| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### client-applications

|            |   |
|------------|---|
| Synopsis   | Enter the <b>client-applications</b> context  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">local-address-assignment ipv6</a> <a href="#">client-applications</a> |
| Tree       | <a href="#">client-applications</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipoe-slaac** *boolean*

|            |   |
|------------|---|
| Synopsis   | Request local addresses for IPoE SLAAC hosts  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>local-address-assignment</b> <b>ipv6</b> <b>client-applications</b> <b>ipoe-slaac</b> <i>boolean</i> |
| Tree       | <a href="#">ipoe-slaac</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipoe-wan** *boolean*

|            |   |
|------------|---|
| Synopsis   | Request local addresses for IPoE IA NA hosts  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>local-address-assignment</b> <b>ipv6</b> <b>client-applications</b> <b>ipoe-wan</b> <i>boolean</i> |
| Tree       | <a href="#">ipoe-wan</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ppp-slaac** *boolean*

|            |  |
|------------|--|
| Synopsis   | Request local addresses for PPP SLAAC hosts  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>local-address-assignment</b> <b>ipv6</b> <b>client-applications</b> <b>ppp-slaac</b> <i>boolean</i> |
| Tree       | <a href="#">ppp-slaac</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **server** *reference*

|          |  |
|----------|--|
| Synopsis | Local DHCPv6 server for local pools management   |
| Context  | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>local-address-assignment</b> <b>ipv6</b> <b>server</b> <i>reference</i> |
| Tree     | <a href="#">server</a>   |

|            |  |
|------------|--|
| Reference  | <b>configure</b> <a href="#">router</a> <i>string</i> <a href="#">dhcp-server</a> <a href="#">dhcpv6</a> <i>string</i> |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **mac** *string*

|            |   |
|------------|---|
| Synopsis   | MAC address for the interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">mac</a> <i>string</i> |
| Tree       | <a href="#">mac</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **nasreq-auth-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Diameter NASREQ application policy to use for authentication  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">nasreq-auth-policy</a> <i>reference</i> |
| Tree       | <a href="#">nasreq-auth-policy</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">diameter-nasreq-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **oper-up-while-empty** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable this group interface without any active SAPs  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">oper-up-while-empty</a> <i>boolean</i> |
| Tree       | <a href="#">oper-up-while-empty</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **pppoe**

|          |   |
|----------|---|
| Synopsis | Enter the <b>pppoe</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> |

|            |   |
|------------|---|
| Tree       | <a href="#">pppoe</a>                                   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of PPPoE  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**anti-spoof** *keyword*

|            |   |
|------------|---|
| Synopsis   | PPPoE anti-spoof filtering  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">anti-spoof</a> <i>keyword</i> |
| Tree       | <a href="#">anti-spoof</a>  |
| Options    | mac-sid, mac-sid-ip   |
| Default    | mac-sid   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## dhcp-client

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dhcp-client</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">dhcp-client</a> |
| Tree       | <a href="#">dhcp-client</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## client-id *keyword*

|            |  |
|------------|--|
| Synopsis   | Type of information that DHCP option 61 contains   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">dhcp-client</a> <a href="#">client-id</a> <i>keyword</i> |
| Tree       | <a href="#">client-id</a>  |
| Options    | mac-pppoe-session-id   |
| Introduced | 16.0.R7  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## policy *reference*

|            |   |
|------------|---|
| Synopsis   | PPPoE policy  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">policy</a> <i>reference</i> |
| Tree       | <a href="#">policy</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">ppp-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## python-policy *reference*

|           |  |
|-----------|--|
| Synopsis  | Python policy used to modify PPPoE packets   |
| Context   | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">python-policy</a> <i>reference</i> |
| Tree      | <a href="#">python-policy</a>  |
| Reference | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **sap-session-limit** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum PPPoE sessions per SAP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">sap-session-limit</a> <i>number</i> |
| Tree       | <a href="#">sap-session-limit</a>   |
| Range      | 1 to 131071   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **session-limit** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum PPPoE sessions  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">session-limit</a> <i>number</i> |
| Tree       | <a href="#">session-limit</a>   |
| Range      | 1 to 333823   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **user-db** *reference*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Local user database for authentication   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">pppoe</a> <a href="#">user-db</a> <i>reference</i> |
| Tree       | <a href="#">user-db</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">local-user-db</a> <i>string</i>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **radius-auth-policy** *reference*

Synopsis RADIUS authentication policy

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [radius-auth-policy](#) *reference*

Tree [radius-auth-policy](#)

Reference **configure** [subscriber-mgmt](#) [radius-authentication-policy](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **redundant-interface** *reference*

Synopsis Redundant interface

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [redundant-interface](#) *reference*

Tree [redundant-interface](#)

Reference **configure** [service ies](#) *string* [redundant-interface](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sap** [[sap-id](#)] *string*

Synopsis Enter the **sap** list instance

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string*

Tree [sap](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[sap-id]** *string*

Synopsis SAP ID

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string*

Tree [sap](#)

String Length 1 to 45

|            |   |
|------------|---|
| Notes      | This element is part of a list key.                     |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **accounting-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Accounting policy  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">accounting-policy</a> <i>reference</i> |
| Tree       | <a href="#">accounting-policy</a>  |
| Reference  | <b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <i>number</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the SAP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **anti-spoof** *keyword*

|            |   |
|------------|---|
| Synopsis   | Type of anti-spoof filtering  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">anti-spoof</a> <i>keyword</i> |
| Tree       | <a href="#">anti-spoof</a>  |
| Options    | source-ip-addr, source-ip-and-mac-addr, next-hop-ip-and-mac-addr  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**app-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Application profile name   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">app-profile</a> <i>reference</i> |
| Tree       | <a href="#">app-profile</a>  |
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**calling-station-id** *string*

|               |  |
|---------------|--|
| Synopsis      | Calling station ID   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">calling-station-id</a> <i>string</i> |
| Tree          | <a href="#">calling-station-id</a>   |
| String Length | 1 to 64  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**collect-stats** *boolean*

|            |  |
|------------|--|
| Synopsis   | Collect accounting statistics  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">collect-stats</a> <i>boolean</i> |
| Tree       | <a href="#">collect-stats</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**cpu-protection**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>cpu-protection</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">cpu-protection</a> |
| Tree       | <a href="#">cpu-protection</a>   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## eth-cfm-monitoring

Synopsis Enable the **eth-cfm-monitoring** context

Context **configure** *service ies string subscriber-interface string group-interface string sap string cpu-protection eth-cfm-monitoring*

Tree [eth-cfm-monitoring](#)

Notes The following elements are part of a choice: **eth-cfm-monitoring**, **ip-src-monitoring**, or **mac-monitoring**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## aggregate

Synopsis Apply rate limit to the sum of the per peer packet rates

Context **configure** *service ies string subscriber-interface string group-interface string sap string cpu-protection eth-cfm-monitoring aggregate*

Tree [aggregate](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## car

Synopsis Ignore Ethernet CFM packets when enforcing overall rate

Context **configure** *service ies string subscriber-interface string group-interface string sap string cpu-protection eth-cfm-monitoring car*

Tree [car](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

## ip-src-monitoring

Synopsis Enable IP source monitoring for CPU protection

Context **configure** *service ies string subscriber-interface string group-interface string sap string cpu-protection ip-src-monitoring*

Tree [ip-src-monitoring](#)

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> , <b>ip-src-monitoring</b> , or <b>mac-monitoring</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s  |

## mac-monitoring

|            |  |
|------------|--|
| Synopsis   | Monitor MAC for CPU protection   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>cpu-protection</b> <b>mac-monitoring</b> |
| Tree       | <a href="#">mac-monitoring</a>   |
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> , <b>ip-src-monitoring</b> , or <b>mac-monitoring</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s  |

## policy-id *reference*

|            |  |
|------------|--|
| Synopsis   | CPM protection policy  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>cpu-protection</b> <b>policy-id</b> <i>reference</i> |
| Tree       | <a href="#">policy-id</a>  |
| Reference  | <b>configure</b> <b>system</b> <b>security</b> <b>cpu-protection</b> <b>policy</b> <i>number</i>   |

| Tree           | <a href="#">fc</a>  |
| Description    | <p>This command configures individual counters for the specified FCs without regard for profile. The system includes all countable packets that match a configured FC, regardless of profile, in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-aware FC using the <b>fc-in-profile</b> command under the <b>collect-lmm-fc-stats</b> context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options        | be, l2, af, l1, h2, ef, h1, nc  |
| Max. Instances | 8   |
| Introduced     | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **fc-in-profile** *keyword*

Synopsis Forwarding class name for profile-aware counter

Context **configure** *service ies string subscriber-interface string group-interface string sap string eth-cfm collect-lmm-fc-stats fc-in-profile keyword*

Tree [fc-in-profile](#)

Description This command configures individual counters for the specified FCs with regard to profile. The system includes all countable packets that match a configured FC and that are deemed to be in-profile in this counter.

An FC specified as part of this command and for this specific context cannot be specified as a profile-unaware FC using the **fc** command under the **collect-lmm-fc-stats** context.

When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.

Options be, l2, af, l1, h2, ef, h1, nc

Max. Instances 8

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **collect-lmm-stats** *boolean*

Synopsis Collect statistics for loss measurement message tests

Context **configure** *service ies string subscriber-interface string group-interface string sap string eth-cfm collect-lmm-stats boolean*

Tree [collect-lmm-stats](#)

Description When configured to **true**, the router instantiates the statistical counter to transmit and receive packets for the LAG facility MEP bindings.

The **show eth-cfm collect-lmm-stats** command displays entities that have been enabled to collect transit and receive counters.

When configured to **false**, the router does not instantiate the counter and the LMM PDU associated with the MEP does not populate the counters in the packet.

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

|            |   |
|------------|---|
| Synopsis   | Maintenance Association (MA) name   |
| Context    | <b>configure service ies string subscriber-interface string group-interface string sap string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number</b> |
| Tree       | <b>mep</b>  |
| Reference  | <b>configure eth-cfm domain string association string</b>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

**mep-id number**

|          |   |
|----------|---|
| Synopsis | Maintenance Endpoint (MEP) ID   |
| Context  | <b>configure service ies string subscriber-interface string group-interface string sap string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number</b> |
| Tree     | <b>mep</b>  |

|            |  |
|------------|--|
| Range      | 1 to 8191  |
| Notes      | This element is part of a list key.                |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the MEP  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm</b> <b>mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **ais** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable the generation and the reception of AIS messages  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm</b> <b>mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>ais</b> <i>boolean</i> |
| Tree       | <b>ais</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **alarm-notification**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>alarm-notification</b> context  |
| Context     | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm</b> <b>mep</b> <b>md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>alarm-notification</b> |
| Tree        | <b>alarm-notification</b>  |
| Description | Commands in this context configure the Fault Notification Generator (FNG) time values to raise an alarm or reset the CCM defect alarm.   |

Use these timers for network management processes. The timers are not tied into delaying the notification to the fault management system on the network element and do not affect fault propagation mechanisms.

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

### **fng-alarm-time** *number*

|            |  |
|------------|--|
| Synopsis   | Time that must expire before an FNG alarm is raised  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">alarm-notification</a> <b>fng-alarm-time</b> <i>number</i> |
| Tree       | <a href="#">fng-alarm-time</a>   |
| Range      | 250   500   1000   |
| Units      | centiseconds   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **fng-reset-time** *number*

|            |  |
|------------|--|
| Synopsis   | Time that must expire before an FNG alarm is reset   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">alarm-notification</a> <b>fng-reset-time</b> <i>number</i> |
| Tree       | <a href="#">fng-reset-time</a>   |
| Range      | 250   500   1000   |
| Units      | centiseconds   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **ccm** *boolean*

|          |   |
|----------|---|
| Synopsis | Generate CCM messages   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <b>ccm</b> <i>boolean</i> |
| Tree     | <a href="#">ccm</a>   |
| Default  | false   |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

### **ccm-ltm-priority** *number*

|            |   |
|------------|---|
| Synopsis   | Priority of CCM and LTM messages transmitted by the MEP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <b>ccm-ltm-priority</b> <i>number</i> |
| Tree       | <a href="#">ccm-ltm-priority</a>  |
| Range      | 0 to 7  |
| Default    | 7   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **ccm-padding-size** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of octets of padding to insert in CCM packets  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <b>ccm-padding-size</b> <i>number</i> |
| Tree        | <a href="#">ccm-padding-size</a>  |
| Description | This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.<br><br>This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through <b>configure eth-cfm domain association ccm-interval</b> ) is less than 1 second.               |
| Range       | 3 to 1500   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **csf**

|          |  |
|----------|--|
| Synopsis | Enable the <b>csf</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <b>csf</b> |

|            |  |
|------------|--|
| Tree       | <a href="#">csf</a>                                |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

### **multiplier** *decimal-number*

|            |  |
|------------|--|
| Synopsis   | Multiplication factor used to clear the CSF condition  |
| Context    | <a href="#">configure</a> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">csf</a> <a href="#">multiplier</a> <i>decimal-number</i> |
| Tree       | <a href="#">multiplier</a>   |
| Range      | 0.0   2.0 to 30.0  |
| Default    | 3.5  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <a href="#">configure</a> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **eth-test**

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>eth-test</b> context   |
| Context     | <a href="#">configure</a> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test</a> |
| Tree        | <a href="#">eth-test</a>   |
| Description | Commands in this context configure information used by the Ethernet Test (ETH-TST) packet. The commands must be configured on both the sender and the receiver nodes. The test packets are used with the <b>oam eth-cfm eth-test</b> command.  |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s |

### **bit-error-threshold** *number*

|            |  |
|------------|--|
| Synopsis   | Lowest priority defect allowed to generate fault alarm   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">eth-test</a> <a href="#">bit-error-threshold</a> <i>number</i> |
| Tree       | <a href="#">bit-error-threshold</a>  |
| Range      | 0 to 11840   |
| Units      | bit errors   |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **test-pattern**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>test-pattern</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">eth-test</a> <a href="#">test-pattern</a> |
| Tree        | <a href="#">test-pattern</a>  |
| Description | Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **crc-tlv** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate a CRC checksum  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">eth-test</a> <a href="#">test-pattern</a> <a href="#">crc-tlv</a> <i>boolean</i> |
| Tree       | <a href="#">crc-tlv</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **pattern** *keyword*

Synopsis Test pattern for Ethernet Test frames

Context **configure** *service* *ies* *string* *subscriber-interface* *string* *group-interface* *string* *sap* *string* *eth-cfm* *mep* *md-admin-name* *reference* *ma-admin-name* *reference* *mep-id* *number* *eth-test* *test-pattern* *pattern* *keyword*

Tree [pattern](#)

Description This command specifies the test pattern of the Ethernet Test (ETH-TST) frames. This does not have to be configured the same on the sender and the receiver.

Options all-zeros, all-ones

Default all-zeros

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **fault-propagation** *keyword*

Synopsis Fault propagation for the MEP

Context **configure** *service* *ies* *string* *subscriber-interface* *string* *group-interface* *string* *sap* *string* *eth-cfm* *mep* *md-admin-name* *reference* *ma-admin-name* *reference* *mep-id* *number* *fault-propagation* *keyword*

Tree [fault-propagation](#)

Options use-if-status-tlv, suspend-ccm

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

### **grace**

Synopsis Enter the **grace** context

Context **configure** *service* *ies* *string* *subscriber-interface* *string* *group-interface* *string* *sap* *string* *eth-cfm* *mep* *md-admin-name* *reference* *ma-admin-name* *reference* *mep-id* *number* *grace*

Tree [grace](#)

Description Commands in this context configure the Nokia ETH-CFM Grace function and the ITU-T Y.1731 Ethernet Expected Default (ETH-ED) function.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

## eth-ed

Synopsis Enter the **eth-ed** context

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **eth-cfm** **mep** **md-admin-name** *reference* **ma-admin-name** *reference* **mep-id** *number* **grace** **eth-ed**

Tree [eth-ed](#)

Description Commands in this context configure the ITU-T Y.1731 ETH-ED function.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

## max-rx-defect-window *number*

Synopsis Maximum received ETH-ED expected defect window duration

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **eth-cfm** **mep** **md-admin-name** *reference* **ma-admin-name** *reference* **mep-id** *number* **grace** **eth-ed** **max-rx-defect-window** *number*

Tree [max-rx-defect-window](#)

Range 1 to 86400

Units seconds

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

## priority *number*

Synopsis Transmission priority for ETH-ED PDUs

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **eth-cfm** **mep** **md-admin-name** *reference* **ma-admin-name** *reference* **mep-id** *number* **grace** **eth-ed** **priority** *number*

Tree [priority](#)

Range 0 to 7

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s

**rx-eth-ed boolean**

|             |  |
|-------------|--|
| Synopsis    | Receive and process ETH-ED ITU-T Y.1731 PDUs on the MEP  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">rx-eth-ed</a> <a href="#">boolean</a> |
| Tree        | <a href="#">rx-eth-ed</a>  |
| Description | This command enables the reception and processing of the ITU-T Y.1731 ETH-ED PDU on the MEP.   |
| Default     | true   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

**tx-eth-ed boolean**

|            |  |
|------------|--|
| Synopsis   | Transmit ETH-ED PDUs from the MEP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">tx-eth-ed</a> <a href="#">boolean</a> |
| Tree       | <a href="#">tx-eth-ed</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

**eth-vsm-grace**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>eth-vsm-grace</b> context  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">grace</a> <a href="#">eth-vsm-grace</a> |
| Tree        | <a href="#">eth-vsm-grace</a>   |
| Description | Commands in this context configure the Nokia ETH-CFM Grace function.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

**rx-eth-vsm-grace boolean**

|          |  |
|----------|--|
| Synopsis | Receive and process Nokia ETH-CFM Grace PDU on the MEP |
|----------|--|

|             |   |
|-------------|---|
| Context     | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>grace eth-vsm-grace rx-eth-vsm-grace</b> <i>boolean</i> |
| Tree        | <a href="#">rx-eth-vsm-grace</a>  |
| Description | When configured to <b>true</b> , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br>When configured to <b>false</b> , the router disables the Nokia Grace function.   |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **tx-eth-vsm-grace** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Transmit ETH-ED PDUs from the MEP  |
| Context     | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>grace eth-vsm-grace tx-eth-vsm-grace</b> <i>boolean</i>  |
| Tree        | <a href="#">tx-eth-vsm-grace</a>   |
| Description | When configured to <b>true</b> , the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.<br>The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br>The operator must configure the <b>configure system eth-cfm grace</b> command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).<br>When configured to <b>false</b> , the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP. |
| Default     | true   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

### **low-priority-defect** *keyword*

|          |  |
|----------|--|
| Synopsis | Lowest priority defect allowed to generate fault alarm   |
| Context  | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>low-priority-defect</b> <i>keyword</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">low-priority-defect</a>                              |
| Options    | all-def, mac-rem-err-xcon, rem-err-xcon, err-xcon, xcon, no-xcon |
| Default    | mac-rem-err-xcon   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s               |

### **one-way-delay-threshold** *number*

|            |   |
|------------|---|
| Synopsis   | Threshold time limit for the one-way delay test   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>one-way-delay-threshold</b> <i>number</i> |
| Tree       | <a href="#">one-way-delay-threshold</a>   |
| Range      | 0 to 600  |
| Units      | seconds   |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s  |

### **squelch-ingress-levels** *number*

|                |  |
|----------------|--|
| Synopsis       | Levels for which ETH-CFM packets are silently discarded  |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <b>squelch-ingress-levels</b> <i>number</i>  |
| Tree           | <a href="#">squelch-ingress-levels</a>   |
| Description    | <p>This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.</p> <p>The list of levels must be a complete contiguous list from 0 up to the highest level that will be dropped.</p> |
| Range          | 0 to 7   |
| Max. Instances | 8  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s   |

**fwd-wholesale**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>fwd-wholesale</b> context   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i><br><b>fwd-wholesale</b> |
| Tree       | <b>fwd-wholesale</b>   |

| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **lag**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lag</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> |
| Tree       | <a href="#">lag</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## **link-map-profile** *number*

|             |  |
|-------------|--|
| Synopsis    | LAG link map profile for a SAP or network interface  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <a href="#">link-map-profile</a> <i>number</i> |
| Tree        | <a href="#">link-map-profile</a>   |
| Description | This command assigns a preconfigured LAG link map profile to a SAP or network interface configured on a LAG or a PW port that exists on a LAG. After an operator   |

assigns a LAG link map profile, the system rehashes the SAP or network interface egress traffic over the LAG as required by the new configuration.

If the LAG link map profile for a SAP or network interface is deleted, the system reverts back to per-flow hashing.

|            |   |
|------------|---|
| Range      | 1 to 64   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## per-link-hash

|            |   |
|------------|---|
| Synopsis   | Enter the <b>per-link-hash</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">lag</a> <a href="#">per-link-hash</a> |
| Tree       | <a href="#">per-link-hash</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## class *number*

|            |   |
|------------|---|
| Synopsis   | Class used on LAG egress using weighted per-link-hash   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">lag</a> <a href="#">per-link-hash</a> <a href="#">class</a> <i>number</i> |
| Tree       | <a href="#">class</a>   |
| Range      | 1 to 3  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## weight *number*

|            |  |
|------------|--|
| Synopsis   | Weight used on LAG egress using weighted per-link-hash   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">lag</a> <a href="#">per-link-hash</a> <a href="#">weight</a> <i>number</i> |
| Tree       | <a href="#">weight</a>   |
| Range      | 1 to 1024  |
| Default    | 1  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **monitor-oper-group** *reference*

Synopsis Monitor operational group

Context **configure service ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **monitor-oper-group** *reference*

Tree **monitor-oper-group**

Reference **configure service oper-group** *string*

Notes The following elements are part of a choice: **monitor-oper-group** or **oper-group**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **multi-service-site** *reference*

Synopsis Multi service site name

Context **configure service ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **multi-service-site** *reference*

Tree **multi-service-site**

Reference **configure service customer** *string* **multi-service-site** *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **oper-group** *reference*

Synopsis Operational group

Context **configure service ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **oper-group** *reference*

Tree **oper-group**

Reference **configure service oper-group** *string*

Notes The following elements are part of a choice: **monitor-oper-group** or **oper-group**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**static-host**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>static-host</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <b>static-host</b> |
| Tree       | <a href="#">static-host</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipv4 [ip] string mac string**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <b>static-host</b> <b>ipv4</b> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[ip] string**

|            |  |
|------------|--|
| Synopsis   | IPv4 address used by the static host   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <b>static-host</b> <b>ipv4</b> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> |
| Tree       | <a href="#">ipv4</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**mac string**

|            |  |
|------------|--|
| Synopsis   | MAC address used by the static host  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <b>static-host</b> <b>ipv4</b> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> |
| Tree       | <a href="#">ipv4</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the static host  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv4</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">admin-state</a> <a href="#">keyword</a> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ancp-string** *string*

|               |   |
|---------------|---|
| Synopsis      | ANCP string   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv4</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">ancp-string</a> <a href="#">string</a> |
| Tree          | <a href="#">ancp-string</a>   |
| String Length | 1 to 63   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**app-profile**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>app-profile</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv4</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">app-profile</a> |
| Tree       | <a href="#">app-profile</a>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**profile** *reference*

|          |  |
|----------|--|
| Synopsis | Application profile used by the static host  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv4</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">app-profile</a> <a href="#">profile</a> <a href="#">reference</a> |
| Tree     | <a href="#">profile</a>  |

|            |   |
|------------|---|
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy</a> <a href="#">app-profile</a> <i>string</i> |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**scope** *keyword*

|            |   |
|------------|---|
| Synopsis   | Scope of the static host application profile  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">app-profile</a> <a href="#">scope</a> <i>keyword</i> |
| Tree       | <a href="#">scope</a>   |
| Options    | subscriber, mac   |
| Default    | subscriber  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**int-dest-id** *string*

|               |  |
|---------------|--|
| Synopsis      | Intermediate destination ID  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">int-dest-id</a> <i>string</i> |
| Tree          | <a href="#">int-dest-id</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**managed-route** [[prefix](#)] *string*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>managed-route</b> list instance   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> |
| Tree        | <a href="#">managed-route</a>  |
| Description | Commands in this context configure managed route parameters.   |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[prefix] string**

|             |  |
|-------------|--|
| Synopsis    | Managed route prefix associated with IPv4 static host  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> |
| Tree        | <a href="#">managed-route</a>  |
| Description | This command configures the managed route prefix. The prefix length must be in the range of 1 to 32.   |
| Notes       | This element is part of a list key.  |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**cpe-check**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>cpe-check</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> |
| Tree       | <a href="#">cpe-check</a>  |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**destination-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | IP address of the target CPE device   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">destination-ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">destination-ip-address</a>  |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**drop-count number**

|          |  |
|----------|--|
| Synopsis | Consecutive ping replies missed before CPE deemed down |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check drop-count</b> <i>number</i> |
| Tree       | <b>drop-count</b>  |
| Range      | 1 to 255   |
| Default    | 3  |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **failed-action**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>failed-action</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check failed-action</b> |
| Tree       | <b>failed-action</b>  |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **metric number**

|            |  |
|------------|--|
| Synopsis   | Metric associated with the provisioned managed route   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check failed-action metric</b> <i>number</i> |
| Tree       | <b>metric</b>  |
| Max. Range | 0 to 4294967295  |
| Default    | 0  |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> .   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **preference number**

|          |  |
|----------|--|
| Synopsis | Preference associated to the provisioned managed route   |
| Context  | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check failed-action preference</b> <i>number</i> |
| Tree     | <b>preference</b>  |

|            |  |
|------------|--|
| Range      | 0 to 255   |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> . |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**tag number**

|            |  |
|------------|--|
| Synopsis   | Route tag used if CPE check fails  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv4</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">managed-route</a> <a href="#">string</a> <a href="#">cpe-check</a> <a href="#">failed-action</a> <a href="#">tag</a> <a href="#">number</a> |
| Tree       | <a href="#">tag</a>  |
| Max. Range | 0 to 4294967295  |
| Default    | 0  |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> .   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**withdraw boolean**

|            |  |
|------------|--|
| Synopsis   | Withdraw the route when the CPE check fails  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv4</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">managed-route</a> <a href="#">string</a> <a href="#">cpe-check</a> <a href="#">failed-action</a> <a href="#">withdraw</a> <a href="#">boolean</a> |
| Tree       | <a href="#">withdraw</a>   |
| Default    | false  |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> .   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**interval number**

|          |   |
|----------|---|
| Synopsis | Interval between ICMP pings to target CPE IP address  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv4</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">managed-route</a> <a href="#">string</a> <a href="#">cpe-check</a> <a href="#">interval</a> <a href="#">number</a> |
| Tree     | <a href="#">interval</a>  |

|            |   |
|------------|---|
| Range      | 1 to 255  |
| Units      | seconds   |
| Default    | 1   |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **log** *boolean*

|            |   |
|------------|---|
| Synopsis   | Log CPE connectivity checks transitions   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">log</a> <i>boolean</i> |
| Tree       | <a href="#">log</a>   |
| Default    | false   |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **padding-size** *number*

|            |   |
|------------|---|
| Synopsis   | Padding size for CPE connectivity checks  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">padding-size</a> <i>number</i> |
| Tree       | <a href="#">padding-size</a>  |
| Range      | 0 to 16384  |
| Units      | bytes   |
| Default    | 56  |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **source-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | Source IP address used in the ICMP messages  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">cpe-check</a> <a href="#">source-ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">source-ip-address</a>  |
| Introduced | 22.10.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis Time interval determining that a ping is missed

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [static-host ipv4](#) *string* [mac](#) *string* [managed-route](#) *string* [cpe-check](#) [timeout](#) *number*

Tree [timeout](#)

Range 1 to 10

Units seconds

Default 1

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **metric** *number*

Synopsis Metric associated with the provisioned managed route

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [static-host ipv4](#) *string* [mac](#) *string* [managed-route](#) *string* [metric](#) *number*

Tree [metric](#)

Description This command configures a metric to associate with the provisioned managed route.

Max. Range 0 to 4294967295

Default 0

Introduced 22.2.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **preference** *number*

Synopsis Preference associated to the provisioned managed route

Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [static-host ipv4](#) *string* [mac](#) *string* [managed-route](#) *string* [preference](#) *number*

Tree [preference](#)

Description This command configures the preference associated with the provisioned managed route.

Range 0 to 255

Default 0

|            |   |
|------------|---|
| Introduced | 22.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **tag** *number*

|            |   |
|------------|---|
| Synopsis   | Route tag used if CPE check fails   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <b>tag</b> <i>number</i> |
| Tree       | <a href="#">tag</a>   |
| Max. Range | 0 to 4294967295   |
| Default    | 0   |
| Introduced | 22.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **rip-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | RIP policy name   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>rip-policy</b> <i>reference</i> |
| Tree       | <a href="#">rip-policy</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">rip-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **shcv**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>shcv</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>shcv</b> |
| Tree       | <a href="#">shcv</a>   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **sla-profile** *reference*

|          |                  |
|----------|------------------|
| Synopsis | SLA profile name |
|----------|------------------|

|            |   |
|------------|---|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>sla-profile</b> <i>reference</i> |
| Tree       | <a href="#">sla-profile</a>   |
| Reference  | <b>configure subscriber-mgmt sla-profile</b> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sub-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Sub-profile name  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>sub-profile</b> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>   |
| Reference  | <b>configure subscriber-mgmt sub-profile</b> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **subscriber-id**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>subscriber-id</b> context   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>subscriber-id</b> |
| Tree       | <a href="#">subscriber-id</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **string** *string*

|               |  |
|---------------|--|
| Synopsis      | Subscriber identification  |
| Context       | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host ipv4</b> <i>string</i> <b>mac</b> <i>string</i> <b>subscriber-id</b> <i>string</i> <i>string</i> |
| Tree          | <a href="#">string</a>   |
| String Length | 1 to 64  |
| Notes         | The following elements are part of a choice: <b>string</b> or <b>use-sap-id</b> .  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**use-sap-id**

|            |   |
|------------|---|
| Synopsis   | Use the SAP id as subscriber ID   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv4</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">subscriber-id</a> <a href="#">use-sap-id</a> |
| Tree       | <a href="#">use-sap-id</a>  |
| Notes      | The following elements are part of a choice: <b>string</b> or <b>use-sap-id</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipv6 [prefix] string mac string**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv6</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> |
| Tree       | <a href="#">ipv6</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[prefix] string**

|            |  |
|------------|--|
| Synopsis   | IPv6 prefix  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> |
| Tree       | <a href="#">ipv6</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**mac string**

|          |  |
|----------|--|
| Synopsis | MAC address  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> |
| Tree     | <a href="#">ipv6</a>   |
| Notes    | This element is part of a list key.  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the static host  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv6</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ancc-string** *string*

|               |   |
|---------------|---|
| Synopsis      | ANCP string   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv6</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <b>ancc-string</b> <i>string</i> |
| Tree          | <a href="#">ancc-string</a>   |
| String Length | 1 to 63   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **app-profile**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>app-profile</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv6</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <b>app-profile</b> |
| Tree       | <a href="#">app-profile</a>   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **profile** *reference*

|          |   |
|----------|---|
| Synopsis | Application profile used by the static host |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv6</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">app-profile</a> <a href="#">profile</a> <a href="#">reference</a> |
| Tree       | <a href="#">profile</a>  |
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-profile</a> <a href="#">string</a>   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **scope** *keyword*

|            |  |
|------------|--|
| Synopsis   | Scope of the static host application profile   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv6</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">app-profile</a> <a href="#">scope</a> <a href="#">keyword</a> |
| Tree       | <a href="#">scope</a>  |
| Options    | subscriber, mac  |
| Default    | subscriber   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **int-dest-id** *string*

|               |   |
|---------------|---|
| Synopsis      | Intermediate destination ID   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv6</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">int-dest-id</a> <a href="#">string</a> |
| Tree          | <a href="#">int-dest-id</a>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **mac-linking** *string*

|            |   |
|------------|---|
| Synopsis   | IPv6 host linked with IPv4 host via learned MAC address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">static-host</a> <a href="#">ipv6</a> <a href="#">string</a> <a href="#">mac</a> <a href="#">string</a> <a href="#">mac-linking</a> <a href="#">string</a> |
| Tree       | <a href="#">mac-linking</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**managed-route** [ipv6-prefix] *string*

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>managed-route</b> list instance  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>managed-route</b> <i>string</i> |
| Tree        | <a href="#">managed-route</a>   |
| Description | Commands in this context configure managed route parameters.  |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[ipv6-prefix]** *string*

|             |   |
|-------------|---|
| Synopsis    | Managed route prefix associated with IPv6 static host   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <b>managed-route</b> <i>string</i> |
| Tree        | <a href="#">managed-route</a>   |
| Description | This command configures the managed route prefix. The prefix length must be in the range of 1 to 128.   |
| Notes       | This element is part of a list key.   |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**cpe-check**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>cpe-check</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <b>cpe-check</b> |
| Tree       | <a href="#">cpe-check</a>   |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**destination-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | IP address of the target CPE device   |
| Context    | <b>configure service ies</b> <i>string subscriber-interface string group-interface string sap string static-host ipv6 string mac string managed-route string cpe-check destination-ip-address (ipv4-address-no-zone   ipv6-address-no-zone)</i> |
| Tree       | <b>destination-ip-address</b>   |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **drop-count** *number*

|            |  |
|------------|--|
| Synopsis   | Consecutive ping replies missed before CPE deemed down   |
| Context    | <b>configure service ies</b> <i>string subscriber-interface string group-interface string sap string static-host ipv6 string mac string managed-route string cpe-check drop-count number</i> |
| Tree       | <b>drop-count</b>  |
| Range      | 1 to 255   |
| Default    | 3  |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **failed-action**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>failed-action</b> context   |
| Context    | <b>configure service ies</b> <i>string subscriber-interface string group-interface string sap string static-host ipv6 string mac string managed-route string cpe-check failed-action</i> |
| Tree       | <b>failed-action</b>   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **metric** *number*

|            |  |
|------------|--|
| Synopsis   | Metric associated with the provisioned managed route   |
| Context    | <b>configure service ies</b> <i>string subscriber-interface string group-interface string sap string static-host ipv6 string mac string managed-route string cpe-check failed-action metric number</i> |
| Tree       | <b>metric</b>  |
| Max. Range | 0 to 4294967295  |
| Default    | 0  |

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> . |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **preference number**

|            |   |
|------------|---|
| Synopsis   | Preference associated to the provisioned managed route  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host</b> <b>ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check</b> <b>failed-action</b> <b>preference</b> <i>number</i> |
| Tree       | <b>preference</b>   |
| Range      | 0 to 255  |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> .  |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **tag number**

|            |  |
|------------|--|
| Synopsis   | Route tag used if CPE check fails  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host</b> <b>ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check</b> <b>failed-action</b> <b>tag</b> <i>number</i> |
| Tree       | <b>tag</b>   |
| Max. Range | 0 to 4294967295  |
| Default    | 0  |
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> .   |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **withdraw boolean**

|          |  |
|----------|--|
| Synopsis | Withdraw the route when the CPE check fails  |
| Context  | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host</b> <b>ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check</b> <b>failed-action</b> <b>withdraw</b> <i>boolean</i> |
| Tree     | <b>withdraw</b>  |
| Default  | false  |

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: ( <b>metric</b> , <b>preference</b> , and <b>tag</b> ) or <b>withdraw</b> . |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **interval** *number*

|            |  |
|------------|--|
| Synopsis   | Interval between ICMP pings to target CPE IP address   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host</b> <b>ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check</b> <b>interval</b> <i>number</i> |
| Tree       | <b>interval</b>  |
| Range      | 1 to 255   |
| Units      | seconds  |
| Default    | 1  |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **log** *boolean*

|            |  |
|------------|--|
| Synopsis   | Log CPE connectivity checks transitions  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host</b> <b>ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check</b> <b>log</b> <i>boolean</i> |
| Tree       | <b>log</b>   |
| Default    | false  |
| Introduced | 22.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **padding-size** *number*

|            |  |
|------------|--|
| Synopsis   | Padding size for CPE connectivity checks   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host</b> <b>ipv6</b> <i>string</i> <b>mac</b> <i>string</i> <b>managed-route</b> <i>string</i> <b>cpe-check</b> <b>padding-size</b> <i>number</i> |
| Tree       | <b>padding-size</b>  |
| Range      | 0 to 16384   |
| Units      | bytes  |
| Default    | 56   |
| Introduced | 22.10.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **source-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Source IP address used in the ICMP messages

Context **configure** **service ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host ipv6** *string* **mac** *string* **managed-route** *string* **cpe-check** **source-ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [source-ip-address](#)

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **timeout** *number*

Synopsis Time interval determining that a ping is missed

Context **configure** **service ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host ipv6** *string* **mac** *string* **managed-route** *string* **cpe-check** **timeout** *number*

Tree [timeout](#)

Range 1 to 10

Units seconds

Default 1

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **metric** *number*

Synopsis Metric associated with the provisioned managed route

Context **configure** **service ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host ipv6** *string* **mac** *string* **managed-route** *string* **metric** *number*

Tree [metric](#)

Description This command configures a metric to associate with the provisioned managed route.

Max. Range 0 to 4294967295

Default 0

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**preference number**

|             |   |
|-------------|---|
| Synopsis    | Preference associated to the provisioned managed route  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">preference</a> <i>number</i> |
| Tree        | <a href="#">preference</a>  |
| Description | This command configures the preference associated with the provisioned managed route.   |
| Range       | 0 to 255  |
| Default     | 0   |
| Introduced  | 22.2.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**tag number**

|            |  |
|------------|--|
| Synopsis   | Route tag used if CPE check fails  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">managed-route</a> <i>string</i> <a href="#">tag</a> <i>number</i> |
| Tree       | <a href="#">tag</a>  |
| Max. Range | 0 to 4294967295  |
| Default    | 0  |
| Introduced | 22.2.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**retail-svc-id number****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Retail service ID  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">retail-svc-id</a> <i>number</i> |
| Tree       | <a href="#">retail-svc-id</a>  |
| Range      | 1 to 2147483647  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## shcv

|            |   |
|------------|---|
| Synopsis   | Enter the <b>shcv</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">shcv</a> |
| Tree       | <a href="#">shcv</a>  |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## sla-profile *reference*

|            |   |
|------------|---|
| Synopsis   | SLA profile name  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">sla-profile</a> <i>reference</i> |
| Tree       | <a href="#">sla-profile</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## sub-profile *reference*

|            |   |
|------------|---|
| Synopsis   | Sub-profile name  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">sub-profile</a> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## subscriber-id

|            |  |
|------------|--|
| Synopsis   | Enter the <b>subscriber-id</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">static-host</a> <a href="#">ipv6</a> <i>string</i> <a href="#">mac</a> <i>string</i> <a href="#">subscriber-id</a> |
| Tree       | <a href="#">subscriber-id</a>  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **string** *string*

Synopsis Subscriber identification

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host** **ipv6** *string* **mac** *string* **subscriber-id** *string* *string*

Tree **string**

String Length 1 to 64

Notes The following elements are part of a choice: **string** or **use-sap-id**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **use-sap-id**

Synopsis Use the SAP id as subscriber ID

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host** **ipv6** *string* **mac** *string* **subscriber-id** **use-sap-id**

Tree **use-sap-id**

Notes The following elements are part of a choice: **string** or **use-sap-id**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **mac-learning**

Synopsis Enter the **mac-learning** context

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **sap** *string* **static-host** **mac-learning**

Tree **mac-learning**

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **data-triggered** *boolean*

Synopsis Enable learning of MAC addresses from data packets

|            |  |
|------------|--|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host mac-learning data-triggered</b> <i>boolean</i> |
| Tree       | <b>data-triggered</b>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **single-mac** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enforce single MAC address and subscriber for the SAP  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>static-host mac-learning single-mac</b> <i>boolean</i> |
| Tree       | <b>single-mac</b>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **sub-sla-mgmt**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sub-sla-mgmt</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt</b> |
| Tree       | <b>sub-sla-mgmt</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of SAP subscriber management   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>sap</b> <i>string</i> <b>sub-sla-mgmt admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**defaults**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>defaults</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> |
| Tree       | <a href="#">defaults</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**app-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Default application profile name for this SAP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">app-profile</a> <i>reference</i> |
| Tree       | <a href="#">app-profile</a>  |
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-profile</a> <a href="#">string</a>   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**int-dest-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>int-dest-id</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">int-dest-id</a> |
| Tree       | <a href="#">int-dest-id</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**string** *string*

|               |   |
|---------------|---|
| Synopsis      | Use the configured string   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">int-dest-id</a> <a href="#">string</a> <a href="#">string</a> |
| Tree          | <a href="#">string</a>  |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a choice: <b>string</b> or <b>top-q-tag</b> .  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## top-q-tag

|            |   |
|------------|---|
| Synopsis   | Use the top Q-tag of this SAP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">int-dest-id</a> <a href="#">top-q-tag</a> |
| Tree       | <a href="#">top-q-tag</a>   |
| Notes      | The following elements are part of a choice: <b>string</b> or <b>top-q-tag</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## sla-profile *reference*

|            |  |
|------------|--|
| Synopsis   | Default SLA profile for hosts on this SAP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">sla-profile</a> <i>reference</i> |
| Tree       | <a href="#">sla-profile</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <a href="#">string</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## sub-profile *reference*

|            |  |
|------------|--|
| Synopsis   | Default subscriber profile for the SAP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">sub-profile</a> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <a href="#">string</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## subscriber-id

|          |  |
|----------|--|
| Synopsis | Enter the <b>subscriber-id</b> context |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>sap</i> <i>string</i> <i>sub-sla-mgmt</i> defaults <i>subscriber-id</i> |
| Tree       | <a href="#">subscriber-id</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## auto-id

|            |   |
|------------|---|
| Synopsis   | Use auto-generated subscriber identification string   |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>sap</i> <i>string</i> <i>sub-sla-mgmt</i> defaults <i>subscriber-id</i> <i>auto-id</i> |
| Tree       | <a href="#">auto-id</a>   |
| Notes      | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## sap-id

|            |  |
|------------|--|
| Synopsis   | Use SAP ID as default subscriber identification string   |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>sap</i> <i>string</i> <i>sub-sla-mgmt</i> defaults <i>subscriber-id</i> <i>sap-id</i> |
| Tree       | <a href="#">sap-id</a>   |
| Notes      | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## string *string*

|               |  |
|---------------|--|
| Synopsis      | Default subscriber identification string for the SAP   |
| Context       | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>sap</i> <i>string</i> <i>sub-sla-mgmt</i> defaults <i>subscriber-id</i> <i>string</i> <i>string</i> |
| Tree          | <a href="#">string</a>   |
| String Length | 1 to 64  |
| Notes         | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## single-sub-parameters

|            |  |
|------------|--|
| Synopsis   | Enter the <b>single-sub-parameters</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> |
| Tree       | <a href="#">single-sub-parameters</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## non-sub-traffic

|            |  |
|------------|--|
| Synopsis   | Enable the <b>non-sub-traffic</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic</a> |
| Tree       | <a href="#">non-sub-traffic</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## app-profile *reference*

|            |   |
|------------|---|
| Synopsis   | Application profile name for all non-subscriber traffic   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic</a> <a href="#">app-profile</a> <i>reference</i> |
| Tree       | <a href="#">app-profile</a>   |
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-profile</a> <a href="#">string</a>  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## sla-profile *reference*

|           |   |
|-----------|---|
| Synopsis  | SLA profile applicable for all non-subscriber traffic   |
| Context   | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic</a> <a href="#">sla-profile</a> <i>reference</i> |
| Tree      | <a href="#">sla-profile</a>   |
| Reference | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <a href="#">string</a>   |
| Notes     | This element is mandatory.  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **sub-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Subscriber profile all non-subscriber traffic   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic</a> <a href="#">sub-profile</a> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **subscriber-id** *string*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Subscriber ID applied for all non-subscriber traffic   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">non-sub-traffic</a> <a href="#">subscriber-id</a> <i>string</i> |
| Tree          | <a href="#">subscriber-id</a>  |
| String Length | 1 to 64  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **profiled-traffic-only** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include all traffic in subscriber profile   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">single-sub-parameters</a> <a href="#">profiled-traffic-only</a> <i>boolean</i> |
| Tree       | <a href="#">profiled-traffic-only</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sub-ident-policy** *reference*

Synopsis Subscriber identification policy used on this SAP

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [sub-sla-mgmt](#) [sub-ident-policy](#) *reference*

Tree [sub-ident-policy](#)

Reference **configure** [subscriber-mgmt](#) [sub-ident-policy](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **subscriber-limit** (*keyword* | *number*)

Synopsis Maximum number of subscribers on this SAP

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap](#) *string* [sub-sla-mgmt](#) [subscriber-limit](#) (*keyword* | *number*)

Tree [subscriber-limit](#)

Range 1 to 131071

Options no-limit

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sap-parameters**

Synopsis Enter the **sap-parameters** context

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [sap-parameters](#)

Tree [sap-parameters](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **anti-spoof** *keyword*

Synopsis Anti-spoof type of the SAP

|            |   |
|------------|---|
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap-parameters anti-spoof</i> <i>keyword</i> |
| Tree       | <a href="#">anti-spoof</a>  |
| Options    | ip-mac, nh-mac  |
| Default    | ip-mac  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### description *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure service ies</b> <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap-parameters description</i> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### sub-sla-mgmt

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sub-sla-mgmt</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap-parameters sub-sla-mgmt</i> |
| Tree       | <a href="#">sub-sla-mgmt</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### defaults

|            |   |
|------------|---|
| Synopsis   | Enter the <b>defaults</b> context   |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>sap-parameters sub-sla-mgmt defaults</i> |
| Tree       | <a href="#">defaults</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**app-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Default application profile name  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap-parameters</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">app-profile</a> <a href="#">reference</a> |
| Tree       | <a href="#">app-profile</a>   |
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <a href="#">number</a> <a href="#">partition</a> <a href="#">number</a> <a href="#">policy</a> <a href="#">app-profile</a> <a href="#">string</a>  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**sla-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Default SLA profile   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap-parameters</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">sla-profile</a> <a href="#">reference</a> |
| Tree       | <a href="#">sla-profile</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <a href="#">string</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**sub-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Default subscriber profile  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap-parameters</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">sub-profile</a> <a href="#">reference</a> |
| Tree       | <a href="#">sub-profile</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <a href="#">string</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**subscriber-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>subscriber-id</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">sap-parameters</a> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">subscriber-id</a> |
| Tree       | <a href="#">subscriber-id</a>   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## auto-id

Synopsis Subscriber ID that is autogenerated

Context **configure service ies string subscriber-interface string group-interface string sap-parameters sub-sla-mgmt defaults subscriber-id auto-id**

Tree [auto-id](#)

Notes The following elements are part of a choice: **auto-id** or **string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## string string

Synopsis String to be used as default subscriber ID

Context **configure service ies string subscriber-interface string group-interface string sap-parameters sub-sla-mgmt defaults subscriber-id string string**

Tree [string](#)

String Length 1 to 64

Notes The following elements are part of a choice: **auto-id** or **string**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## sub-ident-policy reference

Synopsis Subscriber identification policy

Context **configure service ies string subscriber-interface string group-interface string sap-parameters sub-sla-mgmt sub-ident-policy reference**

Tree [sub-ident-policy](#)

Reference **configure subscriber-mgmt sub-ident-policy string**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## shcv-policy reference

Synopsis SHCV policy for IPv4 and IPv6 subscriber hosts

|            |   |
|------------|---|
| Context    | <b>configure service ies</b> <i>string subscriber-interface string group-interface string shcv-policy reference</i> |
| Tree       | <a href="#">shcv-policy</a>   |
| Reference  | <b>configure subscriber-mgmt shcv-policy</b> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **shcv-policy-ipv4** *reference*

|            |  |
|------------|--|
| Synopsis   | SHCV for IPv4 subscriber hosts   |
| Context    | <b>configure service ies</b> <i>string subscriber-interface string group-interface string shcv-policy-ipv4 reference</i> |
| Tree       | <a href="#">shcv-policy-ipv4</a>   |
| Reference  | <b>configure subscriber-mgmt shcv-policy</b> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **shcv-policy-ipv6** *reference*

|            |  |
|------------|--|
| Synopsis   | SHCV for IPv6 subscriber hosts   |
| Context    | <b>configure service ies</b> <i>string subscriber-interface string group-interface string shcv-policy-ipv6 reference</i> |
| Tree       | <a href="#">shcv-policy-ipv6</a>   |
| Reference  | <b>configure subscriber-mgmt shcv-policy</b> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **srrp** [[srrp-id](#)] *number*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>srrp</b> list instance   |
| Context        | <b>configure service ies</b> <i>string subscriber-interface string group-interface string srrp number</i> |
| Tree           | <a href="#">srrp</a>  |
| Max. Instances | 1   |
| Introduced     | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[srrp-id]** *number*

Synopsis SRRP instance ID

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **srrp** *number*

Tree **srrp**

Range 1 to 4294967295

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of SRRP

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **srrp** *number* **admin-state** *keyword*

Tree **admin-state**

Options enable, disable

Default disable

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **bfd-liveness**

Synopsis Enable the **bfd-liveness** context

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **group-interface** *string* **srrp** *number* **bfd-liveness**

Tree **bfd-liveness**

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**dest-ip** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Destination IPv4 prefix  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>srrp</b> <i>number</i> <b>bfd-liveness</b> <b>dest-ip</b> <i>string</i> |
| Tree       | <b>dest-ip</b>   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**interface-name** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Name of the interface running BFD   |
| Context       | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>srrp</b> <i>number</i> <b>bfd-liveness</b> <b>interface-name</b> <i>string</i> |

| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**monitor-oper-group**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>monitor-oper-group</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">srrp</a> <i>number</i> <a href="#">monitor-oper-group</a> |
| Tree       | <a href="#">monitor-oper-group</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**group-name** *reference*

|            |   |
|------------|---|
| Synopsis   | Operational group name  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">srrp</a> <i>number</i> <a href="#">monitor-oper-group</a> <a href="#">group-name</a> <i>reference</i> |
| Tree       | <a href="#">group-name</a>  |
| Reference  | <b>configure</b> <a href="#">service</a> <a href="#">oper-group</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**priority-step** *number*

|          |   |
|----------|---|
| Synopsis | Step value to change priority of SRRP instance  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">srrp</a> <i>number</i> <a href="#">monitor-oper-group</a> <a href="#">priority-step</a> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">priority-step</a>                           |
| Range      | 1 to 10   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **one-garp-per-sap** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send one gratuitous ARP to each SAP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">srrp</a> <a href="#">number</a> <b>one-garp-per-sap</b> <i>boolean</i> |
| Tree       | <a href="#">one-garp-per-sap</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **policy** *reference*

|                |   |
|----------------|---|
| Synopsis       | VRRP priority control policy associated with the SRRP   |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">srrp</a> <a href="#">number</a> <b>policy</b> <i>reference</i> |
| Tree           | <a href="#">policy</a>  |
| Reference      | <b>configure</b> <a href="#">vrrp</a> <a href="#">policy</a> <a href="#">number</a>   |
| Max. Instances | 2   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **preempt** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow the SRRP instance to override an existing master   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">srrp</a> <a href="#">number</a> <b>preempt</b> <i>boolean</i> |
| Tree       | <a href="#">preempt</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **priority** *number*

Synopsis Priority for this interface at this level

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [srrp](#) *number* [priority](#) *number*

Tree [priority](#)

Range 1 to 254

Default 100

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **send-fib-population-packets** *keyword*

Synopsis Mode used to send FIB population packets on switchover

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [srrp](#) *number* [send-fib-population-packets](#) *keyword*

Tree [send-fib-population-packets](#)

Options all, outer-tag-only

Default all

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **suppress-aa-sub** *boolean*

Synopsis Enable application assurance suppression for ESM subscribers

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [suppress-aa-sub](#) *boolean*

Tree [suppress-aa-sub](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**tos-marking-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | TOS marking state   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <b>tos-marking-state</b> <i>keyword</i> |
| Tree       | <a href="#">tos-marking-state</a>   |
| Options    | trusted, untrusted  |
| Default    | untrusted   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Group interface type   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <b>type</b> <i>keyword</i> |
| Tree       | <a href="#">type</a>   |
| Options    | plain, lns, wlan-gw, gtp, bonding  |
| Default    | plain  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**wlan-gw**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>wlan-gw</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <b>wlan-gw</b> |
| Tree       | <a href="#">wlan-gw</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|          |                                      |
|----------|--------------------------------------|
| Synopsis | Administrative state of WLAN Gateway |
|----------|--------------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **gateway-address** [**address**] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>gateway-address</b> list instance   |
| Context        | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>gateway-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree           | <b>gateway-address</b>   |
| Max. Instances | 10   |
| Introduced     | 16.0.R4  |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | Gateway endpoint address of the WLAN Gateway tunnel  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>gateway-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |
| Tree       | <b>gateway-address</b>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R4  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **purpose**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>purpose</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>gateway-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>purpose</b> |
| Tree       | <b>purpose</b>  |
| Introduced | 16.0.R4   |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **xconnect** *boolean*

Synopsis Use tunnel IP address for crosse-connect traffic

Context **configure** *service ies string subscriber-interface string group-interface string wlan-gw gateway-address (ipv4-address-no-zone | ipv6-address-no-zone) purpose xconnect boolean*

Tree [xconnect](#)

Default false

Introduced 16.0.R4

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **gateway-router** *string*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Routing instance the WLAN-GW endpoint resides in

Context **configure** *service ies string subscriber-interface string group-interface string wlan-gw gateway-router string*

Tree [gateway-router](#)

Introduced 16.0.R4

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **group-encryption**

Synopsis Enter the **group-encryption** context

Context **configure** *service ies string subscriber-interface string group-interface string wlan-gw group-encryption*

Tree [group-encryption](#)

Introduced 21.10.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**encryption-keygroup-inbound** *reference*

|            |   |
|------------|---|
| Synopsis   | Encryption keygroup for inbound traffic   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">group-encryption</a> <a href="#">encryption-keygroup-inbound</a> <i>reference</i> |
| Tree       | <a href="#">encryption-keygroup-inbound</a>   |
| Reference  | <b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i>   |
| Introduced | 21.10.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**encryption-keygroup-outbound** *reference*

|            |  |
|------------|--|
| Synopsis   | Encryption keygroup for inbound traffic  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">group-encryption</a> <a href="#">encryption-keygroup-outbound</a> <i>reference</i> |
| Tree       | <a href="#">encryption-keygroup-outbound</a>   |
| Reference  | <b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i>  |
| Introduced | 21.10.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**I2-ap**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>I2-ap</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">I2-ap</a> |
| Tree       | <a href="#">I2-ap</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**access-point** [[sap-id](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>access-point</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">I2-ap</a> <a href="#">access-point</a> <i>string</i> |
| Tree       | <a href="#">access-point</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**[sap-id] string**

|               |  |
|---------------|--|
| Synopsis      | SAP ID for the Layer 2 access point  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw l2-ap</a> <a href="#">access-point</a> <i>string</i> |
| Tree          | <a href="#">access-point</a>   |
| String Length | 1 to 45  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state keyword**

|            |  |
|------------|--|
| Synopsis   | Administrative state of the L2 access points   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw l2-ap</a> <a href="#">access-point</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**encap-type keyword****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Service encapsulation type of this access point   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw l2-ap</a> <a href="#">access-point</a> <i>string</i> <b>encap-type</b> <i>keyword</i> |
| Tree       | <a href="#">encap-type</a>  |
| Options    | null, dot1q, qinq   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## epipe-sap-template *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Parameters template for the L2 access point SAP  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw l2-ap access-point</b> <i>string</i> <b>epipe-sap-template</b> <i>reference</i> |
| Tree       | <b>epipe-sap-template</b>  |
| Reference  | <b>configure service template epipe-sap-template</b> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## auto-sub-id-fmt *keyword*

|            |   |
|------------|---|
| Synopsis   | Format of the auto-generated subscriber ID  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw l2-ap auto-sub-id-fmt</b> <i>keyword</i> |
| Tree       | <b>auto-sub-id-fmt</b>  |
| Options    | include-ap-tags, sap-only   |
| Default    | include-ap-tags   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## default-encap-type *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Default encapsulation type for Layer 2 access points   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw l2-ap default-encap-type</b> <i>keyword</i> |
| Tree       | <b>default-encap-type</b>  |
| Options    | null, dot1q, qinq  |
| Default    | null   |
| Introduced | 16.0.R1  |

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## lanext

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enable the **lanext** context

Context **configure service ies string subscriber-interface string group-interface string wlan-gw lanext**

Tree **lanext**

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## max-bd *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Maximum number of bridge domains

Context **configure service ies string subscriber-interface string group-interface string wlan-gw lanext max-bd number**

Tree **max-bd**

Range 1 to 131071

Default 131071

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## learn-ap-mac

Synopsis Enable the **learn-ap-mac** context

Context **configure service ies string subscriber-interface string group-interface string wlan-gw learn-ap-mac**

Tree **learn-ap-mac**

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**delay-auth** *boolean*

|            |  |
|------------|--|
| Synopsis   | Delay AP-MAC until after ARP/ND authentication response  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>learn-ap-mac</b> <b>delay-auth</b> <i>boolean</i> |
| Tree       | <b>delay-auth</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**mobility**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mobility</b> context   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility</b> |
| Tree       | <b>mobility</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**hold-time** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum time between two mobility events for single UE   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility</b> <b>hold-time</b> <i>number</i> |
| Tree       | <b>hold-time</b>   |
| Range      | 0 to 255   |
| Units      | seconds  |
| Default    | 5  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**inter-tunnel-type** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Enable mobility between terminating tunnel types  |
| Context    | <b>configure</b> <b>service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility inter-tunnel-type</b> <i>boolean</i> |
| Tree       | <b>inter-tunnel-type</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **inter-vlan** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow mobility within different VLANs of the same range  |
| Context    | <b>configure</b> <b>service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility inter-vlan</b> <i>boolean</i> |
| Tree       | <b>inter-vlan</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **trigger**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>trigger</b> context   |
| Context    | <b>configure</b> <b>service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility trigger</b> |
| Tree       | <b>trigger</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **control** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use control traffic as a mobility trigger   |
| Context    | <b>configure</b> <b>service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility trigger control</b> <i>boolean</i> |
| Tree       | <b>control</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**data** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use data traffic as mobility trigger   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility trigger</b> <b>data</b> <i>boolean</i> |
| Tree       | <b>data</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**iapp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use IAPP messages as a mobility trigger  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>mobility trigger</b> <b>iapp</b> <i>boolean</i> |
| Tree       | <b>iapp</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**oper-down-on-group-degrade** *boolean*

|            |  |
|------------|--|
| Synopsis   | Bring interface down when the ISA WLAN Gateway degraded  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>oper-down-on-group-degrade</b> <i>boolean</i> |
| Tree       | <b>oper-down-on-group-degrade</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**tcp-mss-adjust** *number*

|          |   |
|----------|---|
| Synopsis | TCP Maximum Segment Size (MSS) adjustment for gateway   |
| Context  | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b><br><b>tcp-mss-adjust</b> <i>number</i> |
| Tree     | <b>tcp-mss-adjust</b>   |

|            |                                    |
|------------|------------------------------------|
| Range      | 160 to 10240                       |
| Units      | bytes                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## tunnel-egress-qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>tunnel-egress-qos</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <b>tunnel-egress-qos</b> |
| Tree       | <a href="#">tunnel-egress-qos</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Administrative state of egress QoS for WLAN-GW tunnels   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <b>tunnel-egress-qos</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## agg-rate-limit (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | HQoS aggregate rate limit   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <b>tunnel-egress-qos</b> <b>agg-rate-limit</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">agg-rate-limit</a>  |
| Range    | 1 to 100000000  |
| Options  | max   |

|            |                                    |
|------------|------------------------------------|
| Default    | max                                |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **granularity** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Granularity of the egress shaping for WLAN Gateway  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>tunnel-egress-qos</b> <b>granularity</b> <i>keyword</i> |
| Tree       | <a href="#">granularity</a>   |
| Options    | per-tunnel, per-retailer  |
| Default    | per-tunnel  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **hold-time** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Minimum time to hold egress shaping resources   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>tunnel-egress-qos</b> <b>hold-time</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">hold-time</a>   |
| Range      | 1 to 86400  |
| Units      | seconds   |
| Options    | infinite  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **multi-client-only** *boolean*

|          |   |
|----------|---|
| Synopsis | Allow shaping for tunnel traffic for multiple UEs   |
| Context  | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>tunnel-egress-qos</b> <b>multi-client-only</b> <i>boolean</i> |
| Tree     | <a href="#">multi-client-only</a>   |

|            |                                    |
|------------|------------------------------------|
| Default    | false                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### qos reference

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Egress QoS policy linked with each interface tunnel  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tunnel-egress-qos</a> <a href="#">qos</a> <i>reference</i> |
| Tree       | <a href="#">qos</a>  |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">sap-egress</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### scheduler-policy reference

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Egress scheduler policy linked with each tunnel   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tunnel-egress-qos</a> <a href="#">scheduler-policy</a> <i>reference</i> |
| Tree       | <a href="#">scheduler-policy</a>  |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">scheduler-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### tunnel-encaps

|          |   |
|----------|---|
| Synopsis | Enter the <b>tunnel-encaps</b> context  |
| Context  | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tunnel-encaps</a> |

|            |                                    |
|------------|------------------------------------|
| Tree       | <a href="#">tunnel-encaps</a>      |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **learn-l2tp-cookie** (*keyword* | *hex-string*)

|               |  |
|---------------|--|
| Synopsis      | System that learns the cookie from L2TP tunnels terminating on this interface  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">tunnel-encaps</a> <a href="#">learn-l2tp-cookie</a> ( <i>keyword</i>   <i>hex-string</i> ) |
| Tree          | <a href="#">learn-l2tp-cookie</a>  |
| String Length | 6  |
| Options       | never, always  |
| Default       | never  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **vlan-range** [[range](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>vlan-range</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> |
| Tree       | <a href="#">vlan-range</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **[range]** *string*

|            |  |
|------------|--|
| Synopsis   | IEEE 802.1q VLAN tag range   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> |
| Tree       | <a href="#">vlan-range</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## authentication

|            |  |
|------------|--|
| Synopsis   | Enter the <b>authentication</b> context  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>authentication</b> |
| Tree       | <b>authentication</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## hold-time *number*

|            |   |
|------------|---|
| Synopsis   | Minimum time UE held down after failed authentication   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>authentication</b> <b>hold-time</b> <i>number</i> |
| Tree       | <b>hold-time</b>  |
| Range      | 0 to 3600   |
| Units      | seconds   |
| Default    | 5   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## local

|            |   |
|------------|---|
| Synopsis   | Enable the <b>local</b> context   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>authentication</b> <b>local</b> |
| Tree       | <b>local</b>  |
| Introduced | 22.2.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## coa-policy *reference*

|           |  |
|-----------|--|
| Synopsis  | RADIUS ISA policy applied to CoA or disconnect messages  |
| Context   | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>authentication</b> <b>local</b> <b>coa-policy</b> <i>reference</i> |
| Tree      | <b>coa-policy</b>  |
| Reference | <b>configure</b> <b>aaa</b> <b>radius</b> <b>isa-policy</b> <i>string</i>  |

Introduced 22.2.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **default-ue-state** *keyword*

Synopsis UE state accepted for immediate authentication  
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [authentication](#) [local](#) **default-ue-state** *keyword*  
Tree [default-ue-state](#)  
Options portal, dsm  
Notes This element is mandatory.  
Introduced 22.2.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **on-control-plane** *boolean*

Synopsis Allow authentication on first control plane packet  
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [authentication](#) [on-control-plane](#) *boolean*  
Tree [on-control-plane](#)  
Default false  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policy** *reference*

Synopsis RADIUS policy for authentication  
Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [authentication](#) [policy](#) *reference*  
Tree [policy](#)  
Reference **configure** [aaa](#) [radius](#) [isa-policy](#) *string*  
Introduced 16.0.R1  
Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**vlan-mismatch-timeout** *number*

|            |   |
|------------|---|
| Synopsis   | Timeout if packet received with a non-matching VLAN tag   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">authentication</a> <a href="#">vlan-mismatch-timeout</a> <i>number</i> |
| Tree       | <a href="#">vlan-mismatch-timeout</a>   |
| Range      | 5 to 60   |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**data-triggered-ue-creation**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>data-triggered-ue-creation</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">data-triggered-ue-creation</a> |
| Tree       | <a href="#">data-triggered-ue-creation</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of data-triggered UE creation   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">data-triggered-ue-creation</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**arp** *boolean*

|          |  |
|----------|--|
| Synopsis | Authenticate ARP packets received from an unknown UE   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">data-triggered-ue-creation</a> <a href="#">arp</a> <i>boolean</i> |
| Tree     | <a href="#">arp</a>  |

|            |                                    |
|------------|------------------------------------|
| Default    | false                              |
| Introduced | 22.7.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### create-proxy-cache-entry

|            |  |
|------------|--|
| Synopsis   | Enter the <b>create-proxy-cache-entry</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">data-triggered-ue-creation</a> <a href="#">create-proxy-cache-entry</a> |
| Tree       | <a href="#">create-proxy-cache-entry</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### mac-format *string*

|               |  |
|---------------|--|
| Synopsis      | MAC address format   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">data-triggered-ue-creation</a> <a href="#">create-proxy-cache-entry</a> <a href="#">mac-format</a> <a href="#">string</a> |
| Tree          | <a href="#">mac-format</a>   |
| String Length | 2 to 7   |
| Default       | aa:  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### proxy-server

|            |   |
|------------|---|
| Synopsis   | Enable the <b>proxy-server</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">data-triggered-ue-creation</a> <a href="#">create-proxy-cache-entry</a> <a href="#">proxy-server</a> |
| Tree       | <a href="#">proxy-server</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### name *string*

|          |                          |
|----------|--------------------------|
| Synopsis | RADIUS Proxy server name |
|----------|--------------------------|

|               |  |
|---------------|--|
| Context       | <b>configure service ies</b> <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw vlan-range string</i> <i>data-triggered-ue-creation</i> <i>create-proxy-cache-entry</i> <i>proxy-server name string</i> |
| Tree          | <a href="#">name</a>   |
| String Length | 1 to 32  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **router-instance** *string*

|            |   |
|------------|---|
| Synopsis   | Router instance of the RADIUS proxy server  |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw vlan-range string</i> <i>data-triggered-ue-creation</i> <i>create-proxy-cache-entry</i> <i>proxy-server router-instance string</i> |
| Tree       | <a href="#">router-instance</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R4   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **dhcp4**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dhcp4</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw vlan-range string</i> <b>dhcp4</b> |
| Tree       | <a href="#">dhcp4</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of DHCPv4  |
| Context  | <b>configure service ies</b> <i>string</i> <i>subscriber-interface string</i> <i>group-interface string</i> <i>wlan-gw vlan-range string</i> <b>dhcp4 admin-state keyword</b> |
| Tree     | <a href="#">admin-state</a>   |
| Options  | enable, disable   |
| Default  | disable   |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **dns string**

|                |   |
|----------------|---|
| Synopsis       | DNS servers signaled in DHCP  |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dhcp4</a> <a href="#">dns</a> <a href="#">string</a> |
| Tree           | <a href="#">dns</a>   |
| Max. Instances | 2   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **l2-aware-ip-address** ([ipv4-unicast-address](#) | [keyword](#))

|            |   |
|------------|---|
| Synopsis   | L2-Aware NAT inside IP address  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dhcp4</a> <a href="#">l2-aware-ip-address</a> ( <a href="#">ipv4-unicast-address</a>   <a href="#">keyword</a> ) |
| Tree       | <a href="#">l2-aware-ip-address</a>   |
| Options    | <a href="#">from-pool</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **lease-time**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lease-time</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dhcp4</a> <a href="#">lease-time</a> |
| Tree       | <a href="#">lease-time</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**active number**

|            |   |
|------------|---|
| Synopsis   | Lease time an authenticated user  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp4</b> <b>lease-time</b> <b>active</b> <b>number</b> |
| Tree       | <b>active</b>   |
| Range      | 300 to 3600   |
| Units      | seconds   |
| Default    | 600   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**initial number**

|            |  |
|------------|--|
| Synopsis   | Lease time for migrant user (unauthenticated)  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp4</b> <b>lease-time</b> <b>initial</b> <b>number</b> |
| Tree       | <b>initial</b>   |
| Range      | 300 to 3600  |
| Units      | seconds  |
| Default    | 600  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**nbns string**

|                |   |
|----------------|---|
| Synopsis       | NetBIOS servers signaled in DHCP  |
| Context        | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp4</b> <b>nbns</b> <b>string</b> |
| Tree           | <b>nbns</b>   |
| Max. Instances | 2   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## dhcp6

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dhcp6</b> context  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp6</b> |
| Tree       | <b>dhcp6</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the protocol  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp6</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## preferred-lifetime

|            |   |
|------------|---|
| Synopsis   | Enter the <b>preferred-lifetime</b> context   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp6</b> <b>preferred-lifetime</b> |
| Tree       | <b>preferred-lifetime</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## active *number*

|          |   |
|----------|---|
| Synopsis | Preferred signaled lifetime after full authentication   |
| Context  | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp6</b> <b>preferred-lifetime</b> <b>active</b> <i>number</i> |
| Tree     | <b>active</b>   |
| Range    | 300 to 3600   |
| Units    | seconds   |

|            |                                    |
|------------|------------------------------------|
| Default    | 600                                |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **initial number**

|            |   |
|------------|---|
| Synopsis   | Signaled preferred lifetime after full authentication   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <i>string</i> <b>vlan-range</b> <i>string</i> <b>dhcp6 preferred-lifetime initial number</b> |
| Tree       | <b>initial</b>  |
| Range      | 300 to 3600   |
| Units      | seconds   |
| Default    | 300   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **valid-lifetime**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>valid-lifetime</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <i>string</i> <b>vlan-range</b> <i>string</i> <b>dhcp6 valid-lifetime</b> |
| Tree       | <b>valid-lifetime</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **active number**

|            |  |
|------------|--|
| Synopsis   | Signaled valid lifetime after full authentication  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <i>string</i> <b>vlan-range</b> <i>string</i> <b>dhcp6 valid-lifetime active number</b> |
| Tree       | <b>active</b>  |
| Range      | 300 to 3600  |
| Units      | seconds  |
| Default    | 600  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**initial number**

|            |  |
|------------|--|
| Synopsis   | Valid signaled lifetime UE is not fully authenticated  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dhcp6</b> <b>valid-lifetime</b> <b>initial</b> <i>number</i> |
| Tree       | <b>initial</b>   |
| Range      | 300 to 3600  |
| Units      | seconds  |
| Default    | 300  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**dsm**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dsm</b> context  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dsm</b> |
| Tree       | <b>dsm</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**accounting-policy** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | ISA Radius Policy for accounting  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>dsm</b> <b>accounting-policy</b> <i>reference</i> |
| Tree       | <b>accounting-policy</b>  |
| Reference  | <b>configure</b> <b>aaa</b> <b>radius</b> <b>isa-policy</b> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## accounting-update

|            |   |
|------------|---|
| Synopsis   | Enable the <b>accounting-update</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <b>accounting-update</b> |
| Tree       | <a href="#">accounting-update</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## interval *number*

|            |   |
|------------|---|
| Synopsis   | Interim accounting update messages interval   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <b>accounting-update</b> <b>interval</b> <i>number</i> |
| Tree       | <a href="#">interval</a>  |
| Range      | 5 to 259200   |
| Units      | minutes   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of DSM  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## application-assurance

|          |   |
|----------|---|
| Synopsis | Enter the <b>application-assurance</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <b>application-assurance</b> |

Tree [application-assurance](#)  
 Introduced 21.10.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **accounting-statistics** *boolean*

Synopsis Collect AA statistics  
 Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [dsm](#) [application-assurance](#) [accounting-statistics](#) *boolean*  
 Tree [accounting-statistics](#)  
 Default false  
 Introduced 21.10.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **profile** *reference*

Synopsis AA application profile used for portal authentication  
 Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [dsm](#) [application-assurance](#) [profile](#) *reference*  
 Tree [profile](#)  
 Reference **configure** [application-assurance](#) [group](#) *number* [partition](#) *number* [policy](#) [app-profile](#) *string*  
 Introduced 21.10.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **url-parameter** *string*

Synopsis AA URL parameter included for HTTP portal redirect  
 Context **configure** [service](#) [ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [dsm](#) [application-assurance](#) [url-parameter](#) *string*  
 Tree [url-parameter](#)  
 String Length 1 to 247  
 Introduced 22.2.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## egress

|            |   |
|------------|---|
| Synopsis   | Enter the <b>egress</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <a href="#">egress</a> |
| Tree       | <a href="#">egress</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## policer reference

|            |   |
|------------|---|
| Synopsis   | Policer for egress traffic  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <a href="#">egress</a> <a href="#">policer</a> <a href="#">reference</a> |
| Tree       | <a href="#">policer</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-policer</a> <a href="#">string</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## ingress

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ingress</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <a href="#">ingress</a> |
| Tree       | <a href="#">ingress</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ip-filter reference

|            |  |
|------------|--|
| Synopsis   | Filter for ingress traffic   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <a href="#">ingress</a> <a href="#">ip-filter</a> <a href="#">reference</a> |
| Tree       | <a href="#">ip-filter</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-filter</a> <a href="#">string</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **policer** *reference*

|            |   |
|------------|---|
| Synopsis   | Policer for ingress traffic   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm ingress policer</a> <i>reference</i> |
| Tree       | <a href="#">policer</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt isa-policer</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **soft-quota-exhausted-filter** *reference*

|             |   |
|-------------|---|
| Synopsis    | Filter applied when soft volume quota is reached  |
| Context     | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm ingress soft-quota-exhausted-filter</a> <i>reference</i>   |
| Tree        | <a href="#">soft-quota-exhausted-filter</a>   |
| Description | This command applies a filter when a soft volume quota is reached. The filter replaces the currently applied filter (which can be preconfigured using the <b>ip-filter</b> command in the <b>configure service vprn subscriber-interface group-interface wlan-gw vlan-range dsm ingress ip-filter</b> context or be set using a RADIUS CoA message) for the UE upon quota exhaustion. If the quota is extended using a RADIUS CoA message, the filter is automatically reverted. Configuration changes apply only to new DSM UEs and not to existing UEs. |
| Reference   | <b>configure</b> <a href="#">subscriber-mgmt isa-filter</a> <i>string</i>   |
| Introduced  | 21.7.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **one-time-redirect**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>one-time-redirect</b> context   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">dsm one-time-redirect</a> |
| Tree       | <a href="#">one-time-redirect</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**port number**

|            |  |
|------------|--|
| Synopsis   | Destination port of packets for HTTP redirect  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <a href="#">one-time-redirect</a> <a href="#">port</a> <a href="#">number</a> |
| Tree       | <a href="#">port</a>   |
| Range      | 1 to 65535   |
| Default    | 80   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**url string**

|               |   |
|---------------|---|
| Synopsis      | URL for redirected HTTP protocol packets  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <a href="#">one-time-redirect</a> <a href="#">url</a> <a href="#">string</a> |
| Tree          | <a href="#">url</a>   |
| String Length | 1 to 255  |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**volume-quota-direction keyword**

|             |   |
|-------------|---|
| Synopsis    | Volume quota direction for WLAN GW  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">dsm</a> <a href="#">volume-quota-direction</a> <a href="#">keyword</a> |
| Tree        | <a href="#">volume-quota-direction</a>  |
| Description | This command specifies the direction that volume quotas are applied. Configuration changes apply only to new DSM UEs and not to existing UEs.   |
| Options     | both, ingress, egress   |
| Default     | both  |
| Introduced  | 21.7.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**extension [[extension-range](#)] string**

|          |                                       |
|----------|---------------------------------------|
| Synopsis | Add a list entry for <b>extension</b> |
|----------|---------------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>extension</b> <i>string</i> |
| Tree       | <b>extension</b>  |
| Introduced | 21.7.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **[extension-range]** *string*

|             |   |
|-------------|---|
| Synopsis    | VLAN tag range used for matching  |
| Context     | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>extension</b> <i>string</i> |
| Tree        | <b>extension</b>  |
| Description | This command configures the additional VLAN range that is used for matching. Any traffic within the extension range is considered part of the same VLAN range for purposes of intra-SSID mobility.      |
| Notes       | This element is part of a list key.   |
| Introduced  | 21.7.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **http-redirect-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Default HTTP redirect policy for portal authentication  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>http-redirect-policy</b> <i>reference</i> |
| Tree       | <b>http-redirect-policy</b>   |
| Reference  | <b>configure subscriber-mgmt</b> <b>http-redirect-policy</b> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **idle-timeout-action** *keyword*

|          |  |
|----------|--|
| Synopsis | Action to perform when the idle timeout expires  |
| Context  | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>idle-timeout-action</b> <i>keyword</i> |
| Tree     | <b>idle-timeout-action</b>   |
| Options  | remove, shcv   |
| Default  | remove   |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## I2-service

|            |  |
|------------|--|
| Synopsis   | Enable the <b>I2-service</b> context   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>I2-service</b> |
| Tree       | <b>I2-service</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of Layer 2 service for VLAN range   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>I2-service</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## description *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>I2-service</b> <b>description</b> <i>string</i> |
| Tree          | <b>description</b>  |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## service reference

|          |   |
|----------|---|
| Synopsis | Layer 2 service associated with the range |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wlan-gw</i> <i>vlan-range</i> <i>string</i> <i>l2-service</i> <i>service</i> <i>reference</i> |
| Tree       | <a href="#">service</a>  |
| Reference  | <b>configure service vpls</b> <i>string</i>  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **nat-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | NAT policy for DSM and ISA portal authentication  |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wlan-gw</i> <i>vlan-range</i> <i>string</i> <i>nat-policy</i> <i>reference</i> |
| Tree       | <a href="#">nat-policy</a>  |
| Reference  | <b>configure service nat</b> <i>nat-policy</i> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **retail-service** *string*

|               |  |
|---------------|--|
| Synopsis      | Default retail service for new UEs in this range   |
| Context       | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wlan-gw</i> <i>vlan-range</i> <i>string</i> <i>retail-service</i> <i>string</i> |
| Tree          | <a href="#">retail-service</a>   |
| String Length | 1 to 64  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **slaac**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>slaac</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wlan-gw</i> <i>vlan-range</i> <i>string</i> <i>slaac</i> |
| Tree       | <a href="#">slaac</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the protocol   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">slaac</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**preferred-lifetime**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>preferred-lifetime</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">slaac</a> <b>preferred-lifetime</b> |
| Tree       | <a href="#">preferred-lifetime</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**active** *number*

|            |  |
|------------|--|
| Synopsis   | Preferred signaled lifetime after full authentication  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">slaac</a> <b>preferred-lifetime</b> <b>active</b> <i>number</i> |
| Tree       | <a href="#">active</a>   |
| Range      | 300 to 3600  |
| Units      | seconds  |
| Default    | 600  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**initial** *number*

|          |   |
|----------|---|
| Synopsis | Signaled preferred lifetime after full authentication |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>slaac preferred-lifetime initial</b> <i>number</i> |
| Tree       | <b>initial</b>   |
| Range      | 300 to 3600  |
| Units      | seconds  |
| Default    | 300  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **valid-lifetime**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>valid-lifetime</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>slaac valid-lifetime</b> |
| Tree       | <b>valid-lifetime</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **active number**

|            |   |
|------------|---|
| Synopsis   | Signaled valid lifetime after full authentication   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>slaac valid-lifetime active</b> <i>number</i> |
| Tree       | <b>active</b>   |
| Range      | 300 to 3600   |
| Units      | seconds   |
| Default    | 600   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **initial number**

|          |  |
|----------|--|
| Synopsis | Valid signaled lifetime UE is not fully authenticated  |
| Context  | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>slaac valid-lifetime initial</b> <i>number</i> |
| Tree     | <b>initial</b>   |

|            |                                    |
|------------|------------------------------------|
| Range      | 300 to 3600                        |
| Units      | seconds                            |
| Default    | 300                                |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## vrgw

|            |  |
|------------|--|
| Synopsis   | Enter the <b>vrgw</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>vrgw</b> |
| Tree       | <b>vrgw</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of vRGW  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>vrgw admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## brg

|            |  |
|------------|--|
| Synopsis   | Enter the <b>brg</b> context   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wlan-gw</b> <b>vlan-range</b> <i>string</i> <b>vrgw brg</b> |
| Tree       | <b>brg</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**authenticated-brg-only** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Only allow hosts from BRGs pre-authenticated using the radius-proxy   |
| Context    | <b>configure</b> <i>service ies string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw brg authenticated-brg-only boolean</i> |
| Tree       | <i>authenticated-brg-only</i>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**default-brg-profile** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Default BRG profile to use if the AAA server does not specify one  |
| Context    | <b>configure</b> <i>service ies string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw brg default-brg-profile reference</i> |
| Tree       | <i>default-brg-profile</i>   |
| Reference  | <b>configure</b> <i>subscriber-mgmt vrgw brg-profile string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**lanext**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lanext</b> context   |
| Context    | <b>configure</b> <i>service ies string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw lanext</i> |
| Tree       | <i>lanext</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## access

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Enter the <b>access</b> context   |
| Context    | <b>configure service ies string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw lanext access</b> |
| Tree       | <b>access</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## max-mac number

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Maximum number of allowed MAC entries on access side   |
| Context    | <b>configure service ies string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw lanext access max-mac number</b> |
| Tree       | <b>max-mac</b>   |
| Range      | 1 to 256   |
| Default    | 20   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## multi-access boolean

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Allow multiple access points   |
| Context  | <b>configure service ies string subscriber-interface string group-interface string wlan-gw vlan-range string vrgw lanext access multi-access boolean</b> |
| Tree     | <b>multi-access</b>  |
| Default  | false  |

Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policer** *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Policer for ingress home traffic  
 Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [group-interface](#) *string* [wlan-gw](#) [vlan-range](#) *string* [vrgw lanext access](#) [policer](#) *reference*

### **mac-translation** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Allow MAC address translation for HLE services   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <i>string</i> <a href="#">vrgw</a> <a href="#">lanext</a> <b>mac-translation</b> <i>boolean</i> |
| Tree       | <a href="#">mac-translation</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **network**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enter the <b>network</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">vrgw</a> <a href="#">lanext</a> <a href="#">network</a> |
| Tree       | <a href="#">network</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Administrative state of the HLE network  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">vrgw</a> <a href="#">lanext</a> <a href="#">network</a> <a href="#">admin-state</a> <a href="#">keyword</a> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **max-mac** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Maximum number of allowed MAC entries on network side   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">vrgw</a> <a href="#">lanext</a> <a href="#">network</a> <a href="#">max-mac</a> <a href="#">number</a> |
| Tree       | <a href="#">max-mac</a>   |
| Range      | 1 to 64   |
| Default    | 20  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## **policer** *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Policer for ingress data center traffic  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">vrgw</a> <a href="#">lanext</a> <a href="#">network</a> <a href="#">policer</a> <a href="#">reference</a> |
| Tree       | <a href="#">policer</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">isa-policer</a> <a href="#">string</a>  |
| Introduced | 19.7.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## **xconnect**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>xconnect</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">xconnect</a> |
| Tree       | <a href="#">xconnect</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## **accounting**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>accounting</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">xconnect</a> <a href="#">accounting</a> |
| Tree       | <a href="#">accounting</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## **mobility-updates** *boolean*

|          |   |
|----------|---|
| Synopsis | Accounting updates triggered by mobility  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">xconnect</a> <a href="#">accounting</a> <a href="#">mobility-updates</a> <a href="#">boolean</a> |
| Tree     | <a href="#">mobility-updates</a>  |

|            |                                    |
|------------|------------------------------------|
| Default    | false                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### policy reference

#### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | ISA RADIUS accounting policy for cross-connected UEs  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">xconnect</a> <a href="#">accounting</a> <a href="#">policy</a> <a href="#">reference</a> |
| Tree       | <a href="#">policy</a>  |
| Reference  | <b>configure</b> <a href="#">aaa</a> <a href="#">radius</a> <a href="#">isa-policy</a> <a href="#">string</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### update-interval number

|            |   |
|------------|---|
| Synopsis   | Time between successive interim accounting updates  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">xconnect</a> <a href="#">accounting</a> <a href="#">update-interval</a> <a href="#">number</a> |
| Tree       | <a href="#">update-interval</a>   |
| Range      | 5 to 259200   |
| Units      | minutes   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### admin-state keyword

|          |   |
|----------|---|
| Synopsis | Administrative state of the cross-connect   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">group-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">vlan-range</a> <a href="#">string</a> <a href="#">xconnect</a> <a href="#">admin-state</a> <a href="#">keyword</a> |
| Tree     | <a href="#">admin-state</a>   |
| Options  | enable, disable   |
| Default  | disable   |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### wlan-gw-group *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | ID of WLAN Gateway ISA group that gateway binds to  |
| Context    | <b>configure service ies</b> <i>string subscriber-interface string group-interface string wlan-gw wlan-gw-group reference</i> |
| Tree       | <a href="#">wlan-gw-group</a>   |
| Reference  | <b>configure isa wlan-gw-group</b> <i>number</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### wpp

|            |   |
|------------|---|
| Synopsis   | Enable the <b>wpp</b> context   |
| Context    | <b>configure service ies</b> <i>string subscriber-interface string group-interface string wpp</i> |
| Tree       | <a href="#">wpp</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of WPP   |
| Context    | <b>configure service ies</b> <i>string subscriber-interface string group-interface string wpp admin-state keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**initial**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>initial</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wpp</i> <b>initial</b> |
| Tree       | <b>initial</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**app-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Initial application profile name  |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wpp</i> <b>initial</b> <b>app-profile</b> <i>reference</i> |
| Tree       | <b>app-profile</b>  |
| Reference  | <b>configure application-assurance</b> <i>group</i> <i>number</i> <i>partition</i> <i>number</i> <i>policy</i> <b>app-profile</b> <i>string</i>   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**sla-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Initial SLA profile   |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wpp</i> <b>initial</b> <b>sla-profile</b> <i>reference</i> |
| Tree       | <b>sla-profile</b>  |
| Reference  | <b>configure subscriber-mgmt</b> <b>sla-profile</b> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**sub-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Initial subscriber profile  |
| Context    | <b>configure service ies</b> <i>string</i> <i>subscriber-interface</i> <i>string</i> <i>group-interface</i> <i>string</i> <i>wpp</i> <b>initial</b> <b>sub-profile</b> <i>reference</i> |
| Tree       | <b>sub-profile</b>  |
| Reference  | <b>configure subscriber-mgmt</b> <b>sub-profile</b> <i>string</i>   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **lease-time** *number*

Synopsis Lease time

Context **configure** *service ies string subscriber-interface string group-interface string wpp lease-time number*

Tree *lease-time*

Range 10 to 315446399

Units seconds

Default 600

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **portal**

Synopsis Enter the **portal** context

Context **configure** *service ies string subscriber-interface string group-interface string wpp portal*

Tree *portal*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **name** *string*

Synopsis Web portal server name

Context **configure** *service ies string subscriber-interface string group-interface string wpp portal name string*

Tree *name*

String Length 1 to 32

Notes The following elements are part of a choice: **portal-group** or (**name** and **router-instance**).

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**portal-group** *reference*

|            |  |
|------------|--|
| Synopsis   | WPP portal group for this interface  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wpp portal</a> <a href="#">portal-group</a> <i>reference</i> |
| Tree       | <a href="#">portal-group</a>   |
| Reference  | <b>configure</b> <a href="#">aaa wpp portal-group</a> <i>string</i>  |
| Notes      | The following elements are part of a choice: <b>portal-group</b> or ( <b>name</b> and <b>router-instance</b> ).  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**router-instance** *string*

|            |  |
|------------|--|
| Synopsis   | Virtual router instance of WPP portal for interface  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wpp portal</a> <a href="#">router-instance</a> <i>string</i> |
| Tree       | <a href="#">router-instance</a>  |
| Notes      | The following elements are part of a choice: <b>portal-group</b> or ( <b>name</b> and <b>router-instance</b> ).  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**restore-to-initial-on-disconnect** *boolean*

|            |   |
|------------|---|
| Synopsis   | Restore initial profiles after a host has disconnected  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">group-interface</a> <i>string</i> <a href="#">wpp</a> <a href="#">restore-to-initial-on-disconnect</a> <i>boolean</i> |
| Tree       | <a href="#">restore-to-initial-on-disconnect</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**triggered-hosts** *boolean*

|          |                                |
|----------|--------------------------------|
| Synopsis | Enable/disable triggered hosts |
|----------|--------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wpp triggered-hosts</b> <i>boolean</i> |
| Tree       | <b>triggered-hosts</b>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **user-db** *reference*

|            |   |
|------------|---|
| Synopsis   | User database   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>group-interface</b> <i>string</i> <b>wpp user-db</b> <i>reference</i> |
| Tree       | <b>user-db</b>  |
| Reference  | <b>configure subscriber-mgmt local-user-db</b> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **hold-time**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>hold-time</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>hold-time</b> |
| Tree       | <b>hold-time</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipv4**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv4</b> context   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>hold-time</b> <b>ipv4</b> |
| Tree       | <b>ipv4</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **down**

|          |                               |
|----------|-------------------------------|
| Synopsis | Enter the <b>down</b> context |
|----------|-------------------------------|

|             |  |
|-------------|--|
| Context     | <b>configure service ies string subscriber-interface string hold-time ipv4 down</b>  |
| Tree        | <b>down</b>  |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activating the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the <b>init-only</b> command. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **init-only boolean**

|             |   |
|-------------|---|
| Synopsis    | Apply delay only at interface configuration or reboot   |
| Context     | <b>configure service ies string subscriber-interface string hold-time ipv4 down init-only boolean</b> |
| Tree        | <b>init-only</b>  |
| Description | This command applies a delay only when the IP interface is first configured or after a system reboot. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **seconds number**

|            |  |
|------------|--|
| Synopsis   | Down hold time for the IP interface  |
| Context    | <b>configure service ies string subscriber-interface string hold-time ipv4 down seconds number</b> |
| Tree       | <b>seconds</b>   |
| Range      | 1 to 1200  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **up**

|          |   |
|----------|---|
| Synopsis | Enter the <b>up</b> context   |
| Context  | <b>configure service ies string subscriber-interface string hold-time ipv4 up</b> |
| Tree     | <b>up</b>   |

|             |   |
|-------------|---|
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **seconds** *number*

|            |  |
|------------|--|
| Synopsis   | Up hold time for the IP interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">hold-time</a> <a href="#">ipv4</a> <a href="#">up</a> <b>seconds</b> <i>number</i> |
| Tree       | <a href="#">seconds</a>  |
| Range      | 1 to 1200  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ipv6**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv6</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">hold-time</a> <a href="#">ipv6</a> |
| Tree       | <a href="#">ipv6</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **down**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>down</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">hold-time</a> <a href="#">ipv6</a> <b>down</b>  |
| Tree        | <a href="#">down</a>  |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the <b>init-only</b> command. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **init-only** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Apply delay only at interface configuration or reboot   |
| Context     | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>hold-time</b> <b>ipv6</b> <b>down</b> <b>init-only</b> <i>boolean</i> |
| Tree        | <b>init-only</b>  |
| Description | This command applies the delay only when when the IP interface is first configured or after a system reboot.  |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **seconds** *number*

|            |  |
|------------|--|
| Synopsis   | Down hold time for the IP interface  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>hold-time</b> <b>ipv6</b> <b>down</b> <b>seconds</b> <i>number</i> |
| Tree       | <b>seconds</b>   |
| Range      | 1 to 1200  |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **up**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>up</b> context   |
| Context     | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>hold-time</b> <b>ipv6</b> <b>up</b>   |
| Tree        | <b>up</b>   |
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**seconds** *number*

|            |   |
|------------|---|
| Synopsis   | Up hold time for the IP interface   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">hold-time ipv6 up</a> <a href="#">seconds</a> <i>number</i> |
| Tree       | <a href="#">seconds</a>   |
| Range      | 1 to 1200   |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipoe-linking**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipoe-linking</b> context  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipoe-linking</a> |
| Tree       | <a href="#">ipoe-linking</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**gratuitous-router-advertisement** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send unsolicited router advertisement after DHCP setup  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipoe-linking</a> <a href="#">gratuitous-router-advertisement</a> <i>boolean</i> |
| Tree       | <a href="#">gratuitous-router-advertisement</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ipoe-session**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipoe-session</b> context  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipoe-session</a> |
| Tree       | <a href="#">ipoe-session</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**session-limit** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of sessions on this group interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipoe-session</a> <a href="#">session-limit</a> <i>number</i> |
| Tree       | <a href="#">session-limit</a>  |
| Range      | 1 to 500000  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipv4**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**address** [[ipv4-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>address</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[[ipv4-address](#)]** *string*

|            |  |
|------------|--|
| Synopsis   | IP address associated with the subscriber subnet   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**gateway string**

|            |  |
|------------|--|
| Synopsis   | Gateway IP address within the subnet for SRRP routing  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <i>string</i> <a href="#">gateway</a> <i>string</i> |
| Tree       | <a href="#">gateway</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**holdup-time number**

|            |  |
|------------|--|
| Synopsis   | Wait time before accepting new state attribute   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <i>string</i> <a href="#">holdup-time</a> <i>number</i> |
| Tree       | <a href="#">holdup-time</a>  |
| Range      | 100 to 5000  |
| Units      | milliseconds   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**populate-host-routes boolean**

|            |  |
|------------|--|
| Synopsis   | Populate subscriber host routes in local FIB   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <i>string</i> <a href="#">populate-host-routes</a> <i>boolean</i> |
| Tree       | <a href="#">populate-host-routes</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**prefix-length number**

|          |  |
|----------|--|
| Synopsis | IPv4 address prefix length   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">address</a> <i>string</i> <a href="#">prefix-length</a> <i>number</i> |
| Tree     | <a href="#">prefix-length</a>  |
| Range    | 0 to 32  |

|            |   |
|------------|---|
| Notes      | This element is mandatory.                              |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **track-srrp** *number*

|            |   |
|------------|---|
| Synopsis   | SRRP instance whose state is tracked on this IP address   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4</b> <b>address</b> <i>string</i> <b>track-srrp</b> <i>number</i> |
| Tree       | <a href="#">track-srrp</a>  |
| Range      | 1 to 4294967295   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **allow-unmatching-subnets** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow subscriber hosts without a matching subnet  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4</b> <b>allow-unmatching-subnets</b> <i>boolean</i> |
| Tree       | <a href="#">allow-unmatching-subnets</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **default-dns** *string*

|                |   |
|----------------|---|
| Synopsis       | Default DNS server addresses  |
| Context        | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4</b> <b>default-dns</b> <i>string</i> |
| Tree           | <a href="#">default-dns</a>   |
| Max. Instances | 2   |
| Notes          | This element is ordered by the user.  |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## dhcp

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dhcp</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">dhcp</a> |
| Tree       | <a href="#">dhcp</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of DHCP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## client-applications

|            |   |
|------------|---|
| Synopsis   | Enter the <b>client-applications</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">client-applications</a> |
| Tree       | <a href="#">client-applications</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## dhcp *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable IPoE clients to use the DHCP relay or proxy server   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">client-applications</a> <a href="#">dhcp</a> <i>boolean</i> |
| Tree       | <a href="#">dhcp</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ppp boolean**

|            |   |
|------------|---|
| Synopsis   | Enable PPPoE clients to use DHCP relay or proxy server  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp client-applications</a> <a href="#">ppp boolean</a> |
| Tree       | <a href="#">ppp</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**description string**

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**gi-address string**

|             |   |
|-------------|---|
| Synopsis    | GI address for the DHCP relay   |
| Context     | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp gi-address</a> <i>string</i>  |
| Tree        | <a href="#">gi-address</a>  |
| Description | <p>This command configures the GI address to distinguish between the different subscriber interfaces (and potentially group interfaces) defined when the router functions as a DHCP relay.</p> <p>By default, the GI address used in the relayed DHCP packet is the primary IP address of a normal IES interface. Specifying the GI address allows the user to choose a secondary address. For group interfaces, a GI address must be specified under the group interface DHCP context or subscriber interface DHCP context for DHCP to function.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**lease-populate**

|          |   |
|----------|---|
| Synopsis | Enter the <b>lease-populate</b> context |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp lease-populate</b> |
| Tree       | <a href="#">lease-populate</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **max-leases** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of DHCPv4 leases   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp lease-populate max-leases</b> <i>number</i> |
| Tree       | <a href="#">max-leases</a>  |
| Range      | 0 to 511999   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **option-82**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>option-82</b> context  |
| Context     | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp option-82</b>                                       |
| Tree        | <a href="#">option-82</a>   |
| Description | Commands in this context configure the processing required when the router receives a DHCP request that already has an Option 82 field in the packet. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **vendor-specific-option**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>vendor-specific-option</b> context  |
| Context     | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp option-82 vendor-specific-option</b> |
| Tree        | <a href="#">vendor-specific-option</a>   |
| Description | Commands in this context configure the Nokia Vendor-Specific Option (VSO) of the DHCP packet.  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**client-mac-address** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send the MAC address in the VSO  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4</b> <b>dhcp</b> <b>option-82</b> <b>vendor-specific-option</b> <b>client-mac-address</b> <i>boolean</i> |
| Tree       | <b>client-mac-address</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**sap-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send SAP ID in the sub-option of the DHCP relay packet   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4</b> <b>dhcp</b> <b>option-82</b> <b>vendor-specific-option</b> <b>sap-id</b> <i>boolean</i> |
| Tree       | <b>sap-id</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**service-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send the service ID in the Vendor Specific Option  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4</b> <b>dhcp</b> <b>option-82</b> <b>vendor-specific-option</b> <b>service-id</b> <i>boolean</i> |
| Tree       | <b>service-id</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**string** *string*

|          |   |
|----------|---|
| Synopsis | User-defined ASCII string for the VSO   |
| Context  | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4</b> <b>dhcp</b> <b>option-82</b> <b>vendor-specific-option</b> <b>string</b> <i>string</i> |
| Tree     | <b>string</b>   |

|               |   |
|---------------|---|
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **system-id** *boolean*

|            |  |
|------------|--|
| Synopsis   | Send the system ID in the VSO  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp option-82 vendor-specific-option</a> <b>system-id</b> <i>boolean</i> |
| Tree       | <a href="#">system-id</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **proxy-server**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>proxy-server</b> context  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server</a> |
| Tree       | <a href="#">proxy-server</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the DHCP proxy server   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp proxy-server admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **emulated-server** *string*

|          |   |
|----------|---|
| Synopsis | IP address used as DHCP server address in SAP context |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp proxy-server emulated-server</b> <i>string</i> |
| Tree       | <b>emulated-server</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## lease-time

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lease-time</b> context   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp proxy-server lease-time</b> |
| Tree       | <b>lease-time</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## radius-override *boolean*

|            |  |
|------------|--|
| Synopsis   | Use lease time information provided by RADIUS server   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp proxy-server lease-time radius-override</b> <i>boolean</i> |
| Tree       | <b>radius-override</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## value *number*

|            |   |
|------------|---|
| Synopsis   | DHCP lease time   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv4 dhcp proxy-server lease-time value</b> <i>number</i> |
| Tree       | <b>value</b>  |
| Range      | 300 to 315446399  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **python-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Python policy  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">python-policy</a> <i>reference</i> |
| Tree       | <a href="#">python-policy</a>  |
| Reference  | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **relay-proxy**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>relay-proxy</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">relay-proxy</a> |
| Tree       | <a href="#">relay-proxy</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **release-update-src-ip** *boolean*

|            |  |
|------------|--|
| Synopsis   | Update the source IP address of a DHCP RELEASE message   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">relay-proxy</a> <a href="#">release-update-src-ip</a> <i>boolean</i> |
| Tree       | <a href="#">release-update-src-ip</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **siaddr-override** *string*

|            |   |
|------------|---|
| Synopsis   | DHCP server IP address for address hiding function  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">dhcp</a> <a href="#">relay-proxy</a> <a href="#">siaddr-override</a> <i>string</i> |
| Tree       | <a href="#">siaddr-override</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**release-include-gi-address** *boolean*

|            |   |
|------------|---|
| Synopsis   | Include the GI address in DHCP relay messages   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">release-include-gi-address</a> <i>boolean</i> |
| Tree       | <a href="#">release-include-gi-address</a>  |
| Default    | false   |
| Introduced | 21.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**server** *string*

|                |  |
|----------------|--|
| Synopsis       | DHCP server IP addresses   |
| Context        | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">server</a> <i>string</i> |
| Tree           | <a href="#">server</a>   |
| Max. Instances | 8  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**src-ip-addr** *keyword*

|            |  |
|------------|--|
| Synopsis   | Type of source address to use for DHCP relay   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">src-ip-addr</a> <i>keyword</i> |
| Tree       | <a href="#">src-ip-addr</a>  |
| Options    | auto, gi-address   |
| Default    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**virtual-subnet** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable a virtual subnet for DHCPv4 hosts  |
| Context  | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4 dhcp</a> <a href="#">virtual-subnet</a> <i>boolean</i> |
| Tree     | <a href="#">virtual-subnet</a>  |

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **export-host-routes** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow export of subscriber management host routes   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <b>export-host-routes</b> <i>boolean</i> |
| Tree       | <a href="#">export-host-routes</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **unnumbered**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>unnumbered</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <b>unnumbered</b> |
| Tree       | <a href="#">unnumbered</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ip-address** *string*

|            |  |
|------------|--|
| Synopsis   | IP address for the subscriber interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <b>unnumbered</b> <b>ip-address</b> <i>string</i> |
| Tree       | <a href="#">ip-address</a>   |
| Notes      | The following elements are part of a choice: <b>ip-address</b> or <b>ip-int-name</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **ip-int-name** *string*

|          |   |
|----------|---|
| Synopsis | Interface name from which an IPv4 address is borrowed   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv4</a> <b>unnumbered</b> <b>ip-int-name</b> <i>string</i> |

|               |  |
|---------------|--|
| Tree          | <a href="#">ip-int-name</a>  |
| String Length | 1 to 32  |
| Notes         | The following elements are part of a choice: <b>ip-address</b> or <b>ip-int-name</b> . |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                |

## ipv6

|            |  |
|------------|--|
| Synopsis   | Enable the <b>ipv6</b> context   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> |
| Tree       | <a href="#">ipv6</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## address [[ipv6-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>address</b> list instance   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## [[ipv6-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | IPv6 address for the subscriber interface  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">address</a> <i>string</i> |
| Tree       | <a href="#">address</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**host-type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Host type for subscriber interface prefixes  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">address</a> <i>string</i> <b>host-type</b> <i>keyword</i> |
| Tree       | <a href="#">host-type</a>  |
| Options    | pd, wan, pd-wan  |
| Default    | pd   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**prefix-length** *number*

|            |   |
|------------|---|
| Synopsis   | IPv6 address prefix length  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">address</a> <i>string</i> <b>prefix-length</b> <i>number</i> |
| Tree       | <a href="#">prefix-length</a>   |
| Range      | 0 to 128  |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**allow-multiple-wan-addresses** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow multiple WAN addresses  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <b>allow-multiple-wan-addresses</b> <i>boolean</i> |
| Tree       | <a href="#">allow-multiple-wan-addresses</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**allow-unmatching-prefixes** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow subscriber hosts without a matching prefix  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">allow-unmatching-prefixes</a> <i>boolean</i> |
| Tree       | <a href="#">allow-unmatching-prefixes</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**default-dns** *string*

|                |  |
|----------------|--|
| Synopsis       | Default DNS server addresses   |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">default-dns</a> <i>string</i> |
| Tree           | <a href="#">default-dns</a>  |
| Max. Instances | 2  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**delegated-prefix-length** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | IPv6 delegated prefix length  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">delegated-prefix-length</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">delegated-prefix-length</a>   |
| Range      | 48 to 64  |
| Options    | variable  |
| Default    | 64  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**dhcp6**

|          |  |
|----------|--|
| Synopsis | Enter the <b>dhcp6</b> context   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> |

|            |   |
|------------|---|
| Tree       | <a href="#">dhcp6</a>                                   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **override-slaac** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow WAN address offered by DHCP to overwrite the WAN address acquired from SLAAC   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 override-slaac</a> <i>boolean</i> |
| Tree       | <a href="#">override-slaac</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **pd-managed-route**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>pd-managed-route</b> context  |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 pd-managed-route</a> |
| Tree       | <a href="#">pd-managed-route</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **next-hop** *keyword*

|            |   |
|------------|---|
| Synopsis   | Next hop type   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6 dhcp6 pd-managed-route</a> <a href="#">next-hop</a> <i>keyword</i> |
| Tree       | <a href="#">next-hop</a>  |
| Options    | ipv4, ipv6  |
| Default    | ipv6  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## proxy-server

|            |   |
|------------|---|
| Synopsis   | Enter the <b>proxy-server</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> |
| Tree       | <a href="#">proxy-server</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the DHCPv6 proxy server  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## client-applications

|            |   |
|------------|---|
| Synopsis   | Enter the <b>client-applications</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">client-applications</a> |
| Tree       | <a href="#">client-applications</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## dhcp *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable IPoE clients to use DHCP relay or proxy server   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">client-applications</a> <a href="#">dhcp</a> <i>boolean</i> |
| Tree       | <a href="#">dhcp</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ppp boolean**

|            |   |
|------------|---|
| Synopsis   | Allow PPPoE clients to use DHCP relay functionality   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">client-applications</a> <a href="#">ppp</a> <a href="#">boolean</a> |
| Tree       | <a href="#">ppp</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**preferred-lifetime** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Time for prefix to remain preferred on this interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">preferred-lifetime</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">preferred-lifetime</a>  |
| Range      | 300 to 4294967294   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 3600  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**rebind-timer** *number*

|            |  |
|------------|--|
| Synopsis   | Rebind timer (T2) for this interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">rebind-timer</a> <i>number</i> |
| Tree       | <a href="#">rebind-timer</a>   |
| Range      | 0 to 1209600   |
| Units      | seconds  |
| Default    | 2880   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**renew-timer** *number*

|            |   |
|------------|---|
| Synopsis   | Renew timer (T1)  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">renew-timer</a> <i>number</i> |
| Tree       | <a href="#">renew-timer</a>   |
| Range      | 0 to 604800   |
| Units      | seconds   |
| Default    | 1800  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**server-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>server-id</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">server-id</a> |
| Tree       | <a href="#">server-id</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**duid-en-ascii** *string*

|               |   |
|---------------|---|
| Synopsis      | Vendor-assigned ID based on Enterprise Number (DUID-EN)   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">server-id</a> <a href="#">duid-en-ascii</a> <i>string</i> |
| Tree          | <a href="#">duid-en-ascii</a>   |
| String Length | 1 to 58   |
| Notes         | The following elements are part of a choice: <b>duid-en-ascii</b> , <b>duid-en-hex</b> , or <b>duid-ll</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**duid-en-hex** *string*

|          |   |
|----------|---|
| Synopsis | DUID system ID in hexadecimal format  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">server-id</a> <a href="#">duid-en-hex</a> <i>string</i> |

|               |  |
|---------------|--|
| Tree          | <a href="#">duid-en-hex</a>  |
| String Length | 1 to 118   |
| Notes         | The following elements are part of a choice: <b>duid-en-ascii</b> , <b>duid-en-hex</b> , or <b>duid-ll</b> . |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## duid-ll

|            |   |
|------------|---|
| Synopsis   | Use link-layer address (DUID-LL) as DUID  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">server-id</a> <a href="#">duid-ll</a> |
| Tree       | <a href="#">duid-ll</a>   |
| Notes      | The following elements are part of a choice: <b>duid-en-ascii</b> , <b>duid-en-hex</b> , or <b>duid-ll</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## valid-lifetime (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Time for prefix to remain valid on this interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">proxy-server</a> <a href="#">valid-lifetime</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">valid-lifetime</a>  |
| Range      | 300 to 4294967294   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 86400   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## python-policy *reference*

|           |   |
|-----------|---|
| Synopsis  | Python policy   |
| Context   | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">python-policy</a> <i>reference</i> |
| Tree      | <a href="#">python-policy</a>   |
| Reference | <b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>   |

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## relay

Synopsis Enter the **relay** context  
Context **configure service ies string subscriber-interface string ipv6 dhcp6 relay**  
Tree [relay](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis Administrative state of DHCPv6 Relay  
Context **configure service ies string subscriber-interface string ipv6 dhcp6 relay admin-state keyword**  
Tree [admin-state](#)  
Options enable, disable  
Default disable  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## client-applications

Synopsis Enter the **client-applications** context  
Context **configure service ies string subscriber-interface string ipv6 dhcp6 relay client-applications**  
Tree [client-applications](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## dhcp *boolean*

Synopsis Enable IPoE clients to use DHCP relay or proxy server  
Context **configure service ies string subscriber-interface string ipv6 dhcp6 relay client-applications dhcp boolean**

|            |   |
|------------|---|
| Tree       | <a href="#">dhcp</a>                                    |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **ppp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow PPPoE clients to use DHCP relay functionality   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">client-applications</a> <a href="#">ppp</a> <i>boolean</i> |
| Tree       | <a href="#">ppp</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **lease-split**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>lease-split</b> context  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">lease-split</a>  |
| Tree        | <a href="#">lease-split</a>   |
| Description | <p>Commands in this context configure DHCPv6 lease split.</p> <p>DHCPv6 lease split is active when administratively enabled and for all IA_NA and IA_PD options in the transaction, the configured lease split valid lifetime (short lease time) is less than or equal to one of the following:</p> <ul style="list-style-type: none"> <li>• the renew time T1 committed by the server (long renew time)</li> <li>• half of the preferred lifetime committed by the server when T1 committed by the server equals zero</li> </ul> |

---

|            |   |
|------------|---|
| Introduced | 21.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of DHCPv6 lease split  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6</b> <b>dhcp6</b> <b>relay</b> <b>lease-split</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>  |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 21.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**valid-lifetime** *number*

|            |   |
|------------|---|
| Synopsis   | DHCPv6 lease split valid lifetime (short lease time)  |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6</b> <b>dhcp6</b> <b>relay</b> <b>lease-split</b> <b>valid-lifetime</b> <i>number</i> |
| Tree       | <b>valid-lifetime</b>   |
| Range      | 300 to 315446399  |
| Units      | seconds   |
| Default    | 3600  |
| Introduced | 21.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**link-address** *string*

|            |  |
|------------|--|
| Synopsis   | Link address for the DHCPv6 relay messages   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6</b> <b>dhcp6</b> <b>relay</b> <b>link-address</b> <i>string</i> |
| Tree       | <b>link-address</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**server string**

|                |  |
|----------------|--|
| Synopsis       | DHCP6 server(s) to which the DHCP6 requests are forwarded  |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">server</a> <a href="#">string</a> |
| Tree           | <a href="#">server</a>   |
| Max. Instances | 8  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**source-address string**

|            |  |
|------------|--|
| Synopsis   | Source IPv6 address for the DHCPv6 relay messages  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">dhcp6</a> <a href="#">relay</a> <a href="#">source-address</a> <a href="#">string</a> |
| Tree       | <a href="#">source-address</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipoe-bridged-mode boolean**

|            |  |
|------------|--|
| Synopsis   | Enable IPv6 IPoE bridged mode  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">ipoe-bridged-mode</a> <a href="#">boolean</a> |
| Tree       | <a href="#">ipoe-bridged-mode</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**link-local-address**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>link-local-address</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">link-local-address</a> |
| Tree       | <a href="#">link-local-address</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**address string**

|            |  |
|------------|--|
| Synopsis   | IPv6 link local address  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">link-local-address</a> <a href="#">address</a> <a href="#">string</a> |
| Tree       | <a href="#">address</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**prefix [ipv6-prefix] string**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>prefix</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">prefix</a> <a href="#">string</a> |
| Tree       | <a href="#">prefix</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**[ipv6-prefix] string**

|            |  |
|------------|--|
| Synopsis   | IPv6 address for a router interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">prefix</a> <a href="#">string</a> |
| Tree       | <a href="#">prefix</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**holdup-time number**

|            |   |
|------------|---|
| Synopsis   | Time to wait before route accepts new state attribute   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">prefix</a> <a href="#">string</a> <a href="#">holdup-time</a> <a href="#">number</a> |
| Tree       | <a href="#">holdup-time</a>   |
| Range      | 100 to 5000   |
| Units      | milliseconds  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### host-type *keyword*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Host type for subscriber interface prefixes

Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [ipv6](#) [prefix](#) [string](#) [host-type](#) [keyword](#)

Tree [host-type](#)

Options pd, wan, pd-wan

Default pd

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### track-srrp *number*

Synopsis SRRP instance whose state is tracked on this IP address

Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [ipv6](#) [prefix](#) [string](#) [track-srrp](#) [number](#)

Tree [track-srrp](#)

Range 1 to 4294967295

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### router-advertisements

Synopsis Enter the **router-advertisements** context

Context **configure** [service](#) [ies](#) [string](#) [subscriber-interface](#) [string](#) [ipv6](#) [router-advertisements](#)

Tree [router-advertisements](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of router advertisements   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**force-mcast** *keyword*

|            |   |
|------------|---|
| Synopsis   | Protocol with forced multicast  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <a href="#">force-mcast</a> <i>keyword</i> |
| Tree       | <a href="#">force-mcast</a>   |
| Options    | ip, ip-mac  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**max-advertisement-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum advertisement interval  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <a href="#">max-advertisement-interval</a> <i>number</i> |
| Tree       | <a href="#">max-advertisement-interval</a>  |
| Range      | 900 to 1800   |
| Units      | seconds   |
| Default    | 1800  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**min-advertisement-interval** *number*

|          |                                |
|----------|--------------------------------|
| Synopsis | Minimum advertisement interval |
|----------|--------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6</b> <b>router-advertisements</b> <b>min-advertisement-interval</b> <i>number</i> |
| Tree       | <b>min-advertisement-interval</b>   |
| Range      | 900 to 1350   |
| Units      | seconds   |
| Default    | 900   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## options

|            |  |
|------------|--|
| Synopsis   | Enter the <b>options</b> context   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6</b> <b>router-advertisements</b> <b>options</b> |
| Tree       | <b>options</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## current-hop-limit *number*

|            |   |
|------------|---|
| Synopsis   | Hop limit to be advertised  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6</b> <b>router-advertisements</b> <b>options</b> <b>current-hop-limit</b> <i>number</i> |
| Tree       | <b>current-hop-limit</b>  |
| Range      | 0 to 255  |
| Default    | 64  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## dns

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dns</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6</b> <b>router-advertisements</b> <b>options</b> <b>dns</b> |
| Tree       | <b>dns</b>  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **include-rdnss** *boolean*

Synopsis Include the RDNSS server option 25

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **ipv6** **router-advertisements** **options** **dns** **include-rdnss** *boolean*

Tree [include-rdnss](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **rdnss-lifetime** (*number* | *keyword*)

Synopsis Maximum time for the RDNSS address to remain valid

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **ipv6** **router-advertisements** **options** **dns** **rdnss-lifetime** (*number* | *keyword*)

Tree [rdnss-lifetime](#)

Range 900 to 3600

Units seconds

Options infinite

Default 3600

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **managed-configuration** *boolean*

Synopsis Managed address configuration flag

Context **configure** **service** **ies** *string* **subscriber-interface** *string* **ipv6** **router-advertisements** **options** **managed-configuration** *boolean*

Tree [managed-configuration](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**mtu** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Advertised MTU value  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">router-advertisements</a><br><a href="#">options</a> <b>mtu</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mtu</a>   |
| Range      | 1280 to 9212  |
| Units      | bytes   |
| Options    | not-included  |
| Default    | not-included  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**other-stateful-configuration** *boolean*

|            |  |
|------------|--|
| Synopsis   | Other stateful configuration flag  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">router-advertisements</a><br><a href="#">options</a> <b>other-stateful-configuration</b> <i>boolean</i> |
| Tree       | <a href="#">other-stateful-configuration</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**reachable-time** *number*

|            |   |
|------------|---|
| Synopsis   | Reachable time for advertisements   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">ipv6</a> <a href="#">router-advertisements</a><br><a href="#">options</a> <b>reachable-time</b> <i>number</i> |
| Tree       | <a href="#">reachable-time</a>  |
| Range      | 0 to 3600000  |
| Units      | milliseconds  |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**retransmit-timer** *number*

|            |   |
|------------|---|
| Synopsis   | Retransmit time in router advertisements from interface   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <a href="#">options retransmit-timer</a> <i>number</i> |
| Tree       | <a href="#">retransmit-timer</a>  |
| Range      | 0 to 1800000  |
| Units      | seconds   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**router-lifetime** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Router lifetime   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <a href="#">options router-lifetime</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">router-lifetime</a>   |
| Range      | 2700 to 9000  |
| Units      | seconds   |
| Options    | no-default-router   |
| Default    | 4500  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**prefix-options**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>prefix-options</b> context   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <a href="#">router-advertisements</a> <a href="#">prefix-options</a> |
| Tree       | <a href="#">prefix-options</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**autonomous** *boolean*

|          |                              |
|----------|------------------------------|
| Synopsis | Value of the autonomous flag |
|----------|------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements</b> <b>prefix-options autonomous</b> <i>boolean</i> |
| Tree       | <b>autonomous</b>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**on-link** *boolean*

|            |   |
|------------|---|
| Synopsis   | Assign the prefix to an interface on the specified link   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements</b> <b>prefix-options on-link</b> <i>boolean</i> |
| Tree       | <b>on-link</b>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**preferred-lifetime** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Time for a prefix to remain preferred  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements</b> <b>prefix-options preferred-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>preferred-lifetime</b>  |
| Range      | 0 to 4294967294  |
| Units      | seconds  |
| Options    | infinite   |
| Default    | 3600   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**valid-lifetime** (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | Time for a prefix to remain valid  |
| Context  | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>ipv6 router-advertisements</b> <b>prefix-options valid-lifetime</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <b>valid-lifetime</b>  |

|            |   |
|------------|---|
| Range      | 0 to 4294967294   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 86400   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## router-solicit

|            |  |
|------------|--|
| Synopsis   | Enter the <b>router-solicit</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <b>router-solicit</b> |
| Tree       | <a href="#">router-solicit</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## inactivity-timer (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Time before an inactive host is removed   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">ipv6</a> <b>router-solicit</b> <b>inactivity-timer</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">inactivity-timer</a>  |
| Range      | 1 to 31536000   |
| Units      | seconds   |
| Options    | infinite  |
| Default    | 300   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## local-address-assignment

|            |   |
|------------|---|
| Synopsis   | Enter the <b>local-address-assignment</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <b>local-address-assignment</b> |
| Tree       | <a href="#">local-address-assignment</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of Local Address Assignment  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipv4**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv4</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">ipv4</a> |
| Tree       | <a href="#">ipv4</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **client-applications**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>client-applications</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">ipv4</a> <a href="#">client-applications</a> |
| Tree       | <a href="#">client-applications</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ppp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Request local addresses for PPP IPCP hosts   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">local-address-assignment</a> <a href="#">ipv4</a> <a href="#">client-applications</a> <a href="#">ppp</a> <i>boolean</i> |
| Tree       | <a href="#">ppp</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **default-pool** *string*

Synopsis Default pools

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [local-address-assignment](#) [ipv4](#) [default-pool](#) *string*

Tree [default-pool](#)

String Length 1 to 32

Max. Instances 2

Notes This element is ordered by the user.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **server** *reference*

Synopsis Local DHCPv4 server for local pools management

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [local-address-assignment](#) [ipv4](#) [server](#) *reference*

Tree [server](#)

Reference **configure** [router](#) *string* [dhcp-server](#) [dhcpv4](#) *string*

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ipv6**

Synopsis Enter the **ipv6** context

Context **configure** [service ies](#) *string* [subscriber-interface](#) *string* [local-address-assignment](#) [ipv6](#)

Tree [ipv6](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **client-applications**

Synopsis Enter the **client-applications** context

|            |   |
|------------|---|
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>local-address-assignment ipv6 client-applications</b> |
| Tree       | <b>client-applications</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipoe-slaac** *boolean*

|            |   |
|------------|---|
| Synopsis   | Request local addresses for IPoE SLAAC hosts  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>local-address-assignment ipv6 client-applications ipoe-slaac</b> <i>boolean</i> |
| Tree       | <b>ipoe-slaac</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ipoe-wan** *boolean*

|            |   |
|------------|---|
| Synopsis   | Request local addresses for IPoE IA NA hosts  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>local-address-assignment ipv6 client-applications ipoe-wan</b> <i>boolean</i> |
| Tree       | <b>ipoe-wan</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ppp-slaac** *boolean*

|            |  |
|------------|--|
| Synopsis   | Request local addresses for PPP SLAAC hosts  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>local-address-assignment ipv6 client-applications ppp-slaac</b> <i>boolean</i> |
| Tree       | <b>ppp-slaac</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**server reference**

|            |  |
|------------|--|
| Synopsis   | Local DHCPv6 server for local pools management   |
| Context    | <b>configure service ies string subscriber-interface string local-address-assignment ipv6 server reference</b> |
| Tree       | <b>server</b>  |
| Reference  | <b>configure router string dhcp-server dhcpv6 string</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**pppoe**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pppoe</b> context  |
| Context    | <b>configure service ies string subscriber-interface string pppoe</b> |
| Tree       | <b>pppoe</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR               |

**description string**

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure service ies string subscriber-interface string pppoe description string</b> |
| Tree          | <b>description</b>   |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |

| Tree       | <b>session-limit</b>   |
| Range      | 1 to 333823  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

## wan-mode keyword

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Mode of operation for hosts with /128 WAN IPv6 address  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wan-mode</b> <i>keyword</i> |
| Tree       | <b>wan-mode</b>   |
| Options    | mode64, mode128   |
| Default    | mode64  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## wlan-gw

|            |   |
|------------|---|
| Synopsis   | Enable the <b>wlan-gw</b> context   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw</b> |
| Tree       | <b>wlan-gw</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## pool-manager

|            |  |
|------------|--|
| Synopsis   | Enter the <b>pool-manager</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw pool-manager</b> |
| Tree       | <b>pool-manager</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## dhcp6-client

|          |   |
|----------|---|
| Synopsis | Enter the <b>dhcp6-client</b> context   |
| Context  | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw pool-manager dhcp6-client</b> |
| Tree     | <b>dhcp6-client</b>   |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## dhcpv4-nat

|            |  |
|------------|--|
| Synopsis   | Enter the <b>dhcpv4-nat</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">pool-manager</a> <a href="#">dhcp6-client</a> <a href="#">dhcpv4-nat</a> |
| Tree       | <a href="#">dhcpv4-nat</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the DHCPv6 client entity  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">pool-manager</a> <a href="#">dhcp6-client</a> <a href="#">dhcpv4-nat</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## link-address *string*

|            |   |
|------------|---|
| Synopsis   | IPv6 address in the link address field of relay header  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <a href="#">string</a> <a href="#">subscriber-interface</a> <a href="#">string</a> <a href="#">wlan-gw</a> <a href="#">pool-manager</a> <a href="#">dhcp6-client</a> <a href="#">dhcpv4-nat</a> <a href="#">link-address</a> <i>string</i> |
| Tree       | <a href="#">link-address</a>  |
| Default    | ::  |
| Introduced | 16.0.R4   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## pool-name *string*

|          |   |
|----------|---|
| Synopsis | Pool name to be sent in the DHCPv6 messages |
|----------|---|

|               |  |
|---------------|--|
| Context       | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw pool-manager dhcp6-client dhcpv4-nat pool-name</b> <i>string</i> |
| Tree          | <a href="#">pool-name</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ia-na

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ia-na</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw pool-manager dhcp6-client ia-na</b> |
| Tree       | <a href="#">ia-na</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the DHCPv6 client entity   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw pool-manager dhcp6-client ia-na admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## link-address *string*

|            |  |
|------------|--|
| Synopsis   | IPv6 address in the link address field of relay header   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw pool-manager dhcp6-client ia-na link-address</b> <i>string</i> |
| Tree       | <a href="#">link-address</a>   |
| Default    | ::   |
| Introduced | 16.0.R4  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **pool-name** *string*

|               |  |
|---------------|--|
| Synopsis      | Pool name to be sent in the DHCPv6 messages  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">pool-manager</a> <a href="#">dhcp6-client</a> <a href="#">ia-na</a> <b>pool-name</b> <i>string</i> |
| Tree          | <a href="#">pool-name</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **lease-query**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>lease-query</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">pool-manager</a> <a href="#">dhcp6-client</a> <b>lease-query</b> |
| Tree       | <a href="#">lease-query</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **max-retries** *number*

|            |  |
|------------|--|
| Synopsis   | Retries before lease query assumes no allocated subnets  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">pool-manager</a> <a href="#">dhcp6-client</a> <a href="#">lease-query</a> <b>max-retries</b> <i>number</i> |
| Tree       | <a href="#">max-retries</a>  |
| Range      | 0 to 10  |
| Default    | 2  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **servers** *string*

|          |  |
|----------|--|
| Synopsis | DHCPv6 servers that are used for requesting addresses  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ies</a> <i>string</i> <a href="#">subscriber-interface</a> <i>string</i> <a href="#">wlan-gw</a> <a href="#">pool-manager</a> <a href="#">dhcp6-client</a> <b>servers</b> <i>string</i> |
| Tree     | <a href="#">servers</a>  |

|                |                                    |
|----------------|------------------------------------|
| Max. Instances | 8                                  |
| Introduced     | 16.0.R1                            |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## slaac

|            |   |
|------------|---|
| Synopsis   | Enter the <b>slaac</b> context  |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw pool-manager dhcp6-client slaac</b> |
| Tree       | <b>slaac</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the DHCPv6 client entity   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw pool-manager dhcp6-client slaac admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## link-address *string*

|            |  |
|------------|--|
| Synopsis   | IPv6 address in the link address field of relay header   |
| Context    | <b>configure service ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw pool-manager dhcp6-client slaac link-address</b> <i>string</i> |
| Tree       | <b>link-address</b>  |
| Default    | ::   |
| Introduced | 16.0.R4  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **pool-name** *string*

|               |   |
|---------------|---|
| Synopsis      | Pool name to be sent in the DHCPv6 messages   |
| Context       | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw</b> <b>pool-manager</b> <b>dhcp6-client</b> <b>slaac</b> <b>pool-name</b> <i>string</i> |
| Tree          | <b>pool-name</b>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **source-ip** (*keyword* | *ipv6-address*)

|            |   |
|------------|---|
| Synopsis   | Source IP address that is used by the DHCPv6 client   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw</b> <b>pool-manager</b> <b>dhcp6-client</b> <b>source-ip</b> ( <i>keyword</i>   <i>ipv6-address</i> ) |
| Tree       | <b>source-ip</b>  |
| Options    | use-interface-ip  |
| Default    | use-interface-ip  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **watermarks**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>watermarks</b> context   |
| Context    | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw</b> <b>pool-manager</b> <b>watermarks</b> |
| Tree       | <b>watermarks</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **high** *number*

|          |   |
|----------|---|
| Synopsis | High watermark when new prefix is allocated   |
| Context  | <b>configure</b> <b>service</b> <b>ies</b> <i>string</i> <b>subscriber-interface</b> <i>string</i> <b>wlan-gw</b> <b>pool-manager</b> <b>watermarks</b> <b>high</b> <i>number</i> |
| Tree     | <b>high</b>   |
| Range    | 51 to 99  |

|            |                                    |
|------------|------------------------------------|
| Default    | 95                                 |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**low number**

|            |  |
|------------|--|
| Synopsis   | Low watermark when unused prefix is released   |
| Context    | <b>configure service ies string subscriber-interface string wlan-gw pool-manager watermarks low number</b> |
| Tree       | <a href="#">low</a>  |
| Range      | 50 to 98   |
| Default    | 90   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**wlan-gw-group reference**

|            |  |
|------------|--|
| Synopsis   | ID of WLAN gateway group where prefixes are installed  |
| Context    | <b>configure service ies string subscriber-interface string wlan-gw pool-manager wlan-gw-group reference</b> |
| Tree       | <a href="#">wlan-gw-group</a>  |
| Reference  | <b>configure isa wlan-gw-group number</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**redundancy**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>redundancy</b> context  |
| Context    | <b>configure service ies string subscriber-interface string wlan-gw redundancy</b> |
| Tree       | <a href="#">redundancy</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state keyword**

|          |  |
|----------|--|
| Synopsis | Administrative state of WLAN-GW redundancy |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service ies string subscriber-interface string wlan-gw redundancy admin-state keyword</b> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### export string

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Route to export to peer  |
| Context    | <b>configure service ies string subscriber-interface string wlan-gw redundancy export string</b> |
| Tree       | <b>export</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### monitor string

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Peer route to monitor   |
| Context    | <b>configure service ies string subscriber-interface string wlan-gw redundancy monitor string</b> |
| Tree       | <b>monitor</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### subscriber-mgmt

|          |   |
|----------|---|
| Synopsis | Enter the <b>subscriber-mgmt</b> context            |
| Context  | <b>configure service ies string subscriber-mgmt</b> |

|            |   |
|------------|---|
| Tree       | <a href="#">subscriber-mgmt</a>                         |
| Introduced | 22.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **multi-chassis-shunt-id** *number*

|             |   |
|-------------|---|
| Synopsis    | Shunt ID for a pair of resilient nodes  |
| Context     | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-mgmt</a> <a href="#">multi-chassis-shunt-id</a> <i>number</i>   |
| Tree        | <a href="#">multi-chassis-shunt-id</a>  |
| Description | <p>This command configures the shunt ID that is used to shunt downstream traffic from a standby node to an active node. Because this ID identifies the traffic service on the standby node, the same ID must be configured per service on each node.</p> <p>This configuration is required for BNG CUPS inter-UPF resiliency shunting, but not for non-BNG CUPS shunting. However, when configured, it is also used for shunting non-BNG CUPS sessions in the same service.</p> |
| Range       | 1 to 8191   |
| Introduced  | 22.2.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **up-resiliency**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>up-resiliency</b> context   |
| Context    | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> |
| Tree       | <a href="#">up-resiliency</a>  |
| Introduced | 22.2.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **monitor-oper-group** [[oper-group](#)] *reference*

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>monitor-oper-group</b> list instance  |
| Context     | <b>configure</b> <a href="#">service ies</a> <i>string</i> <a href="#">subscriber-mgmt</a> <a href="#">up-resiliency</a> <a href="#">monitor-oper-group</a> <i>reference</i>   |
| Tree        | <a href="#">monitor-oper-group</a>   |
| Description | <p>Commands in this context define parameters to derive the service health based on monitored operational groups. The BNG UPF sends the health value to the BNG CPF. The BNG CPF uses the value to determine the need for a BNG UPF status change (active or standby).</p> |

**Note:**

The following is only applicable for the **configure service vpls capture-sap** context. If the configured groups are not the same for all capture SAPs sharing the same underlying port or LAG, the configuration of a Layer 2 access ID alias is required, or else the system chooses arbitrarily one set of configured groups.

|                |   |
|----------------|---|
| Max. Instances | 4   |
| Introduced     | 22.2.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### [oper-group] *reference*

|            |   |
|------------|---|
| Synopsis   | Operational group name  |
| Context    | <b>configure service ies</b> <i>string</i> <a href="#">subscriber-mgmt up-resiliency monitor-oper-group reference</a> |
| Tree       | <a href="#">monitor-oper-group</a>  |
| Reference  | <b>configure service oper-group</b> <i>string</i>   |
| Notes      | This element is part of a list key.   |
| Introduced | 22.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### health-drop *number*

|             |   |
|-------------|---|
| Synopsis    | Number subtracted from the health value per failure   |
| Context     | <b>configure service ies</b> <i>string</i> <a href="#">subscriber-mgmt up-resiliency monitor-oper-group reference health-drop number</a>  |
| Tree        | <a href="#">health-drop</a>   |
| Description | This command configures the drop in the health value for every operational group member failure. Every failure of an operational group member decreases the base health value to a possible minimum of 0. |
| Range       | 1 to 255  |
| Default     | 1   |
| Introduced  | 22.2.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### video-interface [[interface-name](#)] *string*

|          |  |
|----------|--|
| Synopsis | Enter the <b>video-interface</b> list instance |
|----------|--|

|                |  |
|----------------|--|
| Context        | <b>configure service ies string video-interface string</b>                             |
| Tree           | <a href="#">video-interface</a>  |
| Max. Instances | 9  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR-1, 7750 SR-7/12/12e, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s |

### **[interface-name] string**

|               |  |
|---------------|--|
| Synopsis      | Video interface name   |
| Context       | <b>configure service ies string video-interface string</b>                             |
| Tree          | <a href="#">video-interface</a>  |
| String Length | 1 to 29  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR-1, 7750 SR-7/12/12e, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s |

### **accounting-policy reference**

|            |  |
|------------|--|
| Synopsis   | Accounting Policy  |
| Context    | <b>configure service ies string video-interface string accounting-policy reference</b> |
| Tree       | <a href="#">accounting-policy</a>  |
| Reference  | <b>configure log accounting-policy number</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-1, 7750 SR-7/12/12e, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s |

### **address [ip-address] string**

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>address</b>                                       |
| Context    | <b>configure service ies string video-interface string address string</b> |
| Tree       | <a href="#">address</a>   |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR-1, 7750 SR-7/12/12e, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### [ip-address] string

Synopsis IPv4 address for the video interface within the service

Context **configure** [service ies](#) *string* [video-interface](#) *string* [address](#) *string*

Tree [address](#)

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-1, 7750 SR-7/12/12e, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

|----------|--|
| Synopsis | MAC filter ID  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">filter</a> <a href="#">ip</a> <i>reference</i> |
| Tree     | <a href="#">ip</a>   |

|            |   |
|------------|---|
| Reference  | <b>configure filter ip-filter</b> <i>string</i> |
| Introduced | 20.10.R1  |
| Platforms  | All   |

### ipv6 reference

|            |  |
|------------|--|
| Synopsis   | IPv6 filter identifier   |
| Context    | <b>configure service ipipe</b> <i>string sap string egress filter ipv6 reference</i> |
| Tree       | <a href="#">ipv6</a>   |
| Reference  | <b>configure filter ipv6-filter</b> <i>string</i>                                    |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context                                       |
| Context    | <b>configure service ipipe</b> <i>string sap string egress qos</i> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### policer-control-policy

|            |   |
|------------|---|
| Synopsis   | Enter the <b>policer-control-policy</b> context   |
| Context    | <b>configure service ipipe</b> <i>string sap string egress qos policer-control-policy</i> |
| Tree       | <a href="#">policer-control-policy</a>  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR                                    |

### overrides

|            |   |
|------------|---|
| Synopsis   | Enable the <b>overrides</b> context   |
| Context    | <b>configure service ipipe</b> <i>string sap string egress qos policer-control-policy overrides</i> |
| Tree       | <a href="#">overrides</a>   |
| Introduced | 20.10.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## root

Synopsis Enter the **root** context

Context **configure service ipipe string sap string egress qos policer-control-policy overrides root**

Tree **root**

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## max-rate (*number* | *keyword*)

Synopsis Maximum frame-based bandwidth limit

Context **configure service ipipe string sap string egress qos policer-control-policy overrides root max-rate (*number* | *keyword*)**

Tree **max-rate**

Range 1 to 6400000000

Options max

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## priority-mbs-thresholds

Synopsis Enter the **priority-mbs-thresholds** context

Context **configure service ipipe string sap string egress qos policer-control-policy overrides root priority-mbs-thresholds**

Tree **priority-mbs-thresholds**

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## min-thresh-separation (*number* | *keyword*)

Synopsis Minimum amount of separation buffer space

Context **configure service ipipe string sap string egress qos policer-control-policy overrides root priority-mbs-thresholds min-thresh-separation (*number* | *keyword*)**

Tree **min-thresh-separation**

|            |  |
|------------|--|
| Range      | 0 to 16777216  |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **priority** [[priority-level](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priority</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **[priority-level]** *number*

|            |  |
|------------|--|
| Synopsis   | Priority level   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>   |
| Range      | 1 to 8   |
| Notes      | This element is part of a list key.  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **mbs-contribution** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Minimum amount of cumulative buffer space allowed  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> <a href="#">mbs-contribution</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mbs-contribution</a>   |
| Range      | 0 to 16777216  |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 20.10.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **policy-name** *reference*

Synopsis Policer control policy name

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [policer-control-policy](#) [policy-name](#) *reference*

Tree [policy-name](#)

Reference **configure** [qos](#) [policer-control-policy](#) *string*

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **qinq-mark-top-only** *boolean*

Synopsis Mark top Q-tags

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [qinq-mark-top-only](#) *boolean*

Tree [qinq-mark-top-only](#)

Default false

Introduced 20.10.R1

Platforms All

### **sap-egress**

Synopsis Enter the **sap-egress** context

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#)

Tree [sap-egress](#)

Introduced 20.10.R1

Platforms All

### **overrides**

Synopsis Enter the **overrides** context

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#)

Tree [overrides](#)

Introduced 20.10.R1

Platforms All

### **hs-secondary-shaper** *string*

Synopsis HS Secondary Shaper

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [hs-secondary-shaper](#) *string*

Tree [hs-secondary-shaper](#)

String Length 1 to 32

Introduced 20.10.R1

Platforms 7750 SR-7/12/12e

### **hs-wrr-group** [[group-id](#)] *reference*

Synopsis Enter the **hs-wrr-group** list instance

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [hs-wrr-group](#) *reference*

Tree [hs-wrr-group](#)

Introduced 20.10.R1

Platforms 7750 SR-7/12/12e

### [[group-id](#)] *reference*

Synopsis HS WRR group identifier

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [hs-wrr-group](#) *reference*

Tree [hs-wrr-group](#)

Reference **configure** [qos](#) [sap-egress](#) *string* [hs-wrr-group](#) *number*

Notes This element is part of a list key.

Introduced 20.10.R1

Platforms 7750 SR-7/12/12e

### **hs-class-weight** *number*

Synopsis Class weight override of the WRR group

|            |  |
|------------|--|
| Context    | <b>configure service ipipe string sap string egress qos sap-egress overrides hs-wrr-group reference hs-class-weight number</b> |
| Tree       | <a href="#">hs-class-weight</a>  |
| Range      | 1   2   4   8  |
| Introduced | 20.10.R1   |
| Platforms  | 7750 SR-7/12/12e   |

### **percent-rate** *decimal-number*

|            |   |
|------------|---|
| Synopsis   | Percent rate override applied to the HS WRR group   |
| Context    | <b>configure service ipipe string sap string egress qos sap-egress overrides hs-wrr-group reference percent-rate decimal-number</b> |
| Tree       | <a href="#">percent-rate</a>  |
| Range      | 0.01 to 100.00  |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .   |
| Introduced | 20.10.R1  |
| Platforms  | 7750 SR-7/12/12e  |

### **rate** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Scheduling rate override applied to the HS WRR group  |
| Context    | <b>configure service ipipe string sap string egress qos sap-egress overrides hs-wrr-group reference rate (number   keyword)</b> |
| Tree       | <a href="#">rate</a>  |
| Range      | 1 to 2000000000   |
| Units      | kilobps   |
| Options    | max   |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .   |
| Introduced | 20.10.R1  |
| Platforms  | 7750 SR-7/12/12e  |

### **policer** [[policer-id](#)] *reference*

|          |  |
|----------|--|
| Synopsis | Enter the <b>policer</b> list instance   |
| Context  | <b>configure service ipipe string sap string egress qos sap-egress overrides policer reference</b> |

|            |  |
|------------|--|
| Tree       | <a href="#">policer</a>                                |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

**[policer-id] reference**

|            |   |
|------------|---|
| Synopsis   | Policer unique ID   |
| Context    | <b>configure service ipipe</b> <i>string sap string egress qos sap-egress overrides policer reference</i> |
| Tree       | <a href="#">policer</a>   |
| Reference  | <b>configure qos sap-egress</b> <i>string policer number</i>  |
| Notes      | This element is part of a list key.   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**cbs (number | keyword)**

|            |  |
|------------|--|
| Synopsis   | CBS  |
| Context    | <b>configure service ipipe</b> <i>string sap string egress qos sap-egress overrides policer reference cbs (number   keyword)</i> |
| Tree       | <a href="#">cbs</a>  |
| Range      | 0 to 268435456   |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**mbs (number | keyword)**

|          |  |
|----------|--|
| Synopsis | MBS  |
| Context  | <b>configure service ipipe</b> <i>string sap string egress qos sap-egress overrides policer reference mbs (number   keyword)</i> |
| Tree     | <a href="#">mbs</a>  |
| Range    | 0 to 268435456   |
| Units    | bytes  |
| Options  | auto   |

|            |  |
|------------|--|
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **packet-byte-offset** *number*

|            |  |
|------------|--|
| Synopsis   | Packet size modification for policing information  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <b>packet-byte-offset</b> <i>number</i> |
| Tree       | <a href="#">packet-byte-offset</a>   |
| Range      | -64 to 31  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **percent-rate**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>percent-rate</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <b>percent-rate</b> |
| Tree       | <a href="#">percent-rate</a>   |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **cir** *decimal-number*

|            |  |
|------------|--|
| Synopsis   | CIR percent rate   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <a href="#">percent-rate</a> <b>cir</b> <i>decimal-number</i> |
| Tree       | <a href="#">cir</a>  |
| Range      | 0.00 to 100.00   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **pir** *decimal-number*

|          |                  |
|----------|------------------|
| Synopsis | PIR percent rate |
|----------|------------------|

|            |  |
|------------|--|
| Context    | <b>configure service ipipe</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides policer</b><br><i>reference percent-rate pir decimal-number</i> |
| Tree       | <a href="#">pir</a>  |
| Range      | 0.01 to 100.00   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**rate**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>rate</b> context   |
| Context    | <b>configure service ipipe</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides policer</b><br><i>reference rate</i> |
| Tree       | <a href="#">rate</a>  |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**cir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CIR rate   |
| Context    | <b>configure service ipipe</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides policer</b><br><i>reference rate cir</i> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cir</a>  |
| Range      | 0 to 6400000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**pir** (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | PIR rate   |
| Context  | <b>configure service ipipe</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress qos sap-egress overrides policer</b><br><i>reference rate pir</i> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">pir</a>  |
| Range    | 1 to 6400000000  |

|            |  |
|------------|--|
| Units      | kilobps  |
| Options    | max  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **stat-mode** *keyword*

|            |   |
|------------|---|
| Synopsis   | Mode of statistics collected by the policer   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a><br><i>reference</i> <a href="#">stat-mode</a> <i>keyword</i> |
| Tree       | <a href="#">stat-mode</a>   |
| Options    | no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-profile-cir, offered-limited-capped-cir, offered-profile-capped-cir, offered-total-cir-exceed, offered-four-profile-no-cir, offered-total-cir-four-profile  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **queue** [[queue-id](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>queue</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a><br><i>reference</i> |
| Tree       | <a href="#">queue</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### **[queue-id]** *reference*

|            |  |
|------------|--|
| Synopsis   | Policer unique ID  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a><br><i>reference</i> |
| Tree       | <a href="#">queue</a>  |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">sap-egress</a> <i>string</i> <a href="#">queue</a> <i>number</i>  |
| Notes      | This element is part of a list key.  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**adaptation-rule**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>adaptation-rule</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <a href="#">adaptation-rule</a> |

| Options    | max, min, closest   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**avg-frame-overhead** *decimal-number*

|          |   |
|----------|---|
| Synopsis | Average packet-to-frame encapsulation overhead  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <a href="#">avg-frame-overhead</a> <i>decimal-number</i> |
| Tree     | <a href="#">avg-frame-overhead</a>  |
| Range    | 0.00 to 100.00  |

Introduced 20.10.R1  
 Platforms All

### **burst-limit** (*number* | *keyword*)

Synopsis Explicit shaping burst size for the queue  
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)  
*reference* [burst-limit](#) (*number* | *keyword*)  
 Tree [burst-limit](#)  
 Range 1 to 14000000  
 Units bytes  
 Options auto  
 Introduced 20.10.R1  
 Platforms All

### **cbs** (*number* | *keyword*)

Synopsis CBS  
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)  
*reference* [cbs](#) (*number* | *keyword*)  
 Tree [cbs](#)  
 Range 0 to 1048576  
 Units kilobytes  
 Options auto  
 Introduced 20.10.R1  
 Platforms All

### **drop-tail**

Synopsis Enter the **drop-tail** context  
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)  
*reference* [drop-tail](#)  
 Tree [drop-tail](#)  
 Introduced 20.10.R1  
 Platforms All

**low**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>low</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a><br><i>reference</i> <a href="#">drop-tail</a> <a href="#">low</a> |
| Tree       | <a href="#">low</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**percent-reduction-from-mbs** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Percentage reduction from the MBS for a queue drop tail  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a><br><i>reference</i> <a href="#">drop-tail</a> <a href="#">low</a> <a href="#">percent-reduction-from-mbs</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">percent-reduction-from-mbs</a>   |
| Range      | 0 to 100   |
| Options    | auto   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**hs-class-weight** *number*

|            |  |
|------------|--|
| Synopsis   | Class weight override for the queue  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a><br><i>reference</i> <a href="#">hs-class-weight</a> <i>number</i> |
| Tree       | <a href="#">hs-class-weight</a>  |
| Range      | 1   2   4   8  |
| Introduced | 20.10.R1   |
| Platforms  | 7750 SR-7/12/12e   |

**hs-wred-queue**

|          |  |
|----------|--|
| Synopsis | Enter the <b>hs-wred-queue</b> context   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a><br><i>reference</i> <a href="#">hs-wred-queue</a> |
| Tree     | <a href="#">hs-wred-queue</a>  |

Introduced 20.10.R1  
 Platforms 7750 SR-7/12/12e

### **policy reference**

Synopsis Slope policy applied to the HSQ queue group queue  
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)  
[reference](#) [hs-wred-queue](#) [policy](#) [reference](#)  
 Tree [policy](#)  
 Reference **configure** [qos](#) [slope-policy](#) *string*  
 Introduced 20.10.R1  
 Platforms 7750 SR-7/12/12e

### **hs-wrr-weight number**

Synopsis WRR weight to parent with the queue into the scheduler  
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)  
[reference](#) [hs-wrr-weight](#) *number*  
 Tree [hs-wrr-weight](#)  
 Range 1 to 127  
 Default 1  
 Introduced 20.10.R1  
 Platforms 7750 SR-7/12/12e

### **mbs (number | keyword)**

Synopsis MBS  
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)  
[reference](#) [mbs](#) *(number | keyword)*  
 Tree [mbs](#)  
 Range 0 to 1073741824  
 Units bytes  
 Options auto  
 Introduced 20.10.R1  
 Platforms All

**monitor-queue-depth**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>monitor-queue-depth</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <b>monitor-queue-depth</b> |
| Tree       | <a href="#">monitor-queue-depth</a>   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**fast-polling** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable fast polling of the queue depth  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <a href="#">monitor-queue-depth</a> <b>fast-polling</b> <i>boolean</i> |
| Tree        | <a href="#">fast-polling</a>  |
| Description | When configured to <b>true</b> , this command enables fast polling of the queue depth. Faster polling allows a more accurate view of the actual depth.<br>When configured to <b>false</b> , fast queue polling is not enabled.  |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

**violation-threshold** *decimal-number*

|             |   |
|-------------|---|
| Synopsis    | Threshold for queue depth before violation is raised  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <a href="#">monitor-queue-depth</a> <b>violation-threshold</b> <i>decimal-number</i> |
| Tree        | <a href="#">violation-threshold</a>   |
| Description | This command specifies the threshold for the queue MBS. When the queue depth exceeds the threshold value, a violation is registered.  |
| Range       | 0.01 to 99.99   |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

**parent**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>parent</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a><br><i>reference</i> <a href="#">parent</a> |
| Tree       | <a href="#">parent</a>  |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**cir-weight** *number*

|            |  |
|------------|--|
| Synopsis   | CIR parameter that overrides parent for queue group  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a><br><i>reference</i> <a href="#">parent</a> <a href="#">cir-weight</a> <i>number</i> |
| Tree       | <a href="#">cir-weight</a>   |
| Range      | 0 to 100   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**weight** *number*

|            |  |
|------------|--|
| Synopsis   | PIR parameter that overrides parent for queue group  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a><br><i>reference</i> <a href="#">parent</a> <a href="#">weight</a> <i>number</i> |
| Tree       | <a href="#">weight</a>   |
| Range      | 0 to 100   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**percent-rate**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>percent-rate</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a><br><i>reference</i> <a href="#">percent-rate</a> |
| Tree       | <a href="#">percent-rate</a>  |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .   |
| Introduced | 20.10.R1  |

Platforms All

### **cir** *decimal-number*

Synopsis CIR percent rate

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)  
*reference* [percent-rate](#) [cir](#) *decimal-number*

Tree [cir](#)

Range 0.00 to 100.00

Introduced 20.10.R1

Platforms All

### **pir** *decimal-number*

Synopsis PIR percent rate

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)  
*reference* [percent-rate](#) [pir](#) *decimal-number*

Tree [pir](#)

Range 0.01 to 100.00

Introduced 20.10.R1

Platforms All

### **rate**

Synopsis Enter the **rate** context

Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [overrides](#) [queue](#)  
*reference* [rate](#)

| Synopsis | Enter the <b>port-redirect-group</b> context  |
| Context  | <b>configure service ipipe</b> <i>string sap string egress qos sap-egress port-redirect-group</i> |
| Tree     | <a href="#">port-redirect-group</a>   |

Introduced 20.10.R1  
Platforms All

### **group-name** *reference*

Synopsis Name of the queue group redirect list policy  
Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [port-redirect-group](#) [group-name](#) *reference*  
Tree [group-name](#)  
Reference **configure** [qos](#) [queue-group-templates](#) [egress](#) [queue-group](#) *string*  
Introduced 20.10.R1  
Platforms All

### **instance** *number*

Synopsis Instance of port queue group  
Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [sap-egress](#) [port-redirect-group](#) [instance](#) *number*  
Tree [instance](#)  
Range 1 to 65535  
Introduced 20.10.R1  
Platforms All

### **scheduler-policy**

Synopsis Enter the **scheduler-policy** context  
Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [scheduler-policy](#)  
Tree [scheduler-policy](#)  
Introduced 20.10.R1  
Platforms All

### **overrides**

Synopsis Enter the **overrides** context  
Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [egress](#) [qos](#) [scheduler-policy](#) [overrides](#)  
Tree [overrides](#)

|            |          |
|------------|----------|
| Introduced | 20.10.R1 |
| Platforms  | All      |

### **scheduler** [[scheduler-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>scheduler</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos scheduler-policy overrides</a><br><a href="#">scheduler</a> <i>string</i> |
| Tree       | <a href="#">scheduler</a>   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

### **[scheduler-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Scheduler name   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos scheduler-policy overrides</a><br><a href="#">scheduler</a> <i>string</i>  |
| Tree          | <a href="#">scheduler</a>  |
| Description   | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 20.10.R1   |
| Platforms     | All  |

### **parent**

|          |                                 |
|----------|---------------------------------|
| Synopsis | Enter the <b>parent</b> context |

| Introduced | 20.10.R1  |
| Platforms  | All   |

## match-qinq-dot1p *keyword*

|            |  |
|------------|--|
| Synopsis   | Ingress match QinQ Dot1p   |
| Context    | <b>configure service ipipe</b> <i>string sap string ingress qos match-qinq-dot1p keyword</i> |
| Tree       | <a href="#">match-qinq-dot1p</a>   |
| Options    | top, bottom  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## policer-control-policy

|            |  |
|------------|--|
| Synopsis   | Enter the <b>policer-control-policy</b> context  |
| Context    | <b>configure service ipipe</b> <i>string sap string ingress qos policer-control-policy</i> |
| Tree       | <a href="#">policer-control-policy</a>   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR                                     |

## overrides

|          |  |
|----------|--|
| Synopsis | Enable the <b>overrides</b> context  |
| Context  | <b>configure service ipipe</b> <i>string sap string ingress qos policer-control-policy overrides</i> |
| Tree     | <a href="#">overrides</a>  |

Introduced 20.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## root

Synopsis Enter the **root** context  
 Context **configure service ipipe string sap string ingress qos policer-control-policy overrides root**  
 Tree [root](#)  
 Introduced 20.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## max-rate (*number | keyword*)

Synopsis Maximum frame-based bandwidth limit  
 Context **configure service ipipe string sap string ingress qos policer-control-policy overrides root**  
[max-rate \(\*number | keyword\*\)](#)  
 Tree [max-rate](#)  
 Range 1 to 6400000000  
 Options max  
 Introduced 20.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## priority-mbs-thresholds

Synopsis Enter the **priority-mbs-thresholds** context  
 Context **configure service ipipe string sap string ingress qos policer-control-policy overrides root**  
[priority-mbs-thresholds](#)  
 Tree [priority-mbs-thresholds](#)  
 Introduced 20.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## min-thresh-separation (*number | keyword*)

Synopsis Minimum amount of separation buffer space  
 Context **configure service ipipe string sap string ingress qos policer-control-policy overrides root**  
[priority-mbs-thresholds min-thresh-separation \(\*number | keyword\*\)](#)

|            |  |
|------------|--|
| Tree       | <a href="#">min-thresh-separation</a>                  |
| Range      | 0 to 16777216  |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **priority** [[priority-level](#)] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>priority</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **[priority-level]** *number*

|            |   |
|------------|---|
| Synopsis   | Priority level  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>  |
| Range      | 1 to 8  |
| Notes      | This element is part of a list key.   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **mbs-contribution** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | Minimum amount of cumulative buffer space allowed   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">overrides</a> <a href="#">root</a> <a href="#">priority-mbs-thresholds</a> <a href="#">priority</a> <i>number</i> <a href="#">mbs-contribution</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">mbs-contribution</a>  |
| Range    | 0 to 16777216   |
| Units    | bytes   |
| Options  | auto  |

|            |  |
|------------|--|
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **policy-name** *reference*

|            |  |
|------------|--|
| Synopsis   | Policer control policy name  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policer-control-policy</a> <a href="#">policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>  |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">policer-control-policy</a> <i>string</i>  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **sap-ingress**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sap-ingress</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> |
| Tree       | <a href="#">sap-ingress</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### **fp-redirect-group**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>fp-redirect-group</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">fp-redirect-group</a> |
| Tree       | <a href="#">fp-redirect-group</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### **group-name** *reference*

|           |  |
|-----------|--|
| Synopsis  | Queue group template name created on forwarding plane  |
| Context   | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">fp-redirect-group</a> <a href="#">group-name</a> <i>reference</i> |
| Tree      | <a href="#">group-name</a>   |
| Reference | <b>configure</b> <a href="#">qos</a> <a href="#">queue-group-templates</a> <a href="#">ingress</a> <a href="#">queue-group</a> <i>string</i>   |

Introduced 20.10.R1  
 Platforms All

### **instance** *number*

Synopsis Queue group instance  
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [fp-redirect-group](#)  
[instance](#) *number*  
 Tree [instance](#)  
 Range 1 to 65535  
 Introduced 20.10.R1  
 Platforms All

### **overrides**

Synopsis Enter the **overrides** context  
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [overrides](#)  
 Tree [overrides](#)  
 Introduced 20.10.R1  
 Platforms All

### **policer** [[policer-id](#)] *reference*

Synopsis Enter the **policer** list instance  
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [overrides](#) [policer](#)  
[reference](#)  
 Tree [policer](#)  
 Introduced 20.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **[policer-id]** *reference*

Synopsis Policer unique ID  
 Context **configure** [service](#) [ipipe](#) *string* [sap](#) *string* [ingress](#) [qos](#) [sap-ingress](#) [overrides](#) [policer](#)  
[reference](#)  
 Tree [policer](#)

|            |   |
|------------|---|
| Reference  | <b>configure qos sap-ingress</b> <i>string</i> <b>policer</b> <i>number</i> |
| Notes      | This element is part of a list key.   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR                      |

**cbs** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CBS  |
| Context    | <b>configure service ipipe</b> <i>string</i> <b>sap</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b><br><i>reference</i> <b>cbs</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>cbs</b>   |
| Range      | 0 to 268435456   |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**mbs** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | MBS  |
| Context    | <b>configure service ipipe</b> <i>string</i> <b>sap</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b><br><i>reference</i> <b>mbs</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>mbs</b>   |
| Range      | 0 to 268435456   |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**packet-byte-offset** *number*

|          |  |
|----------|--|
| Synopsis | Packet size modification for policing information  |
| Context  | <b>configure service ipipe</b> <i>string</i> <b>sap</b> <i>string</i> <b>ingress qos sap-ingress overrides policer</b><br><i>reference</i> <b>packet-byte-offset</b> <i>number</i> |
| Tree     | <b>packet-byte-offset</b>  |
| Range    | -32 to 31  |

|            |  |
|------------|--|
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

## percent-rate

|            |  |
|------------|--|
| Synopsis   | Enter the <b>percent-rate</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <b>percent-rate</b> |
| Tree       | <a href="#">percent-rate</a>   |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

## cir decimal-number

|            |  |
|------------|--|
| Synopsis   | CIR percent rate   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <a href="#">percent-rate</a> <b>cir</b> <i>decimal-number</i> |
| Tree       | <a href="#">cir</a>  |
| Range      | 0.00 to 100.00   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

## pir decimal-number

|            |  |
|------------|--|
| Synopsis   | PIR percent rate   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <a href="#">percent-rate</a> <b>pir</b> <i>decimal-number</i> |
| Tree       | <a href="#">pir</a>  |
| Range      | 0.01 to 100.00   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

## rate

|          |                               |
|----------|-------------------------------|
| Synopsis | Enter the <b>rate</b> context |
|----------|-------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service ipipe</b> <i>string sap string ingress qos sap-ingress overrides policer reference rate</i> |
| Tree       | <a href="#">rate</a>   |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .                                |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**cir** (*number | keyword*)

|            |  |
|------------|--|
| Synopsis   | CIR rate   |
| Context    | <b>configure service ipipe</b> <i>string sap string ingress qos sap-ingress overrides policer reference rate cir</i> ( <i>number   keyword</i> ) |
| Tree       | <a href="#">cir</a>  |
| Range      | 0 to 6400000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**pir** (*number | keyword*)

|            |  |
|------------|--|
| Synopsis   | PIR rate   |
| Context    | <b>configure service ipipe</b> <i>string sap string ingress qos sap-ingress overrides policer reference rate pir</i> ( <i>number   keyword</i> ) |
| Tree       | <a href="#">pir</a>  |
| Range      | 1 to 6400000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**stat-mode** *keyword*

|          |  |
|----------|--|
| Synopsis | Mode of statistics collected by the policer  |
| Context  | <b>configure service ipipe</b> <i>string sap string ingress qos sap-ingress overrides policer reference stat-mode</i> <i>keyword</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">stat-mode</a>   |
| Options    | no-stats, minimal, offered-profile-no-cir, offered-total-cir, offered-priority-no-cir, offered-profile-cir, offered-priority-cir, offered-limited-profile-cir, offered-profile-capped-cir, offered-limited-capped-cir |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **queue** [\[queue-id\]](#) *reference*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>queue</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> |
| Tree       | <a href="#">queue</a>   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

### **[queue-id]** *reference*

|            |   |
|------------|---|
| Synopsis   | Policer unique ID   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> |
| Tree       | <a href="#">queue</a>   |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">sap-ingress</a> <i>string</i> <a href="#">queue</a> <i>number</i>  |
| Notes      | This element is part of a list key.   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

### **adaptation-rule**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>adaptation-rule</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">queue</a> <i>reference</i> <a href="#">adaptation-rule</a> |
| Tree       | <a href="#">adaptation-rule</a>   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**cir keyword**

|            |   |
|------------|---|
| Synopsis   | Constraint used when deriving the operational CIR value   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">queue</a><br><a href="#">reference</a> <a href="#">adaptation-rule</a> <a href="#">cir</a> <a href="#">keyword</a> |
| Tree       | <a href="#">cir</a>   |
| Options    | max, min, closest   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**pir keyword**

|            |   |
|------------|---|
| Synopsis   | Constraint used when deriving the operational PIR value   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">queue</a><br><a href="#">reference</a> <a href="#">adaptation-rule</a> <a href="#">pir</a> <a href="#">keyword</a> |
| Tree       | <a href="#">pir</a>   |
| Options    | max, min, closest   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**cbs (number | keyword)**

|            |  |
|------------|--|
| Synopsis   | CBS  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">queue</a><br><a href="#">reference</a> <a href="#">cbs</a> <a href="#">(number   keyword)</a> |
| Tree       | <a href="#">cbs</a>  |
| Range      | 0 to 1048576   |
| Units      | kilobytes  |
| Options    | auto   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**drop-tail**

|          |   |
|----------|---|
| Synopsis | Enter the <b>drop-tail</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">queue</a><br><a href="#">reference</a> <a href="#">drop-tail</a> |

| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <b>scheduler-policy</b> <b>overrides</b> |

|            |                           |
|------------|---------------------------|
| Tree       | <a href="#">overrides</a> |
| Introduced | 20.10.R1                  |
| Platforms  | All                       |

### **scheduler** [[scheduler-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>scheduler</b> list instance  |
| Context    | <a href="#">configure service ipipe string sap string ingress qos scheduler-policy overrides scheduler string</a> |
| Tree       | <a href="#">scheduler</a>   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

### **[scheduler-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Scheduler name   |
| Context       | <a href="#">configure service ipipe string sap string ingress qos scheduler-policy overrides scheduler string</a>  |
| Tree          | <a href="#">scheduler</a>  |
| Description   | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (<code>#</code>, <code>\$</code>, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 20.10.R1   |
| Platforms     | All  |

**parent**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>parent</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <i>string</i> <b>parent</b> |
| Tree       | <a href="#">parent</a>  |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**cir-weight** *number*

|            |  |
|------------|--|
| Synopsis   | Weight used at the within-CIR port priority level  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <i>string</i> <a href="#">parent</a> <b>cir-weight</b> <i>number</i> |
| Tree       | <a href="#">cir-weight</a>   |
| Range      | 0 to 100   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**weight** *number*

|            |  |
|------------|--|
| Synopsis   | Relative weight of the scheduler to feed the queue   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <i>string</i> <a href="#">parent</a> <b>weight</b> <i>number</i> |

| Introduced | 20.10.R1  |
| Platforms  | All   |

**cir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CIR at which the queue it to operate   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <i>string</i> <a href="#">rate</a> <b>cir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cir</a>  |
| Range      | 0 to 6400000000  |
| Units      | kilobps  |
| Options    | sum, max   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**pir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | PIR at which the queue is to operate   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <i>string</i> <a href="#">rate</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>  |
| Range      | 1 to 6400000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**policy-name** *reference*

|            |  |
|------------|--|
| Synopsis   | Scheduler policy name  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>  |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">scheduler-policy</a> <i>string</i>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## lag

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lag</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> |
| Tree       | <a href="#">lag</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## link-map-profile *number*

|             |   |
|-------------|---|
| Synopsis    | LAG link map profile for a SAP or network interface   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <a href="#">link-map-profile</a> <i>number</i>   |
| Tree        | <a href="#">link-map-profile</a>  |
| Description | <p>This command assigns a preconfigured LAG link map profile to a SAP or network interface configured on a LAG or a PW port that exists on a LAG. After an operator assigns a LAG link map profile, the system rehashes the SAP or network interface egress traffic over the LAG as required by the new configuration.</p> <p>If the LAG link map profile for a SAP or network interface is deleted, the system reverts back to per-flow hashing.</p> |
| Range       | 1 to 64   |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

## per-link-hash

|            |  |
|------------|--|
| Synopsis   | Enter the <b>per-link-hash</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <a href="#">per-link-hash</a> |
| Tree       | <a href="#">per-link-hash</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## class *number*

|          |  |
|----------|--|
| Synopsis | Class used on LAG egress using weighted per-link-hash  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <a href="#">per-link-hash</a> <a href="#">class</a> <i>number</i> |
| Tree     | <a href="#">class</a>  |
| Range    | 1 to 3   |

|            |          |
|------------|----------|
| Default    | 1        |
| Introduced | 20.10.R1 |
| Platforms  | All      |

**weight** *number*

|            |   |
|------------|---|
| Synopsis   | Weight used on LAG egress using weighted per-link-hash  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <a href="#">per-link-hash</a> <a href="#">weight</a> <i>number</i> |
| Tree       | <a href="#">weight</a>  |
| Range      | 1 to 1024   |
| Default    | 1   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**mac** *string*

|            |  |
|------------|--|
| Synopsis   | MAC address of the Ipipe Ethernet SAP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mac</a> <i>string</i> |
| Tree       | <a href="#">mac</a>  |
| Default    | 00:00:00:00:00:00  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**mac-refresh** *number*

|            |  |
|------------|--|
| Synopsis   | MAC refresh interval   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mac-refresh</a> <i>number</i> |
| Tree       | <a href="#">mac-refresh</a>  |
| Range      | 0 to 65535   |
| Default    | 14400  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**multi-service-site** *reference*

|            |  |
|------------|--|
| Synopsis   | Multi service site name  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">ipipe</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">multi-service-site</a> <i>reference</i> |
| Tree       | <a href="#">multi-service-site</a>   |

| Synopsis    | MTU size  |
| Context     | <b>configure service ipipe</b> <i>string service-mtu number</i>   |
| Tree        | <a href="#">service-mtu</a>   |
| Description | This command configures the Maximum Transmission Unit (MTU) value (payload) for the service. The system uses the value to validate the operational state of the SAP and SDP binding within the service. The value overrides the default MTU for the service type. |

The service MTU and a SAP's service delineation encapsulation overhead (4 bytes for a dot1q tag) are used to derive the required MTU of the physical port or channel on which the SAP was created. If the required payload is larger than the port or channel MTU, the SAP is placed in an inoperative state. If the required MTU is equal to or less than the port or channel MTU, the SAP transitions to the operative state.

When binding an SDP to a service, the service MTU is compared to the path MTU associated with the SDP. The path MTU can be administratively defined in the context of the SDP. The default or administrative path MTU can be dynamically reduced due to the MTU capabilities discovered by the tunneling mechanism of the SDP or the egress interface MTU capabilities based on the next hop in the tunnel path. If the service MTU is larger than the path MTU, the SDP binding for the service is placed in an inoperative state. If the service MTU is equal to or less than the path MTU, the SDP binding is placed in an operational state.

If a service MTU, port or channel MTU, or path MTU is dynamically or administratively modified, all associated SAP and SDP binding operational states are automatically reevaluated.

Binding operational states are automatically reevaluated.

For I-VPLS and Epipe bound to a B-VPLS, the service MTU must be at least 18 bytes smaller than the B-VPLS service MTU to accommodate the PBB header.

Because this connects a Layer 2 to a Layer 3 service, adjust the service MTU under the Epipe service. The MTU that is advertised from the Epipe side is service MTU minus EtherHeaderSize.

In the **configure service epipe spoke-sdp** context, the **adv-service-mtu** command can be used to override the configured MTU value used in T-LDP signaling to the far-end of an Epipe spoke-sdp. The **adv-service-mtu** command is also used to validate the value signaled by the far-end PE.

| Range    | 1 to 1000  |
| Notes    | This element is part of a list key.  |

|            |  |
|------------|--|
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## action

|            |   |
|------------|---|
| Synopsis   | Enter the <b>action</b> context   |
| Context    | <b>configure service nat classifier</b> <i>string entry number action</i> |
| Tree       | <a href="#">action</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                              |

## destination-nat

|            |  |
|------------|--|
| Synopsis   | Enable the <b>destination-nat</b> context  |
| Context    | <b>configure service nat classifier</b> <i>string entry number action destination-nat</i>  |
| Tree       | <a href="#">destination-nat</a>  |
| Notes      | The following elements are part of a choice: ( <b>destination-nat</b> , <b>dnat</b> , and <b>dnat-ip-address</b> ) or <b>forward</b> . |
| Introduced | 21.2.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ip-address *string*

|            |   |
|------------|---|
| Synopsis   | Replacement destination IP address for packets  |
| Context    | <b>configure service nat classifier</b> <i>string entry number action destination-nat ip-address string</i> |
| Tree       | <a href="#">ip-address</a>  |
| Introduced | 21.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## forward

### WARNING:

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|          |                           |
|----------|---------------------------|
| Synopsis | Forward mode of operation |
|----------|---------------------------|

---

|            |  |
|------------|--|
| Context    | <b>configure service nat classifier</b> <i>string entry number action forward</i>  |
| Tree       | <b>forward</b>   |
| Notes      | The following elements are part of a choice: ( <b>destination-nat</b> , <b>dnat</b> , and <b>dnat-ip-address</b> ) or <b>forward</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure service nat classifier</b> <i>string entry number description string</i> |
| Tree          | <b>description</b>  |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **match**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>match</b> context   |
| Context    | <b>configure service nat classifier</b> <i>string entry number match</i> |
| Tree       | <b>match</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                             |

### **dst-port-range**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dst-port-range</b> context   |
| Context    | <b>configure service nat classifier</b> <i>string entry number match dst-port-range</i> |
| Tree       | <b>dst-port-range</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**end number****WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Upper bound of the port range   |
| Context    | <b>configure</b> <a href="#">service nat classifier</a> <i>string</i> <a href="#">entry number match dst-port-range</a> <b>end number</b> |
| Tree       | <a href="#">end</a>   |
| Range      | 0   1 to 65535  |
| Default    | 65535   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**start number****WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Lower bound of the port range   |
| Context    | <b>configure</b> <a href="#">service nat classifier</a> <i>string</i> <a href="#">entry number match dst-port-range</a> <b>start number</b> |
| Tree       | <a href="#">start</a>   |
| Range      | 0   1 to 65535  |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**foreign-ip-address string****WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Foreign IP address as the match criterion   |
| Context    | <b>configure</b> <a href="#">service nat classifier</a> <i>string</i> <a href="#">entry number match foreign-ip-address</a> <b>string</b> |
| Tree       | <a href="#">foreign-ip-address</a>  |
| Introduced | 19.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**protocol** *keyword***WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | IP protocol to match   |
| Context    | <b>configure</b> <a href="#">service nat classifier</a> <i>string</i> <a href="#">entry number match protocol</a> <i>keyword</i> |
| Tree       | <a href="#">protocol</a>   |
| Options    | tcp, udp   |
| Default    | udp  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**deterministic-script**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>deterministic-script</b> context                     |
| Context    | <b>configure</b> <a href="#">service nat deterministic-script</a> |
| Tree       | <a href="#">deterministic-script</a>                              |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                      |

**location** *string*

|               |  |
|---------------|--|
| Synopsis      | Remote location where Python script is exported  |
| Context       | <b>configure</b> <a href="#">service nat deterministic-script location</a> <i>string</i> |
| Tree          | <a href="#">location</a>   |
| String Length | 1 to 180   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**firewall-policy** [[name](#)] *string*

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>firewall-policy</b> list instance  |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i>  |
| Tree        | <a href="#">firewall-policy</a>   |
| Description | Commands in this context configure the attributes of the firewall policy, for use in contexts where basic protection from outside attack vectors is required. |

Firewall policies cannot be deleted if they are in use.

|                |                                    |
|----------------|------------------------------------|
| Max. Instances | 2048                               |
| Introduced     | 16.0.R1                            |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Firewall policy name   |
| Context       | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> |
| Tree          | <a href="#">firewall-policy</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **alg**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>alg</b> context   |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <b>alg</b>            |
| Tree        | <a href="#">alg</a>  |
| Description | Commands in this context configure the Application Layer Gateway (ALG) attributes of the policy. |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **ftp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use FTP ALG for the policy   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <b>alg ftp</b> <i>boolean</i> |
| Tree       | <a href="#">ftp</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **rtsp boolean**

|             |  |
|-------------|--|
| Synopsis    | Use RTSP ALG for the policy  |
| Context     | <b>configure service nat firewall-policy string alg rtsp boolean</b>                             |
| Tree        | <a href="#">rtsp</a>   |
| Description | When configured to <b>true</b> , Real-Time Streaming Protocol (RTSP) ALG is used for the policy. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **sip boolean**

|            |   |
|------------|---|
| Synopsis   | Use SIP ALG for the policy  |
| Context    | <b>configure service nat firewall-policy string alg sip boolean</b> |
| Tree       | <a href="#">sip</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                  |

### **description string**

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure service nat firewall-policy string description string</b> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                     |

### **domain**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>domain</b> context  |
| Context     | <b>configure service nat firewall-policy string domain</b>   |
| Tree        | <a href="#">domain</a>   |
| Description | Commands in this context configure the attributes of the domain for the firewall policy. All associated traffic must be part of the prefixes specified by this domain. |

---

|            |   |
|------------|---|
| Notes      | The following elements are part of a choice: <b>domain</b> or <b>I2-outside</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **name** *string*

|               |  |
|---------------|--|
| Synopsis      | Firewall domain name   |
| Context       | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">domain name</a> <i>string</i> |
| Tree          | <a href="#">name</a>   |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **router-instance** *string*

|             |   |
|-------------|---|
| Synopsis    | Router or VPRN service name   |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">domain router-instance</a> <i>string</i>                           |
| Tree        | <a href="#">router-instance</a>   |
| Description | This command specifies the router instance or VPRN service for this domain. All associated traffic must be part of the prefixes specified by this domain. |
| Introduced  | 16.0.R4   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **filtering** *keyword*

|            |   |
|------------|---|
| Synopsis   | Filtering method for inbound traffic for the policy   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">filtering</a> <i>keyword</i> |
| Tree       | <a href="#">filtering</a>   |
| Options    | endpoint-independent, address-and-port-dependent  |
| Default    | endpoint-independent  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## I2-outside

|             |  |
|-------------|--|
| Synopsis    | Use Layer 2 outside service address location   |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">I2-outside</a>                  |
| Tree        | <a href="#">I2-outside</a>   |
| Description | This command specifies Layer 2 outside service address location for the NAT policy instead of Layer 3 outside service. |
| Notes       | The following elements are part of a choice: <b>domain</b> or <b>I2-outside</b> .                                      |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## port-limits

|            |  |
|------------|--|
| Synopsis   | Enter the <b>port-limits</b> context   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">port-limits</a> |
| Tree       | <a href="#">port-limits</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## forwarding *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of port forwarding entries   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">port-limits</a> <a href="#">forwarding</a> <i>number</i> |
| Tree       | <a href="#">forwarding</a>  |
| Range      | 1 to 64   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## priority-sessions

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priority-sessions</b> context   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">priority-sessions</a> |
| Tree       | <a href="#">priority-sessions</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**fc**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>fc</b> context   |
| Context     | <b>configure service nat firewall-policy string priority-sessions fc</b>                        |
| Tree        | <b>fc</b>   |
| Description | Commands in this context specify which Forwarding Class (FC) options have prioritized sessions. |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**af boolean**

|             |  |
|-------------|--|
| Synopsis    | Prioritize traffic from AF forwarding classes  |
| Context     | <b>configure service nat firewall-policy string priority-sessions fc af boolean</b>  |
| Tree        | <b>af</b>  |
| Description | When configured to <b>true</b> , traffic from Assured Forwarding (AF) FC sessions is prioritized. When configured to <b>false</b> , AF traffic is not prioritized. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**be boolean**

|             |   |
|-------------|---|
| Synopsis    | Prioritize traffic from BE forwarding classes   |
| Context     | <b>configure service nat firewall-policy string priority-sessions fc be boolean</b>   |
| Tree        | <b>be</b>   |
| Description | When configured to <b>true</b> , traffic from Best Effort (BE) FC sessions is prioritized. When configured to <b>false</b> , BE traffic is not prioritized. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**ef boolean**

|          |   |
|----------|---|
| Synopsis | Prioritize traffic from EF forwarding classes                                       |
| Context  | <b>configure service nat firewall-policy string priority-sessions fc ef boolean</b> |

---

|            |                                    |
|------------|------------------------------------|
| Tree       | <a href="#">ef</a>                 |
| Default    | false                              |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## **h1** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Prioritize traffic from H1 forwarding classes   |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">priority-sessions</a> <a href="#">fc h1</a> <i>boolean</i> |
| Tree        | <a href="#">h1</a>  |
| Description | When configured to <b>true</b> , traffic from H1 sessions is prioritized. When configured to false, H1 traffic is not prioritized.                |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## **h2** *boolean*

|            |   |
|------------|---|
| Synopsis   | Prioritize traffic from H2 forwarding classes   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">priority-sessions</a> <a href="#">fc h2</a> <i>boolean</i> |
| Tree       | <a href="#">h2</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## **l1** *boolean*

|            |   |
|------------|---|
| Synopsis   | Prioritize traffic from L1 forwarding classes   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">priority-sessions</a> <a href="#">fc l1</a> <i>boolean</i> |
| Tree       | <a href="#">l1</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## ***l2 boolean***

|             |  |
|-------------|--|
| Synopsis    | Prioritize traffic from L2 forwarding classes  |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">priority-sessions fc l2 boolean</a>         |
| Tree        | <a href="#">l2</a>   |
| Description | When configured to <b>true</b> , traffic from L2 sessions is prioritized. When configured to false, L2 traffic is not prioritized. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ***nc boolean***

|            |  |
|------------|--|
| Synopsis   | Prioritize traffic from NC forwarding classes  |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">priority-sessions fc nc boolean</a> |
| Tree       | <a href="#">nc</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## **session-limits**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>session-limits</b> context   |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">session-limits</a> |
| Tree        | <a href="#">session-limits</a>  |
| Description | Commands in this context configure session-limit attributes for the policy.                               |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## ***max number***

|          |  |
|----------|--|
| Synopsis | Maximum number of sessions per subscriber  |
| Context  | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">session-limits max number</a> |
| Tree     | <a href="#">max</a>  |
| Range    | 1 to 65535   |
| Default  | 65535  |

|            |                                    |
|------------|------------------------------------|
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **reserved** *number*

|             |  |
|-------------|--|
| Synopsis    | Number of sessions reserved for prioritized sessions   |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">session-limits reserved</a> <i>number</i> |
| Tree        | <a href="#">reserved</a>   |
| Description | This command configures the number of sessions per block that are reserved for prioritized sessions.                             |
| Range       | 1 to 65534   |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **watermarks**

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>watermarks</b> context   |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">session-limits watermarks</a> |
| Tree        | <a href="#">watermarks</a>   |
| Description | This command configures watermarks for NAT resources.  |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **high** *number*

|             |   |
|-------------|---|
| Synopsis    | High watermark percentage   |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">session-limits watermarks high</a> <i>number</i> |
| Tree        | <a href="#">high</a>  |
| Description | This command configures the high threshold value as a percentage of the total port-block space in a NAT pool.                           |
| Range       | 0 to 100  |
| Units       | percent   |
| Notes       | This element is mandatory.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**low number**

|             |  |
|-------------|--|
| Synopsis    | Low watermark percentage   |
| Context     | <b>configure service nat firewall-policy string session-limits watermarks low number</b>                     |
| Tree        | <a href="#">low</a>  |
| Description | This command configures the low threshold value as a percentage of the total port-block space in a NAT pool. |
| Range       | 0 to 100   |
| Units       | percent  |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**tcp**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>tcp</b> context   |
| Context     | <b>configure service nat firewall-policy string tcp</b>  |
| Tree        | <a href="#">tcp</a>  |
| Description | Commands in this context configure the transmission control protocol (TCP) attributes of the policy. |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**mss-adjust number**

|             |  |
|-------------|--|
| Synopsis    | TCP MSS adjustment value   |
| Context     | <b>configure service nat firewall-policy string tcp mss-adjust number</b>  |
| Tree        | <a href="#">mss-adjust</a>   |
| Description | This command configures the value to use to adjust the TCP Maximum Segment Size (MSS) option, if not already present or the present value is higher. |
| Range       | 160 to 10240   |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## timeouts

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>timeouts</b> context  |
| Context     | <b>configure service nat firewall-policy string timeouts</b>                               |
| Tree        | <a href="#">timeouts</a>   |
| Description | Commands in this context configure the attributes of session idle timeouts for the policy. |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## icmp6-query *number*

|            |   |
|------------|---|
| Synopsis   | Timeout applied to an ICMPv6 Query session                                      |
| Context    | <b>configure service nat firewall-policy string timeouts icmp6-query number</b> |
| Tree       | <a href="#">icmp6-query</a>   |
| Range      | 60 to 240   |
| Units      | seconds   |
| Default    | 60  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## sip *number*

|            |   |
|------------|---|
| Synopsis   | SIP inactive media timeout  |
| Context    | <b>configure service nat firewall-policy string timeouts sip number</b> |
| Tree       | <a href="#">sip</a>   |
| Range      | 10 to 7200  |
| Units      | seconds   |
| Default    | 120   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                      |

## tcp

|          |  |
|----------|--|
| Synopsis | Enter the <b>tcp</b> context                                     |
| Context  | <b>configure service nat firewall-policy string timeouts tcp</b> |
| Tree     | <a href="#">tcp</a>  |

---

|             |  |
|-------------|--|
| Description | Commands in this context configure TCP timeout attributes. |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR                         |

### **established** *number*

|            |   |
|------------|---|
| Synopsis   | Idle timeout for TCP session in established state   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">timeouts tcp established</a> <i>number</i> |
| Tree       | <a href="#">established</a>   |
| Range      | 60 to 86400   |
| Units      | seconds   |
| Default    | 7440  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **rst** *number*

|             |   |
|-------------|---|
| Synopsis    | Suspend time for TCP connection ports closed by RST   |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">timeouts tcp rst</a> <i>number</i>   |
| Tree        | <a href="#">rst</a>   |
| Description | This command configures the suspend time for outside TCP ports that are used in translations for TCP connections, when they are closed by TCP Reset (RST). After the timer expires, the outside ports can be reused for new TCP translations. |
| Range       | 0 to 240  |
| Units       | seconds   |
| Default     | 0   |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **syn** *number*

|          |   |
|----------|---|
| Synopsis | TCP session timeout when synchronizing initial sequence   |
| Context  | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">timeouts tcp syn</a> <i>number</i> |
| Tree     | <a href="#">syn</a>   |
| Range    | 6 to 86400  |

|            |                                    |
|------------|------------------------------------|
| Units      | seconds                            |
| Default    | 15                                 |
| Introduced | 16.0.R1                            |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **time-wait** *number*

|            |   |
|------------|---|
| Synopsis   | Timeout applied to a TCP session in the time-wait state   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">timeouts tcp time-wait</a> <i>number</i> |
| Tree       | <a href="#">time-wait</a>   |
| Range      | 0 to 240  |
| Units      | seconds   |
| Default    | 0   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **transitory** *number*

|            |  |
|------------|--|
| Synopsis   | Idle timeout for TCP session in transitory state   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">timeouts tcp transitory</a> <i>number</i> |
| Tree       | <a href="#">transitory</a>   |
| Range      | 60 to 86400  |
| Units      | seconds  |
| Default    | 240  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **udp**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>udp</b> context  |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">timeouts udp</a> |
| Tree        | <a href="#">udp</a>   |
| Description | Commands in this context configure the User Datagram Protocol (UDP) mapping timeout attributes.         |
| Introduced  | 16.0.R1   |

---

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dns number**

Synopsis Timeout applied to UDP session with destination port 53

Context **configure service nat firewall-policy string timeouts udp dns number**

Tree **dns**

Range 15 to 86400

Units seconds

Default 15

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **initial number**

Synopsis UDP mapping timeout applied to new sessions

Context **configure service nat firewall-policy string timeouts udp initial number**

Tree **initial**

Range 10 to 300

Units seconds

Default 15

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **normal number**

Synopsis UDP mapping timeout

Context **configure service nat firewall-policy string timeouts udp normal number**

Tree **normal**

Range 60 to 86400

Units seconds

Default 300

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**unknown-protocol** *number***WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Timeout for flows with an unknown protocol   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">timeouts unknown-protocol</a> <i>number</i> |
| Tree       | <a href="#">unknown-protocol</a>   |
| Range      | 60 to 86400  |
| Units      | seconds  |
| Default    | 300  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**udp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>udp</b> context   |
| Context    | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">udp</a> |
| Tree       | <a href="#">udp</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**inbound-refresh** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Extend UDP session timeout on inbound traffic   |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy</a> <i>string</i> <a href="#">udp inbound-refresh</a> <i>boolean</i>   |
| Tree        | <a href="#">inbound-refresh</a>   |
| Description | When configured to <b>true</b> , this command extends the UDP session timeout on inbound traffic.<br>When configured to <b>false</b> , the UDP session timeout is not extended. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## unknown-protocols

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>unknown-protocols</b> context  |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy string unknown-protocols</a>   |
| Tree        | <a href="#">unknown-protocols</a>   |
| Description | Commands in this context configure the treatment of flows of unknown Layer 4 protocols that cannot be natively handled by the system. |
| Introduced  | 16.0.R1   |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## all

|             |  |
|-------------|--|
| Synopsis    | Allow all protocols to create unknown flows  |
| Context     | <b>configure</b> <a href="#">service nat firewall-policy string unknown-protocols all</a>  |
| Tree        | <a href="#">all</a>  |
| Description | This command specifies that all protocols are permitted to create unknown flows. Protocol or IPv6 extension header values that are explicitly supported by SR OS will not be treated as unknown protocols. |
| Notes       | The following elements are part of a choice: <b>all</b> or <b>protocol</b> .   |
| Introduced  | 16.0.R1  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## protocol *number*

|                |   |
|----------------|---|
| Synopsis       | IANA number of protocol allowed to create unknown flow  |
| Context        | <b>configure</b> <a href="#">service nat firewall-policy string unknown-protocols protocol number</a>   |
| Tree           | <a href="#">protocol</a>  |
| Description    | This command specifies the Internet Assigned Numbers Authority (IANA) number of a protocol that is permitted to create unknown flows. Protocol or IPv6 extension header values that are explicitly supported by SR OS can be configured but will not be treated as unknown protocols. |
| Range          | 0 to 255  |
| Max. Instances | 8   |
| Notes          | The following elements are part of a choice: <b>all</b> or <b>protocol</b> .  |
| Introduced     | 16.0.R1   |
| Platforms      | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## map-t

|            |                                    |
|------------|------------------------------------|
| Synopsis   | Enter the <b>map-t</b> context     |
| Context    | <b>configure service nat map-t</b> |
| Tree       | <a href="#">map-t</a>              |
| Introduced | 16.0.R4                            |
| Platforms  | VSR                                |

## domain [[name](#)] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>domain</b> list instance            |
| Context        | <b>configure service nat map-t domain string</b> |
| Tree           | <a href="#">domain</a>                           |
| Max. Instances | 63   |
| Introduced     | 16.0.R4  |
| Platforms      | VSR  |

## [\[name\]](#) *string*

|               |  |
|---------------|--|
| Synopsis      | MAP domain name                                  |
| Context       | <b>configure service nat map-t domain string</b> |
| Tree          | <a href="#">domain</a>                           |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.              |
| Introduced    | 16.0.R4  |
| Platforms     | VSR  |

## admin-state *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of the MAP domain                               |

|            |   |
|------------|---|
| Context    | <b>configure service nat nat-policy string dnat</b> |
| Tree       | <b>dnat</b>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR        |

## classifier reference

### WARNING:

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | NAT classifier  |
| Context     | <b>configure service nat nat-policy string dnat classifier reference</b>  |
| Tree        | <b>classifier</b>   |
| Description | When configured within the NAT policy, this command references a NAT classifier that activates DNAT functionality. The configuration uses a filter-like approach to identify the traffic that is subjected to DNAT. It is required for translation of the destination IP address. |
| Reference   | <b>configure service nat classifier string</b>  |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## dnat-only

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>dnat-only</b> context  |
| Context     | <b>configure service nat nat-policy string dnat-only</b>   |
| Tree        | <b>dnat-only</b>   |
| Description | Commands in this context configure the attributes of DNAT-only. When DNAT-only is configured, no source or port NAT (SNAPT) is performed. Only the destination IP address (going from inside to outside) is translated; the source IP address and port are not translated. |
| Notes       | The following elements are part of a choice: <b>dnat-only</b> , <b>I2-outside</b> , or <b>pool</b> .   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## nat-group *reference*

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | NAT group  |
| Context     | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">dnat-only nat-group</a> <i>reference</i> |
| Tree        | <a href="#">nat-group</a>  |
| Description | This command configures the NAT group in which DNAT translation takes place for the outside routing context.               |
| Reference   | <b>configure</b> <a href="#">isa nat-group</a> <i>number</i>   |
| Notes       | The following elements are part of a mandatory choice: <b>nat-group</b> or <b>wlan-gw-group</b> .                          |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## router-instance *string*

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Router name or VPRN service name  |
| Context    | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">dnat-only router-instance</a> <i>string</i> |
| Tree       | <a href="#">router-instance</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## wlan-gw-group *reference*

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | WLAN GW group used for NAT   |
| Context     | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">dnat-only wlan-gw-group</a> <i>reference</i> |
| Tree        | <a href="#">wlan-gw-group</a>  |
| Description | This command configures the NAT WLAN Gateway (GW) group in which DNAT translation takes place for the outside routing context. |
| Reference   | <b>configure</b> <a href="#">isa wlan-gw-group</a> <i>number</i>   |
| Notes       | The following elements are part of a mandatory choice: <b>nat-group</b> or <b>wlan-gw-group</b> .                              |
| Introduced  | 16.0.R4  |
| Platforms   | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**filtering** *keyword*

|            |  |
|------------|--|
| Synopsis   | Filtering method for inbound traffic for the policy  |
| Context    | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">filtering</a> <i>keyword</i> |
| Tree       | <a href="#">filtering</a>  |
| Options    | endpoint-independent, address-and-port-dependent   |
| Default    | endpoint-independent   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**flow-log-policy**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>flow-log-policy</b> context  |
| Context    | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">flow-log-policy</a> |
| Tree       | <a href="#">flow-log-policy</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**ipfix** *reference*

|          |  |
|----------|--|
| Synopsis | IPFIX export policy  |
| Context  | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">flow-log-policy ipfix</a> <i>reference</i> |

|             |  |
|-------------|--|
| Tree        | <a href="#">ipfix</a>  |
| Description | This command specifies an IP flow information export policy for the flow-log policy. |
| Reference   | <b>configure</b> <a href="#">service ipfix export-policy</a> <i>string</i>           |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **syslog** *reference*

|             |   |
|-------------|---|
| Synopsis    | Syslog export policy name   |
| Context     | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">flow-log-policy</a> <a href="#">syslog</a> <i>reference</i>   |
| Tree        | <a href="#">syslog</a>  |
| Description | This command configures a syslog export policy with a set of transport parameters used to transmit NAT flow records in syslog format to an external collector node. The policy name is referenced from the NAT policy applied to an inside routing context. |
| Reference   | <b>configure</b> <a href="#">service nat syslog export-policy</a> <i>string</i>   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **I2-outside**

|             |  |
|-------------|--|
| Synopsis    | Use Layer 2 outside service address location   |
| Context     | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">I2-outside</a>                       |
| Tree        | <a href="#">I2-outside</a>   |
| Description | This command specifies Layer 2 outside service address location for the NAT policy instead of Layer 3 outside service. |
| Notes       | The following elements are part of a choice: <b>dnat-only</b> , <b>I2-outside</b> , or <b>pool</b> .                   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **pool**

|          |  |
|----------|--|
| Synopsis | Enter the <b>pool</b> context  |
| Context  | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">pool</a>           |
| Tree     | <a href="#">pool</a>   |
| Notes    | The following elements are part of a choice: <b>dnat-only</b> , <b>I2-outside</b> , or <b>pool</b> . |

|            |  |
|------------|--|
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**name** *string***WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | NAT pool name   |
| Context       | <b>configure</b> <b>service nat nat-policy</b> <i>string</i> <b>pool name</b> <i>string</i> |
| Tree          | <b>name</b>   |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**router-instance** *string***WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Router or VPRN service name  |
| Context    | <b>configure</b> <b>service nat nat-policy</b> <i>string</i> <b>pool router-instance</b> <i>string</i> |
| Tree       | <b>router-instance</b>   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**port-forwarding-range-end** *number*

|             |  |
|-------------|--|
| Synopsis    | End of the port forwarding range   |
| Context     | <b>configure</b> <b>service nat nat-policy</b> <i>string</i> <b>port-forwarding-range-end</b> <i>number</i>  |
| Tree        | <b>port-forwarding-range-end</b>   |
| Description | <p>This command specifies the end of the port range available for port forwarding. The start of the range is always equal to one.</p> <p>The number of ports that can be configured is half of the available block =&gt; <math>64512 / 2 = 32256</math>. In combination with the configured value for <b>port-forwarding-range-end</b>, the formulas are:</p> <p>max port-reservation blocks = <math>65535 - \text{port-forwarding-range-end}</math></p> |

$\text{max port-reservation ports} = (65535 - \text{port-forwarding-range-end}) / 2$

If **port-reservation** is already configured, the following applies for the maximum port-forwarding-range-end:

$\text{max port-forwarding-range-end} = 65535 - \text{port-reservation blocks}$   
 $\text{max port-forwarding-range-end} = 65535 - (\text{port-reservation ports} * 2)$

|            |  |
|------------|--|
| Range      | 1023 to 65535                                |
| Default    | 1023   |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### port-limits

|            |  |
|------------|--|
| Synopsis   | Enter the <b>port-limits</b> context                       |
| Context    | <b>configure service nat nat-policy string port-limits</b> |
| Tree       | <a href="#">port-limits</a>                                |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR               |

### forwarding *number*

|            |  |
|------------|--|
| Synopsis   | Maximum number of port forwarding entries                                    |
| Context    | <b>configure service nat nat-policy string port-limits forwarding number</b> |
| Tree       | <a href="#">forwarding</a>   |
| Range      | 1 to 64  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                 |

### reserved *number*

|             |   |
|-------------|---|
| Synopsis    | Number of ports reserved for prioritized sessions   |
| Context     | <b>configure service nat nat-policy string port-limits reserved number</b>                        |
| Tree        | <a href="#">reserved</a>  |
| Description | This command configures the number of ports per block that are reserved for prioritized sessions. |
| Range       | 1 to 65534  |
| Introduced  | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## watermarks

Synopsis Enable the **watermarks** context  
Context **configure service nat nat-policy string port-limits watermarks**  
Tree [watermarks](#)  
Description This command configures watermarks for NAT resources.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## high number

Synopsis High watermark percentage  
Context **configure service nat nat-policy string port-limits watermarks high number**  
Tree [high](#)  
Description This command configures the high threshold value as a percentage of the total port-block space in a NAT pool.  
Range 0 to 100  
Units percent  
Notes This element is mandatory.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## low number

Synopsis Low watermark percentage  
Context **configure service nat nat-policy string port-limits watermarks low number**  
Tree [low](#)  
Description This command configures the low threshold value as a percentage of the total port-block space in a NAT pool.  
Range 0 to 100  
Units percent  
Notes This element is mandatory.  
Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## priority-sessions

Synopsis Enter the **priority-sessions** context  
 Context **configure service nat nat-policy string priority-sessions**  
 Tree [priority-sessions](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## fc

Synopsis Enter the **fc** context  
 Context **configure service nat nat-policy string priority-sessions fc**  
 Tree [fc](#)  
 Description Commands in this context specify which Forwarding Class (FC) options have prioritized sessions.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## af boolean

Synopsis Prioritize traffic from AF forwarding classes  
 Context **configure service nat nat-policy string priority-sessions fc af boolean**  
 Tree [af](#)  
 Description When configured to **true**, traffic from Assured Forwarding (AF) FC sessions is prioritized. When configured to **false**, AF traffic is not prioritized.  
 Default false  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## be boolean

Synopsis Prioritize traffic from BE forwarding classes  
 Context **configure service nat nat-policy string priority-sessions fc be boolean**  
 Tree [be](#)

---

|             |   |
|-------------|---|
| Description | When configured to <b>true</b> , traffic from Best Effort (BE) FC sessions is prioritized. When configured to <b>false</b> , BE traffic is not prioritized. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **ef** *boolean*

|            |   |
|------------|---|
| Synopsis   | Prioritize traffic from EF forwarding classes   |
| Context    | <b>configure service nat nat-policy</b> <i>string</i> <b>priority-sessions fc ef</b> <i>boolean</i> |
| Tree       | <a href="#">ef</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **h1** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Prioritize traffic from H1 forwarding classes  |
| Context     | <b>configure service nat nat-policy</b> <i>string</i> <b>priority-sessions fc h1</b> <i>boolean</i>                                |
| Tree        | <a href="#">h1</a>   |
| Description | When configured to <b>true</b> , traffic from H1 sessions is prioritized. When configured to false, H1 traffic is not prioritized. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **h2** *boolean*

|            |   |
|------------|---|
| Synopsis   | Prioritize traffic from H2 forwarding classes   |
| Context    | <b>configure service nat nat-policy</b> <i>string</i> <b>priority-sessions fc h2</b> <i>boolean</i> |
| Tree       | <a href="#">h2</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**I1 *boolean***

|            |   |
|------------|---|
| Synopsis   | Prioritize traffic from L1 forwarding classes   |
| Context    | <b>configure service nat nat-policy</b> <i>string</i> <b>priority-sessions fc I1</b> <i>boolean</i> |
| Tree       | <b>I1</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**I2 *boolean***

|             |  |
|-------------|--|
| Synopsis    | Prioritize traffic from L2 forwarding classes  |
| Context     | <b>configure service nat nat-policy</b> <i>string</i> <b>priority-sessions fc I2</b> <i>boolean</i>                                |
| Tree        | <b>I2</b>  |
| Description | When configured to <b>true</b> , traffic from L2 sessions is prioritized. When configured to false, L2 traffic is not prioritized. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**nc *boolean***

|            |   |
|------------|---|
| Synopsis   | Prioritize traffic from NC forwarding classes   |
| Context    | <b>configure service nat nat-policy</b> <i>string</i> <b>priority-sessions fc nc</b> <i>boolean</i> |
| Tree       | <b>nc</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**session-limits**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>session-limits</b> context                                     |
| Context     | <b>configure service nat nat-policy</b> <i>string</i> <b>session-limits</b> |
| Tree        | <b>session-limits</b>   |
| Description | Commands in this context configure session-limit attributes for the policy. |
| Introduced  | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max number**

Synopsis Maximum number of sessions per subscriber  
 Context **configure service nat nat-policy string session-limits max number**  
 Tree [max](#)  
 Range 1 to 65535  
 Default 65535  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **reserved number**

Synopsis Number of sessions reserved for prioritized sessions  
 Context **configure service nat nat-policy string session-limits reserved number**  
 Tree [reserved](#)  
 Description This command configures the number of sessions per block that are reserved for prioritized sessions.  
 Range 1 to 65534  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **watermarks**

Synopsis Enable the **watermarks** context  
 Context **configure service nat nat-policy string session-limits watermarks**  
 Tree [watermarks](#)  
 Description This command configures watermarks for NAT resources.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **high number**

Synopsis High watermark percentage

|             |   |
|-------------|---|
| Context     | <b>configure service nat nat-policy</b> <i>string session-limits watermarks high number</i>                   |
| Tree        | <a href="#">high</a>  |
| Description | This command configures the high threshold value as a percentage of the total port-block space in a NAT pool. |
| Range       | 0 to 100  |
| Units       | percent   |
| Notes       | This element is mandatory.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **low number**

|             |  |
|-------------|--|
| Synopsis    | Low watermark percentage   |
| Context     | <b>configure service nat nat-policy</b> <i>string session-limits watermarks low number</i>                   |
| Tree        | <a href="#">low</a>  |
| Description | This command configures the low threshold value as a percentage of the total port-block space in a NAT pool. |
| Range       | 0 to 100   |
| Units       | percent  |
| Notes       | This element is mandatory.   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **tcp**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>tcp</b> context   |
| Context     | <b>configure service nat nat-policy</b> <i>string tcp</i>  |
| Tree        | <a href="#">tcp</a>  |
| Description | Commands in this context configure the transmission control protocol (TCP) attributes of the policy. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**mss-adjust** *number*

|             |  |
|-------------|--|
| Synopsis    | TCP MSS adjustment value   |
| Context     | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">tcp mss-adjust</a> <i>number</i>                                   |
| Tree        | <a href="#">mss-adjust</a>   |
| Description | This command configures the value to use to adjust the TCP Maximum Segment Size (MSS) option, if not already present or the present value is higher. |
| Range       | 160 to 10240   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**reset-unknown** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Generate TCP reset for packets from unknown flows   |
| Context     | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">tcp reset-unknown</a> <i>boolean</i>  |
| Tree        | <a href="#">reset-unknown</a>   |
| Description | When configured to <b>true</b> , TCP packets are dropped and a TCP reset is generated if the NAT inside receives a TCP packet without the SYN flag set for an unknown flow.<br>When configured to <b>false</b> , no TCP reset is generated. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**timeouts**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>timeouts</b> context  |
| Context     | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">timeouts</a> |
| Tree        | <a href="#">timeouts</a>   |
| Description | Commands in this context configure the attributes of session idle timeouts for the policy.     |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**icmp-query** *number*

|          |   |
|----------|---|
| Synopsis | Timeout applied to an ICMP Query session  |
| Context  | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">timeouts icmp-query</a> <i>number</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">icmp-query</a>                   |
| Range      | 60 to 240                                    |
| Units      | seconds                                      |
| Default    | 60   |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **sip number**

|            |   |
|------------|---|
| Synopsis   | SIP inactive media timeout  |
| Context    | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">timeouts sip number</a> |
| Tree       | <a href="#">sip</a>   |
| Range      | 10 to 7200  |
| Units      | seconds   |
| Default    | 120   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **subscriber-retention number**

|             |  |
|-------------|--|
| Synopsis    | IP address hold time after host and port blocks expire   |
| Context     | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">timeouts subscriber-retention number</a>   |
| Tree        | <a href="#">subscriber-retention</a>   |
| Description | This command configures the time to keep a NAT subscriber and its associated IP address after all hosts and associated port blocks expire. If a NAT subscriber host appears before the retention timeout elapses, it is given the same outside IP address. |
| Range       | 0 to 1440  |
| Units       | minutes  |
| Default     | 0  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **tcp**

|          |                              |
|----------|------------------------------|
| Synopsis | Enter the <b>tcp</b> context |
|----------|------------------------------|

|             |   |
|-------------|---|
| Context     | <b>configure service nat nat-policy</b> <i>string</i> <b>timeouts tcp</b> |
| Tree        | <b>tcp</b>  |
| Description | Commands in this context configure TCP timeout attributes.                |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                              |

### **established** *number*

|            |   |
|------------|---|
| Synopsis   | Idle timeout for TCP session in established state   |
| Context    | <b>configure service nat nat-policy</b> <i>string</i> <b>timeouts tcp established</b> <i>number</i> |
| Tree       | <b>established</b>  |
| Range      | 60 to 86400   |
| Units      | seconds   |
| Default    | 7440  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **rst** *number*

|             |   |
|-------------|---|
| Synopsis    | Suspend time for TCP connection ports closed by RST   |
| Context     | <b>configure service nat nat-policy</b> <i>string</i> <b>timeouts tcp rst</b> <i>number</i>   |
| Tree        | <b>rst</b>  |
| Description | This command configures the suspend time for outside TCP ports that are used in translations for TCP connections, when they are closed by TCP Reset (RST). After the timer expires, the outside ports can be reused for new TCP translations. |
| Range       | 0 to 240  |
| Units       | seconds   |
| Default     | 0   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **syn** *number*

|          |   |
|----------|---|
| Synopsis | TCP session timeout when synchronizing initial sequence                                     |
| Context  | <b>configure service nat nat-policy</b> <i>string</i> <b>timeouts tcp syn</b> <i>number</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">syn</a>                          |
| Range      | 6 to 86400                                   |
| Units      | seconds                                      |
| Default    | 15   |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **time-wait** *number*

|            |  |
|------------|--|
| Synopsis   | Timeout applied to a TCP session in the time-wait state  |
| Context    | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">timeouts tcp time-wait</a> <i>number</i> |
| Tree       | <a href="#">time-wait</a>  |
| Range      | 0 to 240   |
| Units      | seconds  |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **transitory** *number*

|            |   |
|------------|---|
| Synopsis   | Idle timeout for TCP session in transitory state  |
| Context    | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">timeouts tcp transitory</a> <i>number</i> |
| Tree       | <a href="#">transitory</a>  |
| Range      | 60 to 86400   |
| Units      | seconds   |
| Default    | 240   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **udp**

|          |  |
|----------|--|
| Synopsis | Enter the <b>udp</b> context   |
| Context  | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">timeouts udp</a> |
| Tree     | <a href="#">udp</a>  |

---

|             |   |
|-------------|---|
| Description | Commands in this context configure the User Datagram Protocol (UDP) mapping timeout attributes. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **dns number**

|            |   |
|------------|---|
| Synopsis   | Timeout applied to UDP session with destination port 53   |
| Context    | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">timeouts udp dns number</a> |
| Tree       | <a href="#">dns</a>   |
| Range      | 15 to 86400   |
| Units      | seconds   |
| Default    | 15  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **initial number**

|            |   |
|------------|---|
| Synopsis   | UDP mapping timeout applied to new sessions   |
| Context    | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">timeouts udp initial number</a> |
| Tree       | <a href="#">initial</a>   |
| Range      | 10 to 300   |
| Units      | seconds   |
| Default    | 15  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **normal number**

|          |  |
|----------|--|
| Synopsis | UDP mapping timeout  |
| Context  | <b>configure</b> <a href="#">service nat nat-policy</a> <i>string</i> <a href="#">timeouts udp normal number</a> |
| Tree     | <a href="#">normal</a>   |
| Range    | 60 to 86400  |
| Units    | seconds  |
| Default  | 300  |

|            |  |
|------------|--|
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## udp

|            |  |
|------------|--|
| Synopsis   | Enter the <b>udp</b> context                       |
| Context    | <b>configure service nat nat-policy string udp</b> |
| Tree       | <a href="#">udp</a>                                |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR       |

## inbound-refresh *boolean*

|             |   |
|-------------|---|
| Synopsis    | Extend UDP session timeout on inbound traffic   |
| Context     | <b>configure service nat nat-policy string udp inbound-refresh boolean</b>  |
| Tree        | <a href="#">inbound-refresh</a>   |
| Description | When configured to <b>true</b> , this command extends the UDP session timeout on inbound traffic.<br>When configured to <b>false</b> , the UDP session timeout is not extended. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## pcp-server-policy [*name*] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pcp-server-policy</b> list instance      |
| Context    | <b>configure service nat pcp-server-policy string</b> |
| Tree       | <a href="#">pcp-server-policy</a>                     |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR          |

## [*name*] *string*

|          |   |
|----------|---|
| Synopsis | PCP server policy name                                |
| Context  | <b>configure service nat pcp-server-policy string</b> |

|               |  |
|---------------|--|
| Tree          | <a href="#">pcp-server-policy</a>            |
| String Length | 1 to 32                                      |
| Notes         | This element is part of a list key.          |
| Introduced    | 16.0.R1                                      |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **lifetime**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lifetime</b> context  |
| Context    | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <i>string</i> <b>lifetime</b> |
| Tree       | <a href="#">lifetime</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **maximum** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum lifetime of explicit mappings made by the PCP servers   |
| Context    | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <i>string</i> <b>lifetime</b> <b>maximum</b> <i>number</i> |
| Tree       | <a href="#">maximum</a>   |
| Range      | 61 to 86400   |
| Default    | 86400   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **minimum** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum lifetime of explicit mappings made by the PCP servers                        |
| Context    | <b>configure service nat pcp-server-policy</b> <i>string lifetime minimum number</i> |
| Tree       | <a href="#">minimum</a>  |
| Range      | 60 to 86399  |
| Default    | 120  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **max-description-size** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum length of mapping descriptions made by the PCP servers                           |
| Context    | <b>configure service nat pcp-server-policy</b> <i>string max-description-size number</i> |
| Tree       | <a href="#">max-description-size</a>   |
| Range      | 1 to 64  |
| Default    | 64   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **opcode**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>opcode</b> context                                     |
| Context    | <b>configure service nat pcp-server-policy</b> <i>string opcode</i> |
| Tree       | <a href="#">opcode</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                        |

### **announce** *boolean*

|            |  |
|------------|--|
| Synopsis   | Process the announce PCP requests  |
| Context    | <b>configure service nat pcp-server-policy</b> <i>string opcode announce boolean</i> |
| Tree       | <a href="#">announce</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **get** *boolean*

|            |  |
|------------|--|
| Synopsis   | Process the get PCP requests   |
| Context    | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <i>string</i> <a href="#">opcode get</a> <i>boolean</i> |
| Tree       | <a href="#">get</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **map** *boolean*

|            |  |
|------------|--|
| Synopsis   | Process the map PCP requests   |
| Context    | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <i>string</i> <a href="#">opcode map</a> <i>boolean</i> |
| Tree       | <a href="#">map</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **option**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>option</b> context   |
| Context    | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <i>string</i> <a href="#">option</a> |
| Tree       | <a href="#">option</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **description** *boolean*

|            |  |
|------------|--|
| Synopsis   | Text description   |
| Context    | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <i>string</i> <a href="#">option description</a> <i>boolean</i> |
| Tree       | <a href="#">description</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**next** *boolean*

|            |  |
|------------|--|
| Synopsis   | Process the PCP requests that contain the next option  |
| Context    | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <a href="#">string option next</a> <i>boolean</i> |
| Tree       | <a href="#">next</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**port-reservation** *boolean*

|            |  |
|------------|--|
| Synopsis   | Process the PCP requests that contain the prefer failure option  |
| Context    | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <a href="#">string option port-reservation</a> <i>boolean</i> |
| Tree       | <a href="#">port-reservation</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**port-set** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Support the PORT_SET option in PCP MAP requests   |
| Context     | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <a href="#">string option port-set</a> <i>boolean</i>  |
| Tree        | <a href="#">port-set</a>  |
| Description | <p>When configured to <b>true</b>, the PCP MAP option optimizes PCP performance for applications that require multiple sets of port forwards. A range of consecutive port forwards can be requested by the PCP client with a single PCP request.</p> <p>When configured to <b>false</b>, the default behavior is applied, where a plain MAP option is used to allocate a single port in a single request.</p> |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**prefer-failure** *boolean*

|          |  |
|----------|--|
| Synopsis | Process the PCP requests that contain the port reservation option  |
| Context  | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <a href="#">string option prefer-failure</a> <i>boolean</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">prefer-failure</a>               |
| Default    | false  |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **third-party** *boolean*

|            |  |
|------------|--|
| Synopsis   | Process the PCP requests that contain the third party option   |
| Context    | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <i>string</i> <a href="#">option third-party</a> <i>boolean</i> |
| Tree       | <a href="#">third-party</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **reuse-external-ip-address** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Reuse external IP address for NAT subscriber   |
| Context     | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <i>string</i> <a href="#">reuse-external-ip-address</a> <i>boolean</i>  |
| Tree        | <a href="#">reuse-external-ip-address</a>  |
| Description | <p>When configured to <b>true</b>, the system reuses the external IP address assigned to a subscriber when the requested well-known port or external IP mapping is not available.</p> <p>When configured to <b>false</b>, a request for a well-known port is allocated as requested on a different external IP address if the port is already allocated to another subscriber sharing the same external IP address. The existing external IP address is initially allocated to the subscriber as a result of the initial traffic flow.</p> <p>This configuration flag can be set dynamically but the flag affects only PCP port forwards that are created after the flag has been set.</p> |
| Default     | false  |
| Introduced  | 19.10.R3   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **version**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>version</b> context   |
| Context    | <b>configure</b> <a href="#">service nat pcp-server-policy</a> <i>string</i> <a href="#">version</a> |
| Tree       | <a href="#">version</a>  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **maximum** *number*

Synopsis Maximum protocol version supported by the PCP servers  
Context **configure** [service nat pcp-server-policy](#) *string version maximum number*  
Tree [maximum](#)  
Range 1 to 255

| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | UP NAT policy name  |
| Context       | <b>configure</b> <i>service nat up-nat-policy string</i>  |
| Tree          | <i>up-nat-policy</i>  |
| Description   | This command specifies the UP NAT policy name. The name default has a special meaning representing the default UP NAT policy template. The system uses the default template when the BNG CPF does not receive a more specific name when the subscriber is instantiated. |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 20.10.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**alg**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>alg</b> context   |
| Context     | <b>configure</b> <i>service nat up-nat-policy string alg</i>                                     |
| Tree        | <i>alg</i>   |
| Description | Commands in this context configure the Application Layer Gateway (ALG) attributes of the policy. |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**ftp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use FTP ALG for the policy   |
| Context    | <b>configure</b> <i>service nat up-nat-policy string alg ftp boolean</i> |
| Tree       | <i>ftp</i>   |
| Default    | true   |
| Introduced | 20.10.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **pptp** *boolean*

Synopsis Use PPTP ALG for the policy

Context **configure** [service nat up-nat-policy](#) *string alg pptp boolean*

Tree [pptp](#)

Description When configured to **true**, the policy uses Point-to-Point Tunneling Protocol (PPTP) ALG.  
PPTP sessions can only be initiated from NAT inside.  
GRE traffic is allowed through NAT only if the corresponding mapping exists.  
There can be seven calls (GRE tunnels) per control session.  
When configured to **false**, PPTP ALG is not used.

Default false

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **rtsp** *boolean*

Synopsis Use RTSP ALG for the policy

Context **configure** [service nat up-nat-policy](#) *string alg rtsp boolean*

Tree [rtsp](#)

Description When configured to **true**, Real-Time Streaming Protocol (RTSP) ALG is used for the policy.

Default false

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **sip** *boolean*

Synopsis Use SIP ALG for the policy

Context **configure** [service nat up-nat-policy](#) *string alg sip boolean*

Tree [sip](#)

Default false

Introduced 20.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## default-host

Synopsis Enable the **default-host** context

Context **configure service nat up-nat-policy string default-host**

Tree **default-host**

Description Commands in this context configure the default DMZ host options. A default DMZ host is a node on the inside to which all unknown traffic is redirected by changing the destination IPv4 address in the traffic header. During this operation, the checksums in the Layer 3 and Layer 4 header (UDP and TCP) are recalculated.

Unknown traffic in NAT represent all unmatched traffic arriving from the outside (where there is no pinhole or a matching flow record created by traffic initiated from the inside). The purpose of the default DMZ host is to capture and analyze the unknown traffic as part of threat analysis.

The rate of redirected unknown traffic can be restricted by configuration.

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## inside-router-instance *string*

Synopsis Router instance of the DMZ

Context **configure service nat up-nat-policy string default-host inside-router-instance string**

Tree **inside-router-instance**

Description This command configures the router instance on the inside where the default DMZ host resides.

Introduced 22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ip-address *string*

Synopsis IP address of the default DMZ host

Context **configure service nat up-nat-policy string default-host ip-address string**

Tree **ip-address**

Description This command configures the IP address of the default DMZ host. Redirection to the default DMZ host is achieved by replacing the destination IP address in the traffic header in the unknown traffic initiated from the outside with the one of the default DMZ host.

|            |  |
|------------|--|
| Introduced | 22.10.R1                                     |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**rate-limit** *number*

|             |  |
|-------------|--|
| Synopsis    | Rate limit for unknown traffic sent to default DMZ host  |
| Context     | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">default-host rate-limit</a> <i>number</i>   |
| Tree        | <a href="#">rate-limit</a>   |
| Description | This command configures the rate limit of the unknown traffic sent to the default DMZ host.<br><br>Unknown traffic sent to the default DMZ host is rate limited by a configurable value expressed in mbps. The rate limit is configurable per NAT pool per ISA, vISA, or ESA-VM. |
| Range       | 1 to 10000   |
| Default     | 10   |
| Introduced  | 22.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 20.10.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**filtering** *keyword*

|            |   |
|------------|---|
| Synopsis   | Filtering method for inbound traffic for the policy   |
| Context    | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">filtering</a> <i>keyword</i> |
| Tree       | <a href="#">filtering</a>   |
| Options    | endpoint-independent, address-and-port-dependent  |
| Default    | endpoint-independent  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## flow-log-policy

|            |  |
|------------|--|
| Synopsis   | Enter the <b>flow-log-policy</b> context   |
| Context    | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">flow-log-policy</a> |
| Tree       | <a href="#">flow-log-policy</a>  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## ipfix *reference*

|             |  |
|-------------|--|
| Synopsis    | IPFIX export policy  |
| Context     | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">flow-log-policy</a> <a href="#">ipfix reference</a> |
| Tree        | <a href="#">ipfix</a>  |
| Description | This command specifies an IP flow information export policy for the flow-log policy.   |
| Reference   | <b>configure</b> <a href="#">service ipfix export-policy</a> <i>string</i>   |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## icmp-echo-reply *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable replies to ICMP Echo Request messages  |
| Context    | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">icmp-echo-reply</a> <i>boolean</i> |
| Tree       | <a href="#">icmp-echo-reply</a>   |
| Default    | false   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## port-limits

|            |  |
|------------|--|
| Synopsis   | Enter the <b>port-limits</b> context   |
| Context    | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">port-limits</a> |
| Tree       | <a href="#">port-limits</a>  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **reserved** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of ports reserved for prioritized sessions   |
| Context     | <b>configure service nat up-nat-policy</b> <i>string port-limits reserved number</i>              |
| Tree        | <a href="#">reserved</a>  |
| Description | This command configures the number of ports per block that are reserved for prioritized sessions. |
| Range       | 1 to 65534  |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **watermarks**

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>watermarks</b> context  |
| Context     | <b>configure service nat up-nat-policy</b> <i>string port-limits watermarks</i> |
| Tree        | <a href="#">watermarks</a>  |
| Description | This command configures watermarks for NAT resources.                           |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                    |

### **high** *number*

|             |   |
|-------------|---|
| Synopsis    | High watermark percentage   |
| Context     | <b>configure service nat up-nat-policy</b> <i>string port-limits watermarks high number</i>                   |
| Tree        | <a href="#">high</a>  |
| Description | This command configures the high threshold value as a percentage of the total port-block space in a NAT pool. |
| Range       | 0 to 100  |
| Units       | percent   |
| Notes       | This element is mandatory.  |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**low number**

|             |  |
|-------------|--|
| Synopsis    | Low watermark percentage   |
| Context     | <b>configure service nat up-nat-policy</b> <i>string</i> port-limits watermarks <b>low number</b>            |
| Tree        | <b>low</b>   |
| Description | This command configures the low threshold value as a percentage of the total port-block space in a NAT pool. |
| Range       | 0 to 100   |
| Units       | percent  |
| Notes       | This element is mandatory.   |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**priority-sessions**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>priority-sessions</b> context  |
| Context    | <b>configure service nat up-nat-policy</b> <i>string</i> <b>priority-sessions</b> |
| Tree       | <b>priority-sessions</b>  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                      |

**fc**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>fc</b> context   |
| Context     | <b>configure service nat up-nat-policy</b> <i>string</i> <b>priority-sessions fc</b>            |
| Tree        | <b>fc</b>   |
| Description | Commands in this context specify which Forwarding Class (FC) options have prioritized sessions. |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**af boolean**

|          |   |
|----------|---|
| Synopsis | Prioritize traffic from AF forwarding classes   |
| Context  | <b>configure service nat up-nat-policy</b> <i>string</i> <b>priority-sessions fc af boolean</b> |
| Tree     | <b>af</b>   |

|             |  |
|-------------|--|
| Description | When configured to <b>true</b> , traffic from Assured Forwarding (AF) FC sessions is prioritized. When configured to <b>false</b> , AF traffic is not prioritized. |
| Default     | false  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**be** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Prioritize traffic from BE forwarding classes   |
| Context     | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">priority-sessions fc be</a> <i>boolean</i>                             |
| Tree        | <a href="#">be</a>  |
| Description | When configured to <b>true</b> , traffic from Best Effort (BE) FC sessions is prioritized. When configured to <b>false</b> , BE traffic is not prioritized. |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**ef** *boolean*

|            |   |
|------------|---|
| Synopsis   | Prioritize traffic from EF forwarding classes   |
| Context    | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">priority-sessions fc ef</a> <i>boolean</i> |
| Tree       | <a href="#">ef</a>  |
| Default    | false   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**h1** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Prioritize traffic from H1 forwarding classes  |
| Context     | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">priority-sessions fc h1</a> <i>boolean</i>    |
| Tree        | <a href="#">h1</a>   |
| Description | When configured to <b>true</b> , traffic from H1 sessions is prioritized. When configured to false, H1 traffic is not prioritized. |
| Default     | false  |
| Introduced  | 20.10.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **h2** *boolean*

Synopsis Prioritize traffic from H2 forwarding classes  
Context **configure** [service nat up-nat-policy](#) *string* [priority-sessions fc h2](#) *boolean*  
Tree [h2](#)  
Default false  
Introduced 20.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **l1** *boolean*

Synopsis Prioritize traffic from L1 forwarding classes  
Context **configure** [service nat up-nat-policy](#) *string* [priority-sessions fc l1](#) *boolean*  
Tree [l1](#)  
Default false  
Introduced 20.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **l2** *boolean*

Synopsis Prioritize traffic from L2 forwarding classes  
Context **configure** [service nat up-nat-policy](#) *string* [priority-sessions fc l2](#) *boolean*  
Tree [l2](#)  
Description When configured to **true**, traffic from L2 sessions is prioritized. When configured to false, L2 traffic is not prioritized.  
Default false  
Introduced 20.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **nc** *boolean*

Synopsis Prioritize traffic from NC forwarding classes  
Context **configure** [service nat up-nat-policy](#) *string* [priority-sessions fc nc](#) *boolean*

|            |  |
|------------|--|
| Tree       | <a href="#">nc</a>                           |
| Default    | false  |
| Introduced | 20.10.R1                                     |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## session-limits

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>session-limits</b> context   |
| Context     | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">session-limits</a> |
| Tree        | <a href="#">session-limits</a>  |
| Description | Commands in this context configure session-limit attributes for the policy.                             |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## max number

|            |  |
|------------|--|
| Synopsis   | Maximum number of sessions per subscriber  |
| Context    | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">session-limits max number</a> |
| Tree       | <a href="#">max</a>  |
| Range      | 1 to 65535   |
| Default    | 65535  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## reserved number

|             |   |
|-------------|---|
| Synopsis    | Number of sessions reserved for prioritized sessions  |
| Context     | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">session-limits reserved number</a> |
| Tree        | <a href="#">reserved</a>  |
| Description | This command configures the number of sessions per block that are reserved for prioritized sessions.                    |
| Range       | 1 to 65534  |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## watermarks

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>watermarks</b> context   |
| Context     | <b>configure service nat up-nat-policy</b> <i>string session-limits watermarks</i> |
| Tree        | <a href="#">watermarks</a>   |
| Description | This command configures watermarks for NAT resources.                              |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                       |

## high number

|             |   |
|-------------|---|
| Synopsis    | High watermark percentage   |
| Context     | <b>configure service nat up-nat-policy</b> <i>string session-limits watermarks high number</i>                |
| Tree        | <a href="#">high</a>  |
| Description | This command configures the high threshold value as a percentage of the total port-block space in a NAT pool. |
| Range       | 0 to 100  |
| Units       | percent   |
| Notes       | This element is mandatory.  |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## low number

|             |  |
|-------------|--|
| Synopsis    | Low watermark percentage   |
| Context     | <b>configure service nat up-nat-policy</b> <i>string session-limits watermarks low number</i>                |
| Tree        | <a href="#">low</a>  |
| Description | This command configures the low threshold value as a percentage of the total port-block space in a NAT pool. |
| Range       | 0 to 100   |
| Units       | percent  |
| Notes       | This element is mandatory.   |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## tcp

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>tcp</b> context   |
| Context     | <b>configure service nat up-nat-policy</b> <i>string tcp</i>   |
| Tree        | <a href="#">tcp</a>  |
| Description | Commands in this context configure the transmission control protocol (TCP) attributes of the policy. |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## mss-adjust *number*

|             |  |
|-------------|--|
| Synopsis    | TCP MSS adjustment value   |
| Context     | <b>configure service nat up-nat-policy</b> <i>string tcp mss-adjust number</i>   |
| Tree        | <a href="#">mss-adjust</a>   |
| Description | This command configures the value to use to adjust the TCP Maximum Segment Size (MSS) option, if not already present or the present value is higher. |
| Range       | 160 to 10240   |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## reset-unknown *boolean*

|             |   |
|-------------|---|
| Synopsis    | Generate TCP reset for packets from unknown flows   |
| Context     | <b>configure service nat up-nat-policy</b> <i>string tcp reset-unknown boolean</i>  |
| Tree        | <a href="#">reset-unknown</a>   |
| Description | When configured to <b>true</b> , TCP packets are dropped and a TCP reset is generated if the NAT inside receives a TCP packet without the SYN flag set for an unknown flow.<br>When configured to <b>false</b> , no TCP reset is generated. |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## timeouts

|          |                                   |
|----------|-----------------------------------|
| Synopsis | Enter the <b>timeouts</b> context |
|----------|-----------------------------------|

---

|             |  |
|-------------|--|
| Context     | <b>configure service nat up-nat-policy</b> <i>string timeouts</i>                          |
| Tree        | <a href="#">timeouts</a>   |
| Description | Commands in this context configure the attributes of session idle timeouts for the policy. |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **icmp-query** *number*

|            |   |
|------------|---|
| Synopsis   | Timeout applied to an ICMP Query session  |
| Context    | <b>configure service nat up-nat-policy</b> <i>string timeouts icmp-query number</i> |
| Tree       | <a href="#">icmp-query</a>  |
| Range      | 60 to 240   |
| Units      | seconds   |
| Default    | 60  |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **sip** *number*

|            |  |
|------------|--|
| Synopsis   | SIP inactive media timeout   |
| Context    | <b>configure service nat up-nat-policy</b> <i>string timeouts sip number</i> |
| Tree       | <a href="#">sip</a>  |
| Range      | 10 to 7200   |
| Units      | seconds  |
| Default    | 120  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                 |

### **subscriber-retention** *number*

|          |   |
|----------|---|
| Synopsis | IP address hold time after host and port blocks expire  |
| Context  | <b>configure service nat up-nat-policy</b> <i>string timeouts subscriber-retention number</i> |
| Tree     | <a href="#">subscriber-retention</a>  |

|             |  |
|-------------|--|
| Description | This command configures the time to keep a NAT subscriber and its associated IP address after all hosts and associated port blocks expire. If a NAT subscriber host appears before the retention timeout elapses, it is given the same outside IP address. |
| Range       | 0 to 1440  |
| Units       | minutes  |
| Default     | 0  |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## tcp

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>tcp</b> context                                   |
| Context     | <b>configure service nat up-nat-policy string timeouts tcp</b> |
| Tree        | <a href="#">tcp</a>  |
| Description | Commands in this context configure TCP timeout attributes.     |
| Introduced  | 20.10.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                   |

## established *number*

|            |  |
|------------|--|
| Synopsis   | Idle timeout for TCP session in established state  |
| Context    | <b>configure service nat up-nat-policy string timeouts tcp established <i>number</i></b> |
| Tree       | <a href="#">established</a>  |
| Range      | 60 to 86400  |
| Units      | seconds  |
| Default    | 7440   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## rst *number*

|          |  |
|----------|--|
| Synopsis | Suspend time for TCP connection ports closed by RST                              |
| Context  | <b>configure service nat up-nat-policy string timeouts tcp rst <i>number</i></b> |
| Tree     | <a href="#">rst</a>  |

|             |   |
|-------------|---|
| Description | This command configures the suspend time for outside TCP ports that are used in translations for TCP connections, when they are closed by TCP Reset (RST). After the timer expires, the outside ports can be reused for new TCP translations. |
| Range       | 0 to 240  |
| Units       | seconds   |
| Default     | 0   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **syn number**

|            |  |
|------------|--|
| Synopsis   | TCP session timeout when synchronizing initial sequence                          |
| Context    | <b>configure service nat up-nat-policy</b> <i>string timeouts tcp syn number</i> |
| Tree       | <a href="#">syn</a>  |
| Range      | 6 to 86400   |
| Units      | seconds  |
| Default    | 15   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                     |

### **time-wait number**

|            |  |
|------------|--|
| Synopsis   | Timeout applied to a TCP session in the time-wait state                                |
| Context    | <b>configure service nat up-nat-policy</b> <i>string timeouts tcp time-wait number</i> |
| Tree       | <a href="#">time-wait</a>  |
| Range      | 0 to 240   |
| Units      | seconds  |
| Default    | 0  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **transitory number**

|          |   |
|----------|---|
| Synopsis | Idle timeout for TCP session in transitory state  |
| Context  | <b>configure service nat up-nat-policy</b> <i>string timeouts tcp transitory number</i> |

---

|            |  |
|------------|--|
| Tree       | <a href="#">transitory</a>                   |
| Range      | 60 to 86400                                  |
| Units      | seconds                                      |
| Default    | 240  |
| Introduced | 20.10.R1                                     |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

## udp

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>udp</b> context  |
| Context     | <b>configure service nat up-nat-policy</b> <i>string</i> <b>timeouts udp</b>                    |
| Tree        | <a href="#">udp</a>   |
| Description | Commands in this context configure the User Datagram Protocol (UDP) mapping timeout attributes. |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## dns *number*

|            |  |
|------------|--|
| Synopsis   | Timeout applied to UDP session with destination port 53  |
| Context    | <b>configure service nat up-nat-policy</b> <i>string</i> <b>timeouts udp dns</b> <i>number</i> |
| Tree       | <a href="#">dns</a>  |
| Range      | 15 to 86400  |
| Units      | seconds  |
| Default    | 15   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## initial *number*

|          |  |
|----------|--|
| Synopsis | UDP mapping timeout applied to new sessions  |
| Context  | <b>configure service nat up-nat-policy</b> <i>string</i> <b>timeouts udp initial</b> <i>number</i> |
| Tree     | <a href="#">initial</a>  |
| Range    | 10 to 300  |
| Units    | seconds  |

|            |  |
|------------|--|
| Default    | 15   |
| Introduced | 20.10.R1                                     |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

### **normal** *number*

|            |  |
|------------|--|
| Synopsis   | UDP mapping timeout  |
| Context    | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">timeouts udp normal</a> <i>number</i> |
| Tree       | <a href="#">normal</a>   |
| Range      | 60 to 86400  |
| Units      | seconds  |
| Default    | 300  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **udp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>udp</b> context   |
| Context    | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">udp</a> |
| Tree       | <a href="#">udp</a>  |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **inbound-refresh** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Extend UDP session timeout on inbound traffic   |
| Context     | <b>configure</b> <a href="#">service nat up-nat-policy</a> <i>string</i> <a href="#">udp inbound-refresh</a> <i>boolean</i>   |
| Tree        | <a href="#">inbound-refresh</a>   |
| Description | When configured to <b>true</b> , this command extends the UDP session timeout on inbound traffic.<br>When configured to <b>false</b> , the UDP session timeout is not extended. |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**oper-group** [*name*] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>oper-group</b> list instance         |
| Context        | <b>configure service oper-group</b> <i>string</i> |
| Tree           | <b>oper-group</b>                                 |
| Max. Instances | 32768   |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

**[name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Operational group name                            |
| Context       | <b>configure service oper-group</b> <i>string</i> |
| Tree          | <b>oper-group</b>                                 |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.               |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**bfd-liveness**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>bfd-liveness</b> context                                |
| Context    | <b>configure service oper-group</b> <i>string</i> <b>bfd-liveness</b> |
| Tree       | <b>bfd-liveness</b>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**dest-ip** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Destination address for BFD   |
| Context  | <b>configure service oper-group</b> <i>string</i> <b>bfd-liveness dest-ip</b> <i>string</i> |
| Tree     | <b>dest-ip</b>  |

|            |                            |
|------------|----------------------------|
| Notes      | This element is mandatory. |
| Introduced | 16.0.R1                    |
| Platforms  | All                        |

### interface-name *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | Source interface name   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">oper-group</a> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">interface-name</a> <i>string</i> |
| Tree          | <a href="#">interface-name</a>  |
| String Length | 1 to 32   |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### router-instance *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Routing context used for route lookup  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">oper-group</a> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">router-instance</a> <i>string</i> |
| Tree       | <a href="#">router-instance</a>  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### hold-time

|          |   |
|----------|---|
| Synopsis | Enter the <b>hold-time</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">oper-group</a> <i>string</i> <a href="#">hold-time</a> |
| Tree     | <a href="#">hold-time</a>   |

---

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **down** *number*

|            |  |
|------------|--|
| Synopsis   | Oper group hold down time  |
| Context    | <b>configure</b> <a href="#">service oper-group</a> <i>string</i> <a href="#">hold-time down</a> <i>number</i> |
| Tree       | <a href="#">down</a>   |
| Range      | 1 to 3600  |
| Units      | seconds  |
| Introduced | 16.0.R3  |
| Platforms  | All  |

### **up** *number*

|            |  |
|------------|--|
| Synopsis   | Oper group hold up time  |
| Context    | <b>configure</b> <a href="#">service oper-group</a> <i>string</i> <a href="#">hold-time up</a> <i>number</i> |
| Tree       | <a href="#">up</a>   |
| Range      | 0 to 3600  |
| Units      | seconds  |
| Default    | 4  |
| Introduced | 16.0.R3  |
| Platforms  | All  |

### **pbb**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>pbb</b> context                 |
| Context    | <b>configure</b> <a href="#">service pbb</a> |
| Tree       | <a href="#">pbb</a>                          |

Synopsis Enable automatic update of MAC protect list

Context **configure** [service pw-template](#) *string* **fdb auto-learn-mac-protect** *boolean*

Tree [auto-learn-mac-protect](#)

Default false

Introduced 16.0.R1

Platforms All

## auto-learn-mac-protect-exclude-list *string*

Synopsis Name of the MAC protect exclusion list

Context **configure** [service pw-template](#) *string* **fdb auto-learn-mac-protect-exclude-list** *string*

Tree [auto-learn-mac-protect-exclude-list](#)

Description This command configures the name of a MAC protect exclusion list.

Dynamically-learned MAC Source Addresses (SA) are protected if they are learned on an object with ALMP configured and no exclusion list is associated with the object, or if the MAC SA does not match any entry in an associated exclusion list.

An exclusion list can be used in multiple objects of a service. If a list is empty, ALMP does not exclude any learned MAC SAs from protection on the object.

String Length 1 to 32

Introduced 20.5.R1

Platforms All

### **discard-unknown-source** *boolean*

Synopsis Discard frames with unknown source

Context **configure** [service pw-template string fdb discard-unknown-source boolean](#)

Tree [discard-unknown-source](#)

| Introduced | 16.0.R1   |
| Platforms  | All   |

**maximum-mac-addresses** *number*

|             |  |
|-------------|--|
| Synopsis    | Maximum number of MAC address entries in the FDB   |
| Context     | <b>configure</b> <a href="#">service pw-template string fdb maximum-mac-addresses number</a>   |
| Tree        | <a href="#">maximum-mac-addresses</a>  |
| Description | <p>This command specifies the maximum number of FDB entries for both learned and static MAC addresses for this PW template.</p> <p>When the configured limit is reached, no new addresses are learned from the SAP or spoke SDP until at least one FDB entry is aged out or cleared.</p> |

When the configured limit is reached and the **configure service pw-template fdb discard-unknown-source** command is set to **true** for this PW template, packets with unknown source MAC addresses are discarded. If **discard-unknown-source** is set to **false**, the packets are forwarded if their destination MAC addresses are known, or flooded if their destination MAC addresses are unknown.

However, if the **configure service vpls fdb discard-unknown** command is set to **true**, packets with unknown destination MAC addresses are discarded, even if the limit of FDB entries on the specific VPLS instance is not reached.

When unconfigured, the PW template uses the global MAC learning limitations.

|            |             |
|------------|-------------|
| Range      | 1 to 511999 |

|------------|--|
| Synopsis   | Time to wait for a response to the host-query messages   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">igmp-snooping</a> <a href="#">query-response-interval</a> <i>number</i> |
| Tree       | <a href="#">query-response-interval</a>  |
| Range      | 1 to 1023  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**robust-count** *number*

|            |   |
|------------|---|
| Synopsis   | Number of retries after expected message loss   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">igmp-snooping</a> <a href="#">robust-count</a> <i>number</i> |
| Tree       | <a href="#">robust-count</a>  |
| Range      | 2 to 7  |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**send-queries** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate IGMP general queries  |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">igmp-snooping</a> <a href="#">send-queries</a> <i>boolean</i> |
| Tree       | <a href="#">send-queries</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**version** *keyword*

|          |   |
|----------|---|
| Synopsis | IGMP version  |
| Context  | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">igmp-snooping</a> <a href="#">version</a> <i>keyword</i> |
| Tree     | <a href="#">version</a>   |
| Options  | 1, 2, 3   |

---

|            |         |
|------------|---------|
| Default    | 3       |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## ingress

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ingress</b> context  |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <b>ingress</b> |
| Tree       | <a href="#">ingress</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## filter

|            |  |
|------------|--|
| Synopsis   | Enter the <b>filter</b> context  |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <b>ingress</b> <a href="#">filter</a> |
| Tree       | <a href="#">filter</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ip *string*

|               |  |
|---------------|--|
| Synopsis      | IPv4 filter policy name  |
| Context       | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <b>ingress</b> <a href="#">filter</a> <b>ip</b> <i>string</i> |
| Tree          | <a href="#">ip</a>   |
| String Length | 1 to 64  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

## ipv6 *string*

|               |  |
|---------------|--|
| Synopsis      | IPv6 filter policy name  |
| Context       | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <b>ingress</b> <a href="#">filter</a> <b>ipv6</b> <i>string</i> |
| Tree          | <a href="#">ipv6</a>   |
| String Length | 1 to 64  |

Introduced 16.0.R1  
Platforms All

### **mac string**

Synopsis MAC filter policy name  
Context **configure** [service pw-template string ingress filter mac string](#)  
Tree [mac](#)  
String Length 1 to 64  
Introduced 16.0.R1  
Platforms All

### **qos**

Synopsis Enter the **qos** context  
Context **configure** [service pw-template string ingress qos](#)  
Tree [qos](#)  
Introduced 16.0.R1  
Platforms All

### **network**

Synopsis Enter the **network** context  
Context **configure** [service pw-template string ingress qos network](#)  
Tree [network](#)  
Introduced 16.0.R1  
Platforms All

### **fp-redirect-group**

Synopsis Enter the **fp-redirect-group** context  
Context **configure** [service pw-template string ingress qos network fp-redirect-group](#)  
Tree [fp-redirect-group](#)  
Introduced 16.0.R1  
Platforms All

**group-name** *string*

|               |   |
|---------------|---|
| Synopsis      | Name of the forwarding plane queue group template   |
| Context       | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">ingress qos network fp-redirect-group</a> <a href="#">group-name</a> <i>string</i> |
| Tree          | <a href="#">group-name</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**instance** *number*

|            |   |
|------------|---|
| Synopsis   | Instance for FP ingress queue group   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">ingress qos network fp-redirect-group</a> <a href="#">instance</a> <i>number</i> |
| Tree       | <a href="#">instance</a>  |
| Range      | 1 to 65535  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**policy-name** *string*

|               |  |
|---------------|--|
| Synopsis      | Network policy ID  |
| Context       | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">ingress qos network</a> <a href="#">policy-name</a> <i>string</i> |
| Tree          | <a href="#">policy-name</a>  |
| String Length | 1 to 64  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**l2pt**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>l2pt</b> context   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">l2pt</a> |
| Tree       | <a href="#">l2pt</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## termination

|            |  |
|------------|--|
| Synopsis   | Enable the <b>termination</b> context                        |
| Context    | <b>configure service pw-template string l2pt termination</b> |
| Tree       | <a href="#">termination</a>                                  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## protocols

|            |  |
|------------|--|
| Synopsis   | Enter the <b>protocols</b> context                                     |
| Context    | <b>configure service pw-template string l2pt termination protocols</b> |
| Tree       | <a href="#">protocols</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## cdp boolean

|            |  |
|------------|--|
| Synopsis   | Enable Cisco discovery protocol  |
| Context    | <b>configure service pw-template string l2pt termination protocols cdp boolean</b> |
| Tree       | <a href="#">cdp</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## dtp boolean

|            |  |
|------------|--|
| Synopsis   | Enable dynamic trunking protocol   |
| Context    | <b>configure service pw-template string l2pt termination protocols dtp boolean</b> |
| Tree       | <a href="#">dtp</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **pagp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable port aggregation protocol  |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">l2pt termination protocols</a> <a href="#">pagp</a> <i>boolean</i> |
| Tree       | <a href="#">pagp</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **stp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable all spanning tree protocols   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">l2pt termination protocols</a> <a href="#">stp</a> <i>boolean</i> |
| Tree       | <a href="#">stp</a>  |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **udld** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable unidirectional link detection  |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">l2pt termination protocols</a> <a href="#">udld</a> <i>boolean</i> |
| Tree       | <a href="#">udld</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **vtp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable virtual trunk protocol  |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">l2pt termination protocols</a> <a href="#">vtp</a> <i>boolean</i> |
| Tree       | <a href="#">vtp</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**provisioned-sdp** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Provisioned SDP type  |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">provisioned-sdp</a> <i>keyword</i> |
| Tree       | <a href="#">provisioned-sdp</a>   |
| Options    | use, prefer   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**pw-template-id** *number***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | PW Template Id  |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">pw-template-id</a> <i>number</i> |
| Tree       | <a href="#">pw-template-id</a>  |
| Range      | 1 to 2147483647   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**sdp-exclude** [[group-name](#)] *reference*

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>sdp-exclude</b>   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">sdp-exclude</a> <i>reference</i> |
| Tree       | <a href="#">sdp-exclude</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[group-name]** *reference*

|          |                |
|----------|----------------|
| Synopsis | SDP group name |
|----------|----------------|

|            |   |
|------------|---|
| Context    | <b>configure service pw-template string sdp-exclude reference</b> |
| Tree       | <a href="#">sdp-exclude</a>                                       |
| Reference  | <b>configure service sdp-group group-name string</b>              |
| Notes      | This element is part of a list key.                               |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **sdp-include** [[group-name](#)] *reference*

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>sdp-include</b>                           |
| Context    | <b>configure service pw-template string sdp-include reference</b> |
| Tree       | <a href="#">sdp-include</a>                                       |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[group-name]** *reference*

|            |   |
|------------|---|
| Synopsis   | SDP group name  |
| Context    | <b>configure service pw-template string sdp-include reference</b> |
| Tree       | <a href="#">sdp-include</a>                                       |
| Reference  | <b>configure service sdp-group group-name string</b>              |
| Notes      | This element is part of a list key.                               |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **split-horizon-group**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>split-horizon-group</b> context                    |
| Context    | <b>configure service pw-template string split-horizon-group</b> |
| Tree       | <a href="#">split-horizon-group</a>                             |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">split-horizon-group</a> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**fdb**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>fdb</b> context   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">split-horizon-group</a> <a href="#">fdb</a> |
| Tree       | <a href="#">fdb</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**saps**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>saps</b> context   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">split-horizon-group</a> <a href="#">fdb</a> <a href="#">saps</a> |
| Tree       | <a href="#">saps</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**auto-learn-mac-protect** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable automatic update of MAC protect list   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">split-horizon-group</a> <a href="#">fdb</a> <a href="#">saps</a> <a href="#">auto-learn-mac-protect</a> <i>boolean</i> |
| Tree       | <a href="#">auto-learn-mac-protect</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**discard-unprotected-dest-mac** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable/disable unprotected dest MAC restriction   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">split-horizon-group fdb saps</a> <a href="#">discard-unprotected-dest-mac</a> <i>boolean</i> |
| Tree       | <a href="#">discard-unprotected-dest-mac</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**protected-src-mac-violation-action** *keyword*

|            |   |
|------------|---|
| Synopsis   | Action for protected source MAC restriction   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">split-horizon-group fdb saps</a> <a href="#">protected-src-mac-violation-action</a> <i>keyword</i> |
| Tree       | <a href="#">protected-src-mac-violation-action</a>  |
| Options    | sap-oper-down, alarm-only, discard  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**name** *string*

|               |   |
|---------------|---|
| Synopsis      | Split horizon group name to which the SDP belongs   |
| Context       | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">split-horizon-group name</a> <i>string</i> |
| Tree          | <a href="#">name</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**stp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>stp</b> context   |
| Context    | <b>configure</b> <a href="#">service pw-template</a> <i>string</i> <a href="#">stp</a> |
| Tree       | <a href="#">stp</a>  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of STP  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">pw-template</a> <i>string</i> <a href="#">stp</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**auto-edge** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable automatic detection of edge port characteristics  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">pw-template</a> <i>string</i> <a href="#">stp</a> <b>auto-edge</b> <i>boolean</i> |
| Tree       | <a href="#">auto-edge</a>  |
| Default    | true   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**edge-port** *boolean*

|            |  |
|------------|--|
| Synopsis   | Designate SAP or SDP as an edge port   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">pw-template</a> <i>string</i> <a href="#">stp</a> <b>edge-port</b> <i>boolean</i> |
| Tree       | <a href="#">edge-port</a>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**link-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Configure STP link-type  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">pw-template</a> <i>string</i> <a href="#">stp</a> <b>link-type</b> <i>keyword</i> |
| Tree       | <a href="#">link-type</a>  |
| Options    | pt-pt, shared  |
| Default    | pt-pt  |
| Introduced | 16.0.R4  |

Platforms All

### **path-cost** *number*

Synopsis Configure path-cost  
Context **configure** [service pw-template](#) *string* **stp path-cost** *number*

|------------|---|
| Synopsis   | Administrative state of the SDP                         |
| Context    | <b>configure service sdp number admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>                             |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **adv-mtu-override** *boolean*

|            |  |
|------------|--|
| Synopsis   | Override the advertised VC-type MTU using the SDP ID         |
| Context    | <b>configure service sdp number adv-mtu-override boolean</b> |
| Tree       | <a href="#">adv-mtu-override</a>                             |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **allow-fragmentation** *boolean*

|          |   |
|----------|---|
| Synopsis | Allow packets to be sent without setting DF bit                 |
| Context  | <b>configure service sdp number allow-fragmentation boolean</b> |
| Tree     | <a href="#">allow-fragmentation</a>                             |
| Default  | false   |

Introduced 16.0.R1  
Platforms All

### **bgp-tunnel** *boolean*

Synopsis Allow use of BGP route tunnels to reach far-end nodes  
Context **configure** [service sdp](#) *number* **bgp-tunnel** *boolean*  
Tree [bgp-tunnel](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **booking-factor** *number*

Synopsis Percentage of SDP max available bandwidth for VLL CAC  
Context **configure** [service sdp](#) *number* **booking-factor** *number*  
Tree [booking-factor](#)  
Range 0 to 1000  
Default 100  
Introduced 16.0.R1  
Platforms All

### **class-forwarding**

Synopsis Enable the **class-forwarding** context  
Context **configure** [service sdp](#) *number* **class-forwarding**  
Tree [class-forwarding](#)  
Introduced 16.0.R1  
Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of class-based forwarding  
Context **configure** [service sdp](#) *number* **class-forwarding** **admin-state** *keyword*  
Tree [admin-state](#)

|            |                 |
|------------|-----------------|
| Options    | enable, disable |
| Default    | disable         |
| Introduced | 16.0.R1         |
| Platforms  | All             |

### **default-lsp** *reference*

|            |  |
|------------|--|
| Synopsis   | Default LSP for class-based forwarding on the SDP  |
| Context    | <b>configure</b> <a href="#">service sdp number class-forwarding default-lsp reference</a> |
| Tree       | <a href="#">default-lsp</a>  |
| Reference  | <b>configure</b> <a href="#">service sdp number lsp string</a>                             |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **enforce-diffserv-lsp-fc** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable RSVP validation of FC support by the LSP  |
| Context    | <b>configure</b> <a href="#">service sdp number class-forwarding enforce-diffserv-lsp-fc boolean</a> |
| Tree       | <a href="#">enforce-diffserv-lsp-fc</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **fc** [[fc-name](#)] *keyword*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>fc</b> list instance   |
| Context    | <b>configure</b> <a href="#">service sdp number class-forwarding fc keyword</a> |
| Tree       | <a href="#">fc</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[fc-name]** *keyword*

|          |                                 |
|----------|---------------------------------|
| Synopsis | Forwarding class to LSP mapping |
|----------|---------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service sdp number class-forwarding fc keyword</b> |
| Tree       | <b>fc</b>   |
| Options    | be, l2, af, l1, h2, ef, h1, nc                                  |
| Notes      | This element is part of a list key.                             |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **lsp reference**

|            |   |
|------------|---|
| Synopsis   | LSP name used to forward service packets                                      |
| Context    | <b>configure service sdp number class-forwarding fc keyword lsp reference</b> |
| Tree       | <b>lsp</b>  |
| Reference  | <b>configure service sdp number lsp string</b>                                |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **multicast-lsp reference**

|            |  |
|------------|--|
| Synopsis   | LSP to forward all multicast traffic   |
| Context    | <b>configure service sdp number class-forwarding multicast-lsp reference</b> |
| Tree       | <b>multicast-lsp</b>   |
| Reference  | <b>configure service sdp number lsp string</b>                               |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **collect-stats boolean**

|            |   |
|------------|---|
| Synopsis   | Collect accounting statistics for this SDP                |
| Context    | <b>configure service sdp number collect-stats boolean</b> |
| Tree       | <b>collect-stats</b>                                      |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**delivery-type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Delivery type used by the SDP   |
| Context    | <b>configure</b> <a href="#">service sdp number delivery-type keyword</a> |
| Tree       | <a href="#">delivery-type</a>   |
| Options    | gre, mpls, l2tpv3, gre-eth-bridged  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service sdp number description string</a> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**far-end**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>far-end</b> context                            |
| Context    | <b>configure</b> <a href="#">service sdp number far-end</a> |

| Introduced | 16.0.R1   |
| Platforms  | All   |

## signaling *keyword*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Signaling protocol used to obtain pseudowire labels  |
| Context     | <b>configure service sdp</b> <i>number signaling keyword</i>   |
| Tree        | <a href="#">signaling</a>  |
| Description | <p>This command specifies the signaling protocol used to obtain the ingress and egress pseudowire labels in frames transmitted and received on the SDP. The signaling value can only be changed while the administrative status of the SDP is down. Additionally, the signaling can only be changed on an SDP if the SDP is not in use by BGP-AD or BGP-VPLS. BGP signaling can only be enabled if the SDP does not already have pseudowires signaled over it. Also, BGP signaling is not supported with mixed mode LSP SDPs.</p> <p><b>Note:</b> If the <b>tldp</b> option is selected as the mechanism for exchanging service labels over an MPLS or GRE SDP and the T-LDP session is automatically established, an explicit T-LDP session that is subsequently configured takes precedence over the automatic T-LDP session. However, if the explicit, manually-configured session is then removed, the system does not revert to the automatic session and the automatic session is also deleted. To address this, recreate the T-LDP session by using the <b>admin-state</b> command to administratively disable and then enable the SDP.</p> |
| Options     | off, tldp, bgp   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## source-bmac-lsb

|            |  |
|------------|--|

| Context    | <b>configure service sdp</b> <i>number</i> <b>sr-ospf</b> <i>boolean</i> |
| Tree       | <b>sr-ospf</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**tunnel-far-end** (*ipv4-address-no-zone | ipv6-address-no-zone*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | System address of the far-end router for the SDP  |
| Context    | <b>configure service sdp number tunnel-far-end</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) |
| Tree       | <a href="#">tunnel-far-end</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**vlan-vc-etype** *string*

|               |   |
|---------------|---|
| Synopsis      | VLAN VC Ethertype   |
| Context       | <b>configure service sdp number vlan-vc-etype</b> <i>string</i> |
| Tree          | <a href="#">vlan-vc-etype</a>                                   |
| String Length | 5 to 6  |
| Default       | 0x8100  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**weighted-ecmp** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow weighted load-balancing on an SDP                          |
| Context    | <b>configure service sdp number weighted-ecmp</b> <i>boolean</i> |
| Tree       | <a href="#">weighted-ecmp</a>                                    |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**sdp-group**

|          |                                    |
|----------|------------------------------------|
| Synopsis | Enter the <b>sdp-group</b> context |
| Context  | <b>configure service sdp-group</b> |

|            |                           |
|------------|---------------------------|
| Tree       | <a href="#">sdp-group</a> |
| Introduced | 16.0.R1                   |
| Platforms  | All                       |

### **group-name** [[group-name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>group-name</b> list instance                            |
| Context    | <b>configure</b> <a href="#">service sdp-group group-name string</a> |
| Tree       | <a href="#">group-name</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **[group-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | SDP administrative group name  |
| Context       | <b>configure</b> <a href="#">service sdp-group group-name string</a> |
| Tree          | <a href="#">group-name</a>   |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.                                  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **value** *number*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Unique group value associated with the SDP admin group                            |
| Context    | <b>configure</b> <a href="#">service sdp-group group-name string value number</a> |
| Tree       | <a href="#">value</a>   |
| Range      | 0 to 31   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## system

|            |                                 |
|------------|---------------------------------|
| Synopsis   | Enter the <b>system</b> context |
| Context    | <b>configure service system</b> |
| Tree       | <a href="#">system</a>          |
| Introduced | 16.0.R1                         |
| Platforms  | All                             |

## bgp

|            |                                     |
|------------|-------------------------------------|
| Synopsis   | Enter the <b>bgp</b> context        |
| Context    | <b>configure service system bgp</b> |
| Tree       | <a href="#">bgp</a>                 |
| Introduced | 16.0.R1                             |
| Platforms  | All                                 |

## evpn

|            |  |
|------------|--|
| Synopsis   | Enter the <b>evpn</b> context            |
| Context    | <b>configure service system bgp evpn</b> |
| Tree       | <a href="#">evpn</a>                     |
| Introduced | 16.0.R1                                  |
| Platforms  | All                                      |

## ad-per-es-route

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ad-per-es-route</b> context                 |
| Context    | <b>configure service system bgp evpn ad-per-es-route</b> |
| Tree       | <a href="#">ad-per-es-route</a>                          |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## extended-evi-range *boolean*

|          |  |
|----------|--|
| Synopsis | Reserve extended RD comm-values for AD per-ES routes |
|----------|--|

|             |  |
|-------------|--|
| Context     | <b>configure service system bgp evpn ad-per-es-route extended-evi-range</b> <i>boolean</i>   |
| Tree        | <a href="#">extended-evi-range</a>   |
| Description | When configured to <b>true</b> , the system reserves the Route Distinguisher (RD) comm-values 1 to 65535 out of the type 1 RD that is used for AD per-ES routes. If <b>ad-per-es-route route-target-type</b> is also configured to <b>evi-route-target-set</b> , the system can pack the maximum number of EVI route targets in the AD per-ES routes<br><br>When configured to <b>false</b> , this command only reserves comm-values 1 to 512. |
| Default     | false  |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

### **route-distinguisher-ip-address** *string*

|            |   |
|------------|---|
| Synopsis   | IP address for route distinguisher for EVPN AD-ES routes  |
| Context    | <b>configure service system bgp evpn ad-per-es-route route-distinguisher-ip-address</b> <i>string</i> |
| Tree       | <a href="#">route-distinguisher-ip-address</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **route-target-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Method for the AD per-ES routes advertisement   |
| Context    | <b>configure service system bgp evpn ad-per-es-route route-target-type</b> <i>keyword</i> |
| Tree       | <a href="#">route-target-type</a>   |
| Options    | evi-route-target, evi-route-target-set  |
| Default    | evi-route-target  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ethernet-segment** [[ethernet-segment-name](#)] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>ethernet-segment</b> list instance                         |
| Context        | <b>configure service system bgp evpn ethernet-segment</b> <i>string</i> |
| Tree           | <a href="#">ethernet-segment</a>  |
| Max. Instances | 4095  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### [**ethernet-segment-name**] *string*

|               |   |
|---------------|---|
| Synopsis      | Specify name for Ethernet segment                                       |
| Context       | <b>configure service system bgp evpn ethernet-segment</b> <i>string</i> |
| Tree          | <a href="#">ethernet-segment</a>  |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.                                     |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **ac-df-capability** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | AC-influenced DF election capability   |
| Context     | <b>configure service system bgp evpn ethernet-segment</b> <i>string</i> <b>ac-df-capability</b> <i>keyword</i>   |
| Tree        | <a href="#">ac-df-capability</a>   |
| Description | <p>This command configures the Attachment Circuit-influenced (AC-influenced) designated forwarder (DF) election capability (AC-DF) into the DF election for the Ethernet Segment (ES).</p> <p>AC-DF supports EVPN Auto-Discovery per EVI/ES (AD per EVI/ES) routes for a specific PE, to ensure the PE is included in the candidate DF election list.</p> <p>When AC-DF is excluded on a specific ES, the presence or absence of the AD per EVI/ES routes from the ES peers does not modify the candidate DF election list for the ES. Excluding the AC-DF is recommended in ESs that use an operational group monitored by the access LAG to signal the standby LACP or to power-off.</p> |
| Options     | include, exclude   |
| Default     | include  |
| Introduced  | 21.5.R1  |
| Platforms   | All  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the Ethernet segment instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">system</a> <a href="#">bgp evpn ethernet-segment</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**association**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>association</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">system</a> <a href="#">bgp evpn ethernet-segment</a> <i>string</i> <b>association</b> |
| Tree       | <a href="#">association</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**lag** [[lag-name](#)] *reference*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>lag</b> list instance  |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">system</a> <a href="#">bgp evpn ethernet-segment</a> <i>string</i> <a href="#">association</a> <b>lag</b> <i>reference</i> |
| Tree           | <a href="#">lag</a>   |
| Max. Instances | 1   |
| Notes          | The following elements are part of a choice: <b>lag</b> , <b>network-interconnect-vxlan</b> , <b>port</b> , <b>pw-port</b> , <b>sdp</b> , or <b>vprn-next-hop</b> .             |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

**[lag-name]** *reference*

|           |   |
|-----------|---|
| Synopsis  | LAG multi-homed with the Ethernet segment entry   |
| Context   | <b>configure</b> <a href="#">service</a> <a href="#">system</a> <a href="#">bgp evpn ethernet-segment</a> <i>string</i> <a href="#">association</a> <b>lag</b> <i>reference</i> |
| Tree      | <a href="#">lag</a>   |
| Reference | <b>configure</b> <a href="#">lag</a> <i>string</i>  |

|            |                                     |
|------------|-------------------------------------|
| Notes      | This element is part of a list key. |
| Introduced | 21.2.R1                             |
| Platforms  | All                                 |

## virtual-ranges

|            |  |
|------------|--|
| Synopsis   | Enter the <b>virtual-ranges</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">system</a> <a href="#">bgp evpn ethernet-segment</a> <a href="#">string</a> <a href="#">association</a> <a href="#">lag</a> <a href="#">reference</a><br><a href="#">virtual-ranges</a> |
| Tree       | <a href="#">virtual-ranges</a>   |

**vprn-next-hop [ip-address] (ipv4-address-no-zone | ipv6-address-no-zone)**

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>vprn-next-hop</b> list instance  |
| Context        | <b>configure service system bgp evpn ethernet-segment</b> <i>string association vprn-next-hop (ipv4-address-no-zone   ipv6-address-no-zone)</i>   |
| Tree           | <a href="#">vprn-next-hop</a>   |
| Description    | Commands in this list instance are used to associate an IPv4 or IPv6 address to an Ethernet segment. A virtual Ethernet segment using this VPRN next-hop association represents a Layer 3 Ethernet segment as described in <i>draft-sajassi-bess-evpn-ip-aliasing</i> . This IP address must be installed in the route table of the VPRN service identified by the EVI so that the Auto-Discovery per-ES or EVI routes for the ES are advertised. Only one VPRN next hop is supported per Ethernet segment. |
| Max. Instances | 1   |
| Notes          | The following elements are part of a choice: <b>lag</b> , <b>network-interconnect-vxlan</b> , <b>port</b> , <b>pw-port</b> , <b>sdp</b> , or <b>vprn-next-hop</b> .   |

Introduced 22.10.R1  
 Platforms All

**etree-leaf-label** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable E-Tree leaf label for PE   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">system</a> <a href="#">bgp evpn</a> <a href="#">etree-leaf-label</a> <i>boolean</i>  |
| Tree        | <a href="#">etree-leaf-label</a>  |
| Description | <p>When configured to <b>true</b>, this command enables EVPN Ethernet-Tree (E-Tree) VPLS services on the router (not B-VPLS), allocates an E-Tree leaf label for the Provider Edge (PE) device, and configures the ILM entry. This command ensures that in-flight traffic can perform an ILM entry lookup at any time, and avoids discards when administratively enabling or disabling services, or reduces the timing window so that it does not occur during normal operation or configuration. The value for the E-Tree leaf label is set via the <b>etree-leaf-label-value</b> command.</p> <p>When configured to <b>false</b>, PE leaf labels are not supported. The <b>bgp-evpn mpls admin-state</b> command in the configure service epipe context cannot be administratively enabled if this command is set to false.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

| Default    | false   |
| Introduced | 21.10.R1  |
| Platforms  | All   |

## iff-attribute-uniform-propagation *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable uniform propagation of BGP attributes   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">system</a> <a href="#">bgp</a> <a href="#">evpn</a> <a href="#">ip-prefix-routes</a> <a href="#">iff-attribute-uniform-propagation</a> <i>boolean</i>   |
| Tree        | <a href="#">iff-attribute-uniform-propagation</a>  |
| Description | When configured to <b>true</b> , this command enables the uniform propagation of BGP attributes for EVPN-IFF (Interfaceful) routes. EVPN-IFF is used in R-VPLS services with <b>bgp-evpn ip-route-advertisement</b> . When enabled, the received EVPN-IFF routes for the R-VPLS can be propagated with the original BGP path attributes into EVPN-IFL, IPVPN, EVPN-IFF (in other R-VPLS services) or BGP IP routes advertised for the attached VPRN. The command also enables the attribute propagation in the opposite direction, for example, from EVPN-IFL/IPVPN/IP/EVPN-IFF routes into EVPN-IFF routes. |

The propagation follows the uniform mode defined in draft-ietf-bess-evpn-ipvpn-interworking.

When configured to **false**, this command re-originates the BGP Path Attributes when propagating EVPN-IFF routes into other Inter-Subnet Forwarding families.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 21.2.R1 |
| Platforms  | All     |

### **iff-bgp-path-selection** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable BGP path selection for EVPN-IFF routes   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">system</a> <a href="#">bgp</a> <a href="#">evpn</a> <a href="#">ip-prefix-routes</a> <a href="#">iff-bgp-path-selection</a> <i>boolean</i>   |
| Tree        | <a href="#">iff-bgp-path-selection</a>  |
| Description | <p>When configured to <b>true</b>, this command enables the EVPN-IFF routes to be ordered and selected in a similar manner as IPVPN or EVPN-IFL routes, that is, based on the regular BGP path selection process.</p> <p>When configured to <b>false</b>, this command makes the system order EVPN-IFF routes based on their {RVPLS Iindex, RD, Ethernet Tag}. For example, if two EVPN-IFF routes are received for the same prefix on the same R-VPLS and with different RDs (Route Distinguishers), the route with the lowest RD is selected.</p> |
| Default     | false   |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

### **multicast-leave-sync-propagation** *number*

|             |   |
|-------------|---|
| Synopsis    | Multicast leave group synchronization delay   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">system</a> <a href="#">bgp</a> <a href="#">evpn</a> <a href="#">multicast-leave-sync-propagation</a> <i>number</i>   |
| Tree        | <a href="#">multicast-leave-sync-propagation</a>  |
| Description | <p>This command configures the additional amount of time that the system waits before removing a multicast state that was synchronized in an Ethernet Segment via Multicast Join or Leave Synch routes. This value represents a delta corresponding to the time it takes for a BGP advertisement to propagate to ES peers.</p> <p>The node triggering the route computes the maximum response time as the product of the locally configured values, Last Member Query Count and Last Member Query Interval, and adds the delta value to the maximum response time. The query count value is configured in the <b>configure services vrpn igmp robust-count</b> command. The query interval value is taken from the <b>configure service vpls sap igmp-snooping last-member-query-interval</b> or the <b>configure service vpls spoke-sdp igmp-snooping last-member-query-interval</b> configuration, depending on the Ethernet Segment.</p> |

Increasing the maximum response time by this value can help minimize the churn of removing and recreating the state on the node.

This value should be configured consistently in all ES peers.

|            |          |
|------------|----------|
| Range      | 0 to 300 |
| Units      | seconds  |

| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## mac reference

|            |  |
|------------|--|
| Synopsis   | MAC filter policy name   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">template</a> <a href="#">epipe-sap-template</a> <i>string</i> <a href="#">ingress</a> <a href="#">filter</a> <a href="#">mac</a> <i>reference</i> |
| Tree       | <a href="#">mac</a>  |
| Reference  | <b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">template</a> <a href="#">epipe-sap-template</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## policy-name *reference*

|            |   |
|------------|---|
| Synopsis   | SAP ingress QoS policy name to apply to the SAP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">template</a> <a href="#">epipe-sap-template</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>   |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">sap-ingress</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

## queuing-type *keyword*

|            |  |
|------------|--|
| Synopsis   | Queuing type   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">template</a> <a href="#">epipe-sap-template</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">queuing-type</a> <i>keyword</i> |
| Tree       | <a href="#">queuing-type</a>   |
| Options    | shared, multipoint-shared  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## upnp

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>upnp</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">upnp</a>                     |
| Tree        | <a href="#">upnp</a>  |
| Description | Commands in this context configure Universal Plug 'n Play (UPnP) for the service. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                      |

**policy** [*name*] *string*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>policy</b> list instance                                 |
| Context        | <b>configure service upnp policy</b> <i>string</i>                    |
| Tree           | <i>policy</i>   |
| Description    | Commands in this context configure the attributes of the UPnP policy. |
| Max. Instances | 255   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                          |

**[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | UPnP policy name                                   |
| Context       | <b>configure service upnp policy</b> <i>string</i> |
| Tree          | <i>policy</i>                                      |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.                |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR       |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure service upnp policy</b> <i>string</i> <b>description</b> <i>string</i> |
| Tree          | <i>description</i>  |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**mapping-limit** *number*

|          |   |
|----------|---|
| Synopsis | Maximum number of UPnP mappings per subscriber  |
| Context  | <b>configure service upnp policy</b> <i>string</i> <b>mapping-limit</b> <i>number</i> |
| Tree     | <i>mapping-limit</i>  |

|            |  |
|------------|--|
| Range      | 1 to 256                                     |
| Default    | 256  |
| Introduced | 16.0.R1                                      |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**port number**

|            |  |
|------------|--|
| Synopsis   | HTTP TCP port to which the UPnP IGD listens  |
| Context    | <b>configure</b> <a href="#">service upnp policy</a> <i>string</i> <b>port</b> <i>number</i> |
| Tree       | <a href="#">port</a>   |
| Range      | 1 to 65535   |
| Default    | 5000   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**strict-mode boolean**

|             |   |
|-------------|---|
| Synopsis    | Enable UPnP strict mode   |
| Context     | <b>configure</b> <a href="#">service upnp policy</a> <i>string</i> <b>strict-mode</b> <i>boolean</i>  |
| Tree        | <a href="#">strict-mode</a>   |
| Description | When configured to <b>true</b> , this command enables UPnP strict mode, in which the system only allows changes to an existing UPnP mapping if the request comes from the same UPnP client. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**vpls [service-name] string**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>vpls</b> list instance                         |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> |
| Tree       | <a href="#">vpls</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[service-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Administrative service name   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> |
| Tree          | <a href="#">vpls</a>  |
| String Length | 1 to 64   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the service   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**bgp** [[bgp-instance](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bgp</b> list instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <b>bgp</b> <i>number</i> |
| Tree       | <a href="#">bgp</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[bgp-instance]** *number*

|            |  |
|------------|--|
| Synopsis   | BGP instance   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <b>bgp</b> <i>number</i> |
| Tree       | <a href="#">bgp</a>  |
| Range      | 1 to 2   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |

Platforms All

### **adv-service-mtu** *number*

Synopsis Advertised service MTU value

Context **configure service vpls string bgp number adv-service-mtu number**

Tree [adv-service-mtu](#)

Description This command configures the MTU signaled value used in the BGP for the service. When configured, the router uses the value for signaling and for validation with the received MTU instead of the service MTU. However, the value does not affect the locally enforced value, which is still based on the service MTU.

Range 0 to 9782

Introduced 22.2.R1

Platforms All

### **pw-template-binding** [[pw-template-name](#)] *reference*

Synopsis Enter the **pw-template-binding** list instance

Context **configure service vpls string bgp number pw-template-binding reference**

Tree [pw-template-binding](#)

Max. Instances 100

Introduced 16.0.R1

Platforms All

### **[pw-template-name]** *reference*

Synopsis Policy name

Context **configure service vpls string bgp number pw-template-binding reference**

Tree [pw-template-binding](#)

Reference **configure service pw-template string**

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

**bfd-liveness** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable BFD   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp number</a> <a href="#">pw-template-binding reference</a> <b>bfd-liveness</b> <i>boolean</i> |
| Tree       | <a href="#">bfd-liveness</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**bfd-template** *reference*

|            |  |
|------------|--|

| Platforms  | All  |

**accept-ivpls-evpn-flush** *boolean*

|          |   |
|----------|---|
| Synopsis | Accept and process non-zero ethernet-tag MAC routes   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">bgp-evpn accept-ivpls-evpn-flush</a> <i>boolean</i> |
| Tree     | <a href="#">accept-ivpls-evpn-flush</a>   |
| Default  | false   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **evi number**

|             |   |
|-------------|---|
| Synopsis    | EVPN ID   |
| Context     | <b>configure service vpls string bgp-evpn evi number</b>  |
| Tree        | <b>evi</b>  |
| Description | <p>This command configures a 2-byte EVPN instance (EVI) unique in the system. It is used for the service-carving algorithm for multi-homing and auto-deriving route target and route distinguishers.</p> <p>If not specified, the EVPN ID value is zero and no route distinguisher or route targets are auto-derived from it.</p> <p>If the EVI ID value is specified and no other <b>route-distinguisher</b> or <b>route-target</b> is configured in the service, the following rules apply:</p> <ul style="list-style-type: none"> <li>• the route distinguisher is derived from &lt;system_ip&gt;:evi</li> <li>• the route target is derived from &lt;autonomous-system&gt;:evi</li> </ul> <p>If VSI import and export policies are configured, the route target must be configured in the policies and those values take precedence over the auto-derived route targets. If <b>bgp-ad vpls-id</b> and <b>bgp-evpn evi</b> are both configured on the same service, the VPLS ID auto-derived route target or route distinguisher takes precedence over the values auto-derived from the EVI. Use the <b>show service id bgp</b> command to display the operational route target for a service.</p> |
| Range       | 1 to 16777215   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **incl-mcast-orig-ip string**

|            |   |
|------------|---|
| Synopsis   | Originating IP address  |
| Context    | <b>configure service vpls string bgp-evpn incl-mcast-orig-ip string</b> |
| Tree       | <b>incl-mcast-orig-ip</b>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **isid-route-target**

|          |  |
|----------|--|
| Synopsis | Enter the <b>isid-route-target</b> context |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service vpls string</b> <i>bgp-evpn isid-route-target</i> |
| Tree       | <i>isid-route-target</i>   |
| Introduced | 16.0.R1  |

### **[bgp-instance]** *number*

Synopsis BGP instance  
 Context **configure service vpls string bgp-evpn mpls number**  
 Tree [mpls](#)  
 Range 1 to 2  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of BGP EVPN MPLS

|            |   |
|------------|---|
| Context    | <b>configure service vpls string bgp-evpn mpls number admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **auto-bind-tunnel**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>auto-bind-tunnel</b> context                                  |
| Context    | <b>configure service vpls string bgp-evpn mpls number auto-bind-tunnel</b> |
| Tree       | <a href="#">auto-bind-tunnel</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **allow-flex-algo-fallback** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable flexible algorithm fallback  |
| Context     | <b>configure service vpls string bgp-evpn mpls number auto-bind-tunnel allow-flex-algo-fallback boolean</b>   |
| Tree        | <a href="#">allow-flex-algo-fallback</a>  |
| Description | <p>When configured to <b>true</b>, a BGP router with a Flex-Algorithm action configured (via the <b>configure policy-options policy-statement entry action flex-algo</b> command) can resolve to a tunnel with algorithm 0 if no target Flex-Algorithm tunnel is available.</p> <p>When configured to <b>false</b>, the BGP router can resolve only to the intended Flex-Algorithm tunnel, which may cause traffic loss if no corresponding Flex-Algorithm tunnel is available.</p> |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

### **ecmp** *number*

|          |  |
|----------|--|
| Synopsis | Maximum ECMP routes information  |
| Context  | <b>configure service vpls string bgp-evpn mpls number auto-bind-tunnel ecmp number</b> |
| Tree     | <a href="#">ecmp</a>   |
| Range    | 1 to 32  |

|            |          |
|------------|----------|
| Default    | 1        |
| Introduced | 19.10.R1 |
| Platforms  | All      |

### **enforce-strict-tunnel-tagging** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable/disable enforcement of strict tunnel tagging  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">bgp-evpn</a> <a href="#">mpls</a> <i>number</i> <a href="#">auto-bind-tunnel</a> <b>enforce-strict-tunnel-tagging</b> <i>boolean</i> |
| Tree       | <a href="#">enforce-strict-tunnel-tagging</a>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **resolution** *keyword*

|            |   |
|------------|---|
| Synopsis   | Resolution method for tunnel selection  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">bgp-evpn</a> <a href="#">mpls</a> <i>number</i> <a href="#">auto-bind-tunnel</a> <b>resolution</b> <i>keyword</i> |
| Tree       | <a href="#">resolution</a>  |
| Options    | none, filter, any   |
| Default    | none  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **resolution-filter**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>resolution-filter</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">bgp-evpn</a> <a href="#">mpls</a> <i>number</i> <a href="#">auto-bind-tunnel</a> <b>resolution-filter</b> |
| Tree       | <a href="#">resolution-filter</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **bgp** *boolean*

|          |   |
|----------|---|
| Synopsis | Use BGP tunneling for next-hop resolution |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure service vpls string</b> <a href="#">bgp-evpn mpls number auto-bind-tunnel resolution-filter</a> <a href="#">bgp boolean</a>  |
| Tree        | <a href="#">bgp</a>   |
| Description | When configured to <b>true</b> , BGP searches the BGP LSP for the address of the BGP next hop.<br>When configured to <b>false</b> , BGP tunneling is not used and inter-area or inter-as prefixes are not resolved. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **ldp boolean**

|             |  |
|-------------|--|
| Synopsis    | Use LDP tunneling for next-hop resolution  |
| Context     | <b>configure service vpls string</b> <a href="#">bgp-evpn mpls number auto-bind-tunnel resolution-filter</a> <a href="#">ldp boolean</a>   |
| Tree        | <a href="#">ldp</a>  |
| Description | When configured to <b>true</b> , BGP searches for an LDP LSP with a FEC prefix corresponding to the address of the BGP next hop.<br>When configured to <b>false</b> , LDP tunneling is not used for next-hop resolution. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **mpls-fwd-policy boolean**

|             |   |
|-------------|---|
| Synopsis    | Use MPLS forwarding policy for next-hop resolution  |
| Context     | <b>configure service vpls string</b> <a href="#">bgp-evpn mpls number auto-bind-tunnel resolution-filter</a> <a href="#">mpls-fwd-policy boolean</a>  |
| Tree        | <a href="#">mpls-fwd-policy</a>   |
| Description | When configured to <b>true</b> , BGP uses the MPLS forwarding policy to determine the address of the BGP next hop.<br>When configured to <b>false</b> , the MPLS forwarding policy is not used for next-hop resolution. |
| Default     | false   |
| Introduced  | 19.5.R1   |
| Platforms   | All   |

**rib-api** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use RIB API gRPC service for next-hop resolution  |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter</a><br><a href="#">rib-api</a> <i>boolean</i>  |
| Tree        | <a href="#">rib-api</a>   |
| Description | When configured to <b>true</b> , BGP uses tunnels programmed using the RIB API gRPC service to resolve the next hops of routes imported into the EVPN service.<br><br>When configured to <b>false</b> , the RIB API service tunnels are not used for next-hop resolution. |
| Default     | false   |
| Introduced  | 19.5.R1   |
| Platforms   | All   |

**rsvp** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use RSVP tunneling for next-hop resolution  |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter</a><br><a href="#">rsvp</a> <i>boolean</i>   |
| Tree        | <a href="#">rsvp</a>  |
| Description | When configured to <b>true</b> , BGP searches the best metric RSVP LSP to determine the address of the BGP next hop. This address can correspond to the system interface or to another loopback interface used by the BGP instance on the remote node. The LSP metric is provided by MPLS in the tunnel table. In the case of multiple RSVP LSPs with the same lowest metric, BGP selects the LSP with the lowest tunnel ID.<br><br>When configured to <b>false</b> , the RSVP LSP is not used for next-hop resolution. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**sr-isis** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Use IS-IS SR tunneling for next-hop resolution   |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter</a><br><a href="#">sr-isis</a> <i>boolean</i> |
| Tree        | <a href="#">sr-isis</a>  |
| Description | When configured to <b>true</b> , BGP uses an IS-IS tunnel type to determine the address of the BGP next hop.   |

The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered IS-IS instance.

When configured to **false**, IS-IS tunneling is not used for next-hop resolution.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **sr-ospf** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Use OSPF SR tunneling for next-hop resolution  |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel resolution-filter sr-ospf</a> <i>boolean</i>  |
| Tree        | <a href="#">sr-ospf</a>  |
| Description | When configured to <b>true</b> , BGP uses an OSPF tunnel type to determine the address of the BGP next hop.<br><br>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered OPSF instance.<br><br>When configured to <b>false</b> , OSPF tunneling is not used for next-hop resolution. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **sr-ospf3** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use OSPFv3 SR tunneling for next-hop resolution   |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel resolution-filter sr-ospf3</a> <i>boolean</i>  |
| Tree        | <a href="#">sr-ospf3</a>  |
| Description | When configured to <b>true</b> , BGP uses an OSPF3 tunnel type to determine the address of the BGP next hop.<br><br>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered OPSF3 instance.<br><br>When configured to <b>false</b> , OSPF3 tunneling is not used for next-hop resolution. |
| Default     | false   |
| Introduced  | 19.10.R1  |
| Platforms   | All   |

**sr-policy boolean**

|             |   |
|-------------|---|
| Synopsis    | Use SR policies for next-hop resolution   |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter sr-policy boolean</a>  |
| Tree        | <a href="#">sr-policy</a>   |
| Description | <p>When configured to <b>true</b>, this command instructs BGP to use an SR policy to determine the address of the BGP next hop. The SR policy search criteria includes a non-null endpoint and color value that matches the BGP next hop and color extended community value, respectively, of the EVPN route.</p> <p>When configured to <b>false</b>, SR policies are not used for next-hop resolution.</p> |
| Default     | false   |
| Introduced  | 19.5.R1   |
| Platforms   | All   |

**sr-te boolean**

|             |   |
|-------------|---|
| Synopsis    | Use SR-TE tunneling for next-hop resolution   |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter sr-te boolean</a>  |
| Tree        | <a href="#">sr-te</a>   |
| Description | <p>When configured to <b>true</b>, BGP uses an SR-TE tunnel type to determine the address of the BGP next hop.</p> <p>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered tunnel ID.</p> <p>When configured to <b>false</b>, SR-TE tunneling is not used for next-hop resolution.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**udp boolean**

|             |  |
|-------------|--|
| Synopsis    | Use MPLS over UDP tunneling for next-hop resolution  |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter udp boolean</a> |
| Tree        | <a href="#">udp</a>  |
| Description | When configured to <b>true</b> , BGP uses an MPLS over UDP tunnel type to determine the address of the BGP next hop.   |

When configured to **false**, MPLS over UDP tunneling is not used for next-hop resolution.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **weighted-ecmp** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow weighted load balancing  |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel</a> <b>weighted-ecmp</b> <i>boolean</i>   |
| Tree        | <a href="#">weighted-ecmp</a>  |
| Description | When configured to <b>true</b> , this router enables weighted ECMP for packets using tunnels that a VPLS or Epipe automatically binds to. Packets are sprayed across LSPs in the ECMP according to the outcome of the hash algorithm and the configured load balancing weight of each LSP.<br><br>When configured to <b>false</b> , this command disables weighted ECMP for next-hop tunnel selection. |
| Default     | false  |
| Introduced  | 22.7.R1  |
| Platforms   | All  |

### **control-word** *boolean*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Allow use of the CW bit in the label message   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <b>control-word</b> <i>boolean</i> |
| Tree       | <a href="#">control-word</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**default-route-tag** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Default route tag  |
| Context     | <b>configure</b> <i>service vpls string bgp-evpn mpls number default-route-tag string</i>  |
| Tree        | <i>default-route-tag</i>   |
| Description | <p>This command configures a route tag that is used when sending a route to the BGP application (for the corresponding service and BGP instance). If the corresponding BGP instance is enabled, the command cannot be changed.</p> <p>When used for BGP EVPN contexts, only one route tag can be passed to BGP for matching on export policies. In case of a conflict with other route tags pushed by EVPN, the default route tag has the least priority.</p> <p>The following are examples of the conflict priority handling:</p> <ul style="list-style-type: none"> <li>• If a service is configured with both <b>default-route-tag</b> <i>X</i> and <b>proxy-arp evpn-route-tag</b> <i>Y</i>, the EVPN uses route tag <i>Y</i> when sending EVPN proxy-arp routes to the BGP RIB for advertisement.</li> <li>• If a given IP-prefix route is tagged in the route-table with tag <i>A</i> and the R-VPLS, in which the route is advertised, uses <i>B</i> as the <b>default-route-tag</b>, then EVPN keeps tag <i>A</i> when sending the route to the BGP RIB.</li> </ul> <p>The <b>default-route-tag</b> configuration is only supported on EVPN and IP-VPN service routes. The route tag for ES and AD per-ES routes is always zero.</p> |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**dynamic-egress-label-limit** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enables dynamic egress label limit   |
| Context     | <b>configure</b> <i>service vpls string bgp-evpn mpls number dynamic-egress-label-limit boolean</i>  |
| Tree        | <i>dynamic-egress-label-limit</i>  |
| Description | <p>When configured to <b>true</b>, this command relaxes the egress MPLS label limit check when resolving BGP next hops in the tunnel table.</p> <p>For VPRN services, the OAM label is never computed and, therefore, one more egress label is allowed.</p> <p>For EVPN (Epipe and VPLS) services, the system only computes the control word and ESI label if they are used. For the control word, the system reduces the egress label limit by one label if the control word is configured in the service. When configured, the ESI label is not counted for Epipes or VPLS services without an ES.</p> |

When configured to **false** this command, for EVPN, Epipe, and VPLS services, always accounts for the ESI label and control word.

|            |         |

### **evi-three-byte-auto-rt boolean**

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Auto-derive the BGP EVPN route target   |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-evpn mpls number</a> <b>evi-three-byte-auto-rt boolean</b>   |
| Tree        | <a href="#">evi-three-byte-auto-rt</a>  |
| Description | When configured to <b>true</b> , the BGP-EVPN instance import and export route target is auto-derived as described in RFC 8365 (Global-Administrator:A/Type/D-ID/Service-ID).<br>Where: |

- Global Administrator – is the configured 2-octet AS number; if the configured ASN exceeds the 2 byte limit, the low order 16-bit value is taken
- A=0 (for auto-derivation)
- Type=4 (EVI-based route-target)
- D-ID= [1..2] – encodes the BGP instance, which allows the auto-derivation of different route-targets in multi-instance services; the value is inherited from the corresponding BGP instance
- Service ID=3-octet EVI

When configured to **false**, route target derivation is not allowed.

### **domain-id** *string*

**Synopsis** Domain ID of received BGP route before readvertisement

**Context** **configure** **service vpls** *string* **bgp-evpn routes ip-prefix domain-id** *string*

**Tree** [domain-id](#)

**Description** This command specifies the domain ID. The domain ID identifies the network from which the BGP route was received before the RTM advertises it to a different neighbor. The domain ID is part of a domain, represented as domain-id:isf\_safi\_type in the D-PATH attribute, as described in *draft-ietf-bess-evpn-ipvpn-interworking*. Gateway routers modify the D-PATH attribute. A gateway is a PE where a VPRN is instantiated. The VPRN in this case advertises or receives routes from multiple BGP owners (for example, EVPN-IFL and BGP-IPVPN) or multiple instances of the same owner (for example, VPRN with two BGP-IPVPN instances).

Gateways use the D-PATH attribute to detect loops (for received routes where the D-PATH contains a local domain ID) and to make BGP best-path selection decisions based on the D-PATH length (shorter D-PATH is preferred).

In the following example, suppose a gateway receives prefix P in an EVPN-IFL instance with the following D-PATH from neighbor N:

Seg Len=1 / 65000:1:128

If the router imports the route in VPRN-1, BGP-EVPN SRv6 instance with domain 65000:2, it readvertises it to its BGP-IPVPN MPLS instance as follows:

Seg Len=2 / 65000:2:70 / 65000:1:128

That is, the gateway prepends the local domain ID and family to the D-PATH before readvertising the route into a different instance.

|-------------|--|
| Description | <p>This command configures a route tag that is used when sending a route to the BGP application (for the corresponding service and BGP instance). If the corresponding BGP instance is enabled, the command cannot be changed.</p> <p>When used for BGP EVPN contexts, only one route tag can be passed to BGP for matching on export policies. In case of a conflict with other route tags pushed by EVPN, the default route tag has the least priority.</p> <p>The following are examples of the conflict priority handling:</p> <ul style="list-style-type: none"> <li>• If a service is configured with both <b>default-route-tag X</b> and <b>proxy-arp evpn-route-tag Y</b>, the EVPN uses route tag Y when sending EVPN proxy-arp routes to the BGP RIB for advertisement.</li> <li>• If a given IP-prefix route is tagged in the route-table with tag A and the R-VPLS, in which the route is advertised, uses B as the <b>default-route-tag</b>, then EVPN keeps tag A when sending the route to the BGP RIB.</li> </ul> <p>The <b>default-route-tag</b> configuration is only supported on EVPN and IP-VPN service routes. The route tag for ES and AD per-ES routes is always zero.</p> |
| Introduced  | 22.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

### **ecmp number**

|            |   |
|------------|---|
| Synopsis   | Maximum ECMP value configured on the service  |
| Context    | <b>configure service vpls string bgp-evpn segment-routing-v6 number ecmp number</b> |
| Tree       | <b>ecmp</b>   |
| Range      | 1 to 32   |
| Default    | 1   |
| Introduced | 22.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

### **evi-three-byte-auto-rt boolean**

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Auto-derive the BGP EVPN route target   |
| Context     | <b>configure service vpls string bgp-evpn segment-routing-v6 number evi-three-byte-auto-rt boolean</b>  |
| Tree        | <b>evi-three-byte-auto-rt</b>   |
| Description | When configured to <b>true</b> , the BGP-EVPN instance import and export route target is auto-derived as described in RFC 8365 (Global-Administrator:A/Type/D-ID/Service-ID). |

Where:

- Global Administrator – is the configured 2-octet AS number; if the configured ASN exceeds the 2 byte limit, the low order 16-bit value is taken
- A=0 (for auto-derivation)
- Type=4 (EVI-based route-target)
- D-ID= [1..2] – encodes the BGP instance, which allows the auto-derivation of different route-targets in multi-instance services; the value is inherited from the corresponding BGP instance
- Service ID=3-octet EVI

When configured to **false**, route target derivation is not allowed.

|            |   |
|------------|---|
| Default    | false                                       |
| Introduced | 22.7.R1                                     |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

## **fdb**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>fdb</b> context  |
| Context    | <b>configure service vpls string bgp-evpn segment-routing-v6 number fdb</b> |
| Tree       | <b>fdb</b>  |
| Introduced | 22.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR                                 |

## **protected-src-mac-violation-action keyword**

|            |  |
|------------|--|
| Synopsis   | Relearn request for a protected MAC is received action   |
| Context    | <b>configure service vpls string bgp-evpn segment-routing-v6 number fdb protected-src-mac-violation-action keyword</b> |
| Tree       | <b>protected-src-mac-violation-action</b>  |
| Options    | discard  |
| Introduced | 22.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

## **force-vc-forwarding keyword**

|          |   |
|----------|---|
| Synopsis | Datapath forwarding to force vlan-vc-type   |
| Context  | <b>configure service vpls string bgp-evpn segment-routing-v6 number force-vc-forwarding keyword</b> |

|             |  |
|-------------|--|
| Tree        | <a href="#">force-vc-forwarding</a>  |
| Description | <p>This command allows the system to preserve the VLAN ID and 802.1p bits of the service-delimiting qtag in a new tag added in the customer frame before sending it to the EVPN destinations.</p> <p>This command may be used in conjunction with the <b>sap ingress vlan-translation</b> command. If so used, the configured translated VLAN ID is the VLAN ID sent to the EVPN destinations as opposed to the service-delimiting tag VLAN ID. If the ingress SAP/SDP binding is 'null'-encapsulated, the output VLAN ID and pbits is zero.</p> |
| Options     | vlan, qinq-c-tag-c-tag, qinq-s-tag-c-tag   |
| Introduced  | 22.7.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

### **mh-mode** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | VXLAN instance   |
| Context    | <b>configure service vpls string</b> <i>bgp-evpn vxlan number vxlan-instance reference</i> |
| Tree       | <i>vxlan-instance</i>  |
| Reference  | <b>configure service vpls string</b> <i>vxlan instance number</i>                          |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**bgp-mh-site** [*site-name*] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bgp-mh-site</b> list instance                     |
| Context    | <b>configure service vpls string</b> <i>bgp-mh-site string</i> |
| Tree       | <i>bgp-mh-site</i>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[site-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | Name for the specific site  |
| Context       | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> |
| Tree          | <a href="#">bgp-mh-site</a>   |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**activation-timer** *number*

|            |   |
|------------|---|
| Synopsis   | Time that the local sites are in standby status, waiting for BGP updates  |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <a href="#">activation-timer number</a> |
| Tree       | <a href="#">activation-timer</a>  |
| Range      | 0 to 100  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the VPLS BGP multi-homing site  |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <a href="#">admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**boot-timer** *number*

|          |   |
|----------|---|
| Synopsis | Wait time after reboot to run the DF election algorithm   |
| Context  | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <a href="#">boot-timer number</a> |
| Tree     | <a href="#">boot-timer</a>  |

|            |          |
|------------|----------|
| Range      | 0 to 600 |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | All      |

### **failed-threshold** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Threshold for the site to be declared down   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <b>failed-threshold</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">failed-threshold</a>   |
| Range      | 1 to 1000  |
| Options    | all  |
| Default    | all  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **id** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Site ID   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <b>id</b> <i>number</i> |
| Tree       | <a href="#">id</a>  |
| Range      | 1 to 65535  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mesh-sdp-binds**

|          |   |
|----------|---|
| Synopsis | Specify if a mesh-sdp-binding is associated with this site  |
| Context  | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <b>mesh-sdp-binds</b>             |
| Tree     | <a href="#">mesh-sdp-binds</a>  |
| Notes    | The following elements are part of a choice: <b>mesh-sdp-binds</b> , <b>sap</b> , <b>shg-name</b> , or <b>spoke-sdp</b> . |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **min-down-timer** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum downtime for BGP multi-homing site after transition from up to down   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <a href="#">min-down-timer number</a> |
| Tree       | <a href="#">min-down-timer</a>  |
| Range      | 0 to 100  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **monitor-oper-group** *reference*

|            |  |
|------------|--|
| Synopsis   | Operational group to monitor   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <a href="#">monitor-oper-group reference</a> |
| Tree       | <a href="#">monitor-oper-group</a>   |
| Reference  | <b>configure</b> <a href="#">service oper-group string</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **sap** *string*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | SAP to be associated with this site   |
| Context       | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <a href="#">sap string</a>        |
| Tree          | <a href="#">sap</a>   |
| String Length | 1 to 45   |
| Notes         | The following elements are part of a choice: <b>mesh-sdp-binds</b> , <b>sap</b> , <b>shg-name</b> , or <b>spoke-sdp</b> . |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

## shg-name *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | SHG name to be associated with the site   |
| Context       | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <a href="#">shg-name string</a>   |
| Tree          | <a href="#">shg-name</a>  |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a choice: <b>mesh-sdp-binds</b> , <b>sap</b> , <b>shg-name</b> , or <b>spoke-sdp</b> . |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

## spoke-sdp *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|               |   |
|---------------|---|
| Synopsis      | SDP to be associated with this site   |
| Context       | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-mh-site string</a> <a href="#">spoke-sdp string</a>  |
| Tree          | <a href="#">spoke-sdp</a>   |
| String Length | 3 to 16   |
| Notes         | The following elements are part of a choice: <b>mesh-sdp-binds</b> , <b>sap</b> , <b>shg-name</b> , or <b>spoke-sdp</b> . |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

## bgp-vpls

|            |   |
|------------|---|
| Synopsis   | Enable the <b>bgp-vpls</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">bgp-vpls</a> |
| Tree       | <a href="#">bgp-vpls</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the BGP-VPLS instance  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">bgp-vpls</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**maximum-ve-id** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum vpls-edge id for BGP-VPLS   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">bgp-vpls</a> <b>maximum-ve-id</b> <i>number</i> |
| Tree       | <a href="#">maximum-ve-id</a>   |
| Range      | 1 to 65535  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**ve**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ve</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">bgp-vpls</a> <b>ve</b> |
| Tree       | <a href="#">ve</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**id** *number*

|            |  |
|------------|--|
| Synopsis   | VPLS edge ID   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">bgp-vpls</a> <b>ve</b> <b>id</b> <i>number</i> |
| Tree       | <a href="#">id</a>   |
| Range      | 1 to 65535   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**name** *string*

|               |  |
|---------------|--|
| Synopsis      | VPLS Edge instance name  |
| Context       | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">bgp-vpls ve</a> <i>name string</i> |
| Tree          | <a href="#">name</a>   |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**capture-sap** [[sap-id](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>capture-sap</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">capture-sap</a> <i>string</i> |
| Tree       | <a href="#">capture-sap</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[sap-id]** *string*

|               |   |
|---------------|---|
| Synopsis      | SAP identifier  |
| Context       | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">capture-sap</a> <i>string</i> |
| Tree          | <a href="#">capture-sap</a>   |
| String Length | 1 to 45   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the SAP  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">capture-sap</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **allow-dot1q-msaps** *boolean*

Synopsis Enable support for triggering managed SAP creation  
 Context **configure** [service vpls](#) *string* [capture-sap](#) *string* **allow-dot1q-msaps** *boolean*  
 Tree [allow-dot1q-msaps](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **bandwidth** *number*

Synopsis SAP bandwidth  
 Context **configure** [service vpls](#) *string* [capture-sap](#) *string* **bandwidth** *number*  
 Tree [bandwidth](#)  
 Range 1 to 6400000000  
 Units kilobps  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **cpu-protection**

Synopsis Enter the **cpu-protection** context  
 Context **configure** [service vpls](#) *string* [capture-sap](#) *string* **cpu-protection**  
 Tree [cpu-protection](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

### **mac-monitoring**

Synopsis Monitor MAC for CPU protection  
 Context **configure** [service vpls](#) *string* [capture-sap](#) *string* **cpu-protection** **mac-monitoring**  
 Tree [mac-monitoring](#)  
 Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s

### **policy-id** *reference*

Synopsis CPM protection policy  
 Context **configure** [service vpls string capture-sap string cpu-protection policy-id reference](#)  
 Tree [policy-id](#)  
 Reference **configure** [system security cpu-protection policy number](#)

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**service-name** *string*

|               |   |
|---------------|---|
| Synopsis      | Administrative service name   |
| Context       | <b>configure</b> <a href="#">service vpls string</a> <a href="#">capture-sap string</a> <a href="#">msap-defaults service-name string</a> |
| Tree          | <a href="#">service-name</a>  |
| String Length | 1 to 64   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**nasreq-auth-policy** *reference*

|            |  |
|------------|--|
| Synopsis   | Diameter NASREQ application policy to use for authentication   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">capture-sap string</a> <a href="#">nasreq-auth-policy reference</a> |
| Tree       | <a href="#">nasreq-auth-policy</a>   |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt diameter-nasreq-policy string</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**pfcp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>pfcp</b> context                                |
| Context    | <b>configure service vpls string capture-sap string pfcp</b> |
| Tree       | <b>pfcp</b>  |
| Introduced | 20.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR      |

**association reference**

|             |  |
|-------------|--|
| Synopsis    | Association used for PFCP messages on the capture SAP  |
| Context     | <b>configure service vpls string capture-sap string pfcp association reference</b>   |
| Tree        | <b>association</b>   |
| Description | This command links the capture SAP to a PFCP association. This enables CUPS for the capture SAP and any trigger packets are forwarded to the BNG CUPS CPF. |
| Reference   | <b>configure subscriber-mgmt pfcp association string</b>   |
| Introduced  | 20.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**I2-access-id-alias string**

|               |   |
|---------------|---|
| Synopsis      | String used as Layer 2 access ID for the capture SAP  |
| Context       | <b>configure service vpls string capture-sap string pfcp I2-access-id-alias string</b>  |
| Tree          | <b>I2-access-id-alias</b>   |
| Description   | This command defines a Layer 2 access ID alias for the capture SAP. It replaces the default underlying port-based or LAG-based Layer 2 access ID. Different capture SAPs on the same underlying port or LAG can have different Layer 2 access ID aliases. |
| String Length | 1 to 32   |
| Introduced    | 22.2.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**up-resiliency**

|          |  |
|----------|--|
| Synopsis | Enter the <b>up-resiliency</b> context                                     |
| Context  | <b>configure service vpls string capture-sap string pfcp up-resiliency</b> |
| Tree     | <b>up-resiliency</b>   |

|            |   |
|------------|---|
| Introduced | 22.2.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **monitor-oper-group** [[oper-group](#)] *reference*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>monitor-oper-group</b> list instance   |
| Context        | <b>configure service vpls string capture-sap string pfc up-resiliency monitor-oper-group reference</b>  |
| Tree           | <a href="#">monitor-oper-group</a>  |
| Description    | Commands in this context define parameters to derive the service health based on monitored operational groups. The BNG UPF sends the health value to the BNG CPF. The BNG CPF uses the value to determine the need for a BNG UPF status change (active or standby).<br><br><b>Note:</b><br>The following is only applicable for the <b>configure service vpls capture-sap</b> context. If the configured groups are not the same for all capture SAPs sharing the same underlying port or LAG, the configuration of a Layer 2 access ID alias is required, or else the system chooses arbitrarily one set of configured groups. |
| Max. Instances | 4   |
| Introduced     | 22.2.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **[oper-group]** *reference*

|            |  |
|------------|--|
| Synopsis   | Operational group name   |
| Context    | <b>configure service vpls string capture-sap string pfc up-resiliency monitor-oper-group reference</b> |
| Tree       | <a href="#">monitor-oper-group</a>   |
| Reference  | <b>configure service oper-group string</b>   |
| Notes      | This element is part of a list key.  |
| Introduced | 22.2.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **health-drop** *number*

|          |   |
|----------|---|
| Synopsis | Number subtracted from the health value per failure |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure service vpls string capture-sap string pfc up-resiliency monitor-oper-group reference health-drop number</b>   |
| Tree        | <a href="#">health-drop</a>   |
| Description | This command configures the drop in the health value for every operational group member failure. Every failure of an operational group member decreases the base health value to a possible minimum of 0. |
| Range       | 1 to 255  |
| Default     | 1   |
| Introduced  | 22.2.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### pppoe

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pppoe</b> context                                |

| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **eth-cfm**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>eth-cfm</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <b>eth-cfm</b> |
| Tree       | <a href="#">eth-cfm</a>  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS               |

### **mep** [md-admin-name](#) *reference* [ma-admin-name](#) *reference* **mep-id** *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mep</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">eth-cfm</a> <b>mep</b> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <b>mep-id</b> <i>number</i> |
| Tree       | <a href="#">mep</a>  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **md-admin-name** *reference*

|          |   |
|----------|---|
| Synopsis | Maintenance Domain (MD) name  |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">eth-cfm</a> <b>mep</b> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">mep</a>  |
| Reference  | <b>configure</b> <a href="#">eth-cfm domain string</a>       |
| Notes      | This element is part of a list key.                          |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **ma-admin-name** *reference*

|            |  |
|------------|--|
| Synopsis   | Maintenance Association (MA) name  |
| Context    | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number</a> |
| Tree       | <a href="#">mep</a>  |
| Reference  | <b>configure</b> <a href="#">eth-cfm domain string association string</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **mep-id number**

|            |  |
|------------|--|
| Synopsis   | Maintenance Endpoint (MEP) ID  |
| Context    | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number</a> |
| Tree       | <a href="#">mep</a>  |
| Range      | 1 to 8191  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of the MEP  |
| Context  | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number admin-state keyword</a> |
| Tree     | <a href="#">admin-state</a>  |
| Options  | enable, disable  |

|            |  |
|------------|--|
| Default    | disable  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## alarm-notification

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>alarm-notification</b> context  |
| Context     | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number alarm-notification</a>  |
| Tree        | <a href="#">alarm-notification</a>   |
| Description | <p>Commands in this context configure the Fault Notification Generator (FNG) time values to raise an alarm or reset the CCM defect alarm.</p> <p>Use these timers for network management processes. The timers are not tied into delaying the notification to the fault management system on the network element and do not affect fault propagation mechanisms.</p> |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## fng-alarm-time *number*

|            |   |
|------------|---|
| Synopsis   | Time that must expire before an FNG alarm is raised   |
| Context    | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number alarm-notification fng-alarm-time number</a> |
| Tree       | <a href="#">fng-alarm-time</a>  |
| Range      | 250   500   1000  |
| Units      | centiseconds  |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## fng-reset-time *number*

|          |   |
|----------|---|
| Synopsis | Time that must expire before an FNG alarm is reset  |
| Context  | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number alarm-notification fng-reset-time number</a> |
| Tree     | <a href="#">fng-reset-time</a>  |
| Range    | 250   500   1000  |
| Units    | centiseconds  |

|            |  |
|------------|--|
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

**ccm boolean**

|            |  |
|------------|--|
| Synopsis   | Generate CCM messages  |
| Context    | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm boolean</a> |
| Tree       | <a href="#">ccm</a>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ccm-ltm-priority number**

|            |  |
|------------|--|
| Synopsis   | Priority of CCM and LTM messages transmitted by the MEP  |
| Context    | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm-ltm-priority number</a> |
| Tree       | <a href="#">ccm-ltm-priority</a>   |
| Range      | 0 to 7   |
| Default    | 7  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**ccm-padding-size number**

|             |   |
|-------------|---|
| Synopsis    | Number of octets of padding to insert in CCM packets  |
| Context     | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm-padding-size number</a>  |
| Tree        | <a href="#">ccm-padding-size</a>  |
| Description | This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.<br><br>This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through <b>configure eth-cfm domain association ccm-interval</b> ) is less than 1 second. |
| Range       | 3 to 1500   |

|            |  |
|------------|--|
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **cfm-vlan-tag** *string*

|               |  |
|---------------|--|
| Synopsis      | VLAN tags to apply to CFM PDUs for egress processing   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>cfm-vlan-tag</b> <i>string</i> |
| Tree          | <a href="#">cfm-vlan-tag</a>   |
| String Length | 1 to 9   |
| Introduced    | 21.10.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R4   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **eth-test**

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>eth-test</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>eth-test</b> |
| Tree        | <a href="#">eth-test</a>   |
| Description | Commands in this context configure information used by the Ethernet Test (ETH-TST) packet. The commands must be configured on both the sender and the receiver nodes. The test packets are used with the <b>oam eth-cfm eth-test</b> command.                              |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**bit-error-threshold** *number*

|            |  |
|------------|--|
| Synopsis   | Lowest priority defect allowed to generate fault alarm   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id number</a> <a href="#">eth-test bit-error-threshold</a> <i>number</i> |
| Tree       | <a href="#">bit-error-threshold</a>  |
| Range      | 0 to 11840   |
| Units      | bit errors   |
| Default    | 1  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**test-pattern**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>test-pattern</b> context   |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id number</a> <a href="#">eth-test test-pattern</a> |
| Tree        | <a href="#">test-pattern</a>  |
| Description | Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver.  |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**crc-tlv** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate a CRC checksum  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id number</a> <a href="#">eth-test test-pattern</a> <a href="#">crc-tlv</a> <i>boolean</i> |
| Tree       | <a href="#">crc-tlv</a>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**pattern** *keyword*

|          |                                       |
|----------|---------------------------------------|
| Synopsis | Test pattern for Ethernet Test frames |
|----------|---------------------------------------|

|             |   |
|-------------|---|
| Context     | <b>configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test test-pattern pattern keyword</b>        |
| Tree        | <a href="#">pattern</a>   |
| Description | This command specifies the test pattern of the Ethernet Test (ETH-TST) frames. This does not have to be configured the same on the sender and the receiver. |
| Options     | all-zeros, all-ones   |
| Default     | all-zeros   |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## grace

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>grace</b> context  |
| Context     | <b>configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace</b>                  |
| Tree        | <a href="#">grace</a>   |
| Description | Commands in this context configure the Nokia ETH-CFM Grace function and the ITU-T Y.1731 Ethernet Expected Default (ETH-ED) function. |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## eth-ed

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>eth-ed</b> context   |
| Context     | <b>configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed</b> |
| Tree        | <a href="#">eth-ed</a>  |
| Description | Commands in this context configure the ITU-T Y.1731 ETH-ED function.  |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## max-rx-defect-window *number*

|          |   |
|----------|---|
| Synopsis | Maximum received ETH-ED expected defect window duration   |
| Context  | <b>configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed max-rx-defect-window number</b> |
| Tree     | <a href="#">max-rx-defect-window</a>  |

|            |  |
|------------|--|
| Range      | 1 to 86400   |
| Units      | seconds  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **priority number**

|            |   |
|------------|---|
| Synopsis   | Transmission priority for ETH-ED PDUs   |
| Context    | <b>configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed priority number</b> |
| Tree       | <a href="#">priority</a>  |
| Range      | 0 to 7  |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **rx-eth-ed boolean**

|             |   |
|-------------|---|
| Synopsis    | Receive and process ETH-ED ITU-T Y.1731 PDUs on the MEP   |
| Context     | <b>configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed rx-eth-ed boolean</b> |
| Tree        | <a href="#">rx-eth-ed</a>   |
| Description | This command enables the reception and processing of the ITU-T Y.1731 ETH-ED PDU on the MEP.  |
| Default     | true  |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **tx-eth-ed boolean**

|            |   |
|------------|---|
| Synopsis   | Transmit ETH-ED PDUs from the MEP   |
| Context    | <b>configure service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed tx-eth-ed boolean</b> |
| Tree       | <a href="#">tx-eth-ed</a>   |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## eth-vsm-grace

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>eth-vsm-grace</b> context   |
| Context     | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-vsm-grace</a> |
| Tree        | <a href="#">eth-vsm-grace</a>  |
| Description | Commands in this context configure the Nokia ETH-CFM Grace function.   |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## rx-eth-vsm-grace *boolean*

|             |   |
|-------------|---|
| Synopsis    | Receive and process Nokia ETH-CFM Grace PDU on the MEP  |
| Context     | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-vsm-grace rx-eth-vsm-grace boolean</a>   |
| Tree        | <a href="#">rx-eth-vsm-grace</a>  |
| Description | When configured to <b>true</b> , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>When configured to <b>false</b> , the router disables the Nokia Grace function. |
| Default     | true  |
| Introduced  | 16.0.R4   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## tx-eth-vsm-grace *boolean*

|             |   |
|-------------|---|
| Synopsis    | Transmit ETH-ED PDUs from the MEP   |
| Context     | <b>configure</b> <a href="#">service vpls string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-vsm-grace tx-eth-vsm-grace boolean</a>   |
| Tree        | <a href="#">tx-eth-vsm-grace</a>  |
| Description | When configured to <b>true</b> , the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.<br><br>The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>The operator must configure the <b>configure system eth-cfm grace</b> command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED). |

When configured to **false**, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.

|            |  |
|------------|--|
| Default    | true   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **low-priority-defect** *keyword*

|            |  |
|------------|--|
| Synopsis   | Lowest priority defect allowed to generate fault alarm   |
| Context    | <b>configure service vpls string eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id number low-priority-defect keyword</b> |
| Tree       | <a href="#">low-priority-defect</a>  |
| Options    | all-def, mac-rem-err-xcon, rem-err-xcon, err-xcon, xcon, no-xcon   |
| Default    | mac-rem-err-xcon   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **mac-address** *string*

|             |  |
|-------------|--|
| Synopsis    | MAC address of the MEP   |
| Context     | <b>configure service vpls string eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id number mac-address string</b>                                    |
| Tree        | <a href="#">mac-address</a>  |
| Description | This command specifies the MAC address of the MEP.<br>When unconfigured, the MAC address of the port (if the MEP is on a SAP) or the MAC address of a bridge (if the MEP is on a spoke) is used. |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **one-way-delay-threshold** *number*

|          |   |
|----------|---|
| Synopsis | Threshold time limit for the one-way delay test   |
| Context  | <b>configure service vpls string eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id number one-way-delay-threshold number</b> |
| Tree     | <a href="#">one-way-delay-threshold</a>   |
| Range    | 0 to 600  |
| Units    | seconds   |

|            |  |
|------------|--|
| Default    | 3  |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **etree boolean**

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Use VPLS service as an E-Tree VPLS                 |
| Context    | <b>configure service vpls string etree boolean</b> |
| Tree       | <b>etree</b>                                       |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **fdb**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>fdb</b> context             |
| Context    | <b>configure service vpls string fdb</b> |
| Tree       | <b>fdb</b>                               |
| Introduced | 16.0.R1                                  |
| Platforms  | All                                      |

### **discard-unknown boolean**

|            |  |
|------------|--|
| Synopsis   | Discard packets with unknown destination MAC addresses           |
| Context    | <b>configure service vpls string fdb discard-unknown boolean</b> |
| Tree       | <b>discard-unknown</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## mac-learning

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mac-learning</b> context                 |
| Context    | <b>configure service vpls string fdb mac-learning</b> |
| Tree       | <a href="#">mac-learning</a>                          |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## aging *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable aging of MAC addresses                                       |
| Context    | <b>configure service vpls string fdb mac-learning aging boolean</b> |
| Tree       | <a href="#">aging</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## learning *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable learning of new MAC addresses                                   |
| Context    | <b>configure service vpls string fdb mac-learning learning boolean</b> |
| Tree       | <a href="#">learning</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## local-age-time *number*

|            |   |
|------------|---|
| Synopsis   | Aging time for locally learned MAC addresses                                |
| Context    | <b>configure service vpls string fdb mac-learning local-age-time number</b> |
| Tree       | <a href="#">local-age-time</a>  |
| Range      | 60 to 86400   |
| Default    | 300   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**remote-age-time** *number*

|            |  |
|------------|--|
| Synopsis   | Aging time for locally learned MAC addresses   |
| Context    | <b>configure</b> <a href="#">service vpls string fdb mac-learning remote-age-time number</a> |
| Tree       | <a href="#">remote-age-time</a>  |
| Range      | 60 to 86400  |
| Default    | 900  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**mac-move**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mac-move</b> context                                 |
| Context    | <b>configure</b> <a href="#">service vpls string fdb mac-move</a> |
| Tree       | <a href="#">mac-move</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of MAC move  |
| Context    | <b>configure</b> <a href="#">service vpls string fdb mac-move admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**hold-down-time** *number*

|          |   |
|----------|---|
| Synopsis | Wait time before re-enabling disabled SAP   |
| Context  | <b>configure</b> <a href="#">service vpls string fdb mac-move hold-down-time number</a> |
| Tree     | <a href="#">hold-down-time</a>  |
| Range    | 0 to 600  |
| Units    | seconds   |

|            |         |
|------------|---------|
| Default    | 10      |
| Introduced | 19.7.R1 |
| Platforms  | All     |

### **move-frequency** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum rate MACs can be re-learned in the VPLS service   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">fdb mac-move</a> <a href="#">move-frequency</a> <i>number</i> |
| Tree       | <a href="#">move-frequency</a>  |
| Range      | 1 to 10   |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **primary-cumulative-factor** *number*

|            |  |
|------------|--|
| Synopsis   | Factor for MAC-relearn periods for MAC-relearn rate  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">fdb mac-move</a> <a href="#">primary-cumulative-factor</a> <i>number</i> |
| Tree       | <a href="#">primary-cumulative-factor</a>  |
| Range      | 3 to 10  |
| Default    | 3  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

### **retry-count** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Number of retries for re-enabling the SAP or SDP  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">fdb mac-move</a> <a href="#">retry-count</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">retry-count</a>   |
| Range      | 1 to 255  |
| Options    | unlimited   |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**sap** [[sap-id](#)] *reference*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>sap</b> list instance                              |
| Context    | <b>configure service vpls string fdb mac-move sap reference</b> |
| Tree       | <a href="#">sap</a>   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

**[sap-id]** *reference*

|            |   |
|------------|---|
| Synopsis   | SAP identifier  |
| Context    | <b>configure service vpls string fdb mac-move sap reference</b> |
| Tree       | <a href="#">sap</a>   |
| Reference  | <b>configure service vpls string sap string</b>                 |
| Notes      | This element is part of a list key.                             |
| Introduced | 19.7.R1   |
| Platforms  | All   |

**level** *keyword*

|            |   |
|------------|---|
| Synopsis   | Primary or secondary port level   |
| Context    | <b>configure service vpls string fdb mac-move sap reference level keyword</b> |
| Tree       | <a href="#">level</a>   |
| Options    | primary, secondary  |
| Notes      | This element is mandatory.  |
| Introduced | 19.7.R1   |
| Platforms  | All   |

**secondary-cumulative-factor** *number*

|          |  |
|----------|--|
| Synopsis | Number of periods to measure mac-relearn rate  |
| Context  | <b>configure service vpls string fdb mac-move secondary-cumulative-factor number</b> |
| Tree     | <a href="#">secondary-cumulative-factor</a>  |
| Range    | 2 to 9   |
| Default  | 2  |

Introduced 19.7.R1  
 Platforms All

### **spoke-sdp** [[sdp-bind-id](#)] *reference*

Synopsis Enter the **spoke-sdp** list instance  
 Context **configure** [service vpls string fdb mac-move spoke-sdp reference](#)  
 Tree [spoke-sdp](#)  
 Introduced 19.7.R1  
 Platforms All

### **[sdp-bind-id]** *reference*

Synopsis SDP binding ID  
 Context **configure** [service vpls string fdb mac-move spoke-sdp reference](#)  
 Tree [spoke-sdp](#)  
 Reference **configure** [service vpls string spoke-sdp string](#)  
 Notes This element is part of a list key.  
 Introduced 19.7.R1  
 Platforms All

### **level** *keyword*

Synopsis Primary or secondary port level  
 Context **configure** [service vpls string fdb mac-move spoke-sdp reference level keyword](#)  
 Tree [level](#)  
 Options primary, secondary  
 Notes This element is mandatory.  
 Introduced 19.7.R1  
 Platforms All

### **mac-subnet-length** *number*

Synopsis Number of bits performing MAC learning or MAC switching  
 Context **configure** [service vpls string fdb mac-subnet-length number](#)

|            |                                   |
|------------|-----------------------------------|
| Tree       | <a href="#">mac-subnet-length</a> |
| Range      | 24 to 48                          |
| Default    | 48                                |
| Introduced | 16.0.R1                           |
| Platforms  | All                               |

### **selective-learning** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allocate FDB entries on selectively learned line cards                              |
| Context    | <b>configure</b> <a href="#">service vpls string fdb selective-learning boolean</a> |
| Tree       | <a href="#">selective-learning</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **static-mac**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>static-mac</b> context                                 |
| Context    | <b>configure</b> <a href="#">service vpls string fdb static-mac</a> |
| Tree       | <a href="#">static-mac</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mac** [[mac-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mac</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vpls string fdb static-mac mac string</a> |
| Tree       | <a href="#">mac</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **[mac-address]** *string*

|          |  |
|----------|--|
| Synopsis | Static MAC address to SAP/SDP-binding or black-hole                            |
| Context  | <b>configure</b> <a href="#">service vpls string fdb static-mac mac string</a> |

|            |                                     |
|------------|-------------------------------------|
| Tree       | <a href="#">mac</a>                 |
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R1                             |
| Platforms  | All                                 |

## blackhole

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Create a static FDB entry for the MAC address to black-hole traffic  |
| Context    | <b>configure</b> <a href="#">service vpls string fdb static-mac mac string blackhole</a>   |
| Tree       | <a href="#">blackhole</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>blackhole</b> , <b>endpoint</b> , <b>mesh-sdp</b> , <b>sap</b> , or <b>spoke-sdp</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## endpoint *reference*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Endpoint associated with this MAC  |
| Context    | <b>configure</b> <a href="#">service vpls string fdb static-mac mac string endpoint reference</a>  |
| Tree       | <a href="#">endpoint</a>   |
| Reference  | <b>configure</b> <a href="#">service vpls string endpoint string</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>blackhole</b> , <b>endpoint</b> , <b>mesh-sdp</b> , <b>sap</b> , or <b>spoke-sdp</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## mesh-sdp *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Mesh SDP bind associated with this MAC   |
| Context    | <b>configure</b> <a href="#">service vpls string fdb static-mac mac string mesh-sdp reference</a>  |
| Tree       | <a href="#">mesh-sdp</a>   |
| Reference  | <b>configure</b> <a href="#">service vpls string mesh-sdp string</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>blackhole</b> , <b>endpoint</b> , <b>mesh-sdp</b> , <b>sap</b> , or <b>spoke-sdp</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## monitor *keyword*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Entity to be monitored to decide whether this entry can be installed in the FDB                |
| Context    | <b>configure</b> <a href="#">service vpls string fdb static-mac mac string monitor keyword</a> |
| Tree       | <a href="#">monitor</a>  |
| Options    | none, forward-status   |
| Default    | none   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## sap *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | SAP associated with this MAC   |
| Context  | <b>configure</b> <a href="#">service vpls string fdb static-mac mac string sap reference</a> |
| Tree     | <a href="#">sap</a>  |

|            |  |
|------------|--|
| Reference  | <b>configure service vpls string sap string</b>  |
| Notes      | The following elements are part of a mandatory choice: <b>blackhole</b> , <b>endpoint</b> , <b>mesh-sdp</b> , <b>sap</b> , or <b>spoke-sdp</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **spoke-sdp** *reference*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Spoke SDP bind associated with this MAC  |
| Context    | <b>configure service vpls string fdb static-mac mac string spoke-sdp reference</b>   |
| Tree       | <a href="#">spoke-sdp</a>  |
| Reference  | <b>configure service vpls string spoke-sdp string</b>  |
| Notes      | The following elements are part of a mandatory choice: <b>blackhole</b> , <b>endpoint</b> , <b>mesh-sdp</b> , <b>sap</b> , or <b>spoke-sdp</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **table**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>table</b> context                 |
| Context    | <b>configure service vpls string fdb table</b> |
| Tree       | <a href="#">table</a>                          |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **high-wmark** *number*

|          |  |
|----------|--|
| Synopsis | High watermark for the FDB table                                 |
| Context  | <b>configure service vpls string fdb table high-wmark number</b> |
| Tree     | <a href="#">high-wmark</a>                                       |
| Range    | 0 to 100   |
| Default  | 95   |

---

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **low-wmark** *number*

|            |  |
|------------|--|
| Synopsis   | Low watermark for the FDB table  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">fdb table</a> <b>low-wmark</b> <i>number</i> |
| Tree       | <a href="#">low-wmark</a>  |
| Range      | 0 to 100   |
| Default    | 90   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **size** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum MAC entries in the FDB  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">fdb table</a> <b>size</b> <i>number</i> |
| Tree       | <a href="#">size</a>  |
| Range      | 1 to 511999   |
| Default    | 250   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **gsmp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>gsmp</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <b>gsmp</b> |
| Tree       | <a href="#">gsmp</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of GSMP   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">gsmp</a> <b>admin-state</b> <i>keyword</i> |

|            |                             |
|------------|-----------------------------|
| Tree       | <a href="#">admin-state</a> |
| Options    | enable, disable             |
| Default    | disable                     |
| Introduced | 16.0.R1                     |
| Platforms  | All                         |

### **group** [[name](#)] *string*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>group</b> list instance   |
| Context        | <b>configure</b> <a href="#">service vpls string</a> <a href="#">gsmp group string</a> |
| Tree           | <a href="#">group</a>  |
| Max. Instances | 1024   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **[name]** *string*

|               |  |
|---------------|--|
| Synopsis      | GSMP group name  |
| Context       | <b>configure</b> <a href="#">service vpls string</a> <a href="#">gsmp group string</a> |
| Tree          | <a href="#">group</a>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the GSMP group   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">gsmp group string</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**ancp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ancp</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">gsmp</a> <a href="#">group</a> <i>string</i> <b>ancp</b> |
| Tree       | <a href="#">ancp</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**dynamic-topology-discovery** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable the ANCP dynamic topology discovery capability   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">gsmp</a> <a href="#">group</a> <i>string</i> <b>ancp</b> <b>dynamic-topology-discovery</b> <i>boolean</i> |
| Tree       | <a href="#">dynamic-topology-discovery</a>  |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**oam** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable GSMP ANCP OAM capability at startup of GSMP connection  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">gsmp</a> <a href="#">group</a> <i>string</i> <b>ancp</b> <b>oam</b> <i>boolean</i> |
| Tree       | <a href="#">oam</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**description** *string*

|               |   |

String Length 1 to 80  
Introduced 16.0.R1  
Platforms All

## local-address *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Restrict connections to this local address only within the service running ANCP   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">gsmg group string</a> <a href="#">neighbor string</a> <a href="#">local-address string</a> |
| Tree       | <a href="#">local-address</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## priority-marking

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Enter the <b>priority-marking</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">gsmg group string</a> <a href="#">neighbor string</a> <a href="#">priority-marking</a> |
| Tree       | <a href="#">priority-marking</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## dscp *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | DSCP that is used while remarking the in profile packets  |
| Context  | <b>configure</b> <a href="#">service vpls string</a> <a href="#">gsmg group string</a> <a href="#">neighbor string</a> <a href="#">priority-marking</a> <a href="#">dscp keyword</a>  |
| Tree     | <a href="#">dscp</a>  |
| Options  | be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63 |
| Notes    | The following elements are part of a choice: <b>dscp</b> or <b>prec</b> .   |

Introduced 16.0.R1  
 Platforms All

### **prec** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Precedence priority marking  
 Context **configure** [service vpls string](#) [gsmg group string](#) [neighbor string](#) [priority-marking prec number](#)  
 Tree [prec](#)  
 Range 0 to 7  
 Notes The following elements are part of a choice: **dscp** or **prec**.  
 Introduced 16.0.R1  
 Platforms All

### **persistence** *boolean*

Synopsis Store DSL line information when the GSMP connection terminates  
 Context **configure** [service vpls string](#) [gsmg group string](#) [persistence boolean](#)  
 Tree [persistence](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

### **igmp-host-tracking**

Synopsis Enter the **igmp-host-tracking** context  
 Context **configure** [service vpls string](#) [igmp-host-tracking](#)  
 Tree [igmp-host-tracking](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of IGMP host tracking  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">igmp-host-tracking</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**expiry-time** *number*

|            |  |
|------------|--|
| Synopsis   | Time that the system continues to track inactive hosts   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">igmp-host-tracking</a> <a href="#">expiry-time</a> <i>number</i> |
| Tree       | <a href="#">expiry-time</a>  |
| Range      | 1 to 65535   |
| Units      | seconds  |
| Default    | 260  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**igmp-snooping**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>igmp-snooping</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">igmp-snooping</a> |
| Tree       | <a href="#">igmp-snooping</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of snooping   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">igmp-snooping</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>  |
| Options  | enable, disable  |
| Default  | disable  |

Introduced 16.0.R1  
 Platforms All

## evpn-proxy

Synopsis Enter the **evpn-proxy** context  
 Context **configure service vpls string igmp-snooping evpn-proxy**  
 Tree [evpn-proxy](#)  
 Introduced 20.10.R1  
 Platforms All

## admin-state *keyword*

Synopsis Administrative state of EVPN proxy  
 Context **configure service vpls string igmp-snooping evpn-proxy admin-state keyword**  
 Tree [admin-state](#)  
 Options enable, disable  
 Default disable  
 Introduced 20.10.R1  
 Platforms All

## mvr

Synopsis Enter the **mvr** context  
 Context **configure service vpls string igmp-snooping mvr**  
 Tree [mvr](#)  
 Introduced 16.0.R1  
 Platforms All

## admin-state *keyword*

Synopsis Administrative state of MVR  
 Context **configure service vpls string igmp-snooping mvr admin-state keyword**  
 Tree [admin-state](#)  
 Options enable, disable

---

|            |         |
|------------|---------|
| Default    | disable |
| Introduced | 16.0.R1 |
| Platforms  | All     |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service vpls string</a> <a href="#">igmp-snooping mvr description string</a> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**group-policy** *string*

|               |  |
|---------------|--|
| Synopsis      | Policy that applies MVR  |
| Context       | <b>configure</b> <a href="#">service vpls string</a> <a href="#">igmp-snooping mvr group-policy string</a> |
| Tree          | <a href="#">group-policy</a>   |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**query-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time between two consecutive host-query messages   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">igmp-snooping query-interval number</a> |
| Tree       | <a href="#">query-interval</a>   |
| Range      | 1 to 65535   |
| Units      | seconds  |
| Default    | 125  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**query-source-address** (*keyword* | *ipv4-address*)

|            |  |
|------------|--|
| Synopsis   | Source address for IGMP queries  |
| Context    | <b>configure service vpls string igmp-snooping query-source-address</b> ( <i>keyword</i>   <i>ipv4-address</i> ) |
| Tree       | <a href="#">query-source-address</a>   |
| Options    | system   |
| Default    | system   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**report-source-address** *string*

|            |  |
|------------|--|
| Synopsis   | Source IP address used when generating IGMP reports                                    |
| Context    | <b>configure service vpls string igmp-snooping report-source-address</b> <i>string</i> |
| Tree       | <a href="#">report-source-address</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**robust-count** *number*

|            |   |
|------------|---|
| Synopsis   | Number of retries after expected message loss                                 |
| Context    | <b>configure service vpls string igmp-snooping robust-count</b> <i>number</i> |
| Tree       | <a href="#">robust-count</a>  |
| Range      | 1 to 255  |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**ignore-l2vpn-mtu-mismatch** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Ignore the L2 VPN MTU mismatch with local service MTU  |
| Context     | <b>configure service vpls string ignore-l2vpn-mtu-mismatch</b> <i>boolean</i>  |
| Tree        | <a href="#">ignore-l2vpn-mtu-mismatch</a>  |
| Description | When configured to <b>true</b> , the router does not check the value of the Layer 2 MTU in the Layer2 Info Extended Community received in a BGP update message against the local |

service MTU or locally signaled MTU. It may, therefore, bring up the BGP VPLS service regardless of any MTU mismatch.

When configured to **false**, an MTU mismatch prevents the system from bringing up a BGP-VPLS service.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 22.2.R1 |
| Platforms  | All     |

### **interface** [[interface-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>interface</b> list instance              |
| Context    | <b>configure service vpls string interface string</b> |
| Tree       | <a href="#">interface</a>                             |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[interface-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | IP interface name                                     |
| Context       | <b>configure service vpls string interface string</b> |
| Tree          | <a href="#">interface</a>                             |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.                   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the interface                                     |
| Context    | <b>configure service vpls string interface string admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 255  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **hold-time**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>hold-time</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">hold-time</a> |
| Tree       | <a href="#">hold-time</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ipv4**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">hold-time</a> <a href="#">ipv4</a> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **down**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>down</b> context  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">hold-time</a> <a href="#">ipv4</a> <a href="#">down</a>  |
| Tree        | <a href="#">down</a>   |
| Description | Commands in this context configure the down hold timer, which specifies the delay before activating the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface up, unless an operator configures the <b>init-only</b> command. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**init-only** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Apply delay only at interface configuration or reboot  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">hold-time</a> <a href="#">ipv4</a> <a href="#">down</a> <a href="#">init-only</a> <i>boolean</i> |
| Tree        | <a href="#">init-only</a>  |
| Description | This command applies a delay only when the IP interface is first configured or after a system reboot.  |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**seconds** *number*

|            |   |
|------------|---|
| Synopsis   | Down hold time for the IP interface   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">hold-time</a> <a href="#">ipv4</a> <a href="#">down</a> <a href="#">seconds</a> <i>number</i> |
| Tree       | <a href="#">seconds</a>   |
| Range      | 1 to 1200   |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**up**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>up</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">hold-time</a> <a href="#">ipv4</a> <a href="#">up</a>   |
| Tree        | <a href="#">up</a>  |
| Description | Commands in this context configure the up hold timer, which specifies the delay before deactivation of the associated interface. The delay is invoked whenever the system attempts to bring the associated IP interface down. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**seconds** *number*

|          |   |
|----------|---|
| Synopsis | Up hold time for the IP interface   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">hold-time</a> <a href="#">ipv4</a> <a href="#">up</a> <a href="#">seconds</a> <i>number</i> |

|            |                         |
|------------|-------------------------|
| Tree       | <a href="#">seconds</a> |
| Range      | 1 to 1200               |
| Units      | seconds                 |
| Introduced | 16.0.R1                 |
| Platforms  | All                     |

## ipv4

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">interface string</a> <a href="#">ipv4</a> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## neighbor-discovery

|            |   |
|------------|---|
| Synopsis   | Enter the <b>neighbor-discovery</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">interface string</a> <a href="#">ipv4 neighbor-discovery</a> |
| Tree       | <a href="#">neighbor-discovery</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## static-neighbor [[ipv4-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>static-neighbor</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">interface string</a> <a href="#">ipv4 neighbor-discovery</a> <a href="#">static-neighbor string</a> |
| Tree       | <a href="#">static-neighbor</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## [\[ipv4-address\]](#) *string*

|          |  |
|----------|--|
| Synopsis | IPv4 address that corresponds to the physical address  |
| Context  | <b>configure</b> <a href="#">service vpls string</a> <a href="#">interface string</a> <a href="#">ipv4 neighbor-discovery</a> <a href="#">static-neighbor string</a> |

|------------|-------------------------------------|
| Tree       | <a href="#">static-neighbor</a>     |
| Notes      | This element is part of a list key. |
| Introduced | 16.0.R1                             |
| Platforms  | All                                 |

### **mac-address** *string*

|            |   |
|------------|---|
| Synopsis   | MAC address for the static neighbor   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 neighbor-discovery</a> <a href="#">static-neighbor</a> <i>string</i> <a href="#">mac-address</a> <i>string</i> |
| Tree       | <a href="#">mac-address</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **timeout** *number*

|            |   |
|------------|---|
| Synopsis   | ARP timeout value to determine how long an ARP entry remains in the ARP cache   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4 neighbor-discovery</a> <a href="#">timeout</a> <i>number</i> |
| Tree       | <a href="#">timeout</a>   |
| Range      | 0 to 65535  |
| Units      | seconds   |
| Default    | 14400   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **primary**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>primary</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">interface</a> <i>string</i> <a href="#">ipv4</a> <a href="#">primary</a> |
| Tree       | <a href="#">primary</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **address** *string*

|            |   |
|------------|---|
| Synopsis   | IP address of the interface   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">interface string ipv4 primary address string</a> |
| Tree       | <a href="#">address</a>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **prefix-length** *number*

|            |   |
|------------|---|
| Synopsis   | IPv4 address prefix length  |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">interface string ipv4 primary prefix-length number</a> |
| Tree       | <a href="#">prefix-length</a>   |
| Range      | 0 to 32   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mac** *string*

|            |  |
|------------|--|
| Synopsis   | MAC address for the interface  |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">interface string mac string</a> |
| Tree       | <a href="#">mac</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **isid-policy**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>isid-policy</b> context                             |
| Context    | <b>configure</b> <a href="#">service vpls string isid-policy</a> |
| Tree       | <a href="#">isid-policy</a>                                      |
| Introduced | 19.10.R1   |
| Platforms  | All  |

**entry** [*range-entry-id*] *number*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>entry</b> list instance                          |
| Context    | <b>configure service vpls string isid-policy entry number</b> |
| Tree       | <b>entry</b>  |
| Introduced | 19.10.R1  |
| Platforms  | All   |

**[range-entry-id]** *number*

|            |   |
|------------|---|
| Synopsis   | ISID policy entry ID  |
| Context    | <b>configure service vpls string isid-policy entry number</b> |
| Tree       | <b>entry</b>  |
| Range      | 1 to 8191   |
| Notes      | This element is part of a list key.                           |
| Introduced | 19.10.R1  |
| Platforms  | All   |

**advertise-local** *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise locally-defined I-VPLS ISIDs or static ISIDs                                |
| Context    | <b>configure service vpls string isid-policy entry number advertise-local boolean</b> |
| Tree       | <b>advertise-local</b>  |
| Default    | true  |
| Introduced | 19.10.R1  |
| Platforms  | All   |

**range**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>range</b> context                                      |
| Context    | <b>configure service vpls string isid-policy entry number range</b> |
| Tree       | <b>range</b>  |
| Introduced | 19.10.R1  |
| Platforms  | All   |

### **end number**

|            |  |
|------------|--|
| Synopsis   | Upper bound of the ISID range  |
| Context    | <b>configure service vpls string isid-policy entry number range end number</b> |
| Tree       | <b>end</b>   |
| Range      | 1 to 16777215  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

### **start number**

|            |  |
|------------|--|
| Synopsis   | Lower bound of the ISID range  |
| Context    | <b>configure service vpls string isid-policy entry number range start number</b> |
| Tree       | <b>start</b>   |
| Range      | 1 to 16777215  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

### **use-def-mcast boolean**

|            |   |
|------------|---|
| Synopsis   | Use default multicast tree to propagate ISIS range                                  |
| Context    | <b>configure service vpls string isid-policy entry number use-def-mcast boolean</b> |
| Tree       | <b>use-def-mcast</b>  |
| Default    | false   |
| Introduced | 19.10.R1  |
| Platforms  | All   |

### **load-balancing**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>load-balancing</b> context             |
| Context    | <b>configure service vpls string load-balancing</b> |
| Tree       | <b>load-balancing</b>                               |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**lbl-eth-or-ip-l4-teid** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable hashing of MPLS ethernet and IP packets on SAPs   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">load-balancing</a> <a href="#">lbl-eth-or-ip-l4-teid</a> <i>boolean</i>  |
| Tree        | <a href="#">lbl-eth-or-ip-l4-teid</a>  |
| Description | When configured to <b>true</b> , this command enables hashing of MPLS Ethernet and MPLS IP packets received on the Epipe and VPLS service SAP using the MPLS labels, the inner IP addresses, the port numbers, and the GTP TEID field, if read by the system. This capability is supported on line cards that are FP4-based and later. |
| Default     | false  |
| Introduced  | 22.2.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**per-service-hashing** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable per-service hashing for Ethernet services  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">load-balancing</a> <a href="#">per-service-hashing</a> <i>boolean</i> |
| Tree       | <a href="#">per-service-hashing</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**spi-load-balancing** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow use of SPI (Security Parameter Index) in hashing for ESP/AH encrypted IPv4/IPv6 traffic  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">load-balancing</a> <a href="#">spi-load-balancing</a> <i>boolean</i> |
| Tree       | <a href="#">spi-load-balancing</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**teid-load-balancing** *boolean*

|          |   |
|----------|---|
| Synopsis | Include TEID in hashing algorithm for GTP-U/C encapsulated traffic  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">load-balancing</a> <a href="#">teid-load-balancing</a> <i>boolean</i> |
| Tree     | <a href="#">teid-load-balancing</a>   |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **m-vpls** *boolean*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Specify whether this is a management VPLS  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <b>m-vpls</b> <i>boolean</i> |
| Tree       | <a href="#">m-vpls</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mac-flush**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mac-flush</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <b>mac-flush</b> |
| Tree       | <a href="#">mac-flush</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **tldp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>tldp</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <b>mac-flush</b> <b>tldp</b> |
| Tree       | <a href="#">tldp</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **propagate** *boolean*

|          |  |
|----------|--|
| Synopsis | Propagate MAC flush messages received from the T-LDP |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vpls string mac-flush tldp propagate boolean</b> |
| Tree       | <a href="#">propagate</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **send-on-failure boolean**

|            |   |
|------------|---|
| Synopsis   | Send MAC withdraw message on SAP/Spoke-SDP failure                          |
| Context    | <b>configure service vpls string mac-flush tldp send-on-failure boolean</b> |
| Tree       | <a href="#">send-on-failure</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mac-protect**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mac-protect</b> context             |
| Context    | <b>configure service vpls string mac-protect</b> |
| Tree       | <a href="#">mac-protect</a>                      |
| Introduced | 19.10.R1   |
| Platforms  | All  |

### **mac [mac-address] string**

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>mac</b>                             |
| Context    | <b>configure service vpls string mac-protect mac string</b> |
| Tree       | <a href="#">mac</a>   |
| Introduced | 19.10.R1  |
| Platforms  | All   |

### **[mac-address] string**

|          |   |
|----------|---|
| Synopsis | Protected MAC address                                       |
| Context  | <b>configure service vpls string mac-protect mac string</b> |

|            |                                     |
|------------|-------------------------------------|
| Tree       | <a href="#">mac</a>                 |
| Notes      | This element is part of a list key. |
| Introduced | 19.10.R1                            |
| Platforms  | All                                 |

### **mcast-ipv6-snooping-scope** *keyword*

|            |   |
|------------|---|
| Synopsis   | IPv6 multicast snooping scope   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <b>mcast-ipv6-snooping-scope</b> <i>keyword</i> |
| Tree       | <a href="#">mcast-ipv6-snooping-scope</a>   |
| Options    | sg-based, mac-based   |
| Default    | mac-based   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mcr-default-gtw**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mcr-default-gtw</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <b>mcr-default-gtw</b> |
| Tree       | <a href="#">mcr-default-gtw</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **ip** *string*

|            |  |
|------------|--|
| Synopsis   | Multi-chassis ring default gateway IP address  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <b>mcr-default-gtw</b> <b>ip</b> <i>string</i> |
| Tree       | <a href="#">ip</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mac** *string*

|          |   |
|----------|---|
| Synopsis | Multi-chassis ring default gateway MAC address  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <b>mcr-default-gtw</b> <b>mac</b> <i>string</i> |

|            |                     |
|------------|---------------------|
| Tree       | <a href="#">mac</a> |
| Default    | 00:00:00:00:00:00   |
| Introduced | 16.0.R1             |
| Platforms  | All                 |

### **mesh-sdp** [[sdp-bind-id](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mesh-sdp</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <b>mesh-sdp</b> <i>string</i> |
| Tree       | <a href="#">mesh-sdp</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[sdp-bind-id]** *string*

|               |   |
|---------------|---|
| Synopsis      | SDP binding ID  |
| Context       | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <b>mesh-sdp</b> <i>string</i> |
| Tree          | <a href="#">mesh-sdp</a>  |
| String Length | 3 to 16   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

### **accounting-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Policy to collect accounting statistics   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <b>mesh-sdp</b> <i>string</i> <b>accounting-policy</b> <i>reference</i> |
| Tree       | <a href="#">accounting-policy</a>   |
| Reference  | <b>configure</b> <a href="#">log</a> <b>accounting-policy</b> <i>number</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **admin-state** *keyword*

|          |  |
|----------|--|
| Synopsis | Administrative state of the SDP binding to the service |
|----------|--|

---

|            |  |
|------------|--|
| Context    | <b>configure service vpls string mesh-sdp string admin-state keyword</b> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **bfd**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bfd</b> context                             |
| Context    | <b>configure service vpls string mesh-sdp string bfd</b> |
| Tree       | <b>bfd</b>   |
| Introduced | 21.2.R1  |
| Platforms  | All  |

## **bfd-liveness**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>bfd-liveness</b> context                                |
| Context    | <b>configure service vpls string mesh-sdp string bfd bfd-liveness</b> |
| Tree       | <b>bfd-liveness</b>   |
| Introduced | 21.2.R1   |
| Platforms  | All   |

## **encap keyword**

|            |   |
|------------|---|
| Synopsis   | BFD encapsulation used on the SDP binding   |
| Context    | <b>configure service vpls string mesh-sdp string bfd bfd-liveness encap keyword</b> |
| Tree       | <b>encap</b>  |
| Options    | ipv4  |
| Default    | ipv4  |
| Introduced | 21.2.R1   |
| Platforms  | All   |

**bfd-template** *reference*

|             |   |
|-------------|---|
| Synopsis    | BFD template associated with the SDP binding  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">bfd bfd-template</a> <i>reference</i>  |
| Tree        | <a href="#">bfd-template</a>  |
| Description | This command configures a named BFD template to be used by VCCV BFD on PWs belonging to the VLL service. The template specifies parameters, such as the minimum transmit and receive control packet timer intervals, used by the BFD session. Template parameters are configured under the <b>configure router bfd</b> context. |
| Reference   | <b>configure</b> <a href="#">bfd bfd-template</a> <i>string</i>   |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

**collect-stats** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow agent to collect accounting statistics  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">collect-stats</a> <i>boolean</i> |
| Tree       | <a href="#">collect-stats</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**control-word** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use the control word as preferred  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">control-word</a> <i>boolean</i> |
| Tree       | <a href="#">control-word</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**cpu-protection**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cpu-protection</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">cpu-protection</a> |
| Tree       | <a href="#">cpu-protection</a>  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## eth-cfm-monitoring

Synopsis Enable the **eth-cfm-monitoring** context

Context **configure service vpls string mesh-sdp string cpu-protection eth-cfm-monitoring**

Tree [eth-cfm-monitoring](#)

Notes The following elements are part of a choice: **eth-cfm-monitoring** or **mac-monitoring**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## aggregate

Synopsis Apply rate limit to the sum of the per peer packet rates

Context **configure service vpls string mesh-sdp string cpu-protection eth-cfm-monitoring aggregate**

Tree [aggregate](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## car

Synopsis Ignore Ethernet CFM packets when enforcing overall rate

Context **configure service vpls string mesh-sdp string cpu-protection eth-cfm-monitoring car**

Tree [car](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## mac-monitoring

Synopsis Monitor MAC for CPU protection

Context **configure service vpls string mesh-sdp string cpu-protection mac-monitoring**

Tree [mac-monitoring](#)

Notes The following elements are part of a choice: **eth-cfm-monitoring** or **mac-monitoring**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS

## collect-lmm-fc-stats

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>collect-lmm-fc-stats</b> context  |
| Context     | <b>configure</b> <a href="#">service vpls string mesh-sdp string eth-cfm collect-lmm-fc-stats</a>  |
| Tree        | <a href="#">collect-lmm-fc-stats</a>   |
| Description | <p>Commands in this context configure per forwarding class (FC) LMM information collection.</p> <p>The commands <b>fc-in-profile</b> and <b>fc</b> in this context are mutually exclusive. The commands apply to either profile-aware or profile-unaware FCs respectively.</p> <p>This command and the <b>collect-lmm-stats</b> command are mutually exclusive when there is entity resource contention.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**fc keyword**

|                |   |
|----------------|---|
| Synopsis       | Forwarding class name for profile-unaware counter   |
| Context        | <b>configure service vpls string mesh-sdp string eth-cfm collect-lmm-fc-stats fc keyword</b>  |
| Tree           | <b>fc</b>   |
| Description    | <p>This command configures individual counters for the specified FCs without regard for profile. The system includes all countable packets that match a configured FC, regardless of profile, in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-aware FC using the <b>fc-in-profile</b> command under the <b>collect-lmm-fc-stats</b> context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options        | be, l2, af, l1, h2, ef, h1, nc  |
| Max. Instances | 8   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**fc-in-profile keyword**

|                |   |
|----------------|---|
| Synopsis       | Forwarding class name for profile-aware counter   |
| Context        | <b>configure service vpls string mesh-sdp string eth-cfm collect-lmm-fc-stats fc-in-profile keyword</b>   |
| Tree           | <b>fc-in-profile</b>  |
| Description    | <p>This command configures individual counters for the specified FCs with regard to profile. The system includes all countable packets that match a configured FC and that are deemed to be in-profile in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-unaware FC using the <b>fc</b> command under the <b>collect-lmm-fc-stats</b> context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options        | be, l2, af, l1, h2, ef, h1, nc  |

|------------|---|
| Synopsis   | Priority of CCM and LTM messages transmitted by the MEP   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>ccm-ltm-priority</b> <i>number</i> |
| Tree       | <a href="#">ccm-ltm-priority</a>  |
| Range      | 0 to 7  |
| Default    | 7   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**ccm-padding-size** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of octets of padding to insert in CCM packets  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>ccm-padding-size</b> <i>number</i>   |
| Tree        | <a href="#">ccm-padding-size</a>  |
| Description | This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.<br><br>This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through <b>configure eth-cfm domain association ccm-interval</b> ) is less than 1 second. |
| Range       | 3 to 1500   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**cfm-vlan-tag** *string*

|               |   |
|---------------|---|
| Synopsis      | VLAN tags to apply to CFM PDUs for egress processing  |
| Context       | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>cfm-vlan-tag</b> <i>string</i> |
| Tree          | <a href="#">cfm-vlan-tag</a>  |
| String Length | 1 to 9  |
| Introduced    | 21.10.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**csf**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>csf</b> context  |
| Context    | <b>configure service vpls</b> <i>string</i> <b>mesh-sdp</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>csf</b> |
| Tree       | <b>csf</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**multiplier** *decimal-number*

|            |   |
|------------|---|
| Synopsis   | Multiplication factor used to clear the CSF condition   |
| Context    | <b>configure service vpls</b> <i>string</i> <b>mesh-sdp</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>csf multiplier</b> <i>decimal-number</i> |
| Tree       | <b>multiplier</b>   |
| Range      | 0.0   2.0 to 30.0   |
| Default    | 3.5   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure service vpls</b> <i>string</i> <b>mesh-sdp</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>description</b> <i>string</i> |
| Tree          | <b>description</b>   |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**direction** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |                         |
|----------|-------------------------|
| Synopsis | Direction the MEP faces |
|----------|-------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number direction keyword</b> |
| Tree       | <a href="#">direction</a>  |
| Options    | down, up   |
| Default    | down   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## eth-test

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>eth-test</b> context  |
| Context     | <b>configure service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test</b>   |
| Tree        | <a href="#">eth-test</a>  |
| Description | Commands in this context configure information used by the Ethernet Test (ETH-TST) packet. The commands must be configured on both the sender and the receiver nodes. The test packets are used with the <b>oam eth-cfm eth-test</b> command. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## bit-error-threshold *number*

|            |  |
|------------|--|
| Synopsis   | Lowest priority defect allowed to generate fault alarm   |
| Context    | <b>configure service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test bit-error-threshold number</b> |
| Tree       | <a href="#">bit-error-threshold</a>  |
| Range      | 0 to 11840   |
| Units      | bit errors   |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## test-pattern

|          |  |
|----------|--|
| Synopsis | Enter the <b>test-pattern</b> context  |
| Context  | <b>configure service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test test-pattern</b> |

|             |  |
|-------------|--|
| Tree        | <a href="#">test-pattern</a>   |
| Description | Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **crc-tlv** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate a CRC checksum  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">mesh-sdp</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">eth-test</a> <a href="#">test-pattern</a> <b>crc-tlv</b> <i>boolean</i> |
| Tree       | <a href="#">crc-tlv</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **pattern** *keyword*

|             |  |
|-------------|--|
| Synopsis    | Test pattern for Ethernet Test frames  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">mesh-sdp</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">eth-test</a> <a href="#">test-pattern</a> <b>pattern</b> <i>keyword</i> |
| Tree        | <a href="#">pattern</a>  |
| Description | This command specifies the test pattern of the Ethernet Test (ETH-TST) frames. This does not have to be configured the same on the sender and the receiver.  |
| Options     | all-zeros, all-ones  |
| Default     | all-zeros  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **fault-propagation** *keyword*

|          |  |
|----------|--|
| Synopsis | Fault propagation for the MEP  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">mesh-sdp</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <b>fault-propagation</b> <i>keyword</i> |
| Tree     | <a href="#">fault-propagation</a>  |
| Options  | use-if-status-tlv, suspend-ccm   |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

## grace

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>grace</b> context  |
| Context     | <b>configure</b> <a href="#">service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number</a> <b>grace</b> |
| Tree        | <a href="#">grace</a>   |
| Description | Commands in this context configure the Nokia ETH-CFM Grace function and the ITU-T Y.1731 Ethernet Expected Default (ETH-ED) function.                       |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## eth-ed

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>eth-ed</b> context  |
| Context     | <b>configure</b> <a href="#">service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number</a> <b>grace eth-ed</b> |
| Tree        | <a href="#">eth-ed</a>   |
| Description | Commands in this context configure the ITU-T Y.1731 ETH-ED function.   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## max-rx-defect-window *number*

|            |   |
|------------|---|
| Synopsis   | Maximum received ETH-ED expected defect window duration   |
| Context    | <b>configure</b> <a href="#">service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number</a> <b>grace eth-ed max-rx-defect-window</b> <i>number</i> |
| Tree       | <a href="#">max-rx-defect-window</a>  |
| Range      | 1 to 86400  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**priority number**

|            |   |
|------------|---|
| Synopsis   | Transmission priority for ETH-ED PDUs   |
| Context    | <b>configure service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed priority number</b> |
| Tree       | <a href="#">priority</a>  |
| Range      | 0 to 7  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**rx-eth-ed boolean**

|             |   |
|-------------|---|
| Synopsis    | Receive and process ETH-ED ITU-T Y.1731 PDUs on the MEP   |
| Context     | <b>configure service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed rx-eth-ed boolean</b> |
| Tree        | <a href="#">rx-eth-ed</a>   |
| Description | This command enables the reception and processing of the ITU-T Y.1731 ETH-ED PDU on the MEP.  |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**tx-eth-ed boolean**

|            |   |
|------------|---|
| Synopsis   | Transmit ETH-ED PDUs from the MEP   |
| Context    | <b>configure service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed tx-eth-ed boolean</b> |
| Tree       | <a href="#">tx-eth-ed</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**eth-vsm-grace**

|          |  |
|----------|--|
| Synopsis | Enter the <b>eth-vsm-grace</b> context   |
| Context  | <b>configure service vpls string mesh-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-vsm-grace</b> |

|             |  |
|-------------|--|
| Tree        | <a href="#">eth-vsm-grace</a>  |
| Description | Commands in this context configure the Nokia ETH-CFM Grace function. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS         |

### **rx-eth-vsm-grace** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Receive and process Nokia ETH-CFM Grace PDU on the MEP  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-vsm-grace rx-eth-vsm-grace</a> <i>boolean</i> |
| Tree        | <a href="#">rx-eth-vsm-grace</a>  |
| Description | When configured to <b>true</b> , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>When configured to <b>false</b> , the router disables the Nokia Grace function.                           |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **tx-eth-vsm-grace** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Transmit ETH-ED PDUs from the MEP  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-vsm-grace tx-eth-vsm-grace</a> <i>boolean</i>  |
| Tree        | <a href="#">tx-eth-vsm-grace</a>   |
| Description | When configured to <b>true</b> , the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.<br><br>The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>The operator must configure the <b>configure system eth-cfm grace</b> command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).<br><br>When configured to <b>false</b> , the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP. |
| Default     | true   |
| Introduced  | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **lbm-svc-act-responder** *boolean*

Synopsis Process service activation streams in ETH-CFM LBM

Context **configure** [service](#) [vpls](#) [string](#) [mesh-sdp](#) [string](#) [eth-cfm](#) [mep](#) [md-admin-name](#) [reference](#) [ma-admin-name](#) [reference](#) [mep-id](#) [number](#) **lbm-svc-act-responder** *boolean*

Tree [lbm-svc-act-responder](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **low-priority-defect** *keyword*

Synopsis Lowest priority defect allowed to generate fault alarm

Context **configure** [service](#) [vpls](#) [string](#) [mesh-sdp](#) [string](#) [eth-cfm](#) [mep](#) [md-admin-name](#) [reference](#) [ma-admin-name](#) [reference](#) [mep-id](#) [number](#) **low-priority-defect** *keyword*

Tree [low-priority-defect](#)

Options all-def, mac-rem-err-xcon, rem-err-xcon, err-xcon, xcon, no-xcon

Default mac-rem-err-xcon

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mac-address** *string*

Synopsis MAC address of the MEP

Context **configure** [service](#) [vpls](#) [string](#) [mesh-sdp](#) [string](#) [eth-cfm](#) [mep](#) [md-admin-name](#) [reference](#) [ma-admin-name](#) [reference](#) [mep-id](#) [number](#) **mac-address** *string*

Tree [mac-address](#)

Description This command specifies the MAC address of the MEP.  
When unconfigured, the MAC address of the port (if the MEP is on a SAP) or the MAC address of a bridge (if the MEP is on a spoke) is used.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**one-way-delay-threshold** *number*

|            |  |
|------------|--|
| Synopsis   | Threshold time limit for the one-way delay test  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>one-way-delay-threshold</b> <i>number</i> |
| Tree       | <a href="#">one-way-delay-threshold</a>  |
| Range      | 0 to 600   |
| Units      | seconds  |
| Default    | 3  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**primary-vlan** *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | MEP provisioned using MA primary VLAN ID   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>primary-vlan</b> <i>boolean</i> |

|               |  |
|---------------|--|
| Synopsis      | VLAN tags to apply to CFM PDUs for egress processing   |
| Context       | <b>configure service vpls string mesh-sdp string eth-cfm mip primary-vlan</b> ( <i>number   keyword</i> ) <b>cfm-vlan-tag string</b>   |
| Tree          | <a href="#">cfm-vlan-tag</a>   |
| Description   | This command allows the CFM function to include additional VLAN tags to the CFM packet that are carried to the egress and treated as service delimited. Typically, this function is used to influence the VLAN carried over a binding that uses the vc-type vlan or the binding forces the use of one or more VLAN tag that results in a mismatch between the service data arriving at the binding and the locally generated ETH-CFM PDUs arriving at the same egress. When this command is included under the MEP or MIP configuration, the tags used as part of the configuration typically match the SAP service delimited configuration. |
| String Length | 1 to 9   |
| Introduced    | 21.10.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **mac-address string**

|            |   |
|------------|---|
| Synopsis   | MAC address of the MIP  |
| Context    | <b>configure service vpls string mesh-sdp string eth-cfm mip primary-vlan</b> ( <i>number   keyword</i> ) <b>mac-address string</b> |
| Tree       | <a href="#">mac-address</a>   |
| Introduced | 21.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**squelch-ingress-ctag-levels** *number*

|                |   |
|----------------|---|
| Synopsis       | Squelch levels using additional VLAN C-Tag space  |
| Context        | <b>configure</b> <a href="#">service vpls string</a> <a href="#">mesh-sdp string</a> <a href="#">eth-cfm</a> <a href="#">squelch-ingress-ctag-levels</a> <i>number</i>  |
| Tree           | <a href="#">squelch-ingress-ctag-levels</a>   |
| Description    | <p>This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding plus an additional VLAN, up to a maximum tag length of two tags. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.</p> <p>The list of levels must be a complete contiguous list from 0 up to the highest level to be dropped.</p> |
| Range          | 0 to 7  |
| Max. Instances | 8   |
| Introduced     | 21.2.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ingress</b> context                             |
| Context    | <b>configure service vpls string mesh-sdp string ingress</b> |
| Tree       | <a href="#">ingress</a>                                      |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## filter

|            |   |
|------------|---|
| Synopsis   | Enter the <b>filter</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress filter</a> |
| Tree       | <a href="#">filter</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ip reference

|            |  |
|------------|--|
| Synopsis   | IPv4 filter policy name  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress filter</a> <a href="#">ip reference</a> |
| Tree       | <a href="#">ip</a>   |
| Reference  | <b>configure</b> <a href="#">filter ip-filter</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ipv6 reference

|            |  |
|------------|--|
| Synopsis   | IPv6 filter policy name  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress filter</a> <a href="#">ipv6 reference</a> |
| Tree       | <a href="#">ipv6</a>   |
| Reference  | <b>configure</b> <a href="#">filter ipv6-filter</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## mac reference

|            |   |
|------------|---|
| Synopsis   | MAC filter policy name  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress filter</a> <a href="#">mac reference</a> |
| Tree       | <a href="#">mac</a>   |
| Reference  | <b>configure</b> <a href="#">filter mac-filter</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**qos**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress qos</a> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**network**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>network</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress qos network</a> |
| Tree       | <a href="#">network</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**fp-redirect-group**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>fp-redirect-group</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress qos network fp-redirect-group</a> |
| Tree       | <a href="#">fp-redirect-group</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**group-name** *reference*

|            |   |
|------------|---|
| Synopsis   | Name of the forwarding plane queue group template   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress qos network fp-redirect-group</a><br><a href="#">group-name</a> <i>reference</i> |
| Tree       | <a href="#">group-name</a>  |
| Reference  | <b>configure</b> <a href="#">qos queue-group-templates</a> <a href="#">ingress queue-group</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**instance number**

|            |   |
|------------|---|
| Synopsis   | Instance of FP ingress queue group for the SDP binding  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress qos</a> <a href="#">network fp-redirect-group</a> <i>instance number</i> |
| Tree       | <a href="#">instance</a>  |
| Range      | 1 to 65535  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**policy-name reference**

|            |   |
|------------|---|
| Synopsis   | Network policy ID   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress qos</a> <a href="#">network policy-name</a> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>   |
| Reference  | <b>configure</b> <a href="#">qos network</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**vc-label number****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Ingress MPLS VC label to send packets to the far end  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">ingress vc-label</a> <i>number</i> |
| Tree       | <a href="#">vc-label</a>  |
| Range      | 1 to 1048575  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**mld-snooping**

|          |   |
|----------|---|
| Synopsis | Enter the <b>mld-snooping</b> context   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mld-snooping</a> |

|            |                              |
|------------|------------------------------|
| Tree       | <a href="#">mld-snooping</a> |
| Introduced | 16.0.R1                      |
| Platforms  | All                          |

**fast-leave** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow IGMP fast leave processing   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <b>fast-leave</b> <i>boolean</i> |
| Tree       | <a href="#">fast-leave</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**import-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Import policy that filters IGMP packets   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <b>import-policy</b> <i>reference</i> |
| Tree       | <a href="#">import-policy</a>   |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**maximum-number-groups** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum groups allowed   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <b>maximum-number-groups</b> <i>number</i> |
| Tree       | <a href="#">maximum-number-groups</a>  |
| Range      | 1 to 16000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**mrouter-port** *boolean*

|          |   |
|----------|---|
| Synopsis | Operate port as a multicast router port |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vpls string mesh-sdp string mld-snooping mrouter-port boolean</b> |
| Tree       | <a href="#">mrouter-port</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **query-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time between two consecutive host-query messages  |
| Context    | <b>configure service vpls string mesh-sdp string mld-snooping query-interval number</b> |
| Tree       | <a href="#">query-interval</a>  |
| Range      | 2 to 1024   |
| Units      | seconds   |
| Default    | 125   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **query-last-member-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time between group-specific query messages  |
| Context    | <b>configure service vpls string mesh-sdp string mld-snooping query-last-member-interval number</b> |
| Tree       | <a href="#">query-last-member-interval</a>  |
| Range      | 1 to 50   |
| Units      | deciseconds   |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **query-response-interval** *number*

|          |  |
|----------|--|
| Synopsis | Time to wait for a response to the host-query messages   |
| Context  | <b>configure service vpls string mesh-sdp string mld-snooping query-response-interval number</b> |
| Tree     | <a href="#">query-response-interval</a>  |
| Range    | 1 to 1023  |

---

|            |         |
|------------|---------|
| Units      | seconds |
| Default    | 10      |
| Introduced | 16.0.R1 |
| Platforms  | All     |

**robust-count** *number*

|            |   |
|------------|---|
| Synopsis   | Number of retries after expected message loss   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <b>robust-count</b> <i>number</i> |
| Tree       | <a href="#">robust-count</a>  |
| Range      | 2 to 7  |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**router-alert-check** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable IP router alert check option  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <b>router-alert-check</b> <i>boolean</i> |
| Tree       | <a href="#">router-alert-check</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**send-queries** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate IGMP general queries  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <b>send-queries</b> <i>boolean</i> |
| Tree       | <a href="#">send-queries</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**static**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>static</b> context  |
| Context    | <b>configure service vpls string mesh-sdp string mld-snooping static</b> |
| Tree       | <b>static</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**group [group-address] string**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>group</b> list instance  |
| Context    | <b>configure service vpls string mesh-sdp string mld-snooping static group string</b> |
| Tree       | <b>group</b>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[group-address] string**

|            |   |
|------------|---|
| Synopsis   | Group address of multicast channel  |
| Context    | <b>configure service vpls string mesh-sdp string mld-snooping static group string</b> |
| Tree       | <b>group</b>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**source [source-address] string**

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>source</b>  |
| Context    | <b>configure service vpls string mesh-sdp string mld-snooping static group string source string</b> |
| Tree       | <b>source</b>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .              |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[source-address]** *string*

|            |   |
|------------|---|
| Synopsis   | Source IP address   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mld-snooping static group</a> <i>string</i> <a href="#">source</a> <i>string</i> |
| Tree       | <a href="#">source</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R2   |
| Platforms  | All   |

**starg**

|            |  |
|------------|--|
| Synopsis   | any source address (*,G)   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mld-snooping static group</a> <i>string</i> <a href="#">starg</a> |
| Tree       | <a href="#">starg</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .   |
| Introduced | 16.0.R2  |
| Platforms  | All  |

**version** *keyword*

|            |  |
|------------|--|
| Synopsis   | Version of MLD running on the SAP or SDP   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mld-snooping version</a> <i>keyword</i> |
| Tree       | <a href="#">version</a>  |
| Options    | 1, 2   |
| Default    | 2  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**mrp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mrp</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mrp</a> |
| Tree       | <a href="#">mrp</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### **join-time** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum rate for attribute join messages sent on SDP   |
| Context    | <b>configure</b> <b>service vpls</b> <i>string</i> <b>mesh-sdp</b> <i>string</i> <b>mrp</b> <b>join-time</b> <i>number</i> |
| Tree       | <a href="#">join-time</a>  |
| Range      | 1 to 10  |
| Units      | deciseconds  |
| Default    | 2  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### **leave-all-time** *number*

|            |   |
|------------|---|
| Synopsis   | Frequency of LeaveAll PDUs by LeaveAll state machine  |
| Context    | <b>configure</b> <b>service vpls</b> <i>string</i> <b>mesh-sdp</b> <i>string</i> <b>mrp</b> <b>leave-all-time</b> <i>number</i> |
| Tree       | <a href="#">leave-all-time</a>  |
| Range      | 60 to 300   |
| Units      | deciseconds   |
| Default    | 100   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

### **leave-time** *number*

|            |   |
|------------|---|
| Synopsis   | Time in LV state before transition to MT state  |
| Context    | <b>configure</b> <b>service vpls</b> <i>string</i> <b>mesh-sdp</b> <i>string</i> <b>mrp</b> <b>leave-time</b> <i>number</i> |
| Tree       | <a href="#">leave-time</a>  |
| Range      | 30 to 60  |
| Units      | deciseconds   |
| Default    | 30  |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**periodic-time** *number*

|            |   |
|------------|---|
| Synopsis   | Frequency of periodic events generated by state machine   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mrp</a> <b>periodic-time</b> <i>number</i> |
| Tree       | <a href="#">periodic-time</a>   |
| Range      | 10 to 100   |
| Units      | deciseconds   |
| Default    | 10  |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**periodic-timer** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable the Periodic Transmission Timer  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mrp</a> <b>periodic-timer</b> <i>boolean</i> |
| Tree       | <a href="#">periodic-timer</a>  |
| Default    | false   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**policy** *reference*

|            |   |
|------------|---|
| Synopsis   | MRP policy to control Group B-MAC attributes  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">mrp</a> <b>policy</b> <i>reference</i> |
| Tree       | <a href="#">policy</a>  |
| Reference  | <b>configure</b> <a href="#">service mrp</a> <b>policy</b> <i>string</i>  |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**pbb**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pbb</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <b>pbb</b> |
| Tree       | <a href="#">pbb</a>   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

## fault-propagation

|            |  |
|------------|--|
| Synopsis   | Enter the <b>fault-propagation</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">pbb</a> <a href="#">fault-propagation</a> |
| Tree       | <a href="#">fault-propagation</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## backbone-mac-address [[address](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>backbone-mac-address</b>  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">pbb</a> <a href="#">fault-propagation</a> <a href="#">backbone-mac-address</a> <i>string</i> |
| Tree       | <a href="#">backbone-mac-address</a>  |
| Introduced | 20.10.R1  |
| Platforms  | All   |

## [[address](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Backbone MAC address  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">pbb</a> <a href="#">fault-propagation</a> <a href="#">backbone-mac-address</a> <i>string</i> |
| Tree       | <a href="#">backbone-mac-address</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

## backbone-mac-name [[name](#)] *reference*

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>backbone-mac-name</b>   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mesh-sdp</a> <i>string</i> <a href="#">pbb</a> <a href="#">fault-propagation</a> <a href="#">backbone-mac-name</a> <i>reference</i> |
| Tree       | <a href="#">backbone-mac-name</a>   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**[name]** *reference*

|            |  |
|------------|--|
| Synopsis   | Backbone MAC address name  |
| Context    | <b>configure</b> <a href="#">service vpls string mesh-sdp string pbb fault-propagation backbone-mac-name reference</a> |
| Tree       | <a href="#">backbone-mac-name</a>  |
| Reference  | <b>configure</b> <a href="#">service pbb mac string</a>  |
| Notes      | This element is part of a list key.  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**vc-type** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Type of virtual circuit (VC) associated with the SDP binding; VPLS not supported     |
| Context    | <b>configure</b> <a href="#">service vpls string mesh-sdp string vc-type keyword</a> |
| Tree       | <a href="#">vc-type</a>  |
| Options    | ether, vlan  |
| Default    | ether  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**vlan-vc-tag** *number*

|            |   |
|------------|---|
| Synopsis   | SDP bind VC tag   |
| Context    | <b>configure</b> <a href="#">service vpls string mesh-sdp string vlan-vc-tag number</a> |
| Tree       | <a href="#">vlan-vc-tag</a>   |
| Range      | 0 to 4094   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **mfib**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mfib</b> context             |
| Context    | <b>configure service vpls string mfib</b> |
| Tree       | <a href="#">mfib</a>                      |
| Introduced | 16.0.R1                                   |
| Platforms  | All                                       |

## **table**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>table</b> context                  |
| Context    | <b>configure service vpls string mfib table</b> |
| Tree       | <a href="#">table</a>                           |
| Introduced | 16.0.R1   |

## **high-wmark** *number*

|            |   |
|------------|---|
| Synopsis   | High watermark for the MFIB table                                 |
| Context    | <b>configure service vpls string mfib table high-wmark number</b> |
| Tree       | <a href="#">high-wmark</a>  |
| Range      | 0 to 100  |
| Default    | 95  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **low-wmark** *number*

|            |  |
|------------|--|
| Synopsis   | Low watermark for the MFIB table                                 |
| Context    | <b>configure service vpls string mfib table low-wmark number</b> |
| Tree       | <a href="#">low-wmark</a>  |
| Range      | 0 to 100   |
| Default    | 90   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **size number**

|            |   |
|------------|---|
| Synopsis   | Maximum SG entries in the MFIB                              |
| Context    | <b>configure service vpls string mfib table size number</b> |
| Tree       | <a href="#">size</a>  |
| Range      | 1 to 40959  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mld-snooping**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mld-snooping</b> context             |
| Context    | <b>configure service vpls string mld-snooping</b> |
| Tree       | <a href="#">mld-snooping</a>                      |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **admin-state keyword**

|            |   |
|------------|---|
| Synopsis   | Administrative state of snooping                                      |
| Context    | <b>configure service vpls string mld-snooping admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **evpn-proxy**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>evpn-proxy</b> context                          |
| Context    | <b>configure service vpls string mld-snooping evpn-proxy</b> |
| Tree       | <a href="#">evpn-proxy</a>                                   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of EVPN proxy  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">evpn-proxy</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**mvr**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mvr</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mld-snooping</a> <b>mvr</b> |
| Tree       | <a href="#">mvr</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of MVR   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mld-snooping</a> <b>mvr</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">mld-snooping</a> <b>mvr</b> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |

Platforms All

### **group-policy** *string*

Synopsis Policy that applies MVR  
 Context **configure** [service](#) [vpls](#) *string* [mld-snooping](#) [mvr](#) [group-policy](#) *string*  
 Tree [group-policy](#)  
 String Length 1 to 32  
 Introduced 16.0.R1  
 Platforms All

### **query-interval** *number*

Synopsis Time between two consecutive host-query messages  
 Context **configure** [service](#) [vpls](#) *string* [mld-snooping](#) [query-interval](#) *number*  
 Tree [query-interval](#)  
 Range 1 to 65535  
 Units seconds  
 Default 125  
 Introduced 16.0.R1  
 Platforms All

### **query-source-address** (*keyword* | *ipv6-address*)

Synopsis Source IP address used in MLD queries  
 Context **configure** [service](#) [vpls](#) *string* [mld-snooping](#) [query-source-address](#) (*keyword* | *ipv6-address*)  
 Tree [query-source-address](#)  
 Options system  
 Default system  
 Introduced 16.0.R1  
 Platforms All

### **report-source-address** *string*

Synopsis Source IP address used when generating MLD reports

---

|            |  |
|------------|--|
| Context    | <b>configure service vpls string mld-snooping report-source-address string</b> |
| Tree       | <b>report-source-address</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**robust-count** *number*

|            |   |
|------------|---|
| Synopsis   | Number of retries after expected message loss                         |
| Context    | <b>configure service vpls string mld-snooping robust-count number</b> |
| Tree       | <b>robust-count</b>   |
| Range      | 1 to 255  |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**mrp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mrp</b> context             |
| Context    | <b>configure service vpls string mrp</b> |
| Tree       | <b>mrp</b>                               |
| Introduced | 20.10.R1                                 |
| Platforms  | All                                      |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of MRP                                  |
| Context    | <b>configure service vpls string mrp admin-state keyword</b> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## mmp

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mmp</b> context                 |
| Context    | <b>configure service vpls string mmp mmp</b> |
| Tree       | <a href="#">mmp</a>                          |
| Introduced | 20.10.R1                                     |
| Platforms  | All  |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of MMRP                                     |
| Context    | <b>configure service vpls string mmp mmp admin-state keyword</b> |
| Tree       | <a href="#">admin-state</a>                                      |
| Options    | enable, disable  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## attribute-table

|            |  |
|------------|--|
| Synopsis   | Enter the <b>attribute-table</b> context                     |
| Context    | <b>configure service vpls string mmp mmp attribute-table</b> |
| Tree       | <a href="#">attribute-table</a>                              |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## high-wmark *number*

|            |  |
|------------|--|
| Synopsis   | High watermark for the MMRP attribute table                                    |
| Context    | <b>configure service vpls string mmp mmp attribute-table high-wmark number</b> |
| Tree       | <a href="#">high-wmark</a>   |
| Range      | 0 to 100   |
| Default    | 95   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**low-wmark** *number*

|            |  |
|------------|--|
| Synopsis   | Low watermark for the MMRP attribute table   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mrp mmrp attribute-table</a> <a href="#">low-wmark</a> <i>number</i> |
| Tree       | <a href="#">low-wmark</a>  |
| Range      | 0 to 100   |
| Default    | 90   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**size** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of attributes accepted by B-VPLS   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mrp mmrp attribute-table</a> <a href="#">size</a> <i>number</i> |
| Tree       | <a href="#">size</a>  |
| Range      | 1 to 8192   |
| Default    | 2048  |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**end-station-only** *boolean*

|            |  |
|------------|--|
| Synopsis   | Prevent generation or processing of MMRP messages  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mrp mmrp</a> <a href="#">end-station-only</a> <i>boolean</i> |
| Tree       | <a href="#">end-station-only</a>   |
| Default    | false  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**flood-time** *number*

|            |   |
|------------|---|
| Synopsis   | Time when traffic is flooded after status change  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">mrp mmrp</a> <a href="#">flood-time</a> <i>number</i> |
| Tree       | <a href="#">flood-time</a>  |
| Range      | 3 to 600  |
| Introduced | 20.10.R1  |

Platforms All

### **multicast-info-policy** *reference*

Synopsis Multicast information policy  
 Context **configure** [service vpls string multicast-info-policy reference](#)  
 Tree [multicast-info-policy](#)

|            |  |
|------------|--|
| Synopsis   | Operate port as a multicast router port  |
| Context    | <b>configure</b> <a href="#">service vpls string pbb backbone-vpls reference sap reference mld-snooping mrouter-port boolean</a> |
| Tree       | <a href="#">mrouter-port</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## spoke-sdp [[sdp-bind-id](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>spoke-sdp</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vpls string pbb backbone-vpls reference spoke-sdp reference</a> |
| Tree       | <a href="#">spoke-sdp</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## [[sdp-bind-id](#)] *reference*

|          |  |
|----------|--|
| Synopsis | Backbone VPLS SDP Binding ID   |
| Context  | <b>configure</b> <a href="#">service vpls string pbb backbone-vpls reference spoke-sdp reference</a> |
| Tree     | <a href="#">spoke-sdp</a>  |

|            |   |
|------------|---|
| Reference  | <b>configure</b> <a href="#">service vpls string spoke-sdp string</a> |
| Notes      | This element is part of a list key.                                   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## igmp-snooping

|            |  |
|------------|--|
| Synopsis   | Enter the <b>igmp-snooping</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string pbb backbone-vpls reference spoke-sdp reference igmp-snooping</a> |
| Tree       | <a href="#">igmp-snooping</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## mrouter-port *boolean*

|            |   |
|------------|---|
| Synopsis   | Operate port as a multicast router port   |
| Context    | <b>configure</b> <a href="#">service vpls string pbb backbone-vpls reference spoke-sdp reference igmp-snooping mrouter-port boolean</a> |
| Tree       | <a href="#">mrouter-port</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## mld-snooping

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mld-snooping</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string pbb backbone-vpls reference spoke-sdp reference mld-snooping</a> |
| Tree       | <a href="#">mld-snooping</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## mrouter-port *boolean*

|          |   |
|----------|---|
| Synopsis | Operate port as a multicast router port |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vpls string pbb backbone-vpls reference spoke-sdp reference mld-snooping mrouter-port boolean</b> |
| Tree       | <a href="#">mrouter-port</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **force-qtag-forwarding boolean**

|            |  |
|------------|--|
| Synopsis   | Add an IEEE 802.1q tag after C-MAC addresses PBB header                |
| Context    | <b>configure service vpls string pbb force-qtag-forwarding boolean</b> |
| Tree       | <a href="#">force-qtag-forwarding</a>                                  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **i-vpls-mac-flush**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>i-vpls-mac-flush</b> context                 |
| Context    | <b>configure service vpls string pbb i-vpls-mac-flush</b> |
| Tree       | <a href="#">i-vpls-mac-flush</a>                          |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **bgp-evpn**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bgp-evpn</b> context                                  |
| Context    | <b>configure service vpls string pbb i-vpls-mac-flush bgp-evpn</b> |
| Tree       | <a href="#">bgp-evpn</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **send-to-bvpls boolean**

|          |  |
|----------|--|
| Synopsis | Send b-VPLS EVPN flush   |
| Context  | <b>configure service vpls string pbb i-vpls-mac-flush bgp-evpn send-to-bvpls boolean</b> |

|            |                               |
|------------|-------------------------------|
| Tree       | <a href="#">send-to-bvpls</a> |
| Default    | false                         |
| Introduced | 16.0.R1                       |
| Platforms  | All                           |

## tldp

|            |  |
|------------|--|
| Synopsis   | Enter the <b>tldp</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string pbb i-vpls-mac-flush tldp</a> |
| Tree       | <a href="#">tldp</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## propagate-from-bvpls *boolean*

|            |   |
|------------|---|
| Synopsis   | Propagate MAC flush message from B-VPLS into local I-VPLS   |
| Context    | <b>configure</b> <a href="#">service vpls string pbb i-vpls-mac-flush tldp propagate-from-bvpls boolean</a> |
| Tree       | <a href="#">propagate-from-bvpls</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## send-on-bvpls-failure *boolean*

|            |  |
|------------|--|
| Synopsis   | Send negative flush message (flush-all-from-me) on B-VPLS failure  |
| Context    | <b>configure</b> <a href="#">service vpls string pbb i-vpls-mac-flush tldp send-on-bvpls-failure boolean</a> |
| Tree       | <a href="#">send-on-bvpls-failure</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## send-to-bvpls

|          |  |
|----------|--|
| Synopsis | Enter the <b>send-to-bvpls</b> context   |
| Context  | <b>configure</b> <a href="#">service vpls string pbb i-vpls-mac-flush tldp send-to-bvpls</a> |

|            |                               |
|------------|-------------------------------|
| Tree       | <a href="#">send-to-bvpls</a> |
| Introduced | 16.0.R1                       |
| Platforms  | All                           |

**all-but-mine** *boolean*

|            |   |
|------------|---|
| Synopsis   | Generate LDP MAC withdraw message to b-VPLS   |
| Context    | <b>configure</b> <a href="#">service vpls string pbb i-vpls-mac-flush tldp send-to-bvpls all-but-mine</a><br><i>boolean</i> |
| Tree       | <a href="#">all-but-mine</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**all-from-me** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate LDP MAC withdraw all from me message to b-VPLS  |
| Context    | <b>configure</b> <a href="#">service vpls string pbb i-vpls-mac-flush tldp send-to-bvpls all-from-me</a><br><i>boolean</i> |
| Tree       | <a href="#">all-from-me</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**mac-notification**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mac-notification</b> context                                 |
| Context    | <b>configure</b> <a href="#">service vpls string pbb mac-notification</a> |
| Tree       | <a href="#">mac-notification</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of MAC notification messages   |
| Context  | <b>configure</b> <a href="#">service vpls string pbb mac-notification admin-state keyword</a> |

|            |                             |
|------------|-----------------------------|
| Tree       | <a href="#">admin-state</a> |
| Options    | enable, disable             |
| Default    | disable                     |
| Introduced | 16.0.R1                     |
| Platforms  | All                         |

**count** *number*

|            |  |
|------------|--|
| Synopsis   | MAC notification messages count  |
| Context    | <b>configure</b> <a href="#">service vpls string pbb mac-notification count number</a> |
| Tree       | <a href="#">count</a>  |
| Range      | 1 to 10  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**interval** *number*

|            |   |
|------------|---|
| Synopsis   | Interval for MAC notification messages  |
| Context    | <b>configure</b> <a href="#">service vpls string pbb mac-notification interval number</a> |
| Tree       | <a href="#">interval</a>  |
| Range      | 1 to 100  |
| Units      | deciseconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**renotify** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Re-notify interval for MAC-notification messages  |
| Context    | <b>configure</b> <a href="#">service vpls string pbb mac-notification renotify (number   keyword)</a> |
| Tree       | <a href="#">renotify</a>  |
| Range      | 240 to 840  |
| Units      | seconds   |
| Options    | none  |
| Default    | none  |
| Introduced | 16.0.R1   |

Platforms All

### source-bmac

| Platforms  | All  |

## advertise-neighbor-type *keyword*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Advertisement type of static or dynamic entries in EVPN  |
| Context     | <b>configure</b> <a href="#">service vpls string proxy-nd evpn advertise-neighbor-type keyword</a>   |
| Tree        | <a href="#">advertise-neighbor-type</a>  |
| Description | <p>This command enables the advertisement of static or dynamic entries that are learned as host, router, or host and router (only one option is possible in a specified service). It also determines the R flag (host or router) when sending Neighbor Advertisement (NA) messages for existing EVPN entries in the proxy-ND table.</p> <p>The <b>router-host</b> command option is only possible when the ARP/ND extended community is advertised along with the MAC/IP routes. It determines that both host and router (dynamic and static) entries are advertised in MAC/IP routes, with an indication whether the entry is host or router in the R flag. These EVPN entries are installed as host or router entries depending on the R flag of the route, and NA messages for them are sent with the proper host or router indication.</p> |
| Options     | router, host   |
| Default     | router   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**flood**

| Synopsis   | Enter the <b>static-neighbor</b> context                                      |
| Context    | <b>configure</b> <a href="#">service vpls string proxy-nd static-neighbor</a> |
| Tree       | <a href="#">static-neighbor</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ip-address** [[ipv6-address](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ip-address</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vpls string proxy-nd static-neighbor ip-address string</a> |
| Tree       | <a href="#">ip-address</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[ipv6-address]** *string*

|            |   |
|------------|---|
| Synopsis   | Proxy ND IPv6 address   |
| Context    | <b>configure</b> <a href="#">service vpls string proxy-nd static-neighbor ip-address string</a> |
| Tree       | <a href="#">ip-address</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mac** *string*

|          |  |
|----------|--|
| Synopsis | Proxy ARP MAC address for static entry   |
| Context  | <b>configure</b> <a href="#">service vpls string proxy-nd static-neighbor ip-address string mac string</a> |
| Tree     | <a href="#">mac</a>  |
| Notes    | This element is mandatory.   |

Introduced 16.0.R1  
Platforms All

### **type** *keyword*

Synopsis Entry type  
Context **configure service vpls string proxy-nd static-neighbor ip-address string type keyword**  
Tree [type](#)  
Options host, router  
Default router  
Introduced 16.0.R1  
Platforms All

### **table-size** *number*

Synopsis Maximum number of learned and static entries allowed in the proxy table of this service  
Context **configure service vpls string proxy-nd table-size number**  
Tree [table-size](#)  
Range 1 to 16383  
Default 250  
Introduced 16.0.R1  
Platforms All

### **routed-vpls**

Synopsis Enable the **routed-vpls** context  
Context **configure service vpls string routed-vpls**  
Tree [routed-vpls](#)  
Introduced 16.0.R1  
Platforms All

### **evpn-mpls-ecmp** *boolean*

Synopsis Enable ECMP behavior on R-VPLS services  
Context **configure service vpls string routed-vpls evpn-mpls-ecmp boolean**

---

|            |                                |
|------------|--------------------------------|
| Tree       | <a href="#">evpn-mpls-ecmp</a> |
| Default    | false                          |

| Introduced | 21.10.R1   |
| Platforms  | All  |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the multicast EVPN gateway  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">routed-vpls</a> <a href="#">multicast</a> <a href="#">evpn-gateway</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 21.10.R1  |
| Platforms  | All   |

**advertise** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Type of the multicast EVPN gateway   |
| Context     | <b>configure service vpls string routed-vpls multicast evpn-gateway advertise</b> <i>keyword</i>                                 |
| Tree        | <a href="#">advertise</a>  |
| Description | This command configures EVPN OISM to advertise the type of OISM gateway function in the Inclusive Multicast Ethernet Tag routes. |
| Options     | mvpn-pim, mvpn-only, pim-only  |
| Default     | mvpn-pim   |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

**dr-activation-timer** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | DR activation timer for the EVPN gateway  |
| Context     | <b>configure service vpls string routed-vpls multicast evpn-gateway dr-activation-timer</b> <i>number</i>   |
| Tree        | <a href="#">dr-activation-timer</a>   |
| Description | <p>This command configures the the designated router (DR) activation timer for the EVPN gateway.</p> <p>After the DR activation timer expires, each provider edge router (PE) runs the MEG or PEG DR election. The timer allows the PE to collect Inclusive Multicast Ethernet Tag routes from other MEG or PEG gateways and avoids running the DR election multiple times.</p> |
| Range       | 0 to 100  |
| Units       | seconds   |
| Default     | 3   |
| Introduced  | 21.10.R1  |
| Platforms   | All   |

**non-dr-attract-traffic** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Multicast traffic attraction option on non-DR router GW  |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">routed-vpls multicast evpn-gateway non-dr-attract-traffic keyword</a> |
| Tree       | <a href="#">non-dr-attract-traffic</a>   |
| Options    | none, from-evpn, from-pim-mvpn, from-evpn-pim-mvpn   |
| Default    | from-pim-mvpn  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

**ip-multicast-ecmp** *boolean*

|            |  |
|------------|--|
| Synopsis   | ECMP behaviour for multicast traffic on bgp-evpn mpls and vxlan  |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">routed-vpls multicast ip-multicast-ecmp boolean</a> |
| Tree       | <a href="#">ip-multicast-ecmp</a>  |
| Default    | false  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

**ipv4**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv4</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">routed-vpls multicast ipv4</a> |

 Platforms All

## mrouter-port *boolean*

Synopsis Operate VPLS L3 interface as a multicast router port  
 Context **configure** [service vpls string](#) [routed-vpls multicast ipv6 mld-snooping mrouter-port](#) *boolean*  
 Tree [mrouter-port](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

## vxlan-ipv4-tep-ecmp *boolean*

Synopsis Use ECMP on VXLAN IPv4 destinations for R-VPLS services  
 Context **configure** [service vpls string](#) [routed-vpls vxlan-ipv4-tep-ecmp](#) *boolean*  
 Tree [vxlan-ipv4-tep-ecmp](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

## sap [[sap-id](#)] *string*

Synopsis Enter the **sap** list instance  
 Context **configure** [service vpls string](#) [sap string](#)  
 Tree [sap](#)  
 Introduced 16.0.R1

Platforms All

### **[sap-id]** *string*

Synopsis SAP identifier  
Context **configure** [service vpls string sap string](#)  
Tree [sap](#)  
String Length 1 to 45  
Notes This element is part of a list key.  
Introduced 16.0.R1  
Platforms All

### **accounting-policy** *reference*

Synopsis Accounting policy  
Context **configure** [service vpls string sap string accounting-policy reference](#)  
Tree [accounting-policy](#)  
Reference **configure** [log accounting-policy number](#)  
Introduced 16.0.R1  
Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the SAP  
Context **configure** [service vpls string sap string admin-state keyword](#)  
Tree [admin-state](#)  
Options enable, disable  
Default enable  
Introduced 16.0.R1  
Platforms All

### **anti-spoof** *keyword*

Synopsis Type of anti-spoof filtering  
Context **configure** [service vpls string sap string anti-spoof keyword](#)

|            |   |
|------------|---|
| Tree       | <a href="#">anti-spoof</a>  |
| Options    | source-ip-addr, source-mac-addr, source-ip-and-mac-addr, next-hop-ip-and-mac-addr |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                           |

### **app-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | Application profile name  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">app-profile</a> <i>reference</i>  |
| Tree       | <a href="#">app-profile</a>   |

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of ARP hosts   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">arp-host</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **host-limit** *number*

|          |   |
|----------|---|
| Synopsis | Maximum number of ARP triggered hosts   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">arp-host</a> <a href="#">host-limit</a> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">host-limit</a>                              |
| Range      | 1 to 131071   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **min-auth-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum authentication interval   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string arp-host min-auth-interval number</a> |
| Tree       | <a href="#">min-auth-interval</a>   |
| Range      | 1 to 6000   |
| Units      | minutes   |
| Default    | 15  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **arp-reply-agent** *keyword*

|            |   |
|------------|---|
| Synopsis   | Enable arp-reply-agent function   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string arp-reply-agent keyword</a> |
| Tree       | <a href="#">arp-reply-agent</a>   |
| Options    | true, with-subscr-ident   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **bandwidth** *number*

|            |  |
|------------|--|
| Synopsis   | SAP bandwidth  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string bandwidth number</a> |
| Tree       | <a href="#">bandwidth</a>  |
| Range      | 1 to 6400000000  |
| Units      | kilobps  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**bgp-vpls-mh-veid** *number*

|             |  |
|-------------|--|
| Synopsis    | BGP-VPLS multi-homing VE-ID  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <b>bgp-vpls-mh-veid</b> <i>number</i>  |
| Tree        | <a href="#">bgp-vpls-mh-veid</a>   |
| Description | This command specifies a VE ID that is configured on SAPs that are part of an EVPN single-active Ethernet Segment. The configuration of this command allows the advertisement of L2VPN routes that indicate the state of multi-homed SAPs to the remote BGP-VPLS PEs, which can trigger a MAC flush operation on the service to avoid traffic from being blackholed when a failure occurs in the active PE.<br><br>When unconfigured from the SAP, L2VPN routes are withdrawn, which causes MAC flush processing on the remote BGP-VPLS. |
| Range       | 1 to 65535   |
| Introduced  | 20.5.R1  |
| Platforms   | All  |

**bpdu-translation** *keyword*

|            |  |
|------------|--|
| Synopsis   | Bpdu translation on this SAP   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <b>bpdu-translation</b> <i>keyword</i> |
| Tree       | <a href="#">bpdu-translation</a>   |
| Options    | auto, pvst, stp, pvst-rw, auto-rw  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**calling-station-id** *string*

|               |   |
|---------------|---|
| Synopsis      | Calling station ID  |
| Context       | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <b>calling-station-id</b> <i>string</i> |
| Tree          | <a href="#">calling-station-id</a>  |
| String Length | 1 to 64   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**cflowd** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable Cflowd collection and analysis on this SAP |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">service vpls string sap string cflowd</a> <i>boolean</i> |
| Tree       | <a href="#">cflowd</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **collect-stats** *boolean*

|            |  |
|------------|--|
| Synopsis   | Collect accounting statistics  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string collect-stats</a> <i>boolean</i> |
| Tree       | <a href="#">collect-stats</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **cpu-protection**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>cpu-protection</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string cpu-protection</a> |
| Tree       | <a href="#">cpu-protection</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS                  |

### **eth-cfm-monitoring**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>eth-cfm-monitoring</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string cpu-protection eth-cfm-monitoring</a> |
| Tree       | <a href="#">eth-cfm-monitoring</a>  |
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> or <b>mac-monitoring</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS                                     |

### **aggregate**

|          |  |
|----------|--|
| Synopsis | Apply rate limit to the sum of the per peer packet rates |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vpls string sap string</b> <a href="#">cpu-protection eth-cfm-monitoring aggregate</a> |
| Tree       | <a href="#">aggregate</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

**car**

|            |   |
|------------|---|
| Synopsis   | Ignore Ethernet CFM packets when enforcing overall rate   |
| Context    | <b>configure service vpls string sap string</b> <a href="#">cpu-protection eth-cfm-monitoring car</a> |
| Tree       | <a href="#">car</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS   |

**mac-monitoring**

|            |   |
|------------|---|
| Synopsis   | Monitor MAC for CPU protection  |
| Context    | <b>configure service vpls string sap string</b> <a href="#">cpu-protection mac-monitoring</a>     |
| Tree       | <a href="#">mac-monitoring</a>  |
| Notes      | The following elements are part of a choice: <b>eth-cfm-monitoring</b> or <b>mac-monitoring</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS                                     |

**policy-id reference**

|            |  |
|------------|--|
| Synopsis   | CPM protection policy  |
| Context    | <b>configure service vpls string sap string</b> <a href="#">cpu-protection policy-id reference</a> |
| Tree       | <a href="#">policy-id</a>  |
| Reference  | <b>configure system security cpu-protection policy</b> <i>number</i>                               |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-7s, 7750 SR-14s, 7950 XRS                                      |

**description string**

|          |  |
|----------|--|
| Synopsis | Text description   |
| Context  | <b>configure service vpls string sap string</b> <a href="#">description string</a> |

---

|               |                             |

| String Length | 1 to 160                    |
| Introduced    | 16.0.R1                     |
| Platforms     | All                         |

## dhcp

|            |   |
|------------|---|
| Synopsis   | Enter the <b>dhcp</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <b>dhcp</b> |
| Tree       | <a href="#">dhcp</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of DHCP  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <b>dhcp</b> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## description *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <b>dhcp</b> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

## lease-populate

|          |   |
|----------|---|
| Synopsis | Enter the <b>lease-populate</b> context   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <b>dhcp</b> <b>lease-populate</b> |

|            |                                |
|------------|--------------------------------|
| Tree       | <a href="#">lease-populate</a> |
| Introduced | 16.0.R1                        |
| Platforms  | All                            |

### **max-leases** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum number of DHCPv4 leases   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string dhcp lease-populate max-leases number</a> |
| Tree       | <a href="#">max-leases</a>  |
| Range      | 0 to 131071   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **option-82**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>option-82</b> context  |
| Context     | <b>configure</b> <a href="#">service vpls string sap string dhcp option-82</a>  |
| Tree        | <a href="#">option-82</a>   |
| Description | Commands in this context configure the processing required when the router receives a DHCP request that already has an Option 82 field in the packet. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **action** *keyword*

|            |   |
|------------|---|
| Synopsis   | Action to take with received DHCP Option 82   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string dhcp option-82 action keyword</a> |
| Tree       | <a href="#">action</a>  |
| Options    | replace, drop, keep   |
| Default    | keep  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**circuit-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>circuit-id</b> context                                       |
| Context    | <b>configure service vpls string sap string dhcp option-82 circuit-id</b> |
| Tree       | <a href="#">circuit-id</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**ascii-tuple**

|            |  |
|------------|--|
| Synopsis   | Use the ASCII-encoded tuple for the circuit ID   |
| Context    | <b>configure service vpls string sap string dhcp option-82 circuit-id ascii-tuple</b>  |
| Tree       | <a href="#">ascii-tuple</a>  |
| Notes      | The following elements are part of a choice: <b>ascii-tuple</b> , <b>hex-string</b> , <b>none</b> , or <b>vlan-ascii-tuple</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**hex-string** *string*

|               |  |
|---------------|--|
| Synopsis      | User-defined hexadecimal value of the option   |
| Context       | <b>configure service vpls string sap string dhcp option-82 circuit-id hex-string string</b>                                      |
| Tree          | <a href="#">hex-string</a>   |
| String Length | 1 to 66  |
| Notes         | The following elements are part of a choice: <b>ascii-tuple</b> , <b>hex-string</b> , <b>none</b> , or <b>vlan-ascii-tuple</b> . |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**none**

|          |  |
|----------|--|
| Synopsis | Do not include the circuit ID  |
| Context  | <b>configure service vpls string sap string dhcp option-82 circuit-id none</b>   |
| Tree     | <a href="#">none</a>   |
| Notes    | The following elements are part of a choice: <b>ascii-tuple</b> , <b>hex-string</b> , <b>none</b> , or <b>vlan-ascii-tuple</b> . |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### vlan-ascii-tuple

|             |   |
|-------------|---|
| Synopsis    | Include the VLAN ID and dot1p bits in the ASCII tuple   |
| Context     | <b>configure</b> <a href="#">service vpls string sap string dhcp option-82 circuit-id</a> <a href="#">vlan-ascii-tuple</a>  |
| Tree        | <a href="#">vlan-ascii-tuple</a>  |
| Description | When configured, the router includes the VLAN ID and dot1p bits with the ASCII-tuple information. This only occurs on dot1q and QinQ-encapsulated ports. When the Option 82 bits are stripped, dot1p bits are copied to the Ethernet header of the outgoing packet.<br>When unconfigured, the router leaves the circuit ID sub-option of the DHCP packet empty. |
| Notes       | The following elements are part of a choice: <b>ascii-tuple</b> , <b>hex-string</b> , <b>none</b> , or <b>vlan-ascii-tuple</b> .  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### remote-id

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>remote-id</b> context   |
| Context     | <b>configure</b> <a href="#">service vpls string sap string dhcp option-82</a> <a href="#">remote-id</a>   |
| Tree        | <a href="#">remote-id</a>  |
| Description | Commands in this context configure the remote IP sub-option of the DHCP packet with the identity of the remote host end (typically the DHCP client). |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### ascii-string *string*

|               |   |
|---------------|---|
| Synopsis      | User-defined ASCII string for the remote ID   |
| Context       | <b>configure</b> <a href="#">service vpls string sap string dhcp option-82 remote-id</a> <a href="#">ascii-string</a> <i>string</i> |
| Tree          | <a href="#">ascii-string</a>  |
| String Length | 1 to 32   |
| Notes         | The following elements are part of a choice: <b>ascii-string</b> , <b>hex-string</b> , <b>mac</b> , or <b>none</b> .                |
| Introduced    | 16.0.R1   |

Platforms All

### hex-string *string*

Synopsis Option as a hexadecimal string

Context **configure** [service vpls string sap string dhcp option-82 remote-id hex-string string](#)

Tree [hex-string](#)

String Length 1 to 66

Notes The following elements are part of a choice: **ascii-string**, **hex-string**, **mac**, or **none**.

Introduced 16.0.R1

Platforms All

### mac

Synopsis Use the MAC address for the remote ID

Context **configure** [service vpls string sap string dhcp option-82 remote-id mac](#)

Tree [mac](#)

Notes The following elements are part of a choice: **ascii-string**, **hex-string**, **mac**, or **none**.

Introduced 16.0.R1

Platforms All

### none

Synopsis Do not include the remote ID

Context **configure** [service vpls string sap string dhcp option-82 remote-id none](#)

Tree [none](#)

Notes The following elements are part of a choice: **ascii-string**, **hex-string**, **mac**, or **none**.

Introduced 16.0.R1

Platforms All

### vendor-specific-option

Synopsis Enter the **vendor-specific-option** context

Context **configure** [service vpls string sap string dhcp option-82 vendor-specific-option](#)

Tree [vendor-specific-option](#)

---

|             |   |
|-------------|---|
| Description | Commands in this context configure the Nokia Vendor-Specific Option (VSO) of the DHCP packet. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **client-mac-address** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send the MAC address in the VSO   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">dhcp option-82 vendor-specific-option</a> <a href="#">client-mac-address</a> <i>boolean</i> |
| Tree       | <a href="#">client-mac-address</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **sap-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send SAP ID in the sub-option of the DHCP relay packet  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">dhcp option-82 vendor-specific-option</a> <a href="#">sap-id</a> <i>boolean</i> |
| Tree       | <a href="#">sap-id</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **service-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send the service ID in the Vendor Specific Option   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">dhcp option-82 vendor-specific-option</a> <a href="#">service-id</a> <i>boolean</i> |
| Tree       | <a href="#">service-id</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**string** *string*

|               |   |
|---------------|---|
| Synopsis      | User-defined ASCII string for the VSO   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">dhcp</a> <a href="#">option-82</a> <a href="#">vendor-specific-option</a> <a href="#">string</a> <a href="#">string</a> |
| Tree          | <a href="#">string</a>  |
| String Length | 1 to 32   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**system-id** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send the system ID in the VSO   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">dhcp</a> <a href="#">option-82</a> <a href="#">vendor-specific-option</a> <a href="#">system-id</a> <a href="#">boolean</a> |
| Tree       | <a href="#">system-id</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**proxy-server**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>proxy-server</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">dhcp</a> <a href="#">proxy-server</a> |
| Tree       | <a href="#">proxy-server</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the DHCP proxy server   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">dhcp</a> <a href="#">proxy-server</a> <a href="#">admin-state</a> <a href="#">keyword</a> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |

Platforms All

### **emulated-server** *string*

Synopsis IP address used as DHCP server address in SAP context  
 Context **configure** [service vpls string sap string dhcp proxy-server emulated-server string](#)  
 Tree [emulated-server](#)  
 Introduced 16.0.R1  
 Platforms All

### **lease-time**

Synopsis Enter the **lease-time** context  
 Context **configure** [service vpls string sap string dhcp proxy-server lease-time](#)  
 Tree [lease-time](#)  
 Introduced 16.0.R1  
 Platforms All

### **radius-override** *boolean*

Synopsis Use lease time information provided by RADIUS server  
 Context **configure** [service vpls string sap string dhcp proxy-server lease-time radius-override boolean](#)  
 Tree [radius-override](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

### **value** *number*

Synopsis DHCP lease time  
 Context **configure** [service vpls string sap string dhcp proxy-server lease-time value number](#)  
 Tree [value](#)  
 Range 300 to 315446399  
 Units seconds  
 Introduced 16.0.R1

---

Platforms All

### **snoop** *boolean*

Synopsis Enable DHCP snooping on the SAP  
Context **configure** [service vpls](#) *string* [sap](#) *string* [dhcp snoop](#) *boolean*  
Tree [snoop](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **dist-cpu-protection** *reference*

Synopsis Distributed CPU protection policy for SAP  
Context **configure** [service vpls](#) *string* [sap](#) *string* [dist-cpu-protection](#) *reference*  
Tree [dist-cpu-protection](#)  
Reference **configure** [system security](#) [dist-cpu-protection](#) *policy* *string*  
Introduced 16.0.R1  
Platforms All

### **egress**

Synopsis Enter the **egress** context  
Context **configure** [service vpls](#) *string* [sap](#) *string* [egress](#)  
Tree [egress](#)  
Introduced 16.0.R1  
Platforms All

### **agg-rate**

Synopsis Enter the **agg-rate** context  
Context **configure** [service vpls](#) *string* [sap](#) *string* [egress](#) [agg-rate](#)  
Tree [agg-rate](#)  
Notes The following elements are part of a choice: **agg-rate** or **percent-agg-rate**.  
Introduced 16.0.R1

Platforms All

### **adaptation-rule** *keyword*

Synopsis Adaptation rule to compute the operational PIR value when an aggregate shaper is used  
Context **configure** [service vpls](#) *string* [sap](#) *string* [egress agg-rate](#) [adaptation-rule](#) *keyword*  
Tree [adaptation-rule](#)  
Options max, min, closest  
Default closest  
Introduced 22.10.R1  
Platforms 7750 SR-1, 7750 SR-s

### **burst-limit** (*number* | *keyword*)

Synopsis Shaping burst size when an aggregate shaper is used  
Context **configure** [service vpls](#) *string* [sap](#) *string* [egress agg-rate](#) [burst-limit](#) (*number* | *keyword*)  
Tree [burst-limit](#)  
Range 1 to 14000000  
Units bytes  
Options auto  
Default auto  
Introduced 22.10.R1  
Platforms 7750 SR-1, 7750 SR-s

### **limit-unused-bandwidth** *boolean*

Synopsis Enable aggregate rate overrun protection  
Context **configure** [service vpls](#) *string* [sap](#) *string* [egress agg-rate](#) [limit-unused-bandwidth](#) *boolean*  
Tree [limit-unused-bandwidth](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **queue-frame-based-accounting** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable frame based accounting on policers and queues  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress agg-rate</a> <a href="#">queue-frame-based-accounting</a> <i>boolean</i> |
| Tree       | <a href="#">queue-frame-based-accounting</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **rate** *number*

|            |  |
|------------|--|
| Synopsis   | Enforced aggregate rate for all queues   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress agg-rate</a> <a href="#">rate</a> <i>number</i> |
| Tree       | <a href="#">rate</a>   |
| Range      | 1 to 6400000000  |
| Units      | kilobps  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **dest-mac-rewrite** *string*

|            |   |
|------------|---|
| Synopsis   | Destination MAC overwrite for unicast   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress dest-mac-rewrite</a> <i>string</i> |
| Tree       | <a href="#">dest-mac-rewrite</a>  |
| Introduced | 16.0.R5   |
| Platforms  | All   |

### **filter**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>filter</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress filter</a> |
| Tree       | <a href="#">filter</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### ip reference

|            |  |
|------------|--|
| Synopsis   | IPv4 filter policy name  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress filter ip reference</a> |
| Tree       | <a href="#">ip</a>   |
| Reference  | <b>configure</b> <a href="#">filter ip-filter</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### ipv6 reference

|            |  |
|------------|--|
| Synopsis   | IPv6 filter policy name  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress filter ipv6 reference</a> |
| Tree       | <a href="#">ipv6</a>   |
| Reference  | <b>configure</b> <a href="#">filter ipv6-filter</a> <i>string</i>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### mac reference

|            |   |
|------------|---|
| Synopsis   | MAC filter policy name  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress filter mac reference</a> |
| Tree       | <a href="#">mac</a>   |
| Reference  | <b>configure</b> <a href="#">filter mac-filter</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos</a> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **policer-control-policy**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>policer-control-policy</b> context                                   |
| Context    | <b>configure service vpls string sap string egress qos policer-control-policy</b> |
| Tree       | <a href="#">policer-control-policy</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR                            |

## **overrides**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>overrides</b> context   |
| Context    | <b>configure service vpls string sap string egress qos policer-control-policy overrides</b> |
| Tree       | <a href="#">overrides</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR                                      |

## **root**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>root</b> context  |
| Context    | <b>configure service vpls string sap string egress qos policer-control-policy overrides root</b> |
| Tree       | <a href="#">root</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

## **max-rate** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Maximum frame-based bandwidth limit   |
| Context    | <b>configure service vpls string sap string egress qos policer-control-policy overrides root</b><br><a href="#">max-rate</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">max-rate</a>  |
| Range      | 1 to 6400000000   |
| Options    | max   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**priority-mbs-thresholds**

|            |  |

| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **policy-name** *reference*

|            |   |
|------------|---|
| Synopsis   | Policer control policy name   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos</a> <a href="#">policer-control-policy</a> <b>policy-name</b> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>   |
| Reference  | <b>configure</b> <a href="#">qos</a> <a href="#">policer-control-policy</a> <i>string</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **qinq-mark-top-only** *boolean*

|            |   |
|------------|---|
| Synopsis   | Mark top Q-tags   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress qos</a> <b>qinq-mark-top-only</b> <i>boolean</i> |
| Tree       | <a href="#">qinq-mark-top-only</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**sap-egress**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>sap-egress</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress</a> |
| Tree       | <a href="#">sap-egress</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**overrides**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>overrides</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides</a> |
| Tree       | <a href="#">overrides</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**hs-secondary-shaper** *string*

|               |  |
|---------------|--|
| Synopsis      | HS Secondary Shaper  |
| Context       | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides hs-secondary-shaper string</a> |
| Tree          | <a href="#">hs-secondary-shaper</a>  |
| String Length | 1 to 32  |
| Introduced    | 16.0.R1  |
| Platforms     | 7750 SR-7/12/12e   |

**hs-wrr-group** [[group-id](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>hs-wrr-group</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides hs-wrr-group reference</a> |
| Tree       | <a href="#">hs-wrr-group</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

**[group-id] reference**

|            |  |
|------------|--|
| Synopsis   | HS WRR group identifier  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides hs-wrr-group reference</a> |
| Tree       | <a href="#">hs-wrr-group</a>   |
| Reference  | <b>configure</b> <a href="#">qos sap-egress string hs-wrr-group number</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

**hs-class-weight number**

|            |   |
|------------|---|
| Synopsis   | Class weight override of the WRR group  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides hs-wrr-group reference hs-class-weight number</a> |
| Tree       | <a href="#">hs-class-weight</a>   |
| Range      | 1   2   4   8   |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR-7/12/12e  |

**percent-rate decimal-number**

|            |  |
|------------|--|
| Synopsis   | Percent rate override applied to the HS WRR group  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides hs-wrr-group reference percent-rate decimal-number</a> |
| Tree       | <a href="#">percent-rate</a>   |
| Range      | 0.01 to 100.00   |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7750 SR-7/12/12e   |

**rate (number | keyword)**

|          |  |
|----------|--|
| Synopsis | Scheduling rate override applied to the HS WRR group   |
| Context  | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides hs-wrr-group reference rate (number   keyword)</a> |

|            |   |
|------------|---|
| Tree       | <a href="#">rate</a>  |
| Range      | 1 to 2000000000   |
| Units      | kilobps   |
| Options    | max   |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7750 SR-7/12/12e  |

### **policer** [[policer-id](#)] *reference*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>policer</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides policer reference</a> |
| Tree       | <a href="#">policer</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **[policer-id]** *reference*

|            |   |
|------------|---|
| Synopsis   | Policer unique ID   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides policer reference</a> |
| Tree       | <a href="#">policer</a>   |
| Reference  | <b>configure</b> <a href="#">qos sap-egress string policer number</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **cbs** (*number* | *keyword*)

|          |  |
|----------|--|
| Synopsis | CBS  |
| Context  | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides policer reference cbs (number   keyword)</a> |
| Tree     | <a href="#">cbs</a>  |
| Range    | 0 to 268435456   |
| Units    | bytes  |

|            |  |
|------------|--|
| Options    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **mbs** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | MBS  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">policer</a> <i>reference</i> <b>mbs</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mbs</a>  |
| Range      | 0 to 268435456   |
| Units      | bytes  |
| Options    | auto   |

| Synopsis | WRR weight to parent with the queue into the scheduler   |
| Context  | <b>configure service vpls string sap string egress qos sap-egress overrides queue reference hs-wrr-weight number</b> |
| Tree     | <a href="#">hs-wrr-weight</a>  |
| Range    | 1 to 127   |
| Default  | 1  |

|            |                  |
|------------|------------------|
| Introduced | 16.0.R1          |
| Platforms  | 7750 SR-7/12/12e |

### **mbs** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | MBS   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <b>mbs</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mbs</a>   |
| Range      | 0 to 1073741824   |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **monitor-queue-depth**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>monitor-queue-depth</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <b>monitor-queue-depth</b> |
| Tree       | <a href="#">monitor-queue-depth</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### **fast-polling** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable fast polling of the queue depth   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">overrides</a> <a href="#">queue</a> <a href="#">reference</a> <a href="#">monitor-queue-depth</a> <b>fast-polling</b> <i>boolean</i> |
| Tree        | <a href="#">fast-polling</a>   |
| Description | When configured to <b>true</b> , this command enables fast polling of the queue depth. Faster polling allows a more accurate view of the actual depth.<br>When configured to <b>false</b> , fast queue polling is not enabled.   |
| Default     | false  |
| Introduced  | 20.10.R1   |
| Platforms   | All  |

**violation-threshold** *decimal-number*

|             |  |
|-------------|--|
| Synopsis    | Threshold for queue depth before violation is raised   |
| Context     | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides queue reference monitor-queue-depth violation-threshold decimal-number</a> |
| Tree        | <a href="#">violation-threshold</a>  |
| Description | This command specifies the threshold for the queue MBS. When the queue depth exceeds the threshold value, a violation is registered.                                   |
| Range       | 0.01 to 99.99  |
| Introduced  | 20.10.R1   |
| Platforms   | All  |

**parent**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>parent</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides queue reference parent</a> |
| Tree       | <a href="#">parent</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**cir-weight** *number*

|            |  |
|------------|--|
| Synopsis   | CIR parameter that overrides parent for queue group  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides queue reference parent cir-weight number</a> |
| Tree       | <a href="#">cir-weight</a>   |
| Range      | 0 to 100   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**weight** *number*

|          |  |
|----------|--|
| Synopsis | PIR parameter that overrides parent for queue group  |
| Context  | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides queue reference parent weight number</a> |
| Tree     | <a href="#">weight</a>   |

|            |          |
|------------|----------|
| Range      | 0 to 100 |
| Introduced | 16.0.R1  |
| Platforms  | All      |

### **percent-rate**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>percent-rate</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides queue reference percent-rate</a> |
| Tree       | <a href="#">percent-rate</a>   |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **cir decimal-number**

|            |   |
|------------|---|
| Synopsis   | CIR percent rate  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides queue reference percent-rate cir decimal-number</a> |
| Tree       | <a href="#">cir</a>   |
| Range      | 0.00 to 100.00  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **pir decimal-number**

|            |   |
|------------|---|
| Synopsis   | PIR percent rate  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string egress qos sap-egress overrides queue reference percent-rate pir decimal-number</a> |
| Tree       | <a href="#">pir</a>   |
| Range      | 0.01 to 100.00  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**rate**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rate</b> context  |
| Context    | <b>configure service vpls string sap string egress qos sap-egress overrides queue reference rate</b> |
| Tree       | <a href="#">rate</a>   |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .                    |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**cir** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | CIR rate  |
| Context    | <b>configure service vpls string sap string egress qos sap-egress overrides queue reference rate cir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cir</a>   |
| Range      | 0 to 6400000000   |
| Units      | kilobps   |
| Options    | max   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**pir** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | PIR rate  |
| Context    | <b>configure service vpls string sap string egress qos sap-egress overrides queue reference rate pir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>   |
| Range      | 1 to 6400000000   |
| Units      | kilobps   |
| Options    | max   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**policy-name** *reference*

|          |  |
|----------|--|
| Synopsis | Policy ID to associate with SAP for mirrored service |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vpls string sap string egress qos sap-egress policy-name reference</b> |
| Tree       | <a href="#">policy-name</a>   |
| Reference  | <b>configure qos sap-egress string</b>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### port-redirect-group

|            |   |
|------------|---|
| Synopsis   | Enter the <b>port-redirect-group</b> context  |
| Context    | <b>configure service vpls string sap string egress qos sap-egress port-redirect-group</b> |
| Tree       | <a href="#">port-redirect-group</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### group-name *reference*

|            |  |
|------------|--|
| Synopsis   | Name of the queue group redirect list policy   |
| Context    | <b>configure service vpls string sap string egress qos sap-egress port-redirect-group group-name reference</b> |
| Tree       | <a href="#">group-name</a>   |
| Reference  | <b>configure qos queue-group-templates egress queue-group string</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### instance *number*

|            |   |
|------------|---|
| Synopsis   | Instance of port queue group  |
| Context    | <b>configure service vpls string sap string egress qos sap-egress port-redirect-group instance number</b> |
| Tree       | <a href="#">instance</a>  |
| Range      | 1 to 65535  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## scheduler-policy

|            |   |
|------------|---|
| Synopsis   | Enter the <b>scheduler-policy</b> context                                   |
| Context    | <b>configure service vpls string sap string egress qos scheduler-policy</b> |
| Tree       | <a href="#">scheduler-policy</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## overrides

|            |   |
|------------|---|
| Synopsis   | Enter the <b>overrides</b> context  |
| Context    | <b>configure service vpls string sap string egress qos scheduler-policy overrides</b> |
| Tree       | <a href="#">overrides</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## scheduler [[scheduler-name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>scheduler</b> list instance   |
| Context    | <b>configure service vpls string sap string egress qos scheduler-policy overrides scheduler string</b> |
| Tree       | <a href="#">scheduler</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## [\[scheduler-name\]](#) *string*

|             |  |
|-------------|--|
| Synopsis    | Scheduler name   |
| Context     | <b>configure service vpls string sap string egress qos scheduler-policy overrides scheduler string</b>   |
| Tree        | <a href="#">scheduler</a>  |
| Description | This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands. |

If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.

If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.

|               |                                     |
|---------------|-------------------------------------|
| String Length | 1 to 32                             |
| Notes         | This element is part of a list key. |
| Introduced    | 16.0.R1                             |
| Platforms     | All                                 |

## parent

|            |  |
|------------|--|
| Synopsis   | Enter the <b>parent</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">egress</a> <a href="#">qos</a> <a href="#">scheduler-policy</a> <a href="#">overrides</a> <a href="#">scheduler</a> <a href="#">string</a> <b>parent</b> |

| Introduced | 16.0.R1   |
| Platforms  | All   |

**eth-cfm**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>eth-cfm</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string eth-cfm</a> |
| Tree       | <a href="#">eth-cfm</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS            |

**collect-lmm-fc-stats**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>collect-lmm-fc-stats</b> context  |
| Context     | <b>configure</b> <a href="#">service vpls string sap string eth-cfm collect-lmm-fc-stats</a>   |
| Tree        | <a href="#">collect-lmm-fc-stats</a>   |
| Description | <p>Commands in this context configure per forwarding class (FC) LMM information collection.</p> <p>The commands <b>fc-in-profile</b> and <b>fc</b> in this context are mutually exclusive. The commands apply to either profile-aware or profile-unaware FCs respectively.</p> <p>This command and the <b>collect-lmm-stats</b> command are mutually exclusive when there is entity resource contention.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**fc** *keyword*

|          |   |
|----------|---|
| Synopsis | Forwarding class name for profile-unaware counter   |
| Context  | <b>configure</b> <a href="#">service vpls string sap string eth-cfm collect-lmm-fc-stats fc keyword</a> |

|                |   |
|----------------|---|
| Tree           | <a href="#">fc</a>  |
| Description    | <p>This command configures individual counters for the specified FCs without regard for profile. The system includes all countable packets that match a configured FC, regardless of profile, in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-aware FC using the <b>fc-in-profile</b> command under the <b>collect-imm-fc-stats</b> context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options        | be, l2, af, l1, h2, ef, h1, nc  |
| Max. Instances | 8   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **fc-in-profile** *keyword*

|                |   |
|----------------|---|
| Synopsis       | Forwarding class name for profile-aware counter   |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">collect-imm-fc-stats</a> <a href="#">fc-in-profile</a> <i>keyword</i>   |
| Tree           | <a href="#">fc-in-profile</a>   |
| Description    | <p>This command configures individual counters for the specified FCs with regard to profile. The system includes all countable packets that match a configured FC and that are deemed to be in-profile in this counter.</p> <p>An FC specified as part of this command and for this specific context cannot be specified as a profile-unaware FC using the <b>fc</b> command under the <b>collect-imm-fc-stats</b> context.</p> <p>When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.</p> |
| Options        | be, l2, af, l1, h2, ef, h1, nc  |
| Max. Instances | 8   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **collect-imm-stats** *boolean*

|          |  |
|----------|--|
| Synopsis | Collect statistics for loss measurement message tests  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">collect-imm-stats</a> <i>boolean</i> |
| Tree     | <a href="#">collect-imm-stats</a>  |

|            |  |
|------------|--|

|------------|--|
| Synopsis   | Maintenance Endpoint (MEP) ID  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> |
| Tree       | <a href="#">mep</a>  |
| Range      | 1 to 8191  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### admin-state *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the MEP   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### ais

|            |  |
|------------|--|
| Synopsis   | Enable the <b>ais</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ais</a> |
| Tree       | <a href="#">ais</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### client-meg-level *number*

|          |   |
|----------|---|
| Synopsis | Client MEG level for AIS message generation   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ais</a> <a href="#">client-meg-level</a> <i>number</i> |
| Tree     | <a href="#">client-meg-level</a>  |

|                |  |
|----------------|--|
| Range          | 1 to 7   |
| Max. Instances | 7  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **interface-support** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable generation of AIS PDUs based on endpoint state  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ais</a> <b>interface-support</b> <i>boolean</i> |
| Tree       | <a href="#">interface-support</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **interval** *number*

|            |  |
|------------|--|
| Synopsis   | Transmission interval for AIS messages   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ais</a> <b>interval</b> <i>number</i> |
| Tree       | <a href="#">interval</a>   |
| Range      | 1   60   |
| Units      | seconds  |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **low-priority-defect** *keyword*

|          |  |
|----------|--|
| Synopsis | Lowest priority defect allowed to generate fault alarm   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ais</a> <b>low-priority-defect</b> <i>keyword</i> |
| Tree     | <a href="#">low-priority-defect</a>  |
| Options  | all-def, mac-rem-err-xcon  |
| Default  | all-def  |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **priority** *number*

|            |  |
|------------|--|
| Synopsis   | Priority of the AIS messages generated by the node   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ais</a> <b>priority</b> <i>number</i> |
| Tree       | <a href="#">priority</a>   |
| Range      | 0 to 7   |
| Default    | 7  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **alarm-notification**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>alarm-notification</b> context  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>alarm-notification</b>   |
| Tree        | <a href="#">alarm-notification</a>   |
| Description | <p>Commands in this context configure the Fault Notification Generator (FNG) time values to raise an alarm or reset the CCM defect alarm.</p> <p>Use these timers for network management processes. The timers are not tied into delaying the notification to the fault management system on the network element and do not affect fault propagation mechanisms.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **fng-alarm-time** *number*

|            |   |
|------------|---|
| Synopsis   | Time that must expire before an FNG alarm is raised   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">alarm-notification</a> <b>fng-alarm-time</b> <i>number</i> |
| Tree       | <a href="#">fng-alarm-time</a>  |
| Range      | 250   500   1000  |
| Units      | centiseconds  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fng-reset-time** *number*

Synopsis Time that must expire before an FNG alarm is reset

Context **configure** [service vpls](#) *string* [sap](#) *string* [eth-cfm mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [alarm-notification](#) [fng-reset-time](#) *number*

Tree [fng-reset-time](#)

Range 250 | 500 | 1000

Units centiseconds

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm** *boolean*

Synopsis Generate CCM messages

Context **configure** [service vpls](#) *string* [sap](#) *string* [eth-cfm mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [ccm](#) *boolean*

Tree [ccm](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm-ltm-priority** *number*

Synopsis Priority of CCM and LTM messages transmitted by the MEP

Context **configure** [service vpls](#) *string* [sap](#) *string* [eth-cfm mep](#) [md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [ccm-ltm-priority](#) *number*

Tree [ccm-ltm-priority](#)

Range 0 to 7

Default 7

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ccm-padding-size** *number*

|             |   |
|-------------|---|
| Synopsis    | Number of octets of padding to insert in CCM packets  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>ccm-padding-size</b> <i>number</i>  |
| Tree        | <a href="#">ccm-padding-size</a>  |
| Description | This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.<br><br>This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through <b>configure eth-cfm domain association ccm-interval</b> ) is less than 1 second. |
| Range       | 3 to 1500   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**cfm-vlan-tag** *string*

|               |  |
|---------------|--|
| Synopsis      | VLAN tags to apply to CFM PDUs for egress processing   |
| Context       | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>cfm-vlan-tag</b> <i>string</i> |
| Tree          | <a href="#">cfm-vlan-tag</a>   |
| String Length | 1 to 9   |
| Introduced    | 21.10.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**csf**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>csf</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>csf</b> |
| Tree       | <a href="#">csf</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**multiplier** *decimal-number*

|            |   |
|------------|---|
| Synopsis   | Multiplication factor used to clear the CSF condition   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string sap</a> <a href="#">string eth-cfm mep</a> <a href="#">md-admin-name</a> <a href="#">reference ma-admin-name</a> <a href="#">reference mep-id</a> <a href="#">number csf</a> <b>multiplier</b> <i>decimal-number</i> |
| Tree       | <a href="#">multiplier</a>  |
| Range      | 0.0   2.0 to 30.0   |
| Default    | 3.5   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service vpls</a> <a href="#">string sap</a> <a href="#">string eth-cfm mep</a> <a href="#">md-admin-name</a> <a href="#">reference ma-admin-name</a> <a href="#">reference mep-id</a> <a href="#">number</a> <b>description</b> <i>string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**direction** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Direction the MEP faces   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string sap</a> <a href="#">string eth-cfm mep</a> <a href="#">md-admin-name</a> <a href="#">reference ma-admin-name</a> <a href="#">reference mep-id</a> <a href="#">number</a> <b>direction</b> <i>keyword</i> |
| Tree       | <a href="#">direction</a>   |
| Options    | down, up  |
| Default    | down  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**eth-test**

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>eth-test</b> context   |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>eth-test</b> |
| Tree        | <a href="#">eth-test</a>   |
| Description | Commands in this context configure information used by the Ethernet Test (ETH-TST) packet. The commands must be configured on both the sender and the receiver nodes. The test packets are used with the <b>oam eth-cfm eth-test</b> command.                                |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**bit-error-threshold** *number*

|            |  |
|------------|--|
| Synopsis   | Lowest priority defect allowed to generate fault alarm   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>eth-test bit-error-threshold</b> <i>number</i> |
| Tree       | <a href="#">bit-error-threshold</a>  |
| Range      | 0 to 11840   |
| Units      | bit errors   |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**test-pattern**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>test-pattern</b> context   |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>eth-test test-pattern</b> |
| Tree        | <a href="#">test-pattern</a>  |
| Description | Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**crc-tlv** *boolean*

|          |                         |
|----------|-------------------------|
| Synopsis | Generate a CRC checksum |
|----------|-------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vpls string sap string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test test-pattern crc-tlv boolean</b> |
| Tree       | <a href="#">crc-tlv</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **pattern keyword**

|             |   |
|-------------|---|
| Synopsis    | Test pattern for Ethernet Test frames   |
| Context     | <b>configure service vpls string sap string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test test-pattern pattern keyword</b> |
| Tree        | <a href="#">pattern</a>   |
| Description | This command specifies the test pattern of the Ethernet Test (ETH-TST) frames. This does not have to be configured the same on the sender and the receiver.     |
| Options     | all-zeros, all-ones   |
| Default     | all-zeros   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **fault-propagation keyword**

|            |   |
|------------|---|
| Synopsis   | Fault propagation for the MEP   |
| Context    | <b>configure service vpls string sap string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number fault-propagation keyword</b> |
| Tree       | <a href="#">fault-propagation</a>   |
| Options    | use-if-status-tlv, suspend-ccm  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **grace**

|          |   |
|----------|---|
| Synopsis | Enter the <b>grace</b> context  |
| Context  | <b>configure service vpls string sap string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace</b> |
| Tree     | <a href="#">grace</a>   |

|             |   |
|-------------|---|
| Description | Commands in this context configure the Nokia ETH-CFM Grace function and the ITU-T Y.1731 Ethernet Expected Default (ETH-ED) function. |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## eth-ed

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>eth-ed</b> context   |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-ed</a> |
| Tree        | <a href="#">eth-ed</a>  |
| Description | Commands in this context configure the ITU-T Y.1731 ETH-ED function.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

## max-rx-defect-window *number*

|            |  |
|------------|--|
| Synopsis   | Maximum received ETH-ED expected defect window duration  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-ed max-rx-defect-window</a> <i>number</i> |
| Tree       | <a href="#">max-rx-defect-window</a>   |
| Range      | 1 to 86400   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## priority *number*

|            |  |
|------------|--|
| Synopsis   | Transmission priority for ETH-ED PDUs  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-ed priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>   |
| Range      | 0 to 7   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**rx-eth-ed** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Receive and process ETH-ED ITU-T Y.1731 PDUs on the MEP   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">rx-eth-ed</a> <i>boolean</i> |
| Tree        | <a href="#">rx-eth-ed</a>   |
| Description | This command enables the reception and processing of the ITU-T Y.1731 ETH-ED PDU on the MEP.  |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**tx-eth-ed** *boolean*

|            |   |
|------------|---|
| Synopsis   | Transmit ETH-ED PDUs from the MEP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">tx-eth-ed</a> <i>boolean</i> |
| Tree       | <a href="#">tx-eth-ed</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**eth-vsm-grace**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>eth-vsm-grace</b> context  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">grace</a> <a href="#">eth-vsm-grace</a> |
| Tree        | <a href="#">eth-vsm-grace</a>   |
| Description | Commands in this context configure the Nokia ETH-CFM Grace function.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**rx-eth-vsm-grace** *boolean*

|          |  |
|----------|--|
| Synopsis | Receive and process Nokia ETH-CFM Grace PDU on the MEP |
|----------|--|

|             |   |
|-------------|---|
| Context     | <b>configure service vpls</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>grace eth-vsm-grace rx-eth-vsm-grace</b> <i>boolean</i>   |
| Tree        | <a href="#">rx-eth-vsm-grace</a>  |
| Description | When configured to <b>true</b> , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>When configured to <b>false</b> , the router disables the Nokia Grace function. |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **tx-eth-vsm-grace** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Transmit ETH-ED PDUs from the MEP  |
| Context     | <b>configure service vpls</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>grace eth-vsm-grace tx-eth-vsm-grace</b> <i>boolean</i>  |
| Tree        | <a href="#">tx-eth-vsm-grace</a>   |
| Description | When configured to <b>true</b> , the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.<br><br>The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>The operator must configure the <b>configure system eth-cfm grace</b> command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).<br><br>When configured to <b>false</b> , the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP. |
| Default     | true   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **lbm-svc-act-responder** *boolean*

|            |  |
|------------|--|
| Synopsis   | Process service activation streams in ETH-CFM LBM  |
| Context    | <b>configure service vpls</b> <i>string</i> <b>sap</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>lbm-svc-act-responder</b> <i>boolean</i> |
| Tree       | <a href="#">lbm-svc-act-responder</a>  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **low-priority-defect** *keyword*

Synopsis Lowest priority defect allowed to generate fault alarm

Context **configure service vpls** *string sap string eth-cfm mep md-admin-name* *reference ma-admin-name reference mep-id number low-priority-defect keyword*

Tree [low-priority-defect](#)

Options all-def, mac-rem-err-xcon, rem-err-xcon, err-xcon, xcon, no-xcon

Default mac-rem-err-xcon

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mac-address** *string*

Synopsis MAC address of the MEP

Context **configure service vpls** *string sap string eth-cfm mep md-admin-name* *reference ma-admin-name reference mep-id number mac-address string*

Tree [mac-address](#)

Description This command specifies the MAC address of the MEP.  
When unconfigured, the MAC address of the port (if the MEP is on a SAP) or the MAC address of a bridge (if the MEP is on a spoke) is used.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **one-way-delay-threshold** *number*

Synopsis Threshold time limit for the one-way delay test

Context **configure service vpls** *string sap string eth-cfm mep md-admin-name* *reference ma-admin-name reference mep-id number one-way-delay-threshold number*

Tree [one-way-delay-threshold](#)

Range 0 to 600

Units seconds

Default 3

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**primary-vlan** *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |

| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>primary-vlan</b> <i>boolean</i> |
| Tree       | <a href="#">primary-vlan</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**mip primary-vlan** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mip</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mip primary-vlan</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mip</a>   |
| Introduced | 21.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**primary-vlan** (*number* | *keyword*)

|             |   |
|-------------|---|
| Synopsis    | VLAN ID to which the MIP is attached  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mip primary-vlan</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree        | <a href="#">mip</a>   |
| Description | This command provides an option for linking a MIP with a Primary VLAN number or none. When the <b>none</b> option is provided, the MIP does not include the primary vlan. |
| Range       | 1 to 4094   |
| Options     | none  |
| Notes       | This element is part of a list key.   |
| Introduced  | 21.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**cfm-vlan-tag** *string*

|               |  |
|---------------|--|
| Synopsis      | VLAN tags to apply to CFM PDUs for egress processing   |
| Context       | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mip primary-vlan</a> ( <i>number</i>   <i>keyword</i> )<br><a href="#">cfm-vlan-tag</a> <i>string</i>  |
| Tree          | <a href="#">cfm-vlan-tag</a>   |
| Description   | This command allows the CFM function to include additional VLAN tags to the CFM packet that are carried to the egress and treated as service delimited. Typically, this function is used to influence the VLAN carried over a binding that uses the vc-type vlan or the binding forces the use of one or more VLAN tag that results in a mismatch between the service data arriving at the binding and the locally generated ETH-CFM PDUs arriving at the same egress. When this command is included under the MEP or MIP configuration, the tags used as part of the configuration typically match the SAP service delimited configuration. |
| String Length | 1 to 9   |
| Introduced    | 21.10.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**mac-address** *string*

|            |  |
|------------|--|
| Synopsis   | MAC address of the MIP   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm mip primary-vlan</a> ( <i>number</i>   <i>keyword</i> )<br><a href="#">mac-address</a> <i>string</i> |
| Tree       | <a href="#">mac-address</a>  |
| Introduced | 21.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**squelch-ingress-ctag-levels** *number*

|             |  |
|-------------|--|
| Synopsis    | Squelch levels using additional VLAN C-Tag space   |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">eth-cfm squelch-ingress-ctag-levels</a> <i>number</i>  |
| Tree        | <a href="#">squelch-ingress-ctag-levels</a>  |
| Description | This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding plus an additional VLAN, up to a maximum tag length of two tags. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.<br><br>The list of levels must be a complete contiguous list from 0 up to the highest level to be dropped. |

|                |  |
|----------------|--|
| Range          | 0 to 7   |
| Max. Instances | 8  |
| Introduced     | 21.2.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

| Tree       | <a href="#">number-down</a> |
| Introduced | 16.0.R1                     |
| Platforms  | All                         |

### **[number-lag-port-down]** *number*

|            |  |
|------------|--|
| Synopsis   | Number of ports that are down in this LAG link   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string igmp-snooping mcac mc-constraints number-down number</a> |
| Tree       | <a href="#">number-down</a>  |
| Range      | 1 to 64  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **level** *number*

|             |   |
|-------------|---|
| Synopsis    | Level ID to associate with number of down LAG ports   |
| Context     | <b>configure</b> <a href="#">service vpls string sap string igmp-snooping mcac mc-constraints number-down number level number</a> |
| Tree        | <a href="#">level</a>   |
| Description | This command specifies the bandwidth for a given level. Level 1 has the highest priority and level 8 has the lowest priority.     |
| Range       | 1 to 8  |
| Notes       | This element is mandatory.  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **use-lag-port-weight** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Use LAG port weight in calculating MCAC constraints  |
| Context     | <b>configure</b> <a href="#">service vpls string sap string igmp-snooping mcac mc-constraints use-lag-port-weight boolean</a>  |
| Tree        | <a href="#">use-lag-port-weight</a>  |
| Description | When configured to <b>true</b> , port weight is used when determining available bandwidth per level when LAG ports go down or come up. This command is required for proper |

operation on mixed port-speed LAGs and can also be used for unmixed port-speed LAGs.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **policy reference**

|             |   |
|-------------|---|
| Synopsis    | Multicast CAC policy name   |
| Context     | <b>configure service vpls string sap string igmp-snooping mcac policy reference</b>   |
| Tree        | <a href="#">policy</a>  |
| Description | <p>This command configures the name of the global channel bandwidth definition policy that is used for (H)MCAC and HQoS adjustment.</p> <p>Within the scope of HQoS adjustment, the channel definition policy under the group interface is used if redirection is unconfigured. In this case, the HQoS adjustment can be applied to IPE subscribers in per-SAP replication mode.</p> <p>If redirection is configured, the channel bandwidth definition policy applied under the Layer 3 redirected interface is in effect.</p> <p>Hierarchical MCAC (HMCAC) is supported on two levels simultaneously:</p> <ul style="list-style-type: none"> <li>• subscriber level and redirected interface when redirection is configured</li> <li>• subscriber level and group-interface level when redirection is unconfigured</li> </ul> <p>In HMCAC, the subscriber is checked against its bandwidth limits first, then against the bandwidth limits of the redirected or group interface. If redirection is configured but the policy is referenced only under the group interface, no admission control is executed (HMCAC or MCAC).</p> |
| Reference   | <b>configure mcac policy string</b>   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **mrouter-port boolean**

|            |  |
|------------|--|
| Synopsis   | Operate port as a multicast router port  |
| Context    | <b>configure service vpls string sap string igmp-snooping mrouter-port boolean</b> |
| Tree       | <a href="#">mrouter-port</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **mvr**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mvr</b> context                                      |
| Context    | <b>configure service vpls string sap string igmp-snooping mvr</b> |
| Tree       | <b>mvr</b>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **from-vpls** *reference*

|            |   |
|------------|---|
| Synopsis   | MVR VPLS from which the multicast channels are taken                                  |
| Context    | <b>configure service vpls string sap string igmp-snooping mvr from-vpls reference</b> |

 Tree [qos](#)  
 Introduced 16.0.R1  
 Platforms All

### match-qinq-dot1p keyword

Synopsis Ingress match QinQ Dot1p  
 Context **configure** [service vpls string sap string ingress qos match-qinq-dot1p keyword](#)  
 Tree [match-qinq-dot1p](#)  
 Options top, bottom  
 Introduced 16.0.R1

Platforms All

## **policer-control-policy**

Synopsis Enter the **policer-control-policy** context

Context **configure service vpls string sap string ingress qos policer-control-policy**

Tree [policer-control-policy](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## **overrides**

Synopsis Enable the **overrides** context

Context **configure service vpls string sap string ingress qos policer-control-policy overrides**

Tree [overrides](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## **root**

Synopsis Enter the **root** context

Context **configure service vpls string sap string ingress qos policer-control-policy overrides root**

Tree [root](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

## **max-rate** (*number* | *keyword*)

Synopsis Maximum frame-based bandwidth limit

Context **configure service vpls string sap string ingress qos policer-control-policy overrides root**  
[max-rate](#) (*number* | *keyword*)

Tree [max-rate](#)

Range 1 to 6400000000

Options max

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### priority-mbs-thresholds

Synopsis Enter the **priority-mbs-thresholds** context

Context **configure service vpls string sap string ingress qos policer-control-policy overrides root priority-mbs-thresholds**

Tree [priority-mbs-thresholds](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### min-thresh-separation (*number* | *keyword*)

Synopsis Minimum amount of separation buffer space

Context **configure service vpls string sap string ingress qos policer-control-policy overrides root priority-mbs-thresholds min-thresh-separation (*number* | *keyword*)**

Tree [min-thresh-separation](#)

Range 0 to 16777216

Units bytes

Options auto

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### priority [*priority-level*] *number*

Synopsis Enter the **priority** list instance

Context **configure service vpls string sap string ingress qos policer-control-policy overrides root priority-mbs-thresholds priority *number***

Tree [priority](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### [*priority-level*] *number*

Synopsis Priority level

Context **configure service vpls string sap string ingress qos policer-control-policy overrides root priority-mbs-thresholds priority *number***

|            |  |

| Tree       | <a href="#">instance</a>   |
| Range      | 1 to 65535   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**overrides**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>overrides</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> |
| Tree       | <a href="#">overrides</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ip-criteria

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ip-criteria</b> context  |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides ip-criteria</b> |
| Tree       | <a href="#">ip-criteria</a>   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                  |

## activate-entry-tag *number*

|            |  |
|------------|--|
| Synopsis   | Tag ID activated for IPv4 criteria   |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides ip-criteria activate-entry-tag <i>number</i></b> |
| Tree       | <a href="#">activate-entry-tag</a>   |
| Range      | 1 to 255   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

## ipv6-criteria

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv6-criteria</b> context  |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides ipv6-criteria</b> |
| Tree       | <a href="#">ipv6-criteria</a>   |
| Introduced | 20.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                    |

## activate-entry-tag *number*

|            |  |
|------------|--|
| Synopsis   | Tag ID activated for IPv6 criteria   |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides ipv6-criteria activate-entry-tag <i>number</i></b> |
| Tree       | <a href="#">activate-entry-tag</a>   |
| Range      | 1 to 255   |
| Introduced | 20.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**policer** [*policer-id*] *reference*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>policer</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos sap-ingress overrides policer reference</a> |
| Tree       | <a href="#">policer</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**[policer-id]** *reference*

|            |   |
|------------|---|
| Synopsis   | Policer unique ID   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos sap-ingress overrides policer reference</a> |
| Tree       | <a href="#">policer</a>   |
| Reference  | <b>configure</b> <a href="#">qos sap-ingress string policer number</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

**cbs** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CBS  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos sap-ingress overrides policer reference cbs (number   keyword)</a> |
| Tree       | <a href="#">cbs</a>  |
| Range      | 0 to 268435456   |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**mbs** (*number* | *keyword*)

|          |     |
|----------|-----|
| Synopsis | MBS |
|----------|-----|

|            |   |
|------------|---|
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides policer reference mbs</b> ( <i>number   keyword</i> ) |
| Tree       | <a href="#">mbs</a>   |
| Range      | 0 to 268435456  |
| Units      | bytes   |
| Options    | auto  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **packet-byte-offset** *number*

|            |   |
|------------|---|
| Synopsis   | Packet size modification for policing information   |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides policer reference packet-byte-offset number</b> |
| Tree       | <a href="#">packet-byte-offset</a>  |
| Range      | -32 to 31   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **percent-rate**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>percent-rate</b> context  |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides policer reference percent-rate</b> |
| Tree       | <a href="#">percent-rate</a>   |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .                                |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

### **cir** *decimal-number*

|          |   |
|----------|---|
| Synopsis | CIR percent rate  |
| Context  | <b>configure service vpls string sap string ingress qos sap-ingress overrides policer reference percent-rate cir decimal-number</b> |
| Tree     | <a href="#">cir</a>   |
| Range    | 0.00 to 100.00  |

|            |  |
|------------|--|
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR |

### **pir** *decimal-number*

|            |   |
|------------|---|
| Synopsis   | PIR percent rate  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <a href="#">percent-rate</a> <b>pir</b> <i>decimal-number</i> |
| Tree       | <a href="#">pir</a>   |
| Range      | 0.01 to 100.00  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **rate**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>rate</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <b>rate</b> |
| Tree       | <a href="#">rate</a>  |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR  |

### **cir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CIR rate   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <a href="#">rate</a> <b>cir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cir</a>  |
| Range      | 0 to 6400000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR   |

**pir** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | PIR rate   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qos</a> <a href="#">sap-ingress</a> <a href="#">overrides</a> <a href="#">policer</a> <a href="#">reference</a> <a href="#">rate</a> <b>pir</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">pir</a>  |

| Introduced | 16.0.R1  |
| Platforms  | All  |

## cir keyword

|            |   |
|------------|---|
| Synopsis   | Constraint used when deriving the operational CIR value   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides</a> <a href="#">queue</a> <i>reference</i> <a href="#">adaptation-rule</a> <a href="#">cir</a> <i>keyword</i> |
| Tree       | <a href="#">cir</a>   |
| Options    | max, min, closest   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## pir keyword

|            |   |
|------------|---|
| Synopsis   | Constraint used when deriving the operational PIR value   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress qos sap-ingress overrides</a> <a href="#">queue</a> <i>reference</i> <a href="#">adaptation-rule</a> <a href="#">pir</a> <i>keyword</i> |
| Tree       | <a href="#">pir</a>   |
| Options    | max, min, closest   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**cbs** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | CBS  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos sap-ingress overrides queue reference cbs</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">cbs</a>  |
| Range      | 0 to 1048576   |
| Units      | kilobytes  |
| Options    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**drop-tail**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>drop-tail</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos sap-ingress overrides queue reference drop-tail</a> |
| Tree       | <a href="#">drop-tail</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**low**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>low</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos sap-ingress overrides queue reference drop-tail low</a> |
| Tree       | <a href="#">low</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**percent-reduction-from-mbs** (*number* | *keyword*)

|          |   |
|----------|---|
| Synopsis | Percentage reduction from the MBS for a queue drop tail   |
| Context  | <b>configure</b> <a href="#">service vpls string sap string ingress qos sap-ingress overrides queue reference drop-tail low percent-reduction-from-mbs</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree     | <a href="#">percent-reduction-from-mbs</a>  |
| Range    | 0 to 100  |

|            |         |
|------------|---------|
| Options    | auto    |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **mbs** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | MBS  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos sap-ingress overrides queue reference mbs</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mbs</a>  |
| Range      | 0 to 1073741824  |
| Units      | bytes  |
| Options    | auto   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **monitor-queue-depth**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>monitor-queue-depth</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos sap-ingress overrides queue reference monitor-queue-depth</a> |
| Tree       | <a href="#">monitor-queue-depth</a>   |
| Introduced | 21.7.R1   |
| Platforms  | All   |

### **fast-polling** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable fast polling of the queue depth   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos sap-ingress overrides queue reference monitor-queue-depth fast-polling boolean</a> |
| Tree       | <a href="#">fast-polling</a>   |
| Default    | false  |
| Introduced | 21.7.R1  |
| Platforms  | All  |

## parent

|            |  |
|------------|--|
| Synopsis   | Enter the <b>parent</b> context  |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides queue reference parent</b> |
| Tree       | <b>parent</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## cir-weight *number*

|            |  |
|------------|--|
| Synopsis   | CIR parameter that overrides parent for queue group  |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides queue reference parent cir-weight number</b> |
| Tree       | <b>cir-weight</b>  |
| Range      | 0 to 100   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## weight *number*

|            |  |
|------------|--|
| Synopsis   | PIR parameter that overrides parent for queue group  |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides queue reference parent weight number</b> |
| Tree       | <b>weight</b>  |
| Range      | 0 to 100   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## percent-rate

|            |  |
|------------|--|
| Synopsis   | Enter the <b>percent-rate</b> context  |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides queue reference percent-rate</b> |
| Tree       | <b>percent-rate</b>  |
| Notes      | The following elements are part of a choice: <b>percent-rate</b> or <b>rate</b> .                              |
| Introduced | 16.0.R1  |

Platforms All

### **cir** *decimal-number*

Synopsis CIR percent rate

Context **configure** [service vpls string sap string ingress qos sap-ingress overrides queue reference percent-rate cir decimal-number](#)

Tree [cir](#)

Range 0.00 to 100.00

Introduced 16.0.R1

Platforms All

### **pir** *decimal-number*

Synopsis PIR percent rate

Context **configure** [service vpls string sap string ingress qos sap-ingress overrides queue reference percent-rate pir decimal-number](#)

Tree [pir](#)

Range 0.01 to 100.00

Introduced 16.0.R1

Platforms All

### **rate**

Synopsis Enter the **rate** context

Context **configure** [service vpls string sap string ingress qos sap-ingress overrides queue reference rate](#)

Tree [rate](#)

Notes The following elements are part of a choice: **percent-rate** or **rate**.

Introduced 16.0.R1

Platforms All

### **cir** (*number* | *keyword*)

Synopsis CIR rate

|            |  |
|------------|--|
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides queue reference rate cir</b> ( <i>number   keyword</i> ) |
| Tree       | <a href="#">cir</a>  |
| Range      | 0 to 6400000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**pir** (*number | keyword*)

|            |  |
|------------|--|
| Synopsis   | PIR rate   |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress overrides queue reference rate pir</b> ( <i>number   keyword</i> ) |
| Tree       | <a href="#">pir</a>  |
| Range      | 1 to 6400000000  |
| Units      | kilobps  |
| Options    | max  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**policy-name** *reference*

|            |  |
|------------|--|
| Synopsis   | Policy ID  |
| Context    | <b>configure service vpls string sap string ingress qos sap-ingress policy-name</b> <i>reference</i> |
| Tree       | <a href="#">policy-name</a>  |
| Reference  | <b>configure qos sap-ingress string</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**queuing-type** *keyword*

|          |   |
|----------|---|
| Synopsis | Queuing type  |
| Context  | <b>configure service vpls string sap string ingress qos sap-ingress queuing-type</b> <i>keyword</i> |
| Tree     | <a href="#">queuing-type</a>  |

|            |   |
|------------|---|
| Options    | shared, multipoint-shared                             |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e, VSR |

## **scheduler-policy**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>scheduler-policy</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos scheduler-policy</a> |
| Tree       | <a href="#">scheduler-policy</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **overrides**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>overrides</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos scheduler-policy overrides</a> |
| Tree       | <a href="#">overrides</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **scheduler** [[scheduler-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>scheduler</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos scheduler-policy overrides scheduler string</a> |
| Tree       | <a href="#">scheduler</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **[scheduler-name]** *string*

|          |   |
|----------|---|
| Synopsis | Scheduler name  |
| Context  | <b>configure</b> <a href="#">service vpls string sap string ingress qos scheduler-policy overrides scheduler string</a> |
| Tree     | <a href="#">scheduler</a>   |

|               |  |
|---------------|--|
| Description   | <p>This command specifies the scheduler name which is composed of printable 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes. Each scheduler must have a unique name within the context of the scheduler policy. However, the same name can be reused in multiple scheduler policies. If the scheduler name already exists within the policy tier level, the context changes to that scheduler name for the purpose of editing the scheduler commands.</p> <p>If the scheduler name exists within the policy on a different tier, an error occurs and the current context will not change. If the scheduler name does not exist in this or another tier within the scheduler policy, it is assumed that an attempt is being made to create a scheduler of that name.</p> <p>If the provided scheduler name is invalid, a name syntax error will occur, the command will not execute, and the context will not change.</p> |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

## parent

|            |  |
|------------|--|
| Synopsis   | Enter the <b>parent</b> context  |
| Context    | <b>configure service vpls</b> <i>string</i> <b>sap</b> <i>string</i> <b>ingress qos scheduler-policy overrides scheduler</b> <i>string</i> <b>parent</b> |
| Tree       | <b>parent</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## cir-weight *number*

|            |   |
|------------|---|
| Synopsis   | Weight used at the within-CIR port priority level   |
| Context    | <b>configure service vpls</b> <i>string</i> <b>sap</b> <i>string</i> <b>ingress qos scheduler-policy overrides scheduler</b> <i>string</i> <b>parent cir-weight</b> <i>number</i> |
| Tree       | <b>cir-weight</b>   |
| Range      | 0 to 100  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**weight number**

|            |  |
|------------|--|
| Synopsis   | Relative weight of the scheduler to feed the queue   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string sap</a> <a href="#">string ingress qos scheduler-policy overrides scheduler</a> <a href="#">string parent weight number</a> |
| Tree       | <a href="#">weight</a>   |
| Range      | 0 to 100   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**rate**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>rate</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string sap</a> <a href="#">string ingress qos scheduler-policy overrides scheduler</a> <a href="#">string rate</a> |
| Tree       | <a href="#">rate</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**cir (number | keyword)**

|            |   |
|------------|---|
| Synopsis   | CIR at which the queue it to operate  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string sap</a> <a href="#">string ingress qos scheduler-policy overrides scheduler</a> <a href="#">string rate cir (number   keyword)</a> |
| Tree       | <a href="#">cir</a>   |
| Range      | 0 to 6400000000   |
| Units      | kilobps   |
| Options    | sum, max  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**pir (number | keyword)**

|          |   |
|----------|---|
| Synopsis | PIR at which the queue is to operate  |
| Context  | <b>configure</b> <a href="#">service vpls</a> <a href="#">string sap</a> <a href="#">string ingress qos scheduler-policy overrides scheduler</a> <a href="#">string rate pir (number   keyword)</a> |
| Tree     | <a href="#">pir</a>   |

|            |                 |
|------------|-----------------|
| Range      | 1 to 6400000000 |
| Units      | kilobps         |
| Options    | max             |
| Introduced | 16.0.R1         |
| Platforms  | All             |

### **policy-name** *reference*

|            |  |
|------------|--|
| Synopsis   | Scheduler policy name  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qos scheduler-policy policy-name reference</a> |
| Tree       | <a href="#">policy-name</a>  |
| Reference  | <b>configure</b> <a href="#">qos scheduler-policy string</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **qtag-manipulation**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>qtag-manipulation</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qtag-manipulation</a> |
| Tree       | <a href="#">qtag-manipulation</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **c-tag** (*number | keyword*)

|            |  |
|------------|--|
| Synopsis   | Inner ingress vlan translation for two service delimiting vlan values  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string ingress qtag-manipulation c-tag (number   keyword)</a> |
| Tree       | <a href="#">c-tag</a>  |
| Range      | 0 to 4094  |
| Options    | tag-*  |
| Notes      | The following elements are part of a choice: <b>push-dot1q-vlan</b> or ( <b>c-tag</b> and <b>s-tag</b> ).          |
| Introduced | 22.10.R1   |
| Platforms  | All  |

**push-dot1q-vlan** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | VLAN translation information   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qtag-manipulation</a> <a href="#">push-dot1q-vlan</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">push-dot1q-vlan</a>  |
| Range      | 0 to 4094  |
| Options    | use-sap-svlan  |
| Notes      | The following elements are part of a choice: <b>push-dot1q-vlan</b> or ( <b>c-tag</b> and <b>s-tag</b> ).  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**s-tag** *number*

|            |   |
|------------|---|
| Synopsis   | Outer ingress VLAN translation for two service delimiting VLAN values   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">ingress</a> <a href="#">qtag-manipulation</a> <a href="#">s-tag</a> <i>number</i> |
| Tree       | <a href="#">s-tag</a>   |
| Range      | 0 to 4094   |
| Notes      | The following elements are part of a choice: <b>push-dot1q-vlan</b> or ( <b>c-tag</b> and <b>s-tag</b> ).   |
| Introduced | 22.10.R1  |
| Platforms  | All   |

**l2pt**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>l2pt</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">l2pt</a> |
| Tree       | <a href="#">l2pt</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**force-boundary**

|          |   |
|----------|---|
| Synopsis | Enable the <b>force-boundary</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">l2pt</a> <a href="#">force-boundary</a> |

### **ethernet**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Enable the Ethernet PW-type for the L2TPv3 session   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">l2tpv3-session</a> <a href="#">pseudo-wire</a> <b>ethernet</b> |
| Tree       | <a href="#">ethernet</a>   |
| Notes      | The following elements are part of a choice: <b>ethernet</b> or <b>ethernet-vlan-id</b> .  |
| Introduced | 16.0.R4  |

Platforms All

## ethernet-vlan-id *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Ethernet-VLAN PW-type ID for the L2TPv3 session  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string l2tpv3-session pseudo-wire ethernet-vlan-id number</a> |
| Tree       | <a href="#">ethernet-vlan-id</a>   |
| Range      | 0 to 4095  |
| Notes      | The following elements are part of a choice: <b>ethernet</b> or <b>ethernet-vlan-id</b> .                          |
| Introduced | 16.0.R4  |
| Platforms  | All  |

## router

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Enter the <b>router</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string l2tpv3-session router</a> |
| Tree       | <a href="#">router</a>  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

## group *string*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Tunnel group name  |
| Context  | <b>configure</b> <a href="#">service vpls string sap string l2tpv3-session router group string</a> |
| Tree     | <a href="#">group</a>  |

String Length 1 to 32  
 Introduced 16.0.R4  
 Platforms All

### **router-instance** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Router name used to identify the router instance  
 Context **configure** [service vpls string sap string l2tpv3-session](#) [router router-instance string](#)  
 Tree [router-instance](#)  
 String Length 1 to 64  
 Introduced 16.0.R4  
 Platforms All

### **vc-id** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis VC ID for the L2TPv3 session  
 Context **configure** [service vpls string sap string l2tpv3-session](#) [vc-id number](#)  
 Tree [vc-id](#)  
 Range 1 to 4294967295  
 Introduced 16.0.R4  
 Platforms All

### **lag**

Synopsis Enter the **lag** context  
 Context **configure** [service vpls string sap string](#) [lag](#)  
 Tree [lag](#)  
 Introduced 16.0.R1  
 Platforms All

### **link-map-profile** *number*

|             |   |
|-------------|---|
| Synopsis    | LAG link map profile for a SAP or network interface   |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <a href="#">link-map-profile</a> <i>number</i>  |
| Tree        | <a href="#">link-map-profile</a>  |
| Description | <p>This command assigns a preconfigured LAG link map profile to a SAP or network interface configured on a LAG or a PW port that exists on a LAG. After an operator assigns a LAG link map profile, the system rehashes the SAP or network interface egress traffic over the LAG as required by the new configuration.</p> <p>If the LAG link map profile for a SAP or network interface is deleted, the system reverts back to per-flow hashing.</p> |
| Range       | 1 to 64   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **per-link-hash**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>per-link-hash</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <a href="#">per-link-hash</a> |
| Tree       | <a href="#">per-link-hash</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **class** *number*

|            |   |
|------------|---|
| Synopsis   | Class used on LAG egress using weighted per-link-hash   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">lag</a> <a href="#">per-link-hash</a> <a href="#">class</a> <i>number</i> |
| Tree       | <a href="#">class</a>   |
| Range      | 1 to 3  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **weight** *number*

|          |  |
|----------|--|
| Synopsis | Weight used on LAG egress using weighted per-link-hash |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vpls string sap string lag per-link-hash weight number</b> |
| Tree       | <b>weight</b>   |
| Range      | 1 to 1024   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## managed-vlan-list

|            |   |
|------------|---|
| Synopsis   | Enter the <b>managed-vlan-list</b> context                        |
| Context    | <b>configure service vpls string sap string managed-vlan-list</b> |
| Tree       | <b>managed-vlan-list</b>  |
| Introduced | 19.10.R1  |
| Platforms  | All   |

## range [vlan-range] string

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>range</b>  |
| Context    | <b>configure service vpls string sap string managed-vlan-list range string</b> |
| Tree       | <b>range</b>   |
| Introduced | 19.10.R1   |
| Platforms  | All  |

## [vlan-range] string

|            |  |
|------------|--|
| Synopsis   | Range of VLANs associated with the M-VPLS SAP                                  |
| Context    | <b>configure service vpls string sap string managed-vlan-list range string</b> |
| Tree       | <b>range</b>   |
| Notes      | This element is part of a list key.  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

## mc-ring

|          |                                   |
|----------|-----------------------------------|
| Synopsis | Enable the <b>mc-ring</b> context |
|----------|-----------------------------------|

---

|            |   |
|------------|---|
| Context    | <b>configure service vpls string sap string mc-ring</b> |
| Tree       | <b>mc-ring</b>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **ring-node** *string*

|               |  |
|---------------|--|
| Synopsis      | Name for the ring node associated with this SAP                          |
| Context       | <b>configure service vpls string sap string mc-ring ring-node string</b> |
| Tree          | <b>ring-node</b>   |
| String Length | 1 to 32  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **mld-snooping**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mld-snooping</b> context                        |
| Context    | <b>configure service vpls string sap string mld-snooping</b> |
| Tree       | <b>mld-snooping</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **fast-leave** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow IGMP fast leave processing  |
| Context    | <b>configure service vpls string sap string mld-snooping fast-leave boolean</b> |
| Tree       | <b>fast-leave</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **import-policy** *reference*

|          |   |
|----------|---|
| Synopsis | Import policy that filters IGMP packets |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">import-policy</a> <i>reference</i> |
| Tree       | <a href="#">import-policy</a>   |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **maximum-number-groups** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum groups allowed   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">maximum-number-groups</a> <i>number</i> |
| Tree       | <a href="#">maximum-number-groups</a>  |
| Range      | 1 to 16000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mrouter-port** *boolean*

|            |  |
|------------|--|
| Synopsis   | Operate port as a multicast router port  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">mrouter-port</a> <i>boolean</i> |
| Tree       | <a href="#">mrouter-port</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mvr**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mvr</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">mvr</a> |
| Tree       | <a href="#">mvr</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **from-vpls** *reference*

|          |  |
|----------|--|
| Synopsis | MVR VPLS from which the multicast channels are taken |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service vpls string sap string mld-snooping mvr from-vpls reference</b> |
| Tree       | <a href="#">from-vpls</a>  |
| Reference  | <b>configure service vpls string</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **to-sap string**

|               |  |
|---------------|--|
| Synopsis      | SAP to which the multicast channels are copied                                 |
| Context       | <b>configure service vpls string sap string mld-snooping mvr to-sap string</b> |
| Tree          | <a href="#">to-sap</a>   |
| String Length | 1 to 45  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

### **query-interval number**

|            |  |
|------------|--|
| Synopsis   | Time between two consecutive host-query messages                                   |
| Context    | <b>configure service vpls string sap string mld-snooping query-interval number</b> |
| Tree       | <a href="#">query-interval</a>   |
| Range      | 2 to 1024  |
| Units      | seconds  |
| Default    | 125  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **query-last-member-interval number**

|          |  |
|----------|--|
| Synopsis | Time between group-specific query messages   |
| Context  | <b>configure service vpls string sap string mld-snooping query-last-member-interval number</b> |
| Tree     | <a href="#">query-last-member-interval</a>   |
| Range    | 1 to 50  |
| Units    | deciseconds  |
| Default  | 10   |

---

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **query-response-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time to wait for a response to the host-query messages   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">query-response-interval</a> <i>number</i> |
| Tree       | <a href="#">query-response-interval</a>  |
| Range      | 1 to 1023  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **robust-count** *number*

|            |   |
|------------|---|
| Synopsis   | Number of retries after expected message loss   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">robust-count</a> <i>number</i> |
| Tree       | <a href="#">robust-count</a>  |
| Range      | 2 to 7  |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **router-alert-check** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable IP router alert check option  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">router-alert-check</a> <i>boolean</i> |
| Tree       | <a href="#">router-alert-check</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**send-queries** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate IGMP general queries  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">send-queries</a> <i>boolean</i> |
| Tree       | <a href="#">send-queries</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**static**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>static</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">static</a> |
| Tree       | <a href="#">static</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**group** [[group-address](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>group</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">static</a> <a href="#">group</a> <i>string</i> |
| Tree       | <a href="#">group</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[group-address]** *string*

|            |   |
|------------|---|
| Synopsis   | Group address of multicast channel  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">static</a> <a href="#">group</a> <i>string</i> |
| Tree       | <a href="#">group</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**source** [[source-address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>source</b>   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">sap string</a> <a href="#">mld-snooping static group string</a> <a href="#">source string</a> |
| Tree       | <a href="#">source</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[source-address]** *string*

|            |  |
|------------|--|
| Synopsis   | Source IP address  |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">sap string</a> <a href="#">mld-snooping static group string</a> <a href="#">source string</a> |
| Tree       | <a href="#">source</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R2  |
| Platforms  | All  |

**starg**

|            |  |
|------------|--|
| Synopsis   | any source address (*,G)   |
| Context    | <b>configure</b> <a href="#">service vpls string</a> <a href="#">sap string</a> <a href="#">mld-snooping static group string</a> <a href="#">starg</a> |

**pbb**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pbb</b> context                        |
| Context    | <b>configure service vpls string sap string pbb</b> |
| Tree       | <a href="#">pbb</a>                                 |
| Introduced | 20.10.R1  |
| Platforms  | All   |

## fault-propagation

|            |   |
|------------|---|
| Synopsis   | Enter the <b>fault-propagation</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">pbb</a> <a href="#">fault-propagation</a> |
| Tree       | <a href="#">fault-propagation</a>   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

## backbone-mac-address [[address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>backbone-mac-address</b>   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">pbb</a> <a href="#">fault-propagation</a> <a href="#">backbone-mac-address</a> <i>string</i> |
| Tree       | <a href="#">backbone-mac-address</a>   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## [[address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Backbone MAC address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">pbb</a> <a href="#">fault-propagation</a> <a href="#">backbone-mac-address</a> <i>string</i> |
| Tree       | <a href="#">backbone-mac-address</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## backbone-mac-name [[name](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>backbone-mac-name</b>  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">pbb</a> <a href="#">fault-propagation</a> <a href="#">backbone-mac-name</a> <i>reference</i> |
| Tree       | <a href="#">backbone-mac-name</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**[name] reference**

|            |   |
|------------|---|
| Synopsis   | Backbone MAC address name   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string pbb fault-propagation backbone-mac-name reference</a> |
| Tree       | <a href="#">backbone-mac-name</a>   |
| Reference  | <b>configure</b> <a href="#">service pbb mac string</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**pim-snooping**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>pim-snooping</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string pim-snooping</a> |
| Tree       | <a href="#">pim-snooping</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**maximum-number-groups number**

|            |   |
|------------|---|
| Synopsis   | Maximum groups for this interface   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string pim-snooping maximum-number-groups number</a> |
| Tree       | <a href="#">maximum-number-groups</a>   |
| Range      | 1 to 16000  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**process-cpm-traffic-on-sap-down boolean**

|            |   |
|------------|---|
| Synopsis   | Process CPM traffic on SAP down event   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string process-cpm-traffic-on-sap-down boolean</a> |
| Tree       | <a href="#">process-cpm-traffic-on-sap-down</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |

Platforms All

### **radius-auth-policy** *reference*

Synopsis RADIUS authentication policy  
 Context **configure** [service vpls string sap string radius-auth-policy reference](#)  
 Tree [radius-auth-policy](#)  
 Reference **configure** [subscriber-mgmt radius-authentication-policy string](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **shcv-policy-ipv4** *reference*

Synopsis Subscriber host connectivity verification policy for IPv4  
 Context **configure** [service vpls string sap string shcv-policy-ipv4 reference](#)  
 Tree [shcv-policy-ipv4](#)  
 Reference **configure** [subscriber-mgmt shcv-policy string](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **spb**

Synopsis Enable the **spb** context  
 Context **configure** [service vpls string sap string spb](#)  
 Tree [spb](#)  
 Introduced 21.10.R1  
 Platforms All

### **admin-state** *keyword*

Synopsis Admin state  
 Context **configure** [service vpls string sap string spb admin-state keyword](#)  
 Tree [admin-state](#)  
 Options enable, disable  
 Default disable

Introduced 21.10.R1  
 Platforms All

### **level** [*id*] *number*

Synopsis Enter the **level** list instance  
 Context **configure** *service vpls string sap string spb level number*  
 Tree [level](#)  
 Introduced 21.10.R1  
 Platforms All

### **[id]** *number*

Synopsis Level identifier  
 Context **configure** *service vpls string sap string spb level number*  
 Tree [level](#)  
 Range 1  
 Notes This element is part of a list key.  
 Introduced 21.10.R1  
 Platforms All

### **hello-interval** *number*

Synopsis Hello interval  
 Context **configure** *service vpls string sap string spb level number hello-interval number*  
 Tree [hello-interval](#)  
 Range 1 to 20000  
 Units seconds  
 Default 9  
 Introduced 21.10.R1  
 Platforms All

### **hello-multiplier** *number*

Synopsis Hello multiplier

|            |  |
|------------|--|
| Context    | <b>configure service vpls string sap string spb level number hello-multiplier number</b> |
| Tree       | <a href="#">hello-multiplier</a>   |
| Range      | 2 to 100   |
| Default    | 3  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

**metric number**

|            |  |
|------------|--|
| Synopsis   | Metric   |
| Context    | <b>configure service vpls string sap string spb level number metric number</b> |
| Tree       | <a href="#">metric</a>   |
| Range      | 0 to 16777215  |
| Default    | 0  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

**lsp-pacing-interval number**

|            |  |
|------------|--|
| Synopsis   | Lsp pacing interval  |
| Context    | <b>configure service vpls string sap string spb lsp-pacing-interval number</b> |
| Tree       | <a href="#">lsp-pacing-interval</a>  |
| Range      | 0 to 65535   |
| Units      | milliseconds   |
| Default    | 100  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

**retransmit-interval number**

|          |  |
|----------|--|
| Synopsis | Retransmit interval  |
| Context  | <b>configure service vpls string sap string spb retransmit-interval number</b> |
| Tree     | <a href="#">retransmit-interval</a>  |
| Range    | 1 to 65535   |
| Units    | seconds  |

|            |          |
|------------|----------|
| Default    | 5        |
| Introduced | 21.10.R1 |
| Platforms  | All      |

### **split-horizon-group** *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Split horizon group   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string split-horizon-group reference</a> |
| Tree       | <a href="#">split-horizon-group</a>   |
| Reference  | <b>configure</b> <a href="#">service vpls string split-horizon-group string</a>               |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **static-host**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>static-host</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string static-host</a> |
| Tree       | <a href="#">static-host</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                     |

### **ipv4** [[ip](#)] [string](#) [mac string](#)

|            |  |
|------------|--|
| Synopsis   | Enter the <b>ipv4</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string static-host ipv4 string mac string</a> |
| Tree       | <a href="#">ipv4</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **[ip]** [string](#)

|          |            |
|----------|------------|
| Synopsis | IP address |
|----------|------------|

|            |  |
|------------|--|

|            |   |
|------------|---|
| Synopsis   | Multiple Spanning Tree Instance number                                  |
| Context    | <b>configure service vpls string sap string stp mst-instance number</b> |
| Tree       | <b>mst-instance</b>   |
| Range      | 1 to 4094   |
| Notes      | This element is part of a list key.                                     |
| Introduced | 19.10.R1  |
| Platforms  | All   |

### **mst-path-cost number**

|            |  |
|------------|--|
| Synopsis   | MSTI path cost   |
| Context    | <b>configure service vpls string sap string stp mst-instance number mst-path-cost number</b> |
| Tree       | <b>mst-path-cost</b>   |
| Range      | 1 to 200000000   |
| Default    | 10   |
| Introduced | 19.10.R1   |
| Platforms  | All  |

### **mst-port-priority number**

|            |  |
|------------|--|
| Synopsis   | MSTI port priority   |
| Context    | <b>configure service vpls string sap string stp mst-instance number mst-port-priority number</b> |
| Tree       | <b>mst-port-priority</b>   |
| Range      | 0   16   32   48   64   80   96   112   128   144   160   176   192   208   224   240            |
| Default    | 128  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

**path-cost** *number*

|            |   |
|------------|---|
| Synopsis   | Configure path-cost   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">stp</a> <a href="#">path-cost</a> <i>number</i> |
| Tree       | <a href="#">path-cost</a>   |
| Range      | 1 to 200000000  |
| Default    | 10  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**port-num** *number*

|            |  |
|------------|--|
| Synopsis   | Configure virtual port number  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">stp</a> <a href="#">port-num</a> <i>number</i> |
| Tree       | <a href="#">port-num</a>   |
| Range      | 1 to 2047  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**priority** *number*

|            |  |
|------------|--|
| Synopsis   | Configure STP priority   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">stp</a> <a href="#">priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>   |
| Range      | 0 to 255   |
| Default    | 128  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**root-guard** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable/disable STP root-guard   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">stp</a> <a href="#">root-guard</a> <i>boolean</i> |
| Tree     | <a href="#">root-guard</a>  |
| Default  | false   |

|            |         |
|------------|---------|
| Introduced | 16.0.R4 |
| Platforms  | All     |

## sub-sla-mgmt

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sub-sla-mgmt</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string sub-sla-mgmt</a> |
| Tree       | <a href="#">sub-sla-mgmt</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                      |

## admin-state *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of SAP subscriber management  |
| Context    | <b>configure</b> <a href="#">service vpls string sap string sub-sla-mgmt admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | disable  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## defaults

|            |   |
|------------|---|
| Synopsis   | Enter the <b>defaults</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string sap string sub-sla-mgmt defaults</a> |
| Tree       | <a href="#">defaults</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                               |

## app-profile *reference*

|           |  |
|-----------|--|
| Synopsis  | Default application profile name for this SAP  |
| Context   | <b>configure</b> <a href="#">service vpls string sap string sub-sla-mgmt defaults app-profile reference</a>    |
| Tree      | <a href="#">app-profile</a>  |
| Reference | <b>configure</b> <a href="#">application-assurance group number partition number policy app-profile string</a> |

Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **int-dest-id**

Synopsis Enter the **int-dest-id** context  
Context **configure service vpls string sap string sub-sla-mgmt defaults int-dest-id**  
Tree [int-dest-id](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **string string**

Synopsis Use the configured string  
Context **configure service vpls string sap string sub-sla-mgmt defaults int-dest-id string string**  
Tree [string](#)  
String Length 1 to 32  
Notes The following elements are part of a choice: **string** or **top-q-tag**.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **top-q-tag**

Synopsis Use the top Q-tag of this SAP  
Context **configure service vpls string sap string sub-sla-mgmt defaults int-dest-id top-q-tag**  
Tree [top-q-tag](#)  
Notes The following elements are part of a choice: **string** or **top-q-tag**.  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **sla-profile reference**

Synopsis Default SLA profile for hosts on this SAP  
Context **configure service vpls string sap string sub-sla-mgmt defaults sla-profile reference**  
Tree [sla-profile](#)

|            |  |
|------------|--|
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sla-profile</a> <i>string</i> |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                                    |

### **sub-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Default subscriber profile for the SAP   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">sub-profile</a> <i>reference</i> |
| Tree       | <a href="#">sub-profile</a>  |
| Reference  | <b>configure</b> <a href="#">subscriber-mgmt</a> <a href="#">sub-profile</a> <i>string</i>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **subscriber-id**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>subscriber-id</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">subscriber-id</a> |
| Tree       | <a href="#">subscriber-id</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **auto-id**

|            |   |
|------------|---|
| Synopsis   | Use auto-generated subscriber identification string   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">subscriber-id</a> <a href="#">auto-id</a> |
| Tree       | <a href="#">auto-id</a>   |
| Notes      | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sap-id**

|          |  |
|----------|--|
| Synopsis | Use SAP ID as default subscriber identification string   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">defaults</a> <a href="#">subscriber-id</a> <a href="#">sap-id</a> |
| Tree     | <a href="#">sap-id</a>   |

|            |  |
|------------|--|
| Notes      | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **string** *string*

|               |   |
|---------------|---|
| Synopsis      | Default subscriber identification string for the SAP  |
| Context       | <b>configure</b> <a href="#">service vpls</a> <a href="#">string sap</a> <a href="#">string sub-sla-mgmt defaults subscriber-id</a> <a href="#">string string</a> |
| Tree          | <a href="#">string</a>  |
| String Length | 1 to 64   |
| Notes         | The following elements are part of a choice: <b>auto-id</b> , <b>sap-id</b> , or <b>string</b> .  |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **mac-da-hashing** *boolean*

|            |   |
|------------|---|
| Synopsis   | Use destination MAC address instead of subscriber ID to select egress LAG link  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string sap</a> <a href="#">string sub-sla-mgmt mac-da-hashing</a> <a href="#">boolean</a> |
| Tree       | <a href="#">mac-da-hashing</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **single-sub-parameters**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>single-sub-parameters</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string sap</a> <a href="#">string sub-sla-mgmt single-sub-parameters</a> |
| Tree       | <a href="#">single-sub-parameters</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **non-sub-traffic**

|          |   |
|----------|---|
| Synopsis | Enable the <b>non-sub-traffic</b> context |
|----------|---|

|            |  |
|------------|--|
| Context    | <b>configure service vpls string sap string sub-sla-mgmt single-sub-parameters non-sub-traffic</b> |
| Tree       | <a href="#">non-sub-traffic</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **app-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Application profile name for all non-subscriber traffic  |
| Context    | <b>configure service vpls string sap string sub-sla-mgmt single-sub-parameters non-sub-traffic app-profile reference</b> |
| Tree       | <a href="#">app-profile</a>  |
| Reference  | <b>configure application-assurance group number partition number policy app-profile string</b>                           |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **sla-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | SLA profile applicable for all non-subscriber traffic  |
| Context    | <b>configure service vpls string sap string sub-sla-mgmt single-sub-parameters non-sub-traffic sla-profile reference</b> |
| Tree       | <a href="#">sla-profile</a>  |
| Reference  | <b>configure subscriber-mgmt sla-profile string</b>  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **sub-profile** *reference*

|            |  |
|------------|--|
| Synopsis   | Subscriber profile all non-subscriber traffic  |
| Context    | <b>configure service vpls string sap string sub-sla-mgmt single-sub-parameters non-sub-traffic sub-profile reference</b> |
| Tree       | <a href="#">sub-profile</a>  |
| Reference  | <b>configure subscriber-mgmt sub-profile string</b>  |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### subscriber-id *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Subscriber ID applied for all non-subscriber traffic

Context **configure** [service vpls string sap string sub-sla-mgmt single-sub-parameters non-sub-traffic subscriber-id string](#)

Tree [subscriber-id](#)

String Length 1 to 64

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### profiled-traffic-only *boolean*

Synopsis Include all traffic in subscriber profile

Context **configure** [service vpls string sap string sub-sla-mgmt single-sub-parameters profiled-traffic-only boolean](#)

Tree [profiled-traffic-only](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### sub-ident-policy *reference*

Synopsis Subscriber identification policy used on this SAP

Context **configure** [service vpls string sap string sub-sla-mgmt sub-ident-policy reference](#)

Tree [sub-ident-policy](#)

Reference **configure** [subscriber-mgmt sub-ident-policy string](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**subscriber-limit** (*keyword* | *number*)

|            |  |
|------------|--|
| Synopsis   | Maximum number of subscribers on this SAP  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">sub-sla-mgmt</a> <a href="#">subscriber-limit</a> ( <i>keyword</i>   <i>number</i> ) |
| Tree       | <a href="#">subscriber-limit</a>   |
| Range      | 1 to 131071  |
| Options    | no-limit   |
| Default    | 1  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**transit-policy**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>transit-policy</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">transit-policy</a> |
| Tree       | <a href="#">transit-policy</a>   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**ip reference****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | IP transit policy ID   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">transit-policy</a> <a href="#">ip reference</a>                          |
| Tree       | <a href="#">ip</a>   |
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <a href="#">group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">transit-ip-policy</a> <i>number</i> |
| Notes      | The following elements are part of a mandatory choice: <b>ip</b> or <b>prefix</b> .  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**prefix reference****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | IP prefix policy ID   |
| Context    | <b>configure service vpls string sap string transit-policy prefix reference</b>                   |
| Tree       | <a href="#">prefix</a>  |
| Reference  | <b>configure application-assurance group number partition number transit-prefix-policy number</b> |
| Notes      | The following elements are part of a mandatory choice: <b>ip</b> or <b>prefix</b> .               |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**segment-routing-v6 [instance] number**

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>segment-routing-v6</b> list instance              |
| Context        | <b>configure service vpls string segment-routing-v6 number</b> |
| Tree           | <a href="#">segment-routing-v6</a>                             |
| Max. Instances | 1  |
| Introduced     | 22.7.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR                    |

**[instance] number**

|            |  |
|------------|--|
| Synopsis   | Segment routing v6 instance                                    |
| Context    | <b>configure service vpls string segment-routing-v6 number</b> |
| Tree       | <a href="#">segment-routing-v6</a>                             |
| Range      | 1  |
| Notes      | This element is part of a list key.                            |
| Introduced | 22.7.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR                    |

**locator** [[locator-name](#)] *reference*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>locator</b> list instance  |
| Context        | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">segment-routing-v6</a> <i>number</i> <a href="#">locator</a> <i>reference</i> |
| Tree           | <a href="#">locator</a>   |
| Max. Instances | 1   |
| Introduced     | 22.7.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

**[locator-name]** *reference*

|            |  |
|------------|--|
| Synopsis   | SRv6 locator name  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">segment-routing-v6</a> <i>number</i> <a href="#">locator</a> <i>reference</i>          |

| Context        | <b>configure service vpls string segment-routing-v6 number micro-segment-locator reference</b> |
| Tree           | <a href="#">micro-segment-locator</a>  |
| Max. Instances | 1  |
| Introduced     | 22.10.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

**[locator-name]** *reference*

|             |   |
|-------------|---|
| Synopsis    | Micro-segment SRv6 locator name   |
| Context     | <b>configure service vpls string segment-routing-v6 number micro-segment-locator reference</b>  |
| Tree        | <a href="#">micro-segment-locator</a>   |
| Description | This command associates a pre-defined micro-segment SRv6 locator (defined in the <b>configure router segment-routing segment-routing-v6</b> context) with the SRv6 instance in the service. The same micro-segment locator can be referenced in multiple BGP instances used by IPVPN or EVPN. |
| Reference   | <b>configure router string segment-routing segment-routing-v6 micro-segment-locator string</b>  |
| Notes       | This element is part of a list key.   |
| Introduced  | 22.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

**function**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>function</b> context   |
| Context    | <b>configure service vpls string segment-routing-v6 number micro-segment-locator reference function</b> |
| Tree       | <a href="#">function</a>  |
| Introduced | 22.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

## udt2m

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>udt2m</b> context   |
| Context     | <b>configure</b> <a href="#">service vpls string</a> <a href="#">segment-routing-v6 number</a> <a href="#">micro-segment-locator reference</a> <a href="#">function udt2m</a>   |
| Tree        | <a href="#">udt2m</a>   |
| Description | Commands in this context configure the SRv6 uDT2M behavior and the function value that is associated to the SRv6 instance in the service. When configured, decapsulation and table lookup for IPv6 prefixes occurs in the VPLS service. |
| Introduced  | 22.10.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

| Range      | 1 to 2147483647  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**service-mtu number**

|             |  |
|-------------|--|
| Synopsis    | MTU size   |
| Context     | <b>configure service vpls string service-mtu number</b>  |
| Tree        | <b>service-mtu</b>   |
| Description | This command configures the Maximum Transmission Unit (MTU) value (payload) for the service. The system uses the value to validate the operational state of the SAP and SDP binding within the service. The value overrides the default MTU for the service type.<br><br>The service MTU and a SAP's service delineation encapsulation overhead (4 bytes for a dot1q tag) are used to derive the required MTU of the physical port or channel on which the SAP was created. If the required payload is larger than the port or channel MTU, the SAP is placed in an inoperative state. If the required MTU is equal to or less than the port or channel MTU, the SAP transitions to the operative state. |

When binding an SDP to a service, the service MTU is compared to the path MTU associated with the SDP. The path MTU can be administratively defined in the context of the SDP. The default or administrative path MTU can be dynamically reduced due to the MTU capabilities discovered by the tunneling mechanism of the SDP or the egress interface MTU capabilities based on the next hop in the tunnel path. If the service MTU is larger than the path MTU, the SDP binding for the service is placed in an inoperative state. If the service MTU is equal to or less than the path MTU, the SDP binding is placed in an operational state.

If a service MTU, port or channel MTU, or path MTU is dynamically or administratively modified, all associated SAP and SDP binding operational states are automatically reevaluated.

Binding operational states are automatically reevaluated.

For I-VPLS and Epipes bound to a B-VPLS, the service MTU must be at least 18 bytes smaller than the B-VPLS service MTU to accommodate the PBB header.

Because this connects a Layer 2 to a Layer 3 service, adjust the service MTU under the Epipe service. The MTU that is advertised from the Epipe side is service MTU minus EtherHeaderSize.

In the **configure service epipe spoke-sdp** context, the **adv-service-mtu** command can be used to override the configured MTU value used in T-LDP signaling to the far-end of an Epipe spoke-sdp. The **adv-service-mtu** command is also used to validate the value signaled by the far-end PE.

## **auto-learn-mac-protect** *boolean*

|            |   |
|------------|---|
| Synopsis   | Populate automatically MAC protect list with MAC addresses learned on SDP with split horizon group  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">split-horizon-group</a> <a href="#">string</a> <a href="#">fdb</a> <a href="#">saps</a> <a href="#">auto-learn-mac-protect</a> <a href="#">boolean</a> |
| Tree       | <a href="#">auto-learn-mac-protect</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **auto-learn-mac-protect-exclude-list** *reference*

|          |  |
|----------|--|
| Synopsis | Referenced MAC protect exclusion list name |
|----------|--|

|             |  |
|-------------|--|
| Context     | <b>configure service vpls string split-horizon-group string fdb saps auto-learn-mac-protect-exclude-list reference</b>   |
| Tree        | <a href="#">auto-learn-mac-protect-exclude-list</a>  |
| Description | This command references the name of a MAC protect exclusion list.<br><br>Dynamically-learned MAC Source Addresses (SA) are protected if they are learned on an object with ALMP configured and no exclusion list is associated with the object, or if the MAC SA does not match any entry in an associated exclusion list.<br><br>An exclusion list can be used in multiple objects of a service. If a list is empty, ALMP does not exclude any learned MAC SAs from protection on the object. |
| Reference   | <b>configure service mac-list string</b>   |
| Introduced  | 20.5.R1  |
| Platforms   | All  |

### **discard-unprotected-dest-mac *boolean***

|            |   |
|------------|---|
| Synopsis   | Discard packet with unprotected destination MAC address   |
| Context    | <b>configure service vpls string split-horizon-group string fdb saps discard-unprotected-dest-mac boolean</b> |
| Tree       | <a href="#">discard-unprotected-dest-mac</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **protected-src-mac-violation-action *keyword***

|            |   |
|------------|---|
| Synopsis   | Action to take whenever a relearn request for a protected MAC is received   |
| Context    | <b>configure service vpls string split-horizon-group string fdb saps protected-src-mac-violation-action keyword</b> |
| Tree       | <a href="#">protected-src-mac-violation-action</a>  |
| Options    | sap-oper-down, alarm-only, discard  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**residential** *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | Define as a residential split horizon group   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">split-horizon-group</a> <i>string</i> <b>residential</b> <i>boolean</i> |
| Tree       | <a href="#">residential</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**spoke-sdp** [[sdp-bind-id](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>spoke-sdp</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <b>spoke-sdp</b> <i>string</i> |
| Tree       | <a href="#">spoke-sdp</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[sdp-bind-id]** *string*

|               |  |
|---------------|--|
| Synopsis      | SDP binding ID   |

| Tree          | <a href="#">spoke-sdp</a>  |
| String Length | 3 to 16  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**accounting-policy** *reference*

|          |  |
|----------|--|
| Synopsis | Policy to collect accounting statistics  |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>accounting-policy</b> <i>reference</i> |
| Tree     | <a href="#">accounting-policy</a>  |

|            |  |
|------------|--|
| Reference  | <b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the SDP binding to the service  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **app-profile** *reference*

|            |   |
|------------|---|
| Synopsis   | ISA-AA application profile name for this SDP  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <b>app-profile</b> <i>reference</i>                             |
| Tree       | <a href="#">app-profile</a>   |
| Reference  | <b>configure</b> <a href="#">application-assurance group</a> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">policy app-profile</a> <i>string</i> |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

### **bfd**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bfd</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <b>bfd</b> |
| Tree       | <a href="#">bfd</a>  |
| Introduced | 21.2.R1  |
| Platforms  | All  |

### **bfd-liveness**

|          |  |
|----------|--|
| Synopsis | Enable the <b>bfd-liveness</b> context   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <b>bfd</b> <b>bfd-liveness</b> |

|            |                              |
|------------|------------------------------|
| Tree       | <a href="#">bfd-liveness</a> |
| Introduced | 21.2.R1                      |
| Platforms  | All                          |

**encap** *keyword*

|            |  |
|------------|--|
| Synopsis   | BFD encapsulation used on the SDP binding  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string bfd bfd-liveness encap keyword</a> |
| Tree       | <a href="#">encap</a>  |
| Options    | ipv4   |
| Default    | ipv4   |
| Introduced | 21.2.R1  |
| Platforms  | All  |

**bfd-template** *reference*

|             |   |
|-------------|---|
| Synopsis    | BFD template associated with the SDP binding  |
| Context     | <b>configure</b> <a href="#">service vpls string spoke-sdp string bfd bfd-template reference</a>  |
| Tree        | <a href="#">bfd-template</a>  |
| Description | This command configures a named BFD template to be used by VCCV BFD on PWs belonging to the VLL service. The template specifies parameters, such as the minimum transmit and receive control packet timer intervals, used by the BFD session. Template parameters are configured under the <b>configure router bfd</b> context. |
| Reference   | <b>configure</b> <a href="#">bfd bfd-template string</a>  |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

**failure-action** *keyword*

|             |   |
|-------------|---|
| Synopsis    | VCCV BFD action taken on the SDP binding  |
| Context     | <b>configure</b> <a href="#">service vpls string spoke-sdp string bfd failure-action keyword</a>  |
| Tree        | <a href="#">failure-action</a>  |
| Description | This command configures a named BFD template to be used by VCCV BFD on PWs belonging to the VLL service. The template specifies parameters, such as the minimum transmit and receive control packet timer intervals, used by the BFD session. Template parameters are configured under the <b>configure router bfd</b> context. |
| Options     | none, down  |

|            |         |
|------------|---------|
| Default    | none    |
| Introduced | 21.2.R1 |
| Platforms  | All     |

### **wait-for-up-timer** *number*

|             |  |
|-------------|--|
| Synopsis    | Time waited for BFD up status  |
| Context     | <b>configure</b> <a href="#">service vpls string spoke-sdp string bfd wait-for-up-timer number</a>   |
| Tree        | <a href="#">wait-for-up-timer</a>  |
| Description | This command configures the time interval that is used to wait for a BFD session to come up.<br><br>This command is triggered when a spoke-SDP is first administratively enabled and a VCCV BFD session transitions from up to down. The command is required to allow time for BFD sessions to come up, and for BFD to settle before selecting the active spoke-SDP for use in a redundant set. In the case where a VCCV BFD session is bouncing, the timer prevents excessive flapping of the operational state of a spoke-SDP. |
| Range       | 1 to 60  |
| Units       | seconds  |
| Introduced  | 21.2.R1  |
| Platforms   | All  |

### **block-on-mesh-failure** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable blocking after all SDPs are operationally down   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string block-on-mesh-failure boolean</a> |
| Tree       | <a href="#">block-on-mesh-failure</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **bpdu-translation** *keyword*

|            |  |
|------------|--|
| Synopsis   | BPDU format  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string bpdu-translation keyword</a> |
| Tree       | <a href="#">bpdu-translation</a>   |
| Options    | auto, pvst, stp, pvst-rw, auto-rw  |
| Introduced | 16.0.R1  |

Platforms All

### **collect-stats** *boolean*

Synopsis Allow agent to collect accounting statistics  
 Context **configure** [service vpls](#) *string* [spoke-sdp](#) *string* **collect-stats** *boolean*

Platforms All

## eth-cfm

Synopsis Enter the **eth-cfm** context

Context **configure service vpls string spoke-sdp string eth-cfm**

Tree [eth-cfm](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## collect-lmm-fc-stats

Synopsis Enter the **collect-lmm-fc-stats** context

Context **configure service vpls string spoke-sdp string eth-cfm collect-lmm-fc-stats**

Tree [collect-lmm-fc-stats](#)

Description Commands in this context configure per forwarding class (FC) LMM information collection.

The commands **fc-in-profile** and **fc** in this context are mutually exclusive. The commands apply to either profile-aware or profile-unaware FCs respectively.

This command and the **collect-lmm-stats** command are mutually exclusive when there is entity resource contention.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## fc keyword

Synopsis Forwarding class name for profile-unaware counter

Context **configure service vpls string spoke-sdp string eth-cfm collect-lmm-fc-stats fc keyword**

Tree [fc](#)

Description This command configures individual counters for the specified FCs without regard for profile. The system includes all countable packets that match a configured FC, regardless of profile, in this counter.

An FC specified as part of this command and for this specific context cannot be specified as a profile-aware FC using the **fc-in-profile** command under the **collect-lmm-fc-stats** context.

When this command is reentered, a differential is performed. Omitted FCs stop counting, newly added FCs start counting, and unchanged FCs continue to count.

Options be, l2, af, l1, h2, ef, h1, nc

|                |  |

|            |   |
|------------|---|
| Synopsis   | Lowest priority defect allowed to generate fault alarm  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>eth-test</b> <b>bit-error-threshold</b> <i>number</i> |
| Tree       | <a href="#">bit-error-threshold</a>   |
| Range      | 0 to 11840  |
| Units      | bit errors  |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **test-pattern**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>test-pattern</b> context  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>eth-test</b> <b>test-pattern</b> |
| Tree        | <a href="#">test-pattern</a>   |
| Description | Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver.   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **crc-tlv** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate a CRC checksum  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>eth-test</b> <b>test-pattern</b> <b>crc-tlv</b> <i>boolean</i> |
| Tree       | <a href="#">crc-tlv</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **pattern** *keyword*

Synopsis Test pattern for Ethernet Test frames

Context **configure service vpls string spoke-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number eth-test test-pattern pattern keyword**

Tree [pattern](#)

Description This command specifies the test pattern of the Ethernet Test (ETH-TST) frames. This does not have to be configured the same on the sender and the receiver.

Options all-zeros, all-ones

Default all-zeros

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fault-propagation** *keyword*

Synopsis Fault propagation for the MEP

Context **configure service vpls string spoke-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number fault-propagation keyword**

Tree [fault-propagation](#)

Options use-if-status-tlv, suspend-ccm

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **grace**

Synopsis Enter the **grace** context

Context **configure service vpls string spoke-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace**

Tree [grace](#)

Description Commands in this context configure the Nokia ETH-CFM Grace function and the ITU-T Y.1731 Ethernet Expected Default (ETH-ED) function.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**eth-ed**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>eth-ed</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a> |
| Tree        | <a href="#">eth-ed</a>  |
| Description | Commands in this context configure the ITU-T Y.1731 ETH-ED function.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**max-rx-defect-window** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum received ETH-ED expected defect window duration  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">max-rx-defect-window</a> <i>number</i> |
| Tree       | <a href="#">max-rx-defect-window</a>   |
| Range      | 1 to 86400   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**priority** *number*

|            |  |
|------------|--|
| Synopsis   | Transmission priority for ETH-ED PDUs  |

| Tree       | <a href="#">priority</a>   |
| Range      | 0 to 7   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**rx-eth-ed** *boolean*

|          |  |
|----------|--|
| Synopsis | Receive and process ETH-ED ITU-T Y.1731 PDUs on the MEP  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a> <a href="#">eth-ed</a> <a href="#">rx-eth-ed</a> <i>boolean</i> |
| Tree     | <a href="#">rx-eth-ed</a>  |

|             |  |
|-------------|--|
| Description | This command enables the reception and processing of the ITU-T Y.1731 ETH-ED PDU on the MEP. |
| Default     | true   |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS                                 |

### **tx-eth-ed** *boolean*

|            |   |
|------------|---|
| Synopsis   | Transmit ETH-ED PDUs from the MEP   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string spoke-sdp</a> <a href="#">string eth-cfm mep</a> <a href="#">md-admin-name reference</a> <a href="#">ma-admin-name reference</a> <a href="#">mep-id number</a> <a href="#">grace eth-ed tx-eth-ed</a> <i>boolean</i> |
| Tree       | <a href="#">tx-eth-ed</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **eth-vsm-grace**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>eth-vsm-grace</b> context  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <a href="#">string spoke-sdp</a> <a href="#">string eth-cfm mep</a> <a href="#">md-admin-name reference</a> <a href="#">ma-admin-name reference</a> <a href="#">mep-id number</a> <a href="#">grace eth-vsm-grace</a> |
| Tree        | <a href="#">eth-vsm-grace</a>   |
| Description | Commands in this context configure the Nokia ETH-CFM Grace function.  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **rx-eth-vsm-grace** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Receive and process Nokia ETH-CFM Grace PDU on the MEP  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <a href="#">string spoke-sdp</a> <a href="#">string eth-cfm mep</a> <a href="#">md-admin-name reference</a> <a href="#">ma-admin-name reference</a> <a href="#">mep-id number</a> <a href="#">grace eth-vsm-grace rx-eth-vsm-grace</a> <i>boolean</i> |
| Tree        | <a href="#">rx-eth-vsm-grace</a>  |
| Description | When configured to <b>true</b> , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.<br><br>When configured to <b>false</b> , the router disables the Nokia Grace function.         |

|            |  |
|------------|--|
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **tx-eth-vsm-grace** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Transmit ETH-ED PDUs from the MEP   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">spoke-sdp</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">eth-vsm-grace</a> <a href="#">tx-eth-vsm-grace</a> <i>boolean</i>   |
| Tree        | <a href="#">tx-eth-vsm-grace</a>  |
| Description | <p>When configured to <b>true</b>, the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.</p> <p>The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.</p> <p>The operator must configure the <b>configure system eth-cfm grace</b> command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).</p> <p>When configured to <b>false</b>, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.</p> |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **lbm-svc-act-responder** *boolean*

|            |  |
|------------|--|
| Synopsis   | Process service activation streams in ETH-CFM LBM  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <a href="#">string</a> <a href="#">spoke-sdp</a> <a href="#">string</a> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <a href="#">reference</a> <a href="#">ma-admin-name</a> <a href="#">reference</a> <a href="#">mep-id</a> <a href="#">number</a> <a href="#">lbm-svc-act-responder</a> <i>boolean</i> |
| Tree       | <a href="#">lbm-svc-act-responder</a>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **low-priority-defect** *keyword*

|          |  |
|----------|--|
| Synopsis | Lowest priority defect allowed to generate fault alarm |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vpls string spoke-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number low-priority-defect keyword</b> |
| Tree       | <a href="#">low-priority-defect</a>   |
| Options    | all-def, mac-rem-err-xcon, rem-err-xcon, err-xcon, xcon, no-xcon  |
| Default    | mac-rem-err-xcon  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

### **mac-address string**

|             |  |
|-------------|--|
| Synopsis    | MAC address of the MEP   |
| Context     | <b>configure service vpls string spoke-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number mac-address string</b>   |
| Tree        | <a href="#">mac-address</a>  |
| Description | This command specifies the MAC address of the MEP.<br><br>When unconfigured, the MAC address of the port (if the MEP is on a SAP) or the MAC address of a bridge (if the MEP is on a spoke) is used. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

### **one-way-delay-threshold number**

|            |  |
|------------|--|
| Synopsis   | Threshold time limit for the one-way delay test  |
| Context    | <b>configure service vpls string spoke-sdp string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number one-way-delay-threshold number</b> |
| Tree       | <a href="#">one-way-delay-threshold</a>  |
| Range      | 0 to 600   |
| Units      | seconds  |
| Default    | 3  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**primary-vlan** *boolean***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | MEP provisioned using MA primary VLAN ID   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">primary-vlan</a> <i>boolean</i> |
| Tree       | <a href="#">primary-vlan</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**mip primary-vlan** (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mip</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mip</a> <a href="#">primary-vlan</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">mip</a>   |
| Introduced | 21.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**primary-vlan** (*number* | *keyword*)

|             |   |
|-------------|---|
| Synopsis    | VLAN ID to which the MIP is attached  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mip</a> <a href="#">primary-vlan</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree        | <a href="#">mip</a>   |
| Description | This command provides an option for linking a MIP with a Primary VLAN number or none. When the <b>none</b> option is provided, the MIP does not include the primary vlan.                       |
| Range       | 1 to 4094   |
| Options     | none  |
| Notes       | This element is part of a list key.   |
| Introduced  | 21.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**cfm-vlan-tag** *string*

|               |  |
|---------------|--|
| Synopsis      | VLAN tags to apply to CFM PDUs for egress processing   |
| Context       | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mip primary-vlan</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">cfm-vlan-tag</a> <i>string</i>   |
| Tree          | <a href="#">cfm-vlan-tag</a>   |
| Description   | This command allows the CFM function to include additional VLAN tags to the CFM packet that are carried to the egress and treated as service delimited. Typically, this function is used to influence the VLAN carried over a binding that uses the vc-type vlan or the binding forces the use of one or more VLAN tag that results in a mismatch between the service data arriving at the binding and the locally generated ETH-CFM PDUs arriving at the same egress. When this command is included under the MEP or MIP configuration, the tags used as part of the configuration typically match the SAP service delimited configuration. |
| String Length | 1 to 9   |
| Introduced    | 21.10.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS   |

**mac-address** *string*

|            |   |
|------------|---|
| Synopsis   | MAC address of the MIP  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm mip primary-vlan</a> ( <i>number</i>   <i>keyword</i> ) <a href="#">mac-address</a> <i>string</i> |
| Tree       | <a href="#">mac-address</a>   |
| Introduced | 21.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS  |

**squelch-ingress-ctag-levels** *number*

|             |   |
|-------------|---|
| Synopsis    | Squelch levels using additional VLAN C-Tag space  |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">eth-cfm squelch-ingress-ctag-levels</a> <i>number</i>   |
| Tree        | <a href="#">squelch-ingress-ctag-levels</a>   |
| Description | This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding plus an additional VLAN, up to a maximum tag length of two tags. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option. |

The list of levels must be a complete contiguous list from 0 up to the highest level to be dropped.

|                |  |
|----------------|--|
| Range          | 0 to 7   |
| Max. Instances | 8  |
| Introduced     | 21.2.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS |

### **sqelch-ingress-levels** *number*

|                |  |
|----------------|--|
| Synopsis       | Levels for which ETH-CFM packets are silently discarded  |
| Context        | <b>configure</b> <a href="#">service vpls string spoke-sdp string eth-cfm sqelch-ingress-levels number</a>   |
| Tree           | <a href="#">sqelch-ingress-levels</a>  |
| Description    | <p>This command defines the levels of the ETH-CFM packets that are silently discarded on ingress into the SAP or SDP binding from the wire that matches the service delineation of the SAP or SDP binding. All ETH-CFM packets inbound to the SAP or SDP binding that match the configured levels are dropped without regard for any other ETH-CFM criteria. No statistical information or drop count is available for any ETH-CFM packet that is silently discarded by this option.</p> <p>The list of levels must be a complete contiguous list from 0 up to the highest level that will be dropped.</p> |
| Range          | 0 to 7   |
| Max. Instances | 8  |

| Tree       | <i>etree-root-leaf-tag</i>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**fdb**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>fdb</b> context                                     |
| Context    | <b>configure</b> <i>service vpls string spoke-sdp string fdb</i> |
| Tree       | <i>fdb</i>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**auto-learn-mac-protect** *boolean*

|          |   |
|----------|---|
| Synopsis | Populate automatically MAC protect list with source MAC addresses learned on SDP                |
| Context  | <b>configure</b> <i>service vpls string spoke-sdp string fdb auto-learn-mac-protect boolean</i> |

|            |  |
|------------|--|
| Tree       | <a href="#">auto-learn-mac-protect</a> |
| Default    | false                                  |
| Introduced | 16.0.R1                                |
| Platforms  | All                                    |

### **auto-learn-mac-protect-exclude-list** *reference*

|             |   |
|-------------|---|
| Synopsis    | Referenced MAC protect exclusion list name  |
| Context     | <b>configure</b> <a href="#">service vpls string spoke-sdp string fdb auto-learn-mac-protect-exclude-list reference</a>   |
| Tree        | <a href="#">auto-learn-mac-protect-exclude-list</a>   |
| Description | <p>This command references the name of a MAC protect exclusion list.</p> <p>Dynamically-learned MAC Source Addresses (SA) are protected if they are learned on an object with ALMP configured and no exclusion list is associated with the object, or if the MAC SA does not match any entry in an associated exclusion list.</p> <p>An exclusion list can be used in multiple objects of a service. If a list is empty, ALMP does not exclude any learned MAC SAs from protection on the object.</p> |
| Reference   | <b>configure</b> <a href="#">service mac-list string</a>  |
| Introduced  | 20.5.R1   |
| Platforms   | All   |

### **discard-unknown-source** *boolean*

|            |  |
|------------|--|
| Synopsis   | Discard packets with unknown destination MAC addresses   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string fdb discard-unknown-source boolean</a> |
| Tree       | <a href="#">discard-unknown-source</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **limit-mac-move** *keyword*

|          |  |
|----------|--|
| Synopsis | MAC move   |
| Context  | <b>configure</b> <a href="#">service vpls string spoke-sdp string fdb limit-mac-move keyword</a> |
| Tree     | <a href="#">limit-mac-move</a>   |
| Options  | blockable, non-blockable   |

---

|            |           |
|------------|-----------|
| Default    | blockable |
| Introduced | 16.0.R1   |
| Platforms  | All       |

### **mac-learning**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mac-learning</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">fdb mac-learning</a> |
| Tree       | <a href="#">mac-learning</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **aging** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable aging of MAC addresses   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">fdb mac-learning aging</a> <i>boolean</i> |
| Tree       | <a href="#">aging</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **learning** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable learning of new MAC addresses   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">fdb mac-learning learning</a> <i>boolean</i> |
| Tree       | <a href="#">learning</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mac-pinning** *boolean*

|          |  |
|----------|--|
| Synopsis | MAC address pinning in active status   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">fdb mac-pinning</a> <i>boolean</i> |
| Tree     | <a href="#">mac-pinning</a>  |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **maximum-mac-addresses** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum MAC entries in the FDB from this SDP  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">fdb</a> <a href="#">maximum-mac-addresses</a> <i>number</i> |
| Tree       | <a href="#">maximum-mac-addresses</a>   |
| Range      | 1 to 511999   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **protected-src-mac-violation-action** *keyword*

|            |   |
|------------|---|
| Synopsis   | Action when a relearn request for a protected MAC is received on the SDP  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">fdb</a> <a href="#">protected-src-mac-violation-action</a> <i>keyword</i> |
| Tree       | <a href="#">protected-src-mac-violation-action</a>  |
| Options    | sdp-bind-oper-down, alarm-only, discard   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **force-vc-forwarding** *keyword*

|            |  |
|------------|--|
| Synopsis   | VC forwarding action   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">force-vc-forwarding</a> <i>keyword</i> |
| Tree       | <a href="#">force-vc-forwarding</a>  |
| Options    | vlan, qinq-c-tag-c-tag, qinq-s-tag-c-tag   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **hash-label**

|          |  |
|----------|--|
| Synopsis | Enable the <b>hash-label</b> context   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">hash-label</a> |

|            |  |
|------------|--|
| Tree       | <a href="#">hash-label</a>   |
| Notes      | The following elements are part of a choice: <b>entropy-label</b> or <b>hash-label</b> . |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## signal-capability

|            |  |
|------------|--|
| Synopsis   | Enable the signaling of the hash label between PE nodes  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string spoke-sdp</a> <a href="#">string hash-label</a> <a href="#">signal-capability</a> |
| Tree       | <a href="#">signal-capability</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## i-vpls-mac-flush

|            |  |
|------------|--|
| Synopsis   | Enter the <b>i-vpls-mac-flush</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string spoke-sdp</a> <a href="#">string i-vpls-mac-flush</a> |
| Tree       | <a href="#">i-vpls-mac-flush</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## bgp-evpn

|            |   |
|------------|---|
| Synopsis   | Enter the <b>bgp-evpn</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <a href="#">string spoke-sdp</a> <a href="#">string i-vpls-mac-flush</a> <a href="#">bgp-evpn</a> |
| Tree       | <a href="#">bgp-evpn</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## send-to-bvpls *boolean*

|          |  |
|----------|--|
| Synopsis | Send B-VPLS EVPN flush   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <a href="#">string spoke-sdp</a> <a href="#">string i-vpls-mac-flush</a> <a href="#">bgp-evpn</a> <a href="#">send-to-bvpls</a> <i>boolean</i> |
| Tree     | <a href="#">send-to-bvpls</a>  |

|            |         |
|------------|---------|
| Default    | true    |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## igmp-snooping

|            |   |
|------------|---|
| Synopsis   | Enter the <b>igmp-snooping</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping</a> |
| Tree       | <a href="#">igmp-snooping</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## fast-leave *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow IGMP fast leave processing   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping fast-leave boolean</a> |
| Tree       | <a href="#">fast-leave</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## import-policy *reference*

|            |   |
|------------|---|
| Synopsis   | Import policy that filters IGMP packets   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping import-policy reference</a> |
| Tree       | <a href="#">import-policy</a>   |
| Reference  | <b>configure</b> <a href="#">policy-options policy-statement string</a>                                     |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## maximum-number-group-sources *number*

|          |   |
|----------|---|
| Synopsis | Maximum group source combinations   |
| Context  | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping maximum-number-group-sources number</a> |

|            |  |
|------------|--|
| Tree       | <a href="#">maximum-number-group-sources</a> |
| Range      | 1 to 32000                                   |
| Introduced | 16.0.R1                                      |
| Platforms  | All  |

### **maximum-number-groups** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum groups allowed   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping maximum-number-groups number</a> |
| Tree       | <a href="#">maximum-number-groups</a>  |
| Range      | 1 to 16000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **maximum-number-sources** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum sources that are allowed per group  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping maximum-number-sources number</a> |
| Tree       | <a href="#">maximum-number-sources</a>  |
| Range      | 1 to 1000   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **mcac**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mcac</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping mcac</a> |
| Tree       | <a href="#">mcac</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **bandwidth**

|          |                                    |
|----------|------------------------------------|
| Synopsis | Enter the <b>bandwidth</b> context |
|----------|------------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping mcac bandwidth</a> |
| Tree       | <a href="#">bandwidth</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mandatory** (*number | keyword*)

|            |   |
|------------|---|
| Synopsis   | Pre-reserved bandwidth for all mandatory channels   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping mcac bandwidth mandatory (number   keyword)</a> |
| Tree       | <a href="#">mandatory</a>   |
| Range      | 0 to 2147483647   |
| Options    | unlimited   |
| Default    | unlimited   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **total** (*number | keyword*)

|            |   |
|------------|---|
| Synopsis   | Maximum allowed bandwidth   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping mcac bandwidth total (number   keyword)</a> |
| Tree       | <a href="#">total</a>   |
| Range      | 0 to 2147483647   |
| Options    | unlimited   |
| Default    | unlimited   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **interface-policy** *reference*

|           |   |
|-----------|---|
| Synopsis  | Name of multicast CAC interface policy  |
| Context   | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping mcac interface-policy reference</a> |
| Tree      | <a href="#">interface-policy</a>  |
| Reference | <b>configure</b> <a href="#">mcac interface-policy string</a>   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **policy reference**

|             |   |
|-------------|---|
| Synopsis    | Multicast CAC policy name   |
| Context     | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping mcac policy reference</a>   |
| Tree        | <a href="#">policy</a>  |
| Description | <p>This command configures the name of the global channel bandwidth definition policy that is used for (H)MCAC and HQoS adjustment.</p> <p>Within the scope of HQoS adjustment, the channel definition policy under the group interface is used if redirection is unconfigured. In this case, the HQoS adjustment can be applied to IPE subscribers in per-SAP replication mode.</p> <p>If redirection is configured, the channel bandwidth definition policy applied under the Layer 3 redirected interface is in effect.</p> <p>Hierarchical MCAC (HMCAC) is supported on two levels simultaneously:</p> <ul style="list-style-type: none"> <li>• subscriber level and redirected interface when redirection is configured</li> <li>• subscriber level and group-interface level when redirection is unconfigured</li> </ul> <p>In HMCAC, the subscriber is checked against its bandwidth limits first, then against the bandwidth limits of the redirected or group interface. If redirection is configured but the policy is referenced only under the group interface, no admission control is executed (HMCAC or MCAC).</p> |
| Reference   | <b>configure</b> <a href="#">mcac policy string</a>   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **mrouter-port boolean**

|            |  |
|------------|--|
| Synopsis   | Operate port as a multicast router port  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping mrouter-port boolean</a> |
| Tree       | <a href="#">mrouter-port</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **query-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time between two consecutive host-query messages   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping</a> <a href="#">query-interval</a> <i>number</i> |
| Tree       | <a href="#">query-interval</a>   |
| Range      | 2 to 1024  |
| Units      | seconds  |
| Default    | 125  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **query-last-member-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time between group-specific query messages   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping</a> <a href="#">query-last-member-interval</a> <i>number</i> |
| Tree       | <a href="#">query-last-member-interval</a>   |
| Range      | 1 to 50  |
| Units      | deciseconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **query-response-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time to wait for a response to the host-query messages  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping</a> <a href="#">query-response-interval</a> <i>number</i> |
| Tree       | <a href="#">query-response-interval</a>   |
| Range      | 1 to 1023   |
| Units      | seconds   |
| Default    | 10  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**robust-count** *number*

|            |   |
|------------|---|
| Synopsis   | Number of retries after expected message loss   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping</a> <b>robust-count</b> <i>number</i> |
| Tree       | <a href="#">robust-count</a>  |
| Range      | 2 to 7  |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**router-alert-check** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable IP router alert check option  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping</a> <b>router-alert-check</b> <i>boolean</i> |
| Tree       | <a href="#">router-alert-check</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**send-queries** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate IGMP general queries  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping</a> <b>send-queries</b> <i>boolean</i> |
| Tree       | <a href="#">send-queries</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**static**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>static</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping</a> <b>static</b> |
| Tree       | <a href="#">static</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**group** [*group-address*] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>group</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping static group</a> <i>string</i> |
| Tree       | <a href="#">group</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[group-address]** *string*

|             |  |
|-------------|--|
| Synopsis    | Group address of static IGMP multicast channel   |
| Context     | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping static group</a> <i>string</i> |
| Tree        | <a href="#">group</a>  |
| Description | This command configures an address that receives data on an interface. The IP address must be unique for each static group.                                  |
| Notes       | This element is part of a list key.  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**source** [*source-address*] *string*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>source</b>   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping static group</a> <i>string</i> <b>source</b> <i>string</i> |
| Tree       | <a href="#">source</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[source-address]** *string*

|          |  |
|----------|--|
| Synopsis | Source IP address of multicast channel sending data  |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">igmp-snooping static group</a> <i>string</i> <b>source</b> <i>string</i> |
| Tree     | <a href="#">source</a>   |
| Notes    | This element is part of a list key.  |

|            |         |
|------------|---------|
| Introduced | 16.0.R2 |
| Platforms  | All     |

## starg

|            |   |
|------------|---|
| Synopsis   | any source address (*,G)  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping static group string starg</a> |
| Tree       | <a href="#">starg</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .                        |
| Introduced | 16.0.R2   |
| Platforms  | All   |

## version *keyword*

|            |   |
|------------|---|
| Synopsis   | IGMP protocol version   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string igmp-snooping version keyword</a> |
| Tree       | <a href="#">version</a>   |
| Options    | 1, 2, 3   |
| Default    | 3   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ignore-standby-signaling *boolean*

|            |  |
|------------|--|
| Synopsis   | Ignore standby-bit received from TLDP peers when performing internal tasks                             |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string ignore-standby-signaling boolean</a> |
| Tree       | <a href="#">ignore-standby-signaling</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ingress

|          |   |
|----------|---|
| Synopsis | Enter the <b>ingress</b> context  |
| Context  | <b>configure</b> <a href="#">service vpls string spoke-sdp string ingress</a> |

|            |                         |
|------------|-------------------------|
| Tree       | <a href="#">ingress</a> |
| Introduced | 16.0.R1                 |
| Platforms  | All                     |

## filter

|            |  |
|------------|--|
| Synopsis   | Enter the <b>filter</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string ingress filter</a> |
| Tree       | <a href="#">filter</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ip reference

|            |   |
|------------|---|
| Synopsis   | IPv4 filter policy name   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string ingress filter ip reference</a> |
| Tree       | <a href="#">ip</a>  |
| Reference  | <b>configure</b> <a href="#">filter ip-filter string</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ipv6 reference

|            |   |
|------------|---|
| Synopsis   | IPv6 filter policy name   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string ingress filter ipv6 reference</a> |
| Tree       | <a href="#">ipv6</a>  |
| Reference  | <b>configure</b> <a href="#">filter ipv6-filter string</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## mac reference

|          |  |
|----------|--|
| Synopsis | MAC filter policy name   |
| Context  | <b>configure</b> <a href="#">service vpls string spoke-sdp string ingress filter mac reference</a> |
| Tree     | <a href="#">mac</a>  |

|            |  |
|------------|--|
| Reference  | <b>configure</b> <a href="#">filter mac-filter</a> <i>string</i> |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## qos

|            |   |
|------------|---|
| Synopsis   | Enter the <b>qos</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">ingress qos</a> |
| Tree       | <a href="#">qos</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## network

|            |   |
|------------|---|
| Synopsis   | Enter the <b>network</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">ingress qos network</a> |
| Tree       | <a href="#">network</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## fp-redirect-group

|            |   |
|------------|---|
| Synopsis   | Enter the <b>fp-redirect-group</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">ingress qos network fp-redirect-group</a> |
| Tree       | <a href="#">fp-redirect-group</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## group-name *reference*

|           |   |
|-----------|---|
| Synopsis  | Name of the forwarding plane queue group template   |
| Context   | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">ingress qos network fp-redirect-group</a> <a href="#">group-name</a> <i>reference</i> |
| Tree      | <a href="#">group-name</a>  |
| Reference | <b>configure</b> <a href="#">qos queue-group-templates</a> <a href="#">ingress queue-group</a> <i>string</i>  |

Introduced 16.0.R1  
 Platforms All

### **instance** *number*

Synopsis Instance of FP ingress queue group for the SDP binding  
 Context **configure** [service vpls string spoke-sdp string ingress qos network fp-redirect-group instance number](#)  
 Tree [instance](#)  
 Range 1 to 65535  
 Introduced 16.0.R1  
 Platforms All

### **policy-name** *reference*

Synopsis Network policy ID  
 Context **configure** [service vpls string spoke-sdp string ingress qos network policy-name reference](#)  
 Tree [policy-name](#)  
 Reference **configure** [qos network string](#)  
 Introduced 16.0.R1  
 Platforms All

### **vc-label** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Ingress MPLS VC label to send packets to the far end  
 Context **configure** [service vpls string spoke-sdp string ingress vc-label number](#)  
 Tree [vc-label](#)  
 Range 1 to 1048575  
 Introduced 16.0.R1  
 Platforms All

## **l2pt**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>l2pt</b> context                              |
| Context    | <b>configure service vpls string spoke-sdp string l2pt</b> |
| Tree       | <b>l2pt</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **termination**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>termination</b> context                                  |
| Context    | <b>configure service vpls string spoke-sdp string l2pt termination</b> |
| Tree       | <b>termination</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **protocols**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>protocols</b> context   |
| Context    | <b>configure service vpls string spoke-sdp string l2pt termination protocols</b> |
| Tree       | <b>protocols</b>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **cdp boolean**

|            |  |
|------------|--|
| Synopsis   | Enable Cisco discovery protocol  |
| Context    | <b>configure service vpls string spoke-sdp string l2pt termination protocols cdp boolean</b> |
| Tree       | <b>cdp</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## **dtp boolean**

|          |                                  |
|----------|----------------------------------|
| Synopsis | Enable dynamic trunking protocol |
|----------|----------------------------------|

---

|            |  |
|------------|--|
| Context    | <b>configure service vpls string spoke-sdp string l2pt termination protocols dtp boolean</b> |
| Tree       | <b>dtp</b>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **pagp boolean**

|            |   |
|------------|---|
| Synopsis   | Enable port aggregation protocol  |
| Context    | <b>configure service vpls string spoke-sdp string l2pt termination protocols pagp boolean</b> |
| Tree       | <b>pagp</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **stp boolean**

|            |  |
|------------|--|
| Synopsis   | Enable all spanning tree protocols   |
| Context    | <b>configure service vpls string spoke-sdp string l2pt termination protocols stp boolean</b> |
| Tree       | <b>stp</b>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **udld boolean**

|            |   |
|------------|---|
| Synopsis   | Enable unidirectional link detection  |
| Context    | <b>configure service vpls string spoke-sdp string l2pt termination protocols udld boolean</b> |
| Tree       | <b>udld</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**vtp** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable virtual trunk protocol   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">l2pt termination protocols vtp</a> <i>boolean</i> |
| Tree       | <a href="#">vtp</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**mld-snooping**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mld-snooping</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> |
| Tree       | <a href="#">mld-snooping</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**fast-leave** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow IGMP fast leave processing   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping fast-leave</a> <i>boolean</i> |
| Tree       | <a href="#">fast-leave</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**import-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Import policy that filters IGMP packets   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping import-policy</a> <i>reference</i> |
| Tree       | <a href="#">import-policy</a>   |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**maximum-number-groups** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum groups allowed   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">maximum-number-groups</a> <i>number</i> |
| Tree       | <a href="#">maximum-number-groups</a>  |
| Range      | 1 to 16000   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**mrouter-port** *boolean*

|            |  |
|------------|--|
| Synopsis   | Operate port as a multicast router port  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">mrouter-port</a> <i>boolean</i> |
| Tree       | <a href="#">mrouter-port</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**query-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Time between two consecutive host-query messages  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">query-interval</a> <i>number</i> |
| Tree       | <a href="#">query-interval</a>  |
| Range      | 2 to 1024   |
| Units      | seconds   |
| Default    | 125   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**query-last-member-interval** *number*

|          |   |
|----------|---|
| Synopsis | Time between group-specific query messages  |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">query-last-member-interval</a> <i>number</i> |
| Tree     | <a href="#">query-last-member-interval</a>  |

|            |             |
|------------|-------------|
| Range      | 1 to 50     |
| Units      | deciseconds |
| Default    | 10          |
| Introduced | 16.0.R1     |
| Platforms  | All         |

### **query-response-interval** *number*

|            |  |
|------------|--|
| Synopsis   | Time to wait for a response to the host-query messages   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">query-response-interval</a> <i>number</i> |
| Tree       | <a href="#">query-response-interval</a>  |
| Range      | 1 to 1023  |
| Units      | seconds  |
| Default    | 10   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **robust-count** *number*

|            |   |
|------------|---|
| Synopsis   | Number of retries after expected message loss   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">robust-count</a> <i>number</i> |
| Tree       | <a href="#">robust-count</a>  |
| Range      | 2 to 7  |
| Default    | 2   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **router-alert-check** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable IP router alert check option  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">router-alert-check</a> <i>boolean</i> |
| Tree       | <a href="#">router-alert-check</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |

Platforms All

### **send-queries** *boolean*

Synopsis Generate IGMP general queries

Context **configure** [service vpls string spoke-sdp string mld-snooping send-queries boolean](#)

Tree [send-queries](#)

Default false

Introduced 16.0.R1

Platforms All

### **static**

Synopsis Enter the **static** context

Context **configure** [service vpls string spoke-sdp string mld-snooping static](#)

Tree [static](#)

Introduced 16.0.R1

Platforms All

### **group** [[group-address](#)] *string*

Synopsis Enter the **group** list instance

Context **configure** [service vpls string spoke-sdp string mld-snooping static group string](#)

Tree [group](#)

Introduced 16.0.R1

Platforms All

### **[group-address]** *string*

Synopsis Group address of multicast channel

Context **configure** [service vpls string spoke-sdp string mld-snooping static group string](#)

Tree [group](#)

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

**source** [[source-address](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>source</b>  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">static</a> <a href="#">group</a> <i>string</i> <b>source</b> <i>string</i> |
| Tree       | <a href="#">source</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[source-address]** *string*

|            |   |
|------------|---|
| Synopsis   | Source IP address   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">static</a> <a href="#">group</a> <i>string</i> <b>source</b> <i>string</i> |
| Tree       | <a href="#">source</a>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R2   |
| Platforms  | All   |

**starg**

|            |  |
|------------|--|
| Synopsis   | any source address (*,G)   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <a href="#">static</a> <a href="#">group</a> <i>string</i> <b>starg</b> |
| Tree       | <a href="#">starg</a>  |
| Notes      | The following elements are part of a mandatory choice: <b>source</b> or <b>starg</b> .   |
| Introduced | 16.0.R2  |
| Platforms  | All  |

**version** *keyword*

|          |  |
|----------|--|
| Synopsis | Version of MLD running on the SAP or SDP   |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">mld-snooping</a> <b>version</b> <i>keyword</i> |
| Tree     | <a href="#">version</a>  |
| Options  | 1, 2   |

|            |         |
|------------|---------|
| Default    | 2       |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **monitor-oper-group** *reference*

|            |  |
|------------|--|
| Synopsis   | Operational group that affects state of the SDP bind   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string</a> <b>monitor-oper-group</b> <i>reference</i> |
| Tree       | <a href="#">monitor-oper-group</a>   |
| Reference  | <b>configure</b> <a href="#">service oper-group string</a>   |
| Notes      | The following elements are part of a choice: <b>monitor-oper-group</b> or <b>oper-group</b> .                    |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **mrp**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>mrp</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string</a> <b>mrp</b> |
| Tree       | <a href="#">mrp</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### **join-time** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum rate for attribute join messages sent on SDP  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string</a> <b>mrp</b> <b>join-time</b> <i>number</i> |
| Tree       | <a href="#">join-time</a>   |
| Range      | 1 to 10   |
| Units      | deciseconds   |
| Default    | 2   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**leave-all-time** *number*

|            |  |
|------------|--|
| Synopsis   | Frequency of LeaveAll PDUs by LeaveAll state machine   |
| Context    | <b>configure</b> <b>service vpls</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>mrp</b> <b>leave-all-time</b> <i>number</i> |
| Tree       | <a href="#">leave-all-time</a>   |
| Range      | 60 to 300  |
| Units      | deciseconds  |
| Default    | 100  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**leave-time** *number*

|            |  |
|------------|--|
| Synopsis   | Time in LV state before transition to MT state   |
| Context    | <b>configure</b> <b>service vpls</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>mrp</b> <b>leave-time</b> <i>number</i> |
| Tree       | <a href="#">leave-time</a>   |
| Range      | 30 to 60   |
| Units      | deciseconds  |
| Default    | 30   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**periodic-time** *number*

|            |   |
|------------|---|
| Synopsis   | Frequency of periodic events generated by state machine   |
| Context    | <b>configure</b> <b>service vpls</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>mrp</b> <b>periodic-time</b> <i>number</i> |
| Tree       | <a href="#">periodic-time</a>   |
| Range      | 10 to 100   |
| Units      | deciseconds   |
| Default    | 10  |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**periodic-timer** *boolean*

|          |  |
|----------|--|
| Synopsis | Enable the Periodic Transmission Timer |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service vpls string spoke-sdp string mrp periodic-timer boolean</b> |
| Tree       | <a href="#">periodic-timer</a>   |
| Default    | false  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### **policy reference**

|            |  |
|------------|--|
| Synopsis   | MRP policy to control Group B-MAC attributes                               |
| Context    | <b>configure service vpls string spoke-sdp string mrp policy reference</b> |
| Tree       | <a href="#">policy</a>   |
| Reference  | <b>configure service mrp policy string</b>                                 |
| Introduced | 20.10.R1   |
| Platforms  | All  |

### **oper-group reference**

|            |   |
|------------|---|
| Synopsis   | Operational group identifier  |
| Context    | <b>configure service vpls string spoke-sdp string oper-group reference</b>                    |
| Tree       | <a href="#">oper-group</a>  |
| Reference  | <b>configure service oper-group string</b>  |
| Notes      | The following elements are part of a choice: <b>monitor-oper-group</b> or <b>oper-group</b> . |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **pbb**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pbb</b> context                              |
| Context    | <b>configure service vpls string spoke-sdp string pbb</b> |
| Tree       | <a href="#">pbb</a>                                       |
| Introduced | 20.10.R1  |
| Platforms  | All   |

## fault-propagation

|            |  |
|------------|--|
| Synopsis   | Enter the <b>fault-propagation</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string pbb</a> <b>fault-propagation</b> |
| Tree       | <a href="#">fault-propagation</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## backbone-mac-address [[address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>backbone-mac-address</b>   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string pbb</a> <b>fault-propagation backbone-mac-address string</b> |
| Tree       | <a href="#">backbone-mac-address</a>   |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## [[address](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Backbone MAC address   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string pbb</a> <b>fault-propagation backbone-mac-address string</b> |
| Tree       | <a href="#">backbone-mac-address</a>   |
| Notes      | This element is part of a list key.  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

## backbone-mac-name [[name](#)] *reference*

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>backbone-mac-name</b>  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string pbb</a> <b>fault-propagation backbone-mac-name reference</b> |
| Tree       | <a href="#">backbone-mac-name</a>  |
| Introduced | 20.10.R1   |
| Platforms  | All  |

**[name] reference**

|            |   |
|------------|---|
| Synopsis   | Backbone MAC address name   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string pbb fault-propagation backbone-mac-name reference</a> |
| Tree       | <a href="#">backbone-mac-name</a>   |
| Reference  | <b>configure</b> <a href="#">service pbb mac string</a>   |
| Notes      | This element is part of a list key.   |
| Introduced | 20.10.R1  |
| Platforms  | All   |

**pim-snooping**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>pim-snooping</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string pim-snooping</a> |
| Tree       | <a href="#">pim-snooping</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**maximum-number-groups number**

|            |   |
|------------|---|
| Synopsis   | Maximum groups for this interface   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string pim-snooping maximum-number-groups number</a> |
| Tree       | <a href="#">maximum-number-groups</a>   |
| Range      | 1 to 16000  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**pw-status**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pw-status</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string pw-status</a> |
| Tree       | <a href="#">pw-status</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**signaling** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable the use of pseudowire status signaling   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string pw-status signaling boolean</a> |
| Tree       | <a href="#">signaling</a>   |
| Default    | true  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**spb**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>spb</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string spb</a> |
| Tree       | <a href="#">spb</a>   |
| Introduced | 21.10.R1  |
| Platforms  | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Admin state   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string spb admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 21.10.R1  |
| Platforms  | All   |

**level** [*id*] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>level</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string spb level number</a> |
| Tree       | <a href="#">level</a>  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

**[id] number**

|            |   |
|------------|---|
| Synopsis   | Level identifier  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">spb level</a> <i>number</i> |
| Tree       | <a href="#">level</a>   |
| Range      | 1   |
| Notes      | This element is part of a list key.   |
| Introduced | 21.10.R1  |
| Platforms  | All   |

**hello-interval number**

|            |  |
|------------|--|
| Synopsis   | Hello interval   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">spb level</a> <i>number</i> <a href="#">hello-interval</a> <i>number</i> |
| Tree       | <a href="#">hello-interval</a>   |
| Range      | 1 to 20000   |
| Units      | seconds  |
| Default    | 9  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

**hello-multiplier number**

|            |  |
|------------|--|
| Synopsis   | Hello multiplier   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">spb level</a> <i>number</i> <a href="#">hello-multiplier</a> <i>number</i> |
| Tree       | <a href="#">hello-multiplier</a>   |
| Range      | 2 to 100   |
| Default    | 3  |
| Introduced | 21.10.R1   |
| Platforms  | All  |

**metric number**

|          |  |
|----------|--|
| Synopsis | Metric   |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">spb level</a> <i>number</i> <a href="#">metric</a> <i>number</i> |

|            |                        |
|------------|------------------------|
| Tree       | <a href="#">metric</a> |
| Range      | 0 to 16777215          |
| Default    | 0                      |
| Introduced | 21.10.R1               |
| Platforms  | All                    |

### **lsp-pacing-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Lsp pacing interval   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">spb</a> <a href="#">lsp-pacing-interval</a> <i>number</i> |
| Tree       | <a href="#">lsp-pacing-interval</a>   |
| Range      | 0 to 65535  |
| Units      | milliseconds  |
| Default    | 100   |
| Introduced | 21.10.R1  |
| Platforms  | All   |

### **retransmit-interval** *number*

|            |   |
|------------|---|
| Synopsis   | Retransmit interval   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">spb</a> <a href="#">retransmit-interval</a> <i>number</i> |
| Tree       | <a href="#">retransmit-interval</a>   |
| Range      | 1 to 65535  |
| Units      | seconds   |
| Default    | 5   |
| Introduced | 21.10.R1  |
| Platforms  | All   |

### **split-horizon-group** *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Name of the split horizon group where the spoke SDP bind belongs to  |
| Context  | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">split-horizon-group</a> <i>reference</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">split-horizon-group</a>                             |
| Reference  | <b>configure service vpls string split-horizon-group string</b> |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **static-isid**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>static-isid</b> context                              |
| Context    | <b>configure service vpls string spoke-sdp string static-isid</b> |
| Tree       | <a href="#">static-isid</a>                                       |
| Introduced | 19.10.R1  |
| Platforms  | All   |

## **range [range-id] number**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>range</b> list instance   |
| Context    | <b>configure service vpls string spoke-sdp string static-isid range number</b> |
| Tree       | <a href="#">range</a>  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

## **[range-id] number**

|            |  |
|------------|--|
| Synopsis   | Range ID for static ISID   |
| Context    | <b>configure service vpls string spoke-sdp string static-isid range number</b> |
| Tree       | <a href="#">range</a>  |
| Range      | 1 to 8191  |
| Notes      | This element is part of a list key.  |
| Introduced | 19.10.R1   |
| Platforms  | All  |

## **end number**

|          |   |
|----------|---|
| Synopsis | Upper bound of the ISID range   |
| Context  | <b>configure service vpls string spoke-sdp string static-isid range number end number</b> |

|            |                     |
|------------|---------------------|
| Tree       | <a href="#">end</a> |
| Range      | 1 to 16777215       |
| Introduced | 19.10.R1            |
| Platforms  | All                 |

**start number**

|            |   |
|------------|---|
| Synopsis   | Lower bound of the ISID range   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string static-isid range number start number</a> |
| Tree       | <a href="#">start</a>   |
| Range      | 1 to 16777215   |
| Introduced | 19.10.R1  |
| Platforms  | All   |

**stp**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>stp</b> context  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string stp</a> |
| Tree       | <a href="#">stp</a>   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**admin-state keyword**

|            |   |
|------------|---|
| Synopsis   | Administrative state of STP   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string stp admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**auto-edge boolean**

|          |   |
|----------|---|
| Synopsis | Enable automatic detection of edge port characteristics                                     |
| Context  | <b>configure</b> <a href="#">service vpls string spoke-sdp string stp auto-edge boolean</a> |

---

|            |                           |
|------------|---------------------------|
| Tree       | <a href="#">auto-edge</a> |
| Default    | true                      |
| Introduced | 16.0.R4                   |
| Platforms  | All                       |

### **edge-port** *boolean*

|            |   |
|------------|---|
| Synopsis   | Designate SAP or SDP as an edge port  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string stp edge-port boolean</a> |
| Tree       | <a href="#">edge-port</a>   |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **link-type** *keyword*

|            |   |
|------------|---|
| Synopsis   | Configure STP link-type   |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string stp link-type keyword</a> |
| Tree       | <a href="#">link-type</a>   |
| Options    | pt-pt, shared   |
| Default    | pt-pt   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **path-cost** *number*

|            |  |
|------------|--|
| Synopsis   | Configure path-cost  |
| Context    | <b>configure</b> <a href="#">service vpls string spoke-sdp string stp path-cost number</a> |
| Tree       | <a href="#">path-cost</a>  |
| Range      | 1 to 200000000   |
| Default    | 10   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**port-num** *number*

|            |  |
|------------|--|
| Synopsis   | Virtual port number  |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">stp</a> <a href="#">port-num</a> <i>number</i> |
| Tree       | <a href="#">port-num</a>   |
| Range      | 1 to 2047  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**priority** *number*

|            |  |
|------------|--|
| Synopsis   | Configure STP priority   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">stp</a> <a href="#">priority</a> <i>number</i> |
| Tree       | <a href="#">priority</a>   |
| Range      | 0 to 255   |
| Default    | 128  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**root-guard** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable/disable STP root-guard   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">stp</a> <a href="#">root-guard</a> <i>boolean</i> |
| Tree       | <a href="#">root-guard</a>  |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**transit-policy**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>transit-policy</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">transit-policy</a> |
| Tree       | <a href="#">transit-policy</a>   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**prefix reference****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |   |
|------------|---|
| Synopsis   | IP prefix policy ID   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">transit-policy</a> <a href="#">prefix</a> <i>reference</i>    |
| Tree       | <a href="#">prefix</a>  |
| Reference  | <b>configure</b> <a href="#">application-assurance</a> <i>group</i> <i>number</i> <a href="#">partition</a> <i>number</i> <a href="#">transit-prefix-policy</a> <i>number</i> |
| Notes      | This element is mandatory.  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**vc-type keyword****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Type of virtual circuit (VC) associated with the SDP binding; VPLS not supported   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">vc-type</a> <i>keyword</i> |
| Tree       | <a href="#">vc-type</a>  |
| Options    | ether, vlan  |
| Default    | ether  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**vlan-vc-tag number**

|            |   |
|------------|---|
| Synopsis   | SDP bind VC tag   |
| Context    | <b>configure</b> <a href="#">service vpls</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">vlan-vc-tag</a> <i>number</i> |

## assisted-replication

|            |   |
|------------|---|
| Synopsis   | Enter the <b>assisted-replication</b> context                                   |
| Context    | <b>configure service vpls string vxlan instance number assisted-replication</b> |
| Tree       | <a href="#">assisted-replication</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## leaf

|            |  |
|------------|--|
| Synopsis   | Enable the <b>leaf</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string vxlan instance number assisted-replication leaf</a> |
| Tree       | <a href="#">leaf</a>   |
| Notes      | The following elements are part of a choice: <b>leaf</b> or <b>replicator</b> .                      |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## acttime *number*

|            |   |
|------------|---|
| Synopsis   | Time for the leaf to wait before sending traffic to a new replicator  |
| Context    | <b>configure</b> <a href="#">service vpls string vxlan instance number assisted-replication leaf acttime number</a> |
| Tree       | <a href="#">acttime</a>   |
| Range      | 1 to 255  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## replicator

|            |  |
|------------|--|
| Synopsis   | AR role as replicator  |
| Context    | <b>configure</b> <a href="#">service vpls string vxlan instance number assisted-replication replicator</a> |
| Tree       | <a href="#">replicator</a>   |
| Notes      | The following elements are part of a choice: <b>leaf</b> or <b>replicator</b> .                            |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## egress-vtep [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |  |
|------------|--|
| Synopsis   | Add a list entry for <b>egress-vtep</b>  |
| Context    | <b>configure</b> <a href="#">service vpls string vxlan instance number egress-vtep (ipv4-address-no-zone   ipv6-address-no-zone)</a> |
| Tree       | <a href="#">egress-vtep</a>  |
| Introduced | 16.0.R4  |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### [ip-address] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis VTEP IP address used when originating VXLAN packets

Context **configure service vpls string vxlan instance number egress-vtep** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [egress-vtep](#)

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### fdb

Synopsis Enter the **fdb** context

Context **configure service vpls string vxlan instance number fdb**

Tree [fdb](#)

Introduced 16.0.R1

Platforms All

### discard-unknown-source *boolean*

Synopsis Discard frames with unknown source

Context **configure service vpls string vxlan instance number fdb discard-unknown-source boolean**

Tree [discard-unknown-source](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### mac-learning

Synopsis Enter the **mac-learning** context

Context **configure service vpls string vxlan instance number fdb mac-learning**

Tree [mac-learning](#)

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **aging** *boolean*

Synopsis Enable/disable aging of MAC addresses  
 Context **configure** [service](#) [vpls](#) *string* [vxlan](#) *instance* *number* [fdb](#) [mac-learning](#) [aging](#) *boolean*  
 Tree [aging](#)  
 Default false  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **learning** *boolean*

Synopsis Enable learning of new MAC addresses  
 Context **configure** [service](#) [vpls](#) *string* [vxlan](#) *instance* *number* [fdb](#) [mac-learning](#) [learning](#) *boolean*  
 Tree [learning](#)  
 Default false  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **maximum-mac-addresses** *number*

Synopsis Maximum number of MAC entries in the FDB from this vxlan instance  
 Context **configure** [service](#) [vpls](#) *string* [vxlan](#) *instance* *number* [fdb](#) [maximum-mac-addresses](#) *number*  
 Tree [maximum-mac-addresses](#)  
 Range 1 to 511999  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **protected-src-mac-violation-action** *keyword*

Synopsis Action when a relearn request for a protected MAC is received  
 Context **configure** [service](#) [vpls](#) *string* [vxlan](#) *instance* *number* [fdb](#) [protected-src-mac-violation-action](#) *keyword*  
 Tree [protected-src-mac-violation-action](#)

|            |         |
|------------|---------|
| Options    | discard |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## igmp-snooping

|            |  |
|------------|--|
| Synopsis   | Enter the <b>igmp-snooping</b> context                                   |
| Context    | <b>configure service vpls string vxlan instance number igmp-snooping</b> |
| Tree       | <a href="#">igmp-snooping</a>  |
| Introduced | 16.0.R5  |
| Platforms  | All  |

## mrouter-port *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable VXLAN binds as multicast router ports   |
| Context    | <b>configure service vpls string vxlan instance number igmp-snooping mrouter-port <i>boolean</i></b> |
| Tree       | <a href="#">mrouter-port</a>   |
| Default    | false  |
| Introduced | 16.0.R5  |
| Platforms  | All  |

## mld-snooping

|            |   |
|------------|---|
| Synopsis   | Enter the <b>mld-snooping</b> context                                   |
| Context    | <b>configure service vpls string vxlan instance number mld-snooping</b> |
| Tree       | <a href="#">mld-snooping</a>  |
| Introduced | 16.0.R5   |
| Platforms  | All   |

## mrouter-port *boolean*

|          |   |
|----------|---|
| Synopsis | Enable VXLAN binds as multicast router ports  |
| Context  | <b>configure service vpls string vxlan instance number mld-snooping mrouter-port <i>boolean</i></b> |
| Tree     | <a href="#">mrouter-port</a>  |
| Default  | false   |

Introduced 16.0.R5  
 Platforms All

## network

Synopsis Enter the **network** context  
 Context **configure** [service](#) [vpls](#) [string](#) [vxlan](#) [instance](#) [number](#) [network](#)  
 Tree [network](#)  
 Introduced 16.0.R1

 Platforms All

**fp-redirect-group**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>fp-redirect-group</b> context   |
| Context    | <b>configure</b> <a href="#">service vpls string vxlan instance number network ingress qos network fp-redirect-group</a> |
| Tree       | <a href="#">fp-redirect-group</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**group-name** *reference*

|            |   |
|------------|---|
| Synopsis   | Name of the forwarding plane queue group template   |
| Context    | <b>configure</b> <a href="#">service vpls string vxlan instance number network ingress qos network fp-redirect-group group-name reference</a> |
| Tree       | <a href="#">group-name</a>  |
| Reference  | <b>configure</b> <a href="#">qos queue-group-templates ingress queue-group string</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**instance** *number*

|            |  |
|------------|--|
| Synopsis   | Instance of the forwarding-plane ingress Queue Group for this SDP binding  |
| Context    | <b>configure</b> <a href="#">service vpls string vxlan instance number network ingress qos network fp-redirect-group instance number</a> |
| Tree       | <a href="#">instance</a>   |
| Range      | 1 to 65535   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**policy-name** *reference*

|            |  |
|------------|--|
| Synopsis   | Ingress network policy name applied to this SDP binding  |
| Context    | <b>configure</b> <a href="#">service vpls string vxlan instance number network ingress qos network policy-name reference</a> |
| Tree       | <a href="#">policy-name</a>  |
| Reference  | <b>configure</b> <a href="#">qos network string</a>  |
| Introduced | 16.0.R1  |

Platforms All

### **rx-discard-on-ndf** *keyword*

Synopsis Received multicast traffic type discarded on NDF

Context **configure** [service vpls](#) *string vxlan instance number rx-discard-on-ndf keyword*

Tree [rx-discard-on-ndf](#)

Options bm, bum, none

Default bm

Introduced 16.0.R4

Platforms All

### **source-vtep-security** *boolean*

Synopsis Enable/disable source vtep security

Context **configure** [service vpls](#) *string vxlan instance number source-vtep-security boolean*

Tree [source-vtep-security](#)

Default false

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **vni** *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis VNI of the VXLAN

Context **configure** [service vpls](#) *string vxlan instance number vni number*

Tree [vni](#)

Range 1 to 16777215

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

**source-vtep** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|            |  |
|------------|--|

|------------|---|
| Synopsis   | IP MTU applied to outgoing packets  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">aa-interface</a> <i>string</i> <b>ip-mtu</b> <i>number</i> |
| Tree       | <a href="#">ip-mtu</a>  |
| Range      | 512 to 9786   |
| Units      | bytes   |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**ipv4**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>ipv4</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">aa-interface</a> <i>string</i> <b>ipv4</b> |
| Tree       | <a href="#">ipv4</a>  |
| Introduced | 21.10.R1  |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## primary

Synopsis Enable the **primary** context

Context **configure service vprn string aa-interface string ipv4 primary**

Tree [primary](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## address string

Synopsis Primary IPv4 address assigned to the interface

Context **configure service vprn string aa-interface string ipv4 primary address string**

Tree [address](#)

Notes This element is mandatory.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## prefix-length number

Synopsis IPv4 address prefix length

Context **configure service vprn string aa-interface string ipv4 primary prefix-length number**

Tree [prefix-length](#)

Range 0 to 32

Notes This element is mandatory.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## sap [sap-id] string

Synopsis Enter the **sap** list instance

Context **configure service vprn string aa-interface string sap string**

Tree [sap](#)

|                |  |
|----------------|--|
| Max. Instances | 1  |
| Introduced     | 21.10.R1                                     |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR |

**[sap-id] string**

|               |   |
|---------------|---|
| Synopsis      | SAP ID  |
| Context       | <b>configure</b> <a href="#">service vprn string aa-interface string sap string</a> |
| Tree          | <a href="#">sap</a>   |
| String Length | 1 to 45   |
| Notes         | This element is part of a list key.   |
| Introduced    | 21.10.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state keyword**

|            |   |
|------------|---|
| Synopsis   | Administrative state of the SAP   |
| Context    | <b>configure</b> <a href="#">service vprn string aa-interface string sap string admin-state keyword</a> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR  |

**description string**

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <a href="#">service vprn string aa-interface string sap string description string</a> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 160   |
| Introduced    | 21.10.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## egress

|            |  |
|------------|--|
| Synopsis   | Enter the <b>egress</b> context  |
| Context    | <b>configure service vprn string aa-interface string sap string egress</b> |
| Tree       | <a href="#">egress</a>   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                               |

## filter

|            |   |
|------------|---|
| Synopsis   | Enter the <b>filter</b> context   |
| Context    | <b>configure service vprn string aa-interface string sap string egress filter</b> |
| Tree       | <a href="#">filter</a>  |
| Introduced | 21.10.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                      |

## ip reference

|            |  |
|------------|--|
| Synopsis   | IPv4 filter policy name  |
| Context    | <b>configure service vprn string aa-interface string sap string egress filter ip reference</b> |
| Tree       | <a href="#">ip</a>   |
| Reference  | <b>configure filter ip-filter string</b>   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure service vprn string aa-interface string sap string egress qos</b> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                   |

## sap-egress

|          |                                     |
|----------|-------------------------------------|
| Synopsis | Enter the <b>sap-egress</b> context |
|----------|-------------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string aa-interface string sap string egress qos sap-egress</i> |
| Tree       | <a href="#">sap-egress</a>   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **policy-name** *reference*

|            |  |
|------------|--|
| Synopsis   | Policy ID to associate with SAP for mirrored service   |
| Context    | <b>configure service vprn</b> <i>string aa-interface string sap string egress qos sap-egress policy-name reference</i> |
| Tree       | <a href="#">policy-name</a>  |
| Reference  | <b>configure qos sap-egress</b> <i>string</i>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **fwd-wholesale**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>fwd-wholesale</b> context   |
| Context    | <b>configure service vprn</b> <i>string aa-interface string sap string fwd-wholesale</i> |
| Tree       | <a href="#">fwd-wholesale</a>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **pppoe-service** *reference*

|            |  |
|------------|--|
| Synopsis   | PPPoE service name   |
| Context    | <b>configure service vprn</b> <i>string aa-interface string sap string fwd-wholesale pppoe-service reference</i> |
| Tree       | <a href="#">pppoe-service</a>  |
| Reference  | <b>configure service epipe</b> <i>string</i>   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

### **ingress**

|          |                                  |
|----------|----------------------------------|
| Synopsis | Enter the <b>ingress</b> context |
|----------|----------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string aa-interface string sap string ingress</i> |
| Tree       | <a href="#">ingress</a>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR                                       |

## qos

|            |  |
|------------|--|
| Synopsis   | Enter the <b>qos</b> context   |
| Context    | <b>configure service vprn</b> <i>string aa-interface string sap string ingress qos</i> |
| Tree       | <a href="#">qos</a>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## sap-ingress

|            |  |
|------------|--|
| Synopsis   | Enter the <b>sap-ingress</b> context   |
| Context    | <b>configure service vprn</b> <i>string aa-interface string sap string ingress qos sap-ingress</i> |
| Tree       | <a href="#">sap-ingress</a>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## overrides

|            |  |
|------------|--|
| Synopsis   | Enter the <b>overrides</b> context   |
| Context    | <b>configure service vprn</b> <i>string aa-interface string sap string ingress qos sap-ingress overrides</i> |
| Tree       | <a href="#">overrides</a>  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## policy-name *reference*

|          |  |
|----------|--|
| Synopsis | Policy ID  |
| Context  | <b>configure service vprn</b> <i>string aa-interface string sap string ingress qos sap-ingress policy-name reference</i> |
| Tree     | <a href="#">policy-name</a>  |

---

|            |  |
|------------|--|
| Reference  | <b>configure</b> qos sap-ingress <i>string</i> |
| Introduced | 21.10.R1                                       |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## lag

|            |  |
|------------|--|
| Synopsis   | Enter the <b>lag</b> context   |
| Context    | <b>configure</b> service vprn <i>string</i> aa-interface <i>string</i> sap <i>string</i> lag |
| Tree       | lag  |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

## aaa

|            |   |
|------------|---|
| Synopsis   | Enter the <b>aaa</b> context                    |
| Context    | <b>configure</b> service vprn <i>string</i> aaa |
| Tree       | aaa   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

## remote-servers

|            |  |
|------------|--|
| Synopsis   | Enter the <b>remote-servers</b> context                        |
| Context    | <b>configure</b> service vprn <i>string</i> aaa remote-servers |
| Tree       | remote-servers   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

## radius

|            |   |
|------------|---|
| Synopsis   | Enable the <b>radius</b> context                                      |
| Context    | <b>configure</b> service vprn <i>string</i> aaa remote-servers radius |
| Tree       | radius  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**access-algorithm** *keyword*

|            |  |
|------------|--|
| Synopsis   | Algorithm used to access the set of RADIUS servers   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>aaa remote-servers radius access-algorithm</b> <i>keyword</i> |
| Tree       | <a href="#">access-algorithm</a>   |
| Options    | direct, round-robin  |
| Default    | direct   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**accounting** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable RADIUS command accounting   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>aaa remote-servers radius accounting</b> <i>boolean</i> |
| Tree       | <a href="#">accounting</a>   |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**accounting-port** *number*

|            |  |
|------------|--|
| Synopsis   | Port number on RADIUS server for accounting requests   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>aaa remote-servers radius accounting-port</b> <i>number</i> |
| Tree       | <a href="#">accounting-port</a>  |
| Range      | 1 to 65535   |
| Default    | 1813   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**admin-state** *keyword*

|          |   |
|----------|---|
| Synopsis | Administrative state of the authentication server   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>aaa remote-servers radius admin-state</b> <i>keyword</i> |
| Tree     | <a href="#">admin-state</a>   |
| Options  | enable, disable   |

---

|            |         |
|------------|---------|
| Default    | enable  |
| Introduced | 16.0.R4 |
| Platforms  | All     |

### **authorization** *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable RADIUS authorization  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">aaa remote-servers radius authorization</a> <i>boolean</i> |
| Tree       | <a href="#">authorization</a>  |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **interactive-authentication** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable RADIUS interactive authentication  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">aaa remote-servers radius interactive-authentication</a> <i>boolean</i> |
| Tree       | <a href="#">interactive-authentication</a>  |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **port** *number*

|            |  |
|------------|--|
| Synopsis   | UDP port number on which to contact RADIUS server  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">aaa remote-servers radius port</a> <i>number</i> |
| Tree       | <a href="#">port</a>   |
| Range      | 1 to 65535   |
| Default    | 1812   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **server** [[index](#)] *number*

|          |                                       |
|----------|---------------------------------------|
| Synopsis | Enter the <b>server</b> list instance |
|----------|---------------------------------------|

|                |  |
|----------------|--|
| Context        | <b>configure service vprn string aaa remote-servers radius server number</b> |
| Tree           | <b>server</b>  |
| Max. Instances | 5  |
| Introduced     | 16.0.R4  |
| Platforms      | All  |

**[index] number**

|            |  |
|------------|--|
| Synopsis   | RADIUS server ID   |
| Context    | <b>configure service vprn string aaa remote-servers radius server number</b> |
| Tree       | <b>server</b>  |
| Range      | 1 to 5   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**address (ipv4-address-no-zone | ipv6-address-no-zone)**

|            |  |
|------------|--|
| Synopsis   | IP address of the RADIUS server  |
| Context    | <b>configure service vprn string aaa remote-servers radius server number address (ipv4-address-no-zone   ipv6-address-no-zone)</b> |
| Tree       | <b>address</b>   |
| Notes      | This element is mandatory.   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**authenticator keyword**

|             |  |
|-------------|--|
| Synopsis    | Authenticator hash algorithm for the RADIUS server   |
| Context     | <b>configure service vprn string aaa remote-servers radius server number authenticator keyword</b>   |
| Tree        | <b>authenticator</b>   |
| Description | This command specifies the hash algorithm used to authenticate RADIUS Access-Request, Access-Accept, Access-Reject, Access-Challenge, Accounting-Request, and Accounting-Response packets. |

|            |          |
|------------|----------|
| Options    | md5, sm3 |
| Default    | md5      |
| Introduced | 22.10.R1 |
| Platforms  | All      |

**secret string**

|               |  |
|---------------|--|
| Synopsis      | Secret key to access the RADIUS server   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">aaa remote-servers radius server</a> <i>number</i> <b>secret</b> <i>string</i> |
| Tree          | <a href="#">secret</a>   |
| String Length | 1 to 115   |
| Introduced    | 16.0.R4  |
| Platforms     | All  |

**tls-client-profile reference**

|             |   |
|-------------|---|
| Synopsis    | TLS client profile for the RADIUS server  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">aaa remote-servers radius server</a> <i>number</i> <b>tls-client-profile</b> <i>reference</i> |
| Tree        | <a href="#">tls-client-profile</a>  |
| Description | This command specifies the TLS client profile used to encrypt RADIUS communication. When configured, RADIUS messages are sent using TLS.                              |
| Reference   | <b>configure</b> <a href="#">system security tls</a> <i>client-tls-profile</i> <i>string</i>  |
| Introduced  | 21.10.R1  |
| Platforms   | All   |

**server-retry number**

|            |   |
|------------|---|
| Synopsis   | Number of attempts to retry contacting RADIUS server  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">aaa remote-servers radius</a> <i>server-retry</i> <i>number</i> |
| Tree       | <a href="#">server-retry</a>  |
| Range      | 1 to 10   |
| Default    | 3   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**server-timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Time to wait for a response from the RADIUS server   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">aaa remote-servers radius</a> <a href="#">server-timeout</a> <i>number</i> |
| Tree       | <a href="#">server-timeout</a>   |
| Range      | 1 to 90  |
| Units      | seconds  |
| Default    | 3  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**use-default-template** *boolean*

|            |   |
|------------|---|
| Synopsis   | Apply the RADIUS default user template to RADIUS user   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">aaa remote-servers radius</a> <a href="#">use-default-template</a> <i>boolean</i> |
| Tree       | <a href="#">use-default-template</a>  |
| Default    | false   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**tacplus**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>tacplus</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">aaa remote-servers</a> <a href="#">tacplus</a> |
| Tree       | <a href="#">tacplus</a>  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**accounting**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>accounting</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">aaa remote-servers tacplus</a> <a href="#">accounting</a> |
| Tree       | <a href="#">accounting</a>  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **record-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | Type of accounting record packet sent to TACACS+ server  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">accounting</a> <a href="#">record-type</a> <i>keyword</i> |
| Tree       | <a href="#">record-type</a>  |
| Options    | start-stop, stop-only  |
| Default    | stop-only  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the TACACS+ protocol  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

### **authorization**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>authorization</b> context  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">authorization</a> |
| Tree       | <a href="#">authorization</a>  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

### **request-format**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>request-format</b> context   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <a href="#">authorization</a> <a href="#">request-format</a> |
| Tree        | <a href="#">request-format</a>  |
| Description | Commands in this context configure access operations that are sent to the TACACS+ server during authorization.  |

|            |          |
|------------|----------|
| Introduced | 21.10.R3 |
| Platforms  | All      |

### **access-operation-cmd** *keyword*

|                |   |
|----------------|---|
| Synopsis       | Access operations sent in authorization requests  |
| Context        | <b>configure service vprn string aaa remote-servers tacplus authorization request-format access-operation-cmd keyword</b>   |
| Tree           | <a href="#">access-operation-cmd</a>  |
| Description    | This command sends an operation argument in authorization requests.<br><br>In model-driven interfaces, this command configures the system to send the operation in the cmd argument, and the path in the cmd-args argument, in TACACS+ authorization requests. This command does not apply to authorization requests in classic interfaces. |
| Options        | delete  |
| Max. Instances | 1   |
| Introduced     | 21.10.R3  |
| Platforms      | All   |

### **use-priv-lvl** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow privilege level mapping  |
| Context     | <b>configure service vprn string aaa remote-servers tacplus authorization use-priv-lvl boolean</b>   |
| Tree        | <a href="#">use-priv-lvl</a>   |
| Description | When configured to <b>true</b> , this command automatically performs a single authorization request to the TACACS+ server for cmd* (all commands) immediately after login, and then uses the local profile associated (via the <b>priv-lvl-map</b> ) with the priv-lvl returned by the TACACS+ server for all subsequent authorization (except <b>enable-admin</b> ). After the initial authorization for cmd*, no further authorization requests are sent to the TACACS+ server (except <b>enable-admin</b> ).<br><br>When configured to <b>false</b> , each command is sent to the TACACS+ server for authorization (this is true regardless of whether the <b>tacplus use-default-template</b> setting is enabled). |
| Default     | false  |
| Introduced  | 16.0.R4  |
| Platforms   | All  |

**interactive-authentication** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allows TACACS+ interactive authentication  |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">aaa remote-servers tacplus interactive-authentication</a> <i>boolean</i> |
| Tree       | <a href="#">interactive-authentication</a>   |
| Default    | false  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**priv-lvl-map**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>priv-lvl-map</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">aaa remote-servers tacplus priv-lvl-map</a> |
| Tree       | <a href="#">priv-lvl-map</a>  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**priv-lvl** [[level](#)] *number*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>priv-lvl</b> list instance  |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">aaa remote-servers tacplus priv-lvl-map priv-lvl</a> <i>number</i> |
| Tree       | <a href="#">priv-lvl</a>   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**[level]** *number*

|            |  |
|------------|--|
| Synopsis   | Privilege level for the mapping  |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">aaa remote-servers tacplus priv-lvl-map priv-lvl</a> <i>number</i> |
| Tree       | <a href="#">priv-lvl</a>   |
| Range      | 0 to 15  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**user-profile-name** *reference*

|            |   |
|------------|---|
| Synopsis   | User profile for the mapping  |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">aaa remote-servers tacplus priv-lvl-map priv-lvl</a> <i>number</i> <a href="#">user-profile-name</a> <i>reference</i> |
| Tree       | <a href="#">user-profile-name</a>   |
| Reference  | <b>configure system security aaa local-profiles profile</b> <i>string</i>   |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**server** [[index](#)] *number*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>server</b> list instance   |
| Context        | <b>configure service vprn</b> <i>string</i> <a href="#">aaa remote-servers tacplus server</a> <i>number</i> |
| Tree           | <a href="#">server</a>  |
| Max. Instances | 5   |
| Introduced     | 16.0.R4   |
| Platforms      | All   |

**[index]** *number*

|            |   |
|------------|---|
| Synopsis   | TACACS+ server ID   |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">aaa remote-servers tacplus server</a> <i>number</i> |
| Tree       | <a href="#">server</a>  |
| Range      | 1 to 5  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

|          |   |
|----------|---|
| Synopsis | IP address of the TACACS+ server  |
| Context  | <b>configure service vprn</b> <i>string</i> <a href="#">aaa remote-servers tacplus server</a> <i>number</i> <a href="#">address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) |

|            |                            |
|------------|----------------------------|
| Tree       | <a href="#">address</a>    |
| Notes      | This element is mandatory. |
| Introduced | 16.0.R4                    |
| Platforms  | All                        |

**port number**

|            |   |
|------------|---|
| Synopsis   | TCP port ID on which to contact TACACS+ server  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">aaa remote-servers tacplus server number</a> <a href="#">port number</a> |
| Tree       | <a href="#">port</a>  |
| Range      | 0   1 to 65535  |
| Default    | 49  |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**secret string**

|               |   |
|---------------|---|
| Synopsis      | Secret key to access the TACACS+ server   |
| Context       | <b>configure</b> <a href="#">service vprn string</a> <a href="#">aaa remote-servers tacplus server number</a> <a href="#">secret string</a> |
| Tree          | <a href="#">secret</a>  |
| String Length | 1 to 199  |
| Notes         | This element is mandatory.  |
| Introduced    | 16.0.R4   |
| Platforms     | All   |

**server-timeout number**

|            |   |
|------------|---|
| Synopsis   | Time to wait for a response from the TACACS+ server   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">aaa remote-servers tacplus server-timeout number</a> |
| Tree       | <a href="#">server-timeout</a>  |
| Range      | 1 to 90   |
| Units      | seconds   |
| Default    | 3   |
| Introduced | 16.0.R4   |
| Platforms  | All   |

**use-default-template** *boolean*

|            |  |
|------------|--|
| Synopsis   | Apply TACACS+ default user-template to TACACS+ user  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <a href="#">aaa</a> <a href="#">remote-servers</a> <a href="#">tacplus</a> <b>use-default-template</b> <i>boolean</i> |
| Tree       | <a href="#">use-default-template</a>   |
| Default    | true   |
| Introduced | 16.0.R4  |
| Platforms  | All  |

**aarp-interface** [[interface-name](#)] *string*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>aarp-interface</b> list instance  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <b>aarp-interface</b> <i>string</i> |
| Tree       | <a href="#">aarp-interface</a>   |
| Introduced | 21.10.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**[interface-name]** *string*

|               |  |
|---------------|--|
| Synopsis      | Interface name   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <b>aarp-interface</b> <i>string</i> |
| Tree          | <a href="#">aarp-interface</a>   |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 21.10.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the interface  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vpn</a> <i>string</i> <b>aarp-interface</b> <i>string</i> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 21.10.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
Context **configure** [service vprn](#) *string* [aarp-interface](#) *string* [description](#) *string*

|-------------|--|
| Synopsis    | Use AS_SET path segment type for the aggregate route   |
| Context     | <b>configure service vpn string aggregates aggregate (ipv4-prefix   ipv6-prefix) as-set boolean</b>  |
| Tree        | <b>as-set</b>  |
| Description | <p>When configured to <b>true</b>, the AS_PATH attribute of the aggregate contains an AS_SET containing all AS numbers from the contributing routes. This can increase the amount of churn due to best-path changes.</p> <p>When configured to <b>false</b>, the AS_PATH attribute contains no AS_SET and will be originated by the ESR.</p> |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## blackhole

|            |   |
|------------|---|
| Synopsis   | Enable the <b>blackhole</b> context   |
| Context    | <b>configure service vprn string aggregates aggregate (ipv4-prefix   ipv6-prefix) blackhole</b> |
| Tree       | <b>blackhole</b>  |
| Notes      | The following elements are part of a choice: <b>blackhole</b> or <b>indirect</b> .              |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## generate-icmp *boolean*

|             |  |
|-------------|--|
| Synopsis    | Send ICMP unreachable messages for aggregate routes  |
| Context     | <b>configure service vprn string aggregates aggregate (ipv4-prefix   ipv6-prefix) blackhole generate-icmp boolean</b>  |
| Tree        | <b>generate-icmp</b>   |
| Description | When configured to <b>true</b> , ICMP unreachable messages are sent when packets match an aggregate route in the FIB with a black-hole next-hop.<br>When configured to <b>false</b> , ICMP unreachable messages are not generated. |
| Default     | false  |
| Introduced  | 16.0.R2  |
| Platforms   | All  |

## community *string*

|               |   |
|---------------|---|
| Synopsis      | Community name that is added to the aggregate route   |
| Context       | <b>configure service vprn string aggregates aggregate (ipv4-prefix   ipv6-prefix) community string</b>  |
| Tree          | <b>community</b>  |
| Description   | This command associates a BGP community with the aggregate route. The community name can be matched in route policies and is automatically added to BGP routes exported from the aggregate route. |
| String Length | 1 to 72   |

|                |                                      |
|----------------|--------------------------------------|
| Max. Instances | 12                                   |
| Notes          | This element is ordered by the user. |
| Introduced     | 16.0.R1                              |
| Platforms      | All                                  |

**description** *string*

|               |  |
|---------------|--|
| Synopsis      | Text description   |
| Context       | <b>configure</b> <b>service vprn</b> <i>string aggregates aggregate (ipv4-prefix   ipv6-prefix) description string</i> |
| Tree          | <a href="#">description</a>  |
| String Length | 1 to 80  |
| Introduced    | 16.0.R1  |
| Platforms     | All  |

**discard-component-communities** *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise aggregate with aggregate route community set  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string aggregates aggregate (ipv4-prefix   ipv6-prefix) discard-component-communities boolean</i> |
| Tree       | <a href="#">discard-component-communities</a>   |
| Default    | false   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

**indirect** (*ipv4-address-no-zone | ipv6-address-no-zone*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |  |
|----------|--|
| Synopsis | Address of the indirect next hop   |
| Context  | <b>configure</b> <b>service vprn</b> <i>string aggregates aggregate (ipv4-prefix   ipv6-prefix) indirect (ipv4-address-no-zone   ipv6-address-no-zone)</i> |
| Tree     | <a href="#">indirect</a>   |

|             |   |
|-------------|---|
| Description | This command programs aggregate routes into the forwarding table with an indirect next hop. If a packet matches the aggregate route but not a contributing route, it is forwarded toward the indirect next hop rather than being discarded. |
| Notes       | The following elements are part of a choice: <b>blackhole</b> or <b>indirect</b> .  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **local-preference** *number*

|             |  |
|-------------|--|
| Synopsis    | Local preference used when aggregate route is exported   |
| Context     | <b>configure service vprn string aggregates aggregate</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>local-preference number</b>  |
| Tree        | <a href="#">local-preference</a>   |
| Description | This command configures the local preference value to use when the aggregate route is exported rather than using any of the local preference values assigned for any of the contributing routes. |
| Range       | 0 to 4294967295  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **policy** *reference*

|             |   |
|-------------|---|
| Synopsis    | Policy name for the aggregated route  |
| Context     | <b>configure service vprn string aggregates aggregate</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>policy reference</b>  |
| Tree        | <a href="#">policy</a>  |
| Description | <p>This command associates an aggregate route with a policy reference. The aggregated route is activated only when there is at least one eligible active route in the sub-trees below it that is accepted by the policy evaluation. There is no evaluation into any sub-tree that starts with another active aggregate route. Eligible routes exclude host routes and LDP shortcut routes.</p> <p>If an aggregate route has no policy, or the reference is to an empty policy, this configuration is treated as equivalent to a policy with one rule that accepts all routes.</p> |
| Reference   | <b>configure policy-options policy-statement string</b>   |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

**summary-only *boolean***

|             |  |
|-------------|--|
| Synopsis    | Advertise the aggregate route only   |
| Context     | <b>configure service vpn</b> <i>string</i> <b>aggregates aggregate</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>summary-only</b> <i>boolean</i>  |
| Tree        | <b>summary-only</b>  |
| Description | When configured to <b>true</b> , the router suppresses the advertisement of more specific component routes for the aggregate.<br><br>When configured to <b>false</b> , the router advertises both the aggregate route and its contributing routes. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**tunnel-group *number***

|             |  |
|-------------|--|
| Synopsis    | Tunnel group from which to associate the MC IPsec state  |
| Context     | <b>configure service vpn</b> <i>string</i> <b>aggregates aggregate</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>tunnel-group</b> <i>number</i> |
| Tree        | <b>tunnel-group</b>  |
| Description | This command adds the MC-IPsec state of the specific tunnel-group to the aggregate route.  |
| Range       | 1 to 64  |
| Introduced  | 20.7.R1  |
| Platforms   | All  |

**allow-export-bgp-vpn *boolean***

|            |   |
|------------|---|
| Synopsis   | Include BGP-VPN routes for export   |
| Context    | <b>configure service vpn</b> <i>string</i> <b>allow-export-bgp-vpn</b> <i>boolean</i> |
| Tree       | <b>allow-export-bgp-vpn</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**autonomous-system** *number*

|             |  |
|-------------|--|
| Synopsis    | AS number advertised to peers for this router  |
| Context     | <b>configure service vprn</b> <i>string autonomous-system number</i>   |
| Tree        | <a href="#">autonomous-system</a>  |
| Description | This command configures the autonomous system (AS) number for the router. This value must be set before BGP can be activated.<br><br>If the AS number is changed on a router with an active BGP instance, the new AS number is not used until the BGP instance is restarted. |
| Range       | 1 to 4294967295  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**bgp**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>bgp</b> context                   |
| Context    | <b>configure service vprn</b> <i>string bgp</i> |
| Tree       | <a href="#">bgp</a>                             |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the BGP instance                            |
| Context    | <b>configure service vprn</b> <i>string bgp admin-state keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | enable  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**advertise-inactive** *boolean*

|          |  |
|----------|--|
| Synopsis | Advertise inactive BGP routes to peers                                     |
| Context  | <b>configure service vprn</b> <i>string bgp advertise-inactive boolean</i> |
| Tree     | <a href="#">advertise-inactive</a>   |

|             |   |
|-------------|---|
| Description | When configured to <b>true</b> , this command allows any inactive BGP route to be advertised, even though it is not the used route.<br><br>When configured to <b>false</b> , the advertisement of inactive BGP routes to other BGP peers is disabled. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### advertise-ipv6-next-hops

|            |  |
|------------|--|
| Synopsis   | Enter the <b>advertise-ipv6-next-hops</b> context                |
| Context    | <b>configure service vpn string bgp advertise-ipv6-next-hops</b> |
| Tree       | <a href="#">advertise-ipv6-next-hops</a>                         |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### ipv4 *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable IPv4 routes to be advertised   |
| Context    | <b>configure service vpn string bgp advertise-ipv6-next-hops ipv4 boolean</b> |
| Tree       | <a href="#">ipv4</a>  |
| Default    | false   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

### aggregator-id-zero *boolean*

|             |  |
|-------------|--|
| Synopsis    | Set router ID in the BGP AGGREGATOR attribute to 0   |
| Context     | <b>configure service vpn string bgp aggregator-id-zero boolean</b>   |
| Tree        | <a href="#">aggregator-id-zero</a>   |
| Description | When configured to <b>true</b> , the router ID in the BGP AGGREGATOR path attribute is set to 0 when BGP aggregates routes. This prevents different routers within an AS from creating aggregate routes for the same prefix with different path attributes.<br><br>When configured to <b>false</b> , the AS number and router ID are added to the AGGREGATOR path attribute. |
| Default     | false  |

Introduced 16.0.R1  
 Platforms All

### **asn-4-byte** *boolean*

Synopsis Advertise support for 4-byte ASNs  
 Context **configure** [service vprn](#) *string* [bgp asn-4-byte](#) *boolean*  
 Tree [asn-4-byte](#)  
 Default true  
 Introduced 16.0.R1  
 Platforms All

### **authentication-key** *string*

Synopsis BGP authentication key for all peers  
 Context **configure** [service vprn](#) *string* [bgp authentication-key](#) *string*  
 Tree [authentication-key](#)  
 Description This command configures the authentication key used to protect all sessions. The stored format of the authentication key is based on the **configure system security hash-control management-interface md-cli hash-algorithm** setting.  
 String Length 1 to 370  
 Introduced 16.0.R1  
 Platforms All

### **authentication-keychain** *reference*

Synopsis TCP authentication keychain for the session  
 Context **configure** [service vprn](#) *string* [bgp authentication-keychain](#) *reference*  
 Tree [authentication-keychain](#)  
 Description This command associates the keychain to be used to authenticate the BGP session. The keychain allows the rollover of authentication keys during the lifetime of a session.  
 Reference **configure** [system security keychains](#) [keychain](#) *string*  
 Introduced 16.0.R3  
 Platforms All

## backup-path

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>backup-path</b> context   |
| Context     | <b>configure service vprn string bgp backup-path</b>   |
| Tree        | <a href="#">backup-path</a>  |
| Description | <p>Commands in this context enable the use of a backup path for specified BGP-learned prefixes belonging to the base router. Multiple paths must be received for a prefix in order to take advantage of this feature. When a prefix has a backup path and its primary paths fail, the affected traffic is rapidly diverted to the backup path without waiting for control plane re-convergence to occur. When many prefixes share the same primary paths and in some cases, the same backup path, the time to divert failover traffic to the backup path is independent of the number of prefixes.</p> <p>By default, IPv4 and IPv6 prefixes do not have a backup path installed in the IOM.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## ipv4 *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable support for unlabeled unicast IPv4 routes                         |
| Context    | <b>configure service vprn string bgp backup-path ipv4 <i>boolean</i></b> |
| Tree       | <a href="#">ipv4</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ipv6 *boolean*

|            |  |
|------------|--|
| Synopsis   | Enable support for unlabeled unicast IPv6 routes                         |
| Context    | <b>configure service vprn string bgp backup-path ipv6 <i>boolean</i></b> |
| Tree       | <a href="#">ipv6</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## label-ipv4 *boolean*

|          |  |
|----------|--|
| Synopsis | Enable support for labeled-unicast IPv4 routes                                 |
| Context  | <b>configure service vprn string bgp backup-path label-ipv4 <i>boolean</i></b> |

|            |                            |
|------------|----------------------------|
| Tree       | <a href="#">label-ipv4</a> |
| Default    | false                      |
| Introduced | 16.0.R1                    |
| Platforms  | All                        |

### **label-ipv6** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable support for labeled unicast IPv6 routes  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp backup-path label-ipv6</a> <i>boolean</i> |
| Tree       | <a href="#">label-ipv6</a>  |
| Default    | false   |
| Introduced | 22.2.R1   |
| Platforms  | All   |

### **best-path-selection**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>best-path-selection</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp best-path-selection</a> |
| Tree       | <a href="#">best-path-selection</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **always-compare-med**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>always-compare-med</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp best-path-selection always-compare-med</a> |
| Tree        | <a href="#">always-compare-med</a>   |
| Description | Commands in this context determine how the BGP decision process is affected by the MED path attribute.                 |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **med-value** *keyword*

|          |                                    |
|----------|------------------------------------|
| Synopsis | Action for a missing MED attribute |
|----------|------------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn string bgp best-path-selection always-compare-med med-value keyword</b> |
| Tree       | <a href="#">med-value</a>   |
| Options    | off, missing-med-zero, missing-med-infinity, on   |
| Default    | off   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **strict-as boolean**

|             |   |
|-------------|---|
| Synopsis    | Compare MED only for routes from same neighbor AS   |
| Context     | <b>configure service vprn string bgp best-path-selection always-compare-med strict-as boolean</b>   |
| Tree        | <a href="#">strict-as</a>   |
| Description | When configured to <b>true</b> , the route selection process can compare the MED path attribute between routes only if they come from the same neighbor AS.<br><br>When configured to <b>false</b> , the route selection process can compare the MED path attribute between routes even if they come from different neighbor ASs. |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **as-path-ignore**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>as-path-ignore</b> context  |
| Context     | <b>configure service vprn string bgp best-path-selection as-path-ignore</b>  |
| Tree        | <a href="#">as-path-ignore</a>   |
| Description | Commands in this context determine whether the AS path length is considered in the selection process for routes of the specified address families. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **ipv4 boolean**

|          |  |
|----------|--|
| Synopsis | Ignore AS path length for unlabeled unicast IPv4 routes                                  |
| Context  | <b>configure service vprn string bgp best-path-selection as-path-ignore ipv4 boolean</b> |

---

|            |                      |
|------------|----------------------|
| Tree       | <a href="#">ipv4</a> |
| Default    | false                |
| Introduced | 16.0.R1              |
| Platforms  | All                  |

### **ipv6 *boolean***

|            |   |
|------------|---|
| Synopsis   | Ignore AS path length for unlabeled unicast IPv6 routes   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <a href="#">string</a> <a href="#">bgp best-path-selection as-path-ignore</a> <a href="#">ipv6</a> <i>boolean</i> |
| Tree       | <a href="#">ipv6</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **label-ipv4 *boolean***

|            |   |
|------------|---|
| Synopsis   | Ignore AS path length for labeled-unicast IPv4 routes   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <a href="#">string</a> <a href="#">bgp best-path-selection as-path-ignore</a> <a href="#">label-ipv4</a> <i>boolean</i> |
| Tree       | <a href="#">label-ipv4</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **label-ipv6 *boolean***

|            |   |
|------------|---|
| Synopsis   | Ignore AS path length for labeled unicast IPv6 routes   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <a href="#">string</a> <a href="#">bgp best-path-selection as-path-ignore</a> <a href="#">label-ipv6</a> <i>boolean</i> |
| Tree       | <a href="#">label-ipv6</a>  |
| Default    | false   |
| Introduced | 22.2.R1   |
| Platforms  | All   |

### **compare-origin-validation-state *boolean***

|          |  |
|----------|--|
| Synopsis | Allow comparison of origin validation states |
|----------|--|

|            |  |
|------------|--|
| Context    | <b>configure service vprn string bgp best-path-selection compare-origin-validation-state boolean</b> |
| Tree       | <a href="#">compare-origin-validation-state</a>  |
| Default    | false  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

### **d-path-length-ignore boolean**

|             |  |
|-------------|--|
| Synopsis    | Enable D-PATH length ignore  |
| Context     | <b>configure service vprn string bgp best-path-selection d-path-length-ignore boolean</b>  |
| Tree        | <a href="#">d-path-length-ignore</a>   |
| Description | <p>When configured to <b>true</b>, this command, enables the router to ignore the D-PATH domain segment length during best-path selection.</p> <p>At the base router level (or VPRN BGP level for PE-CE routers), this command allows BGP to ignore the D-PATH domain segment length for best-path selection purposes. BGP ignores the D-PATH length when comparing two VPN routes or two IFL routes within the same RD. However, these VPN/IFL routes are processed in the main-BGP instance.</p> <p>At the VPRN router level, this command allows the VPRN RTM to ignore the D-PATH domain segment length for best-path selection purposes (for routes in VPRN). The user can control whether the RTM considers the D-PATH length when comparing two VPN routes with different RDs.</p> <p>Best-path selection for EVPN-IFF routes against other owners (for example, EVPN-IFL or IPVPN) still relies on RTM preference. When EVPN-IFF RTM preference matches the RTM preference of another BGP owner, the existing RTM selection applies and D-PATH is not considered, irrespective of the <b>d-path-length-ignore</b> configuration.</p> <p>When configured to <b>false</b>, this command disables the ability to ignore the D-PATH domain segment length.</p> |
| Default     | false  |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

### **deterministic-med boolean**

|             |   |
|-------------|---|
| Synopsis    | Group paths based on AS before MED attribute comparison   |
| Context     | <b>configure service vprn string bgp best-path-selection deterministic-med boolean</b>  |
| Tree        | <a href="#">deterministic-med</a>   |
| Description | When configured to <b>true</b> , BGP groups paths from the same AS that are equal up to the MED attribute comparison and then compares the best path from each group to |

select the overall best path. This process ensures that the best-path selection process is deterministic in all cases.

When configured to **false**, paths are not grouped and the overall best-path selection can depend on the order of route arrival.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## **ebgp-ibgp-equal**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>ebgp-ibgp-equal</b> context   |
| Context     | <b>configure service vprn string bgp best-path-selection ebgp-ibgp-equal</b>   |
| Tree        | <a href="#">ebgp-ibgp-equal</a>  |
| Description | <p>Commands in this context allow BGP to ignore the difference between EBGP and IBGP routes in selecting the best path and eligible multipaths (if multipath and ECMP are enabled) for the specified address families. The result is a form of EIBGP load-balancing in a multipath scenario. This behavior can be applied selectively to certain address families.</p> <p>By default, the BGP decision process prefers an EBGP learned route over an IBGP learned route.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## **ipv4 boolean**

|            |   |
|------------|---|
| Synopsis   | Consider EBGP and IBGP IPv4 routes equal  |
| Context    | <b>configure service vprn string bgp best-path-selection ebgp-ibgp-equal ipv4 boolean</b> |
| Tree       | <a href="#">ipv4</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## **ipv6 boolean**

|          |   |
|----------|---|
| Synopsis | Consider EBGP and IBGP IPv6 routes equal  |
| Context  | <b>configure service vprn string bgp best-path-selection ebgp-ibgp-equal ipv6 boolean</b> |
| Tree     | <a href="#">ipv6</a>  |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **label-ipv4** *boolean*

|            |   |
|------------|---|
| Synopsis   | Consider EBGP and IBGP label-IPv4 routes equal  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp best-path-selection ebgp-ibgp-equal label-ipv4</a> <i>boolean</i> |
| Tree       | <a href="#">label-ipv4</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **label-ipv6** *boolean*

|            |   |
|------------|---|
| Synopsis   | Consider EBGP and IBGP label-IPv6 routes equal  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp best-path-selection ebgp-ibgp-equal label-ipv6</a> <i>boolean</i> |
| Tree       | <a href="#">label-ipv6</a>  |
| Default    | false   |
| Introduced | 22.2.R1   |
| Platforms  | All   |

### **ignore-nh-metric** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Ignore next-hop distance in best path selection   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp best-path-selection ignore-nh-metric</a> <i>boolean</i>   |
| Tree        | <a href="#">ignore-nh-metric</a>  |
| Description | <p>When configured to <b>true</b>, BGP ignores the resolved distance to the BGP next hop in its route selection process.</p> <p>When configured to <b>false</b>, BGP factors the distance to the next hop into its decision process when it compares two BGP routes with the same NLRI learned from base router BGP peers (in the <b>router</b> context) or IP prefix learned from VPRN BGP peers (in the <b>vprn</b> context).</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |

Platforms All

### ignore-router-id

Synopsis Enable the **ignore-router-id** context

Context **configure service vprn string bgp best-path-selection ignore-router-id**

Tree [ignore-router-id](#)

Description Commands in this context determine whether the BGP selection process ignores the BGP identifier (router ID) comparison of two EBGP paths from different EBGP peers when determining the best path for the specified address families.

By default, BGP selects the path with the lower router ID when it compares two paths from EBGP peers.

Introduced 16.0.R1

Platforms All

### origin-invalid-unusable *boolean*

Synopsis Ignore routes with invalid origin validation state

Context **configure service vprn string bgp best-path-selection origin-invalid-unusable *boolean***

Tree [origin-invalid-unusable](#)

Default false

Introduced 19.7.R1

Platforms All

### bfd-liveness *boolean*

Synopsis Enable BFD

Context **configure service vprn string bgp bfd-liveness *boolean***

Tree [bfd-liveness](#)

Description When configured to **true**, BFD is enabled on all BGP sessions, subject to the association of those BGP sessions with IP interfaces that have BFD configurations.

When configured to **false**, BFD is not enabled globally for all BGP sessions.

Default false

Introduced 16.0.R1

Platforms All

**client-reflect** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Allow client reflection of routes by route reflector  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp client-reflect</a> <i>boolean</i>   |
| Tree        | <a href="#">client-reflect</a>  |
| Description | When configured to <b>true</b> , routes received from neighbors considered to be RR clients are reflected to other peers as expected.<br>When configured to <b>false</b> , routes received from neighbors considered to be RR clients are not reflected to other clients. |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**cluster**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>cluster</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp cluster</a> |
| Tree       | <a href="#">cluster</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**cluster-id** *string*

|             |  |
|-------------|--|
| Synopsis    | Route reflector cluster ID   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp cluster cluster-id</a> <i>string</i>                                   |
| Tree        | <a href="#">cluster-id</a>   |
| Description | The command specifies the cluster ID to associate with the routing instance, effectively making all IBGP peers of the routing instance RR clients. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**connect-retry** *number*

|          |   |
|----------|---|
| Synopsis | BGP connect retry timer value   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp connect-retry</a> <i>number</i> |
| Tree     | <a href="#">connect-retry</a>   |

|             |   |
|-------------|---|
| Description | This command configures the BGP connect retry timer. When the timer expires, BGP tries to reconnect to the configured peer. |
| Range       | 1 to 65535  |
| Default     | 120   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## convergence

|            |   |
|------------|---|
| Synopsis   | Enter the <b>convergence</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp convergence</a> |
| Tree       | <a href="#">convergence</a>   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

## family [[family-type](#)] *keyword*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>family</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp convergence family</a> <i>keyword</i> |
| Tree       | <a href="#">family</a>  |
| Introduced | 19.7.R1   |
| Platforms  | All   |

## [[family-type](#)] *keyword*

|            |   |
|------------|---|
| Synopsis   | Address family for which convergence selection applies  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp convergence family</a> <i>keyword</i> |
| Tree       | <a href="#">family</a>  |
| Options    | ipv4, ipv6  |
| Notes      | This element is part of a list key.   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

**max-wait-to-advertise** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum wait time before advertising routes   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp convergence</a> <a href="#">family keyword</a> <a href="#">max-wait-to-advertise number</a> |
| Tree       | <a href="#">max-wait-to-advertise</a>   |
| Range      | 0 to 3600   |
| Default    | 0   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

**min-wait-to-advertise** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum wait time before advertising routes  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp convergence</a> <a href="#">min-wait-to-advertise number</a> |
| Tree       | <a href="#">min-wait-to-advertise</a>  |
| Range      | 0 to 3600  |
| Default    | 0  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

**damp-peer-oscillations**

|             |   |
|-------------|---|
| Synopsis    | Enable the <b>damp-peer-oscillations</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp damp-peer-oscillations</a>  |
| Tree        | <a href="#">damp-peer-oscillations</a>  |
| Description | Commands in this context specify how long a BGP peer session remains in the idle state after an error causes the session to reset. In the idle state, BGP does not initiate or respond to attempts to establish a new session. Repeated errors that occur a short time after each session reset cause longer and longer hold times in the idle state. |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**error-interval** *number*

|          |  |
|----------|--|
| Synopsis | Time after a reset that the session must be error-free   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp damp-peer-oscillations</a> <a href="#">error-interval number</a> |

|             |   |
|-------------|---|
| Tree        | <a href="#">error-interval</a>  |
| Description | This command sets the interval of time after a reset, during which the session must be error-free in order to reset the penalty counter and return the idle hold time to the initial wait time. |
| Range       | 0 to 2048   |
| Default     | 30  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **idle-hold-time**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>idle-hold-time</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string bgp damp-peer-oscillations idle-hold-time</a> |
| Tree       | <a href="#">idle-hold-time</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **initial-wait number**

|            |  |
|------------|--|
| Synopsis   | Time session remains in idle state after stabilization   |
| Context    | <b>configure</b> <a href="#">service vprn string bgp damp-peer-oscillations idle-hold-time initial-wait number</a> |
| Tree       | <a href="#">initial-wait</a>   |
| Range      | 0 to 2048  |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **max-wait number**

|          |  |
|----------|--|
| Synopsis | Maximum session idle time after repeated instability   |
| Context  | <b>configure</b> <a href="#">service vprn string bgp damp-peer-oscillations idle-hold-time max-wait number</a> |
| Tree     | <a href="#">max-wait</a>   |
| Range    | 1 to 2048  |
| Default  | 60   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **second-wait** *number*

|             |   |
|-------------|---|
| Synopsis    | Time that doubles after each session failure  |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp damp-peer-oscillations</b> <b>idle-hold-time</b> <b>second-wait</b> <i>number</i> |
| Tree        | <b>second-wait</b>  |
| Description | This command defines the hold time that doubles after each repeated session failure that occurs in a short span of time.                    |
| Range       | 1 to 2048   |
| Default     | 5   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **damping** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Use BGP route damping to reduce route flap   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp damping</b> <i>boolean</i>   |
| Tree        | <b>damping</b>   |
| Description | <p>When configured to <b>true</b>, this command enables route damping to reduce the number of update messages sent between BGP peers and reduce the load on peers without affecting the route convergence time for stable routes.</p> <p>Route damping is controlled by profiles set in route policies. If no profile is specified in the route policy, the default damping profile is used with the following parameters:</p> <ul style="list-style-type: none"> <li>• Half-life: 15 minutes</li> <li>• Max-suppress: 60 minutes</li> <li>• Suppress-threshold: 3000</li> <li>• Reuse-threshold: 750</li> </ul> <p>When configured to <b>false</b>, BGP route damping for learned routes is disabled.</p> |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## default-label-preference

|            |  |
|------------|--|
| Synopsis   | Enter the <b>default-label-preference</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp default-label-preference</a> |
| Tree       | <a href="#">default-label-preference</a>   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

| Synopsis   | Default preference for IBGP   |
| Context    | <b>configure service vprn string bgp default-preference ibgp number</b> |
| Tree       | <b>ibgp</b>   |
| Range      | 0 to 255  |
| Default    | 0   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**description string**

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure service vprn string bgp description string</b> |
| Tree          | <b>description</b>  |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**domain-id string**

|          |   |
|----------|---|
| Synopsis | Domain ID of received BGP route before readvertisement    |
| Context  | <b>configure service vprn string bgp domain-id string</b> |
| Tree     | <b>domain-id</b>  |

|             |  |
|-------------|--|
| Description | <p>This command specifies the domain ID. The domain ID identifies the network from which the BGP route was received before the RTM advertises it to a different neighbor. The domain ID is part of a domain, represented as domain-id:isf_safi_type in the D-PATH attribute, as described in <i>draft-ietf-bess-evpn-ipvpn-interworking</i>. Gateway routers modify the D-PATH attribute. A gateway is a PE where a VPRN is instantiated. The VPRN in this case advertises or receives routes from multiple BGP owners (for example, EVPN-IFL and BGP-IPVPN) or multiple instances of the same owner (for example, VPRN with two BGP-IPVPN instances).</p> <p>Gateways use the D-PATH attribute to detect loops (for received routes where the D-PATH contains a local domain ID) and to make BGP best-path selection decisions based on the D-PATH length (shorter D-PATH is preferred).</p> <p>In the following example, suppose a gateway receives prefix P in an EVPN-IFL instance with the following D-PATH from neighbor N:</p> <p>Seg Len=1 / 65000:1:128</p> <p>If the router imports the route in VPRN-1, BGP-EVPN SRv6 instance with domain 65000:2, it readvertises it to its BGP-IPVPN MPLS instance as follows:</p> <p>Seg Len=2 / 65000:2:70 / 65000:1:128</p> <p>That is, the gateway prepends the local domain ID and family to the D-PATH before readvertising the route into a different instance.</p> |
| Introduced  | 21.10.R1   |
| Platforms   | All  |

### **dynamic-neighbor-limit** *number*

|             |  |
|-------------|--|
| Synopsis    | Max dynamic BGP sessions to accept from remote peers   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>bgp dynamic-neighbor-limit</b> <i>number</i>  |
| Tree        | <a href="#">dynamic-neighbor-limit</a>   |
| Description | This command configures the maximum number of dynamic BGP sessions to accept from remote peers associated with the entire BGP instance. If accepting a new dynamic session causes the instance limit to be exceeded, the new session attempt is rejected and a Notification message is sent back to the remote peer. |
| Range       | 1 to 8192  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **ebgp-default-reject-policy**

|          |   |
|----------|---|
| Synopsis | Enter the <b>ebgp-default-reject-policy</b> context                               |
| Context  | <b>configure service vprn</b> <i>string</i> <b>bgp ebgp-default-reject-policy</b> |
| Tree     | <a href="#">ebgp-default-reject-policy</a>  |

Introduced 19.5.R1  
Platforms All

### **export** *boolean*

## family

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>family</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn string bgp family</a>                                      |
| Tree        | <a href="#">family</a>   |
| Description | Commands in this context specify the BGP address families supported by the base router BGP sessions. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## flow-ipv4 *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise support for the flowspec-IPv4 address family                            |
| Context    | <b>configure</b> <a href="#">service vprn string bgp family flow-ipv4 boolean</a> |
| Tree       | <a href="#">flow-ipv4</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## flow-ipv6 *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise support for the flowspec-IPv6 address family                            |
| Context    | <b>configure</b> <a href="#">service vprn string bgp family flow-ipv6 boolean</a> |
| Tree       | <a href="#">flow-ipv6</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## ipv4 *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise MP-BGP support for the IPv4 address family                         |
| Context    | <b>configure</b> <a href="#">service vprn string bgp family ipv4 boolean</a> |
| Tree       | <a href="#">ipv4</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**ipv6** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise MP-BGP support for the IPv6 address family   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp family ipv6</a> <i>boolean</i> |
| Tree       | <a href="#">ipv6</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**label-ipv4** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise support for the label-IPv4 address family  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp family label-ipv4</a> <i>boolean</i> |
| Tree       | <a href="#">label-ipv4</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**mcast-ipv4** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise support for the MCAST-IPv4 address family  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp family mcast-ipv4</a> <i>boolean</i> |
| Tree       | <a href="#">mcast-ipv4</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**mcast-ipv6** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise support for the MCAST-IPv6 address family  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp family mcast-ipv6</a> <i>boolean</i> |
| Tree       | <a href="#">mcast-ipv6</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**fast-external-failover** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Drop external BGP session immediately when link fails   |
| Context     | <b>configure</b> <a href="#">service vprn string bgp fast-external-failover</a> <i>boolean</i>  |
| Tree        | <a href="#">fast-external-failover</a>  |
| Description | When configured to <b>true</b> , the router drops an external BGP session to a single-hop neighbor immediately when the local interface goes down.<br>When configured to <b>false</b> , the BGP session remains up until the hold time expires. |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**flowspec**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>flowspec</b> context                                 |
| Context    | <b>configure</b> <a href="#">service vprn string bgp flowspec</a> |
| Tree       | <a href="#">flowspec</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**validate-dest-prefix** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Validate destination prefix in FlowSpec-IPv4/IPv6 route   |
| Context     | <b>configure</b> <a href="#">service vprn string bgp flowspec validate-dest-prefix</a> <i>boolean</i>   |
| Tree        | <a href="#">validate-dest-prefix</a>  |
| Description | When configured to <b>true</b> , this command enables validation of received IPv4 and IPv6 FlowSpec routes that contain a destination-prefix subcomponent.<br>A FlowSpec route with a destination-prefix subcomponent is considered invalid if both of the following are true: <ul style="list-style-type: none"> <li>• it was originated outside the local AS of the receiving BGP router</li> <li>• the neighbor AS of the FlowSpec route does not match the neighbor AS of the best match BGP (unicast) route for the destination prefix or the neighbor AS of any longer match BGP (unicast) route for the destination prefix</li> </ul> An invalid route is retained in the BGP but it is not used for filtering traffic or propagated to other BGP routers.<br>When configured to <b>false</b> , destination-prefix validation is disabled. |
| Default     | false   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **validate-redirect-ip** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Validate the redirect-to-IPv4 action in FlowSpec route   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp flowspec</a> <b>validate-redirect-ip</b> <i>boolean</i>  |
| Tree        | <a href="#">validate-redirect-ip</a>   |
| Description | <p>When configured to <b>true</b>, this command enables procedures to validate the redirect-to-IPv4 action attached to FlowSpec-IPv4 routes that are received by the BGP instance.</p> <p>A FlowSpec-IPv4 route is considered invalid and is not installed as a filter rule if the FlowSpec-IPv4 route is deemed to have originated from a different AS than the IP route that resolves the redirection IPv4 address. The originating AS of a FlowSpec route is determined from its AS path.</p> <p>When configured to <b>false</b>, the validation check is disabled.</p> |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **graceful-restart**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>graceful-restart</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp</a> <b>graceful-restart</b> |
| Tree       | <a href="#">graceful-restart</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **gr-notification** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Perform Graceful Restart procedures  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp graceful-restart</a> <b>gr-notification</b> <i>boolean</i>   |
| Tree        | <a href="#">gr-notification</a>  |
| Description | <p>When configured to <b>true</b>, the Graceful Restart capability sent by the router indicates support for NOTIFICATION messages. If the peer also supports this capability, the session is restarted gracefully (while preserving forwarding) if either peer sends a NOTIFICATION message due to some type of event or error.</p> <p>When configured to <b>false</b>, NOTIFICATION messages are not supported.</p> |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

## long-lived

|            |  |
|------------|--|
| Synopsis   | Enable the <b>long-lived</b> context                                 |
| Context    | <b>configure service vprn string bgp graceful-restart long-lived</b> |
| Tree       | <a href="#">long-lived</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## advertise-stale-to-all-neighbors *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise stale routes to all BGP peers   |
| Context    | <b>configure service vprn string bgp graceful-restart long-lived advertise-stale-to-all-neighbors boolean</b> |
| Tree       | <a href="#">advertise-stale-to-all-neighbors</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## advertised-stale-time *number*

|            |   |
|------------|---|
| Synopsis   | LLGR stale routes time  |
| Context    | <b>configure service vprn string bgp graceful-restart long-lived advertised-stale-time number</b> |
| Tree       | <a href="#">advertised-stale-time</a>   |
| Range      | 0 to 16777215   |
| Default    | 86400   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## family [[family-type](#)] *keyword*

|          |                                       |
|----------|---------------------------------------|
| Synopsis | Enter the <b>family</b> list instance |
|----------|---------------------------------------|

|            |  |
|------------|--|
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp graceful-restart long-lived family</b> <i>keyword</i> |
| Tree       | <b>family</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **[family-type]** *keyword*

|            |  |
|------------|--|
| Synopsis   | Address family type for LLGR   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp graceful-restart long-lived family</b> <i>keyword</i> |
| Tree       | <b>family</b>  |
| Options    | ipv4, ipv6, flow-ipv4, flow-ipv6, label-ipv4   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **advertised-stale-time** *number*

|            |   |
|------------|---|
| Synopsis   | LLGR stale routes time for family override  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp graceful-restart long-lived family</b> <i>keyword</i> <b>advertised-stale-time</b> <i>number</i> |
| Tree       | <b>advertised-stale-time</b>  |
| Range      | 0 to 16777215   |
| Default    | 86400   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **helper-override-stale-time** *number*

|            |  |
|------------|--|
| Synopsis   | Locally-configured stale routes override time  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp graceful-restart long-lived family</b> <i>keyword</i> <b>helper-override-stale-time</b> <i>number</i> |
| Tree       | <b>helper-override-stale-time</b>  |
| Range      | 0 to 16777215  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**forwarding-bits-set** *keyword*

|             |   |
|-------------|---|
| Synopsis    | BGP LLGR forwarding-bit behavior for address family   |
| Context     | <b>configure service vprn string bgp graceful-restart long-lived forwarding-bits-set keyword</b>  |
| Tree        | <a href="#">forwarding-bits-set</a>   |
| Description | <p>This command determines the setting of the F bit in the GR and LLGR capabilities advertised by the router. When the F bit is set for an address family, it indicates that the advertising router is able to preserve forwarding state for the routes of that address family across the last restart. When the session is re-established after a restart and the F bit is not set, all stale routes from the peer are immediately removed for the corresponding address family.</p> <p>This command allows the F bit to be set for all address families or only for non-forwarding address families (L2-VPN, route target, flow-IPv4, and flow-IPv6).</p> |
| Options     | none, all, non-fwd  |
| Default     | none  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**helper-override-restart-time** *number*

|             |  |
|-------------|--|
| Synopsis    | Locally-configured override for restart time   |
| Context     | <b>configure service vprn string bgp graceful-restart long-lived helper-override-restart-time number</b>   |
| Tree        | <a href="#">helper-override-restart-time</a>   |
| Description | <p>This command overrides the restart time advertised by a peer (in its GR capability) with a locally-configured value. This override applies only to AFI/SAFI that were included in the GR capability of the peer. The restart-time is always zero for AFI/SAFI not included in the GR capability. This command is useful if the local router wants to force the LLGR phase to begin after a set time for all protected AFI/SAFI.</p> |
| Range       | 0 to 4095  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**helper-override-stale-time** *number*

|          |  |
|----------|--|
| Synopsis | Locally-configured stale routes override time  |
| Context  | <b>configure service vprn string bgp graceful-restart long-lived helper-override-stale-time number</b> |
| Tree     | <a href="#">helper-override-stale-time</a>   |

|             |   |
|-------------|---|
| Description | This command configures a locally-imposed LLGR stale time that overrides the long-lived stale routes time that is advertised by the router in its LLGR capability.<br><br>This command applies to all AFI/SAFI in the advertised LLGR capability except for any AFI/SAFI with a family-specific override. |
| Range       | 0 to 16777215   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **without-no-export** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Advertise LLGR stale routes to non-LLGR peers  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp graceful-restart long-lived without-no-export</a> <i>boolean</i>   |
| Tree        | <a href="#">without-no-export</a>  |
| Description | When configured to <b>true</b> , LLGR stale routes can be advertised to any peer (EBGP or IBGP) that did not signal the LLGR capability. For IBGP and confederation-EBGP peers that did not advertise the LLGR capability, the local preference attribute in the advertised stale routes is automatically set to 0.<br><br>When configured to <b>false</b> , LLGR stale routes are not advertised to any EBGP peer that did not signal the LLGR capability. For IBGP and confederation-EBGP peers that did not advertise the LLGR capability, the local preference attribute in the advertised stale routes is automatically set to 0 and a NO_EXPORT standard community is automatically added to the routes. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **restart-time** *number*

|            |   |
|------------|---|
| Synopsis   | Restart time advertised by GR capability  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp graceful-restart restart-time</a> <i>number</i> |
| Tree       | <a href="#">restart-time</a>  |
| Range      | 0 to 4095   |
| Default    | 120   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**stale-routes-time** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum time to maintain routes after graceful restart   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp graceful-restart</a> <a href="#">stale-routes-time</a> <i>number</i> |
| Tree       | <a href="#">stale-routes-time</a>  |
| Range      | 1 to 3600  |
| Default    | 360  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**group** [[group-name](#)] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>group</b> list instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> |
| Tree       | <a href="#">group</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**[group-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | BGP peer group name   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> |
| Tree          | <a href="#">group</a>   |
| String Length | 1 to 64   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the BGP group  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>  |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |

Platforms All

### **advertise-inactive** *boolean*

**Synopsis** Advertise an inactive BGP route to peers

**Context** **configure** *service vprn string bgp group string advertise-inactive boolean*

**Tree** [advertise-inactive](#)

**Description** When configured to **true**, this command allows an inactive BGP route to be advertised, even though it is not the most preferred route. The effect of the command on advertised unlabeled, labeled, and multicast IPv4 and IPv6 routes depends on several factors.

- If the active route for the IP prefix is a BGP route, that route is advertised.
- If the active route is a non-BGP route and there are valid inactive BGP routes to the same destination, the best valid inactive route is advertised unless the active non-BGP route is matched and accepted by an export policy applied to the session.
- If the active route is a non-BGP route and there are no valid BGP routes to the same destination, no route is advertised unless the active non-BGP route is matched and accepted by an export policy applied to the session.

When unconfigured, the command inherits the value of the global-level setting (**true** or **false**). The command cannot be explicitly configured to **false**.

When this command inherits a value of **false**, the advertisement of inactive BGP routes to other BGP peers is disabled.

**Introduced** 16.0.R1

**Platforms** All

### **advertise-ipv6-next-hops**

**Synopsis** Enable the **advertise-ipv6-next-hops** context

**Context** **configure** *service vprn string bgp group string advertise-ipv6-next-hops*

**Tree** [advertise-ipv6-next-hops](#)

**Introduced** 19.5.R1

### **ipv4** *boolean*

**Synopsis** Enable IPv4 routes to be advertised

**Context** **configure** *service vprn string bgp group string advertise-ipv6-next-hops ipv4 boolean*

**Tree** [ipv4](#)

**Default** false

|            |         |
|------------|---------|
| Introduced | 19.5.R1 |
| Platforms  | All     |

### **aggregator-id-zero** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set router ID in the BGP AGGREGATOR attribute to zero  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>aggregator-id-zero</b> <i>boolean</i> |
| Tree       | <a href="#">aggregator-id-zero</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **as-override** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Replace the peer's ASN with the local ASN in AS Path  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>as-override</b> <i>boolean</i>   |
| Tree        | <a href="#">as-override</a>   |
| Description | <p>When configured to <b>true</b>, the advertising router's local AS replaces all occurrences of the peer AS in the AS_PATH attribute.</p> <p>This command should be used with caution, as it breaks BGP's loop detection mechanism.</p> <p>When configured to <b>false</b>, no AS override is performed.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **asn-4-byte** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Advertise the use of 4-byte ASNs   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>asn-4-byte</b> <i>boolean</i>   |
| Tree        | <a href="#">asn-4-byte</a>   |
| Description | <p>When this command inherits a value of <b>true</b>, the use of 4-byte ASNs is supported.</p> <p>When unconfigured, the command inherits the value of the global-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>true</b>.</p> <p>When configured to <b>false</b>, this command disables the use of 4-byte ASNs.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**authentication-key *string***

|               |   |
|---------------|---|
| Synopsis      | BGP authentication key for peers in the group   |
| Context       | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>authentication-key</b> <i>string</i>  |
| Tree          | <a href="#">authentication-key</a>  |
| Description   | This command configures the authentication key that must be configured on both peers. The stored format of the authentication key is based on the <b>configure system security hash-control management-interface md-cli hash-algorithm</b> setting. |
| String Length | 1 to 370  |
| Introduced    | 16.0.R1   |
| Platforms     | All   |

**authentication-keychain *reference***

|             |  |
|-------------|--|

|             |  |
|-------------|--|
| Synopsis    | Enable BFD   |
| Context     | <b>configure</b> <a href="#">service vpn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>bfd-liveness</b> <i>boolean</i>  |
| Tree        | <a href="#">bfd-liveness</a>   |
| Description | <p>When configured to <b>true</b>, BFD is enabled on a given protocol interface where the state of the protocol interface is tied to the state of the BFD session between the local node and the remote node.</p> <p>When unconfigured, the command inherits the value of the global-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>false</b>.</p> <p>When this command inherits a value of <b>false</b>, BFD is removed from the associated protocol adjacency.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**capability-negotiation** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable capability negotiation   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>capability-negotiation</b> <i>boolean</i>  |
| Tree        | <a href="#">capability-negotiation</a>  |
| Description | When configured to <b>true</b> , this command enables the exchange of capabilities.<br>When configured to <b>false</b> and the peering is flapped, new capabilities are not negotiated and strictly IPv4 exchanges are supported with the peer. |
| Default     | true  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**client-reflect** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Allow cluster RR to advertise routes to its clients  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>client-reflect</b> <i>boolean</i>   |
| Tree        | <a href="#">client-reflect</a>   |
| Description | When unconfigured, this command inherits the value of the global-level setting ( <b>true</b> or <b>false</b> ). The command cannot be explicitly configured to <b>true</b> .<br>When the command inherits a value of <b>true</b> , client reflection of routes is enabled.<br>When configured to <b>false</b> , this command disables client reflection of routes. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**cluster**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>cluster</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>cluster</b> |
| Tree       | <a href="#">cluster</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

|          |  |
|----------|--|
| Synopsis | Route reflector cluster ID   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>cluster</b> <b>cluster-id</b> <i>string</i> |

|            |                            |
|------------|----------------------------|
| Tree       | <a href="#">cluster-id</a> |
| Introduced | 16.0.R1                    |
| Platforms  | All                        |

### **connect-retry** *number*

|            |   |
|------------|---|
| Synopsis   | BGP connect retry timer value   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">connect-retry</a> <i>number</i> |
| Tree       | <a href="#">connect-retry</a>   |
| Range      | 1 to 65535  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **damp-peer-oscillations**

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>damp-peer-oscillations</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">damp-peer-oscillations</a>   |
| Tree        | <a href="#">damp-peer-oscillations</a>   |
| Description | <p>Commands in this context specify how long a BGP peer session remains in the idle state after an error causes the session to reset. In the idle state, BGP does not initiate or respond to attempts to establish a new session. Repeated errors that occur a short time after each session reset cause longer and longer hold times in the idle state.</p> <p>When unconfigured, command settings are inherited from the global-level configuration.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **error-interval** *number*

|             |   |
|-------------|---|
| Synopsis    | Time after a reset that the session must be error-free  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">damp-peer-oscillations</a> <a href="#">error-interval</a> <i>number</i>         |
| Tree        | <a href="#">error-interval</a>  |
| Description | This command sets the interval of time after a reset, during which the session must be error-free in order to reset the penalty counter and return the idle hold time to the initial wait time. |
| Range       | 0 to 2048   |
| Default     | 30  |

Introduced 16.0.R1  
Platforms All

### **idle-hold-time**

| Tree        | <a href="#">dynamic-neighbor</a>   |
| Description | Commands in this context configure dynamic BGP sessions for a peer group.  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**interface** [[interface-name](#)] *reference*

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>interface</b> list instance  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">dynamic-neighbor</a> <a href="#">interface</a> <i>reference</i> |
| Tree        | <a href="#">interface</a>   |
| Description | Commands in this context configure an unnumbered VPRN access IP interface for dynamic neighbors.  |

If this interface connects to a network with other BGP routers, sessions with the other routers can be set up automatically without explicitly configuring them as BGP neighbors. The interface must be IPv6 enabled, but because the interface is considered unnumbered, it does not require an IPv4 address or a global-unicast IPv6 address. The sessions are set up using IPv6 link-local addresses.

The BGP unnumbered feature supports all address families that allow IPv6 link-local BGP next-hop addresses. This includes IPv4 with the use of RFC 8950 extensions.

When an interface is added to the list of dynamic-neighbor interfaces, an outgoing connection attempt is initiated toward any directly connected router on the interface that announces itself using an ICMPv6 router advertisement message. The session attempt is unsuccessful if the peer type is not EBGP, the reported AS number of the peer does not match one of the allowed values, or the maximum session limit of the interface would be exceeded.

Synopsis Enable the **family** context  
Context **configure** [service vprn string](#) [bgp group string](#) [family](#)  
Tree [family](#)  
Introduced 16.0.R1  
Platforms All

## flow-ipv4 *boolean*

Synopsis Advertise support for the flowspec-IPv4 address family  
Context **configure** [service vprn string](#) [bgp group string](#) [family flow-ipv4](#) *boolean*  
Tree [flow-ipv4](#)  
Default false  
Introduced 16.0.R1  
Platforms All

## flow-ipv6 *boolean*

Synopsis Advertise support for the flowspec-IPv6 address family  
Context **configure** [service vprn string](#) [bgp group string](#) [family flow-ipv6](#) *boolean*  
Tree [flow-ipv6](#)  
Default false  
Introduced 16.0.R1  
Platforms All

## ipv4 *boolean*

Synopsis Add support for the IPv4 address family  
Context **configure** [service vprn string](#) [bgp group string](#) [family ipv4](#) *boolean*  
Tree [ipv4](#)  
Default false

Introduced 16.0.R1  
Platforms All

### **ipv6** *boolean*

Synopsis Advertise MP-BGP support for the IPv6 address family  
Context **configure** [service vprn](#) *string* [bgp group](#) *string* [family ipv6](#) *boolean*  
Tree [ipv6](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **label-ipv4** *boolean*

Synopsis Advertise support for the label-IPv4 address family  
Context **configure** [service vprn](#) *string* [bgp group](#) *string* [family label-ipv4](#) *boolean*  
Tree [label-ipv4](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **mcast-ipv4** *boolean*

Synopsis Advertise support for the MCAST-IPv4 address family  
Context **configure** [service vprn](#) *string* [bgp group](#) *string* [family mcast-ipv4](#) *boolean*  
Tree [mcast-ipv4](#)  
Default false  
Introduced 16.0.R1  
Platforms All

### **mcast-ipv6** *boolean*

Synopsis Advertise support for the MCAST-IPv6 address family  
Context **configure** [service vprn](#) *string* [bgp group](#) *string* [family mcast-ipv6](#) *boolean*  
Tree [mcast-ipv6](#)

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **fast-external-failover** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Drop external BGP session immediately when link fails  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>fast-external-failover</b> <i>boolean</i>   |
| Tree        | <a href="#">fast-external-failover</a>   |
| Description | <p>When this command inherits a value of <b>true</b>, the router drops an external BGP session on a single-hop route immediately when the local interface goes down.</p> <p>When unconfigured, the command inherits the value of the global-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>true</b>.</p> <p>When configured to <b>false</b>, the BGP session remains up until the hold time expires.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **graceful-restart**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>graceful-restart</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>graceful-restart</b> |
| Tree       | <a href="#">graceful-restart</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **gr-notification** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Perform graceful restart procedures after NOTIFICATION   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>graceful-restart</b> <b>gr-notification</b> <i>boolean</i>  |
| Tree        | <a href="#">gr-notification</a>  |
| Description | <p>When configured to <b>true</b>, the Graceful Restart capability sent by the router indicates support for NOTIFICATION messages. If the peer also supports this capability, the session is restarted gracefully (while preserving forwarding) if either peer sends a NOTIFICATION message due to some type of event or error.</p> <p>When configured to <b>false</b>, NOTIFICATION messages are not supported.</p> |
| Default     | false  |
| Introduced  | 16.0.R1  |

Platforms All

## long-lived

Synopsis Enable the **long-lived** context

| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp</a> <a href="#">group</a> <i>string</i> <a href="#">graceful-restart</a> <a href="#">long-lived</a> <a href="#">family</a> <i>keyword</i> <a href="#">advertised-stale-time</a> <i>number</i> |
| Tree        | <a href="#">advertised-stale-time</a>   |
| Description | This command configures the long-lived stale routes time that is advertised by the router in its LLGR capability.<br><br>This command applies to all AFI/SAFI in the advertised LLGR capability with a family-specific override.  |
| Range       | 0 to 16777215   |
| Default     | 86400   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**helper-override-stale-time** *number*

|             |  |
|-------------|--|
| Synopsis    | Locally-configured stale routes override time  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp</a> <a href="#">group</a> <i>string</i> <a href="#">graceful-restart</a> <a href="#">long-lived</a> <a href="#">family</a> <i>keyword</i> <a href="#">helper-override-stale-time</a> <i>number</i> |
| Tree        | <a href="#">helper-override-stale-time</a>   |
| Description | This command configures a locally-imposed LLGR stale time that overrides the long-lived stale routes time that is advertised by the router in its LLGR capability. This is a family-specific override value.   |

|            |               |
|------------|---------------|
| Range      | 0 to 16777216 |
| Default    | 16777216      |
| Introduced | 16.0.R1       |
| Platforms  | All           |

### **forwarding-bits-set** *keyword*

|             |   |
|-------------|---|
| Synopsis    | BGP LLGR forwarding-bit behavior for address family   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <a href="#">graceful-restart long-lived forwarding-bits-set keyword</a>   |
| Tree        | <a href="#">forwarding-bits-set</a>   |
| Description | <p>This command determines the setting of the F bit in the GR and LLGR capabilities advertised by the router. When the F bit is set for an address family, it indicates that the advertising router is able to preserve forwarding state for the routes of that address family across the last restart. When the session is re-established after a restart and the F bit is not set, all stale routes from the peer are immediately removed for the corresponding address family.</p> <p>This command allows the F bit to be set for all address families or only for non-forwarding address families (L2-VPN, route target, flow-IPv4, and flow-IPv6).</p> |
| Options     | none, all, non-fwd  |
| Default     | none  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **helper-override-restart-time** *number*

|             |  |
|-------------|--|
| Synopsis    | Locally-configured override for restart time   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <a href="#">graceful-restart long-lived helper-override-restart-time number</a>  |
| Tree        | <a href="#">helper-override-restart-time</a>   |
| Description | <p>This command overrides the restart time advertised by a peer (in its GR capability) with a locally-configured value. This override applies only to AFI/SAFI that were included in the GR capability of the peer. The restart-time is always zero for AFI/SAFI not included in the GR capability. This command is useful if the local router wants to force the LLGR phase to begin after a set time for all protected AFI/SAFI.</p> |
| Range       | 0 to 4095  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**helper-override-stale-time** *number*

|             |   |
|-------------|---|
| Synopsis    | Locally-configured stale routes override time   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <a href="#">graceful-restart long-lived helper-override-stale-time number</a>   |
| Tree        | <a href="#">helper-override-stale-time</a>  |
| Description | This command configures a locally-imposed LLGR stale time that overrides the long-lived stale routes time that is advertised by the router in its LLGR capability.<br><br>This command applies to all AFI/SAFI in the advertised LLGR capability except for any AFI/SAFI with a family-specific override. |
| Range       | 0 to 16777215   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**without-no-export** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Advertise LLGR stale routes to non-LLGR peers  |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <a href="#">graceful-restart long-lived without-no-export boolean</a>  |
| Tree        | <a href="#">without-no-export</a>  |
| Description | When configured to <b>true</b> , LLGR stale routes can be advertised to any peer (EBGP or IBGP) that did not signal the LLGR capability. For IBGP and confederation-EBGP peers that did not advertise the LLGR capability, the local preference attribute in the advertised stale routes is automatically set to 0.<br><br>When configured to <b>false</b> , LLGR stale routes are not advertised to any EBGP peer that did not signal the LLGR capability. For IBGP and confederation-EBGP peers that did not advertise the LLGR capability, the local preference attribute in the advertised stale routes is automatically set to 0 and a NO_EXPORT standard community is automatically added to the routes. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**restart-time** *number*

|          |  |
|----------|--|
| Synopsis | Restart time advertised by GR capability   |
| Context  | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <a href="#">graceful-restart restart-time number</a> |
| Tree     | <a href="#">restart-time</a>   |

|            |           |
|------------|-----------|
| Range      | 0 to 4095 |
| Default    | 300       |
| Introduced | 16.0.R1   |
| Platforms  | All       |

### **stale-routes-time** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum time to maintain routes after graceful restart  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <a href="#">graceful-restart stale-routes-time number</a> |
| Tree       | <a href="#">stale-routes-time</a>   |
| Range      | 1 to 3600   |
| Default    | 360   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **hold-time**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>hold-time</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <a href="#">hold-time</a> |
| Tree       | <a href="#">hold-time</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **minimum-hold-time** *number*

|             |   |
|-------------|---|
| Synopsis    | Minimum hold time between successive messages   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <a href="#">hold-time minimum-hold-time number</a>  |
| Tree        | <a href="#">minimum-hold-time</a>   |
| Description | This command specifies the minimum hold time that is accepted for the session. If a peer proposes a hold time lower than this value, the session attempt is rejected.<br>When unconfigured, the command value is inherited from the BGP global-level setting. |
| Range       | 0   3 to 65536  |
| Default     | 0   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**seconds** *number*

|             |  |
|-------------|--|
| Synopsis    | Maximum time BGP waits between successive messages   |
| Context     | <b>configure</b> <i>service vprn string bgp group string hold-time seconds number</i>  |
| Tree        | <i>seconds</i>   |
| Description | <p>This command configures the maximum time BGP waits between successive messages (either keepalive or update) from its peer before closing the connection.</p> <p>Although the implementation allows setting the keepalive timer at the BGP group level times separately, the configured keepalive timer is overridden by this value under the following circumstances.</p> <ul style="list-style-type: none"> <li>• If the specified hold time is less than the configured keepalive time, the operational keepalive time is set to a third of the hold-time; the configured keepalive time is not changed.</li> <li>• If the hold time is set to zero, the operational value of the keepalive time is set to zero; the configured keepalive time is not changed. The connection with the peer is up permanently and no keepalive packets are sent to the peer.</li> </ul> <p>When unconfigured, the command setting is inherited from the BGP global-level configuration.</p> |
| Range       | 0   3 to 65535   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**import**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>import</b> context                                    |
| Context    | <b>configure</b> <i>service vprn string bgp group string import</i> |
| Tree       | <i>import</i>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**policy** (*policy-expr-string* | *string*)

|                |  |
|----------------|--|
| Synopsis       | Route policy name  |
| Context        | <b>configure</b> <i>service vprn string bgp group string import policy (policy-expr-string   string)</i> |
| Tree           | <i>policy</i>  |
| String Length  | 1 to 255   |
| Max. Instances | 15   |

|                |                                      |
|----------------|--------------------------------------|
| Min. Instances | 1                                    |
| Notes          | This element is ordered by the user. |
| Introduced     | 16.0.R1                              |
| Platforms      | All                                  |

### **initial-send-delay-zero** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Send BGP updates as soon as the session comes up  |
| Context     | <b>configure</b> <i>service vprn string</i> <i>bgp group string</i> <b>initial-send-delay-zero</b> <i>boolean</i>   |
| Tree        | <a href="#">initial-send-delay-zero</a>   |
| Description | <p>When configured to <b>true</b>, BGP updates are sent as soon as the session comes up.</p> <p>When unconfigured, the command inherits the value of the global-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>false</b>.</p> <p>When this command inherits a value of <b>false</b>, BGP waits to send UPDATE messages for the minimum route advertisement time after a session is established.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **keepalive** *number*

|             |  |
|-------------|--|
| Synopsis    | Time after which the BGP KEEPALIVE message is sent   |
| Context     | <b>configure</b> <i>service vprn string</i> <i>bgp group string</i> <b>keepalive</b> <i>number</i>   |
| Tree        | <a href="#">keepalive</a>  |
| Description | <p>This command configures the BGP keepalive timer value. A keepalive message is sent every time this timer expires.</p> <p>This value is generally one-third of the hold time interval configured in the <b>hold-time seconds</b> context. Although the implementation allows this keepalive value and the hold time interval to be independently set, under the following circumstances, the configured keepalive value is overridden by the hold time interval value:</p> <ul style="list-style-type: none"> <li>• If the specified keepalive value is greater than the configured hold time, the specified keepalive value is ignored and the timer value is set to one third of the current hold time value.</li> <li>• If the specified hold time interval is less than the configured keepalive value, the keepalive value is reset to one third of the specified hold time interval.</li> <li>• If the hold time interval is set to zero, the configured keepalive value is ignored. This means that the connection with the peer is up permanently and no keepalive packets are sent to the peer.</li> </ul> <p>When unconfigured, the command inherits the BGP global-level setting.</p> |

|            |            |
|------------|------------|
| Range      | 0 to 21845 |
| Introduced | 16.0.R1    |
| Platforms  | All        |

### **label-preference** *number*

|            |   |
|------------|---|
| Synopsis   | Route preference for routes from labeled-unicast peers  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>label-preference</b> <i>number</i> |
| Tree       | <a href="#">label-preference</a>  |
| Range      | 1 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **link-bandwidth**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>link-bandwidth</b> context   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>link-bandwidth</b>   |
| Tree        | <a href="#">link-bandwidth</a>  |
| Description | <p>Commands in this context specify the handling of the Link Bandwidth Extended Community attached to specific BGP routes.</p> <p>When all used multipaths of an IP prefix correspond to BGP routes with a Link Bandwidth EC, the datapath is programmed to use weighted ECMP across the BGP next hops in proportion to the bandwidth values.</p> |
| Introduced  | 16.0.R3   |
| Platforms   | All   |

### **accept-from-ebgp**

| Introduced | 16.0.R1  |
| Platforms  | All  |

**as-number** *number*

|            |  |
|------------|--|
| Synopsis   | Local (or virtual) BGP AS number   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>local-as as-number</b> <i>number</i> |
| Tree       | <a href="#">as-number</a>  |
| Range      | 1 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**prepend-global-as** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Prepend global ASN when advertising routes to BGP peer   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>local-as prepend-global-as</b> <i>boolean</i>  |
| Tree        | <a href="#">prepend-global-as</a>  |
| Description | When configured to <b>true</b> , the global ASN is added to the AS_PATH attribute in outbound routes sent to the peer.<br>When configured to <b>false</b> , the global ASN is not included in the AS_PATH attribute. |
| Default     | true   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **private** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Hide the local ASN in sent paths learned from peering  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">local-as</a> <a href="#">private</a> <i>boolean</i>  |
| Tree        | <a href="#">private</a>  |
| Description | When configured to <b>true</b> , the local AS number is only advertised to peers that use the local ASN for establishing BGP peering sessions.<br>When configured to <b>false</b> , the local ASN is advertised to all peers, including those that can use the global ASN for establishing BGP peering sessions. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **local-preference** *number*

|            |  |
|------------|--|
| Synopsis   | Default local preference if not in incoming routes   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">local-preference</a> <i>number</i> |
| Tree       | <a href="#">local-preference</a>   |
| Range      | 0 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **loop-detect** *keyword*

|            |  |
|------------|--|
| Synopsis   | Strategy for loop detection in the AS path   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">loop-detect</a> <i>keyword</i> |
| Tree       | <a href="#">loop-detect</a>  |
| Options    | drop-peer, ignore-loop, off, discard-route   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**loop-detect-threshold** *number*

|            |   |
|------------|---|
| Synopsis   | Threshold for the global ASN in a received AS path  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>loop-detect-threshold</b> <i>number</i> |
| Tree       | <a href="#">loop-detect-threshold</a>   |
| Range      | 0 to 15   |
| Introduced | 16.0.R6   |
| Platforms  | All   |

**med-out** (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Default MED attribute value to advertise to peers  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>med-out</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">med-out</a>  |
| Max. Range | 0 to 4294967295  |
| Options    | igp-cost   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**min-route-advertisement** *number*

|            |   |
|------------|---|
| Synopsis   | Minimum time before a prefix can be advertised to peer  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>min-route-advertisement</b> <i>number</i> |
| Tree       | <a href="#">min-route-advertisement</a>   |
| Range      | 1 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**monitor**

|            |   |
|------------|---|
| Synopsis   | Enable the <b>monitor</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>monitor</b> |
| Tree       | <a href="#">monitor</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of BMP monitoring  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp</a> <a href="#">group</a> <i>string</i> <a href="#">monitor</a> <b>admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**all-stations** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Send BMP messages to all configured stations   |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp</a> <a href="#">group</a> <i>string</i> <a href="#">monitor</a> <b>all-stations</b> <i>boolean</i>   |
| Tree        | <a href="#">all-stations</a>   |
| Description | <p>When configured to <b>true</b>, this command specifies that BMP messages are to be sent to all configured BMP monitoring stations.</p> <p>When configured to <b>false</b>, the command is not used to indicate the stations which can receive BMP messages. The <b>station</b> command (at the same context level) identifies the BMP stations for which BMP messages are to be sent.</p> |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**route-monitoring**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>route-monitoring</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp</a> <a href="#">group</a> <i>string</i> <a href="#">monitor</a> <b>route-monitoring</b> |
| Tree       | <a href="#">route-monitoring</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**post-policy** *boolean*

|          |  |
|----------|--|
| Synopsis | Allow post-policy route-monitoring messages to be sent |
|----------|--|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>monitor route-monitoring post-policy</b> <i>boolean</i> |
| Tree       | <a href="#">post-policy</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **pre-policy** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow pre-policy route-monitoring messages to be sent  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>monitor route-monitoring pre-policy</b> <i>boolean</i> |
| Tree       | <a href="#">pre-policy</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **station** [[station-name](#)] *reference*

|                |  |
|----------------|--|
| Synopsis       | Add a list entry for <b>station</b>  |
| Context        | <b>configure service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>monitor station</b> <i>reference</i> |
| Tree           | <a href="#">station</a>  |
| Max. Instances | 8  |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

### **[station-name]** *reference*

|            |  |
|------------|--|
| Synopsis   | BMP monitoring station   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>monitor station</b> <i>reference</i> |
| Tree       | <a href="#">station</a>  |
| Reference  | <b>configure bmp station</b> <i>string</i>   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **multihop** *number*

|            |   |
|------------|---|
| Synopsis   | TTL in IP packet headers for EBGP peers multi-hops away   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <b>multihop</b> <i>number</i> |
| Tree       | <a href="#">multihop</a>  |
| Range      | 1 to 255  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **multipath-eligible** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow routes from group peers in multipath eligibility   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <b>multipath-eligible</b> <i>boolean</i> |
| Tree       | <a href="#">multipath-eligible</a>   |
| Default    | false  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **next-hop-self** *boolean*

|            |   |
|------------|---|
| Synopsis   | Advertise routes with local address as next-hop address   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <b>next-hop-self</b> <i>boolean</i> |
| Tree       | <a href="#">next-hop-self</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **origin-validation**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>origin-validation</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <b>origin-validation</b> |
| Tree       | <a href="#">origin-validation</a>  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

**ipv4 boolean**

|            |  |
|------------|--|
| Synopsis   | Enable/disable family type ipv4.   |
| Context    | <b>configure service vprn string bgp group string origin-validation ipv4 boolean</b> |
| Tree       | <a href="#">ipv4</a>   |
| Default    | false  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

**ipv6 boolean**

|            |  |
|------------|--|
| Synopsis   | Enable support for unlabeled unicast IPv6 routes                                     |
| Context    | <b>configure service vprn string bgp group string origin-validation ipv6 boolean</b> |
| Tree       | <a href="#">ipv6</a>   |
| Default    | false  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

**label-ipv4 boolean**

|            |  |
|------------|--|
| Synopsis   | Enable support for labeled-unicast IPv4 routes   |
| Context    | <b>configure service vprn string bgp group string origin-validation label-ipv4 boolean</b> |
| Tree       | <a href="#">label-ipv4</a>   |
| Default    | false  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

**passive boolean**

|            |   |
|------------|---|
| Synopsis   | Enable passive mode for BGP communication                             |
| Context    | <b>configure service vprn string bgp group string passive boolean</b> |
| Tree       | <a href="#">passive</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**path-mtu-discovery** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable Path MTU Discovery  |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <b>path-mtu-discovery</b> <i>boolean</i>   |
| Tree        | <a href="#">path-mtu-discovery</a>   |
| Description | <p>When configured to <b>true</b>, Path MTU Discovery (PMTUD) is enabled for the associated TCP connections.</p> <p>When set to true, PMTUD is activated toward an IPv4 BGP neighbor and the Don't Fragment (DF) bit is set in the IP header of all IPv4 packets sent to the peer. If any device along the path toward the peer cannot forward the packet because the IP MTU of the interface is smaller than the IP packet size, this device drops the packet and sends an ICMP or ICMPv6 error message encoding the interface MTU. When the router receives the ICMP or ICMPv6 message, it lowers the TCP maximum segment size limit from the previous value so that the IP MTU constraint can be accommodated.</p> <p>When PMTUD is configured to <b>false</b> and there is no TCP MSS configuration that can be associated with a BGP neighbor (in either the BGP configuration or the first hop IP interface configuration), the router advertises a value of only 1024 bytes as the TCP MSS option value, limiting received TCP segments to that size.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**peer-as** *number*

|            |  |
|------------|--|
| Synopsis   | Peer AS number   |
| Context    | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <b>peer-as</b> <i>number</i> |
| Tree       | <a href="#">peer-as</a>  |
| Range      | 1 to 4294967295  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**peer-ip-tracking** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable BGP peer tracking   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp group string</a> <b>peer-ip-tracking</b> <i>boolean</i>   |
| Tree        | <a href="#">peer-ip-tracking</a>   |
| Description | <p>When configured to <b>true</b>, this command enables BGP peer tracking.</p> <p>Peer tracking should be used with caution. Peer tracking can tear a session down even if the loss of connectivity turns out to be short-lived (for example, while the IGP protocol</p> |

is re-converging). Next-hop tracking, which is always enabled, handles temporary connectivity issues more effectively.

When unconfigured, the command inherits the value of the global-level setting (**true** or **false**). The command cannot be explicitly configured to **false**.

When this command inherits a value of **false**, peer tracking is disabled.

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **preference** *number*

|            |  |
|------------|--|
| Synopsis   | Route preference for routes learned from all peers   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">preference</a> <i>number</i> |
| Tree       | <a href="#">preference</a>   |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **prefix-limit** [[family](#)] *keyword*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>prefix-limit</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">prefix-limit</a> <i>keyword</i> |
| Tree       | <a href="#">prefix-limit</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **[family]** *keyword*

|            |   |
|------------|---|
| Synopsis   | Address family to which the limit applies   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">prefix-limit</a> <i>keyword</i> |
| Tree       | <a href="#">prefix-limit</a>  |
| Options    | ipv4, ipv6, mcast-ipv4, flow-ipv4, flow-ipv6, mcast-ipv6, label-ipv4  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**idle-timeout** *number*

|            |  |
|------------|--|
| Synopsis   | Time BGP peering remains idle before reconnecting  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>prefix-limit</b> <i>keyword</i> <b>idle-timeout</b> <i>number</i> |
| Tree       | <b>idle-timeout</b>  |
| Range      | 1 to 1024  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**log-only** *boolean*

|            |   |
|------------|---|
| Synopsis   | Send warning message at threshold instead of take-down  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>prefix-limit</b> <i>keyword</i> <b>log-only</b> <i>boolean</i> |
| Tree       | <b>log-only</b>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**maximum** *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum number of routes to be learned from a peer  |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>prefix-limit</b> <i>keyword</i> <b>maximum</b> <i>number</i> |
| Tree        | <b>maximum</b>  |
| Description | This command configures the maximum number of BGP routes that can be received from a peer before administrative action is taken.                  |
| Range       | 1 to 4294967295   |
| Notes       | This element is mandatory.  |
| Introduced  | 16.0.R2   |
| Platforms   | All   |

**post-import** *boolean*

|          |  |
|----------|--|
| Synopsis | Apply limit only to routes accepted by import policies   |
| Context  | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp group</b> <i>string</i> <b>prefix-limit</b> <i>keyword</i> <b>post-import</b> <i>boolean</i> |
| Tree     | <b>post-import</b>   |
| Default  | false  |

### **limited** *boolean*

|            |  |
|------------|--|
| Synopsis   | Remove private ASNs up to first public ASN encountered   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">remove-private</a> <b>limited</b> <i>boolean</i> |
| Tree       | <a href="#">limited</a>  |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **replace** *boolean*

|          |  |
|----------|--|
| Synopsis | Replace private ASN with global ASN before advertising   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">remove-private</a> <b>replace</b> <i>boolean</i> |
| Tree     | <a href="#">replace</a>  |

|            |          |
|------------|----------|
| Default    | false    |
| Introduced | 19.10.R1 |
| Platforms  | All      |

### **skip-peer-as** *boolean*

|            |  |
|------------|--|
| Synopsis   | Keep private ASN if it is the same as the BGP peer ASN   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">remove-private</a> <a href="#">skip-peer-as</a> <i>boolean</i> |
| Tree       | <a href="#">skip-peer-as</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **send-communities**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>send-communities</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">send-communities</a> |
| Tree       | <a href="#">send-communities</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **extended** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Advertise the Extended Communities attribute to peers  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">send-communities</a> <a href="#">extended</a> <i>boolean</i>   |
| Tree        | <a href="#">extended</a>   |
| Description | <p>When unconfigured, this command inherits the value of the global-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>true</b>.</p> <p>When this command inherits a value of <b>true</b>, BGP extended communities are sent to peers in the Extended Communities attribute.</p> <p>When configured to <b>false</b>, all extended communities are removed from all routes advertised to BGP peers.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

## large *boolean*

|             |   |
|-------------|---|
| Synopsis    | Advertise the Large Communities attribute to peers  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">send-communities large</a> <i>boolean</i>   |
| Tree        | <a href="#">large</a>   |
| Description | <p>When unconfigured, this command inherits the value of the global-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>true</b>.</p> <p>When this command inherits a value of <b>true</b>, BGP large communities are sent to peers in the Large Communities attribute.</p> <p>When configured to <b>false</b>, all large communities are removed from all routes advertised to BGP peers.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## standard *boolean*

|             |   |
|-------------|---|
| Synopsis    | Advertise the Communities attribute to peers  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">send-communities standard</a> <i>boolean</i>  |
| Tree        | <a href="#">standard</a>  |
| Description | <p>When unconfigured, this command inherits the value of the global-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>true</b>.</p> <p>When this command inherits a value of <b>true</b>, BGP standard communities are sent to peers in the Communities attribute.</p> <p>When configured to <b>false</b>, all standard communities are removed from all routes advertised to BGP peers.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

## send-default

|            |  |
|------------|--|
| Synopsis   | Enable the <b>send-default</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">send-default</a> |
| Tree       | <a href="#">send-default</a>   |
| Introduced | 19.7.R1  |
| Platforms  | All  |

**export-policy** *reference*

|            |   |
|------------|---|
| Synopsis   | Export policy name  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">send-default</a> <a href="#">export-policy</a> <i>reference</i> |
| Tree       | <a href="#">export-policy</a>   |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>  |
| Introduced | 19.7.R1   |
| Platforms  | All   |

**ipv4** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate and advertise an IPv4 default route (0/0)   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">send-default</a> <a href="#">ipv4</a> <i>boolean</i> |
| Tree       | <a href="#">ipv4</a>   |
| Default    | false  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

**ipv6** *boolean*

|            |  |
|------------|--|
| Synopsis   | Generate and advertise an IPv6 default route (::/0)  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">send-default</a> <a href="#">ipv6</a> <i>boolean</i> |
| Tree       | <a href="#">ipv6</a>   |
| Default    | false  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

**split-horizon** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Prevent routes being reflected back to best-route peer   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <a href="#">split-horizon</a> <i>boolean</i>   |
| Tree        | <a href="#">split-horizon</a>  |
| Description | When configured to <b>true</b> , this command enables the use of split-horizon.<br>This command prevents routes from being reflected back to a peer that sends the best route. It applies to routes of all address families and to any type of sending peer; confed-EBGP, EBGP and IBGP. |

Enabling the split-horizon functionality may have a detrimental impact on peer and route scaling and should only be used when absolutely necessary.

When unconfigured, the command inherits the value of the global-level setting (**true** or **false**). The command cannot be explicitly configured to **false**.

When this command inherits a value of **false**, the use of split-horizon is disabled.

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **static-group** *boolean*

|            |  |
|------------|--|
| Synopsis   | Use group for static peers   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>static-group</b> <i>boolean</i> |
| Tree       | <a href="#">static-group</a>   |
| Default    | true   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **tcp-mss** (*number* | *keyword*)

|             |   |
|-------------|---|
| Synopsis    | TCP maximum segment size override   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp group</a> <i>string</i> <b>tcp-mss</b> ( <i>number</i>   <i>keyword</i> )   |
| Tree        | <a href="#">tcp-mss</a>   |
| Description | <p>This command configures an override for the TCP maximum segment size to use with a specific peer or set of peers (depending on the scope of the command).</p> <p>The configured value controls two properties of the TCP connection as follows:</p> <p>TCP MSS option - The router advertises the TCP MSS option value in the TCP SYN packet it sends as part of the 3-way handshake. The advertised value may be lower than the configured value, depending on the IP MTU of the first hop IP interface. The peers must abide by this value when sending TCP segments to the local router.</p> <p>TCP maximum segment size - The actual transmitted size may be lower than the configured value, depending on the TCP MSS option value signaled by the peers, the effect of path MTU discovery, or other factors.</p> |
| Range       | 384 to 9746   |
| Options     | ip-stack  |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

**third-party-nexthop** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Apply third-party next-hop processing to EBGP peers   |
| Context     | <b>configure</b> <i>service vprn string</i> <i>bgp group string</i> <b>third-party-nexthop</b> <i>boolean</i>   |
| Tree        | <b>third-party-nexthop</b>  |
| Description | <p>When configured to <b>true</b>, this command enables the router to send third-party next hop to EBGP peers in the same subnet as the source peer. The address family of the transport must match the address family of the route.</p> <p>When an IPv4 or IPv6 route is received from one EBGP peer and advertised to another EBGP peer in the same IP subnet, the BGP next hop is left unchanged.</p> <p>When unconfigured, the command inherits the value of the global-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>false</b>.</p> <p>When this command inherits a value of <b>false</b>, third-party next-hop processing is disabled and the next hop carries the IP address of the interface used to establish the TCP connection to the peer.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**ttl-security** *number*

|             |  |
|-------------|--|
| Synopsis    | Minimum TTL value for an incoming BGP packet   |
| Context     | <b>configure</b> <i>service vprn string</i> <i>bgp group string</i> <b>ttl-security</b> <i>number</i>  |
| Tree        | <b>ttl-security</b>  |
| Description | This command configures the minimum TTL value that BGP will accept from an incoming packet. A packet with a TTL value less than the minimum configured TTL value is discarded. |
| Range       | 1 to 255   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**type** *keyword*

|            |  |
|------------|--|

## hold-time

Synopsis Enter the **hold-time** context

Context **configure service vprn string bgp hold-time**

Tree **hold-time**

Introduced 16.0.R1

Platforms All

## minimum-hold-time *number*

Synopsis Minimum hold time between successive messages

Context **configure service vprn string bgp hold-time minimum-hold-time number**

Tree **minimum-hold-time**

Description This command specifies the minimum hold time that is accepted for the session. If a peer proposes a hold time lower than this value, the session attempt is rejected.

Range 0 | 3 to 65535

Default 0

Introduced 16.0.R1

Platforms All

## seconds *number*

Synopsis Maximum time BGP waits between successive messages

Context **configure service vprn string bgp hold-time seconds number**

Tree **seconds**

Description This command configures the maximum time BGP waits between successive messages (either keepalive or update) from its peer before closing the connection.

Although the implementation allows setting the keepalive timer at the BGP global level times separately, the configured keepalive timer is overridden by this value under the following circumstances.

- If the specified hold time is less than the configured keepalive time, the operational keepalive time is set to a third of the hold-time; the configured keepalive time is not changed.
- If the hold time is set to zero, the operational value of the keepalive time is set to zero; the configured keepalive time is not changed. The connection with the peer is up permanently and no keepalive packets are sent to the peer.

|            |                |
|------------|----------------|
| Range      | 0   3 to 65535 |
| Default    | 90             |
| Introduced | 16.0.R1        |
| Platforms  | All            |

### **ibgp-multipath** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable IBGP multipath load balancing   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp ibgp-multipath</a> <i>boolean</i>  |
| Tree        | <a href="#">ibgp-multipath</a>   |
| Description | When configured to <b>true</b> , this command enables IBGP multipath load balancing when adding BGP routes to the route table if the route resolving the BGP next hop offers multiple next hops.<br><br>When configured to <b>false</b> , this command disables IBGP multipath load balancing. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **import**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>import</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp import</a> |

| Introduced | 16.0.R1  |
| Platforms  | All  |

**multihop** *number*

|             |  |
|-------------|--|
| Synopsis    | TTL in IP packet headers for EBGP peers multi-hops away  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp multihop</a> <i>number</i>   |
| Tree        | <a href="#">multihop</a>   |
| Description | This command configures the Time to Live (TTL) value entered in the IP header of packets sent to an EBGP peer multiple hops away. This command applies only to EBGP. |

|            |          |
|------------|----------|
| Range      | 1 to 255 |
| Introduced | 16.0.R1  |
| Platforms  | All      |

## multipath

|            |  |
|------------|--|
| Synopsis   | Enter the <b>multipath</b> context                 |
| Context    | <b>configure service vprn string bgp multipath</b> |
| Tree       | <b>multipath</b>                                   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## ebgp number

|            |  |
|------------|--|
| Synopsis   | Maximum multipaths per prefix for EBGp learned routes          |
| Context    | <b>configure service vprn string bgp multipath ebgp number</b> |
| Tree       | <b>ebgp</b>  |
| Range      | 1 to 64  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## family [family-type] keyword

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>family</b> list instance  |
| Context     | <b>configure service vprn string bgp multipath family keyword</b>  |
| Tree        | <b>family</b>  |
| Description | <p>Commands in this context set ECMP multipath parameters that apply only to the specified label unicast address family.</p> <p>When multipath is enabled, traffic to the destination is load-shared across a set of paths (BGP routes) that the BGP decision process considers equal to the best path. The distribution of traffic over the multiple paths may or may not be equal. The distribution is based on weights derived from the Link Bandwidth Extended Community.</p> <p>For more information about the criteria a non-best route must meet to qualify as a multipath, see “BGP route installation in the route table” in the <i>7450 ESS 7750 SR 7950 XRS VSR Unicast Routing Protocols User Guide</i>.</p> |
| Introduced  | 19.5.R1  |
| Platforms   | All  |

**[family-type] keyword**

|            |   |
|------------|---|
| Synopsis   | Address family type for the multipath selection                   |
| Context    | <b>configure service vprn string bgp multipath family keyword</b> |
| Tree       | <b>family</b>   |
| Options    | ipv4, ipv6, label-ipv4, label-ipv6                                |
| Notes      | This element is part of a list key.                               |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**ebgp number**

|             |  |
|-------------|--|
| Synopsis    | Maximum multipaths when best path is EBGP learned route  |
| Context     | <b>configure service vprn string bgp multipath family keyword ebgp number</b>  |
| Tree        | <b>ebgp</b>  |
| Description | This command configures the maximum number of multipaths per prefix or NLRI when the best path is an EBGP learned route. The limit configured using this command overrides the limit configured in the <b>max-paths</b> command. If the best path is an EBGP learned route, and this command is set to 1, multipaths are disabled. |
| Range       | 1 to 64  |
| Introduced  | 19.5.R1  |
| Platforms   | All  |

**ibgp number**

|             |   |
|-------------|---|
| Synopsis    | Maximum multipaths when best path is IBGP learned route   |
| Context     | <b>configure service vprn string bgp multipath family keyword ibgp number</b>   |
| Tree        | <b>ibgp</b>   |
| Description | This command configures the maximum number of multipaths per prefix or NLRI when the best path is an IBGP learned route. The limit configured using this command overrides the limit configured in the <b>max-paths</b> command. If the best path is an IBGP learned route and this command is set to 1, multipaths are disabled. |
| Range       | 1 to 64   |
| Introduced  | 19.5.R1   |
| Platforms   | All   |

**max-paths** *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum number of multipaths per prefix or NLRI   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp multipath family</b> <i>keyword</i> <b>max-paths</b> <i>number</i>  |
| Tree        | <b>max-paths</b>  |
| Description | This command configures the maximum number of multipaths per prefix or NLRI for the IP family option specified using the <b>family</b> command.<br>Consider the following when configuring this command: <ul style="list-style-type: none"> <li>• If the best path is an EBGP-learned route and the <b>ebgp</b> command is configured, the limit configured in the <b>ebgp</b> command overrides the limit configured in this command.</li> <li>• If the best path is an IBGP-learned route and the <b>ibgp</b> command is configured, the limit configured in the <b>ibgp</b> command overrides the limit configured in this command.</li> <li>• If the best path is an EBGP-learned route and the <b>ebgp</b> command is not configured, and this command is configured to 1, multipaths are disabled.</li> <li>• If the best path is an IBGP-learned route and the <b>ibgp</b> command is not configured, and this command is configured to 1, multipaths are disabled.</li> </ul> |
| Range       | 1 to 64   |
| Introduced  | 19.5.R1   |
| Platforms   | All   |

**restrict** *keyword*

|            |  |
|------------|--|
| Synopsis   | AS path restriction for the non-best path  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp multipath family</b> <i>keyword</i> <b>restrict</b> <i>keyword</i> |
| Tree       | <b>restrict</b>  |
| Options    | same-as-path-length, same-neighbor-as, exact-as-path   |
| Default    | same-as-path-length  |
| Introduced | 19.5.R1  |
| Platforms  | All  |

**unequal-cost** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Ignore differences in the next-hop cost for multipath  |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp multipath family</b> <i>keyword</i> <b>unequal-cost</b> <i>boolean</i> |
| Tree        | <b>unequal-cost</b>  |
| Description | When configured to <b>true</b> , BGP ignores differences in the next-hop cost when determining eligible multipaths.              |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 19.5.R1 |
| Platforms  | All     |

**ibgp** *number*

|            |  |
|------------|--|
| Synopsis   | Maximum multipaths per prefix for IBGP learned routes  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp multipath ibgp</a> <i>number</i> |
| Tree       | <a href="#">ibgp</a>   |
| Range      | 1 to 64  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**max-paths** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum multipaths per prefix   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp multipath max-paths</a> <i>number</i> |
| Tree       | <a href="#">max-paths</a>   |
| Range      | 1 to 64   |
| Default    | 1   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**restrict** *keyword*

|            |   |
|------------|---|
| Synopsis   | AS path restriction for the non-best path   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp multipath restrict</a> <i>keyword</i> |
| Tree       | <a href="#">restrict</a>  |
| Options    | same-as-path-length, same-neighbor-as, exact-as-path  |
| Default    | same-as-path-length   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**unequal-cost** *boolean*

|            |   |
|------------|---|
| Synopsis   | Ignore differences in the next-hop cost for multipath   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp multipath unequal-cost</b> <i>boolean</i> |
| Tree       | <b>unequal-cost</b>   |
| Default    | false   |
| Introduced | 19.5.R1   |
| Platforms  | All   |

**neighbor** [**ip-address**] (*ipv4-address-with-zone* | *ipv6-address-with-zone*)

|            |  |
|------------|--|
| Synopsis   | Enter the <b>neighbor</b> list instance  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) |
| Tree       | <b>neighbor</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**[ip-address]** (*ipv4-address-with-zone* | *ipv6-address-with-zone*)

|            |  |
|------------|--|
| Synopsis   | IP address of the BGP peer router  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) |
| Tree       | <b>neighbor</b>  |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**admin-state** *keyword*

|            |  |
|------------|--|
| Synopsis   | Administrative state of the BGP neighbor   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>admin-state</b> <i>keyword</i> |
| Tree       | <b>admin-state</b>   |
| Options    | enable, disable  |
| Default    | enable   |
| Introduced | 16.0.R1  |

Platforms All

### **advertise-inactive** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Advertise an inactive BGP route to peers  |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>advertise-inactive</b> <i>boolean</i>   |
| Tree        | <a href="#">advertise-inactive</a>  |
| Description | <p>When configured to <b>true</b>, this command allows an inactive BGP route to be advertised, even though it is not the most preferred route. The effect of the command on advertised unlabeled, labeled, and multicast IPv4 and IPv6 routes depends on several factors.</p> <ul style="list-style-type: none"> <li>• If the active route for the IP prefix is a BGP route, that route is advertised.</li> <li>• If the active route is a non-BGP route and there are valid inactive BGP routes to the same destination, the best valid inactive route is advertised unless the active non-BGP route is matched and accepted by an export policy applied to the session.</li> <li>• If the active route is a non-BGP route and there are no valid BGP routes to the same destination, no route is advertised unless the active non-BGP route is matched and accepted by an export policy applied to the session.</li> </ul> <p>When unconfigured, the command inherits the value of the global-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>false</b>.</p> <p>When this command inherits a value of <b>false</b>, the advertisement of inactive BGP routes to other BGP peers is disabled.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **advertise-ipv6-next-hops**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>advertise-ipv6-next-hops</b> context   |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>advertise-ipv6-next-hops</b> |
| Tree       | <a href="#">advertise-ipv6-next-hops</a>   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **ipv4** *boolean*

|          |   |
|----------|---|
| Synopsis | Enable IPv4 routes to be advertised   |
| Context  | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>advertise-ipv6-next-hops</b> <b>ipv4</b> <i>boolean</i> |

|            |                      |
|------------|----------------------|
| Tree       | <a href="#">ipv4</a> |
| Default    | false                |
| Introduced | 19.5.R1              |
| Platforms  | All                  |

### **aggregator-id-zero** *boolean*

|            |  |
|------------|--|
| Synopsis   | Set router ID in the BGP AGGREGATOR attribute to zero  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">aggregator-id-zero</a> <i>boolean</i> |
| Tree       | <a href="#">aggregator-id-zero</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **as-override** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Replace the peer ASN with the local ASN in AS Path   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">as-override</a> <i>boolean</i>  |
| Tree        | <a href="#">as-override</a>  |
| Description | <p>When configured to <b>true</b>, the advertising router's local AS replaces all occurrences of the peer AS in the AS_PATH attribute.</p> <p>This command should be used with caution, as it breaks BGP's loop detection mechanism.</p> <p>When unconfigured, the command inherits the value of the group-level setting (<b>true</b> or <b>false</b>). This command cannot be explicitly configured to <b>false</b>.</p> <p>When the command inherits a value of <b>false</b>, no AS override is performed.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **asn-4-byte** *boolean*

|            |  |
|------------|--|
| Synopsis   | Advertise the use of 4-byte ASNs   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">asn-4-byte</a> <i>boolean</i> |
| Tree       | <a href="#">asn-4-byte</a>   |
| Introduced | 16.0.R1  |

Platforms All

### **authentication-key** *string*

Synopsis BGP authentication key

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **authentication-key** *string*

Tree [authentication-key](#)

String Length 1 to 370

Introduced 16.0.R1

Platforms All

### **authentication-keychain** *reference*

Synopsis TCP authentication keychain for the session

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **authentication-keychain** *reference*

Tree [authentication-keychain](#)

Description This command associates the keychain to be used to authenticate the BGP session. The keychain allows the rollover of authentication keys during the lifetime of a session.

Reference **configure system security keychains** **keychain** *string*

Introduced 16.0.R3

Platforms All

### **bfd-liveness** *boolean*

Synopsis Enable BFD

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **bfd-liveness** *boolean*

Tree [bfd-liveness](#)

Description When configured to **true**, BFD is enabled on a given protocol interface where the state of the protocol interface is tied to the state of the BFD session between the local node and the remote node.

When unconfigured, the command inherits the value of the group-level setting (**true** or **false**). The command cannot be explicitly configured to **false**.

When this command inherits a value of **false**, BFD is removed from the associated protocol adjacency.

Introduced 16.0.R1  
Platforms All

### **capability-negotiation** *boolean*

Synopsis Enable capability negotiation  
Context **configure service vprn string bgp neighbor** (*ipv4-address-with-zone | ipv6-address-with-zone*) **capability-negotiation boolean**  
Tree [capability-negotiation](#)  
Introduced 16.0.R1  
Platforms All

### **client-reflect** *boolean*

Synopsis Allow cluster RR to advertise routes to its clients  
Context **configure service vprn string bgp neighbor** (*ipv4-address-with-zone | ipv6-address-with-zone*) **client-reflect boolean**  
Tree [client-reflect](#)  
Introduced 16.0.R1  
Platforms All

### **cluster**

Synopsis Enter the **cluster** context  
Context **configure service vprn string bgp neighbor** (*ipv4-address-with-zone | ipv6-address-with-zone*) **cluster**  
Tree [cluster](#)  
Introduced 16.0.R1  
Platforms All

### **cluster-id** *string*

Synopsis Route reflector cluster ID  
Context **configure service vprn string bgp neighbor** (*ipv4-address-with-zone | ipv6-address-with-zone*) **cluster cluster-id string**  
Tree [cluster-id](#)  
Introduced 16.0.R1

Platforms All

### **connect-retry** *number*

Synopsis BGP connect retry timer value

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **connect-retry** *number*

Tree [connect-retry](#)

Range 1 to 65535

Introduced 16.0.R1

Platforms All

### **damp-peer-oscillations**

Synopsis Enable the **damp-peer-oscillations** context

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **damp-peer-oscillations**

Tree [damp-peer-oscillations](#)

Introduced 16.0.R1

Platforms All

### **error-interval** *number*

Synopsis Time after a reset that the session must be error-free

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **damp-peer-oscillations error-interval** *number*

Tree [error-interval](#)

Description This command sets the interval of time after a reset, during which the session must be error-free in order to reset the penalty counter and return the idle hold time to the initial wait time.

Range 0 to 2048

Default 30

Introduced 16.0.R1

Platforms All

**idle-hold-time**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>idle-hold-time</b> context   |
| Context    | <b>configure service vprn string bgp neighbor</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>damp-peer-oscillations idle-hold-time</b> |
| Tree       | <a href="#">idle-hold-time</a>  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**initial-wait number**

|            |   |
|------------|---|
| Synopsis   | Time session remains in idle state after stabilization  |
| Context    | <b>configure service vprn string bgp neighbor</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>damp-peer-oscillations idle-hold-time initial-wait number</b> |
| Tree       | <a href="#">initial-wait</a>  |

### **helper-override-stale-time** *number*

Synopsis Locally-configured stale routes override time

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **graceful-restart long-lived family** *keyword* **helper-override-stale-time** *number*

Tree [helper-override-stale-time](#)

Description This command configures a locally-imposed LLGR stale time that overrides the long-lived stale routes time that is advertised by the router in its LLGR capability. This is a family-specific override value.

Range 0 to 16777216

Default 16777216

Introduced 16.0.R1

Platforms All

### **forwarding-bits-set** *keyword*

Synopsis BGP LLGR forwarding-bit behavior for address family

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **graceful-restart long-lived** **forwarding-bits-set** *keyword*

Tree [forwarding-bits-set](#)

Description This command determines the setting of the F bit in the GR and LLGR capabilities advertised by the router. When the F bit is set for an address family, it indicates that the advertising router is able to preserve forwarding state for the routes of that address family across the last restart. When the session is re-established after a restart and the F bit is not set, all stale routes from the peer are immediately removed for the corresponding address family.

This command allows the F bit to be set for all address families or only for non-forwarding address families (L2-VPN, route target, flow-IPv4, and flow-IPv6).

Options none, all, non-fwd

Default none

Introduced 16.0.R1

Platforms All

### **helper-override-restart-time** *number*

Synopsis Locally-configured override for restart time

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>graceful-restart long-lived helper-override-restart-time</b> <i>number</i>   |
| Tree        | <a href="#">helper-override-restart-time</a>  |
| Description | This command overrides the restart time advertised by a peer (in its GR capability) with a locally-configured value. This override applies only to AFI/SAFI that were included in the GR capability of the peer. The restart-time is always zero for AFI/SAFI not included in the GR capability. This command is useful if the local router wants to force the LLGR phase to begin after a set time for all protected AFI/SAFI. |
| Range       | 0 to 4095   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

| Context     | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>graceful-restart long-lived helper-override-stale-time</b> <i>number</i>   |
| Tree        | <a href="#">helper-override-stale-time</a>  |
| Description | This command configures a locally-imposed LLGR stale time that overrides the long-lived stale routes time that is advertised by the router in its LLGR capability.<br><br>This command applies to all AFI/SAFI in the advertised LLGR capability except for any AFI/SAFI with a family-specific override. |
| Range       | 0 to 16777215   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **without-no-export** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Advertise LLGR stale routes to non-LLGR peers  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>graceful-restart long-lived without-no-export</b> <i>boolean</i>  |
| Tree        | <a href="#">without-no-export</a>  |
| Description | When configured to <b>true</b> , LLGR stale routes can be advertised to any peer (EBGP or IBGP) that did not signal the LLGR capability. For IBGP and confederation-EBGP peers that did not advertise the LLGR capability, the local preference attribute in the advertised stale routes is automatically set to 0.<br><br>When configured to <b>false</b> , LLGR stale routes are not advertised to any EBGP peer that did not signal the LLGR capability. For IBGP and confederation-EBGP peers that did not advertise the LLGR capability, the local preference attribute in the advertised stale |

routes is automatically set to 0 and a NO\_EXPORT standard community is automatically added to the routes.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **restart-time** *number*

|            |  |
|------------|--|
| Synopsis   | Restart time advertised by GR capability   |
| Context    | <b>configure service vprn string bgp neighbor</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>graceful-restart restart-time number</b> |
| Tree       | <a href="#">restart-time</a>   |
| Range      | 0 to 4095  |
| Default    | 300  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **stale-routes-time** *number*

|            |   |
|------------|---|
| Synopsis   | Maximum time to maintain routes after graceful restart  |
| Context    | <b>configure service vprn string bgp neighbor</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>graceful-restart stale-routes-time number</b> |
| Tree       | <a href="#">stale-routes-time</a>   |
| Range      | 1 to 3600   |
| Default    | 360   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **group** *reference*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |   |
|----------|---|
| Synopsis | Neighbor to group   |
| Context  | <b>configure service vprn string bgp neighbor</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>group reference</b> |

|            |   |
|------------|---|
| Tree       | <a href="#">group</a>   |
| Reference  | <b>configure service vprn</b> <i>string</i> <a href="#">bgp group</a> <i>string</i> |
| Notes      | This element is mandatory.  |
| Introduced | 16.0.R1   |
| Platforms  | All   |

## hold-time

|            |  |
|------------|--|
| Synopsis   | Enter the <b>hold-time</b> context   |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">hold-time</a> |
| Tree       | <a href="#">hold-time</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## minimum-hold-time *number*

|            |  |
|------------|--|
| Synopsis   | Minimum time BGP waits between successive messages   |
| Context    | <b>configure service vprn</b> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">hold-time</a> <a href="#">minimum-hold-time</a> <i>number</i> |
| Tree       | <a href="#">minimum-hold-time</a>  |
| Range      | 0   3 to 65536   |
| Default    | 0  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## seconds *number*

|             |   |
|-------------|---|
| Synopsis    | Maximum hold time between successive messages   |
| Context     | <b>configure service vprn</b> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">hold-time</a> <a href="#">seconds</a> <i>number</i>  |
| Tree        | <a href="#">seconds</a>   |
| Description | <p>The BGP hold time specifies the maximum time BGP waits between successive messages (either keepalive or update) from its peer, before closing the connection.</p> <p>Even though the implementation allows setting the keepalive timer at the BGP neighbor level times separately, the configured keepalive timer is overridden by this value under the following circumstances:</p> |

- If the specified hold time is less than the configured keepalive time, then the operational keepalive time is set to a third of the hold-time; the configured keepalive time is not changed.
- If the hold time is set to zero, the operational value of the keepalive time is set to zero; the configured keepalive time is not changed. This means that the connection with the peer is up permanently and no keepalive packets are sent to the peer.

When unconfigured, the command setting is inherited from the BGP group-level configuration.

|            |                |
|------------|----------------|
| Range      | 0   3 to 65535 |
| Introduced | 16.0.R1        |
| Platforms  | All            |

## import

|            |  |
|------------|--|
| Synopsis   | Enable the <b>import</b> context   |
| Context    | <b>configure service vprn string bgp neighbor</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>import</b> |
| Tree       | <b>import</b>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

## policy (*policy-expr-string | string*)

|                |  |
|----------------|--|
| Synopsis       | Route policy name  |
| Context        | <b>configure service vprn string bgp neighbor</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>import policy</b> ( <i>policy-expr-string   string</i> ) |
| Tree           | <b>policy</b>  |
| String Length  | 1 to 255   |
| Max. Instances | 15   |
| Min. Instances | 1  |
| Notes          | This element is ordered by the user.   |
| Introduced     | 16.0.R1  |
| Platforms      | All  |

**initial-send-delay-zero** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Send BGP updates as soon as the session comes up   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">initial-send-delay-zero</a> <i>boolean</i>  |
| Tree        | <a href="#">initial-send-delay-zero</a>  |
| Description | When configured to <b>true</b> , BGP updates are sent as soon as the session comes up.<br>When unconfigured, the command inherits the value of the group-level setting ( <b>true</b> or <b>false</b> ). The command cannot be explicitly configured to <b>false</b> .<br>When this command inherits a value of <b>false</b> , BGP waits to send UPDATE messages for the minimum route advertisement time after a session is established. |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

**keepalive** *number*

|            |  |
|------------|--|
| Synopsis   | Time after which the BGP KEEPALIVE message is sent   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">keepalive</a> <i>number</i> |

|            |          |
|------------|----------|
| Options    | igp-cost |
| Introduced | 16.0.R1  |
| Platforms  | All      |

### **min-route-advertisement** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum interval between successive prefix updates   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">min-route-advertisement</a> <i>number</i> |
| Tree       | <a href="#">min-route-advertisement</a>  |
| Range      | 1 to 255   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **monitor**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>monitor</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">monitor</a> |
| Tree       | <a href="#">monitor</a>  |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of BMP monitoring  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <a href="#">monitor</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **all-stations** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Send BMP messages to all configured stations   |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>monitor all-stations</b> <i>boolean</i>  |
| Tree        | <a href="#">all-stations</a>   |
| Description | <p>When configured to <b>true</b>, this command specifies that BMP messages are to be sent to all configured BMP monitoring stations.</p> <p>When configured to <b>false</b>, the command is not used to indicate the stations which can receive BMP messages. The <b>station</b> command (at the same context level) identifies the BMP stations for which BMP messages are to be sent.</p> |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **route-monitoring**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>route-monitoring</b> context  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>monitor route-monitoring</b> |
| Tree       | <a href="#">route-monitoring</a>   |
| Introduced | 16.0.R1  |
| Platforms  | All  |

### **post-policy** *boolean*

|            |   |
|------------|---|
| Synopsis   | Allow post-policy route-monitoring messages to be sent  |
| Context    | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>monitor route-monitoring post-policy</b> <i>boolean</i> |
| Tree       | <a href="#">post-policy</a>   |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **pre-policy** *boolean*

|          |   |
|----------|---|
| Synopsis | Allow pre-policy route-monitoring messages to be sent |
|----------|---|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>monitor route-monitoring pre-policy</b> <i>boolean</i> |
| Tree       | <a href="#">pre-policy</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **station** [[station-name](#)] *reference*

|                |   |
|----------------|---|
| Synopsis       | Add a list entry for <b>station</b>   |
| Context        | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>monitor station</b> <i>reference</i> |
| Tree           | <a href="#">station</a>   |
| Max. Instances | 8   |
| Introduced     | 16.0.R1   |
| Platforms      | All   |

### **[station-name]** *reference*

|            |   |
|------------|---|
| Synopsis   | BMP monitoring station  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>monitor station</b> <i>reference</i> |
| Tree       | <a href="#">station</a>   |
| Reference  | <b>configure bmp station</b> <i>string</i>  |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **multihop** *number*

|          |   |
|----------|---|
| Synopsis | TTL in IP packet headers for EBGP peers multi-hops away   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>multihop</b> <i>number</i> |
| Tree     | <a href="#">multihop</a>  |
| Range    | 1 to 255  |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **multipath-eligible** *boolean*

|            |  |
|------------|--|
| Synopsis   | Allow routes from this peer in multipath eligibility   |
| Context    | <b>configure</b> <b>service vpn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>multipath-eligible</b> <i>boolean</i> |
| Tree       | <a href="#">multipath-eligible</a>   |
| Introduced | 19.5.R1  |
| Platforms  | All  |

### **next-hop-self** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Advertise routes with local address as next-hop address  |
| Context     | <b>configure</b> <b>service vpn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>next-hop-self</b> <i>boolean</i>  |
| Tree        | <a href="#">next-hop-self</a>  |
| Description | <p>When configured to <b>true</b>, this command configures BGP to advertise routes to members of a group using a local address of the BGP instance as the BGP next-hop address.</p> <p>Note that this command is set without exception, regardless of the route source (EBGP or IBGP) or its family. When used with VPN-IPv4 and VPN-IPv6 routes, the <b>configure router bgp rr-vpn-forwarding</b> command should also be configured.</p> <p>When unconfigured, the command inherits the value of the group-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>false</b>.</p> <p>When this command inherits a value of <b>false</b>, protocol standard behavior is applied to determine whether to set <b>next-hop-self</b> in advertised routes.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **origin-validation**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>origin-validation</b> context  |
| Context    | <b>configure</b> <b>service vpn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>origin-validation</b> |
| Tree       | <a href="#">origin-validation</a>  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

### **ipv4** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable/disable family type ipv4.  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>origin-validation</b> <b>ipv4</b> <i>boolean</i> |
| Tree       | <a href="#">ipv4</a>  |
| Default    | false   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

### **ipv6** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable support for unlabeled unicast IPv6 routes  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>origin-validation</b> <b>ipv6</b> <i>boolean</i> |
| Tree       | <a href="#">ipv6</a>  |
| Default    | false   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

### **label-ipv4** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable support for labeled-unicast IPv4 routes  |
| Context    | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>origin-validation</b> <b>label-ipv4</b> <i>boolean</i> |
| Tree       | <a href="#">label-ipv4</a>  |
| Default    | false   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

### **passive** *boolean*

|          |   |
|----------|---|
| Synopsis | Use passive mode for BGP communication  |
| Context  | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>passive</b> <i>boolean</i> |
| Tree     | <a href="#">passive</a>   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **path-mtu-discovery** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable path MTU discovery   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>path-mtu-discovery</b> <i>boolean</i>  |
| Tree        | <a href="#">path-mtu-discovery</a>  |
| Description | <p>When configured to <b>true</b>, Path MTU Discovery (PMTUD) is enabled for the associated TCP connections.</p> <p>When set to <b>true</b>, PMTUD is activated toward an IPv4 BGP neighbor and the Don't Fragment (DF) bit is set in the IP header of all IPv4 packets sent to the peer. If any device along the path toward the peer cannot forward the packet because the IP MTU of the interface is smaller than the IP packet size, this device drops the packet and sends an ICMP or ICMPv6 error message encoding the interface MTU. When the router receives the ICMP or ICMPv6 message, it lowers the TCP maximum segment size limit from the previous value so that the IP MTU constraint can be accommodated.</p> <p>When PMTUD is configured to <b>false</b> and there is no TCP MSS configuration that can be associated with a BGP neighbor (in either the BGP configuration or the first hop IP interface configuration), the router advertises a value of only 1024 bytes as the TCP MSS option value, limiting received TCP segments to that size.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **peer-as** *number*

|             |   |
|-------------|---|
| Synopsis    | Peer AS number  |
| Context     | <b>configure service vprn</b> <i>string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>peer-as</b> <i>number</i>  |
| Tree        | <a href="#">peer-as</a>   |
| Description | <p>This command configures the autonomous system number for the peer. The peer AS number must be configured for each configured peer.</p> <p>For EBGP peers, the peer AS number configured must be different from the autonomous system number configured for this router under the global level since the peer will be in a different autonomous system than this router.</p> <p>For IBGP peers, the peer AS number must be the same as the autonomous system number of this router configured under the global level.</p> |
| Range       | 1 to 4294967295   |
| Introduced  | 16.0.R1   |

Platforms All

### **peer-creation-type** *keyword*

Synopsis Peer creation type

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **peer-creation-type** *keyword*

Tree [peer-creation-type](#)

Options static, dynamic, dynamic-if-remote, dynamic-if-local

Default static

Introduced 16.0.R1

Platforms All

### **peer-ip-tracking** *boolean*

Synopsis Enable BGP peer tracking

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **peer-ip-tracking** *boolean*

Tree [peer-ip-tracking](#)

Description When configured to **true**, this command enables BGP peer tracking.

Peer tracking should be used with caution. Peer tracking can tear a session down even if the loss of connectivity turns out to be short-lived (for example, while the IGP protocol is re-converging). Next-hop tracking, which is always enabled, handles temporary connectivity issues more effectively.

When unconfigured, the command inherits the value of the group-level setting (**true** or **false**). The command cannot be explicitly configured to **false**.

When this command inherits a value of **false**, peer tracking is disabled.

Introduced 16.0.R1

Platforms All

### **preference** *number*

Synopsis Route preference for routes learned from all peers

Context **configure service vprn** *string* **bgp neighbor** (*ipv4-address-with-zone* | *ipv6-address-with-zone*) **preference** *number*

Tree [preference](#)

Description This command configures the route preference for routes learned from the configured peers.

The lower the preference value, the higher the chance of the route being the active route. The router assigns BGP routes the highest default preference as compared to routes that are direct, static or learned via MPLS or OSPF.

When unconfigured, the command setting is inherited from the group-level configuration.

|            |          |
|------------|----------|
| Range      | 1 to 255 |
| Introduced | 16.0.R1  |
| Platforms  | All      |

### **prefix-limit** [*family*] *keyword*

|            |  |
|------------|--|
| Synopsis   | Enter the <b>prefix-limit</b> list instance  |
| Context    | <b>configure service vprn string bgp neighbor</b> ( <i>ipv4-address-with-zone   ipv6-address-with-zone</i> ) <b>prefix-limit keyword</b> |

| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <a href="#">ipv4-address-with-zone</a>   <a href="#">ipv6-address-with-zone</a> ) <a href="#">send-default</a> <a href="#">ipv4</a> <i>boolean</i> |
| Tree       | <a href="#">ipv4</a>  |
| Default    | false   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

### **ipv6** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable IPv6 family type   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <a href="#">ipv4-address-with-zone</a>   <a href="#">ipv6-address-with-zone</a> ) <a href="#">send-default</a> <a href="#">ipv6</a> <i>boolean</i> |
| Tree       | <a href="#">ipv6</a>  |
| Default    | false   |
| Introduced | 19.7.R1   |
| Platforms  | All   |

### **split-horizon** *boolean*

|          |   |
|----------|---|
| Synopsis | Prevent routes being reflected back to best-route peer  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <a href="#">ipv4-address-with-zone</a>   <a href="#">ipv6-address-with-zone</a> ) <a href="#">split-horizon</a> <i>boolean</i> |
| Tree     | <a href="#">split-horizon</a>   |

|             |  |
|-------------|--|
| Description | <p>When configured to <b>true</b>, this command enables the use of split-horizon.</p> <p>This command prevents routes from being reflected back to a peer that sends the best route. It applies to routes of all address families and to any type of sending peer; confed-EBGP, EBGP and IBGP.</p> <p>Enabling the split-horizon functionality may have a detrimental impact on peer and route scaling and should only be used when absolutely necessary.</p> <p>When unconfigured, the command inherits the value of the group-level setting (<b>true</b> or <b>false</b>). The command cannot be explicitly configured to <b>false</b>.</p> <p>When this command inherits a value of <b>false</b>, the use of split-horizon is disabled.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **tcp-mss** (*number* | *keyword*)

|             |   |
|-------------|---|
| Synopsis    | TCP maximum segment size override   |
| Context     | <b>configure</b> <i>service vprn string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>tcp-mss</b> ( <i>number</i>   <i>keyword</i> )   |
| Tree        | <a href="#">tcp-mss</a>   |
| Description | <p>This command configures an override for the TCP maximum segment size to use with a specific peer or set of peers (depending on the scope of the command).</p> <p>The configured value controls two properties of the TCP connection as follows:</p> <p>TCP MSS option - The router advertises the TCP MSS option value in the TCP SYN packet it sends as part of the 3-way handshake. The advertised value may be lower than the configured value, depending on the IP MTU of the first hop IP interface. The peers must abide by this value when sending TCP segments to the local router.</p> <p>TCP maximum segment size - The actual transmitted size may be lower than the configured value, depending on the TCP MSS option value signaled by the peers, the effect of path MTU discovery, or other factors.</p> |
| Range       | 384 to 9746   |
| Options     | ip-stack  |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

### **third-party-nexthop** *boolean*

|          |   |
|----------|---|
| Synopsis | Apply third-party next-hop processing to EBGP peers   |
| Context  | <b>configure</b> <i>service vprn string</i> <b>bgp neighbor</b> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>third-party-nexthop</b> <i>boolean</i> |
| Tree     | <a href="#">third-party-nexthop</a>   |

|            |         |
|------------|---------|
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **ttl-security** *number*

|             |   |
|-------------|---|
| Synopsis    | Minimum TTL value for an incoming BGP packet  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>ttl-security</b> <i>number</i>  |
| Tree        | <a href="#">ttl-security</a>  |
| Description | This command configures the minimum TTL value that BGP will accept from an incoming packet. A packet with a TTL value less than the minimum configured TTL value is discarded.<br><br>When unconfigured, the command inherits the value of the group-level setting. |
| Range       | 1 to 255  |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **type** *keyword*

|            |   |
|------------|---|
| Synopsis   | BGP peer type   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp neighbor</a> ( <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> ) <b>type</b> <i>keyword</i> |
| Tree       | <a href="#">type</a>  |
| Options    | no-type, internal, external   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **next-hop-resolution**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>next-hop-resolution</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp next-hop-resolution</a> |
| Tree       | <a href="#">next-hop-resolution</a>   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

**policy reference**

|            |  |
|------------|--|
| Synopsis   | Policy that filters routes for BGP next-hop resolution   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp next-hop-resolution</a> <a href="#">policy reference</a> |
| Tree       | <a href="#">policy</a>   |
| Reference  | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>                                       |
| Introduced | 16.0.R1  |
| Platforms  | All  |

**use-bgp-routes** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Use BGP routes to resolve BGP next hops  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp next-hop-resolution</a> <a href="#">use-bgp-routes</a> <i>boolean</i>  |
| Tree        | <a href="#">use-bgp-routes</a>   |
| Description | <p>When configured to <b>true</b>, BGP routes resolve BGP next hops. When this command is enabled, any unlabeled IPv4 or IPv6 BGP route received from a VPRN BGP peer becomes resolvable by up to four other BGP routes in order to resolve the route to a VPRN IP interface. A VPRN BGP route is not resolvable by another VPRN BGP route or by a BGP-VPN route.</p> <p>This command also allows unlabeled IPv4 or IPv6 BGP routes leaked from the GRT with unresolved next hops (in the GRT) to be resolvable by BGP-VPN routes (of the VPRN).</p> <p>When configured to <b>false</b>, BGP next hops are not resolved.</p> |
| Default     | false  |
| Introduced  | 19.10.R1   |
| Platforms   | All  |

**path-mtu-discovery** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Enable Path MTU Discovery  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp path-mtu-discovery</a> <i>boolean</i>  |
| Tree        | <a href="#">path-mtu-discovery</a>   |
| Description | <p>When configured to <b>true</b>, Path MTU Discovery (PMTUD) is enabled for the associated TCP connections.</p> <p>When set to <b>true</b>, PMTUD is activated toward an IPv4 BGP neighbor and the Don't Fragment (DF) bit is set in the IP header of all IPv4 packets sent to the peer. If any device along the path toward the peer cannot forward the packet because the IP MTU of the interface is smaller than the IP packet size, this device drops the packet and sends an ICMP or ICMPv6 error message encoding the interface MTU. When the router receives the ICMP or ICMPv6 message, it lowers the TCP maximum segment size limit from the previous value so that the IP MTU constraint can be accommodated.</p> |

When PMTUD is configured to **false** and there is no TCP MSS configuration that can be associated with a BGP neighbor (in either the BGP configuration or the first hop IP interface configuration), the router advertises a value of only 1024 bytes as the TCP MSS option value, limiting received TCP segments to that size.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 16.0.R1 |
| Platforms  | All     |

### **peer-ip-tracking** *boolean*

|            |   |
|------------|---|
| Synopsis   | Enable BGP peer tracking  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp peer-ip-tracking</a> <i>boolean</i> |
| Tree       | <a href="#">peer-ip-tracking</a>  |
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | All   |

### **peer-tracking-policy** *reference*

|             |  |
|-------------|--|
| Synopsis    | Policy for BGP peer tracking on router instance  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp peer-tracking-policy</a> <i>reference</i>  |
| Tree        | <a href="#">peer-tracking-policy</a>   |
| Description | <p>This command specifies the name of a policy statement to use with the BGP peer-tracking function on BGP sessions where peer tracking is enabled.</p> <p>When unconfigured, the default peer-tracking policy allows any type of route to match the neighbor IP address except aggregate routes and LDP shortcut routes.</p> <p>Peer tracking should be used with caution. The peer-tracking policy should only permit one of direct-interface or direct routes to be advertised to a BGP peer. Advertising both routes causes the best route to oscillate.</p> |
| Reference   | <b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>   |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **preference** *number*

|          |  |
|----------|--|
| Synopsis | Route preference for routes learned from all peers   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp preference</a> <i>number</i> |

|             |  |
|-------------|--|
| Tree        | <a href="#">preference</a>   |
| Description | This command configures the route preference for routes learned from the configured peers.<br><br>The lower the preference value, the higher the chance of the route being the active route. The router assigns BGP routes the highest default preference as compared to routes that are direct, static or learned via MPLS or OSPF. |
| Range       | 1 to 255   |
| Default     | 170  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **rapid-withdrawal** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Send BGP withdrawal UPDATE messages immediately  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp rapid-withdrawal</a> <i>boolean</i>  |
| Tree        | <a href="#">rapid-withdrawal</a>   |
| Description | When configured to <b>true</b> , UPDATE messages containing withdrawn NLRI are sent immediately to a peer without waiting for the MRAI timer to expire. UPDATE messages containing reachable NLRI continue to wait for the MRAI timer to expire, or for a rapid update trigger.<br><br>When configured to <b>false</b> , withdrawal processing continues with the normal behavior. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | All  |

### **remove-private**

|            |  |
|------------|--|

| Introduced | 16.0.R1   |
| Platforms  | All   |

## policy-name *reference*

|             |   |
|-------------|---|
| Synopsis    | Name of policy that controls route importation into RIB   |
| Context     | <b>configure service vprn string bgp rib-management label-ipv4 route-table-import policy-name <i>reference</i></b>  |
| Tree        | <a href="#">policy-name</a>   |
| Description | <p>This command specifies the name of a policy that controls the importation of active routes from the IP route table into one of the BGP RIBs.</p> <p>When this command is configured, routes dropped or rejected by the policy are not installed in the associated RIB. Rejected routes cannot be advertised to BGP peers associated with the RIB, but they can still be used to resolve BGP next hops of routes in that RIB. If the active route for a prefix is rejected by the policy, the best BGP route for that prefix in the BGP RIB can be advertised to peers as though it is used.</p> <p>Aggregate routes are always imported into each RIB, independent of the specified policy.</p> <p>Route modifications specified in the actions of the policy are ignored and have no effect on the imported routes.</p> <p>When unconfigured, or if the command refers to an empty policy, all non-BGP routes from the IP route table are imported into the applicable RIB.</p> |
| Reference   | <b>configure</b> <a href="#">policy-options policy-statement string</a>   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**label-ipv6**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>label-ipv6</b> context                                |
| Context    | <b>configure service vprn string bgp rib-management label-ipv6</b> |
| Tree       | <a href="#">label-ipv6</a>   |
| Introduced | 22.2.R1  |
| Platforms  | All  |

**leak-import**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>leak-import</b> context   |
| Context    | <b>configure service vprn string bgp rib-management label-ipv6 leak-import</b> |
| Tree       | <a href="#">leak-import</a>  |
| Introduced | 22.2.R1  |
| Platforms  | All  |

**policy** (*policy-expr-string* | *string*)

|                |  |
|----------------|--|
| Synopsis       | Leak import policy name  |
| Context        | <b>configure service vprn string bgp rib-management label-ipv6 leak-import policy</b> ( <i>policy-expr-string</i>   <i>string</i> )  |
| Tree           | <a href="#">policy</a>   |
| Description    | This command specifies one or more leak import policies.<br><br>Policy names are limited to 64 characters except for the first policy. Only one object can be a policy logical expression consisting of policy names (enclosed in square brackets) and logical operators (AND, OR, NOT). |
| String Length  | 1 to 255   |
| Max. Instances | 15   |
| Notes          | This element is ordered by the user.   |
| Introduced     | 22.2.R1  |
| Platforms      | All  |

**router-id** *string*

|          |   |
|----------|---|
| Synopsis | Router ID for the BGP instance in the AS                  |
| Context  | <b>configure service vprn string bgp router-id string</b> |

---

|             |   |
|-------------|---|
| Tree        | <a href="#">router-id</a>   |
| Description | <p>This command specifies the router ID to be used with the BGP instance.</p> <p>Changing the BGP router ID on an active BGP instance causes the BGP instance to restart with the new router ID.</p> <p>When an SR OS is configured with an IPv6-only BOF and no IPv4 system interface address, explicitly-defined IPv4 router IDs are required for BGP as there is no mechanism to derive the router ID from an IPv6 system interface address.</p> |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **send-communities**

|            |  |

| Default    | false  |
| Introduced | 19.7.R1  |
| Platforms  | All  |

**split-horizon *boolean***

|             |   |
|-------------|---|
| Synopsis    | Prevent routes being reflected back to best-route peer  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp</a> <a href="#">split-horizon</a> <i>boolean</i>  |
| Tree        | <a href="#">split-horizon</a>   |
| Description | <p>When configured to <b>true</b>, this command enables the use of split-horizon.</p> <p>This command prevents routes from being reflected back to a peer that sends the best route. It applies to routes of all address families and to any type of sending peer; confed-EBGP, EBGP and IBGP.</p> <p>Enabling the split-horizon functionality may have a detrimental impact on peer and route scaling and should only be used when absolutely necessary.</p> <p>When configured to <b>false</b>, the use of split-horizon is disabled.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

**tcp-mss *number***

|             |  |
|-------------|--|
| Synopsis    | TCP maximum segment size override  |
| Context     | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp</a> <a href="#">tcp-mss</a> <i>number</i>  |
| Tree        | <a href="#">tcp-mss</a>  |
| Description | <p>This command configures an override for the TCP maximum segment size to use with a specific peer or set of peers (depending on the scope of the command).</p> <p>The configured value controls two properties of the TCP connection as follows:</p> <p>TCP MSS option - The router advertises the TCP MSS option value in the TCP SYN packet it sends as part of the 3-way handshake. The advertised value may be lower than the configured value, depending on the IP MTU of the first hop IP interface. The peers must abide by this value when sending TCP segments to the local router.</p> |

TCP maximum segment size - The actual transmitted size may be lower than the configured value, depending on the TCP MSS option value signaled by the peers, the effect of path MTU discovery, or other factors.

|            |             |
|------------|-------------|
| Range      | 384 to 9746 |
| Introduced | 21.2.R1     |
| Platforms  | All         |

### **third-party-nexthop** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Apply third-party next-hop processing to EBGP peers   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp third-party-nexthop</a> <i>boolean</i>  |
| Tree        | <a href="#">third-party-nexthop</a>   |
| Description | <p>When configured to <b>true</b>, this command enables the router to send third-party next hop to EBGP peers in the same subnet as the source peer. The address family of the transport must match the address family of the route.</p> <p>When an IPv4 or IPv6 route is received from one EBGP peer and advertised to another EBGP peer in the same IP subnet, the BGP next hop is left unchanged.</p> <p>When configured to <b>false</b>, third-party next-hop processing is disabled and the next hop carries the IP address of the interface used to establish the TCP connection to the peer.</p> |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | All   |

### **bgp-evpn**

|            |  |
|------------|--|

| Tree       | <a href="#">resolution</a>  |
| Options    | none, filter, any   |
| Default    | none  |
| Introduced | 20.10.R1  |
| Platforms  | All   |

### resolution-filter

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>resolution-filter</b> context  |
| Context     | <b>configure service vprn string bgp-evpn mpls number auto-bind-tunnel resolution-filter</b>  |
| Tree        | <a href="#">resolution-filter</a>   |
| Description | Commands in this context configure the subset of tunnel types that can be used in the resolution of BGP-EVPN routes within the automatic binding of the BGP-EVPN MPLS service to tunnels to MP-BGP peers. |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

### bgp boolean

|             |   |
|-------------|---|
| Synopsis    | Use BGP tunneling for next-hop resolution   |
| Context     | <b>configure service vprn string bgp-evpn mpls number auto-bind-tunnel resolution-filter bgp boolean</b>  |
| Tree        | <a href="#">bgp</a>   |
| Description | When configured to <b>true</b> , BGP searches the BGP LSP for the address of the BGP next hop.<br><br>When configured to <b>false</b> , BGP tunneling is not used and inter-area or inter-as prefixes are not resolved. |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

### ldp boolean

|          |   |
|----------|---|
| Synopsis | Use LDP tunneling for next-hop resolution |
|----------|---|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn string bgp-evpn mpls number auto-bind-tunnel resolution-filter ldp boolean</b>   |
| Tree        | <b>ldp</b>   |
| Description | When configured to <b>true</b> , BGP searches for an LDP LSP with a FEC prefix corresponding to the address of the BGP next hop.<br>When configured to <b>false</b> , LDP tunneling is not used for next-hop resolution. |
| Default     | false  |
| Introduced  | 20.10.R1   |
| Platforms   | All  |

### **mpls-fwd-policy boolean**

|             |   |
|-------------|---|
| Synopsis    | Use MPLS forwarding policy for next-hop resolution  |
| Context     | <b>configure service vprn string bgp-evpn mpls number auto-bind-tunnel resolution-filter mpls-fwd-policy boolean</b>  |
| Tree        | <b>mpls-fwd-policy</b>  |
| Description | When configured to <b>true</b> , BGP uses the MPLS forwarding policy to determine the address of the BGP next hop.<br>When configured to <b>false</b> , the MPLS forwarding policy is not used for next-hop resolution. |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

### **rib-api boolean**

|             |   |
|-------------|---|
| Synopsis    | Use RIB API gRPC service for next-hop resolution  |
| Context     | <b>configure service vprn string bgp-evpn mpls number auto-bind-tunnel resolution-filter rib-api boolean</b>  |
| Tree        | <b>rib-api</b>  |
| Description | When configured to <b>true</b> , BGP uses tunnels programmed using the RIB API gRPC service to resolve the next hops of routes imported into the EVPN service.<br>When configured to <b>false</b> , the RIB API service tunnels are not used for next-hop resolution. |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

**rsvp boolean**

|             |  |
|-------------|--|
| Synopsis    | Use RSVP tunneling for next-hop resolution   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel resolution-filter</a> <a href="#">rsvp boolean</a>  |
| Tree        | <a href="#">rsvp</a>   |
| Description | <p>When configured to <b>true</b>, BGP searches the best metric RSVP LSP to determine the address of the BGP next hop. This address can correspond to the system interface or to another loopback interface used by the BGP instance on the remote node. The LSP metric is provided by MPLS in the tunnel table. In the case of multiple RSVP LSPs with the same lowest metric, BGP selects the LSP with the lowest tunnel ID.</p> <p>When configured to <b>false</b>, the RSVP LSP is not used for next-hop resolution.</p> |
| Default     | false  |
| Introduced  | 20.10.R1   |
| Platforms   | All  |

**sr-isis boolean**

|             |  |
|-------------|--|
| Synopsis    | Use IS-IS SR tunneling for next-hop resolution   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel resolution-filter</a> <a href="#">sr-isis boolean</a>   |
| Tree        | <a href="#">sr-isis</a>  |
| Description | <p>When configured to <b>true</b>, BGP uses an IS-IS tunnel type to determine the address of the BGP next hop.</p> <p>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered IS-IS instance.</p> <p>When configured to <b>false</b>, IS-IS tunneling is not used for next-hop resolution.</p> |
| Default     | false  |
| Introduced  | 20.10.R1   |
| Platforms   | All  |

**sr-ospf boolean**

|          |  |
|----------|--|
| Synopsis | Use OSPF SR tunneling for next-hop resolution  |
| Context  | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp-evpn mpls number</a> <a href="#">auto-bind-tunnel resolution-filter</a> <a href="#">sr-ospf boolean</a> |
| Tree     | <a href="#">sr-ospf</a>  |

|             |  |
|-------------|--|
| Description | When configured to <b>true</b> , BGP uses an OSPF tunnel type to determine the address of the BGP next hop.<br>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered OSPF instance.<br>When configured to <b>false</b> , OSPF tunneling is not used for next-hop resolution. |
| Default     | false  |
| Introduced  | 20.10.R1   |
| Platforms   | All  |

### **sr-ospf3** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use OSPFv3 SR tunneling for next-hop resolution   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>bgp-evpn</b> <b>mpls</b> <i>number</i> <b>auto-bind-tunnel</b> <b>resolution-filter</b> <b>sr-ospf3</b> <i>boolean</i>   |
| Tree        | <b>sr-ospf3</b>   |
| Description | When configured to <b>true</b> , BGP uses an OSPF3 tunnel type to determine the address of the BGP next hop.<br>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered OSPF3 instance.<br>When configured to <b>false</b> , OSPF3 tunneling is not used for next-hop resolution. |
| Default     | false   |
| Introduced  | 20.10.R1  |
| Platforms   | All   |

### **sr-policy** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Use SR policies for next-hop resolution  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>bgp-evpn</b> <b>mpls</b> <i>number</i> <b>auto-bind-tunnel</b> <b>resolution-filter</b> <b>sr-policy</b> <i>boolean</i>   |
| Tree        | <b>sr-policy</b>   |
| Description | When configured to <b>true</b> , this command instructs BGP to use an SR policy to determine the address of the BGP next hop. The SR policy search criteria includes a non-null endpoint and color value that matches the BGP next hop and color extended community value, respectively, of the EVPN route.<br>When configured to <b>false</b> , SR policies are not used for next-hop resolution. |
| Default     | false  |
| Introduced  | 20.10.R1   |

Platforms All

### **sr-te** *boolean*

Synopsis Use SR-TE tunneling for next-hop resolution

Context **configure** *service vprn string bgp-evpn mpls number auto-bind-tunnel resolution-filter sr-te boolean*

Tree [sr-te](#)

Description When configured to **true**, BGP uses an SR-TE tunnel type to determine the address of the BGP next hop.  
The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered tunnel ID.  
When configured to **false**, SR-TE tunneling is not used for next-hop resolution.

Default false

Introduced 20.10.R1

Platforms All

### **udp** *boolean*

Synopsis Use MPLS over UDP tunneling for next-hop resolution

Context **configure** *service vprn string bgp-evpn mpls number auto-bind-tunnel resolution-filter udp boolean*

Tree [udp](#)

Description When configured to **true**, BGP uses an MPLS over UDP tunnel type to determine the address of the BGP next hop.  
When configured to **false**, MPLS over UDP tunneling is not used for next-hop resolution.

Default false

Introduced 20.10.R1

Platforms All

### **default-route-tag** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Default route tag

|             |  |
|-------------|--|
| Context     | <b>configure service vprn string bgp-evpn mpls number default-route-tag string</b>   |
| Tree        | <b>default-route-tag</b>   |
| Description | <p>This command configures a route tag that is used when sending a route to the BGP application (for the corresponding service and BGP instance). If the corresponding BGP instance is enabled, the command cannot be changed.</p> <p>When used for BGP EVPN contexts, only one route tag can be passed to BGP for matching on export policies. In case of a conflict with other route tags pushed by EVPN, the default route tag has the least priority.</p> <p>The following are examples of the conflict priority handling:</p> <ul style="list-style-type: none"> <li>• If a service is configured with both <b>default-route-tag X</b> and <b>proxy-arp evpn-route-tag Y</b>, the EVPN uses route tag Y when sending EVPN proxy-arp routes to the BGP RIB for advertisement.</li> <li>• If a given IP-prefix route is tagged in the route-table with tag A and the R-VPLS, in which the route is advertised, uses B as the <b>default-route-tag</b>, then EVPN keeps tag A when sending the route to the BGP RIB.</li> </ul> <p>The <b>default-route-tag</b> configuration is only supported on EVPN and IP-VPN service routes. The route tag for ES and AD per-ES routes is always zero.</p> |

## domain-id string

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Domain ID of received BGP route before readvertisement  |
| Context     | <b>configure service vprn string bgp-evpn mpls number domain-id string</b>  |
| Tree        | <b>domain-id</b>  |
| Description | <p>This command specifies the domain ID. The domain ID identifies the network from which the BGP route was received before the RTM advertises it to a different neighbor. The domain ID is part of a domain, represented as domain-id:isf_safi_type in the D-PATH attribute, as described in <i>draft-ietf-bess-evpn-ipvpn-interworking</i>. Gateway routers modify the D-PATH attribute. A gateway is a PE where a VPRN is instantiated. The VPRN in this case advertises or receives routes from multiple BGP owners (for example, EVPN-IFL and BGP-IPVPN) or multiple instances of the same owner (for example, VPRN with two BGP-IPVPN instances).</p> <p>Gateways use the D-PATH attribute to detect loops (for received routes where the D-PATH contains a local domain ID) and to make BGP best-path selection decisions based on the D-PATH length (shorter D-PATH is preferred).</p> <p>In the following example, suppose a gateway receives prefix P in an EVPN-IFL instance with the following D-PATH from neighbor N:</p> |

Seg Len=1 / 65000:1:128

If the router imports the route in VPRN-1, BGP-EVPN SRv6 instance with domain 65000:2, it readvertises it to its BGP-IPVPN MPLS instance as follows:

Seg Len=2 / 65000:2:70 / 65000:1:128

That is, the gateway prepends the local domain ID and family to the D-PATH before readvertising the route into a different instance.

### **dynamic-egress-label-limit** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enables dynamic egress label limit  |
| Context     | <b>configure</b> <b>service vprn</b> <i>string</i> <b>bgp-evpn mpls</b> <i>number</i> <b>dynamic-egress-label-limit</b> <i>boolean</i>  |
| Tree        | <a href="#">dynamic-egress-label-limit</a>  |
| Description | <p>When configured to <b>true</b>, this command relaxes the egress MPLS label limit check when resolving BGP next hops in the tunnel table.</p> <p>For VPRN services, the OAM label is never computed and, therefore, one more egress label is allowed.</p> <p>For EVPN (Epipe and VPLS) services, the system only computes the control word and ESI label if they are used. For the control word, the system reduces the egress label limit by one label if the control word is configured in the service. When configured, the ESI label is not counted for Epipes or VPLS services without an ES.</p> <p>When configured to <b>false</b> this command, for EVPN, Epipe, and VPLS services, always accounts for the ESI label and control word.</p> |
| Default     | false   |

### **weighted-ecmp** *boolean*

Synopsis Enable weighted ECMP

Context **configure service vprn** *string* **bgp-evpn mpls** *number* **evpn-link-bandwidth weighted-ecmp** *boolean*

Tree **weighted-ecmp**

Description When configured to **true**, the router supports the processing of the EVPN link bandwidth extended community when installing an ECMP set for an EVPN IP-Prefix route in the VPRN route table.

Flows to an IP Prefix received with a weight and a zero ESI value are sprayed according to the weight. If the EVPN IP-Prefix route received with the weight has a non-zero ESI, the weight is divided into the number of PEs attached to the Ethernet Segment (and rounded up if the result is not an integer).

The command also enables the weighted ECMP functionality for BGP CEs that are configured with an **evpn-link-bandwidth add-to-received-bgp** weight.

When configured to **false**, the router disables the processing of the EVPN link bandwidth extended community.

Default false

| Options    | route-table, tunnel-table, fallback-tunnel-to-route-table   |
| Default    | route-table   |
| Introduced | 22.7.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

### **route-distinguisher** (*string* | *keyword*)

|             |   |
|-------------|---|
| Synopsis    | Route distinguisher   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>bgp-evpn segment-routing-v6</b> <i>number</i> <b>route-distinguisher</b> ( <i>string</i>   <i>keyword</i> )  |
| Tree        | <b>route-distinguisher</b>  |
| Description | This command specifies a unique route distinguisher (RD) to be associated with each routing instance to identify the VPN to which the route belongs.<br><br>Alternatively, the system can automatically generate an RD based on the BGP automatic RD range configured at the <b>configure service system</b> level. |
| Options     | auto-rd   |
| Introduced  | 22.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

### **source-address** *string*

|          |                     |
|----------|---------------------|
| Synopsis | Source IPv6 address |
|----------|---------------------|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn string</b> <i>bgp-evpn segment-routing-v6 number source-address string</i>   |
| Tree        | <a href="#">source-address</a>   |
| Description | <p>When configured, this command specifies the source IPv6 address used in the SA field of the outer IPv6 header of the SRv6 encapsulated packet.</p> <p>When not configured, the source IPv6 address is inherited from the configuration of the global default address in the <b>router "base" segment-routing segment-routing-v6 source-address</b> context.</p> <p>A source IPv6 address must be configured in this context or in the base router context. The system does not check if the address entered is a valid local address.</p> |
| Introduced  | 22.5.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

## srv6

|            |   |
|------------|---|
| Synopsis   | Enter the <b>srv6</b> context   |
| Context    | <b>configure service vprn string</b> <i>bgp-evpn segment-routing-v6 number srv6</i> |
| Tree       | <a href="#">srv6</a>  |
| Introduced | 22.5.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

## default-locator *string*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Default route locator  |
| Context    | <b>configure service vprn string</b> <i>bgp-evpn segment-routing-v6 number srv6 default-locator string</i> |
| Tree       | <a href="#">default-locator</a>  |
| Introduced | 22.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

## instance *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|            |  |
|------------|--|
| Synopsis   | Segment Routing IPv6 instance  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp-evpn segment-routing-v6</a> <i>number</i> <a href="#">srv6</a> <i>instance reference</i> |
| Tree       | <a href="#">instance</a>   |
| Reference  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">segment-routing-v6</a> <i>number</i>   |
| Introduced | 22.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

## vrf-export

|            |  |
|------------|--|
| Synopsis   | Enable the <b>vrf-export</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp-evpn segment-routing-v6</a> <i>number</i> <a href="#">vrf-export</a> |
| Tree       | <a href="#">vrf-export</a>   |
| Introduced | 22.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

## policy (*policy-expr-string* | *string*)

|             |  |
|-------------|--|
| Synopsis    | Policy name  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp-evpn segment-routing-v6</a> <i>number</i> <a href="#">vrf-export</a> <i>policy (policy-expr-string   string)</i>   |
| Tree        | <a href="#">policy</a>   |
| Description | <p>This command configures VRF route policies that control routes between local VRFs and other VRFs on the same or remote PE routers (using MP-BGP).</p> <p>Each referenced object is either a policy logical expression or the name of a single policy.</p> <p>Only one referenced object can be a policy logical expression consisting of policy names (enclosed in square brackets) and logical operators (AND, OR, NOT). The objects are evaluated in the specified order to determine whether to accept or reject the route.</p> <p>Only the first policy can have the maximum length and the rest can be up to 64 characters.</p> <p>Aggregate routes are not advertised using MP-BGP protocols to the other MP-BGP peers.</p> |

|                |   |
|----------------|---|
| String Length  | 1 to 255                                    |
| Max. Instances | 15  |
| Min. Instances | 1   |
| Notes          | This element is ordered by the user.        |
| Introduced     | 22.5.R1                                     |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

## vrf-import

|            |  |
|------------|--|
| Synopsis   | Enable the <b>vrf-import</b> context   |
| Context    | <b>configure service vprn string bgp-evpn segment-routing-v6 number vrf-import</b> |
| Tree       | <a href="#">vrf-import</a>   |
| Introduced | 22.5.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

## policy (*policy-expr-string* | *string*)

|                |  |
|----------------|--|
| Synopsis       | Policy name  |
| Context        | <b>configure service vprn string bgp-evpn segment-routing-v6 number vrf-import policy</b><br>( <i>policy-expr-string</i>   <i>string</i> )   |
| Tree           | <a href="#">policy</a>   |
| Description    | <p>This command configures VRF route policies that control routes between local VRFs and other VRFs on the same or remote PE routers (using MP-BGP).</p> <p>Each referenced object is either a policy logical expression or the name of a single policy.</p> <p>Only one referenced object can be a policy logical expression consisting of policy names (enclosed in square brackets) and logical operators (AND, OR, NOT). The objects are evaluated in the specified order to determine whether to accept or reject the route.</p> <p>Only the first policy can have the maximum length and the rest can be up to 64 characters.</p> <p>Aggregate routes are not advertised using MP-BGP protocols to the other MP-BGP peers.</p> |
| String Length  | 1 to 255   |
| Max. Instances | 15   |

|                |   |
|----------------|---|
| Min. Instances | 1   |
| Notes          | This element is ordered by the user.        |
| Introduced     | 22.5.R1                                     |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR |

## vrf-target

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>vrf-target</b> context   |
| Context     | <b>configure service vprn string bgp-evpn segment-routing-v6 number vrf-target</b>  |
| Tree        | <b>vrf-target</b>   |
| Description | <p>Commands in this context configure the route target that is added to advertised routes or compared against received routes from other VRFs on the same or remote PE routers (via MP-BGP).</p> <p>BGP-VPN and EVPN-IFL routes imported using a VRF target configuration use the BGP preference value of 170 when imported from remote PE routers, or retain the protocol preference value of the exported route when imported from other VRFs in the same router.</p> <p>Configured VRF import or export policies override the VRF target policy.</p> |
| Introduced  | 22.5.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR   |

## community string

|               |  |
|---------------|--|
| Synopsis      | Extended BGP community   |
| Context       | <b>configure service vprn string bgp-evpn segment-routing-v6 number vrf-target community string</b>                              |
| Tree          | <b>community</b>   |
| Description   | This command configures an extended BGP community in the form type:x:y. Type can only be target and x and y are 16-bit integers. |
| String Length | 10 to 28   |
| Notes         | The following elements are part of a choice: <b>community</b> or ( <b>export-community</b> and <b>import-community</b> ).        |
| Introduced    | 22.5.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

**export-community** *string*

|               |  |
|---------------|--|
| Synopsis      | Communities sent to remote PE neighbors  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp-evpn</a> <a href="#">segment-routing-v6</a> <i>number</i> <a href="#">vrf-target</a> <b>export-community</b> <i>string</i> |
| Tree          | <a href="#">export-community</a>   |
| String Length | 10 to 28   |
| Notes         | The following elements are part of a choice: <b>community</b> or ( <b>export-community</b> and <b>import-community</b> ).  |
| Introduced    | 22.5.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

**import-community** *string*

|               |  |
|---------------|--|
| Synopsis      | Communities accepted from remote PE neighbors  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">bgp-evpn</a> <a href="#">segment-routing-v6</a> <i>number</i> <a href="#">vrf-target</a> <b>import-community</b> <i>string</i> |
| Tree          | <a href="#">import-community</a>   |
| String Length | 10 to 28   |
| Notes         | The following elements are part of a choice: <b>community</b> or ( <b>export-community</b> and <b>import-community</b> ).  |
| Introduced    | 22.5.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR  |

**bgp-ipvpn**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>bgp-ipvpn</b> context   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <b>bgp-ipvpn</b> |
| Tree       | <a href="#">bgp-ipvpn</a>  |
| Introduced | 21.2.R1  |
| Platforms  | All  |

**mpls**

|          |  |
|----------|--|
| Synopsis | Enter the <b>mpls</b> context  |
| Context  | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <b>bgp-ipvpn</b> <b>mpls</b> |
| Tree     | <a href="#">mpls</a>   |

|            |         |
|------------|---------|
| Introduced | 21.2.R1 |
| Platforms  | All     |

### **admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of BGP-IPVPN MPLS  |
| Context    | <b>configure service vpn</b> <i>string</i> <b>bgp-ipvpn mpls admin-state</b> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 21.2.R1   |
| Platforms  | All   |

### **auto-bind-tunnel**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>auto-bind-tunnel</b> context   |
| Context     | <b>configure service vpn</b> <i>string</i> <b>bgp-ipvpn mpls auto-bind-tunnel</b>   |
| Tree        | <a href="#">auto-bind-tunnel</a>  |
| Description | Commands in this context configure the automatic binding parameters of a BGP-IPVPN service using tunnels to MP-BGP peers. |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

### **allow-flex-algo-fallback** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Enable flexible algorithm fallback  |
| Context     | <b>configure service vpn</b> <i>string</i> <b>bgp-ipvpn mpls auto-bind-tunnel allow-flex-algo-fallback</b> <i>boolean</i>   |
| Tree        | <a href="#">allow-flex-algo-fallback</a>  |
| Description | <p>When configured to <b>true</b>, a BGP router with a Flex-Algorithm action configured (via the <b>configure policy-options policy-statement entry action flex-algo</b> command) can resolve to a tunnel with algorithm 0 if no target Flex-Algorithm tunnel is available.</p> <p>When configured to <b>false</b>, the BGP router can resolve only to the intended Flex-Algorithm tunnel, which may cause traffic loss if no corresponding Flex-Algorithm tunnel is available.</p> |
| Default     | false   |
| Introduced  | 21.2.R1   |

Platforms All

### **ecmp** *number*

Synopsis Maximum ECMP routes allowed

Context **configure** [service vprn](#) *string* [bgp-ipvpn](#) [mpls](#) [auto-bind-tunnel](#) **ecmp** *number*

Tree [ecmp](#)

Description This command configures the maximum number of tunnels that can be used as ECMP next hops for the VPRN. This value overrides the ECMP value configured at the **configure service vprn** context level.

Range 1 to 32

Default 1

Introduced 21.2.R1

Platforms All

### **enforce-strict-tunnel-tagging** *boolean*

Synopsis Allow enforcement of strict tunnel tagging

Context **configure** [service vprn](#) *string* [bgp-ipvpn](#) [mpls](#) [auto-bind-tunnel](#) **enforce-strict-tunnel-tagging** *boolean*

Tree [enforce-strict-tunnel-tagging](#)

Description When configured to **true**, the system must only consider LSPs marked with an administrative tag for next-hop resolution.

When configured to **false**, tagged RSVP and SR-TE LSPs are considered first. The system then uses untagged LSPs of other types.

Default false

Introduced 21.2.R1

Platforms All

### **resolution** *keyword*

Synopsis Resolution method for tunnel selection

Context **configure** [service vprn](#) *string* [bgp-ipvpn](#) [mpls](#) [auto-bind-tunnel](#) **resolution** *keyword*

Tree [resolution](#)

Options none, filter, any

Default none

|            |         |
|------------|---------|
| Introduced | 21.2.R1 |
| Platforms  | All     |

## resolution-filter

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>resolution-filter</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp-ipvpn mpls auto-bind-tunnel</a> <a href="#">resolution-filter</a>  |
| Tree        | <a href="#">resolution-filter</a>   |
| Description | Commands in this context configure the subset of tunnel types that can be used in the resolution of BGP-IPVPN routes within the automatic binding of the BGP-IPVPN MPLS service to tunnels to MP-BGP peers. |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

## bgp boolean

|             |   |
|-------------|---|
| Synopsis    | Use BGP tunneling for next-hop resolution   |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp-ipvpn mpls auto-bind-tunnel</a> <a href="#">resolution-filter</a> <a href="#">bgp boolean</a>  |
| Tree        | <a href="#">bgp</a>   |
| Description | When configured to <b>true</b> , BGP searches the BGP LSP for the address of the BGP next hop.<br><br>When configured to <b>false</b> , BGP tunneling is not used and inter-area or inter-as prefixes are not resolved. |
| Default     | true  |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

## gre boolean

|             |  |
|-------------|--|
| Synopsis    | Use GRE tunneling for next-hop resolution  |
| Context     | <b>configure</b> <a href="#">service vprn string</a> <a href="#">bgp-ipvpn mpls auto-bind-tunnel</a> <a href="#">resolution-filter</a> <a href="#">gre boolean</a> |
| Tree        | <a href="#">gre</a>  |
| Description | When configured to <b>true</b> , this command enables setting the tunnel type for the auto bind tunnel.  |

When configured to **false**, this command disables setting the tunnel type for the auto bind tunnel.

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 21.2.R1 |
| Platforms  | All     |

### **ldp boolean**

|             |  |
|-------------|--|
| Synopsis    | Use LDP tunneling for next-hop resolution  |
| Context     | <b>configure service vpn string bgp-ipvpn mpls auto-bind-tunnel resolution-filter ldp boolean</b>  |
| Tree        | <a href="#">ldp</a>  |
| Description | When configured to <b>true</b> , BGP searches for an LDP LSP with a FEC prefix corresponding to the address of the BGP next hop.<br>When configured to <b>false</b> , LDP tunneling is not used for next-hop resolution. |
| Default     | false  |
| Introduced  | 21.2.R1  |
| Platforms   | All  |

### **mpls-fwd-policy boolean**

|             |   |
|-------------|---|
| Synopsis    | Use MPLS forwarding policy for next-hop resolution  |
| Context     | <b>configure service vpn string bgp-ipvpn mpls auto-bind-tunnel resolution-filter mpls-fwd-policy boolean</b>   |
| Tree        | <a href="#">mpls-fwd-policy</a>   |
| Description | When configured to <b>true</b> , BGP uses the MPLS forwarding policy to determine the address of the BGP next hop.<br>When configured to <b>false</b> , the MPLS forwarding policy is not used for next-hop resolution. |
| Default     | false   |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

### **rib-api boolean**

|          |  |
|----------|--|
| Synopsis | Use RIB API gRPC service for next-hop resolution |
|----------|--|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <a href="#">bgp-ipvpn</a> <a href="#">mpls</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter</a> <a href="#">rib-api</a> <i>boolean</i>  |
| Tree        | <a href="#">rib-api</a>   |
| Description | When configured to <b>true</b> , BGP uses tunnels programmed using the RIB API gRPC service to resolve the next hops of routes imported into the EVPN service.<br>When configured to <b>false</b> , the RIB API service tunnels are not used for next-hop resolution. |
| Default     | false   |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

### **rsvp** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use RSVP tunneling for next-hop resolution  |
| Context     | <b>configure service vprn</b> <i>string</i> <a href="#">bgp-ipvpn</a> <a href="#">mpls</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter</a> <a href="#">rsvp</a> <i>boolean</i>   |
| Tree        | <a href="#">rsvp</a>  |
| Description | When configured to <b>true</b> , BGP searches the best metric RSVP LSP to determine the address of the BGP next hop. This address can correspond to the system interface or to another loopback interface used by the BGP instance on the remote node. The LSP metric is provided by MPLS in the tunnel table. In the case of multiple RSVP LSPs with the same lowest metric, BGP selects the LSP with the lowest tunnel ID.<br>When configured to <b>false</b> , the RSVP LSP is not used for next-hop resolution. |
| Default     | false   |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

### **sr-isis** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use IS-IS SR tunneling for next-hop resolution  |
| Context     | <b>configure service vprn</b> <i>string</i> <a href="#">bgp-ipvpn</a> <a href="#">mpls</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter</a> <a href="#">sr-isis</a> <i>boolean</i>  |
| Tree        | <a href="#">sr-isis</a>   |
| Description | When configured to <b>true</b> , BGP uses an IS-IS tunnel type to determine the address of the BGP next hop.<br>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered IS-IS instance.<br>When configured to <b>false</b> , IS-IS tunneling is not used for next-hop resolution. |

|            |         |
|------------|---------|
| Default    | false   |
| Introduced | 21.2.R1 |
| Platforms  | All     |

### **sr-ospf** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use OSPF SR tunneling for next-hop resolution   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp-ipvpn</a> <a href="#">mpls</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter</a> <b>sr-ospf</b> <i>boolean</i>   |
| Tree        | <a href="#">sr-ospf</a>   |
| Description | <p>When configured to <b>true</b>, BGP uses an OSPF tunnel type to determine the address of the BGP next hop.</p> <p>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered OSPF instance.</p> <p>When configured to <b>false</b>, OSPF tunneling is not used for next-hop resolution.</p> |
| Default     | false   |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

### **sr-ospf3** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Use OSPFv3 SR tunneling for next-hop resolution   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">bgp-ipvpn</a> <a href="#">mpls</a> <a href="#">auto-bind-tunnel</a> <a href="#">resolution-filter</a> <b>sr-ospf3</b> <i>boolean</i>  |
| Tree        | <a href="#">sr-ospf3</a>  |
| Description | <p>When configured to <b>true</b>, BGP uses an OSPFv3 tunnel type to determine the address of the BGP next hop.</p> <p>The SR tunnel to the BGP next hop is selected in the TTM from the lowest-numbered OSPFv3 instance.</p> <p>When configured to <b>false</b>, OSPFv3 tunneling is not used for next-hop resolution.</p> |
| Default     | false   |
| Introduced  | 21.2.R1   |
| Platforms   | All   |

### **sr-policy** *boolean*

|          |   |
|----------|---|
| Synopsis | Use SR policies for next-hop resolution |
|----------|---|

|             |   |
|-------------|---|
| Context     | <b>configure service vprn</b> <i>string</i> <b>bgp-ipvpn mpls auto-bind-tunnel resolution-filter sr-policy</b> <i>boolean</i>   |
| Tree        | <b>sr-policy</b>  |

**domain-id** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Domain ID of received BGP route before readvertisement  |
| Context     | <b>configure</b> <i>service vpn</i> <i>string</i> <i>bgp-ipvpn segment-routing-v6 number</i> <b>domain-id</b> <i>string</i>   |
| Tree        | <b>domain-id</b>  |
| Description | <p>This command specifies the domain ID. The domain ID identifies the network from which the BGP route was received before the RTM advertises it to a different neighbor. The domain ID is part of a domain, represented as domain-id:isf_safi_type in the D-PATH attribute, as described in <i>draft-ietf-bess-evpn-ipvpn-interworking</i>. Gateway routers modify the D-PATH attribute. A gateway is a PE where a VPRN is instantiated. The</p> |

VPRN in this case advertises or receives routes from multiple BGP owners (for example, EVPN-IFL and BGP-IPVPN) or multiple instances of the same owner (for example, VPRN with two BGP-IPVPN instances).

Gateways use the D-PATH attribute to detect loops (for received routes where the D-PATH contains a local domain ID) and to make BGP best-path selection decisions based on the D-PATH length (shorter D-PATH is preferred).

In the following example, suppose a gateway receives prefix P in an EVPN-IFL instance with the following D-PATH from neighbor N:

Seg Len=1 / 65000:1:128

If the router imports the route in VPRN-1, BGP-EVPN SRv6 instance with domain 65000:2, it readvertises it to its BGP-IPVPN MPLS instance as follows:

Seg Len=2 / 65000:2:70 / 65000:1:128

That is, the gateway prepends the local domain ID and family to the D-PATH before readvertising the route into a different instance.

Synopsis Policy name

Context **configure service vprn string** [bgp-ipvpn](#) [segment-routing-v6](#) *number* [vrf-export](#) [policy](#) (*policy-expr-string* | *string*)

Tree [policy](#)

Description This command configures VRF route policies that control routes between local VRFs and other VRFs on the same or remote PE routers (using MP-BGP).

Each referenced object is either a policy logical expression or the name of a single policy.

Only one referenced object can be a policy logical expression consisting of policy names (enclosed in square brackets) and logical operators (AND, OR, NOT). The objects are evaluated in the specified order to determine whether to accept or reject the route.

Only the first policy can have the maximum length and the rest can be up to 64 characters.

Aggregate routes are not advertised using MP-BGP protocols to the other MP-BGP peers.

## policy (*policy-expr-string* | *string*)

|          |   |
|----------|---|
| Synopsis | Policy name   |
| Context  | <b>configure service vprn string bgp-ipvpn segment-routing-v6 number vrf-import policy</b><br>( <i>policy-expr-string</i>   <i>string</i> ) |
| Tree     | <a href="#">policy</a>  |

Description This command configures VRF route policies that control routes between local VRFs and other VRFs on the same or remote PE routers (using MP-BGP).

Each referenced object is either a policy logical expression or the name of a single policy.

Only one referenced object can be a policy logical expression consisting of policy names (enclosed in square brackets) and logical operators (AND, OR, NOT). The objects are evaluated in the specified order to determine whether to accept or reject the route.

Only the first policy can have the maximum length and the rest can be up to 64 characters.

Aggregate routes are not advertised using MP-BGP protocols to the other MP-BGP peers.

|                |   |
|----------------|---|
| String Length  | 1 to 255                                    |

|-------------|---|
| Synopsis    | Ignore maximum client lead during takeover from partner   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">failover</a> <a href="#">ignore-mclt-on-takeover</a> <i>boolean</i>              |
| Tree        | <a href="#">ignore-mclt-on-takeover</a>   |
| Description | When configured to <b>true</b> , the remote IP address range can be taken over immediately when the intercommunication link enters the PARTNER-DOWN state, without having to wait for the MCLT to expire. |

When configured to **false**, the DHCP lease time for new clients is restricted to the MCLT during a failure. For existing clients, the lease time is gradually reduced over time to the MCLT by consecutive DHCP renewals.

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### maximum-client-lead-time *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Maximum time that DHCP server can extend client's lease   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv4</b> <i>string</i> <b>failover</b> <b>maximum-client-lead-time</b> <i>number</i>  |
| Tree        | <b>maximum-client-lead-time</b>   |
| Description | This command configures the maximum client lead time (MCLT), which is the maximum time that a DHCP server can extend the client's lease time beyond the lease time currently known by the DHCP partner node. In dual-homed environments, the initial lease time for all DHCP clients is restricted to the MCLT by default. Consecutive DHCP renewals can extend the lease time beyond the MCLT. |
| Range       | 600 to 86399  |
| Units       | seconds   |
| Default     | 600   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### partner-down-delay *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Delay to prevent lease duplication during link failure   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv4</b> <i>string</i> <b>failover</b> <b>partner-down-delay</b> <i>number</i>         |
| Tree        | <b>partner-down-delay</b>  |
| Description | This command configures the interval before a failed intercommunication link transitions from the COMM-INT state to the PARTNER-DOWN state. This delay prevents IP lease |

duplication during link failure by not allowing new IP addresses to be assigned from the remote IP address range. This timer is intended to provide the operator with enough time to remedy the failed situation and avoid duplication of IP addresses and prefixes during the failure.

|            |   |
|------------|---|
| Range      | 0 to 86399  |
| Units      | seconds   |

## additional-scenarios

Synopsis Enter the **additional-scenarios** context

Context **configure service vprn string dhcp-server dhcpv4 string lease-hold additional-scenarios**

Tree [additional-scenarios](#)

Description Commands in this context configure additional types of leases or triggers that cause the system to hold up leases.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## internal-lease-ipsec *boolean*

Synopsis Apply the lease hold timer to local IPsec clients

Context **configure service vprn string dhcp-server dhcpv4 string lease-hold additional-scenarios internal-lease-ipsec boolean**

Tree [internal-lease-ipsec](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## solicited-release *boolean*

Synopsis Apply lease hold timer for solicited releases

Context **configure service vprn string dhcp-server dhcpv4 string lease-hold additional-scenarios solicited-release boolean**

Tree [solicited-release](#)

|             |   |
|-------------|---|
| Description | This command enables the server to hold up a lease even for a solicited release, for example, when the server receives a normal DHCP release message. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**time number**

|            |   |
|------------|---|
| Synopsis   | Lease hold time   |
| Context    | <b>configure service vprn string dhcp-server dhcpv4 string lease-hold time number</b> |
| Tree       | <b>time</b>   |
| Range      | 1 to 631152000  |
| Units      | seconds   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                               |

**pool [pool-name] string**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>pool</b> list instance  |
| Context    | <b>configure service vprn string dhcp-server dhcpv4 string pool string</b> |
| Tree       | <b>pool</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                    |

**[pool-name] string**

|               |  |
|---------------|--|
| Synopsis      | DHCP server pool name  |
| Context       | <b>configure service vprn string dhcp-server dhcpv4 string pool string</b> |
| Tree          | <b>pool</b>  |
| String Length | 1 to 32  |
| Notes         | This element is part of a list key.  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                    |

**description** *string*

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**failover**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>failover</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover</a> |
| Tree       | <a href="#">failover</a>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**admin-state** *keyword*

|            |   |
|------------|---|
| Synopsis   | Administrative state of the failover mechanism  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover</a> <a href="#">admin-state</a> <i>keyword</i> |
| Tree       | <a href="#">admin-state</a>   |
| Options    | enable, disable   |
| Default    | disable   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**ignore-mclt-on-takeover** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Ignore maximum client lead during takeover from partner   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover</a> <a href="#">ignore-mclt-on-takeover</a> <i>boolean</i> |
| Tree        | <a href="#">ignore-mclt-on-takeover</a>   |
| Description | When configured to <b>true</b> , the remote IP address range can be taken over immediately when the intercommunication link enters the PARTNER-DOWN state, without having to wait for the MCLT to expire.                       |

When configured to **false**, the DHCP lease time for new clients is restricted to the MCLT during a failure. For existing clients, the lease time is gradually reduced over time to the MCLT by consecutive DHCP renewals.

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### maximum-client-lead-time *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Maximum time that DHCP server can extend client's lease   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>failover</b> <b>maximum-client-lead-time</b> <i>number</i>  |
| Tree        | <b>maximum-client-lead-time</b>   |
| Description | This command configures the maximum client lead time (MCLT), which is the maximum time that a DHCP server can extend the client's lease time beyond the lease time currently known by the DHCP partner node. In dual-homed environments, the initial lease time for all DHCP clients is restricted to the MCLT by default. Consecutive DHCP renewals can extend the lease time beyond the MCLT. |
| Range       | 600 to 86399  |
| Units       | seconds   |
| Default     | 600   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### partner-down-delay *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |  |
|-------------|--|
| Synopsis    | Delay to prevent lease duplication during link failure   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>failover</b> <b>partner-down-delay</b> <i>number</i> |
| Tree        | <b>partner-down-delay</b>  |
| Description | This command configures the interval before a failed intercommunication link transitions from the COMM-INT state to the PARTNER-DOWN state. This delay prevents IP lease                   |

duplication during link failure by not allowing new IP addresses to be assigned from the remote IP address range. This timer is intended to provide the operator with enough time to remedy the failed situation and avoid duplication of IP addresses and prefixes during the failure.

|            |   |
|------------|---|
| Range      | 0 to 86399  |
| Units      | seconds   |
| Default    | 86399   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **peer** [[address](#)] *reference*

|                |  |
|----------------|--|
| Synopsis       | Enter the <b>peer</b> list instance  |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover peer</a> <i>reference</i> |
| Tree           | <a href="#">peer</a>   |
| Max. Instances | 1  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **[address]** *reference*

|            |  |
|------------|--|
| Synopsis   | IP address of the failover peer  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover peer</a> <i>reference</i> |
| Tree       | <a href="#">peer</a>   |
| Reference  | <b>configure</b> <a href="#">redundancy multi-chassis peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )   |
| Notes      | This element is part of a list key.  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**sync-tag** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Tag that identifies synchronizing server or pool pairs   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover peer reference</a> <a href="#">sync-tag</a> <i>string</i> |
| Tree          | <a href="#">sync-tag</a>   |
| String Length | 1 to 32  |
| Notes         | This element is mandatory.   |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**startup-wait-time** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Time between initialization and assuming active role  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">failover</a> <a href="#">startup-wait-time</a> <i>number</i>  |
| Tree        | <a href="#">startup-wait-time</a>   |
| Description | This command configures a delay that avoids transient issues during the initialization process. During startup wait time, each failover peer waits after the initialization process before assuming the active role for the prefix designated as local or remote. |
| Range       | 60 to 3600  |
| Units       | seconds   |
| Default     | 120   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**max-lease-time** *number*

|          |  |
|----------|--|
| Synopsis | Maximum lease time   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">max-lease-time</a> <i>number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">max-lease-time</a>                          |
| Range      | 10 to 315446399   |
| Units      | seconds   |
| Default    | 864000  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **min-lease-time** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum lease time   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">min-lease-time</a> <i>number</i> |
| Tree       | <a href="#">min-lease-time</a>   |
| Range      | 10 to 315446399  |
| Units      | seconds  |
| Default    | 600  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **minimum-free**

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>minimum-free</b> context  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">minimum-free</a> |
| Tree        | <a href="#">minimum-free</a>   |
| Description | Commands in this context specify the minimum number of free addresses in this pool.  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **absolute** *number*

|          |   |
|----------|---|
| Synopsis | Minimum number of free addresses in this pool or subnet   |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">minimum-free</a> <a href="#">absolute</a> <i>number</i> |
| Tree     | <a href="#">absolute</a>  |
| Range    | 0 to 255  |

|            |  |
|------------|--|
| Default    | 1  |
| Notes      | The following elements are part of a choice: <b>absolute</b> or <b>percent</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                          |

### **event-when-depleted** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Generate notification when addresses are depleted  |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">minimum-free event-when-depleted</a> <i>boolean</i>  |
| Tree        | <a href="#">event-when-depleted</a>  |
| Description | When configured to <b>true</b> , a system-generated event is generated when all available addresses in the pool or subnet of a local DHCP server are depleted.<br>When configured to <b>false</b> , no action is taken when all available addresses in the pool or subnet of a local DHCP server are depleted. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **percent** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum free addresses as a percentage   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">minimum-free percent</a> <i>number</i> |
| Tree       | <a href="#">percent</a>  |
| Range      | 0 to 100   |
| Default    | 1  |
| Notes      | The following elements are part of a choice: <b>absolute</b> or <b>percent</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **nak-non-matching-subnet** *boolean*

|          |  |
|----------|--|
| Synopsis | Send NAK if no match for request address pool range  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">nak-non-matching-subnet</a> <i>boolean</i> |

|             |   |
|-------------|---|
| Tree        | <a href="#">nak-non-matching-subnet</a>   |
| Description | When configured to <b>true</b> , a NAK response when the local DHCPv4 server receives a DHCP request with option 50 (the client is trying to request a previously allocated message). If the address-allocation algorithm uses a pool that does not contain the requested address, the system returns the DHCP NAK.<br><br>When configured to <b>false</b> or unconfigured, the system drops the DHCP packet. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **offer-time** *number*

|            |  |
|------------|--|
| Synopsis   | Time interval during which a DHCP offer remains valid  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">offer-time</a> <i>number</i> |
| Tree       | <a href="#">offer-time</a>   |
| Range      | 10 to 600  |
| Units      | seconds  |
| Default    | 60   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **options**

|            |   |
|------------|---|
| Synopsis   | Enter the <b>options</b> context  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">options</a> |
| Tree       | <a href="#">options</a>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **option** [[number](#)] (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | Enter the <b>option</b> list instance   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">options</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <a href="#">option</a>  |
| Introduced | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[number]** (*number* | *keyword*)

Synopsis DHCP option to send identification strings to client

Context **configure** [service](#) [vprn](#) *string* [dhcp-server](#) [dhcpv4](#) *string* [pool](#) *string* [options](#) [option](#) (*number* | *keyword*)

Tree [option](#)

Range 1 to 254

Options subnet-mask, default-router, dns-server, domain-name, netbios-name-server, netbios-node-type, lease-time, lease-renew-time, lease-rebind-time

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **ascii-string** *string*

Synopsis DHCP option specified as an ASCII string

Context **configure** [service](#) [vprn](#) *string* [dhcp-server](#) [dhcpv4](#) *string* [pool](#) *string* [options](#) [option](#) (*number* | *keyword*) [ascii-string](#) *string*

Tree [ascii-string](#)

String Length 1 to 127

Notes The following elements are part of a mandatory choice: **ascii-string**, **duration**, **empty**, **hex-string**, **ipv4-address**, or **netbios-node-type**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **duration** *number*

Synopsis DHCP option as time duration

Context **configure** [service](#) [vprn](#) *string* [dhcp-server](#) [dhcpv4](#) *string* [pool](#) *string* [options](#) [option](#) (*number* | *keyword*) [duration](#) *number*

Tree [duration](#)

Range 10 to 315446399

Units seconds

Notes The following elements are part of a mandatory choice: **ascii-string**, **duration**, **empty**, **hex-string**, **ipv4-address**, or **netbios-node-type**.

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

## empty

|            |   |
|------------|---|
| Synopsis   | Empty DHCP option.  |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <a href="#">string</a> <a href="#">dhcp-server</a> <a href="#">dhcpv4</a> <a href="#">string</a> <a href="#">pool</a> <a href="#">string</a> <a href="#">options</a> <a href="#">option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <b>empty</b> |
| Tree       | <a href="#">empty</a>   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .   |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## hex-string *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP option specified as hexadecimal string   |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <a href="#">string</a> <a href="#">dhcp-server</a> <a href="#">dhcpv4</a> <a href="#">string</a> <a href="#">pool</a> <a href="#">string</a> <a href="#">options</a> <a href="#">option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <b>hex-string</b> <a href="#">string</a> |
| Tree          | <a href="#">hex-string</a>  |
| String Length | 1 to 256  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## ipv4-address *string*

|                |   |
|----------------|---|
| Synopsis       | DHCP option as a list of IPv4 addresses   |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <a href="#">string</a> <a href="#">dhcp-server</a> <a href="#">dhcpv4</a> <a href="#">string</a> <a href="#">pool</a> <a href="#">string</a> <a href="#">options</a> <a href="#">option</a> ( <a href="#">number</a>   <a href="#">keyword</a> ) <b>ipv4-address</b> <a href="#">string</a> |
| Tree           | <a href="#">ipv4-address</a>  |
| Max. Instances | 4   |
| Notes          | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .<br>This element is ordered by the user.   |

Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **netbios-node-type** *keyword*

Synopsis DHCP option as NetBIOS node type  
 Context **configure** [service](#) [vprn](#) *string* [dhcp-server](#) [dhcpv4](#) *string* [pool](#) *string* [options](#) [option](#) (*number* | *keyword*) **netbios-node-type** *keyword*  
 Tree [netbios-node-type](#)  
 Options b-node, p-node, m-node, h-node  
 Notes The following elements are part of a mandatory choice: **ascii-string**, **duration**, **empty**, **hex-string**, **ipv4-address**, or **netbios-node-type**.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **subnet** [[ipv4-prefix](#)] *string*

Synopsis Enter the **subnet** list instance  
 Context **configure** [service](#) [vprn](#) *string* [dhcp-server](#) [dhcpv4](#) *string* [pool](#) *string* **subnet** *string*  
 Tree [subnet](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### [[ipv4-prefix](#)] *string*

Synopsis IPv4 prefix for the subnet  
 Context **configure** [service](#) [vprn](#) *string* [dhcp-server](#) [dhcpv4](#) *string* [pool](#) *string* **subnet** *string*  
 Tree [subnet](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **address-range** [[start](#)] *string* [end](#) *string*

Synopsis Enter the **address-range** list instance

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>dhcp-server dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>subnet</b> <i>string</i> <b>address-range</b> <i>string</i> <b>end</b> <i>string</i> |
| Tree       | <b>address-range</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[start]** *string*

|             |   |
|-------------|---|
| Synopsis    | Lower bound of the IP address range   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>dhcp-server dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>subnet</b> <i>string</i> <b>address-range</b> <i>string</i> <b>end</b> <i>string</i> |
| Tree        | <b>address-range</b>  |
| Description | This command specifies the start of a range of IP addresses that are excluded from the pool of IP addresses in this subnet.   |
| Notes       | This element is part of a list key.   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**end** *string*

|             |   |
|-------------|---|
| Synopsis    | Upper bound of the IP address range   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>dhcp-server dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>subnet</b> <i>string</i> <b>address-range</b> <i>string</i> <b>end</b> <i>string</i> |
| Tree        | <b>address-range</b>  |
| Description | This command specifies the end of a range of IP addresses that are excluded from the pool of IP addresses in this subnet.   |
| Notes       | This element is part of a list key.   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**failover-control-type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|          |                                      |
|----------|--------------------------------------|
| Synopsis | Failover control type for this range |
|----------|--------------------------------------|

|            |   |
|------------|---|
| Context    | <b>configure service vprn</b> <i>string</i> <b>dhcp-server dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>subnet</b> <i>string</i> <b>address-range</b> <i>string</i> <b>end</b> <i>string</i> <b>failover-control-type</b> <i>keyword</i> |
| Tree       | <b>failover-control-type</b>  |
| Options    | local, remote, access-driven  |
| Default    | local   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**drain** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Prevent new lease assignment from this subnet   |
| Context     | <b>configure service vprn</b> <i>string</i> <b>dhcp-server dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>subnet</b> <i>string</i> <b>drain</b> <i>boolean</i>   |
| Tree        | <b>drain</b>  |
| Description | When configured to <b>true</b> , new leases cannot be assigned and existing leases are kept up until they are released.<br>When configured to <b>false</b> , the subnet is active and new leases can be assigned. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**exclude-addresses** [*start*] *string* **end** *string*

|            |   |
|------------|---|
| Synopsis   | Add a list entry for <b>exclude-addresses</b>   |
| Context    | <b>configure service vprn</b> <i>string</i> <b>dhcp-server dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>subnet</b> <i>string</i> <b>exclude-addresses</b> <i>string</i> <b>end</b> <i>string</i> |
| Tree       | <b>exclude-addresses</b>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**[start]** *string*

|          |   |
|----------|---|
| Synopsis | Lower bound of the IP address range   |
| Context  | <b>configure service vprn</b> <i>string</i> <b>dhcp-server dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>subnet</b> <i>string</i> <b>exclude-addresses</b> <i>string</i> <b>end</b> <i>string</i> |
| Tree     | <b>exclude-addresses</b>  |

|             |   |
|-------------|---|
| Description | This command specifies the start of a range of IP addresses that are excluded from the pool of IP addresses in this subnet. |
| Notes       | This element is part of a list key.   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **end string**

|             |  |
|-------------|--|
| Synopsis    | Upper bound of the IP address range  |
| Context     | <b>configure service vprn string dhcp-server dhcpv4 string pool string subnet string exclude-addresses string end string</b> |
| Tree        | <a href="#">exclude-addresses</a>  |
| Description | This command specifies the end of a range of IP addresses that are excluded from the pool of IP addresses in this subnet.    |
| Notes       | This element is part of a list key.  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **maximum-declined number**

|            |  |
|------------|--|
| Synopsis   | Maximum number of declined addresses allowed   |
| Context    | <b>configure service vprn string dhcp-server dhcpv4 string pool string subnet string maximum-declined number</b> |
| Tree       | <a href="#">maximum-declined</a>   |
| Max. Range | 0 to 4294967295  |
| Default    | 64   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **minimum-free**

|             |   |
|-------------|---|
| Synopsis    | Enter the <b>minimum-free</b> context   |
| Context     | <b>configure service vprn string dhcp-server dhcpv4 string pool string subnet string minimum-free</b> |
| Tree        | <a href="#">minimum-free</a>  |
| Description | Commands in this context specify the minimum number of free addresses in this pool.                   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

**absolute** *number*

|            |  |
|------------|--|
| Synopsis   | Minimum number of free addresses in this pool or subnet  |
| Context    | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>subnet</b> <i>string</i> <b>minimum-free</b> <b>absolute</b> <i>number</i> |
| Tree       | <b>absolute</b>  |
| Range      | 0 to 255   |
| Default    | 1  |
| Notes      | The following elements are part of a choice: <b>absolute</b> or <b>percent</b> .   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**event-when-depleted** *boolean*

|             |  |
|-------------|--|
| Synopsis    | Generate notification when addresses are depleted  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>subnet</b> <i>string</i> <b>minimum-free</b> <b>event-when-depleted</b> <i>boolean</i>   |
| Tree        | <b>event-when-depleted</b>   |
| Description | When configured to <b>true</b> , a system-generated event is generated when all available addresses in the pool or subnet of a local DHCP server are depleted.<br><br>When configured to <b>false</b> , no action is taken when all available addresses in the pool or subnet of a local DHCP server are depleted. |
| Default     | false  |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**percent** *number*

|          |   |
|----------|---|
| Synopsis | Minimum free addresses as a percentage  |
| Context  | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv4</b> <i>string</i> <b>pool</b> <i>string</i> <b>subnet</b> <i>string</i> <b>minimum-free</b> <b>percent</b> <i>number</i> |
| Tree     | <b>percent</b>  |
| Range    | 0 to 100  |

|            |  |
|------------|--|
| Default    | 1  |
| Notes      | The following elements are part of a choice: <b>absolute</b> or <b>percent</b> . |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                          |

## options

|            |  |
|------------|--|
| Synopsis   | Enter the <b>options</b> context   |
| Context    | <b>configure service vprn string dhcp-server dhcpv4 string pool string subnet string options</b> |
| Tree       | <b>options</b>   |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## option [number] (*number* | *keyword*)

|            |  |
|------------|--|
| Synopsis   | Enter the <b>option</b> list instance  |
| Context    | <b>configure service vprn string dhcp-server dhcpv4 string pool string subnet string options option</b> ( <i>number</i>   <i>keyword</i> ) |
| Tree       | <b>option</b>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## [number] (*number* | *keyword*)

|            |   |
|------------|---|
| Synopsis   | DHCP option to send identification strings to client  |
| Context    | <b>configure service vprn string dhcp-server dhcpv4 string pool string subnet string options option</b> ( <i>number</i>   <i>keyword</i> )    |
| Tree       | <b>option</b>   |
| Range      | 1 to 254  |
| Options    | subnet-mask, default-router, dns-server, domain-name, netbios-name-server, netbios-node-type, lease-time, lease-renew-time, lease-rebind-time |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ascii-string** *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP option specified as an ASCII string  |
| Context       | <b>configure service vprn string dhcp-server dhcpv4 string pool string subnet string options option (number   keyword) ascii-string string</b>  |
| Tree          | <b>ascii-string</b>   |
| String Length | 1 to 127  |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **duration** *number*

|            |   |
|------------|---|
| Synopsis   | DHCP option as time duration  |
| Context    | <b>configure service vprn string dhcp-server dhcpv4 string pool string subnet string options option (number   keyword) duration number</b>  |
| Tree       | <b>duration</b>   |
| Range      | 10 to 315446399   |
| Units      | seconds   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **empty**

|            |   |
|------------|---|
| Synopsis   | Empty DHCP option   |
| Context    | <b>configure service vprn string dhcp-server dhcpv4 string pool string subnet string options option (number   keyword) empty</b>  |
| Tree       | <b>empty</b>  |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> . |
| Introduced | 16.0.R4   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**hex-string** *string*

|               |  |
|---------------|--|
| Synopsis      | DHCP option specified as hexadecimal string  |
| Context       | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">dhcp-server</a> <a href="#">dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">subnet</a> <i>string</i> <a href="#">options</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> ) <b>hex-string</b> <i>string</i> |
| Tree          | <a href="#">hex-string</a>   |
| String Length | 1 to 256   |
| Notes         | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .  |
| Introduced    | 16.0.R1  |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**ipv4-address** *string*

|                |  |
|----------------|--|
| Synopsis       | DHCP option as a list of IPv4 addresses  |
| Context        | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">dhcp-server</a> <a href="#">dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">subnet</a> <i>string</i> <a href="#">options</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> ) <b>ipv4-address</b> <i>string</i> |
| Tree           | <a href="#">ipv4-address</a>   |
| Max. Instances | 4  |
| Notes          | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .<br>This element is ordered by the user.  |
| Introduced     | 16.0.R1  |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**netbios-node-type** *keyword*

|            |  |
|------------|--|
| Synopsis   | DHCP option as NetBIOS node type   |
| Context    | <b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">dhcp-server</a> <a href="#">dhcpv4</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">subnet</a> <i>string</i> <a href="#">options</a> <a href="#">option</a> ( <i>number</i>   <i>keyword</i> ) <b>netbios-node-type</b> <i>keyword</i> |

| Options    | b-node, p-node, m-node, h-node   |
| Notes      | The following elements are part of a mandatory choice: <b>ascii-string</b> , <b>duration</b> , <b>empty</b> , <b>hex-string</b> , <b>ipv4-address</b> , or <b>netbios-node-type</b> .  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## pool-selection

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pool-selection</b> context                                       |
| Context    | <b>configure service vprn string dhcp-server dhcpv4 string pool-selection</b> |
| Tree       | <a href="#">pool-selection</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                       |

## use-gi-address

|             |  |
|-------------|--|
| Synopsis    | Enable the <b>use-gi-address</b> context   |
| Context     | <b>configure service vprn string dhcp-server dhcpv4 string pool-selection use-gi-address</b>   |
| Tree        | <a href="#">use-gi-address</a>   |
| Description | <p>Commands in this context configure gateway interface (GI) address matching. When configured, the pool can be used for address matching even if a subnet is not found. If the local user database name is not used, addresses are provided only by GI. If a user must be blocked from getting an address, the server maps to a local user database and configures the user with no address.</p> <p>A pool can include multiple subnets. Since the GI is shared by multiple subnets in a subscriber interface, the pool can provide IP addresses from any of the subnets included when the GI is matched to one of its subnets. This allows a pool to be created that represents a sub-net.</p> |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

## scope *keyword*

|            |  |
|------------|--|
| Synopsis   | GI address-matching scope  |
| Context    | <b>configure service vprn string dhcp-server dhcpv4 string pool-selection use-gi-address scope keyword</b> |
| Tree       | <a href="#">scope</a>  |
| Options    | subnet, pool   |
| Default    | subnet   |
| Introduced | 16.0.R4  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**use-pool-from-client**

|            |  |
|------------|--|
| Synopsis   | Enable the <b>use-pool-from-client</b> context   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv4</a> <i>string</i> <a href="#">pool-selection use-pool-from-client</a> |

**preferred-lifetime** *number*

|             |  |
|-------------|--|
| Synopsis    | Time this lease remains preferred  |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv6</b> <i>string</i> <b>defaults</b> <b>preferred-lifetime</b> <i>number</i>   |
| Tree        | <a href="#">preferred-lifetime</a>   |
| Description | This command configures the preferred lifetime of the IPv6 lease address or prefix. When the preferred lifetime expires, any derived addresses are deprecated. The preferred lifetime must be less than or equal to the valid lifetime.<br><br>Each address or prefix assigned to the client has associated preferred and valid lifetimes specified by the address assignment authority (such as the DHCP server, RADIUS, or ESM). To request an extension of the lifetimes assigned to an address, the client sends a renew message to the addressing authority. The authority sends a reply message to the client with the new lifetimes, allowing the client to continue to use the address/prefix without interruption. The lifetimes are transmitted from the addressing authority to the client in the identity association (IA) option at the top level of the message (not the address or prefix level). |
| Range       | 300 to 315446399   |
| Units       | seconds  |
| Default     | 3600   |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**rebind-time** *number*

|          |                           |
|----------|---------------------------|
| Synopsis | Rebind time for the lease |
|----------|---------------------------|

|             |  |
|-------------|--|
| Context     | <b>configure service vprn string dhcp-server dhcpv6 string defaults rebind-time number</b>   |
| Tree        | <b>rebind-time</b>   |
| Description | <p>This command configures the rebind time, known as T2, at which the client contacts the addressing authority to extend the lifetimes of its leases.</p> <p>The IP addressing authority (such as the DHCP server, RADIUS, or ESM) controls the time for extending lifetimes on assigned addresses/prefixes through the T1 and T2 parameters assigned to an identity association (IA). At renew time, T1, the client initiates a renew or reply message exchange to extend the lifetimes of any addresses in the IA. The client includes an IA option with all addresses or prefixes currently assigned to the IA in its renew message.</p> <p>Recommended values for T1 and T2 are 0.5 and 0.8 times the shortest preferred lifetime of the addresses or prefixes in the IA that the addressing authority is willing to extend, respectively. The configured rebind timer value should always be less than or equal to the rebind timer. The T1 and T2 values are carried in the IPV6 address option in the IA.</p> |
| Range       | 0 to 1209600   |
| Units       | seconds  |
| Default     | 2880   |
| Introduced  | 16.0.R4  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **renew-time number**

|             |   |
|-------------|---|
| Synopsis    | Renew time for the lease  |
| Context     | <b>configure service vprn string dhcp-server dhcpv6 string defaults renew-time number</b>   |
| Tree        | <b>renew-time</b>   |
| Description | <p>This command configures the renew time, known as T1, at which the client makes a transition to the lease-renewal state.</p> <p>The IP addressing authority (such as the DHCP server, RADIUS, or ESM) controls the time for extending lifetimes on assigned addresses/prefixes through the T1 and T2 parameters assigned to an identity association (IA). At renew time, T1, the client initiates a renew/reply message exchange to extend the lifetimes of any addresses in the IA. The client includes an IA option with all addresses/prefixes currently assigned to the IA in its renew message.</p> <p>Recommended values for T1 and T2 are 0.5 and 0.8 times the shortest preferred lifetime of the addresses or prefixes in the IA that the addressing authority is willing to extend, respectively. The configured renew timer value should always be shorter than or equal to the rebind timer. The T1 and T2 values are carried in the IPV6 address option in the IA.</p> |
| Range       | 0 to 604800   |
| Units       | seconds   |

|            |   |
|------------|---|
| Default    | 1800  |

|             |  |
|-------------|--|
| Synopsis    | Delay to prevent lease duplication during link failure   |
| Context     | <b>configure</b> <b>service</b> <b>vprn</b> <i>string</i> <b>dhcp-server</b> <b>dhcpv6</b> <i>string</i> <b>failover</b> <b>partner-down-delay</b> <i>number</i>   |
| Tree        | <b>partner-down-delay</b>  |
| Description | This command configures the interval before a failed intercommunication link transitions from the COMM-INT state to the PARTNER-DOWN state. This delay prevents IP lease duplication during link failure by not allowing new IP addresses to be assigned from the remote IP address range. This timer is intended to provide the operator with enough time to remedy the failed situation and avoid duplication of IP addresses and prefixes during the failure. |
| Range       | 0 to 86399   |
| Units       | seconds  |
| Default     | 86399  |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **peer** [[address](#)] *reference*

|                |   |
|----------------|---|
| Synopsis       | Enter the <b>peer</b> list instance   |
| Context        | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">failover peer</a> <i>reference</i> |
| Tree           | <a href="#">peer</a>  |
| Max. Instances | 1   |
| Introduced     | 16.0.R1   |
| Platforms      | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **[address]** *reference*

|            |   |
|------------|---|
| Synopsis   | IP address of the failover peer   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">failover peer</a> <i>reference</i> |
| Tree       | <a href="#">peer</a>  |
| Reference  | <b>configure</b> <a href="#">redundancy multi-chassis peer</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )                                |
| Notes      | This element is part of a list key.   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **sync-tag** *string*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

|               |  |
|---------------|--|
| Synopsis      | Tag that identifies synchronizing server or pool pairs   |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">failover peer</a> <i>reference</i> <a href="#">sync-tag</a> <i>string</i> |
| Tree          | <a href="#">sync-tag</a>   |
| String Length | 1 to 32  |
| Notes         | This element is mandatory.   |

|            |   |
|------------|---|
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **startup-wait-time** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Time between initialization and assuming active role  |
| Context     | <b>configure</b> <a href="#">service vprn string dhcp-server dhcpv6 string failover startup-wait-time number</a>  |
| Tree        | <a href="#">startup-wait-time</a>   |
| Description | This command configures a delay that avoids transient issues during the initialization process. During startup wait time, each failover peer waits after the initialization process before assuming the active role for the prefix designated as local or remote. |
| Range       | 60 to 3600  |
| Units       | seconds   |
| Default     | 120   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **ignore-rapid-commit** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Ignore Rapid Commit option  |
| Context     | <b>configure</b> <a href="#">service vprn string dhcp-server dhcpv6 string ignore-rapid-commit boolean</a>                            |
| Tree        | <a href="#">ignore-rapid-commit</a>   |
| Description | When configured to <b>true</b> , the server ignores the Rapid Commit option sent by the client and uses the regular message exchange. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## interface-id-mapping *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

|             |   |
|-------------|---|
| Synopsis    | Map hosts within interface-to-prefix combinations   |
| Context     | <b>configure service vpn</b> <i>string dhcp-server dhcpv6 string interface-id-mapping boolean</i>   |
| Tree        | <a href="#">interface-id-mapping</a>  |
| Description | When configured to <b>true</b> , this command specifies an interface-mapping method that uses a combination of unique /64 prefixes and interface IDs. A /64 prefix is allocated to each interface ID, and all clients with the same interface ID are assigned an address from the prefix. This method is used for bridging clients in the same local loop and SAP, so that sharing the prefix allows communication to stay local. For SLAAC-based assignment, downstream neighbor discovery is automatically enabled to resolve the assigned address. |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

## lease-hold

|            |   |
|------------|---|
| Synopsis   | Enter the <b>lease-hold</b> context   |
| Context    | <b>configure service vpn</b> <i>string dhcp-server dhcpv6 string lease-hold</i> |
| Tree       | <a href="#">lease-hold</a>  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                         |

## additional-scenarios

|             |  |
|-------------|--|
| Synopsis    | Enter the <b>additional-scenarios</b> context  |
| Context     | <b>configure service vpn</b> <i>string dhcp-server dhcpv6 string lease-hold additional-scenarios</i>               |
| Tree        | <a href="#">additional-scenarios</a>   |
| Description | Commands in this context configure additional types of leases or triggers that cause the system to hold up leases. |
| Introduced  | 16.0.R1  |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**internal-lease-ipsec** *boolean*

|            |  |
|------------|--|
| Synopsis   | Apply the lease hold timer to local IPsec clients  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">lease-hold additional-scenarios internal-lease-ipsec</a> <i>boolean</i> |
| Tree       | <a href="#">internal-lease-ipsec</a>   |
| Default    | false  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**solicited-release** *boolean*

|             |   |
|-------------|---|
| Synopsis    | Apply lease hold timer for solicited releases   |
| Context     | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">lease-hold additional-scenarios solicited-release</a> <i>boolean</i> |
| Tree        | <a href="#">solicited-release</a>   |
| Description | This command enables the server to hold up a lease even for a solicited release, for example, when the server receives a normal DHCP release message.   |
| Default     | false   |
| Introduced  | 16.0.R1   |
| Platforms   | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

**time** *number*

|            |  |
|------------|--|
| Synopsis   | Lease hold time  |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">lease-hold time</a> <i>number</i> |
| Tree       | <a href="#">time</a>   |
| Range      | 1 to 631152000   |
| Units      | seconds  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

**lease-query** *boolean*

|          |   |
|----------|---|
| Synopsis | Handle and reply to lease query messages  |
| Context  | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">lease-query</a> <i>boolean</i> |
| Tree     | <a href="#">lease-query</a>   |

|            |   |
|------------|---|
| Default    | false   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **pool** [*pool-name*] *string*

|            |   |
|------------|---|
| Synopsis   | Enter the <b>pool</b> list instance   |
| Context    | <b>configure</b> <i>service vprn string dhcp-server dhcpv6 string pool string</i> |
| Tree       | <i>pool</i>   |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                           |

### **[pool-name]** *string*

|               |   |
|---------------|---|
| Synopsis      | DHCP server pool name   |
| Context       | <b>configure</b> <i>service vprn string dhcp-server dhcpv6 string pool string</i> |
| Tree          | <i>pool</i>   |
| String Length | 1 to 32   |
| Notes         | This element is part of a list key.   |
| Introduced    | 16.0.R1   |
| Platforms     | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR                           |

### **delegated-prefix**

|            |  |
|------------|--|
| Synopsis   | Enter the <b>delegated-prefix</b> context  |
| Context    | <b>configure</b> <i>service vprn string dhcp-server dhcpv6 string pool string delegated-prefix</i> |
| Tree       | <i>delegated-prefix</i>  |
| Introduced | 16.0.R1  |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR  |

### **length** *number*

|          |  |
|----------|--|
| Synopsis | Prefix length for pool if unspecified by client  |
| Context  | <b>configure</b> <i>service vprn string dhcp-server dhcpv6 string pool string delegated-prefix length number</i> |

|            |   |
|------------|---|
| Tree       | <a href="#">length</a>                                  |
| Range      | 48 to 127   |
| Default    | 64  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR |

### **maximum number**

|            |   |
|------------|---|
| Synopsis   | Maximum delegated prefix length for this pool   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">delegated-prefix</a> <a href="#">maximum number</a> |
| Tree       | <a href="#">maximum</a>   |
| Range      | 48 to 127   |
| Default    | 64  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **minimum number**

|            |   |
|------------|---|
| Synopsis   | Minimum delegated prefix length for this pool   |
| Context    | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">delegated-prefix</a> <a href="#">minimum number</a> |
| Tree       | <a href="#">minimum</a>   |
| Range      | 48 to 127   |
| Default    | 48  |
| Introduced | 16.0.R1   |
| Platforms  | 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR   |

### **description string**

|               |   |
|---------------|---|
| Synopsis      | Text description  |
| Context       | <b>configure</b> <a href="#">service vprn</a> <i>string</i> <a href="#">dhcp-server dhcpv6</a> <i>string</i> <a href="#">pool</a> <i>string</i> <a href="#">description</a> <i>string</i> |
| Tree          | <a href="#">description</a>   |
| String Length | 1 to 80   |
| Introduced    | 16.0.R1   |

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **exclude-prefix** [[ipv6-prefix](#)] *string*

Synopsis Add a list entry for **exclude-prefix**

Context **configure** [service vprn](#) *string* [dhcp-server dhcpv6](#) *string* [pool](#) *string* **exclude-prefix** *string*

Tree [exclude-prefix](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[ipv6-prefix]** *string*

Synopsis IPv6 prefix to be excluded from available pool prefixes

Context **configure** [service vprn](#) *string* [dhcp-server dhcpv6](#) *string* [pool](#) *string* **exclude-prefix** *string*

Tree [exclude-prefix](#)

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **failover**

Synopsis Enter the **failover** context

Context **configure** [service vprn](#) *string* [dhcp-server dhcpv6](#) *string* [pool](#) *string* **failover**

Tree [failover](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis Administrative state of the failover mechanism
