide routes accepted from RIP neighbors   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <a href="#">import-policy</a> <i>reference</i>   |
| Tree        | <a href="#">import-policy</a>   |
| Description | This command configures import route policies to determine which routes are accepted from RIP neighbors.<br><br>If multiple policy names are specified, the policies are evaluated in the order they are specified. The first policy that matches is applied. |
| Reference   | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |

|                |                                      |
|----------------|--------------------------------------|
| Max. Instances | 5                                    |
| Notes          | This element is ordered by the user. |
| Introduced     | 16.0.R4                              |
| Platforms      | All                                  |

### **message-size** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of routes in the message  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <a href="#">message-size number</a> |
| Tree       | <a href="#">message-size</a>   |
| Range      | 25 to 255  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **metric-in** *number*

|            |   |
|------------|---|
| Synopsis   | Metric added to routes received from the neighbor   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <a href="#">metric-in number</a> |
| Tree       | <a href="#">metric-in</a>   |
| Range      | 1 to 16   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **metric-out** *number*

|            |  |
|------------|--|
| Synopsis   | Metric added to routes exported into RIPng   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <a href="#">metric-out number</a> |
| Tree       | <a href="#">metric-out</a>   |
| Range      | 1 to 16  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**preference** *number*

|            |  |
|------------|--|
| Synopsis   | Route preference   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string ripng group string neighbor reference preference number</i> |
| Tree       | <b>preference</b>  |
| Range      | 1 to 255   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**receive** *keyword*

|            |  |
|------------|--|
| Synopsis   | Accepted version on received packets   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string ripng group string neighbor reference receive keyword</i> |
| Tree       | <b>receive</b>   |
| Options    | none, ripng  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**send** *keyword*

|            |   |
|------------|---|
| Synopsis   | RIPng version and method used to send RIPng updates   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string ripng group string neighbor reference send keyword</i> |
| Tree       | <b>send</b>   |
| Options    | none, ripng, unicast  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**split-horizon** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable split horizon and poison reverse   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string ripng group string neighbor reference split-horizon boolean</i>  |
| Tree        | <b>split-horizon</b>  |
| Description | When configured to <b>true</b> , this command enables the use of split horizon with poison reverse. Split-horizon with poison reverse means that routes learned from a neighbor through a given interface are advertised in updates out of the same interface but with a metric of 16 (infinity). |

When configured to **false**, this command enables split horizon without poison reverse. This allows the routes to be re-advertised on interfaces other than the interface that learned the route, with the advertised metric equaling an increment of the metric-in value.

|            |         |
|------------|---------|
| Introduced | 16.0.R4 |
| Platforms  | All     |

## timers

|            |  |
|------------|--|
| Synopsis   | Enable the <b>timers</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <b>timers</b> |
| Tree       | <a href="#">timers</a>   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

## flush number

|             |  |
|-------------|--|
| Synopsis    | RIP flush timer  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <a href="#">timers</a> <b>flush</b> <i>number</i>   |
| Tree        | <a href="#">flush</a>  |
| Description | This command specifies the time a route is maintained in the RIP database after it has been declared invalid. When the timer expires, the route is flushed from the RIP database completely. |
| Range       | 1 to 1200  |
| Units       | seconds  |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

## timeout number

|          |  |
|----------|--|
| Synopsis | RIP timeout timer  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">neighbor reference</a> <a href="#">timers</a> <b>timeout</b> <i>number</i> |
| Tree     | <a href="#">timeout</a>  |

|             |  |
|-------------|--|
| Description | This command specifies the RIP timeout timer. If a route is not updated by the time the timer expires, the route is declared invalid, but the route is maintained in the RIP database. |
| Range       | 1 to 1200  |
| Units       | seconds  |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **update** *number*

|            |  |
|------------|--|
| Synopsis   | Timer that controls the frequency of updates   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ripng</a> <a href="#">group</a> <i>string</i> <a href="#">neighbor</a> <a href="#">reference</a> <a href="#">timers</a> <a href="#">update</a> <i>number</i> |
| Tree       | <a href="#">update</a>   |
| Range      | 1 to 600   |
| Units      | seconds  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **unicast-address** [[address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>unicast-address</b>  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ripng</a> <a href="#">group</a> <i>string</i> <a href="#">neighbor</a> <a href="#">reference</a> <a href="#">unicast-address</a> <i>string</i> |
| Tree       | <a href="#">unicast-address</a>  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **[address]** *string*

|          |  |
|----------|--|
| Synopsis | Unicast IPv6 address for the neighbor  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ripng</a> <a href="#">group</a> <i>string</i> <a href="#">neighbor</a> <a href="#">reference</a> <a href="#">unicast-address</a> <i>string</i> |
| Tree     | <a href="#">unicast-address</a>  |

|            |                                     |
|------------|-------------------------------------|
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R4                             |
| Platforms  | All                                 |

### **preference** *number*

|            |  |
|------------|--|
| Synopsis   | Route preference   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">preference</a> <i>number</i> |
| Tree       | <a href="#">preference</a>   |
| Range      | 1 to 255   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **receive** *keyword*

|            |  |
|------------|--|
| Synopsis   | Accepted version on received packets   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">receive</a> <i>keyword</i> |
| Tree       | <a href="#">receive</a>  |
| Options    | none, ripng  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **send** *keyword*

|            |   |
|------------|---|
| Synopsis   | RIPng version and method used to send RIPng updates   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">send</a> <i>keyword</i> |
| Tree       | <a href="#">send</a>  |
| Options    | none, ripng   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **split-horizon** *boolean*

|          |  |
|----------|--|
| Synopsis | Enable split horizon and poison reverse  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">split-horizon</a> <i>boolean</i> |

|             |   |
|-------------|---|
| Tree        | <a href="#">split-horizon</a>   |
| Description | <p>When configured to <b>true</b>, this command enables the use of split horizon with poison reverse. Split-horizon with poison reverse means that routes learned from a neighbor through a given interface are advertised in updates out of the same interface but with a metric of 16 (infinity).</p> <p>When configured to <b>false</b>, this command enables split horizon without poison reverse. This allows the routes to be re-advertised on interfaces other than the interface that learned the route, with the advertised metric equaling an increment of the metric-in value.</p> |
| Introduced  | 16.0.R4   |
| Platforms   | All   |

## timers

|            |  |
|------------|--|
| Synopsis   | Enable the <b>timers</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">timers</a> |
| Tree       | <a href="#">timers</a>   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

## flush number

|             |  |
|-------------|--|
| Synopsis    | RIP flush timer  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng group</a> <i>string</i> <a href="#">timers</a> <a href="#">flush</a> <i>number</i>                             |
| Tree        | <a href="#">flush</a>  |
| Description | This command specifies the time a route is maintained in the RIP database after it has been declared invalid. When the timer expires, the route is flushed from the RIP database completely. |
| Range       | 1 to 1200  |
| Units       | seconds  |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

## timeout number

|          |                   |
|----------|-------------------|
| Synopsis | RIP timeout timer |
|----------|-------------------|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn string ripng group string timers timeout number</b>  |
| Tree        | <b>timeout</b>   |
| Description | This command specifies the RIP timeout timer. If a route is not updated by the time the timer expires, the route is declared invalid, but the route is maintained in the RIP database. |
| Range       | 1 to 1200  |
| Units       | seconds  |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

### **update number**

|            |  |
|------------|--|
| Synopsis   | Timer that controls the frequency of updates                                 |
| Context    | <b>configure service vprn string ripng group string timers update number</b> |
| Tree       | <b>update</b>  |
| Range      | 1 to 600   |
| Units      | seconds  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **import-policy reference**

|                |  |
|----------------|--|
| Synopsis       | Import policies to decide routes for routing table                 |
| Context        | <b>configure service vprn string ripng import-policy reference</b> |
| Tree           | <b>import-policy</b>   |
| Reference      | <b>configure policy-options policy-statement string</b>            |
| Max. Instances | 5  |
| Notes          | This element is ordered by the user.                               |
| Introduced     | 16.0.R4  |
| Platforms      | All  |

**message-size** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of routes in the message  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng</a> <a href="#">message-size</a> <i>number</i> |
| Tree       | <a href="#">message-size</a>   |
| Range      | 25 to 255  |
| Default    | 25   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**metric-in** *number*

|            |   |
|------------|---|
| Synopsis   | Metric added to routes received from the neighbor   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng</a> <a href="#">metric-in</a> <i>number</i> |
| Tree       | <a href="#">metric-in</a>   |
| Range      | 1 to 16   |
| Default    | 1   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**metric-out** *number*

|            |  |
|------------|--|
| Synopsis   | Metric added to routes exported into RIPng   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng</a> <a href="#">metric-out</a> <i>number</i> |
| Tree       | <a href="#">metric-out</a>   |
| Range      | 1 to 16  |
| Default    | 1  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**preference** *number*

|          |  |
|----------|--|
| Synopsis | Route preference   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng</a> <a href="#">preference</a> <i>number</i> |
| Tree     | <a href="#">preference</a>   |
| Range    | 1 to 255   |

|            |         |
|------------|---------|
| Default    | 100     |
| Introduced | 16.0.R4 |
| Platforms  | All     |

**receive keyword**

|            |   |
|------------|---|
| Synopsis   | Accepted version on received packets  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ripng</a> <b>receive</b> <i>keyword</i> |
| Tree       | <a href="#">receive</a>   |
| Options    | none, ripng   |
| Default    | ripng   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**send keyword**

|            |  |
|------------|--|
| Synopsis   | RIPng version and method used to send RIPng updates  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ripng</a> <b>send</b> <i>keyword</i> |
| Tree       | <a href="#">send</a>   |
| Options    | none, ripng  |
| Default    | ripng  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**split-horizon boolean**

|             |   |
|-------------|---|
| Synopsis    | Enable split horizon and poison reverse   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">ripng</a> <b>split-horizon</b> <i>boolean</i>   |
| Tree        | <a href="#">split-horizon</a>   |
| Description | <p>When configured to <b>true</b>, this command enables the use of split horizon with poison reverse. Split-horizon with poison reverse means that routes learned from a neighbor through a given interface are advertised in updates out of the same interface but with a metric of 16 (infinity).</p> <p>When configured to <b>false</b>, this command enables split horizon without poison reverse. This allows the routes to be re-advertised on interfaces other than the interface that learned the route, with the advertised metric equaling an increment of the metric-in value.</p> |

|            |         |
|------------|---------|
| Default    | true    |
| Introduced | 16.0.R4 |
| Platforms  | All     |

## timers

|            |   |
|------------|---|
| Synopsis   | Enable the <b>timers</b> context                  |
| Context    | <b>configure service vprn string ripng timers</b> |
| Tree       | <b>timers</b>                                     |
| Introduced | 16.0.R4   |
| Platforms  | All   |

## flush *number*

|             |  |
|-------------|--|
| Synopsis    | RIP flush timer  |
| Context     | <b>configure service vprn string ripng timers flush number</b>   |
| Tree        | <b>flush</b>   |
| Description | This command specifies the time a route is maintained in the RIP database after it has been declared invalid. When the timer expires, the route is flushed from the RIP database completely. |
| Range       | 1 to 1200  |
| Units       | seconds  |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

## timeout *number*

|             |  |
|-------------|--|
| Synopsis    | RIP timeout timer  |
| Context     | <b>configure service vprn string ripng timers timeout number</b>   |
| Tree        | <b>timeout</b>   |
| Description | This command specifies the RIP timeout timer. If a route is not updated by the time the timer expires, the route is declared invalid, but the route is maintained in the RIP database. |
| Range       | 1 to 1200  |
| Units       | seconds  |

|            |                            |
|------------|----------------------------|
| Notes      | This element is mandatory. |
| Introduced | 16.0.R4                    |
| Platforms  | All                        |

### **update** *number*

|            |   |
|------------|---|
| Synopsis   | Timer that controls the frequency of updates  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">ripng timers</a> <a href="#">update</a> <i>number</i> |
| Tree       | <a href="#">update</a>  |
| Range      | 1 to 600  |
| Units      | seconds   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **router-id** *string*

|            |   |
|------------|---|
| Synopsis   | Unique router ID for the router in the AS   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">router-id</a> <i>string</i> |
| Tree       | <a href="#">router-id</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **segment-routing-v6** [[instance](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>segment-routing-v6</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">segment-routing-v6</a> <i>number</i> |

| Tree       | <a href="#">locator</a>  |
| Reference  | <b>configure</b> <a href="#">router</a> <i>string</i> <a href="#">segment-routing</a> <a href="#">segment-routing-v6</a> <a href="#">locator</a> <i>string</i> |
| Notes      | This element is part of a list key.  |
| Introduced | 21.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

### **function**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>function</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">segment-routing-v6</a> <i>number</i> <a href="#">locator</a> <i>reference</i> <a href="#">function</a>  |
| Tree        | <a href="#">function</a>  |
| Description | Commands in this context configure the End SID functions for each SRH mode.<br>The <b>end-dt4</b> configuration and the <b>end-dt46</b> configuration are mutually exclusive.<br>The <b>end-dt6</b> configuration and the <b>end-dt46</b> configuration are mutually exclusive. |
| Introduced  | 21.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

**end-dt4**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>end-dt4</b> context   |
| Context    | <b>configure service vprn string segment-routing-v6 number locator reference function end-dt4</b> |
| Tree       | <b>end-dt4</b>  |
| Introduced | 21.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

**value number**

|             |  |
|-------------|--|
| Synopsis    | SRv6 function value  |
| Context     | <b>configure service vprn string segment-routing-v6 number locator reference function end-dt4 value number</b>   |
| Tree        | <b>value</b>   |
| Description | This command assigns the optional static function value for the routes in the VPRN, VPLS, or Epipe instance.<br><br>When unconfigured, the system allocates a value dynamically. |
| Range       | 1 to 1048575   |
| Introduced  | 21.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

**end-dt46**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>end-dt46</b> context   |
| Context    | <b>configure service vprn string segment-routing-v6 number locator reference function end-dt46</b> |
| Tree       | <b>end-dt46</b>  |
| Introduced | 21.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

**value number**

|          |   |
|----------|---|
| Synopsis | SRv6 function value   |
| Context  | <b>configure service vprn string segment-routing-v6 number locator reference function end-dt46 value number</b> |
| Tree     | <b>value</b>  |

|             |  |
|-------------|--|
| Description | This command assigns the optional static function value for the routes in the VPRN, VPLS, or Epipe instance.<br>When unconfigured, the system allocates a value dynamically. |
| Range       | 1 to 1048575   |
| Introduced  | 21.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

## end-dt6

|            |  |
|------------|--|
| Synopsis   | Enable the <b>end-dt6</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>segment-routing-v6</b> <i>number</i> <b>locator</b> <i>reference</i> <b>function</b> <b>end-dt6</b> |
| Tree       | <b>end-dt6</b>   |
| Introduced | 21.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

## value *number*

|             |   |
|-------------|---|
| Synopsis    | SRv6 function value   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>segment-routing-v6</b> <i>number</i> <b>locator</b> <i>reference</i> <b>function</b> <b>end-dt6</b> <b>value</b> <i>number</i> |
| Tree        | <b>value</b>  |
| Description | This command assigns the optional static function value for the routes in the VPRN, VPLS, or Epipe instance.<br>When unconfigured, the system allocates a value dynamically.  |
| Range       | 1 to 1048575  |
| Introduced  | 21.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

## micro-segment-locator [*locator-name*] *reference*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>micro-segment-locator</b> list instance  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>segment-routing-v6</b> <i>number</i> <b>micro-segment-locator</b> <i>reference</i> |
| Tree       | <b>micro-segment-locator</b>  |
| Introduced | 22.10.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### [locator-name] *reference*

Synopsis Micro-segment SRv6 locator name

Context **configure** [service vprn](#) *string* [segment-routing-v6](#) *number* [micro-segment-locator](#) *reference*

Tree [micro-segment-locator](#)

Description This command associates a pre-defined micro-segment SRv6 locator (defined in the **configure router segment-routing segment-routing-v6** context) with the SRv6 instance in the service. The same micro-segment locator can be referenced in multiple BGP instances used by IPVPN or EVPN.

Reference **configure** [router](#) *string* [segment-routing](#) [segment-routing-v6](#) [micro-segment-locator](#) *string*

Notes This element is part of a list key.

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### function

Synopsis Enter the **function** context

Context **configure** [service vprn](#) *string* [segment-routing-v6](#) *number* [micro-segment-locator](#) *reference* [function](#)

Tree [function](#)

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### udt4

Synopsis Enable the **udt4** context

Context **configure** [service vprn](#) *string* [segment-routing-v6](#) *number* [micro-segment-locator](#) *reference* [function](#) [udt4](#)

Tree [udt4](#)

Description Commands in this context configure the SRv6 uDT4 behavior and the function value that is associated with the SRv6 instance in the service. When configured, decapsulation and table lookup for IPv4 prefixes occur in the VPRN service.

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **value number**

Synopsis SRv6 function value

Context **configure service vprn string segment-routing-v6 number micro-segment-locator reference function udt4 value number**

Tree [value](#)

Description This command assigns the optional static function value for the routes in the VPRN, VPLS, or Epipe instance.  
When unconfigured, the system allocates a value dynamically.

Range 1 to 1048575

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **udt46**

Synopsis Enable the **udt46** context

Context **configure service vprn string segment-routing-v6 number micro-segment-locator reference function udt46**

Tree [udt46](#)

Description The commands in this context configure the SRv6 uDT46 behavior and the function value that is associated with the SRv6 instance in the service. When configured, decapsulation and table lookup for IPv4 and IPv6 prefixes occur in the VPRN service.

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **value number**

Synopsis SRv6 function value

Context **configure service vprn string segment-routing-v6 number micro-segment-locator reference function udt46 value number**

Tree [value](#)

Description This command assigns the optional static function value for the routes in the VPRN, VPLS, or Epipe instance.  
When unconfigured, the system allocates a value dynamically.

Range 1 to 1048575

|            |   |
|------------|---|
| Introduced | 22.10.R1                                    |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

## udt6

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>udt6</b> context  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>segment-routing-v6</b> <i>number</i> <b>micro-segment-locator</b> <i>reference</i> <b>function</b> <b>udt6</b>   |
| Tree        | <b>udt6</b>   |
| Description | Commands in this context configure the SRv6 uDT6 behavior and the function value that is associated with the SRv6 instance in the service. When configured, decapsulation and table lookup for IPv6 prefixes occur in the VPRN service. |
| Introduced  | 22.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

## value *number*

|             |  |

**access boolean**

|            |  |
|------------|--|
| Synopsis   | Enable SNMP access for the VPRN service                  |
| Context    | <b>configure service vprn string snmp access boolean</b> |
| Tree       | <b>access</b>  |
| Default    | false  |
| Introduced | 16.0.R5  |
| Platforms  | All  |

**community [community-string] string**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>community</b> list instance   |
| Context     | <b>configure service vprn string snmp community string</b>   |
| Tree        | <b>community</b>   |
| Description | <p>Commands in this context set the SNMP community names to be used with the associated VPRN instance. These VPRN community names are used to associate SNMP v1/v2c requests with a particular VPRN context and to return a reply that contains VPRN-specific data or limit SNMP access to data in a specific VPRN instance.</p> <p>VPRN SNMP communities configured with an access permission of 'r' are automatically associated with the default access group "snmp-vprn-ro" and the "vprn-view" view (read only). VPRN SNMP communities configured with an access permission of 'rw' are</p> |

automatically associated with the default access group "snmp-vprn" and the "vprn-view" view (read/write).

The community in an SNMP v1/v2 request determines the SNMP context (that is, the VPRN number for accessing SNMP tables) and not the VPRN of the incoming interface on which the request was received. For example, when an SNMP request arrives on VPRN 5 interface "ringo" with a destination IP address equal to the "ringo" interface, but the community in the SNMP request is the community configured against VPRN 101, the SNMP request is processed using the VPRN 101 context. (the response contains information about VPRN 101). Nokia recommends avoiding the use of a simple series of VPRN SNMP community values that are similar to each other (for example, avoid my-vprncomm-1, my-vprn-comm-2, and so on).

|            |         |

|---------------|--|
| Synopsis      | SNMP v1/v2c community name associated with the VPRN                        |
| Context       | <b>configure</b> <a href="#">service vprn string snmp community string</a> |
| Tree          | <a href="#">community</a>  |
| String Length | 1 to 114   |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R5  |
| Platforms     | All  |

### **access-permissions keyword**

|            |   |
|------------|---|
| Synopsis   | Access permissions to MIB objects   |
| Context    | <b>configure</b> <a href="#">service vprn string snmp community string access-permissions keyword</a> |
| Tree       | <a href="#">access-permissions</a>  |
| Options    | r, rw   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R5   |
| Platforms  | All   |

### **source-access-list reference**

|          |   |
|----------|---|
| Synopsis | List name used to validate the source IP address  |
| Context  | <b>configure</b> <a href="#">service vprn string snmp community string source-access-list reference</a> |

|             |   |
|-------------|---|
| Tree        | <a href="#">source-access-list</a>  |
| Description | This command specifies the SNMP source access list to use with the SNMP community. The source access list is used to validate the source IP address of all received SNMP requests that use the community. |
| Reference   | <b>configure</b> <a href="#">system security snmp source-access-list</a> <i>string</i>  |
| Introduced  | 16.0.R5   |
| Platforms   | All   |

### **version** *keyword*

|            |   |
|------------|---|
| Synopsis   | SNMP version  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">snmp community</a> <i>string</i> <a href="#">version</a> <i>keyword</i> |
| Tree       | <a href="#">version</a>   |
| Options    | v1, v2c, both   |
| Default    | both  |
| Introduced | 16.0.R5   |
| Platforms  | All   |

### **source-address**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>source-address</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">source-address</a> |
| Tree       | <a href="#">source-address</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **ipv4** [[application](#)] *keyword*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">source-address</a> <a href="#">ipv4</a> <i>keyword</i> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[application]** *keyword*

|            |  |
|------------|--|
| Synopsis   | Application that uses the source IP address  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">source-address</a> <a href="#">ipv4</a> <i>keyword</i> |
| Tree       | <a href="#">ipv4</a>   |
| Options    | telnet, ssh, snmptrap, ping, traceroute, ntp, cflowd, ptp, icmp-error  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**address** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Source IPv4 address  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">source-address</a> <a href="#">ipv4</a> <i>keyword</i> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>address</b> or <b>interface-name</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**interface-name** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | IP interface name   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">source-address</a> <a href="#">ipv4</a> <i>keyword</i> <a href="#">interface-name</a> <i>string</i> |
| Tree          | <a href="#">interface-name</a>  |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a mandatory choice: <b>address</b> or <b>interface-name</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**ipv6** [[application](#)] *keyword*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv6</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">source-address</a> <a href="#">ipv6</a> <i>keyword</i> |

**cpe-check [address]** (*ipv4-address-no-zone | ipv6-address-no-zone*)

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>cpe-check</b> list instance   |
| Context        | <b>configure service vprn string static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type keyword indirect</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>cpe-check</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )  |
| Tree           | <b>cpe-check</b>   |
| Description    | <p>When configured, this command enables the Customer Premises Equipment (CPE) check feature and specifies the IP address of the target CPE device.</p> <p>This option initiates a background ICMP ping test to the configured target IP address. The IP address can either be an IPv4 address for IPv4 static routes or an IPv6 address for IPv6 static routes. To avoid possible circular references, the target IP address cannot exist in the same subnet as the static route subnet. This command is mutually exclusive with BFD support on a specific static route.</p> <p><b>Note:</b> A node that is sourcing CPE-check packets waits an additional full interval before taking action, which gives the CPE time to respond. For example, with a drop-count of 3 and an interval of 1s, three CPE-check packets are sent out and the node waits for the duration of another interval before acting on the loss. Failure declaration may take extra time depending on the load, interval, and other factors. In line with multitasking, multi-priority operating principles of the node, and the relative priority of <b>cpe-ping</b>, the node paces these minor events.</p> |

| Platforms      | All  |

**[address]** (*ipv4-address-no-zone | ipv6-address-no-zone*)

|          |                                     |
|----------|-------------------------------------|
| Synopsis | IP address of the target CPE device |
|----------|-------------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type</b> <b>keyword</b> <b>indirect</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>cpe-check</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) |
| Tree       | <b>cpe-check</b>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **drop-count** *number*

|            |   |
|------------|---|
| Synopsis   | Consecutive ping replies missed before CPE deemed down  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type</b> <b>keyword</b> <b>indirect</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>cpe-check</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>drop-count</b> <i>number</i> |
| Tree       | <b>drop-count</b>   |
| Range      | 1 to 255  |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **interval** *number*

|            |   |
|------------|---|
| Synopsis   | Interval between ICMP pings to target CPE IP address  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type</b> <b>keyword</b> <b>indirect</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>cpe-check</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>interval</b> <i>number</i> |
| Tree       | <b>interval</b>   |
| Range      | 1 to 255  |
| Units      | seconds   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **log** *boolean*

|          |   |
|----------|---|
| Synopsis | Log CPE connectivity checks transitions |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>static-routes route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <i>keyword</i> <b>indirect</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>cpe-check</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>log</b> <i>boolean</i> |
| Tree       | <b>log</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **padding-size** *number*

|            |  |
|------------|--|
| Synopsis   | Padding size for CPE connectivity checks   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>static-routes route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <i>keyword</i> <b>indirect</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>cpe-check</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>padding-size</b> <i>number</i> |
| Tree       | <b>padding-size</b>  |
| Range      | 0 to 16384   |
| Units      | bytes  |
| Default    | 56   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure service vprn</b> <i>string</i> <b>static-routes route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <i>keyword</i> <b>indirect</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>description</b> <i>string</i> |
| Tree          | <b>description</b>   |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **destination-class** *number*

|          |  |
|----------|--|
| Synopsis | Destination class for this static route  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>static-routes route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <i>keyword</i> <b>indirect</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>destination-class</b> <i>number</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">destination-class</a>      |
| Range      | 1 to 255                               |
| Introduced | 16.0.R1                                |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS |

### **metric number**

|            |   |
|------------|---|
| Synopsis   | Static route metric   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">static-routes</a> <a href="#">route</a> ( <a href="#">ipv4-prefix</a>   <a href="#">ipv6-prefix</a> ) <a href="#">route-type</a> <i>keyword</i> <a href="#">indirect</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">metric</a> <i>number</i> |
| Tree       | <a href="#">metric</a>  |
| Range      | 0 to 65535  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **preference number**

|            |   |
|------------|---|
| Synopsis   | Priority of this static route over the routes from different sources  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">static-routes</a> <a href="#">route</a> ( <a href="#">ipv4-prefix</a>   <a href="#">ipv6-prefix</a> ) <a href="#">route-type</a> <i>keyword</i> <a href="#">indirect</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">preference</a> <i>number</i> |
| Tree       | <a href="#">preference</a>  |
| Range      | 1 to 255  |
| Default    | 5   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **prefix-list**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>prefix-list</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">static-routes</a> <a href="#">route</a> ( <a href="#">ipv4-prefix</a>   <a href="#">ipv6-prefix</a> ) <a href="#">route-type</a> <i>keyword</i> <a href="#">indirect</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">prefix-list</a> |
| Tree       | <a href="#">prefix-list</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**flag keyword**

|            |   |
|------------|---|
| Synopsis   | Static route match condition from prefix list   |
| Context    | <b>configure service vprn string static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type keyword indirect</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>prefix-list flag keyword</b> |
| Tree       | <b>flag</b>   |
| Options    | any, all, none  |
| Default    | any   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**name reference**

|            |   |
|------------|---|
| Synopsis   | Prefix list name  |
| Context    | <b>configure service vprn string static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type keyword indirect</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>prefix-list name reference</b> |
| Tree       | <b>name</b>   |
| Reference  | <b>configure policy-options prefix-list string</b>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**qos**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure service vprn string static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type keyword indirect</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>qos</b> |
| Tree       | <b>qos</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**forwarding-class keyword**

|          |   |
|----------|---|
| Synopsis | Forwarding class associated with the static route   |
| Context  | <b>configure service vprn string static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type keyword indirect</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>qos forwarding-class keyword</b> |

|            |  |
|------------|--|
| Tree       | <a href="#">forwarding-class</a>                             |
| Options    | be, l2, af, l1, h2, ef, h1, nc                               |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **priority** *keyword*

|            |  |
|------------|--|
| Synopsis   | Static route priority  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">static-routes</a> <a href="#">route</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">route-type</a> <a href="#">keyword</a> <a href="#">indirect</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">qos</a> <a href="#">priority</a> <a href="#">keyword</a> |
| Tree       | <a href="#">priority</a>   |
| Options    | low, high  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **source-class** *number*

|            |   |
|------------|---|
| Synopsis   | Source class for this static route  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">static-routes</a> <a href="#">route</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">route-type</a> <a href="#">keyword</a> <a href="#">indirect</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">source-class</a> <a href="#">number</a> |
| Tree       | <a href="#">source-class</a>  |
| Range      | 1 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS  |

### **tag** *number*

|            |  |
|------------|--|
| Synopsis   | Static route tag   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">static-routes</a> <a href="#">route</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">route-type</a> <a href="#">keyword</a> <a href="#">indirect</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">tag</a> <a href="#">number</a> |
| Tree       | <a href="#">tag</a>  |
| Range      | 1 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**interface** [[interface-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>interface</b> list instance  |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">static-routes route</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">route-type</a><br><i>keyword interface string</i> |
| Tree       | <a href="#">interface</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[interface-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Router interface name.  |
| Context       | <b>configure service vprn</b> <i>string</i> <a href="#">static-routes route</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">route-type</a><br><i>keyword interface string</i> |
| Tree          | <a href="#">interface</a>   |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the static route operation  |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">static-routes route</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">route-type</a><br><i>keyword interface string admin-state keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**community** *string*

|               |  |
|---------------|--|
| Synopsis      | Community ID associated with the static route  |
| Context       | <b>configure service vprn</b> <i>string</i> <a href="#">static-routes route</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">route-type</a><br><i>keyword interface string community string</i> |
| Tree          | <a href="#">community</a>  |
| String Length | 1 to 72  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **cpe-check** [address] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>cpe-check</b> list instance   |
| Context        | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>static-routes</b> <b>route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <b>keyword</b> <b>interface</b> <i>string</i> <b>cpe-check</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )   |
| Tree           | <b>cpe-check</b>   |
| Description    | <p>When configured, this command enables the Customer Premises Equipment (CPE) check feature and specifies the IP address of the target CPE device.</p> <p>This option initiates a background ICMP ping test to the configured target IP address. The IP address can either be an IPv4 address for IPv4 static routes or an IPv6 address for IPv6 static routes. To avoid possible circular references, the target IP address cannot exist in the same subnet as the static route subnet. This command is mutually exclusive with BFD support on a specific static route.</p> <p><b>Note:</b> A node that is sourcing CPE-check packets waits an additional full interval before taking action, which gives the CPE time to respond. For example, with a drop-count of 3 and an interval of 1s, three CPE-check packets are sent out and the node waits for the duration of another interval before acting on the loss. Failure declaration may take extra time depending on the load, interval, and other factors. In line with multitasking, multi-priority operating principles of the node, and the relative priority of <b>cpe-ping</b>, the node paces these minor events.</p> |
| Max. Instances | 1  |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | IP address of the target CPE device  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>static-routes</b> <b>route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <b>keyword</b> <b>interface</b> <i>string</i> <b>cpe-check</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <b>cpe-check</b>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### drop-count *number*

|            |   |
|------------|---|
| Synopsis   | Consecutive ping replies missed before CPE deemed down  |
| Context    | <b>configure service vprn</b> <i>string static-routes route (ipv4-prefix   ipv6-prefix) route-type keyword interface string cpe-check (ipv4-address-no-zone   ipv6-address-no-zone) drop-count number</i> |
| Tree       | <a href="#">drop-count</a>  |

| Description | Commands in this context configure static route entry fast failover.  |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

### **address** ([ipv4-address-no-zone](#) | [ipv6-address-no-zone](#))

|             |   |
|-------------|---|
| Synopsis    | Backup next-hop IP address  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">static-routes</a> <a href="#">route</a> ( <a href="#">ipv4-prefix</a>   <a href="#">ipv6-prefix</a> ) <a href="#">route-type</a> <i>keyword</i> <a href="#">next-hop</a> ( <a href="#">ipv4-address-with-zone</a>   <a href="#">ipv6-address-with-zone</a> ) <a href="#">backup-next-hop</a> <a href="#">address</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) |
| Tree        | <a href="#">address</a>   |
| Description | This command specifies the backup IP forwarding address that is used for static route Fast ReRoute (FRR). The configured address, if reachable, acts as pre-installed backup forwarding information that can be used when the primary IP next-hop suddenly fails.<br><br>The configured backup next-hop IP address can be directly or indirectly connected (using an IGP or tunnel) to the node. The backup next-hop forwarding information or the  |

Next-hop Label Forwarding Entry (NHLFE) tunnel forwarding information from the IP Routing Table Manager (RTM) is used to preconfigure an IP fast-reroute backup path.

One backup next-hop address can protect a single primary static route entry next-hop address without ECMP and it is only activated when the primary next-hop has no active ECMP.

The configured IP address can be either on the network or the access side.

|            |         |
|------------|---------|
| Introduced | 21.2.R1 |
| Platforms  | All     |

### **bfd-liveness** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use Bidirectional Forwarding Detection on this static route   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>static-routes</b> <b>route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <b>keyword</b> <b>next-hop</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>bfd-liveness</b> <i>boolean</i> |
| Tree       | <b>bfd-liveness</b>   |

| Synopsis   | Enter the <b>prefix-list</b> context   |
| Context    | <b>configure service vprn string static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type keyword next-hop</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>prefix-list</b> |
| Tree       | <b>prefix-list</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**flag keyword**

|            |   |
|------------|---|
| Synopsis   | Static route match condition from prefix list   |
| Context    | <b>configure service vprn string static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type keyword next-hop</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>prefix-list flag keyword</b> |
| Tree       | <b>flag</b>   |
| Options    | any, all, none  |
| Default    | any   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**name reference**

|          |   |
|----------|---|
| Synopsis | Prefix list name  |
| Context  | <b>configure service vprn string static-routes route</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>route-type keyword next-hop</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>prefix-list name reference</b> |

|            |   |
|------------|---|
| Tree       | <a href="#">name</a>  |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">prefix-list</a> <i>string</i> |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## qos

|            |   |
|------------|---|
| Synopsis   | Enter the <b>qos</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">static-routes</a> <a href="#">route</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">route-type</a> <a href="#">keyword</a> <a href="#">next-hop</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">qos</a> |
| Tree       | <a href="#">qos</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## forwarding-class *keyword*

|            |   |
|------------|---|
| Synopsis   | Forwarding class associated with the static route   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">static-routes</a> <a href="#">route</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">route-type</a> <a href="#">keyword</a> <a href="#">next-hop</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">qos</a> <a href="#">forwarding-class</a> <i>keyword</i> |
| Tree       | <a href="#">forwarding-class</a>  |
| Options    | be, l2, af, l1, h2, ef, h1, nc  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## priority *keyword*

|            |   |
|------------|---|
| Synopsis   | Static route priority   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">static-routes</a> <a href="#">route</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <a href="#">route-type</a> <a href="#">keyword</a> <a href="#">next-hop</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">qos</a> <a href="#">priority</a> <i>keyword</i> |
| Tree       | <a href="#">priority</a>  |
| Options    | low, high   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**source-class** *number*

|            |  |
|------------|--|
| Synopsis   | Source class for this static route   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>static-routes</b> <b>route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <b>keyword</b> <b>next-hop</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>source-class</b> <b>number</b> |
| Tree       | <b>source-class</b>  |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS   |

**tag** *number*

|            |   |
|------------|---|
| Synopsis   | Static route tag  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>static-routes</b> <b>route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <b>keyword</b> <b>next-hop</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>tag</b> <b>number</b> |
| Tree       | <b>tag</b>  |
| Range      | 1 to 4294967295   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**validate-next-hop** *boolean*

|            |  |
|------------|--|
| Synopsis   | Track the state of the next hop in the IPv4 ARP Cache or the IPv6 Neighbor Cache   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>static-routes</b> <b>route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <b>keyword</b> <b>next-hop</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>validate-next-hop</b> <b>boolean</b> |
| Tree       | <b>validate-next-hop</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**tag** *number*

|          |   |
|----------|---|
| Synopsis | Static route tag  |
| Context  | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>static-routes</b> <b>route</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>route-type</b> <b>keyword</b> <b>tag</b> <b>number</b> |
| Tree     | <b>tag</b>  |

|            |                 |
|------------|-----------------|
| Range      | 1 to 4294967295 |
| Introduced | 16.0.R1         |
| Platforms  | All             |

### **subscriber-interface** [[interface-name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>subscriber-interface</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> |
| Tree       | <a href="#">subscriber-interface</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **[interface-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Subscriber interface name  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> |
| Tree          | <a href="#">subscriber-interface</a>   |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the subscriber interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **description** *string*

|          |                  |
|----------|------------------|
| Synopsis | Text description |
|----------|------------------|

|               |  |
|---------------|--|
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <b>description</b>   |
| String Length | 1 to 255   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **fwd-service** *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Configure the forwarding service.   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>fwd-service</b> <i>reference</i> |
| Tree       | <b>fwd-service</b>  |
| Reference  | <b>configure service vprn</b> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **fwd-subscriber-interface** *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Forwarding subscriber interface name   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>fwd-subscriber-interface</b> <i>reference</i> |
| Tree       | <b>fwd-subscriber-interface</b>  |
| Reference  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **group-interface** [**group-interface-name**] *string*

|          |  |
|----------|--|
| Synopsis | Enter the <b>group-interface</b> list instance   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">group-interface</a>                         |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **[group-interface-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Group interface name  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> |
| Tree          | <a href="#">group-interface</a>   |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **bonding-parameters**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>bonding-parameters</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <b>bonding-parameters</b> |
| Tree       | <a href="#">bonding-parameters</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of ESM connection bonding   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">bonding-parameters</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**connection** [[connection-index](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>connection</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">bonding-parameters</a> <a href="#">connection</a> <i>number</i> |
| Tree       | <a href="#">connection</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**[connection-index]** *number*

|            |  |
|------------|--|
| Synopsis   | Bonding connection index   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">bonding-parameters</a> <a href="#">connection</a> <i>number</i> |
| Tree       | <a href="#">connection</a>   |
| Range      | 1 to 2   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**service** *string*

|          |  |
|----------|--|
| Synopsis | Connection service   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">bonding-parameters</a> <a href="#">connection</a> <i>number</i> <a href="#">service</a> <i>string</i> |
| Tree     | <a href="#">service</a>  |

|               |  |
|---------------|--|
| String Length | 1 to 64                                      |
| Introduced    | 16.0.R1                                      |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## fpe reference

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | FPE that provisions bonding functionality  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">bonding-parameters</a> <a href="#">fpe</a> <i>reference</i> |
| Tree       | <a href="#">fpe</a>  |
| Reference  | <b>configure</b> <a href="#">fwd-path-ext</a> <a href="#">fpe</a> <i>number</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## multicast

|            |   |
|------------|---|
| Synopsis   | Enter the <b>multicast</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">bonding-parameters</a> <a href="#">multicast</a> |
| Tree       | <a href="#">multicast</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## connection (*number* | *keyword*)

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Multicast connection  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">bonding-parameters</a> <a href="#">multicast</a> <a href="#">connection</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">connection</a>  |

| Default    | use-incoming                                 |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## brg

|            |  |
|------------|--|
| Synopsis   | Enter the <b>brg</b> context   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>brg</b> |
| Tree       | <b>brg</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of BRG   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>brg</b><br><b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## authenticated-brg-only *boolean*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Allow BRGs that have been pre-authenticated  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>brg</b><br><b>authenticated-brg-only</b> <i>boolean</i> |
| Tree       | <b>authenticated-brg-only</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### default-brg-profile *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Default BRG profile for new BRGs

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [brg default-brg-profile](#) *reference*

Tree [default-brg-profile](#)

Reference **configure** [subscriber-mgmt vrgw brg-profile](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### cflowd-parameters

Synopsis Enter the **cflowd-parameters** context

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [cflowd-parameters](#)

Tree [cflowd-parameters](#)

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### sampling [[sampling-type](#)] *keyword*

Synopsis Enter the **sampling** list instance

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [cflowd-parameters](#) [sampling](#) *keyword*

Tree [sampling](#)

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [[sampling-type](#)] *keyword*

Synopsis Traffic sampling type

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>cflowd-parameters sampling</b> <i>keyword</i> |
| Tree        | <b>sampling</b>   |
| Description | This command configures the type of traffic to be sampled on the associated IP interface.   |
| Options     | unicast, multicast, both  |
| Notes       | This element is part of a list key.   |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **direction** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Direction of traffic for cflowd sampling  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>cflowd-parameters sampling</b> <i>keyword</i> <b>direction</b> <i>keyword</i> |
| Tree        | <b>direction</b>  |
| Description | This command configures the direction in which sampling occurs on the associated IP interfaces.   |
| Options     | ingress-only, egress-only, both   |
| Default     | ingress-only  |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sample-profile** (*keyword* | *number*)

|             |  |
|-------------|--|
| Synopsis    | Sample profile ID  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>cflowd-parameters sampling</b> <i>keyword</i> <b>sample-profile</b> ( <i>keyword</i>   <i>number</i> ) |
| Tree        | <b>sample-profile</b>  |
| Description | This command defines the sampling rate profile associated with this interface.   |
| Max. Range  | 0 to 4294967295  |
| Options     | 1  |
| Introduced  | 19.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**type keyword**

|             |   |
|-------------|---|
| Synopsis    | Type of cflowd analysis   |
| Context     | <b>configure service vprn string subscriber-interface string group-interface string cflowd-parameters sampling keyword type keyword</b> |
| Tree        | <b>type</b>   |
| Description | This command configures the cflowd sampling type on the associated IP interface.  |
| Options     | acl, interface  |
| Notes       | This element is mandatory.  |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**data-trigger**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>data-trigger</b> context  |
| Context    | <b>configure service vprn string subscriber-interface string group-interface string data-trigger</b> |
| Tree       | <b>data-trigger</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state keyword**

|            |  |
|------------|--|
| Synopsis   | Administrative state of data-triggered host creation   |
| Context    | <b>configure service vprn string subscriber-interface string group-interface string data-trigger admin-state keyword</b> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**description string**

|          |  |
|----------|--|
| Synopsis | Text description   |
| Context  | <b>configure service vprn string subscriber-interface string group-interface string description string</b> |

---

|               |   |
|---------------|---|
| Tree          | <a href="#">description</a>                             |
| String Length | 1 to 255  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### dynamic-routes-track-srrp

|            |  |
|------------|--|
| Synopsis   | Enable the <b>dynamic-routes-track-srrp</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">dynamic-routes-track-srrp</a> |
| Tree       | <a href="#">dynamic-routes-track-srrp</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### hold-time *number*

|            |  |
|------------|--|
| Synopsis   | Time before route state updated after SRRP transition  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">dynamic-routes-track-srrp</a> <a href="#">hold-time</a> <i>number</i> |
| Tree       | <a href="#">hold-time</a>  |
| Range      | 1 to 50  |
| Units      | deciseconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### gtp-parameters

|            |   |
|------------|---|
| Synopsis   | Enter the <b>gtp-parameters</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">gtp-parameters</a> |
| Tree       | <a href="#">gtp-parameters</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of GTP access  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">gtp-parameters</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**fpe** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | PE that provisions the GTP user interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">gtp-parameters</a> <b>fpe</b> <i>reference</i> |
| Tree       | <a href="#">fpe</a>   |
| Reference  | <b>configure</b> <a href="#">fwd-path-ext</a> <b>fpe</b> <i>number</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**gx-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Diameter application policy   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">gx-policy</a> <i>reference</i> |
| Tree       | <a href="#">gx-policy</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-gx-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ingress

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ingress</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ingress</a> |
| Tree       | <a href="#">ingress</a>  |
| Introduced | 19.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## policy-accounting *reference*

|            |   |
|------------|---|
| Synopsis   | Ingress policy accounting template name   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ingress</a> <a href="#">policy-accounting</a> <i>reference</i> |
| Tree       | <a href="#">policy-accounting</a>   |
| Reference  | <b>configure</b> <a href="#">routing-options</a> <a href="#">policy-accounting</a> <a href="#">policy-acct-template</a> <i>string</i>   |
| Introduced | 19.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s  |

## ingress-stats *boolean*

|            |   |
|------------|---|
| Synopsis   | Collect ingress interface statistics  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ingress-stats</a> <i>boolean</i> |
| Tree       | <a href="#">ingress-stats</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ip-mtu *number*

|            |   |
|------------|---|
| Synopsis   | Interface IP MTU  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ip-mtu</a> <i>number</i> |
| Tree       | <a href="#">ip-mtu</a>  |
| Range      | 512 to 9786   |
| Units      | bytes   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipoe-linking

Synopsis Enter the **ipoe-linking** context

Context **configure service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **ipoe-linking**

Tree **ipoe-linking**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis Administrative state of IPoE host linking

Context **configure service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **ipoe-linking admin-state** *keyword*

Tree **admin-state**

Options enable, disable

Default disable

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## gratuitous-router-advertisement *boolean*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Send unsolicited router advertisement after DHCP setup

Context **configure service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **ipoe-linking gratuitous-router-advertisement** *boolean*

Tree **gratuitous-router-advertisement**

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**shared-circuit-id** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enable circuit ID in DHCPv4 Option82 to validate DHCPv6  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipoe-linking</b> <b>shared-circuit-id</b> <i>boolean</i> |
| Tree       | <a href="#">shared-circuit-id</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipoe-session**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipoe-session</b> context  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipoe-session</b> |
| Tree       | <a href="#">ipoe-session</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of IPoE session management  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipoe-session</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**description** *string*

|          |   |
|----------|---|
| Synopsis | Text description  |
| Context  | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipoe-session</b> <b>description</b> <i>string</i> |

---

|               |   |
|---------------|---|
| Tree          | <a href="#">description</a>                             |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **force-auth**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>force-auth</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipoe-session</a> <a href="#">force-auth</a> |
| Tree       | <a href="#">force-auth</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **cid-change** *boolean*

|            |   |
|------------|---|
| Synopsis   | Ignore min-auth-interval when circuit ID changed  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipoe-session</a> <a href="#">force-auth</a> <a href="#">cid-change</a> <i>boolean</i> |
| Tree       | <a href="#">cid-change</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **rid-change** *boolean*

|            |   |
|------------|---|
| Synopsis   | Ignore min-auth-interval when remote ID changed   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipoe-session</a> <a href="#">force-auth</a> <a href="#">rid-change</a> <i>boolean</i> |
| Tree       | <a href="#">rid-change</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ipoe-session-policy *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | IPoE Session policy to be used for new sessions  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipoe-session ipoe-session-policy</a> <i>reference</i> |
| Tree       | <a href="#">ipoe-session-policy</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt ipoe-session-policy</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## min-auth-interval (*keyword* | *number*)

|            |  |
|------------|--|
| Synopsis   | Minimum time between two authentication attempts   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipoe-session min-auth-interval</a> ( <i>keyword</i>   <i>number</i> ) |
| Tree       | <a href="#">min-auth-interval</a>  |
| Range      | 1 to 32000000  |
| Units      | seconds  |
| Options    | infinite, always-reauthenticate  |
| Default    | infinite   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## radius-session-timeout *keyword*

|            |   |
|------------|---|
| Synopsis   | Session timeout attribute to be interpreted   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipoe-session radius-session-timeout</a> <i>keyword</i> |
| Tree       | <a href="#">radius-session-timeout</a>  |
| Options    | absolute, ignore, backwards-compatible  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**sap-session-limit** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of sessions per SAP   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipoe-session</b> <b>sap-session-limit</b> <i>number</i> |
| Tree       | <b>sap-session-limit</b>   |
| Range      | 1 to 131071  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**session-limit** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of sessions on this group interface   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipoe-session</b> <b>session-limit</b> <i>number</i> |
| Tree       | <b>session-limit</b>   |
| Range      | 1 to 500000  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**stateless-redundancy** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Remove IPoE sessions when the system becomes stand-by in a stateless multi-chassis redundancy setup  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipoe-session</b> <b>stateless-redundancy</b> <i>boolean</i> |
| Tree       | <b>stateless-redundancy</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## user-db *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Local user database for IPoE session authentication  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipoe-session user-db</a> <i>reference</i> |
| Tree       | <a href="#">user-db</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ipv4

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv4</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4</a> |
| Tree       | <a href="#">ipv4</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## arp-host

|            |  |
|------------|--|
| Synopsis   | Enter the <b>arp-host</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 arp-host</a> |
| Tree       | <a href="#">arp-host</a>   |
| Introduced | 16.0.R6  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of ARP hosts   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 arp-host admin-state</a> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>   |
| Options  | enable, disable   |

|            |   |
|------------|---|
| Introduced | 16.0.R6   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **host-limit** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of ARP hosts  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">arp-host</a> <b>host-limit</b> <i>number</i> |
| Tree       | <a href="#">host-limit</a>   |
| Range      | 1 to 524287  |
| Introduced | 16.0.R6  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **min-auth-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum authentication interval   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">arp-host</a> <b>min-auth-interval</b> <i>number</i> |
| Tree       | <a href="#">min-auth-interval</a>   |
| Range      | 1 to 6000   |
| Units      | minutes   |
| Default    | 15  |
| Introduced | 16.0.R6   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sap-host-limit** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of ARP hosts per SAP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">arp-host</a> <b>sap-host-limit</b> <i>number</i> |
| Tree       | <a href="#">sap-host-limit</a>   |
| Range      | 1 to 131071  |
| Default    | 1  |
| Introduced | 16.0.R6  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**bfd**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>bfd</b> context  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 bfd</b>              |
| Tree        | <b>bfd</b>  |
| Description | Commands in this context configure the attributes of bidirectional forwarding detection (BFD) sessions that control the state of ESM dynamic BGP peers. |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of BFD sessions  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 bfd</b><br><b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**echo-receive** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum echo interval over this interface   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 bfd</b><br><b>echo-receive</b> <i>number</i> |
| Tree       | <b>echo-receive</b>   |
| Range      | 100 to 100000   |
| Units      | milliseconds  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**multiplier** *number*

|          |   |
|----------|---|
| Synopsis | Number of consecutive BFD messages missed from the peer |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 bfd multiplier</b> <i>number</i>   |
| Tree        | <b>multiplier</b>   |
| Description | This command configures the number of missed messages before the BFD session state is changed to down and the upper-level protocol is notified of the fault. A multiplier of less than 3 should not be used in production environments. |
| Range       | 1 to 20   |
| Default     | 3   |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **receive number**

|             |  |
|-------------|--|
| Synopsis    | BFD receive interval over this interface   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 bfd receive number</b>  |
| Tree        | <b>receive</b>   |
| Description | This command specifies the receive interval for the BFD session.<br>On the 7750 SR, this command can only be configured to a value less than 100 when the <b>type</b> command is configured to <b>cpm-np</b> . |
| Range       | 10 to 100000   |
| Units       | milliseconds   |
| Default     | 100  |
| Introduced  | 21.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **transmit-interval number**

|             |   |
|-------------|---|
| Synopsis    | BFD transmit interval over this interface   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 bfd transmit-interval number</b>                           |
| Tree        | <b>transmit-interval</b>  |
| Description | This command configures the transmit intervals.<br>On the 7750 SR, this command can only be configured to a value less than 100 when the <b>type</b> command is configured to <b>cpm-np</b> . |
| Range       | 10 to 100000  |
| Units       | milliseconds  |

|            |   |
|------------|---|
| Default    | 100   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **type** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Local termination point for the BFD session   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4</b> <b>bfd</b> <b>type</b> <i>keyword</i>  |
| Tree        | <b>type</b>   |
| Description | This command sets the local termination point for the BFD session to allow for fast timers down to 10 ms granularity.<br>The options to specify where the BFD session runs are: <ul style="list-style-type: none"> <li>• <b>auto</b> (default) – the system chooses and uses the line card CPU only for single-hop BFD sessions with timer intervals equal to or greater than 100ms. All others are placed on the <b>cpm-np</b>.</li> <li>• <b>cpm-np</b> – BFD session runs on the FP complex associated with the CPM. This is either the FP on the CPM or the one elected on smaller systems.</li> <li>• <b>fp</b> – BFD session runs on the line card CPU. This option can only be used for single-hop BFD sessions with timers equal to or greater than 100ms.</li> </ul> |
| Options     | cpm-np, auto, fp  |
| Default     | auto  |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **dhcp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dhcp</b> context  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4</b> <b>dhcp</b> |
| Tree       | <b>dhcp</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|          |                              |
|----------|------------------------------|
| Synopsis | Administrative state of DHCP |
|----------|------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string ipv4 dhcp admin-state keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## client-applications

|            |  |
|------------|--|
| Synopsis   | Enter the <b>client-applications</b> context   |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string ipv4 dhcp client-applications</i> |
| Tree       | <a href="#">client-applications</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## dhcp boolean

|            |   |
|------------|---|
| Synopsis   | Enable IPoE clients to use DHCP relay or proxy server   |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string ipv4 dhcp client-applications dhcp boolean</i> |
| Tree       | <a href="#">dhcp</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ppp boolean

|            |  |
|------------|--|
| Synopsis   | Enable PPPoE clients to use DHCP relay or proxy server   |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string ipv4 dhcp client-applications ppp boolean</i> |
| Tree       | <a href="#">ppp</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**description string**

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure service vpn string subscriber-interface string group-interface string ipv4 dhcp description string</b> |
| Tree          | <b>description</b>  |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**filter reference**

|            |   |
|------------|---|
| Synopsis   | DHCP filter ID for the group interface  |
| Context    | <b>configure service vpn string subscriber-interface string group-interface string ipv4 dhcp filter reference</b> |
| Tree       | <b>filter</b>   |
| Reference  | <b>configure filter dhcp-filter number</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**gi-address string**

|             |   |
|-------------|---|
| Synopsis    | GI address for the DHCP relay   |
| Context     | <b>configure service vpn string subscriber-interface string group-interface string ipv4 dhcp gi-address string</b>  |
| Tree        | <b>gi-address</b>   |
| Description | <p>This command configures the GI address to distinguish between the different subscriber interfaces (and potentially group interfaces) defined when the router functions as a DHCP relay.</p> <p>By default, the GI address used in the relayed DHCP packet is the primary IP address of a normal IES interface. Specifying the GI address allows the user to choose a secondary address. For group interfaces, a GI address must be specified under the group interface DHCP context or subscriber interface DHCP context for DHCP to function.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## lease-populate

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lease-populate</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp lease-populate</b> |
| Tree       | <b>lease-populate</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## I2-header

|            |  |
|------------|--|
| Synopsis   | Enable the <b>I2-header</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp lease-populate I2-header</b> |
| Tree       | <b>I2-header</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## mac *string*

|            |  |
|------------|--|
| Synopsis   | IEEE address used in anti-spoofing entries for the SAP   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp lease-populate I2-header mac</b> <i>string</i> |
| Tree       | <b>mac</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## max-leases *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of DHCPv4 leases   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp lease-populate max-leases</b> <i>number</i> |
| Tree       | <b>max-leases</b>   |
| Range      | 1 to 511999   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **match-circuit-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable Option 82 circuit ID on relayed DHCP packets  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">match-circuit-id</a> <i>boolean</i> |
| Tree       | <a href="#">match-circuit-id</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **offer-selection**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>offer-selection</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">offer-selection</a> |
| Tree       | <a href="#">offer-selection</a>  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **client-mac**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>client-mac</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">offer-selection</a> <a href="#">client-mac</a> |
| Tree       | <a href="#">client-mac</a>  |
| Notes      | The following elements are part of a choice: <b>client-mac</b> or <b>server</b> .   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **discover-delay** *number*

|             |  |
|-------------|--|
| Synopsis    | Delay before sending DHCP Discover messages  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">offer-selection</a> <a href="#">client-mac</a> <a href="#">discover-delay</a> <i>number</i> |
| Tree        | <a href="#">discover-delay</a>   |
| Description | This command configures the time to delay sending DHCP Discover messages from the specified MAC addresses.   |

|            |   |
|------------|---|
| Range      | 1 to 100  |
| Units      | deciseconds   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **mac-address** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Designated client MAC addresses for Offer selection  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp offer-selection</a> <a href="#">client-mac</a> <a href="#">mac-address</a> <i>keyword</i> |
| Tree        | <a href="#">mac-address</a>  |
| Description | This command specifies the client MAC addresses for which the Discover delay applies.  |
| Options     | odd, even  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **discover-delay** *number*

|             |   |
|-------------|---|
| Synopsis    | Delay before sending DHCP Discover messages   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp offer-selection</a> <a href="#">discover-delay</a> <i>number</i> |
| Tree        | <a href="#">discover-delay</a>  |
| Description | This command configures the time to delay sending DHCP Discover messages. The delay is applied to all DHCP Discover messages for which no per DHCP server or per client MAC delay is configured.  |
| Range       | 1 to 100  |
| Units       | deciseconds   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **server** [[ipv4-address](#)] *string*

|          |   |
|----------|---|
| Synopsis | Enter the <b>server</b> list instance   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp offer-selection</a> <a href="#">server</a> <i>string</i> |
| Tree     | <a href="#">server</a>  |

|                |   |
|----------------|---|
| Max. Instances | 8   |
| Notes          | The following elements are part of a choice: <b>client-mac</b> or <b>server</b> . |
| Introduced     | 20.10.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                           |

### [**ipv4-address**] *string*

|            |  |
|------------|--|
| Synopsis   | IP address of the DHCP server  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp offer-selection server</b> <i>string</i> |
| Tree       | <a href="#">server</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **discover-delay** *number*

|             |  |
|-------------|--|
| Synopsis    | Delay before sending DHCP Discover messages  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp offer-selection server</b> <i>string</i> <b>discover-delay</b> <i>number</i> |
| Tree        | <a href="#">discover-delay</a>   |
| Description | This command configures the time to delay DHCP Discover messages sent to the server.   |
| Range       | 1 to 100   |
| Units       | deciseconds  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **option-82**

|          |   |
|----------|---|
| Synopsis | Enter the <b>option-82</b> context  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp option-82</b> |
| Tree     | <a href="#">option-82</a>   |

|             |   |
|-------------|---|
| Description | Commands in this context configure the processing required when the router receives a DHCP request that already has an Option 82 field in the packet. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **action** *keyword*

|            |  |
|------------|--|
| Synopsis   | Action to take with received DHCP Option 82  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4</b> <b>dhcp</b> <b>option-82</b> <b>action</b> <i>keyword</i> |
| Tree       | <a href="#">action</a>   |
| Options    | replace, drop, keep  |
| Default    | keep   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **circuit-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>circuit-id</b> context   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4</b> <b>dhcp</b> <b>option-82</b> <b>circuit-id</b> |
| Tree       | <a href="#">circuit-id</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ascii-tuple**

|            |  |
|------------|--|
| Synopsis   | Use the ASCII-encoded tuple for the circuit ID   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4</b> <b>dhcp</b> <b>option-82</b> <b>circuit-id</b> <b>ascii-tuple</b> |
| Tree       | <a href="#">ascii-tuple</a>  |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>ifindex</b> , <b>none</b> , <b>sap-id</b> , or <b>vlan-ascii-tuple</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ifindex

|            |   |
|------------|---|
| Synopsis   | Use the interface index for the circuit ID  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 circuit-id</a> <a href="#">ifindex</a> |
| Tree       | <a href="#">ifindex</a>   |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>ifindex</b> , <b>none</b> , <b>sap-id</b> , or <b>vlan-ascii-tuple</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## none

|            |  |
|------------|--|
| Synopsis   | Do not include the circuit ID  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 circuit-id</a> <a href="#">none</a> |
| Tree       | <a href="#">none</a>   |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>ifindex</b> , <b>none</b> , <b>sap-id</b> , or <b>vlan-ascii-tuple</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## sap-id

|            |  |
|------------|--|
| Synopsis   | Use the SAP ID   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 circuit-id</a> <a href="#">sap-id</a> |
| Tree       | <a href="#">sap-id</a>   |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>ifindex</b> , <b>none</b> , <b>sap-id</b> , or <b>vlan-ascii-tuple</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## vlan-ascii-tuple

|          |  |
|----------|--|
| Synopsis | Include the VLAN ID and dot1p bits in the ASCII tuple  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 circuit-id</a> <a href="#">vlan-ascii-tuple</a> |

|             |   |
|-------------|---|
| Tree        | <a href="#">vlan-ascii-tuple</a>  |
| Description | When configured, the router includes the VLAN ID and dot1p bits with the ASCII-tuple information. This only occurs on dot1q and QinQ-encapsulated ports. When the Option 82 bits are stripped, dot1p bits are copied to the Ethernet header of the outgoing packet.<br>When unconfigured, the router leaves the circuit ID sub-option of the DHCP packet empty. |
| Notes       | The following elements are part of a choice: <b>ascii-tuple</b> , <b>ifindex</b> , <b>none</b> , <b>sap-id</b> , or <b>vlan-ascii-tuple</b> .   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## remote-id

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>remote-id</b> context  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp option-82 remote-id</b> |
| Tree        | <a href="#">remote-id</a>   |
| Description | Commands in this context configure the remote IP sub-option of the DHCP packet with the identity of the remote host end (typically the DHCP client).            |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ascii-string *string*

|               |  |
|---------------|--|
| Synopsis      | User-defined ASCII string for the remote ID  |
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp option-82 remote-id ascii-string</b> <i>string</i> |
| Tree          | <a href="#">ascii-string</a>   |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>ascii-string</b> , <b>mac</b> , or <b>none</b> .   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## mac

|          |                                       |
|----------|---------------------------------------|
| Synopsis | Use the MAC address for the remote ID |
|----------|---------------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp option-82 remote-id mac</b> |
| Tree       | <b>mac</b>  |
| Notes      | The following elements are part of a choice: <b>ascii-string</b> , <b>mac</b> , or <b>none</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### none

|            |  |
|------------|--|
| Synopsis   | Do not include the remote ID   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp option-82 remote-id none</b> |
| Tree       | <b>none</b>  |
| Notes      | The following elements are part of a choice: <b>ascii-string</b> , <b>mac</b> , or <b>none</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### vendor-specific-option

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>vendor-specific-option</b> context  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp option-82 vendor-specific-option</b> |
| Tree        | <b>vendor-specific-option</b>  |
| Description | Commands in this context configure the Nokia Vendor-Specific Option (VSO) of the DHCP packet.  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### client-mac-address *boolean*

|            |  |
|------------|--|
| Synopsis   | Send the MAC address in the VSO  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp option-82 vendor-specific-option client-mac-address</b> <i>boolean</i> |
| Tree       | <b>client-mac-address</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pool-name** *boolean*

Synopsis Send the pool name in the VSO

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv4 dhcp option-82 vendor-specific-option pool-name](#) *boolean*

Tree [pool-name](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sap-id** *boolean*

Synopsis Send SAP ID in the sub-option of the DHCP relay packet

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv4 dhcp option-82 vendor-specific-option sap-id](#) *boolean*

Tree [sap-id](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **service-id** *boolean*

Synopsis Send the service ID in the Vendor Specific Option

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv4 dhcp option-82 vendor-specific-option service-id](#) *boolean*

Tree [service-id](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **string** *string*

Synopsis User-defined ASCII string for the VSO

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv4 dhcp option-82 vendor-specific-option string](#) *string*

|               |   |
|---------------|---|
| Tree          | <a href="#">string</a>                                  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **system-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send the system ID in the VSO  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 vendor-specific-option</a> <a href="#">system-id</a> <i>boolean</i> |
| Tree       | <a href="#">system-id</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **proxy-server**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>proxy-server</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server</a> |
| Tree       | <a href="#">proxy-server</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the DHCP proxy server  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**emulated-server** *string*

|            |   |
|------------|---|
| Synopsis   | IP address used as DHCP server address in SAP context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server emulated-server</a> <i>string</i> |
| Tree       | <a href="#">emulated-server</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**lease-time**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lease-time</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server lease-time</a> |
| Tree       | <a href="#">lease-time</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**radius-override** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use lease time information provided by RADIUS server  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server lease-time radius-override</a> <i>boolean</i> |
| Tree       | <a href="#">radius-override</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**value** *number*

|            |  |
|------------|--|
| Synopsis   | DHCP lease time  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server lease-time value</a> <i>number</i> |
| Tree       | <a href="#">value</a>  |
| Range      | 300 to 315446399   |
| Units      | seconds  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **python-policy** *reference*

Synopsis Python policy name

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv4 dhcp python-policy](#) *reference*

Tree [python-policy](#)

Description This command associates a Python policy name with the interface.

Reference **configure** [python](#) [python-policy](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **relay-proxy**

Synopsis Enable the **relay-proxy** context

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv4 dhcp relay-proxy](#)

Tree [relay-proxy](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **release-update-src-ip** *boolean*

Synopsis Update the source IP address of a DHCP RELEASE message

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv4 dhcp relay-proxy](#) [release-update-src-ip](#) *boolean*

Tree [release-update-src-ip](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **siaddr-override** *string*

Synopsis DHCP server IP address for address hiding function

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp relay-proxy siaddr-override</b> <i>string</i> |
| Tree       | <b>siaddr-override</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **release-include-gi-address** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include gateway IP address in DHCP Release messages   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp release-include-gi-address</b> <i>boolean</i> |
| Tree       | <b>release-include-gi-address</b>   |
| Default    | false   |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **server** *string*

|                |  |
|----------------|--|
| Synopsis       | IP addresses for DHCP server requests  |
| Context        | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp server</b> <i>string</i>   |
| Tree           | <b>server</b>  |
| Description    | This command configures a list of servers that this interface forwards requests to.<br>The operator can enter the list of servers as either IP addresses or fully qualified domain names. The operator must specify at least one server specified for DHCP relay to work. If there are multiple servers, the system forwards the request to all the servers in the list. |
| Max. Instances | 8  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **src-ip-addr** *keyword*

|          |  |
|----------|--|
| Synopsis | Type of source address to use for DHCP relay   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 dhcp src-ip-addr</b> <i>keyword</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">src-ip-addr</a>                             |
| Options    | auto, gi-address  |
| Default    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### trusted *boolean*

|             |   |
|-------------|---|
| Synopsis    | Relay untrusted packets   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">trusted</a> <i>boolean</i>   |
| Tree        | <a href="#">trusted</a>   |
| Description | <p>When configured to <b>true</b>, the router enables the trusted mode on the interface. When enabled, the relay agent changes the existing GI address (of the request) to the ingress interface, and forwards the request.</p> <p>A DHCP request that contains a GI address of 0.0.0.0 and an Option 82 field in the packet is discarded unless it arrives on a trusted circuit.</p> <p>This behavior only applies if the Relay Agent Information Option action is to keep the existing information. When the Option 82 field is replaced by the relay agent, the original Option 82 information is lost, and there is no reason to enable the trusted option.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### user-db *reference*

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Local user database for authentication  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">user-db</a> <i>reference</i> |
| Tree       | <a href="#">user-db</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**icmp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>icmp</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp</b> |
| Tree       | <b>icmp</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**mask-reply** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow responses to ICMP mask requests on the interface  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp mask-reply</b> <i>boolean</i> |
| Tree       | <b>mask-reply</b>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**param-problem**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>param-problem</b> context  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp param-problem</b> |
| Tree        | <b>param-problem</b>  |
| Description | Commands in this context specify the settings for ICMP Parameter Problem messages generated by the interface.   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of sent Parameter Problem messages  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp param-problem admin-state</b> <i>keyword</i> |
| Tree     | <b>admin-state</b>   |
| Options  | enable, disable  |

|            |   |
|------------|---|
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **number** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of Parameter Problem messages to send  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4</b> <b>icmp</b> <b>param-problem</b> <b>number</b> <i>number</i> |
| Tree       | <b>number</b>   |
| Range      | 10 to 1000  |
| Default    | 100   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **seconds** *number*

|            |  |
|------------|--|
| Synopsis   | Time used to limit number of Parameter Problem messages  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4</b> <b>icmp</b> <b>param-problem</b> <b>seconds</b> <i>number</i> |
| Tree       | <b>seconds</b>   |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **redirects**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>redirects</b> context  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4</b> <b>icmp</b> <b>redirects</b>   |
| Tree        | <b>redirects</b>  |
| Description | <p>Commands in this context configure the settings for ICMP redirect messages generated by the interface.</p> <p>The system sends ICMP redirect messages to alert the sending node that a more optimal route is available on another router on the same subnetwork.</p> |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of sending ICMP redirect messages   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">redirects</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **number** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of ICMP redirect messages to send   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">redirects</a> <b>number</b> <i>number</i> |
| Tree       | <a href="#">number</a>   |
| Range      | 10 to 1000   |
| Default    | 100  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **seconds** *number*

|            |   |
|------------|---|
| Synopsis   | Time used to limit the number of ICMP redirect messages   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">icmp</a> <a href="#">redirects</a> <b>seconds</b> <i>number</i> |
| Tree       | <a href="#">seconds</a>   |
| Range      | 1 to 60   |
| Units      | seconds   |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ttl-expired**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>ttl-expired</b> context   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp</b> <b>ttl-expired</b> |
| Tree        | <b>ttl-expired</b>   |
| Description | Commands in this context configure the settings for ICMP TTL expired messages generated by the interface.  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of sending TTL expired messages  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp</b> <b>ttl-expired admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**number** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of TTL expired messages to send  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp</b> <b>ttl-expired number</b> <i>number</i> |
| Tree       | <b>number</b>   |
| Range      | 10 to 2000  |
| Default    | 100   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**seconds** *number*

|          |   |
|----------|---|
| Synopsis | Time used to limit the number of TTL expired messages |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp ttl-expired</b> <i>seconds</i> <i>number</i> |
| Tree       | <b>seconds</b>   |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **use-matching-address** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Use the subscriber interface address as source address   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp ttl-expired use-matching-address</b> <i>boolean</i>  |
| Tree        | <b>use-matching-address</b>  |
| Description | <p>When configured to <b>true</b>, the system uses a matching subscriber interface address as the source address of the ICMP TTL expired message.</p> <p>For matching to occur, the source address of the offending packet must be in the same subnet of the subscriber interface address.</p> <p>When configured to <b>false</b>, the system uses the first configured address.</p> |
| Default     | false  |
| Introduced  | 22.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **unreachables**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>unreachables</b> context  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp unreachables</b> |
| Tree        | <b>unreachables</b>  |
| Description | Commands in this context specify the settings for ICMP host and network destination unreachable messages generated by the interface.                     |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of sending unreachable messages  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp unreachables</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**number** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of unreachable messages to send  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp unreachables</b> <b>number</b> <i>number</i> |
| Tree       | <b>number</b>   |
| Range      | 10 to 2000  |
| Default    | 100   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**seconds** *number*

|            |  |
|------------|--|
| Synopsis   | Time to limit the number of ICMP unreachable messages  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 icmp unreachables</b> <b>seconds</b> <i>number</i> |
| Tree       | <b>seconds</b>   |
| Range      | 1 to 60  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ignore-df-bit** *boolean*

|          |   |
|----------|---|
| Synopsis | Ignore DF bit in the IPv4 header when fragmenting |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 ignore-df-bit</b> <i>boolean</i>   |
| Tree        | <b>ignore-df-bit</b>  |
| Description | When configured to <b>true</b> , fragmentation is applied according to the applicable egress MTU instead of the DF bit for frames egressing the WLAN-GW group. The DF bit is reset for frames that are fragmented.<br><br>When configured to <b>false</b> , the router fragments a packet larger than the MTU if the DF bit is set to 0 and drops the packet if the DF bit is set to 1. |
| Default     | false   |
| Introduced  | 20.5.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## neighbor-discovery

|            |   |
|------------|---|
| Synopsis   | Enter the <b>neighbor-discovery</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 neighbor-discovery</b> |
| Tree       | <b>neighbor-discovery</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## local-proxy-arp *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable local proxy ARP on interface  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 neighbor-discovery local-proxy-arp</b> <i>boolean</i>                     |
| Tree        | <b>local-proxy-arp</b>   |
| Description | When configured to <b>true</b> , the router enables local proxy ARP on the interface.<br><br>When configured to <b>false</b> , the router does not respond to ARP requests for addresses on the same subnet. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## populate *boolean*

|          |  |
|----------|--|
| Synopsis | Allow population of static and dynamic hosts |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 neighbor-discovery populate</b> <i>boolean</i> |
| Tree       | <a href="#">populate</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **proxy-arp-policy** *reference*

|                |   |
|----------------|---|
| Synopsis       | Proxy ARP policy name   |
| Context        | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 neighbor-discovery proxy-arp-policy</b> <i>reference</i> |
| Tree           | <a href="#">proxy-arp-policy</a>  |
| Reference      | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |
| Max. Instances | 5   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **remote-proxy-arp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable remote proxy ARP on the interface  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 neighbor-discovery remote-proxy-arp</b> <i>boolean</i> |
| Tree       | <a href="#">remote-proxy-arp</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **timeout** *number*

|          |   |
|----------|---|
| Synopsis | Timeout for an ARP entry learned on the interface   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv4 neighbor-discovery timeout</b> <i>number</i> |
| Tree     | <a href="#">timeout</a>   |
| Range    | 0 to 65535  |

|            |   |
|------------|---|
| Units      | seconds   |
| Default    | 14400   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **qos-route-lookup** *keyword*

|            |  |
|------------|--|
| Synopsis   | QoS route lookup   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4</a> <b>qos-route-lookup</b> <i>keyword</i> |
| Tree       | <a href="#">qos-route-lookup</a>   |
| Options    | destination  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **urpf-check**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>urpf-check</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4</a> <b>urpf-check</b> |
| Tree       | <a href="#">urpf-check</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **mode** *keyword*

|            |  |
|------------|--|
| Synopsis   | Unicast RPF check mode   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv4</a> <b>urpf-check</b> <b>mode</b> <i>keyword</i> |
| Tree       | <a href="#">mode</a>   |
| Options    | strict, loose, strict-no-ecmp  |
| Default    | strict   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ipv6

|            |   |
|------------|---|
| Synopsis   | Enable the <b>ipv6</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> |
| Tree       | <a href="#">ipv6</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## allow-multiple-wan-addresses *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow multiple WAN addresses  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">allow-multiple-wan-addresses</a> <i>boolean</i> |
| Tree       | <a href="#">allow-multiple-wan-addresses</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## auto-reply

|            |  |
|------------|--|
| Synopsis   | Enter the <b>auto-reply</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">auto-reply</a> |
| Tree       | <a href="#">auto-reply</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## neighbor-solicitation *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable auto-reply for NS  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">auto-reply</a> <a href="#">neighbor-solicitation</a> <i>boolean</i> |
| Tree       | <a href="#">neighbor-solicitation</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**router-solicitation** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable auto-reply for RS   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">auto-reply</a> <a href="#">router-solicitation</a> <i>boolean</i> |
| Tree       | <a href="#">router-solicitation</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**bfd**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>bfd</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">bfd</a> |
| Tree        | <a href="#">bfd</a>  |
| Description | Commands in this context configure the attributes of bidirectional forwarding detection (BFD) sessions that control the state of ESM dynamic BGP peers.  |
| Introduced  | 21.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of BFD sessions  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">bfd</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**echo-receive** *number*

|          |   |
|----------|---|
| Synopsis | Minimum echo interval over this interface   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">bfd</a> <a href="#">echo-receive</a> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">echo-receive</a>                            |
| Range      | 100 to 100000   |
| Units      | milliseconds  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **multiplier number**

|             |   |
|-------------|---|
| Synopsis    | Number of consecutive BFD messages missed from the peer   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 bfd multiplier number</a>                                 |
| Tree        | <a href="#">multiplier</a>  |
| Description | This command configures the number of missed messages before the BFD session state is changed to down and the upper-level protocol is notified of the fault. A multiplier of less than 3 should not be used in production environments. |
| Range       | 1 to 20   |
| Default     | 3   |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **receive number**

|             |  |
|-------------|--|
| Synopsis    | BFD receive interval over this interface   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 bfd receive number</a>           |
| Tree        | <a href="#">receive</a>  |
| Description | This command specifies the receive interval for the BFD session.<br>On the 7750 SR, this command can only be configured to a value less than 100 when the <b>type</b> command is configured to <b>cpm-np</b> . |
| Range       | 10 to 100000   |
| Units       | milliseconds   |
| Default     | 100  |
| Introduced  | 21.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**transmit-interval** *number*

|             |  |
|-------------|--|
| Synopsis    | BFD transmit interval over this interface  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b> <b>bfd</b> <b>transmit-interval</b> <i>number</i> |
| Tree        | <b>transmit-interval</b>   |
| Description | This command configures the transmit intervals.<br>On the 7750 SR, this command can only be configured to a value less than 100 when the <b>type</b> command is configured to <b>cpm-np</b> .          |
| Range       | 10 to 100000   |
| Units       | milliseconds   |
| Default     | 100  |
| Introduced  | 21.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**type** *keyword*

|             |   |
|-------------|---|
| Synopsis    | Local termination point for the BFD session   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b> <b>bfd</b> <b>type</b> <i>keyword</i>  |
| Tree        | <b>type</b>   |
| Description | This command sets the local termination point for the BFD session to allow for fast timers down to 10 ms granularity.<br>The options to specify where the BFD session runs are: <ul style="list-style-type: none"> <li>• <b>auto</b> (default) – the system chooses and uses the line card CPU only for single-hop BFD sessions with timer intervals equal to or greater than 100ms. All others are placed on the <b>cpm-np</b>.</li> <li>• <b>cpm-np</b> – BFD session runs on the FP complex associated with the CPM. This is either the FP on the CPM or the one elected on smaller systems.</li> <li>• <b>fp</b> – BFD session runs on the line card CPU. This option can only be used for single-hop BFD sessions with timers equal to or greater than 100ms.</li> </ul> |
| Options     | cpm-np, auto, fp  |
| Default     | auto  |
| Introduced  | 21.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

## dhcp6

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dhcp6</b> context  |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string ipv6 dhcp6</i> |
| Tree       | <a href="#">dhcp6</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## filter reference

|            |  |
|------------|--|
| Synopsis   | DHCPv6 filter  |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string ipv6 dhcp6 filter reference</i> |
| Tree       | <a href="#">filter</a>   |
| Reference  | <b>configure filter dhcp6-filter</b> <i>number</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## option

|            |  |
|------------|--|
| Synopsis   | Enter the <b>option</b> context  |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string ipv6 dhcp6 option</i> |
| Tree       | <a href="#">option</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## interface-id

|            |   |
|------------|---|
| Synopsis   | Enter the <b>interface-id</b> context   |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string ipv6 dhcp6 option interface-id</i> |
| Tree       | <a href="#">interface-id</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ascii-tuple

|            |   |
|------------|---|
| Synopsis   | Use ASCII-encoded concatenated tuple  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 option interface-id</a> <a href="#">ascii-tuple</a> |
| Tree       | <a href="#">ascii-tuple</a>   |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>if-index</b> , <b>sap-id</b> , or <b>string</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## if-index

|            |  |
|------------|--|
| Synopsis   | Use interface index in the DHCPv6 relay packet   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 option interface-id</a> <a href="#">if-index</a> |
| Tree       | <a href="#">if-index</a>   |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>if-index</b> , <b>sap-id</b> , or <b>string</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## sap-id

|            |  |
|------------|--|
| Synopsis   | Use SAP ID in interface ID option in relay packet  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 option interface-id</a> <a href="#">sap-id</a> |
| Tree       | <a href="#">sap-id</a>   |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>if-index</b> , <b>sap-id</b> , or <b>string</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## string *string*

|          |  |
|----------|--|
| Synopsis | String for interface ID option in DHCPv6 relay packet  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 option interface-id</a> <a href="#">string</a> <i>string</i> |
| Tree     | <a href="#">string</a>   |

---

|               |  |
|---------------|--|
| String Length | 1 to 80  |
| Notes         | The following elements are part of a choice: <b>ascii-tuple</b> , <b>if-index</b> , <b>sap-id</b> , or <b>string</b> . |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **remote-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send remote ID option in the DHCPv6 relay packet   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 option remote-id</b> <i>boolean</i> |
| Tree       | <a href="#">remote-id</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **override-slaac** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow WAN address offered by DHCP to overwrite the WAN address acquired from SLAAC   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 override-slaac</b> <i>boolean</i> |
| Tree       | <a href="#">override-slaac</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **pd-managed-route**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>pd-managed-route</b> context  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 pd-managed-route</b> |
| Tree       | <a href="#">pd-managed-route</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**next-hop** *keyword*

|            |  |
|------------|--|
| Synopsis   | Next hop type  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 pd-managed-route next-hop</a> <i>keyword</i> |
| Tree       | <a href="#">next-hop</a>   |
| Options    | ipv4, ipv6   |
| Default    | ipv6   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**proxy-server**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>proxy-server</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 proxy-server</a> |
| Tree       | <a href="#">proxy-server</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the DHCPv6 proxy server   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 proxy-server admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**client-applications**

|          |  |
|----------|--|
| Synopsis | Enter the <b>client-applications</b> context   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 proxy-server client-applications</a> |
| Tree     | <a href="#">client-applications</a>  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **dhcp boolean**

|            |  |
|------------|--|
| Synopsis   | Enable IPoE clients to use the DHCP proxy server   |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string ipv6 dhcp6 proxy-server client-applications dhcp boolean</a> |
| Tree       | <a href="#">dhcp</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ppp boolean**

|            |   |
|------------|---|
| Synopsis   | Allow PPPoE clients to use DHCP relay functionality   |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string ipv6 dhcp6 proxy-server client-applications ppp boolean</a> |
| Tree       | <a href="#">ppp</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **preferred-lifetime (number | keyword)**

|            |   |
|------------|---|
| Synopsis   | Time for prefix to remain preferred on this interface   |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string ipv6 dhcp6 proxy-server preferred-lifetime (number   keyword)</a> |
| Tree       | <a href="#">preferred-lifetime</a>  |
| Range      | 300 to 4294967294   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 3600  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**rebind-timer** *number*

|            |  |
|------------|--|
| Synopsis   | Rebind timer (T2) for this interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 proxy-server</a> <b>rebind-timer</b> <i>number</i> |
| Tree       | <a href="#">rebind-timer</a>   |
| Range      | 0 to 1209600   |
| Units      | seconds  |
| Default    | 2880   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**renew-timer** *number*

|            |   |
|------------|---|
| Synopsis   | Renew timer (T1)  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 proxy-server</a> <b>renew-timer</b> <i>number</i> |
| Tree       | <a href="#">renew-timer</a>   |
| Range      | 0 to 604800   |
| Units      | seconds   |
| Default    | 1800  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**server-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>server-id</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 proxy-server</a> <b>server-id</b> |
| Tree       | <a href="#">server-id</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**duid-en-ascii** *string*

|          |   |
|----------|---|
| Synopsis | Vendor-assigned ID based on Enterprise Number (DUID-EN) |
|----------|---|

|               |   |
|---------------|---|
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 proxy-server server-id duid-en-ascii</b> <i>string</i> |
| Tree          | <b>duid-en-ascii</b>  |
| String Length | 1 to 58   |
| Notes         | The following elements are part of a choice: <b>duid-en-ascii</b> , <b>duid-en-hex</b> , or <b>duid-ll</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **duid-en-hex** *string*

|               |   |
|---------------|---|
| Synopsis      | DUID system ID in hexadecimal format  |
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 proxy-server server-id duid-en-hex</b> <i>string</i> |
| Tree          | <b>duid-en-hex</b>  |
| String Length | 1 to 118  |
| Notes         | The following elements are part of a choice: <b>duid-en-ascii</b> , <b>duid-en-hex</b> , or <b>duid-ll</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **duid-ll**

|            |   |
|------------|---|
| Synopsis   | Use link-layer address (DUID-LL) as DUID  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 proxy-server server-id duid-ll</b> |
| Tree       | <b>duid-ll</b>  |
| Notes      | The following elements are part of a choice: <b>duid-en-ascii</b> , <b>duid-en-hex</b> , or <b>duid-ll</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **valid-lifetime** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | Time for prefix to remain valid on this interface   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 proxy-server valid-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <b>valid-lifetime</b>   |
| Range    | 300 to 4294967294   |

|            |   |
|------------|---|
| Units      | seconds   |
| Options    | infinite  |
| Default    | 86400   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **python-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Python policy   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 python-policy reference</a> |
| Tree       | <a href="#">python-policy</a>   |
| Reference  | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **relay**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>relay</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay</a> |
| Tree       | <a href="#">relay</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of DHCPv6 Relay   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## advertise-selection

|            |  |
|------------|--|
| Synopsis   | Enter the <b>advertise-selection</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string ipv6 dhcp6 relay advertise-selection</a> |
| Tree       | <a href="#">advertise-selection</a>  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## client-mac

|            |   |
|------------|---|
| Synopsis   | Enter the <b>client-mac</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string ipv6 dhcp6 relay advertise-selection client-mac</a> |
| Tree       | <a href="#">client-mac</a>  |
| Notes      | The following elements are part of a choice: <b>client-mac</b> or <b>server</b> .   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## mac-address *keyword*

|            |   |
|------------|---|
| Synopsis   | Designated client MAC addresses for Advertise selection   |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string ipv6 dhcp6 relay advertise-selection client-mac mac-address keyword</a> |
| Tree       | <a href="#">mac-address</a>   |
| Options    | odd, even   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## preference-option

|          |   |
|----------|---|
| Synopsis | Enter the <b>preference-option</b> context  |
| Context  | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string ipv6 dhcp6 relay advertise-selection client-mac preference-option</a> |
| Tree     | <a href="#">preference-option</a>   |

|             |   |
|-------------|---|
| Description | Commands in this context configure the DHCPv6 preference option that is inserted in the DHCPv6 Advertise message. |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **value** *number*

|            |   |
|------------|---|
| Synopsis   | Preference option value for DHCPv6 Advertise messages   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b> <b>dhcp6</b> <b>relay</b> <b>advertise-selection</b> <b>client-mac</b> <b>preference-option</b> <b>value</b> <i>number</i> |
| Tree       | <b>value</b>  |
| Range      | 0 to 255  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **solicit-delay** *number*

|             |  |
|-------------|--|
| Synopsis    | Delay before sending DHCPv6 Solicit messages   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b> <b>dhcp6</b> <b>relay</b> <b>advertise-selection</b> <b>client-mac</b> <b>solicit-delay</b> <i>number</i> |
| Tree        | <b>solicit-delay</b>   |
| Description | This command configures the time to delay DHCPv6 Solicit messages sent from the designated client MAC addresses.   |
| Range       | 1 to 100   |
| Units       | deciseconds  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **preference-option**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>preference-option</b> context   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b> <b>dhcp6</b> <b>relay</b> <b>advertise-selection</b> <b>preference-option</b> |
| Tree        | <b>preference-option</b>   |
| Description | Commands in this context configure the DHCPv6 preference option that is inserted in the DHCPv6 Advertise message.  |
| Introduced  | 20.10.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **value** *number*

Synopsis Preference option value for DHCPv6 Advertise messages

Context **configure** *service vprn string subscriber-interface string group-interface string ipv6 dhcp6 relay advertise-selection preference-option value number*

Tree *value*

Range 0 to 255

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **server** [*ipv6-address*] *string*

Synopsis Enter the **server** list instance

Context **configure** *service vprn string subscriber-interface string group-interface string ipv6 dhcp6 relay advertise-selection server string*

Tree *server*

Max. Instances 8

Notes The following elements are part of a choice: **client-mac** or **server**.

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[ipv6-address]** *string*

Synopsis IP address of the DHCPv6 server

Context **configure** *service vprn string subscriber-interface string group-interface string ipv6 dhcp6 relay advertise-selection server string*

Tree *server*

Notes This element is part of a list key.

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**preference-option**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>preference-option</b> context   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection server</b> <i>string</i> <b>preference-option</b> |
| Tree        | <b>preference-option</b>   |
| Description | Commands in this context configure the DHCPv6 preference option that is inserted in the DHCPv6 Advertise message.  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**value number**

|            |  |
|------------|--|
| Synopsis   | Preference option value for DHCPv6 Advertise messages  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection server</b> <i>string</i> <b>preference-option value</b> <i>number</i> |
| Tree       | <b>value</b>   |
| Range      | 0 to 255   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**solicit-delay number**

|             |  |
|-------------|--|
| Synopsis    | Delay before sending DHCPv6 Solicit messages   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection server</b> <i>string</i> <b>solicit-delay</b> <i>number</i> |
| Tree        | <b>solicit-delay</b>   |
| Description | This command configures the time to delay DHCPv6 Solicit messages sent to the server.  |
| Range       | 1 to 100   |
| Units       | deciseconds  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**solicit-delay number**

|          |  |
|----------|--|
| Synopsis | Delay before sending DHCPv6 Solicit messages |
|----------|--|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 relay advertise-selection solicit-delay</b> <i>number</i>                             |
| Tree        | <b>solicit-delay</b>   |
| Description | This command configures the time to delay DHCPv6 Solicit messages. The delay is applied to DHCPv6 Solicit messages for which no overriding value is configured in the <b>server</b> instance or the <b>client-mac</b> context. |
| Range       | 1 to 100   |
| Units       | deciseconds  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## client-applications

|            |  |
|------------|--|
| Synopsis   | Enter the <b>client-applications</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 relay client-applications</b> |
| Tree       | <b>client-applications</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## dhcp boolean

|            |  |
|------------|--|
| Synopsis   | Enable IPoE clients to use DHCP relay or proxy server  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 relay client-applications dhcp</b> <i>boolean</i> |
| Tree       | <b>dhcp</b>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## ppp boolean

|          |   |
|----------|---|
| Synopsis | Allow the PPP application to use DHCP relay functionality   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 dhcp6 relay client-applications ppp</b> <i>boolean</i> |
| Tree     | <b>ppp</b>  |
| Default  | false   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **lease-split**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>lease-split</b> context  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">lease-split</a>   |
| Tree        | <a href="#">lease-split</a>   |
| Description | <p>Commands in this context configure DHCPv6 lease split.</p> <p>DHCPv6 lease split is active when administratively enabled and for all IA_NA and IA_PD options in the transaction, the configured lease split valid lifetime (short lease time) is less than or equal to one of the following:</p> <ul style="list-style-type: none"> <li>• the renew time T1 committed by the server (long renew time)</li> <li>• half of the preferred lifetime committed by the server when T1 committed by the server equals zero</li> </ul> |
| Introduced  | 21.2.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of DHCPv6 lease split   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">lease-split</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>  |
| Options  | enable, disable  |
| Default  | disable  |

|            |   |
|------------|---|
| Introduced | 21.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**valid-lifetime** *number*

|            |  |
|------------|--|
| Synopsis   | DHCPv6 lease split valid lifetime (short lease time)   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay lease-split valid-lifetime</a> <i>number</i> |
| Tree       | <a href="#">valid-lifetime</a>   |
| Range      | 300 to 315446399   |
| Units      | seconds  |
| Default    | 3600   |
| Introduced | 21.2.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**link-address** *string*

|            |  |
|------------|--|
| Synopsis   | Link address for the DHCPv6 relay messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay link-address</a> <i>string</i> |
| Tree       | <a href="#">link-address</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**server** *string*

|                |  |
|----------------|--|
| Synopsis       | DHCP6 server(s) to which the DHCP6 requests are forwarded  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay server</a> <i>string</i> |
| Tree           | <a href="#">server</a>   |
| Max. Instances | 8  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**source-address** *string*

|            |  |
|------------|--|
| Synopsis   | Source IPv6 address for the DHCPv6 relay messages  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 relay source-address</a> <i>string</i> |
| Tree       | <a href="#">source-address</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**snooping**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>snooping</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 snooping</a> |
| Tree       | <a href="#">snooping</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of DHCPv6 snooping   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 snooping admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

**user-db** *reference*

|            |  |
|------------|--|
| Synopsis   | Local user database used for authentication  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 user-db</a> <i>reference</i> |
| Tree       | <a href="#">user-db</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt local-user-db</a> <i>string</i>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **user-ident** *keyword*

Synopsis DHCP6 user identification for this interface

Context **configure service vprn** *string subscriber-interface string group-interface string ipv6 dhcp6 user-ident keyword*

Tree [user-ident](#)

Options mac, mac-interface-id

Default mac

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipoe-bridged-mode** *boolean*

Synopsis Enable IPv6 IPoE bridged mode

Context **configure service vprn** *string subscriber-interface string group-interface string ipv6 ipoe-bridged-mode boolean*

Tree [ipoe-bridged-mode](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **neighbor-discovery**

Synopsis Enter the **neighbor-discovery** context

Context **configure service vprn** *string subscriber-interface string group-interface string ipv6 neighbor-discovery*

Tree [neighbor-discovery](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **dad-snooping** *boolean*

Synopsis Populate table via duplicate address detection packets

Context **configure service vprn** *string subscriber-interface string group-interface string ipv6 neighbor-discovery dad-snooping boolean*

|            |   |
|------------|---|
| Tree       | <a href="#">dad-snooping</a>                            |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **neighbor-limit** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum neighbor entries learned per SLAAC host   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 neighbor-discovery neighbor-limit</a> <i>number</i> |
| Tree       | <a href="#">neighbor-limit</a>  |
| Range      | 1 to 8  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **qos-route-lookup** *keyword*

|            |   |
|------------|---|
| Synopsis   | QoS route lookup  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 qos-route-lookup</a> <i>keyword</i> |
| Tree       | <a href="#">qos-route-lookup</a>  |
| Options    | destination   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **router-advertisements**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>router-advertisements</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 router-advertisements</a> |
| Tree       | <a href="#">router-advertisements</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of router advertisements   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 router-advertisements</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**force-mcast** *keyword*

|            |   |
|------------|---|
| Synopsis   | Protocol with forced multicast  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 router-advertisements</a> <b>force-mcast</b> <i>keyword</i> |
| Tree       | <a href="#">force-mcast</a>   |
| Options    | ip, ip-mac  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**max-advertisement-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum advertisement interval  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 router-advertisements</a> <b>max-advertisement-interval</b> <i>number</i> |
| Tree       | <a href="#">max-advertisement-interval</a>  |
| Range      | 900 to 1800   |
| Units      | seconds   |
| Default    | 1800  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**min-advertisement-interval** *number*

|          |                                |
|----------|--------------------------------|
| Synopsis | Minimum advertisement interval |
|----------|--------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 router-advertisements min-advertisement-interval</b> <i>number</i> |
| Tree       | <b>min-advertisement-interval</b>   |
| Range      | 900 to 1350   |
| Units      | seconds   |
| Default    | 900   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## options

|            |  |
|------------|--|
| Synopsis   | Enter the <b>options</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 router-advertisements options</b> |
| Tree       | <b>options</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## current-hop-limit *number*

|            |  |
|------------|--|
| Synopsis   | Hop limit to be advertised   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 router-advertisements options current-hop-limit</b> <i>number</i> |
| Tree       | <b>current-hop-limit</b>   |
| Range      | 0 to 255   |
| Default    | 64   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## dns

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dns</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 router-advertisements options dns</b> |
| Tree       | <b>dns</b>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **include-rdnss** *boolean*

Synopsis Include the RDNSS server option 25

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv6 router-advertisements options dns include-rdnss](#) *boolean*

Tree [include-rdnss](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rdnss-lifetime** (*number* | *keyword*)

Synopsis Maximum time for the RDNSS address to remain valid

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv6 router-advertisements options dns rdnss-lifetime](#) (*number* | *keyword*)

Tree [rdnss-lifetime](#)

Range 900 to 3600

Units seconds

Options infinite

Default 3600

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **managed-configuration** *boolean*

Synopsis Managed address configuration flag

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [ipv6 router-advertisements options managed-configuration](#) *boolean*

Tree [managed-configuration](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mtu** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Advertised MTU value   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 router-advertisements</a> <a href="#">options mtu</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mtu</a>  |
| Range      | 1280 to 9212   |
| Units      | bytes  |
| Options    | not-included   |
| Default    | not-included   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**other-stateful-configuration** *boolean*

|            |   |
|------------|---|
| Synopsis   | Other stateful configuration flag   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 router-advertisements</a> <a href="#">options other-stateful-configuration</a> <i>boolean</i> |
| Tree       | <a href="#">other-stateful-configuration</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**reachable-time** *number*

|            |  |
|------------|--|
| Synopsis   | Reachable time for advertisements  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6 router-advertisements</a> <a href="#">options reachable-time</a> <i>number</i> |
| Tree       | <a href="#">reachable-time</a>   |
| Range      | 0 to 3600000   |
| Units      | milliseconds   |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**retransmit-timer** *number*

|            |  |
|------------|--|
| Synopsis   | Retransmit time in router advertisements from interface  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b><br><b>router-advertisements</b> <b>options</b> <b>retransmit-timer</b> <i>number</i> |
| Tree       | <a href="#">retransmit-timer</a>   |
| Range      | 0 to 1800000   |
| Units      | seconds  |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**router-lifetime** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Router lifetime  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b><br><b>router-advertisements</b> <b>options</b> <b>router-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">router-lifetime</a>  |
| Range      | 2700 to 9000   |
| Units      | seconds  |
| Options    | no-default-router  |
| Default    | 4500   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**prefix-options**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>prefix-options</b> context   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b><br><b>router-advertisements</b> <b>prefix-options</b> |
| Tree       | <a href="#">prefix-options</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**autonomous** *boolean*

|          |                              |
|----------|------------------------------|
| Synopsis | Value of the autonomous flag |
|----------|------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b><br><b>router-advertisements prefix-options autonomous</b> <i>boolean</i> |
| Tree       | <b>autonomous</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**on-link** *boolean*

|            |  |
|------------|--|
| Synopsis   | Assign the prefix to an interface on the specified link  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b><br><b>router-advertisements prefix-options on-link</b> <i>boolean</i> |
| Tree       | <b>on-link</b>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**preferred-lifetime** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Time for a prefix to remain preferred   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b><br><b>router-advertisements prefix-options preferred-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>preferred-lifetime</b>   |
| Range      | 0 to 4294967294   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 3600  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**valid-lifetime** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | Time for a prefix to remain valid   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6</b><br><b>router-advertisements prefix-options valid-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <b>valid-lifetime</b>   |

|            |   |
|------------|---|
| Range      | 0 to 4294967294   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 86400   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## router-solicit

|            |  |
|------------|--|
| Synopsis   | Enter the <b>router-solicit</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a><br><a href="#">router-solicit</a> |
| Tree       | <a href="#">router-solicit</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of router-solicit authentication   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a><br><a href="#">router-solicit</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## inactivity-timer (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | Time before an inactive host is removed  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a><br><a href="#">router-solicit</a> <a href="#">inactivity-timer</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">inactivity-timer</a>   |
| Range    | 1 to 31536000  |
| Units    | seconds  |
| Options  | infinite   |

|            |   |
|------------|---|
| Default    | 300   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **min-auth-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum time between successive authentication attempts   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-solicit</a> <b>min-auth-interval</b> <i>number</i> |
| Tree       | <a href="#">min-auth-interval</a>   |
| Range      | 1 to 360000   |
| Units      | seconds   |
| Default    | 300   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **user-db** *reference*

|            |  |
|------------|--|
| Synopsis   | Local user database used for authentication  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-solicit</a> <b>user-db</b> <i>reference</i> |
| Tree       | <a href="#">user-db</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **urpf-check**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>urpf-check</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">ipv6</a> <b>urpf-check</b> |
| Tree       | <a href="#">urpf-check</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**mode keyword**

|            |   |
|------------|---|
| Synopsis   | Unicast RPF check mode  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>ipv6 urpf-check mode</b> <i>keyword</i> |
| Tree       | <b>mode</b>   |
| Options    | strict, loose, strict-no-ecmp   |
| Default    | strict  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**local-address-assignment**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>local-address-assignment</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>local-address-assignment</b> |
| Tree       | <b>local-address-assignment</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state keyword**

|            |   |
|------------|---|
| Synopsis   | Administrative state of Local Address Assignment  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>local-address-assignment admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipv4**

|          |   |
|----------|---|
| Synopsis | Enter the <b>ipv4</b> context   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>local-address-assignment ipv4</b> |
| Tree     | <b>ipv4</b>   |

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## client-applications

Synopsis Enter the **client-applications** context  
 Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [local-address-assignment](#) [ipv4](#) [client-applications](#)  
 Tree [client-applications](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ipoe *boolean*

Synopsis Request local addresses for non-DHCP/managed IPoE hosts  
 Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [local-address-assignment](#) [ipv4](#) [client-applications](#) [ipoe](#) *boolean*  
 Tree [ipoe](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ppp *boolean*

Synopsis Request local addresses for PPP IPCP hosts  
 Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [local-address-assignment](#) [ipv4](#) [client-applications](#) [ppp](#) *boolean*  
 Tree [ppp](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## default-pool *string*

Synopsis Default pools  
 Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [local-address-assignment](#) [ipv4](#) [default-pool](#) *string*

---

|                |   |
|----------------|---|
| Tree           | <a href="#">default-pool</a>                            |
| String Length  | 1 to 32   |
| Max. Instances | 2   |
| Notes          | This element is ordered by the user.                    |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **server reference**

|            |   |
|------------|---|
| Synopsis   | Local DHCPv4 server for local pools management  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">ipv4</a> <a href="#">server</a> <a href="#">reference</a> |
| Tree       | <a href="#">server</a>  |
| Reference  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">dhcp-server</a> <a href="#">dhcpv4</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipv6**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv6</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">ipv6</a> |

| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **client-applications**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>client-applications</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">ipv6</a> <a href="#">client-applications</a> |
| Tree       | <a href="#">client-applications</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ipoe-slaac** *boolean*

|            |  |
|------------|--|
| Synopsis   | Request local addresses for IPoE SLAAC hosts   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">ipv6</a> <a href="#">client-applications</a> <a href="#">ipoe-slaac</a> <i>boolean</i> |
| Tree       | <a href="#">ipoe-slaac</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ipoe-wan** *boolean*

|            |  |
|------------|--|
| Synopsis   | Request local addresses for IPoE IA NA hosts   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">ipv6</a> <a href="#">client-applications</a> <a href="#">ipoe-wan</a> <i>boolean</i> |
| Tree       | <a href="#">ipoe-wan</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ppp-slaac** *boolean*

|            |   |
|------------|---|
| Synopsis   | Request local addresses for PPP SLAAC hosts   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">ipv6</a> <a href="#">client-applications</a> <a href="#">ppp-slaac</a> <i>boolean</i> |
| Tree       | <a href="#">ppp-slaac</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **server** *reference*

|          |  |
|----------|--|
| Synopsis | Local DHCPv6 server for local pools management   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">ipv6</a> <a href="#">server</a> <i>reference</i> |
| Tree     | <a href="#">server</a>   |

|            |  |
|------------|--|
| Reference  | <b>configure service vpn</b> <i>string dhcp-server dhcpv6 string</i> |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR              |

### **mac** *string*

|            |  |
|------------|--|
| Synopsis   | MAC address for the interface  |
| Context    | <b>configure service vpn</b> <i>string subscriber-interface string group-interface string mac string</i> |
| Tree       | <a href="#">mac</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **nasreq-auth-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Diameter NASREQ application policy to use for authentication   |
| Context    | <b>configure service vpn</b> <i>string subscriber-interface string group-interface string nasreq-auth-policy reference</i> |
| Tree       | <a href="#">nasreq-auth-policy</a>   |
| Reference  | <b>configure subscriber-mgmt diameter-nasreq-policy</b> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **oper-up-while-empty** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable this group interface without any active SAPs   |
| Context    | <b>configure service vpn</b> <i>string subscriber-interface string group-interface string oper-up-while-empty boolean</i> |
| Tree       | <a href="#">oper-up-while-empty</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **pppoe**

|          |                                |
|----------|--------------------------------|
| Synopsis | Enter the <b>pppoe</b> context |
|----------|--------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>pppoe</b> |
| Tree       | <b>pppoe</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of PPPoE  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>pppoe</b><br><b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**anti-spoof** *keyword*

|            |   |
|------------|---|
| Synopsis   | PPPoE anti-spoof filtering  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>pppoe</b><br><b>anti-spoof</b> <i>keyword</i> |
| Tree       | <b>anti-spoof</b>   |
| Options    | mac-sid, mac-sid-ip   |
| Default    | mac-sid   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>pppoe</b><br><b>description</b> <i>string</i> |
| Tree          | <b>description</b>  |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## dhcp-client

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dhcp-client</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">dhcp-client</a> |
| Tree       | <a href="#">dhcp-client</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## client-id *keyword*

|            |   |
|------------|---|
| Synopsis   | Type of information that DHCP option 61 contains  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">dhcp-client</a> <a href="#">client-id</a> <i>keyword</i> |
| Tree       | <a href="#">client-id</a>   |
| Options    | mac-pppoe-session-id  |
| Introduced | 16.0.R7   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## policy *reference*

|            |  |
|------------|--|
| Synopsis   | PPPoE policy   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">policy</a> <i>reference</i> |
| Tree       | <a href="#">policy</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## python-policy *reference*

|           |   |
|-----------|---|
| Synopsis  | Python policy used to modify PPPoE packets  |
| Context   | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">python-policy</a> <i>reference</i> |
| Tree      | <a href="#">python-policy</a>   |
| Reference | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **sap-session-limit** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum PPPoE sessions per SAP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">sap-session-limit</a> <i>number</i> |
| Tree       | <a href="#">sap-session-limit</a>  |
| Range      | 1 to 131071  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **session-limit** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum PPPoE sessions   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">session-limit</a> <i>number</i> |
| Tree       | <a href="#">session-limit</a>  |
| Range      | 1 to 333823  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **user-db** *reference*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Local user database for authentication  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">user-db</a> <i>reference</i> |
| Tree       | <a href="#">user-db</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i>  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-auth-policy** *reference*

Synopsis RADIUS authentication policy

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [radius-auth-policy](#) *reference*

Tree [radius-auth-policy](#)

Reference **configure** [subscriber-mgmt radius-authentication-policy](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **redundant-interface** *reference*

Synopsis Redundant interface

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [redundant-interface](#) *reference*

Tree [redundant-interface](#)

Reference **configure** [service vprn](#) *string* [redundant-interface](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sap** [[sap-id](#)] *string*

Synopsis Enter the **sap** list instance

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string*

Tree [sap](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[sap-id]** *string*

Synopsis SAP ID

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string*

Tree [sap](#)

String Length 1 to 45

|            |   |
|------------|---|
| Notes      | This element is part of a list key.                     |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **accounting-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Accounting policy  |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string sap string accounting-policy reference</a> |
| Tree       | <a href="#">accounting-policy</a>  |
| Reference  | <b>configure</b> <a href="#">log accounting-policy number</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the SAP  |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string sap string admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **anti-spoof** *keyword*

|            |   |
|------------|---|
| Synopsis   | Type of anti-spoof filtering  |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string sap string anti-spoof keyword</a> |
| Tree       | <a href="#">anti-spoof</a>  |
| Options    | source-ip-addr, source-ip-and-mac-addr, next-hop-ip-and-mac-addr  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**app-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Application profile name  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">app-profile</a> <i>reference</i> |
| Tree       | <a href="#">app-profile</a>   |
| Reference  | <b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy app-profile</a> <i>string</i>   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**calling-station-id** *string*

|               |   |
|---------------|---|
| Synopsis      | Calling station ID  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">calling-station-id</a> <i>string</i> |
| Tree          | <a href="#">calling-station-id</a>  |
| String Length | 1 to 64   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**collect-stats** *boolean*

|            |   |
|------------|---|
| Synopsis   | Collect accounting statistics   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">collect-stats</a> <i>boolean</i> |
| Tree       | <a href="#">collect-stats</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**cpu-protection**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cpu-protection</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">cpu-protection</a> |
| Tree       | <a href="#">cpu-protection</a>  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## eth-cfm-monitoring

Synopsis Enable the **eth-cfm-monitoring** context

Context **configure service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **cpu-protection eth-cfm-monitoring**

Tree [eth-cfm-monitoring](#)

Notes The following elements are part of a choice: **eth-cfm-monitoring**, **ip-src-monitoring**, or **mac-monitoring**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## aggregate

Synopsis Apply rate limit to the sum of the per peer packet rates

Context **configure service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **cpu-protection eth-cfm-monitoring aggregate**

Tree [aggregate](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## car

Synopsis Ignore Ethernet CFM packets when enforcing overall rate

Context **configure service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **cpu-protection eth-cfm-monitoring car**

Tree [car](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## ip-src-monitoring

Synopsis Enable IP source monitoring for CPU protection

Context **configure service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **cpu-protection ip-src-monitoring**

Tree [ip-src-monitoring](#)

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> , <b>ip-src-monitoring</b> , or <b>mac-monitoring</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s  |

## mac-monitoring

|            |  |
|------------|--|
| Synopsis   | Monitor MAC for CPU protection   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">cpu-protection mac-monitoring</a> |
| Tree       | <a href="#">mac-monitoring</a>   |
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> , <b>ip-src-monitoring</b> , or <b>mac-monitoring</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s  |

## policy-id *reference*

|            |   |
|------------|---|
| Synopsis   | CPM protection policy   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">cpu-protection policy-id reference</a> |
| Tree       | <a href="#">policy-id</a>   |
| Reference  | <b>configure</b> <a href="#">system security cpu-protection policy</a> <i>number</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s   |

## default-host

|            |   |
|------------|---|
| Synopsis   | Enter the <b>default-host</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">default-host</a> |
| Tree       | <a href="#">default-host</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

**ipv4** [address] *reference* **prefix-length** *number*

| Tree           | <b>fc</b>   |
| Description    | <p>This command configures individual counters for the specified FCs without regard for profile. The system includes all countable packets that match a configured FC, regardless of profile, in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-aware FC using the <b>fc-in-profile</b> command under the <b>collect-lmm-fc-stats</b> context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options        | be, l2, af, l1, h2, ef, h1, nc  |
| Max. Instances | 8   |
| Introduced     | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **fc-in-profile** *keyword*

Synopsis Forwarding class name for profile-aware counter

Context **configure** **service** **vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **eth-cfm** **collect-lmm-fc-stats** **fc-in-profile** *keyword*

Tree **fc-in-profile**

Description This command configures individual counters for the specified FCs with regard to profile. The system includes all countable packets that match a configured FC and that are deemed to be in-profile in this counter.

An FC specified as part of this command and for this specific context cannot be specified as a profile-unaware FC using the **fc** command under the **collect-lmm-fc-stats** context.

When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.

Options be, l2, af, l1, h2, ef, h1, nc

Max. Instances 8

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **collect-lmm-stats** *boolean*

Synopsis Collect statistics for loss measurement message tests

Context **configure** **service** **vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **eth-cfm** **collect-lmm-stats** *boolean*

Tree **collect-lmm-stats**

Description When configured to **true**, the router instantiates the statistical counter to transmit and receive packets for the LAG facility MEP bindings.

The **show eth-cfm collect-lmm-stats** command displays entities that have been enabled to collect transit and receive counters.

When configured to **false**, the router does not instantiate the counter and the LMM PDU associated with the MEP does not populate the counters in the packet.

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">group-interface string</a> <a href="#">sap string</a> <a href="#">eth-cfm mep md-admin-name reference</a> <a href="#">ma-admin-name reference</a> <a href="#">mep-id number</a> |
| Tree       | <a href="#">mep</a>  |
| Reference  | <b>configure</b> <a href="#">eth-cfm domain string</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

**ma-admin-name** *reference*

|            |  |
|------------|--|
| Synopsis   | Maintenance Association (MA) name  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">group-interface string</a> <a href="#">sap string</a> <a href="#">eth-cfm mep md-admin-name reference</a> <a href="#">ma-admin-name reference</a> <a href="#">mep-id number</a> |
| Tree       | <a href="#">mep</a>  |
| Reference  | <b>configure</b> <a href="#">eth-cfm domain string</a> <a href="#">association string</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

**mep-id** *number*

|          |  |
|----------|--|
| Synopsis | Maintenance Endpoint (MEP) ID  |
| Context  | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">group-interface string</a> <a href="#">sap string</a> <a href="#">eth-cfm mep md-admin-name reference</a> <a href="#">ma-admin-name reference</a> <a href="#">mep-id number</a> |
| Tree     | <a href="#">mep</a>  |

|            |  |
|------------|--|
| Range      | 1 to 8191  |
| Notes      | This element is part of a list key.                |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the MEP   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **ais** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable the generation and the reception of AIS messages   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>ais</b> <i>boolean</i> |
| Tree       | <a href="#">ais</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **alarm-notification**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>alarm-notification</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>alarm-notification</b> |
| Tree        | <a href="#">alarm-notification</a>  |
| Description | Commands in this context configure the Fault Notification Generator (FNG) time values to raise an alarm or reset the CCM defect alarm.  |

Use these timers for network management processes. The timers are not tied into delaying the notification to the fault management system on the network element and do not affect fault propagation mechanisms.

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

### **fng-alarm-time** *number*

|            |   |
|------------|---|
| Synopsis   | Time that must expire before an FNG alarm is raised   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm</b> <b>mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>alarm-notification</b> <b>fng-alarm-time</b> <i>number</i> |
| Tree       | <b>fng-alarm-time</b>   |
| Range      | 250   500   1000  |
| Units      | centiseconds  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **fng-reset-time** *number*

|            |   |
|------------|---|
| Synopsis   | Time that must expire before an FNG alarm is reset  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm</b> <b>mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>alarm-notification</b> <b>fng-reset-time</b> <i>number</i> |
| Tree       | <b>fng-reset-time</b>   |
| Range      | 250   500   1000  |
| Units      | centiseconds  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **ccm** *boolean*

|          |   |
|----------|---|
| Synopsis | Generate CCM messages   |
| Context  | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm</b> <b>mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>ccm</b> <i>boolean</i> |
| Tree     | <b>ccm</b>  |
| Default  | false   |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

### **ccm-ltm-priority** *number*

|            |   |
|------------|---|
| Synopsis   | Priority of CCM and LTM messages transmitted by the MEP   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>ccm-ltm-priority</b> <i>number</i> |
| Tree       | <a href="#">ccm-ltm-priority</a>  |
| Range      | 0 to 7  |
| Default    | 7   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **ccm-padding-size** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of octets of padding to insert in CCM packets  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>ccm-padding-size</b> <i>number</i>   |
| Tree        | <a href="#">ccm-padding-size</a>  |
| Description | This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.<br><br>This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through <b>configure eth-cfm domain association ccm-interval</b> ) is less than 1 second. |
| Range       | 3 to 1500   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **csf**

|          |  |
|----------|--|
| Synopsis | Enable the <b>csf</b> context  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>csf</b> |

|            |  |
|------------|--|
| Tree       | <a href="#">csf</a>                                |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

### **multiplier** *decimal-number*

|            |  |
|------------|--|
| Synopsis   | Multiplication factor used to clear the CSF condition  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">csf</a> <a href="#">multiplier</a> <i>decimal-number</i> |
| Tree       | <a href="#">multiplier</a>   |
| Range      | 0.0   2.0 to 30.0  |
| Default    | 3.5  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **eth-test**

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>eth-test</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test</a> |
| Tree        | <a href="#">eth-test</a>   |
| Description | Commands in this context configure information used by the Ethernet Test (ETH-TST) packet. The commands must be configured on both the sender and the receiver nodes. The test packets are used with the <b>oam eth-cfm eth-test</b> command.  |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

### **bit-error-threshold** *number*

|            |  |
|------------|--|
| Synopsis   | Lowest priority defect allowed to generate fault alarm   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test bit-error-threshold</a> <i>number</i> |
| Tree       | <a href="#">bit-error-threshold</a>  |
| Range      | 0 to 11840   |
| Units      | bit errors   |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **test-pattern**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>test-pattern</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test test-pattern</a> |
| Tree        | <a href="#">test-pattern</a>  |
| Description | Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **crc-tlv** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate a CRC checksum  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test test-pattern</a> <a href="#">crc-tlv</a> <i>boolean</i> |
| Tree       | <a href="#">crc-tlv</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **pattern** *keyword*

Synopsis Test pattern for Ethernet Test frames

Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [eth-cfm](#) [mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [eth-test](#) [test-pattern](#) [pattern](#) *keyword*

Tree [pattern](#)

Description This command specifies the test pattern of the Ethernet Test (ETH-TST) frames. This does not have to be configured the same on the sender and the receiver.

Options all-zeros, all-ones

Default all-zeros

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **fault-propagation** *keyword*

Synopsis Fault propagation for the MEP

Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [eth-cfm](#) [mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [fault-propagation](#) *keyword*

Tree [fault-propagation](#)

Options use-if-status-tlv, suspend-ccm

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **grace**

Synopsis Enter the **grace** context

Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [eth-cfm](#) [mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [grace](#)

Tree [grace](#)

Description Commands in this context configure the Nokia ETH-CFM Grace function and the ITU-T Y.1731 Ethernet Expected Default (ETH-ED) function.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

## eth-ed

Synopsis Enter the **eth-ed** context

Context **configure** *service* *vprn string* *subscriber-interface string* *group-interface string* *sap string* *eth-cfm mep md-admin-name reference* *ma-admin-name reference* *mep-id number* *grace eth-ed*

Tree [eth-ed](#)

Description Commands in this context configure the ITU-T Y.1731 ETH-ED function.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

## max-rx-defect-window *number*

Synopsis Maximum received ETH-ED expected defect window duration

Context **configure** *service* *vprn string* *subscriber-interface string* *group-interface string* *sap string* *eth-cfm mep md-admin-name reference* *ma-admin-name reference* *mep-id number* *grace eth-ed max-rx-defect-window number*

Tree [max-rx-defect-window](#)

Range 1 to 86400

Units seconds

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

## priority *number*

Synopsis Transmission priority for ETH-ED PDUs

Context **configure** *service* *vprn string* *subscriber-interface string* *group-interface string* *sap string* *eth-cfm mep md-admin-name reference* *ma-admin-name reference* *mep-id number* *grace eth-ed priority number*

Tree [priority](#)

Range 0 to 7

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

**rx-eth-ed** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Receive and process ETH-ED ITU-T Y.1731 PDUs on the MEP   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">rx-eth-ed</a> <i>boolean</i> |
| Tree        | <a href="#">rx-eth-ed</a>   |
| Description | This command enables the reception and processing of the ITU-T Y.1731 ETH-ED PDU on the MEP.  |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

**tx-eth-ed** *boolean*

|            |   |
|------------|---|
| Synopsis   | Transmit ETH-ED PDUs from the MEP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">tx-eth-ed</a> <i>boolean</i> |
| Tree       | <a href="#">tx-eth-ed</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

**eth-vsm-grace**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>eth-vsm-grace</b> context  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-vsm-grace</a> |
| Tree        | <a href="#">eth-vsm-grace</a>   |
| Description | Commands in this context configure the Nokia ETH-CFM Grace function.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

**rx-eth-vsm-grace** *boolean*

|          |  |
|----------|--|
| Synopsis | Receive and process Nokia ETH-CFM Grace PDU on the MEP |
|----------|--|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>grace eth-vsm-grace rx-eth-vsm-grace</b> <i>boolean</i> |
| Tree        | <b>rx-eth-vsm-grace</b>  |
| Description | When configured to <b>true</b> , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>When configured to <b>false</b> , the router disables the Nokia Grace function.  |
| Default     | true   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **tx-eth-vsm-grace** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Transmit ETH-ED PDUs from the MEP  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>grace eth-vsm-grace tx-eth-vsm-grace</b> <i>boolean</i>   |
| Tree        | <b>tx-eth-vsm-grace</b>  |
| Description | When configured to <b>true</b> , the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.<br><br>The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>The operator must configure the <b>configure system eth-cfm grace</b> command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).<br><br>When configured to <b>false</b> , the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP. |
| Default     | true   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **low-priority-defect** *keyword*

|          |   |
|----------|---|
| Synopsis | Lowest priority defect allowed to generate fault alarm  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>low-priority-defect</b> <i>keyword</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">low-priority-defect</a>                              |
| Options    | all-def, mac-rem-err-xcon, rem-err-xcon, err-xcon, xcon, no-xcon |
| Default    | mac-rem-err-xcon   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s               |

### **one-way-delay-threshold** *number*

|            |  |
|------------|--|
| Synopsis   | Threshold time limit for the one-way delay test  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>one-way-delay-threshold</b> <i>number</i> |
| Tree       | <a href="#">one-way-delay-threshold</a>  |
| Range      | 0 to 600   |
| Units      | seconds  |
| Default    | 3  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **squelch-ingress-levels** *number*

|                |  |
|----------------|--|
| Synopsis       | Levels for which ETH-CFM packets are silently discarded  |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <b>squelch-ingress-levels</b> <i>number</i>   |
| Tree           | <a href="#">squelch-ingress-levels</a>   |
| Description    | <p>This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.</p> <p>The list of levels must be a complete contiguous list from 0 up to the highest level that will be dropped.</p> |
| Range          | 0 to 7   |
| Max. Instances | 8  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

**fwd-wholesale**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>fwd-wholesale</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i><br><b>fwd-wholesale</b> |
| Tree       | <b>fwd-wholesale</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**pppoe-service** *reference*

|            |  |
|------------|--|
| Synopsis   | PPPoE service name   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i><br><b>fwd-wholesale pppoe-service</b> <i>reference</i> |
| Tree       | <b>pppoe-service</b>   |
| Reference  | <b>configure service epipe</b> <i>string</i>   |

## **link-map-profile** *number*

|             |   |
|-------------|---|
| Synopsis    | LAG link map profile for a SAP or network interface   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>lag link-map-profile</b> <i>number</i> |
| Tree        | <b>link-map-profile</b>   |
| Description | This command assigns a preconfigured LAG link map profile to a SAP or network interface configured on a LAG or a PW port that exists on a LAG. After an operator                              |

assigns a LAG link map profile, the system rehashes the SAP or network interface egress traffic over the LAG as required by the new configuration.

If the LAG link map profile for a SAP or network interface is deleted, the system reverts back to per-flow hashing.

|            |   |
|------------|---|
| Range      | 1 to 64   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## per-link-hash

|            |   |
|------------|---|
| Synopsis   | Enter the <b>per-link-hash</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <b>per-link-hash</b> |
| Tree       | <a href="#">per-link-hash</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## class *number*

|            |   |
|------------|---|
| Synopsis   | Class used on LAG egress using weighted per-link-hash   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <a href="#">per-link-hash</a> <b>class</b> <i>number</i> |
| Tree       | <a href="#">class</a>   |
| Range      | 1 to 3  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## weight *number*

|            |  |
|------------|--|
| Synopsis   | Weight used on LAG egress using weighted per-link-hash   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <a href="#">per-link-hash</a> <b>weight</b> <i>number</i> |
| Tree       | <a href="#">weight</a>   |
| Range      | 1 to 1024  |
| Default    | 1  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **monitor-oper-group** *reference*

Synopsis Monitor operational group

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [monitor-oper-group](#) *reference*

Tree [monitor-oper-group](#)

Reference **configure** [service oper-group](#) *string*

Notes The following elements are part of a choice: **monitor-oper-group** or **oper-group**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **multi-service-site** *reference*

Synopsis Multi service site name

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [multi-service-site](#) *reference*

Tree [multi-service-site](#)

Reference **configure** [service customer](#) *string* [multi-service-site](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **oper-group** *reference*

Synopsis Operational group

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [oper-group](#) *reference*

Tree [oper-group](#)

Reference **configure** [service oper-group](#) *string*

Notes The following elements are part of a choice: **monitor-oper-group** or **oper-group**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**static-host**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>static-host</b> context  |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string sap string static-host</i> |
| Tree       | <a href="#">static-host</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipv4 [ip] string mac string**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> list instance  |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string sap string static-host ipv4 string mac string</i> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[ip] string**

|            |  |
|------------|--|
| Synopsis   | IPv4 address used by the static host   |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string sap string static-host ipv4 string mac string</i> |
| Tree       | <a href="#">ipv4</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**mac string**

|            |  |
|------------|--|
| Synopsis   | MAC address used by the static host  |
| Context    | <b>configure service vprn</b> <i>string subscriber-interface string group-interface string sap string static-host ipv4 string mac string</i> |
| Tree       | <a href="#">ipv4</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the static host  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ancp-string** *string*

|               |   |
|---------------|---|
| Synopsis      | ANCP string   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>ancp-string</b> <i>string</i> |
| Tree          | <a href="#">ancp-string</a>   |
| String Length | 1 to 63   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**app-profile**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>app-profile</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>app-profile</b> |
| Tree       | <a href="#">app-profile</a>   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**profile** *reference*

|          |   |
|----------|---|
| Synopsis | Application profile used by the static host   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>app-profile</b> <b>profile</b> <i>reference</i> |
| Tree     | <a href="#">profile</a>   |

|            |   |
|------------|---|
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i> |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**scope** *keyword*

|            |   |
|------------|---|
| Synopsis   | Scope of the static host application profile  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">app-profile</a> <a href="#">scope</a> <i>keyword</i> |
| Tree       | <a href="#">scope</a>   |
| Options    | subscriber, mac   |
| Default    | subscriber  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**int-dest-id** *string*

|               |  |
|---------------|--|
| Synopsis      | Intermediate destination ID  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">int-dest-id</a> <i>string</i> |
| Tree          | <a href="#">int-dest-id</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**managed-route** [[prefix](#)] *string*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>managed-route</b> list instance   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> |
| Tree        | <a href="#">managed-route</a>  |
| Description | Commands in this context configure managed route parameters.   |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[prefix] string**

|             |  |
|-------------|--|
| Synopsis    | Managed route prefix associated with IPv4 static host  |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">group-interface string</a> <a href="#">sap string</a> <a href="#">static-host ipv4 string</a> <a href="#">mac string</a> <a href="#">managed-route string</a> |
| Tree        | <a href="#">managed-route</a>  |
| Description | This command configures the managed route prefix. The prefix length must be in the range of 1 to 32.   |
| Notes       | This element is part of a list key.  |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**cpe-check**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>cpe-check</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">group-interface string</a> <a href="#">sap string</a> <a href="#">static-host ipv4 string</a> <a href="#">mac string</a> <a href="#">managed-route string</a> <a href="#">cpe-check</a> |
| Tree       | <a href="#">cpe-check</a>  |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**destination-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | IP address of the target CPE device   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">group-interface string</a> <a href="#">sap string</a> <a href="#">static-host ipv4 string</a> <a href="#">mac string</a> <a href="#">managed-route string</a> <a href="#">cpe-check</a> <a href="#">destination-ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">destination-ip-address</a>  |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**drop-count number**

|          |  |
|----------|--|
| Synopsis | Consecutive ping replies missed before CPE deemed down |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check drop-count</b> <i>number</i> |
| Tree       | <b>drop-count</b>   |
| Range      | 1 to 255  |
| Default    | 3   |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **failed-action**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>failed-action</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check failed-action</b> |
| Tree       | <b>failed-action</b>   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **metric number**

|            |   |
|------------|---|
| Synopsis   | Metric associated with the provisioned managed route  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check failed-action metric</b> <i>number</i> |
| Tree       | <b>metric</b>   |
| Max. Range | 0 to 4294967295   |
| Default    | 0   |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> .  |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **preference number**

|          |   |
|----------|---|
| Synopsis | Preference associated to the provisioned managed route  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check failed-action preference</b> <i>number</i> |
| Tree     | <b>preference</b>   |

|            |  |
|------------|--|
| Range      | 0 to 255   |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> . |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**tag number**

|            |  |
|------------|--|
| Synopsis   | Route tag used if CPE check fails  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">failed-action</a> <a href="#">tag number</a> |
| Tree       | <a href="#">tag</a>  |
| Max. Range | 0 to 4294967295  |
| Default    | 0  |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> .   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**withdraw boolean**

|            |  |
|------------|--|
| Synopsis   | Withdraw the route when the CPE check fails  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">failed-action</a> <a href="#">withdraw boolean</a> |
| Tree       | <a href="#">withdraw</a>   |
| Default    | false  |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> .   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**interval number**

|          |   |
|----------|---|
| Synopsis | Interval between ICMP pings to target CPE IP address  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">interval number</a> |
| Tree     | <a href="#">interval</a>  |

|            |   |
|------------|---|
| Range      | 1 to 255  |
| Units      | seconds   |
| Default    | 1   |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **log** *boolean*

|            |  |
|------------|--|
| Synopsis   | Log CPE connectivity checks transitions  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">log</a> <i>boolean</i> |
| Tree       | <a href="#">log</a>  |
| Default    | false  |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **padding-size** *number*

|            |  |
|------------|--|
| Synopsis   | Padding size for CPE connectivity checks   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">padding-size</a> <i>number</i> |
| Tree       | <a href="#">padding-size</a>   |
| Range      | 0 to 16384   |
| Units      | bytes  |
| Default    | 56   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **source-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |   |
|------------|---|
| Synopsis   | Source IP address used in the ICMP messages   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">source-ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">source-ip-address</a>   |
| Introduced | 22.10.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis Time interval determining that a ping is missed

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [static-host ipv4](#) *string* [mac](#) *string* [managed-route](#) *string* [cpe-check](#) *timeout* *number*

Tree [timeout](#)

Range 1 to 10

Units seconds

Default 1

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **metric** *number*

Synopsis Metric associated with the provisioned managed route

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [static-host ipv4](#) *string* [mac](#) *string* [managed-route](#) *string* [metric](#) *number*

Tree [metric](#)

Description This command configures a metric to associate with the provisioned managed route.

Max. Range 0 to 4294967295

Default 0

Introduced 22.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **preference** *number*

Synopsis Preference associated to the provisioned managed route

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [static-host ipv4](#) *string* [mac](#) *string* [managed-route](#) *string* [preference](#) *number*

Tree [preference](#)

Description This command configures the preference associated with the provisioned managed route.

Range 0 to 255

Default 0

|            |   |
|------------|---|
| Introduced | 22.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**tag number**

|            |  |
|------------|--|
| Synopsis   | Route tag used if CPE check fails  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">tag number</a> |
| Tree       | <a href="#">tag</a>  |
| Max. Range | 0 to 4294967295  |
| Default    | 0  |
| Introduced | 22.2.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**rip-policy reference**

|            |  |
|------------|--|
| Synopsis   | RIP policy name  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">rip-policy reference</a> |
| Tree       | <a href="#">rip-policy</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">rip-policy</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**shcv**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>shcv</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">shcv</a> |
| Tree       | <a href="#">shcv</a>   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**sla-profile reference**

|          |                  |
|----------|------------------|
| Synopsis | SLA profile name |
|----------|------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>sla-profile</b> <i>reference</i> |
| Tree       | <a href="#">sla-profile</a>  |
| Reference  | <b>configure subscriber-mgmt sla-profile</b> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **sub-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Sub-profile name   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>sub-profile</b> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>  |
| Reference  | <b>configure subscriber-mgmt sub-profile</b> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **subscriber-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>subscriber-id</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>subscriber-id</b> |
| Tree       | <a href="#">subscriber-id</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **string** *string*

|               |   |
|---------------|---|
| Synopsis      | Subscriber identification   |
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>subscriber-id</b> <i>string</i> <b>string</b> |
| Tree          | <a href="#">string</a>  |
| String Length | 1 to 64   |
| Notes         | The following elements are part of a choice: <b>string</b> or <b>use-sap-id</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**use-sap-id**

|            |  |
|------------|--|
| Synopsis   | Use the SAP id as subscriber ID  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">subscriber-id</a> <a href="#">use-sap-id</a> |
| Tree       | <a href="#">use-sap-id</a>   |
| Notes      | The following elements are part of a choice: <b>string</b> or <b>use-sap-id</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipv6** [[prefix](#)] *string* [mac](#) *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv6</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> |
| Tree       | <a href="#">ipv6</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[prefix]** *string*

|            |   |
|------------|---|
| Synopsis   | IPv6 prefix   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> |
| Tree       | <a href="#">ipv6</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**mac** *string*

|          |   |
|----------|---|
| Synopsis | MAC address   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> |
| Tree     | <a href="#">ipv6</a>  |
| Notes    | This element is part of a list key.   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the static host   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ancc-string** *string*

|               |  |
|---------------|--|
| Synopsis      | ANCP string  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>ancc-string</b> <i>string</i> |
| Tree          | <a href="#">ancc-string</a>  |
| String Length | 1 to 63  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **app-profile**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>app-profile</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>app-profile</b> |
| Tree       | <a href="#">app-profile</a>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **profile** *reference*

|          |   |
|----------|---|
| Synopsis | Application profile used by the static host |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>app-profile</b> <i>profile</i> <i>reference</i> |
| Tree       | <a href="#">profile</a>   |
| Reference  | <b>configure application-assurance group</b> <i>number</i> <b>partition</b> <i>number</i> <b>policy app-profile</b> <i>string</i>   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **scope** *keyword*

|            |   |
|------------|---|
| Synopsis   | Scope of the static host application profile  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>app-profile</b> <i>scope</i> <i>keyword</i> |
| Tree       | <a href="#">scope</a>   |
| Options    | subscriber, mac   |
| Default    | subscriber  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **int-dest-id** *string*

|               |   |
|---------------|---|
| Synopsis      | Intermediate destination ID   |
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>int-dest-id</b> <i>string</i> |
| Tree          | <a href="#">int-dest-id</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **mac-linking** *string*

|            |   |
|------------|---|
| Synopsis   | IPv6 host linked with IPv4 host via learned MAC address   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>mac-linking</b> <i>string</i> |
| Tree       | <a href="#">mac-linking</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**managed-route** [ipv6-prefix] *string*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>managed-route</b> list instance   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host</b> <b>ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> |
| Tree        | <b>managed-route</b>   |
| Description | Commands in this context configure managed route parameters.   |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[ipv6-prefix]** *string*

|             |  |
|-------------|--|
| Synopsis    | Managed route prefix associated with IPv6 static host  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host</b> <b>ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> |
| Tree        | <b>managed-route</b>   |
| Description | This command configures the managed route prefix. The prefix length must be in the range of 1 to 128.  |
| Notes       | This element is part of a list key.  |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**cpe-check**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>cpe-check</b> context   |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host</b> <b>ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check</b> |
| Tree       | <b>cpe-check</b>  |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**destination-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | IP address of the target CPE device   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check destination-ip-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <b>destination-ip-address</b>   |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **drop-count** *number*

|            |   |
|------------|---|
| Synopsis   | Consecutive ping replies missed before CPE deemed down  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check drop-count</b> <i>number</i> |
| Tree       | <b>drop-count</b>   |
| Range      | 1 to 255  |
| Default    | 3   |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **failed-action**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>failed-action</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check failed-action</b> |
| Tree       | <b>failed-action</b>   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **metric** *number*

|            |   |
|------------|---|
| Synopsis   | Metric associated with the provisioned managed route  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check failed-action metric</b> <i>number</i> |
| Tree       | <b>metric</b>   |
| Max. Range | 0 to 4294967295   |
| Default    | 0   |

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> . |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **preference number**

|            |  |
|------------|--|
| Synopsis   | Preference associated to the provisioned managed route   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">failed-action</a> <a href="#">preference</a> <i>number</i> |
| Tree       | <a href="#">preference</a>   |
| Range      | 0 to 255   |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> .   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **tag number**

|            |   |
|------------|---|
| Synopsis   | Route tag used if CPE check fails   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">failed-action</a> <a href="#">tag</a> <i>number</i> |
| Tree       | <a href="#">tag</a>   |
| Max. Range | 0 to 4294967295   |
| Default    | 0   |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> .  |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **withdraw boolean**

|          |   |
|----------|---|
| Synopsis | Withdraw the route when the CPE check fails   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">failed-action</a> <a href="#">withdraw</a> <i>boolean</i> |
| Tree     | <a href="#">withdraw</a>  |
| Default  | false   |

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> . |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **interval** *number*

|            |  |
|------------|--|
| Synopsis   | Interval between ICMP pings to target CPE IP address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">interval</a> <i>number</i> |
| Tree       | <a href="#">interval</a>   |
| Range      | 1 to 255   |
| Units      | seconds  |
| Default    | 1  |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **log** *boolean*

|            |  |
|------------|--|
| Synopsis   | Log CPE connectivity checks transitions  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">log</a> <i>boolean</i> |
| Tree       | <a href="#">log</a>  |
| Default    | false  |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **padding-size** *number*

|            |  |
|------------|--|
| Synopsis   | Padding size for CPE connectivity checks   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">padding-size</a> <i>number</i> |
| Tree       | <a href="#">padding-size</a>   |
| Range      | 0 to 16384   |
| Units      | bytes  |
| Default    | 56   |
| Introduced | 22.10.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **source-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Source IP address used in the ICMP messages

Context **configure** **service** **vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host** **ipv6** *string* **mac** *string* **managed-route** *string* **cpe-check** **source-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [source-ip-address](#)

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis Time interval determining that a ping is missed

Context **configure** **service** **vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host** **ipv6** *string* **mac** *string* **managed-route** *string* **cpe-check** **timeout** *number*

Tree [timeout](#)

Range 1 to 10

Units seconds

Default 1

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **metric** *number*

Synopsis Metric associated with the provisioned managed route

Context **configure** **service** **vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host** **ipv6** *string* **mac** *string* **managed-route** *string* **metric** *number*

Tree [metric](#)

Description This command configures a metric to associate with the provisioned managed route.

Max. Range 0 to 4294967295

Default 0

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**preference number**

|             |  |
|-------------|--|
| Synopsis    | Preference associated to the provisioned managed route   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">preference</a> <i>number</i> |
| Tree        | <a href="#">preference</a>   |
| Description | This command configures the preference associated with the provisioned managed route.  |
| Range       | 0 to 255   |
| Default     | 0  |
| Introduced  | 22.2.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**tag number**

|            |   |
|------------|---|
| Synopsis   | Route tag used if CPE check fails   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">tag</a> <i>number</i> |
| Tree       | <a href="#">tag</a>   |
| Max. Range | 0 to 4294967295   |
| Default    | 0   |
| Introduced | 22.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**retail-svc-id number****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Retail service ID   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">retail-svc-id</a> <i>number</i> |
| Tree       | <a href="#">retail-svc-id</a>   |
| Range      | 1 to 2147483647   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**shcv**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>shcv</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">shcv</a> |
| Tree       | <a href="#">shcv</a>   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**sla-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | SLA profile name   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">sla-profile</a> <i>reference</i> |
| Tree       | <a href="#">sla-profile</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**sub-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Sub-profile name   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">sub-profile</a> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**subscriber-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>subscriber-id</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">subscriber-id</a> |
| Tree       | <a href="#">subscriber-id</a>   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **string** *string*

Synopsis Subscriber identification

Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [static-host](#) [ipv6](#) *string* [mac](#) *string* [subscriber-id](#) *string* *string*

Tree [string](#)

String Length 1 to 64

Notes The following elements are part of a choice: **string** or **use-sap-id**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **use-sap-id**

Synopsis Use the SAP id as subscriber ID

Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [static-host](#) [ipv6](#) *string* [mac](#) *string* [subscriber-id](#) [use-sap-id](#)

Tree [use-sap-id](#)

Notes The following elements are part of a choice: **string** or **use-sap-id**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mac-learning**

Synopsis Enter the **mac-learning** context

Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [static-host](#) [mac-learning](#)

Tree [mac-learning](#)

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **data-triggered** *boolean*

Synopsis Enable learning of MAC addresses from data packets

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host mac-learning data-triggered</b> <i>boolean</i> |
| Tree       | <a href="#">data-triggered</a>  |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **single-mac** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enforce single MAC address and subscriber for the SAP   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host mac-learning single-mac</b> <i>boolean</i> |
| Tree       | <a href="#">single-mac</a>  |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sub-sla-mgmt**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>sub-sla-mgmt</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt</b> |
| Tree       | <a href="#">sub-sla-mgmt</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of SAP subscriber management  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**defaults**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>defaults</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt defaults</b> |
| Tree       | <b>defaults</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**app-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Default application profile name for this SAP   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt defaults app-profile</b> <i>reference</i> |
| Tree       | <b>app-profile</b>  |
| Reference  | <b>configure application-assurance group</b> <i>number</i> <b>partition</b> <i>number</i> <b>policy app-profile</b> <i>string</i>   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**int-dest-id**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>int-dest-id</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt defaults int-dest-id</b> |
| Tree       | <b>int-dest-id</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**string** *string*

|               |   |
|---------------|---|
| Synopsis      | Use the configured string   |
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt defaults int-dest-id string</b> <i>string</i> |
| Tree          | <b>string</b>   |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a choice: <b>string</b> or <b>top-q-tag</b> .  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## top-q-tag

|            |  |
|------------|--|
| Synopsis   | Use the top Q-tag of this SAP  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt defaults int-dest-id</a> <a href="#">top-q-tag</a> |
| Tree       | <a href="#">top-q-tag</a>  |
| Notes      | The following elements are part of a choice: <b>string</b> or <b>top-q-tag</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## sla-profile *reference*

|            |   |
|------------|---|
| Synopsis   | Default SLA profile for hosts on this SAP   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt defaults sla-profile</a> <i>reference</i> |
| Tree       | <a href="#">sla-profile</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt sla-profile</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## sub-profile *reference*

|            |   |
|------------|---|
| Synopsis   | Default subscriber profile for the SAP  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt defaults sub-profile</a> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt sub-profile</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## subscriber-id

|          |  |
|----------|--|
| Synopsis | Enter the <b>subscriber-id</b> context |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt defaults subscriber-id</b> |
| Tree       | <b>subscriber-id</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## auto-id

|            |  |
|------------|--|
| Synopsis   | Use auto-generated subscriber identification string  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt defaults subscriber-id auto-id</b> |
| Tree       | <b>auto-id</b>   |
| Notes      | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## sap-id

|            |   |
|------------|---|
| Synopsis   | Use SAP ID as default subscriber identification string  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt defaults subscriber-id sap-id</b> |
| Tree       | <b>sap-id</b>   |
| Notes      | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## string *string*

|               |   |
|---------------|---|
| Synopsis      | Default subscriber identification string for the SAP  |
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt defaults subscriber-id string</b> <i>string</i> |
| Tree          | <b>string</b>   |
| String Length | 1 to 64   |
| Notes         | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## single-sub-parameters

|            |   |
|------------|---|
| Synopsis   | Enter the <b>single-sub-parameters</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> |
| Tree       | <a href="#">single-sub-parameters</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## non-sub-traffic

|            |   |
|------------|---|
| Synopsis   | Enable the <b>non-sub-traffic</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic</a> |
| Tree       | <a href="#">non-sub-traffic</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## app-profile *reference*

|            |  |
|------------|--|
| Synopsis   | Application profile name for all non-subscriber traffic  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic</a> <a href="#">app-profile</a> <i>reference</i> |
| Tree       | <a href="#">app-profile</a>  |
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## sla-profile *reference*

|           |  |
|-----------|--|
| Synopsis  | SLA profile applicable for all non-subscriber traffic  |
| Context   | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic</a> <a href="#">sla-profile</a> <i>reference</i> |
| Tree      | <a href="#">sla-profile</a>  |
| Reference | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i>   |
| Notes     | This element is mandatory.   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **sub-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Subscriber profile all non-subscriber traffic  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic</a> <a href="#">sub-profile</a> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **subscriber-id** *string*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Subscriber ID applied for all non-subscriber traffic  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic</a> <a href="#">subscriber-id</a> <i>string</i> |
| Tree          | <a href="#">subscriber-id</a>   |
| String Length | 1 to 64   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **profiled-traffic-only** *boolean*

|            |  |
|------------|--|
| Synopsis   | Include all traffic in subscriber profile  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">profiled-traffic-only</a> <i>boolean</i> |
| Tree       | <a href="#">profiled-traffic-only</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-ident-policy** *reference*

Synopsis Subscriber identification policy used on this SAP

Context **configure** **service** **vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **sub-sla-mgmt** **sub-ident-policy** *reference*

Tree [sub-ident-policy](#)

Reference **configure** **subscriber-mgmt** **sub-ident-policy** *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **subscriber-limit** (*keyword* | *number*)

Synopsis Maximum number of subscribers on this SAP

Context **configure** **service** **vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **sub-sla-mgmt** **subscriber-limit** (*keyword* | *number*)

Tree [subscriber-limit](#)

Range 1 to 131071

Options no-limit

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sap-parameters**

Synopsis Enter the **sap-parameters** context

Context **configure** **service** **vprn** *string* **subscriber-interface** *string* **group-interface** *string* **sap-parameters**

Tree [sap-parameters](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **anti-spoof** *keyword*

Synopsis Anti-spoof type of the SAP

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap-parameters anti-spoof</b> <i>keyword</i> |
| Tree       | <b>anti-spoof</b>  |
| Options    | ip-mac, nh-mac   |
| Default    | ip-mac   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### description *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap-parameters description</b> <i>string</i> |
| Tree          | <b>description</b>   |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### sub-sla-mgmt

|            |   |
|------------|---|
| Synopsis   | Enter the <b>sub-sla-mgmt</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap-parameters sub-sla-mgmt</b> |
| Tree       | <b>sub-sla-mgmt</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### defaults

|            |  |
|------------|--|
| Synopsis   | Enter the <b>defaults</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap-parameters sub-sla-mgmt defaults</b> |
| Tree       | <b>defaults</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**app-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Default application profile name   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">group-interface string</a> <a href="#">sap-parameters sub-sla-mgmt defaults app-profile reference</a> |
| Tree       | <a href="#">app-profile</a>  |
| Reference  | <b>configure</b> <a href="#">application-assurance group number</a> <a href="#">partition number</a> <a href="#">policy app-profile string</a>   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**sla-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Default SLA profile  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">group-interface string</a> <a href="#">sap-parameters sub-sla-mgmt defaults sla-profile reference</a> |
| Tree       | <a href="#">sla-profile</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt sla-profile string</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**sub-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Default subscriber profile   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">group-interface string</a> <a href="#">sap-parameters sub-sla-mgmt defaults sub-profile reference</a> |
| Tree       | <a href="#">sub-profile</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt sub-profile string</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**subscriber-id**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>subscriber-id</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">subscriber-interface string</a> <a href="#">group-interface string</a> <a href="#">sap-parameters sub-sla-mgmt defaults subscriber-id</a> |
| Tree       | <a href="#">subscriber-id</a>  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## auto-id

Synopsis Subscriber ID that is autogenerated

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap-parameters](#) [sub-sla-mgmt](#) [defaults](#) [subscriber-id](#) [auto-id](#)

Tree [auto-id](#)

Notes The following elements are part of a choice: **auto-id** or **string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## string *string*

Synopsis String to be used as default subscriber ID

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap-parameters](#) [sub-sla-mgmt](#) [defaults](#) [subscriber-id](#) [string](#) [string](#)

Tree [string](#)

String Length 1 to 64

Notes The following elements are part of a choice: **auto-id** or **string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sub-ident-policy *reference*

Synopsis Subscriber identification policy

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap-parameters](#) [sub-sla-mgmt](#) [sub-ident-policy](#) [reference](#)

Tree [sub-ident-policy](#)

Reference **configure** [subscriber-mgmt](#) [sub-ident-policy](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## shcv-policy *reference*

Synopsis SHCV policy for IPv4 and IPv6 subscriber hosts

|            |   |
|------------|---|
| Context    | <b>configure service vpn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>shcv-policy</b> <i>reference</i> |
| Tree       | <a href="#">shcv-policy</a>   |
| Reference  | <b>configure subscriber-mgmt shcv-policy</b> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **shcv-policy-ipv4** *reference*

|            |  |
|------------|--|
| Synopsis   | SHCV for IPv4 subscriber hosts   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>shcv-policy-ipv4</b> <i>reference</i> |
| Tree       | <a href="#">shcv-policy-ipv4</a>   |
| Reference  | <b>configure subscriber-mgmt shcv-policy</b> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **shcv-policy-ipv6** *reference*

|            |  |
|------------|--|
| Synopsis   | SHCV for IPv6 subscriber hosts   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>shcv-policy-ipv6</b> <i>reference</i> |
| Tree       | <a href="#">shcv-policy-ipv6</a>   |
| Reference  | <b>configure subscriber-mgmt shcv-policy</b> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **srrp** [**srrp-id**] *number*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>srrp</b> list instance   |
| Context        | <b>configure service vpn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>srrp</b> <i>number</i> |
| Tree           | <a href="#">srrp</a>  |
| Max. Instances | 1   |
| Introduced     | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[srrp-id]** *number*

Synopsis SRRP instance ID

Context **configure** **service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **srrp** *number*

Tree **srrp**

Range 1 to 4294967295

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of SRRP

Context **configure** **service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **srrp** *number* **admin-state** *keyword*

Tree **admin-state**

Options enable, disable

Default disable

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **bfd-liveness**

Synopsis Enable the **bfd-liveness** context

Context **configure** **service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **srrp** *number* **bfd-liveness**

Tree **bfd-liveness**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**dest-ip** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Destination IPv4 prefix   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>srp</b> <i>number</i> <b>bfd-liveness</b> <b>dest-ip</b> <i>string</i> |
| Tree       | <b>dest-ip</b>  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**interface-name** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Name of the interface running BFD  |
| Context       | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>srp</b> <i>number</i> <b>bfd-liveness</b> <b>interface-name</b> <i>string</i> |
| Tree          | <b>interface-name</b>  |
| String Length | 1 to 32  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**service-name** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Administrative service name  |
| Context  | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>srp</b> <i>number</i> <b>bfd-liveness</b> <b>service-name</b> <i>string</i> |
| Tree     | <b>service-name</b>  |

String Length 1 to 64  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
Context **configure** **service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **srrp**  
*number* **description** *string*  
Tree [description](#)  
String Length 1 to 80  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **gw-mac** *string*

Synopsis Gateway MAC address  
Context **configure** **service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **srrp**  
*number* **gw-mac** *string*  
Tree [gw-mac](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **keep-alive-interval** *number*

Synopsis Interval between SRRP advertisements  
Context **configure** **service vprn** *string* **subscriber-interface** *string* **group-interface** *string* **srrp**  
*number* **keep-alive-interval** *number*  
Tree [keep-alive-interval](#)  
Range 1 to 100  
Units deciseconds  
Default 10  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**message-path** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | SAP to use as the SRRP message path   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">srrp</a> <i>number</i> <a href="#">message-path</a> <i>reference</i> |

| Max. Instances | 2  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **preempt** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow the SRRP instance to override an existing master  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">srrp</a> <i>number</i> <b>preempt</b> <i>boolean</i> |
| Tree       | <a href="#">preempt</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **priority** *number*

Synopsis Priority for this interface at this level

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [srrp](#) *number* **priority** *number*

Tree [priority](#)

Range 1 to 254

Default 100

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **send-fib-population-packets** *keyword*

Synopsis Mode used to send FIB population packets on switchover

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [srrp](#) *number* **send-fib-population-packets** *keyword*

Tree [send-fib-population-packets](#)

Options all, outer-tag-only

Default all

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suppress-aa-sub** *boolean*

Synopsis Enable application assurance suppression for ESM subscribers

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* **suppress-aa-sub** *boolean*

Tree [suppress-aa-sub](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**tos-marking-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | TOS marking state  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <b>tos-marking-state</b> <i>keyword</i> |
| Tree       | <a href="#">tos-marking-state</a>  |
| Options    | trusted, untrusted   |
| Default    | trusted  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Group interface type  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <b>type</b> <i>keyword</i> |
| Tree       | <a href="#">type</a>  |
| Options    | plain, lns, wlan-gw, gtp, bonding   |
| Default    | plain   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**wlan-gw**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>wlan-gw</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <b>wlan-gw</b> |
| Tree       | <a href="#">wlan-gw</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|          |                                      |
|----------|--------------------------------------|
| Synopsis | Administrative state of WLAN Gateway |
|----------|--------------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **gateway-address** [**address**] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>gateway-address</b> list instance  |
| Context        | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>gateway-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree           | <b>gateway-address</b>  |
| Max. Instances | 10  |
| Introduced     | 16.0.R4   |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |   |
|------------|---|
| Synopsis   | Gateway endpoint address of the WLAN Gateway tunnel   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>gateway-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <b>gateway-address</b>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R4   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **purpose**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>purpose</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>gateway-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>purpose</b> |
| Tree       | <b>purpose</b>   |
| Introduced | 16.0.R4  |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **xconnect** *boolean*

Synopsis Use tunnel IP address for cross-connect traffic

Context **configure** **service** **vpn** *string* **subscriber-interface** *string* **group-interface** *string* **wlan-gw** **gateway-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **purpose** **xconnect** *boolean*

Tree [xconnect](#)

Default false

Introduced 16.0.R4

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gateway-router** *string*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Routing instance the WLAN-GW endpoint resides in

Context **configure** **service** **vpn** *string* **subscriber-interface** *string* **group-interface** *string* **wlan-gw** **gateway-router** *string*

Tree [gateway-router](#)

Introduced 16.0.R4

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **group-encryption**

Synopsis Enter the **group-encryption** context

Context **configure** **service** **vpn** *string* **subscriber-interface** *string* **group-interface** *string* **wlan-gw** **group-encryption**

Tree [group-encryption](#)

Introduced 21.10.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**encryption-keygroup-inbound** *reference*

|            |  |
|------------|--|
| Synopsis   | Encryption keygroup for inbound traffic  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">group-encryption</a> <a href="#">encryption-keygroup-inbound</a> <i>reference</i> |
| Tree       | <a href="#">encryption-keygroup-inbound</a>  |
| Reference  | <b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i>  |
| Introduced | 21.10.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**encryption-keygroup-outbound** *reference*

|            |   |
|------------|---|
| Synopsis   | Encryption keygroup for inbound traffic   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">group-encryption</a> <a href="#">encryption-keygroup-outbound</a> <i>reference</i> |
| Tree       | <a href="#">encryption-keygroup-outbound</a>  |
| Reference  | <b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i>   |
| Introduced | 21.10.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**l2-ap**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>l2-ap</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">l2-ap</a> |
| Tree       | <a href="#">l2-ap</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**access-point** [[sap-id](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>access-point</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">l2-ap</a> <a href="#">access-point</a> <i>string</i> |
| Tree       | <a href="#">access-point</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**[sap-id]** *string*

|               |   |
|---------------|---|
| Synopsis      | SAP ID for the Layer 2 access point   |
| Context       | <b>configure</b> <b>service</b> <b>vpn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>l2-ap</b> <b>access-point</b> <i>string</i> |
| Tree          | <b>access-point</b>   |
| String Length | 1 to 45   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the L2 access points  |
| Context    | <b>configure</b> <b>service</b> <b>vpn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>l2-ap</b> <b>access-point</b> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**encap-type** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Service encapsulation type of this access point  |
| Context    | <b>configure</b> <b>service</b> <b>vpn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>l2-ap</b> <b>access-point</b> <i>string</i> <b>encap-type</b> <i>keyword</i> |
| Tree       | <b>encap-type</b>  |
| Options    | null, dot1q, qinq  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## epipe-sap-template *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Parameters template for the L2 access point SAP   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw l2-ap access-point</b> <i>string</i> <b>epipe-sap-template</b> <i>reference</i> |
| Tree       | <a href="#">epipe-sap-template</a>  |
| Reference  | <b>configure service template epipe-sap-template</b> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## auto-sub-id-fmt *keyword*

|            |  |
|------------|--|
| Synopsis   | Format of the auto-generated subscriber ID   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw l2-ap auto-sub-id-fmt</b> <i>keyword</i> |
| Tree       | <a href="#">auto-sub-id-fmt</a>  |
| Options    | include-ap-tags, sap-only  |
| Default    | include-ap-tags  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## default-encap-type *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Default encapsulation type for Layer 2 access points  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw l2-ap default-encap-type</b> <i>keyword</i> |
| Tree       | <a href="#">default-encap-type</a>  |
| Options    | null, dot1q, qinq   |
| Default    | null  |
| Introduced | 16.0.R1   |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## lanext

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enable the **lanext** context

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) **lanext**

Tree [lanext](#)

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## max-bd *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Maximum number of bridge domains

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) **lanext** **max-bd** *number*

Tree [max-bd](#)

Range 1 to 131071

Default 131071

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## learn-ap-mac

Synopsis Enable the **learn-ap-mac** context

Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) **learn-ap-mac**

Tree [learn-ap-mac](#)

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**delay-auth** *boolean*

|            |  |
|------------|--|
| Synopsis   | Delay AP-MAC until after ARP/ND authentication response  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">learn-ap-mac</a> <b>delay-auth</b> <i>boolean</i> |
| Tree       | <a href="#">delay-auth</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**mobility**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mobility</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <b>mobility</b> |
| Tree       | <a href="#">mobility</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**hold-time** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum time between two mobility events for single UE   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">mobility</a> <b>hold-time</b> <i>number</i> |
| Tree       | <a href="#">hold-time</a>  |
| Range      | 0 to 255   |
| Units      | seconds  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**inter-tunnel-type** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Enable mobility between terminating tunnel types  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility inter-tunnel-type</b> <i>boolean</i> |
| Tree       | <b>inter-tunnel-type</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **inter-vlan** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow mobility within different VLANs of the same range  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility inter-vlan</b> <i>boolean</i> |
| Tree       | <b>inter-vlan</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **trigger**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>trigger</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility trigger</b> |
| Tree       | <b>trigger</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **control** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use control traffic as a mobility trigger   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility trigger control</b> <i>boolean</i> |
| Tree       | <b>control</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**data** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use data traffic as mobility trigger  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">mobility trigger data</a> <i>boolean</i> |
| Tree       | <a href="#">data</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**iapp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use IAPP messages as a mobility trigger   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">mobility trigger iapp</a> <i>boolean</i> |
| Tree       | <a href="#">iapp</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**oper-down-on-group-degrade** *boolean*

|            |  |
|------------|--|
| Synopsis   | Bring interface down when the ISA WLAN Gateway degraded  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">oper-down-on-group-degrade</a> <i>boolean</i> |
| Tree       | <a href="#">oper-down-on-group-degrade</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**tcp-mss-adjust** *number*

|          |   |
|----------|---|
| Synopsis | TCP Maximum Segment Size (MSS) adjustment for gateway   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tcp-mss-adjust</a> <i>number</i> |
| Tree     | <a href="#">tcp-mss-adjust</a>  |

|            |                                    |
|------------|------------------------------------|
| Range      | 160 to 10240                       |
| Units      | bytes                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## tunnel-egress-qos

|            |   |
|------------|---|
| Synopsis   | Enter the <b>tunnel-egress-qos</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <b>tunnel-egress-qos</b> |
| Tree       | <a href="#">tunnel-egress-qos</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Administrative state of egress QoS for WLAN-GW tunnels  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <b>tunnel-egress-qos</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## agg-rate-limit (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | HQoS aggregate rate limit  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <b>tunnel-egress-qos</b> <b>agg-rate-limit</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">agg-rate-limit</a>   |
| Range    | 1 to 100000000   |
| Options  | max  |

|            |                                    |
|------------|------------------------------------|
| Default    | max                                |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **granularity** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Granularity of the egress shaping for WLAN Gateway   |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tunnel-egress-qos</a> <a href="#">granularity</a> <i>keyword</i> |
| Tree       | <a href="#">granularity</a>  |
| Options    | per-tunnel, per-retailer   |
| Default    | per-tunnel   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **hold-time** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Minimum time to hold egress shaping resources  |
| Context    | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tunnel-egress-qos</a> <a href="#">hold-time</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">hold-time</a>  |
| Range      | 1 to 86400   |
| Units      | seconds  |
| Options    | infinite   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **multi-client-only** *boolean*

|          |  |
|----------|--|
| Synopsis | Allow shaping for tunnel traffic for multiple UEs  |
| Context  | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tunnel-egress-qos</a> <a href="#">multi-client-only</a> <i>boolean</i> |
| Tree     | <a href="#">multi-client-only</a>  |

|            |                                    |
|------------|------------------------------------|
| Default    | false                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### qos reference

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Egress QoS policy linked with each interface tunnel   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tunnel-egress-qos</a> <a href="#">qos</a> <i>reference</i> |
| Tree       | <a href="#">qos</a>   |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">sap-egress</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### scheduler-policy reference

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Egress scheduler policy linked with each tunnel  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tunnel-egress-qos</a> <a href="#">scheduler-policy</a> <i>reference</i> |
| Tree       | <a href="#">scheduler-policy</a>   |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">scheduler-policy</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### tunnel-encaps

|          |  |
|----------|--|
| Synopsis | Enter the <b>tunnel-encaps</b> context   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tunnel-encaps</a> |

Tree [tunnel-encaps](#)  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **learn-l2tp-cookie** (*keyword* | *hex-string*)

Synopsis System that learns the cookie from L2TP tunnels terminating on this interface  
 Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [tunnel-encaps](#) [learn-l2tp-cookie](#) (*keyword* | *hex-string*)  
 Tree [learn-l2tp-cookie](#)  
 String Length 6  
 Options never, always  
 Default never  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **vlan-range** [[range](#)] *string*

Synopsis Enter the **vlan-range** list instance  
 Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string*  
 Tree [vlan-range](#)  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[range]** *string*

Synopsis IEEE 802.1q VLAN tag range  
 Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string*  
 Tree [vlan-range](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## authentication

|            |   |
|------------|---|
| Synopsis   | Enter the <b>authentication</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <b>authentication</b> |
| Tree       | <a href="#">authentication</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## hold-time *number*

|            |  |
|------------|--|
| Synopsis   | Minimum time UE held down after failed authentication  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <b>authentication</b> <b>hold-time</b> <i>number</i> |
| Tree       | <a href="#">hold-time</a>  |
| Range      | 0 to 3600  |
| Units      | seconds  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## local

|            |  |
|------------|--|
| Synopsis   | Enable the <b>local</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <b>authentication</b> <b>local</b> |
| Tree       | <a href="#">local</a>  |
| Introduced | 22.2.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## coa-policy *reference*

|           |   |
|-----------|---|
| Synopsis  | RADIUS ISA policy applied to CoA or disconnect messages   |
| Context   | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <b>authentication</b> <b>local</b> <b>coa-policy</b> <i>reference</i> |
| Tree      | <a href="#">coa-policy</a>  |
| Reference | <b>configure</b> <b>aaa</b> <b>radius</b> <b>isa-policy</b> <i>string</i>   |

Introduced 22.2.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **default-ue-state** *keyword*

Synopsis UE state accepted for immediate authentication  
Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [authentication local default-ue-state](#) *keyword*  
Tree [default-ue-state](#)  
Options portal, dsm  
Notes This element is mandatory.  
Introduced 22.2.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **on-control-plane** *boolean*

Synopsis Allow authentication on first control plane packet  
Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [authentication on-control-plane](#) *boolean*  
Tree [on-control-plane](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policy** *reference*

Synopsis RADIUS policy for authentication  
Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [authentication policy](#) *reference*  
Tree [policy](#)  
Reference **configure** [aaa radius isa-policy](#) *string*  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**vlan-mismatch-timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Timeout if packet received with a non-matching VLAN tag  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">authentication</a> <a href="#">vlan-mismatch-timeout</a> <i>number</i> |
| Tree       | <a href="#">vlan-mismatch-timeout</a>  |
| Range      | 5 to 60  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**data-triggered-ue-creation**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>data-triggered-ue-creation</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">data-triggered-ue-creation</a> |
| Tree       | <a href="#">data-triggered-ue-creation</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of data-triggered UE creation  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">data-triggered-ue-creation</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**arp** *boolean*

|          |   |
|----------|---|
| Synopsis | Authenticate ARP packets received from an unknown UE  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">data-triggered-ue-creation</a> <a href="#">arp</a> <i>boolean</i> |
| Tree     | <a href="#">arp</a>   |

|            |                                    |
|------------|------------------------------------|
| Default    | false                              |
| Introduced | 22.7.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **create-proxy-cache-entry**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>create-proxy-cache-entry</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">data-triggered-ue-creation</a> <a href="#">create-proxy-cache-entry</a> |
| Tree       | <a href="#">create-proxy-cache-entry</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **mac-format** *string*

|               |  |
|---------------|--|
| Synopsis      | MAC address format   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">data-triggered-ue-creation</a> <a href="#">create-proxy-cache-entry</a> <a href="#">mac-format</a> <i>string</i> |
| Tree          | <a href="#">mac-format</a>   |
| String Length | 2 to 7   |
| Default       | aa:  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **proxy-server**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>proxy-server</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">data-triggered-ue-creation</a> <a href="#">create-proxy-cache-entry</a> <a href="#">proxy-server</a> |
| Tree       | <a href="#">proxy-server</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **name** *string*

|          |                          |
|----------|--------------------------|
| Synopsis | RADIUS Proxy server name |
|----------|--------------------------|

|               |   |
|---------------|---|
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>data-triggered-ue-creation</b> <b>create-proxy-cache-entry</b> <b>proxy-server</b> <b>name</b> <i>string</i> |
| Tree          | <b>name</b>   |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **router-instance** *string*

|            |  |
|------------|--|
| Synopsis   | Router instance of the RADIUS proxy server   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>data-triggered-ue-creation</b> <b>create-proxy-cache-entry</b> <b>proxy-server</b> <b>router-instance</b> <i>string</i> |
| Tree       | <b>router-instance</b>   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R4  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **dhcp4**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dhcp4</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp4</b> |
| Tree       | <b>dhcp4</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of DHCPv4   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp4</b> <b>admin-state</b> <i>keyword</i> |
| Tree     | <b>admin-state</b>   |
| Options  | enable, disable  |
| Default  | disable  |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**dns string**

|                |   |
|----------------|---|
| Synopsis       | DNS servers signaled in DHCP  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp4</a> <a href="#">dns</a> <i>string</i> |
| Tree           | <a href="#">dns</a>   |
| Max. Instances | 2   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**l2-aware-ip-address** (*ipv4-unicast-address* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | L2-Aware NAT inside IP address   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp4</a> <a href="#">l2-aware-ip-address</a> ( <i>ipv4-unicast-address</i>   <i>keyword</i> ) |
| Tree       | <a href="#">l2-aware-ip-address</a>  |
| Options    | from-pool  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**lease-time**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lease-time</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp4</a> <a href="#">lease-time</a> |
| Tree       | <a href="#">lease-time</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**active number**

|            |  |
|------------|--|
| Synopsis   | Lease time an authenticated user   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp4 lease-time active number</a> |
| Tree       | <a href="#">active</a>   |
| Range      | 300 to 3600  |
| Units      | seconds  |
| Default    | 600  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**initial number**

|            |   |
|------------|---|
| Synopsis   | Lease time for migrant user (unauthenticated)   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp4 lease-time initial number</a> |
| Tree       | <a href="#">initial</a>   |
| Range      | 300 to 3600   |
| Units      | seconds   |
| Default    | 600   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**nbns string**

|                |   |
|----------------|---|
| Synopsis       | NetBIOS servers signaled in DHCP  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp4 nbns string</a> |
| Tree           | <a href="#">nbns</a>  |
| Max. Instances | 2   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## dhcp6

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dhcp6</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp6</a> |
| Tree       | <a href="#">dhcp6</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the protocol   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp6</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## preferred-lifetime

|            |  |
|------------|--|
| Synopsis   | Enter the <b>preferred-lifetime</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp6</a> <a href="#">preferred-lifetime</a> |
| Tree       | <a href="#">preferred-lifetime</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## active *number*

|          |   |
|----------|---|
| Synopsis | Preferred signaled lifetime after full authentication   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp6</a> <a href="#">preferred-lifetime</a> <a href="#">active</a> <i>number</i> |
| Tree     | <a href="#">active</a>  |
| Range    | 300 to 3600   |
| Units    | seconds   |

|            |                                    |
|------------|------------------------------------|
| Default    | 600                                |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **initial number**

|            |   |
|------------|---|
| Synopsis   | Signaled preferred lifetime after full authentication   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp6</a> <a href="#">preferred-lifetime</a> <b>initial</b> <i>number</i> |
| Tree       | <a href="#">initial</a>   |
| Range      | 300 to 3600   |
| Units      | seconds   |
| Default    | 300   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **valid-lifetime**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>valid-lifetime</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp6</a> <b>valid-lifetime</b> |
| Tree       | <a href="#">valid-lifetime</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **active number**

|            |  |
|------------|--|
| Synopsis   | Signaled valid lifetime after full authentication  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dhcp6</a> <a href="#">valid-lifetime</a> <b>active</b> <i>number</i> |
| Tree       | <a href="#">active</a>   |
| Range      | 300 to 3600  |
| Units      | seconds  |
| Default    | 600  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**initial number**

|            |   |
|------------|---|
| Synopsis   | Valid signaled lifetime UE is not fully authenticated   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp6 valid-lifetime initial</b> <i>number</i> |
| Tree       | <b>initial</b>  |
| Range      | 300 to 3600   |
| Units      | seconds   |
| Default    | 300   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**dsm**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dsm</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dsm</b> |
| Tree       | <b>dsm</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**accounting-policy** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | ISA Radius Policy for accounting  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dsm accounting-policy</b> <i>reference</i> |
| Tree       | <b>accounting-policy</b>  |
| Reference  | <b>configure aaa radius isa-policy</b> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## accounting-update

|            |  |
|------------|--|
| Synopsis   | Enable the <b>accounting-update</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm</a> <b>accounting-update</b> |
| Tree       | <a href="#">accounting-update</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## interval *number*

|            |  |
|------------|--|
| Synopsis   | Interim accounting update messages interval  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm</a> <b>accounting-update</b> <b>interval</b> <i>number</i> |
| Tree       | <a href="#">interval</a>   |
| Range      | 5 to 259200  |
| Units      | minutes  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of DSM   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## application-assurance

|          |  |
|----------|--|
| Synopsis | Enter the <b>application-assurance</b> context   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm</a> <b>application-assurance</b> |

Tree [application-assurance](#)  
 Introduced 21.10.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **accounting-statistics** *boolean*

Synopsis Collect AA statistics  
 Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [dsm](#) [application-assurance](#) [accounting-statistics](#) *boolean*  
 Tree [accounting-statistics](#)  
 Default false  
 Introduced 21.10.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **profile** *reference*

Synopsis AA application profile used for portal authentication  
 Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [dsm](#) [application-assurance](#) [profile](#) *reference*  
 Tree [profile](#)  
 Reference **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-profile](#) *string*  
 Introduced 21.10.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **url-parameter** *string*

Synopsis AA URL parameter included for HTTP portal redirect  
 Context **configure** [service vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [dsm](#) [application-assurance](#) [url-parameter](#) *string*  
 Tree [url-parameter](#)  
 String Length 1 to 247  
 Introduced 22.2.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## egress

|            |  |
|------------|--|
| Synopsis   | Enter the <b>egress</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm</a> <a href="#">egress</a> |
| Tree       | <a href="#">egress</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## policer reference

|            |   |
|------------|---|
| Synopsis   | Policer for egress traffic  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm</a> <a href="#">egress</a> <a href="#">policer</a> <i>reference</i> |
| Tree       | <a href="#">policer</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt isa-policer</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## ingress

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ingress</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm</a> <a href="#">ingress</a> |
| Tree       | <a href="#">ingress</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## ip-filter reference

|            |  |
|------------|--|
| Synopsis   | Filter for ingress traffic   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <i>reference</i> |
| Tree       | <a href="#">ip-filter</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **policer** *reference*

|            |  |
|------------|--|
| Synopsis   | Policer for ingress traffic  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm ingress policer</a> <i>reference</i> |
| Tree       | <a href="#">policer</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt isa-policer</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **soft-quota-exhausted-filter** *reference*

|             |   |
|-------------|---|
| Synopsis    | Filter applied when soft volume quota is reached  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm ingress soft-quota-exhausted-filter</a> <i>reference</i>  |
| Tree        | <a href="#">soft-quota-exhausted-filter</a>   |
| Description | This command applies a filter when a soft volume quota is reached. The filter replaces the currently applied filter (which can be preconfigured using the <b>ip-filter</b> command in the <b>configure service vprn subscriber-interface group-interface wlan-gw vlan-range dsm ingress ip-filter</b> context or be set using a RADIUS CoA message) for the UE upon quota exhaustion. If the quota is extended using a RADIUS CoA message, the filter is automatically reverted. Configuration changes apply only to new DSM UEs and not to existing UEs. |
| Reference   | <b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i>   |
| Introduced  | 21.7.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **one-time-redirect**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>one-time-redirect</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm one-time-redirect</a> |
| Tree       | <a href="#">one-time-redirect</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**port number**

|            |  |
|------------|--|
| Synopsis   | Destination port of packets for HTTP redirect  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm one-time-redirect</a> <a href="#">port</a> <i>number</i> |
| Tree       | <a href="#">port</a>   |
| Range      | 1 to 65535   |
| Default    | 80   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**url string**

|               |   |
|---------------|---|
| Synopsis      | URL for redirected HTTP protocol packets  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm one-time-redirect</a> <a href="#">url</a> <i>string</i> |
| Tree          | <a href="#">url</a>   |
| String Length | 1 to 255  |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**volume-quota-direction keyword**

|             |   |
|-------------|---|
| Synopsis    | Volume quota direction for WLAN GW  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm volume-quota-direction</a> <i>keyword</i> |
| Tree        | <a href="#">volume-quota-direction</a>  |
| Description | This command specifies the direction that volume quotas are applied. Configuration changes apply only to new DSM UEs and not to existing UEs.   |
| Options     | both, ingress, egress   |
| Default     | both  |
| Introduced  | 21.7.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**extension [[extension-range](#)] string**

|          |                                       |
|----------|---------------------------------------|
| Synopsis | Add a list entry for <b>extension</b> |
|----------|---------------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>extension</b> <i>string</i> |
| Tree       | <b>extension</b>   |
| Introduced | 21.7.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **[extension-range]** *string*

|             |  |
|-------------|--|
| Synopsis    | VLAN tag range used for matching   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>extension</b> <i>string</i> |
| Tree        | <b>extension</b>   |
| Description | This command configures the additional VLAN range that is used for matching. Any traffic within the extension range is considered part of the same VLAN range for purposes of intra-SSID mobility.       |
| Notes       | This element is part of a list key.  |
| Introduced  | 21.7.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **http-redirect-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Default HTTP redirect policy for portal authentication   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>http-redirect-policy</b> <i>reference</i> |
| Tree       | <b>http-redirect-policy</b>  |
| Reference  | <b>configure subscriber-mgmt</b> <b>http-redirect-policy</b> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **idle-timeout-action** *keyword*

|          |   |
|----------|---|
| Synopsis | Action to perform when the idle timeout expires   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>idle-timeout-action</b> <i>keyword</i> |
| Tree     | <b>idle-timeout-action</b>  |
| Options  | remove, shcv  |
| Default  | remove  |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## I2-service

|            |  |
|------------|--|
| Synopsis   | Enable the <b>I2-service</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string wlan-gw vlan-range string I2-service</a> |
| Tree       | <a href="#">I2-service</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of Layer 2 service for VLAN range   |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string wlan-gw vlan-range string I2-service admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## description *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string wlan-gw vlan-range string I2-service description string</a> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## service reference

|          |   |
|----------|---|
| Synopsis | Layer 2 service associated with the range |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>l2-service</b> <i>service</i> <i>reference</i> |
| Tree       | <a href="#">service</a>   |
| Reference  | <b>configure service vpls</b> <i>string</i>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **nat-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | NAT policy for DSM and ISA portal authentication   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>nat-policy</b> <i>reference</i> |
| Tree       | <a href="#">nat-policy</a>   |
| Reference  | <b>configure service nat nat-policy</b> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **retail-service** *string*

|               |   |
|---------------|---|
| Synopsis      | Default retail service for new UEs in this range  |
| Context       | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>retail-service</b> <i>string</i> |
| Tree          | <a href="#">retail-service</a>  |
| String Length | 1 to 64   |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **slaac**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>slaac</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>slaac</b> |
| Tree       | <a href="#">slaac</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the protocol  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">slaac</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**preferred-lifetime**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>preferred-lifetime</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">slaac</a> <b>preferred-lifetime</b> |
| Tree       | <a href="#">preferred-lifetime</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**active** *number*

|            |   |
|------------|---|
| Synopsis   | Preferred signaled lifetime after full authentication   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">slaac</a> <b>preferred-lifetime</b> <b>active</b> <i>number</i> |
| Tree       | <a href="#">active</a>  |
| Range      | 300 to 3600   |
| Units      | seconds   |
| Default    | 600   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**initial** *number*

|          |   |
|----------|---|
| Synopsis | Signaled preferred lifetime after full authentication |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>slaac preferred-lifetime initial</b> <i>number</i> |
| Tree       | <b>initial</b>  |
| Range      | 300 to 3600   |
| Units      | seconds   |
| Default    | 300   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **valid-lifetime**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>valid-lifetime</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>slaac valid-lifetime</b> |
| Tree       | <b>valid-lifetime</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **active number**

|            |  |
|------------|--|
| Synopsis   | Signaled valid lifetime after full authentication  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>slaac valid-lifetime active</b> <i>number</i> |
| Tree       | <b>active</b>  |
| Range      | 300 to 3600  |
| Units      | seconds  |
| Default    | 600  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **initial number**

|          |   |
|----------|---|
| Synopsis | Valid signaled lifetime UE is not fully authenticated   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>slaac valid-lifetime initial</b> <i>number</i> |
| Tree     | <b>initial</b>  |

|            |                                    |
|------------|------------------------------------|
| Range      | 300 to 3600                        |
| Units      | seconds                            |
| Default    | 300                                |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## vrgw

|            |  |
|------------|--|
| Synopsis   | Enter the <b>vrgw</b> context  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>vrgw</b> |
| Tree       | <b>vrgw</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of vRGW   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>vrgw</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## brg

|            |   |
|------------|---|
| Synopsis   | Enter the <b>brg</b> context  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>vrgw</b> <b>brg</b> |
| Tree       | <b>brg</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**authenticated-brg-only** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Only allow hosts from BRGs pre-authenticated using the radius-proxy  |
| Context    | <b>configure</b> <i>service vprn string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw brg authenticated-brg-only boolean</i> |
| Tree       | <a href="#">authenticated-brg-only</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**default-brg-profile** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Default BRG profile to use if the AAA server does not specify one   |
| Context    | <b>configure</b> <i>service vprn string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw brg default-brg-profile reference</i> |
| Tree       | <a href="#">default-brg-profile</a>   |
| Reference  | <b>configure</b> <i>subscriber-mgmt vrgw brg-profile string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**lanext**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lanext</b> context  |
| Context    | <b>configure</b> <i>service vprn string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw lanext</i> |
| Tree       | <a href="#">lanext</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**access****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Enter the <b>access</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">vrgw lanext</a> <b>access</b> |
| Tree       | <a href="#">access</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**max-mac number****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Maximum number of allowed MAC entries on access side  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">vrgw lanext</a> <b>access max-mac</b> <i>number</i> |
| Tree       | <a href="#">max-mac</a>   |
| Range      | 1 to 256  |
| Default    | 20  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**multi-access boolean****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Allow multiple access points  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">vrgw lanext</a> <b>access multi-access</b> <i>boolean</i> |
| Tree     | <a href="#">multi-access</a>  |
| Default  | false   |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **policer** *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Policer for ingress home traffic  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">vrgw lanext</a> <a href="#">access policer</a> <i>reference</i> |
| Tree       | <a href="#">policer</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt isa-policer</a> <i>string</i>  |
| Introduced | 19.7.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of HLE  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">vrgw lanext</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **assistive-address-resolution** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | ISA assists in address resolution   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">vrgw lanext</a> <a href="#">assistive-address-resolution</a> <i>boolean</i> |
| Tree     | <a href="#">assistive-address-resolution</a>  |

|            |                                    |
|------------|------------------------------------|
| Default    | false                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **bd-mac-prefix** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Prefix of the HLE BD MAC address   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">vrgw lanext</a> <b>bd-mac-prefix</b> <i>string</i> |
| Tree          | <a href="#">bd-mac-prefix</a>  |
| String Length | 8  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **mac-translation** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Allow MAC address translation for HLE services  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">vrgw lanext</a> <b>mac-translation</b> <i>boolean</i> |
| Tree       | <a href="#">mac-translation</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **network**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Enter the <b>network</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw lanext network</a> |
| Tree       | <a href="#">network</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Administrative state of the HLE network   |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw lanext network admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **max-mac** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Maximum number of allowed MAC entries on network side  |
| Context    | <b>configure</b> <a href="#">service vprn string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw lanext network max-mac number</a> |
| Tree       | <a href="#">max-mac</a>  |
| Range      | 1 to 64  |
| Default    | 20   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## policer *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Policer for ingress data center traffic  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">vrgw lanext network</a> <a href="#">policer</a> <i>reference</i> |
| Tree       | <a href="#">policer</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt isa-policer</a> <i>string</i>   |
| Introduced | 19.7.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## xconnect

|            |  |
|------------|--|
| Synopsis   | Enter the <b>xconnect</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">xconnect</a> |
| Tree       | <a href="#">xconnect</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## accounting

|            |   |
|------------|---|
| Synopsis   | Enter the <b>accounting</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">xconnect</a> <a href="#">accounting</a> |
| Tree       | <a href="#">accounting</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## mobility-updates *boolean*

|          |   |
|----------|---|
| Synopsis | Accounting updates triggered by mobility  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">xconnect</a> <a href="#">accounting</a> <a href="#">mobility-updates</a> <i>boolean</i> |
| Tree     | <a href="#">mobility-updates</a>  |

|            |                                    |
|------------|------------------------------------|
| Default    | false                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### policy reference

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | ISA RADIUS accounting policy for cross-connected UEs   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">xconnect</a> <a href="#">accounting</a> <a href="#">policy reference</a> |
| Tree       | <a href="#">policy</a>   |
| Reference  | <b>configure</b> <a href="#">aaa radius isa-policy</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### update-interval number

|            |   |
|------------|---|
| Synopsis   | Time between successive interim accounting updates  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">xconnect</a> <a href="#">accounting</a> <a href="#">update-interval</a> <i>number</i> |
| Tree       | <a href="#">update-interval</a>   |
| Range      | 5 to 259200   |
| Units      | minutes   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### admin-state keyword

|          |   |
|----------|---|
| Synopsis | Administrative state of the cross-connect   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">xconnect</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>   |
| Options  | enable, disable   |
| Default  | disable   |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### wlan-gw-group *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | ID of WLAN Gateway ISA group that gateway binds to  |
| Context    | <b>configure service vpn</b> <i>string subscriber-interface string group-interface string wlan-gw-wlan-gw-group reference</i> |
| Tree       | <a href="#">wlan-gw-group</a>   |
| Reference  | <b>configure isa wlan-gw-group</b> <i>number</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### wpp

|            |   |
|------------|---|
| Synopsis   | Enable the <b>wpp</b> context   |
| Context    | <b>configure service vpn</b> <i>string subscriber-interface string group-interface string wpp</i> |
| Tree       | <a href="#">wpp</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of WPP   |
| Context    | <b>configure service vpn</b> <i>string subscriber-interface string group-interface string wpp admin-state keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**initial**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>initial</b> context  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wpp initial</b> |
| Tree       | <b>initial</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**app-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Initial application profile name   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wpp initial</b><br><b>app-profile</b> <i>reference</i> |
| Tree       | <b>app-profile</b>   |
| Reference  | <b>configure application-assurance group</b> <i>number</i> <b>partition</b> <i>number</i> <b>policy app-profile</b> <i>string</i>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**sla-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Initial SLA profile  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wpp initial</b><br><b>sla-profile</b> <i>reference</i> |
| Tree       | <b>sla-profile</b>   |
| Reference  | <b>configure subscriber-mgmt sla-profile</b> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**sub-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Initial subscriber profile   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wpp initial</b><br><b>sub-profile</b> <i>reference</i> |
| Tree       | <b>sub-profile</b>   |
| Reference  | <b>configure subscriber-mgmt sub-profile</b> <i>string</i>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lease-time** *number*

Synopsis Lease time

Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wpp](#) [lease-time](#) *number*

Tree [lease-time](#)

Range 10 to 315446399

Units seconds

Default 600

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **portal**

Synopsis Enter the **portal** context

Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wpp](#) [portal](#)

Tree [portal](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **name** *string*

Synopsis Web portal server name

Context **configure** [service](#) [vprn](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wpp](#) [portal](#) [name](#) *string*

Tree [name](#)

String Length 1 to 32

Notes The following elements are part of a choice: **portal-group** or (**name** and **router-instance**).

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**portal-group** *reference*

|            |   |
|------------|---|
| Synopsis   | WPP portal group for this interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wpp portal</a> <a href="#">portal-group</a> <i>reference</i> |
| Tree       | <a href="#">portal-group</a>  |
| Reference  | <b>configure</b> <a href="#">aaa wpp portal-group</a> <i>string</i>   |
| Notes      | The following elements are part of a choice: <b>portal-group</b> or ( <b>name</b> and <b>router-instance</b> ).   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**router-instance** *string*

|            |   |
|------------|---|
| Synopsis   | Virtual router instance of WPP portal for interface   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wpp portal</a> <a href="#">router-instance</a> <i>string</i> |
| Tree       | <a href="#">router-instance</a>   |
| Notes      | The following elements are part of a choice: <b>portal-group</b> or ( <b>name</b> and <b>router-instance</b> ).   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**restore-to-initial-on-disconnect** *boolean*

|            |  |
|------------|--|
