Introduced	20.10.R1
Platforms	VSR

## src-ip

Synopsis	Enter the <b>src-ip</b> context
----------	---------------------------------

Context	<b>configure filter ipv6-exception</b> <i>string</i> <b>entry</b> <i>number</i> <b>match src-ip</b>
Tree	<a href="#">src-ip</a>
Introduced	20.10.R1
Platforms	VSR

### **address** (*ipv6-prefix-with-host-bits* | *ipv6-address*)

Synopsis	IPv6 address used as the match criterion
Context	<b>configure filter ipv6-exception</b> <i>string</i> <b>entry</b> <i>number</i> <b>match src-ip</b> <b>address</b> ( <i>ipv6-prefix-with-host-bits</i>   <i>ipv6-address</i> )
Tree	<a href="#">address</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	20.10.R1
Platforms	VSR

### **ipv6-prefix-list** *reference*

Synopsis	IPv6 address prefix list used as match criterion
Context	<b>configure filter ipv6-exception</b> <i>string</i> <b>entry</b> <i>number</i> <b>match src-ip</b> <b>ipv6-prefix-list</b> <i>reference</i>
Tree	<a href="#">ipv6-prefix-list</a>
Reference	<b>configure filter match-list</b> <b>ipv6-prefix-list</b> <i>string</i>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	20.10.R1
Platforms	VSR

### **mask** *string*

Synopsis	IPv6 address mask used as the match criterion
Context	<b>configure filter ipv6-exception</b> <i>string</i> <b>entry</b> <i>number</i> <b>match src-ip</b> <b>mask</b> <i>string</i>
Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	20.10.R1
Platforms	VSR

## src-port

Synopsis	Enter the <b>src-port</b> context
Context	<b>configure filter ipv6-exception string entry number match src-port</b>
Tree	<a href="#">src-port</a>
Description	Commands in this context configure match criteria for the source port.
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).
Introduced	20.10.R1
Platforms	VSR

## eq number

Synopsis	Exact value as the match criterion
Context	<b>configure filter ipv6-exception string entry number match src-port eq number</b>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

## gt number

Synopsis	Greater than value as the match criterion
Context	<b>configure filter ipv6-exception string entry number match src-port gt number</b>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

## lt number

Synopsis	Less than value as the match criterion
Context	<b>configure filter ipv6-exception string entry number match src-port lt number</b>
Tree	<a href="#">lt</a>

Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **port-list** *reference*

Synopsis	Name of the port list as the match criterion
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-exception</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>port-list</b> <i>reference</i>
Tree	<a href="#">port-list</a>
Reference	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-exception</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <b>range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	20.10.R1
Platforms	VSR

### **end** *number*

Synopsis	Upper bound of the port range
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-exception</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a> <b>end</b> <i>number</i>
Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	VSR

**start number**

Synopsis	Lower bound of the port range
Context	<b>configure filter ipv6-exception</b> <i>string entry number match src-port range start number</i>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	20.10.R1
Platforms	VSR

**filter-id number****WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Filter ID
Context	<b>configure filter ipv6-exception</b> <i>string filter-id number</i>
Tree	<a href="#">filter-id</a>
Range	1 to 65535
Introduced	20.10.R1
Platforms	VSR

**ipv6-filter** [[filter-name](#)] *string*

Synopsis	Enter the <b>ipv6-filter</b> list instance
Context	<b>configure filter ipv6-filter</b> <i>string</i>
Tree	<a href="#">ipv6-filter</a>
Introduced	16.0.R1
Platforms	All

**[filter-name]** *string*

Synopsis	Filter name
Context	<b>configure filter ipv6-filter</b> <i>string</i>
Tree	<a href="#">ipv6-filter</a>
String Length	1 to 64

---

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **chain-to-system-filter** *boolean*

Synopsis	Chain filter policy to the active IPvX system filter policy
Context	<b>configure filter ipv6-filter</b> <i>string chain-to-system-filter boolean</i>
Tree	<a href="#">chain-to-system-filter</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **default-action** *keyword*

Synopsis	Action for packets that do not match any entry
Context	<b>configure filter ipv6-filter</b> <i>string default-action keyword</i>
Tree	<a href="#">default-action</a>
Options	drop, accept
Default	drop
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure filter ipv6-filter</b> <i>string description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **embed**

Synopsis	Enter the <b>embed</b> context
----------	--------------------------------

Context	<b>configure filter ipv6-filter string embed</b>
Tree	<b>embed</b>
Description	Commands in this context embed a previously defined IPv6 embedded filter policy or Hybrid OpenFlow switch instance into an exclusive, template, or system filter policy at the specified offset value. Rules derived from the BGP FlowSpec can also be embedded into template filter policies only.
Introduced	16.0.R1
Platforms	All

### **filter [name] reference offset number**

Synopsis	Enter the <b>filter</b> list instance
Context	<b>configure filter ipv6-filter string embed filter reference offset number</b>
Tree	<b>filter</b>
Introduced	16.0.R1
Platforms	All

### **[name] reference**

Synopsis	IPv6 policy to be embedded in the filter
Context	<b>configure filter ipv6-filter string embed filter reference offset number</b>
Tree	<b>filter</b>
Reference	<b>configure filter ipv6-filter string</b>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **offset number**

Synopsis	Offset of the inserted entries
Context	<b>configure filter ipv6-filter string embed filter reference offset number</b>
Tree	<b>filter</b>
Range	0 to 2097150
Notes	This element is part of a list key.
Introduced	16.0.R1

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the embedded filter

Context **configure** **filter** **ipv6-filter** *string* **embed** **filter** *reference* **offset** *number* **admin-state** *keyword*

Tree [admin-state](#)

Options enable, disable

Default enable

Introduced 16.0.R1

Platforms All

### **flowspec** **offset** *number*

Synopsis Enter the **flowspec** list instance

Context **configure** **filter** **ipv6-filter** *string* **embed** **flowspec** **offset** *number*

Tree [flowspec](#)

Introduced 16.0.R1

Platforms All

### **offset** *number*

Synopsis Offset of the inserted entries

Context **configure** **filter** **ipv6-filter** *string* **embed** **flowspec** **offset** *number*

Tree [flowspec](#)

Range 0 to 2097151

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the embedded filter

Context **configure** **filter** **ipv6-filter** *string* **embed** **flowspec** **offset** *number* **admin-state** *keyword*

Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

### **group** *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Interface group ID for an external configured set of flowspec rules
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">embed</a> <a href="#">flowspec</a> <a href="#">offset</a> <i>number</i> <a href="#">group</a> <i>number</i>
Tree	<a href="#">group</a>
Range	0 to 16383
Introduced	16.0.R1
Platforms	All

### **router-instance** *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Virtual router for an external configured set of flowspec rules
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">embed</a> <a href="#">flowspec</a> <a href="#">offset</a> <i>number</i> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **openflow** [[of-switch](#)] *reference* [offset](#) *number*

Synopsis	Enter the <b>openflow</b> list instance
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">embed</a> <a href="#">openflow</a> <i>reference</i> <a href="#">offset</a> <i>number</i>
Tree	<a href="#">openflow</a>

Introduced	16.0.R4
Platforms	All

**[of-switch] reference**

Synopsis	Referenced Hybrid OpenFlow Switch (OFS) name
Context	<b>configure filter ipv6-filter string embed openflow reference offset number</b>
Tree	<a href="#">openflow</a>
Reference	<b>configure openflow of-switch string</b>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

**offset number**

Synopsis	Offset of the inserted entries
Context	<b>configure filter ipv6-filter string embed openflow reference offset number</b>
Tree	<a href="#">openflow</a>
Range	0 to 2097150
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

**admin-state keyword**

Synopsis	Administrative state of the embedded filter
Context	<b>configure filter ipv6-filter string embed openflow reference offset number admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R4
Platforms	All

## grt

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Global routing context
Context	<b>configure filter ipv6-filter string embed openflow reference offset number grt</b>
Tree	<a href="#">grt</a>
Notes	The following elements are part of a choice: <b>grt, system, (sap and vpls), or vprn.</b>
Introduced	16.0.R4
Platforms	All

## sap reference

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	SAP context
Context	<b>configure filter ipv6-filter string embed openflow reference offset number sap reference</b>
Tree	<a href="#">sap</a>
Reference	<b>configure service vpls string sap string</b>
Notes	The following elements are part of a choice: <b>grt, system, (sap and vpls), or vprn.</b>
Introduced	16.0.R4
Platforms	All

## system

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	System context
Context	<b>configure filter ipv6-filter string embed openflow reference offset number system</b>
Tree	<a href="#">system</a>
Notes	The following elements are part of a choice: <b>grt, system, (sap and vpls), or vprn.</b>
Introduced	16.0.R4

Platforms All

## vpls reference

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis VPLS context

Context **configure** filter ipv6-filter string embed openflow reference offset number vpls reference

Tree vpls

Reference **configure** service vpls string

Notes The following elements are part of a choice: **grt**, **system**, (**sap** and **vpls**), or **vprn**.

Introduced 16.0.R4

Platforms All

## vprn reference

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis VPRN context

Context **configure** filter ipv6-filter string embed openflow reference offset number vprn reference

Tree vprn

Reference **configure** service vprn string

Notes The following elements are part of a choice: **grt**, **system**, (**sap** and **vpls**), or **vprn**.

Introduced 16.0.R4

Platforms All

## entry [entry-id] number

Synopsis Enter the **entry** list instance

Context **configure** filter ipv6-filter string entry number

Tree entry

Introduced 16.0.R1

Platforms All

### [entry-id] *number*

Synopsis ID for a match criteria and the corresponding action

Context **configure filter ipv6-filter** *string entry number*

Tree [entry](#)

Range 1 to 2097151

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### action

Synopsis Enable the **action** context

Context **configure filter ipv6-filter** *string entry number action*

Tree [action](#)

Introduced 16.0.R1

Platforms All

### accept

Synopsis Accept regular routing to forward a matching packet

Context **configure filter ipv6-filter** *string entry number action accept*

Tree [accept](#)

Notes The following elements are part of a mandatory choice: **accept**, **drop**, **forward**, **http-redirect**, **ignore-match**, **nat**, or **tcp-mss-adjust**.

Introduced 16.0.R1

Platforms All

### accept-when

Synopsis Enable the **accept-when** context

Context **configure filter ipv6-filter** *string entry number action accept-when*

Tree [accept-when](#)

Introduced	19.5.R1
Platforms	All

## **pattern**

Synopsis	Enable the <b>pattern</b> context
Context	<b>configure filter ipv6-filter string entry number action accept-when pattern</b>
Tree	<a href="#">pattern</a>
Introduced	19.5.R1
Platforms	All

## **expression string**

Synopsis	Pattern expression to match
Context	<b>configure filter ipv6-filter string entry number action accept-when pattern expression string</b>
Tree	<a href="#">expression</a>
String Length	3 to 18
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

## **mask string**

Synopsis	Mask for the pattern expression
Context	<b>configure filter ipv6-filter string entry number action accept-when pattern mask string</b>
Tree	<a href="#">mask</a>
String Length	3 to 18
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

## **offset-type keyword**

Synopsis	Starting point reference for offset value of pattern
----------	--

Context	<b>configure</b> filter ipv6-filter string entry number action accept-when pattern offset-type keyword
Tree	offset-type
Options	layer-3, layer-4, data, dns-qtype
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

### offset-value number

Synopsis	Offset value for the pattern expression
Context	<b>configure</b> filter ipv6-filter string entry number action accept-when pattern offset-value number
Tree	offset-value
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

### drop

Synopsis	Drop a packet matching this entry
Context	<b>configure</b> filter ipv6-filter string entry number action drop
Tree	drop
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>http-redirect</b> , <b>ignore-match</b> , <b>nat</b> , or <b>tcp-mss-adjust</b> .
Introduced	16.0.R1
Platforms	All

### drop-when

Synopsis	Enable the <b>drop-when</b> context
Context	<b>configure</b> filter ipv6-filter string entry number action drop-when
Tree	drop-when
Introduced	16.0.R1

Platforms All

### extracted-traffic

Synopsis Drop traffic extracted to CPM  
 Context **configure filter ipv6-filter string entry number action drop-when extracted-traffic**  
 Tree [extracted-traffic](#)  
 Introduced 16.0.R1  
 Platforms All

### hop-limit

Synopsis Enable the **hop-limit** context  
 Context **configure filter ipv6-filter string entry number action drop-when hop-limit**  
 Tree [hop-limit](#)  
 Notes The following elements are part of a choice: **hop-limit** or **payload-length**.  
 Introduced 16.0.R1  
 Platforms All

### eq number

Synopsis Equal to condition match value  
 Context **configure filter ipv6-filter string entry number action drop-when hop-limit eq number**  
 Tree [eq](#)  
 Range 0 to 255  
 Notes The following elements are part of a mandatory choice: **eq**, **gt**, **lt**, or **range**.  
 Introduced 16.0.R1  
 Platforms All

### gt number

Synopsis Greater than condition match value  
 Context **configure filter ipv6-filter string entry number action drop-when hop-limit gt number**  
 Tree [gt](#)  
 Range 0 to 254

Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**lt number**

Synopsis	Less than condition match value
Context	<b>configure filter ipv6-filter string entry number action drop-when hop-limit lt number</b>
Tree	<b>lt</b>
Range	1 to 255
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-filter string entry number action drop-when hop-limit range</b>
Tree	<b>range</b>
Description	This command in this context specify an inclusive range. When range is used, the start of the range (the first value entered) must be smaller than the end of the range (the second value entered).
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**end number**

Synopsis	Upper bound of the range
Context	<b>configure filter ipv6-filter string entry number action drop-when hop-limit range end number</b>
Tree	<b>end</b>
Range	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1

Platforms All

### **start number**

Synopsis Lower bound of the range

Context **configure filter ipv6-filter string entry number action drop-when hop-limit range start number**

Tree [start](#)

Range 0 to 254

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **pattern**

Synopsis Enable the **pattern** context

Context **configure filter ipv6-filter string entry number action drop-when pattern**

Tree [pattern](#)

Introduced 16.0.R4

Platforms All

### **expression string**

Synopsis Pattern expression to match

Context **configure filter ipv6-filter string entry number action drop-when pattern expression string**

Tree [expression](#)

String Length 3 to 18

Notes This element is mandatory.

Introduced 16.0.R4

Platforms All

### **mask string**

Synopsis Mask for the pattern expression

Context **configure filter ipv6-filter string entry number action drop-when pattern mask string**

Tree	<a href="#">mask</a>
String Length	3 to 18
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **offset-type** *keyword*

Synopsis	Starting point reference for offset value of pattern
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <a href="#">string</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">action</a> <a href="#">drop-when</a> <a href="#">pattern</a> <a href="#">offset-type</a> <a href="#">keyword</a>
Tree	<a href="#">offset-type</a>
Options	layer-3, layer-4, data, dns-qtype
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **offset-value** *number*

Synopsis	Offset value for the pattern expression
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <a href="#">string</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">action</a> <a href="#">drop-when</a> <a href="#">pattern</a> <a href="#">offset-value</a> <a href="#">number</a>
Tree	<a href="#">offset-value</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **payload-length**

Synopsis	Enable the <b>payload-length</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <a href="#">string</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">action</a> <a href="#">drop-when</a> <a href="#">payload-length</a>
Tree	<a href="#">payload-length</a>
Notes	The following elements are part of a choice: <b>hop-limit</b> or <b>payload-length</b> .
Introduced	16.0.R1

Platforms All

### **eq** *number*

Synopsis Exact match criterion for the length

Context **configure** filter ipv6-filter *string* entry *number* action drop-when payload-length eq *number*

Tree [eq](#)

Range 0 to 65535

Notes The following elements are part of a mandatory choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms All

### **gt** *number*

Synopsis Greater than match criterion for the length

Context **configure** filter ipv6-filter *string* entry *number* action drop-when payload-length gt *number*

Tree [gt](#)

Range 0 to 65534

Notes The following elements are part of a mandatory choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms All

### **lt** *number*

Synopsis Less than match criterion for the length

Context **configure** filter ipv6-filter *string* entry *number* action drop-when payload-length lt *number*

Tree [lt](#)

Range 1 to 65535

Notes The following elements are part of a mandatory choice: **eq**, **gt**, **lt**, or **range**.

Introduced 16.0.R1

Platforms All

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action drop-when payload-length range</b>
Tree	<b>range</b>
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

## end number

Synopsis	Upper bound of the length range
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action drop-when payload-length range end number</b>
Tree	<b>end</b>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## start number

Synopsis	Lower bound of the length range
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action drop-when payload-length range start number</b>
Tree	<b>start</b>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## fc keyword

Synopsis	Class name to be forwarded for matching packets
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action fc keyword</b>
Tree	<b>fc</b>

Options	be, l2, af, l1, h2, ef, h1, nc
Introduced	16.0.R1
Platforms	All

## forward

Synopsis	Enter the <b>forward</b> context
Context	<b>configure filter ipv6-filter string entry number action forward</b>
Tree	<a href="#">forward</a>
Notes	The following elements are part of a mandatory choice: <b>accept, drop, forward, http-redirect, ignore-match, nat, or tcp-mss-adjust.</b>
Introduced	16.0.R1
Platforms	All

## bonding-connection *number*

Synopsis	Connection ID over which packet is forwarded
Context	<b>configure filter ipv6-filter string entry number action forward bonding-connection number</b>
Tree	<a href="#">bonding-connection</a>
Range	1 to 2
Notes	The following elements are part of a choice: <b>bonding-connection, esi-l2, esi-l3, gre-tunnel, lsp, mpls-policy, next-hop, redirect-policy, router-instance, sap, sdp, srte-policy, srv6-policy, or vprn-target.</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## esi-l2

Synopsis	Enable the <b>esi-l2</b> context
Context	<b>configure filter ipv6-filter string entry number action forward esi-l2</b>
Tree	<a href="#">esi-l2</a>
Notes	The following elements are part of a choice: <b>bonding-connection, esi-l2, esi-l3, gre-tunnel, lsp, mpls-policy, next-hop, redirect-policy, router-instance, sap, sdp, srte-policy, srv6-policy, or vprn-target.</b>
Introduced	16.0.R1

Platforms All

### **esi-value** *string*

Synopsis ESI of the first ESI-identified appliance

Context **configure** [filter ipv6-filter](#) *string* [entry number](#) [action forward esi-l2](#) *esi-value* *string*

Tree [esi-value](#)

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **vpls** *reference*

Synopsis VPLS service name

Context **configure** [filter ipv6-filter](#) *string* [entry number](#) [action forward esi-l2](#) *vpls* *reference*

Tree [vpls](#)

Reference **configure** [service vpls](#) *string*

Notes This element is mandatory.

Introduced 16.0.R3

Platforms All

### **esi-l3**

Synopsis Enable the **esi-l3** context

Context **configure** [filter ipv6-filter](#) *string* [entry number](#) [action forward esi-l3](#)

Tree [esi-l3](#)

Notes The following elements are part of a choice: **bonding-connection**, **esi-l2**, **esi-l3**, **gre-tunnel**, **lsp**, **mpls-policy**, **next-hop**, **redirect-policy**, **router-instance**, **sap**, **sdp**, **srte-policy**, **srv6-policy**, or **vpn-target**.

Introduced 16.0.R1

Platforms All

**esi-value** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	ESI of the first ESI-identified appliance
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">esi-l3</a> <a href="#">esi-value</a> <i>string</i>
Tree	<a href="#">esi-value</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**sf-ip** *string***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	IP address of the service function to forward traffic
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">esi-l3</a> <a href="#">sf-ip</a> <i>string</i>
Tree	<a href="#">sf-ip</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**vas-interface** *reference***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Egress R-VPLS IP interface name
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">esi-l3</a> <a href="#">vas-interface</a> <i>reference</i>
Tree	<a href="#">vas-interface</a>
Reference	<b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i> <a href="#">interface</a> <i>string</i>
Notes	This element is mandatory.

Introduced	16.0.R1
Platforms	All

### **vprn** *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	VPRN service name
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">esi-l3</a> <a href="#">vprn</a> <i>reference</i>
Tree	<a href="#">vprn</a>
Reference	<b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

### **gre-tunnel** *reference*

Synopsis	GRE tunnel template ID that sets the location where an encapsulated matching packet is transported
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">gre-tunnel</a> <i>reference</i>
Tree	<a href="#">gre-tunnel</a>
Reference	<b>configure</b> <a href="#">filter</a> <a href="#">gre-tunnel-template</a> <i>string</i>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### **lsp** *string*

Synopsis	LSP that is specified to forward a packet matching this entry
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">lsp</a> <i>string</i>
Tree	<a href="#">lsp</a>
String Length	1 to 64

Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

## mpls-policy

Synopsis	Enable the <b>mpls-policy</b> context
Context	<b>configure filter ipv6-filter string entry number action forward mpls-policy</b>
Tree	<a href="#">mpls-policy</a>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	19.10.R1
Platforms	All

## endpoint *string*

Synopsis	MPLS forwarding policy endpoint IPv6 address
Context	<b>configure filter ipv6-filter string entry number action forward mpls-policy endpoint string</b>
Tree	<a href="#">endpoint</a>
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

## next-hop

Synopsis	Enable the <b>next-hop</b> context
Context	<b>configure filter ipv6-filter string entry number action forward next-hop</b>
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

## nh-ip

Synopsis	Enable the <b>nh-ip</b> context
Context	<b>configure filter ipv6-filter string entry number action forward next-hop nh-ip</b>
Tree	<a href="#">nh-ip</a>
Notes	The following elements are part of a mandatory choice: <b>nh-ip</b> or <b>nh-ip-vrf</b> .
Introduced	16.0.R1
Platforms	All

## address string

Synopsis	IPv6 address of next hop to forward matching packets
Context	<b>configure filter ipv6-filter string entry number action forward next-hop nh-ip address string</b>
Tree	<a href="#">address</a>
Description	This command specifies the IPv6 address of a direct or indirect next hop to which matching packets are forwarded.
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## indirect boolean

Synopsis	Allow next hop to be indirectly reachable
Context	<b>configure filter ipv6-filter string entry number action forward next-hop nh-ip indirect boolean</b>
Tree	<a href="#">indirect</a>
Default	false
Introduced	16.0.R1
Platforms	All

## nh-ip-vrf

Synopsis	Enable the <b>nh-ip-vrf</b> context
Context	<b>configure filter ipv6-filter string entry number action forward next-hop nh-ip-vrf</b>
Tree	<a href="#">nh-ip-vrf</a>

Notes	The following elements are part of a mandatory choice: <b>nh-ip</b> or <b>nh-ip-vrf</b> .
Introduced	16.0.R1
Platforms	All

### **address string**

Synopsis	IPv6 address of next hop to forward matching packets
Context	<b>configure filter ipv6-filter string entry number action forward next-hop nh-ip-vrf address string</b>
Tree	<a href="#">address</a>
Description	This command specifies the IPv6 address of a direct or indirect next hop to which matching packets are forwarded.
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **indirect boolean**

Synopsis	Allow next hop to be indirectly reachable
Context	<b>configure filter ipv6-filter string entry number action forward next-hop nh-ip-vrf indirect boolean</b>
Tree	<a href="#">indirect</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **router-instance string**

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Routing context for route lookup for forwarding packets
Context	<b>configure filter ipv6-filter string entry number action forward next-hop nh-ip-vrf router-instance string</b>
Tree	<a href="#">router-instance</a>
Notes	This element is mandatory.

Introduced	16.0.R1
Platforms	All

### **redirect-policy** *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Next hop or forward next hop router that forwards a packet that matches this entry
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action forward</b> <b>redirect-policy</b> <i>reference</i>
Tree	<b>redirect-policy</b>
Reference	<b>configure filter</b> <b>redirect-policy</b> <i>string</i>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### **router-instance** *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Router name or VPRN service name
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action forward</b> <b>router-instance</b> <i>string</i>
Tree	<b>router-instance</b>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### **sap**

Synopsis	Enable the <b>sap</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action forward</b> <b>sap</b>

Tree	<a href="#">sap</a>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### **sap-id** *reference*

Synopsis	VPLS Ethernet SAP ID used to forward matching packets
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">sap</a> <a href="#">sap-id</a> <i>reference</i>
Tree	<a href="#">sap-id</a>
Reference	<b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i> <a href="#">sap</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **vpls** *reference*

Synopsis	VPLS associated with the SAP
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">sap</a> <a href="#">vpls</a> <i>reference</i>
Tree	<a href="#">vpls</a>
Reference	<b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **sdp**

Synopsis	Enable the <b>sdp</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">sdp</a>
Tree	<a href="#">sdp</a>
Notes	The following elements are part of a choice: <b>bonding-connection</b> , <b>esi-l2</b> , <b>esi-l3</b> , <b>gre-tunnel</b> , <b>lsp</b> , <b>mpls-policy</b> , <b>next-hop</b> , <b>redirect-policy</b> , <b>router-instance</b> , <b>sap</b> , <b>sdp</b> , <b>srte-policy</b> , <b>srv6-policy</b> , or <b>vprn-target</b> .
Introduced	16.0.R1

Platforms All

### **sdp-bind-id** *string*

Synopsis VPLS SDP bind ID used to forward matching packets

Context **configure** [filter](#) [ipv6-filter](#) *string* [entry](#) *number* [action](#) [forward](#) [sdp](#) [sdp-bind-id](#) *string*

Tree [sdp-bind-id](#)

String Length 3 to 16

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **vpls** *reference*

Synopsis VPLS associated with the SDP

Context **configure** [filter](#) [ipv6-filter](#) *string* [entry](#) *number* [action](#) [forward](#) [sdp](#) [vpls](#) *reference*

Tree [vpls](#)

Reference **configure** [service](#) [vpls](#) *string*

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **srte-policy**

Synopsis Enable the **srte-policy** context

Context **configure** [filter](#) [ipv6-filter](#) *string* [entry](#) *number* [action](#) [forward](#) [srte-policy](#)

Tree [srte-policy](#)

Notes The following elements are part of a choice: **bonding-connection**, **esi-l2**, **esi-l3**, **gre-tunnel**, **lsp**, **mpls-policy**, **next-hop**, **redirect-policy**, **router-instance**, **sap**, **sdp**, **srte-policy**, **srv6-policy**, or **vprn-target**.

Introduced 19.10.R1

Platforms All

**color number**

Synopsis	SR-TE policy color ID
Context	<b>configure filter ipv6-filter string entry number action forward srte-policy color number</b>
Tree	<a href="#">color</a>
Range	0 to 4294967295
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

**endpoint string**

Synopsis	SR-TE policy endpoint IPv6 address
Context	<b>configure filter ipv6-filter string entry number action forward srte-policy endpoint string</b>
Tree	<a href="#">endpoint</a>
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

**srv6-policy**

Synopsis	Enable the <b>srv6-policy</b> context
Context	<b>configure filter ipv6-filter string entry number action forward srv6-policy</b>
Tree	<a href="#">srv6-policy</a>
Notes	The following elements are part of a choice: <b>bonding-connection, esi-l2, esi-l3, gre-tunnel, lsp, mpls-policy, next-hop, redirect-policy, router-instance, sap, sdp, srte-policy, srv6-policy, or vprn-target.</b>
Introduced	23.7.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

**color number**

Synopsis	SRv6 policy color
Context	<b>configure filter ipv6-filter string entry number action forward srv6-policy color number</b>
Tree	<a href="#">color</a>
Range	0 to 4294967295

Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **endpoint string**

Synopsis	SRv6 policy endpoint IPv6 address
Context	<b>configure filter ipv6-filter string entry number action forward srv6-policy endpoint string</b>
Tree	<a href="#">endpoint</a>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **service-sid string**

Synopsis	SRv6 service segment identifier
Context	<b>configure filter ipv6-filter string entry number action forward srv6-policy service-sid string</b>
Tree	<a href="#">service-sid</a>
Notes	This element is mandatory.
Introduced	23.7.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **vprn-target**

Synopsis	Enable the <b>vprn-target</b> context
Context	<b>configure filter ipv6-filter string entry number action forward vprn-target</b>
Tree	<a href="#">vprn-target</a>
Notes	The following elements are part of a choice: <b>bonding-connection, esi-l2, esi-l3, gre-tunnel, lsp, mpls-policy, next-hop, redirect-policy, router-instance, sap, sdp, srte-policy, srv6-policy, or vprn-target.</b>
Introduced	16.0.R1
Platforms	All

**adv-prefix string**

Synopsis	Advertised IP prefix for target destination
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">vprn-target</a> <a href="#">adv-prefix</a> <i>string</i>
Tree	<a href="#">adv-prefix</a>
Introduced	16.0.R1
Platforms	All

**bgp-nh string**

Synopsis	Target BGP next hop IP address
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">vprn-target</a> <a href="#">bgp-nh</a> <i>string</i>
Tree	<a href="#">bgp-nh</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**lsp string**

Synopsis	LSP that is specified to forward a packet matching this entry
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">vprn-target</a> <a href="#">lsp</a> <i>string</i>
Tree	<a href="#">lsp</a>
String Length	1 to 64
Introduced	16.0.R1
Platforms	All

**vprn reference**

Synopsis	Routing context used for route lookup
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forward</a> <a href="#">vprn-target</a> <a href="#">vprn</a> <i>reference</i>
Tree	<a href="#">vprn</a>
Reference	<b>configure</b> <a href="#">service</a> <a href="#">vprn</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

## http-redirect

Synopsis	Enable the <b>http-redirect</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <a href="#">http-redirect</a>
Tree	<a href="#">http-redirect</a>
Description	Commands in this context configure the filter entry action for HTTP redirection.
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>http-redirect</b> , <b>ignore-match</b> , <b>nat</b> , or <b>tcp-mss-adjust</b> .
Introduced	16.0.R1
Platforms	All

## allow-override *boolean*

Synopsis	Override the HTTP redirect URL by a RADIUS VSA
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <a href="#">http-redirect</a> <b>allow-override</b> <i>boolean</i>
Tree	<a href="#">allow-override</a>
Description	This command specifies whether the RADIUS VSA can override the configured HTTP redirect URL for this filter entry.  When configured to <b>true</b> , the RADIUS VSA can override the HTTP redirect URL.  When configured to <b>false</b> , the HTTP redirect URL is not overridden.  This does not apply if the CPF option is specified for the URL.
Default	false
Introduced	16.0.R1
Platforms	All

## url (*keyword* | *http-redirect-url*)

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	URL used for HTTP redirect action
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <a href="#">http-redirect</a> <b>url</b> ( <i>keyword</i>   <i>http-redirect-url</i> )
Tree	<a href="#">url</a>
Description	This command specifies the URL to use for HTTP redirection for this filter entry.

A URL can be specified or the CPF option can be used for BNG CUPS ESM sessions only.

The following macro substitutions may be used:

\$URL — request-URI in the HTTP GET request received

\$MAC — a string that represents the MAC address of the subscriber host

\$IP — a string that represents the IP address of the subscriber host

\$SUB — a string that represents the subscriber ID

\$SAP — a string that represents a SAP ID

\$SAPDESC — description string configured on the SAP

\$CID — a string that represents the circuit ID or interface ID of the subscriber host (hexadecimal format)

\$RID — a string that represents the remote ID of the subscriber host (hexadecimal format)

String Length	1 to 255
Options	from-cpf
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## ignore-match

Synopsis	Ignore match criteria for the entry
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <b>ignore-match</b>
Tree	<b>ignore-match</b>
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>http-redirect</b> , <b>ignore-match</b> , <b>nat</b> , or <b>tcp-mss-adjust</b> .
Introduced	16.0.R1
Platforms	All

## nat

Synopsis	Enable the <b>nat</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <b>nat</b>
Tree	<b>nat</b>

Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>http-redirect</b> , <b>ignore-match</b> , <b>nat</b> , or <b>tcp-mss-adjust</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### nat-policy *reference*

#### WARNING:

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	NAT policy name when action is NAT
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action nat nat-policy</b> <i>reference</i>
Tree	<a href="#">nat-policy</a>
Reference	<b>configure service nat nat-policy</b> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### nat-type *keyword*

#### WARNING:

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	NAT type to assign when action is NAT
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action nat nat-type</b> <i>keyword</i>
Tree	<a href="#">nat-type</a>
Options	dslite, nat64
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### rate-limit

Synopsis	Enable the <b>rate-limit</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action rate-limit</b>
Tree	<a href="#">rate-limit</a>
Introduced	16.0.R1

Platforms All

### extracted-traffic

Synopsis Limit the rate of traffic extracted to the CPM  
 Context **configure** [filter](#) [ipv6-filter](#) *string* [entry](#) *number* [action](#) [rate-limit](#) [extracted-traffic](#)  
 Tree [extracted-traffic](#)  
 Introduced 22.2.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS

### hop-limit

Synopsis Enable the **hop-limit** context  
 Context **configure** [filter](#) [ipv6-filter](#) *string* [entry](#) *number* [action](#) [rate-limit](#) [hop-limit](#)  
 Tree [hop-limit](#)  
 Notes The following elements are part of a choice: **hop-limit** or **payload-length**.  
 Introduced 16.0.R1  
 Platforms All

### eq *number*

Synopsis Equal to condition match value  
 Context **configure** [filter](#) [ipv6-filter](#) *string* [entry](#) *number* [action](#) [rate-limit](#) [hop-limit](#) [eq](#) *number*  
 Tree [eq](#)  
 Range 0 to 255  
 Notes The following elements are part of a mandatory choice: **eq**, **gt**, **lt**, or **range**.  
 Introduced 16.0.R1  
 Platforms All

### gt *number*

Synopsis Greater than condition match value  
 Context **configure** [filter](#) [ipv6-filter](#) *string* [entry](#) *number* [action](#) [rate-limit](#) [hop-limit](#) [gt](#) *number*  
 Tree [gt](#)  
 Range 0 to 254

Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**lt number**

Synopsis	Less than condition match value
Context	<b>configure filter ipv6-filter string entry number action rate-limit hop-limit lt number</b>
Tree	<b>lt</b>
Range	1 to 255
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-filter string entry number action rate-limit hop-limit range</b>
Tree	<b>range</b>
Description	This command in this context specify an inclusive range. When range is used, the start of the range (the first value entered) must be smaller than the end of the range (the second value entered).
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**end number**

Synopsis	Upper bound of the range
Context	<b>configure filter ipv6-filter string entry number action rate-limit hop-limit range end number</b>
Tree	<b>end</b>
Range	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1

Platforms All

### **start number**

Synopsis Lower bound of the range

Context **configure filter ipv6-filter string entry number action rate-limit hop-limit range start number**

Tree [start](#)

Range 0 to 254

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **mbs (number | keyword)**

Synopsis Maximum burst size

Context **configure filter ipv6-filter string entry number action rate-limit mbs (number | keyword)**

Tree [mbs](#)

Range 0 to 268435456

Units bytes

Options auto

Default auto

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS, VSR

### **pattern**

Synopsis Enable the **pattern** context

Context **configure filter ipv6-filter string entry number action rate-limit pattern**

Tree [pattern](#)

Introduced 16.0.R4

Platforms All

**expression string**

Synopsis	Pattern expression to match
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">rate-limit</a> <a href="#">pattern</a> <a href="#">expression</a> <i>string</i>
Tree	<a href="#">expression</a>
String Length	3 to 18
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

**mask string**

Synopsis	Mask for the pattern expression
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">rate-limit</a> <a href="#">pattern</a> <a href="#">mask</a> <i>string</i>
Tree	<a href="#">mask</a>
String Length	3 to 18
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

**offset-type keyword**

Synopsis	Starting point reference for offset value of pattern
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">rate-limit</a> <a href="#">pattern</a> <a href="#">offset-type</a> <i>keyword</i>
Tree	<a href="#">offset-type</a>
Options	layer-3, layer-4, data, dns-qtype
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

**offset-value number**

Synopsis	Offset value for the pattern expression
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">rate-limit</a> <a href="#">pattern</a> <a href="#">offset-value</a> <i>number</i>

Tree	<a href="#">offset-value</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	All

## payload-length

Synopsis	Enable the <b>payload-length</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number</b> <a href="#">action rate-limit payload-length</a>
Tree	<a href="#">payload-length</a>
Notes	The following elements are part of a choice: <b>hop-limit</b> or <b>payload-length</b> .
Introduced	16.0.R1
Platforms	All

## eq *number*

Synopsis	Exact match criterion for the length
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number</b> <a href="#">action rate-limit payload-length eq</a> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

## gt *number*

Synopsis	Greater than match criterion for the length
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number</b> <a href="#">action rate-limit payload-length gt</a> <i>number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**lt number**

Synopsis	Less than match criterion for the length
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number</b> <b>action rate-limit payload-length lt number</b>
Tree	<b>lt</b>
Range	1 to 65535
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number</b> <b>action rate-limit payload-length range</b>
Tree	<b>range</b>
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

**end number**

Synopsis	Upper bound of the length range
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number</b> <b>action rate-limit payload-length range end number</b>
Tree	<b>end</b>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**start number**

Synopsis	Lower bound of the length range
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number</b> <b>action rate-limit payload-length range start number</b>

Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **pir** (*number* | *keyword*)

Synopsis	Peak information rate
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action rate-limit pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	0 to 2000000000
Units	kilobps
Options	max
Notes	The following elements are part of a mandatory choice: <b>pir</b> or <b>pps-pir</b> .
Introduced	16.0.R1
Platforms	All

### **pps-pir** (*number* | *keyword*)

Synopsis	Peak information rate
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action rate-limit pps-pir</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pps-pir</a>
Range	0 to 1000000000
Units	packets per second
Options	max
Notes	The following elements are part of a mandatory choice: <b>pir</b> or <b>pps-pir</b> .
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS

### **remark**

Synopsis	Enable the <b>remark</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action remark</b>

Tree	<a href="#">remark</a>
Introduced	16.0.R1
Platforms	All

### **dscp keyword**

Synopsis	Destination SAP
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <a href="#">remark</a> <a href="#">dscp</a> <i>keyword</i>
Tree	<a href="#">dscp</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **secondary**

Synopsis	Enable the <b>secondary</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <a href="#">secondary</a>
Tree	<a href="#">secondary</a>
Introduced	16.0.R1
Platforms	All

### **forward**

Synopsis	Enter the <b>forward</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <a href="#">secondary</a> <a href="#">forward</a>
Tree	<a href="#">forward</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## next-hop

Synopsis	Enable the <b>next-hop</b> context
Context	<b>configure filter ipv6-filter string entry number action secondary forward next-hop</b>
Tree	<a href="#">next-hop</a>
Notes	The following elements are part of a choice: <b>next-hop</b> , <b>sap</b> , <b>sdp</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

## nh-ip-vrf

Synopsis	Enable the <b>nh-ip-vrf</b> context
Context	<b>configure filter ipv6-filter string entry number action secondary forward next-hop nh-ip-vrf</b>
Tree	<a href="#">nh-ip-vrf</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## address string

Synopsis	IPv6 address of next hop to forward matching packets
Context	<b>configure filter ipv6-filter string entry number action secondary forward next-hop nh-ip-vrf address string</b>
Tree	<a href="#">address</a>
Description	This command specifies the IPv6 address of a direct or indirect next hop to which matching packets are forwarded.
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## indirect boolean

Synopsis	Allow next hop to be indirectly reachable
Context	<b>configure filter ipv6-filter string entry number action secondary forward next-hop nh-ip-vrf indirect boolean</b>
Tree	<a href="#">indirect</a>

Default	false
Introduced	16.0.R1
Platforms	All

### router-instance *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Routing context for route lookup for forwarding packets
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number</b> <b>action secondary forward next-hop nh-ip-vrf router-instance</b> <i>string</i>
Tree	<a href="#">router-instance</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### sap

Synopsis	Enable the <b>sap</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number</b> <b>action secondary forward sap</b>
Tree	<a href="#">sap</a>
Notes	The following elements are part of a choice: <b>next-hop</b> , <b>sap</b> , <b>sdp</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### sap-id *reference*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	SAP ID used to forward packets matching the entry
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number</b> <b>action secondary forward sap sap-id</b> <i>reference</i>
Tree	<a href="#">sap-id</a>

Reference	<b>configure service vpls string sap string</b>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **vpls reference**

Synopsis	VPLS the sdp-bind-id belongs to
Context	<b>configure filter ipv6-filter string entry number action secondary forward sap vpls reference</b>
Tree	<a href="#">vpls</a>
Reference	<b>configure service vpls string</b>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **sdp**

Synopsis	Enable the <b>sdp</b> context
Context	<b>configure filter ipv6-filter string entry number action secondary forward sdp</b>
Tree	<a href="#">sdp</a>
Notes	The following elements are part of a choice: <b>next-hop</b> , <b>sap</b> , <b>sdp</b> , or <b>vprn-target</b> .
Introduced	16.0.R1
Platforms	All

### **sdp-bind-id string**

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	VPLS SDP bind ID used to forward matching packets
Context	<b>configure filter ipv6-filter string entry number action secondary forward sdp sdp-bind-id string</b>
Tree	<a href="#">sdp-bind-id</a>
String Length	3 to 16

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **vpls reference**

Synopsis	VPLS associated with the SDP
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">secondary</a> <a href="#">forward</a> <a href="#">sdp</a> <a href="#">vpls</a> <i>reference</i>
Tree	<a href="#">vpls</a>
Reference	<b>configure</b> <a href="#">service</a> <a href="#">vpls</a> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **vprn-target**

Synopsis	Enable the <b>vprn-target</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">secondary</a> <a href="#">forward</a> <a href="#">vprn-target</a>
Tree	<a href="#">vprn-target</a>
Notes	The following elements are part of a choice: <b>next-hop</b> , <b>sap</b> , <b>sdp</b> , or <b>vprn-target</b> .
Introduced	21.7.R1
Platforms	All

### **adv-prefix string**

Synopsis	Advertised IP prefix for the target destination
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">secondary</a> <a href="#">forward</a> <a href="#">vprn-target</a> <a href="#">adv-prefix</a> <i>string</i>
Tree	<a href="#">adv-prefix</a>
Introduced	21.7.R1
Platforms	All

**bgp-nh string**

Synopsis	Target BGP next hop IP address
Context	<b>configure</b> filter ipv6-filter string entry number action secondary forward vprn-target bgp-nh string
Tree	bgp-nh
Notes	This element is mandatory.
Introduced	21.7.R1
Platforms	All

**lsp string**

Synopsis	LSP that is specified to forward a packet matching this entry
Context	<b>configure</b> filter ipv6-filter string entry number action secondary forward vprn-target lsp string
Tree	lsp
String Length	1 to 64
Introduced	21.7.R1
Platforms	All

**vprn reference**

Synopsis	Routing context used for route lookup
Context	<b>configure</b> filter ipv6-filter string entry number action secondary forward vprn-target vprn reference
Tree	vprn
Reference	<b>configure</b> service vprn string
Notes	This element is mandatory.
Introduced	21.7.R1
Platforms	All

**remark**

Synopsis	Enable the <b>remark</b> context
Context	<b>configure</b> filter ipv6-filter string entry number action secondary remark
Tree	remark

Introduced	16.0.R1
Platforms	All

### **dscp** *keyword*

Synopsis	Destination SAP
Context	<b>configure</b> <b>filter</b> <b>ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <b>secondary</b> <b>remark</b> <b>dscp</b> <i>keyword</i>
Tree	<b>dscp</b>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **tcp-mss-adjust**

Synopsis	Adjust MSS option of TCP matching packets to configured value of tcp-mss in router interface context
Context	<b>configure</b> <b>filter</b> <b>ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>action</b> <b>tcp-mss-adjust</b>
Tree	<b>tcp-mss-adjust</b>
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>http-redirect</b> , <b>ignore-match</b> , <b>nat</b> , or <b>tcp-mss-adjust</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <b>filter</b> <b>ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**egress-pbr** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	PBR that has an effect when this filter is applied on egress
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">egress-pbr</a> <i>keyword</i>
Tree	<a href="#">egress-pbr</a>
Options	true, true-with-I4Ib
Introduced	16.0.R1
Platforms	All

**filter-sample** *boolean*

Synopsis	Sample matching traffic if IP interface is set to cflowd ACL mode
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">filter-sample</a> <i>boolean</i>
Tree	<a href="#">filter-sample</a>
Default	false
Introduced	16.0.R1
Platforms	All

**interface-sample** *boolean*

Synopsis	Sample matching traffic if IP interface is set to cflowd interface mode
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">interface-sample</a> <i>boolean</i>
Tree	<a href="#">interface-sample</a>
Default	true
Introduced	16.0.R1
Platforms	All

**log** *reference*

Synopsis	Log that is used for packets matching this entry
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">log</a> <i>reference</i>
Tree	<a href="#">log</a>

Reference	<b>configure filter log</b> <i>number</i>
Introduced	16.0.R1
Platforms	All

## match

Synopsis	Enter the <b>match</b> context
Context	<b>configure filter ipv6-filter</b> <i>string entry number match</i>
Tree	<a href="#">match</a>
Description	Commands in this context provide match criteria for the filter entry. When the match criteria are satisfied, the action associated with the match criteria is executed.
Introduced	16.0.R1
Platforms	All

## destination-class *number*

Synopsis	Destination class as a match criterion
Context	<b>configure filter ipv6-filter</b> <i>string entry number match destination-class number</i>
Tree	<a href="#">destination-class</a>
Description	This command configures the BGP destination class value as a match criterion. Filtering egress traffic on the destination class requires the <b>destination-class-lookup</b> command (under the <b>ingress</b> context for the service interface) to be enabled (set to <b>true</b> ).
Range	1 to 255
Introduced	20.7.R1
Platforms	All

## dscp *keyword*

Synopsis	DSCP used as an IP filter match criterion
Context	<b>configure filter ipv6-filter</b> <i>string entry number match dscp keyword</i>
Tree	<a href="#">dscp</a>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Introduced	16.0.R1

Platforms All

## dst-ip

Synopsis Enter the **dst-ip** context

Context **configure filter ipv6-filter string entry number match dst-ip**

Tree [dst-ip](#)

Notes The following elements are part of a choice: **ip** or (**dst-ip** and **src-ip**).

Introduced 16.0.R1

Platforms All

## address (*ipv6-prefix-with-host-bits* | *ipv6-address*)

Synopsis IPv6 address used as the match criterion

Context **configure filter ipv6-filter string entry number match dst-ip address (*ipv6-prefix-with-host-bits* | *ipv6-address*)**

Tree [address](#)

Notes The following elements are part of a choice: (**address** and **mask**) or **ipv6-prefix-list**.

Introduced 16.0.R1

Platforms All

## ipv6-prefix-list *reference*

Synopsis IPv6 address prefix list used as match criterion

Context **configure filter ipv6-filter string entry number match dst-ip ipv6-prefix-list *reference***

Tree [ipv6-prefix-list](#)

Reference **configure filter match-list ipv6-prefix-list string**

Notes The following elements are part of a choice: (**address** and **mask**) or **ipv6-prefix-list**.

Introduced 16.0.R1

Platforms All

## mask *string*

Synopsis IPv6 address mask used as the match criterion

Context **configure filter ipv6-filter string entry number match dst-ip mask *string***

Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	16.0.R1
Platforms	All

## **dst-port**

Synopsis	Enter the <b>dst-port</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a>
Tree	<a href="#">dst-port</a>
Description	Commands in this context configure match criteria for the destination port.
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).
Introduced	16.0.R1
Platforms	All

## **eq number**

Synopsis	Exact value as the match criterion
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">eq</a> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

## **gt number**

Synopsis	Greater than value as the match criterion
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <a href="#">gt</a> <i>number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **lt** *number*

Synopsis	Less than value as the match criterion
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match</b> <i>dst-port</i> <b>lt</b> <i>number</i>
Tree	<b>lt</b>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **port-list** *reference*

Synopsis	Name of the port list as the match criterion
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match</b> <i>dst-port</i> <b>port-list</b> <i>reference</i>
Tree	<b>port-list</b>
Reference	<b>configure filter match-list</b> <b>port-list</b> <i>string</i>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match</b> <i>dst-port</i> <b>range</b>
Tree	<b>range</b>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **end** *number*

Synopsis	Upper bound of the port range
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match</b> <i>dst-port</i> <b>range</b> <b>end</b> <i>number</i>
Tree	<b>end</b>
Range	1 to 65535

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**start number**

Synopsis	Lower bound of the port range
Context	<b>configure filter ipv6-filter string entry number match dst-port range start number</b>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**extension-header**

Synopsis	Enter the <b>extension-header</b> context
Context	<b>configure filter ipv6-filter string entry number match extension-header</b>
Tree	<a href="#">extension-header</a>
Introduced	16.0.R1
Platforms	All

**ah boolean**

Synopsis	Match a packet as per the existence of an AH Extension Header
Context	<b>configure filter ipv6-filter string entry number match extension-header ah boolean</b>
Tree	<a href="#">ah</a>
Introduced	16.0.R1
Platforms	All

**esp boolean**

Synopsis	Match a packet as per the existence of an Encapsulation security payload extension header
Context	<b>configure filter ipv6-filter string entry number match extension-header esp boolean</b>

Tree	<a href="#">esp</a>
Introduced	16.0.R1
Platforms	All

### **hop-by-hop** *boolean*

Synopsis	Match on Hop-by-Hop Options Extension Header existence
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">extension-header</a> <a href="#">hop-by-hop</a> <i>boolean</i>
Tree	<a href="#">hop-by-hop</a>
Introduced	16.0.R2
Platforms	All

### **routing-type0** *boolean*

Synopsis	Match a packet as per the existence of a routing Extension Header
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">extension-header</a> <a href="#">routing-type0</a> <i>boolean</i>
Tree	<a href="#">routing-type0</a>
Introduced	16.0.R1
Platforms	All

### **flow-label**

Synopsis	Enable the <b>flow-label</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">flow-label</a>
Tree	<a href="#">flow-label</a>
Description	Commands in this context configure the flow label and optional mask match condition.
Introduced	16.0.R1
Platforms	All

### **mask** *number*

Synopsis	Flow label mask for the IPv6 filter entry
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">flow-label</a> <a href="#">mask</a> <i>number</i>
Tree	<a href="#">mask</a>

Description	This command specifies the IPv6 address mask for the flow label filter entry. This value can be expressed in decimal, hexadecimal, or binary format.
Range	1 to 1048575
Default	1048575
Introduced	16.0.R1
Platforms	All

### **value** *number*

Synopsis	Flow label as a match criterion
Context	<b>configure</b> <b>filter</b> <b>ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match</b> <b>flow-label</b> <b>value</b> <i>number</i>
Tree	<b>value</b>
Description	This command specifies the flow label to use as a match criterion. This value can be expressed in decimal, hexadecimal, or binary format.
Range	0 to 1048575
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **fragment** *keyword*

Synopsis	Match criterion for fragmented packages
Context	<b>configure</b> <b>filter</b> <b>ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match</b> <b>fragment</b> <i>keyword</i>
Tree	<b>fragment</b>
Options	false, true, first-only, non-first-only
Introduced	16.0.R1
Platforms	All

### **hop-limit**

Synopsis	Enable the <b>hop-limit</b> context
Context	<b>configure</b> <b>filter</b> <b>ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match</b> <b>hop-limit</b>
Tree	<b>hop-limit</b>
Introduced	21.10.R1
Platforms	All

### **eq number**

Synopsis	Equal to condition match value
Context	<b>configure filter ipv6-filter string entry number match hop-limit eq number</b>
Tree	<a href="#">eq</a>
Range	0 to 255
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	All

### **gt number**

Synopsis	Greater than condition match value
Context	<b>configure filter ipv6-filter string entry number match hop-limit gt number</b>
Tree	<a href="#">gt</a>
Range	0 to 254
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	All

### **lt number**

Synopsis	Less than condition match value
Context	<b>configure filter ipv6-filter string entry number match hop-limit lt number</b>
Tree	<a href="#">lt</a>
Range	1 to 255
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	All

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-filter string entry number match hop-limit range</b>
Tree	<a href="#">range</a>

Description	This command in this context specify an inclusive range. When range is used, the start of the range (the first value entered) must be smaller than the end of the range (the second value entered).
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	21.10.R1
Platforms	All

### **end number**

Synopsis	Upper bound of the range
Context	<b>configure filter ipv6-filter string entry number match hop-limit range end number</b>
Tree	<b>end</b>
Range	1 to 255
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	All

### **start number**

Synopsis	Lower bound of the range
Context	<b>configure filter ipv6-filter string entry number match hop-limit range start number</b>
Tree	<b>start</b>
Range	0 to 254
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	All

### **icmp**

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure filter ipv6-filter string entry number match icmp</b>
Tree	<b>icmp</b>
Introduced	16.0.R1
Platforms	All

**code number**

Synopsis	ICMPv6 code value to match
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number match icmp code number</b>
Tree	<b>code</b>
Range	0 to 255
Introduced	16.0.R1
Platforms	All

**type number**

Synopsis	ICMPv6 type value to match
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number match icmp type number</b>
Tree	<b>type</b>
Range	0 to 255
Introduced	16.0.R1
Platforms	All

**ip**

Synopsis	Enter the <b>ip</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number match ip</b>
Tree	<b>ip</b>
Notes	The following elements are part of a choice: <b>ip</b> or ( <b>dst-ip</b> and <b>src-ip</b> ).
Introduced	21.10.R1
Platforms	All

**address** (*ipv6-prefix-with-host-bits | ipv6-address*)

Synopsis	IPv6 address used as the match criterion
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number match ip address</b> ( <i>ipv6-prefix-with-host-bits   ipv6-address</i> )
Tree	<b>address</b>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	21.10.R1
Platforms	All

### ipv6-prefix-list *reference*

Synopsis	IPv6 address prefix list used as match criterion
Context	<b>configure filter ipv6-filter</b> <i>string entry number match ip ipv6-prefix-list reference</i>
Tree	<a href="#">ipv6-prefix-list</a>
Reference	<b>configure filter match-list</b> <a href="#">ipv6-prefix-list</a> <i>string</i>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	21.10.R1
Platforms	All

### mask *string*

Synopsis	IPv6 address mask used as the match criterion
Context	<b>configure filter ipv6-filter</b> <i>string entry number match ip mask string</i>
Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	21.10.R1
Platforms	All

### next-header (*number* | *keyword*)

Synopsis	IP protocol to match
Context	<b>configure filter ipv6-filter</b> <i>string entry number match next-header</i> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">next-header</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Notes	The following elements are part of a choice: <b>next-header</b> or <b>next-header-list</b> .
Introduced	16.0.R1
Platforms	All

### next-header-list *reference*

Synopsis	Name of the protocol list as a match criterion
----------	--

Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match next-header-list</b> <i>reference</i>
Tree	<a href="#">next-header-list</a>
Reference	<b>configure filter match-list protocol-list</b> <i>string</i>
Notes	The following elements are part of a choice: <b>next-header</b> or <b>next-header-list</b> .
Introduced	20.7.R1
Platforms	All

## packet-length

Synopsis	Enable the <b>packet-length</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match packet-length</b>
Tree	<a href="#">packet-length</a>
Description	Commands in this context specify the match criterion for the IPv6 packet length. The IPv6 packet length represents the total packet length which includes the IPv6 header and the payload.
Introduced	19.5.R1
Platforms	All

## eq number

Synopsis	Exact match criterion for the length
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match packet-length eq</b> <i>number</i>
Tree	<a href="#">eq</a>
Range	40 to 65575
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.5.R1
Platforms	All

## gt number

Synopsis	Greater than match criterion for the length
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match packet-length gt</b> <i>number</i>
Tree	<a href="#">gt</a>
Range	40 to 65574
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .

Introduced	19.5.R1
Platforms	All

**lt number**

Synopsis	Less than match criterion for the length
Context	<b>configure filter ipv6-filter string entry number match packet-length lt number</b>
Tree	<b>lt</b>
Range	41 to 65575
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.5.R1
Platforms	All

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-filter string entry number match packet-length range</b>
Tree	<b>range</b>
Notes	The following elements are part of a mandatory choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.5.R1
Platforms	All

**end number**

Synopsis	Upper bound of packet length range as match criterion
Context	<b>configure filter ipv6-filter string entry number match packet-length range end number</b>
Tree	<b>end</b>
Range	41 to 65575
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

**start number**

Synopsis	Lower bound of packet length range as match criterion
----------	---

Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match packet-length</b> <i>range</i> <b>start</b> <i>number</i>
Tree	<a href="#">start</a>
Range	40 to 65574
Notes	This element is mandatory.
Introduced	19.5.R1
Platforms	All

## port

Synopsis	Enter the <b>port</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match port</b>
Tree	<a href="#">port</a>
Notes	The following elements are part of a choice: <b>port</b> or ( <b>dst-port</b> and <b>src-port</b> ).
Introduced	16.0.R1
Platforms	All

## eq *number*

Synopsis	Exact value as the match criterion
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match port eq</b> <i>number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

## gt *number*

Synopsis	Greater than value as the match criterion
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>match port gt</b> <i>number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1

Platforms All

### **lt** *number*

Synopsis Less than value as the match criterion

Context **configure filter ipv6-filter** *string entry number match port lt number*

Tree **lt**

Range 1 to 65535

Notes The following elements are part of a choice: **eq, gt, lt, port-list, or range.**

Introduced 16.0.R1

Platforms All

### **port-list** *reference*

Synopsis Name of the port list as the match criterion

Context **configure filter ipv6-filter** *string entry number match port port-list reference*

Tree **port-list**

Reference **configure filter match-list port-list** *string*

Notes The following elements are part of a choice: **eq, gt, lt, port-list, or range.**

Introduced 16.0.R1

Platforms All

### **range**

Synopsis Enable the **range** context

Context **configure filter ipv6-filter** *string entry number match port range*

Tree **range**

Notes The following elements are part of a choice: **eq, gt, lt, port-list, or range.**

Introduced 16.0.R1

Platforms All

### **end** *number*

Synopsis Upper bound of the port range

Context **configure filter ipv6-filter** *string entry number match port range end number*

Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **start number**

Synopsis	Lower bound of the port range
Context	<b>configure filter ipv6-filter</b> <i>string</i> <a href="#">entry number match port range start number</a>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **src-ip**

Synopsis	Enter the <b>src-ip</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <a href="#">entry number match src-ip</a>
Tree	<a href="#">src-ip</a>
Notes	The following elements are part of a choice: <b>ip</b> or ( <b>dst-ip</b> and <b>src-ip</b> ).
Introduced	16.0.R1
Platforms	All

### **address** (*ipv6-prefix-with-host-bits | ipv6-address*)

Synopsis	IPv6 address used as the match criterion
Context	<b>configure filter ipv6-filter</b> <i>string</i> <a href="#">entry number match src-ip address</a> ( <i>ipv6-prefix-with-host-bits   ipv6-address</i> )
Tree	<a href="#">address</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	16.0.R1
Platforms	All

## ipv6-prefix-list *reference*

Synopsis	IPv6 address prefix list used as match criterion
Context	<b>configure filter ipv6-filter</b> <i>string entry number match src-ip ipv6-prefix-list reference</i>
Tree	<a href="#">ipv6-prefix-list</a>
Reference	<b>configure filter match-list</b> <a href="#">ipv6-prefix-list</a> <i>string</i>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	16.0.R1
Platforms	All

## mask *string*

Synopsis	IPv6 address mask used as the match criterion
Context	<b>configure filter ipv6-filter</b> <i>string entry number match src-ip mask string</i>
Tree	<a href="#">mask</a>
Notes	The following elements are part of a choice: ( <b>address</b> and <b>mask</b> ) or <b>ipv6-prefix-list</b> .
Introduced	16.0.R1
Platforms	All

## src-mac

Synopsis	Enable the <b>src-mac</b> context
Context	<b>configure filter ipv6-filter</b> <i>string entry number match src-mac</i>
Tree	<a href="#">src-mac</a>
Introduced	19.5.R1
Platforms	All

## address *string*

Synopsis	MAC address used as the match criterion
Context	<b>configure filter ipv6-filter</b> <i>string entry number match src-mac address string</i>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	19.5.R1

Platforms All

### mask string

Synopsis MAC address mask as the match criterion  
 Context **configure filter ipv6-filter string entry number match src-mac mask string**  
 Tree [mask](#)  
 Default ff:ff:ff:ff:ff:ff  
 Introduced 19.5.R1  
 Platforms All

### src-port

Synopsis Enter the **src-port** context  
 Context **configure filter ipv6-filter string entry number match src-port**  
 Tree [src-port](#)  
 Description Commands in this context configure match criteria for the source port.  
 Notes The following elements are part of a choice: **port** or (**dst-port** and **src-port**).  
 Introduced 16.0.R1  
 Platforms All

### eq number

Synopsis Exact value as the match criterion  
 Context **configure filter ipv6-filter string entry number match src-port eq number**  
 Tree [eq](#)  
 Range 0 to 65535  
 Notes The following elements are part of a choice: **eq**, **gt**, **lt**, **port-list**, or **range**.  
 Introduced 16.0.R1  
 Platforms All

### gt number

Synopsis Greater than value as the match criterion  
 Context **configure filter ipv6-filter string entry number match src-port gt number**

Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **lt number**

Synopsis	Less than value as the match criterion
Context	<b>configure filter ipv6-filter string entry number match src-port lt number</b>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **port-list reference**

Synopsis	Name of the port list as the match criterion
Context	<b>configure filter ipv6-filter string entry number match src-port port-list reference</b>
Tree	<a href="#">port-list</a>
Reference	<b>configure filter match-list port-list string</b>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-filter string entry number match src-port range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , <b>port-list</b> , or <b>range</b> .
Introduced	16.0.R1
Platforms	All

### **end number**

Synopsis	Upper bound of the port range
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number match src-port range end number</b>
Tree	<b>end</b>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **start number**

Synopsis	Lower bound of the port range
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number match src-port range start number</b>
Tree	<b>start</b>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **tcp-established**

Synopsis	Match packets containing the TCP flag as ACK or RST
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number match tcp-established</b>
Tree	<b>tcp-established</b>
Notes	The following elements are part of a choice: <b>tcp-established</b> or <b>tcp-flags</b> .
Introduced	22.10.R1
Platforms	All

### **tcp-flags**

Synopsis	Enter the <b>tcp-flags</b> context
Context	<b>configure filter ipv6-filter</b> <i>string</i> <b>entry number match tcp-flags</b>
Tree	<b>tcp-flags</b>
Notes	The following elements are part of a choice: <b>tcp-established</b> or <b>tcp-flags</b> .

Introduced 16.0.R1  
Platforms All

### **ack boolean**

Synopsis Match TCP ACK as per value of the ACK TCP flag bit  
Context **configure filter ipv6-filter string entry number match tcp-flags ack boolean**  
Tree [ack](#)  
Introduced 16.0.R1  
Platforms All

### **cwr boolean**

Synopsis Match TCP CWR as per value of the CWR TCP flag bit  
Context **configure filter ipv6-filter string entry number match tcp-flags cwr boolean**  
Tree [cwr](#)  
Introduced 16.0.R1  
Platforms All

### **ece boolean**

Synopsis Match TCP ECE as per value of the ECE TCP flag bit  
Context **configure filter ipv6-filter string entry number match tcp-flags ece boolean**  
Tree [ece](#)  
Introduced 16.0.R1  
Platforms All

### **fin boolean**

Synopsis Match TCP FIN as per value of the FIN TCP flag bit  
Context **configure filter ipv6-filter string entry number match tcp-flags fin boolean**  
Tree [fin](#)  
Introduced 16.0.R1  
Platforms All

**ns boolean**

Synopsis	Match TCP NS as per value of the NS TCP flag bit
Context	<b>configure filter ipv6-filter string entry number match tcp-flags ns boolean</b>
Tree	<a href="#">ns</a>
Introduced	16.0.R1
Platforms	All

**psh boolean**

Synopsis	Match TCP PSH as per value of the PSH TCP flag bit
Context	<b>configure filter ipv6-filter string entry number match tcp-flags psh boolean</b>
Tree	<a href="#">psh</a>
Introduced	16.0.R1
Platforms	All

**rst boolean**

Synopsis	Match TCP RST as per value of the RST TCP flag bit
Context	<b>configure filter ipv6-filter string entry number match tcp-flags rst boolean</b>
Tree	<a href="#">rst</a>
Introduced	16.0.R1
Platforms	All

**syn boolean**

Synopsis	Match TCP SYN as per value of the SYN TCP flag bit
Context	<b>configure filter ipv6-filter string entry number match tcp-flags syn boolean</b>
Tree	<a href="#">syn</a>
Introduced	16.0.R1
Platforms	All

**urg boolean**

Synopsis	Match TCP URG as per value of the URG TCP flag bit
Context	<b>configure filter ipv6-filter string entry number match tcp-flags urg boolean</b>

Tree	<a href="#">urg</a>
Introduced	16.0.R1
Platforms	All

### **pbr-down-action-override** *keyword*

Synopsis	Action when PBR or PBF target for this entry is not available
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">pbr-down-action-override</a> <i>keyword</i>
Tree	<a href="#">pbr-down-action-override</a>
Options	drop, forward, filter-default-action
Introduced	16.0.R1
Platforms	All

### **sample-profile** *reference*

Synopsis	Cflowd sample profile ID to match packets
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">sample-profile</a> <i>reference</i>
Tree	<a href="#">sample-profile</a>
Description	This command allows traffic matching an IPv4 or IPv6 filter to be sampled for cflowd processing using a specific sample profile ID. This option is only compatible if the associated interface is configured for interface-based sampling and is only supported for ingress sampling. An IP filter can only specify a single alternate sample profile ID for cflowd sampling, but the ID can be used in multiple entries.
Reference	<b>configure</b> <a href="#">cflowd</a> <a href="#">sample-profile</a> <i>number</i>
Introduced	20.10.R1
Platforms	All

### **sticky-dest** (*number* | *keyword*)

Synopsis	Time before action with available PBR or PBF destination and highest priority
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">sticky-dest</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">sticky-dest</a>
Range	0 to 65535
Units	seconds
Options	no-hold-time-up
Introduced	16.0.R1

Platforms All

### **filter-id** *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis IPv6 filter identifier

Context **configure filter ipv6-filter** *string filter-id number*

Tree [filter-id](#)

Range 1 to 65535

Introduced 16.0.R1

Platforms All

### **scope** *keyword*

Synopsis Scope of the filter definition

Context **configure filter ipv6-filter** *string scope keyword*

Tree [scope](#)

Description This command configures the filter policy scope.  
If the scope of the policy is **template** and is applied to one or more services or network interfaces, the scope cannot be changed.

Options exclusive, template, embedded, system, cpm

Default template

Introduced 16.0.R1

Platforms All

### **shared-policer** *boolean*

Synopsis Share policer among active ports in the LAG

Context **configure filter ipv6-filter** *string shared-policer boolean*

Tree [shared-policer](#)

Description When configured to **true**, and when the filter policy is configured on a LAG endpoint, the system programs the policer rates in the filter policy per line card FP of the LAG based on the number of active ports in the LAG for each FP.

When configured to **false**, and when the filter policy is configured on a LAG endpoint, the system programs the same policer rate on each line card FP of the LAG.

Default	false
Introduced	22.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, 7950 XRS

## subscriber-mgmt

Synopsis	Enter the <b>subscriber-mgmt</b> context
Context	<b>configure filter ipv6-filter string subscriber-mgmt</b>
Tree	<a href="#">subscriber-mgmt</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## host-specific-entry

Synopsis	Enter the <b>host-specific-entry</b> context
Context	<b>configure filter ipv6-filter string subscriber-mgmt host-specific-entry</b>
Tree	<a href="#">host-specific-entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## credit-control

Synopsis	Enter the <b>credit-control</b> context
Context	<b>configure filter ipv6-filter string subscriber-mgmt host-specific-entry credit-control</b>
Tree	<a href="#">credit-control</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-filter string subscriber-mgmt host-specific-entry credit-control range</b>
Tree	<a href="#">range</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **end number**

Synopsis Upper bound of range for credit control filter entries

Context **configure filter ipv6-filter string subscriber-mgmt host-specific-entry credit-control range end number**

Tree [end](#)

Range 1 to 2097151

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **start number**

Synopsis Lower bound of range for credit control filter entries

Context **configure filter ipv6-filter string subscriber-mgmt host-specific-entry credit-control range start number**

Tree [start](#)

Range 1 to 2097151

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **filter-rule**

Synopsis Enter the **filter-rule** context

Context **configure filter ipv6-filter string subscriber-mgmt host-specific-entry filter-rule**

Tree [filter-rule](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **range**

Synopsis Enable the **range** context

Context **configure filter ipv6-filter string subscriber-mgmt host-specific-entry filter-rule range**

Tree	<a href="#">range</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**end number**

Synopsis	Upper bound of range for inserting filter rule entries
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">subscriber-mgmt</a> <a href="#">host-specific-entry</a> <a href="#">filter-rule</a> <a href="#">range</a> <a href="#">end number</a>
Tree	<a href="#">end</a>
Range	1 to 2097151
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**start number**

Synopsis	Lower bound of range for inserting filter rule entries
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">subscriber-mgmt</a> <a href="#">host-specific-entry</a> <a href="#">filter-rule</a> <a href="#">range</a> <a href="#">start number</a>
Tree	<a href="#">start</a>
Range	1 to 2097151
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**watermark**

Synopsis	Enter the <b>watermark</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">ipv6-filter</a> <i>string</i> <a href="#">subscriber-mgmt</a> <a href="#">host-specific-entry</a> <a href="#">watermark</a>
Tree	<a href="#">watermark</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## high number

Synopsis	High watermark for host-specific entries, to raise a table full alarm
Context	<b>configure filter ipv6-filter string subscriber-mgmt host-specific-entry watermark high number</b>
Tree	<a href="#">high</a>
Range	0 to 100
Default	95
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## low number

Synopsis	Low watermark for host-specific entries, to clear a table full alarm
Context	<b>configure filter ipv6-filter string subscriber-mgmt host-specific-entry watermark low number</b>
Tree	<a href="#">low</a>
Range	0 to 100
Default	90
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## shared-entry

Synopsis	Enter the <b>shared-entry</b> context
Context	<b>configure filter ipv6-filter string subscriber-mgmt shared-entry</b>
Tree	<a href="#">shared-entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## filter-rule

Synopsis	Enter the <b>filter-rule</b> context
Context	<b>configure filter ipv6-filter string subscriber-mgmt shared-entry filter-rule</b>
Tree	<a href="#">filter-rule</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## range

Synopsis Enable the **range** context

Context **configure filter ipv6-filter string subscriber-mgmt shared-entry filter-rule range**

Tree [range](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## end number

Synopsis Upper bound of range for inserting shared host rules

Context **configure filter ipv6-filter string subscriber-mgmt shared-entry filter-rule range end number**

Tree [end](#)

Range 1 to 2097151

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## start number

Synopsis Lower bound of range for inserting shared host rules

Context **configure filter ipv6-filter string subscriber-mgmt shared-entry filter-rule range start number**

Tree [start](#)

Range 1 to 2097151

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## pcc-rule

Synopsis Enter the **pcc-rule** context

Context **configure filter ipv6-filter string subscriber-mgmt shared-entry pcc-rule**

Tree	<a href="#">pcc-rule</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure filter ipv6-filter string subscriber-mgmt shared-entry pcc-rule range</b>
Tree	<a href="#">range</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## end number

Synopsis	Upper bound of the range for PCC rule filter entries
Context	<b>configure filter ipv6-filter string subscriber-mgmt shared-entry pcc-rule range end number</b>
Tree	<a href="#">end</a>
Range	1 to 2097151
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## start number

Synopsis	Lower bound of the range for PCC rule filter entries
Context	<b>configure filter ipv6-filter string subscriber-mgmt shared-entry pcc-rule range start number</b>
Tree	<a href="#">start</a>
Range	1 to 2097151
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**watermark**

Synopsis	Enable the <b>watermark</b> context
Context	<b>configure filter ipv6-filter string subscriber-mgmt shared-entry watermark</b>
Tree	<a href="#">watermark</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**high number**

Synopsis	Limit of RADIUS shared filters before generating high watermark notification
Context	<b>configure filter ipv6-filter string subscriber-mgmt shared-entry watermark high number</b>
Tree	<a href="#">high</a>
Range	1 to 8000
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**low number**

Synopsis	Limit of RADIUS or Diameter shared filters before clearing high watermark notification
Context	<b>configure filter ipv6-filter string subscriber-mgmt shared-entry watermark low number</b>
Tree	<a href="#">low</a>
Range	0 to 7999
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**type keyword**

Synopsis	Set of match criteria for the filter policy
Context	<b>configure filter ipv6-filter string type keyword</b>
Tree	<a href="#">type</a>
Description	This command configures the filter policy type that defines the list of match criteria supported in a filter policy.
Options	normal, src-mac, packet-length, destination-class

Default	normal
Introduced	19.5.R1
Platforms	All

**log** [*log-id*] *number*

Synopsis	Enter the <b>log</b> list instance
Context	<b>configure</b> <i>filter log number</i>
Tree	<i>log</i>
Introduced	16.0.R1
Platforms	All

**[log-id]** *number*

Synopsis	Filter log identifier
Context	<b>configure</b> <i>filter log number</i>
Tree	<i>log</i>
Range	101 to 199
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of filter logging
Context	<b>configure</b> <i>filter log number admin-state keyword</i>
Tree	<i>admin-state</i>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
----------	------------------

---

Context	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	0 to 80
Introduced	16.0.R1
Platforms	All

## destination

Synopsis	Enter the <b>destination</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i> <a href="#">destination</a>
Tree	<a href="#">destination</a>
Introduced	16.0.R1
Platforms	All

## memory

Synopsis	Enter the <b>memory</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i> <a href="#">destination</a> <a href="#">memory</a>
Tree	<a href="#">memory</a>
Notes	The following elements are part of a choice: <b>memory</b> or <b>syslog</b> .
Introduced	16.0.R1
Platforms	All

## max-entries *number*

Synopsis	Maximum number of memory entries that the log can store
Context	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i> <a href="#">destination</a> <a href="#">memory</a> <a href="#">max-entries</a> <i>number</i>
Tree	<a href="#">max-entries</a>
Range	1 to 50000
Default	1000
Introduced	16.0.R1
Platforms	All

**stop-on-full** *boolean*

Synopsis	Stop logging when maximum number of memory entries is reached or wrap-around is used
Context	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i> <a href="#">destination</a> <a href="#">memory</a> <b>stop-on-full</b> <i>boolean</i>
Tree	<a href="#">stop-on-full</a>
Default	false
Introduced	16.0.R1
Platforms	All

**syslog**

Synopsis	Enter the <b>syslog</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i> <a href="#">destination</a> <b>syslog</b>
Tree	<a href="#">syslog</a>
Notes	The following elements are part of a choice: <b>memory</b> or <b>syslog</b> .
Introduced	16.0.R1
Platforms	All

**name** *reference*

Synopsis	Syslog server definition ID
Context	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i> <a href="#">destination</a> <a href="#">syslog</a> <b>name</b> <i>reference</i>
Tree	<a href="#">name</a>
Reference	<b>configure</b> <a href="#">log</a> <a href="#">syslog</a> <i>string</i>
Introduced	21.2.R1
Platforms	All

**summary**

Synopsis	Enter the <b>summary</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i> <a href="#">destination</a> <a href="#">syslog</a> <b>summary</b>
Tree	<a href="#">summary</a>
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of filter log summarization
Context	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i> <a href="#">destination</a> <a href="#">syslog</a> <a href="#">summary</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**summary-crit** *keyword*

Synopsis	Summary for filter log entries
Context	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i> <a href="#">destination</a> <a href="#">syslog</a> <a href="#">summary</a> <b>summary-crit</b> <i>keyword</i>
Tree	<a href="#">summary-crit</a>
Options	src-addr, dst-addr
Default	src-addr
Introduced	16.0.R1
Platforms	All

**mac-filter** [[filter-name](#)] *string*

Synopsis	Enter the <b>mac-filter</b> list instance
Context	<b>configure</b> <a href="#">filter</a> <b>mac-filter</b> <i>string</i>
Tree	<a href="#">mac-filter</a>
Introduced	16.0.R1
Platforms	All

**[filter-name]** *string*

Synopsis	Filter name
Context	<b>configure</b> <a href="#">filter</a> <b>mac-filter</b> <i>string</i>
Tree	<a href="#">mac-filter</a>
String Length	1 to 64
Notes	This element is part of a list key.

Introduced	16.0.R1
Platforms	All

### **default-action** *keyword*

Synopsis	Action for packets that do not match any entry
Context	<b>configure</b> <b>filter</b> <b>mac-filter</b> <i>string</i> <b>default-action</b> <i>keyword</i>
Tree	<a href="#">default-action</a>
Options	drop, accept
Default	drop
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <b>filter</b> <b>mac-filter</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **embed**

Synopsis	Enter the <b>embed</b> context
Context	<b>configure</b> <b>filter</b> <b>mac-filter</b> <i>string</i> <b>embed</b>
Tree	<a href="#">embed</a>
Description	Commands in this context embed a previously defined MAC embedded filter policy or Hybrid OpenFlow switch instance into an exclusive, template, or system filter policy at the specified offset value. Rules derived from the BGP FlowSpec can also be embedded into template filter policies only.
Introduced	16.0.R1
Platforms	All

**entry** [*entry-id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure filter mac-filter string entry number</b>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	All

**[entry-id]** *number*

Synopsis	ID for a match criteria and the corresponding action
Context	<b>configure filter mac-filter string entry number</b>
Tree	<a href="#">entry</a>
Range	1 to 2097151
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**action**

Synopsis	Enable the <b>action</b> context
Context	<b>configure filter mac-filter string entry number action</b>
Tree	<a href="#">action</a>
Introduced	16.0.R1
Platforms	All

**accept**

Synopsis	Accept regular routing to forward a matching packet
Context	<b>configure filter mac-filter string entry number action accept</b>
Tree	<a href="#">accept</a>
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>http-redirect</b> , or <b>ignore-match</b> .
Introduced	16.0.R1
Platforms	All

## drop

Synopsis	Drop a packet matching this entry
Context	<b>configure filter mac-filter</b> <i>string entry number action drop</i>
Tree	<a href="#">drop</a>
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>http-redirect</b> , or <b>ignore-match</b> .
Introduced	16.0.R1
Platforms	All

## forward

Synopsis	Enter the <b>forward</b> context
Context	<b>configure filter mac-filter</b> <i>string entry number action forward</i>
Tree	<a href="#">forward</a>
Notes	The following elements are part of a mandatory choice: <b>accept</b> , <b>drop</b> , <b>forward</b> , <b>http-redirect</b> , or <b>ignore-match</b> .
Introduced	16.0.R1
Platforms	All

## esi-l2

Synopsis	Enable the <b>esi-l2</b> context
Context	<b>configure filter mac-filter</b> <i>string entry number action forward esi-l2</i>
Tree	<a href="#">esi-l2</a>
Notes	The following elements are part of a choice: <b>esi-l2</b> , <b>sap</b> , or <b>sdp</b> .
Introduced	16.0.R1
Platforms	All

## esi-value *string*

Synopsis	ESI of the first ESI-identified appliance
Context	<b>configure filter mac-filter</b> <i>string entry number action forward esi-l2 esi-value string</i>
Tree	<a href="#">esi-value</a>
Notes	This element is mandatory.

Introduced 16.0.R1  
 Platforms All

### **vpls** *reference*

Synopsis VPLS service name  
 Context **configure** [filter](#) [mac-filter](#) *string* [entry](#) *number* [action](#) [forward](#) [esi-l2](#) [vpls](#) *reference*  
 Tree [vpls](#)  
 Reference **configure** [service](#) [vpls](#) *string*  
 Notes This element is mandatory.  
 Introduced 16.0.R3  
 Platforms All

### **sap**

Synopsis Enable the **sap** context  
 Context **configure** [filter](#) [mac-filter](#) *string* [entry](#) *number* [action](#) [forward](#) [sap](#)  
 Tree [sap](#)  
 Notes The following elements are part of a choice: **esi-l2**, **sap**, or **sdp**.  
 Introduced 16.0.R1  
 Platforms All

### **sap-id** *reference*

Synopsis VPLS Ethernet SAP ID used to forward matching packets  
 Context **configure** [filter](#) [mac-filter](#) *string* [entry](#) *number* [action](#) [forward](#) [sap](#) [sap-id](#) *reference*  
 Tree [sap-id](#)  
 Reference **configure** [service](#) [vpls](#) *string* [sap](#) *string*  
 Notes This element is mandatory.  
 Introduced 16.0.R1  
 Platforms All

### **vpls** *reference*

Synopsis VPLS associated with the SAP

Context	<b>configure filter mac-filter string entry number action forward sap vpls reference</b>
Tree	<a href="#">vpls</a>
Reference	<b>configure service vpls string</b>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## sdp

Synopsis	Enable the <b>sdp</b> context
Context	<b>configure filter mac-filter string entry number action forward sdp</b>
Tree	<a href="#">sdp</a>
Notes	The following elements are part of a choice: <b>esi-l2</b> , <b>sap</b> , or <b>sdp</b> .
Introduced	16.0.R1
Platforms	All

## sdp-bind-id string

Synopsis	VPLS SDP bind ID used to forward matching packets
Context	<b>configure filter mac-filter string entry number action forward sdp sdp-bind-id string</b>
Tree	<a href="#">sdp-bind-id</a>
String Length	3 to 16
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## vpls reference

Synopsis	VPLS associated with the SDP
Context	<b>configure filter mac-filter string entry number action forward sdp vpls reference</b>
Tree	<a href="#">vpls</a>
Reference	<b>configure service vpls string</b>
Notes	This element is mandatory.
Introduced	16.0.R1

Platforms All

## http-redirect

Synopsis Enable the **http-redirect** context

Context **configure filter mac-filter string entry number action http-redirect**

Tree [http-redirect](#)

Notes The following elements are part of a mandatory choice: **accept**, **drop**, **forward**, **http-redirect**, or **ignore-match**.

Introduced 16.0.R1

Platforms All

## url string

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis URL that is used for redirecting

Context **configure filter mac-filter string entry number action http-redirect url string**

Tree [url](#)

String Length 1 to 255

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

## ignore-match

Synopsis Ignore match criteria for the entry

Context **configure filter mac-filter string entry number action ignore-match**

Tree [ignore-match](#)

Notes The following elements are part of a mandatory choice: **accept**, **drop**, **forward**, **http-redirect**, or **ignore-match**.

Introduced 16.0.R1

Platforms All

**rate-limit**

Synopsis	Enable the <b>rate-limit</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">rate-limit</a>
Tree	<a href="#">rate-limit</a>
Introduced	16.0.R1
Platforms	All

**pir** (*number* | *keyword*)

Synopsis	Peak information rate
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">rate-limit</a> <a href="#">pir</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">pir</a>
Range	0 to 2000000000
Units	kilobps
Options	max
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**secondary**

Synopsis	Enable the <b>secondary</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">secondary</a>
Tree	<a href="#">secondary</a>
Introduced	16.0.R1
Platforms	All

**forward**

Synopsis	Enter the <b>forward</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">secondary</a> <a href="#">forward</a>
Tree	<a href="#">forward</a>
Notes	This element is mandatory.
Introduced	16.0.R1

Platforms All

## sap

Synopsis Enable the **sap** context

Context **configure** [filter](#) [mac-filter](#) [string](#) [entry](#) [number](#) [action](#) [secondary](#) [forward](#) [sap](#)

Tree [sap](#)

Notes The following elements are part of a choice: **sap** or **sdp**.

Introduced 16.0.R1

Platforms All

## sap-id reference

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis SAP ID used to forward packets matching the entry

Context **configure** [filter](#) [mac-filter](#) [string](#) [entry](#) [number](#) [action](#) [secondary](#) [forward](#) [sap](#) [sap-id](#) [reference](#)

Tree [sap-id](#)

Reference **configure** [service](#) [vpls](#) [string](#) [sap](#) [string](#)

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

## vpls reference

Synopsis VPLS the sdp-bind-id belongs to

Context **configure** [filter](#) [mac-filter](#) [string](#) [entry](#) [number](#) [action](#) [secondary](#) [forward](#) [sap](#) [vpls](#) [reference](#)

Tree [vpls](#)

Reference **configure** [service](#) [vpls](#) [string](#)

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

## sdp

Synopsis	Enable the <b>sdp</b> context
Context	<b>configure filter mac-filter string entry number action secondary forward sdp</b>
Tree	<a href="#">sdp</a>
Notes	The following elements are part of a choice: <b>sap</b> or <b>sdp</b> .
Introduced	16.0.R1
Platforms	All

## sdp-bind-id *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	VPLS SDP bind ID used to forward matching packets
Context	<b>configure filter mac-filter string entry number action secondary forward sdp sdp-bind-id string</b>
Tree	<a href="#">sdp-bind-id</a>
String Length	3 to 16
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## vpls *reference*

Synopsis	VPLS associated with the SDP
Context	<b>configure filter mac-filter string entry number action secondary forward sdp vpls reference</b>
Tree	<a href="#">vpls</a>
Reference	<b>configure service vpls string</b>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **log** *reference*

Synopsis	Log that is used for packets matching this entry
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">log</a> <i>reference</i>
Tree	<a href="#">log</a>
Reference	<b>configure</b> <a href="#">filter</a> <a href="#">log</a> <i>number</i>
Introduced	16.0.R1
Platforms	All

### **match**

Synopsis	Enter the <b>match</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a>
Tree	<a href="#">match</a>
Introduced	16.0.R1
Platforms	All

### **dot1p**

Synopsis	Enable the <b>dot1p</b> context
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dot1p</a>
Tree	<a href="#">dot1p</a>
Introduced	16.0.R1
Platforms	All

### **mask number**

Synopsis	802.1p mask value used as a MAC filter match criterion
Context	<b>configure filter mac-filter string entry number match dot1p mask number</b>
Tree	<a href="#">mask</a>
Range	1 to 7
Default	7
Introduced	16.0.R1
Platforms	All

### **priority number**

Synopsis	IEEE 802.1p value used as a MAC filter match criterion
Context	<b>configure filter mac-filter string entry number match dot1p priority number</b>
Tree	<a href="#">priority</a>
Range	0 to 7
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **dst-mac**

Synopsis	Enable the <b>dst-mac</b> context
Context	<b>configure filter mac-filter string entry number match dst-mac</b>
Tree	<a href="#">dst-mac</a>
Introduced	16.0.R1
Platforms	All

### **address string**

Synopsis	MAC address used as the match criterion
Context	<b>configure filter mac-filter string entry number match dst-mac address string</b>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R1

Platforms All

### **mask string**

Synopsis MAC address mask as the match criterion  
 Context **configure filter mac-filter string entry number match dst-mac mask string**  
 Tree [mask](#)  
 Default ff:ff:ff:ff:ff:ff  
 Introduced 16.0.R1  
 Platforms All

### **etype string**

Synopsis Ethernet type  
 Context **configure filter mac-filter string entry number match etype string**  
 Tree [etype](#)  
 String Length 5 to 6  
 Introduced 16.0.R1  
 Platforms All

### **frame-type keyword**

Synopsis MAC frame as match criteria  
 Context **configure filter mac-filter string entry number match frame-type keyword**  
 Tree [frame-type](#)  
 Options 802dot3, 802dot2-llc, 802dot2-snap, ethernet-ii  
 Introduced 16.0.R1  
 Platforms All

### **inner-tag**

Synopsis Enable the **inner-tag** context  
 Context **configure filter mac-filter string entry number match inner-tag**  
 Tree [inner-tag](#)  
 Introduced 16.0.R1

Platforms All

### **mask number**

Synopsis Mask to VID of the inner VLAN tag before comparing it with the inner-tag or outer-tag value

Context **configure filter mac-filter string entry number match inner-tag mask number**

Tree **mask**

Range 1 to 4095

Default 4095

Introduced 16.0.R1

Platforms All

### **tag number**

Synopsis Matching value against VID of the second or first VLAN tag in the packet carried transparently

Context **configure filter mac-filter string entry number match inner-tag tag number**

Tree **tag**

Range 0 to 4095

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

### **isid**

Synopsis Enter the **isid** context

Context **configure filter mac-filter string entry number match isid**

Tree **isid**

Introduced 16.0.R1

Platforms All

### **range**

Synopsis Enable the **range** context

Context **configure filter mac-filter string entry number match isid range**

Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>range</b> or <b>value</b> .
Introduced	16.0.R1
Platforms	All

**end number**

Synopsis	Upper bound of the ISID range
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <a href="#">string</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">isid</a> <a href="#">range</a> <a href="#">end</a> <a href="#">number</a>
Tree	<a href="#">end</a>
Range	0 to 16777215
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**start number**

Synopsis	Lower bound of the ISID range
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <a href="#">string</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">isid</a> <a href="#">range</a> <a href="#">start</a> <a href="#">number</a>
Tree	<a href="#">start</a>
Range	0 to 16777215
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**value number**

Synopsis	Lowest value of 24-bit service instance identifier for the service matching this entry
Context	<b>configure</b> <a href="#">filter</a> <a href="#">mac-filter</a> <a href="#">string</a> <a href="#">entry</a> <a href="#">number</a> <a href="#">match</a> <a href="#">isid</a> <a href="#">value</a> <a href="#">number</a>
Tree	<a href="#">value</a>
Range	0 to 16777215
Notes	The following elements are part of a choice: <b>range</b> or <b>value</b> .
Introduced	16.0.R1
Platforms	All

## llc-dsap

Synopsis	Enable the <b>llc-dsap</b> context
Context	<b>configure filter mac-filter string entry number match llc-dsap</b>
Tree	<a href="#">llc-dsap</a>
Introduced	16.0.R1
Platforms	All

## dsap number

Synopsis	DSAP value
Context	<b>configure filter mac-filter string entry number match llc-dsap dsap number</b>
Tree	<a href="#">dsap</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## mask number

Synopsis	Destination SAP mask
Context	<b>configure filter mac-filter string entry number match llc-dsap mask number</b>
Tree	<a href="#">mask</a>
Range	1 to 255
Default	255
Introduced	16.0.R1
Platforms	All

## llc-ssap

Synopsis	Enable the <b>llc-ssap</b> context
Context	<b>configure filter mac-filter string entry number match llc-ssap</b>
Tree	<a href="#">llc-ssap</a>
Introduced	16.0.R1
Platforms	All

**mask number**

Synopsis	Source SAP mask
Context	<b>configure filter mac-filter string entry number match llc-ssap mask number</b>
Tree	<a href="#">mask</a>
Range	1 to 255
Default	255
Introduced	16.0.R1
Platforms	All

**ssap number**

Synopsis	Source or destination SAP value
Context	<b>configure filter mac-filter string entry number match llc-ssap ssap number</b>
Tree	<a href="#">ssap</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**outer-tag**

Synopsis	Enable the <b>outer-tag</b> context
Context	<b>configure filter mac-filter string entry number match outer-tag</b>
Tree	<a href="#">outer-tag</a>
Introduced	16.0.R1
Platforms	All

**mask number**

Synopsis	Mask to VID of the inner VLAN tag before comparing it with the inner-tag or outer-tag value
Context	<b>configure filter mac-filter string entry number match outer-tag mask number</b>
Tree	<a href="#">mask</a>
Range	1 to 4095

Default	4095
Introduced	16.0.R1
Platforms	All

### **tag number**

Synopsis	Matching value against VID of the second or first VLAN tag in the packet carried transparently
Context	<b>configure filter mac-filter string entry number match outer-tag tag number</b>
Tree	<a href="#">tag</a>
Range	0 to 4095
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **snap-oui keyword**

Synopsis	Parameter snap-oui as a MAC filter match criteria
Context	<b>configure filter mac-filter string entry number match snap-oui keyword</b>
Tree	<a href="#">snap-oui</a>
Options	zero, non-zero
Introduced	16.0.R1
Platforms	All

### **snap-pid number**

Synopsis	Parameter snap-pid as a MAC filter match criteria
Context	<b>configure filter mac-filter string entry number match snap-pid number</b>
Tree	<a href="#">snap-pid</a>
Range	0 to 65535
Introduced	16.0.R1
Platforms	All

## src-mac

Synopsis	Enable the <b>src-mac</b> context
Context	<b>configure filter mac-filter string entry number match src-mac</b>
Tree	<a href="#">src-mac</a>
Introduced	16.0.R1
Platforms	All

## address string

Synopsis	MAC address used as the match criterion
Context	<b>configure filter mac-filter string entry number match src-mac address string</b>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## mask string

Synopsis	MAC address mask as the match criterion
Context	<b>configure filter mac-filter string entry number match src-mac mask string</b>
Tree	<a href="#">mask</a>
Default	ff:ff:ff:ff:ff:ff
Introduced	16.0.R1
Platforms	All

## pbr-down-action-override keyword

Synopsis	Action when PBR or PBF target for this entry is not available
Context	<b>configure filter mac-filter string entry number pbr-down-action-override keyword</b>
Tree	<a href="#">pbr-down-action-override</a>
Options	drop, forward, filter-default-action
Introduced	16.0.R1
Platforms	All

**sticky-dest** (*number* | *keyword*)

Synopsis	Time before action with available PBR or PBF destination and highest priority
Context	<b>configure</b> <b>filter</b> <b>mac-filter</b> <i>string</i> <b>entry</b> <i>number</i> <b>sticky-dest</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">sticky-dest</a>
Range	0 to 65535
Units	seconds
Options	no-hold-time-up
Introduced	16.0.R1
Platforms	All

**filter-id** *number***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	MAC filter ID
Context	<b>configure</b> <b>filter</b> <b>mac-filter</b> <i>string</i> <b>filter-id</b> <i>number</i>
Tree	<a href="#">filter-id</a>
Range	1 to 65535
Introduced	16.0.R1
Platforms	All

**scope** *keyword*

Synopsis	Filter policy scope
Context	<b>configure</b> <b>filter</b> <b>mac-filter</b> <i>string</i> <b>scope</b> <i>keyword</i>
Tree	<a href="#">scope</a>
Options	exclusive, template, embedded, system, cpm
Default	template
Introduced	16.0.R1
Platforms	All

**type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	MAC filter policy
Context	<b>configure</b> filter mac-filter <i>string</i> <b>type</b> <i>keyword</i>
Tree	<b>type</b>
Options	normal, isid, vid
Default	normal
Introduced	16.0.R1
Platforms	All

**match-list**

Synopsis	Enter the <b>match-list</b> context
Context	<b>configure</b> filter match-list
Tree	<b>match-list</b>
Introduced	16.0.R1
Platforms	All

**ip-prefix-list** [*prefix-list-name*] *string*

Synopsis	Enter the <b>ip-prefix-list</b> list instance
Context	<b>configure</b> filter match-list ip-prefix-list <i>string</i>
Tree	<b>ip-prefix-list</b>
Introduced	16.0.R1
Platforms	All

**[prefix-list-name]** *string*

Synopsis	IP prefix list name
Context	<b>configure</b> filter match-list ip-prefix-list <i>string</i>
Tree	<b>ip-prefix-list</b>
String Length	1 to 32
Notes	This element is part of a list key.

Introduced	16.0.R1
Platforms	All

## apply-path

Synopsis	Enter the <b>apply-path</b> context
Context	<b>configure</b> filter match-list ip-prefix-list <i>string</i> apply-path
Tree	apply-path
Introduced	16.0.R1
Platforms	All

## bgp-peers [*criteria-index*] *number*

Synopsis	Enter the <b>bgp-peers</b> list instance
Context	<b>configure</b> filter match-list ip-prefix-list <i>string</i> apply-path bgp-peers <i>number</i>
Tree	bgp-peers
Introduced	16.0.R1
Platforms	All

## [*criteria-index*] *number*

Synopsis	BGP peers auto-generation configuration index
Context	<b>configure</b> filter match-list ip-prefix-list <i>string</i> apply-path bgp-peers <i>number</i>
Tree	bgp-peers
Range	1 to 255
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

## group *string*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Regular expression to match against the base router BGP instance group configuration
----------	--

Context	<b>configure</b> filter match-list ip-prefix-list <i>string</i> apply-path bgp-peers <i>number</i> group <i>string</i>
Tree	group
String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### neighbor *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Regular expression to match against the base router BGP instance neighbor configuration
Context	<b>configure</b> filter match-list ip-prefix-list <i>string</i> apply-path bgp-peers <i>number</i> neighbor <i>string</i>
Tree	neighbor
String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### router-instance *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Target routing instance
Context	<b>configure</b> filter match-list ip-prefix-list <i>string</i> apply-path bgp-peers <i>number</i> router-instance <i>string</i>
Tree	router-instance
Default	Base
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ip-prefix-list</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**prefix** [[ip-prefix](#)] *string*

Synopsis	Add a list entry for <b>prefix</b>
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ip-prefix-list</a> <i>string</i> <a href="#">prefix</a> <i>string</i>
Tree	<a href="#">prefix</a>
Description	<p>Commands in this context add IPv4 prefixes to the prefix match list. Prefixes can overlap IPv4 address space.</p> <p>An IPv4 prefix addition is blocked if resource exhaustion is detected anywhere in the system due to filter policies that use the prefix list.</p>
Max. Instances	8192
Introduced	16.0.R1
Platforms	All

**[ip-prefix]** *string*

Synopsis	IPv4 prefix to be added to the prefix list
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ip-prefix-list</a> <i>string</i> <a href="#">prefix</a> <i>string</i>
Tree	<a href="#">prefix</a>
Notes	This element is part of a list key.
Introduced	16.0.R3
Platforms	All

**prefix-exclude** [[ip-prefix](#)] *string*

Synopsis	Add a list entry for <b>prefix-exclude</b>
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ip-prefix-list</a> <i>string</i> <a href="#">prefix-exclude</a> <i>string</i>
Tree	<a href="#">prefix-exclude</a>

Description	Commands in this context exclude IPv4 prefixes from the prefix match list. This command is mutually exclusive with the <b>apply-path</b> command.
Max. Instances	512
Introduced	16.0.R4
Platforms	All

**[ip-prefix]** *string*

Synopsis	IPv4 prefix to be added to the prefix list
Context	<b>configure</b> <b>filter</b> <b>match-list</b> <b>ip-prefix-list</b> <i>string</i> <b>prefix-exclude</b> <i>string</i>
Tree	<a href="#">prefix-exclude</a>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

**ipv6-prefix-list** [[prefix-list-name](#)] *string*

Synopsis	Enter the <b>ipv6-prefix-list</b> list instance
Context	<b>configure</b> <b>filter</b> <b>match-list</b> <b>ipv6-prefix-list</b> <i>string</i>
Tree	<a href="#">ipv6-prefix-list</a>
Introduced	16.0.R1
Platforms	All

**[prefix-list-name]** *string*

Synopsis	IP prefix list name
Context	<b>configure</b> <b>filter</b> <b>match-list</b> <b>ipv6-prefix-list</b> <i>string</i>
Tree	<a href="#">ipv6-prefix-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

## apply-path

Synopsis	Enter the <b>apply-path</b> context
Context	<b>configure</b> filter match-list ipv6-prefix-list <i>string</i> apply-path
Tree	apply-path
Introduced	16.0.R1
Platforms	All

## bgp-peers [*criteria-index*] *number*

Synopsis	Enter the <b>bgp-peers</b> list instance
Context	<b>configure</b> filter match-list ipv6-prefix-list <i>string</i> apply-path bgp-peers <i>number</i>
Tree	bgp-peers
Introduced	16.0.R1
Platforms	All

## [*criteria-index*] *number*

Synopsis	BGP peers auto-generation configuration index
Context	<b>configure</b> filter match-list ipv6-prefix-list <i>string</i> apply-path bgp-peers <i>number</i>
Tree	bgp-peers
Range	1 to 255
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

## group *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Regular expression to match against the base router BGP instance group configuration
Context	<b>configure</b> filter match-list ipv6-prefix-list <i>string</i> apply-path bgp-peers <i>number</i> group <i>string</i>
Tree	group
String Length	1 to 255

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **neighbor** *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Regular expression to match against the base router BGP instance neighbor configuration
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ipv6-prefix-list</a> <i>string</i> <a href="#">apply-path</a> <a href="#">bgp-peers</a> <i>number</i> <b>neighbor</b> <i>string</i>
Tree	<a href="#">neighbor</a>
String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **router-instance** *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Target routing instance
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ipv6-prefix-list</a> <i>string</i> <a href="#">apply-path</a> <a href="#">bgp-peers</a> <i>number</i> <b>router-instance</b> <i>string</i>
Tree	<a href="#">router-instance</a>
Default	Base
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
----------	------------------

Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ipv6-prefix-list</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **prefix** [[ipv6-prefix](#)] *string*

Synopsis	Add a list entry for <b>prefix</b>
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ipv6-prefix-list</a> <i>string</i> <a href="#">prefix</a> <i>string</i>
Tree	<a href="#">prefix</a>
Max. Instances	8192
Introduced	16.0.R1
Platforms	All

### **[ipv6-prefix]** *string*

Synopsis	IPv6 prefix to be added to the prefix list
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ipv6-prefix-list</a> <i>string</i> <a href="#">prefix</a> <i>string</i>
Tree	<a href="#">prefix</a>
Notes	This element is part of a list key.
Introduced	16.0.R3
Platforms	All

### **prefix-exclude** [[ipv6-prefix](#)] *string*

Synopsis	Add a list entry for <b>prefix-exclude</b>
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">ipv6-prefix-list</a> <i>string</i> <a href="#">prefix-exclude</a> <i>string</i>
Tree	<a href="#">prefix-exclude</a>
Description	Commands in this context exclude IPv6 prefixes from the prefix match list. This command is mutually exclusive with the <b>apply-path</b> command.
Max. Instances	512
Introduced	16.0.R4

Platforms All

### **[ipv6-prefix]** *string*

Synopsis IPv6 prefix to be added to the prefix list

Context **configure** **filter** **match-list** **ipv6-prefix-list** *string* **prefix-exclude** *string*

Tree [prefix-exclude](#)

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms All

### **port-list** [[port-list-name](#)] *string*

Synopsis Enter the **port-list** list instance

Context **configure** **filter** **match-list** **port-list** *string*

Tree [port-list](#)

Max. Instances 5120

Introduced 16.0.R1

Platforms All

### **[port-list-name]** *string*

Synopsis Port list name

Context **configure** **filter** **match-list** **port-list** *string*

Tree [port-list](#)

Description This command specifies the port list name. If special characters are used (#, \$, spaces, and so on), the string must be enclosed within double quotes.

String Length 1 to 32

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **description** *string*

Synopsis Text description

Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**port** [[value](#)] *number*

Synopsis	Add a list entry for <b>port</b>
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i> <a href="#">port</a> <i>number</i>
Tree	<a href="#">port</a>
Introduced	16.0.R1
Platforms	All

**[value]** *number*

Synopsis	Port value
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i> <a href="#">port</a> <i>number</i>
Tree	<a href="#">port</a>
Range	0 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**range** [start](#) *number* [end](#) *number*

Synopsis	Add a list entry for <b>range</b>
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i> <a href="#">range</a> <a href="#">start</a> <i>number</i> <a href="#">end</a> <i>number</i>
Tree	<a href="#">range</a>
Introduced	16.0.R1
Platforms	All

**start** *number*

Synopsis	Lower bound of the port list range
----------	------------------------------------

Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i> <a href="#">range</a> <a href="#">start</a> <i>number</i> <a href="#">end</a> <i>number</i>
Tree	<a href="#">range</a>
Range	0 to 65534
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **end** *number*

Synopsis	Upper bound of the port list range
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">port-list</a> <i>string</i> <a href="#">range</a> <a href="#">start</a> <i>number</i> <a href="#">end</a> <i>number</i>
Tree	<a href="#">range</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **protocol-list** [[protocol-list-name](#)] *string*

Synopsis	Enter the <b>protocol-list</b> list instance
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">protocol-list</a> <i>string</i>
Tree	<a href="#">protocol-list</a>
Max. Instances	512
Introduced	20.7.R1
Platforms	All

### [[protocol-list-name](#)] *string*

Synopsis	Protocol list name
Context	<b>configure</b> <a href="#">filter</a> <a href="#">match-list</a> <a href="#">protocol-list</a> <i>string</i>
Tree	<a href="#">protocol-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	20.7.R1

### **[protocol-id]** (*number* | *keyword*)

Synopsis IP protocol identifier  
 Context **configure** [filter](#) [match-list](#) [protocol-list](#) *string* **protocol** (*number* | *keyword*)  
 Tree [protocol](#)  
 Range 0 to 255  
 Options icmp, igmp, ip, tcp, egg, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp  
 Notes This element is part of a list key.  
 Introduced 20.7.R1  
 Platforms All

## md-auto-id

Synopsis	Enter the <b>md-auto-id</b> context
Context	<b>configure</b> filter md-auto-id
Tree	md-auto-id
Introduced	16.0.R1
Platforms	All

## filter-id-range

Synopsis	Enable the <b>filter-id-range</b> context
Context	<b>configure</b> filter md-auto-id filter-id-range
Tree	filter-id-range
Introduced	16.0.R1
Platforms	All

## end number

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Upper bound of the ID range
Context	<b>configure</b> filter md-auto-id filter-id-range end <i>number</i>
Tree	end
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

## start number

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Lower bound of the ID range
----------	-----------------------------

Context	<b>configure</b> filter md-auto-id filter-id-range start <i>number</i>
Tree	<a href="#">start</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **redirect-policy** [[redirect-policy-name](#)] *string*

Synopsis	Enter the <b>redirect-policy</b> list instance
Context	<b>configure</b> filter <a href="#">redirect-policy</a> <i>string</i>
Tree	<a href="#">redirect-policy</a>
Introduced	16.0.R1
Platforms	All

### **[redirect-policy-name]** *string*

Synopsis	Redirect policy name
Context	<b>configure</b> filter <a href="#">redirect-policy</a> <i>string</i>
Tree	<a href="#">redirect-policy</a>
Description	This command specifies the redirect policy name. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes.
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the redirect policy
Context	<b>configure</b> filter <a href="#">redirect-policy</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable

Introduced 16.0.R1  
 Platforms All

String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **ping-test**

Synopsis	Enable the <b>ping-test</b> context
Context	<b>configure filter redirect-policy</b> <i>string destination</i> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">ping-test</a>
Tree	<a href="#">ping-test</a>
Introduced	16.0.R1
Platforms	All

### **drop-count** *number*

Synopsis	Number of consecutive requests that fail before destination is declared unreachable
Context	<b>configure filter redirect-policy</b> <i>string destination</i> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">ping-test drop-count</a> <i>number</i>
Tree	<a href="#">drop-count</a>
Range	1 to 60
Default	3
Introduced	16.0.R1
Platforms	All

### **hold-down** *number*

Synopsis	Time for the system to be held down if this test has marked it unreachable
Context	<b>configure</b> <b>filter</b> <b>redirect-policy</b> <i>string destination</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>ping-test</b> <b>hold-down</b> <i>number</i>
Tree	<b>hold-down</b>
Range	0 to 86400
Units	seconds
Default	0
Introduced	16.0.R1
Platforms	All

### **interval** *number*

Synopsis	Time between consecutive requests which are sent to the far end host
Context	<b>configure</b> <b>filter</b> <b>redirect-policy</b> <i>string destination</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>ping-test</b> <b>interval</b> <i>number</i>
Tree	<b>interval</b>
Range	1 to 60
Units	seconds
Default	1
Introduced	16.0.R1
Platforms	All

### **source-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source address to use in the IP packet of the ping test
Context	<b>configure</b> <b>filter</b> <b>redirect-policy</b> <i>string destination</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>ping-test</b> <b>source-address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<b>source-address</b>
Introduced	16.0.R4
Platforms	All

### **timeout** *number*

Synopsis	Time required to receive a response from the far end host
----------	---

Context	<b>configure filter redirect-policy</b> <i>string destination</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>ping-test timeout</b> <i>number</i>
Tree	<b>timeout</b>
Range	1 to 60
Units	seconds
Default	1
Introduced	16.0.R1
Platforms	All

### **priority** *number*

Synopsis	Priority for this destination
Context	<b>configure filter redirect-policy</b> <i>string destination</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>priority</b> <i>number</i>
Tree	<b>priority</b>
Range	1 to 255
Default	100
Introduced	16.0.R1
Platforms	All

### **unicast-rt-test**

Synopsis	Enable the <b>unicast-rt-test</b> context
Context	<b>configure filter redirect-policy</b> <i>string destination</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>unicast-rt-test</b>
Tree	<b>unicast-rt-test</b>
Introduced	16.0.R1
Platforms	All

### **notify-dest-change** *boolean*

Synopsis	Send notifications when the active destination changes
Context	<b>configure filter redirect-policy</b> <i>string notify-dest-change</i> <i>boolean</i>
Tree	<b>notify-dest-change</b>
Description	When configured to <b>true</b> , notifications (such as Log and SNMP) are sent when the active destination of a redirect policy changes. No notification is sent when there are no more active destinations (as this scenario is covered by another notification).

When configured to **false**, the notification generation is disabled.

Default	false
Introduced	16.0.R4
Platforms	All

### **router-instance** *string*

Synopsis	Routing context to use for route lookup
Context	<b>configure</b> <a href="#">filter</a> <a href="#">redirect-policy</a> <i>string</i> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>
Introduced	16.0.R1
Platforms	All

### **sticky-dest** (*number* | *keyword*)

Synopsis	Time required by system before applying the current best destination as active destination
Context	<b>configure</b> <a href="#">filter</a> <a href="#">redirect-policy</a> <i>string</i> <a href="#">sticky-dest</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">sticky-dest</a>
Range	0 to 65535
Units	seconds
Options	no-hold-time-up
Introduced	16.0.R1
Platforms	All

### **redirect-policy-binding** [[binding-name](#)] *string*

Synopsis	Enter the <b>redirect-policy-binding</b> list instance
Context	<b>configure</b> <a href="#">filter</a> <a href="#">redirect-policy-binding</a> <i>string</i>
Tree	<a href="#">redirect-policy-binding</a>
Max. Instances	16
Introduced	16.0.R4
Platforms	All

**[binding-name]** *string*

Synopsis	Binding name
Context	<b>configure</b> filter <a href="#">redirect-policy-binding</a> <i>string</i>
Tree	<a href="#">redirect-policy-binding</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

**binding-operator** *keyword*

Synopsis	Logical operator used to obtain the master test result
Context	<b>configure</b> filter <a href="#">redirect-policy-binding</a> <i>string</i> <a href="#">binding-operator</a> <i>keyword</i>
Tree	<a href="#">binding-operator</a>
Description	This command configures the logical operator to use with the destinations' test results to obtain the master test result (the redirect policy binding test result).
Options	and, or
Default	and
Introduced	16.0.R4
Platforms	All

**redirect-policy** [[redirect-policy-name](#)] *reference*

Synopsis	Enter the <b>redirect-policy</b> list instance
Context	<b>configure</b> filter <a href="#">redirect-policy-binding</a> <i>string</i> <a href="#">redirect-policy</a> <i>reference</i>
Tree	<a href="#">redirect-policy</a>
Introduced	16.0.R4
Platforms	All

**[redirect-policy-name]** *reference*

Synopsis	Redirect policy name
Context	<b>configure</b> filter <a href="#">redirect-policy-binding</a> <i>string</i> <a href="#">redirect-policy</a> <i>reference</i>
Tree	<a href="#">redirect-policy</a>
Reference	<b>configure</b> filter <a href="#">redirect-policy</a> <i>string</i>

Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

### **destination** [[destination-address](#)] *reference*

Synopsis	Add a list entry for <b>destination</b>
Context	<b>configure</b> filter <a href="#">redirect-policy-binding</a> <i>string</i> <a href="#">redirect-policy</a> <i>reference</i> <a href="#">destination</a> <i>reference</i>
Tree	<a href="#">destination</a>
Min. Instances	1
Introduced	16.0.R4
Platforms	All

### **[destination-address]** *reference*

Synopsis	IP address of redirect policy destination to binding
Context	<b>configure</b> filter <a href="#">redirect-policy-binding</a> <i>string</i> <a href="#">redirect-policy</a> <i>reference</i> <a href="#">destination</a> <i>reference</i>
Tree	<a href="#">destination</a>
Reference	<b>configure</b> filter <a href="#">redirect-policy</a> <i>string</i> <a href="#">destination</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

### **system-filter**

Synopsis	Enter the <b>system-filter</b> context
Context	<b>configure</b> filter <a href="#">system-filter</a>
Tree	<a href="#">system-filter</a>
Introduced	16.0.R1
Platforms	All

**ip [ip-filter] reference**

Synopsis	Add a list entry for <b>ip</b>
Context	<b>configure filter system-filter ip reference</b>
Tree	<a href="#">ip</a>
Max. Instances	1
Introduced	16.0.R1
Platforms	All

**[ip-filter] reference**

Synopsis	Active IPv4 system filter policy
Context	<b>configure filter system-filter ip reference</b>
Tree	<a href="#">ip</a>
Reference	<b>configure filter ip-filter string</b>
Notes	This element is part of a list key.
Introduced	16.0.R3
Platforms	All

**ipv6 [ipv6-filter] reference**

Synopsis	Add a list entry for <b>ipv6</b>
Context	<b>configure filter system-filter ipv6 reference</b>
Tree	<a href="#">ipv6</a>
Max. Instances	1
Introduced	16.0.R1
Platforms	All

**[ipv6-filter] reference**

Synopsis	Active IPv6 system filter policy
Context	<b>configure filter system-filter ipv6 reference</b>
Tree	<a href="#">ipv6</a>
Reference	<b>configure filter ipv6-filter string</b>

Notes	This element is part of a list key.
Introduced	16.0.R3
Platforms	All

### 3.18 fwd-path-ext commands

```

configure
- fwd-path-ext
- apply-groups reference
- apply-groups-exclude reference
- fpe number
- application
- pw-port-extension
- interface-a
- qos
- network-policy reference
- interface-b
- qos
- network-policy reference
- srv6
- interface-a
- qos
- network-policy reference
- interface-b
- mtu number
- qos
- network-policy reference
- type keyword
- sub-mgmt-extension boolean
- vxlan
- router-instance string
- apply-groups reference
- apply-groups-exclude reference
- description string
- multi-path
- path number
- apply-groups reference
- apply-groups-exclude reference
- pxc reference
- xc-lag-a reference
- xc-lag-b reference
- path
- pxc reference
- xc-lag-a reference
- xc-lag-b reference
- sdp-id-range
- apply-groups reference
- apply-groups-exclude reference
- end number
- start number

```

### 3.18.1 fwd-path-ext command descriptions

#### fwd-path-ext

Synopsis	Enter the <b>fwd-path-ext</b> context
Context	<b>configure fwd-path-ext</b>
Tree	<a href="#">fwd-path-ext</a>
Description	Commands in this context configure a Forwarding Path Extension (FPE). Some applications that rely on PXC functionality utilize FPE to simplify the configuration of these applications.
Introduced	16.0.R1
Platforms	All

#### fpe [[fpe-id](#)] *number*

Synopsis	Enter the <b>fpe</b> list instance
Context	<b>configure fwd-path-ext fpe <i>number</i></b>
Tree	<a href="#">fpe</a>
Description	Commands in this context configure the Forwarding Path Extension (FPE), which associates an application with a PXC (a paired set of PXC sub-ports or a paired set of PXC-based LAGs).
Introduced	16.0.R1
Platforms	All

#### [\[fpe-id\]](#) *number*

Synopsis	FPE ID
Context	<b>configure fwd-path-ext fpe <i>number</i></b>
Tree	<a href="#">fpe</a>
Range	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

## application

Synopsis	Enter the <b>application</b> context
Context	<b>configure fwd-path-ext fpe number application</b>
Tree	<a href="#">application</a>
Description	Commands in this context configure the attributes of the FPE application.
Introduced	16.0.R1
Platforms	All

## pw-port-extension

Synopsis	Enable the <b>pw-port-extension</b> context
Context	<b>configure fwd-path-ext fpe number application pw-port-extension</b>
Tree	<a href="#">pw-port-extension</a>
Description	<p>Commands in this context configure the type of the cross-connect required to terminate an external tunnel to an anchored PW port. The system automatically builds the internal infrastructure required to perform the tunnel termination on a PW port.</p> <p>PW ports support the following types of tunnels:</p> <ul style="list-style-type: none"> <li>• GRE/MPLS PW with SDP of type MPLS or GRE</li> <li>• L2oGRE bridged Ethernet over GRE, where GRE protocol number is 0x6558</li> </ul>
Introduced	22.2.R1
Platforms	All

## interface-a

Synopsis	Enter the <b>interface-a</b> context
Context	<b>configure fwd-path-ext fpe number application pw-port-extension interface-a</b>
Tree	<a href="#">interface-a</a>
Description	Commands in this context configure the command options for network interface-a of the PW port extension FPE.
Introduced	22.10.R1
Platforms	All

## qos

Synopsis	Enter the <b>qos</b> context
Context	<b>configure fwd-path-ext fpe number application pw-port-extension interface-a qos</b>

Tree	<a href="#">qos</a>
Introduced	22.10.R1
Platforms	All

### **network-policy** *reference*

Synopsis	Network QoS policy applied to the FPE interface
Context	<b>configure</b> <a href="#">fwd-path-ext fpe number application pw-port-extension interface-a qos network-policy reference</a>
Tree	<a href="#">network-policy</a>
Reference	<b>configure</b> <a href="#">qos network string</a>
Introduced	22.10.R1
Platforms	All

### **interface-b**

Synopsis	Enter the <b>interface-b</b> context
Context	<b>configure</b> <a href="#">fwd-path-ext fpe number application pw-port-extension interface-b</a>
Tree	<a href="#">interface-b</a>
Description	Commands in this context configure command options for network interface-b of the PW port extension FPE.
Introduced	22.10.R1
Platforms	All

### **qos**

Synopsis	Enter the <b>qos</b> context
Context	<b>configure</b> <a href="#">fwd-path-ext fpe number application pw-port-extension interface-b qos</a>
Tree	<a href="#">qos</a>
Introduced	22.10.R1
Platforms	All

### **network-policy** *reference*

Synopsis	Network QoS policy applied to the FPE interface
----------	---

Context	<b>configure fwd-path-ext fpe number application pw-port-extension interface-b qos network-policy reference</b>
Tree	<a href="#">network-policy</a>
Reference	<b>configure qos network string</b>
Introduced	22.10.R1
Platforms	All

## srv6

Synopsis	Enable the <b>srv6</b> context
Context	<b>configure fwd-path-ext fpe number application srv6</b>
Tree	<a href="#">srv6</a>
Description	Commands in this context configure the SRv6 FPE application used for origination or termination of SRv6 tunnels.
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

## interface-a

Synopsis	Enter the <b>interface-a</b> context
Context	<b>configure fwd-path-ext fpe number application srv6 interface-a</b>
Tree	<a href="#">interface-a</a>
Description	Commands in this context configure the parameters of network interface-a of the SRv6 FPE.
Introduced	21.5.R2
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

## qos

Synopsis	Enter the <b>qos</b> context
Context	<b>configure fwd-path-ext fpe number application srv6 interface-a qos</b>
Tree	<a href="#">qos</a>
Introduced	21.5.R2
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**network-policy** *reference*

Synopsis	Network QoS policy applied to the FPE interface
Context	<b>configure fwd-path-ext fpe number application srv6 interface-a qos network-policy reference</b>
Tree	<a href="#">network-policy</a>
Reference	<b>configure qos network string</b>
Introduced	21.5.R2
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**interface-b**

Synopsis	Enter the <b>interface-b</b> context
Context	<b>configure fwd-path-ext fpe number application srv6 interface-b</b>
Tree	<a href="#">interface-b</a>
Description	Commands in this context configure the parameters of network interface-b of the SRv6 FPE.
Introduced	21.5.R2
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**mtu** *number*

Synopsis	MTU size of SRv6 origination FPE interface-b
Context	<b>configure fwd-path-ext fpe number application srv6 interface-b mtu number</b>
Tree	<a href="#">mtu</a>
Description	<p>This command configures the Maximum Transfer Unit (MTU) of interface-b of the SRv6 origination FPE.</p> <p>The MTU is used to check if an IPv4 service packet should be fragmented and if an IPv6 service packet should be dropped when tunneled over SRv6.</p> <p>The minimum value is the IPv6 minimum MTU value. The maximum value is set to the maximum Ethernet port MTU (9800) minus 14 bytes for Null Ethernet encapsulation.</p>
Range	0   1280 to 9786
Introduced	21.5.R2
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**qos**

Synopsis	Enter the <b>qos</b> context
Context	<b>configure fwd-path-ext fpe number application srv6 interface-b qos</b>
Tree	<a href="#">qos</a>
Introduced	21.5.R2
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**network-policy reference**

Synopsis	Network QoS policy applied to the FPE interface
Context	<b>configure fwd-path-ext fpe number application srv6 interface-b qos network-policy reference</b>
Tree	<a href="#">network-policy</a>
Reference	<b>configure qos network string</b>
Introduced	21.5.R2
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**type keyword**

Synopsis	SRv6 FPE application type
Context	<b>configure fwd-path-ext fpe number application srv6 type keyword</b>
Tree	<a href="#">type</a>
Description	<p>This command specifies if the SRv6 FPE application is used for origination or termination of SRv6 tunnels.</p> <p>A dedicated SRv6 FPE is required for origination and termination of SRv6 tunnels on services and they cannot share the same FPE.</p> <p>A single FPE can be configured for SRv6 origination. One or more FPEs can be configured for SRv6 termination, where a termination SRv6 FPE is assigned one or more configured locators.</p> <p>Transit SRv6 routers do not require SRv6 FPEs.</p>
Options	origination, termination
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**sub-mgmt-extension** *boolean*

Synopsis	Enable FPE for subscriber management extensions
Context	<b>configure fwd-path-ext fpe number application sub-mgmt-extension boolean</b>
Tree	<a href="#">sub-mgmt-extension</a>
Description	When configured to <b>true</b> , the FPE is used for subscriber management extensions. The FPE can be used for multiple subscriber management applications, but it cannot be used for other applications.  When configured to <b>false</b> , the FPE is not used for subscriber management extensions.
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**vxlan**

Synopsis	Enable the <b>vxlan</b> context
Context	<b>configure fwd-path-ext fpe number application vxlan</b>
Tree	<a href="#">vxlan</a>
Introduced	22.2.R1
Platforms	All

**router-instance** *string*

Synopsis	Router instance for VXLAN termination
Context	<b>configure fwd-path-ext fpe number application vxlan router-instance string</b>
Tree	<a href="#">router-instance</a>
Default	Base
Introduced	22.2.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure fwd-path-ext fpe number description string</b>
Tree	<a href="#">description</a>
String Length	1 to 80

Introduced	16.0.R1
Platforms	All

## multi-path

Synopsis	Enable the <b>multi-path</b> context
Context	<b>configure fwd-path-ext fpe number multi-path</b>
Tree	<a href="#">multi-path</a>
Description	Commands in this context configure a multipath FPE that can contain multiple PXC ports or LAGs of PXC ports.
Notes	The following elements are part of a choice: <b>multi-path</b> or <b>path</b> .
Introduced	21.10.R1
Platforms	All

## path [path-id] number

Synopsis	Enter the <b>path</b> list instance
Context	<b>configure fwd-path-ext fpe number multi-path path number</b>
Tree	<a href="#">path</a>
Description	Commands in this context configure a multipath FPE forwarding path. A single path in a multipath FPE can contain a single PXC port or a LAG of PXC ports.
Introduced	21.10.R1
Platforms	All

## [path-id] number

Synopsis	Multipath FPE forwarding path ID
Context	<b>configure fwd-path-ext fpe number multi-path path number</b>
Tree	<a href="#">path</a>
Range	1 to 64
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	All

### **pxc reference**

Synopsis	Dedicated PXC ID used by the FPE path
Context	<b>configure fwd-path-ext fpe number multi-path path number pxc reference</b>
Tree	<a href="#">pxc</a>
Reference	<b>configure port-xc pxc number</b>
Notes	The following elements are part of a choice: <b>pxc</b> or ( <b>xc-lag-a</b> and <b>xc-lag-b</b> ).
Introduced	21.10.R1
Platforms	All

### **xc-lag-a reference**

Synopsis	PXC LAG identifier dedicated to the FPE path
Context	<b>configure fwd-path-ext fpe number multi-path path number xc-lag-a reference</b>
Tree	<a href="#">xc-lag-a</a>
Description	This command specifies the LAG identifier associated with one side of the PXC. The operator can associate <b>xc-lag-a</b> with the LAG containing either supports.a or supports.b. The system does not enforce a match between <b>xc-lag-a</b> and the LAG ID containing supports.a.
Reference	<b>configure lag string</b>
Notes	The following elements are part of a choice: <b>pxc</b> or ( <b>xc-lag-a</b> and <b>xc-lag-b</b> ).
Introduced	21.10.R1
Platforms	All

### **xc-lag-b reference**

Synopsis	PXC LAG identifier dedicated to the FPE path
Context	<b>configure fwd-path-ext fpe number multi-path path number xc-lag-b reference</b>
Tree	<a href="#">xc-lag-b</a>
Description	This command specifies the LAG identifier associated with one side of the PXC. The operator can associate <b>xc-lag-b</b> with the LAG containing either supports.a or supports.b. The system does not enforce a match between <b>xc-lag-b</b> and the LAG ID containing supports.b.
Reference	<b>configure lag string</b>
Notes	The following elements are part of a choice: <b>pxc</b> or ( <b>xc-lag-a</b> and <b>xc-lag-b</b> ).
Introduced	21.10.R1

Platforms All

## path

Synopsis Enter the **path** context

Context **configure fwd-path-ext fpe number path**

Tree [path](#)

Notes The following elements are part of a choice: **multi-path** or **path**.

Introduced 16.0.R1

Platforms All

## pxc reference

Synopsis Dedicated PXC ID used by the FPE path

Context **configure fwd-path-ext fpe number path pxc reference**

Tree [pxc](#)

Reference **configure port-xc pxc number**

Notes The following elements are part of a choice: **pxc** or (**xc-lag-a** and **xc-lag-b**).

Introduced 16.0.R1

Platforms All

## xc-lag-a reference

Synopsis PXC LAG identifier dedicated to the FPE path

Context **configure fwd-path-ext fpe number path xc-lag-a reference**

Tree [xc-lag-a](#)

Description This command specifies the LAG identifier associated with one side of the PXC. The operator can associate **xc-lag-a** with the LAG containing either supports.a or supports.b. The system does not enforce a match between **xc-lag-a** and the LAG ID containing supports.a.

Reference **configure lag string**

Notes The following elements are part of a choice: **pxc** or (**xc-lag-a** and **xc-lag-b**).

Introduced 16.0.R4

Platforms All

## **xc-lag-b** reference

Synopsis	PXC LAG identifier dedicated to the FPE path
Context	<b>configure fwd-path-ext fpe number path xc-lag-b reference</b>
Tree	<a href="#">xc-lag-b</a>
Description	This command specifies the LAG identifier associated with one side of the PXC. The operator can associate <b>xc-lag-b</b> with the LAG containing either subports.a or subports.b. The system does not enforce a match between <b>xc-lag-b</b> and the LAG ID containing subports.b.
Reference	<b>configure lag string</b>
Notes	The following elements are part of a choice: <b>pxc</b> or ( <b>xc-lag-a</b> and <b>xc-lag-b</b> ).
Introduced	16.0.R4
Platforms	All

## **sdp-id-range**

Synopsis	Enable the <b>sdp-id-range</b> context
Context	<b>configure fwd-path-ext sdp-id-range</b>
Tree	<a href="#">sdp-id-range</a>
Description	<p>Commands in this context configure the SDP ID range used by the FPE based PW port and VXLAN termination applications.</p> <p>Each configured FPE-based PW port is associated with two internal SDPs (one in each direction) whose IDs are allocated from the configured SDP ID range. When the FPE is associated with VXLAN termination, an internal SDP is allocated from the configured SDP ID range and is used for R-VPLS services that terminate VXLAN IPv6. A spoke SDP per VXLAN IPv6 R-VPLS service is created on that SDP for egress processing of the packets. The SDP ID range cannot be modified if any of its IDs are currently in use.</p>
Introduced	16.0.R1
Platforms	All

## **end number**

Synopsis	Upper bound of the SDP ID range
Context	<b>configure fwd-path-ext sdp-id-range end number</b>
Tree	<a href="#">end</a>
Range	1 to 32767
Notes	This element is mandatory.
Introduced	16.0.R1

---

Platforms All

### **start number**

Synopsis Lower bound of the SDP ID range

Context **configure fwd-path-ext sdp-id-range start number**

Tree [start](#)

Range 1 to 32767

Notes This element is mandatory.

Introduced 16.0.R1

Platforms All

## 3.19 group-encryption commands

```
configure
- group-encryption
  - apply-groups reference
  - apply-groups-exclude reference
  - encryption-keygroup number
    - active-outbound-security-association reference
    - apply-groups reference
    - apply-groups-exclude reference
    - authentication-algorithm keyword
    - description string
    - encryption-algorithm keyword
    - keygroup-name string
    - security-association number
      - apply-groups reference
      - apply-groups-exclude reference
      - authentication-key string
      - encryption-key string
  - group-encryption-label number
```

### 3.19.1 group-encryption command descriptions

#### group-encryption

Synopsis	Enter the <b>group-encryption</b> context
Context	<b>configure</b> <a href="#">group-encryption</a>
Tree	<a href="#">group-encryption</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

#### encryption-keygroup [id] number

Synopsis	Enter the <b>encryption-keygroup</b> list instance
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i>
Tree	<a href="#">encryption-keygroup</a>
Max. Instances	127
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

#### [id] number

Synopsis	Encryption key group ID
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i>
Tree	<a href="#">encryption-keygroup</a>
Range	1 to 127
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

#### active-outbound-security-association *reference*

Synopsis	SPI to use for egressing packets for the key group
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i> <a href="#">active-outbound-security-association</a> <i>reference</i>

Tree	<a href="#">active-outbound-security-association</a>
Reference	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i> <a href="#">security-association</a> <i>number</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **authentication-algorithm** *keyword*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Hashing algorithm used for the authentication function
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i> <a href="#">authentication-algorithm</a> <i>keyword</i>
Tree	<a href="#">authentication-algorithm</a>
Options	sha256, sha512
Default	sha256
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **encryption-algorithm** *keyword*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Encryption algorithm for encryption on ESP
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i> <a href="#">encryption-algorithm</a> <i>keyword</i>

Tree	<a href="#">encryption-algorithm</a>
Options	aes128, aes256
Default	aes128
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **keygroup-name** *string*

Synopsis	Key group name
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i> <a href="#">keygroup-name</a> <i>string</i>
Tree	<a href="#">keygroup-name</a>
String Length	0 to 64
Default	
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **security-association** [[security-parameter-index](#)] *number*

Synopsis	Enter the <b>security-association</b> list instance
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i> <a href="#">security-association</a> <i>number</i>
Tree	<a href="#">security-association</a>
Max. Instances	4
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[security-parameter-index]** *number*

Synopsis	Security Parameter Index (SPI)
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i> <a href="#">security-association</a> <i>number</i>
Tree	<a href="#">security-association</a>
Range	1 to 1023
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## authentication-key *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Key used for the authentication algorithm
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i> <a href="#">security-association</a> <i>number</i> <a href="#">authentication-key</a> <i>string</i>
Tree	<a href="#">authentication-key</a>
String Length	1 to 115
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## encryption-key *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Key used for the encryption algorithm
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">encryption-keygroup</a> <i>number</i> <a href="#">security-association</a> <i>number</i> <a href="#">encryption-key</a> <i>string</i>
Tree	<a href="#">encryption-key</a>
String Length	1 to 71
Notes	This element is mandatory.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## group-encryption-label *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Network-wide unique MPLS label for group encryption
Context	<b>configure</b> <a href="#">group-encryption</a> <a href="#">group-encryption-label</a> <i>number</i>

Tree	<a href="#">group-encryption-label</a>
Range	32 to 2047
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## 3.20 ipsec commands

```

configure
- ipsec
  - apply-groups reference
  - apply-groups-exclude reference
  - cert-profile string
    - admin-state keyword
  - apply-groups reference
  - apply-groups-exclude reference
  - entry number

### 3.20.1 ipsec command descriptions

#### ipsec

Synopsis	Enter the <b>ipsec</b> context
Context	<b>configure ipsec</b>
Tree	<a href="#">ipsec</a>
Description	Commands in this context configure Internet Protocol Security (IPsec) commands.
Introduced	16.0.R4
Platforms	All

#### cert-profile [[name](#)] *string*

Synopsis	Enter the <b>cert-profile</b> list instance
Context	<b>configure ipsec cert-profile <i>string</i></b>
Tree	<a href="#">cert-profile</a>
Description	Commands in this context configure the certificate profile.
Max. Instances	10200
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

#### [\[name\]](#) *string*

Synopsis	Certificate profile name
Context	<b>configure ipsec cert-profile <i>string</i></b>
Tree	<a href="#">cert-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

#### admin-state *keyword*

Synopsis	Administrative state of the certificate profile
----------	---

Context	<b>configure ipsec cert-profile</b> <i>string admin-state keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	disable
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure ipsec cert-profile</b> <i>string entry number</i>
Tree	<b>entry</b>
Description	Commands in this context configure the certificate profile entry.
Max. Instances	8
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[id]** *number*

Synopsis	Certificate profile entry ID
Context	<b>configure ipsec cert-profile</b> <i>string entry number</i>
Tree	<b>entry</b>
Range	1 to 8
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **cert** *string*

Synopsis	File name of the imported certificate for the entry
Context	<b>configure ipsec cert-profile</b> <i>string entry number cert string</i>
Tree	<b>cert</b>
String Length	1 to 95
Introduced	19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **compare-chain-include** *reference*

Synopsis CA profile to include in the compare-chain

Context **configure ipsec cert-profile** *string entry number compare-chain-include reference*

Tree [compare-chain-include](#)

Description This command specifies the Certificate Authority (CA) that needs to be included in the compare-chain for the entry. This configuration is required in instances where the configured root CA is cross-signed by another CA.

Reference **configure system security pki ca-profile** *string*

Introduced 23.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **key** *string*

Synopsis File name of the imported key used for authentication

Context **configure ipsec cert-profile** *string entry number key string*

Tree [key](#)

String Length 1 to 95

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **rsa-signature** *keyword*

Synopsis Signature scheme for the RSA key

Context **configure ipsec cert-profile** *string entry number rsa-signature keyword*

Tree [rsa-signature](#)

Options pkcs1, pss

Default pkcs1

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **send-chain**

Synopsis Enter the **send-chain** context

Context	<b>configure ipsec cert-profile</b> <i>string entry number send-chain</i>
Tree	<a href="#">send-chain</a>
Description	Commands in this context allow the system to send additional CA certificates to the peer. These additional CA certificates must be in the certificate chain of the certificate specified by the <b>cert</b> command in the same entry.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ca-profile** *reference*

Synopsis	CA certificate to send to the peer
Context	<b>configure ipsec cert-profile</b> <i>string entry number send-chain ca-profile reference</i>
Tree	<a href="#">ca-profile</a>
Reference	<b>configure system security pki ca-profile</b> <i>string</i>
Max. Instances	7
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **client-db** [*name*] *string*

Synopsis	Enter the <b>client-db</b> list instance
Context	<b>configure ipsec client-db</b> <i>string</i>
Tree	<a href="#">client-db</a>
Max. Instances	1000
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	IPsec client database name
Context	<b>configure ipsec client-db</b> <i>string</i>
Tree	<a href="#">client-db</a>
String Length	1 to 32
Notes	This element is part of a list key.

Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the client database
Context	<b>configure ipsec client-db</b> <i>string admin-state keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**client** [[id](#)] *number*

Synopsis	Enter the <b>client</b> list instance
Context	<b>configure ipsec client-db</b> <i>string client number</i>
Tree	<a href="#">client</a>
Description	Commands in this context configure the IPsec client entry in the client database.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[id]** *number*

Synopsis	Client ID
Context	<b>configure ipsec client-db</b> <i>string client number</i>
Tree	<a href="#">client</a>
Range	1 to 8000
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the database client
----------	---

Context	<b>configure ipsec client-db</b> <i>string client number admin-state keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### client-name *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Client name
Context	<b>configure ipsec client-db</b> <i>string client number client-name string</i>
Tree	<a href="#">client-name</a>
String Length	1 to 32
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### credential

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>credential</b> context
Context	<b>configure ipsec client-db</b> <i>string client number credential</i>
Tree	<a href="#">credential</a>
Description	Commands in this context authenticate peers.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## pre-shared-key *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Pre-shared key used to authenticate peers
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">credential</a> <b>pre-shared-key</b> <i>string</i>
Tree	<a href="#">pre-shared-key</a>
String Length	1 to 115
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## identification

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>identification</b> context
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <b>identification</b>
Tree	<a href="#">identification</a>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## idi

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable the <b>idi</b> context
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <b>idi</b>
Tree	<a href="#">idi</a>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**any boolean****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Accept any IDi value as a match
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <a href="#">idi</a> <i>any boolean</i>
Tree	<a href="#">any</a>
Notes	The following elements are part of a mandatory choice: <b>any</b> , <b>fqdn</b> , <b>fqdn-suffix</b> , <b>ipv4-prefix</b> , <b>ipv4-prefix-any</b> , <b>ipv6-prefix</b> , <b>ipv6-prefix-any</b> , <b>rfc822</b> , or <b>rfc822-suffix</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**fqdn string****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	FQDN used as the match criteria for the IDi
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <a href="#">idi</a> <i>fqdn string</i>
Tree	<a href="#">fqdn</a>
String Length	0 to 255
Notes	The following elements are part of a mandatory choice: <b>any</b> , <b>fqdn</b> , <b>fqdn-suffix</b> , <b>ipv4-prefix</b> , <b>ipv4-prefix-any</b> , <b>ipv6-prefix</b> , <b>ipv6-prefix-any</b> , <b>rfc822</b> , or <b>rfc822-suffix</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**fqdn-suffix string****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	FQDN suffix used as the match criteria for the IDi
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <a href="#">idi</a> <i>fqdn-suffix string</i>
Tree	<a href="#">fqdn-suffix</a>
String Length	0 to 255

Notes	The following elements are part of a mandatory choice: <b>any</b> , <b>fqdn</b> , <b>fqdn-suffix</b> , <b>ipv4-prefix</b> , <b>ipv4-prefix-any</b> , <b>ipv6-prefix</b> , <b>ipv6-prefix-any</b> , <b>rfc822</b> , or <b>rfc822-suffix</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ipv4-prefix *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	IPv4 prefix used as the match criteria for the IDi
Context	<b>configure ipsec client-db string client number identification idi ipv4-prefix string</b>
Tree	<a href="#">ipv4-prefix</a>
Notes	The following elements are part of a mandatory choice: <b>any</b> , <b>fqdn</b> , <b>fqdn-suffix</b> , <b>ipv4-prefix</b> , <b>ipv4-prefix-any</b> , <b>ipv6-prefix</b> , <b>ipv6-prefix-any</b> , <b>rfc822</b> , or <b>rfc822-suffix</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ipv4-prefix-any *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Accept any valid IPv4 prefix as a match for the IDi
Context	<b>configure ipsec client-db string client number identification idi ipv4-prefix-any boolean</b>
Tree	<a href="#">ipv4-prefix-any</a>
Notes	The following elements are part of a mandatory choice: <b>any</b> , <b>fqdn</b> , <b>fqdn-suffix</b> , <b>ipv4-prefix</b> , <b>ipv4-prefix-any</b> , <b>ipv6-prefix</b> , <b>ipv6-prefix-any</b> , <b>rfc822</b> , or <b>rfc822-suffix</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ipv6-prefix *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	IPv6 prefix used as the match criteria for the IDi
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <a href="#">idi</a> <a href="#">ipv6-prefix</a> <i>string</i>
Tree	<a href="#">ipv6-prefix</a>
Notes	The following elements are part of a mandatory choice: <b>any</b> , <b>fqdn</b> , <b>fqdn-suffix</b> , <b>ipv4-prefix</b> , <b>ipv4-prefix-any</b> , <b>ipv6-prefix</b> , <b>ipv6-prefix-any</b> , <b>rfc822</b> , or <b>rfc822-suffix</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ipv6-prefix-any *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Accept any valid IPv6 prefix as a match for the IDi
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <a href="#">idi</a> <a href="#">ipv6-prefix-any</a> <i>boolean</i>
Tree	<a href="#">ipv6-prefix-any</a>
Notes	The following elements are part of a mandatory choice: <b>any</b> , <b>fqdn</b> , <b>fqdn-suffix</b> , <b>ipv4-prefix</b> , <b>ipv4-prefix-any</b> , <b>ipv6-prefix</b> , <b>ipv6-prefix-any</b> , <b>rfc822</b> , or <b>rfc822-suffix</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## rfc822 *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Email address (RFC 822) used as match criteria for IDi
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <a href="#">idi</a> <a href="#">rfc822</a> <i>string</i>
Tree	<a href="#">rfc822</a>
String Length	0 to 255

Notes	The following elements are part of a mandatory choice: <b>any</b> , <b>fqdn</b> , <b>fqdn-suffix</b> , <b>ipv4-prefix</b> , <b>ipv4-prefix-any</b> , <b>ipv6-prefix</b> , <b>ipv6-prefix-any</b> , <b>rfc822</b> , or <b>rfc822-suffix</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **rfc822-suffix** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Email address domain (RFC 822) as IDi match criteria
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <a href="#">idi</a> <b>rfc822-suffix</b> <i>string</i>
Tree	<a href="#">rfc822-suffix</a>
String Length	0 to 255
Notes	The following elements are part of a mandatory choice: <b>any</b> , <b>fqdn</b> , <b>fqdn-suffix</b> , <b>ipv4-prefix</b> , <b>ipv4-prefix-any</b> , <b>ipv6-prefix</b> , <b>ipv6-prefix-any</b> , <b>rfc822</b> , or <b>rfc822-suffix</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **peer-ip-prefix**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable the <b>peer-ip-prefix</b> context
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <b>peer-ip-prefix</b>
Tree	<a href="#">peer-ip-prefix</a>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-prefix** (*ipv4-prefix* | *ipv6-prefix*)

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	IP prefix used as the match criteria
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <a href="#">peer-ip-prefix</a> <a href="#">ip-prefix</a> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">ip-prefix</a>
Notes	The following elements are part of a mandatory choice: <b>ip-prefix</b> , <b>ipv4-only</b> , or <b>ipv6-only</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ipv4-only *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Accept any valid IPv4 address as a match
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <a href="#">peer-ip-prefix</a> <a href="#">ipv4-only</a> <i>boolean</i>
Tree	<a href="#">ipv4-only</a>
Notes	The following elements are part of a mandatory choice: <b>ip-prefix</b> , <b>ipv4-only</b> , or <b>ipv6-only</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### ipv6-only *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Accept any valid IPv6 address as a match
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <a href="#">identification</a> <a href="#">peer-ip-prefix</a> <a href="#">ipv6-only</a> <i>boolean</i>
Tree	<a href="#">ipv6-only</a>
Notes	The following elements are part of a mandatory choice: <b>ip-prefix</b> , <b>ipv4-only</b> , or <b>ipv6-only</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**private-interface** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Private interface name used for tunnel setup
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <b>private-interface</b> <i>string</i>
Tree	<a href="#">private-interface</a>
String Length	1 to 32
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**private-service-name** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Name of the private service used for tunnel setup
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <b>private-service-name</b> <i>string</i>
Tree	<a href="#">private-service-name</a>
String Length	1 to 64
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ts-list** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Traffic selector list used by the tunnel
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">client</a> <i>number</i> <b>ts-list</b> <i>string</i>
Tree	<a href="#">ts-list</a>
String Length	1 to 32
Introduced	19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tunnel-template** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Tunnel template ID

Context **configure ipsec client-db string client number tunnel-template number**

Tree [tunnel-template](#)

Range 1 to 2048

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description

Context **configure ipsec client-db string description string**

Tree [description](#)

String Length 1 to 80

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **match-list**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enter the **match-list** context

Context **configure ipsec client-db string match-list**

Tree [match-list](#)

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**idi** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Use IDi type in the IPsec client matching process
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">match-list</a> <b>idi</b> <i>boolean</i>
Tree	<a href="#">idi</a>
Default	false
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**peer-ip-prefix** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Use the peer tunnel IP address in the matching process
Context	<b>configure</b> <a href="#">ipsec client-db</a> <i>string</i> <a href="#">match-list</a> <b>peer-ip-prefix</b> <i>boolean</i>
Tree	<a href="#">peer-ip-prefix</a>
Default	false
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ike-policy** [[id](#)] *number*

Synopsis	Enter the <b>ike-policy</b> list instance
Context	<b>configure</b> <a href="#">ipsec</a> <b>ike-policy</b> <i>number</i>
Tree	<a href="#">ike-policy</a>
Description	Commands in this context configure an Internet Key Exchange (IKE) policy.
Max. Instances	2048
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[id] number**

Synopsis	IKE policy ID
Context	<b>configure ipsec ike-policy number</b>
Tree	<a href="#">ike-policy</a>
Range	1 to 2048
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure ipsec ike-policy number description string</b>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dpd**

Synopsis	Enable the <b>dpd</b> context
Context	<b>configure ipsec ike-policy number dpd</b>
Tree	<a href="#">dpd</a>
Description	Commands in this context configure the dead peer detection mechanism.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**interval number**

Synopsis	DPD interval
Context	<b>configure ipsec ike-policy number dpd interval number</b>
Tree	<a href="#">interval</a>
Description	This command specifies the DPD interval.

Because more time is necessary to determine if there is incoming traffic, the actual time needed to bring down the tunnel is larger than the DPD interval multiplied by the value configured for maximum retry attempts.

Range	10 to 300
Units	seconds
Default	30
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max-retries** *number*

Synopsis	Maximum number of retries before the tunnel is removed
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">dpd max-retries</a> <i>number</i>
Tree	<a href="#">max-retries</a>
Range	2 to 5
Default	3
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **reply-only** *boolean*

Synopsis	Initiate DPD request for incoming ESP or IKE packets
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">dpd reply-only</a> <i>boolean</i>
Tree	<a href="#">reply-only</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ike-transform** *reference*

Synopsis	IKE transform instance associated with the IKE policy
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">ike-transform</a> <i>reference</i>
Tree	<a href="#">ike-transform</a>
Description	This command specifies the IKE transform instance associated with the IKE policy. If multiple IDs are specified, the system selects an IKE transform based on the proposal of the peer. If the system is a tunnel initiator, it uses the configured IKE transform to generate the SA payload.

Reference	<b>configure ipsec ike-transform</b> <i>number</i>
Max. Instances	4
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ike-version-1

Synopsis	Enter the <b>ike-version-1</b> context
Context	<b>configure ipsec ike-policy</b> <i>number</i> <b>ike-version-1</b>
Tree	<a href="#">ike-version-1</a>
Description	Commands in this context configure the IKE version 1 mode of operation that the IKE policy uses.
Notes	The following elements are part of a choice: <b>ike-version-1</b> or <b>ike-version-2</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## auth-method *keyword*

Synopsis	Authentication method used with the IKE policy
Context	<b>configure ipsec ike-policy</b> <i>number</i> <b>ike-version-1</b> <b>auth-method</b> <i>keyword</i>
Tree	<a href="#">auth-method</a>
Options	psk, plain-psk-xauth
Default	psk
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## ike-mode *keyword*

Synopsis	Mode of operation
Context	<b>configure ipsec ike-policy</b> <i>number</i> <b>ike-version-1</b> <b>ike-mode</b> <i>keyword</i>
Tree	<a href="#">ike-mode</a>
Options	main, aggressive
Default	main
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **own-auth-method** *keyword*

Synopsis Authentication method used with policy on its own side

Context **configure** [ipsec ike-policy](#) *number* [ike-version-1](#) **own-auth-method** *keyword*

Tree [own-auth-method](#)

Options symmetric

Default symmetric

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ph1-responder-delete-notify** *boolean*

Synopsis Send delete notification for IKEv1 phase 1 removal

Context **configure** [ipsec ike-policy](#) *number* [ike-version-1](#) **ph1-responder-delete-notify** *boolean*

Tree [ph1-responder-delete-notify](#)

Description When configured to **true**, a delete notification is sent to the peer when deleting an IKEv1 phase 1 SA for which it was the responder.  
When configured to **false**, no notification is sent.

Default true

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ike-version-2**

Synopsis Enable the **ike-version-2** context

Context **configure** [ipsec ike-policy](#) *number* [ike-version-2](#)

Tree [ike-version-2](#)

Description Commands in this context configure the IKE version 2 mode of operation that the IKE policy uses.

Notes The following elements are part of a choice: **ike-version-1** or **ike-version-2**.

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **auth-method** *keyword*

Synopsis	Authentication method used with the IKE policy
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">ike-version-2</a> <b>auth-method</b> <i>keyword</i>
Tree	<a href="#">auth-method</a>
Options	psk, cert, psk-radius, cert-radius, eap, auto-eap-radius, auto-eap
Default	psk
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **auto-eap-method** *keyword*

Synopsis	Authentication method used for the remote peer
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">ike-version-2</a> <b>auto-eap-method</b> <i>keyword</i>
Tree	<a href="#">auto-eap-method</a>
Description	This command specifies the behavior for the IKEv2 remote-access tunnel when the authentication method uses EAP or potentially another method to authenticate the remote peer.
Options	psk, cert, psk-or-cert
Default	cert
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ikev2-fragment**

Synopsis	Enable the <b>ikev2-fragment</b> context
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">ike-version-2</a> <b>ikev2-fragment</b>
Tree	<a href="#">ikev2-fragment</a>
Description	Commands in this context configure IKEv2 protocol level fragmentation (RFC 7383).
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mtu** *number*

Synopsis	Maximum size of the IKEv2 packet
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">ike-version-2</a> <b>ikev2-fragment</b> <b>mtu</b> <i>number</i>

Tree	<a href="#">mtu</a>
Range	512 to 9000
Units	octets
Default	1500
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **reassemble-timeout** *number*

Synopsis	Timeout for reassembly of IKEv2 message fragments
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">ike-version-2</a> <a href="#">ikev2-fragment</a> <a href="#">reassemble-timeout</a> <i>number</i>
Tree	<a href="#">reassemble-timeout</a>
Range	1 to 5
Units	seconds
Default	2
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **own-auth-method** *keyword*

Synopsis	Authentication method used with IKE policy on own side
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">ike-version-2</a> <a href="#">own-auth-method</a> <i>keyword</i>
Tree	<a href="#">own-auth-method</a>
Options	symmetric, psk, cert, eap-only
Default	symmetric
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **own-auto-eap-method** *keyword*

Synopsis	Authentication method used on its own side
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">ike-version-2</a> <a href="#">own-auto-eap-method</a> <i>keyword</i>
Tree	<a href="#">own-auto-eap-method</a>

Description	This command specifies the behavior for the IKEv2 remote-access tunnel when the authentication method uses EAP or potentially another method to authenticate the peer.
Options	psk, cert
Default	cert
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **send-idr-after-eap-success** *boolean*

Synopsis	Send IDr payload in last IKE authentication response
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">ike-version-2</a> <a href="#">send-idr-after-eap-success</a> <i>boolean</i>
Tree	<a href="#">send-idr-after-eap-success</a>
Description	When configured to <b>true</b> , the Identification Responder (IDr) payload is added in the last IKE authentication response after an Extensible Authentication Protocol (EAP) Success packet is received. When configured to <b>false</b> , the IDr payload is not included in the last IKE.
Default	true
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipsec-lifetime** *number*

Synopsis	Lifetime of the Phase 2 IKE key
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">ipsec-lifetime</a> <i>number</i>
Tree	<a href="#">ipsec-lifetime</a>
Range	1200 to 31536000
Units	seconds
Default	3600
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **limit-init-exchange**

Synopsis	Enter the <b>limit-init-exchange</b> context
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">limit-init-exchange</a>
Tree	<a href="#">limit-init-exchange</a>

Description	Commands in this context limit the number of ongoing IKEv2 initial exchanges per tunnel.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of limiting initial IKE exchanges
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">limit-init-exchange</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **reduced-max-exchange-timeout** (*number* | *keyword*)

Synopsis	Maximum timeout for in-progress initial IKE exchange
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">limit-init-exchange</a> <a href="#">reduced-max-exchange-timeout</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">reduced-max-exchange-timeout</a>
Description	This command configures the maximum timeout for the in-progress initial IKE exchange. If a new IKEv2 IKE_SA_INIT request is received when there is an ongoing IKEv2 initial exchange from the same peer, the timeout value of the existing exchange is set to this specified value. If the <b>none</b> option is configured for this command, the timeout value remains unchanged.
Range	2 to 60
Units	seconds
Options	none
Default	2
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **lockout**

Synopsis	Enable the <b>lockout</b> context
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">lockout</a>

Tree	<a href="#">lockout</a>
Description	Commands in this context specify the lockout mechanism for the IPsec tunnel. These commands apply only when the system acts as a tunnel responder.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **block** (*number* | *keyword*)

Synopsis	Time a client is blocked for failed authentications
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">lockout block</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">block</a>
Description	This command configures the time the client is blocked if the number of failed authentications exceeds the configured value within the specified duration.
Range	1 to 1440
Units	minutes
Options	infinite
Default	10
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **duration** *number*

Synopsis	Time interval for failed attempts threshold
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">lockout duration</a> <i>number</i>
Tree	<a href="#">duration</a>
Description	This command specifies the time interval in which the configured failed authentication count must be exceeded to trigger a lockout.
Range	1 to 60
Units	minutes
Default	5
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **failed-attempts** *number*

Synopsis	Maximum failed authentications allowed in the duration
----------	--

Context	<b>configure ipsec ike-policy number lockout failed-attempts number</b>
Tree	<a href="#">failed-attempts</a>
Range	1 to 64
Default	3
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max-port-per-ip number**

Synopsis	Maximum number of ports allowed under same IP address
Context	<b>configure ipsec ike-policy number lockout max-port-per-ip number</b>
Tree	<a href="#">max-port-per-ip</a>
Description	This command configures the maximum number of ports allowed under the same IP address. When the threshold is exceeded and the client is locked out, all ports behind the IP address are blocked.
Range	1 to 32000
Default	16
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **match-peer-id-to-cert boolean**

Synopsis	Check IKE peer ID during certificate authentication
Context	<b>configure ipsec ike-policy number match-peer-id-to-cert boolean</b>
Tree	<a href="#">match-peer-id-to-cert</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nat-traversal**

Synopsis	Enable the <b>nat-traversal</b> context
Context	<b>configure ipsec ike-policy number nat-traversal</b>
Tree	<a href="#">nat-traversal</a>
Description	Commands in this context configure the Network Address Translation Traversal (NAT-T) functionality.

Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **force boolean**

Synopsis	Enable NAT-T in forced mode
Context	<b>configure ipsec ike-policy number nat-traversal force boolean</b>
Tree	<a href="#">force</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **force-keep-alive boolean**

Synopsis	Continue sending keepalive packets (no expiry)
Context	<b>configure ipsec ike-policy number nat-traversal force-keep-alive boolean</b>
Tree	<a href="#">force-keep-alive</a>
Default	true
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **keep-alive-interval number**

Synopsis	Keepalive interval for NAT-T
Context	<b>configure ipsec ike-policy number nat-traversal keep-alive-interval number</b>
Tree	<a href="#">keep-alive-interval</a>
Range	120 to 600
Units	seconds
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **pfs**

Synopsis	Enable the <b>pfs</b> context
Context	<b>configure ipsec ike-policy number pfs</b>

Tree	<a href="#">pfs</a>
Description	Commands in this context configure perfect forward secrecy on the IPsec tunnel using the policy. PFS provides for a new Diffie-Hellman (DH) key exchange each time the Security Association (SA) key is renegotiated. When the SA key expires, another key is generated (if the SA remains up).
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dh-group** *keyword*

Synopsis	Diffie-Helman group used to calculate session keys
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">pfs</a> <b>dh-group</b> <i>keyword</i>
Tree	<a href="#">dh-group</a>
Description	This command specifies which DH group to use for calculating session keys. More bits provide a higher level of security, but require more processing.
Options	group-1, group-2, group-5, group-14, group-15, group-19, group-20, group-21
Default	group-2
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **relay-unsolicited-cfg-attribute**

Synopsis	Enter the <b>relay-unsolicited-cfg-attribute</b> context
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">relay-unsolicited-cfg-attribute</a>
Tree	<a href="#">relay-unsolicited-cfg-attribute</a>
Description	Commands in this context configure attributes returned from the source (such as a RADIUS server) that are returned to the IKEv2 remote-access tunnel client regardless if the client has requested the attribute in the CFG_REQUEST payload.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **internal-ip4-address** *boolean*

Synopsis	Return the IPv4 address from the source to the client
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">relay-unsolicited-cfg-attribute</a> <a href="#">internal-ip4-address</a> <i>boolean</i>
Tree	<a href="#">internal-ip4-address</a>

Description	When configured to <b>true</b> , the system returns the IPv4 address from the source (such as a RADIUS server) to the IKEv2 remote-access tunnel client regardless if the client has requested the address in the CFG_REQUEST payload.
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **internal-ip4-dns** *boolean*

Synopsis	Return IPv4 DNS server address from source to client
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">relay-unsolicited-cfg-attribute</a> <a href="#">internal-ip4-dns</a> <i>boolean</i>
Tree	<a href="#">internal-ip4-dns</a>
Description	When configured to <b>true</b> , the system returns the IPv4 DNS server address from the source (such as a RADIUS server) to the IKEv2 remote-access tunnel client regardless if the client has requested the address in the CFG_REQUEST payload.
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **internal-ip4-netmask** *boolean*

Synopsis	Return the IPv4 netmask from the source to the client
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">relay-unsolicited-cfg-attribute</a> <a href="#">internal-ip4-netmask</a> <i>boolean</i>
Tree	<a href="#">internal-ip4-netmask</a>
Description	When configured to <b>true</b> , the system returns the IPv4 netmask from the source (such as a RADIUS server) to the IKEv2 remote-access tunnel client regardless if the client has requested the netmask in the CFG_REQUEST payload.
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **internal-ip6-address** *boolean*

Synopsis	Return the IPv6 address from the source to the client
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">relay-unsolicited-cfg-attribute</a> <a href="#">internal-ip6-address</a> <i>boolean</i>

Tree	<a href="#">internal-ip6-address</a>
Description	When configured to <b>true</b> , the system returns the IPv6 address from the source (such as a RADIUS server) to the IKEv2 remote-access tunnel client regardless if the client has requested the address in the CFG_REQUEST payload.
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **internal-ip6-dns** *boolean*

Synopsis	Return IPv6 DNS server address from source to client
Context	<b>configure</b> <a href="#">ipsec ike-policy</a> <i>number</i> <a href="#">relay-unsolicited-cfg-attribute</a> <a href="#">internal-ip6-dns</a> <i>boolean</i>
Tree	<a href="#">internal-ip6-dns</a>
Description	When configured to <b>true</b> , the system returns the IPv6 DNS server address from the source (such as a RADIUS server) to the IKEv2 remote-access tunnel client regardless if the client has requested the address in the CFG_REQUEST payload.
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ike-transform** [*id*] *number*

Synopsis	Enter the <b>ike-transform</b> list instance
Context	<b>configure</b> <a href="#">ipsec ike-transform</a> <i>number</i>
Tree	<a href="#">ike-transform</a>
Max. Instances	4096
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[id]** *number*

Synopsis	IKE transform instance ID
Context	<b>configure</b> <a href="#">ipsec ike-transform</a> <i>number</i>
Tree	<a href="#">ike-transform</a>
Range	1 to 4096

Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dh-group** *keyword*

Synopsis	Diffie-Helman group used to calculate session keys
Context	<b>configure</b> <a href="#">ipsec ike-transform</a> <i>number</i> <a href="#">dh-group</a> <i>keyword</i>
Tree	<a href="#">dh-group</a>
Options	group-1, group-2, group-5, group-14, group-15, group-19, group-20, group-21
Default	group-2
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ike-auth-algorithm** *keyword*

Synopsis	IKE authentication algorithm for IKE transform instance
Context	<b>configure</b> <a href="#">ipsec ike-transform</a> <i>number</i> <a href="#">ike-auth-algorithm</a> <i>keyword</i>
Tree	<a href="#">ike-auth-algorithm</a>
Options	md-5, sha-1, sha-256, sha-384, sha-512, aes-xcbc, auth-encryption
Default	sha-1
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ike-encryption-algorithm** *keyword*

Synopsis	IKE encryption algorithm for the IKE transform instance
Context	<b>configure</b> <a href="#">ipsec ike-transform</a> <i>number</i> <a href="#">ike-encryption-algorithm</a> <i>keyword</i>
Tree	<a href="#">ike-encryption-algorithm</a>
Options	des, des-3, aes-128, aes-192, aes-256, aes128-gcm8, aes128-gcm16, aes256-gcm8, aes256-gcm16
Default	aes-128
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ike-prf-algorithm** *keyword*

Synopsis	PRF algorithm for the IKE transform instance
Context	<b>configure</b> <a href="#">ipsec ike-transform</a> <i>number</i> <a href="#">ike-prf-algorithm</a> <i>keyword</i>
Tree	<a href="#">ike-prf-algorithm</a>
Description	This command specifies the pseudo-random function algorithm used for IKE security association.  If an encrypted algorithm such as AES-GCM is used for the IKE encryption algorithm, <b>same-as-auth</b> cannot be used for the IKE PRF algorithm.
Options	md-5, sha-1, sha-256, sha-384, sha-512, aes-xcbc, same-as-auth
Default	same-as-auth
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**isakmp-lifetime** *number*

Synopsis	Phase 1 lifetime for the IKE transform instance
Context	<b>configure</b> <a href="#">ipsec ike-transform</a> <i>number</i> <a href="#">isakmp-lifetime</a> <i>number</i>
Tree	<a href="#">isakmp-lifetime</a>
Range	1200 to 31536000
Units	seconds
Default	86400
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ipsec-transform** [*id*] *number*

Synopsis	Enter the <b>ipsec-transform</b> list instance
Context	<b>configure</b> <a href="#">ipsec ipsec-transform</a> <i>number</i>
Tree	<a href="#">ipsec-transform</a>
Description	Commands in this context create an IPsec transform policy. IPsec transform policies can be shared. A change to the IPsec transform is allowed at any time. The change does not impact tunnels that have been established until they are renegotiated. If the change is required immediately, the tunnel must be cleared (reset) for force renegotiation.
Max. Instances	2048
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [id] *number*

Synopsis IPsec transform policy ID

Context **configure ipsec ipsec-transform** *number*

Tree [ipsec-transform](#)

Range 1 to 2048

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **esp-auth-algorithm** *keyword*

Synopsis Encapsulating Security Payload (ESP) authentication

Context **configure ipsec ipsec-transform** *number esp-auth-algorithm* *keyword*

Tree [esp-auth-algorithm](#)

Description This command specifies the hashing algorithm used for the authentication function. Both ends of a manually configured tunnel must share the same configuration for the IPsec tunnel to enter the operational state.

Options null, md-5, sha-1, sha-256, sha-384, sha-512, aes-xcbc, auth-encryption

Default sha-1

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **esp-encryption-algorithm** *keyword*

Synopsis Encryption algorithm for the IPsec transform session

Context **configure ipsec ipsec-transform** *number esp-encryption-algorithm* *keyword*

Tree [esp-encryption-algorithm](#)

Description This command specifies the encryption algorithm used for the IPsec session. Encryption applies only to ESP configurations. If encryption is not defined, ESP is not used.

Both ends of a manually configured tunnel must share the same encryption algorithm for the IPsec tunnel to enter the operational state.

When AES-GCM or AES-GMAC is configured:

- the authentication encryption must be set to **auth-encryption**

- the system does not include the authentication algorithm in the ESP proposal of the SA payload
- IPsec transform cannot be used for manual keying

Options	null, des, des-3, aes-128, aes-192, aes-256, aes128-gcm8, aes128-gcm12, aes128-gcm16, aes192-gcm8, aes192-gcm12, aes192-gcm16, aes256-gcm8, aes256-gcm12, aes256-gcm16, null-aes128-gmac, null-aes192-gmac, null-aes256-gmac
Default	aes-128
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **extended-sequence-number** *boolean*

Synopsis	Enable extended sequence numbering support
Context	<b>configure</b> <a href="#">ipsec</a> <a href="#">ipsec-transform</a> <i>number</i> <a href="#">extended-sequence-number</a> <i>boolean</i>
Tree	<a href="#">extended-sequence-number</a>
Description	When configured to <b>true</b> , this command enables 64-bit extended sequence numbering support. This numbering is used for high throughput CHILD_SA to avoid frequent re-keying caused by sequence numbering wrap around.  When configured to <b>false</b> , only 32-bit sequence numbering is supported.
Default	false
Introduced	21.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipsec-lifetime** *number*

Synopsis	Phase 2 lifetime for the IPsec transform session
Context	<b>configure</b> <a href="#">ipsec</a> <a href="#">ipsec-transform</a> <i>number</i> <a href="#">ipsec-lifetime</a> <i>number</i>
Tree	<a href="#">ipsec-lifetime</a>
Description	This command configures the lifetime of the Phase 2 IKE key.  When unconfigured, the value is inherited from the IPsec lifetime configured in the corresponding IKE policy configured for the same IPsec gateway or IPsec tunnel.
Range	1200 to 31536000
Units	seconds
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**pfs-dh-group** *keyword*

Synopsis	Diffie-Hellman group used for PFS compilation
Context	<b>configure ipsec ipsec-transform</b> <i>number pfs-dh-group keyword</i>
Tree	<a href="#">pfs-dh-group</a>
Description	This command specifies the DH group used for Perfect Forward Secrecy (PFS) compilation during CHILD_SA rekeying.  When unconfigured, the value is inherited from the DH group value from the IPsec gateway or IPsec tunnel.
Options	none, group-1, group-2, group-5, group-14, group-15, group-19, group-20, group-21
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ipsec-transport-mode-profile** [*name*] *string*

Synopsis	Enter the <b>ipsec-transport-mode-profile</b> list instance
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i>
Tree	<a href="#">ipsec-transport-mode-profile</a>
Description	Commands in this context configure IPsec-specific attributes that allow an IP tunnel (for example, GRE) to be protected by using IPsec transport mode.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	IPsec transport mode profile name string
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i>
Tree	<a href="#">ipsec-transport-mode-profile</a>
Description	This command specifies the name of the IPsec transport mode profile.
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">ipsec ipsec-transport-mode-profile</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**key-exchange**

Synopsis	Enter the <b>key-exchange</b> context
Context	<b>configure</b> <a href="#">ipsec ipsec-transport-mode-profile</a> <i>string</i> <a href="#">key-exchange</a>
Tree	<a href="#">key-exchange</a>
Description	Commands in this context configure the key exchange used each time the Security Association (SA) key is renegotiated.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**dynamic**

Synopsis	Enter the <b>dynamic</b> context
Context	<b>configure</b> <a href="#">ipsec ipsec-transport-mode-profile</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic</a>
Tree	<a href="#">dynamic</a>
Description	Commands in this context configure dynamic keying for the transport mode profile.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**auto-establish** *boolean*

Synopsis	Attempt to establish a phase 1 exchange automatically
Context	<b>configure</b> <a href="#">ipsec ipsec-transport-mode-profile</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic</a> <a href="#">auto-establish</a> <i>boolean</i>
Tree	<a href="#">auto-establish</a>
Default	false
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## cert

Synopsis Enter the **cert** context

Context **configure ipsec ipsec-transport-mode-profile** *string* *key-exchange* *dynamic* *cert*

Tree [cert](#)

Description Commands in this context configure the attributes of the dynamic keying certificate.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## cert-profile *reference*

Synopsis Certificate profile name

Context **configure ipsec ipsec-transport-mode-profile** *string* *key-exchange* *dynamic* *cert* *cert-profile* *reference*

Tree [cert-profile](#)

Reference **configure ipsec cert-profile** *string*

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## status-verify

Synopsis Enter the **status-verify** context

Context **configure ipsec ipsec-transport-mode-profile** *string* *key-exchange* *dynamic* *cert* *status-verify*

Tree [status-verify](#)

Description Commands in this context configure attributes of Certificate Status Verification (CSV).

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## default-result *keyword*

Synopsis Default result for Certificate Status Verification

Context **configure ipsec ipsec-transport-mode-profile** *string* *key-exchange* *dynamic* *cert* *status-verify* *default-result* *keyword*

Tree	<a href="#">default-result</a>
Description	This command specifies the default certificate revocation status result to use when all configured CSV methods fail to return a result.
Options	revoked, good
Default	revoked
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **primary keyword**

Synopsis	Primary method of CSV to verify the revocation status
Context	<b>configure</b> <a href="#">ipsec ipsec-transport-mode-profile</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic cert status-verify</a> <b>primary keyword</b>
Tree	<a href="#">primary</a>
Description	This command configures the primary method of Certificate Status Verification (CSV) that is used to verify the revocation status of the certificate of the peer.
Options	crl, ocsrp
Default	crl
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **secondary keyword**

Synopsis	Secondary method used to verify certificate revocation
Context	<b>configure</b> <a href="#">ipsec ipsec-transport-mode-profile</a> <i>string</i> <a href="#">key-exchange</a> <a href="#">dynamic cert status-verify</a> <b>secondary keyword</b>
Tree	<a href="#">secondary</a>
Description	This command specifies the secondary method of Certificate Status Verification (CSV) that is used to verify the revocation status of the peer certificate.
Options	none, crl, ocsrp
Default	none
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**trust-anchor-profile** *reference*

Synopsis	Trust anchor profile name
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i> <a href="#">key-exchange dynamic cert trust-anchor-profile</a> <i>reference</i>
Tree	<a href="#">trust-anchor-profile</a>
Reference	<b>configure ipsec trust-anchor-profile</b> <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**id**

Synopsis	Enter the <b>id</b> context
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i> <a href="#">key-exchange dynamic id</a>
Tree	<a href="#">id</a>
Description	Commands in this context specify the local ID used for IDi or IDr for IKEv2 negotiation. The default behavior depends on the local authentication method as follows: <ul style="list-style-type: none"> <li>• Psk: local tunnel IP address</li> <li>• Cert-auth: subject of the local certificate</li> </ul>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**fqdn** *string*

Synopsis	FQDN used as the local ID IKE type
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i> <a href="#">key-exchange dynamic id fqdn</a> <i>string</i>
Tree	<a href="#">fqdn</a>
String Length	1 to 255
Notes	The following elements are part of a choice: <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ipv4** *string*

Synopsis	IPv4 as the local ID type
----------	---------------------------

Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i> <i>key-exchange</i> <i>dynamic id ipv4 string</i>
Tree	<a href="#">ipv4</a>
Notes	The following elements are part of a choice: <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipv6** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IPv6 used as the local IKE ID type
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i> <i>key-exchange</i> <i>dynamic id ipv6</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">ipv6</a>
Notes	The following elements are part of a choice: <b>fqdn</b> , <b>ipv4</b> , or <b>ipv6</b> .
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ike-policy** *reference*

Synopsis	IKE policy ID
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i> <i>key-exchange</i> <i>dynamic ike-policy reference</i>
Tree	<a href="#">ike-policy</a>
Description	This command specifies the ID of the IKE policy used for IKE negotiation. The <b>ipsec-transport-mode-profile</b> configuration only supports IKEv2.
Reference	<b>configure ipsec ike-policy</b> <i>number</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipsec-transform** *reference*

Synopsis	IPsec transform IDs used by the dynamic key
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i> <i>key-exchange</i> <i>dynamic ipsec-transform reference</i>
Tree	<a href="#">ipsec-transform</a>
Description	This command specifies IPsec transform IDs used for CHILD_SA negotiation.

Reference	<b>configure ipsec ipsec-transform</b> <i>number</i>
Max. Instances	4
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **pre-shared-key** *string*

Synopsis	Pre-shared key for IKE authentication
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i> <b>key-exchange dynamic pre-shared-key</b> <i>string</i>
Tree	<a href="#">pre-shared-key</a>
String Length	1 to 115
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max-history-key-records**

Synopsis	Enter the <b>max-history-key-records</b> context
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i> <b>max-history-key-records</b>
Tree	<a href="#">max-history-key-records</a>
Description	Commands in this context configure the settings for recording historical IPsec keys.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **esp** *number*

Synopsis	Maximum number of recent records
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string</i> <b>max-history-key-records esp</b> <i>number</i>
Tree	<a href="#">esp</a>
Range	1 to 48
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ike number**

Synopsis	Maximum number of historical IKE key records
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string max-history-key-records ike number</i>
Tree	<a href="#">ike</a>
Range	1 to 3
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**replay-window number**

Synopsis	Anti-replay window size
Context	<b>configure ipsec ipsec-transport-mode-profile</b> <i>string replay-window number</i>
Tree	<a href="#">replay-window</a>
Description	This command specifies the size of an IPsec anti-replay window. If unconfigured, IPsec anti-replay is disabled.
Range	32   64   128   256   512
Units	packets
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**radius**

Synopsis	Enter the <b>radius</b> context
Context	<b>configure ipsec radius</b>
Tree	<a href="#">radius</a>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**accounting-policy [name] string**

Synopsis	Enter the <b>accounting-policy</b> list instance
Context	<b>configure ipsec radius accounting-policy</b> <i>string</i>
Tree	<a href="#">accounting-policy</a>
Description	Commands in this context configure RADIUS accounting policies to collect accounting statistics.

---

Max. Instances	100
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[name]** *string*

Synopsis	RADIUS accounting policy name
Context	<b>configure</b> <a href="#">ipsec radius accounting-policy</a> <i>string</i>
Tree	<a href="#">accounting-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**include-radius-attribute**

Synopsis	Enter the <b>include-radius-attribute</b> context
Context	<b>configure</b> <a href="#">ipsec radius accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a>
Tree	<a href="#">include-radius-attribute</a>
Description	Commands in this context specify the RADIUS attributes that are to be included in the RADIUS Authentication-Request messages.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**acct-stats** *boolean*

Synopsis	Include accounting attributes in RADIUS packets
Context	<b>configure</b> <a href="#">ipsec radius accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">acct-stats</a> <i>boolean</i>
Tree	<a href="#">acct-stats</a>
Default	false
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**called-station-id** *boolean*

Synopsis	Include the Called-Station-Id attribute
Context	<b>configure</b> <a href="#">ipsec radius accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">called-station-id</a> <i>boolean</i>
Tree	<a href="#">called-station-id</a>
Default	false
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**calling-station-id** *boolean*

Synopsis	Include the Calling-Station-Id attribute
Context	<b>configure</b> <a href="#">ipsec radius accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">calling-station-id</a> <i>boolean</i>
Tree	<a href="#">calling-station-id</a>
Default	false
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**framed-ip-addr** *boolean*

Synopsis	Include the Framed-IP-Address attribute
Context	<b>configure</b> <a href="#">ipsec radius accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">framed-ip-addr</a> <i>boolean</i>
Tree	<a href="#">framed-ip-addr</a>
Default	false
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**framed-ipv6-prefix** *boolean*

Synopsis	Include the Framed-IPv6-Prefix attribute
Context	<b>configure</b> <a href="#">ipsec radius accounting-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">framed-ipv6-prefix</a> <i>boolean</i>
Tree	<a href="#">framed-ipv6-prefix</a>
Default	false

Introduced 19.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-identifier** *boolean*

Synopsis Include the NAS-Identifier attribute  
Context **configure** [ipsec](#) [radius](#) [accounting-policy](#) *string* [include-radius-attribute](#) [nas-identifier](#) *boolean*  
Tree [nas-identifier](#)  
Default false  
Introduced 19.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-ip-addr** *boolean*

Synopsis Include the NAS-IP-Address attribute  
Context **configure** [ipsec](#) [radius](#) [accounting-policy](#) *string* [include-radius-attribute](#) [nas-ip-addr](#) *boolean*  
Tree [nas-ip-addr](#)  
Default false  
Introduced 19.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **nas-port-id** *boolean*

Synopsis Include the NAS-Port-Id attribute  
Context **configure** [ipsec](#) [radius](#) [accounting-policy](#) *string* [include-radius-attribute](#) [nas-port-id](#) *boolean*  
Tree [nas-port-id](#)  
Default false  
Introduced 19.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **radius-server-policy** *reference*

Synopsis Referenced RADIUS server policy

Context	<b>configure ipsec radius accounting-policy</b> <i>string</i> <b>radius-server-policy</b> <i>reference</i>
Tree	<a href="#">radius-server-policy</a>
Reference	<b>configure aaa radius server-policy</b> <i>string</i>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## update-interval

Synopsis	Enter the <b>update-interval</b> context
Context	<b>configure ipsec radius accounting-policy</b> <i>string</i> <b>update-interval</b>
Tree	<a href="#">update-interval</a>
Description	Commands in this context determine how RADIUS interim-update packets are sent for IKEv2 remote-access tunnels.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **jitter** *number*

Synopsis	Jitter interval for sending each interim-update packet
Context	<b>configure ipsec radius accounting-policy</b> <i>string</i> <b>update-interval</b> <b>jitter</b> <i>number</i>
Tree	<a href="#">jitter</a>
Description	This command specifies the jitter interval for the RADIUS interim-update packets. When unconfigured, the system uses 10% of the update interval value.
Range	0 to 3600
Units	seconds
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## **value** *number*

Synopsis	Update interval of the RADIUS accounting data
Context	<b>configure ipsec radius accounting-policy</b> <i>string</i> <b>update-interval</b> <b>value</b> <i>number</i>
Tree	<a href="#">value</a>
Description	This command configures the update interval of the RADIUS accounting data. If a value of 0 is configured, no intermediate updates are sent.

Range	0   5 to 259200
Units	minutes
Default	10
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **authentication-policy** [*name*] *string*

Synopsis	Enter the <b>authentication-policy</b> list instance
Context	<b>configure ipsec radius authentication-policy</b> <i>string</i>
Tree	<a href="#">authentication-policy</a>
Description	Commands in this context configure the RADIUS authentication policy associated with the IPsec gateway.
Max. Instances	100
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	RADIUS authentication policy name
Context	<b>configure ipsec radius authentication-policy</b> <i>string</i>
Tree	<a href="#">authentication-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **include-radius-attribute**

Synopsis	Enter the <b>include-radius-attribute</b> context
Context	<b>configure ipsec radius authentication-policy</b> <i>string</i> <b>include-radius-attribute</b>
Tree	<a href="#">include-radius-attribute</a>
Description	Commands in this context specify the RADIUS attributes to be included in the RADIUS Authentication-Request messages.
Introduced	19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **called-station-id** *boolean*

Synopsis Include the Called-Station-Id attribute

Context **configure ipsec radius authentication-policy** *string* **include-radius-attribute called-station-id** *boolean*

Tree [called-station-id](#)

Default false

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **calling-station-id** *boolean*

Synopsis Include the Calling-Station-Id attribute

Context **configure ipsec radius authentication-policy** *string* **include-radius-attribute calling-station-id** *boolean*

Tree [calling-station-id](#)

Default false

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **client-cert-subject-key-id** *boolean*

Synopsis Include the Subject Key Identifier

Context **configure ipsec radius authentication-policy** *string* **include-radius-attribute client-cert-subject-key-id** *boolean*

Tree [client-cert-subject-key-id](#)

Description When configured to **true**, the Subject Key Identifier of the certificate of the peer is included in the RADIUS Access-Request packet as VSA: Alc-Subject-Key-Identifier. See the *7450 ESS, 7750 SR, 7950 XRS, and VSR RADIUS Attributes Reference Guide* for more information.

Default false

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**nas-identifier** *boolean*

Synopsis	Include the NAS-Identifier attribute
Context	<b>configure</b> <a href="#">ipsec radius authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-identifier</a> <i>boolean</i>
Tree	<a href="#">nas-identifier</a>
Default	false
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**nas-ip-addr** *boolean*

Synopsis	Include the NAS-IP-Address attribute
Context	<b>configure</b> <a href="#">ipsec radius authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-ip-addr</a> <i>boolean</i>
Tree	<a href="#">nas-ip-addr</a>
Default	false
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**nas-port-id** *boolean*

Synopsis	Include the NAS-Port-Id attribute
Context	<b>configure</b> <a href="#">ipsec radius authentication-policy</a> <i>string</i> <a href="#">include-radius-attribute</a> <a href="#">nas-port-id</a> <i>boolean</i>
Tree	<a href="#">nas-port-id</a>
Default	false
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**password** *string*

Synopsis	Password used in RADIUS access requests
Context	<b>configure</b> <a href="#">ipsec radius authentication-policy</a> <i>string</i> <a href="#">password</a> <i>string</i>
Tree	<a href="#">password</a>
String Length	1 to 115
Introduced	19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **radius-server-policy** *reference*

Synopsis Referenced RADIUS server policy  
 Context **configure** [ipsec radius authentication-policy](#) *string* [radius-server-policy](#) *reference*  
 Tree [radius-server-policy](#)  
 Reference **configure** [aaa radius server-policy](#) *string*  
 Introduced 19.7.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **show-ipsec-keys** *boolean*

Synopsis Show IPsec IKE and ESP keys in the output  
 Context **configure** [ipsec show-ipsec-keys](#) *boolean*  
 Tree [show-ipsec-keys](#)  
 Description When configured to **true**, this command allows IPsec keys to be (optionally) included in the display output of certain **debug** and **admin** commands.  
 When configured to **false**, the key display is disabled.  
 Default false  
 Introduced 16.0.R4  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **static-sa** [[name](#)] *string*

Synopsis Enter the **static-sa** list instance  
 Context **configure** [ipsec static-sa](#) *string*  
 Tree [static-sa](#)  
 Max. Instances 1000  
 Introduced 16.0.R6  
 Platforms All

### **[name]** *string*

Synopsis Static SA name

---

Context	<b>configure ipsec static-sa string</b>
Tree	<a href="#">static-sa</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R6
Platforms	All

## authentication

Synopsis	Enable the <b>authentication</b> context
Context	<b>configure ipsec static-sa string authentication</b>
Tree	<a href="#">authentication</a>
Introduced	16.0.R6
Platforms	All

## algorithm *keyword*

Synopsis	Authentication algorithm used for an IPsec manual SA
Context	<b>configure ipsec static-sa string authentication algorithm keyword</b>
Tree	<a href="#">algorithm</a>
Options	md5, sha1
Notes	This element is mandatory.
Introduced	16.0.R6
Platforms	All

## key *string*

Synopsis	Key used for the authentication algorithm
Context	<b>configure ipsec static-sa string authentication key string</b>
Tree	<a href="#">key</a>
String Length	1 to 54
Notes	This element is mandatory.
Introduced	16.0.R6
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure ipsec static-sa string description string</b>
Tree	<b>description</b>
String Length	1 to 32
Introduced	16.0.R6
Platforms	All

**direction keyword**

Synopsis	Direction to which the static SA entry can be applied
Context	<b>configure ipsec static-sa string direction keyword</b>
Tree	<b>direction</b>
Options	inbound, outbound, bidirectional
Default	bidirectional
Introduced	16.0.R6
Platforms	All

**protocol keyword**

Synopsis	IPsec protocol used with the static SA
Context	<b>configure ipsec static-sa string protocol keyword</b>
Tree	<b>protocol</b>
Options	ah, esp
Default	esp
Introduced	16.0.R6
Platforms	All

**spi number**

Synopsis	Security Parameter Index (SPI) for the static SA
Context	<b>configure ipsec static-sa string spi number</b>
Tree	<b>spi</b>
Description	This command specifies the SPI for the static SA.

When the **direction** command is set to **inbound**, the SPI is used to look up the instruction to verify and decrypt the incoming IPsec packets. When the **direction** command is set to **outbound**, the SPI is used in the encoding of the outgoing packets. The remote node can use the SPI to look up the instruction to verify and decrypt the packet.

When unconfigured, the static SA cannot be used.

Range	256 to 16383
Introduced	16.0.R6
Platforms	All

### **trust-anchor-profile** [[name](#)] *string*

Synopsis	Enter the <b>trust-anchor-profile</b> list instance
Context	<b>configure ipsec trust-anchor-profile</b> <i>string</i>
Tree	<a href="#">trust-anchor-profile</a>
Max. Instances	10128
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	Trust anchor profile name for IPsec tunnel or gateway
Context	<b>configure ipsec trust-anchor-profile</b> <i>string</i>
Tree	<a href="#">trust-anchor-profile</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **trust-anchor** [[ca-profile](#)] *reference*

Synopsis	Add a list entry for <b>trust-anchor</b>
Context	<b>configure ipsec trust-anchor-profile</b> <i>string</i> <b>trust-anchor</b> <i>reference</i>
Tree	<a href="#">trust-anchor</a>
Description	Commands in this context configure a CA profile as a trust anchor CA.

Max. Instances	8
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[ca-profile]** *reference*

Synopsis	Name of the CA profile as a trust anchor profile
Context	<b>configure ipsec trust-anchor-profile</b> <i>string trust-anchor reference</i>
Tree	<a href="#">trust-anchor</a>
Reference	<b>configure system security pki ca-profile</b> <i>string</i>
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ts-list** [[name](#)] *string*

Synopsis	Enter the <b>ts-list</b> list instance
Context	<b>configure ipsec ts-list</b> <i>string</i>
Tree	<a href="#">ts-list</a>
Description	Commands in this context configure Traffic Selector (TS) settings.
Max. Instances	32768
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[name]** *string*

Synopsis	Traffic Selector (TS) list name
Context	<b>configure ipsec ts-list</b> <i>string</i>
Tree	<a href="#">ts-list</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## local

Synopsis	Enter the <b>local</b> context
Context	<b>configure ipsec ts-list string local</b>
Tree	<b>local</b>
Description	Commands in this context configure a local TS list, a traffic selector, such as TSr, when the system acts as an IKEv2 responder.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## entry [id] number

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure ipsec ts-list string local entry number</b>
Tree	<b>entry</b>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [id] number

Synopsis	TS list entry ID
Context	<b>configure ipsec ts-list string local entry number</b>
Tree	<b>entry</b>
Range	1 to 32
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## address

Synopsis	Enable the <b>address</b> context
Context	<b>configure ipsec ts-list string local entry number address</b>
Tree	<b>address</b>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP prefix for address range in IKEv2 traffic selector
Context	<b>configure ipsec ts-list</b> <i>string local entry number address prefix</i> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	The following elements are part of a mandatory choice: <b>prefix</b> or <b>range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**range**

Synopsis	Enable the <b>range</b> context
Context	<b>configure ipsec ts-list</b> <i>string local entry number address range</i>
Tree	<a href="#">range</a>
Notes	The following elements are part of a mandatory choice: <b>prefix</b> or <b>range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**begin** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Lower bound of the IP address range for the entry
Context	<b>configure ipsec ts-list</b> <i>string local entry number address range begin</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">begin</a>
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Upper bound of the IP address range
Context	<b>configure ipsec ts-list</b> <i>string local entry number address range end</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">end</a>
Notes	This element is mandatory.

Introduced 19.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## protocol

Synopsis Enable the **protocol** context  
Context **configure ipsec ts-list string local entry number protocol**  
Tree [protocol](#)  
Description Commands in this context specify the protocol settings for the IKEv2 traffic selector.  
Introduced 19.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## any

Synopsis Match any protocol ID  
Context **configure ipsec ts-list string local entry number protocol any**  
Tree [any](#)  
Notes The following elements are part of a mandatory choice: **any** or **id**.  
Introduced 19.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## id

Synopsis Enable the **id** context  
Context **configure ipsec ts-list string local entry number protocol id**  
Tree [id](#)  
Notes The following elements are part of a mandatory choice: **any** or **id**.  
Introduced 19.7.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## icmp

Synopsis Enter the **icmp** context  
Context **configure ipsec ts-list string local entry number protocol id icmp**  
Tree [icmp](#)

Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mip6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## opaque

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string local entry number</i> <b>protocol id icmp opaque</b>
Tree	<b>opaque</b>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-range

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list</b> <i>string local entry number</i> <b>protocol id icmp port-range</b>
Tree	<b>port-range</b>
Description	Commands in this context configure port range information for the protocol.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## begin-icmp-code *number*

Synopsis	Lower bound of the ICMP code range
Context	<b>configure ipsec ts-list</b> <i>string local entry number</i> <b>protocol id icmp port-range begin-icmp-code</b> <i>number</i>
Tree	<b>begin-icmp-code</b>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **begin-icmp-type** *number*

Synopsis Lower bound of the ICMP type range

Context **configure ipsec ts-list** *string local entry number protocol id icmp port-range begin-icmp-type number*

Tree [begin-icmp-type](#)

Range 0 to 255

Notes This element is mandatory.

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end-icmp-code** *number*

Synopsis Upper bound of the ICMP code range

Context **configure ipsec ts-list** *string local entry number protocol id icmp port-range end-icmp-code number*

Tree [end-icmp-code](#)

Range 0 to 255

Notes This element is mandatory.

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end-icmp-type** *number*

Synopsis Upper bound of the ICMP type range

Context **configure ipsec ts-list** *string local entry number protocol id icmp port-range end-icmp-type number*

Tree [end-icmp-type](#)

Range 0 to 255

Notes This element is mandatory.

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## icmp6

Synopsis	Enter the <b>icmp6</b> context
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id icmp6</i>
Tree	<a href="#">icmp6</a>
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mipv6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## opaque

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id icmp6 opaque</i>
Tree	<a href="#">opaque</a>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-range

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id icmp6 port-range</i>
Tree	<a href="#">port-range</a>
Description	Commands in this context configure port range information for the protocol.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## begin-icmp-code *number*

Synopsis	Lower bound of the ICMP code range
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id icmp6 port-range begin-icmp-code number</i>

Tree	<a href="#">begin-icmp-code</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **begin-icmp-type** *number*

Synopsis	Lower bound of the ICMP type range
Context	<b>configure</b> <a href="#">ipsec ts-list</a> <i>string</i> <a href="#">local entry</a> <i>number</i> <a href="#">protocol id icmp6</a> <a href="#">port-range</a> <a href="#">begin-icmp-type</a> <i>number</i>
Tree	<a href="#">begin-icmp-type</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end-icmp-code** *number*

Synopsis	Upper bound of the ICMP code range
Context	<b>configure</b> <a href="#">ipsec ts-list</a> <i>string</i> <a href="#">local entry</a> <i>number</i> <a href="#">protocol id icmp6</a> <a href="#">port-range</a> <a href="#">end-icmp-code</a> <i>number</i>
Tree	<a href="#">end-icmp-code</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end-icmp-type** *number*

Synopsis	Upper bound of the ICMP type range
Context	<b>configure</b> <a href="#">ipsec ts-list</a> <i>string</i> <a href="#">local entry</a> <i>number</i> <a href="#">protocol id icmp6</a> <a href="#">port-range</a> <a href="#">end-icmp-type</a> <i>number</i>
Tree	<a href="#">end-icmp-type</a>
Range	0 to 255

Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## mipv6

Synopsis	Enter the <b>mipv6</b> context
Context	<b>configure ipsec ts-list</b> <i>string local entry number</i> <b>protocol id mipv6</b>
Tree	<b>mipv6</b>
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mipv6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## opaque

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string local entry number</i> <b>protocol id mipv6 opaque</b>
Tree	<b>opaque</b>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-range

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list</b> <i>string local entry number</i> <b>protocol id mipv6 port-range</b>
Tree	<b>port-range</b>
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**begin *number***

Synopsis	Lower bound of the port range
Context	<b>configure ipsec ts-list</b> <i>string local entry number</i> <b>protocol id mipv6 port-range begin</b> <i>number</i>
Tree	<b>begin</b>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end *number***

Synopsis	Upper bound of the port range
Context	<b>configure ipsec ts-list</b> <i>string local entry number</i> <b>protocol id mipv6 port-range end</b> <i>number</i>
Tree	<b>end</b>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**protocol-id-with-any-port (*keyword* | *number*)**

Synopsis	Protocol ID that accepts any port value
Context	<b>configure ipsec ts-list</b> <i>string local entry number</i> <b>protocol id protocol-id-with-any-port</b> ( <i>keyword</i>   <i>number</i> )
Tree	<b>protocol-id-with-any-port</b>
Range	1 to 255
Options	icmp, tcp, udp, icmp6, sctp, mipv6
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mipv6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## sctp

Synopsis	Enter the <b>sctp</b> context
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id sctp</i>
Tree	<a href="#">sctp</a>
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mipv6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## opaque

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id sctp opaque</i>
Tree	<a href="#">opaque</a>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-range

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id sctp port-range</i>
Tree	<a href="#">port-range</a>
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## begin *number*

Synopsis	Lower bound of the port range
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id sctp port-range begin number</i>
Tree	<a href="#">begin</a>

Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end number**

Synopsis	Upper bound of the port range
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id sctp port-range end number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tcp**

Synopsis	Enter the <b>tcp</b> context
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id tcp</i>
Tree	<a href="#">tcp</a>
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mipv6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **opaque**

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id tcp opaque</i>
Tree	<a href="#">opaque</a>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-range

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list string local entry number protocol id tcp port-range</b>
Tree	<a href="#">port-range</a>
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## begin number

Synopsis	Lower bound of the port range
Context	<b>configure ipsec ts-list string local entry number protocol id tcp port-range begin number</b>
Tree	<a href="#">begin</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## end number

Synopsis	Upper bound of the port range
Context	<b>configure ipsec ts-list string local entry number protocol id tcp port-range end number</b>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## udp

Synopsis	Enter the <b>udp</b> context
Context	<b>configure ipsec ts-list string local entry number protocol id udp</b>
Tree	<a href="#">udp</a>

Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mip6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## opaque

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id udp opaque</i>
Tree	<a href="#">opaque</a>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-range

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id udp port-range</i>
Tree	<a href="#">port-range</a>
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## begin *number*

Synopsis	Lower bound of the port range
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id udp port-range begin number</i>
Tree	<a href="#">begin</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end number**

Synopsis	Upper bound of the port range
Context	<b>configure ipsec ts-list</b> <i>string local entry number protocol id udp port-range end number</i>
Tree	<b>end</b>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**remote**

Synopsis	Enter the <b>remote</b> context
Context	<b>configure ipsec ts-list</b> <i>string remote</i>
Tree	<b>remote</b>
Description	Commands in this context configure a remote TS list, a traffic selector, such as TSr, when the system acts as an IKEv2 responder.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**entry [id] number**

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure ipsec ts-list</b> <i>string remote entry number</i>
Tree	<b>entry</b>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[id] number**

Synopsis	TS list entry ID
Context	<b>configure ipsec ts-list</b> <i>string remote entry number</i>
Tree	<b>entry</b>
Range	1 to 32
Notes	This element is part of a list key.

Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## address

Synopsis	Enable the <b>address</b> context
Context	<b>configure ipsec ts-list string remote entry number address</b>
Tree	<a href="#">address</a>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## prefix (*ipv4-prefix | ipv6-prefix*)

Synopsis	IP prefix for address range in IKEv2 traffic selector
Context	<b>configure ipsec ts-list string remote entry number address prefix (<i>ipv4-prefix   ipv6-prefix</i>)</b>
Tree	<a href="#">prefix</a>
Notes	The following elements are part of a mandatory choice: <b>prefix</b> or <b>range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## range

Synopsis	Enable the <b>range</b> context
Context	<b>configure ipsec ts-list string remote entry number address range</b>
Tree	<a href="#">range</a>
Notes	The following elements are part of a mandatory choice: <b>prefix</b> or <b>range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## begin (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Lower bound of the IP address range for the entry
Context	<b>configure ipsec ts-list string remote entry number address range begin (<i>ipv4-address-no-zone   ipv6-address-no-zone</i>)</b>
Tree	<a href="#">begin</a>

Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Upper bound of the IP address range
Context	<b>configure ipsec ts-list</b> <i>string remote entry number address range end</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">end</a>
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **protocol**

Synopsis	Enable the <b>protocol</b> context
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol</i>
Tree	<a href="#">protocol</a>
Description	Commands in this context specify the protocol settings for the IKEv2 traffic selector.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **any**

Synopsis	Match any protocol ID
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol any</i>
Tree	<a href="#">any</a>
Notes	The following elements are part of a mandatory choice: <b>any</b> or <b>id</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **id**

Synopsis	Enable the <b>id</b> context
----------	------------------------------

Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id</i>
Tree	<a href="#">id</a>
Notes	The following elements are part of a mandatory choice: <b>any</b> or <b>id</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## icmp

Synopsis	Enter the <b>icmp</b> context
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id icmp</i>
Tree	<a href="#">icmp</a>
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mip6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## opaque

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id icmp opaque</i>
Tree	<a href="#">opaque</a>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-range

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id icmp port-range</i>
Tree	<a href="#">port-range</a>
Description	Commands in this context configure port range information for the protocol.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **begin-icmp-code** *number*

Synopsis Lower bound of the ICMP code range

Context **configure ipsec ts-list** *string* **remote entry** *number* **protocol id icmp port-range begin-icmp-code** *number*

Tree [begin-icmp-code](#)

Range 0 to 255

Notes This element is mandatory.

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **begin-icmp-type** *number*

Synopsis Lower bound of the ICMP type range

Context **configure ipsec ts-list** *string* **remote entry** *number* **protocol id icmp port-range begin-icmp-type** *number*

Tree [begin-icmp-type](#)

Range 0 to 255

Notes This element is mandatory.

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end-icmp-code** *number*

Synopsis Upper bound of the ICMP code range

Context **configure ipsec ts-list** *string* **remote entry** *number* **protocol id icmp port-range end-icmp-code** *number*

Tree [end-icmp-code](#)

Range 0 to 255

Notes This element is mandatory.

Introduced 19.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end-icmp-type** *number*

Synopsis	Upper bound of the ICMP type range
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id icmp port-range end-icmp-type number</i>
Tree	<a href="#">end-icmp-type</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**icmp6**

Synopsis	Enter the <b>icmp6</b> context
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id icmp6</i>
Tree	<a href="#">icmp6</a>
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mip6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**opaque**

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id icmp6 opaque</i>
Tree	<a href="#">opaque</a>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-range**

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id icmp6 port-range</i>

---

Tree	<a href="#">port-range</a>
Description	Commands in this context configure port range information for the protocol.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **begin-icmp-code** *number*

Synopsis	Lower bound of the ICMP code range
Context	<b>configure ipsec ts-list</b> <i>string</i> <a href="#">remote entry</a> <i>number</i> <a href="#">protocol id icmp6</a> <a href="#">port-range</a> <a href="#">begin-icmp-code</a> <i>number</i>
Tree	<a href="#">begin-icmp-code</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **begin-icmp-type** *number*

Synopsis	Lower bound of the ICMP type range
Context	<b>configure ipsec ts-list</b> <i>string</i> <a href="#">remote entry</a> <i>number</i> <a href="#">protocol id icmp6</a> <a href="#">port-range</a> <a href="#">begin-icmp-type</a> <i>number</i>
Tree	<a href="#">begin-icmp-type</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end-icmp-code** *number*

Synopsis	Upper bound of the ICMP code range
Context	<b>configure ipsec ts-list</b> <i>string</i> <a href="#">remote entry</a> <i>number</i> <a href="#">protocol id icmp6</a> <a href="#">port-range</a> <a href="#">end-icmp-code</a> <i>number</i>
Tree	<a href="#">end-icmp-code</a>
Range	0 to 255

Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end-icmp-type** *number*

Synopsis	Upper bound of the ICMP type range
Context	<b>configure</b> <a href="#">ipsec ts-list</a> <i>string</i> <a href="#">remote entry</a> <i>number</i> <a href="#">protocol id icmp6</a> <a href="#">port-range</a> <b>end-icmp-type</b> <i>number</i>
Tree	<a href="#">end-icmp-type</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mipv6**

Synopsis	Enter the <b>mipv6</b> context
Context	<b>configure</b> <a href="#">ipsec ts-list</a> <i>string</i> <a href="#">remote entry</a> <i>number</i> <a href="#">protocol id mipv6</a>
Tree	<a href="#">mipv6</a>
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mipv6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **opaque**

Synopsis	Support OPAQUE ports
Context	<b>configure</b> <a href="#">ipsec ts-list</a> <i>string</i> <a href="#">remote entry</a> <i>number</i> <a href="#">protocol id mipv6</a> <b>opaque</b>
Tree	<a href="#">opaque</a>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-range

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list string remote entry number protocol id mipv6 port-range</b>
Tree	<a href="#">port-range</a>
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## begin number

Synopsis	Lower bound of the port range
Context	<b>configure ipsec ts-list string remote entry number protocol id mipv6 port-range begin number</b>
Tree	<a href="#">begin</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## end number

Synopsis	Upper bound of the port range
Context	<b>configure ipsec ts-list string remote entry number protocol id mipv6 port-range end number</b>
Tree	<a href="#">end</a>
Range	0 to 255
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## protocol-id-with-any-port (keyword | number)

Synopsis	Protocol ID that accepts any port value
Context	<b>configure ipsec ts-list string remote entry number protocol id protocol-id-with-any-port (keyword   number)</b>

Tree	<a href="#">protocol-id-with-any-port</a>
Range	1 to 255
Options	icmp, tcp, udp, icmp6, sctp, mipv6
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mipv6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## sctp

Synopsis	Enter the <b>sctp</b> context
Context	<b>configure ipsec ts-list</b> <i>string</i> <i>remote entry number protocol id sctp</i>
Tree	<a href="#">sctp</a>
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mipv6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## opaque

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string</i> <i>remote entry number protocol id sctp opaque</i>
Tree	<a href="#">opaque</a>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-range

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list</b> <i>string</i> <i>remote entry number protocol id sctp port-range</i>
Tree	<a href="#">port-range</a>
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .

Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **begin** *number*

Synopsis	Lower bound of the port range
Context	<b>configure</b> <a href="#">ipsec ts-list</a> <i>string</i> <a href="#">remote entry</a> <i>number</i> <a href="#">protocol id</a> <a href="#">sctp</a> <a href="#">port-range</a> <b>begin</b> <i>number</i>
Tree	<a href="#">begin</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **end** *number*

Synopsis	Upper bound of the port range
Context	<b>configure</b> <a href="#">ipsec ts-list</a> <i>string</i> <a href="#">remote entry</a> <i>number</i> <a href="#">protocol id</a> <a href="#">sctp</a> <a href="#">port-range</a> <b>end</b> <i>number</i>
Tree	<a href="#">end</a>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tcp**

Synopsis	Enter the <b>tcp</b> context
Context	<b>configure</b> <a href="#">ipsec ts-list</a> <i>string</i> <a href="#">remote entry</a> <i>number</i> <a href="#">protocol id</a> <b>tcp</b>
Tree	<a href="#">tcp</a>
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mipv6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**opaque**

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id tcp</i> <b>opaque</b>
Tree	<b>opaque</b>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-range**

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id tcp</i> <b>port-range</b>
Tree	<b>port-range</b>
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**begin number**

Synopsis	Lower bound of the port range
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id tcp port-range</i> <b>begin number</b>
Tree	<b>begin</b>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end number**

Synopsis	Upper bound of the port range
Context	<b>configure ipsec ts-list</b> <i>string remote entry number protocol id tcp port-range</i> <b>end number</b>
Tree	<b>end</b>

Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## udp

Synopsis	Enter the <b>udp</b> context
Context	<b>configure ipsec ts-list</b> <i>string</i> <i>remote entry number protocol id udp</i>
Tree	<a href="#">udp</a>
Notes	The following elements are part of a mandatory choice: <b>icmp</b> , <b>icmp6</b> , <b>mip6</b> , <b>protocol-id-with-any-port</b> , <b>sctp</b> , <b>tcp</b> , or <b>udp</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## opaque

Synopsis	Support OPAQUE ports
Context	<b>configure ipsec ts-list</b> <i>string</i> <i>remote entry number protocol id udp opaque</i>
Tree	<a href="#">opaque</a>
Description	This command allows the protocol ID to be accepted even when the port information is not available.
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## port-range

Synopsis	Enable the <b>port-range</b> context
Context	<b>configure ipsec ts-list</b> <i>string</i> <i>remote entry number protocol id udp port-range</i>
Tree	<a href="#">port-range</a>
Notes	The following elements are part of a choice: <b>opaque</b> or <b>port-range</b> .
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**begin *number***

Synopsis	Lower bound of the port range
Context	<b>configure ipsec ts-list</b> <i>string</i> <b>remote entry</b> <i>number</i> <b>protocol id udp port-range begin</b> <i>number</i>
Tree	<b>begin</b>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**end *number***

Synopsis	Upper bound of the port range
Context	<b>configure ipsec ts-list</b> <i>string</i> <b>remote entry</b> <i>number</i> <b>protocol id udp port-range end</b> <i>number</i>
Tree	<b>end</b>
Range	0 to 65535
Notes	This element is mandatory.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**tunnel-template [*id*] *number***

Synopsis	Enter the <b>tunnel-template</b> list instance
Context	<b>configure ipsec tunnel-template</b> <i>number</i>
Tree	<b>tunnel-template</b>
Max. Instances	2048
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[*id*] *number***

Synopsis	Tunnel template ID
Context	<b>configure ipsec tunnel-template</b> <i>number</i>

Tree	<a href="#">tunnel-template</a>
Range	1 to 2048
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **clear-df-bit** *boolean*

Synopsis	Clear the Do-not-Fragment (DF) bit
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">clear-df-bit</a> <i>boolean</i>
Tree	<a href="#">clear-df-bit</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **copy-traffic-class-upon-decapsulation** *boolean*

Synopsis	Enable traffic class copy upon decapsulation
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">copy-traffic-class-upon-decapsulation</a> <i>boolean</i>
Tree	<a href="#">copy-traffic-class-upon-decapsulation</a>
Description	When configured to <b>true</b> , the system copies the traffic class from the outer tunnel IP packet header to the payload IP packet header in the decapsulating direction (public to private).  When configured to <b>false</b> , the system does not copy the traffic class from the outer IP packet to the payload IP packet header upon decapsulation.
Default	false
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **encapsulated-ip-mtu** *number*

Synopsis Maximum size of the encapsulated tunnel packet

Context **configure ipsec tunnel-template** *number* **encapsulated-ip-mtu** *number*

Tree [encapsulated-ip-mtu](#)

Description This command specifies the maximum size of the encapsulated tunnel packet to the IPsec tunnel, the IP tunnel, or the dynamic tunnels terminated on the IPsec Gateway. If the encapsulated IPv4 or IPv6 tunnel packet exceeds this value, the system fragments the packet.

Range 512 to 9000

Units octets

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **icmp-generation**

Synopsis Enter the **icmp-generation** context

Context **configure ipsec tunnel-template** *number* **icmp-generation**

Tree [icmp-generation](#)

Description Commands in this context configure settings for ICMPv4 message generation.

Introduced 21.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **frag-required**

Synopsis Enter the **frag-required** context

Context **configure ipsec tunnel-template** *number* **icmp-generation frag-required**

Tree [frag-required](#)

Description Commands in this context configure the attributes for sending generated ICMP Destination Unreachable "fragmentation needed and DF set" messages (type 3, code 4) back to the source, if the received size of the IPv4 packet on the private side exceeds the private MTU size.

Introduced 21.5.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of sending ICMP messages
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">icmp-generation</a> <a href="#">frag-required</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Description	This command configures the administrative state of sending ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4) messages to the source if the received size of the IPv4 packet on the private side exceeds the private MTU size.
Options	enable, disable
Default	enable
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**interval** *number*

Synopsis	Interval for sending ICMP messages
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">icmp-generation</a> <a href="#">frag-required</a> <a href="#">interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Description	This command configures the interval for sending ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4).
Range	1 to 60
Units	seconds
Default	10
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**message-count** *number*

Synopsis	Maximum number of ICMP messages that can be sent
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">icmp-generation</a> <a href="#">frag-required</a> <a href="#">message-count</a> <i>number</i>
Tree	<a href="#">message-count</a>
Description	This command configures the maximum number of ICMP Destination Unreachable "fragmentation needed, DF set" messages (type 3, code 4) that can be sent during the configured interval.

Range	10 to 1000
Default	100
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## icmp6-generation

Synopsis	Enter the <b>icmp6-generation</b> context
Context	<b>configure ipsec tunnel-template number icmp6-generation</b>
Tree	<a href="#">icmp6-generation</a>
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## pkt-too-big

Synopsis	Enter the <b>pkt-too-big</b> context
Context	<b>configure ipsec tunnel-template number icmp6-generation pkt-too-big</b>
Tree	<a href="#">pkt-too-big</a>
Description	Commands in this context configure values for the ICMPv6 Packet Too Big (PTB) messages. The system sends PTB messages if an IPv6 packet is received on the private side that is larger than 1280 bytes and also exceeds the private MTU of the tunnel.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## admin-state *keyword*

Synopsis	Administrative state of Packet Too Big message sends
Context	<b>configure ipsec tunnel-template number icmp6-generation pkt-too-big admin-state <i>keyword</i></b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**interval** *number*

Synopsis	Maximum interval during which PTB messages can be sent
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">icmp6-generation</a> <a href="#">pkt-too-big</a> <a href="#">interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 60
Units	seconds
Default	10
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**message-count** *number*

Synopsis	Max ICMPv6 messages that can be sent during interval
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">icmp6-generation</a> <a href="#">pkt-too-big</a> <a href="#">message-count</a> <i>number</i>
Tree	<a href="#">message-count</a>
Range	10 to 1000
Default	100
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ignore-default-route** *boolean*

Synopsis	Ignore any full range traffic selector in TSi
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">ignore-default-route</a> <i>boolean</i>
Tree	<a href="#">ignore-default-route</a>
Description	When configured to <b>true</b> , any full range traffic selector is ignored when creating a reverse route.  When configured to <b>false</b> , no CHILD_SA is created if any full range traffic selector is included in TSi.
Default	false
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ip-mtu** *number*

Synopsis	Maximum size of the IP MTU for the payload packets
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">ip-mtu</a> <i>number</i>
Tree	<a href="#">ip-mtu</a>
Range	512 to 9000
Units	octets
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ipsec-transform** *reference*

Synopsis	IPsec transform ID for the tunnel template
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">ipsec-transform</a> <i>reference</i>
Tree	<a href="#">ipsec-transform</a>
Reference	<b>configure</b> <a href="#">ipsec</a> <a href="#">ipsec-transform</a> <i>number</i>
Max. Instances	4
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**pmtu-discovery-aging** *number*

Synopsis	Aging out time of the learned path MTU
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">pmtu-discovery-aging</a> <i>number</i>
Tree	<a href="#">pmtu-discovery-aging</a>
Description	This command configures the temporary public and private MTU expiration time. The temporary MTU is used for MTU propagation.
Range	900 to 3600
Units	seconds
Default	900
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**private-tcp-mss-adjust** *number*

Synopsis	New TCP MSS value on the private side
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">private-tcp-mss-adjust</a> <i>number</i>
Tree	<a href="#">private-tcp-mss-adjust</a>
Description	This command specifies the new (adjusted) TCP MSS value of TCP SYN packets on the private side.  When unconfigured, the MSS value is derived from the received TCP SYN packet on the private side.
Range	512 to 9000
Units	octets
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**propagate-pmtu-v4** *boolean*

Synopsis	Enable propagation of the path MTU to IPv4 hosts
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">propagate-pmtu-v4</a> <i>boolean</i>
Tree	<a href="#">propagate-pmtu-v4</a>
Description	When configured to <b>true</b> , the system propagates the path MTU learned from the public side to the private side (IPv4 hosts).
Default	true
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**propagate-pmtu-v6** *boolean*

Synopsis	Enable propagation of the path MTU to IPv6 hosts
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">propagate-pmtu-v6</a> <i>boolean</i>
Tree	<a href="#">propagate-pmtu-v6</a>
Description	When configured to <b>true</b> , the system propagates the path MTU learned from the public side to the private side (IPv6 hosts).
Default	true
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**public-tcp-mss-adjust** (*number | keyword*)

Synopsis	New TCP MSS value on the public side
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">public-tcp-mss-adjust</a> ( <i>number   keyword</i> )
Tree	<a href="#">public-tcp-mss-adjust</a>
Description	This command specifies the new (adjusted) TCP MSS value for the TCP traffic in an IPsec tunnel which is sent from the public network to the private network. The system can use this value to adjust or insert the MSS option in the TCP SYN packet.  When unconfigured, the MSS value is derived from the public MTU and IPsec overhead.
Range	512 to 9000
Units	octets
Options	auto
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**replay-window** *number*

Synopsis	Anti-replay window size for the tunnel template
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">replay-window</a> <i>number</i>
Tree	<a href="#">replay-window</a>
Range	32   64   128   256   512
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**sp-reverse-route** *keyword*

Synopsis	Reverse route creation method in private service
Context	<b>configure</b> <a href="#">ipsec tunnel-template</a> <i>number</i> <a href="#">sp-reverse-route</a> <i>keyword</i>
Tree	<a href="#">sp-reverse-route</a>
Description	This command allows the system to automatically create a reverse route based on dynamic LAN-to-LAN tunnel's TSi in private service.
Options	none, use-security-policy
Default	none
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## 3.21 isa commands

```

configure
- isa
  - application-assurance-group number
  - aa-sub-scale keyword
  - admin-state keyword
  - apply-groups reference
  - apply-groups-exclude reference
  - backup
    - esa number vm number
    - isa string
  - description string
  - divert-fc keyword
  - failure-mode keyword
  - flow-attribute string
  - http-enrich-max-packet-size number
  - isa-capacity-cost-high-threshold number
  - isa-capacity-cost-low-threshold number
  - minimum-isa-generation number
  - overload-cut-through boolean
  - overload-sub-quarantine
    - admin-state keyword
  - primary
    - esa number vm number
    - isa string
  - qos
    - egress
      - from-subscriber
        - buffer-pool
          - name string
          - resv-cbs number
          - slope-policy reference
        - port-scheduler-policy reference
        - queue-policy reference
        - wa-shared-high-wmark (number | keyword)
        - wa-shared-low-wmark number
      - to-subscriber
        - buffer-pool
          - name string
          - resv-cbs number
          - slope-policy reference
        - port-scheduler-policy reference
        - queue-policy reference
        - wa-shared-high-wmark (number | keyword)
        - wa-shared-low-wmark number
    - shared-resources
      - gtp-tunnel-database number
      - tcp-advanced-functions number
      - url-filter-web-service-cache number
  - statistics
    - stats-type keyword
    - accounting-policy reference
    - apply-groups reference
    - apply-groups-exclude reference
    - collect-stats boolean
  - transit-prefix-limits
    - ipv4-entries number
    - ipv4-remote-entries number
    - ipv6-entries number
    - ipv6-remote-entries number

```

configure isa application-assurance-group vm-traffic-distribute-by-ip

```

- vm-traffic-distribute-by-ip boolean
- vm-traffic-distribute-by-teid boolean
- apply-groups reference
- apply-groups-exclude reference
- lms-group number
  - admin-state keyword
  - apply-groups reference
  - apply-groups-exclude reference
  - description string
  - esa reference vm reference
    - apply-groups reference
    - apply-groups-exclude reference
    - drain boolean
  - mda string
    - apply-groups reference
    - apply-groups-exclude reference
    - drain boolean
  - port-policy reference
- nat-group number
  - admin-state keyword
  - apply-groups reference
  - apply-groups-exclude reference
  - description string
  - esa reference vm reference
  - log
    - suppress-lsn-events boolean
    - suppress-lsn-sub-blocks-free boolean
  - mda string
  - radius-accounting-policy reference
  - redundancy
    - active-mda-limit number
  - inter-chassis
    - flow-timeout-on-switchover number
    - ip-mtu number
    - keepalive
      - dropcount number
      - interval number
    - local-ip-range-start string
    - monitor-oper-group reference
      - apply-groups reference
      - apply-groups-exclude reference
      - health-drop number
    - monitor-port string
      - apply-groups reference
      - apply-groups-exclude reference
      - health-drop number
    - preferred boolean
    - remote-ip-range-start string
    - replication-threshold number
    - router-instance string
    - sync boolean
  - intra-chassis
    - active-active
      - failed-mda-limit number
    - active-standby
    - l2aware-bypass
  - scaling-profile keyword
  - session-limits
    - reserved number
    - upnp-mappings number
    - watermarks
      - high number
      - low number
- tunnel-group number

```

### 3.21.1 isa command descriptions

#### isa

Synopsis	Enter the <b>isa</b> context
Context	<b>configure isa</b>
Tree	<a href="#">isa</a>
Description	Commands in this context configure the Integrated Services Adapter (ISA).
Introduced	16.0.R1
Platforms	All

#### application-assurance-group [[aa-group-id](#)] *number*

Synopsis	Enter the <b>application-assurance-group</b> list instance
Context	<b>configure isa</b> <a href="#">application-assurance-group</a> <i>number</i>
Tree	<a href="#">application-assurance-group</a>
Max. Instances	7
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

#### [\[aa-group-id\]](#) *number*

Synopsis	AA group ID
Context	<b>configure isa</b> <a href="#">application-assurance-group</a> <i>number</i>
Tree	<a href="#">application-assurance-group</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**aa-sub-scale** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	AA group sub-scale
Context	<b>configure</b> isa application-assurance-group number aa-sub-scale keyword
Tree	aa-sub-scale
Options	residential, vpn, mobile-gateway, lightweight-internet, residential-8k, residential-16k, residential-32k, residential-64k, vpn-1k, vpn-2k, vpn-4k, vpn-8k, mobile-gateway-1m, mobile-gateway-2m, lightweight-internet-512k, firewall-32
Default	residential
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of this AA group
Context	<b>configure</b> isa application-assurance-group number admin-state keyword
Tree	admin-state
Options	enable, disable
Default	disable
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**backup**

Synopsis	Enter the <b>backup</b> context
Context	<b>configure</b> isa application-assurance-group number backup
Tree	backup
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**esa** [esa-id] number vm number

Synopsis	Add a list entry for <b>esa</b>
----------	---------------------------------

Context	<b>configure isa application-assurance-group number backup esa number vm number</b>
Tree	<a href="#">esa</a>
Max. Instances	1
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[esa-id] number**

Synopsis	ESA ID
Context	<b>configure isa application-assurance-group number backup esa number vm number</b>
Tree	<a href="#">esa</a>
Range	1 to 16
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**vm number**

Synopsis	VM ID within the ESA
Context	<b>configure isa application-assurance-group number backup esa number vm number</b>
Tree	<a href="#">esa</a>
Range	1 to 4
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**isa [mda-id] string**

Synopsis	Add a list entry for <b>isa</b>
Context	<b>configure isa application-assurance-group number backup isa string</b>
Tree	<a href="#">isa</a>
Max. Instances	1
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[mda-id]** *string*

Synopsis MDA/ISA ID  
 Context **configure** isa application-assurance-group number backup isa string  
 Tree isa  
 Notes This element is part of a list key.  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis Text description  
 Context **configure** isa application-assurance-group number description string  
 Tree description  
 String Length 1 to 80  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **divert-fc** *keyword*

Synopsis Diverted traffic forwarding class  
 Context **configure** isa application-assurance-group number divert-fc keyword  
 Tree divert-fc  
 Options be, l2, af, l1, h2, ef, h1, nc  
 Max. 8  
 Instances  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **failure-mode** *keyword*

Synopsis Mode of operation when no ISA-AA cards are available  
 Context **configure** isa application-assurance-group number failure-mode keyword

Tree	<a href="#">failure-mode</a>
Options	fail-to-open
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **flow-attribute** [\[flow-attribute-name\]](#) *string*

Synopsis	Add a list entry for <b>flow-attribute</b>
Context	<b>configure</b> <a href="#">isa application-assurance-group</a> <i>number</i> <a href="#">flow-attribute</a> <i>string</i>
Tree	<a href="#">flow-attribute</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[flow-attribute-name]** *string*

Synopsis	Flow attribute name
Context	<b>configure</b> <a href="#">isa application-assurance-group</a> <i>number</i> <a href="#">flow-attribute</a> <i>string</i>
Tree	<a href="#">flow-attribute</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **http-enrich-max-packet-size** *number*

Synopsis	Maximum HTTP enriched packet size
Context	<b>configure</b> <a href="#">isa application-assurance-group</a> <i>number</i> <a href="#">http-enrich-max-packet-size</a> <i>number</i>
Tree	<a href="#">http-enrich-max-packet-size</a>
Range	576 to 9212
Units	octets
Default	1500
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**isa-capacity-cost-high-threshold** *number*

Synopsis	Capacity cost high threshold for the ISA-AA group
Context	<b>configure</b> <a href="#">isa application-assurance-group</a> <i>number</i> <a href="#">isa-capacity-cost-high-threshold</a> <i>number</i>
Tree	<a href="#">isa-capacity-cost-high-threshold</a>
Range	0 to 4294967294
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**isa-capacity-cost-low-threshold** *number*

Synopsis	Capacity cost low threshold for the ISA-AA group
Context	<b>configure</b> <a href="#">isa application-assurance-group</a> <i>number</i> <a href="#">isa-capacity-cost-low-threshold</a> <i>number</i>
Tree	<a href="#">isa-capacity-cost-low-threshold</a>
Range	1 to 4294967295
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**minimum-isa-generation** *number*

Synopsis	Minimum ISA generation for this AA group
Context	<b>configure</b> <a href="#">isa application-assurance-group</a> <i>number</i> <a href="#">minimum-isa-generation</a> <i>number</i>
Tree	<a href="#">minimum-isa-generation</a>
Range	1 to 2
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**overload-cut-through** *boolean*

Synopsis	Enable cut-through of traffic if ISA is in overload
Context	<b>configure</b> <a href="#">isa application-assurance-group</a> <i>number</i> <a href="#">overload-cut-through</a> <i>boolean</i>
Tree	<a href="#">overload-cut-through</a>
Default	false
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### overload-sub-quarantine

Synopsis Enter the **overload-sub-quarantine** context

Context **configure isa application-assurance-group number overload-sub-quarantine**

Tree [overload-sub-quarantine](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### admin-state *keyword*

Synopsis Administrative state of overload subscriber quarantine

Context **configure isa application-assurance-group number overload-sub-quarantine admin-state *keyword***

Tree [admin-state](#)

Options enable, disable

Default disable

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### primary

Synopsis Enter the **primary** context

Context **configure isa application-assurance-group number primary**

Tree [primary](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### esa [*esa-id*] *number vm number*

Synopsis Add a list entry for **esa**

Context **configure isa application-assurance-group number primary esa *number vm number***

Tree [esa](#)

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[esa-id]** *number*

Synopsis ESA ID

Context **configure** isa application-assurance-group number primary esa number vm number

Tree esa

Range 1 to 16

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **vm** *number*

Synopsis VM ID within the ESA

Context **configure** isa application-assurance-group number primary esa number vm number

Tree esa

Range 1 to 4

Notes This element is part of a list key.

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **isa** [**mda-id**] *string*

Synopsis Add a list entry for **isa**

Context **configure** isa application-assurance-group number primary isa string

Tree isa

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[mda-id]** *string*

Synopsis MDA/ISA ID

Context **configure** isa application-assurance-group number primary isa string

Tree isa

---

Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## qos

Synopsis	Enter the <b>qos</b> context
Context	<b>configure isa application-assurance-group number qos</b>
Tree	<a href="#">qos</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## egress

Synopsis	Enter the <b>egress</b> context
Context	<b>configure isa application-assurance-group number qos egress</b>
Tree	<a href="#">egress</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## from-subscriber

Synopsis	Enter the <b>from-subscriber</b> context
Context	<b>configure isa application-assurance-group number qos egress from-subscriber</b>
Tree	<a href="#">from-subscriber</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## buffer-pool

Synopsis	Enter the <b>buffer-pool</b> context
Context	<b>configure isa application-assurance-group number qos egress from-subscriber buffer-pool</b>
Tree	<a href="#">buffer-pool</a>
Introduced	21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **name string**

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Name of the buffer pool used for this ISA group

Context **configure isa application-assurance-group number qos egress from-subscriber buffer-pool name string**

Tree [name](#)

String Length 1 to 32

Default default

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **resv-cbs number**

Synopsis Reserved CBS for this ISA group

Context **configure isa application-assurance-group number qos egress from-subscriber buffer-pool resv-cbs number**

Tree [resv-cbs](#)

Range 0 to 100

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **slope-policy reference**

Synopsis Slope policy name

Context **configure isa application-assurance-group number qos egress from-subscriber buffer-pool slope-policy reference**

Tree [slope-policy](#)

Reference **configure qos slope-policy string**

Introduced 21.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-scheduler-policy** *reference*

Synopsis	Port scheduler policy name
Context	<b>configure</b> isa application-assurance-group <i>number</i> qos egress from-subscriber port-scheduler-policy <i>reference</i>
Tree	port-scheduler-policy
Reference	<b>configure</b> qos port-scheduler-policy <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**queue-policy** *reference*

Synopsis	Queue policy name
Context	<b>configure</b> isa application-assurance-group <i>number</i> qos egress from-subscriber queue-policy <i>reference</i>
Tree	queue-policy
Reference	<b>configure</b> qos network-queue <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**wa-shared-high-wmark** (*number* | *keyword*)

Synopsis	High watermark for weighted average utilization
Context	<b>configure</b> isa application-assurance-group <i>number</i> qos egress from-subscriber wa-shared-high-wmark ( <i>number</i>   <i>keyword</i> )
Tree	wa-shared-high-wmark
Range	1 to 100
Units	percent
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**wa-shared-low-wmark** *number*

Synopsis	Low watermark for the weighted average utilization
----------	--

Context	<b>configure isa application-assurance-group number qos egress from-subscriber wa-shared-low-wmark number</b>
Tree	<a href="#">wa-shared-low-wmark</a>
Range	0 to 99
Units	percent
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### to-subscriber

Synopsis	Enter the <b>to-subscriber</b> context
Context	<b>configure isa application-assurance-group number qos egress to-subscriber</b>
Tree	<a href="#">to-subscriber</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### buffer-pool

Synopsis	Enter the <b>buffer-pool</b> context
Context	<b>configure isa application-assurance-group number qos egress to-subscriber buffer-pool</b>
Tree	<a href="#">buffer-pool</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### name *string*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Name of the buffer pool used for this ISA group
Context	<b>configure isa application-assurance-group number qos egress to-subscriber buffer-pool name <i>string</i></b>
Tree	<a href="#">name</a>
String Length	1 to 32

Default	default
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **resv-cbs** *number*

Synopsis	Reserved CBS for this ISA group
Context	<b>configure</b> isa application-assurance-group <i>number</i> qos egress to-subscriber buffer-pool <b>resv-cbs</b> <i>number</i>
Tree	<a href="#">resv-cbs</a>
Range	0 to 100
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **slope-policy** *reference*

Synopsis	Slope policy name
Context	<b>configure</b> isa application-assurance-group <i>number</i> qos egress to-subscriber buffer-pool <b>slope-policy</b> <i>reference</i>
Tree	<a href="#">slope-policy</a>
Reference	<b>configure</b> qos <b>slope-policy</b> <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-scheduler-policy** *reference*

Synopsis	Port scheduler policy name
Context	<b>configure</b> isa application-assurance-group <i>number</i> qos egress to-subscriber port-scheduler-policy <b>reference</b>
Tree	<a href="#">port-scheduler-policy</a>
Reference	<b>configure</b> qos <b>port-scheduler-policy</b> <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**queue-policy** *reference*

Synopsis	Queue policy name
Context	<b>configure</b> isa application-assurance-group <i>number</i> qos egress to-subscriber queue-policy <i>reference</i>
Tree	queue-policy
Reference	<b>configure</b> qos network-queue <i>string</i>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**wa-shared-high-wmark** (*number* | *keyword*)

Synopsis	High watermark for weighted average utilization
Context	<b>configure</b> isa application-assurance-group <i>number</i> qos egress to-subscriber wa-shared-high-wmark ( <i>number</i>   <i>keyword</i> )
Tree	wa-shared-high-wmark
Range	1 to 100
Units	percent
Options	max
Default	max
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**wa-shared-low-wmark** *number*

Synopsis	Low watermark for the weighted average utilization
Context	<b>configure</b> isa application-assurance-group <i>number</i> qos egress to-subscriber wa-shared-low-wmark <i>number</i>
Tree	wa-shared-low-wmark
Range	0 to 99
Units	percent
Default	0
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## shared-resources

Synopsis	Enter the <b>shared-resources</b> context
Context	<b>configure isa application-assurance-group number shared-resources</b>
Tree	<a href="#">shared-resources</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## gtp-tunnel-database *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Percentage of allocated memory resources
Context	<b>configure isa application-assurance-group number shared-resources gtp-tunnel-database number</b>
Tree	<a href="#">gtp-tunnel-database</a>
Range	1 to 100
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## tcp-advanced-functions *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Allocation of resources for TCP advanced functions
Context	<b>configure isa application-assurance-group number shared-resources tcp-advanced-functions number</b>
Tree	<a href="#">tcp-advanced-functions</a>
Range	1 to 100
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**url-filter-web-service-cache** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Amount of shared memory as a percentage
Context	<b>configure</b> isa application-assurance-group <i>number</i> shared-resources url-filter-web-service-cache <i>number</i>
Tree	url-filter-web-service-cache
Range	1 to 100
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**statistics**

Synopsis	Enter the <b>statistics</b> context
Context	<b>configure</b> isa application-assurance-group <i>number</i> statistics
Tree	statistics
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**stats-type** [isa-aa-group-stats-type] *keyword*

Synopsis	Enter the <b>stats-type</b> list instance
Context	<b>configure</b> isa application-assurance-group <i>number</i> statistics stats-type <i>keyword</i>
Tree	stats-type
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[isa-aa-group-stats-type]** *keyword*

Synopsis	Group performance statistics type
Context	<b>configure</b> isa application-assurance-group <i>number</i> statistics stats-type <i>keyword</i>
Tree	stats-type
Options	aa-performance
Notes	This element is part of a list key.

Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **accounting-policy** *reference*

Synopsis Accounting policy ID used by AA  
 Context **configure** isa application-assurance-group number statistics stats-type keyword accounting-policy reference  
 Tree accounting-policy  
 Reference **configure** log accounting-policy number  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **collect-stats** *boolean*

Synopsis Enable the collection of statistics  
 Context **configure** isa application-assurance-group number statistics stats-type keyword collect-stats boolean  
 Tree collect-stats  
 Default false  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **transit-prefix-limits**

Synopsis Enter the **transit-prefix-limits** context  
 Context **configure** isa application-assurance-group number transit-prefix-limits  
 Tree transit-prefix-limits  
 Introduced 21.10.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipv4-entries** *number*

Synopsis Limit of transit prefix IPv4 entries per AA group  
 Context **configure** isa application-assurance-group number transit-prefix-limits ipv4-entries number

---

Tree	<a href="#">ipv4-entries</a>
Range	1 to 16383
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipv4-remote-entries** *number*

Synopsis	Limit of transit prefix IPv4 remote entries per group
Context	<b>configure isa application-assurance-group</b> <i>number</i> <b>transit-prefix-limits ipv4-remote-entries</b> <i>number</i>
Tree	<a href="#">ipv4-remote-entries</a>
Range	1 to 2047
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-entries** *number*

Synopsis	Limit of transit prefix IPv6 entries per AA group
Context	<b>configure isa application-assurance-group</b> <i>number</i> <b>transit-prefix-limits ipv6-entries</b> <i>number</i>
Tree	<a href="#">ipv6-entries</a>
Range	1 to 8191
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ipv6-remote-entries** *number*

Synopsis	Limit of transit prefix IPv6 remote entries per group
Context	<b>configure isa application-assurance-group</b> <i>number</i> <b>transit-prefix-limits ipv6-remote-entries</b> <i>number</i>
Tree	<a href="#">ipv6-remote-entries</a>
Range	1 to 1023
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**vm-traffic-distribute-by-ip** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Allow packet distribution by IP address for virtual AA
Context	<b>configure</b> isa application-assurance-group <i>number</i> vm-traffic-distribute-by-ip <i>boolean</i>
Tree	vm-traffic-distribute-by-ip
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**vm-traffic-distribute-by-teid** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable load balancing of the traffic using TEID
Context	<b>configure</b> isa application-assurance-group <i>number</i> vm-traffic-distribute-by-teid <i>boolean</i>
Tree	vm-traffic-distribute-by-teid
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**Ins-group** [*id*] *number*

Synopsis	Enter the <b>Ins-group</b> list instance
Context	<b>configure</b> isa Ins-group <i>number</i>
Tree	Ins-group
Description	Commands in this context configure the ISA L2TP Network Server (LNS) group.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[id] number**

Synopsis	LNS group ID
Context	<b>configure isa lns-group number</b>
Tree	<a href="#">lns-group</a>
Range	1 to 4
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state keyword**

Synopsis	Administrative state of the ISA LNS group
Context	<b>configure isa lns-group number admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure isa lns-group number description string</b>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**esa [esa-id] reference vm reference**

Synopsis	Enter the <b>esa</b> list instance
Context	<b>configure isa lns-group number esa reference vm reference</b>
Tree	<a href="#">esa</a>
Max. Instances	6

Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

**[esa-id] reference**

Synopsis	ESA ID
Context	<b>configure</b> <a href="#">isa lns-group</a> <a href="#">number</a> <a href="#">esa reference</a> <a href="#">vm reference</a>
Tree	<a href="#">esa</a>
Reference	<b>configure</b> <a href="#">esa</a> <a href="#">number</a>
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

**vm reference**

Synopsis	VM ID
Context	<b>configure</b> <a href="#">isa lns-group</a> <a href="#">number</a> <a href="#">esa reference</a> <a href="#">vm reference</a>
Tree	<a href="#">esa</a>
Reference	<b>configure</b> <a href="#">esa</a> <a href="#">number</a> <a href="#">vm</a> <a href="#">number</a>
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

**drain boolean**

Synopsis	Redirect subscribers to other ESA VMs
Context	<b>configure</b> <a href="#">isa lns-group</a> <a href="#">number</a> <a href="#">esa reference</a> <a href="#">vm reference</a> <a href="#">drain boolean</a>
Tree	<a href="#">drain</a>
Description	<p>When configured to <b>true</b>, the ESA VM redirects new subscribers to use other ESA VMs.</p> <p>The drain function gracefully redirects subscribers to other ESA VMs and does not allow new subscribers to use the ESA VM. As the existing subscribers terminate their sessions, the ESA VM no longer services any subscribers and can be decommissioned gracefully.</p> <p>When configured to <b>false</b>, the ESA VM is set to the normal working operational state and accepts new LNS subscribers.</p>
Default	false

Introduced	20.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **mda** [*mda-id*] *string*

Synopsis	Enter the <b>mda</b> list instance
Context	<b>configure isa lns-group</b> <i>number mda string</i>
Tree	<b>mda</b>
Description	Commands in this context configure an ISA LNS group MDA.
Max. Instances	6
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[mda-id]** *string*

Synopsis	MDA ID for the ISA LNS group
Context	<b>configure isa lns-group</b> <i>number mda string</i>
Tree	<b>mda</b>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **drain** *boolean*

Synopsis	Prevent new L2TP sessions from associating with ISA
Context	<b>configure isa lns-group</b> <i>number mda string drain boolean</i>
Tree	<b>drain</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port-policy** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Port policy for the ISA LNS group
Context	<b>configure</b> <i>isa lns-group number port-policy reference</i>
Tree	<i>port-policy</i>
Reference	<b>configure</b> <i>port-policy string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**nat-group** [*id*] *number*

Synopsis	Enter the <b>nat-group</b> list instance
Context	<b>configure</b> <i>isa nat-group number</i>
Tree	<i>nat-group</i>
Max. Instances	4
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[id]** *number*

Synopsis	NAT group ID
Context	<b>configure</b> <i>isa nat-group number</i>
Tree	<i>nat-group</i>
Range	1 to 4
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the NAT group
Context	<b>configure</b> <i>isa nat-group number admin-state keyword</i>

Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **esa** [[esa-id](#)] *reference* [vm](#) *reference*

Synopsis	Add a list entry for <b>esa</b>
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">esa</a> <i>reference</i> <a href="#">vm</a> <i>reference</i>
Tree	<a href="#">esa</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **[esa-id]** *reference*

Synopsis	Provisioned ESA ID
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">esa</a> <i>reference</i> <a href="#">vm</a> <i>reference</i>
Tree	<a href="#">esa</a>
Reference	<b>configure</b> <a href="#">esa</a> <i>number</i>
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

**vm reference**

Synopsis	VM ID for the provisioned BB ISA
Context	<b>configure isa nat-group number esa reference vm reference</b>
Tree	<a href="#">esa</a>
Reference	<b>configure esa number vm number</b>
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

**log**

Synopsis	Enter the <b>log</b> context
Context	<b>configure isa nat-group number log</b>
Tree	<a href="#">log</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**suppress-lsn-events *boolean***

Synopsis	Suppress LSN events when RADIUS accounting is enabled
Context	<b>configure isa nat-group number log suppress-lsn-events <i>boolean</i></b>
Tree	<a href="#">suppress-lsn-events</a>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**suppress-lsn-sub-blocks-free *boolean***

Synopsis	Suppress LSN Free block and NAT pool block notification
Context	<b>configure isa nat-group number log suppress-lsn-sub-blocks-free <i>boolean</i></b>
Tree	<a href="#">suppress-lsn-sub-blocks-free</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**mda** [[mda-id](#)] *string*

Synopsis	Add a list entry for <b>mda</b>
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">mda</a> <i>string</i>
Tree	<a href="#">mda</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[mda-id]** *string*

Synopsis	MDA ID for ISA NAT group
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">mda</a> <i>string</i>
Tree	<a href="#">mda</a>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**radius-accounting-policy** *reference*

Synopsis	RADIUS accounting policy for ISA group
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">radius-accounting-policy</a> <i>reference</i>
Tree	<a href="#">radius-accounting-policy</a>
Reference	<b>configure</b> <a href="#">aaa radius</a> <a href="#">isa-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**redundancy**

Synopsis	Enter the <b>redundancy</b> context
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">redundancy</a>
Tree	<a href="#">redundancy</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**active-mda-limit** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	Number of active MS-ISAs in the NAT group
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">redundancy</a> <a href="#">active-mda-limit</a> <i>number</i>
Tree	<a href="#">active-mda-limit</a>
Range	1 to 14
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**inter-chassis**

Synopsis	Enable the <b>inter-chassis</b> context
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">redundancy</a> <a href="#">inter-chassis</a>
Tree	<a href="#">inter-chassis</a>
Notes	The following elements are part of a choice: <b>inter-chassis</b> or <b>intra-chassis</b> .
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**flow-timeout-on-switchover** *number*

Synopsis	Flow timeout immediately following a switchover
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">redundancy</a> <a href="#">inter-chassis</a> <a href="#">flow-timeout-on-switchover</a> <i>number</i>
Tree	<a href="#">flow-timeout-on-switchover</a>
Description	<p>This command configures the initial flow timeout on the newly active node for the NAT group after a switchover. The timeout is in effect only if there is no traffic present over the flow; otherwise, the first packet over the flow resets the flow timeout to the originally configured value (under the NAT policy configuration).</p> <p>This command configuration restricts the flow timeout to a portion of the originally configured value.</p>
Range	1 to 50

Units	percent
Default	50
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **ip-mtu** *number*

Synopsis	IP MTU for ISA-to-ISA communication
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">redundancy inter-chassis ip-mtu</a> <i>number</i>
Tree	<a href="#">ip-mtu</a>
Description	This command configures the IP MTU size used to transport flow synchronization records between the ISAs. Multiple flow synchronization events can be packed into a single frame up to the IP MTU size.
Range	512 to 9000
Default	1500
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **keepalive**

Synopsis	Enter the <b>keepalive</b> context
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">redundancy inter-chassis keepalive</a>
Tree	<a href="#">keepalive</a>
Description	Commands in this context configure keepalive messages between the CPMs residing on different chassis and are used to detect the presence of the peering node. If the redundant peer connectivity is lost beyond the limit defined by the keepalive messages, each node in the redundant pair transitions to standalone mode. Keepalive messages use UDP transport.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **dropcount** *number*

Synopsis	Threshold for lost consecutive keepalive messages
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">redundancy inter-chassis keepalive dropcount</a> <i>number</i>
Tree	<a href="#">dropcount</a>

Description	This command configures the threshold for the number of consecutive keepalive messages that are lost between the redundant nodes before the connection is declared down. When the peer is considered unreachable, each node transitions to standalone mode.
Range	2 to 20
Default	2
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **interval** *number*

Synopsis	Interval between two consecutive keepalive messages
Context	<b>configure</b> isa nat-group <i>number</i> redundancy inter-chassis keepalive interval <i>number</i>
Tree	interval
Description	This command configures the interval at which the keepalive messages are periodically sent between the redundant nodes (CPMs) to verify the presence of the peer. If peer connectivity is lost, each node transitions to standalone mode.
Range	2 to 250
Units	deciseconds
Default	30
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **local-ip-range-start** *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	Starting IP address for ISAs in the NAT group
Context	<b>configure</b> isa nat-group <i>number</i> redundancy inter-chassis local-ip-range-start <i>string</i>
Tree	local-ip-range-start
Description	This command configures the initial IP address for the ISAs in the NAT group. Consecutive IP addresses are automatically assigned for the remaining ISAs. The IP addresses are used to communicate between the ISAs on redundant nodes for the

purpose of flow synchronization. Traffic from the member ISA with the initial IP address is sent to the initial IP address from the remote IP range.

Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **monitor-oper-group** [[oper-group](#)] *reference*

Synopsis	Enter the <b>monitor-oper-group</b> list instance
Context	<b>configure</b> <a href="#">isa nat-group number redundancy inter-chassis monitor-oper-group reference</a>
Tree	<a href="#">monitor-oper-group</a>
Description	Commands in this context specify monitoring settings for objects in an operational group, such as SAPs, BFD sessions, or VRRP sessions, in order to adjust the overall health of the node in a redundant inter-chassis NAT system. A state change of the objects in the operational group influences the health of a NAT node in a redundant configuration.
Max. Instances	4
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[oper-group]** *reference*

Synopsis	Operational group name
Context	<b>configure</b> <a href="#">isa nat-group number redundancy inter-chassis monitor-oper-group reference</a>
Tree	<a href="#">monitor-oper-group</a>
Reference	<b>configure</b> <a href="#">service oper-group string</a>
Notes	This element is part of a list key.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **health-drop** *number*

Synopsis	Overall health drop of the NAT group on a state change
Context	<b>configure</b> <a href="#">isa nat-group number redundancy inter-chassis monitor-oper-group reference health-drop number</a>
Tree	<a href="#">health-drop</a>
Range	1 to 255

Default	1
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **monitor-port** [*port-id*] *string*

Synopsis	Enter the <b>monitor-port</b> list instance
Context	<b>configure</b> isa nat-group number redundancy inter-chassis monitor-port <i>string</i>
Tree	<a href="#">monitor-port</a>
Description	Commands in this context specify monitoring settings for a port carrying NAT traffic, in order to adjust the overall health of the node in a redundant inter-chassis NAT system. A state change of a monitored port influences the health of a NAT node in a redundant configuration.
Max. Instances	16
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[port-id]** *string*

Synopsis	Port ID
Context	<b>configure</b> isa nat-group number redundancy inter-chassis monitor-port <i>string</i>
Tree	<a href="#">monitor-port</a>
Notes	This element is part of a list key.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **health-drop** *number*

Synopsis	Overall health drop of the NAT group on a state change
Context	<b>configure</b> isa nat-group number redundancy inter-chassis monitor-port <i>string</i> health-drop <i>number</i>
Tree	<a href="#">health-drop</a>
Range	1 to 255
Default	1
Introduced	20.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### preferred *boolean*

Synopsis Set the preferred activity status for the node

Context **configure isa nat-group number redundancy inter-chassis preferred boolean**

Tree [preferred](#)

Description When configured to **true**, the system designates the node in a redundant NAT system with the preferred activity status. The preferred status comes into consideration only when both redundant nodes have equal health values. If the peer traffic-serving node has an equal health value but does not have the preferred designation, a switch of activity occurs to route traffic to the preferred node. The switchover could cause a brief interruption in traffic flow.

When configured to **false**, the preferred designation is not set for the node.

Default false

Introduced 20.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### remote-ip-range-start *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis Starting IP address for ISAs on the remote node

Context **configure isa nat-group number redundancy inter-chassis remote-ip-range-start string**

Tree [remote-ip-range-start](#)

Description This command configures the initial IP address for the ISAs in the NAT group on the remote node. Consecutive IP addresses are automatically assigned for the remaining ISAs. The IP addresses are used to communicate between the ISAs on redundant nodes for the purpose of flow synchronization. Traffic from the member ISA with the initial local IP address is sent to the initial IP address from the remote IP range.

Introduced 20.7.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**replication-threshold** *number*

Synopsis	Minimum time to wait before a NAT flow is synchronized
Context	<b>configure isa nat-group</b> <i>number</i> <b>redundancy inter-chassis replication-threshold</b> <i>number</i>
Tree	<b>replication-threshold</b>
Description	This command configures the minimum time to wait before a NAT flow is replicated (synchronized) to the standby node.
Range	0 to 300
Units	seconds
Default	20
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**router-instance** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	Router instance for the ISA-to-ISA communication
Context	<b>configure isa nat-group</b> <i>number</i> <b>redundancy inter-chassis router-instance</b> <i>string</i>
Tree	<b>router-instance</b>
Description	This command specifies the routing instance through which ISAs on redundant nodes communicate with each other and synchronize their flow state.
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**sync** *boolean*

Synopsis	Synchronize NAT flows between nodes
Context	<b>configure isa nat-group</b> <i>number</i> <b>redundancy inter-chassis sync</b> <i>boolean</i>
Tree	<b>sync</b>
Default	true
Introduced	22.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## intra-chassis

Synopsis Enter the **intra-chassis** context

Context **configure** [isa nat-group number redundancy intra-chassis](#)

Tree [intra-chassis](#)

Notes The following elements are part of a choice: **inter-chassis** or **intra-chassis**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## active-active

Synopsis Enter the **active-active** context

Context **configure** [isa nat-group number redundancy intra-chassis active-active](#)

Tree [active-active](#)

Notes The following elements are part of a choice: **active-active**, **active-standby**, or **I2aware-bypass**.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## failed-mda-limit *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

### WARNING:

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis Maximum failed MDAs allowed in ICR for the NAT group

Context **configure** [isa nat-group number redundancy intra-chassis active-active failed-mda-limit number](#)

Tree [failed-mda-limit](#)

Range 1 to 2

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## active-standby

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	Active-standby intra-chassis NAT redundancy model
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">redundancy intra-chassis active-standby</a>
Tree	<a href="#">active-standby</a>
Notes	The following elements are part of a choice: <b>active-active</b> , <b>active-standby</b> , or <b>l2aware-bypass</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## l2aware-bypass

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	L2-aware-bypass NAT redundancy model
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">redundancy intra-chassis l2aware-bypass</a>
Tree	<a href="#">l2aware-bypass</a>
Notes	The following elements are part of a choice: <b>active-active</b> , <b>active-standby</b> , or <b>l2aware-bypass</b> .
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**scaling-profile** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	Scaling profile for the NAT group
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">scaling-profile</a> <i>keyword</i>
Tree	<a href="#">scaling-profile</a>
Description	This command determines profiles for NAT scaling. Lower profile numbers allocate less resources, thus supporting lower scaling.  Contact your Nokia representative for more information about NAT scaling figures in each profile.
Options	profile1, profile2, profile3
Default	profile1
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**session-limits**

Synopsis	Enter the <b>session-limits</b> context
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">session-limits</a>
Tree	<a href="#">session-limits</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**reserved** *number*

Synopsis	Number of sessions reserved for prioritized sessions
Context	<b>configure</b> <a href="#">isa nat-group</a> <i>number</i> <a href="#">session-limits</a> <a href="#">reserved</a> <i>number</i>
Tree	<a href="#">reserved</a>
Range	1 to 6291456
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## upnp-mappings *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	Maximum number of UPnP mappings per member
Context	<b>configure isa nat-group</b> <i>number</i> <a href="#">session-limits upnp-mappings</a> <i>number</i>
Tree	<a href="#">upnp-mappings</a>
Description	This command specifies the maximum number of Universal Plug and Play (UPnP) mappings per member.
Range	1 to 524288
Default	524288
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## watermarks

Synopsis	Enable the <b>watermarks</b> context
Context	<b>configure isa nat-group</b> <i>number</i> <a href="#">session-limits watermarks</a>
Tree	<a href="#">watermarks</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## high *number*

Synopsis	Session limit high watermark for each MDA in the group
Context	<b>configure isa nat-group</b> <i>number</i> <a href="#">session-limits watermarks high</a> <i>number</i>
Tree	<a href="#">high</a>
Range	0 to 100
Units	percent
Notes	This element is mandatory.
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **low** *number*

Synopsis Session limit low watermark for each MDA in the group

Context **configure** [isa nat-group](#) *number* [session-limits](#) [watermarks](#) **low** *number*

Tree [low](#)

Range 0 to 100

Units percent

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **tunnel-group** [*id*] *number*

Synopsis Enter the **tunnel-group** list instance

Context **configure** [isa tunnel-group](#) *number*

Tree [tunnel-group](#)

Description Commands in this context create or edit a tunnel group. A tunnel group is a set of one or more MS-ISAs that support the origination and termination of IPsec and IP/GRE tunnels. On a VSR, the **isa-scale-mode** command must be specified, which defines the maximum number of tunnels on each ISA.

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### [*id*] *number*

Synopsis Tunnel group ID

Context **configure** [isa tunnel-group](#) *number*

Tree [tunnel-group](#)

Range 1 to 64

Notes This element is part of a list key.

Introduced 16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state** *keyword*

Synopsis	Administrative state of the ISA tunnel group
Context	<b>configure isa tunnel-group number admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**backup** *string*

Synopsis	IPsec module configured in the slot to the IPsec group
Context	<b>configure isa tunnel-group number backup string</b>
Tree	<a href="#">backup</a>
Notes	The following elements are part of a choice: <b>multi-active</b> or ( <b>backup</b> and <b>primary</b> ).
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure isa tunnel-group number description string</b>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**ipsec-responder-only** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Act as an IKE responder except upon MC-IPsec switchover
Context	<b>configure isa tunnel-group number ipsec-responder-only boolean</b>
Tree	<a href="#">ipsec-responder-only</a>

Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **isa-scale-mode** *keyword*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Tunnel limit on each ISA for the tunnel group
Context	<b>configure</b> <a href="#">isa</a> <a href="#">tunnel-group</a> <i>number</i> <a href="#">isa-scale-mode</a> <i>keyword</i>
Tree	<a href="#">isa-scale-mode</a>
Options	tunnel-limit-2k, tunnel-limit-32k, tunnel-limit-64k, tunnel-limit-8, tunnel-limit-32
Notes	This element is mandatory.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **multi-active**

Synopsis	Enable the <b>multi-active</b> context
Context	<b>configure</b> <a href="#">isa</a> <a href="#">tunnel-group</a> <i>number</i> <a href="#">multi-active</a>
Tree	<a href="#">multi-active</a>
Notes	The following elements are part of a choice: <b>multi-active</b> or ( <b>backup</b> and <b>primary</b> ).
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **active-isa-number** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Number of active MS-ISAs in the tunnel group
Context	<b>configure</b> <a href="#">isa</a> <a href="#">tunnel-group</a> <i>number</i> <a href="#">multi-active</a> <a href="#">active-isa-number</a> <i>number</i>
Tree	<a href="#">active-isa-number</a>

Range	1 to 16
Default	1
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **esa** [[esa-id](#)] *reference* [vm](#) *reference*

Synopsis	Add a list entry for <b>esa</b>
Context	<b>configure</b> <a href="#">isa</a> <a href="#">tunnel-group</a> <i>number</i> <a href="#">multi-active</a> <a href="#">esa</a> <i>reference</i> <a href="#">vm</a> <i>reference</i>
Tree	<a href="#">esa</a>
Notes	The following elements are part of a choice: <b>esa</b> , <b>isa</b> , or <b>member-pool</b> .
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **[esa-id]** *reference*

Synopsis	ESA ID
Context	<b>configure</b> <a href="#">isa</a> <a href="#">tunnel-group</a> <i>number</i> <a href="#">multi-active</a> <a href="#">esa</a> <i>reference</i> <a href="#">vm</a> <i>reference</i>
Tree	<a href="#">esa</a>
Reference	<b>configure</b> <a href="#">esa</a> <i>number</i>
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **vm** *reference*

Synopsis	ESM-VM ID
Context	<b>configure</b> <a href="#">isa</a> <a href="#">tunnel-group</a> <i>number</i> <a href="#">multi-active</a> <a href="#">esa</a> <i>reference</i> <a href="#">vm</a> <i>reference</i>
Tree	<a href="#">esa</a>
Reference	<b>configure</b> <a href="#">esa</a> <i>number</i> <a href="#">vm</a> <i>number</i>
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

**isa** [*isa-id*] *string*

Synopsis	Add a list entry for <b>isa</b>
Context	<b>configure isa tunnel-group</b> <i>number</i> <b>multi-active isa</b> <i>string</i>
Tree	<a href="#">isa</a>
Notes	The following elements are part of a choice: <b>esa</b> , <b>isa</b> , or <b>member-pool</b> .
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[isa-id]** *string*

Synopsis	ISA ID associated with the tunnel member pool
Context	<b>configure isa tunnel-group</b> <i>number</i> <b>multi-active isa</b> <i>string</i>
Tree	<a href="#">isa</a>
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**member-pool** *reference*

Synopsis	Tunnel-member pool name
Context	<b>configure isa tunnel-group</b> <i>number</i> <b>multi-active member-pool</b> <i>reference</i>
Tree	<a href="#">member-pool</a>
Reference	<b>configure isa tunnel-member-pool</b> <i>string</i>
Notes	The following elements are part of a choice: <b>esa</b> , <b>isa</b> , or <b>member-pool</b> .
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**primary** *string*

Synopsis	Primary ISA IPsec module assigned for the tunnel group
Context	<b>configure isa tunnel-group</b> <i>number</i> <b>primary</b> <i>string</i>
Tree	<a href="#">primary</a>
Notes	The following elements are part of a choice: <b>multi-active</b> or ( <b>backup</b> and <b>primary</b> ).
Introduced	16.0.R4

Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## reassemble

Synopsis Enter the **reassemble** context  
Context **configure isa tunnel-group number reassemble**  
Tree [reassemble](#)  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## max-wait-time *number*

Synopsis Maximum time to receive fragments for packet reassembly  
Context **configure isa tunnel-group number reassemble max-wait-time number**  
Tree [max-wait-time](#)  
Range 1 to 5000  
Units milliseconds  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## stats-collection

Synopsis Enter the **stats-collection** context  
Context **configure isa tunnel-group number stats-collection**  
Tree [stats-collection](#)  
Description Commands in this context configure the ISA statistics collection.  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## isa-dp-cpu-usage *boolean*

Synopsis Collect statistics used to derive ISA DP CPU usage  
Context **configure isa tunnel-group number stats-collection isa-dp-cpu-usage boolean**  
Tree [isa-dp-cpu-usage](#)  
Description When configured to **true**, this command collects statistics used to derive ISA CPU DP usage and impacts the ISA performance.

	When configured to <b>false</b> , statistics are not collected.
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **strict-esp-sequence-number-ordering** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable strict ESP sequence number ordering
Context	<b>configure</b> <i>isa tunnel-group number</i> <b>strict-esp-sequence-number-ordering</b> <i>boolean</i>
Tree	<a href="#">strict-esp-sequence-number-ordering</a>
Description	When configured to <b>true</b> , the router enables strict ESP sequence number ordering. When ESP sequence number ordering is enabled, the outbound ESP sequence number of a CHILD_SA must be in the same order as when clear packets are received by the same CHILD_SA.
Default	false
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **tunnel-member-pool** [[name](#)] *string*

Synopsis	Enter the <b>tunnel-member-pool</b> list instance
Context	<b>configure</b> <i>isa tunnel-member-pool</i> <i>string</i>
Tree	<a href="#">tunnel-member-pool</a>
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

#### **[name]** *string*

Synopsis	ISA tunnel-member pool name
Context	<b>configure</b> <i>isa tunnel-member-pool</i> <i>string</i>
Tree	<a href="#">tunnel-member-pool</a>
String Length	1 to 32

Notes	This element is part of a list key.
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">isa</a> <a href="#">tunnel-member-pool</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **esa** [[esa-id](#)] *reference* [vm](#) *reference*

Synopsis	Add a list entry for <b>esa</b>
Context	<b>configure</b> <a href="#">isa</a> <a href="#">tunnel-member-pool</a> <i>string</i> <a href="#">esa</a> <i>reference</i> <a href="#">vm</a> <i>reference</i>
Tree	<a href="#">esa</a>
Description	Commands in this context add specified ESA-VMs to the pool.
Max. Instances	16
Notes	The following elements are part of a choice: <b>esa</b> or <b>isa</b> .
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

### **[esa-id]** *reference*

Synopsis	ESA ID
Context	<b>configure</b> <a href="#">isa</a> <a href="#">tunnel-member-pool</a> <i>string</i> <a href="#">esa</a> <i>reference</i> <a href="#">vm</a> <i>reference</i>
Tree	<a href="#">esa</a>
Reference	<b>configure</b> <a href="#">esa</a> <i>number</i>
Notes	This element is part of a list key.
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

**vm reference**

Synopsis	ESM-VM ID
Context	<b>configure isa tunnel-member-pool</b> <i>string</i> <b>esa reference vm reference</b>
Tree	<b>esa</b>
Reference	<b>configure esa number vm number</b>
Notes	This element is part of a list key.
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s

**high-availability keyword**

Synopsis	High availability scale mode
Context	<b>configure isa tunnel-member-pool</b> <i>string</i> <b>high-availability keyword</b>
Tree	<b>high-availability</b>
Description	This command configures the high availability (HA) mode for a pool. The specified scale mode is the maximum number of all tunnel groups associated with the pool.
Options	none, tunnel-limit-system, tunnel-limit-32k, tunnel-limit-64k, tunnel-limit-128k, tunnel-limit-256k
Default	none
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**isa [isa-id] string**

Synopsis	Add a list entry for <b>isa</b>
Context	<b>configure isa tunnel-member-pool</b> <i>string</i> <b>isa string</b>
Tree	<b>isa</b>
Max. Instances	16
Notes	The following elements are part of a choice: <b>esa</b> or <b>isa</b> .
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[isa-id]** *string*

Synopsis	ISA ID associated with the tunnel member pool
Context	<b>configure isa tunnel-member-pool</b> <i>string isa string</i>
Tree	<a href="#">isa</a>
Notes	This element is part of a list key.
Introduced	22.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**video-group** [[video-group-id](#)] *number*

Synopsis	Enter the <b>video-group</b> list instance
Context	<b>configure isa video-group</b> <i>number</i>
Tree	<a href="#">video-group</a>
Max. Instances	4
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**[video-group-id]** *number*

Synopsis	Video group identifier
Context	<b>configure isa video-group</b> <i>number</i>
Tree	<a href="#">video-group</a>
Range	1 to 4
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**admin-state** *keyword*

Synopsis	Administrative state of the video group
Context	<b>configure isa video-group</b> <i>number admin-state keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**analyzer** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Enable the analyzer for all streams on the video group
Context	<b>configure</b> <i>isa video-group number analyzer boolean</i>
Tree	<i>analyzer</i>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <i>isa video-group number description string</i>
Tree	<i>description</i>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**fcc-server** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Allow FCC server capability for the group
Context	<b>configure</b> isa video-group number fcc-server boolean
Tree	fcc-server
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**local-rt-server** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Enable the local RET server for the group
Context	<b>configure</b> isa video-group number local-rt-server boolean
Tree	local-rt-server
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**mda** [*mda-id*] *string*

Synopsis	Add a list entry for <b>mda</b>
Context	<b>configure</b> isa video-group number mda string
Tree	mda
Max. Instances	6
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**[mda-id]** *string*

Synopsis	MDA identifier
Context	<b>configure</b> <i>isa video-group number mda string</i>
Tree	<i>mda</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**resv-ret** *number*

Synopsis	Egress bandwidth reserved for retransmission
Context	<b>configure</b> <i>isa video-group number resv-ret number</i>
Tree	<i>resv-ret</i>
Range	0 to 10500
Units	megabps
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**stream-selection** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Allow stream selection for the group
Context	<b>configure</b> <i>isa video-group number stream-selection boolean</i>
Tree	<i>stream-selection</i>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**vapp [esa-id] reference vapp-id reference**

Synopsis	Add a list entry for <b>vapp</b>
Context	<b>configure isa video-group number vapp reference vapp-id reference</b>
Tree	<b>vapp</b>
Description	This command adds a list entry for the ESA and VM ID to the list of video group member ESA virtual applications.
Max. Instances	6
Introduced	21.5.R1
Platforms	7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**[esa-id] reference**

Synopsis	ESA ID
Context	<b>configure isa video-group number vapp reference vapp-id reference</b>
Tree	<b>vapp</b>
Reference	<b>configure esa number</b>
Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**vapp-id reference**

Synopsis	Virtual application ID
Context	<b>configure isa video-group number vapp reference vapp-id reference</b>
Tree	<b>vapp</b>
Reference	<b>configure esa number vm number</b>
Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**watermark**

Synopsis	Enter the <b>watermark</b> context
Context	<b>configure isa video-group number watermark</b>

---

Tree	<a href="#">watermark</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## **bandwidth**

Synopsis	Enter the <b>bandwidth</b> context
Context	<b>configure</b> <a href="#">isa video-group</a> <i>number</i> <a href="#">watermark</a> <a href="#">bandwidth</a>
Tree	<a href="#">bandwidth</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## **fcc number**

Synopsis	FCC watermark parameters based on the bandwidth
Context	<b>configure</b> <a href="#">isa video-group</a> <i>number</i> <a href="#">watermark</a> <a href="#">bandwidth</a> <a href="#">fcc</a> <i>number</i>
Tree	<a href="#">fcc</a>
Range	1 to 99
Units	percent
Default	90
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## **ret number**

Synopsis	RET watermark parameters based on the bandwidth
Context	<b>configure</b> <a href="#">isa video-group</a> <i>number</i> <a href="#">watermark</a> <a href="#">bandwidth</a> <a href="#">ret</a> <i>number</i>
Tree	<a href="#">ret</a>
Range	1 to 99
Units	percent
Default	90
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**total number**

Synopsis	Total watermark parameters based on the bandwidth
Context	<b>configure</b> <a href="#">isa video-group</a> <i>number</i> <a href="#">watermark bandwidth total</a> <i>number</i>
Tree	<a href="#">total</a>
Range	1 to 99
Units	percent
Default	90
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**session**

Synopsis	Enter the <b>session</b> context
Context	<b>configure</b> <a href="#">isa video-group</a> <i>number</i> <a href="#">watermark session</a>
Tree	<a href="#">session</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**fcc number**

Synopsis	FCC watermark parameters based on the session
Context	<b>configure</b> <a href="#">isa video-group</a> <i>number</i> <a href="#">watermark session fcc</a> <i>number</i>
Tree	<a href="#">fcc</a>
Range	1 to 99
Units	percent
Default	90
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**ret number**

Synopsis	RET watermark parameters based on the session
Context	<b>configure</b> <a href="#">isa video-group</a> <i>number</i> <a href="#">watermark session ret</a> <i>number</i>
Tree	<a href="#">ret</a>
Range	1 to 99

Units	percent
Default	90
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**total number**

Synopsis	Total watermark parameters based on the session
Context	<b>configure</b> <a href="#">isa</a> <a href="#">video-group</a> <a href="#">number</a> <a href="#">watermark</a> <a href="#">session</a> <a href="#">total</a> <a href="#">number</a>
Tree	<a href="#">total</a>
Range	1 to 99
Units	percent
Default	90
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**wlan-gw-group [id] number**

Synopsis	Enter the <b>wlan-gw-group</b> list instance
Context	<b>configure</b> <a href="#">isa</a> <a href="#">wlan-gw-group</a> <a href="#">number</a>
Tree	<a href="#">wlan-gw-group</a>
Description	Commands in this context configure a WLAN-gateway group that contains a set of ISAs used in WLAN-gateway functionality. A WLAN-gateway group can also be used where a NAT group is expected. The WLAN-gateway group ID shares the same number space with the NAT group.
Max. Instances	1
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[id] number**

Synopsis	WLAN-GW ISA group ID
Context	<b>configure</b> <a href="#">isa</a> <a href="#">wlan-gw-group</a> <a href="#">number</a>
Tree	<a href="#">wlan-gw-group</a>
Range	1 to 4

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **active-iom-limit** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	Number of WLAN-GW IOMs used as active IOMs
Context	<b>configure</b> <i>isa wlan-gw-group number active-iom-limit number</i>
Tree	<a href="#">active-iom-limit</a>
Range	1 to 7
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **active-mda-limit** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	Maximum number of ISA MDAs in active use by the group
Context	<b>configure</b> <i>isa wlan-gw-group number active-mda-limit number</i>
Tree	<a href="#">active-mda-limit</a>
Range	1 to 14
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s

**admin-state** *keyword*

Synopsis	Administrative state of the WLAN Gateway group
Context	<b>configure</b> <i>isa wlan-gw-group number admin-state keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <i>isa wlan-gw-group number description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**distributed-sub-mgmt**

Synopsis	Enter the <b>distributed-sub-mgmt</b> context
Context	<b>configure</b> <i>isa wlan-gw-group number distributed-sub-mgmt</i>
Tree	<a href="#">distributed-sub-mgmt</a>
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**isa-aa-group** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	ISA AA group for WLAN-GW DSM subscribers
Context	<b>configure</b> <i>isa wlan-gw-group number distributed-sub-mgmt isa-aa-group reference</i>
Tree	<a href="#">isa-aa-group</a>
Reference	<b>configure</b> <i>isa application-assurance-group number</i>

Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **isa-aa-oversubscription-factor** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Number of WLAN GW ISAs that a single ISA can serve
Context	<b>configure</b> <i>isa wlan-gw-group number distributed-sub-mgmt isa-aa-oversubscription-factor number</i>
Tree	<a href="#">isa-aa-oversubscription-factor</a>
Range	1 to 10
Default	1
Introduced	21.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s

### **esa** [[esa-id](#)] *reference vm reference*

Synopsis	Add a list entry for <b>esa</b>
Context	<b>configure</b> <i>isa wlan-gw-group number esa reference vm reference</i>
Tree	<a href="#">esa</a>
Introduced	20.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s

### **[esa-id]** *reference*

Synopsis	ESA ID
Context	<b>configure</b> <i>isa wlan-gw-group number esa reference vm reference</i>
Tree	<a href="#">esa</a>
Reference	<b>configure</b> <i>esa number</i>
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s

### **vm** *reference*

Synopsis	VM ID
Context	<b>configure</b> <i>isa wlan-gw-group number esa reference vm reference</i>
Tree	<a href="#">esa</a>
Reference	<b>configure</b> <a href="#">esa</a> <i>number vm number</i>
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s

### **iom** [[slot-number](#)] *reference*

Synopsis	Add a list entry for <b>iom</b>
Context	<b>configure</b> <i>isa wlan-gw-group number iom reference</i>
Tree	<a href="#">iom</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **[slot-number]** *reference*

Synopsis	IOM slot to use in the WLAN-GW group
Context	<b>configure</b> <i>isa wlan-gw-group number iom reference</i>
Tree	<a href="#">iom</a>
Reference	<b>configure</b> <a href="#">card</a> <i>number</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mda** [[mda-id](#)] *string*

Synopsis	Add a list entry for <b>mda</b>
Context	<b>configure</b> <i>isa wlan-gw-group number mda string</i>
Tree	<a href="#">mda</a>
Introduced	16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s

### **[mda-id]** *string*

Synopsis MDA slot value  
 Context **configure** *isa wlan-gw-group number mda string*  
 Tree [mda](#)  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s

### **nat**

Synopsis Enter the **nat** context  
 Context **configure** *isa wlan-gw-group number nat*  
 Tree [nat](#)  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **log**

Synopsis Enter the **log** context  
 Context **configure** *isa wlan-gw-group number nat log*  
 Tree [log](#)  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **suppress-lsn-events** *boolean*

Synopsis Suppress LSN events when RADIUS accounting is enabled  
 Context **configure** *isa wlan-gw-group number nat log suppress-lsn-events boolean*  
 Tree [suppress-lsn-events](#)  
 Default true  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**suppress-lsn-sub-blocks-free** *boolean*

Synopsis	Suppress LSN Free block and NAT pool block notification
Context	<b>configure</b> <i>isa wlan-gw-group number nat log suppress-lsn-sub-blocks-free boolean</i>
Tree	<a href="#">suppress-lsn-sub-blocks-free</a>
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**lsn** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Use Large Scale NAT
Context	<b>configure</b> <i>isa wlan-gw-group number nat lsn boolean</i>
Tree	<a href="#">lsn</a>
Default	true
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**radius-accounting-policy** *reference*

Synopsis	RADIUS accounting policy for ISA group
Context	<b>configure</b> <i>isa wlan-gw-group number nat radius-accounting-policy reference</i>
Tree	<a href="#">radius-accounting-policy</a>
Reference	<b>configure</b> <i>aaa radius isa-policy string</i>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

**session-limits**

Synopsis	Enter the <b>session-limits</b> context
Context	<b>configure</b> <i>isa wlan-gw-group number nat session-limits</i>
Tree	<a href="#">session-limits</a>

Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **reserved** *number*

Synopsis	Number of sessions reserved for prioritized sessions
Context	<b>configure isa wlan-gw-group</b> <i>number nat session-limits reserved number</i>
Tree	<a href="#">reserved</a>
Range	1 to 6291456
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **upnp-mappings** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis	Maximum number of UPnP mappings per member
Context	<b>configure isa wlan-gw-group</b> <i>number nat session-limits upnp-mappings number</i>
Tree	<a href="#">upnp-mappings</a>
Description	This command specifies the maximum number of Universal Plug and Play (UPnP) mappings per member.
Range	1 to 524288
Default	524288
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **watermarks**

Synopsis	Enable the <b>watermarks</b> context
Context	<b>configure isa wlan-gw-group</b> <i>number nat session-limits watermarks</i>
Tree	<a href="#">watermarks</a>
Introduced	16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **high** *number*

Synopsis Session limit high watermark for each MDA in the group

Context **configure** *isa wlan-gw-group number nat session-limits watermarks high number*

Tree [high](#)

Range 0 to 100

Units percent

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **low** *number*

Synopsis Session limit low watermark for each MDA in the group

Context **configure** *isa wlan-gw-group number nat session-limits watermarks low number*

Tree [low](#)

Range 0 to 100

Units percent

Notes This element is mandatory.

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **port-policy** *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Port policy used to configure ports for the ISA group

Context **configure** *isa wlan-gw-group number port-policy reference*

Tree [port-policy](#)

Reference **configure** *port-policy string*

Introduced 16.0.R1

Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### redundancy *keyword*

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Hardware unit subject to redundancy  
 Context **configure** isa wlan-gw-group number redundancy keyword  
 Tree redundancy  
 Options iom, mda  
 Default iom  
 Introduced 16.0.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### scaling-profile *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element clears ISA state, such as flow state, for the new value to take effect.

Synopsis ISA scaling profile identifier  
 Context **configure** isa wlan-gw-group number scaling-profile keyword  
 Tree scaling-profile  
 Options profile1, profile2, profile3  
 Default profile1  
 Introduced 20.5.R1  
 Platforms 7750 SR, 7750 SR-e, 7750 SR-s

## tunnel-port-policy *reference*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Tunnel port policy for per-tunnel QoS processing
Context	<b>configure</b> <a href="#">isa wlan-gw-group</a> <i>number</i> <a href="#">tunnel-port-policy</a> <i>reference</i>
Tree	<a href="#">tunnel-port-policy</a>
Reference	<b>configure</b> <a href="#">port-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## watermarks

Synopsis	Enter the <b>watermarks</b> context
Context	<b>configure</b> <a href="#">isa wlan-gw-group</a> <i>number</i> <a href="#">watermarks</a>
Tree	<a href="#">watermarks</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## mark [[entity](#)] *keyword*

Synopsis	Enter the <b>mark</b> list instance
Context	<b>configure</b> <a href="#">isa wlan-gw-group</a> <i>number</i> <a href="#">watermarks</a> <a href="#">mark</a> <i>keyword</i>
Tree	<a href="#">mark</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

## [[entity](#)] *keyword*

Synopsis	Entity to be monitored
Context	<b>configure</b> <a href="#">isa wlan-gw-group</a> <i>number</i> <a href="#">watermarks</a> <a href="#">mark</a> <i>keyword</i>
Tree	<a href="#">mark</a>
Options	user-equipment, bridge-domain, radius-proxy-client
Notes	This element is part of a list key.

---

Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **high** *number*

Synopsis	High watermark for the WLAN-GW group
Context	<b>configure</b> <a href="#">isa wlan-gw-group</a> <i>number</i> <a href="#">watermarks mark</a> <i>keyword</i> <b>high</b> <i>number</i>
Tree	<a href="#">high</a>
Range	1 to 100
Units	percent
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **low** *number*

Synopsis	Low watermark for the WLAN-GW group
Context	<b>configure</b> <a href="#">isa wlan-gw-group</a> <i>number</i> <a href="#">watermarks mark</a> <i>keyword</i> <b>low</b> <i>number</i>
Tree	<a href="#">low</a>
Range	0 to 99
Units	percent
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-e, 7750 SR-s, VSR

### 3.22.1 lag command descriptions

#### **lag** [**lag-name**] *string*

Synopsis	Enter the <b>lag</b> list instance
Context	<b>configure lag</b> <i>string</i>
Tree	<a href="#">lag</a>
Introduced	16.0.R1
Platforms	All

#### **[lag-name]** *string*

Synopsis	LAG name
Context	<b>configure lag</b> <i>string</i>
Tree	<a href="#">lag</a>
String Length	1 to 27
Notes	This element is part of a list key.
Introduced	21.2.R1
Platforms	All

#### **access**

Synopsis	Enter the <b>access</b> context
Context	<b>configure lag</b> <i>string</i> <b>access</b>
Tree	<a href="#">access</a>
Introduced	16.0.R1
Platforms	All

#### **adapt-qos**

Synopsis	Enter the <b>adapt-qos</b> context
Context	<b>configure lag</b> <i>string</i> <b>access</b> <b>adapt-qos</b>
Tree	<a href="#">adapt-qos</a>
Introduced	16.0.R1

Platforms All

### **include-egr-hash-cfg** *boolean*

Synopsis Factor egress hashing into buffer and rate distribution  
 Context **configure lag** *string* **access adapt-qos include-egr-hash-cfg** *boolean*  
 Tree [include-egr-hash-cfg](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

### **mode** *keyword*

Synopsis QoS adaptation mode  
 Context **configure lag** *string* **access adapt-qos mode** *keyword*  
 Tree [mode](#)  
 Options link, distribute, port-fair  
 Introduced 16.0.R1  
 Platforms All

### **bandwidth** *number*

Synopsis Administrative bandwidth applied to this LAG  
 Context **configure lag** *string* **access bandwidth** *number*  
 Tree [bandwidth](#)  
 Range 1 to 6400000000  
 Units bps  
 Introduced 16.0.R1  
 Platforms All

### **booking-factor** *number*

Synopsis Booking factor against the administrative bandwidth  
 Context **configure lag** *string* **access booking-factor** *number*  
 Tree [booking-factor](#)

---

Range	1 to 1000
Default	100
Introduced	16.0.R1
Platforms	All

### **per-fp-egr-queuing** *boolean*

Synopsis	Per FP egress queuing
Context	<b>configure lag</b> <i>string</i> <a href="#">access per-fp-egr-queuing</a> <i>boolean</i>
Tree	<a href="#">per-fp-egr-queuing</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **per-fp-ing-queuing** *boolean*

Synopsis	Enable ingress queuing per forwarding port
Context	<b>configure lag</b> <i>string</i> <a href="#">access per-fp-ing-queuing</a> <i>boolean</i>
Tree	<a href="#">per-fp-ing-queuing</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **per-fp-sap-instance** *boolean*

Synopsis	SAP instance allocation on a LAG
Context	<b>configure lag</b> <i>string</i> <a href="#">access per-fp-sap-instance</a> <i>boolean</i>
Tree	<a href="#">per-fp-sap-instance</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **adaptive-load-balancing**

Synopsis	Enable the <b>adaptive-load-balancing</b> context
----------	---

Context	<b>configure lag string adaptive-load-balancing</b>
Tree	<a href="#">adaptive-load-balancing</a>
Description	Commands in this context configure adaptive load balancing between LAG links.
Introduced	20.10.R1
Platforms	All

### **bandwidth-threshold *number***

Synopsis	Minimum bandwidth for adaptive load balancing
Context	<b>configure lag string adaptive-load-balancing bandwidth-threshold <i>number</i></b>
Tree	<a href="#">bandwidth-threshold</a>
Range	0 to 100
Units	percent
Introduced	22.10.R1
Platforms	All

### **interval *number***

Synopsis	The statistics pooling interval for the LAG ports
Context	<b>configure lag string adaptive-load-balancing interval <i>number</i></b>
Tree	<a href="#">interval</a>
Range	15   30   60   120
Units	seconds
Default	30
Introduced	21.5.R1
Platforms	All

### **tolerance *number***

Synopsis	Threshold that triggers link utilization optimization
Context	<b>configure lag string adaptive-load-balancing tolerance <i>number</i></b>
Tree	<a href="#">tolerance</a>
Description	This command configures the threshold value that is based on the difference between the most-loaded and least-loaded links in a LAG. When the threshold value is exceeded, the adaptive load balancing operation attempts to optimize traffic distribution between LAG links.

Range	1 to 100
Units	percent
Default	20
Introduced	20.10.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the LAG
Context	<b>configure lag</b> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **bfd-liveness**

Synopsis	Enter the <b>bfd-liveness</b> context
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness</b>
Tree	<a href="#">bfd-liveness</a>
Introduced	16.0.R1
Platforms	All

### **ipv4**

Synopsis	Enter the <b>ipv4</b> context
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness</b> <b>ipv4</b>
Tree	<a href="#">ipv4</a>
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of micro-BFD session for IP family
----------	---

Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv4 admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **bfd-on-distributing-only** *boolean*

Synopsis	Restrict micro-BFD sessions to LACP state distributing
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv4 bfd-on-distributing-only</b> <i>boolean</i>
Tree	<b>bfd-on-distributing-only</b>
Default	false
Introduced	16.0.R1
Platforms	All

### **local-ip-address** *string*

Synopsis	BFD source address
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv4 local-ip-address</b> <i>string</i>
Tree	<b>local-ip-address</b>
Introduced	16.0.R1
Platforms	All

### **max-admin-down-time** (*number* | *keyword*)

Synopsis	Maximum time to forward traffic after micro-BFD is down
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv4 max-admin-down-time</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>max-admin-down-time</b>
Range	0 to 3600
Units	seconds
Options	infinite
Default	0
Introduced	16.0.R1
Platforms	All

**max-setup-time** (*number* | *keyword*)

Synopsis	Maximum time to forward traffic during micro-BFD setup
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv4</b> <b>max-setup-time</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>max-setup-time</b>
Range	0 to 60000
Units	milliseconds
Options	infinite
Default	infinite
Introduced	16.0.R1
Platforms	All

**multiplier** *number*

Synopsis	Interval multiplier to detect BFD packets not received
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv4</b> <b>multiplier</b> <i>number</i>
Tree	<b>multiplier</b>
Range	3 to 20
Default	3
Introduced	16.0.R1
Platforms	All

**receive-interval** *number*

Synopsis	Receive timer for micro-BFD session over the LAG links
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv4</b> <b>receive-interval</b> <i>number</i>
Tree	<b>receive-interval</b>
Range	10 to 100000
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	All

**remote-ip-address** *string*

Synopsis	BFD destination address
Context	<b>configure lag</b> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv4</a> <a href="#">remote-ip-address</a> <i>string</i>
Tree	<a href="#">remote-ip-address</a>
Introduced	16.0.R1
Platforms	All

**transmit-interval** *number*

Synopsis	Transmit timer for micro-BFD session over the LAG links
Context	<b>configure lag</b> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv4</a> <a href="#">transmit-interval</a> <i>number</i>
Tree	<a href="#">transmit-interval</a>
Range	10 to 100000
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	All

**ipv6**

Synopsis	Enter the <b>ipv6</b> context
Context	<b>configure lag</b> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv6</a>
Tree	<a href="#">ipv6</a>
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of micro-BFD session for IP family
Context	<b>configure lag</b> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv6</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**bfd-on-distributing-only** *boolean*

Synopsis	Restrict micro-BFD sessions to LACP state distributing
Context	<b>configure lag</b> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv6</a> <a href="#">bfd-on-distributing-only</a> <i>boolean</i>
Tree	<a href="#">bfd-on-distributing-only</a>
Default	false
Introduced	16.0.R1
Platforms	All

**local-ip-address** *string*

Synopsis	BFD source address
Context	<b>configure lag</b> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv6</a> <a href="#">local-ip-address</a> <i>string</i>
Tree	<a href="#">local-ip-address</a>
Introduced	16.0.R1
Platforms	All

**max-admin-down-time** (*number* | *keyword*)

Synopsis	Maximum time to forward traffic after micro-BFD is down
Context	<b>configure lag</b> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv6</a> <a href="#">max-admin-down-time</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">max-admin-down-time</a>
Range	0 to 3600
Units	seconds
Options	infinite
Default	0
Introduced	16.0.R1
Platforms	All

**max-setup-time** (*number* | *keyword*)

Synopsis	Maximum time to forward traffic during micro-BFD setup
Context	<b>configure lag</b> <i>string</i> <a href="#">bfd-liveness</a> <a href="#">ipv6</a> <a href="#">max-setup-time</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">max-setup-time</a>
Range	0 to 60000

Units	milliseconds
Options	infinite
Default	infinite
Introduced	16.0.R1
Platforms	All

### **multiplier** *number*

Synopsis	Interval multiplier to detect BFD packets not received
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv6 multiplier</b> <i>number</i>
Tree	<a href="#">multiplier</a>
Range	3 to 20
Default	3
Introduced	16.0.R1
Platforms	All

### **receive-interval** *number*

Synopsis	Receive timer for micro-BFD session over the LAG links
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv6 receive-interval</b> <i>number</i>
Tree	<a href="#">receive-interval</a>
Range	10 to 100000
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	All

### **remote-ip-address** *string*

Synopsis	BFD destination address
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv6 remote-ip-address</b> <i>string</i>
Tree	<a href="#">remote-ip-address</a>
Introduced	16.0.R1
Platforms	All

**transmit-interval** *number*

Synopsis	Transmit timer for micro-BFD session over the LAG links
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness ipv6</b> <b>transmit-interval</b> <i>number</i>
Tree	<b>transmit-interval</b>
Range	10 to 100000
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	All

**soft-reset-extension** *boolean*

Synopsis	Extend BFD timers during soft reset
Context	<b>configure lag</b> <i>string</i> <b>bfd-liveness</b> <b>soft-reset-extension</b> <i>boolean</i>
Tree	<b>soft-reset-extension</b>
Default	true
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure lag</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 255
Introduced	16.0.R1
Platforms	All

**dynamic-cost** *boolean*

Synopsis	Allow LAG costing using operational aggregate bandwidth
Context	<b>configure lag</b> <i>string</i> <b>dynamic-cost</b> <i>boolean</i>
Tree	<b>dynamic-cost</b>
Default	false

Introduced 16.0.R1  
 Platforms All

### **encap-type** *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Encapsulation type  
 Context **configure lag** *string* **encap-type** *keyword*  
 Tree [encap-type](#)  
 Options null, dot1q, qinq  
 Introduced 16.0.R1  
 Platforms All

### **eth-cfm**

Synopsis Enter the **eth-cfm** context  
 Context **configure lag** *string* **eth-cfm**  
 Tree [eth-cfm](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mep** *md-admin-name* *reference* *ma-admin-name* *reference* **mep-id** *number*

Synopsis Enter the **mep** list instance  
 Context **configure lag** *string* **eth-cfm mep** *md-admin-name* *reference* *ma-admin-name* *reference* **mep-id** *number*  
 Tree [mep](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **md-admin-name** *reference*

Synopsis	Maintenance Domain (MD) name
Context	<b>configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number</b>
Tree	<b>mep</b>
Reference	<b>configure eth-cfm domain string</b>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ma-admin-name** *reference*

Synopsis	Maintenance Association (MA) name
Context	<b>configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number</b>
Tree	<b>mep</b>
Reference	<b>configure eth-cfm domain string association string</b>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mep-id number**

Synopsis	Maintenance Endpoint (MEP) ID
Context	<b>configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number</b>
Tree	<b>mep</b>
Range	1 to 8191
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**admin-state** *keyword*

Synopsis	Administrative state of the MEP
Context	<b>configure lag</b> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ais**

Synopsis	Enable the <b>ais</b> context
Context	<b>configure lag</b> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>ais</b>
Tree	<a href="#">ais</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**client-meg-level** *number*

Synopsis	Client MEG level for AIS message generation
Context	<b>configure lag</b> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>ais</b> <b>client-meg-level</b> <i>number</i>
Tree	<a href="#">client-meg-level</a>
Range	1 to 7
Max.	7
Instances	
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**interface-support** *boolean*

Synopsis	Enable generation of AIS PDUs based on endpoint state
Context	<b>configure lag</b> <i>string</i> <a href="#">eth-cfm mep md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <b>ais</b> <b>interface-support</b> <i>boolean</i>

Tree	<a href="#">interface-support</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **interval** *number*

Synopsis	Transmission interval for AIS messages
Context	<b>configure lag</b> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ais interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1   60
Units	seconds
Default	1
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **low-priority-defect** *keyword*

Synopsis	Lowest priority defect allowed to generate fault alarm
Context	<b>configure lag</b> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ais low-priority-defect</a> <i>keyword</i>
Tree	<a href="#">low-priority-defect</a>
Options	all-def, mac-rem-err-xcon
Default	all-def
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **priority** *number*

Synopsis	Priority of the AIS messages generated by the node
Context	<b>configure lag</b> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">ais priority</a> <i>number</i>
Tree	<a href="#">priority</a>
Range	0 to 7
Default	7

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## alarm-notification

Synopsis	Enter the <b>alarm-notification</b> context
Context	<b>configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number alarm-notification</b>
Tree	<a href="#">alarm-notification</a>
Description	<p>Commands in this context configure the Fault Notification Generator (FNG) time values to raise an alarm or reset the CCM defect alarm.</p> <p>Use these timers for network management processes. The timers are not tied into delaying the notification to the fault management system on the network element and do not affect fault propagation mechanisms.</p>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## fng-alarm-time *number*

Synopsis	Time that must expire before an FNG alarm is raised
Context	<b>configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number alarm-notification fng-alarm-time number</b>
Tree	<a href="#">fng-alarm-time</a>
Range	250   500   1000
Units	centiseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## fng-reset-time *number*

Synopsis	Time that must expire before an FNG alarm is reset
Context	<b>configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number alarm-notification fng-reset-time number</b>
Tree	<a href="#">fng-reset-time</a>
Range	250   500   1000
Units	centiseconds
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm boolean**

Synopsis Generate CCM messages

Context **configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm boolean**

Tree **ccm**

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm-ltm-priority number**

Synopsis Priority of CCM and LTM messages transmitted by the MEP

Context **configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm-ltm-priority number**

Tree **ccm-ltm-priority**

Range 0 to 7

Default 7

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm-padding-size number**

Synopsis Number of octets of padding to insert in CCM packets

Context **configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm-padding-size number**

Tree **ccm-padding-size**

Description This command sets the byte size of the optional Data TLV to be included in the ETH-CC PDU.

This command increases the size of the ETH-CC PDU by the configured value. The base size of the ETH-CC PDU, including the Interface Status TLV and Port Status TLV, is 83 bytes not including the Layer 2 encapsulation. CCM padding is not supported when the CCM interval (configured through **configure eth-cfm domain association ccm-interval**) is less than 1 second.

Range 3 to 1500

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **ccm-tlv-ignore** *keyword*

Synopsis TLV to ignore on reception

Context **configure lag** *string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number ccm-tlv-ignore keyword*

Tree [ccm-tlv-ignore](#)

Description This command configures the receiving MEP to ignore the specified TLVs in the CCM PDU. The ignored TLVs are reported as absent and have no impact on the MEP state machine.

When unconfigured, the MEP processes all the recognized TLVs.

Options interface-status, port-status

Max. Instances 2

Introduced 16.0.R6

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **collect-lmm-stats** *boolean*

Synopsis Collect statistics for loss measurement message tests

Context **configure lag** *string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number collect-lmm-stats boolean*

Tree [collect-lmm-stats](#)

Description When configured to **true**, the router instantiates the statistical counter to transmit and receive packets for the LAG facility MEP bindings.

The **show eth-cfm collect-lmm-stats** command displays entities that have been enabled to collect transit and receive counters.

When configured to **false**, the router does not instantiate the counter and the LMM PDU associated with the MEP does not populate the counters in the packet.

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **csf**

Synopsis Enable the **csf** context

Context	<b>configure lag</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>csf</b>
Tree	<b>csf</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **multiplier** *decimal-number*

Synopsis	Multiplication factor used to clear the CSF condition
Context	<b>configure lag</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>csf multiplier</b> <i>decimal-number</i>
Tree	<b>multiplier</b>
Range	0.0   2.0 to 30.0
Default	3.5
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **description** *string*

Synopsis	Text description
Context	<b>configure lag</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **eth-test**

Synopsis	Enable the <b>eth-test</b> context
Context	<b>configure lag</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>eth-test</b>
Tree	<b>eth-test</b>
Description	Commands in this context configure information used by the Ethernet Test (ETH-TST) packet. The commands must be configured on both the sender and the receiver nodes. The test packets are used with the <b>oam eth-cfm eth-test</b> command.
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **bit-error-threshold** *number*

Synopsis Lowest priority defect allowed to generate fault alarm

Context **configure lag** *string* [eth-cfm mep md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [eth-test bit-error-threshold](#) *number*

Tree [bit-error-threshold](#)

Range 0 to 11840

Units bit errors

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **test-pattern**

Synopsis Enter the **test-pattern** context

Context **configure lag** *string* [eth-cfm mep md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [eth-test test-pattern](#)

Tree [test-pattern](#)

Description Commands in this context specify the test pattern for the ETH-TST frames. The pattern does not have to be the same on the sender and the receiver.

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **crc-tlv** *boolean*

Synopsis Generate a CRC checksum

Context **configure lag** *string* [eth-cfm mep md-admin-name](#) *reference* [ma-admin-name](#) *reference* [mep-id](#) *number* [eth-test test-pattern](#) [crc-tlv](#) *boolean*

Tree [crc-tlv](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**pattern** *keyword*

Synopsis	Test pattern for Ethernet Test frames
Context	<b>configure</b> <a href="#">lag</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">eth-test</a> <a href="#">test-pattern</a> <a href="#">pattern</a> <i>keyword</i>
Tree	<a href="#">pattern</a>
Description	This command specifies the test pattern of the Ethernet Test (ETH-TST) frames. This does not have to be configured the same on the sender and the receiver.
Options	all-zeros, all-ones
Default	all-zeros
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**facility-fault** *boolean*

Synopsis	Allow the facility MEP to generate a network action
Context	<b>configure</b> <a href="#">lag</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">facility-fault</a> <i>boolean</i>
Tree	<a href="#">facility-fault</a>
Description	When configured to <b>true</b> , the system facility MEP responds to a fault with a network-actionable function instead of just reporting the defect condition.  When configured to <b>false</b> , the system monitors transmissions and reports fault conditions.
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**grace**

Synopsis	Enter the <b>grace</b> context
Context	<b>configure</b> <a href="#">lag</a> <i>string</i> <a href="#">eth-cfm</a> <a href="#">mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace</a>
Tree	<a href="#">grace</a>
Description	Commands in this context configure the Nokia ETH-CFM Grace function and the ITU-T Y.1731 Ethernet Expected Default (ETH-ED) function.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## eth-ed

Synopsis	Enter the <b>eth-ed</b> context
Context	<b>configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed</b>
Tree	<a href="#">eth-ed</a>
Description	Commands in this context configure the ITU-T Y.1731 ETH-ED function.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## max-rx-defect-window *number*

Synopsis	Maximum received ETH-ED expected defect window duration
Context	<b>configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed max-rx-defect-window number</b>
Tree	<a href="#">max-rx-defect-window</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## priority *number*

Synopsis	Transmission priority for ETH-ED PDUs
Context	<b>configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed priority number</b>
Tree	<a href="#">priority</a>
Range	0 to 7
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## rx-eth-ed *boolean*

Synopsis	Receive and process ETH-ED ITU-T Y.1731 PDUs on the MEP
Context	<b>configure lag string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number grace eth-ed rx-eth-ed boolean</b>

Tree	<a href="#">rx-eth-ed</a>
Description	This command enables the reception and processing of the ITU-T Y.1731 ETH-ED PDU on the MEP.
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **tx-eth-ed** *boolean*

Synopsis	Transmit ETH-ED PDUs from the MEP
Context	<b>configure</b> <a href="#">lag</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-ed tx-eth-ed</a> <i>boolean</i>
Tree	<a href="#">tx-eth-ed</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **eth-vsm-grace**

Synopsis	Enter the <b>eth-vsm-grace</b> context
Context	<b>configure</b> <a href="#">lag</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-vsm-grace</a>
Tree	<a href="#">eth-vsm-grace</a>
Description	Commands in this context configure the Nokia ETH-CFM Grace function.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **rx-eth-vsm-grace** *boolean*

Synopsis	Receive and process Nokia ETH-CFM Grace PDU on the MEP
Context	<b>configure</b> <a href="#">lag</a> <i>string</i> <a href="#">eth-cfm mep</a> <a href="#">md-admin-name</a> <i>reference</i> <a href="#">ma-admin-name</a> <i>reference</i> <a href="#">mep-id</a> <i>number</i> <a href="#">grace eth-vsm-grace rx-eth-vsm-grace</a> <i>boolean</i>
Tree	<a href="#">rx-eth-vsm-grace</a>
Description	When configured to <b>true</b> , the router enables the Nokia Grace function, which is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect. When configured to <b>false</b> , the router disables the Nokia Grace function.

Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **tx-eth-vsm-grace** *boolean*

Synopsis	Transmit ETH-ED PDUs from the MEP
Context	<b>configure</b> <b>lag</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>grace eth-vsm-grace tx-eth-vsm-grace</b> <i>boolean</i>
Tree	<a href="#">tx-eth-vsm-grace</a>
Description	<p>When configured to <b>true</b>, the router can transmit the Nokia ETH-CFM Grace PDU from the MEP when a system soft reset notification is received for one or more cards.</p> <p>The Nokia Grace function is a vendor-specific PDU that informs MEP peers that the local node may be entering a period of expected defect.</p> <p>The operator must configure the <b>configure system eth-cfm grace</b> command to instruct the system that the node is capable of transmitting expected-defect windows to peers. The system can only transmit one form of ETH-CFM grace (Nokia ETH-CFM Grace or ITU-T Y.1731 ETH-ED).</p> <p>When configured to <b>false</b>, the router disables the transmission of the Nokia ETH-CFM Grace PDU from the MEP.</p>
Default	true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **low-priority-defect** *keyword*

Synopsis	Lowest priority defect allowed to generate fault alarm
Context	<b>configure</b> <b>lag</b> <i>string</i> <b>eth-cfm mep md-admin-name</b> <i>reference</i> <b>ma-admin-name</b> <i>reference</i> <b>mep-id</b> <i>number</i> <b>low-priority-defect</b> <i>keyword</i>
Tree	<a href="#">low-priority-defect</a>
Options	all-def, mac-rem-err-xcon, rem-err-xcon, err-xcon, xcon, no-xcon
Default	mac-rem-err-xcon
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **mac-address** *string*

Synopsis	MAC address of the MEP
----------	------------------------

Context	<b>configure lag</b> <i>string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number mac-address string</i>
Tree	<a href="#">mac-address</a>
Description	This command specifies the MAC address of the MEP. When unconfigured, the MAC address of the port (if the MEP is on a SAP) or the MAC address of a bridge (if the MEP is on a spoke) is used.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **one-way-delay-threshold** *number*

Synopsis	Threshold time limit for the one-way delay test
Context	<b>configure lag</b> <i>string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number one-way-delay-threshold number</i>
Tree	<a href="#">one-way-delay-threshold</a>
Range	0 to 600
Units	seconds
Default	3
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **vlan** (*number* | *keyword*)

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Outer VLAN ID of the tunnel
Context	<b>configure lag</b> <i>string eth-cfm mep md-admin-name reference ma-admin-name reference mep-id number vlan (number   keyword)</i>
Tree	<a href="#">vlan</a>
Range	1 to 4094
Options	none
Default	none
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## hash-weight-threshold

Synopsis	Enter the <b>hash-weight-threshold</b> context
Context	<b>configure lag string hash-weight-threshold</b>
Tree	<a href="#">hash-weight-threshold</a>
Introduced	19.10.R1
Platforms	All

## action keyword

Synopsis	Action when the sum of the hash weight is not exceeded
Context	<b>configure lag string hash-weight-threshold action keyword</b>
Tree	<a href="#">action</a>
Options	down, dynamic-cost, static-cost
Default	down
Introduced	19.10.R1
Platforms	All

## cost number

Synopsis	Static cost of the LAG
Context	<b>configure lag string hash-weight-threshold cost number</b>
Tree	<a href="#">cost</a>
Range	1 to 16777215
Introduced	19.10.R1
Platforms	All

## value number

Synopsis	Sum of the hash weight values of all active LAG ports
Context	<b>configure lag string hash-weight-threshold value number</b>
Tree	<a href="#">value</a>
Range	1 to 6400000
Introduced	19.10.R1
Platforms	All

**hold-time-down** *number*

Synopsis	Delay time for reporting the LAG is down
Context	<b>configure lag</b> <i>string</i> <b>hold-time-down</b> <i>number</i>
Tree	<a href="#">hold-time-down</a>
Range	1 to 2000
Units	deciseconds
Introduced	16.0.R1
Platforms	All

**lacp**

Synopsis	Enable the <b>lacp</b> context
Context	<b>configure lag</b> <i>string</i> <b>lacp</b>
Tree	<a href="#">lacp</a>
Introduced	16.0.R1
Platforms	All

**administrative-key** *number*

Synopsis	Key to identify the channel group on each LACP port
Context	<b>configure lag</b> <i>string</i> <b>lacp administrative-key</b> <i>number</i>
Tree	<a href="#">administrative-key</a>
Description	This command configures the administrative key that identifies the channel group on each port configured to use LACP.  In an MC-LAG configuration, both redundant nodes must be configured with the same key values. In any other case, the key is only locally significant.
Range	1 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**mode** *keyword*

Synopsis	Mode in which LACP operates
----------	-----------------------------

Context	<b>configure lag string lacp mode keyword</b>
Tree	<b>mode</b>
Options	passive, active
Default	passive
Introduced	16.0.R1
Platforms	All

### **system-id string**

Synopsis	System ID
Context	<b>configure lag string lacp system-id string</b>
Tree	<b>system-id</b>
Default	00:00:00:00:00:00
Introduced	16.0.R1
Platforms	All

### **system-priority number**

Synopsis	System priority value
Context	<b>configure lag string lacp system-priority number</b>
Tree	<b>system-priority</b>
Range	0 to 65535
Introduced	16.0.R1
Platforms	All

### **lacp-mux-control keyword**

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	MUX machine control for LACP LAG in active/passive mode
Context	<b>configure lag string lacp-mux-control keyword</b>
Tree	<b>lacp-mux-control</b>
Options	coupled, independent
Default	coupled

Introduced 16.0.R1  
Platforms All

### **lacp-xmit-interval** *keyword*

Synopsis Time for periodic transmission  
Context **configure lag** *string lacp-xmit-interval keyword*  
Tree [lacp-xmit-interval](#)  
Options slow, fast  
Default fast  
Introduced 16.0.R1  
Platforms All

### **lacp-xmit-stdby** *boolean*

Synopsis Allow LACP message transmission on standby links  
Context **configure lag** *string lacp-xmit-stdby boolean*  
Tree [lacp-xmit-stdby](#)  
Default true  
Introduced 16.0.R1  
Platforms All

### **link-map-profile** [[link-map-profile-id](#)] *number*

Synopsis Enter the **link-map-profile** list instance  
Context **configure lag** *string link-map-profile number*  
Tree [link-map-profile](#)  
Introduced 16.0.R1  
Platforms All

### **[link-map-profile-id]** *number*

Synopsis Link map profile to control LAG ports  
Context **configure lag** *string link-map-profile number*  
Tree [link-map-profile](#)

Range	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure lag</b> <i>string link-map-profile number description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **failure-mode** *keyword*

Synopsis	Failure mode of LAG link profile
Context	<b>configure lag</b> <i>string link-map-profile number failure-mode keyword</i>
Tree	<a href="#">failure-mode</a>
Options	per-link-hash, discard
Default	per-link-hash
Introduced	16.0.R1
Platforms	All

### **link** [[port-id](#)] *reference*

Synopsis	Enter the <b>link</b> list instance
Context	<b>configure lag</b> <i>string link-map-profile number link reference</i>
Tree	<a href="#">link</a>
Introduced	16.0.R1
Platforms	All

### **[port-id]** *reference*

Synopsis	Port associated with the link map profile
----------	---

Context	<b>configure lag</b> <i>string link-map-profile number link reference</i>
Tree	<a href="#">link</a>
Reference	<b>configure lag</b> <i>string port reference</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **port-type** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Type of the associated port for this entry
Context	<b>configure lag</b> <i>string link-map-profile number link reference port-type keyword</i>
Tree	<a href="#">port-type</a>
Options	primary, secondary
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **mac-address** *string*

Synopsis	MAC address of the LAG
Context	<b>configure lag</b> <i>string mac-address string</i>
Tree	<a href="#">mac-address</a>
Default	00:00:00:00:00:00
Introduced	16.0.R1
Platforms	All

### **max-ports** *number*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maximum number of ports allowed in the LAG
Context	<b>configure lag</b> <i>string</i> <b>max-ports</b> <i>number</i>
Tree	<b>max-ports</b>
Description	This command configures the maximum number of ports allowed in the LAG.  This command must be configured to 64 when the LAG name is a numeric identifier in the range of 1 to 64. If the LAG name is a numeric identifier in the range of 65 to 800, this command must be configured to 32.
Range	32   64
Introduced	21.2.R1
Platforms	All

### **mode** *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Operation mode of the LAG
Context	<b>configure lag</b> <i>string</i> <b>mode</b> <i>keyword</i>
Tree	<b>mode</b>
Options	access, network, hybrid
Default	network
Introduced	16.0.R1
Platforms	All

### **monitor-oper-group** *reference*

Synopsis	Operational group to monitor
Context	<b>configure lag</b> <i>string</i> <b>monitor-oper-group</b> <i>reference</i>
Tree	<b>monitor-oper-group</b>
Reference	<b>configure service oper-group</b> <i>string</i>
Introduced	19.5.R1
Platforms	All

## per-link-hash

Synopsis	Enable the <b>per-link-hash</b> context
Context	<b>configure lag string per-link-hash</b>
Tree	<a href="#">per-link-hash</a>
Introduced	16.0.R1
Platforms	All

## weighted

Synopsis	Enable the <b>weighted</b> context
Context	<b>configure lag string per-link-hash weighted</b>
Tree	<a href="#">weighted</a>
Introduced	16.0.R1
Platforms	All

## auto-rebalance *boolean*

Synopsis	Auto-rebalance SAPs, users, or interfaces for new links
Context	<b>configure lag string per-link-hash weighted auto-rebalance <i>boolean</i></b>
Tree	<a href="#">auto-rebalance</a>
Default	false
Introduced	16.0.R1
Platforms	All

## sap-hash-mode *keyword*

Synopsis	SAP traffic load balance over LAG member links
Context	<b>configure lag string per-link-hash weighted sap-hash-mode <i>keyword</i></b>
Tree	<a href="#">sap-hash-mode</a>
Options	sap, vport
Default	sap
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**subscriber-hash-mode** *keyword*

Synopsis	Subscriber traffic load balance over LAG member links
Context	<b>configure lag</b> <i>string</i> <b>per-link-hash weighted subscriber-hash-mode</b> <i>keyword</i>
Tree	<b>subscriber-hash-mode</b>
Description	This command configures weighted subscriber traffic to be load balanced over LAG member links. Traffic hashing can be performed based on SAPs or Vports.  SAP-based hashing supports weights configured at the subscriber level in the subscriber profile. The SAP hashing mode supports only SAP to subscriber (1:1) deployment models.  Vport-based load balancing supports SAP to subscriber (1:1) and SAP to service (N:1) deployment models.
Options	sap, vport
Default	sap
Introduced	22.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**port** [*port-id*] *reference*

Synopsis	Enter the <b>port</b> list instance
Context	<b>configure lag</b> <i>string</i> <b>port</b> <i>reference</i>
Tree	<b>port</b>
Introduced	16.0.R1
Platforms	All

**[port-id]** *reference*

Synopsis	Identifier to uniquely identify the port in the LAG
Context	<b>configure lag</b> <i>string</i> <b>port</b> <i>reference</i>
Tree	<b>port</b>
Reference	<b>configure port</b> <i>string</i>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**hash-weight** (*number* | *keyword*)

Synopsis	Flow hashing distribution between LAG ports
Context	<b>configure lag</b> <i>string</i> <b>port</b> <i>reference</i> <b>hash-weight</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>hash-weight</b>
Range	1 to 100000
Options	port-speed
Introduced	19.5.R1
Platforms	All

**priority** *number*

Synopsis	Priority of the port in the LAG
Context	<b>configure lag</b> <i>string</i> <b>port</b> <i>reference</i> <b>priority</b> <i>number</i>
Tree	<b>priority</b>
Range	1 to 65535
Default	32768
Introduced	16.0.R1
Platforms	All

**sub-group** (*number* | *keyword*)**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Subgroup of the port in the LAG
Context	<b>configure lag</b> <i>string</i> <b>port</b> <i>reference</i> <b>sub-group</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>sub-group</b>
Range	1 to 8
Options	auto-iom, auto-mda
Default	1
Introduced	16.0.R1
Platforms	All

## port-threshold

Synopsis	Enter the <b>port-threshold</b> context
Context	<b>configure lag string port-threshold</b>
Tree	<a href="#">port-threshold</a>
Introduced	16.0.R1
Platforms	All

## action keyword

Synopsis	Action when the active links are at or below threshold
Context	<b>configure lag string port-threshold action keyword</b>
Tree	<a href="#">action</a>
Options	down, dynamic-cost, static-cost
Default	down
Introduced	16.0.R1
Platforms	All

## cost number

Synopsis	Static cost of the LAG
Context	<b>configure lag string port-threshold cost number</b>
Tree	<a href="#">cost</a>
Range	1 to 16777215
Introduced	16.0.R3
Platforms	All

## value number

Synopsis	Active link threshold at which action is taken
Context	<b>configure lag string port-threshold value number</b>
Tree	<a href="#">value</a>
Range	0 to 63
Introduced	16.0.R1
Platforms	All

### **port-type** *keyword*

Synopsis	Port type of the LAG
Context	<b>configure lag</b> <i>string</i> <b>port-type</b> <i>keyword</i>
Tree	<b>port-type</b>
Options	standard, hs
Default	standard
Introduced	16.0.R1
Platforms	All

### **selection-criteria**

Synopsis	Enter the <b>selection-criteria</b> context
Context	<b>configure lag</b> <i>string</i> <b>selection-criteria</b>
Tree	<b>selection-criteria</b>
Introduced	16.0.R1
Platforms	All

### **mode** *keyword*

Synopsis	Criteria to select the active subgroup
Context	<b>configure lag</b> <i>string</i> <b>selection-criteria mode</b> <i>keyword</i>
Tree	<b>mode</b>
Options	highest-count, highest-weight, best-port
Default	highest-count
Introduced	16.0.R1
Platforms	All

### **slave-to-partner** *boolean*

Synopsis	Use slave-to-partner for selection criteria
Context	<b>configure lag</b> <i>string</i> <b>selection-criteria slave-to-partner</b> <i>boolean</i>
Tree	<b>slave-to-partner</b>
Default	false
Introduced	16.0.R1

---

Platforms All

### **subgroup-hold-time** (*number* | *keyword*)

Synopsis Delay time when switching to a new active subgroup

Context **configure lag string selection-criteria subgroup-hold-time** (*number* | *keyword*)

Tree [subgroup-hold-time](#)

Range 0 to 2000

Units deciseconds

Options infinite

Default 0

Introduced 16.0.R1

Platforms All

### **standby-signaling** *keyword*

Synopsis Way of signaling a member port to the remote side

Context **configure lag string standby-signaling** *keyword*

Tree [standby-signaling](#)

Options lacp, power-off

Default lacp

Introduced 16.0.R1

Platforms All

### 3.23.1 li command descriptions

#### li

Synopsis	Configure lawful intercept
Context	<a href="#">li</a>
Tree	<a href="#">li</a>
Introduced	19.10.R1
Platforms	All

#### li-filter

Synopsis	Enter the <b>li-filter</b> context
Context	<a href="#">li li-filter</a>
Tree	<a href="#">li-filter</a>
Introduced	19.10.R1
Platforms	All

#### associations

Synopsis	Enter the <b>associations</b> context
Context	<a href="#">li li-filter associations</a>
Tree	<a href="#">associations</a>
Introduced	19.10.R1
Platforms	All

#### li-ip-filter [[li-filter-name](#)] *reference*

Synopsis	Enter the <b>li-ip-filter</b> list instance
Context	<a href="#">li li-filter associations li-ip-filter reference</a>
Tree	<a href="#">li-ip-filter</a>
Introduced	19.10.R1
Platforms	All

**[li-filter-name] reference**

Synopsis	Name of an existing LI IP filter
Context	<a href="#">li li-filter associations li-ip-filter reference</a> <i>reference</i>
Tree	<a href="#">li-ip-filter</a>
Reference	<a href="#">li li-filter li-ip-filter string</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**ip-filter [filter-name] string**

Synopsis	Add a list entry for <b>ip-filter</b>
Context	<a href="#">li li-filter associations li-ip-filter reference ip-filter string</a> <i>string</i>
Tree	<a href="#">ip-filter</a>
Max. Instances	1
Min. Instances	1
Introduced	19.10.R1
Platforms	All

**[filter-name] string**

Synopsis	IP filter to be associated with specified LI IP filter
Context	<a href="#">li li-filter associations li-ip-filter reference ip-filter string</a> <i>string</i>
Tree	<a href="#">ip-filter</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**li-ipv6-filter [li-filter-name] reference**

Synopsis	Enter the <b>li-ipv6-filter</b> list instance
Context	<a href="#">li li-filter associations li-ipv6-filter reference</a> <i>reference</i>

Tree	<a href="#">li-ipv6-filter</a>
Introduced	19.10.R1
Platforms	All

**[li-filter-name]** *reference*

Synopsis	LI IPv6 filter name
Context	<a href="#">li li-filter associations li-ipv6-filter reference</a>
Tree	<a href="#">li-ipv6-filter</a>
Reference	<a href="#">li li-filter li-ipv6-filter string</a>
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**ipv6-filter** [[filter-name](#)] *string*

Synopsis	Add a list entry for <b>ipv6-filter</b>
Context	<a href="#">li li-filter associations li-ipv6-filter reference ipv6-filter string</a>
Tree	<a href="#">ipv6-filter</a>
Max. Instances	1
Min. Instances	1
Introduced	19.10.R1
Platforms	All

**[filter-name]** *string*

Synopsis	IP filter to be associated with specified LI IP filter
Context	<a href="#">li li-filter associations li-ipv6-filter reference ipv6-filter string</a>
Tree	<a href="#">ipv6-filter</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**li-mac-filter** [[li-filter-name](#)] *reference*

Synopsis	Enter the <b>li-mac-filter</b> list instance
Context	<a href="#">li li-filter associations</a> <a href="#">li-mac-filter reference</a>
Tree	<a href="#">li-mac-filter</a>
Introduced	19.10.R1
Platforms	All

**[li-filter-name]** *reference*

Synopsis	LI MAC filter name
Context	<a href="#">li li-filter associations</a> <a href="#">li-mac-filter reference</a>
Tree	<a href="#">li-mac-filter</a>
Reference	<a href="#">li li-filter</a> <a href="#">li-mac-filter string</a>
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**mac-filter** [[filter-name](#)] *string*

Synopsis	Add a list entry for <b>mac-filter</b>
Context	<a href="#">li li-filter associations</a> <a href="#">li-mac-filter reference</a> <a href="#">mac-filter string</a>
Tree	<a href="#">mac-filter</a>
Max. Instances	1
Min. Instances	1
Introduced	19.10.R1
Platforms	All

**[filter-name]** *string*

Synopsis	IP filter to be associated with specified LI IP filter
Context	<a href="#">li li-filter associations</a> <a href="#">li-mac-filter reference</a> <a href="#">mac-filter string</a>
Tree	<a href="#">mac-filter</a>

String Length	1 to 64
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

### **li-ip-filter** [[li-filter-name](#)] *string*

Synopsis	Enter the <b>li-ip-filter</b> list instance
Context	<a href="#">li li-filter li-ip-filter</a> <i>string</i>
Tree	<a href="#">li-ip-filter</a>
Description	<p>Commands in this context create LI IPv4 filter lists, which can be used to create confidential IPv4 filter based LI source entries.</p> <p>The LI IPv4 filter entries are merged into normal IPv4 filters configured with the <b>li li-filter associations</b> and <b>li li-filter reserved-block</b> commands. The LI IPv4 filter entries are visible only to users with LI permissions.</p>
Introduced	19.10.R1
Platforms	All

### **[li-filter-name]** *string*

Synopsis	LI filter name
Context	<a href="#">li li-filter li-ip-filter</a> <i>string</i>
Tree	<a href="#">li-ip-filter</a>
Description	This command specifies the LI filter name. Filter names cannot start with an underscore character (for example, “_my-filter”) and cannot use the name “default”.
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<a href="#">li li-filter li-ip-filter</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80

Introduced	19.10.R1
Platforms	All

### **entry** [*li-entry-id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <b>entry</b> <i>number</i>
Tree	<a href="#">entry</a>

Description Commands in this context configure an entry for the LI filter.

Multiple entries can be created using unique entry ID numbers within the filter. An entry in an LI filter always has an implicit action of “forward”. LI filter entries can be used as LI source entries.

The entry numbers for LI filters serve only as keys for managing the entries (deleting entries, and so on). The order of the LI filter entries is not guaranteed to match the entry numbers and the software may reorder entries. Operators must therefore use LI entries in such a way that their relative order is not important.

Entries removed from the filter are immediately removed from all services or network ports where the associated filter is applied.

Introduced	19.10.R1
Platforms	All

### **[li-entry-id]** *number*

Synopsis	LI filter entry ID
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <b>entry</b> <i>number</i>
Tree	<a href="#">entry</a>

Range 1 to 65535

Notes This element is part of a list key.

Introduced	19.10.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <b>entry</b> <i>number</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>

String Length 1 to 80

Introduced	19.10.R1
Platforms	All

## match

Synopsis	Enter the <b>match</b> context
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a>
Tree	<a href="#">match</a>
Description	<p>Commands in this context configure match criteria for the filter entry. If more than one match criteria (within one match statement) are configured, all criteria must be satisfied (and function) for a match to occur.</p> <p>A match context may consist of multiple match criteria, but multiple match statements cannot be configured per entry.</p>
Introduced	19.10.R1
Platforms	All

## dst-ip

Synopsis	Enter the <b>dst-ip</b> context
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a>
Tree	<a href="#">dst-ip</a>
Introduced	19.10.R1
Platforms	All

## address (*ipv4-prefix-with-host-bits* | *ipv4-address*)

Synopsis	IP address to match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-ip</a> <a href="#">address</a> ( <i>ipv4-prefix-with-host-bits</i>   <i>ipv4-address</i> )
Tree	<a href="#">address</a>
Introduced	19.10.R1
Platforms	All

## mask *string*

Synopsis	Mask that is applied as an AND to the IP address
----------	--

Context	<a href="#">li li-filter li-ip-filter</a> <i>string entry number match dst-ip mask string</i>
Tree	<a href="#">mask</a>
Introduced	19.10.R1
Platforms	All

### **dst-port**

Synopsis	Enter the <b>dst-port</b> context
Context	<a href="#">li li-filter li-ip-filter</a> <i>string entry number match dst-port</i>
Tree	<a href="#">dst-port</a>
Introduced	19.10.R1
Platforms	All

### **eq number**

Synopsis	Condition on equality to specified value
Context	<a href="#">li li-filter li-ip-filter</a> <i>string entry number match dst-port eq number</i>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

### **gt number**

Synopsis	Condition on being greater than the specified value
Context	<a href="#">li li-filter li-ip-filter</a> <i>string entry number match dst-port gt number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

### **lt number**

Synopsis	Condition on being less than the specified value
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <b>lt</b> <i>number</i>
Tree	<b>lt</b>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

### **range**

Synopsis	Enable the <b>range</b> context
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <b>range</b>
Tree	<b>range</b>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

### **end number**

Synopsis	Upper bound port to match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <b>range</b> <b>end</b> <i>number</i>
Tree	<b>end</b>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

### **start number**

Synopsis	Lower bound port to match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-port</a> <b>range</b> <b>start</b> <i>number</i>
Tree	<b>start</b>
Range	0 to 65534

Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

### **fragment** *keyword*

Synopsis	Fragmentation state as the match criterion
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">fragment</a> <i>keyword</i>
Tree	<a href="#">fragment</a>
Options	false, true
Introduced	20.2.R1
Platforms	All

### **protocol** (*number* | *keyword*)

Synopsis	IP protocol to match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">protocol</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">protocol</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	19.10.R1
Platforms	All

### **src-ip**

Synopsis	Enter the <b>src-ip</b> context
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ip-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-ip</a>
Tree	<a href="#">src-ip</a>
Introduced	19.10.R1
Platforms	All

### **address** (*ipv4-prefix-with-host-bits* | *ipv4-address*)

Synopsis	IP address to match
----------	---------------------

Context	<a href="#">li li-filter li-ip-filter string entry number match src-ip address (ipv4-prefix-with-host-bits   ipv4-address)</a>
Tree	<a href="#">address</a>
Introduced	19.10.R1
Platforms	All

### **mask string**

Synopsis	Mask that is applied as an AND to the IP address
Context	<a href="#">li li-filter li-ip-filter string entry number match src-ip mask string</a>
Tree	<a href="#">mask</a>
Introduced	19.10.R1
Platforms	All

### **src-port**

Synopsis	Enter the <b>src-port</b> context
Context	<a href="#">li li-filter li-ip-filter string entry number match src-port</a>
Tree	<a href="#">src-port</a>
Introduced	19.10.R1
Platforms	All

### **eq number**

Synopsis	Condition on equality to specified value
Context	<a href="#">li li-filter li-ip-filter string entry number match src-port eq number</a>
Tree	<a href="#">eq</a>
Range	0 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

### **gt number**

Synopsis	Condition on being greater than the specified value
----------	---

Context	<a href="#">li li-filter li-ip-filter</a> <i>string entry number match src-port gt number</i>
Tree	<a href="#">gt</a>
Range	0 to 65534
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

### **lt** *number*

Synopsis	Condition on being less than the specified value
Context	<a href="#">li li-filter li-ip-filter</a> <i>string entry number match src-port lt number</i>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

### **range**

Synopsis	Enable the <b>range</b> context
Context	<a href="#">li li-filter li-ip-filter</a> <i>string entry number match src-port range</i>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

### **end** *number*

Synopsis	Upper bound port to match
Context	<a href="#">li li-filter li-ip-filter</a> <i>string entry number match src-port range end number</i>
Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	19.10.R1

Platforms All

### **start number**

Synopsis Lower bound port to match

Context [li li-filter li-ip-filter](#) *string entry number match src-port range start number*

Tree [start](#)

Range 0 to 65534

Notes This element is mandatory.

Introduced 19.10.R1

Platforms All

### **li-ipv6-filter** [[li-filter-name](#)] *string*

Synopsis Enter the **li-ipv6-filter** list instance

Context [li li-filter li-ipv6-filter](#) *string*

Tree [li-ipv6-filter](#)

Description Commands in this context create LI IPv6 filter lists, which can be used to create confidential IPv6 filter based LI source entries.

The LI IPv6 filter entries are merged into normal IPv6 filters configured with the **li li-filter associations** and **li li-filter reserved-block** commands. However, the LI IPv6 filter entries are visible only to users with LI permissions.

Introduced 19.10.R1

Platforms All

### **[li-filter-name]** *string*

Synopsis LI filter name

Context [li li-filter li-ipv6-filter](#) *string*

Tree [li-ipv6-filter](#)

Description This command specifies the LI filter name. Filter names cannot start with an underscore character (for example, “\_my-filter”) and cannot use the name “default”.

String Length 1 to 32

Notes This element is part of a list key.

Introduced 19.10.R1

Platforms All

**description string**

Synopsis	Text description
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ipv6-filter</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	19.10.R1
Platforms	All

**entry [[li-entry-id](#)] number**

Synopsis	Enter the <b>entry</b> list instance
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Description	<p>Commands in this context configure an entry for the LI filter.</p> <p>Multiple entries can be created using unique entry ID numbers within the filter. An entry in an LI filter always has an implicit action of “forward”. LI filter entries can be used as LI source entries.</p> <p>The entry numbers for LI filters serve only as keys for managing the entries (deleting entries, and so on). The order of the LI filter entries is not guaranteed to match the entry numbers and the software may reorder entries. Operators must therefore use LI entries in such a way that their relative order is not important.</p> <p>Entries removed from the filter are immediately removed from all services or network ports where the associated filter is applied.</p>
Introduced	19.10.R1
Platforms	All

**[[li-entry-id](#)] number**

Synopsis	LI filter entry ID
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	19.10.R1

**lt number**

Synopsis	Condition on being less than the specified value
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ipv6-filter</a> <i>string entry number match dst-port lt number</i>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

**range**

Synopsis	Enable the <b>range</b> context
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ipv6-filter</a> <i>string entry number match dst-port range</i>
Tree	<a href="#">range</a>
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

**end number**

Synopsis	Upper bound port to match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ipv6-filter</a> <i>string entry number match dst-port range end number</i>
Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

**start number**

Synopsis	Lower bound port to match
Context	<a href="#">li li-filter li-ipv6-filter</a> <i>string entry number match dst-port range start number</i>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

**next-header** (*number | keyword*)

Synopsis	IP protocol to match
Context	<a href="#">li li-filter li-ipv6-filter</a> <i>string entry number match next-header (number   keyword)</i>
Tree	<a href="#">next-header</a>
Range	0 to 255
Options	tcp-udp, icmp, igmp, ip, tcp, egp, igp, udp, rdp, ipv6, ipv6-route, ipv6-frag, idrp, rsvp, gre, ipv6-icmp, ipv6-no-nxt, ipv6-opts, iso-ip, eigrp, ospf-igp, ether-ip, encap, pnni, pim, vrrp, l2tp, stp, ptp, isis, crtp, crudp, sctp
Introduced	19.10.R1
Platforms	All

**src-ip**

Synopsis	Enter the <b>src-ip</b> context
Context	<a href="#">li li-filter li-ipv6-filter</a> <i>string entry number match src-ip</i>
Tree	<a href="#">src-ip</a>
Introduced	19.10.R1
Platforms	All

**address** (*ipv6-prefix-with-host-bits | ipv6-address*)

Synopsis	IP address to match
Context	<a href="#">li li-filter li-ipv6-filter</a> <i>string entry number match src-ip address (ipv6-prefix-with-host-bits   ipv6-address)</i>
Tree	<a href="#">address</a>
Introduced	19.10.R1

Platforms All

### **mask string**

Synopsis Mask that is applied as an AND to the IPv6 address  
 Context [li li-filter li-ipv6-filter string entry number match src-ip mask string](#)  
 Tree [mask](#)  
 Introduced 19.10.R1  
 Platforms All

### **src-port**

Synopsis Enter the **src-port** context  
 Context [li li-filter li-ipv6-filter string entry number match src-port](#)  
 Tree [src-port](#)  
 Introduced 19.10.R1  
 Platforms All

### **eq number**

Synopsis Condition on equality to specified value  
 Context [li li-filter li-ipv6-filter string entry number match src-port eq number](#)  
 Tree [eq](#)  
 Range 0 to 65535  
 Notes The following elements are part of a choice: **eq**, **gt**, **lt**, or **range**.  
 Introduced 19.10.R1  
 Platforms All

### **gt number**

Synopsis Condition on being greater than the specified value  
 Context [li li-filter li-ipv6-filter string entry number match src-port gt number](#)  
 Tree [gt](#)  
 Range 0 to 65534  
 Notes The following elements are part of a choice: **eq**, **gt**, **lt**, or **range**.

Introduced	19.10.R1
Platforms	All

**lt number**

Synopsis	Condition on being less than the specified value
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">lt</a> <i>number</i>
Tree	<a href="#">lt</a>
Range	1 to 65535
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>lt</b> , or <b>range</b> .
Introduced	19.10.R1
Platforms	All

**range**

Synopsis	Enable the <b>range</b> context
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a>

**end number**

Synopsis	Upper bound port to match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-ipv6-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-port</a> <a href="#">range</a> <a href="#">end</a> <i>number</i>
Tree	<a href="#">end</a>
Range	1 to 65535
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

**start number**

Synopsis	Lower bound port to match
----------	---------------------------

Context	<a href="#">li li-filter li-ipv6-filter</a> <i>string entry number match src-port range start number</i>
Tree	<a href="#">start</a>
Range	0 to 65534
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

### **li-mac-filter** [[li-filter-name](#)] *string*

Synopsis	Enter the <b>li-mac-filter</b> list instance
Context	<a href="#">li li-filter li-mac-filter</a> <i>string</i>
Tree	<a href="#">li-mac-filter</a>
Description	<p>Commands in this context configure LI MAC filter lists, which can be used to create confidential MAC filter based LI source entries.</p> <p>The LI MAC filter entries are merged into normal MAC filters as configured using the <b>li-filter associations</b> and <b>li-filter reserved-block</b> commands. The LI MAC filter entries are visible only to users with LI permissions.</p>
Introduced	19.10.R1
Platforms	All

### **[li-filter-name]** *string*

Synopsis	LI filter name
Context	<a href="#">li li-filter li-mac-filter</a> <i>string</i>
Tree	<a href="#">li-mac-filter</a>
Description	This command specifies the LI filter name. Filter names cannot start with an underscore character (for example, “_my-filter”) and cannot use the name “default”.
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<a href="#">li li-filter li-mac-filter</a> <i>string description string</i>

Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	19.10.R1
Platforms	All

### **entry** [[li-entry-id](#)] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<a href="#">li li-filter li-mac-filter</a> <i>string entry number</i>
Tree	<a href="#">entry</a>

Description Commands in this context configure an entry for the LI filter.

Multiple entries can be created using unique entry ID numbers within the filter. An entry in an LI filter always has an implicit action of “forward”. LI filter entries can be used as LI source entries.

The entry numbers for LI filters serve only as keys for managing the entries (deleting entries, and so on). The order of the LI filter entries is not guaranteed to match the entry numbers and the software may reorder entries. Operators must therefore use LI entries in such a way that their relative order is not important.

Entries removed from the filter are immediately removed from all services or network ports where the associated filter is applied.

Introduced	19.10.R1
Platforms	All

### **[li-entry-id]** *number*

Synopsis	LI filter entry ID
Context	<a href="#">li li-filter li-mac-filter</a> <i>string entry number</i>
Tree	<a href="#">entry</a>

Range 1 to 65535

Notes This element is part of a list key.

Introduced	19.10.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<a href="#">li li-filter li-mac-filter</a> <i>string entry number description string</i>

Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	19.10.R1
Platforms	All

## match

Synopsis	Enter the <b>match</b> context
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a>
Tree	<a href="#">match</a>
Description	<p>Commands in this context configure match criteria for the filter entry. If more than one match criteria (within one match statement) is configured, all criteria must be satisfied (and function) for a match to occur.</p> <p>A match context may consist of multiple match criteria, but multiple match statements cannot be configured per entry.</p>
Introduced	19.10.R1
Platforms	All

## dst-mac

Synopsis	Enable the <b>dst-mac</b> context
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-mac</a>
Tree	<a href="#">dst-mac</a>
Introduced	19.10.R1
Platforms	All

## address *string*

Synopsis	MAC address for filter match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-mac</a> <a href="#">address</a> <i>string</i>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

**mask string**

Synopsis	MAC address mask for filter match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">dst-mac</a> <a href="#">mask</a> <i>string</i>
Tree	<a href="#">mask</a>
Default	ff:ff:ff:ff:ff:ff
Introduced	19.10.R1
Platforms	All

**frame-type keyword**

Synopsis	Frame type for MAC filter match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">frame-type</a> <i>keyword</i>
Tree	<a href="#">frame-type</a>
Description	This command specifies the frame type for MAC filter entry matching. A filter can be edited even if an LI source references an entry in the filter.
Options	802dot3, 802dot2-llc, 802dot2-snap, ethernet-ii
Default	802dot3
Introduced	19.10.R1
Platforms	All

**outer-tag number**

Synopsis	Outer tag for the QinQ SAP for filter match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">outer-tag</a> <i>number</i>
Tree	<a href="#">outer-tag</a>
Description	<p>This command configures the outer-tag to match on and must be used in conjunction with match criteria SAP in order for the entry match to activate.</p> <p>The match criteria SAP must be an exact match with the QinQ configured on the Epipe or VPLS service (for example 1/1/1:1.*, where the outer tag (C-tag) must be "*"). This feature mandates the provisioning of an associated <b>outer-tag</b> (example, 1), to be able to match on the QinQ packet. This example would perform LI on 1/1/1:1.1 on a 1/1/1:1.* SAP.</p>
Range	1 to 4094
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**sap string**

Synopsis	QinQ SAP for filter match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">sap</a> <i>string</i>
Tree	<a href="#">sap</a>
Description	<p>This command specifies the QinQ SAP to match from the Epipe or VPLS service, where the S-tag must be a value and the outer tag (C-tag) must be of type *. This filter match is used in conjunction with match criteria <b>outer-tag</b>, where the <b>outer-tag</b> must also be provisioned for the entry match on the QinQ packet to activate.</p> <p>The match criteria SAP must be an exact match with the QinQ configured on the Epipe or VPLS service (for example 1/1/1:1.*, where the outer tag (C-tag) must be "*"). An associated <b>outer-tag</b> (example, 1) must be provisioned to match on the QinQ packet. This example would perform LI on 1/1/1:1.1 on a 1/1/1:1.* SAP.</p>
String Length	1 to 45
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**src-mac**

Synopsis	Enable the <b>src-mac</b> context
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-mac</a>
Tree	<a href="#">src-mac</a>
Introduced	19.10.R1
Platforms	All

**address string**

Synopsis	MAC address for filter match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-mac</a> <a href="#">address</a> <i>string</i>
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

**mask string**

Synopsis	MAC address mask for filter match
Context	<a href="#">li</a> <a href="#">li-filter</a> <a href="#">li-mac-filter</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">match</a> <a href="#">src-mac</a> <a href="#">mask</a> <i>string</i>

Tree	<a href="#">mask</a>

### **intercept-id** *number*

Synopsis	Intercept ID of the traffic flow
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">li-ip-filter</a> <i>reference</i> <a href="#">entry</a> <i>reference</i> <a href="#">intercept-id</a> <i>number</i>
Tree	<a href="#">intercept-id</a>
Description	<p>This command configures the intercept ID that is inserted into the packet header for all mirrored packets of the associated LI source entry. This intercept ID can be used (for example by a downstream LI gateway) to identify the particular LI session to which the packet belongs.</p> <p>For LI source entries, when the <b>configure mirror mirror-dest encap layer-3-encap header-type</b> command is configured with <b>ip-udp-shim</b> routable encap, an intercept-id field (as part of the routable encap) is always present in the mirrored packets. If there is no intercept ID configured for an LI source entry, the default value is inserted.</p> <p>When the mirror service is configured with <b>ip-gre</b> routable encap under the <b>header-type</b> command, no intercept ID is inserted and none should be specified against the LI source entries.</p>
Range	1 to 1073741823
Introduced	19.10.R1
Platforms	All

**session-id** *number*

Synopsis	Session ID of the traffic flow
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">li-ip-filter</a> <i>reference</i> <a href="#">entry</a> <i>reference</i> <a href="#">session-id</a> <i>number</i>
Tree	<a href="#">session-id</a>
Description	<p>This command configures the session ID that is inserted into the packet header for all mirrored packets of the associated LI source entry. This session ID can be used (for example by a downstream LI gateway) to identify the particular LI session to which the packet belongs.</p> <p>The session ID is only valid and used for mirror services that are configured with <b>ip-udp-shim</b> routable encap under the <b>configure mirror mirror-dest encap layer-3-encap header-type</b> command. For all types of LI source entries, when the mirror service is configured with <b>ip-udp-shim</b> routable encap, a session ID field (as part of the routable encap) is always present in the mirrored packets. If no session ID is configured for an LI source entry, the default value is inserted.</p> <p>When a mirror service is configured with <b>ip-gre</b> routable encap under the header-type command, no session ID is inserted and none is specified against the LI source entries.</p>
Range	1 to 4294967295
Introduced	19.10.R1
Platforms	All

Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**port [port-id] string**

Synopsis	Enter the <b>port</b> list instance
Context	<a href="#">li</a> <a href="#">li-source</a> <a href="#">string</a> <a href="#">port</a> <a href="#">string</a>
Tree	<a href="#">port</a>
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[port-id] string**

Synopsis	Port ID
Context	<a href="#">li li-source string port string</a>
Tree	<a href="#">port</a>
Notes	This element is part of a list key.
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**egress boolean**

Synopsis	Perform lawful intercept on egress traffic
Context	<a href="#">li li-source string port string egress boolean</a>
Tree	<a href="#">egress</a>
Description	When configured to <b>true</b> , the router allows lawful intercept on egress traffic. This command configures packets that egress the SAP to be mirrored. Egress packets are mirrored to the mirror destination after egress packet modification.
Default	false
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ingress boolean**

Synopsis	Perform lawful intercept on ingress traffic
Context	<a href="#">li li-source string port string ingress boolean</a>
Tree	<a href="#">ingress</a>
Description	When configured to <b>true</b> , the router allows lawful intercept on ingress traffic. This command configures packets that ingress the SAP to be mirrored. Ingress packets are mirrored to the mirror destination before ingress packet modification.
Default	false
Introduced	20.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**sap [sap-id] string**

Synopsis	Enter the <b>sap</b> list instance
----------	------------------------------------

Context	<a href="#">li</a> <a href="#">li-source</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a>
Tree	<a href="#">sap</a>
Description	Commands in this context create a service access point (SAP) within an LI configuration. The specified SAP must define a FastE, GigE, or XGigE, or XGigE access port with a dot1q, null, or q-in-q encapsulation type.
Introduced	19.10.R1
Platforms	All

**[sap-id] string**

Synopsis	SAP ID
Context	<a href="#">li</a> <a href="#">li-source</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a>
Tree	<a href="#">sap</a>
Description	This command specifies the physical port identifier portion of the SAP definition.
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**egress boolean**

Synopsis	Perform lawful intercept on egress traffic
Context	<a href="#">li</a> <a href="#">li-source</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">egress</a> <a href="#">boolean</a>
Tree	<a href="#">egress</a>
Description	When configured to <b>true</b> , the router allows lawful intercept on egress traffic. This command configures packets that egress the SAP to be mirrored. Egress packets are mirrored to the mirror destination after egress packet modification.
Default	false
Introduced	19.10.R1
Platforms	All

**ingress boolean**

Synopsis	Perform lawful intercept on ingress traffic
Context	<a href="#">li</a> <a href="#">li-source</a> <a href="#">string</a> <a href="#">sap</a> <a href="#">string</a> <a href="#">ingress</a> <a href="#">boolean</a>
Tree	<a href="#">ingress</a>

Description	When configured to <b>true</b> , the router allows lawful intercept on ingress traffic. This command configures packets that ingress the SAP to be mirrored. Ingress packets are mirrored to the mirror destination before ingress packet modification.
Default	false
Introduced	19.10.R1
Platforms	All

### **intercept-id** *number*

Synopsis	Intercept ID of the traffic flow
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">sap</a> <i>string</i> <b>intercept-id</b> <i>number</i>
Tree	<a href="#">intercept-id</a>
Description	<p>This command configures the intercept ID that is inserted into the packet header for all mirrored packets of the associated LI source entry. This intercept ID can be used (for example by a downstream LI gateway) to identify the particular LI session to which the packet belongs.</p> <p>For LI source entries, when the <b>configure mirror mirror-dest encap layer-3-encap header-type</b> command is configured with <b>ip-udp-shim</b> routable encap, an intercept-id field (as part of the routable encap) is always present in the mirrored packets. If there is no intercept ID configured for an LI source entry, the default value is inserted.</p> <p>When the mirror service is configured with <b>ip-gre</b> routable encap under the <b>header-type</b> command, no intercept ID is inserted and none should be specified against the LI source entries.</p>
Range	1 to 1073741823
Introduced	19.10.R1
Platforms	All

### **session-id** *number*

Synopsis	Session ID of the traffic flow
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">sap</a> <i>string</i> <b>session-id</b> <i>number</i>
Tree	<a href="#">session-id</a>
Description	<p>This command configures the session ID that is inserted into the packet header for all mirrored packets of the associated LI source entry. This session ID can be used (for example by a downstream LI gateway) to identify the particular LI session to which the packet belongs.</p> <p>The session ID is only valid and used for mirror services that are configured with <b>ip-udp-shim</b> routable encap under the <b>configure mirror mirror-dest encap layer-3-encap header-type</b> command. For all types of LI source entries, when the mirror service is configured with <b>ip-udp-shim</b> routable encap, a session ID field (as part of the routable</p>

encap) is always present in the mirrored packets. If no session ID is configured for an LI source entry, the default value is inserted.

When a mirror service is configured with **ip-gre** routable encap under the header-type command, no session ID is inserted and none is specified against the LI source entries.

Range	1 to 4294967295
Introduced	19.10.R1
Platforms	All

### **subscriber** [**subscriber-id**] *string*

Synopsis	Enter the <b>subscriber</b> list instance
Context	<a href="#">li li-source</a> <i>string</i> <b>subscriber</b> <i>string</i>
Tree	<a href="#">subscriber</a>
Description	Commands in this context add hosts of a subscriber to a mirroring service.
Introduced	19.10.R1
Platforms	All

### **[subscriber-id]** *string*

Synopsis	Subscriber ID
Context	<a href="#">li li-source</a> <i>string</i> <b>subscriber</b> <i>string</i>
Tree	<a href="#">subscriber</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

### **egress** *boolean*

Synopsis	Perform lawful intercept on egress traffic
Context	<a href="#">li li-source</a> <i>string</i> <b>subscriber</b> <i>string</i> <b>egress</b> <i>boolean</i>
Tree	<a href="#">egress</a>
Description	When configured to <b>true</b> , the router allows lawful intercept on egress traffic. This command configures packets that egress the SAP to be mirrored. Egress packets are mirrored to the mirror destination after egress packet modification.
Default	false

Introduced	19.10.R1
Platforms	All

**fc keyword**

Synopsis	Forwarding classes to be mirrored
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">subscriber</a> <i>string</i> <b>fc</b> <i>keyword</i>
Tree	<a href="#">fc</a>
Description	This command specifies the name of the forwarding class with which to associate LI traffic. The forwarding class name must already be defined within the system.  If the FC name is not already defined, an error is returned and this command has no effect. If the FC name is defined, the forwarding class associated with the FC name overrides the default forwarding class.
Options	be, l2, af, l1, h2, ef, h1, nc
Max. Instances	8
Introduced	19.10.R1
Platforms	All

**host-type keyword**

Synopsis	Subscriber host type to be monitored
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">subscriber</a> <i>string</i> <b>host-type</b> <i>keyword</i>
Tree	<a href="#">host-type</a>
Description	This command specifies the host type for LI.
Options	ipoe, ppp
Introduced	19.10.R1
Platforms	All

**ingress boolean**

Synopsis	Perform lawful intercept on ingress traffic
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">subscriber</a> <i>string</i> <b>ingress</b> <i>boolean</i>
Tree	<a href="#">ingress</a>
Description	When configured to <b>true</b> , the router allows lawful intercept on ingress traffic. This command configures packets that ingress the SAP to be mirrored. Ingress packets are mirrored to the mirror destination before ingress packet modification.

Default	false
Introduced	19.10.R1
Platforms	All

### **intercept-id** *number*

Synopsis	Intercept ID of the traffic flow
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">subscriber</a> <i>string</i> <b>intercept-id</b> <i>number</i>
Tree	<a href="#">intercept-id</a>
Description	<p>This command configures the intercept ID that is inserted into the packet header for all mirrored packets of the associated LI source entry. This intercept ID can be used (for example by a downstream LI gateway) to identify the particular LI session to which the packet belongs.</p> <p>For LI source entries, when the <b>configure mirror mirror-dest encap layer-3-encap header-type</b> command is configured with <b>ip-udp-shim</b> routable encap, an intercept-id field (as part of the routable encap) is always present in the mirrored packets. If there is no intercept ID configured for an LI source entry, the default value is inserted.</p> <p>When the mirror service is configured with <b>ip-gre</b> routable encap under the <b>header-type</b> command, no intercept ID is inserted and none should be specified against the LI source entries.</p>
Range	1 to 1073741823
Introduced	19.10.R1
Platforms	All

### **ip-address** *string*

Synopsis	IP address of the subscriber
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">subscriber</a> <i>string</i> <b>ip-address</b> <i>string</i>
Tree	<a href="#">ip-address</a>
Description	This command specifies the service IP address (system IP address) of the remote device sending LI traffic. If 0.0.0.0 is specified, any remote router is allowed to send to this service.
Notes	The following elements are part of a choice: ( <b>ip-address</b> , <b>mac-address</b> , and <b>sap-id</b> ) or <b>sla-profile</b> .
Introduced	19.10.R1
Platforms	All

**ip-family** *keyword*

Synopsis	IP family for LI
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">subscriber</a> <i>string</i> <b>ip-family</b> <i>keyword</i>
Tree	<a href="#">ip-family</a>
Description	This command specifies the IP family for LI.
Options	ipv4, ipv6
Introduced	19.10.R1
Platforms	All

**mac-address** *string*

Synopsis	The source MAC address
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">subscriber</a> <i>string</i> <b>mac-address</b> <i>string</i>
Tree	<a href="#">mac-address</a>
Description	This command specifies a MAC address when defining a static host. Multiple static hosts may be configured with the same MAC address because each definition is distinguished by a unique IP address.
Notes	The following elements are part of a choice: ( <b>ip-address</b> , <b>mac-address</b> , and <b>sap-id</b> ) or <b>sla-profile</b> .
Introduced	19.10.R1
Platforms	All

**sap-id** *string*

Synopsis	SAP ID
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">subscriber</a> <i>string</i> <b>sap-id</b> <i>string</i>
Tree	<a href="#">sap-id</a>
String Length	1 to 45
Notes	The following elements are part of a choice: ( <b>ip-address</b> , <b>mac-address</b> , and <b>sap-id</b> ) or <b>sla-profile</b> .
Introduced	19.10.R1
Platforms	All

**session-id** *number*

Synopsis	Session ID of the traffic flow
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">subscriber</a> <i>string</i> <a href="#">session-id</a> <i>number</i>
Tree	<a href="#">session-id</a>
Description	<p>This command configures the session ID that is inserted into the packet header for all mirrored packets of the associated LI source entry. This session ID can be used (for example by a downstream LI gateway) to identify the particular LI session to which the packet belongs.</p> <p>The session ID is only valid and used for mirror services that are configured with <b>ip-udp-shim</b> routable encap under the <b>configure mirror mirror-dest encap layer-3-encap header-type</b> command. For all types of LI source entries, when the mirror service is configured with <b>ip-udp-shim</b> routable encap, a session ID field (as part of the routable encap) is always present in the mirrored packets. If no session ID is configured for an LI source entry, the default value is inserted.</p> <p>When a mirror service is configured with <b>ip-gre</b> routable encap under the header-type command, no session ID is inserted and none is specified against the LI source entries.</p>
Range	1 to 4294967295
Introduced	19.10.R1
Platforms	All

**sla-profile** *string*

Synopsis	SLA profile
Context	<a href="#">li</a> <a href="#">li-source</a> <i>string</i> <a href="#">subscriber</a> <i>string</i> <a href="#">sla-profile</a> <i>string</i>
Tree	<a href="#">sla-profile</a>
Description	<p>This command specifies an SLA profile name.</p> <p>Each host of a subscriber can use a different SLA profile. This option allows interception of only the hosts using the specified SLA profile. In some deployments, SLA profiles are assigned per type of traffic. There can be, for example, a specific SLA profile for voice traffic (which could be used for all SIP hosts).</p>
String Length	1 to 32
Notes	The following elements are part of a choice: ( <b>ip-address</b> , <b>mac-address</b> , and <b>sap-id</b> ) or <b>sla-profile</b> .
Introduced	19.10.R1
Platforms	All

**wlan-gw-dsm-ue** [[mac](#)] *string*

Synopsis	Enter the <b>wlan-gw-dsm-ue</b> list instance
----------	---

Context	<a href="#">li li-source string wlan-gw-dsm-ue string</a>
Tree	<a href="#">wlan-gw-dsm-ue</a>
Introduced	19.10.R1
Platforms	All

**[mac] string**

Synopsis	MAC address of the DSM UE
Context	<a href="#">li li-source string wlan-gw-dsm-ue string</a>
Tree	<a href="#">wlan-gw-dsm-ue</a>
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**intercept-id number**

Synopsis	Intercept identifier
Context	<a href="#">li li-source string wlan-gw-dsm-ue string intercept-id number</a>
Tree	<a href="#">intercept-id</a>
Range	1 to 4294967295
Introduced	19.10.R1
Platforms	All

**session-id number**

Synopsis	Session identifier
Context	<a href="#">li li-source string wlan-gw-dsm-ue string session-id number</a>
Tree	<a href="#">session-id</a>
Range	1 to 4294967295
Introduced	19.10.R1
Platforms	All

**log**

Synopsis	Enter the <b>log</b> context
----------	------------------------------

Context	<a href="#">li log</a>
Tree	<a href="#">log</a>
Introduced	19.10.R1
Platforms	All

### **log-id** [[name](#)] *string*

Synopsis	Enter the <b>log-id</b> list instance
Context	<a href="#">li log log-id</a> <i>string</i>
Tree	<a href="#">log-id</a>
Max. Instances	30
Introduced	19.10.R1
Platforms	All

### **[name]** *string*

Synopsis	Log ID
Context	<a href="#">li log log-id</a> <i>string</i>
Tree	<a href="#">log-id</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	21.2.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	The administrative state of the log
Context	<a href="#">li log log-id</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	19.10.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<a href="#">li log log-id string description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	19.10.R1
Platforms	All

**destination**

Synopsis	Enter the <b>destination</b> context
Context	<a href="#">li log log-id string destination</a>
Tree	<a href="#">destination</a>
Description	Commands in this context specify where log event data is to be sent.
Introduced	19.10.R1
Platforms	All

**memory**

Synopsis	Enable the <b>memory</b> context
Context	<a href="#">li log log-id string destination memory</a>
Tree	<a href="#">memory</a>
Description	Commands in this context configure log events directed to a memory file. A memory file is a circular buffer. When the file is full, each new entry replaces the oldest entry in the log.
Notes	The following elements are part of a choice: <b>memory</b> , <b>netconf</b> , or <b>snmp</b> .
Introduced	19.10.R1
Platforms	All

**max-entries** *number***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Number of events stored in this memory log
----------	--

Context	<a href="#">li log log-id string destination memory max-entries number</a>
Tree	<a href="#">max-entries</a>
Range	50 to 1024
Default	100
Introduced	19.10.R1
Platforms	All

## netconf

Synopsis	Enable the <b>netconf</b> context
Context	<a href="#">li log log-id string destination netconf</a>
Tree	<a href="#">netconf</a>
Description	Commands in this context configure log events directed to a NETCONF session as notifications. A NETCONF client can subscribe to a NETCONF log using the configured <b>netconf-stream</b> for the log in a subscription request. One or more NETCONF sessions can subscribe to a NETCONF log or stream.
Notes	The following elements are part of a choice: <b>memory</b> , <b>netconf</b> , or <b>snmp</b> .
Introduced	20.2.R1
Platforms	All

## max-entries *number*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Maximum number of events stored in the NETCONF log
Context	<a href="#">li log log-id string destination netconf max-entries number</a>
Tree	<a href="#">max-entries</a>
Description	This command configures the maximum number of events stored in the NETCONF log. If this setting needs to be modified, the log ID must be removed and re-created.
Range	50 to 1024
Default	100
Introduced	20.2.R1
Platforms	All

## snmp

Synopsis	Enable the <b>snmp</b> context
Context	<a href="#">li log log-id string destination snmp</a>
Tree	<a href="#">snmp</a>
Description	Commands in this context configure log events directed to the <b>snmp-trap-group</b> associated with the log ID. A local circular memory log is maintained for SNMP logs.
Notes	The following elements are part of a choice: <b>memory</b> , <b>netconf</b> , or <b>snmp</b> .
Introduced	19.10.R1
Platforms	All

## max-entries *number*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Number of events stored in this snmp log
Context	<a href="#">li log log-id string destination snmp max-entries number</a>
Tree	<a href="#">max-entries</a>
Range	50 to 1024
Default	100
Introduced	19.10.R1
Platforms	All

## send-using-vprn *string*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	VPRN to use to send SNMP notifications
Context	<a href="#">li log log-id string destination snmp send-using-vprn string</a>
Tree	<a href="#">send-using-vprn</a>
Description	This command configures lawful intercept (LI) SNMP notifications to transmit in a VPRN. This configuration is useful when doing management of LI via a VPRN.  The specified VPRN service must exist. After an LI log is configured using this command, the VPRN service cannot be deleted without removing the LI log ID.

When this command is configured, an LI log ID uses the snmp-trap-group configured for the VPRN.

When unconfigured, the outgoing routing instance of LI SNMP notifications is determined by the **configure log route-preference** command, and the LI log ID uses the snmp-trap-group configured in the main system log configuration.

String Length 1 to 64  
 Introduced 23.10.R1  
 Platforms All

### **filter string**

Synopsis Event filter ID to associate with log ID configuration  
 Context [li log log-id string filter string](#)  
 Tree [filter](#)  
 String Length 1 to 64  
 Introduced 19.10.R1  
 Platforms All

### **netconf-stream string**

Synopsis Destination NETCONF stream name  
 Context [li log log-id string netconf-stream string](#)  
 Tree [netconf-stream](#)  
 String Length 1 to 32  
 Introduced 20.2.R1  
 Platforms All

### **source**

Synopsis Enter the **source** context  
 Context [li log log-id string source](#)  
 Tree [source](#)  
 Introduced 19.10.R1  
 Platforms All

## **li *boolean***

Synopsis	Event stream for events configured for LI activities
Context	<a href="#">li log log-id string source li boolean</a>
Tree	<a href="#">li</a>
Default	false
Introduced	19.10.R1
Platforms	All

## **time-format *keyword***

Synopsis	Time zone to display date and time
Context	<a href="#">li log log-id string time-format keyword</a>
Tree	<a href="#">time-format</a>
Options	utc, local
Default	utc
Introduced	19.10.R1
Platforms	All

## **mirror-dest-reservation**

Synopsis	Enter the <b>mirror-dest-reservation</b> context
Context	<a href="#">li mirror-dest-reservation</a>
Tree	<a href="#">mirror-dest-reservation</a>
Description	Commands in this context configure the attributes to reserve mirror destination resources.
Introduced	19.10.R1
Platforms	All

## **end *number***

Synopsis	Upper bound of the mirror destination ID
Context	<a href="#">li mirror-dest-reservation end number</a>
Tree	<a href="#">end</a>
Range	1 to 2147483647
Introduced	19.10.R1

**type** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Encapsulation type supported by the mirror service
Context	<a href="#">li mirror-dest-template</a> <i>string type keyword</i>
Tree	<a href="#">type</a>
Options	ether, ip-only
Default	ether
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**nat**

Synopsis	Enter the <b>nat</b> context
Context	<a href="#">li nat</a>
Tree	<a href="#">nat</a>
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**use-outside-ip-address** *boolean*

Synopsis	Report outside IP address for L2-Aware NAT subscribers
Context	<a href="#">li nat use-outside-ip-address</a> <i>boolean</i>
Tree	<a href="#">use-outside-ip-address</a>
Default	false
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**radius**

Synopsis	Enter the <b>radius</b> context
Context	<a href="#">li radius</a>
Tree	<a href="#">radius</a>

Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **mirror-dest-template** *reference*

Synopsis	RADIUS triggered mirror destination template
Context	<a href="#">li radius mirror-dest-template</a> <i>reference</i>
Tree	<a href="#">mirror-dest-template</a>
Reference	<a href="#">li mirror-dest-template</a> <i>string</i>
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **sci**

Synopsis	Enter the <b>sci</b> context
Context	<a href="#">li sci</a>
Tree	<a href="#">sci</a>
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **pfcp-li-shared-key** *string*

Synopsis	Key used to encrypt and decrypt exchanged LI PFCP IEs
Context	<a href="#">li sci pfcp-li-shared-key</a> <i>string</i>
Tree	<a href="#">pfcp-li-shared-key</a>
Description	This command configures the shared secret key that the SR OS uses in its role as a user plane (UP) to the MAG-c. The UP uses the shared secret key to encrypt and decrypt the LI PFCP IEs it exchanges with the MAG-c. The SR OS UP and the MAG-c must use matching secret keys. The system only accepts a secret key configured as a printable string.
String Length	1 to 199
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## x-interfaces

Synopsis	Enter the <b>x-interfaces</b> context
Context	<a href="#">li x-interfaces</a>
Tree	<a href="#">x-interfaces</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## admin-state *keyword*

Synopsis	Administrative state of the x-interfaces
Context	<a href="#">li x-interfaces admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## correlation-id

Synopsis	Enter the <b>correlation-id</b> context
Context	<a href="#">li x-interfaces correlation-id</a>
Tree	<a href="#">correlation-id</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## ipoe *keyword*

Synopsis	RADIUS accounting ID type for subscriber correlation
Context	<a href="#">li x-interfaces correlation-id ipoe keyword</a>
Tree	<a href="#">ipoe</a>
Options	radius-host-acct-id, radius-queue-acct-id, radius-session-acct-id
Default	radius-host-acct-id
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

**pppoe keyword**

Synopsis	RADIUS accounting ID type for subscriber correlation
Context	<a href="#">li x-interfaces correlation-id pppoe keyword</a>
Tree	<a href="#">pppoe</a>
Options	radius-host-acct-id, radius-queue-acct-id, radius-session-acct-id
Default	radius-host-acct-id
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

**ine-identifier string**

Synopsis	Intercepting Network Element (INE) ID
Context	<a href="#">li x-interfaces ine-identifier string</a>
Tree	<a href="#">ine-identifier</a>
String Length	1 to 32
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

**lic [name] string**

Synopsis	Enter the <b>lic</b> list instance
Context	<a href="#">li x-interfaces lic string</a>
Tree	<a href="#">lic</a>
Max. Instances	18
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

**[name] string**

Synopsis	LIC name
Context	<a href="#">li x-interfaces lic string</a>
Tree	<a href="#">lic</a>
String Length	1 to 32

Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## authentication

Synopsis	Enter the <b>authentication</b> context
Context	<a href="#">li x-interfaces lic string authentication</a>
Tree	<a href="#">authentication</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## password *string*

Synopsis	Password for the X1 and X2 interfaces
Context	<a href="#">li x-interfaces lic string authentication password string</a>
Tree	<a href="#">password</a>
String Length	1 to 50
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## private-ki *string*

Synopsis	Private Ki string for the X1 and X2 interfaces
Context	<a href="#">li x-interfaces lic string authentication private-ki string</a>
Tree	<a href="#">private-ki</a>
String Length	1 to 50
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## sequence-group *string*

Synopsis	Sequence group for the X1 and X2 interfaces
Context	<a href="#">li x-interfaces lic string authentication sequence-group string</a>
Tree	<a href="#">sequence-group</a>

String Length 1 to 42  
Introduced 21.5.R1  
Platforms 7750 SR-1, 7750 SR-7/12/12e

### **description** *string*

Synopsis Text description  
Context [li x-interfaces lic string description string](#)  
Tree [description](#)  
String Length 1 to 80  
Introduced 21.5.R1  
Platforms 7750 SR-1, 7750 SR-7/12/12e

### **identifier** *string*

Synopsis LIC ID  
Context [li x-interfaces lic string identifier string](#)  
Tree [identifier](#)  
String Length 1 to 32  
Introduced 21.5.R1  
Platforms 7750 SR-1, 7750 SR-7/12/12e

### **ipv4**

Synopsis Enter the **ipv4** context  
Context [li x-interfaces lic string ipv4](#)  
Tree [ipv4](#)  
Introduced 21.5.R1  
Platforms 7750 SR-1, 7750 SR-7/12/12e

### **ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address of the LIC  
Context [li x-interfaces lic string ipv4 ip-address \(ipv4-address-no-zone | ipv6-address-no-zone\)](#)  
Tree [ip-address](#)

Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **port number**

Synopsis	TCP port associated with the LIC
Context	<a href="#">li x-interfaces lic string port number</a>
Tree	<a href="#">port</a>
Range	0 to 65535
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **router-instance string**

Synopsis	Virtual router instance used by the X-interfaces
Context	<a href="#">li x-interfaces lic string router-instance string</a>
Tree	<a href="#">router-instance</a>
String Length	0 to 64
Default	
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **user-db string**

Synopsis	Location of the data-trigger host for the LIC
Context	<a href="#">li x-interfaces user-db string</a>
Tree	<a href="#">user-db</a>
String Length	1 to 32
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **x1**

Synopsis	Enter the <b>x1</b> context
Context	<a href="#">li x-interfaces x1</a>

Tree	<a href="#">x1</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<a href="#">li x-interfaces x1 ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## local-address (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	X1 interface IP address
Context	<a href="#">li x-interfaces x1 ipv4 local-address</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">local-address</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## lic-peer *reference*

Synopsis	Peer LIC for the X1 interface
Context	<a href="#">li x-interfaces x1 lic-peer <i>reference</i></a>
Tree	<a href="#">lic-peer</a>
Reference	<a href="#">li x-interfaces lic <i>string</i></a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## local-tcp-port *number*

Synopsis	Local TCP port used for the X1 interface
Context	<a href="#">li x-interfaces x1 local-tcp-port <i>number</i></a>
Tree	<a href="#">local-tcp-port</a>
Range	1 to 65535

Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## timeouts

Synopsis	Enter the <b>timeouts</b> context
Context	<a href="#">li x-interfaces x1 timeouts</a>
Tree	<a href="#">timeouts</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## message-timeout *number*

Synopsis	Maximum time for the LIC to reply to an X1 message
Context	<a href="#">li x-interfaces x1 timeouts message-timeout <i>number</i></a>
Tree	<a href="#">message-timeout</a>
Range	180 to 300
Units	seconds
Default	180
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## x2

Synopsis	Enter the <b>x2</b> context
Context	<a href="#">li x-interfaces x2</a>
Tree	<a href="#">x2</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

## ipv4

Synopsis	Enter the <b>ipv4</b> context
Context	<a href="#">li x-interfaces x2 ipv4</a>
Tree	<a href="#">ipv4</a>

Introduced 21.5.R1  
 Platforms 7750 SR-1, 7750 SR-7/12/12e

### **local-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis X2 interface IP address  
 Context [li x-interfaces x2 ipv4 local-address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)  
 Tree [local-address](#)  
 Introduced 21.5.R1  
 Platforms 7750 SR-1, 7750 SR-7/12/12e

### **lic-peer** *reference*

Synopsis Peer LIC for the X2 interface  
 Context [li x-interfaces x2 lic-peer reference](#)  
 Tree [lic-peer](#)  
 Reference [li x-interfaces lic string](#)  
 Introduced 21.5.R1  
 Platforms 7750 SR-1, 7750 SR-7/12/12e

### **timeouts**

Synopsis Enter the **timeouts** context  
 Context [li x-interfaces x2 timeouts](#)  
 Tree [timeouts](#)  
 Introduced 21.5.R1  
 Platforms 7750 SR-1, 7750 SR-7/12/12e

### **keep-alive** *number*

Synopsis Keep-alive timeout  
 Context [li x-interfaces x2 timeouts keep-alive number](#)  
 Tree [keep-alive](#)  
 Range 300 to 600  
 Units seconds

---

Default	300
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **request number**

Synopsis	Tx2-normal timeout
Context	<a href="#">li x-interfaces x2 timeouts request number</a>
Tree	<a href="#">request</a>
Range	5 to 30
Units	seconds
Default	5
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **x3**

Synopsis	Enter the <b>x3</b> context
Context	<a href="#">li x-interfaces x3</a>
Tree	<a href="#">x3</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **alarms**

Synopsis	Enter the <b>alarms</b> context
Context	<a href="#">li x-interfaces x3 alarms</a>
Tree	<a href="#">alarms</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **cpu-alarm**

Synopsis	Enter the <b>cpu-alarm</b> context
Context	<a href="#">li x-interfaces x3 alarms cpu-alarm</a>

---

Tree	<a href="#">cpu-alarm</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **high-threshold** *number*

Synopsis	High threshold value of the CPU usage alarm
Context	<a href="#">li x-interfaces x3 alarms cpu-alarm high-threshold</a> <i>number</i>
Tree	<a href="#">high-threshold</a>
Range	1 to 100
Units	percent
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **low-threshold** *number*

Synopsis	Low threshold value of the CPU usage alarm
Context	<a href="#">li x-interfaces x3 alarms cpu-alarm low-threshold</a> <i>number</i>
Tree	<a href="#">low-threshold</a>
Range	0 to 99
Units	percent
Default	0
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **memory-alarm**

Synopsis	Enter the <b>memory-alarm</b> context
Context	<a href="#">li x-interfaces x3 alarms memory-alarm</a>
Tree	<a href="#">memory-alarm</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### high-threshold *number*

Synopsis	High threshold of the packet buffer memory usage alarm
Context	<a href="#">li x-interfaces x3 alarms memory-alarm high-threshold <i>number</i></a>
Tree	<a href="#">high-threshold</a>
Range	1 to 100
Units	percent
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### low-threshold *number*

Synopsis	Low threshold of the packet buffer memory usage alarm
Context	<a href="#">li x-interfaces x3 alarms memory-alarm low-threshold <i>number</i></a>
Tree	<a href="#">low-threshold</a>
Range	0 to 99
Units	percent
Default	0
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### throughput-alarm

Synopsis	Enter the <b>throughput-alarm</b> context
Context	<a href="#">li x-interfaces x3 alarms throughput-alarm</a>
Tree	<a href="#">throughput-alarm</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### high-threshold *number*

Synopsis	High threshold value of the throughput alarm
Context	<a href="#">li x-interfaces x3 alarms throughput-alarm high-threshold <i>number</i></a>
Tree	<a href="#">high-threshold</a>
Range	1 to 4294967295
Units	megabps

Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **low-threshold** *number*

Synopsis	Low threshold value of the throughput alarm
Context	<a href="#">li x-interfaces x3 alarms throughput-alarm low-threshold</a> <i>number</i>
Tree	<a href="#">low-threshold</a>
Range	1 to 4294967295
Units	megabps
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **ipv4**

Synopsis	Enter the <b>ipv4</b> context
Context	<a href="#">li x-interfaces x3 ipv4</a>
Tree	<a href="#">ipv4</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **local-address-range**

Synopsis	Enter the <b>local-address-range</b> context
Context	<a href="#">li x-interfaces x3 ipv4 local-address-range</a>
Tree	<a href="#">local-address-range</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **end** *string*

Synopsis	Upper bound of the range
Context	<a href="#">li x-interfaces x3 ipv4 local-address-range end</a> <i>string</i>
Tree	<a href="#">end</a>
Introduced	21.5.R1

Platforms 7750 SR-1, 7750 SR-7/12/12e

### **start string**

Synopsis Lower bound of the range  
 Context [li x-interfaces x3 ipv4 local-address-range start string](#)  
 Tree [start](#)  
 Introduced 21.5.R1  
 Platforms 7750 SR-1, 7750 SR-7/12/12e

### **li-group number**

Synopsis ISA group of the X3 interface  
 Context [li x-interfaces x3 li-group number](#)  
 Tree [li-group](#)  
 Range 1 to 4  
 Introduced 21.5.R1  
 Platforms 7750 SR-1, 7750 SR-7/12/12e

### **lic-peers [name] reference**

Synopsis Add a list entry for **lic-peers**  
 Context [li x-interfaces x3 lic-peers reference](#)  
 Tree [lic-peers](#)  
 Max. 16  
 Instances  
 Introduced 21.5.R1  
 Platforms 7750 SR-1, 7750 SR-7/12/12e

### **[name] reference**

Synopsis Peer LIC for the X3 interface  
 Context [li x-interfaces x3 lic-peers reference](#)  
 Tree [lic-peers](#)  
 Reference [li x-interfaces lic string](#)

---

Notes	This element is part of a list key.
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **session-limit** *number*

Synopsis	Maximum number of X3 sessions initiated to the LIC
Context	<a href="#">li x-interfaces x3 session-limit</a> <i>number</i>
Tree	<a href="#">session-limit</a>
Range	1 to 32
Default	32
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **timeouts**

Synopsis	Enter the <b>timeouts</b> context
Context	<a href="#">li x-interfaces x3 timeouts</a>
Tree	<a href="#">timeouts</a>
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### **keep-alive** *number*

Synopsis	Keep-alive timeout
Context	<a href="#">li x-interfaces x3 timeouts keep-alive</a> <i>number</i>
Tree	<a href="#">keep-alive</a>
Range	300 to 600
Units	seconds
Default	300
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

**request *number***

Synopsis	Tx3-normal timeout
Context	<a href="#">li x-interfaces x3 timeouts request <i>number</i></a>
Tree	<a href="#">request</a>
Range	5 to 30
Units	seconds
Default	5
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

**target-retry-wait *number***

Synopsis	Retry interval for target tunnel setup
Context	<a href="#">li x-interfaces x3 timeouts target-retry-wait <i>number</i></a>
Tree	<a href="#">target-retry-wait</a>
Range	300 to 1200
Units	seconds
Default	300
Introduced	21.5.R1
Platforms	7750 SR-1, 7750 SR-7/12/12e

### 3.24.1 log command descriptions

#### log

Synopsis	Enter the <b>log</b> context
Context	<b>configure log</b>
Tree	<a href="#">log</a>
Introduced	16.0.R1
Platforms	All

#### accounting-policy [[policy-id](#)] *number*

Synopsis	Enter the <b>accounting-policy</b> list instance
Context	<b>configure log accounting-policy</b> <i>number</i>
Tree	<a href="#">accounting-policy</a>
Introduced	16.0.R1
Platforms	All

#### [\[policy-id\]](#) *number*

Synopsis	Accounting policy unique ID
Context	<b>configure log accounting-policy</b> <i>number</i>
Tree	<a href="#">accounting-policy</a>
Range	1 to 99
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

#### admin-state *keyword*

Synopsis	Administrative state of the accounting policy
Context	<b>configure log accounting-policy</b> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Description	This command controls the administrative state of the accounting policy.

When an accounting policy is disabled, no accounting data is written to the destination log ID. Counters in the billing data reflect totals, and not increments. When the policy is re-enabled, the counters include the data collected during the period the policy was administratively disabled.

Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **align** *boolean*

Synopsis	Align statistics collection interval to absolute time
Context	<b>configure</b> <b>log accounting-policy</b> <i>number</i> <b>align</b> <i>boolean</i>
Tree	<a href="#">align</a>
Description	<p>When the <b>align</b> command is configured to <b>true</b>, statistics collection is aligned to the nearest interval within an hour. Statistics are generated when the absolute time can be divided by the collection-interval value, after which the collection interval continues. For example, if the interval is set to 15 minutes and the current time is 15:03, the statistics are collected at 15:15, 15:30, 15:45, 16:00, 16:15, and so on. This supports synchronized statistics intervals and collection across multiple nodes in the network.</p> <p>When the <b>align</b> command is configured to <b>false</b>, statistics collection occurs immediately after the configuration has been committed. For example, if the interval is set to 15 minutes and the current time is 15:03, the statistics are collected at 15:03, 15:18, 15:33, 15:48, 16:03, and so on.</p>
Default	false
Introduced	19.10.R1
Platforms	All

### **collection-interval** *number*

Synopsis	Accounting collection interval
Context	<b>configure</b> <b>log accounting-policy</b> <i>number</i> <b>collection-interval</b> <i>number</i>
Tree	<a href="#">collection-interval</a>
Range	1 to 120
Units	minutes
Introduced	16.0.R1
Platforms	All

## custom-record

Synopsis	Enter the <b>custom-record</b> context
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a>
Tree	<a href="#">custom-record</a>
Introduced	16.0.R1
Platforms	All

## aa-specific

Synopsis	Enter the <b>aa-specific</b> context
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a>
Tree	<a href="#">aa-specific</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## aa-sub-attributes

Synopsis	Enter the <b>aa-sub-attributes</b> context
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">aa-sub-attributes</a>
Tree	<a href="#">aa-sub-attributes</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

## app-profile *boolean*

Synopsis	Include application profile to be exported
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">aa-sub-attributes</a> <a href="#">app-profile</a> <i>boolean</i>
Tree	<a href="#">app-profile</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **app-service-options** *boolean*

Synopsis	Include application service options
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <a href="#">number</a> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">aa-sub-attributes</a> <a href="#">app-service-options</a> <i>boolean</i>
Tree	<a href="#">app-service-options</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **aa-sub-counters**

Synopsis	Enter the <b>aa-sub-counters</b> context
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <a href="#">number</a> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">aa-sub-counters</a>
Tree	<a href="#">aa-sub-counters</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **long-duration-flow-count** *boolean*

Synopsis	Include the long duration flow count
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <a href="#">number</a> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">aa-sub-counters</a> <a href="#">long-duration-flow-count</a> <i>boolean</i>
Tree	<a href="#">long-duration-flow-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **medium-duration-flow-count** *boolean*

Synopsis	Include the medium duration flow
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <a href="#">number</a> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">aa-sub-counters</a> <a href="#">medium-duration-flow-count</a> <i>boolean</i>
Tree	<a href="#">medium-duration-flow-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**short-duration-flow-count** *boolean*

Synopsis	Include the short duration flow count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">aa-sub-counters</a> <a href="#">short-duration-flow-count</a> <i>boolean</i>
Tree	<a href="#">short-duration-flow-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**total-flow-duration** *boolean*

Synopsis	Include the total flow duration count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">aa-sub-counters</a> <a href="#">total-flow-duration</a> <i>boolean</i>
Tree	<a href="#">total-flow-duration</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**total-flows-completed-count** *boolean*

Synopsis	Include the total of completed flows count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">aa-sub-counters</a> <a href="#">total-flows-completed-count</a> <i>boolean</i>
Tree	<a href="#">total-flows-completed-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**from-aa-sub-counters**

Synopsis	Enter the <b>from-aa-sub-counters</b> context
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">from-aa-sub-counters</a>
Tree	<a href="#">from-aa-sub-counters</a>

Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **flows-active-count** *boolean*

Synopsis Include the active flows  
Context **configure** [log accounting-policy](#) *number* [custom-record](#) [aa-specific](#) [from-aa-sub-counters](#) [flows-active-count](#) *boolean*  
Tree [flows-active-count](#)  
Default false  
Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **flows-admitted-count** *boolean*

Synopsis Include the admitted flows  
Context **configure** [log accounting-policy](#) *number* [custom-record](#) [aa-specific](#) [from-aa-sub-counters](#) [flows-admitted-count](#) *boolean*  
Tree [flows-admitted-count](#)  
Default false  
Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **flows-denied-count** *boolean*

Synopsis Include the denied flows  
Context **configure** [log accounting-policy](#) *number* [custom-record](#) [aa-specific](#) [from-aa-sub-counters](#) [flows-denied-count](#) *boolean*  
Tree [flows-denied-count](#)  
Default false  
Introduced 21.10.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **forwarding-class** *boolean*

Synopsis Include forwarding class

---

Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">from-aa-sub-counters</a> <a href="#">forwarding-class</a> <i>boolean</i>
Tree	<a href="#">forwarding-class</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max-throughput-octet-count** *boolean*

Synopsis	Include maximum throughput as measured in octet count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">from-aa-sub-counters</a> <a href="#">max-throughput-octet-count</a> <i>boolean</i>
Tree	<a href="#">max-throughput-octet-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max-throughput-packet-count** *boolean*

Synopsis	Include maximum throughput as measured in packet count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">from-aa-sub-counters</a> <a href="#">max-throughput-packet-count</a> <i>boolean</i>
Tree	<a href="#">max-throughput-packet-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max-throughput-timestamp** *boolean*

Synopsis	Include timestamp of the maximum throughput
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">from-aa-sub-counters</a> <a href="#">max-throughput-timestamp</a> <i>boolean</i>
Tree	<a href="#">max-throughput-timestamp</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**octets-admitted-count** *boolean*

Synopsis	Include the admitted octets count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">from-aa-sub-counters</a> <a href="#">octets-admitted-count</a> <i>boolean</i>
Tree	<a href="#">octets-admitted-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**octets-denied-count** *boolean*

Synopsis	Include the denied octets count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">from-aa-sub-counters</a> <a href="#">octets-denied-count</a> <i>boolean</i>
Tree	<a href="#">octets-denied-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**packets-admitted-count** *boolean*

Synopsis	Include the admitted packets count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">from-aa-sub-counters</a> <a href="#">packets-admitted-count</a> <i>boolean</i>
Tree	<a href="#">packets-admitted-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**packets-denied-count** *boolean*

Synopsis	Include the denied packets count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">from-aa-sub-counters</a> <a href="#">packets-denied-count</a> <i>boolean</i>
Tree	<a href="#">packets-denied-count</a>

---

Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **to-aa-sub-counters**

Synopsis	Enter the <b>to-aa-sub-counters</b> context
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a>
Tree	<a href="#">to-aa-sub-counters</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **flows-active-count** *boolean*

Synopsis	Include the active flows
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a> <a href="#">flows-active-count</a> <i>boolean</i>
Tree	<a href="#">flows-active-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **flows-admitted-count** *boolean*

Synopsis	Include the admitted flows
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a> <a href="#">flows-admitted-count</a> <i>boolean</i>
Tree	<a href="#">flows-admitted-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **flows-denied-count** *boolean*

Synopsis	Include the denied flows
----------	--------------------------

---

Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a> <a href="#">flows-denied-count</a> <i>boolean</i>
Tree	<a href="#">flows-denied-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **forwarding-class** *boolean*

Synopsis	Include forwarding class
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a> <a href="#">forwarding-class</a> <i>boolean</i>
Tree	<a href="#">forwarding-class</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max-throughput-octet-count** *boolean*

Synopsis	Include maximum throughput as measured in octet count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a> <a href="#">max-throughput-octet-count</a> <i>boolean</i>
Tree	<a href="#">max-throughput-octet-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **max-throughput-packet-count** *boolean*

Synopsis	Include maximum throughput as measured in packet count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a> <a href="#">max-throughput-packet-count</a> <i>boolean</i>
Tree	<a href="#">max-throughput-packet-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**max-throughput-timestamp** *boolean*

Synopsis	Include timestamp of the maximum throughput
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a> <a href="#">max-throughput-timestamp</a> <i>boolean</i>
Tree	<a href="#">max-throughput-timestamp</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**octets-admitted-count** *boolean*

Synopsis	Include the admitted octets count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a> <a href="#">octets-admitted-count</a> <i>boolean</i>
Tree	<a href="#">octets-admitted-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**octets-denied-count** *boolean*

Synopsis	Include the denied octets count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a> <a href="#">octets-denied-count</a> <i>boolean</i>
Tree	<a href="#">octets-denied-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**packets-admitted-count** *boolean*

Synopsis	Include the admitted packets count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">aa-specific</a> <a href="#">to-aa-sub-counters</a> <a href="#">packets-admitted-count</a> <i>boolean</i>
Tree	<a href="#">packets-admitted-count</a>

Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **packets-denied-count** *boolean*

Synopsis	Include the denied packets count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record aa-specific to-aa-sub-counters</a> <a href="#">packets-denied-count</a> <i>boolean</i>
Tree	<a href="#">packets-denied-count</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **policer** [*id*] *number*

Synopsis	Enter the <b>policer</b> list instance
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record policer</a> <i>number</i>
Tree	<a href="#">policer</a>
Introduced	19.10.R1
Platforms	All

### **[id]** *number*

Synopsis	Policer ID
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record policer</a> <i>number</i>
Tree	<a href="#">policer</a>
Range	1 to 63
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

### **e-counters**

Synopsis	Enter the <b>e-counters</b> context
----------	-------------------------------------

---

Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">policer</a> <i>number</i> <a href="#">e-counters</a>
Tree	<a href="#">e-counters</a>
Introduced	19.10.R1
Platforms	All

### **exceed-profile-octets-discarded-count** *boolean*

Synopsis	Include the exceed profile octets discarded count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">policer</a> <i>number</i> <a href="#">e-counters</a> <a href="#">exceed-profile-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">exceed-profile-octets-discarded-count</a>
Default	false
Introduced	19.10.R1
Platforms	All

### **exceed-profile-octets-forwarded-count** *boolean*

Synopsis	Include the exceed profile octets forwarded count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">policer</a> <i>number</i> <a href="#">e-counters</a> <a href="#">exceed-profile-octets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">exceed-profile-octets-forwarded-count</a>
Default	false
Introduced	19.10.R1
Platforms	All

### **exceed-profile-octets-offered-count** *boolean*

Synopsis	Include the exceed profile octets offered count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">policer</a> <i>number</i> <a href="#">e-counters</a> <a href="#">exceed-profile-octets-offered-count</a> <i>boolean</i>

## **high-octets-discarded-count** *boolean*

Synopsis	Include the high octets discarded count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">high-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">high-octets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	All

**high-octets-offered-count** *boolean*

Synopsis	Include the high octets offered count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">high-octets-offered-count</a> <i>boolean</i>
Tree	<a href="#">high-octets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	All

**high-packets-discarded-count** *boolean*

Synopsis	Include the high packets discarded count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">high-packets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">high-packets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	All

**high-packets-offered-count** *boolean*

Synopsis	Include the high packets offered count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">high-packets-offered-count</a> <i>boolean</i>
Tree	<a href="#">high-packets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	All

**in-profile-octets-forwarded-count** *boolean*

Synopsis	Include the in-profile octets forwarded count
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">in-profile-octets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-octets-forwarded-count</a>

---

Default	false
Introduced	16.0.R1
Platforms	All

### **in-profile-packets-forwarded-count** *boolean*

Synopsis	Include the in-profile packets forwarded count
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">in-profile-packets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">in-profile-packets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **low-octets-discarded-count** *boolean*

Synopsis	Include the low octets discarded count
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">low-octets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">low-octets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **low-octets-offered-count** *boolean*

Synopsis	Include the low octets offered count
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">low-octets-offered-count</a> <i>boolean</i>
Tree	<a href="#">low-octets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **low-packets-discarded-count** *boolean*

Synopsis	Include the low packets discarded count
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">low-packets-discarded-count</a> <i>boolean</i>
Tree	<a href="#">low-packets-discarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **low-packets-offered-count** *boolean*

Synopsis	Include the low packets offered count
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">low-packets-offered-count</a> <i>boolean</i>
Tree	<a href="#">low-packets-offered-count</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **out-profile-octets-forwarded-count** *boolean*

Synopsis	Include the out-of-profile octets forwarded count
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">out-profile-octets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-octets-forwarded-count</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **out-profile-packets-forwarded-count** *boolean*

Synopsis	Include the out-of-profile packets forwarded count
Context	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <i>number</i> <a href="#">custom-record</a> <a href="#">ref-queue</a> <a href="#">i-counters</a> <a href="#">out-profile-packets-forwarded-count</a> <i>boolean</i>
Tree	<a href="#">out-profile-packets-forwarded-count</a>
Default	false

Introduced 16.0.R1  
 Platforms All

### **uncoloured-octets-offered-count** *boolean*

Synopsis Include the uncolored octets offered count  
 Context **configure** [log accounting-policy](#) *number* [custom-record](#) [ref-queue](#) [i-counters](#)  
[uncoloured-octets-offered-count](#) *boolean*  
 Tree [uncoloured-octets-offered-count](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

### **uncoloured-packets-offered-count** *boolean*

Synopsis Include the uncolored packets offered count  
 Context **configure** [log accounting-policy](#) *number* [custom-record](#) [ref-queue](#) [i-counters](#)  
[uncoloured-packets-offered-count](#) *boolean*  
 Tree [uncoloured-packets-offered-count](#)  
 Default false  
 Introduced 16.0.R1  
 Platforms All

### **id** *reference*

Synopsis Queue ID  
 Context **configure** [log accounting-policy](#) *number* [custom-record](#) [ref-queue](#) [id](#) *reference*  
 Tree [id](#)  
 Reference **configure** [log accounting-policy](#) *number* [custom-record](#) [queue](#) *number*  
 Notes The following elements are part of a choice: **all** or **id**.  
 Introduced 16.0.R1  
 Platforms All

### **significant-change** *number*

Synopsis Significant change required to generate the record

Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">custom-record significant-change</a> <i>number</i>
Tree	<a href="#">significant-change</a>
Range	0 to 4294967295
Introduced	16.0.R1
Platforms	All

**default** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Default accounting policy for all objects that do not have an accounting policy
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <b>default</b> <i>boolean</i>
Tree	<a href="#">default</a>
Default	false
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**destination**

Synopsis	Enter the <b>destination</b> context
Context	<b>configure</b> <a href="#">log accounting-policy</a> <i>number</i> <a href="#">destination</a>
Tree	<a href="#">destination</a>
Introduced	16.0.R1
Platforms	All

**file reference****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Unique file identifier when creating a log or accounting file
Context	<b>configure log accounting-policy number destination file reference</b>
Tree	<a href="#">file</a>
Reference	<b>configure log file string</b>
Notes	The following elements are part of a choice: <b>file</b> or <b>null</b> .
Introduced	16.0.R1
Platforms	All

**null****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Indicate no destination for accounting policy records
Context	<b>configure log accounting-policy number destination null</b>
Tree	<a href="#">null</a>
Notes	The following elements are part of a choice: <b>file</b> or <b>null</b> .
Introduced	16.0.R1
Platforms	All

**include-system-info boolean**

Synopsis	Include system information in accounting policy records
----------	---

Context	<b>configure log accounting-policy</b> <i>number</i> <b>include-system-info</b> <i>boolean</i>
Tree	<b>include-system-info</b>
Default	false
Introduced	16.0.R1
Platforms	All

### **record** *keyword*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Accounting policy record type
Context	<b>configure log accounting-policy</b> <i>number</i> <b>record</b> <i>keyword</i>
Tree	<b>record</b>
Description	<p>This command adds the accounting record type to the accounting policy that is forwarded to the configured accounting file. A record name can only be used in one accounting policy. To obtain a list of all record types that can be configured, use the <b>show log accounting-records</b> command.</p> <p>To configure an accounting policy for access ports, select a service record (for example, <b>service-ingress-octets</b>). To change the record name to another service record, configure the new record name with this command.</p> <p>When configuring an accounting policy for network ports, select a network record. To change the record name to another network record, configure the new record name with this command.</p> <p><b>Note:</b> AA, video, and subscriber records are not applicable to the 7950 XRS.</p>
Options	<p>service-ingress-octets, service-egress-octets, service-ingress-packets, service-egress-packets, network-ingress-octets, network-egress-octets, network-ingress-packets, network-egress-packets, compact-service-ingress-octets, combined-service-ingress, combined-network-ing-egr-octets, combined-service-ing-egr-octets, complete-service-ingress-egress, combined-sdp-ingress-egress, complete-sdp-ingress-egress, complete-subscriber-ingress-egress, aa-protocol, aa-application, aa-app-group, aa-subscriber-protocol, aa-subscriber-application, custom-record-subscriber, custom-record-service, custom-record-aa-sub, queue-group-octets, queue-group-packets, combined-queue-group, combined-mpls-lsp-ingress, combined-mpls-lsp-egress, combined-ldp-lsp-egress, saa, video, aa-performance, complete-ethernet-port, extended-service-ingress-egress, complete-network-ing-egr, aa-partition, complete-pm, aa-admit-deny, network-interface-ingress-octets,</p>

network-interface-egress-octets, network-interface-ingress-packets, network-interface-egress-packets, combined-network-interface-ingress, combined-network-interface-egress, complete-network-interface-ing-egr, access-egress-octets, access-egress-packets, combined-access-egress, combined-network-egress, complete-service-activation-test, combined-mpls-srte-egress, combined-sr-policy-egress

Introduced 16.0.R1  
Platforms All

## app-route-notifications

Synopsis Enter the **app-route-notifications** context  
Context **configure** [log app-route-notifications](#)  
Tree [app-route-notifications](#)  
Introduced 16.0.R1  
Platforms All

## cold-start-wait *number*

Synopsis Time delay before notifying specific CPM applications for available route  
Context **configure** [log app-route-notifications cold-start-wait \*number\*](#)  
Tree [cold-start-wait](#)  
Range 1 to 300  
Introduced 16.0.R1  
Platforms All

## route-recovery-wait *number*

Synopsis Time delay before notifying specific CPM applications after route recovery or change  
Context **configure** [log app-route-notifications route-recovery-wait \*number\*](#)  
Tree [route-recovery-wait](#)  
Range 1 to 100  
Introduced 16.0.R1  
Platforms All

### **encryption-key** *string*

Synopsis	Secret key for the encryption of log files
Context	<b>configure</b> <a href="#">log encryption-key</a> <i>string</i>
Tree	<a href="#">encryption-key</a>
Description	This command specifies the encryption key used by AES-256-CTR for log file encryption. The encryption key is used for all local log files on the system.
String Length	1 to 71
Introduced	22.7.R1
Platforms	All

### **event-damping** *boolean*

Synopsis	Allow event damping algorithm to suppress QoS or filter change events
Context	<b>configure</b> <a href="#">log event-damping</a> <i>boolean</i>
Tree	<a href="#">event-damping</a>
Default	true
Introduced	16.0.R1
Platforms	All

### **event-handling**

Synopsis	Enter the <b>event-handling</b> context
Context	<b>configure</b> <a href="#">log event-handling</a>
Tree	<a href="#">event-handling</a>
Introduced	16.0.R1
Platforms	All

### **handler** [[name](#)] *string*

Synopsis	Enter the <b>handler</b> list instance
Context	<b>configure</b> <a href="#">log event-handling handler</a> <i>string</i>
Tree	<a href="#">handler</a>
Max. Instances	1500
Introduced	16.0.R1

Platforms All

### **[name]** *string*

Synopsis EHS handler name  
Context **configure log event-handling handler** *string*  
Tree [handler](#)  
String Length 1 to 32  
Notes This element is part of a list key.  
Introduced 16.0.R1  
Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the EHS handler  
Context **configure log event-handling handler** *string admin-state* *keyword*  
Tree [admin-state](#)  
Options enable, disable  
Default disable  
Introduced 16.0.R1  
Platforms All

### **description** *string*

Synopsis Text description  
Context **configure log event-handling handler** *string description* *string*  
Tree [description](#)  
String Length 1 to 80  
Introduced 16.0.R1  
Platforms All

### **entry** [*id*] *number*

Synopsis Enter the **entry** list instance  
Context **configure log event-handling handler** *string entry* *number*

Tree	<a href="#">entry</a>
Max. Instances	1500
Introduced	16.0.R1
Platforms	All

**[id] number**

Synopsis	EHS handler entry ID
Context	<b>configure</b> <a href="#">log event-handling handler</a> <i>string entry number</i>
Tree	<a href="#">entry</a>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state keyword**

Synopsis	Administrative state of the EHS handler entry
Context	<b>configure</b> <a href="#">log event-handling handler</a> <i>string entry number admin-state keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-handling handler</a> <i>string entry number description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**min-delay** *number*

Synopsis	Minimum delay between subsequent executions of the script policy
Context	<b>configure</b> <a href="#">log event-handling handler</a> <i>string</i> <a href="#">entry number</a> <a href="#">min-delay</a> <i>number</i>
Tree	<a href="#">min-delay</a>
Range	1 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	All

**script-policy**

Synopsis	Enable the <b>script-policy</b> context
Context	<b>configure</b> <a href="#">log event-handling handler</a> <i>string</i> <a href="#">entry number</a> <a href="#">script-policy</a>
Tree	<a href="#">script-policy</a>
Introduced	16.0.R1
Platforms	All

**name** *reference*

Synopsis	Script policy name
Context	<b>configure</b> <a href="#">log event-handling handler</a> <i>string</i> <a href="#">entry number</a> <a href="#">script-policy</a> <i>name</i> <i>reference</i>
Tree	<a href="#">name</a>
Reference	<b>configure</b> <a href="#">system script-control</a> <a href="#">script-policy</a> <i>string</i> <i>owner</i> <i>string</i>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**owner** *reference*

Synopsis	Script policy owner
Context	<b>configure</b> <a href="#">log event-handling handler</a> <i>string</i> <a href="#">entry number</a> <a href="#">script-policy</a> <i>owner</i> <i>reference</i>
Tree	<a href="#">owner</a>
Default	TIMOS CLI
Reference	<b>configure</b> <a href="#">system script-control</a> <a href="#">script-policy</a> <i>string</i> <i>owner</i> <i>string</i>

Introduced	16.0.R1
Platforms	All

## event-trigger

Synopsis	Enter the <b>event-trigger</b> context
Context	<b>configure log event-trigger</b>
Tree	<a href="#">event-trigger</a>
Introduced	16.0.R1
Platforms	All

## adp event keyword

Synopsis	Enter the <b>adp</b> list instance
Context	<b>configure log event-trigger adp event keyword</b>
Tree	<a href="#">adp</a>
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## event keyword

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log event-trigger adp event keyword</b>
Tree	<a href="#">adp</a>
Options	tmnxDiscoveryEndNotify, tmnxDiscoveryCellularReq
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## admin-state keyword

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure log event-trigger adp event keyword admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable

Default	disable
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger adp event</a> <i>keyword</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger adp event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **[id]** *number*

Synopsis	ID of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger adp event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger adp event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>

Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## debounce

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure</b> <a href="#">log event-trigger adp event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">debounce</a>
Tree	<a href="#">debounce</a>
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## time *number*

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure</b> <a href="#">log event-trigger adp event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">debounce</a> <a href="#">time</a> <i>number</i>
Tree	<a href="#">time</a>
Range	1 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

## value *number*

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure</b> <a href="#">log event-trigger adp event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">debounce</a> <a href="#">value</a> <i>number</i>
Tree	<a href="#">value</a>
Range	2 to 15
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

**description string**

Synopsis	Text description
Context	<b>configure log event-trigger adp event</b> <i>keyword entry number description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

**filter reference**

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure log event-trigger adp event</b> <i>keyword entry number filter reference</i>
Tree	<a href="#">filter</a>
Reference	<b>configure log filter</b> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

 Introduced 23.7.R1  
 Platforms All

### **[id]** *number*

Synopsis ID of the EHS event trigger entry  
 Context **configure log event-trigger dot1x event** *keyword entry number*  
 Tree [entry](#)  
 Range 1 to 1500  
 Notes This element is part of a list key.  
 Introduced 23.7.R1  
 Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the EHS event trigger entry  
 Context **configure log event-trigger dot1x event** *keyword entry number admin-state keyword*  
 Tree [admin-state](#)  
 Options enable, disable

Default	enable
Introduced	23.7.R1
Platforms	All

## **debounce**

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure log event-trigger dot1x event keyword entry number debounce</b>
Tree	<a href="#">debounce</a>
Introduced	23.7.R1
Platforms	All

## **time number**

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure log event-trigger dot1x event keyword entry number debounce time number</b>
Tree	<a href="#">time</a>
Range	1 to 604800
Units	seconds
Introduced	23.7.R1
Platforms	All

## **value number**

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure log event-trigger dot1x event keyword entry number debounce value number</b>
Tree	<a href="#">value</a>
Range	2 to 15
Introduced	23.7.R1
Platforms	All

## **description string**

Synopsis	Text description
Context	<b>configure log event-trigger dot1x event keyword entry number description string</b>

Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	23.7.R1
Platforms	All

### **filter** *reference*

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger dot1x event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">filter</a> <i>reference</i>
Tree	<a href="#">filter</a>
Reference	<b>configure</b> <a href="#">log filter</a> <i>string</i>
Introduced	23.7.R1
Platforms	All

### **handler** *reference*

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger dot1x event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">handler</a> <i>reference</i>
Tree	<a href="#">handler</a>
Reference	<b>configure</b> <a href="#">log event-handling handler</a> <i>string</i>
Introduced	23.7.R1

### **debounce**

Synopsis Enter the **debounce** context  
 Context **configure log event-trigger etun event keyword entry number debounce**

Tree	<a href="#">debounce</a>
Introduced	16.0.R1
Platforms	All

**time number**

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure</b> <a href="#">log event-trigger etun event keyword entry number debounce time number</a>
Tree	<a href="#">time</a>
Range	1 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	All

**value number**

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure</b> <a href="#">log event-trigger etun event keyword entry number debounce value number</a>
Tree	<a href="#">value</a>
Range	2 to 15
Introduced	16.0.R1
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger etun event keyword entry number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**filter reference**

Synopsis	Log filter for EHS event trigger entry
----------	--

Context	<b>configure log event-trigger etun event keyword entry number filter reference</b>
Tree	<b>filter</b>
Reference	<b>configure log filter string</b>
Introduced	16.0.R1
Platforms	All

### handler reference

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure log event-trigger etun event keyword entry number handler reference</b>
Tree	<b>handler</b>
Reference	<b>configure log event-handling handler string</b>
Introduced	16.0.R1
Platforms	All

### filter event keyword

Synopsis	Enter the <b>filter</b> list instance
Context	<b>configure log event-trigger filter event keyword</b>
Tree	<b>filter</b>
Introduced	16.0.R1
Platforms	All

### event keyword

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log event-trigger filter event keyword</b>
Tree	<b>filter</b>
Options	tIPFilterPBRPacketsDrop, tFilterSubInsSpaceAlarmRaised, tFilterSubInsSpaceAlarmCleared, tFilterSubInsFltrEntryDropped, tFilterBgpFlowSpecProblem, tFilterApplyPathProblem, tFilterRadSharedFltrAlarmRaised, tFilterRadSharedFltrAlarmClear, tFilterEmbeddingOperStateChange, tFilterEmbedOpenflowOperStateChg, tFilterOpenflowRequestRejected, tFilterEmbedFlowspecOperStateChg, tFilterRPActiveDestChangeEvent
Notes	This element is part of a list key.
Introduced	16.0.R1

Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the EHS event trigger  
 Context **configure** [log](#) [event-trigger](#) [filter](#) [event](#) *keyword* **admin-state** *keyword*

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure</b> <a href="#">log event-trigger mgmt-core event</a> <i>keyword entry number debounce time number</i>
Tree	<a href="#">time</a>
Range	1 to 604800

Units	seconds
Introduced	16.0.R1
Platforms	All

**value** *number*

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure</b> <a href="#">log event-trigger mgmt-core event keyword entry number</a> <a href="#">debounce value number</a>
Tree	<a href="#">value</a>
Range	2 to 15
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger mgmt-core event keyword entry number</a> <a href="#">description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**filter** *reference*

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger mgmt-core event keyword entry number</a> <a href="#">filter reference</a>
Tree	<a href="#">filter</a>
Reference	<b>configure</b> <a href="#">log filter string</a>
Introduced	16.0.R1
Platforms	All

**handler** *reference*

Synopsis	Event handler for EHS event trigger entry
----------	---

Context	<b>configure</b> <a href="#">log event-trigger mgmt-core event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">handler</a> <i>reference</i>
Tree	<a href="#">handler</a>
Reference	<b>configure</b> <a href="#">log event-handling handler</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

### **mirror event** *keyword*

Synopsis	Enter the <b>mirror</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger mirror event</a> <i>keyword</i>
Tree	<a href="#">mirror</a>
Introduced	16.0.R1
Platforms	All

### **event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log event-trigger mirror event</a> <i>keyword</i>
Tree	<a href="#">mirror</a>
Options	sourceEnabled, sourceDisabled, destinationEnabled, destinationDisabled, sourceIpFilterChange, sourceMacFilterChange, sourceSapChange, sourceSubscriberChange, tMirrorSourceIpV6FilterChange
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure</b> <a href="#">log event-trigger mirror event</a> <i>keyword</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger mirror event</a> <i>keyword</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger mirror event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	All

**[id]** *number*

Synopsis	ID of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger mirror event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger mirror event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1

Platforms All

## debounce

Synopsis Enter the **debounce** context  
 Context **configure** [log event-trigger mirror event](#) *keyword* [entry number](#) [debounce](#)  
 Tree [debounce](#)  
 Introduced 16.0.R1  
 Platforms All

## time *number*

Synopsis Time window for events for EHS to trigger a response  
 Context **configure** [log event-trigger mirror event](#) *keyword* [entry number](#) [debounce](#) [time](#) *number*  
 Tree [time](#)  
 Range 1 to 604800  
 Units seconds  
 Introduced 16.0.R1  
 Platforms All

## value *number*

Synopsis Occurrences in time interval to trigger EHS response  
 Context **configure** [log event-trigger mirror event](#) *keyword* [entry number](#) [debounce](#) [value](#) *number*  
 Tree [value](#)  
 Range 2 to 15  
 Introduced 16.0.R1  
 Platforms All

## description *string*

Synopsis Text description  
 Context **configure** [log event-trigger mirror event](#) *keyword* [entry number](#) [description](#) *string*  
 Tree [description](#)  
 String Length 1 to 80

Introduced 16.0.R1  
Platforms All

### **filter** *reference*

Synopsis Log filter for EHS event trigger entry  
Context **configure** [log event-trigger mirror event](#) *keyword* [entry number](#) [filter](#) *reference*  
Tree [filter](#)  
Reference **configure** [log filter](#) *string*  
Introduced 16.0.R1  
Platforms All

### **handler** *reference*

Synopsis Event handler for EHS event trigger entry  
Context **configure** [log event-trigger mirror event](#) *keyword* [entry number](#) [handler](#) *reference*  
Tree [handler](#)  
Reference **configure** [log event-handling handler](#) *string*  
Introduced 16.0.R1  
Platforms All

### **mld event** *keyword*

Synopsis Enter the **mld** list instance  
Context **configure** [log event-trigger mld event](#) *keyword*  
Tree [mld](#)  
Introduced 16.0.R1  
Platforms All

### **event** *keyword*

Synopsis Log event as a trigger for one or more EHS handlers  
Context **configure** [log event-trigger mld event](#) *keyword*  
Tree [mld](#)

Options	vRtrMldIfRxQueryVerMismatch, vRtrMldIfCModeRxQueryMismatch, vRtrMldMaxGrpsLimitExceeded, vRtrMldMcacPlyDropped, vRtrMldHostInstantiationFail, vRtrMldHostMaxGrpsLimitExceeded, vRtrMldHostMcacPlyDropped, vRtrMldHostCModeRxQueryMismatch, vRtrMldHostRxQueryVerMismatch, vRtrMldHostMaxSrcsLimitExceeded, vRtrMldMaxSrcsLimitExceeded, vRtrMldGrpIfSapMaxGrpsLimExceed, vRtrMldGrpIfSapMaxSrcsLimExceed, vRtrMldGrpIfSapMcacPlyDropped, vRtrMldGrpIfSapCModeRxQueryMism, vRtrMldGrpIfSapRxQueryVerMism, vRtrMldHostMaxGrpSrcsLimitExcd, vRtrMldMaxGrpSrcsLimitExceeded, vRtrMldGrpIfSapMaxGrpSrcLimExcd, vRtrMldHostQryIntervalConflict, vRtrMldSlaProflnstMcacPlyDrop
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure</b> <a href="#">log event-trigger mld event</a> <i>keyword</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger mld event</a> <i>keyword</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger mld event</a> <i>keyword</i> <b>entry</b> <i>number</i>

Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	All

**[id] number**

Synopsis	ID of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger mld event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state keyword**

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger mld event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**debounce**

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure</b> <a href="#">log event-trigger mld event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">debounce</a>
Tree	<a href="#">debounce</a>
Introduced	16.0.R1
Platforms	All

**time number**

Synopsis	Time window for events for EHS to trigger a response
----------	--

Context	<b>configure</b> <a href="#">log event-trigger mld event keyword entry number debounce time number</a>
Tree	<a href="#">time</a>
Range	1 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	All

**value number**

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure</b> <a href="#">log event-trigger mld event keyword entry number debounce value number</a>
Tree	<a href="#">value</a>
Range	2 to 15
Introduced	16.0.R1
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger mld event keyword entry number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**filter reference**

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger mld event keyword entry number filter reference</a>
Tree	<a href="#">filter</a>
Reference	<b>configure</b> <a href="#">log filter string</a>
Introduced	16.0.R1
Platforms	All

**handler** *reference*

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger mld event</a> <i>keyword</i> <a href="#">entry number handler reference</a>
Tree	<a href="#">handler</a>
Reference	<b>configure</b> <a href="#">log event-handling handler</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

**mld-snooping** [event](#) *keyword*

Synopsis	Enter the <b>mld-snooping</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger mld-snooping event</a> <i>keyword</i>
Tree	<a href="#">mld-snooping</a>
Introduced	16.0.R1
Platforms	All

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log event-trigger mld-snooping event</a> <i>keyword</i>
Tree	<a href="#">mld-snooping</a>
Options	sapMldSnpGrpLimitExceeded, sdpBndMldSnpGrpLimitExceeded, sapMldSnpMcsFailure
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure</b> <a href="#">log event-trigger mld-snooping event</a> <i>keyword</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1

Platforms All

### **description** *string*

Synopsis Text description  
 Context **configure** [log event-trigger mld-snooping event](#) *keyword* [description](#) *string*

### **admin-state** *keyword*

Synopsis Administrative state of the EHS event trigger  
 Context **configure** [log event-trigger pcap event keyword admin-state keyword](#)  
 Tree [admin-state](#)

---

Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger pcap event</a> <i>keyword</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger pcap event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	All

**[id]** *number*

Synopsis	ID of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger pcap event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger entry
----------	---

Context	<b>configure</b> <a href="#">log event-trigger pcap event keyword entry number admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

## debounce

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure</b> <a href="#">log event-trigger pcap event keyword entry number debounce</a>
Tree	<a href="#">debounce</a>
Introduced	16.0.R1
Platforms	All

## time *number*

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure</b> <a href="#">log event-trigger pcap event keyword entry number debounce time number</a>
Tree	<a href="#">time</a>
Range	1 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	All

## value *number*

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure</b> <a href="#">log event-trigger pcap event keyword entry number debounce value number</a>
Tree	<a href="#">value</a>
Range	2 to 15
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger pcap event keyword entry number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**filter** *reference*

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger pcap event keyword entry number filter reference</a>
Tree	<a href="#">filter</a>
Reference	<b>configure</b> <a href="#">log filter string</a>
Introduced	16.0.R1
Platforms	All

**handler** *reference*

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger pcap event keyword entry number handler reference</a>
Tree	<a href="#">handler</a>
Reference	<b>configure</b> <a href="#">log event-handling handler string</a>
Introduced	16.0.R1
Platforms	All

**pcep event** *keyword*

Synopsis	Enter the <b>pcep</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger pcep event keyword</a>
Tree	<a href="#">pcep</a>
Introduced	22.2.R1
Platforms	All

**event keyword**

Synopsis	PCEP module events
Context	<b>configure log event-trigger pcep event keyword</b>
Tree	<a href="#">pcep</a>
Options	tmnxPcepPccPeerStateChange
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	All

**admin-state keyword**

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure log event-trigger pcep event keyword admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	22.2.R1
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure log event-trigger pcep event keyword description string</b>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	22.2.R1
Platforms	All

**entry [id] number**

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure log event-trigger pcep event keyword entry number</b>
Tree	<a href="#">entry</a>
Introduced	22.2.R1
Platforms	All

**[id] number**

Synopsis	ID of the EHS event trigger entry
Context	<b>configure log event-trigger pcep event keyword entry number</b>
Tree	<a href="#">entry</a>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	All

**admin-state keyword**

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure log event-trigger pcep event keyword entry number admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	22.2.R1
Platforms	All

**debounce**

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure log event-trigger pcep event keyword entry number debounce</b>
Tree	<a href="#">debounce</a>
Introduced	22.2.R1
Platforms	All

**time number**

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure log event-trigger pcep event keyword entry number debounce time number</b>
Tree	<a href="#">time</a>
Range	1 to 604800
Units	seconds

Introduced 22.2.R1  
 Platforms All

### **value** *number*

Synopsis Occurrences in time interval to trigger EHS response  
 Context **configure** [log event-trigger pcep event keyword entry number debounce value number](#)  
 Tree [value](#)  
 Range 2 to 15  
 Introduced 22.2.R1  
 Platforms All

### **description** *string*

Synopsis Text description  
 Context **configure** [log event-trigger pcep event keyword entry number description string](#)  
 Tree [description](#)  
 String Length 1 to 80  
 Introduced 22.2.R1  
 Platforms All

### **filter** *reference*

Synopsis Log filter for EHS event trigger entry  
 Context **configure** [log event-trigger pcep event keyword entry number filter reference](#)  
 Tree [filter](#)  
 Reference **configure** [log filter string](#)  
 Introduced 22.2.R1  
 Platforms All

### **handler** *reference*

Synopsis Event handler for EHS event trigger entry  
 Context **configure** [log event-trigger pcep event keyword entry number handler reference](#)  
 Tree [handler](#)

Reference	<b>configure</b> <a href="#">log event-handling handler</a> <i>string</i>
Introduced	22.2.R1
Platforms	All

### **pfcp event** *keyword*

Synopsis	Enter the <b>pfcp</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger pfcp event</a> <i>keyword</i>
Tree	<a href="#">pfcp</a>
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **event** *keyword*

Synopsis	PFCP events
Context	<b>configure</b> <a href="#">log event-trigger pfcp event</a> <i>keyword</i>
Tree	<a href="#">pfcp</a>
Options	tmnxPfcplInvalidle
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure</b> <a href="#">log event-trigger pfcp event</a> <i>keyword</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **description** *string*

Synopsis	Text description
----------	------------------

Context	<b>configure log event-trigger pfcpc event</b> <i>keyword description string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**entry [id] number**

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure log event-trigger pfcpc event</b> <i>keyword entry number</i>
Tree	<b>entry</b>
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**[id] number**

Synopsis	ID of the EHS event trigger entry
Context	<b>configure log event-trigger pfcpc event</b> <i>keyword entry number</i>
Tree	<b>entry</b>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**admin-state keyword**

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure log event-trigger pfcpc event</b> <i>keyword entry number admin-state keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	enable
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**debounce**

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure log event-trigger pfcpc event</b> <i>keyword entry number</i> <b>debounce</b>
Tree	<b>debounce</b>
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**time number**

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure log event-trigger pfcpc event</b> <i>keyword entry number</i> <b>debounce time number</b>
Tree	<b>time</b>
Range	1 to 604800
Units	seconds
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**value number**

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure log event-trigger pfcpc event</b> <i>keyword entry number</i> <b>debounce value number</b>
Tree	<b>value</b>
Range	2 to 15
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure log event-trigger pfcpc event</b> <i>keyword entry number</i> <b>description string</b>
Tree	<b>description</b>
String Length	1 to 80
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**filter reference**

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure log event-trigger pfcpc event</b> <i>keyword entry number filter reference</i>
Tree	<a href="#">filter</a>
Reference	<b>configure log filter</b> <i>string</i>
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**handler reference**

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure log event-trigger pfcpc event</b> <i>keyword entry number handler reference</i>
Tree	<a href="#">handler</a>
Reference	<b>configure log event-handling handler</b> <i>string</i>
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**pim event keyword**

Synopsis	Enter the <b>pim</b> list instance
Context	<b>configure log event-trigger pim event</b> <i>keyword</i>
Tree	<a href="#">pim</a>
Introduced	16.0.R1
Platforms	All

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log event-trigger pim event</b> <i>keyword</i>
Tree	<a href="#">pim</a>
Options	vRtrPimNgIfNeighborLoss, vRtrPimNgIfNeighborUp, vRtrPimNgInvalidJoinPrune, vRtrPimNgInvalidRegister, vRtrPimNgGrpInSSMRange, vRtrPimNgBSRStateChange, vRtrPimNgHelloDropped, vRtrPimNgSGLimitExceeded, vRtrPimNgReplicationLmtExceeded, vRtrPimNgMDTLimitExceeded, vRtrPimNgMaxGrpsLimitExceeded, vRtrPimNgDataMtReused, vRtrPimNgMcacPlycDropped, vRtrPimNgInvalidIPmsiTunnel,

vRtrPimNgMaxGraftRetry, vRtrPimNgBierInbInvSD, vRtrPimNgBierInbInvBfrId,  
vRtrPimNgUmhBMonFastFailPriToStb, vRtrPimNgUmhBMonFastFailStbToPri,  
vRtrPimNgInstMaxNbrReached, vRtrPimNgIfMaxNbrReached

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure</b> <a href="#">log event-trigger pim event keyword admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger pim event keyword description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger pim event keyword entry number</a>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	All

**[id] number**

Synopsis	ID of the EHS event trigger entry
Context	<b>configure log event-trigger pim event keyword entry number</b>
Tree	<a href="#">entry</a>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state keyword**

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure log event-trigger pim event keyword entry number admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**debounce**

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure log event-trigger pim event keyword entry number debounce</b>
Tree	<a href="#">debounce</a>
Introduced	16.0.R1
Platforms	All

**time number**

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure log event-trigger pim event keyword entry number debounce time number</b>
Tree	<a href="#">time</a>
Range	1 to 604800
Units	seconds
Introduced	16.0.R1

Platforms All

### **value** *number*

Synopsis Occurrences in time interval to trigger EHS response  
 Context **configure** [log event-trigger pim event keyword entry number debounce value number](#)  
 Tree [value](#)  
 Range 2 to 15  
 Introduced 16.0.R1  
 Platforms All

---

Range	1 to 1500
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger pppoe event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **debounce**

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure</b> <a href="#">log event-trigger pppoe event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <b>debounce</b>
Tree	<a href="#">debounce</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **time** *number*

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure</b> <a href="#">log event-trigger pppoe event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">debounce</a> <b>time</b> <i>number</i>
Tree	<a href="#">time</a>
Range	1 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**value number**

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure</b> <a href="#">log event-trigger pppoe event keyword entry number debounce value number</a>
Tree	<a href="#">value</a>
Range	2 to 15
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger pppoe event keyword entry number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**filter reference**

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger pppoe event keyword entry number filter reference</a>
Tree	<a href="#">filter</a>
Reference	<b>configure</b> <a href="#">log filter string</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**handler reference**

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger pppoe event keyword entry number handler reference</a>
Tree	<a href="#">handler</a>
Reference	<b>configure</b> <a href="#">log event-handling handler string</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pppoe-clnt event keyword**

Synopsis	Enter the <b>pppoe-clnt</b> list instance
Context	<b>configure log event-trigger pppoe-clnt event keyword</b>
Tree	<a href="#">pppoe-clnt</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log event-trigger pppoe-clnt event keyword</b>
Tree	<a href="#">pppoe-clnt</a>
Options	tmnxPppoeClientSetupFailure, tmnxPppoeClientEchoTimeout, tmnxPppoeClientNcpFailure
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**admin-state keyword**

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure log event-trigger pppoe-clnt event keyword admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure log event-trigger pppoe-clnt event keyword description string</b>
Tree	<a href="#">description</a>
String Length	1 to 80

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">pppoe-clnt event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **[id]** *number*

Synopsis	ID of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">pppoe-clnt event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">pppoe-clnt event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **debounce**

Synopsis	Enter the <b>debounce</b> context
----------	-----------------------------------

Context	<b>configure</b> log event-trigger pppoe-clnt event keyword entry number debounce
Tree	debounce
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**time number**

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure</b> log event-trigger pppoe-clnt event keyword entry number debounce time number
Tree	time
Range	1 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**value number**

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure</b> log event-trigger pppoe-clnt event keyword entry number debounce value number
Tree	value
Range	2 to 15
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**description string**

Synopsis	Text description
Context	<b>configure</b> log event-trigger pppoe-clnt event keyword entry number description string
Tree	description
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**filter reference**

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">pppoe-clnt event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">filter</a> <i>reference</i>
Tree	<a href="#">filter</a>
Reference	<b>configure</b> <a href="#">log filter</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**handler reference**

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">pppoe-clnt event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">handler</a> <i>reference</i>
Tree	<a href="#">handler</a>
Reference	<b>configure</b> <a href="#">log event-handling</a> <a href="#">handler</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ptp event keyword**

Synopsis	Enter the <b>ptp</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">ptp event</a> <i>keyword</i>
Tree	<a href="#">ptp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">ptp event</a> <i>keyword</i>
Tree	<a href="#">ptp</a>
Options	tmnxPtpCardNotSupported, tmnxPtpCardNotSupportedClear, tmnxPtpMasterClockChangedEvent, tmnxPtpClockRecoveryStateChange, tmnxPtpOutOfResources, tmnxPtpOutOfResourcesClear, tmnxPtpDynamicChange, tmnxPtpPortNoTimestamping, tmnxPtpPortPtsfUnusable, tmnxPtpRequiresSystemReboot, tmnxPtpRequiresSystemRebootClear, tmnxPtpTimeRecoveryStateChange, tmnxPtpPeerNoTxTimestamping,

	tmnxPtpPeerNoTxTimestampingClear, tmnxPtpPeerNoRxTimestamping, tmnxPtpPeerNoRxTimestampingClear
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">ptp event</a> <i>keyword</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">ptp event</a> <i>keyword</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">ptp event</a> <i>keyword</i> <b>entry</b> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[id]** *number*

Synopsis	ID of the EHS event trigger entry
----------	-----------------------------------

Context	<b>configure</b> <a href="#">log event-trigger ptp event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger ptp event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **debounce**

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure</b> <a href="#">log event-trigger ptp event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <b>debounce</b>
Tree	<a href="#">debounce</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **time** *number*

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure</b> <a href="#">log event-trigger ptp event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <b>debounce</b> <a href="#">time</a> <i>number</i>
Tree	<a href="#">time</a>
Range	1 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **value number**

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">ptp event</a> <i>keyword</i> <a href="#">entry number</a> <a href="#">debounce value</a> <i>number</i>
Tree	<a href="#">value</a>
Range	2 to 15
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">ptp event</a> <i>keyword</i> <a href="#">entry number</a> <a href="#">description</a> <i>string</i>

 Tree [admin-state](#)  
 Options enable, disable

Default	enable
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

## debounce

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure log event-trigger sflow event keyword entry number debounce</b>
Tree	<b>debounce</b>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

## time number

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure log event-trigger sflow event keyword entry number debounce time number</b>
Tree	<b>time</b>
Range	1 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

## value number

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure log event-trigger sflow event keyword entry number debounce value number</b>
Tree	<b>value</b>
Range	2 to 15
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

## description string

Synopsis	Text description
Context	<b>configure log event-trigger sflow event keyword entry number description string</b>

---

Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **filter reference**

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger sflow event</a> <i>keyword</i> <a href="#">entry number filter reference</a>
Tree	<a href="#">filter</a>
Reference	<b>configure</b> <a href="#">log filter</a> <i>string</i>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **handler reference**

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger sflow event</a> <i>keyword</i> <a href="#">entry number handler reference</a>
Tree	<a href="#">handler</a>
Reference	<b>configure</b> <a href="#">log event-handling handler</a> <i>string</i>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **snmp event keyword**

Synopsis	Enter the <b>snmp</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger snmp event</a> <i>keyword</i>
Tree	<a href="#">snmp</a>
Introduced	16.0.R1
Platforms	All

### **event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log event-trigger snmp event</a> <i>keyword</i>

Tree	<a href="#">snmp</a>
Options	coldStart, warmStart, authenticationFailure, linkDown, linkUp, risingAlarm, fallingAlarm, snmpdError
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure</b> <a href="#">log event-trigger snmp event</a> <i>keyword</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description

## **value number**

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure</b> <a href="#">log event-trigger tls event keyword entry number</a> <b>debounce</b> <a href="#">value number</a>
Tree	<a href="#">value</a>
Range	2 to 15
Introduced	20.5.R1
Platforms	All

## **description string**

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger tls event keyword entry number</a> <b>description</b> <a href="#">string</a>

Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.5.R1
Platforms	All

### **filter reference**

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">tls event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">filter</a> <i>reference</i>
Tree	<a href="#">filter</a>
Reference	<b>configure</b> <a href="#">log filter</a> <i>string</i>
Introduced	20.5.R1
Platforms	All

### **handler reference**

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">tls event</a> <i>keyword</i> <a href="#">entry</a> <i>number</i> <a href="#">handler</a> <i>reference</i>
Tree	<a href="#">handler</a>
Reference	<b>configure</b> <a href="#">log event-handling</a> <a href="#">handler</a> <i>string</i>
Introduced	20.5.R1
Platforms	All

### **tree-sid event keyword**

Synopsis	Enter the <b>tree-sid</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">tree-sid</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">tree-sid</a>
Introduced	20.10.R1
Platforms	All

### **event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log event-trigger</a> <a href="#">tree-sid</a> <a href="#">event</a> <i>keyword</i>

Tree	<a href="#">tree-sid</a>
Options	vRtrTreeSidCdtPathChanged, vRtrTreeSidCdtPathActInsChanged, vRtrTreeSidInSidRegFailure, vRtrTreeSidTreeldAllocFailure, vRtrTreeSidRepSegResExhaustion, vRtrTreeSidRepSegResExhstCleared, vRtrTreeSidLabelRangeExhaustion, vRtrTreeSidLblRangeExhstCleared, vRtrTreeSidFailOverPriToStdBy, vRtrTreeSidFailOverStdByToPri
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure</b> <a href="#">log event-trigger tree-sid event keyword admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	20.10.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger tree-sid event keyword description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.10.R1
Platforms	All

### **entry** [*id*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">log event-trigger tree-sid event keyword entry number</a>
Tree	<a href="#">entry</a>
Introduced	20.10.R1
Platforms	All

**[id] number**

Synopsis	ID of the EHS event trigger entry
Context	<b>configure log event-trigger tree-sid event keyword entry number</b>
Tree	<b>entry</b>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	20.10.R1
Platforms	All

**admin-state keyword**

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure log event-trigger tree-sid event keyword entry number admin-state keyword</b>
Tree	<b>admin-state</b>
Options	enable, disable
Default	enable
Introduced	20.10.R1
Platforms	All

**debounce**

Synopsis	Enter the <b>debounce</b> context
Context	<b>configure log event-trigger tree-sid event keyword entry number debounce</b>
Tree	<b>debounce</b>
Introduced	20.10.R1
Platforms	All

**time number**

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure log event-trigger tree-sid event keyword entry number debounce time number</b>
Tree	<b>time</b>
Range	1 to 604800
Units	seconds

Introduced	20.10.R1
Platforms	All

**value** *number*

Synopsis	Occurrences in time interval to trigger EHS response
Context	<b>configure</b> <a href="#">log event-trigger tree-sid event keyword entry number debounce value number</a>
Tree	<a href="#">value</a>
Range	2 to 15
Introduced	20.10.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log event-trigger tree-sid event keyword entry number description string</a>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	20.10.R1
Platforms	All

**filter** *reference*

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger tree-sid event keyword entry number filter reference</a>
Tree	<a href="#">filter</a>
Reference	<b>configure</b> <a href="#">log filter string</a>
Introduced	20.10.R1
Platforms	All

**handler** *reference*

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure</b> <a href="#">log event-trigger tree-sid event keyword entry number handler reference</a>

Tree	<a href="#">handler</a>
Reference	<b>configure log event-handling handler</b> <i>string</i>
Introduced	20.10.R1
Platforms	All

### **user event** *keyword*

Synopsis	Enter the <b>user</b> list instance
Context	<b>configure log event-trigger user event</b> <i>keyword</i>
Tree	<a href="#">user</a>
Introduced	16.0.R1
Platforms	All

### **event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log event-trigger user event</b> <i>keyword</i>
Tree	<a href="#">user</a>
Options	cli_user_login, cli_user_logout, cli_user_login_failed, cli_user_login_max_attempts, ftp_user_login, ftp_user_logout, ftp_user_login_failed, ftp_user_login_max_attempts, cli_user_io, snmp_user_set, cli_config_io, cli_unauth_user_io, cli_unauth_config_io, grpc_user_login, grpc_user_logout, grpc_user_login_failed, grpc_user_login_max_attempts, netconf_user_login, netconf_user_logout, netconf_user_login_failed, netconf_user_login_max_attempts
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure log event-trigger user event</b> <i>keyword</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1

Platforms All

Synopsis	Time window for events for EHS to trigger a response
Context	<b>configure</b> <a href="#">log event-trigger vrtr event</a> <i>keyword</i> <a href="#">entry number</a> <a href="#">debounce</a> <a href="#">time</a> <i>number</i>
Tree	<a href="#">time</a>
Range	1 to 604800
Units	seconds
Introduced	16.0.R1
Platforms	All

### **value** *number*

Synopsis	Occurrences in time interval to trigger EHS response
----------	--

Context	<b>configure log event-trigger vrtr event keyword entry number debounce value number</b>
Tree	<b>value</b>
Range	2 to 15
Introduced	16.0.R1
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure log event-trigger vrtr event keyword entry number description string</b>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**filter reference**

Synopsis	Log filter for EHS event trigger entry
Context	<b>configure log event-trigger vrtr event keyword entry number filter reference</b>
Tree	<b>filter</b>
Reference	<b>configure log filter string</b>
Introduced	16.0.R1
Platforms	All

**handler reference**

Synopsis	Event handler for EHS event trigger entry
Context	<b>configure log event-trigger vrtr event keyword entry number handler reference</b>
Tree	<b>handler</b>
Reference	<b>configure log event-handling handler string</b>
Introduced	16.0.R1
Platforms	All

**wlan-gw event** *keyword*

Synopsis	Enter the <b>wlan-gw</b> list instance
Context	<b>configure log event-trigger wlan-gw event</b> <i>keyword</i>
Tree	<a href="#">wlan-gw</a>
Introduced	16.0.R1
Platforms	All

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log event-trigger wlan-gw event</b> <i>keyword</i>
Tree	<a href="#">wlan-gw</a>
Options	tmnxWlanGwResrcProblemDetected, tmnxWlanGwResrcProblemCause, tmnxWlanGwTuQosProblem, tmnxWlanGwGrpOperStateChanged, tmnxWlanGwlomActive, tmnxWlanGwMgwConnected, tmnxWlanGwMgwRestarted, tmnxWlanGwNumMgwHi, tmnxWlanGwMgwStateChanged, tmnxWlanGwQosRadiusGtpMismatch, tmnxWlanGwSubIfRedActiveChanged, tmnxWlanGwDsmGtpTunnelSetupFail, tmnxWlanGwSubIfPmStartD6cFailed, tmnxWlanGwSubIfPmNewPIReqFailed, tmnxWlanGwSubIfPmAddNewPIFailed, tmnxWlanGwSubIfPmCrIntObjFailed, tmnxWlanGwSubIfPmPoolTimeout, tmnxWlanGwSubIfPmPoolUsageLow, tmnxWlanGwSubIfPmLsQryRtryFailed, tmnxWlanGwGtpMessageDropped, tmnxWlanGwSubIfPmPoolPartialUse, tmnxWlanGwBdCreated, tmnxWlanGwBdDeleted, tmnxWlanGwUeCreationFail, tmnxWlanGwUeReplacement, tmnxWlanGwGrpMemberUsageHigh
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the EHS event trigger
Context	<b>configure log event-trigger wlan-gw event</b> <i>keyword admin-state</i> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure log event-trigger wlan-gw event</b> <i>keyword description string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**entry [id] number**

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure log event-trigger wlan-gw event</b> <i>keyword entry number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	All

**[id] number**

Synopsis	ID of the EHS event trigger entry
Context	<b>configure log event-trigger wlan-gw event</b> <i>keyword entry number</i>
Tree	<a href="#">entry</a>
Range	1 to 1500
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state keyword**

Synopsis	Administrative state of the EHS event trigger entry
Context	<b>configure log event-trigger wlan-gw event</b> <i>keyword entry number admin-state keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	16.0.R1

Platforms All

## debounce

Synopsis Enter the **debounce** context

Synopsis Event handler for EHS event trigger entry  
 Context **configure** [log event-trigger wpp event](#) *keyword entry number* [handler reference](#)  
 Tree [handler](#)  
 Reference **configure** [log event-handling handler string](#)

Introduced	16.0.R1
Platforms	All

### **file** [[file-policy-name](#)] *string*

Synopsis	Enter the <b>file</b> list instance
Context	<b>configure</b> <a href="#">log file</a> <i>string</i>
Tree	<a href="#">file</a>
Max. Instances	99
Introduced	16.0.R1
Platforms	All

### **[file-policy-name]** *string*

Synopsis	File ID for a log or accounting file
Context	<b>configure</b> <a href="#">log file</a> <i>string</i>
Tree	<a href="#">file</a>
Description	This command specifies the identification name or number for a log or accounting file. If the name begins with a numerical digit (from 1 to 9), the name must be a number from 1 to 99.
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	All

### **compact-flash-location**

Synopsis	Enter the <b>compact-flash-location</b> context
Context	<b>configure</b> <a href="#">log file</a> <i>string</i> <a href="#">compact-flash-location</a>
Tree	<a href="#">compact-flash-location</a>
Introduced	16.0.R1
Platforms	All

**backup** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Log file location
Context	<b>configure</b> <a href="#">log file</a> <i>string</i> <a href="#">compact-flash-location</a> <b>backup</b> <i>keyword</i>
Tree	<a href="#">backup</a>
Options	cf-unspecified, cf1, cf2, cf3, cf4
Default	cf-unspecified
Introduced	16.0.R1
Platforms	All

**primary** *keyword***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Log file location
Context	<b>configure</b> <a href="#">log file</a> <i>string</i> <a href="#">compact-flash-location</a> <b>primary</b> <i>keyword</i>
Tree	<a href="#">primary</a>
Options	cf-unspecified, cf1, cf2, cf3, cf4
Default	cf-unspecified
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log file</a> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **retention number**

Synopsis	Minimum time that a file is retained on the media
Context	<b>configure log file string retention number</b>
Tree	<a href="#">retention</a>
Range	1 to 500
Units	hours
Default	12
Introduced	16.0.R1
Platforms	All

### **rollover number**

Synopsis	Frequency at which a new log or accounting file is created
Context	<b>configure log file string rollover number</b>
Tree	<a href="#">rollover</a>
Range	5 to 10080
Units	minutes
Default	1440
Introduced	16.0.R1
Platforms	All

### **file-storage-control**

Synopsis	Enter the <b>file-storage-control</b> context
Context	<b>configure log file-storage-control</b>
Tree	<a href="#">file-storage-control</a>
Introduced	23.3.R1
Platforms	All

### **accounting-files-total-size number**

Synopsis	Per CF total accounting file storage limit
Context	<b>configure log file-storage-control accounting-files-total-size number</b>
Tree	<a href="#">accounting-files-total-size</a>

Description	<p>This command configures the limit for the total space that all accounting files can occupy on each storage device on the active CPM.</p> <p>When this threshold is reached, new accounting files are no longer created in the \act-collect directory of the storage device until SR OS removes older accounting files from the \act directory and the occupancy is below the limit. Currently open, in-progress accounting files in the \act-collect directory are not affected by this limit and are completed.</p> <p>When unconfigured, there is no specific limit for the total size of all accounting files.</p> <p>Only accounting files in the \act directory with system generated names (including no file extension) are applicable toward the total size limit.</p> <p>If a user manually adds or deletes accounting files from the \act directory, the size of the files is not taken into account for up to 1 hour.</p> <p>The configured total size limit is not validated against the actual size of the installed storage devices. If the configured limit is larger than the installed compact flash (CF) device, the limit is never reached.</p>
Range	50 to 4194304
Units	megabytes
Introduced	23.3.R1
Platforms	All

### **log-files-total-size** *number*

Synopsis	Per CF total log file storage limit
Context	<b>configure</b> <a href="#">log file-storage-control</a> <a href="#">log-files-total-size</a> <i>number</i>
Tree	<a href="#">log-files-total-size</a>
Description	<p>This command configures the limit for the total space that all log files can occupy on each storage device on the active CPM.</p> <p>When this threshold is reached, log events are no longer written to the files in the \log directory until SR OS removes older log files and the occupancy is below the limit.</p> <p>When unconfigured, there is no specific limit for the total size of all log files.</p> <p>Only log files in the \log directory with system generated names (including no file extension) are applicable toward the total size limit.</p> <p>If a user manually adds or deletes log files from the \log directory, the size of the files is not taken into account for up to 1 hour.</p> <p>The configured total size limit is not validated against the actual size of the installed storage devices. If the configured limit is larger than the installed CF device, the limit is never reached.</p>
Range	50 to 4194304
Units	megabytes
Introduced	23.3.R1

Platforms All

### **filter** [*filter-name*] *string*

Synopsis Enter the **filter** list instance  
 Context **configure log filter** *string*  
 Tree [filter](#)  
 Max. Instances 1500  
 Introduced 16.0.R1  
 Platforms All

### **[filter-name]** *string*

Synopsis Filter name  
 Context **configure log filter** *string*  
 Tree [filter](#)  
 String Length 1 to 64  
 Notes This element is part of a list key.  
 Introduced 21.2.R1  
 Platforms All

### **default-action** *keyword*

Synopsis Default action for the event filter  
 Context **configure log filter** *string* **default-action** *keyword*  
 Tree [default-action](#)

Synopsis	Log event severity level to filter out
Context	<b>configure log filter</b> <i>string</i> <b>named-entry</b> <i>string</i> <b>match severity</b> <b>neq</b> <i>keyword</i>
Tree	<b>neq</b>
Options	cleared, indeterminate, critical, major, minor, warning
Notes	The following elements are part of a choice: <b>eq</b> , <b>gt</b> , <b>gte</b> , <b>lt</b> , <b>lte</b> , or <b>neq</b> .
Introduced	21.2.R1
Platforms	All

### **subject**

Synopsis	Enter the <b>subject</b> context
Context	<b>configure log filter</b> <i>string</i> <b>named-entry</b> <i>string</i> <b>match subject</b>
Tree	<b>subject</b>
Introduced	21.2.R1
Platforms	All

### **eq string**

Synopsis	Log event subject string to match
Context	<b>configure log filter</b> <i>string</i> <b>named-entry</b> <i>string</i> <b>match subject</b> <b>eq</b> <i>string</i>
Tree	<b>eq</b>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .

Introduced 21.2.R1  
 Platforms All

### **neq** *string*

Synopsis Log event subject string to filter out  
 Context **configure log filter** *string* **named-entry** *string* **match subject neq** *string*  
 Tree [neq](#)  
 String Length 1 to 32  
 Notes The following elements are part of a choice: **eq** or **neq**.  
 Introduced 21.2.R1  
 Platforms All

### **regexp** *boolean*

Synopsis String comparison to determine if the log event matches the value of subject  
 Context **configure log filter** *string* **named-entry** *string* **match subject regexp** *boolean*  
 Tree [regexp](#)  
 Default false  
 Introduced 21.2.R1  
 Platforms All

### **vrtr-name**

Synopsis Enter the **vrtr-name** context  
 Context **configure log filter** *string* **named-entry** *string* **match vrtr-name**  
 Tree [vrtr-name](#)  
 Description Commands in this context configure the criteria for the name of a router instance.  
 The vrtr-name is a name for a router instance, in a special format, used in the logging system. Examples of names include Base and vprn101, where 101 is the service ID of the VPRN service. The name represents the router instance that generated the log event.  
 Introduced 21.2.R1  
 Platforms All

### **eq string**

Synopsis	Log event router instance to match
Context	<b>configure log filter string named-entry string match vrtr-name eq string</b>
Tree	<a href="#">eq</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.2.R1
Platforms	All

### **neq string**

Synopsis	Log event router instance to filter out
Context	<b>configure log filter string named-entry string match vrtr-name neq string</b>
Tree	<a href="#">neq</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>eq</b> or <b>neq</b> .
Introduced	21.2.R1
Platforms	All

### **regexp boolean**

Synopsis	Match the router instance string
Context	<b>configure log filter string named-entry string match vrtr-name regexp boolean</b>
Tree	<a href="#">regexp</a>
Default	false
Introduced	21.2.R1
Platforms	All

### **log-events**

Synopsis	Enter the <b>log-events</b> context
Context	<b>configure log log-events</b>
Tree	<a href="#">log-events</a>
Introduced	16.0.R1

Platforms All

### **adp event** *keyword*

Synopsis Enter the **adp** list instance  
Context **configure log log-events adp event** *keyword*  
Tree **adp**  
Introduced 16.0.R1  
Platforms 7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **event** *keyword*

Synopsis Log event as a trigger for one or more EHS handlers  
Context **configure log log-events adp event** *keyword*  
Tree **adp**  
Options tmnxDiscoveryEndNotify, tmnxDiscoveryCellularReq  
Notes This element is part of a list key.  
Introduced 16.0.R1  
Platforms 7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **generate** *boolean*

Synopsis Generate log events when the event occurs  
Context **configure log log-events adp event** *keyword generate* *boolean*  
Tree **generate**  
Introduced 16.0.R1  
Platforms 7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **repeat** *boolean*

Synopsis Repeat the log event until the condition is cleared  
Context **configure log log-events adp event** *keyword repeat* *boolean*  
Tree **repeat**  
Default false  
Introduced 16.0.R4

Platforms 7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **severity** *keyword*

Synopsis Severity level associated with event type  
Context **configure log log-events adp event** *keyword severity keyword*  
Tree [severity](#)  
Options cleared, indeterminate, critical, major, minor, warning  
Introduced 16.0.R1  
Platforms 7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **specific-throttle** *boolean*

Synopsis Use parameters to throttle the specific event  
Context **configure log log-events adp event** *keyword specific-throttle boolean*  
Tree [specific-throttle](#)  
Introduced 16.0.R1  
Platforms 7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
Context **configure log log-events adp event** *keyword specific-throttle-interval number*  
Tree [specific-throttle-interval](#)  
Range 1 to 1200  
Introduced 16.0.R1  
Platforms 7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **specific-throttle-limit** *number*

Synopsis Throttle limit within which events can be logged  
Context **configure log log-events adp event** *keyword specific-throttle-limit number*  
Tree [specific-throttle-limit](#)  
Range 1 to 20000  
Introduced 16.0.R1

Platforms 7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **throttle** *boolean*

Synopsis Throttle log events of this type  
 Context **configure log log-events adp event** *keyword throttle boolean*  
 Tree [throttle](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS-7, 7750 SR-1, 7750 SR-7, 7750 SR-1e, 7750 SR-2e, 7750 SR-s

### **anysec event** *keyword*

Synopsis Enter the **anysec** list instance  
 Context **configure log log-events anysec event** *keyword*  
 Tree [anysec](#)  
 Introduced 23.3.R1  
 Platforms 7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **event** *keyword*

Synopsis ANYSec module event  
 Context **configure log log-events anysec event** *keyword*  
 Tree [anysec](#)  
 Options tmnxAnySecMkaPskRollover, tmnxAnySecMkaOperStateChanged, tmnxAnySecMkaSessionInitiation, tmnxAnySecMkaSessionTermination, tmnxAnySecSessionEnabled, tmnxAnySecSessionDisabled, tmnxAnySecPeerInconsisRxSciDtctd, tmnxAnySecPeerInconsisRxSciClrd  
 Notes This element is part of a list key.  
 Introduced 23.3.R1  
 Platforms 7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **generate** *boolean*

Synopsis Generate log events when the event occurs  
 Context **configure log log-events anysec event** *keyword generate boolean*

---

Tree	<a href="#">generate</a>
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">anysec</a> <a href="#">event</a> <i>keyword</i> <a href="#">repeat</a> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">anysec</a> <a href="#">event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">anysec</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle</a> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
----------	--

---

Context	<b>configure log log-events anysec event keyword specific-throttle-interval number</b>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **specific-throttle-limit number**

Synopsis	Throttle limit within which events can be logged
Context	<b>configure log log-events anysec event keyword specific-throttle-limit number</b>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **throttle boolean**

Synopsis	Throttle log events of this type
Context	<b>configure log log-events anysec event keyword throttle boolean</b>
Tree	<a href="#">throttle</a>
Introduced	23.3.R1
Platforms	7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **application-assurance event keyword**

Synopsis	Enter the <b>application-assurance</b> list instance
Context	<b>configure log log-events application-assurance event keyword</b>
Tree	<a href="#">application-assurance</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">application-assurance</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">application-assurance</a>
Options	tmnxBsxIsaAaGrpFailureV2, tmnxBsxIsaAaGrpFailureClearV2, tmnxBsxIsaAaGrpNonRedundantV2, tmnxBsxIsaAaGrpSwitchover, tmnxBsxIsaAaGrpFlowFull, tmnxBsxIsaAaGrpFlowFullClear, tmnxBsxIsaAaSubLoadBalance, tmnxBsxIsaAaGrpCapCostThres, tmnxBsxIsaAaGrpCapCostThresClear, tmnxBsxAaSubscribersUnassigned, tmnxBsxAaSubscriberAcctDataLoss, tmnxBsxAaSubPolResExceeded, tmnxBsxAaSubPolResExceededClear, tmnxBsxIsaAaGrpFlowSetup, tmnxBsxIsaAaGrpFlowSetupClear, tmnxBsxIsaAaGrpPacketRate, tmnxBsxIsaAaGrpPacketRateClear, tmnxBsxIsaAaGrpBitRate, tmnxBsxIsaAaGrpBitRateClear, tmnxBsxTransIpPolAaSubCreated, tmnxBsxTransIpPolAaSubDeleted, tmnxBsxTransIpPolRadCoAAudit, tmnxBsxTransIpPolRadCoAError, tmnxBsxTransIpPolRadDiscError, tmnxBsxTransIpPolDhcpAddWarning, tmnxBsxTransIpPolDhcpDelWarning, tmnxBsxIsaAaGrpFmSbWaSBufOvld, tmnxBsxIsaAaGrpFmSbWaSBufOvldClr, tmnxBsxIsaAaGrpToSbWaSBufOvld, tmnxBsxIsaAaGrpToSbWaSBufOvldClr, tmnxBsxIsaAaGrpOvrlidCutthru, tmnxBsxIsaAaGrpOvrlidCutthruClr, tmnxBsxTransitIpPersistenceWarn, tmnxBsxAarpInstOperStateChanged, tmnxBsxAarpInstStateChanged, tmnxBsxRadApFailure, tmnxBsxRadApServOperStateChange, tmnxBsxMobileSubModifyFailure, tmnxBsxRadApIntrmUpdateSkipped, tmnxBsxHttpUrlParamLimitExceeded, tmnxBsxUrlFilterOperStateChange, tmnxBsxSubModifyFailure, tmnxBsxDnsIpCacheFull, tmnxBsxDnsIpCacheFullClear, tmnxBsxUrlListUpdate, tmnxBsxUrlListFailure, tmnxBsxIsaAaTimFileProcFailure, tmnxBsxStatTcaThreshCrossed, tmnxBsxStatTcaThreshCrossedClear, tmnxBsxStatPolcrTcaThreshCrossed, tmnxBsxStatPolcrTcaThreshCrClear, tmnxBsxStatFtrTcaThreshCrossed, tmnxBsxStatFtrTcaThreshCrClear, tmnxBsxStatFtrEnTcaThreshCrossed, tmnxBsxStatFtrEnTcaThreshCrClear, tmnxBsxTransIpPolDiamGxError, tmnxBsxDatapathCpuUsage, tmnxBsxDatapathCpuUsageClear, tmnxBsxTcpValTcaCrossed, tmnxBsxTcpValTcaCrossedClear, tmnxBsxCertProfileOperStateChngd, tmnxBsxSubQuarantined, tmnxBsxSubQuarantinedClear, tmnxBsxUrlFiltrWebServOprStateChg
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**generate boolean**

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">application-assurance</a> <a href="#">event</a> <i>keyword</i> <a href="#">generate</a> <i>boolean</i>

Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log log-events application-assurance event</a> <i>keyword</i> <a href="#">repeat</a> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log log-events application-assurance event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log log-events application-assurance event</a> <i>keyword</i> <a href="#">specific-throttle</a> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log log-events application-assurance event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>

Range	1 to 1200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log log-events application-assurance event keyword</a> <b>specific-throttle-limit</b> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log log-events application-assurance event keyword</a> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **aps event** *keyword*

Synopsis	Enter the <b>aps</b> list instance
Context	<b>configure</b> <a href="#">log log-events aps event keyword</a>
Tree	<a href="#">aps</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

### **event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log log-events aps event keyword</a>
Tree	<a href="#">aps</a>

Options	apsEventSwitchover, apsEventModeMismatch, apsEventChannelMismatch, apsEventPSBF, apsEventFEPLF, tApsModeMismatchClear, tApsChannelMismatchClear, tApsPSBFClear, tApsFEPLFClear, tApsLocalSwitchCommandSet, tApsLocalSwitchCommandClear, tApsRemoteSwitchCommandSet, tApsRemoteSwitchCommandClear, tApsMcApsCtlLinkStateChange, tApsChanTxLaisStateChange, tApsPrimaryChannelChange
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

### **generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">aps</a> <a href="#">event</a> <i>keyword</i> <b>generate</b> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

### **repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">aps</a> <a href="#">event</a> <i>keyword</i> <b>repeat</b> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

### **severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">aps</a> <a href="#">event</a> <i>keyword</i> <b>severity</b> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure log log-events aps event</b> <i>keyword specific-throttle boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure log log-events aps event</b> <i>keyword specific-throttle-interval number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure log log-events aps event</b> <i>keyword specific-throttle-limit number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure log log-events aps event</b> <i>keyword throttle boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-7/12/12e, 7750 SR-a, 7750 SR-e

**auto-prov event keyword**

Synopsis	Enter the <b>auto-prov</b> list instance
Context	<b>configure log log-events auto-prov event keyword</b>
Tree	<a href="#">auto-prov</a>
Introduced	16.0.R1
Platforms	All

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log log-events auto-prov event keyword</b>
Tree	<a href="#">auto-prov</a>
Options	autoNodeProv
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate boolean**

Synopsis	Generate log events when the event occurs
Context	<b>configure log log-events auto-prov event keyword generate boolean</b>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat boolean**

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure log log-events auto-prov event keyword repeat boolean</b>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">auto-prov</a> <a href="#">event</a> <i>keyword</i> <b>severity</b> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">auto-prov</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">auto-prov</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle-interval</b> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">auto-prov</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle-limit</b> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">auto-prov</a> <a href="#">event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bfd</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">bfd</a>
Options	tmnxBfdOnLspSessDown, tmnxBfdOnLspSessUp, tmnxBfdOnLspSessDeleted, tmnxBfdOnLspSessProtChange, tmnxBfdOnLspSessNoCpmNpResources, tmnxBfdOnLspSessNoTailResources, tmnxBfdOnLspExtSessDown, tmnxBfdOnLspExtSessUp, tmnxBfdOnLspExtSessDeleted, tmnxBfdOnLspExtSessProtChange, tmnxBfdOnLspExtSessNoCpmNpResrcs
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bfd</a> <a href="#">event</a> <i>keyword</i> <a href="#">generate</a> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure log log-events bfd event keyword repeat boolean</b>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure log log-events bfd event keyword severity keyword</b>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure log log-events bfd event keyword specific-throttle boolean</b>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure log log-events bfd event keyword specific-throttle-interval number</b>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bfd</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bfd</a> <a href="#">event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

**bgp** [event](#) *keyword*

Synopsis	Enter the <b>bgp</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bgp</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">bgp</a>
Introduced	16.0.R1
Platforms	All

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bgp</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">bgp</a>
Options	sendNotification, receiveNotification, bgpInterfaceDown, bgpConnNoKA, bgpConnNoOpenRcvd, bgpRejectConnBadLocAddr, bgpRemoteEndClosedConn, bgpPeerNotFound, bgpConnMgrTerminated, bgpTerminated, bgpNoMemoryPeer, bgpVariableRangeViolation, bgpCfgViol, tBgpPeerGRStatusChange, tBgpNgEstablished, tBgpNgBackwardTransition, tBgpPeerNgHoldTimeInconsistent, tBgpFlowspecUnsupportdComAction, tBgp4RouteInvalid, tBgp4PathAttrInvalid, tBgp4WithdrawnRtFromUpdateError,

tBgp4UpdateInvalid, tBgpGeneral, tBgpFibResourceFailPeer, tBgpReceivedInvalidNlri, tBgpMaxNgPfxLmt, tBgpMaxNgPfxLmtThresholdReached, tBgpInstanceDynamicPeerLmtReachd, tBgpPGDynamicPeerLmtReached, bgpEstablishedNotification, bgpBackwardTransNotification, tBgp4PathAttrDiscarded, tBgpPeerNgGRStatusChange, tBgpInstConvStateTransition, tBgpPeerNgGRStatusChange, tBgpPGDynNbrIfMaxSessLmtReachd

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log log-events bgp event</a> <i>keyword generate boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

### **repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log log-events bgp event</a> <i>keyword repeat boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

### **severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log log-events bgp event</a> <i>keyword severity keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters that throttle this specific event
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>bgp</b> <b>event</b> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<b>specific-throttle</b>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>bgp</b> <b>event</b> <i>keyword</i> <b>specific-throttle-interval</b> <i>number</i>
Tree	<b>specific-throttle-interval</b>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>bgp</b> <b>event</b> <i>keyword</i> <b>specific-throttle-limit</b> <i>number</i>
Tree	<b>specific-throttle-limit</b>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>bgp</b> <b>event</b> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<b>throttle</b>
Introduced	16.0.R1
Platforms	All

**bier event** *keyword*

Synopsis	Enter the <b>bier</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bier event</a> <i>keyword</i>
Tree	<a href="#">bier</a>
Introduced	19.5.R1
Platforms	All

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bier event</a> <i>keyword</i>
Tree	<a href="#">bier</a>
Options	vRtrBierBfrldCollision, vRtrBierMtMismatch, vRtrBierSubDomainMismatch, vRtrBierUnsupportedNhop
Notes	This element is part of a list key.
Introduced	19.5.R1
Platforms	All

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bier event</a> <i>keyword</i> <a href="#">generate</a> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	19.5.R1
Platforms	All

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bier event</a> <i>keyword</i> <a href="#">repeat</a> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	19.5.R1
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure log log-events bier event</b> <i>keyword severity keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	19.5.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure log log-events bier event</b> <i>keyword specific-throttle boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	19.5.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure log log-events bier event</b> <i>keyword specific-throttle-interval number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	19.5.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure log log-events bier event</b> <i>keyword specific-throttle-limit number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	19.5.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">bier event</a> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	19.5.R1
Platforms	All

**calltrace** [event](#) *keyword*

Synopsis	Enter the <b>calltrace</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">calltrace event</a> <i>keyword</i>
Tree	<a href="#">calltrace</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">calltrace event</a> <i>keyword</i>
Tree	<a href="#">calltrace</a>
Options	tmnxCallTraceMaxFilesNumReached, tmnxCallTraceLocSizeLimitReached, calltraceDebugEvent
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">calltrace event</a> <i>keyword</i> <b>generate</b> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">calltrace</a> <a href="#">event</a> <i>keyword</i> <b>repeat</b> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">calltrace</a> <a href="#">event</a> <i>keyword</i> <b>severity</b> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">calltrace</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">calltrace</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle-interval</b> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">calltrace</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle-limit</b> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">calltrace</a> <a href="#">event</a> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**cflowd** [event](#) *keyword*

Synopsis	Enter the <b>cflowd</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">cflowd</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">cflowd</a>
Introduced	16.0.R1
Platforms	All

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">cflowd</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">cflowd</a>
Options	tmnCflowdCreateFailure, tmnCflowdStateChange, tmnCflowdFlowCreateFailure, tmnCflowdPacketTxFailure
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">cflowd</a> <a href="#">event</a> <i>keyword</i> <b>generate</b> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">cflowd</a> <a href="#">event</a> <i>keyword</i> <b>repeat</b> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">cflowd</a> <a href="#">event</a> <i>keyword</i> <b>severity</b> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">cflowd</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">cflowd</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">cflowd</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">cflowd</a> <a href="#">event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

**chassis** [event](#) *keyword*

Synopsis	Enter the <b>chassis</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">chassis</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">chassis</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">efm-oam</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">efm-oam</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">efm-oam</a> <a href="#">event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

**elmi** [event](#) *keyword*

Synopsis	Enter the <b>elmi</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">elmi</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">elmi</a>
Introduced	16.0.R1
Platforms	All

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">elmi</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">elmi</a>
Options	tmnxElmilfStatusChangeEvent, tmnxElmiEVCStatusChangeEvent
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">elmi</a> <a href="#">event</a> <i>keyword</i> <a href="#">generate</a> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">elmi</a> <a href="#">event</a> <i>keyword</i> <a href="#">repeat</a> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">elmi</a> <a href="#">event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">elmi</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle</a> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">elmi</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">elmi</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">elmi</a> <a href="#">event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

**ering event keyword**

Synopsis	Enter the <b>ering</b> list instance
Context	<b>configure log log-events ering event keyword</b>
Tree	<b>ering</b>
Introduced	16.0.R1
Platforms	All

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log log-events ering event keyword</b>
Tree	<b>ering</b>
Options	tmnxEthRingPathFwdStateChange, tmnxEthRingApsPrvsnRaiseAlarm, tmnxEthRingApsPrvsnClearAlarm
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate boolean**

Synopsis	Generate log events when the event occurs
Context	<b>configure log log-events ering event keyword generate boolean</b>
Tree	<b>generate</b>
Introduced	16.0.R1
Platforms	All

**repeat boolean**

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure log log-events ering event keyword repeat boolean</b>
Tree	<b>repeat</b>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ering</a> <a href="#">event</a> <i>keyword severity keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ering</a> <a href="#">event</a> <i>keyword specific-throttle boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ering</a> <a href="#">event</a> <i>keyword specific-throttle-interval number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ering</a> <a href="#">event</a> <i>keyword specific-throttle-limit number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ering</a> <a href="#">event</a> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

**eth-cfm** [event](#) *keyword*

Synopsis	Enter the <b>eth-cfm</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">eth-cfm</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">eth-cfm</a>
Introduced	16.0.R1
Platforms	All

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">eth-cfm</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">eth-cfm</a>
Options	dot1agCfmFaultAlarm, tmnxDot1agCfmMepLbmTestComplete, tmnxDot1agCfmMepLtmTestComplete, tmnxDot1agCfmMepEthTestComplete, tmnxDot1agCfmMepDMTestComplete, tmnxDot1agCfmMepAisStateChanged, tmnxDot1agCfmMipEvaluation, tmnxDot1agCfmMepSLMTestComplete, tmnxDot1agCfmMepCsfStateChanged, tmnxDot1agCfmMepFciltyFaultRaise, tmnxDot1agCfmMepFciltyFaultClear
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">eth-cfm</a> <a href="#">event</a> <i>keyword</i> <b>generate</b> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1

Platforms All

### **repeat** *boolean*

Synopsis Repeat the log event until the condition is cleared  
 Context **configure** [log](#) [log-events](#) [eth-cfm](#) [event](#) *keyword* [repeat](#) *boolean*  
 Tree [repeat](#)  
 Default false  
 Introduced 16.0.R4  
 Platforms All

### **severity** *keyword*

Synopsis Severity level associated with event type  
 Context **configure** [log](#) [log-events](#) [eth-cfm](#) [event](#) *keyword* [severity](#) *keyword*  
 Tree [severity](#)  
 Options cleared, indeterminate, critical, major, minor, warning  
 Introduced 16.0.R1  
 Platforms All

### **specific-throttle** *boolean*

Synopsis Use parameters to throttle the specific event  
 Context **configure** [log](#) [log-events](#) [eth-cfm](#) [event](#) *keyword* [specific-throttle](#) *boolean*  
 Tree [specific-throttle](#)  
 Introduced 16.0.R1  
 Platforms All

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
 Context **configure** [log](#) [log-events](#) [eth-cfm](#) [event](#) *keyword* [specific-throttle-interval](#) *number*  
 Tree [specific-throttle-interval](#)  
 Range 1 to 1200

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
 Context **configure** [log](#) [log-events](#) [igmp-snooping event](#) *keyword specific-throttle-interval number*  
 Tree [specific-throttle-interval](#)  
 Range 1 to 1200  
 Introduced 16.0.R1  
 Platforms All

### **specific-throttle-limit** *number*

Synopsis Throttle limit within which events can be logged  
 Context **configure** [log](#) [log-events](#) [igmp-snooping event](#) *keyword specific-throttle-limit number*  
 Tree [specific-throttle-limit](#)  
 Range 1 to 20000  
 Introduced 16.0.R1

Platforms All

### **throttle** *boolean*

Synopsis Throttle log events of this type  
 Context **configure** [log](#) [log-events](#) [igmp-snooping event](#) *keyword* [throttle](#) *boolean*  
 Tree [throttle](#)  
 Introduced 16.0.R1  
 Platforms All

### **ip event** *keyword*

Synopsis Enter the **ip** list instance  
 Context **configure** [log](#) [log-events](#) [ip event](#) *keyword*  
 Tree [ip](#)  
 Introduced 16.0.R1  
 Platforms All

### **event** *keyword*

Synopsis Log event as a trigger for one or more EHS handlers  
 Context **configure** [log](#) [log-events](#) [ip event](#) *keyword*  
 Tree [ip](#)  
 Options clearRTMError, ipEtherBroadcast, ipDuplicateAddress, ipArpInfoOverwritten, fibAddFailed, qosNetworkPolicyMallocFailed, ipArpBadInterface, ipArpDuplicateIpAddress, ipArpDuplicateMacAddress, ipAnyDuplicateAddress, labelIndexAllocFailed  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **generate** *boolean*

Synopsis Generate log events when the event occurs  
 Context **configure** [log](#) [log-events](#) [ip event](#) *keyword* [generate](#) *boolean*  
 Tree [generate](#)

Introduced 16.0.R1  
Platforms All

### **repeat** *boolean*

Synopsis Repeat the log event until the condition is cleared  
Context **configure log log-events ip event** *keyword repeat boolean*  
Tree [repeat](#)  
Default false  
Introduced 16.0.R4  
Platforms All

### **severity** *keyword*

Synopsis Severity level associated with event type  
Context **configure log log-events ip event** *keyword severity keyword*  
Tree [severity](#)  
Options cleared, indeterminate, critical, major, minor, warning  
Introduced 16.0.R1  
Platforms All

### **specific-throttle** *boolean*

Synopsis Use parameters to throttle the specific event  
Context **configure log log-events ip event** *keyword specific-throttle boolean*  
Tree [specific-throttle](#)  
Introduced 16.0.R1  
Platforms All

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
Context **configure log log-events ip event** *keyword specific-throttle-interval number*  
Tree [specific-throttle-interval](#)  
Range 1 to 1200

Introduced 16.0.R1  
 Platforms All

### **specific-throttle-limit** *number*

Synopsis Throttle limit within which events can be logged  
 Context **configure** [log log-events ip event keyword specific-throttle-limit number](#)  
 Tree [specific-throttle-limit](#)  
 Range 1 to 20000  
 Introduced 16.0.R1  
 Platforms All

### **throttle** *boolean*

Synopsis Throttle log events of this type  
 Context **configure** [log log-events ip event keyword throttle boolean](#)  
 Tree [throttle](#)  
 Introduced 16.0.R1  
 Platforms All

### **ipsec event** *keyword*

Synopsis Enter the **ipsec** list instance  
 Context **configure** [log log-events ipsec event keyword](#)  
 Tree [ipsec](#)  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **event** *keyword*

Synopsis Log event as a trigger for one or more EHS handlers  
 Context **configure** [log log-events ipsec event keyword](#)  
 Tree [ipsec](#)  
 Options tIPsecRUTnIFailToCreate, tIPsecRUSAFailToAddRoute, tIPsecBfdIntfSessStateChgd, tIPsecRadAcctPlcyFailure, tIPSecTrustAnchorPrfOprChg, tIPsecTunnelEncapIpMtuTooSmall, tIPsecRuTnIFailToCreate, tIPsecRuTnIFailToAddRoute, tIPsecBfdIntfSessStateChgd, tIPsecRadAcctPlcyFailure, tIPSecTrustAnchorPrfOprChg, tIPsecTunnelEncapIpMtuTooSmall,

tmnxSecNotifCmptedCertHashChngd, tmnxSecNotifCmptedCertChnChngd, tmnxSecNotifSendChnNotInCmptChn, tmnxIPsecTunnelOperStateChange, tmnxIPsecGWOperStateChange, tIPsecRUTnlRemoved, tIPsecTunnelProtocolFailed

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log log-events ipsec event</a> <i>keyword</i> <a href="#">generate</a> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log log-events ipsec event</a> <i>keyword</i> <a href="#">repeat</a> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log log-events ipsec event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
----------	---

---

Context	<b>configure log log-events ipsec event</b> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<b>specific-throttle</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure log log-events ipsec event</b> <i>keyword</i> <b>specific-throttle-interval</b> <i>number</i>
Tree	<b>specific-throttle-interval</b>
Range	1 to 1200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure log log-events ipsec event</b> <i>keyword</i> <b>specific-throttle-limit</b> <i>number</i>
Tree	<b>specific-throttle-limit</b>
Range	1 to 20000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure log log-events ipsec event</b> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<b>throttle</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **isis event** *keyword*

Synopsis	Enter the <b>isis</b> list instance
Context	<b>configure log log-events isis event</b> <i>keyword</i>

Tree	<a href="#">isis</a>
Introduced	16.0.R1
Platforms	All

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">isis</a> <b>event</b> <i>keyword</i>
Tree	<a href="#">isis</a>

Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">isis</a> <a href="#">event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">isis</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle</a> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">isis</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>isis</b> <b>event</b> <i>keyword</i> <b>specific-throttle-limit</b> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>isis</b> <b>event</b> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

**l2tp** **event** *keyword*

Synopsis	Enter the <b>l2tp</b> list instance
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>l2tp</b> <b>event</b> <i>keyword</i>
Tree	<a href="#">l2tp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>l2tp</b> <b>event</b> <i>keyword</i>
Tree	<a href="#">l2tp</a>
Options	tmnxL2tpPeerUnreachable, tmnxL2tpIlsaMdaVRtrStateChange, tmnxL2tpLnsSePppSessionFailure, tmnxL2tpVappVRtrStateChange, tmnxL2tpTunnelBlacklisted, tmnxL2tpTunnelSelBlacklistFull, tmnxL2tpLnsPppNcpFailure, tmnxL2tpApFailure
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log log-events l2tp event</a> <i>keyword generate boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log log-events l2tp event</a> <i>keyword repeat boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log log-events l2tp event</a> <i>keyword severity keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log log-events l2tp event</a> <i>keyword specific-throttle boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">l2tp</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">l2tp</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">l2tp</a> <a href="#">event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>

 Introduced 16.0.R1  
 Platforms All

### **specific-throttle** *boolean*

Synopsis Use parameters to throttle the specific event  
 Context **configure** [log](#) [log-events](#) [oam](#) [event](#) *keyword* [specific-throttle](#) *boolean*  
 Tree [specific-throttle](#)  
 Introduced 16.0.R1  
 Platforms All

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
 Context **configure** [log](#) [log-events](#) [oam](#) [event](#) *keyword* [specific-throttle-interval](#) *number*  
 Tree [specific-throttle-interval](#)  
 Range 1 to 1200

Introduced	16.0.R1
Platforms	All

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">oam event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">oam event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

### **openflow** [event](#) *keyword*

Synopsis	Enter the <b>openflow</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">openflow event</a> <i>keyword</i>
Tree	<a href="#">openflow</a>
Introduced	16.0.R2
Platforms	All

### **event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">openflow event</a> <i>keyword</i>
Tree	<a href="#">openflow</a>
Options	tmnxOFFlowEntryInsertFailed
Notes	This element is part of a list key.

Introduced 16.0.R2  
Platforms All

### **generate** *boolean*

Synopsis Generate log events when the event occurs  
Context **configure** [log](#) [log-events](#) [openflow](#) [event](#) *keyword generate boolean*  
Tree [generate](#)  
Introduced 16.0.R2  
Platforms All

### **repeat** *boolean*

Synopsis Repeat the log event until the condition is cleared  
Context **configure** [log](#) [log-events](#) [openflow](#) [event](#) *keyword repeat boolean*  
Tree [repeat](#)  
Default false  
Introduced 16.0.R4  
Platforms All

### **severity** *keyword*

Synopsis Severity level associated with event type  
Context **configure** [log](#) [log-events](#) [openflow](#) [event](#) *keyword severity keyword*  
Tree [severity](#)  
Options cleared, indeterminate, critical, major, minor, warning  
Introduced 16.0.R2  
Platforms All

### **specific-throttle** *boolean*

Synopsis Use parameters to throttle the specific event  
Context **configure** [log](#) [log-events](#) [openflow](#) [event](#) *keyword specific-throttle boolean*  
Tree [specific-throttle](#)  
Introduced 16.0.R2

Platforms All

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
Context **configure** [log](#) [log-events](#) [openflow](#) [event](#) *keyword* [specific-throttle-interval](#) *number*  
Tree [specific-throttle-interval](#)  
Range 1 to 1200  
Introduced 16.0.R2  
Platforms All

### **specific-throttle-limit** *number*

Synopsis Throttle limit within which events can be logged  
Context **configure** [log](#) [log-events](#) [openflow](#) [event](#) *keyword* [specific-throttle-limit](#) *number*  
Tree [specific-throttle-limit](#)  
Range 1 to 20000  
Introduced 16.0.R2  
Platforms All

### **throttle** *boolean*

Synopsis Throttle log events of this type  
Context **configure** [log](#) [log-events](#) [openflow](#) [event](#) *keyword* [throttle](#) *boolean*  
Tree [throttle](#)  
Introduced 16.0.R2  
Platforms All

### **ospf** [event](#) *keyword*

Synopsis Enter the **ospf** list instance  
Context **configure** [log](#) [log-events](#) [ospf](#) [event](#) *keyword*  
Tree [ospf](#)  
Introduced 16.0.R1  
Platforms All

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log log-events ospf event keyword</a>
Tree	<a href="#">ospf</a>
Options	tmnxOspfVirtIfStateChange, tmnxOspfVirtNbrStateChange, tmnxOspfVirtIfConfigError, tmnxOspfVirtIfAuthFailure, tmnxOspfVirtIfRxBadPacket, tmnxOspfAreaOriginateLsa, tmnxOspfAreaMaxAgeLsa, tmnxOspfLsdbOverflow, tmnxOspfLsdbApproachingOverflow, tmnxOspfNssaTranslatorStatusChg, tmnxOspfRestartStatusChange, tmnxOspfVirtNbrRestartHlprStsChg, tmnxOspfSpfRunsStopped, tmnxOspfSpfRunsRestarted, tmnxOspfOverloadEntered, tmnxOspfOverloadExited, tmnxOspfAsOriginateLsa, tmnxOspfAsMaxAgeLsa, tmnxOspfShamIfStateChange, tmnxOspfShamNbrStateChange, tmnxOspfShamIfConfigError, tmnxOspfShamIfAuthFailure, tmnxOspfShamIfRxBadPacket, tmnxOspfShamNbrRestartHlprStsChg, tmnxOspfFailureDisabled, tmnxOspfExportLimitReached, tmnxOspfExportLimitWarning, tmnxOspfRoutesExpLmtDropped, tmnxOspfNgNbrStateChange, tmnxOspfNgIfConfigError, tmnxOspfNgIfAuthFailure, tmnxOspfNgIfRxBadPacket, tmnxOspfNgIfStateChange, tmnxOspfNgNbrRestartHlprStsChg, tmnxOspfNgLinkOriginateLsa, tmnxOspfNgLinkMaxAgeLsa, tmnxOspfNgLdpSyncTimerStarted, tmnxOspfNgLdpSyncExit, tmnxOspfSrSidError, tmnxOspfSrSidNotInLabelRange, tmnxOspfOverloadWarning, tmnxOspfRejectedAdjacencySid, tmnxOspfAdjBfdSessionSetupFail, tmnxOspfSrgbBadLabelRange, tmnxOspfRejectedAdjacencySet, tmnxOspfSidStatsIndexAlloc, tmnxOspfDynHostnameDuplicate, tmnxOspfDynHostnameInconsistent, tmnxOspfFaOperParticipationDown, tmnxOspfNgNbrStrictBfdBlocked
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate boolean**

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log log-events ospf event keyword generate boolean</a>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat boolean**

Synopsis	Repeat the log event until the condition is cleared
----------	---

Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ospf</a> <a href="#">event</a> <i>keyword</i> <a href="#">repeat</a> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

### **severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ospf</a> <a href="#">event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

### **specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ospf</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle</a> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

### **specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ospf</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
----------	--

Context	<b>configure log log-events ospf event keyword specific-throttle-limit number</b>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

### **throttle boolean**

Synopsis	Throttle log events of this type
Context	<b>configure log log-events ospf event keyword throttle boolean</b>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

### **pcap event keyword**

Synopsis	Enter the <b>pcap</b> list instance
Context	<b>configure log log-events pcap event keyword</b>
Tree	<a href="#">pcap</a>
Introduced	16.0.R1
Platforms	All

### **event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log log-events pcap event keyword</b>
Tree	<a href="#">pcap</a>
Options	tmnxPcapFileError, tmnxPcapBufferFull, tmnxPcapBufferReadWriteFailure, tmnxPcapSoftwareFailure
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcap event</a> <i>keyword</i> <b>generate</b> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcap event</a> <i>keyword</i> <b>repeat</b> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcap event</a> <i>keyword</i> <b>severity</b> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcap event</a> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcap event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcap event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcap event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

**pcep event** *keyword*

Synopsis	Enter the <b>pcep</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcep event</a> <i>keyword</i>
Tree	<a href="#">pcep</a>
Introduced	22.2.R1
Platforms	All

**event keyword**

Synopsis	PCEP module events
Context	<b>configure log log-events pcep event keyword</b>
Tree	<a href="#">pcep</a>
Options	tmnxPcepPccPeerStateChange
Notes	This element is part of a list key.
Introduced	22.2.R1
Platforms	All

**generate boolean**

Synopsis	Generate log events when the event occurs
Context	<b>configure log log-events pcep event keyword generate boolean</b>
Tree	<a href="#">generate</a>
Introduced	22.2.R1
Platforms	All

**repeat boolean**

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure log log-events pcep event keyword repeat boolean</b>
Tree	<a href="#">repeat</a>
Default	false
Introduced	22.2.R1
Platforms	All

**severity keyword**

Synopsis	Severity level associated with event type
Context	<b>configure log log-events pcep event keyword severity keyword</b>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	22.2.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcep event</a> <i>keyword</i> <a href="#">specific-throttle</a> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	22.2.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcep event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	22.2.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcep event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	22.2.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pcep event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	22.2.R1
Platforms	All

**pfcp event keyword**

Synopsis	Enter the <b>pfcp</b> list instance
Context	<b>configure log log-events pfcp event keyword</b>
Tree	<a href="#">pfcp</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**event keyword**

Synopsis	PFCP events
Context	<b>configure log log-events pfcp event keyword</b>
Tree	<a href="#">pfcp</a>
Options	tmnxPfcplInvalidle
Notes	This element is part of a list key.
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**generate boolean**

Synopsis	Generate log events when the event occurs
Context	<b>configure log log-events pfcp event keyword generate boolean</b>
Tree	<a href="#">generate</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**repeat boolean**

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure log log-events pfcp event keyword repeat boolean</b>
Tree	<a href="#">repeat</a>
Default	false
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure log log-events pfcpc event keyword severity keyword</b>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure log log-events pfcpc event keyword specific-throttle boolean</b>
Tree	<a href="#">specific-throttle</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure log log-events pfcpc event keyword specific-throttle-interval number</b>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure log log-events pfcpc event keyword specific-throttle-limit number</b>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log log-events pfc</a> <a href="#">event</a> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	21.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**pim event** *keyword*

Synopsis	Enter the <b>pim</b> list instance
Context	<b>configure</b> <a href="#">log log-events pim event</a> <i>keyword</i>
Tree	<a href="#">pim</a>
Introduced	16.0.R1
Platforms	All

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log log-events pim event</a> <i>keyword</i>
Tree	<a href="#">pim</a>
Options	vRtrPimNgIfNeighborLoss, vRtrPimNgIfNeighborUp, vRtrPimNgInvalidJoinPrune, vRtrPimNgInvalidRegister, vRtrPimNgGrpInSSMRange, vRtrPimNgBSRStateChange, vRtrPimNgHelloDropped, vRtrPimNgSGLimitExceeded, vRtrPimNgReplicationLmtExceeded, vRtrPimNgMDTLimitExceeded, vRtrPimNgMaxGrpsLimitExceeded, vRtrPimNgDataMtReused, vRtrPimNgMcacPlyDropped, vRtrPimNgInvalidIPmsiTunnel, vRtrPimNgMaxGraftRetry, vRtrPimNgBierInbInvSD, vRtrPimNgBierInbInvBfrld, vRtrPimNgUmhBMonFastFailPriToStb, vRtrPimNgUmhBMonFastFailStbToPri, vRtrPimNgInstMaxNbrReached, vRtrPimNgIfMaxNbrReached
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log log-events pim event</a> <i>keyword</i> <b>generate</b> <i>boolean</i>

Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log log-events pim event</a> <i>keyword repeat boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log log-events pim event</a> <i>keyword severity keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log log-events pim event</a> <i>keyword specific-throttle boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log log-events pim event</a> <i>keyword specific-throttle-interval number</i>
Tree	<a href="#">specific-throttle-interval</a>

---

Range	1 to 1200
Introduced	16.0.R1
Platforms	All

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pim event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pim event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

### **pim-snooping** [event](#) *keyword*

Synopsis	Enter the <b>pim-snooping</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pim-snooping</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">pim-snooping</a>
Introduced	16.0.R1
Platforms	All

### **event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pim-snooping</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">pim-snooping</a>

Options	tmnxPimSnpgIfNeighborLoss, tmnxPimSnpgIfNeighborUp, tmnxPimSnpgSGLimitExceeded, tmnxPimSnpgSnoopModeChanged, tmnxPimSnpgIfMaxNbrReached, tmnxPimSnpgMaxNbrReached
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log log-events pim-snooping event</a> <i>keyword</i> <a href="#">generate</a> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log log-events pim-snooping event</a> <i>keyword</i> <a href="#">repeat</a> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log log-events pim-snooping event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
----------	---

Context	<b>configure log log-events pim-snooping event</b> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<b>specific-throttle</b>
Introduced	16.0.R1
Platforms	All

### **specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure log log-events pim-snooping event</b> <i>keyword</i> <b>specific-throttle-interval</b> <i>number</i>
Tree	<b>specific-throttle-interval</b>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure log log-events pim-snooping event</b> <i>keyword</i> <b>specific-throttle-limit</b> <i>number</i>
Tree	<b>specific-throttle-limit</b>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure log log-events pim-snooping event</b> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<b>throttle</b>
Introduced	16.0.R1
Platforms	All

### **port event** *keyword*

Synopsis	Enter the <b>port</b> list instance
Context	<b>configure log log-events port event</b> <i>keyword</i>

Tree	<a href="#">port</a>
Introduced	16.0.R1
Platforms	All

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">port</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">port</a>

Introduced	16.0.R1
Platforms	All

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">port</a> <a href="#">event</a> <i>keyword</i> <b>generate</b> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">port</a> <a href="#">event</a> <i>keyword</i> <b>repeat</b> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">port</a> <a href="#">event</a> <i>keyword</i> <b>severity</b> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters that throttle this specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">port</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">port</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">port</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">port</a> <a href="#">event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

**pppoe** [event](#) *keyword*

Synopsis	Enter the <b>pppoe</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">pppoe</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">pppoe</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log log-events pppoe event keyword</b>
Tree	<a href="#">pppoe</a>
Options	tmnxPppoeSessionFailure, tmnxPppoeNcpFailure, tmnxMlpppBundleIndicatorsChange, tmnxPppoeLacSteeringActive, tmnxPppoeLacSteeringStopped, tmnxPppoeLacSteeringFailed, tmnxPppoeMaxSessionsOvrExceeded
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**generate boolean**

Synopsis	Generate log events when the event occurs
Context	<b>configure log log-events pppoe event keyword generate boolean</b>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**repeat boolean**

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure log log-events pppoe event keyword repeat boolean</b>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**severity keyword**

Synopsis	Severity level associated with event type
Context	<b>configure log log-events pppoe event keyword severity keyword</b>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **specific-throttle** *boolean*

Synopsis Use parameters to throttle the specific event  
Context **configure log log-events pppoe event** *keyword specific-throttle boolean*  
Tree [specific-throttle](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
Context **configure log log-events pppoe event** *keyword specific-throttle-interval number*  
Tree [specific-throttle-interval](#)  
Range 1 to 1200  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **specific-throttle-limit** *number*

Synopsis Throttle limit within which events can be logged  
Context **configure log log-events pppoe event** *keyword specific-throttle-limit number*  
Tree [specific-throttle-limit](#)  
Range 1 to 20000  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

### **throttle** *boolean*

Synopsis Throttle log events of this type  
Context **configure log log-events pppoe event** *keyword throttle boolean*  
Tree [throttle](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**pppoe-clnt event keyword**

Synopsis	Enter the <b>pppoe-clnt</b> list instance
Context	<b>configure log log-events pppoe-clnt event keyword</b>
Tree	<b>pppoe-clnt</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log log-events pppoe-clnt event keyword</b>
Tree	<b>pppoe-clnt</b>
Options	tmnxPppoeClientSetupFailure, tmnxPppoeClientEchoTimeout, tmnxPppoeClientNcpFailure
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**generate boolean**

Synopsis	Generate log events when the event occurs
Context	<b>configure log log-events pppoe-clnt event keyword generate boolean</b>
Tree	<b>generate</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**repeat boolean**

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure log log-events pppoe-clnt event keyword repeat boolean</b>
Tree	<b>repeat</b>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure log log-events pppoe-clnt event</b> <i>keyword severity keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure log log-events pppoe-clnt event</b> <i>keyword specific-throttle boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure log log-events pppoe-clnt event</b> <i>keyword specific-throttle-interval number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure log log-events pppoe-clnt event</b> <i>keyword specific-throttle-limit number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log log-events pppoe-clnt event</a> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ptp event** *keyword*

Synopsis	Enter the <b>ptp</b> list instance
Context	<b>configure</b> <a href="#">log log-events ptp event</a> <i>keyword</i>
Tree	<a href="#">ptp</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log log-events ptp event</a> <i>keyword</i>
Tree	<a href="#">ptp</a>
Options	tmnxPtpCardNotSupported, tmnxPtpCardNotSupportedClear, tmnxPtpMasterClockChangedEvent, tmnxPtpClockRecoveryStateChange, tmnxPtpOutOfResources, tmnxPtpOutOfResourcesClear, tmnxPtpDynamicChange, tmnxPtpPortNoTimestamping, tmnxPtpPortPtsfUnusable, tmnxPtpRequiresSystemReboot, tmnxPtpRequiresSystemRebootClear, tmnxPtpTimeRecoveryStateChange, tmnxPtpPeerNoTxTimestamping, tmnxPtpPeerNoTxTimestampingClear, tmnxPtpPeerNoRxTimestamping, tmnxPtpPeerNoRxTimestampingClear
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log log-events ptp event</a> <i>keyword</i> <b>generate</b> <i>boolean</i>

Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log log-events ptp event</a> <i>keyword</i> <a href="#">repeat</a> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log log-events ptp event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log log-events ptp event</a> <i>keyword</i> <a href="#">specific-throttle</a> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log log-events ptp event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>

Range	1 to 1200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log log-events ptp event keyword</a> <b>specific-throttle-limit</b> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log log-events ptp event keyword</a> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **python event** *keyword*

Synopsis	Enter the <b>python</b> list instance
Context	<b>configure</b> <a href="#">log log-events python event</a> <i>keyword</i>
Tree	<a href="#">python</a>
Introduced	21.2.R1
Platforms	All

### **event** *keyword*

Synopsis	Python module events
Context	<b>configure</b> <a href="#">log log-events python event</a> <i>keyword</i>
Tree	<a href="#">python</a>
Options	tmnxPythonInterpreterRestarted

---

Notes	This element is part of a list key.
Introduced	21.2.R1
Platforms	All

### **generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">python</a> <a href="#">event</a> <i>keyword</i> <a href="#">generate</a> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	21.2.R1
Platforms	All

### **repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">python</a> <a href="#">event</a> <i>keyword</i> <a href="#">repeat</a> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	21.2.R1
Platforms	All

### **severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">python</a> <a href="#">event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	21.2.R1
Platforms	All

### **specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">python</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle</a> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>

Introduced 21.2.R1  
Platforms All

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
Context **configure** [log](#) [log-events](#) [python](#) [event](#) *keyword* [specific-throttle-interval](#) *number*  
Tree [specific-throttle-interval](#)  
Range 1 to 1200  
Introduced 21.2.R1  
Platforms All

### **specific-throttle-limit** *number*

Synopsis Throttle limit within which events can be logged  
Context **configure** [log](#) [log-events](#) [python](#) [event](#) *keyword* [specific-throttle-limit](#) *number*  
Tree [specific-throttle-limit](#)  
Range 1 to 20000  
Introduced 21.2.R1  
Platforms All

### **throttle** *boolean*

Synopsis Throttle log events of this type  
Context **configure** [log](#) [log-events](#) [python](#) [event](#) *keyword* [throttle](#) *boolean*  
Tree [throttle](#)  
Introduced 21.2.R1  
Platforms All

### **radius** [event](#) *keyword*

Synopsis Enter the **radius** list instance  
Context **configure** [log](#) [log-events](#) [radius](#) [event](#) *keyword*  
Tree [radius](#)  
Introduced 16.0.R1

Platforms All

### **event** *keyword*

Synopsis Log event as a trigger for one or more EHS handlers

Context **configure** [log](#) [log-events](#) [radius](#) [event](#) *keyword*

Tree [radius](#)

Options tmnxRadSrvPlcySrvOperStateCh, tmnxRadRouteDownloadFailed, tmnxRadAcctOnOngoing

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

### **generate** *boolean*

Synopsis Generate log events when the event occurs

Context **configure** [log](#) [log-events](#) [radius](#) [event](#) *keyword* [generate](#) *boolean*

Tree [generate](#)

Introduced 16.0.R1

Platforms All

### **repeat** *boolean*

Synopsis Repeat the log event until the condition is cleared

Context **configure** [log](#) [log-events](#) [radius](#) [event](#) *keyword* [repeat](#) *boolean*

Tree [repeat](#)

Default false

Introduced 16.0.R4

Platforms All

### **severity** *keyword*

Synopsis Severity level associated with event type

Context **configure** [log](#) [log-events](#) [radius](#) [event](#) *keyword* [severity](#) *keyword*

Tree [severity](#)

Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

### **specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">radius</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

### **specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">radius</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle-interval</b> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">radius</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle-limit</b> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">radius</a> <a href="#">event</a> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>

Introduced 16.0.R1  
 Platforms All

### **rip event** *keyword*

Synopsis Enter the **rip** list instance  
 Context **configure log log-events rip event** *keyword*  
 Tree **rip**  
 Introduced 16.0.R1  
 Platforms All

### **event** *keyword*

Synopsis Log event as a trigger for one or more EHS handlers  
 Context **configure log log-events rip event** *keyword*  
 Tree **rip**  
 Options ripPacketDiscarded, vRtrRipAuthTypeMismatch, vRtrRipAuthTypeFailure, vRtrRipInstanceShuttingDown, vRtrRipInstanceRestarted, vRtrRipInstanceExpLmtReached, vRtrRipInstanceExpLmtWarning, vRtrRipInstanceRtsExpLmtDropped, vRtrRipPeerBfdDown  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **generate** *boolean*

Synopsis Generate log events when the event occurs  
 Context **configure log log-events rip event** *keyword generate* *boolean*  
 Tree **generate**  
 Introduced 16.0.R1  
 Platforms All

### **repeat** *boolean*

Synopsis Repeat the log event until the condition is cleared  
 Context **configure log log-events rip event** *keyword repeat* *boolean*

---

Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

### **severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rip event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

### **specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rip event</a> <i>keyword</i> <a href="#">specific-throttle</a> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

### **specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rip event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rip event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>

Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log log-events rip event</a> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

### **ripng event** *keyword*

Synopsis	Enter the <b>ripng</b> list instance
Context	<b>configure</b> <a href="#">log log-events ripng event</a> <i>keyword</i>
Tree	<a href="#">ripng</a>
Introduced	16.0.R3
Platforms	All

### **event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log log-events ripng event</a> <i>keyword</i>
Tree	<a href="#">ripng</a>
Options	tmnxRipNgPacketDiscarded, tmnxRipNgAuthTypeMismatch, tmnxRipNgAuthFailure, tmnxRipNgInstShuttingDown, tmnxRipNgInstRestarted, tmnxRipNgInstExpLmtReached, tmnxRipNgInstExpLmtWarning, tmnxRipNgInstRtsExpLmtDropped, tmnxRipNgIfUcastAddrNotUsed, tmnxRipNgPeerBfdDown
Notes	This element is part of a list key.
Introduced	16.0.R3
Platforms	All

**generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ripng</a> <a href="#">event</a> <i>keyword</i> <b>generate</b> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R3
Platforms	All

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ripng</a> <a href="#">event</a> <i>keyword</i> <b>repeat</b> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">ripng</a> <a href="#">event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R3
Platforms	All

**route-policy** [event](#) *keyword*

Synopsis	Enter the <b>route-policy</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">route-policy</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">route-policy</a>
Introduced	16.0.R1
Platforms	All

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">route-policy</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">route-policy</a>
Options	trigPolicyPrevEval
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate boolean**

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">route-policy</a> <a href="#">event</a> <i>keyword</i> <a href="#">generate</a> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat boolean**

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">route-policy</a> <a href="#">event</a> <i>keyword</i> <a href="#">repeat</a> <i>boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity keyword**

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">route-policy</a> <a href="#">event</a> <i>keyword</i> <a href="#">severity</a> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">route-policy</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle</a> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">route-policy</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-interval</a> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">route-policy</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">route-policy</a> <a href="#">event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

**rpki event keyword**

Synopsis	Enter the <b>rpki</b> list instance
Context	<b>configure log log-events rpki event keyword</b>
Tree	<a href="#">rpki</a>
Introduced	16.0.R1
Platforms	All

**event keyword**

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log log-events rpki event keyword</b>
Tree	<a href="#">rpki</a>
Options	tmnxRpkiNotifySession, tmnxRpkiStaleTimerExpiry
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**generate boolean**

Synopsis	Generate log events when the event occurs
Context	<b>configure log log-events rpki event keyword generate boolean</b>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat boolean**

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure log log-events rpki event keyword repeat boolean</b>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rpk</a> <a href="#">event</a> <i>keyword severity keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rpk</a> <a href="#">event</a> <i>keyword specific-throttle boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rpk</a> <a href="#">event</a> <i>keyword specific-throttle-interval number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rpk</a> <a href="#">event</a> <i>keyword specific-throttle-limit number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rpk</a> <a href="#">event</a> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

### **rsvp event** *keyword*

Synopsis	Enter the <b>rsvp</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rsvp</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">rsvp</a>
Introduced	16.0.R1
Platforms	All

### **event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rsvp</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">rsvp</a>
Options	vRtrRsvpStateChange, vRtrRsvplfStateChange, vRtrRsvplfNbrStateUp, vRtrRsvplfNbrStateDown, vRtrRsvpPEFailOverPriToStdBy, vRtrRsvpPEFailOverStdByToPri
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rsvp</a> <a href="#">event</a> <i>keyword</i> <b>generate</b> <i>boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

**repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>rsvp</b> <b>event</b> <i>keyword</i> <b>repeat</b> <i>boolean</i>
Tree	<b>repeat</b>
Default	false
Introduced	16.0.R4
Platforms	All

**severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>rsvp</b> <b>event</b> <i>keyword</i> <b>severity</b> <i>keyword</i>
Tree	<b>severity</b>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

**specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>rsvp</b> <b>event</b> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<b>specific-throttle</b>
Introduced	16.0.R1
Platforms	All

**specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <b>log</b> <b>log-events</b> <b>rsvp</b> <b>event</b> <i>keyword</i> <b>specific-throttle-interval</b> <i>number</i>
Tree	<b>specific-throttle-interval</b>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

**specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rsvp</a> <a href="#">event</a> <i>keyword</i> <a href="#">specific-throttle-limit</a> <i>number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

**throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">rsvp</a> <a href="#">event</a> <i>keyword</i> <a href="#">throttle</a> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

**satellite** [event](#) *keyword*

Synopsis	Enter the <b>satellite</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">satellite</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">satellite</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">satellite</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">satellite</a>
Options	tmnxSatelliteOperStateChange, tmnxSatSynclfTimRefSwitch, tmnxSatSynclfTimSystemQuality, tmnxSatSynclfTimRef1Quality, tmnxSatSynclfTimRef2Quality, tmnxSatSynclfTimHoldover, tmnxSatSynclfTimHoldoverClear, tmnxSatSynclfTimRef1Alarm, tmnxSatSynclfTimRef1AlarmClear, tmnxSatSynclfTimRef2Alarm, tmnxSatSynclfTimRef2AlarmClear, tmnxSatLocalForwardStateChg, tmnxSatLocalForwardSapStateChg
Notes	This element is part of a list key.

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **generate** *boolean*

Synopsis Generate log events when the event occurs  
Context **configure** [log log-events satellite event](#) *keyword generate boolean*  
Tree [generate](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **repeat** *boolean*

Synopsis Repeat the log event until the condition is cleared  
Context **configure** [log log-events satellite event](#) *keyword repeat boolean*  
Tree [repeat](#)  
Default false  
Introduced 16.0.R4  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **severity** *keyword*

Synopsis Severity level associated with event type  
Context **configure** [log log-events satellite event](#) *keyword severity keyword*  
Tree [severity](#)  
Options cleared, indeterminate, critical, major, minor, warning  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **specific-throttle** *boolean*

Synopsis Use parameters to throttle the specific event  
Context **configure** [log log-events satellite event](#) *keyword specific-throttle boolean*  
Tree [specific-throttle](#)  
Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
 Context **configure** [log](#) [log-events](#) [satellite event](#) *keyword* [specific-throttle-interval](#) *number*  
 Tree [specific-throttle-interval](#)  
 Range 1 to 1200  
 Introduced 16.0.R1  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **specific-throttle-limit** *number*

Synopsis Throttle limit within which events can be logged  
 Context **configure** [log](#) [log-events](#) [satellite event](#) *keyword* [specific-throttle-limit](#) *number*  
 Tree [specific-throttle-limit](#)  
 Range 1 to 20000

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log log-events security event</a> <i>keyword generate boolean</i>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

### **repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log log-events security event</a> <i>keyword repeat boolean</i>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

### **severity** *keyword*

Synopsis	Severity level associated with event type
----------	---

---

Context	<b>configure log log-events security event</b> <i>keyword severity keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

### **specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure log log-events security event</b> <i>keyword specific-throttle boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

### **specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure log log-events security event</b> <i>keyword specific-throttle-interval number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure log log-events security event</b> <i>keyword specific-throttle-limit number</i>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

### **throttle** *boolean*

Synopsis	Throttle log events of this type
----------	----------------------------------

Context	<b>configure log log-events security event</b> <i>keyword throttle boolean</i>
Tree	<b>throttle</b>
Introduced	16.0.R1
Platforms	All

### **sflow event** *keyword*

Synopsis	Enter the <b>sflow</b> list instance
Context	<b>configure log log-events sflow event</b> <i>keyword</i>
Tree	<b>sflow</b>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure log log-events sflow event</b> <i>keyword</i>
Tree	<b>sflow</b>
Options	none, tmnxSflowCpEntrySampling, tmnxSflowPacketTxFailure
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure log log-events sflow event</b> <i>keyword generate boolean</i>
Tree	<b>generate</b>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure log log-events sflow event</b> <i>keyword repeat boolean</i>

Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">sflow</a> <a href="#">event</a> <i>keyword</i> <b>severity</b> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">sflow</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle</b> <i>boolean</i>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">sflow</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle-interval</b> <i>number</i>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">sflow</a> <a href="#">event</a> <i>keyword</i> <b>specific-throttle-limit</b> <i>number</i>

Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">sflow</a> <a href="#">event</a> <i>keyword</i> <b>throttle</b> <i>boolean</i>
Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	7750 SR, 7750 SR-s, 7950 XRS

### **snmp event** *keyword*

Synopsis	Enter the <b>snmp</b> list instance
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">snmp</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">snmp</a>
Introduced	16.0.R1
Platforms	All

### **event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-events</a> <a href="#">snmp</a> <a href="#">event</a> <i>keyword</i>
Tree	<a href="#">snmp</a>
Options	coldStart, warmStart, authenticationFailure, linkDown, linkUp, risingAlarm, fallingAlarm, snmpdError
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **generate** *boolean*

Synopsis	Generate log events when the event occurs
----------	---

---

Context	<b>configure log log-events snmp event keyword generate boolean</b>
Tree	<b>generate</b>
Introduced	16.0.R1
Platforms	All

### **repeat boolean**

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure log log-events snmp event keyword repeat boolean</b>
Tree	<b>repeat</b>
Default	false
Introduced	16.0.R4
Platforms	All

### **severity keyword**

Synopsis	Severity level associated with event type
Context	<b>configure log log-events snmp event keyword severity keyword</b>
Tree	<b>severity</b>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

### **specific-throttle boolean**

Synopsis	Use parameters to throttle the specific event
Context	<b>configure log log-events snmp event keyword specific-throttle boolean</b>
Tree	<b>specific-throttle</b>
Introduced	16.0.R1
Platforms	All

### **specific-throttle-interval number**

Synopsis	Duration of the event specific throttling interval
Context	<b>configure log log-events snmp event keyword specific-throttle-interval number</b>

---

Tree	<a href="#">specific-throttle-interval</a>

### generate *boolean*

Synopsis Generate log events when the event occurs

Context **configure** [log log-events vrtr event](#) *keyword generate boolean*

Tree [generate](#)

Introduced 16.0.R1

Platforms All

### repeat *boolean*

Synopsis Repeat the log event until the condition is cleared

Context **configure** [log log-events vrtr event](#) *keyword repeat boolean*

Tree [repeat](#)

Default false

Introduced 16.0.R4

Platforms All

### severity *keyword*

Synopsis Severity level associated with event type

Context **configure** [log log-events vrtr event](#) *keyword severity keyword*

---

Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

### **specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log log-events vrtr event keyword specific-throttle boolean</a>
Tree	<a href="#">specific-throttle</a>
Introduced	16.0.R1
Platforms	All

### **specific-throttle-interval** *number*

Synopsis	Duration of the event specific throttling interval
Context	<b>configure</b> <a href="#">log log-events vrtr event keyword specific-throttle-interval number</a>
Tree	<a href="#">specific-throttle-interval</a>
Range	1 to 1200
Introduced	16.0.R1
Platforms	All

### **specific-throttle-limit** *number*

Synopsis	Throttle limit within which events can be logged
Context	<b>configure</b> <a href="#">log log-events vrtr event keyword specific-throttle-limit number</a>
Tree	<a href="#">specific-throttle-limit</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

### **throttle** *boolean*

Synopsis	Throttle log events of this type
Context	<b>configure</b> <a href="#">log log-events vrtr event keyword throttle boolean</a>

Tree	<a href="#">throttle</a>
Introduced	16.0.R1
Platforms	All

### **wlan-gw event** *keyword*

Synopsis	Enter the <b>wlan-gw</b> list instance
Context	<b>configure</b> <a href="#">log log-events wlan-gw event</a> <i>keyword</i>
Tree	<a href="#">wlan-gw</a>
Introduced	16.0.R1
Platforms	All

### **event** *keyword*

Synopsis	Log event as a trigger for one or more EHS handlers
Context	<b>configure</b> <a href="#">log log-events wlan-gw event</a> <i>keyword</i>
Tree	<a href="#">wlan-gw</a>
Options	tmnxWlanGwResrcProblemDetected, tmnxWlanGwResrcProblemCause, tmnxWlanGwTuQosProblem, tmnxWlanGwGrpOperStateChanged, tmnxWlanGwlomActive, tmnxWlanGwMgwConnected, tmnxWlanGwMgwRestarted, tmnxWlanGwNumMgwHi, tmnxWlanGwMgwStateChanged, tmnxWlanGwQosRadiusGtpMismatch, tmnxWlanGwSubIfRedActiveChanged, tmnxWlanGwDsmGtpTunnelSetupFail, tmnxWlanGwSubIfPmStartD6cFailed, tmnxWlanGwSubIfPmNewPIReqFailed, tmnxWlanGwSubIfPmAddNewPIFailed, tmnxWlanGwSubIfPmCrIntObjFailed, tmnxWlanGwSubIfPmPoolTimeout, tmnxWlanGwSubIfPmPoolUsageLow, tmnxWlanGwSubIfPmLsQryRtryFailed, tmnxWlanGwGtpMessageDropped, tmnxWlanGwSubIfPmPoolPartialUse, tmnxWlanGwBdCreated, tmnxWlanGwBdDeleted, tmnxWlanGwUeCreationFail, tmnxWlanGwUeReplacement, tmnxWlanGwGrpMemberUsageHigh
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log log-events wlan-gw event</a> <i>keyword</i> <a href="#">generate</a> <i>boolean</i>
Tree	<a href="#">generate</a>

Introduced 16.0.R1  
Platforms All

### **repeat** *boolean*

Synopsis Repeat the log event until the condition is cleared  
Context **configure log log-events wlan-gw event** keyword **repeat** *boolean*  
Tree [repeat](#)  
Default false  
Introduced 16.0.R4  
Platforms All

### **severity** *keyword*

Synopsis Severity level associated with event type  
Context **configure log log-events wlan-gw event** keyword **severity** *keyword*  
Tree [severity](#)  
Options cleared, indeterminate, critical, major, minor, warning  
Introduced 16.0.R1  
Platforms All

### **specific-throttle** *boolean*

Synopsis Use parameters to throttle the specific event  
Context **configure log log-events wlan-gw event** keyword **specific-throttle** *boolean*  
Tree [specific-throttle](#)  
Introduced 16.0.R1  
Platforms All

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
Context **configure log log-events wlan-gw event** keyword **specific-throttle-interval** *number*  
Tree [specific-throttle-interval](#)  
Range 1 to 1200

Introduced 16.0.R1  
 Platforms All

### **specific-throttle-limit** *number*

Synopsis Throttle limit within which events can be logged  
 Context **configure** [log](#) [log-events](#) [wlan-gw event](#) *keyword* [specific-throttle-limit](#) *number*  
 Tree [specific-throttle-limit](#)  
 Range 1 to 20000  
 Introduced 16.0.R1  
 Platforms All

### **throttle** *boolean*

Synopsis Throttle log events of this type  
 Context **configure** [log](#) [log-events](#) [wlan-gw event](#) *keyword* [throttle](#) *boolean*  
 Tree [throttle](#)  
 Introduced 16.0.R1  
 Platforms All

### **wpp event** *keyword*

Synopsis Enter the **wpp** list instance  
 Context **configure** [log](#) [log-events](#) [wpp event](#) *keyword*  
 Tree [wpp](#)  
 Introduced 16.0.R1  
 Platforms All

### **event** *keyword*

Synopsis Log event as a trigger for one or more EHS handlers  
 Context **configure** [log](#) [log-events](#) [wpp event](#) *keyword*  
 Tree [wpp](#)  
 Options [tmnxWppPortalStatChanged](#), [tmnxWppHostAuthenticationFailed](#),  
[tmnxWppPortalUnreachable](#), [tmnxWppPortalGroupStatChanged](#),  
[tmnxWppPGHostAuthFailed](#)

---

Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **generate** *boolean*

Synopsis	Generate log events when the event occurs
Context	<b>configure</b> <a href="#">log log-events wpp event keyword generate boolean</a>
Tree	<a href="#">generate</a>
Introduced	16.0.R1
Platforms	All

### **repeat** *boolean*

Synopsis	Repeat the log event until the condition is cleared
Context	<b>configure</b> <a href="#">log log-events wpp event keyword repeat boolean</a>
Tree	<a href="#">repeat</a>
Default	false
Introduced	16.0.R4
Platforms	All

### **severity** *keyword*

Synopsis	Severity level associated with event type
Context	<b>configure</b> <a href="#">log log-events wpp event keyword severity keyword</a>
Tree	<a href="#">severity</a>
Options	cleared, indeterminate, critical, major, minor, warning
Introduced	16.0.R1
Platforms	All

### **specific-throttle** *boolean*

Synopsis	Use parameters to throttle the specific event
Context	<b>configure</b> <a href="#">log log-events wpp event keyword specific-throttle boolean</a>
Tree	<a href="#">specific-throttle</a>

Introduced 16.0.R1  
Platforms All

### **specific-throttle-interval** *number*

Synopsis Duration of the event specific throttling interval  
Context **configure** [log log-events wpp event keyword](#) [specific-throttle-interval](#) *number*  
Tree [specific-throttle-interval](#)  
Range 1 to 1200  
Introduced 16.0.R1  
Platforms All

### **specific-throttle-limit** *number*

Synopsis Throttle limit within which events can be logged  
Context **configure** [log log-events wpp event keyword](#) [specific-throttle-limit](#) *number*  
Tree [specific-throttle-limit](#)  
Range 1 to 20000  
Introduced 16.0.R1  
Platforms All

### **throttle** *boolean*

Synopsis Throttle log events of this type  
Context **configure** [log log-events wpp event keyword](#) [throttle](#) *boolean*  
Tree [throttle](#)  
Introduced 16.0.R1  
Platforms All

### **log-id** [[name](#)] *string*

Synopsis Enter the **log-id** list instance  
Context **configure** [log log-id](#) *string*  
Tree [log-id](#)  
Max. Instances 30

Introduced 16.0.R1  
Platforms All

### **[name]** *string*

Synopsis Log ID  
Context **configure log log-id string**  
Tree [log-id](#)  
String Length 1 to 64  
Notes This element is part of a list key.  
Introduced 21.2.R1  
Platforms All

### **admin-state** *keyword*

Synopsis Administrative state of the log  
Context **configure log log-id string admin-state keyword**  
Tree [admin-state](#)  
Options enable, disable  
Default enable  
Introduced 16.0.R1  
Platforms All

### **description** *string*

Synopsis Text description  
Context **configure log log-id string description string**  
Tree [description](#)  
String Length 1 to 80  
Introduced 16.0.R1  
Platforms All

### **destination**

Synopsis Enter the **destination** context

Context	<b>configure log log-id string destination</b>
Tree	<b>destination</b>
Description	Commands in this context specify where log event data is to be sent.
Introduced	16.0.R1
Platforms	All

## cli

Synopsis	Enable the <b>cli</b> context
Context	<b>configure log log-id string destination cli</b>
Tree	<b>cli</b>
Description	Commands in this context configure log events directed to any subscribed CLI session. Subscribe to a CLI log from within a CLI session using the <b>tools perform log subscribe-to log-id</b> command. Events are sent to the CLI session for the duration of the CLI session or until a <b>tools perform log unsubscribe-from</b> command is issued. A local circular memory log is maintained for CLI logs.
Notes	The following elements are part of a choice: <b>cli</b> , <b>console</b> , <b>file</b> , <b>memory</b> , <b>netconf</b> , <b>snmp</b> , or <b>syslog</b> .
Introduced	16.0.R1
Platforms	All

## max-entries *number*

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Number of events stored in this CLI log
Context	<b>configure log log-id string destination cli max-entries number</b>
Tree	<b>max-entries</b>
Range	50 to 3000
Default	100
Introduced	16.0.R1
Platforms	All

## console

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Send log events to the system console port
Context	<b>configure log log-id string destination console</b>
Tree	<a href="#">console</a>
Description	When specified, the system directs log events to the console port. If the console is not connected, the system drops all entries.
Notes	The following elements are part of a choice: <b>cli</b> , <b>console</b> , <b>file</b> , <b>memory</b> , <b>netconf</b> , <b>snmp</b> , or <b>syslog</b> .
Introduced	16.0.R1
Platforms	All

## file reference

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	File to send log events
Context	<b>configure log log-id string destination file reference</b>
Tree	<a href="#">file</a>
Description	This command specifies the file where the system directs log events.  When the command is modified, log files are not written to the new location until a rollover occurs or the log is manually cleared. Use the <b>clear log</b> command to force a rollover. Subsequent log entries are then written to the new location. If a rollover does not occur or the log is not cleared, the system continues to use the old location.
Reference	<b>configure log file string</b>
Notes	The following elements are part of a choice: <b>cli</b> , <b>console</b> , <b>file</b> , <b>memory</b> , <b>netconf</b> , <b>snmp</b> , or <b>syslog</b> .
Introduced	16.0.R1
Platforms	All

## memory

Synopsis	Enable the <b>memory</b> context
----------	----------------------------------

Context	<b>configure log log-id string destination memory</b>
Tree	<b>memory</b>
Description	Commands in this context configure log events directed to a memory file. A memory file is a circular buffer. When the file is full, each new entry replaces the oldest entry in the log.
Notes	The following elements are part of a choice: <b>cli</b> , <b>console</b> , <b>file</b> , <b>memory</b> , <b>netconf</b> , <b>snmp</b> , or <b>syslog</b> .
Introduced	16.0.R1
Platforms	All

### **max-entries** *number*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Number of events stored in this memory log
Context	<b>configure log log-id string destination memory max-entries number</b>
Tree	<b>max-entries</b>
Range	50 to 3000
Default	100
Introduced	16.0.R1
Platforms	All

### **netconf**

Synopsis	Enable the <b>netconf</b> context
Context	<b>configure log log-id string destination netconf</b>
Tree	<b>netconf</b>
Description	Commands in this context configure log events directed to a NETCONF session as notifications. A NETCONF client can subscribe to a NETCONF log using the configured <b>netconf-stream</b> for the log in a subscription request. One or more NETCONF sessions can subscribe to a NETCONF log or stream.
Notes	The following elements are part of a choice: <b>cli</b> , <b>console</b> , <b>file</b> , <b>memory</b> , <b>netconf</b> , <b>snmp</b> , or <b>syslog</b> .
Introduced	16.0.R1
Platforms	All

**max-entries** *number***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Number of events stored in this NETCONF log
Context	<b>configure</b> <a href="#">log log-id string destination netconf max-entries number</a>
Tree	<a href="#">max-entries</a>
Range	50 to 3000
Introduced	16.0.R1
Platforms	All

**snmp**

Synopsis	Enable the <b>snmp</b> context
Context	<b>configure</b> <a href="#">log log-id string destination snmp</a>
Tree	<a href="#">snmp</a>
Description	Commands in this context configure log events directed to the <b>snmp-trap-group</b> associated with the log ID. A local circular memory log is maintained for SNMP logs.
Notes	The following elements are part of a choice: <b>cli</b> , <b>console</b> , <b>file</b> , <b>memory</b> , <b>netconf</b> , <b>snmp</b> , or <b>syslog</b> .
Introduced	16.0.R1
Platforms	All

**max-entries** *number***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Number of events stored in this SNMP log
Context	<b>configure</b> <a href="#">log log-id string destination snmp max-entries number</a>
Tree	<a href="#">max-entries</a>
Range	50 to 3000
Default	100
Introduced	16.0.R1

Platforms All

## syslog reference

### WARNING:

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Syslog collector to send log events
Context	<b>configure log log-id string destination syslog reference</b>
Tree	<a href="#">syslog</a>
Description	This command specifies the syslog collector to direct log events. To remain consistent with the standards governing syslog, messages to syslog are truncated to 1024 bytes.
Reference	<b>configure log syslog string</b>
Notes	The following elements are part of a choice: <b>cli</b> , <b>console</b> , <b>file</b> , <b>memory</b> , <b>netconf</b> , <b>snmp</b> , or <b>syslog</b> .
Introduced	16.0.R1
Platforms	All

## filter reference

Synopsis	Event filter policy with the log destination
Context	<b>configure log log-id string filter reference</b>
Tree	<a href="#">filter</a>
Reference	<b>configure log filter string</b>
Introduced	16.0.R1
Platforms	All

## netconf-stream string

Synopsis	Destination NETCONF stream name
Context	<b>configure log log-id string netconf-stream string</b>
Tree	<a href="#">netconf-stream</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	All

### **python-policy** *reference*

Synopsis	Python policy name
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">python-policy</a> <i>reference</i>
Tree	<a href="#">python-policy</a>
Reference	<b>configure</b> <a href="#">python</a> <a href="#">python-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

### **source**

Synopsis	Enter the <b>source</b> context
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">source</a>
Tree	<a href="#">source</a>
Introduced	16.0.R1
Platforms	All

### **change** *boolean*

Synopsis	Collect log events from change event stream
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">source</a> <a href="#">change</a> <i>boolean</i>
Tree	<a href="#">change</a>
Introduced	16.0.R1
Platforms	All

### **debug** *boolean*

Synopsis	Collect log events from the debug event stream
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">source</a> <a href="#">debug</a> <i>boolean</i>
Tree	<a href="#">debug</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **main** *boolean*

Synopsis	Collect log events from the main event stream
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">source</a> <b>main</b> <i>boolean</i>
Tree	<a href="#">main</a>
Introduced	16.0.R1
Platforms	All

### **security** *boolean*

Synopsis	Collect log events from the security event stream
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">source</a> <b>security</b> <i>boolean</i>
Tree	<a href="#">security</a>
Introduced	16.0.R1
Platforms	All

### **time-format** *keyword*

Synopsis	Time zone output for file log contents and syslog
Context	<b>configure</b> <a href="#">log</a> <a href="#">log-id</a> <i>string</i> <a href="#">time-format</a> <i>keyword</i>
Tree	<a href="#">time-format</a>
Options	utc, local
Default	utc
Introduced	16.0.R1
Platforms	All

### **route-preference**

Synopsis	Enter the <b>route-preference</b> context
Context	<b>configure</b> <a href="#">log</a> <a href="#">route-preference</a>
Tree	<a href="#">route-preference</a>
Introduced	16.0.R1
Platforms	All

**primary** *keyword*

Synopsis	Primary routing preference for traffic that is generated for SNMP notifications and syslog messages
Context	<b>configure</b> <a href="#">log route-preference primary</a> <i>keyword</i>
Tree	<a href="#">primary</a>
Options	inband, outband
Default	outband
Introduced	16.0.R1
Platforms	All

**secondary** *keyword*

Synopsis	Secondary route preference for SNMP and syslog traffic
Context	<b>configure</b> <a href="#">log route-preference secondary</a> <i>keyword</i>
Tree	<a href="#">secondary</a>
Options	inband, outband, none
Default	inband
Introduced	16.0.R1
Platforms	All

**services-all-events**

Synopsis	Enter the <b>services-all-events</b> context
Context	<b>configure</b> <a href="#">log services-all-events</a>
Tree	<a href="#">services-all-events</a>
Introduced	19.10.R1
Platforms	All

**service** [[service-name](#)] *reference*

Synopsis	Add a list entry for <b>service</b>
Context	<b>configure</b> <a href="#">log services-all-events service</a> <i>reference</i>
Tree	<a href="#">service</a>
Introduced	19.10.R1
Platforms	All

**[service-name] reference**

Synopsis	Administrative service name
Context	<b>configure log services-all-events service reference</b>
Tree	<a href="#">service</a>
Reference	<b>configure service vprn string</b>
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**snmp-trap-group [log-name] string**

Synopsis	Enter the <b>snmp-trap-group</b> list instance
Context	<b>configure log snmp-trap-group string</b>
Tree	<a href="#">snmp-trap-group</a>
Max. Instances	15
Introduced	16.0.R1
Platforms	All

**[log-name] string**

Synopsis	Log ID
Context	<b>configure log snmp-trap-group string</b>
Tree	<a href="#">snmp-trap-group</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	21.2.R1
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure log snmp-trap-group string description string</b>
Tree	<a href="#">description</a>

---

String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**trap-target** [*name*] *string*

Synopsis	Enter the <b>trap-target</b> list instance
Context	<b>configure</b> <a href="#">log snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i>
Tree	<a href="#">trap-target</a>
Max. Instances	25
Introduced	16.0.R1
Platforms	All

**[name]** *string*

Synopsis	Trap target name
Context	<b>configure</b> <a href="#">log snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i>
Tree	<a href="#">trap-target</a>
String Length	1 to 28
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the trap receiver
Context	<b>configure</b> <a href="#">log snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i> <a href="#">address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">address</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">log snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**notify-community** *string*

Synopsis	SNMPv1 or SNMPv2c community name string, or SNMPv3 security name, for sending a notification
Context	<b>configure</b> <a href="#">log snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i> <a href="#">notify-community</a> <i>string</i>
Tree	<a href="#">notify-community</a>
String Length	1 to 31
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**port** *number*

Synopsis	UDP port number to send messages to this remote SNMP notification collector
Context	<b>configure</b> <a href="#">log snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i> <a href="#">port</a> <i>number</i>
Tree	<a href="#">port</a>
Range	0   1 to 65535
Default	162
Introduced	16.0.R1
Platforms	All

**replay** *boolean*

Synopsis	Retransmit missed notifications
Context	<b>configure</b> <a href="#">log snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i> <a href="#">replay</a> <i>boolean</i>
Tree	<a href="#">replay</a>
Default	false

Introduced	16.0.R1
Platforms	All

### **security-level** *keyword*

Synopsis	Security level at which SNMP notification messages are sent to SNMP notification collector
Context	<b>configure</b> <a href="#">log snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i> <b>security-level</b> <i>keyword</i>
Tree	<a href="#">security-level</a>
Options	no-auth-no-privacy, auth-no-privacy, privacy
Default	no-auth-no-privacy
Introduced	16.0.R1
Platforms	All

### **version** *keyword*

Synopsis	SNMP version to format notification messages sent to this SNMP notification collector
Context	<b>configure</b> <a href="#">log snmp-trap-group</a> <i>string</i> <a href="#">trap-target</a> <i>string</i> <b>version</b> <i>keyword</i>
Tree	<a href="#">version</a>
Options	snmpv1, snmpv2c, snmpv3
Default	snmpv3
Introduced	16.0.R1
Platforms	All

### **syslog** [[syslog-name](#)] *string*

Synopsis	Enter the <b>syslog</b> list instance
Context	<b>configure</b> <a href="#">log syslog</a> <i>string</i>
Tree	<a href="#">syslog</a>
Max. Instances	10
Introduced	16.0.R1
Platforms	All

**[syslog-name]** *string*

Synopsis	Syslog name
Context	<b>configure log syslog</b> <i>string</i>
Tree	<a href="#">syslog</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	21.2.R1
Platforms	All

**address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the Syslog target host
Context	<b>configure log syslog</b> <i>string</i> <b>address</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">address</a>
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure log syslog</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**facility** *keyword*

Synopsis	Facility code for messages
Context	<b>configure log syslog</b> <i>string</i> <b>facility</b> <i>keyword</i>
Tree	<a href="#">facility</a>
Options	kernel, user, mail, systemd, auth, syslogd, printer, netnews, uucp, cron, authpriv, ftp, ntp, logaudit, logalert, cron2, local0, local1, local2, local3, local4, local5, local6, local7
Default	local7
Introduced	16.0.R1

Platforms All

## hostname

Synopsis Enter the **hostname** context

Context **configure log syslog** *string* **hostname**

Tree [hostname](#)

Description Commands in this context control how the HOSTNAME field of syslog messages is populated.

Introduced 23.7.R1

Platforms All

## use-system-name

Synopsis Enable the **use-system-name** context

Context **configure log syslog** *string* **hostname use-system-name**

Tree [use-system-name](#)

Description This command configures the system to use the system name configured with the **configure system name** command as the HOSTNAME field of syslog messages.

Do not use any spaces in the system name if it is being used for the syslog HOSTNAME.

Notes The following elements are part of a choice: **use-system-name** or **value**.

Introduced 23.7.R1

Platforms All

## value *string*

Synopsis Syslog HOSTNAME field value

Context **configure log syslog** *string* **hostname value** *string*

Tree [value](#)

Description This command configures the system to use a specified string as the HOSTNAME field of syslog messages.

Do not use any spaces in the string used for the syslog HOSTNAME.

String Length 1 to 255

Notes The following elements are part of a choice: **use-system-name** or **value**.

Introduced 23.7.R1

Platforms All

### **log-prefix** (*keyword* | *string*)

Synopsis String that is prepended to every log message sent to this target syslog host

Context **configure** **log syslog** *string* **log-prefix** (*keyword* | *string*)

Tree [log-prefix](#)

String Length 1 to 32

Options no-prefix

Default TMNX

Introduced 16.0.R1

Platforms All

### **port number**

Synopsis Destination port when sending syslog over UDP

Context **configure** **log syslog** *string* **port number**

Tree [port](#)

Range 0 | 1 to 65535

Default 514

Introduced 16.0.R1

Platforms All

### **severity keyword**

Synopsis Severity level threshold for the syslog message

Context **configure** **log syslog** *string* **severity keyword**

Tree [severity](#)

Options emergency, alert, critical, error, warning, notice, info, debug

Default info

Introduced 16.0.R1

Platforms All

**tls-client-profile** *reference***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	TLS client profile used to encrypt syslog communication
Context	<b>configure</b> <a href="#">log syslog</a> <i>string</i> <a href="#">tls-client-profile</a> <i>reference</i>
Tree	<a href="#">tls-client-profile</a>
Description	<p>This command specifies the Transport Layer Security (TLS) client profile used to encrypt syslog communications. When configured, syslog messages are sent using TLS.</p> <p>Any change to this command results in a brief interruption of the event log, which may cause the loss of a few syslog messages.</p> <p>When this command is unconfigured, the syslog messages are sent over UDP.</p>
Reference	<b>configure</b> <a href="#">system security</a> <a href="#">tls client-tls-profile</a> <i>string</i>
Introduced	21.10.R1
Platforms	All

**throttle-rate**

Synopsis	Enter the <b>throttle-rate</b> context
Context	<b>configure</b> <a href="#">log throttle-rate</a>
Tree	<a href="#">throttle-rate</a>
Introduced	16.0.R1
Platforms	All

**interval** *number*

Synopsis	Duration of an event throttling interval
Context	<b>configure</b> <a href="#">log throttle-rate</a> <a href="#">interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Range	1 to 1200
Default	1
Introduced	16.0.R1
Platforms	All

**limit number**

Synopsis	Number of log events within the throttle interval
Context	<b>configure</b> <a href="#">log throttle-rate</a> <i>limit number</i>
Tree	<a href="#">limit</a>
Range	1 to 20000
Default	2000
Introduced	16.0.R1
Platforms	All

## 3.25 macsec commands

```
configure
- macsec
  - apply-groups reference
  - apply-groups-exclude reference
  - connectivity-association string
    - admin-state keyword
    - anysec boolean
    - apply-groups reference
    - apply-groups-exclude reference
    - cipher-suite keyword
    - clear-tag-mode keyword
    - delay-protection boolean
    - description string
    - encryption-offset number
    - macsec-encrypt boolean
    - replay-protection boolean
    - replay-window-size number
  - static-cak
    - active-psk number
    - apply-groups reference
    - apply-groups-exclude reference
    - mka-hello-interval keyword
    - mka-key-server-priority number
    - pre-shared-key number
      - apply-groups reference
      - apply-groups-exclude reference
      - cak string
      - cak-name string
      - encryption-type keyword
  - mac-policy number
    - apply-groups reference
    - apply-groups-exclude reference
    - destination-mac-address string
```

### 3.25.1 macsec command descriptions

#### macsec

Synopsis	Enter the <b>macsec</b> context
Context	<b>configure macsec</b>
Tree	<a href="#">macsec</a>
Introduced	16.0.R1
Platforms	All

#### connectivity-association [[ca-name](#)] *string*

Synopsis	Enter the <b>connectivity-association</b> list instance
Context	<b>configure macsec connectivity-association</b> <i>string</i>
Tree	<a href="#">connectivity-association</a>
Introduced	16.0.R1
Platforms	All

#### [[ca-name](#)] *string*

Synopsis	Connectivity association name
Context	<b>configure macsec connectivity-association</b> <i>string</i>
Tree	<a href="#">connectivity-association</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

#### admin-state *keyword*

Synopsis	Administrative state of the connectivity association
Context	<b>configure macsec connectivity-association</b> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable

Introduced 16.0.R1  
 Platforms All

### **anysec** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Mark the CA for use by ANYsec encryption only

Context **configure** **macsec connectivity-association** *string anysec boolean*

Tree **anysec**

Description When configured to **true**, the system configures the Connectivity Association (CA) for exclusive use with ANYsec encryption.  
 The following MACsec commands cannot be configured while ANYsec is configured.

- **configure macsec connectivity-association clear-tag-mode**
- **configure macsec connectivity-association delay-protection**
- **configure macsec connectivity-association encryption-offset**
- **configure macsec connectivity-association macsec-encrypt**
- **configure macsec connectivity-association replay-window-size**
- **configure macsec mac-policy**

When configured to **false**, the system removes the CA.

Default false

Introduced 23.3.R1

Platforms 7750 SR-1-24D, 7750 SR-1-46S, 7750 SR-1-48D, 7750 SR-1-92S, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-1se

### **cipher-suite** *keyword*

Synopsis Data path encryption algorithm

Context **configure** **macsec connectivity-association** *string cipher-suite keyword*

Tree **cipher-suite**

Options gcm-aes-128, gcm-aes-256, gcm-aes-xpn-128, gcm-aes-xpn-256

Default gcm-aes-128

Introduced 16.0.R1

Platforms All

**clear-tag-mode** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Clear tag mode for clear text before the SecTAG
Context	<b>configure</b> <b>macsec connectivity-association</b> <i>string</i> <b>clear-tag-mode</b> <i>keyword</i>
Tree	<b>clear-tag-mode</b>
Options	none, single-tag, dual-tag
Default	none
Introduced	16.0.R1
Platforms	All

**delay-protection** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable delay protection
Context	<b>configure</b> <b>macsec connectivity-association</b> <i>string</i> <b>delay-protection</b> <i>boolean</i>
Tree	<b>delay-protection</b>
Default	false
Introduced	20.10.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <b>macsec connectivity-association</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**encryption-offset** *number*

Synopsis	Confidentiality (encryption) offset
Context	<b>configure</b> <b>macsec connectivity-association</b> <i>string</i> <b>encryption-offset</b> <i>number</i>
Tree	<a href="#">encryption-offset</a>
Range	0   30   50
Default	0
Introduced	16.0.R1
Platforms	All

**macsec-encrypt** *boolean*

Synopsis	Encrypt and authenticate all PDUs
Context	<b>configure</b> <b>macsec connectivity-association</b> <i>string</i> <b>macsec-encrypt</b> <i>boolean</i>
Tree	<a href="#">macsec-encrypt</a>
Description	When configured to <b>true</b> , all PDUs are encrypted and authenticated. When configured to <b>false</b> , all PDUs are transmitted in clear text, however, they are still authenticated and have the trailing ICV.
Default	true
Introduced	16.0.R1
Platforms	All

**replay-protection** *boolean*

Synopsis	Discard packet when not within the replay window size
Context	<b>configure</b> <b>macsec connectivity-association</b> <i>string</i> <b>replay-protection</b> <i>boolean</i>
Tree	<a href="#">replay-protection</a>
Description	When configured to <b>true</b> , replay protection is enabled and packets are discarded when they are not within the replay window size.  With replay protection, the sequence of the ID number of received packets is checked. If a packet arrives out of sequence and the difference between the packet IDs exceeds the replay protection window size, the packet is counted by the receiving port and discarded. For example if the replay protection window size is configured to five and a packet with an ID of 1006 arrives on the receiving link immediately following the packet assigned an ID of 1000, the packet with ID 1006 is counted and discarded because it is outside the parameter of the window size.  Replay protection is particularly useful for addressing man-in-the-middle attacks. A packet that is replayed by a man-in-the-middle attacker on the Ethernet link that arrives

on the receiving link out of sequence will be detected and dropped instead of forwarded through the network.

Replay protection should not be enabled in cases where packets are expected to arrive out of order.

When configured to **false**, replay protection is not enabled.

Default	false
Introduced	16.0.R1
Platforms	All

### **replay-window-size** *number*

Synopsis	Replay protection window size
Context	<b>configure macsec connectivity-association</b> <i>string</i> <b>replay-window-size</b> <i>number</i>
Tree	<b>replay-window-size</b>
Range	0 to 4294967294
Default	0
Introduced	16.0.R1
Platforms	All

### **static-cak**

Synopsis	Enter the <b>static-cak</b> context
Context	<b>configure macsec connectivity-association</b> <i>string</i> <b>static-cak</b>
Tree	<b>static-cak</b>
Description	Commands in this context configure the Connectivity Association Key (CAK) to manage the MACsec Key Agreement (MKA).
Introduced	16.0.R1
Platforms	All

### **active-psk** *number*

Synopsis	Active pre-shared-key (PSK)
Context	<b>configure macsec connectivity-association</b> <i>string</i> <b>static-cak</b> <b>active-psk</b> <i>number</i>
Tree	<b>active-psk</b>
Description	This command specifies the active transmitting PSK. If two PSKs are configured, the arriving MACsec MKA can be decrypted via CAKs using either PSK; however, only the active PSK is used for TX encryption of MKA PDUs.

Range	1 to 2
Default	1
Introduced	16.0.R1
Platforms	All

### **mka-hello-interval** *keyword*

Synopsis	MKA hello interval
Context	<b>configure</b> <b>macsec</b> <b>connectivity-association</b> <i>string</i> <b>static-cak</b> <b>mka-hello-interval</b> <i>keyword</i>
Tree	<a href="#">mka-hello-interval</a>
Description	This command configures the interval at which MKA hello packets are sent or received for the connectivity association.
Options	1, 2, 3, 4, 5, 6, 500ms
Default	2
Introduced	19.5.R1
Platforms	All

### **mka-key-server-priority** *number*

Synopsis	Key server priority used by the MKA protocol
Context	<b>configure</b> <b>macsec</b> <b>connectivity-association</b> <i>string</i> <b>static-cak</b> <b>mka-key-server-priority</b> <i>number</i>
Tree	<a href="#">mka-key-server-priority</a>
Description	This command specifies the key server priority used by the MACsec Key Agreement (MKA) protocol to select the key server when MACsec is enabled using static connectivity association key (CAK) security mode.
Range	0 to 255
Default	16
Introduced	16.0.R1
Platforms	All

### **pre-shared-key** [**psk-id**] *number*

Synopsis	Enter the <b>pre-shared-key</b> list instance
Context	<b>configure</b> <b>macsec</b> <b>connectivity-association</b> <i>string</i> <b>static-cak</b> <b>pre-shared-key</b> <i>number</i>
Tree	<a href="#">pre-shared-key</a>

Description	<p>Commands in this context configure pre-shared key attributes to enable MACsec using static connectivity association key (CAK) security mode.</p> <p>A pre-shared key includes a connectivity association key name (CKN) and a connectivity association key (CAK). The pre-shared key, the CKN and the CAK, must match on both ends of a link.</p> <p>A pre-shared key is configured on both devices at each end of a point-to-point link to enable MACsec via static CAK security mode. The MACsec Key Agreement (MKA) protocol is enabled after the successful MKA liveness negotiation.</p> <p>The encryption type is used to encrypt the SAK and authenticate the MKA packet. The symmetric encryption key SAK (Security Association Key) must be encrypted (wrapped) via the MKA protocols. The AES key is derived from the pre-shared-key.</p>
Max. Instances	2
Introduced	16.0.R1
Platforms	All

### **[psk-id]** *number*

Synopsis	Pre-shared-key (PSK) ID
Context	<b>configure macsec connectivity-association string static-cak pre-shared-key number</b>
Tree	<a href="#">pre-shared-key</a>
Range	1 to 2
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **cak** *string*

Synopsis	Connectivity association key (CAK) for the PSK
Context	<b>configure macsec connectivity-association string static-cak pre-shared-key number cak string</b>
Tree	<a href="#">cak</a>
Description	<p>This command specifies the connectivity association key (CAK) for the pre-shared key. Two values are derived from the CAK:</p> <ul style="list-style-type: none"> <li>• Key Encryption Key (KEK), used to encrypt the MKA and SAK (symmetric key used for data path PDUs) distributed between all members</li> <li>• Integrity Check Value (ICV), used to authenticate the MKA and SAK PDUs distributed between all members</li> </ul>
String Length	1 to 71

Introduced 16.0.R1  
Platforms All

### **cak-name** *string*

Synopsis Connectivity association key name (CKN) for the PSK  
Context **configure** **macsec** **connectivity-association** *string* **static-cak** **pre-shared-key** *number*  
**cak-name** *string*  
Tree **cak-name**  
Description This command specifies the connectivity association key name (CKN) for the pre-shared key. The CKN is appended to the MKA for identification of the appropriate CAK by the peer.  
String Length 1 to 64  
Introduced 16.0.R1  
Platforms All

### **encryption-type** *keyword*

Synopsis Encryption for authentication of the MKA packet  
Context **configure** **macsec** **connectivity-association** *string* **static-cak** **pre-shared-key** *number*  
**encryption-type** *keyword*  
Tree **encryption-type**  
Options aes-128-cmac, aes-256-cmac  
Notes This element is mandatory.  
Introduced 16.0.R1  
Platforms All

### **mac-policy** [**mac-policy-id**] *number*

Synopsis Enter the **mac-policy** list instance  
Context **configure** **macsec** **mac-policy** *number*  
Tree **mac-policy**  
Introduced 16.0.R5  
Platforms All

**[mac-policy-id] number**

Synopsis	MAC address policy ID
Context	<b>configure macsec mac-policy number</b>
Tree	<a href="#">mac-policy</a>
Max. Range	0 to 4294967295
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

**destination-mac-address [dest-mac-addr] string**

Synopsis	Add a list entry for <b>destination-mac-address</b>
Context	<b>configure macsec mac-policy number destination-mac-address string</b>
Tree	<a href="#">destination-mac-address</a>
Max. Instances	5
Introduced	16.0.R5
Platforms	All

**[dest-mac-addr] string**

Synopsis	Destination MAC address added to the MAC policy
Context	<b>configure macsec mac-policy number destination-mac-address string</b>
Tree	<a href="#">destination-mac-address</a>
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

## 3.26 mcac commands

```

Platforms	All

**policy** [[policy-name](#)] *string*

Synopsis	Enter the <b>policy</b> list instance
Context	<b>configure mcac policy</b> <i>string</i>
Tree	<a href="#">policy</a>
Introduced	16.0.R1
Platforms	All

**[policy-name]** *string*

Synopsis	Name of the global MCAC channel definition policy
Context	<b>configure mcac policy</b> <i>string</i>
Tree	<a href="#">policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**bundle** [[bundle-name](#)] *string*

Synopsis	Enter the <b>bundle</b> list instance
Context	<b>configure mcac policy</b> <i>string bundle string</i>
Tree	<a href="#">bundle</a>
Max. Instances	64
Introduced	16.0.R1
Platforms	All

**[bundle-name]** *string*

Synopsis	Multicast policy bundle name
Context	<b>configure mcac policy string bundle string</b>
Tree	<b>bundle</b>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the policy bundle
Context	<b>configure mcac policy string bundle string admin-state keyword</b>
Tree	<b>admin-state</b>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**bandwidth** *number*

Synopsis	Maximum bandwidth for the MCAC policy bundle
Context	<b>configure mcac policy string bundle string bandwidth number</b>
Tree	<b>bandwidth</b>
Range	1 to 4294967295
Units	kilobps
Default	100
Introduced	16.0.R1
Platforms	All

**channel** **start** (*ipv4-address-no-zone | ipv6-address-no-zone*) **end** (*ipv4-address-no-zone | ipv6-address-no-zone*) **source** (*ipv4-prefix | ipv6-prefix*)

Synopsis	Enter the <b>channel</b> list instance
----------	--

Context	<b>configure mcac policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<b>channel</b>
Introduced	16.0.R1
Platforms	All

### **start** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Starting multicast IP address for a multicast stream
Context	<b>configure mcac policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<b>channel</b>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Ending multicast IP address for a multicast stream
Context	<b>configure mcac policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<b>channel</b>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **source** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Source prefix for the multicast IP stream
Context	<b>configure mcac policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<b>channel</b>
Notes	This element is part of a list key.

Introduced	16.0.R1
Platforms	All

**bandwidth** *number*

Synopsis	Bandwidth required by the channel
Context	<b>configure mcac policy string bundle string channel start</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>source</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>bandwidth</b> <i>number</i>
Tree	<a href="#">bandwidth</a>
Range	10 to 10000000
Units	kilobps
Default	10
Introduced	16.0.R1
Platforms	All

**priority-class** *keyword*

Synopsis	Channel classification for when LAG ports change state
Context	<b>configure mcac policy string bundle string channel start</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>source</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>priority-class</b> <i>keyword</i>
Tree	<a href="#">priority-class</a>
Options	low, high
Default	low
Introduced	16.0.R1
Platforms	All

**type** *keyword*

Synopsis	Channel type
Context	<b>configure mcac policy string bundle string channel start</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <b>source</b> ( <i>ipv4-prefix   ipv6-prefix</i> ) <b>type</b> <i>keyword</i>
Tree	<a href="#">type</a>
Options	optional, mandatory

Introduced	16.0.R1
Platforms	All

**[level-id] *number***

Synopsis	Bandwidth level ID for an MCAC constraint
Context	<b>configure mcac policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>mc-constraints level</b> <i>number</i>
Tree	<b>level</b>
Range	1 to 8
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**bandwidth *number***

Synopsis	Bandwidth available for this level
Context	<b>configure mcac policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>mc-constraints level</b> <i>number</i> <b>bandwidth</b> <i>number</i>
Tree	<b>bandwidth</b>
Range	0 to 2147483647
Units	kilobps
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**use-lag-port-weight *boolean***

Synopsis	Use LAG port weight in calculating MCAC constraints
Context	<b>configure mcac policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>mc-constraints use-lag-port-weight</b> <i>boolean</i>
Tree	<b>use-lag-port-weight</b>
Description	When configured to <b>true</b> , port weight is used when determining available bandwidth per level when LAG ports go down or come up. This command is required for proper operation on mixed port-speed LAGs and can also be used for unmixed port-speed LAGs.
Default	false
Introduced	16.0.R1
Platforms	All

**default-action** *keyword*

Synopsis	Default action for the MCAC policy
Context	<b>configure mcac policy</b> <i>string</i> <b>default-action</b> <i>keyword</i>
Tree	<b>default-action</b>
Options	accept, discard
Default	discard
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure mcac policy</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

## 3.27 mirror commands

### 3.27.1 mirror command descriptions

#### mirror

Synopsis	Enter the <b>mirror</b> context
Context	<b>configure mirror</b>
Tree	<a href="#">mirror</a>
Introduced	16.0.R1
Platforms	All

#### global-sampling-rate *number*

Synopsis	System wide global sampling rate
Context	<b>configure mirror global-sampling-rate</b> <i>number</i>
Tree	<a href="#">global-sampling-rate</a>
Description	<p>This command configures the global sampling rate. The global sampling rate provides a higher sampling rate than the sampling rate specified on the mirror destination. When set, this command applies to all mirror destination services that have the <b>use-global-sampling-rate</b> command configured.</p> <p>The global sampling rate takes precedence over the rate specified on the mirror destination. This means that when this command and the <b>configure mirror mirror-dest sampling-rate</b> are configured under the same mirror destination, the system automatically samples using the higher rate configured with this command and ignores the lower rate configured with the <b>sampling-rate</b> command.</p> <p>When unconfigured, no mirror destinations are associated to a global sampling rate and all mirror destinations mirror at the full rate, which means every packet is mirrored unless a mirror destination rate is specified.</p>
Range	0   2 to 255
Default	0
Introduced	22.10.R1
Platforms	All

#### mirror-dest [[service-name](#)] *string*

Synopsis	Enter the <b>mirror-dest</b> list instance
Context	<b>configure mirror mirror-dest</b> <i>string</i>
Tree	<a href="#">mirror-dest</a>

Max. Instances	255
Introduced	16.0.R1
Platforms	All

**[service-name] string**

Synopsis	Administrative service name
Context	<b>configure mirror mirror-dest string</b>
Tree	<a href="#">mirror-dest</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state keyword**

Synopsis	Administrative state of the service
Context	<b>configure mirror mirror-dest string admin-state keyword</b>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

**description string**

Synopsis	Text description
Context	<b>configure mirror mirror-dest string description string</b>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

## encap

Synopsis	Enter the <b>encap</b> context
Context	<b>configure mirror mirror-dest string encap</b>
Tree	<a href="#">encap</a>
Introduced	16.0.R1
Platforms	All

## layer-3-encap

Synopsis	Enable the <b>layer-3-encap</b> context
Context	<b>configure mirror mirror-dest string encap layer-3-encap</b>
Tree	<a href="#">layer-3-encap</a>
Introduced	16.0.R1
Platforms	All

## direction-bit *boolean*

Synopsis	Use the highest bit to specify traffic flow direction
Context	<b>configure mirror mirror-dest string encap layer-3-encap direction-bit <i>boolean</i></b>
Tree	<a href="#">direction-bit</a>
Default	false
Introduced	16.0.R1
Platforms	All

## gateway

Synopsis	Enable the <b>gateway</b> context
Context	<b>configure mirror mirror-dest string encap layer-3-encap gateway</b>
Tree	<a href="#">gateway</a>
Introduced	16.0.R1
Platforms	All

## ip-address

Synopsis	Enter the <b>ip-address</b> context
----------	-------------------------------------

---

Context	<b>configure mirror mirror-dest string encap layer-3-encap gateway ip-address</b>
Tree	<a href="#">ip-address</a>
Introduced	16.0.R1
Platforms	All

### **destination string**

Synopsis	IPv4 destination address for the gateway
Context	<b>configure mirror mirror-dest string encap layer-3-encap gateway ip-address destination string</b>
Tree	<a href="#">destination</a>
Introduced	16.0.R1
Platforms	All

### **source string**

Synopsis	IPv4 source address for the gateway
Context	<b>configure mirror mirror-dest string encap layer-3-encap gateway ip-address source string</b>
Tree	<a href="#">source</a>
Introduced	16.0.R1
Platforms	All

### **udp-port**

Synopsis	Enter the <b>udp-port</b> context
Context	<b>configure mirror mirror-dest string encap layer-3-encap gateway udp-port</b>
Tree	<a href="#">udp-port</a>
Introduced	16.0.R1
Platforms	All

### **destination number**

Synopsis	UDP destination port to use with the gateway
Context	<b>configure mirror mirror-dest string encap layer-3-encap gateway udp-port destination number</b>

Tree	<a href="#">destination</a>
Range	0   1 to 65535
Default	0
Introduced	16.0.R1
Platforms	All

### **source number**

Synopsis	UDP source port to use with the gateway
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">encap</a> <a href="#">layer-3-encap</a> <a href="#">gateway</a> <a href="#">udp-port</a> <a href="#">source</a> <i>number</i>
Tree	<a href="#">source</a>
Range	0   1 to 65535
Default	0
Introduced	16.0.R1
Platforms	All

### **header-type keyword**

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Header type for Layer 3 encapsulation
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">encap</a> <a href="#">layer-3-encap</a> <a href="#">header-type</a> <i>keyword</i>
Tree	<a href="#">header-type</a>
Options	ip-udp-shim, ip-gre, ip-udp-shim-sampled
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **router-instance string**

Synopsis	Router instance to use with routed encapsulation
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">encap</a> <a href="#">layer-3-encap</a> <a href="#">router-instance</a> <i>string</i>
Tree	<a href="#">router-instance</a>

Default	Base
Introduced	16.0.R1
Platforms	All

**endpoint** *[name]* *string*

Synopsis	Enter the <b>endpoint</b> list instance
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>endpoint</b> <i>string</i>
Tree	<b>endpoint</b>
Max. Instances	2
Introduced	16.0.R1
Platforms	All

**[name]** *string*

Synopsis	Service endpoint name
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>endpoint</b> <i>string</i>
Tree	<b>endpoint</b>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>endpoint</b> <i>string</i> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

**revert-time** (*number* | *keyword*)

Synopsis	Time to wait before reverting back to primary spoke SDP
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>endpoint</b> <i>string</i> <b>revert-time</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>revert-time</b>
Range	1 to 600
Units	seconds
Options	never, immediate
Default	immediate
Introduced	16.0.R1
Platforms	All

**fc** *keyword*

Synopsis	Forwarding class for destination traffic
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>fc</b> <i>keyword</i>
Tree	<b>fc</b>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	16.0.R1
Platforms	All

**pcap** [*session-name*] *string*

Synopsis	Enter the <b>pcap</b> list instance
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>pcap</b> <i>string</i>
Tree	<b>pcap</b>
Max. Instances	1
Introduced	16.0.R1
Platforms	All

**[session-name]** *string*

Synopsis	PCAP session name
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>pcap</b> <i>string</i>

Tree	<a href="#">pcap</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **file-url string**

Synopsis	URL and file name for packet capture transfer
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">pcap</a> <i>string</i> <a href="#">file-url</a> <i>string</i>
Tree	<a href="#">file-url</a>
String Length	1 to 180
Introduced	16.0.R1
Platforms	All

### **per-lag-hashing boolean**

Synopsis	Enable per-LAG hashing on the mirror destination
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">per-lag-hashing</a> <i>boolean</i>
Tree	<a href="#">per-lag-hashing</a>
Description	<p>When configured to <b>true</b>, the router enables the use of all link members of the mirror destination SAP or SDP of type LAG. The hashing to link members are based on IP flows.</p> <p>When configured to <b>false</b>, the router disables per-LAG hashing. All mirrored packets sent to a SAP or SDP of type LAG, are sent to only one of the LAG link members. If the link member to which the mirrored packets are being sent fails, another link member takes over and provides mirrored packet forwarding. Although no hashing is performed, resiliency is still provided by this next link member.</p>
Default	false
Introduced	23.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **remote-source**

Synopsis	Enable the <b>remote-source</b> context
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">remote-source</a>
Tree	<a href="#">remote-source</a>

Introduced 16.0.R1  
 Platforms All

### **far-end** [*far-end-addr*] *string*

Synopsis Enter the **far-end** list instance  
 Context **configure** *mirror mirror-dest string remote-source far-end string*  
 Tree *far-end*  
 Introduced 16.0.R1  
 Platforms All

### **[far-end-addr]** *string*

Synopsis Far end IP address  
 Context **configure** *mirror mirror-dest string remote-source far-end string*  
 Tree *far-end*  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **icb** *boolean*

Synopsis Remote source as an inter-chassis backup  
 Context **configure** *mirror mirror-dest string remote-source far-end string icb boolean*  
 Tree *icb*  
 Default false  
 Introduced 16.0.R1  
 Platforms All

### **ing-vc-label** *number*

Synopsis Ingress virtual circuit label  
 Context **configure** *mirror mirror-dest string remote-source far-end string ing-vc-label number*  
 Tree *ing-vc-label*  
 Range 32 to 18431

Notes	The following elements are part of a choice: <b>ing-vc-label</b> or <b>label-signaling</b> .
Introduced	16.0.R1
Platforms	All

### **label-signaling** *keyword*

Synopsis	Protocol to obtain the ingress labels
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>remote-source</b> <b>far-end</b> <i>string</i> <b>label-signaling</b> <i>keyword</i>
Tree	<b>label-signaling</b>
Options	tldp
Default	tldp
Notes	The following elements are part of a choice: <b>ing-vc-label</b> or <b>label-signaling</b> .
Introduced	16.0.R1
Platforms	All

### **vc-id** *number*

Synopsis	Virtual circuit ID associated with the remote source
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>remote-source</b> <b>far-end</b> <i>string</i> <b>vc-id</b> <i>number</i>
Tree	<b>vc-id</b>
Range	1 to 4294967295
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **spoke-sdp** [**sdp-bind-id**] *string*

Synopsis	Enter the <b>spoke-sdp</b> list instance
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>remote-source</b> <b>spoke-sdp</b> <i>string</i>
Tree	<b>spoke-sdp</b>
Introduced	16.0.R1
Platforms	All

**[sdp-bind-id]** *string*

Synopsis	SDP ID number
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>remote-source</b> <b>spoke-sdp</b> <i>string</i>
Tree	<b>spoke-sdp</b>
String Length	3 to 16
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the service SDP binding
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>remote-source</b> <b>spoke-sdp</b> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**control-word** *boolean*

Synopsis	Enable the PW control word on spoke SDPs
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>remote-source</b> <b>spoke-sdp</b> <i>string</i> <b>control-word</b> <i>boolean</i>
Tree	<b>control-word</b>
Description	When configured to <b>true</b> , this command enables the PW control word on spoke SDPs that are part of a mirror destination. The control word must be enabled to allow MPLS-TP OAM on spoke SDP and is only valid for spoke SDPs that are part of a mirror service of type <b>ether</b> . When configured to <b>false</b> , this command disables the PW control word.
Default	false
Introduced	16.0.R1
Platforms	All

## egress

Synopsis	Enter the <b>egress</b> context
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">remote-source</a> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">egress</a>
Tree	<a href="#">egress</a>
Introduced	16.0.R1
Platforms	All

## vc-label *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	MPLS VC label that sends packets to the far end device
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">remote-source</a> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">egress</a> <a href="#">vc-label</a> <i>number</i>
Tree	<a href="#">vc-label</a>
Range	16 to 1048575
Introduced	16.0.R1
Platforms	All

## endpoint

Synopsis	Enter the <b>endpoint</b> context
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">remote-source</a> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">endpoint</a>
Tree	<a href="#">endpoint</a>
Introduced	16.0.R1
Platforms	All

## icb *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Bind the SDP as the Inter-Chassis Backup (ICB) type
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">remote-source</a> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">endpoint</a> <a href="#">icb</a> <i>boolean</i>

Tree	<a href="#">icb</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **name** *reference*

Synopsis	SAP-associated endpoint name
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">remote-source</a> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">endpoint name</a> <i>reference</i>
Tree	<a href="#">name</a>
Reference	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">endpoint</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

### **ingress**

Synopsis	Enter the <b>ingress</b> context
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">remote-source</a> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">ingress</a>
Tree	<a href="#">ingress</a>
Introduced	16.0.R1
Platforms	All

### **I2tpv3**

Synopsis	Enter the <b>I2tpv3</b> context
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">remote-source</a> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">ingress</a> <a href="#">I2tpv3</a>
Tree	<a href="#">I2tpv3</a>
Introduced	16.0.R1
Platforms	All

### **cookie**

Synopsis	Enter the <b>cookie</b> context
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">remote-source</a> <a href="#">spoke-sdp</a> <i>string</i> <a href="#">ingress</a> <a href="#">I2tpv3</a> <a href="#">cookie</a>

Tree	<a href="#">cookie</a>
Introduced	16.0.R1
Platforms	All

**cookie1 string**

Synopsis	Value of the first cookie for the tunnel
Context	<a href="#">configure mirror mirror-dest string remote-source spoke-sdp string ingress l2tpv3 cookie cookie1 string</a>
Tree	<a href="#">cookie1</a>
String Length	18 to 23
Introduced	16.0.R1
Platforms	All

**cookie2 string**

Synopsis	Value of the second cookie for the tunnel
Context	<a href="#">configure mirror mirror-dest string remote-source spoke-sdp string ingress l2tpv3 cookie cookie2 string</a>
Tree	<a href="#">cookie2</a>
String Length	18 to 23
Introduced	16.0.R1
Platforms	All

**vc-label number****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	MPLS VC label that sends packets to the far end device
Context	<a href="#">configure mirror mirror-dest string remote-source spoke-sdp string ingress vc-label number</a>
Tree	<a href="#">vc-label</a>
Range	32 to 18431
Introduced	16.0.R1
Platforms	All

**sampling-rate** *number*

Synopsis	Sampling rate
Context	<b>configure mirror mirror-dest string sampling-rate number</b>
Tree	<b>sampling-rate</b>
Description	This command configures the packet sampling rate value for mirrored traffic and is supported with mirror source configurations. The sampling rate is common to all endpoints on a given line card FP per mirror destination service.
Range	256 to 10000
Introduced	20.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**sap** [**sap-id**] *string*

Synopsis	Enter the <b>sap</b> list instance
Context	<b>configure mirror mirror-dest string sap string</b>
Tree	<b>sap</b>
Max. Instances	1
Introduced	16.0.R1
Platforms	All

**[sap-id]** *string*

Synopsis	SAP ID
Context	<b>configure mirror mirror-dest string sap string</b>
Tree	<b>sap</b>
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**egress**

Synopsis	Enter the <b>egress</b> context
Context	<b>configure mirror mirror-dest string sap string egress</b>

Tree	<a href="#">egress</a>
Introduced	16.0.R1
Platforms	All

## ip-mirror

Synopsis	Enter the <b>ip-mirror</b> context
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">ip-mirror</a>
Tree	<a href="#">ip-mirror</a>
Introduced	16.0.R1
Platforms	All

## mac

Synopsis	Enter the <b>mac</b> context
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">ip-mirror</a> <a href="#">mac</a>
Tree	<a href="#">mac</a>
Introduced	16.0.R1
Platforms	All

## destination *string*

Synopsis	Destination MAC address
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">ip-mirror</a> <a href="#">mac</a> <a href="#">destination</a> <i>string</i>
Tree	<a href="#">destination</a>
Introduced	16.0.R1
Platforms	All

## source *string*

Synopsis	Source MAC address
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">ip-mirror</a> <a href="#">mac</a> <a href="#">source</a> <i>string</i>
Tree	<a href="#">source</a>
Introduced	16.0.R1
Platforms	All

## qos

Synopsis	Enter the <b>qos</b> context
Context	<b>configure mirror mirror-dest string sap string egress qos</b>
Tree	<b>qos</b>
Introduced	16.0.R1
Platforms	All

## sap-egress

Synopsis	Enter the <b>sap-egress</b> context
Context	<b>configure mirror mirror-dest string sap string egress qos sap-egress</b>
Tree	<b>sap-egress</b>
Introduced	16.0.R1
Platforms	All

## policy-name *reference*

Synopsis	Policy ID to associate with SAP for mirrored service
Context	<b>configure mirror mirror-dest string sap string egress qos sap-egress policy-name <i>reference</i></b>
Tree	<b>policy-name</b>
Reference	<b>configure qos sap-egress string</b>
Introduced	16.0.R1
Platforms	All

## port-redirect-group

Synopsis	Enter the <b>port-redirect-group</b> context
Context	<b>configure mirror mirror-dest string sap string egress qos sap-egress port-redirect-group</b>
Tree	<b>port-redirect-group</b>
Introduced	16.0.R1
Platforms	All

**group-name** *reference*

Synopsis	Name of the queue group redirect list policy
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">port-redirect-group</a> <a href="#">group-name</a> <i>reference</i>
Tree	<a href="#">group-name</a>
Reference	<b>configure</b> <a href="#">qos</a> <a href="#">queue-group-templates</a> <a href="#">egress</a> <a href="#">queue-group</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

**instance** *number*

Synopsis	Port queue group instance
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">egress</a> <a href="#">qos</a> <a href="#">sap-egress</a> <a href="#">port-redirect-group</a> <a href="#">instance</a> <i>number</i>
Tree	<a href="#">instance</a>
Range	1 to 65535
Introduced	16.0.R1
Platforms	All

**endpoint** *reference*

Synopsis	Service endpoint name
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">sap</a> <i>string</i> <a href="#">endpoint</a> <i>reference</i>
Tree	<a href="#">endpoint</a>
Reference	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">endpoint</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

**service-id** *number***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Service ID
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">service-id</a> <i>number</i>

Tree	<a href="#">service-id</a>
Range	1 to 2147483647
Introduced	16.0.R1
Platforms	All

### **slice-size** *number*

Synopsis	Maximum size of the transmitted mirrored frame
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">slice-size</a> <i>number</i>
Tree	<a href="#">slice-size</a>
Range	0   128 to 9216
Default	0
Introduced	16.0.R1
Platforms	All

### **spoke-sdp** [[sdp-bind-id](#)] *string*

Synopsis	Enter the <b>spoke-sdp</b> list instance
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i>
Tree	<a href="#">spoke-sdp</a>
Introduced	16.0.R1
Platforms	All

### **[sdp-bind-id]** *string*

Synopsis	SDP ID number
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-dest</a> <i>string</i> <a href="#">spoke-sdp</a> <i>string</i>
Tree	<a href="#">spoke-sdp</a>
String Length	3 to 16
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the service SDP binding
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	enable
Introduced	16.0.R1
Platforms	All

**control-word** *boolean*

Synopsis	Enable the PW control word on spoke SDPs
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>control-word</b> <i>boolean</i>
Tree	<b>control-word</b>
Description	When configured to <b>true</b> , this command enables the PW control word on spoke SDPs that are part of a mirror destination. The control word must be enabled to allow MPLS-TP OAM on spoke SDP and is only valid for spoke SDPs that are part of a mirror service of type <b>ether</b> .  When configured to <b>false</b> , this command disables the PW control word.
Default	false
Introduced	16.0.R1
Platforms	All

**egress**

Synopsis	Enter the <b>egress</b> context
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>egress</b>
Tree	<b>egress</b>
Introduced	16.0.R1
Platforms	All

**I2tpv3**

Synopsis	Enter the <b>I2tpv3</b> context
Context	<b>configure</b> <b>mirror</b> <b>mirror-dest</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>egress</b> <b>I2tpv3</b>
Tree	<b>I2tpv3</b>

Introduced 16.0.R1  
 Platforms All

### **cookie string**

Synopsis RX or TX cookie for L2TPv3 spoke SDPs  
 Context **configure** [mirror mirror-dest string spoke-sdp string egress l2tpv3 cookie string](#)  
 Tree [cookie](#)  
 String Length 18 to 23  
 Introduced 16.0.R1  
 Platforms All

### **vc-label number**

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis MPLS VC label that sends packets to the far end device  
 Context **configure** [mirror mirror-dest string spoke-sdp string egress vc-label number](#)  
 Tree [vc-label](#)  
 Range 16 to 1048575  
 Introduced 16.0.R1  
 Platforms All

### **endpoint**

Synopsis Enter the **endpoint** context  
 Context **configure** [mirror mirror-dest string spoke-sdp string endpoint](#)  
 Tree [endpoint](#)  
 Introduced 16.0.R1  
 Platforms All

**icb boolean****WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Bind the SDP as the Inter-Chassis Backup (ICB) type
Context	<b>configure mirror mirror-dest string spoke-sdp string endpoint icb boolean</b>
Tree	<b>icb</b>
Default	false
Introduced	16.0.R1
Platforms	All

**name reference**

Synopsis	Endpoint name associated with the SAP
Context	<b>configure mirror mirror-dest string spoke-sdp string endpoint name reference</b>
Tree	<b>name</b>
Reference	<b>configure mirror mirror-dest string endpoint string</b>
Introduced	16.0.R1
Platforms	All

**precedence (number | keyword)**

Synopsis	Precedence when multiple SDP binds are on one endpoint
Context	<b>configure mirror mirror-dest string spoke-sdp string endpoint precedence (number   keyword)</b>
Tree	<b>precedence</b>
Range	1 to 4
Options	primary
Default	4
Introduced	16.0.R1
Platforms	All

**ingress**

Synopsis	Enter the <b>ingress</b> context
----------	----------------------------------

Context	<b>configure mirror mirror-dest</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>ingress</b>
Tree	<b>ingress</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **vc-label** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	MPLS VC label that sends packets to the far end device
Context	<b>configure mirror mirror-dest</b> <i>string</i> <b>spoke-sdp</b> <i>string</i> <b>ingress</b> <b>vc-label</b> <i>number</i>
Tree	<b>vc-label</b>
Range	32 to 18431
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **type** *keyword*

**WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	Mirror type information
Context	<b>configure mirror mirror-dest</b> <i>string</i> <b>type</b> <i>keyword</i>
Tree	<b>type</b>
Options	ether, ip-only
Default	ether
Introduced	16.0.R1
Platforms	All

### **use-global-sampling-rate** *boolean*

Synopsis	Enables global sampling rate by mirror destination
Context	<b>configure mirror mirror-dest</b> <i>string</i> <b>use-global-sampling-rate</b> <i>boolean</i>
Tree	<b>use-global-sampling-rate</b>

Description	When configured to <b>true</b> , this command configures each mirror destination service to use the global sampling rate, which allows a single high sampling rate for the entire system.  When configured to <b>false</b> , the mirror destination mirrors at the full rate (all packets) or mirrors based on the sampling rate for the mirror destination if the <b>sampling-rate</b> command is configured.
Default	false
Introduced	22.10.R1
Platforms	All

### **mirror-source** [[service-name](#)] *string*

Synopsis	Enter the <b>mirror-source</b> list instance
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-source</a> <i>string</i>
Tree	<a href="#">mirror-source</a>
Introduced	19.10.R1
Platforms	All

### **[service-name]** *string*

Synopsis	Administrative service name
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-source</a> <i>string</i>
Tree	<a href="#">mirror-source</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the mirror service
Context	<b>configure</b> <a href="#">mirror</a> <a href="#">mirror-source</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	enable
Introduced	19.10.R1

Platforms All

### **ip-filter** [**filter-name**] *reference*

Synopsis Enter the **ip-filter** list instance  
 Context **configure mirror mirror-source** *string ip-filter reference*  
 Tree [ip-filter](#)  
 Introduced 19.10.R1  
 Platforms All

### **[filter-name]** *reference*

Synopsis IP filter name  
 Context **configure mirror mirror-source** *string ip-filter reference*  
 Tree [ip-filter](#)  
 Reference **configure filter ip-filter** *string*  
 Notes This element is part of a list key.  
 Introduced 19.10.R1  
 Platforms All

### **entry** [**entry-id**] *number*

Synopsis Add a list entry for **entry**  
 Context **configure mirror mirror-source** *string ip-filter reference entry number*  
 Tree [entry](#)  
 Min. 1  
 Instances  
 Introduced 19.10.R1  
 Platforms All

### **[entry-id]** *number*

Synopsis IP filter entry ID  
 Context **configure mirror mirror-source** *string ip-filter reference entry number*  
 Tree [entry](#)

Range	1 to 2097151
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

### **ipv6-filter** [[filter-name](#)] *reference*

Synopsis	Enter the <b>ipv6-filter</b> list instance
Context	<b>configure mirror mirror-source</b> <i>string</i> <a href="#">ipv6-filter</a> <i>reference</i>
Tree	<a href="#">ipv6-filter</a>
Introduced	19.10.R1
Platforms	All

### **[filter-name]** *reference*

Synopsis	IPv6 filter name
Context	<b>configure mirror mirror-source</b> <i>string</i> <a href="#">ipv6-filter</a> <i>reference</i>
Tree	<a href="#">ipv6-filter</a>
Reference	<b>configure filter</b> <a href="#">ipv6-filter</a> <i>string</i>
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

### **entry** [[entry-id](#)] *number*

Synopsis	Add a list entry for <b>entry</b>
Context	<b>configure mirror mirror-source</b> <i>string</i> <a href="#">ipv6-filter</a> <i>reference</i> <a href="#">entry</a> <i>number</i>
Tree	<a href="#">entry</a>
Min. Instances	1
Introduced	19.10.R1
Platforms	All

**[entry-id] number**

Synopsis	IPv6 filter entry ID
Context	<b>configure mirror mirror-source</b> <i>string</i> <b>ipv6-filter</b> <i>reference</i> <b>entry</b> <i>number</i>
Tree	<b>entry</b>
Range	1 to 2097151
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**mac-filter [filter-name] reference**

Synopsis	Enter the <b>mac-filter</b> list instance
Context	<b>configure mirror mirror-source</b> <i>string</i> <b>mac-filter</b> <i>reference</i>
Tree	<b>mac-filter</b>
Introduced	19.10.R1
Platforms	All

**[filter-name] reference**

Synopsis	MAC filter name
Context	<b>configure mirror mirror-source</b> <i>string</i> <b>mac-filter</b> <i>reference</i>
Tree	<b>mac-filter</b>
Reference	<b>configure filter mac-filter</b> <i>string</i>
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**entry [entry-id] number**

Synopsis	Add a list entry for <b>entry</b>
Context	<b>configure mirror mirror-source</b> <i>string</i> <b>mac-filter</b> <i>reference</i> <b>entry</b> <i>number</i>
Tree	<b>entry</b>
Min.	1
Instances	
Introduced	19.10.R1

Platforms All

### **[entry-id]** *number*

Synopsis MAC filter entry ID  
Context **configure mirror mirror-source** *string mac-filter reference entry number*  
Tree [entry](#)  
Range 1 to 2097151  
Notes This element is part of a list key.  
Introduced 19.10.R1  
Platforms All

### **port** [[port-id](#)] *string*

Synopsis Enter the **port** list instance  
Context **configure mirror mirror-source** *string port string*  
Tree [port](#)  
Introduced 19.10.R1  
Platforms All

### **[port-id]** *string*

Synopsis Port ID  
Context **configure mirror mirror-source** *string port string*  
Tree [port](#)  
Notes This element is part of a list key.  
Introduced 19.10.R1  
Platforms All

### **egress** *boolean*

Synopsis Mirror egress packets  
Context **configure mirror mirror-source** *string port string egress boolean*  
Tree [egress](#)

Description	When configured to <b>true</b> , egressing packets are mirrored. Egress packets are mirrored to the mirror destination after egress packet modification.
Default	false
Introduced	19.10.R1
Platforms	All

### **ingress** *boolean*

Synopsis	Mirror ingress packets
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>port</b> <i>string</i> <b>ingress</b> <i>boolean</i>
Tree	<b>ingress</b>
Description	When configured to <b>true</b> , ingressing packets are mirrored. Ingress packets are mirrored to the mirror destination before ingress packet modification.
Default	false
Introduced	19.10.R1
Platforms	All

### **sap** [*sap-id*] *string*

Synopsis	Enter the <b>sap</b> list instance
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>sap</b> <i>string</i>
Tree	<b>sap</b>
Introduced	19.10.R1
Platforms	All

### **[sap-id]** *string*

Synopsis	SAP ID
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>sap</b> <i>string</i>
Tree	<b>sap</b>
String Length	1 to 45
Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

**egress** *boolean*

Synopsis	Mirror egress packets
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>sap</b> <i>string</i> <b>egress</b> <i>boolean</i>
Tree	<b>egress</b>
Description	When configured to <b>true</b> , egressing packets are mirrored. Egress packets are mirrored to the mirror destination after egress packet modification.
Default	false
Introduced	19.10.R1
Platforms	All

**ingress** *boolean*

Synopsis	Mirror ingress packets
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>sap</b> <i>string</i> <b>ingress</b> <i>boolean</i>
Tree	<b>ingress</b>
Description	When configured to <b>true</b> , ingressing packets are mirrored. Ingress packets are mirrored to the mirror destination before ingress packet modification.
Default	false
Introduced	19.10.R1
Platforms	All

**subscriber** [**subscriber-id**] *string*

Synopsis	Enter the <b>subscriber</b> list instance
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i>
Tree	<b>subscriber</b>
Introduced	19.10.R1
Platforms	All

**[subscriber-id]** *string*

Synopsis	Subscriber ID
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i>
Tree	<b>subscriber</b>
String Length	1 to 64

Notes	This element is part of a list key.
Introduced	19.10.R1
Platforms	All

### **egress** *boolean*

Synopsis	Mirror egress packets
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i> <b>egress</b> <i>boolean</i>
Tree	<a href="#">egress</a>
Description	When configured to <b>true</b> , egressing packets are mirrored. Egress packets are mirrored to the mirror destination after egress packet modification.
Default	false
Introduced	19.10.R1
Platforms	All

### **fc** *keyword*

Synopsis	The forwarding classes traffic which should be mirrored
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i> <b>fc</b> <i>keyword</i>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Max. Instances	8
Introduced	19.10.R1
Platforms	All

### **host-type** *keyword*

Synopsis	Host type for mirroring
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i> <b>host-type</b> <i>keyword</i>
Tree	<a href="#">host-type</a>
Options	ipoe, ppp
Introduced	19.10.R1
Platforms	All

### **ingress** *boolean*

Synopsis	Mirror ingress packets
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i> <b>ingress</b> <i>boolean</i>
Tree	<a href="#">ingress</a>
Description	When configured to <b>true</b> , ingressing packets are mirrored. Ingress packets are mirrored to the mirror destination before ingress packet modification.
Default	false
Introduced	19.10.R1
Platforms	All

### **ip-address** *string*

Synopsis	Service IP address of remote device sending LI traffic
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i> <b>ip-address</b> <i>string</i>
Tree	<a href="#">ip-address</a>
Notes	The following elements are part of a choice: ( <b>ip-address</b> , <b>mac-address</b> , and <b>sap-id</b> ) or <b>sla-profile</b> .
Introduced	19.10.R1
Platforms	All

### **ip-family** *keyword*

Synopsis	IP family for mirroring
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i> <b>ip-family</b> <i>keyword</i>
Tree	<a href="#">ip-family</a>
Options	ipv4, ipv6
Introduced	19.10.R1
Platforms	All

### **mac-address** *string*

Synopsis	MAC address for the subscriber
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i> <b>mac-address</b> <i>string</i>
Tree	<a href="#">mac-address</a>

---

Notes	The following elements are part of a choice: ( <b>ip-address</b> , <b>mac-address</b> , and <b>sap-id</b> ) or <b>sla-profile</b> .
Introduced	19.10.R1
Platforms	All

### **sap-id** *string*

Synopsis	Subscriber SAP ID
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i> <b>sap-id</b> <i>string</i>
Tree	<b>sap-id</b>
String Length	1 to 45
Notes	The following elements are part of a choice: ( <b>ip-address</b> , <b>mac-address</b> , and <b>sap-id</b> ) or <b>sla-profile</b> .
Introduced	19.10.R1
Platforms	All

### **sla-profile** *string*

Synopsis	SLA profile name
Context	<b>configure</b> <b>mirror</b> <b>mirror-source</b> <i>string</i> <b>subscriber</b> <i>string</i> <b>sla-profile</b> <i>string</i>
Tree	<b>sla-profile</b>
String Length	1 to 32
Notes	The following elements are part of a choice: ( <b>ip-address</b> , <b>mac-address</b> , and <b>sap-id</b> ) or <b>sla-profile</b> .
Introduced	19.10.R1
Platforms	All

## 3.28 multicast-management commands

### 3.28.1 multicast-management command descriptions

#### multicast-management

Synopsis	Enter the <b>multicast-management</b> context
Context	<b>configure</b> <a href="#">multicast-management</a>
Tree	<a href="#">multicast-management</a>
Introduced	16.0.R1
Platforms	All

#### bandwidth-policy [[policy-name](#)] *string*

Synopsis	Enter the <b>bandwidth-policy</b> list instance
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">bandwidth-policy</a> <i>string</i>
Tree	<a href="#">bandwidth-policy</a>
Max. Instances	32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

#### [\[policy-name\]](#) *string*

Synopsis	Bandwidth policy name
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">bandwidth-policy</a> <i>string</i>
Tree	<a href="#">bandwidth-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

#### admin-bw-threshold *number*

Synopsis	Administrative bandwidth threshold
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">bandwidth-policy</a> <i>string</i> <a href="#">admin-bw-threshold</a> <i>number</i>

Tree	<a href="#">admin-bw-threshold</a>
Range	1 to 40000000
Units	kilobps
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **falling-percent-reset** *number*

Synopsis	Percent of bandwidth that decreases before resetting
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">falling-percent-reset</a> <i>number</i>
Tree	<a href="#">falling-percent-reset</a>
Range	1 to 100
Units	percent
Default	50
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **impm-paths**

Synopsis	Enter the <b>impm-paths</b> context
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">impm-paths</a>
Tree	<a href="#">impm-paths</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### primary-path

Synopsis Enter the **primary-path** context

Context **configure** [multicast-management](#) [bandwidth-policy](#) *string* [impm-paths](#) [primary-path](#)

Tree [primary-path](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### queue-parameters

Synopsis Enter the **queue-parameters** context

Context **configure** [multicast-management](#) [bandwidth-policy](#) *string* [impm-paths](#) [primary-path](#) [queue-parameters](#)

Tree [queue-parameters](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **cbs** *decimal-number*

Synopsis Override for default CBS for single queue for each path

Context **configure** [multicast-management](#) [bandwidth-policy](#) *string* [impm-paths](#) [primary-path](#) [queue-parameters](#) [cbs](#) *decimal-number*

Tree [cbs](#)

Range 0.00 to 100.00

Units percent

Default 5.00

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**drop-tail**

Synopsis	Enter the <b>drop-tail</b> context
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">impm-paths</a> <a href="#">primary-path</a> <a href="#">queue-parameters</a> <b>drop-tail</b>
Tree	<a href="#">drop-tail</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**low**

Synopsis	Enter the <b>low</b> context
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">impm-paths</a> <a href="#">primary-path</a> <a href="#">queue-parameters</a> <b>drop-tail</b> <b>low</b>
Tree	<a href="#">low</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**percent-reduction-from-mbs** *number*

Synopsis	Low drop-tail percent from MBS that is reduced
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">impm-paths</a> <a href="#">primary-path</a> <a href="#">queue-parameters</a> <b>drop-tail</b> <b>low</b> <b>percent-reduction-from-mbs</b> <i>number</i>
Tree	<a href="#">percent-reduction-from-mbs</a>
Range	0 to 100
Units	percent
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**mbs** *decimal-number*

Synopsis	Override for default MBS for single queue for each path
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">impm-paths</a> <a href="#">primary-path</a> <a href="#">queue-parameters</a> <b>mbs</b> <i>decimal-number</i>

Tree	<a href="#">mbs</a>
Range	0.00 to 100.00
Units	percent
Default	7.00
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## secondary-path

Synopsis	Enter the <b>secondary-path</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">bandwidth-policy</a> <i>string</i> <a href="#">impmpaths</a> <a href="#">secondary-path</a>
Tree	<a href="#">secondary-path</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## number-paths

Synopsis	Enter the <b>number-paths</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">bandwidth-policy</a> <i>string</i> <a href="#">impmpaths</a> <a href="#">secondary-path</a> <a href="#">number-paths</a>
Tree	<a href="#">number-paths</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## number-of-paths *number*

Synopsis	Number of secondary paths
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">bandwidth-policy</a> <i>string</i> <a href="#">impmpaths</a> <a href="#">secondary-path</a> <a href="#">number-paths</a> <a href="#">number-of-paths</a> <i>number</i>
Tree	<a href="#">number-of-paths</a>
Range	1 to 15
Default	1
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **redundant-sfm** *number*

Synopsis Number of secondary paths in redundant SFM mode

Context **configure** [multicast-management bandwidth-policy](#) *string* [impm-paths secondary-path number-paths](#) **redundant-sfm** *number*

Tree [redundant-sfm](#)

Range 1 to 15

Default 1

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-7/12/12e, 7750 SR-2s, 7750 SR-2se, 7750 SR-7s, 7750 SR-14s, 7950 XRS, VSR

### **queue-parameters**

Synopsis Enter the **queue-parameters** context

Context **configure** [multicast-management bandwidth-policy](#) *string* [impm-paths secondary-path queue-parameters](#)

Tree [queue-parameters](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **cbs** *decimal-number*

Synopsis Override for default CBS for single queue for each path

Context **configure** [multicast-management bandwidth-policy](#) *string* [impm-paths secondary-path queue-parameters](#) **cbs** *decimal-number*

Tree [cbs](#)

Range 0.00 to 100.00

Units percent

Default 30.00

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**drop-tail**

Synopsis	Enter the <b>drop-tail</b> context
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">impm-paths</a> <a href="#">secondary-path</a> <a href="#">queue-parameters</a> <b>drop-tail</b>
Tree	<a href="#">drop-tail</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**low**

Synopsis	Enter the <b>low</b> context
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">impm-paths</a> <a href="#">secondary-path</a> <a href="#">queue-parameters</a> <b>drop-tail</b> <b>low</b>
Tree	<a href="#">low</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**percent-reduction-from-mbs** *number*

Synopsis	Low drop-tail percent from MBS that is reduced
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">impm-paths</a> <a href="#">secondary-path</a> <a href="#">queue-parameters</a> <b>drop-tail</b> <b>low</b> <b>percent-reduction-from-mbs</b> <i>number</i>
Tree	<a href="#">percent-reduction-from-mbs</a>
Range	0 to 100
Units	percent
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**mbs** *decimal-number*

Synopsis	Override for default MBS for single queue for each path
----------	---

Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">imp-path</a> <a href="#">secondary-path</a> <a href="#">queue-parameters</a> <a href="#">mbs</a> <i>decimal-number</i>
Tree	<a href="#">mbs</a>
Range	0.00 to 100.00
Units	percent
Default	40.00
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## **mcast-pool**

Synopsis	Enter the <b>mcast-pool</b> context
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">mcast-pool</a>
Tree	<a href="#">mcast-pool</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## **percent-of-total** *number*

Synopsis	Percent of ingress buffers assigned to multicast pool
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">mcast-pool</a> <a href="#">percent-of-total</a> <i>number</i>
Tree	<a href="#">percent-of-total</a>
Range	1 to 50
Units	percent
Default	10
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## **resv-cbs** *number*

Synopsis	Percentage of pool reserved for multicast path queues
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">mcast-pool</a> <a href="#">resv-cbs</a> <i>number</i>
Tree	<a href="#">resv-cbs</a>

Range	1 to 100
Units	percent
Default	50
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **slope-policy** *reference*

Synopsis	Slope policy name
Context	<b>configure</b> <a href="#">multicast-management bandwidth-policy</a> <i>string</i> <a href="#">mcast-pool slope-policy</a> <i>reference</i>
Tree	<a href="#">slope-policy</a>
Reference	<b>configure</b> <a href="#">qos slope-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **chassis-level**

Synopsis	Enter the <b>chassis-level</b> context
Context	<b>configure</b> <a href="#">multicast-management chassis-level</a>
Tree	<a href="#">chassis-level</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **mmp-imp-override** *boolean*

Synopsis	Manage MMRP traffic by IMPM
Context	<b>configure</b> <a href="#">multicast-management chassis-level mmp-imp-override</a> <i>boolean</i>
Tree	<a href="#">mmp-imp-override</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## per-mcast-plane-capacity

Synopsis	Enter the <b>per-mcast-plane-capacity</b> context
Context	<b>configure</b> <a href="#">multicast-management chassis-level per-mcast-plane-capacity</a>
Tree	<a href="#">per-mcast-plane-capacity</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## mcast-capacity

Synopsis	Enter the <b>mcast-capacity</b> context
Context	<b>configure</b> <a href="#">multicast-management chassis-level per-mcast-plane-capacity mcast-capacity</a>
Tree	<a href="#">mcast-capacity</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## primary-percentage *decimal-number*

Synopsis	Percent of plane capacity for primary multicast planes
Context	<b>configure</b> <a href="#">multicast-management chassis-level per-mcast-plane-capacity mcast-capacity primary-percentage <i>decimal-number</i></a>
Tree	<a href="#">primary-percentage</a>
Range	0.01 to 100.00
Units	percent
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## secondary-percentage *decimal-number*

Synopsis	Percent of plane capacity for secondary multicast plane
Context	<b>configure</b> <a href="#">multicast-management chassis-level per-mcast-plane-capacity mcast-capacity secondary-percentage <i>decimal-number</i></a>
Tree	<a href="#">secondary-percentage</a>

Range	0.01 to 100.00
Units	percent
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### redundant-mcast-capacity

Synopsis	Enter the <b>redundant-mcast-capacity</b> context
Context	<b>configure</b> <a href="#">multicast-management chassis-level per-mcast-plane-capacity redundant-mcast-capacity</a>
Tree	<a href="#">redundant-mcast-capacity</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### primary-percentage *decimal-number*

Synopsis	Percent of plane capacity for primary multicast planes
Context	<b>configure</b> <a href="#">multicast-management chassis-level per-mcast-plane-capacity redundant-mcast-capacity primary-percentage <i>decimal-number</i></a>
Tree	<a href="#">primary-percentage</a>
Range	0.01 to 100.00
Units	percent
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### secondary-percentage *decimal-number*

Synopsis	Percent of plane capacity for secondary multicast plane
Context	<b>configure</b> <a href="#">multicast-management chassis-level per-mcast-plane-capacity redundant-mcast-capacity secondary-percentage <i>decimal-number</i></a>
Tree	<a href="#">secondary-percentage</a>
Range	0.01 to 100.00
Units	percent
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **total-capacity** *keyword*

Synopsis Total multicast plane bandwidth

Context **configure** [multicast-management](#) [chassis-level](#) [per-mcast-plane-capacity](#) **total-capacity** *keyword*

Tree [total-capacity](#)

Units megabps

Options dynamic, 2000, 4000, 5250, 8250, 15000, 17000, 19000, 27000, 42000, 90000

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **round-robin-inactive-records** *boolean*

Synopsis Redistribute newly populated inactive records

Context **configure** [multicast-management](#) [chassis-level](#) **round-robin-inactive-records** *boolean*

Tree [round-robin-inactive-records](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **multicast-info-policy** [[policy-name](#)] *string*

Synopsis Enter the **multicast-info-policy** list instance

Context **configure** [multicast-management](#) **multicast-info-policy** *string*

Tree [multicast-info-policy](#)

Max. Instances 32

Introduced 16.0.R1

Platforms All

**[policy-name]** *string*

Synopsis	Multicast information policy name
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i>
Tree	<a href="#">multicast-info-policy</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**bundle** [[bundle-name](#)] *string*

Synopsis	Enter the <b>bundle</b> list instance
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <b>bundle</b> <i>string</i>
Tree	<a href="#">bundle</a>
Max. Instances	32
Introduced	16.0.R1
Platforms	All

**[bundle-name]** *string*

Synopsis	Bundle name
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <b>bundle</b> <i>string</i>
Tree	<a href="#">bundle</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-bw** *number*

Synopsis	Administrative bandwidth
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <b>bundle</b> <i>string</i> <b>admin-bw</b> <i>number</i>
Tree	<a href="#">admin-bw</a>

Range	1 to 40000000
Units	kilobps
Introduced	16.0.R1
Platforms	All

## **bw-activity**

Synopsis	Enter the <b>bw-activity</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">bw-activity</a>
Tree	<a href="#">bw-activity</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## **black-hole-rate** *number*

Synopsis	Rate that a channel is placed in the blackhole state
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">bw-activity</a> <a href="#">black-hole-rate</a> <i>number</i>
Tree	<a href="#">black-hole-rate</a>
Range	1 to 40000000
Units	kilobps
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

## **bw-activity-type** *keyword*

Synopsis	Bandwidth required by a multicast channel
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">bw-activity</a> <a href="#">bw-activity-type</a> <i>keyword</i>
Tree	<a href="#">bw-activity-type</a>
Options	use-admin-bw, dynamic
Default	dynamic
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **falling-delay** *number*

Synopsis Falling delay threshold value until delay time expires

Context **configure** **multicast-management** **multicast-info-policy** *string* **bundle** *string* **bw-activity** **falling-delay** *number*

Tree **falling-delay**

Range 10 to 3600

Units seconds

Default 30

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **channel** **start** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Enter the **channel** list instance

Context **configure** **multicast-management** **multicast-info-policy** *string* **bundle** *string* **channel** **start** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree **channel**

Introduced 16.0.R1

Platforms All

### **start** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis Starting IP address for the channel range

Context **configure** **multicast-management** **multicast-info-policy** *string* **bundle** *string* **channel** **start** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree **channel**

Notes This element is part of a list key.

Introduced 16.0.R1

Platforms All

**end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Ending IP address for the channel range
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<b>channel</b>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**admin-bw** *number*

Synopsis	Administrative bandwidth
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>admin-bw</b> <i>number</i>
Tree	<b>admin-bw</b>
Range	1 to 40000000
Units	kilobps
Introduced	16.0.R1
Platforms	All

**bw-activity**

Synopsis	Enter the <b>bw-activity</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>bw-activity</b>
Tree	<b>bw-activity</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**black-hole-rate** *number*

Synopsis	Rate that a channel is placed in the blackhole state
----------	--

Context	<b>configure multicast-management multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>bw-activity</b> <b>black-hole-rate</b> <i>number</i>
Tree	<b>black-hole-rate</b>
Range	0 to 40000000
Units	kilobps
Default	0
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **bw-activity-type** *keyword*

Synopsis	Bandwidth required by a multicast channel
Context	<b>configure multicast-management multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>bw-activity</b> <b>bw-activity-type</b> <i>keyword</i>
Tree	<b>bw-activity-type</b>
Options	use-admin-bw, dynamic
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

### **falling-delay** *number*

Synopsis	Falling delay threshold value until delay time expires
Context	<b>configure multicast-management multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>bw-activity</b> <b>falling-delay</b> <i>number</i>
Tree	<b>falling-delay</b>
Range	10 to 3600
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**explicit-sf-path** *keyword*

Synopsis	Explicit switch fabric path shared to multicast channel
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>explicit-sf-path</b> <i>keyword</i>
Tree	<b>explicit-sf-path</b>
Options	primary, secondary
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**keepalive-override** *number*

Synopsis	Keepalive timer override
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>keepalive-override</b> <i>number</i>
Tree	<b>keepalive-override</b>
Range	10 to 86000
Units	seconds
Introduced	16.0.R1
Platforms	All

**preference** *number*

Synopsis	Relative preference level for multicast channels
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>preference</b> <i>number</i>
Tree	<b>preference</b>
Range	1 to 7
Introduced	16.0.R1
Platforms	All

**primary-tunnel-interface**

Synopsis	Enter the <b>primary-tunnel-interface</b> context
----------	---

Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">primary-tunnel-interface</a>
Tree	<a href="#">primary-tunnel-interface</a>
Introduced	16.0.R1
Platforms	All

### **ldp-p2mp** *number*

Synopsis	ID for signaling MLDP P2MP LSP
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">primary-tunnel-interface</a> <a href="#">ldp-p2mp</a> <i>number</i>
Tree	<a href="#">ldp-p2mp</a>
Range	1 to 4294967295
Notes	The following elements are part of a choice: <b>ldp-p2mp</b> or <b>rsvp-p2mp</b> .
Introduced	16.0.R1
Platforms	All

### **rsvp-p2mp** *string*

Synopsis	P2MP name for the LDP P2MP
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">primary-tunnel-interface</a> <a href="#">rsvp-p2mp</a> <i>string</i>
Tree	<a href="#">rsvp-p2mp</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>ldp-p2mp</b> or <b>rsvp-p2mp</b> .
Introduced	16.0.R1
Platforms	All

### **sender** *string*

Synopsis	Bundle set to receive from the primary tunnel interface
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">primary-tunnel-interface</a> <a href="#">sender</a> <i>string</i>

Tree	<a href="#">sender</a>
Introduced	16.0.R1
Platforms	All

### **source-override** [[ip-address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Enter the <b>source-override</b> list instance
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-override</a>
Introduced	16.0.R1
Platforms	All

### **[ip-address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address for the source override
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">source-override</a>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **admin-bw** *number*

Synopsis	Administrative bandwidth
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">admin-bw</a> <i>number</i>
Tree	<a href="#">admin-bw</a>
Range	1 to 40000000
Units	kilobps
Introduced	16.0.R1
Platforms	All

**bw-activity**

Synopsis	Enter the <b>bw-activity</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>bw-activity</b>
Tree	<b>bw-activity</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**black-hole-rate** *number*

Synopsis	Rate that a channel is placed in the blackhole state
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>bw-activity</b> <b>black-hole-rate</b> <i>number</i>
Tree	<b>black-hole-rate</b>
Range	0 to 40000000
Units	kilobps
Default	0
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**bw-activity-type** *keyword*

Synopsis	Bandwidth required by a multicast channel
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>bw-activity</b> <b>bw-activity-type</b> <i>keyword</i>
Tree	<b>bw-activity-type</b>
Options	use-admin-bw, dynamic
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**falling-delay** *number*

Synopsis	Falling delay threshold value until delay time expires
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>bw-activity</b> <b>falling-delay</b> <i>number</i>
Tree	<b>falling-delay</b>
Range	10 to 3600
Units	seconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**explicit-sf-path** *keyword*

Synopsis	Explicit switch fabric path shared to multicast channel
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>explicit-sf-path</b> <i>keyword</i>
Tree	<b>explicit-sf-path</b>
Options	primary, secondary
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**keepalive-override** *number*

Synopsis	Keepalive timer override
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>keepalive-override</b> <i>number</i>
Tree	<b>keepalive-override</b>
Range	10 to 86000
Units	seconds
Introduced	16.0.R1

Platforms All

### preference *number*

Synopsis Relative preference level for multicast channels

Context **configure** **multicast-management** **multicast-info-policy** *string* **bundle** *string* **channel** **start** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **source-override** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **preference** *number*

## non-vid-pid-absent *number*

Synopsis	PID checked within the specified interval
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">non-vid-pid-absent</a> <i>number</i>
Tree	<a href="#">non-vid-pid-absent</a>

Range	100 to 5000
Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## pat-repetition

Synopsis	Enable the <b>pat-repetition</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pat-repetition</a>
Tree	<a href="#">pat-repetition</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## poa number

Synopsis	Time between two PATs for which a POA alarm is raised
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pat-repetition</a> <a href="#">poa</a> <i>number</i>
Tree	<a href="#">poa</a>
Range	300 to 1000
Units	milliseconds
Default	500
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## qos number

Synopsis	Time between two PATs for which a QoS alarm is raised
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pat-repetition</a> <a href="#">qos</a> <i>number</i>
Tree	<a href="#">qos</a>

Range	200 to 900
Units	milliseconds
Default	200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **tnc number**

Synopsis	Time between two PATs for which a TNC alarm is raised
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>analyzer</b> <b>alarms</b> <b>pat-repetition</b> <b>tnc</b> <b>number</b>
Tree	<b>tnc</b>
Range	100 to 800
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **pat-syntax boolean**

Synopsis	Check for PAT syntax errors
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>analyzer</b> <b>alarms</b> <b>pat-syntax</b> <b>boolean</b>
Tree	<b>pat-syntax</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **pcr-repetition**

Synopsis	Enable the <b>pcr-repetition</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-</i>

	<a href="#">address-no-zone</a> ) <a href="#">source-override</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">video analyzer alarms pcr-repetition</a>
Tree	<a href="#">pcr-repetition</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**poa number**

Synopsis	Time between two PCRs for which a POA alarm is raised
Context	<b>configure</b> <a href="#">multicast-management multicast-info-policy</a> <a href="#">string bundle</a> <a href="#">string channel</a> <a href="#">start</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">end</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">source-override</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">video analyzer alarms pcr-repetition poa number</a>
Tree	<a href="#">poa</a>
Range	300 to 1000
Units	milliseconds
Default	500
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**qos number**

Synopsis	Time between two PCRs for which a QoS alarm is raised
Context	<b>configure</b> <a href="#">multicast-management multicast-info-policy</a> <a href="#">string bundle</a> <a href="#">string channel</a> <a href="#">start</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">end</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">source-override</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> ) <a href="#">video analyzer alarms pcr-repetition qos number</a>
Tree	<a href="#">qos</a>
Range	200 to 900
Units	milliseconds
Default	200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**tnc number**

Synopsis	Time between two PCRs for which a TNC alarm is raised
----------	---

Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer</b> <b>alarms</b> <b>pcr-repetition</b> <b>tnc</b> <i>number</i>
Tree	<b>tnc</b>
Range	100 to 800
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **pid-pmt-unref** *boolean*

Synopsis	Check for unreferenced PIDs in the PMT
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer</b> <b>alarms</b> <b>pid-pmt-unref</b> <i>boolean</i>
Tree	<b>pid-pmt-unref</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **pmt-repetition**

Synopsis	Enable the <b>pmt-repetition</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer</b> <b>alarms</b> <b>pmt-repetition</b>
Tree	<b>pmt-repetition</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **poa** *number*

Synopsis	Time between two PMTs for which a POA alarm is raised
----------	---

Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>analyzer</b> <b>alarms</b> <b>pmt-repetition</b> <b>poa</b> <i>number</i>
Tree	<b>poa</b>
Range	300 to 5000
Units	milliseconds
Default	2000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **qos number**

Synopsis	Time between two PMTs for which a QoS alarm is raised
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>analyzer</b> <b>alarms</b> <b>pmt-repetition</b> <b>qos</b> <i>number</i>
Tree	<b>qos</b>
Range	200 to 4900
Units	milliseconds
Default	800
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **tnc number**

Synopsis	Time between two PMTs for which a TNC alarm is raised
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>analyzer</b> <b>alarms</b> <b>pmt-repetition</b> <b>tnc</b> <i>number</i>
Tree	<b>tnc</b>
Range	100 to 4800
Units	milliseconds
Default	400
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**pmt-syntax** *boolean*

Synopsis	Check for PMT syntax errors
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>analyzer</b> <b>alarms</b> <b>pmt-syntax</b> <i>boolean</i>
Tree	<b>pmt-syntax</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**report-alarm**

Synopsis	Enter the <b>report-alarm</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>analyzer</b> <b>alarms</b> <b>report-alarm</b>
Tree	<b>report-alarm</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**severity** *keyword*

Synopsis	Keyword for the type of alarm
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>analyzer</b> <b>alarms</b> <b>report-alarm</b> <b>severity</b> <i>keyword</i>
Tree	<b>severity</b>
Options	tnc, qos, poa
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**tei-set** *boolean*

Synopsis	Check for TEI set errors
----------	--------------------------

Context	<b>configure multicast-management multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms</b> <b>tei-set</b> <i>boolean</i>
Tree	<b>tei-set</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **ts-sync-loss** *boolean*

Synopsis	Check for synchronization loss errors
Context	<b>configure multicast-management multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms</b> <b>ts-sync-loss</b> <i>boolean</i>
Tree	<b>ts-sync-loss</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **vid-pid-absent** *number*

Synopsis	VID PID checked within the specified time interval
Context	<b>configure multicast-management multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms</b> <b>vid-pid-absent</b> <i>number</i>
Tree	<b>vid-pid-absent</b>
Range	100 to 5000
Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **description** *string*

Synopsis	Text description
----------	------------------

Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>analyzer</b> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **fcc-channel-type** *keyword*

Synopsis	Channel type for the bundle or channel
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>fcc-channel-type</b> <i>keyword</i>
Tree	<b>fcc-channel-type</b>
Options	hd, sd, pip
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **fcc-min-duration** *number*

Synopsis	Minimum duration of the FCC burst
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>fcc-min-duration</b> <i>number</i>
Tree	<b>fcc-min-duration</b>
Range	300 to 8000
Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **fcc-server** *keyword*

Synopsis	Value to override the parent value of the FCC server
----------	--

Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>fcc-server</b> <i>keyword</i>
Tree	<b>fcc-server</b>
Options	false, true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **local-rt-server** *keyword*

Synopsis	Value to override the parent value of local RT server
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>local-rt-server</b> <i>keyword</i>
Tree	<b>local-rt-server</b>
Options	false, true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **reorder-audio** *number*

Synopsis	Time the audio packets are reordered in the ad stream
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>reorder-audio</b> <i>number</i>
Tree	<b>reorder-audio</b>
Range	100 to 1000
Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **rt-buffer-size** *number*

Synopsis	Buffer size to store channel packets
----------	--------------------------------------

Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>rt-buffer-size</b> <i>number</i>
Tree	<b>rt-buffer-size</b>
Range	300 to 8000
Units	milliseconds
Default	300
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### rt-server

Synopsis	Enter the <b>rt-server</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>rt-server</b>
Tree	<b>rt-server</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### ip-address *string*

Synopsis	IP address of the upstream retransmission server
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>rt-server</b> <b>ip-address</b> <i>string</i>
Tree	<b>ip-address</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### port *number*

Synopsis	UDP port to send RET requests to the upstream RET sever
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-</i>

	<i>address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">rt-server</a> <i>port</i> <i>number</i>
Tree	<a href="#">port</a>
Range	1024 to 5999   6251 to 65535
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**rt-state** *keyword*

Synopsis	Retransmission server state
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-</i> <i>address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">rt-server</a> <b>rt-state</b> <i>keyword</i>
Tree	<a href="#">rt-state</a>
Options	false, true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**stream-selection**

Synopsis	Enter the <b>stream-selection</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-</i> <i>address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">stream-selection</a>
Tree	<a href="#">stream-selection</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**intf1** *string*

Synopsis	Primary interface
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-</i> <i>address-no-zone</i> ) <a href="#">source-override</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">stream-selection</a> <b>intf1</b> <i>string</i>
Tree	<a href="#">intf1</a>

String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**intf2 string**

Synopsis	Secondary interface
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>stream-selection</b> <b>intf2</b> <i>string</i>
Tree	<b>intf2</b>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**source1 string**

Synopsis	Primary source IP address
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>stream-selection</b> <b>source1</b> <i>string</i>
Tree	<b>source1</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**source2 string**

Synopsis	Secondary source IP address
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>stream-selection</b> <b>source2</b> <i>string</i>
Tree	<b>source2</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**video-group** (*number* | *keyword*)

Synopsis	Video group ID
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>source-override</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>video-group</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>video-group</b>
Range	1 to 4
Options	none
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**video**

Synopsis	Enter the <b>video</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b>
Tree	<b>video</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**analyzer**

Synopsis	Enable the <b>analyzer</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>analyzer</b>
Tree	<b>analyzer</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**alarms**

Synopsis	Enter the <b>alarms</b> context
----------	---------------------------------

Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a>
Tree	<a href="#">alarms</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**cc-error** *boolean*

Synopsis	Check the continuity counter
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">cc-error</a> <i>boolean</i>
Tree	<a href="#">cc-error</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**non-vid-pid-absent** *number*

Synopsis	PID checked within the specified interval
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">non-vid-pid-absent</a> <i>number</i>
Tree	<a href="#">non-vid-pid-absent</a>
Range	100 to 5000
Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**pat-repetition**

Synopsis	Enable the <b>pat-repetition</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pat-repetition</a>
Tree	<a href="#">pat-repetition</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **poa number**

Synopsis Time between two PATs for which a POA alarm is raised

Context **configure multicast-management multicast-info-policy** *string* **bundle** *string* **channel** **start** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **video analyzer alarms pat-repetition poa number**

Tree **poa**

Range 300 to 1000

Units milliseconds

Default 500

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **qos number**

Synopsis Time between two PATs for which a QoS alarm is raised

Context **configure multicast-management multicast-info-policy** *string* **bundle** *string* **channel** **start** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **video analyzer alarms pat-repetition qos number**

Tree **qos**

Range 200 to 900

Units milliseconds

Default 200

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **tnc number**

Synopsis Time between two PATs for which a TNC alarm is raised

Context **configure multicast-management multicast-info-policy** *string* **bundle** *string* **channel** **start** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **end** (*ipv4-address-no-zone* | *ipv6-address-no-zone*) **video analyzer alarms pat-repetition tnc number**

Tree **tnc**

Range 100 to 800

Units milliseconds

Default	100
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **pat-syntax** *boolean*

Synopsis	Check for PAT syntax errors
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms</b> <b>pat-syntax</b> <i>boolean</i>
Tree	<a href="#">pat-syntax</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **pcr-repetition**

Synopsis	Enable the <b>pcr-repetition</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms</b> <b>pcr-repetition</b>
Tree	<a href="#">pcr-repetition</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **poa** *number*

Synopsis	Time between two PCRs for which a POA alarm is raised
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms</b> <b>pcr-repetition</b> <b>poa</b> <i>number</i>
Tree	<a href="#">poa</a>
Range	300 to 1000
Units	milliseconds
Default	500
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**qos number**

Synopsis	Time between two PCRs for which a QoS alarm is raised
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms pcr-repetition qos number</b>
Tree	<b>qos</b>
Range	200 to 900
Units	milliseconds
Default	200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**tnc number**

Synopsis	Time between two PCRs for which a TNC alarm is raised
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms pcr-repetition tnc number</b>
Tree	<b>tnc</b>
Range	100 to 800
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**pid-pmt-unref boolean**

Synopsis	Check for unreferenced PIDs in the PMT
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms pid-pmt-unref boolean</b>
Tree	<b>pid-pmt-unref</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## pmt-repetition

Synopsis	Enable the <b>pmt-repetition</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms pmt-repetition</b>
Tree	<b>pmt-repetition</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## poa number

Synopsis	Time between two PMTs for which a POA alarm is raised
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms pmt-repetition poa number</b>
Tree	<b>poa</b>
Range	300 to 5000
Units	milliseconds
Default	2000
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## qos number

Synopsis	Time between two PMTs for which a QoS alarm is raised
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms pmt-repetition qos number</b>
Tree	<b>qos</b>
Range	200 to 4900
Units	milliseconds
Default	800
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**tnc number**

Synopsis	Time between two PMTs for which a TNC alarm is raised
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms</b> <b>pmt-repetition</b> <b>tnc</b> <i>number</i>
Tree	<b>tnc</b>
Range	100 to 4800
Units	milliseconds
Default	400
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**pmt-syntax boolean**

Synopsis	Check for PMT syntax errors
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms</b> <b>pmt-syntax</b> <i>boolean</i>
Tree	<b>pmt-syntax</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**report-alarm**

Synopsis	Enter the <b>report-alarm</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms</b> <b>report-alarm</b>
Tree	<b>report-alarm</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**severity keyword**

Synopsis	Keyword for the type of alarm
----------	-------------------------------

Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms report-alarm severity</b> <i>keyword</i>
Tree	<b>severity</b>
Options	tnc, qos, poa
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**tei-set** *boolean*

Synopsis	Check for TEI set errors
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms tei-set</b> <i>boolean</i>
Tree	<b>tei-set</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**ts-sync-loss** *boolean*

Synopsis	Check for synchronization loss errors
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms ts-sync-loss</b> <i>boolean</i>
Tree	<b>ts-sync-loss</b>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**vid-pid-absent** *number*

Synopsis	VID PID checked within the specified time interval
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer alarms vid-pid-absent</b> <i>number</i>
Tree	<b>vid-pid-absent</b>
Range	100 to 5000

Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video analyzer</b> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **fcc-channel-type** *keyword*

Synopsis	Channel type for the bundle or channel
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>fcc-channel-type</b> <i>keyword</i>
Tree	<b>fcc-channel-type</b>
Options	hd, sd, pip
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **fcc-min-duration** *number*

Synopsis	Minimum duration of the FCC burst
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>fcc-min-duration</b> <i>number</i>
Tree	<b>fcc-min-duration</b>
Range	300 to 8000
Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **fcc-server** *keyword*

Synopsis	Value to override the parent value of the FCC server
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>fcc-server</b> <i>keyword</i>
Tree	<b>fcc-server</b>
Options	false, true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **local-rt-server** *keyword*

Synopsis	Value to override the parent value of local RT server
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>local-rt-server</b> <i>keyword</i>
Tree	<b>local-rt-server</b>
Options	false, true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **reorder-audio** *number*

Synopsis	Time the audio packets are reordered in the ad stream
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>reorder-audio</b> <i>number</i>
Tree	<b>reorder-audio</b>
Range	100 to 1000
Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **rt-buffer-size** *number*

Synopsis	Buffer size to store channel packets
----------	--------------------------------------

Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>rt-buffer-size</b> <i>number</i>
Tree	<b>rt-buffer-size</b>
Range	300 to 8000
Units	milliseconds
Default	300
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### rt-server

Synopsis	Enter the <b>rt-server</b> context
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>rt-server</b>
Tree	<b>rt-server</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### ip-address *string*

Synopsis	IP address of the upstream retransmission server
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>rt-server</b> <b>ip-address</b> <i>string</i>
Tree	<b>ip-address</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### port *number*

Synopsis	UDP port to send RET requests to the upstream RET sever
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>rt-server</b> <b>port</b> <i>number</i>
Tree	<b>port</b>
Range	1024 to 5999   6251 to 65535

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **rt-state** *keyword*

Synopsis	Retransmission server state
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">rt-server</a> <b>rt-state</b> <i>keyword</i>
Tree	<a href="#">rt-state</a>
Options	false, true
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **stream-selection**

Synopsis	Enter the <b>stream-selection</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <b>stream-selection</b>
Tree	<a href="#">stream-selection</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **intf1** *string*

Synopsis	Primary interface
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">channel</a> <a href="#">start</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">end</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">video</a> <a href="#">stream-selection</a> <b>intf1</b> <i>string</i>
Tree	<a href="#">intf1</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**intf2 string**

Synopsis	Secondary interface
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>stream-selection</b> <b>intf2</b> <i>string</i>
Tree	<b>intf2</b>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**source1 string**

Synopsis	Primary source IP address
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>stream-selection</b> <b>source1</b> <i>string</i>
Tree	<b>source1</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**source2 string**

Synopsis	Secondary source IP address
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>stream-selection</b> <b>source2</b> <i>string</i>
Tree	<b>source2</b>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**video-group** (*number* | *keyword*)

Synopsis	Video group ID
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>channel</b> <b>start</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>end</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <b>video</b> <b>video-group</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>video-group</b>

Range	1 to 4
Options	none
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **cong-priority-threshold** *number*

Synopsis	Preference level threshold from low to high priority
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <b>cong-priority-threshold</b> <i>number</i>
Tree	<a href="#">cong-priority-threshold</a>
Range	0 to 7
Default	4
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <b>description</b> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **ecmp-opt-threshold** *number*

Synopsis	ECMP threshold
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <b>ecmp-opt-threshold</b> <i>number</i>
Tree	<a href="#">ecmp-opt-threshold</a>
Range	0 to 7
Default	7
Introduced	16.0.R1
Platforms	All

**explicit-sf-path** *keyword*

Synopsis	Explicit ingress switch fabric multicast path
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <b>explicit-sf-path</b> <i>keyword</i>
Tree	<a href="#">explicit-sf-path</a>
Options	primary, secondary
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR-1x-48D, 7750 SR-1x-92S, 7750 SR-7/12/12e, 7750 SR-s, 7950 XRS, VSR

**keepalive-override** *number*

Synopsis	Keepalive timer override
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <b>keepalive-override</b> <i>number</i>
Tree	<a href="#">keepalive-override</a>
Range	10 to 86000
Units	seconds
Introduced	16.0.R1
Platforms	All

**preference** *number*

Synopsis	Relative preference level for multicast channels
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <b>preference</b> <i>number</i>
Tree	<a href="#">preference</a>
Range	1 to 7
Introduced	16.0.R1
Platforms	All

**primary-tunnel-interface**

Synopsis	Enter the <b>primary-tunnel-interface</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <b>primary-tunnel-interface</b>

Tree	<a href="#">primary-tunnel-interface</a>
Introduced	16.0.R1
Platforms	All

### **ldp-p2mp** *number*

Synopsis	ID for signaling MLDP P2MP LSP
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">primary-tunnel-interface</a> <b>ldp-p2mp</b> <i>number</i>
Tree	<a href="#">ldp-p2mp</a>
Range	1 to 4294967295
Notes	The following elements are part of a choice: <b>ldp-p2mp</b> or <b>rsvp-p2mp</b> .
Introduced	16.0.R1
Platforms	All

### **rsvp-p2mp** *string*

Synopsis	P2MP name for the LDP P2MP
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">primary-tunnel-interface</a> <b>rsvp-p2mp</b> <i>string</i>
Tree	<a href="#">rsvp-p2mp</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>ldp-p2mp</b> or <b>rsvp-p2mp</b> .
Introduced	16.0.R1
Platforms	All

### **sender** *string*

Synopsis	Bundle set to receive from the primary tunnel interface
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">primary-tunnel-interface</a> <b>sender</b> <i>string</i>
Tree	<a href="#">sender</a>
Introduced	16.0.R1
Platforms	All

## video

Synopsis	Enter the <b>video</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a>
Tree	<a href="#">video</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## analyzer

Synopsis	Enable the <b>analyzer</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a>
Tree	<a href="#">analyzer</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## alarms

Synopsis	Enter the <b>alarms</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a>
Tree	<a href="#">alarms</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## cc-error *boolean*

Synopsis	Check the continuity counter
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">cc-error</a> <i>boolean</i>
Tree	<a href="#">cc-error</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**non-vid-pid-absent** *number*

Synopsis	PID checked within the specified interval
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">non-vid-pid-absent</a> <i>number</i>
Tree	<a href="#">non-vid-pid-absent</a>
Range	100 to 5000
Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**pat-repetition**

Synopsis	Enable the <b>pat-repetition</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pat-repetition</a>
Tree	<a href="#">pat-repetition</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**poa** *number*

Synopsis	Time between two PATs for which a POA alarm is raised
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pat-repetition</a> <a href="#">poa</a> <i>number</i>
Tree	<a href="#">poa</a>
Range	300 to 1000
Units	milliseconds
Default	500
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**qos** *number*

Synopsis	Time between two PATs for which a QoS alarm is raised
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pat-repetition</a> <a href="#">qos</a> <i>number</i>

Tree	<a href="#">qos</a>
Range	200 to 900
Units	milliseconds
Default	200
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **tnc number**

Synopsis	Time between two PATs for which a TNC alarm is raised
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pat-repetition</a> <b>tnc</b> <i>number</i>
Tree	<a href="#">tnc</a>
Range	100 to 800
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **pat-syntax boolean**

Synopsis	Check for PAT syntax errors
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pat-syntax</a> <i>boolean</i>
Tree	<a href="#">pat-syntax</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **pcr-repetition**

Synopsis	Enable the <b>pcr-repetition</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pcr-repetition</a>
Tree	<a href="#">pcr-repetition</a>
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **poa number**

Synopsis Time between two PCRs for which a POA alarm is raised

Context **configure** **multicast-management** **multicast-info-policy** *string* **bundle** *string* **video analyzer alarms** **pcr-repetition** **poa** *number*

Tree [poa](#)

Range 300 to 1000

Units milliseconds

Default 500

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **qos number**

Synopsis Time between two PCRs for which a QoS alarm is raised

Context **configure** **multicast-management** **multicast-info-policy** *string* **bundle** *string* **video analyzer alarms** **pcr-repetition** **qos** *number*

Tree [qos](#)

Range 200 to 900

Units milliseconds

Default 200

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **tnc number**

Synopsis Time between two PCRs for which a TNC alarm is raised

Context **configure** **multicast-management** **multicast-info-policy** *string* **bundle** *string* **video analyzer alarms** **pcr-repetition** **tnc** *number*

Tree [tnc](#)

Range 100 to 800

Units milliseconds

Default 100

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **pid-pmt-unref** *boolean*

Synopsis Check for unreferenced PIDs in the PMT

Context **configure** **multicast-management** **multicast-info-policy** *string* **bundle** *string* **video**  
**analyzer** **alarms** **pid-pmt-unref** *boolean*

Tree [pid-pmt-unref](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **pmt-repetition**

Synopsis Enable the **pmt-repetition** context

Context **configure** **multicast-management** **multicast-info-policy** *string* **bundle** *string* **video**  
**analyzer** **alarms** **pmt-repetition**

Tree [pmt-repetition](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **poa** *number*

Synopsis Time between two PMTs for which a POA alarm is raised

Context **configure** **multicast-management** **multicast-info-policy** *string* **bundle** *string* **video**  
**analyzer** **alarms** **pmt-repetition** **poa** *number*

Tree [poa](#)

Range 300 to 5000

Units milliseconds

Default 2000

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **qos** *number*

Synopsis Time between two PMTs for which a QoS alarm is raised

Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pmt-repetition</a> <i>qos</i> <i>number</i>
Tree	<a href="#">qos</a>
Range	200 to 4900
Units	milliseconds
Default	800
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**tnc number**

Synopsis	Time between two PMTs for which a TNC alarm is raised
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pmt-repetition</a> <a href="#">tnc</a> <i>number</i>
Tree	<a href="#">tnc</a>
Range	100 to 4800
Units	milliseconds
Default	400
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**pmt-syntax boolean**

Synopsis	Check for PMT syntax errors
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">pmt-syntax</a> <i>boolean</i>
Tree	<a href="#">pmt-syntax</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**report-alarm**

Synopsis	Enter the <b>report-alarm</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">report-alarm</a>

Tree	<a href="#">report-alarm</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **severity** *keyword*

Synopsis	Keyword for the type of alarm
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">report-alarm</a> <b>severity</b> <i>keyword</i>
Tree	<a href="#">severity</a>
Options	tnc, qos, poa
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **tei-set** *boolean*

Synopsis	Check for TEI set errors
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">tei-set</a> <b>boolean</b>
Tree	<a href="#">tei-set</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **ts-sync-loss** *boolean*

Synopsis	Check for synchronization loss errors
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">analyzer</a> <a href="#">alarms</a> <a href="#">ts-sync-loss</a> <b>boolean</b>
Tree	<a href="#">ts-sync-loss</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**vid-pid-absent** *number*

Synopsis	VID PID checked within the specified time interval
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>video</b> <b>analyzer</b> <b>alarms</b> <b>vid-pid-absent</b> <i>number</i>
Tree	<b>vid-pid-absent</b>
Range	100 to 5000
Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>video</b> <b>analyzer</b> <b>description</b> <i>string</i>
Tree	<b>description</b>
String Length	1 to 80
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**fcc-channel-type** *keyword*

Synopsis	Channel type for the bundle or channel
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>video</b> <b>fcc-channel-type</b> <i>keyword</i>
Tree	<b>fcc-channel-type</b>
Options	hd, sd, pip
Default	hd
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**fcc-min-duration** *number*

Synopsis	Minimum duration of the FCC burst
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>bundle</b> <i>string</i> <b>video</b> <b>fcc-min-duration</b> <i>number</i>

Tree	<a href="#">fcc-min-duration</a>
Range	300 to 8000
Units	milliseconds
Default	300
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **fcc-server** *boolean*

Synopsis	Enable the FCC server for a multicast bundle
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string bundle string video</i> <a href="#">fcc-server</a> <i>boolean</i>
Tree	<a href="#">fcc-server</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **local-fcc-port** *number*

Synopsis	Local port for FCC requests
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string bundle string video</i> <a href="#">local-fcc-port</a> <i>number</i>
Tree	<a href="#">local-fcc-port</a>
Range	1024 to 5999   6251 to 65535
Default	4098
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **local-rt-port** *number*

Synopsis	Local port for RET requests
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string bundle string video</i> <a href="#">local-rt-port</a> <i>number</i>
Tree	<a href="#">local-rt-port</a>
Range	1024 to 5999   6251 to 65535
Default	4096

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **local-rt-server** *boolean*

Synopsis	Enable local retransmission server capability
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">local-rt-server</a> <i>boolean</i>
Tree	<a href="#">local-rt-server</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **reorder-audio** *number*

Synopsis	Time the audio packets are reordered in the ad stream
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">reorder-audio</a> <i>number</i>
Tree	<a href="#">reorder-audio</a>
Range	100 to 1000
Units	milliseconds
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **rt-buffer-size** *number*

Synopsis	Buffer size to store channel packets
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">rt-buffer-size</a> <i>number</i>
Tree	<a href="#">rt-buffer-size</a>
Range	300 to 8000
Units	milliseconds
Default	300
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## rt-server

Synopsis	Enable the <b>rt-server</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">rt-server</a>
Tree	<a href="#">rt-server</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## ip-address *string*

Synopsis	IP address of the upstream retransmission server
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">rt-server</a> <a href="#">ip-address</a> <i>string</i>
Tree	<a href="#">ip-address</a>
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## port *number*

Synopsis	RET server port number
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">rt-server</a> <a href="#">port</a> <i>number</i>
Tree	<a href="#">port</a>
Range	1024 to 5999   6251 to 65535
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## stream-selection

Synopsis	Enter the <b>stream-selection</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">stream-selection</a>
Tree	<a href="#">stream-selection</a>

Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **intf1 string**

Synopsis Primary interface  
Context **configure** [multicast-management](#) [multicast-info-policy](#) [string bundle](#) [string video](#) [stream-selection](#) [intf1](#) [string](#)  
Tree [intf1](#)  
String Length 1 to 32  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **intf2 string**

Synopsis Secondary interface  
Context **configure** [multicast-management](#) [multicast-info-policy](#) [string bundle](#) [string video](#) [stream-selection](#) [intf2](#) [string](#)  
Tree [intf2](#)  
String Length 1 to 32  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **source1 string**

Synopsis Primary source IP address  
Context **configure** [multicast-management](#) [multicast-info-policy](#) [string bundle](#) [string video](#) [stream-selection](#) [source1](#) [string](#)  
Tree [source1](#)  
Introduced 16.0.R1  
Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **source2 string**

Synopsis Secondary source IP address  
Context **configure** [multicast-management](#) [multicast-info-policy](#) [string bundle](#) [string video](#) [stream-selection](#) [source2](#) [string](#)

Tree	<a href="#">source2</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **video-group** *number*

Synopsis	Video group for the bundle
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">bundle</a> <i>string</i> <a href="#">video</a> <a href="#">video-group</a> <i>number</i>
Tree	<a href="#">video-group</a>
Range	1 to 4
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **video-policy**

Synopsis	Enter the <b>video-policy</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a>
Tree	<a href="#">video-policy</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **video-interface** [[ip-address](#)] *string*

Synopsis	Enter the <b>video-interface</b> list instance
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i>

Tree	<a href="#">video-interface</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**[ip-address] string**

Synopsis	IP address of the video interface
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i>
Tree	<a href="#">video-interface</a>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**extended-unicast boolean**

Synopsis	Extend video unicast session
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">extended-unicast</a> <i>boolean</i>
Tree	<a href="#">extended-unicast</a>
Description	<p>When configured to <b>true</b>, video unicast is delayed from switching over to multicast for 5 minutes. The unicast session can be extended further by sending an RTCP extension request, which resets the 5-minute timer. This is ideal for services that require unicast video and end devices that require extended time to switch over from unicast to multicast.</p> <p>When configured to <b>false</b>, the unicast session switches over to multicast 1.5 seconds after the IGMP request is sent. Most Fast Channel Change deployments do not require a time extension.</p>
Default	false
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**fcc-session-timeout number**

Synopsis	FCC session timeout
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">fcc-session-timeout</a> <i>number</i>
Tree	<a href="#">fcc-session-timeout</a>

Range	5 to 300
Units	seconds
Default	300
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## hd

Synopsis	Enter the <b>hd</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <b>hd</b>
Tree	<a href="#">hd</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## dent-threshold *number*

Synopsis	Threshold below which the FCC server dents unicast data
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <b>hd</b> <b>dent-threshold</b> <i>number</i>
Tree	<a href="#">dent-threshold</a>
Range	1 to 31
Default	16
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## fcc-burst *number*

Synopsis	Burst rate FCC server sends unicast data to FCC client
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <b>hd</b> <b>fcc-burst</b> <i>number</i>
Tree	<a href="#">fcc-burst</a>
Range	0 to 600
Units	percent
Default	25
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **fcc-server**

Synopsis Enter the **fcc-server** context

Context **configure** [multicast-management](#) [multicast-info-policy](#) *string* [video-policy](#) [video-interface](#) *string* [hd fcc-server](#)

Tree [fcc-server](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **mode** *keyword*

Synopsis Mode the FCC server sends information to the client

Context **configure** [multicast-management](#) [multicast-info-policy](#) *string* [video-policy](#) [video-interface](#) *string* [hd fcc-server mode](#) *keyword*

Tree [mode](#)

Options burst, dent, hybrid

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **local-rt-server** *boolean*

Synopsis Enable local retransmission server capability

Context **configure** [multicast-management](#) [multicast-info-policy](#) *string* [video-policy](#) [video-interface](#) *string* [hd local-rt-server](#) *boolean*

Tree [local-rt-server](#)

Default false

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **mc-handover** *number*

Synopsis Rate the FCC server sends data during the handover

Context **configure** [multicast-management](#) [multicast-info-policy](#) *string* [video-policy](#) [video-interface](#) *string* [hd mc-handover](#) *number*

Tree [mc-handover](#)

---

Range	0 to 100
Units	percent
Default	25
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **rt-rate** *number*

Synopsis	Rate the RET packets are sent to client
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>video-policy</b> <b>video-interface</b> <i>string</i> <b>hd</b> <b>rt-rate</b> <i>number</i>
Tree	<b>rt-rate</b>
Range	1 to 100
Units	percent
Default	5
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **max-igmp-latency** *number*

Synopsis	Maximum IGMP latency per client
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>video-policy</b> <b>video-interface</b> <i>string</i> <b>max-igmp-latency</b> <i>number</i>
Tree	<b>max-igmp-latency</b>
Range	10 to 1000
Units	milliseconds
Default	100
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **max-sessions** *number*

Synopsis	Maximum number of sessions per client
Context	<b>configure</b> <b>multicast-management</b> <b>multicast-info-policy</b> <i>string</i> <b>video-policy</b> <b>video-interface</b> <i>string</i> <b>max-sessions</b> <i>number</i>
Tree	<b>max-sessions</b>

Range	1 to 65536
Default	256
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## pip

Synopsis	Enter the <b>pip</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <b>pip</b>
Tree	<a href="#">pip</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## dent-threshold *number*

Synopsis	Threshold below which the FCC server dents unicast data
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">pip</a> <b>dent-threshold</b> <i>number</i>
Tree	<a href="#">dent-threshold</a>
Range	1 to 31
Default	16
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## fcc-burst *number*

Synopsis	Burst rate FCC server sends unicast data to FCC client
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">pip</a> <b>fcc-burst</b> <i>number</i>
Tree	<a href="#">fcc-burst</a>
Range	0 to 600
Units	percent
Default	25
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## **fcc-server**

Synopsis	Enter the <b>fcc-server</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">pip</a> <b>fcc-server</b>
Tree	<a href="#">fcc-server</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## **mode** *keyword*

Synopsis	Mode the FCC server sends information to the client
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">pip</a> <b>fcc-server</b> <b>mode</b> <i>keyword</i>
Tree	<a href="#">mode</a>
Options	burst, dent, hybrid
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## **local-rt-server** *boolean*

Synopsis	Enable local retransmission server capability
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">pip</a> <b>local-rt-server</b> <i>boolean</i>
Tree	<a href="#">local-rt-server</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

## **mc-handover** *number*

Synopsis	Rate the FCC server sends data during the handover
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">pip</a> <b>mc-handover</b> <i>number</i>
Tree	<a href="#">mc-handover</a>
Range	0 to 600

Units	percent
Default	25
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**rt-rate** *number*

Synopsis	Rate the RET packets are sent to client
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">pip</a> <a href="#">rt-rate</a> <i>number</i>
Tree	<a href="#">rt-rate</a>
Range	1 to 100
Units	percent
Default	5
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**ret-session-timeout** *number*

Synopsis	RET session timeout
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">ret-session-timeout</a> <i>number</i>
Tree	<a href="#">ret-session-timeout</a>
Range	5 to 300
Units	seconds
Default	300
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**rt-payload-type** *number*

Synopsis	Format for the received retransmission packets
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">rt-payload-type</a> <i>number</i>
Tree	<a href="#">rt-payload-type</a>
Range	33   96 to 127

Default	99
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**rt-rate** *number*

Synopsis	Rate the RET packets are sent to client
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <b>rt-rate</b> <i>number</i>
Tree	<a href="#">rt-rate</a>
Range	1 to 100
Units	percent
Default	5
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**sd**

Synopsis	Enter the <b>sd</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <b>sd</b>
Tree	<a href="#">sd</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**dent-threshold** *number*

Synopsis	Threshold below which the FCC server dents unicast data
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <b>sd</b> <b>dent-threshold</b> <i>number</i>
Tree	<a href="#">dent-threshold</a>
Range	1 to 31
Default	16
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**fcc-burst** *number*

Synopsis	Burst rate FCC server sends unicast data to FCC client
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">sd</a> <b>fcc-burst</b> <i>number</i>
Tree	<a href="#">fcc-burst</a>
Range	0 to 600
Units	percent
Default	25
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**fcc-server**

Synopsis	Enter the <b>fcc-server</b> context
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">sd</a> <b>fcc-server</b>
Tree	<a href="#">fcc-server</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**mode** *keyword*

Synopsis	Mode the FCC server sends information to the client
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">sd</a> <b>fcc-server</b> <b>mode</b> <i>keyword</i>
Tree	<a href="#">mode</a>
Options	burst, dent, hybrid
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**local-rt-server** *boolean*

Synopsis	Enable local retransmission server capability
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">sd</a> <b>local-rt-server</b> <i>boolean</i>

Tree	<a href="#">local-rt-server</a>
Default	false
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **mc-handover** *number*

Synopsis	Rate the FCC server sends data during the handover
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">sd mc-handover</a> <i>number</i>
Tree	<a href="#">mc-handover</a>
Range	0 to 600
Units	percent
Default	25
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **rt-rate** *number*

Synopsis	Rate the RET packets are sent to client
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">sd rt-rate</a> <i>number</i>
Tree	<a href="#">rt-rate</a>
Range	1 to 100
Units	percent
Default	5
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

### **subscriber-bw-limit** *number*

Synopsis	Egress bandwidth limit per subscriber
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-info-policy</a> <i>string</i> <a href="#">video-policy</a> <a href="#">video-interface</a> <i>string</i> <a href="#">subscriber-bw-limit</a> <i>number</i>
Tree	<a href="#">subscriber-bw-limit</a>
Range	1 to 4294967295

---

Units	kilobps
Default	4294967295
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-1s, 7750 SR-2s, 7750 SR-7s, 7750 SR-14s

**multicast-reporting-destination** [[name](#)] *string*

Synopsis	Enter the <b>multicast-reporting-destination</b> list instance
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-reporting-destination</a> <i>string</i>
Tree	<a href="#">multicast-reporting-destination</a>
Introduced	16.0.R1
Platforms	All

**[name]** *string*

Synopsis	Multicast reporting destination name
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-reporting-destination</a> <i>string</i>
Tree	<a href="#">multicast-reporting-destination</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**address** *string*

Synopsis	IP address of the multicast reporting destination
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-reporting-destination</a> <i>string</i> <a href="#">address</a> <i>string</i>
Tree	<a href="#">address</a>
Default	0.0.0.0
Introduced	16.0.R1
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of multicast reporting destination
----------	---

Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-reporting-destination</a> <i>string</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-reporting-destination</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **maximum-transmission-delay** *number*

Synopsis	Time delay before packet transmits to the destination
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-reporting-destination</a> <i>string</i> <a href="#">maximum-transmission-delay</a> <i>number</i>
Tree	<a href="#">maximum-transmission-delay</a>
Range	0 to 100
Units	deciseconds
Default	1
Introduced	16.0.R1
Platforms	All

### **udp-port** *number*

Synopsis	UDP port where multicast reports are sent
Context	<b>configure</b> <a href="#">multicast-management</a> <a href="#">multicast-reporting-destination</a> <i>string</i> <a href="#">udp-port</a> <i>number</i>
Tree	<a href="#">udp-port</a>
Range	1 to 65535

Default	1037
Introduced	16.0.R1
Platforms	All

## 3.29 oam-pm commands

```

### 3.29.1 oam-pm command descriptions

#### **oam-pm**

Synopsis	Enter the <b>oam-pm</b> context
Context	<b>configure oam-pm</b>
Tree	<a href="#">oam-pm</a>
Introduced	16.0.R1
Platforms	All

#### **bin-group** [[bin-group-id](#)] *number*

Synopsis	Enter the <b>bin-group</b> list instance
Context	<b>configure oam-pm bin-group</b> <i>number</i>
Tree	<a href="#">bin-group</a>
Introduced	16.0.R5
Platforms	All

#### **[bin-group-id]** *number*

Synopsis	Bin group ID
Context	<b>configure oam-pm bin-group</b> <i>number</i>
Tree	<a href="#">bin-group</a>
Range	1 to 255
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

#### **admin-state** *keyword*

Synopsis	Administrative state of the bin group
Context	<b>configure oam-pm bin-group</b> <i>number</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Introduced	16.0.R5

Platforms All

### **bin-type** [**bin-metric**] *keyword*

Synopsis Enter the **bin-type** list instance  
 Context **configure** **oam-pm** **bin-group** *number* **bin-type** *keyword*  
 Tree **bin-type**  
 Introduced 16.0.R5  
 Platforms All

### **[bin-metric]** *keyword*

Synopsis Delay metric bin structure  
 Context **configure** **oam-pm** **bin-group** *number* **bin-type** *keyword*  
 Tree **bin-type**  
 Options fd, fdr, ifdv  
 Notes This element is part of a list key.  
 Introduced 16.0.R5  
 Platforms All

### **bin** [**bin-number**] *number*

Synopsis Enter the **bin** list instance  
 Context **configure** **oam-pm** **bin-group** *number* **bin-type** *keyword* **bin** *number*  
 Tree **bin**  
 Introduced 16.0.R5  
 Platforms All

### **[bin-number]** *number*

Synopsis Bin number  
 Context **configure** **oam-pm** **bin-group** *number* **bin-type** *keyword* **bin** *number*  
 Tree **bin**  
 Range 0 to 9  
 Notes This element is part of a list key.

Introduced 16.0.R5  
 Platforms All

### **lower-bound** *number*

Synopsis Lower bound for the bin  
 Context **configure** **oam-pm** **bin-group** *number* **bin-type** *keyword* **bin** *number* **lower-bound** *number*  
 Tree [lower-bound](#)  
 Range 0 | 1 to 4294967295  
 Units microseconds  
 Introduced 16.0.R5  
 Platforms All

### **delay-event** [**direction**] *keyword*

Synopsis Enter the **delay-event** list instance  
 Context **configure** **oam-pm** **bin-group** *number* **bin-type** *keyword* **delay-event** *keyword*  
 Tree [delay-event](#)  
 Introduced 16.0.R5  
 Platforms All

### [**direction**] *keyword*

Synopsis Traffic flow direction of the OAM-PM test or metric  
 Context **configure** **oam-pm** **bin-group** *number* **bin-type** *keyword* **delay-event** *keyword*  
 Tree [delay-event](#)  
 Options forward, backward, round-trip  
 Notes This element is part of a list key.  
 Introduced 16.0.R5  
 Platforms All

### **clear-threshold** *number*

Synopsis OAM-PM clear threshold for an excessive delay

Context	<b>configure</b> oam-pm bin-group number bin-type keyword delay-event keyword clear-threshold number
Tree	clear-threshold
Range	0 to 863999
Introduced	16.0.R5
Platforms	All

### **exclude-lowest-bin** number

Synopsis	Lowest bin excluded from the TCA count
Context	<b>configure</b> oam-pm bin-group number bin-type keyword delay-event keyword exclude-lowest-bin number
Tree	exclude-lowest-bin
Range	1 to 9
Introduced	16.0.R5
Platforms	All

### **lowest-bin** number

Synopsis	Lowest delay bin used when applying a delay threshold
Context	<b>configure</b> oam-pm bin-group number bin-type keyword delay-event keyword lowest-bin number
Tree	lowest-bin
Range	0 to 9
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

### **raise-threshold** number

Synopsis	Raise threshold for excessive delay
Context	<b>configure</b> oam-pm bin-group number bin-type keyword delay-event keyword raise-threshold number
Tree	raise-threshold
Range	1 to 864000
Notes	This element is mandatory.

Introduced 16.0.R5  
 Platforms All

### **exclude-from-avg** [[direction](#)] *keyword*

Synopsis Enter the **exclude-from-avg** list instance  
 Context **configure** [oam-pm](#) [bin-group](#) *number* [bin-type](#) *keyword* [exclude-from-avg](#) *keyword*  
 Tree [exclude-from-avg](#)  
 Introduced 16.0.R5  
 Platforms All

### **[direction]** *keyword*

Synopsis Traffic flow direction of the OAM-PM test or metric  
 Context **configure** [oam-pm](#) [bin-group](#) *number* [bin-type](#) *keyword* [exclude-from-avg](#) *keyword*  
 Tree [exclude-from-avg](#)  
 Options forward, backward, round-trip  
 Notes This element is part of a list key.  
 Introduced 16.0.R5  
 Platforms All

### **bins** *string*

Synopsis Bin numbers excluded from the average calculation  
 Context **configure** [oam-pm](#) [bin-group](#) *number* [bin-type](#) *keyword* [exclude-from-avg](#) *keyword* [bins](#) *string*  
 Tree [bins](#)  
 String Length 1 to 39  
 Notes This element is mandatory.  
 Introduced 16.0.R5  
 Platforms All

### **description** *string*

Synopsis Text description

Context	<b>configure</b> <a href="#">oam-pm bin-group</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R5
Platforms	All

### **session** [[session-name](#)] *string*

Synopsis	Enter the <b>session</b> list instance
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i>
Tree	<a href="#">session</a>
Introduced	16.0.R5
Platforms	All

### **[session-name]** *string*

Synopsis	OAM-PM session name
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i>
Tree	<a href="#">session</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

### **bin-group** *reference*

Synopsis	Bin group for the session
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">bin-group</a> <i>reference</i>
Tree	<a href="#">bin-group</a>
Reference	<b>configure</b> <a href="#">oam-pm bin-group</a> <i>number</i>
Introduced	16.0.R5
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R5
Platforms	All

### **ethernet**

Synopsis	Enable the <b>ethernet</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet</a>
Tree	<a href="#">ethernet</a>
Notes	The following elements are part of a mandatory choice: <b>ethernet</b> , <b>ip</b> , or <b>mpls</b> .
Introduced	16.0.R5
Platforms	All

### **dest-mac** *string*

Synopsis	Destination MAC address for the session
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet</a> <a href="#">dest-mac</a> <i>string</i>
Tree	<a href="#">dest-mac</a>
Introduced	16.0.R5
Platforms	All

### **dmm**

Synopsis	Enable the <b>dmm</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet</a> <a href="#">dmm</a>
Tree	<a href="#">dmm</a>
Introduced	16.0.R5
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the test
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet dmm admin-state</b> <i>keyword</i>
Tree	<b>admin-state</b>
Options	enable, disable
Default	disable
Introduced	16.0.R5
Platforms	All

**data-tlv-size** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Size of the pad TLV in the frames sent for the test
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet dmm data-tlv-size</b> <i>number</i>
Tree	<b>data-tlv-size</b>
Range	0   3 to 2000
Units	octets
Default	0
Introduced	16.0.R5
Platforms	All

**delay-template** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Reference to a streaming delay template for the test
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet dmm delay-template</b> <i>string</i>
Tree	<b>delay-template</b>
String Length	1 to 64
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**interval** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Time between transmission PDUs for the session test
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet dmm interval</b> <i>number</i>
Tree	<b>interval</b>
Description	This command configures the message period or probe spacing for the transmission of a frame.
Range	50   100   200   300   400   500   600   700   800   900   1000   10000
Units	milliseconds
Introduced	16.0.R5
Platforms	All

**test-duration** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Duration of an on-demand test
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet dmm test-duration</b> <i>number</i>
Tree	<b>test-duration</b>
Range	1 to 86400
Units	seconds
Introduced	16.0.R5
Platforms	All

**test-id** (*number* | *keyword*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Test ID
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet dmm test-id</b> ( <i>number</i>   <i>keyword</i> )

Tree	<a href="#">test-id</a>
Range	0 to 2147483647
Options	auto – Automatically assigns a test-id
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

## Imm

Synopsis	Enable the <b>Imm</b> context
Context	<b>configure</b> <a href="#">oam-pm session string ethernet Imm</a>
Tree	<a href="#">Imm</a>
Introduced	16.0.R5
Platforms	All

## **admin-state** *keyword*

Synopsis	Administrative state of the test
Context	<b>configure</b> <a href="#">oam-pm session string ethernet Imm admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R5
Platforms	All

## availability

### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>availability</b> context
Context	<b>configure</b> <a href="#">oam-pm session string ethernet Imm availability</a>
Tree	<a href="#">availability</a>
Introduced	16.0.R5
Platforms	All

**admin-state** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Administrative state of availability statistics
Context	<b>configure</b> <a href="#">oam-pm session string ethernet lmm availability admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R5
Platforms	All

**flr-threshold** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	FLR threshold for the test
Context	<b>configure</b> <a href="#">oam-pm session string ethernet lmm availability flr-threshold number</a>
Tree	<a href="#">flr-threshold</a>
Range	0 to 100
Units	percent
Default	50
Introduced	16.0.R5
Platforms	All

**hli-force-count** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Increment HLI/CHLI counters regardless of availability
Context	<b>configure</b> <a href="#">oam-pm session string ethernet lmm availability hli-force-count boolean</a>

Tree	<a href="#">hli-force-count</a>
Default	false
Introduced	16.0.R5
Platforms	All

## timing

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>timing</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm availability timing</a>
Tree	<a href="#">timing</a>
Introduced	16.0.R5
Platforms	All

## chli-threshold *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	CHLI threshold
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm availability timing chli-threshold</a> <i>number</i>
Tree	<a href="#">chli-threshold</a>
Range	1 to 9
Default	5
Introduced	16.0.R5
Platforms	All

## consec-delta-t *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Number of consecutive delta-t intervals
----------	---

Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm availability timing consec-delta-t</a> <i>number</i>
Tree	<a href="#">consec-delta-t</a>
Range	2 to 10
Default	10
Introduced	16.0.R5
Platforms	All

### **frames-per-delta-t** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Number of frames sent in one delta-t
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm availability timing frames-per-delta-t</a> <i>number</i>
Tree	<a href="#">frames-per-delta-t</a>
Range	1 to 50
Introduced	16.0.R5
Platforms	All

### **fc-collection** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enable collection of per-forwarding class counters
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm fc-collection</a> <i>boolean</i>
Tree	<a href="#">fc-collection</a>
Default	false
Introduced	16.0.R5
Platforms	All

## interval number

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Time between transmission PDUs for the session test
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm interval</a> <i>number</i>
Tree	<a href="#">interval</a>
Description	This command configures the message period or probe spacing for the transmission of a frame.
Range	100   1000   10000
Units	milliseconds
Introduced	16.0.R5
Platforms	All

## loss-events

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>loss-events</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events</a>
Tree	<a href="#">loss-events</a>
Introduced	16.0.R5
Platforms	All

## avg-flr-event [[direction](#)] *keyword*

Synopsis	Enter the <b>avg-flr-event</b> list instance
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events avg-flr-event</a> <i>keyword</i>
Tree	<a href="#">avg-flr-event</a>
Introduced	16.0.R5
Platforms	All

**[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm loss-events avg-flr-event</b> <i>keyword</i>
Tree	<a href="#">avg-flr-event</a>
Options	forward, backward
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

**clear-threshold** *decimal-number*

Synopsis	Clear threshold for the average FLR
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm loss-events avg-flr-event</b> <i>keyword</i> <b>clear-threshold</b> <i>decimal-number</i>
Tree	<a href="#">clear-threshold</a>
Range	0.000 to 99.999
Units	percent
Introduced	16.0.R5
Platforms	All

**raise-threshold** *decimal-number*

Synopsis	Raise threshold for the average FLR
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm loss-events avg-flr-event</b> <i>keyword</i> <b>raise-threshold</b> <i>decimal-number</i>
Tree	<a href="#">raise-threshold</a>
Range	0.000 to 100.000
Units	percent
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

**chli-event** [[direction](#)] *keyword*

Synopsis	Enter the <b>chli-event</b> list instance
----------	---

Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events chli-event</a> <i>keyword</i>
Tree	<a href="#">chli-event</a>
Introduced	16.0.R5
Platforms	All

### **[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events chli-event</a> <i>keyword</i>
Tree	<a href="#">chli-event</a>
Options	forward, backward, aggregate
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

### **clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events chli-event</a> <i>keyword</i> <a href="#">clear-threshold</a> <i>number</i>
Tree	<a href="#">clear-threshold</a>
Range	0 to 863999
Introduced	16.0.R5
Platforms	All

### **raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events chli-event</a> <i>keyword</i> <a href="#">raise-threshold</a> <i>number</i>
Tree	<a href="#">raise-threshold</a>
Range	1 to 864000
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

**hli-event** [[direction](#)] *keyword*

Synopsis	Enter the <b>hli-event</b> list instance
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events</a> <a href="#">hli-event</a> <i>keyword</i>
Tree	<a href="#">hli-event</a>
Introduced	16.0.R5
Platforms	All

**[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events</a> <a href="#">hli-event</a> <i>keyword</i>
Tree	<a href="#">hli-event</a>
Options	forward, backward, aggregate
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

**clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events</a> <a href="#">hli-event</a> <i>keyword</i> <a href="#">clear-threshold</a> <i>number</i>
Tree	<a href="#">clear-threshold</a>
Range	0 to 863999
Introduced	16.0.R5
Platforms	All

**raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events</a> <a href="#">hli-event</a> <i>keyword</i> <a href="#">raise-threshold</a> <i>number</i>
Tree	<a href="#">raise-threshold</a>
Range	1 to 864000

Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

### **unavailability-event** [[direction](#)] *keyword*

Synopsis	Enter the <b>unavailability-event</b> list instance
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm loss-events unavailability-event keyword</b>
Tree	<a href="#">unavailability-event</a>
Introduced	16.0.R5
Platforms	All

### **[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm loss-events unavailability-event keyword</b>
Tree	<a href="#">unavailability-event</a>
Options	forward, backward, aggregate
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

### **clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm loss-events unavailability-event keyword</b> <a href="#">clear-threshold</a> <i>number</i>
Tree	<a href="#">clear-threshold</a>
Range	0 to 863999
Introduced	16.0.R5
Platforms	All

### **raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
----------	---

Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm loss-events unavailability-event</b> <i>keyword</i> <b>raise-threshold</b> <i>number</i>
Tree	<b>raise-threshold</b>
Range	1 to 864000
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

### **undet-availability-event** [**direction**] *keyword*

Synopsis	Enter the <b>undet-availability-event</b> list instance
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm loss-events undet-availability-event</b> <i>keyword</i>
Tree	<b>undet-availability-event</b>
Introduced	16.0.R5
Platforms	All

### **[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm loss-events undet-availability-event</b> <i>keyword</i>
Tree	<b>undet-availability-event</b>
Options	forward, backward, aggregate
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

### **clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm loss-events undet-availability-event</b> <i>keyword</i> <b>clear-threshold</b> <i>number</i>
Tree	<b>clear-threshold</b>
Range	0 to 863999
Introduced	16.0.R5

Platforms All

### **raise-threshold** *number*

Synopsis Rising threshold that determines when to generate event

Context **configure** [oam-pm session](#) *string* [ethernet lmm loss-events undet-availability-event](#) *keyword* [raise-threshold](#) *number*

Tree [raise-threshold](#)

Range 1 to 864000

Notes This element is mandatory.

Introduced 16.0.R5

Platforms All

### **undet-unavailability-event** [[direction](#)] *keyword*

Synopsis Enter the **undet-unavailability-event** list instance

Context **configure** [oam-pm session](#) *string* [ethernet lmm loss-events undet-unavailability-event](#) *keyword*

Tree [undet-unavailability-event](#)

Introduced 16.0.R5

Platforms All

### **[direction]** *keyword*

Synopsis Traffic flow direction

Context **configure** [oam-pm session](#) *string* [ethernet lmm loss-events undet-unavailability-event](#) *keyword*

Tree [undet-unavailability-event](#)

Options forward, backward, aggregate

Notes This element is part of a list key.

Introduced 16.0.R5

Platforms All

### **clear-threshold** *number*

Synopsis Clear threshold

Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events undet-unavailability-event</a> <i>keyword</i> <a href="#">clear-threshold</a> <i>number</i>
Tree	<a href="#">clear-threshold</a>
Range	0 to 863999
Introduced	16.0.R5
Platforms	All

### **raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm loss-events undet-unavailability-event</a> <i>keyword</i> <a href="#">raise-threshold</a> <i>number</i>
Tree	<a href="#">raise-threshold</a>
Range	1 to 864000
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

### **test-duration** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Duration of an on-demand test
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet lmm test-duration</a> <i>number</i>
Tree	<a href="#">test-duration</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R5
Platforms	All

**test-id** (*number* | *keyword*)**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Test ID
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet lmm test-id</b> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">test-id</a>
Range	0 to 2147483647
Options	auto – Automatically assigns a test-id
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

**priority** *number*

Synopsis	Priority and forwarding class for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet priority</b> <i>number</i>
Tree	<a href="#">priority</a>
Range	0 to 7
Default	0
Introduced	16.0.R5
Platforms	All

**remote-mep** *number*

Synopsis	Remote MEP for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet remote-mep</b> <i>number</i>
Tree	<a href="#">remote-mep</a>
Range	1 to 8191
Introduced	16.0.R5
Platforms	All

**slm**

Synopsis	Enable the <b>slm</b> context
----------	-------------------------------

Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm</a>
Tree	<a href="#">slm</a>
Introduced	16.0.R5
Platforms	All

### **admin-state** *keyword*

Synopsis	Administrative state of the test
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm</a> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R5
Platforms	All

### **data-tlv-size** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Size of the pad TLV in the frames sent for the test
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm</a> <b>data-tlv-size</b> <i>number</i>
Tree	<a href="#">data-tlv-size</a>
Range	0   3 to 2000
Units	octets
Default	0
Introduced	16.0.R5
Platforms	All

### **flr-threshold** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	FLR threshold for the test
----------	----------------------------

Context	<b>configure</b> <i>oam-pm session string ethernet slm flr-threshold number</i>
Tree	<a href="#">flr-threshold</a>
Range	0 to 100
Units	percent
Default	50
Introduced	16.0.R5
Platforms	All

### **hli-force-count** *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Increment HLI/CHLI counters regardless of availability
Context	<b>configure</b> <i>oam-pm session string ethernet slm hli-force-count boolean</i>
Tree	<a href="#">hli-force-count</a>
Default	false
Introduced	16.0.R5
Platforms	All

### **interval** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Time between transmission PDUs for the session test
Context	<b>configure</b> <i>oam-pm session string ethernet slm interval number</i>
Tree	<a href="#">interval</a>
Description	This command configures the message period or probe spacing for the transmission of a frame.
Range	50   100   200   300   400   500   600   700   800   900   1000
Units	milliseconds
Introduced	16.0.R5
Platforms	All

## loss-events

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>loss-events</b> context
Context	<b>configure</b> <a href="#">oam-pm session string ethernet slm loss-events</a>
Tree	<a href="#">loss-events</a>
Introduced	16.0.R5
Platforms	All

## avg-flr-event [[direction](#)] *keyword*

Synopsis	Enter the <b>avg-flr-event</b> list instance
Context	<b>configure</b> <a href="#">oam-pm session string ethernet slm loss-events avg-flr-event keyword</a>
Tree	<a href="#">avg-flr-event</a>
Introduced	16.0.R5
Platforms	All

## [\[direction\]](#) *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <a href="#">oam-pm session string ethernet slm loss-events avg-flr-event keyword</a>
Tree	<a href="#">avg-flr-event</a>
Options	forward, backward
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

## clear-threshold *decimal-number*

Synopsis	Clear threshold for the average FLR
Context	<b>configure</b> <a href="#">oam-pm session string ethernet slm loss-events avg-flr-event keyword clear-threshold decimal-number</a>
Tree	<a href="#">clear-threshold</a>

Range	0.000 to 99.999
Units	percent
Introduced	16.0.R5
Platforms	All

### **raise-threshold** *decimal-number*

Synopsis	Raise threshold for the average FLR
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events avg-flr-event</b> <i>keyword</i> <b>raise-threshold</b> <i>decimal-number</i>
Tree	<b>raise-threshold</b>
Range	0.000 to 100.000
Units	percent
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

### **chli-event** [**direction**] *keyword*

Synopsis	Enter the <b>chli-event</b> list instance
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events chli-event</b> <i>keyword</i>
Tree	<b>chli-event</b>
Introduced	16.0.R5
Platforms	All

### **[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events chli-event</b> <i>keyword</i>
Tree	<b>chli-event</b>
Options	forward, backward, aggregate
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

**clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events chli-event</b> <i>keyword</i> <b>clear-threshold</b> <i>number</i>
Tree	<b>clear-threshold</b>
Range	0 to 863999
Introduced	16.0.R5
Platforms	All

**raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events chli-event</b> <i>keyword</i> <b>raise-threshold</b> <i>number</i>
Tree	<b>raise-threshold</b>
Range	1 to 864000
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

**hli-event** [*direction*] *keyword*

Synopsis	Enter the <b>hli-event</b> list instance
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events hli-event</b> <i>keyword</i>
Tree	<b>hli-event</b>
Introduced	16.0.R5
Platforms	All

**[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events hli-event</b> <i>keyword</i>
Tree	<b>hli-event</b>
Options	forward, backward, aggregate

Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

**clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events hli-event</b> <i>keyword</i> <b>clear-threshold</b> <i>number</i>
Tree	<a href="#">clear-threshold</a>
Range	0 to 863999
Introduced	16.0.R5
Platforms	All

**raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events hli-event</b> <i>keyword</i> <b>raise-threshold</b> <i>number</i>
Tree	<a href="#">raise-threshold</a>
Range	1 to 864000
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

**unavailability-event** [[direction](#)] *keyword*

Synopsis	Enter the <b>unavailability-event</b> list instance
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events unavailability-event</b> <i>keyword</i>
Tree	<a href="#">unavailability-event</a>
Introduced	16.0.R5
Platforms	All

**[direction]** *keyword*

Synopsis	Traffic flow direction
----------	------------------------

Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm loss-events unavailability-event</a> <i>keyword</i>
Tree	<a href="#">unavailability-event</a>
Options	forward, backward, aggregate
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

### **clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm loss-events unavailability-event</a> <i>keyword</i> <a href="#">clear-threshold</a> <i>number</i>
Tree	<a href="#">clear-threshold</a>
Range	0 to 863999
Introduced	16.0.R5
Platforms	All

### **raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm loss-events unavailability-event</a> <i>keyword</i> <a href="#">raise-threshold</a> <i>number</i>
Tree	<a href="#">raise-threshold</a>
Range	1 to 864000
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

### **undet-availability-event** [[direction](#)] *keyword*

Synopsis	Enter the <b>undet-availability-event</b> list instance
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm loss-events undet-availability-event</a> <i>keyword</i>
Tree	<a href="#">undet-availability-event</a>
Introduced	16.0.R5
Platforms	All

**[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events undet-availability-event</b> <i>keyword</i>
Tree	<b>undet-availability-event</b>
Options	forward, backward, aggregate
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

**clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events undet-availability-event</b> <i>keyword</i> <b>clear-threshold</b> <i>number</i>
Tree	<b>clear-threshold</b>
Range	0 to 863999
Introduced	16.0.R5
Platforms	All

**raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm loss-events undet-availability-event</b> <i>keyword</i> <b>raise-threshold</b> <i>number</i>
Tree	<b>raise-threshold</b>
Range	1 to 864000
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

**undet-unavailability-event** [**direction**] *keyword*

Synopsis	Enter the <b>undet-unavailability-event</b> list instance
----------	---

Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm loss-events undet-unavailability-event</a> <i>keyword</i>
Tree	<a href="#">undet-unavailability-event</a>
Introduced	16.0.R5
Platforms	All

**[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm loss-events undet-unavailability-event</a> <i>keyword</i>
Tree	<a href="#">undet-unavailability-event</a>
Options	forward, backward, aggregate
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

**clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm loss-events undet-unavailability-event</a> <i>keyword</i> <a href="#">clear-threshold</a> <i>number</i>
Tree	<a href="#">clear-threshold</a>
Range	0 to 863999
Introduced	16.0.R5
Platforms	All

**raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm loss-events undet-unavailability-event</a> <i>keyword</i> <a href="#">raise-threshold</a> <i>number</i>
Tree	<a href="#">raise-threshold</a>
Range	1 to 864000
Notes	This element is mandatory.
Introduced	16.0.R5

Platforms All

### test-duration *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Duration of an on-demand test
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm test-duration</b> <i>number</i>
Tree	<b>test-duration</b>
Range	1 to 86400
Units	seconds
Introduced	16.0.R5
Platforms	All

### test-id (*number* | *keyword*)

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Test ID
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ethernet slm test-id</b> ( <i>number</i>   <i>keyword</i> )
Tree	<b>test-id</b>
Range	0 to 2147483647
Options	auto – Automatically assigns a test-id
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

### timing

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>timing</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm timing</a>
Tree	<a href="#">timing</a>
Introduced	16.0.R5
Platforms	All

### **chli-threshold** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	CHLI threshold
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm timing chli-threshold</a> <i>number</i>
Tree	<a href="#">chli-threshold</a>
Range	1 to 9
Default	5
Introduced	16.0.R5
Platforms	All

### **consec-delta-t** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Number of consecutive delta-t intervals
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm timing consec-delta-t</a> <i>number</i>
Tree	<a href="#">consec-delta-t</a>
Range	2 to 10
Default	10
Introduced	16.0.R5
Platforms	All

**frames-per-delta-t** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Number of frames sent in one delta-t
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet slm timing frames-per-delta-t</a> <i>number</i>
Tree	<a href="#">frames-per-delta-t</a>
Range	1 to 50
Introduced	16.0.R5
Platforms	All

**source**

Synopsis	Enable the <b>source</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet source</a>
Tree	<a href="#">source</a>
Introduced	16.0.R5
Platforms	All

**ma-admin-name** (*named-item-64* | *admin-name*)

Synopsis	Source Ethernet MA name
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet source ma-admin-name</a> ( <i>named-item-64</i>   <i>admin-name</i> )
Tree	<a href="#">ma-admin-name</a>
String Length	1 to 64
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

**md-admin-name** (*named-item-64* | *admin-name*)

Synopsis	Source Ethernet MD name
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet source md-admin-name</a> ( <i>named-item-64</i>   <i>admin-name</i> )

Tree	<a href="#">md-admin-name</a>
String Length	1 to 64
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

### **mep number**

Synopsis	Source Ethernet MEP ID
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ethernet source mep number</a>
Tree	<a href="#">mep</a>
Range	1 to 8191
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	All

### **ip**

Synopsis	Enable the <b>ip</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip</a>
Tree	<a href="#">ip</a>
Notes	The following elements are part of a mandatory choice: <b>ethernet</b> , <b>ip</b> , or <b>mpls</b> .
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **allow-egress-remark-dscp boolean**

Synopsis	Allow DSCP modification by the egress QoS policy
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip allow-egress-remark-dscp</a> <i>boolean</i>
Tree	<a href="#">allow-egress-remark-dscp</a>
Default	false
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**destination** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Destination IP address for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip destination</i> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">destination</a>
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**destination-udp-port** *number*

Synopsis	Destination UDP port for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip destination-udp-port number</i>
Tree	<a href="#">destination-udp-port</a>
Range	1 to 65535
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**do-not-fragment** *boolean*

Synopsis	Do not allow packet fragmentation in the IPv4 header
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip do-not-fragment boolean</i>
Tree	<a href="#">do-not-fragment</a>
Default	false
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**dscp** (*keyword* | *keyword*)

Synopsis	DSCP value configured to the DSCP name
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip dscp</i> ( <i>keyword</i>   <i>keyword</i> )
Tree	<a href="#">dscp</a>
Description	This command allows for the explicit setting of the DSCP rather than deriving the DSCP value from the egress network QoS policy 1 using the <b>fc</b> and <b>profile</b> values.  Although disconnected from the <b>fc</b> and <b>profile</b> settings unless required, the three parameters should be aligned to ensure proper treatment within the node and along the path.

Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Options	resolve
Default	resolve
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fc keyword**

Synopsis	Forwarding class for the session
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip fc keyword</a>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **forwarding**

Synopsis	Enable the <b>forwarding</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip forwarding</a>
Tree	<a href="#">forwarding</a>
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **bypass-routing**

Synopsis	Bypass the routing table when sending test packets
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip forwarding bypass-routing</a>
Tree	<a href="#">bypass-routing</a>
Notes	The following elements are part of a mandatory choice: <b>bypass-routing</b> , <b>interface</b> , or <b>next-hop</b> .
Introduced	16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **interface** *string*

Synopsis Interface name

Context **configure** [oam-pm session](#) *string* [ip forwarding interface](#) *string*

Tree [interface](#)

String Length 1 to 32

Notes The following elements are part of a mandatory choice: **bypass-routing**, **interface**, or **next-hop**.

Introduced 16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **next-hop** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis IP address for forwarding

Context **configure** [oam-pm session](#) *string* [ip forwarding next-hop](#) (*ipv4-address-no-zone | ipv6-address-no-zone*)

Tree [next-hop](#)

Notes The following elements are part of a mandatory choice: **bypass-routing**, **interface**, or **next-hop**.

Introduced 16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **pattern** (*keyword | number*)

Synopsis Pattern used to fill the packet padding field

Context **configure** [oam-pm session](#) *string* [ip pattern](#) (*keyword | number*)

Tree [pattern](#)

Range 0 to 65535

Options sequential

Default 0

Introduced 16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**profile** *keyword*

Synopsis	Profile type for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip profile keyword</i>
Tree	<a href="#">profile</a>
Options	in, out
Default	out
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**router-instance** *string*

Synopsis	Router instance for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip router-instance string</i>
Tree	<a href="#">router-instance</a>
Default	Base
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**source** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source IP address for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip source (ipv4-address-no-zone   ipv6-address-no-zone)</i>
Tree	<a href="#">source</a>
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**source-udp-port** *number*

Synopsis	Source UDP port for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip source-udp-port number</i>
Tree	<a href="#">source-udp-port</a>
Range	64374 to 64383
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ttl number**

Synopsis	TTL value for the session
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string ip ttl number</i>
Tree	<a href="#">ttl</a>
Range	1 to 255
Default	255
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**tunnel**

Synopsis	Enter the <b>tunnel</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string ip tunnel</i>
Tree	<a href="#">tunnel</a>
Description	Commands in this context configure packet tunneling options for the session. This command and the <b>oam-pm session ip forwarding</b> command are mutually exclusive.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**mpls**

Synopsis	Enable the <b>mpls</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string ip tunnel mpls</i>
Tree	<a href="#">mpls</a>
Description	Commands in this context configure the MPLS packet tunneling options for the session. Configure the <b>oam-pm session ip router-instance</b> to Base to configure commands in the tunnel MPLS context. When entering a context under MPLS, the system removes any previous configuration of any sibling context. You can only configure one of the contexts for each OAM-PM session.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**rsvp-te**

Synopsis	Enable the <b>rsvp-te</b> context
----------	-----------------------------------

Context	<b>configure oam-pm session</b> <i>string</i> <b>ip tunnel mpls rsvp-te</b>
Tree	<b>rsvp-te</b>
Description	Commands in this context allow for the specification of RSVP-TE specific tunnel information used to transport the test packets. Entering this context removes all other tunnel-type options configured under the <b>configure oam-pm session ip tunnel mpls</b> context. Only a single MPLS type can be configured for an OAM-PM session.
Notes	The following elements are part of a choice: <b>rsvp-te</b> , <b>rsvp-te-auto</b> , <b>sr-isis</b> , <b>sr-ospf</b> , <b>sr-ospf3</b> , or <b>sr-te</b> .
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **lsp** *string*

Synopsis	Name of LSP that carries the test packets
Context	<b>configure oam-pm session</b> <i>string</i> <b>ip tunnel mpls rsvp-te lsp</b> <i>string</i>
Tree	<b>lsp</b>
String Length	1 to 64
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **rsvp-te-auto**

Synopsis	Enable the <b>rsvp-te-auto</b> context
Context	<b>configure oam-pm session</b> <i>string</i> <b>ip tunnel mpls rsvp-te-auto</b>
Tree	<b>rsvp-te-auto</b>
Description	Commands in this context configure the RSVP-TE-Auto feature and <b>rsvp-te-auto</b> (RSVP TE with dynamically-created LSPs) packet tunneling options for the session. If you enter a context within the MPLS context, the system removes any previous configuration of any sibling context. You can only configure one of the contexts for each OAM-PM session.
Notes	The following elements are part of a choice: <b>rsvp-te</b> , <b>rsvp-te-auto</b> , <b>sr-isis</b> , <b>sr-ospf</b> , <b>sr-ospf3</b> , or <b>sr-te</b> .
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**from string**

Synopsis	IPv4 address used to identify the LSP to be tested
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ip tunnel mpls rsvp-te-auto from</b> <i>string</i>
Tree	<b>from</b>
Description	This command configures the headend of the RSV LSP. Configure the following three commands to identify an RSVP-TE Auto LSP: <b>from</b> , <b>to</b> , and <b>lsp-template</b> . When all three of these values are configured, the specific RSVP LSP can be identified and the test packets can be carried across the tunnel.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**lsp-template string**

Synopsis	LSP template used to identify the LSP to be tested
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ip tunnel mpls rsvp-te-auto lsp-template</b> <i>string</i>
Tree	<b>lsp-template</b>
Description	This command configures the name of the LSP template used to identify the unique LSP. Configure the following three commands to identify an RSVP-TE Auto LSP: <b>from</b> , <b>to</b> , and <b>lsp-template</b> . When all three of these values are configured, the specific RSVP LSP can be identified and the test packets can be carried across the tunnel.
String Length	1 to 32
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**to string**

Synopsis	IPv4 unicast address to identify the LSP to be tested
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ip tunnel mpls rsvp-te-auto to</b> <i>string</i>
Tree	<b>to</b>
Description	This command configures the termination point of the RSVP LSP. Configure the following three commands to identify an RSVP-TE Auto LSP: <b>from</b> , <b>to</b> , and <b>lsp-template</b> . When all three of these values are configured, the specific RSVP LSP can be identified and the test packets can be carried across the tunnel.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**sr-isis**

Synopsis	Enable the <b>sr-isis</b> context
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ip tunnel mpls sr-isis</b>
Tree	<b>sr-isis</b>
Description	Commands in this context allow for the specification of SR-ISIS specific tunnel information used to transport the test packets. Entering this context removes all the other tunnel type commands configured in the <b>configure oam-pm session ip tunnel mpls</b> context. Only a single MPLS type can be configured for an OAM-PM session.
Notes	The following elements are part of a choice: <b>rsvp-te</b> , <b>rsvp-te-auto</b> , <b>sr-isis</b> , <b>sr-ospf</b> , <b>sr-ospf3</b> , or <b>sr-te</b> .
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**igp-instance** *number*

Synopsis	IGP instance used to tunnel IP packets
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ip tunnel mpls sr-isis igp-instance</b> <i>number</i>
Tree	<b>igp-instance</b>
Description	This command configures the IGP instance to tunnel IP packets for the session test.
Range	0 to 127
Default	0
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP prefix to tunnel IP packets for the session tests
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ip tunnel mpls sr-isis prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<b>prefix</b>
Description	This command configures the IP prefix used with the IGP instance to tunnel IP packets for the session tests.
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**sr-ospf**

Synopsis	Enable the <b>sr-ospf</b> context
Context	<b>configure oam-pm session</b> <i>string</i> <b>ip tunnel mpls sr-ospf</b>
Tree	<a href="#">sr-ospf</a>
Description	Commands in this context allow for the specification of SR-OSPF specific tunnel information used to transport the test packets. Entering this context removes all other tunnel type options configured under the <b>configure oam-pm session ip tunnel mpls</b> context. Only a single MPLS type can be configured for an OAM-PM session.
Notes	The following elements are part of a choice: <b>rsvp-te</b> , <b>rsvp-te-auto</b> , <b>sr-isis</b> , <b>sr-ospf</b> , <b>sr-ospf3</b> , or <b>sr-te</b> .
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**igp-instance** *number*

Synopsis	IGP instance used to tunnel IP packets
Context	<b>configure oam-pm session</b> <i>string</i> <b>ip tunnel mpls sr-ospf igp-instance</b> <i>number</i>
Tree	<a href="#">igp-instance</a>
Range	0 to 31
Default	0
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**prefix** *string*

Synopsis	IP prefix to tunnel IP packets for the session tests
Context	<b>configure oam-pm session</b> <i>string</i> <b>ip tunnel mpls sr-ospf prefix</b> <i>string</i>
Tree	<a href="#">prefix</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**sr-ospf3**

Synopsis	Enable the <b>sr-ospf3</b> context
Context	<b>configure oam-pm session</b> <i>string</i> <b>ip tunnel mpls sr-ospf3</b>
Tree	<a href="#">sr-ospf3</a>

Description	Commands in this context allow for the specification of SR-OSPFv3 specific tunnel information used to transport the test packets. Entering this context removes all other tunnel type options configured under the <b>configure oam-pm session ip tunnel mpls</b> context. Only a single MPLS type can be configured for an OAM-PM session.
Notes	The following elements are part of a choice: <b>rsvp-te</b> , <b>rsvp-te-auto</b> , <b>sr-isis</b> , <b>sr-ospf</b> , <b>sr-ospf3</b> , or <b>sr-te</b> .
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **igp-instance** *number*

Synopsis	IGP instance used to tunnel IP packets
Context	<b>configure oam-pm session</b> <i>string</i> <b>ip tunnel mpls sr-ospf3 igp-instance</b> <i>number</i>
Tree	<a href="#">igp-instance</a>
Range	0 to 31   64 to 95
Default	0
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP prefix to tunnel IP packets for the session tests
Context	<b>configure oam-pm session</b> <i>string</i> <b>ip tunnel mpls sr-ospf3 prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **sr-te**

Synopsis	Enable the <b>sr-te</b> context
Context	<b>configure oam-pm session</b> <i>string</i> <b>ip tunnel mpls sr-te</b>
Tree	<a href="#">sr-te</a>
Description	Commands in this context allow for the specification of SR-TE specific tunnel information used to transport the test packets. Entering this context removes all other tunnel type options configured under the <b>configure oam-pm session ip tunnel mpls</b> context. Only a single MPLS type can be configured for an OAM-PM session.

Notes	The following elements are part of a choice: <b>rsvp-te</b> , <b>rsvp-te-auto</b> , <b>sr-isis</b> , <b>sr-ospf</b> , <b>sr-ospf3</b> , or <b>sr-te</b> .
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **lsp string**

Synopsis	Name of LSP that carries the test packets
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip tunnel mpls sr-te</a> <a href="#">lsp string</a>
Tree	<a href="#">lsp</a>
String Length	1 to 64
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **twamp-light**

Synopsis	Enable the <b>twamp-light</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip twamp-light</a>
Tree	<a href="#">twamp-light</a>
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **admin-state keyword**

Synopsis	Administrative state of the test
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip twamp-light</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**allow-ipv6-udp-checksum-zero** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Process IPv6 packets with a zero UDP checksum
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ip twamp-light</b> <b>allow-ipv6-udp-checksum-zero</b> <i>boolean</i>
Tree	<a href="#">allow-ipv6-udp-checksum-zero</a>
Description	<p>When configured to <b>true</b>, this command configures the acceptance of IPv6 packets with UDP checksums of 0. This optional configuration allows the router to process arriving IPv6 TWAMP Test packets that contain IPv6 UDP checksum of 0x0000. The UDP port specific to this TWAMP Light test bypasses the default discard IPv6 UDP checksum 0x0000. If this optional command is not configured, IPv6 UDP checksum 0x0000 arriving packets are discarded.</p> <p>When configured to <b>false</b>, packets that arrive with an IPv6 UDP checksum of 0x0000 are discarded.</p>
Default	false
Introduced	22.2.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**delay-template** *string***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Reference to a streaming delay template for the test
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>ip twamp-light</b> <b>delay-template</b> <i>string</i>
Tree	<a href="#">delay-template</a>
String Length	1 to 64
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**interval** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Time between transmission PDUs for the session test
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip twamp-light interval number</i>
Tree	<b>interval</b>
Description	This command configures the message period or probe spacing for the transmission of a frame.
Range	50   100   200   300   400   500   600   700   800   900   1000   10000
Units	milliseconds
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## loss

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>loss</b> context
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip twamp-light loss</i>
Tree	<b>loss</b>
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## flr-threshold *number*

### WARNING:

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	FLR threshold for the test
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip twamp-light loss flr-threshold number</i>
Tree	<b>flr-threshold</b>
Range	0 to 100
Units	percent
Default	50
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## hli-force-count *boolean*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Increase HLI/CHLI counters regardless of availability
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip twamp-light loss</a> <b>hli-force-count</b> <i>boolean</i>
Tree	<a href="#">hli-force-count</a>
Default	false
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## timing

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Enter the <b>timing</b> context
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip twamp-light loss</a> <b>timing</b>
Tree	<a href="#">timing</a>
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## chli-threshold *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	CHLI threshold
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip twamp-light loss timing</a> <b>chli-threshold</b> <i>number</i>
Tree	<a href="#">chli-threshold</a>
Range	1 to 9
Default	5
Introduced	16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **consec-delta-t** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Number of consecutive delta-t intervals

Context **configure** [oam-pm session](#) *string ip twamp-light loss timing consec-delta-t number*

Tree [consec-delta-t](#)

Range 2 to 10

Default 10

Introduced 16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **frames-per-delta-t** *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Number of frames sent in one delta-t

Context **configure** [oam-pm session](#) *string ip twamp-light loss timing frames-per-delta-t number*

Tree [frames-per-delta-t](#)

Range 1 to 50

Introduced 16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **loss-events**

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis Enter the **loss-events** context

Context **configure** [oam-pm session](#) *string ip twamp-light loss-events*

Tree [loss-events](#)

Introduced 16.0.R5  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **avg-flr-event** [[direction](#)] *keyword*

Synopsis Enter the **avg-flr-event** list instance  
 Context **configure** [oam-pm session](#) *string ip twamp-light loss-events avg-flr-event keyword*  
 Tree [avg-flr-event](#)  
 Introduced 16.0.R5  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[direction]** *keyword*

Synopsis Traffic flow direction  
 Context **configure** [oam-pm session](#) *string ip twamp-light loss-events avg-flr-event keyword*  
 Tree [avg-flr-event](#)  
 Options forward, backward  
 Notes This element is part of a list key.  
 Introduced 16.0.R5  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **clear-threshold** *decimal-number*

Synopsis Clear threshold for the average FLR  
 Context **configure** [oam-pm session](#) *string ip twamp-light loss-events avg-flr-event keyword*  
[clear-threshold](#) *decimal-number*  
 Tree [clear-threshold](#)  
 Range 0.000 to 99.999  
 Units percent  
 Introduced 16.0.R5  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **raise-threshold** *decimal-number*

Synopsis Raise threshold for the average FLR

Context	<b>configure</b> <i>oam-pm session string ip twamp-light loss-events avg-flr-event keyword raise-threshold decimal-number</i>
Tree	<a href="#">raise-threshold</a>
Range	0.000 to 100.000
Units	percent
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **chli-event** [[direction](#)] *keyword*

Synopsis	Enter the <b>chli-event</b> list instance
Context	<b>configure</b> <i>oam-pm session string ip twamp-light loss-events chli-event keyword</i>
Tree	<a href="#">chli-event</a>
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <i>oam-pm session string ip twamp-light loss-events chli-event keyword</i>
Tree	<a href="#">chli-event</a>
Options	forward, backward, aggregate
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <i>oam-pm session string ip twamp-light loss-events chli-event keyword clear-threshold number</i>
Tree	<a href="#">clear-threshold</a>
Range	0 to 863999
Introduced	16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **raise-threshold** *number*

Synopsis Rising threshold that determines when to generate event

Context **configure** **oam-pm session** *string* **ip twamp-light loss-events chli-event** *keyword* **raise-threshold** *number*

Tree **raise-threshold**

Range 1 to 864000

Notes This element is mandatory.

Introduced 16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **hli-event** [*direction*] *keyword*

Synopsis Enter the **hli-event** list instance

Context **configure** **oam-pm session** *string* **ip twamp-light loss-events hli-event** *keyword*

Tree **hli-event**

Introduced 16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### [*direction*] *keyword*

Synopsis Traffic flow direction

Context **configure** **oam-pm session** *string* **ip twamp-light loss-events hli-event** *keyword*

Tree **hli-event**

Options forward, backward, aggregate

Notes This element is part of a list key.

Introduced 16.0.R5

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **clear-threshold** *number*

Synopsis Clear threshold

Context **configure** **oam-pm session** *string* **ip twamp-light loss-events hli-event** *keyword* **clear-threshold** *number*

Tree	<a href="#">clear-threshold</a>
Range	0 to 863999
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">ip twamp-light loss-events hli-event</a> <i>keyword</i> <a href="#">raise-threshold</a> <i>number</i>
Tree	<a href="#">raise-threshold</a>
Range	1 to 864000
Notes	This element is mandatory.
Introduced	16.0.R5

Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[direction]** *keyword*

Synopsis	Traffic flow direction
Context	<b>configure</b> <a href="#">oam-pm session string ip twamp-light loss-events undet-unavailability-event keyword</a>
Tree	<a href="#">undet-unavailability-event</a>
Options	forward, backward, aggregate
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**clear-threshold** *number*

Synopsis	Clear threshold
Context	<b>configure</b> <a href="#">oam-pm session string ip twamp-light loss-events undet-unavailability-event keyword clear-threshold number</a>
Tree	<a href="#">clear-threshold</a>
Range	0 to 863999
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**raise-threshold** *number*

Synopsis	Rising threshold that determines when to generate event
Context	<b>configure</b> <a href="#">oam-pm session string ip twamp-light loss-events undet-unavailability-event keyword raise-threshold number</a>
Tree	<a href="#">raise-threshold</a>
Range	1 to 864000
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## pad-size *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Amount of packet padding sent for the TWAMP-Light test
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip twamp-light pad-size number</i>
Tree	<a href="#">pad-size</a>
Range	0 to 2000
Units	octets
Default	0
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## pad-tlv-size *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Pad TLV size in each sent STAMP packet
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip twamp-light pad-tlv-size number</i>
Tree	<a href="#">pad-tlv-size</a>
Description	<p>This command configures the PAD TLV included in the STAMP test packet with a total byte count specified by this command.</p> <p>TWAMP Light test packets do not allow TLVs. To pad the size of the TWAMP Light test packet the user must configure the <b>pad-size</b> command. STAMP test packets (the standard form of TWAMP Light) introduces TLVs for padding. Therefore, STAMP test packets must use the <b>pad-tlv-size</b> value.</p>
Range	4 to 2000
Units	octets
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**record-stats** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Type of statistics recorded for the TWAMP-Light test
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip twamp-light record-stats keyword</i>
Tree	<a href="#">record-stats</a>
Options	delay, loss, delay-and-loss
Default	delay
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**session-sender-type** *keyword***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Packet type sent by the test
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip twamp-light session-sender-type keyword</i>
Tree	<a href="#">session-sender-type</a>
Description	This command configures the type of test packet format to transmit.  When the <b>stamp</b> option is configured, STAMP transmission, packet formatting, and packet processing is allowed and STAMP test packets support TLVs. When the <b>twamp-light</b> option is configured, TWAMP Light transmission, packet formatting, and packet processing is allowed, but TWAMP Light test packets do not allow TLVs.
Options	twamp-light, stamp
Default	twamp-light
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**test-duration** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Duration of an on-demand test
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip twamp-light test-duration number</i>
Tree	<a href="#">test-duration</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **test-id** (*number | keyword*)

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Test ID
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip twamp-light test-id (number   keyword)</i>
Tree	<a href="#">test-id</a>
Range	0 to 2147483647
Options	auto – Automatically assigns a test-id
Notes	This element is mandatory.
Introduced	16.0.R5
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **timestamp-format** *keyword*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	TWAMP Light or STAMP test packet timestamp format
Context	<b>configure</b> <b>oam-pm session</b> <i>string ip twamp-light timestamp-format keyword</i>
Tree	<a href="#">timestamp-format</a>
Description	This command configures the format of the timestamp structure and epoch to include in the STAMP and TWAMP Light test packets. The command option value also sets the z-bit in the test packet.  When <b>timestamp-format</b> value is <b>ntp</b> , the z-bit in the test packet is 0. When the <b>timestamp-format</b> is <b>ptp</b> , the z-bit in the test packets is 1.

Options	ntp, ptp
Default	ntp
Introduced	23.3.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **measurement-interval** [[duration](#)] *keyword*

Synopsis	Enter the <b>measurement-interval</b> list instance
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">measurement-interval</a> <i>keyword</i>
Tree	<a href="#">measurement-interval</a>
Description	Commands in this context establish individual measurement intervals to be used by the session. A maximum of three different measurement intervals may be configured under each session.
Introduced	16.0.R5
Platforms	All

### **[duration]** *keyword*

Synopsis	Duration of the measurement interval
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">measurement-interval</a> <i>keyword</i>
Tree	<a href="#">measurement-interval</a>
Options	15-mins, 1-hour, 1-day, 5-mins, 1-min
Notes	This element is part of a list key.
Introduced	16.0.R5
Platforms	All

### **accounting-policy** *reference*

Synopsis	Accounting policy for the measurement interval
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">measurement-interval</a> <i>keyword</i> <a href="#">accounting-policy</a> <i>reference</i>
Tree	<a href="#">accounting-policy</a>
Reference	<b>configure</b> <a href="#">log</a> <a href="#">accounting-policy</a> <i>number</i>
Introduced	16.0.R5
Platforms	All

**boundary-type** *keyword*

Synopsis	Alignment of the start of the measurement interval
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>measurement-interval</b> <i>keyword</i> <b>boundary-type</b> <i>keyword</i>
Tree	<b>boundary-type</b>
Options	clock-aligned, test-relative
Default	clock-aligned
Introduced	16.0.R5
Platforms	All

**clock-offset** *number*

Synopsis	Offset for a clock-aligned measurement interval
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>measurement-interval</b> <i>keyword</i> <b>clock-offset</b> <i>number</i>
Tree	<b>clock-offset</b>
Range	0 to 86399
Units	seconds
Default	0
Introduced	16.0.R5
Platforms	All

**intervals-stored** *number*

Synopsis	Maximum number of measurement intervals stored
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>measurement-interval</b> <i>keyword</i> <b>intervals-stored</b> <i>number</i>
Tree	<b>intervals-stored</b>
Range	1 to 96
Introduced	16.0.R5
Platforms	All

**threshold-cross-alerts**

Synopsis	Enter the <b>threshold-cross-alerts</b> context
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>measurement-interval</b> <i>keyword</i> <b>threshold-cross-alerts</b>

---

Tree	<a href="#">threshold-cross-alerts</a>
Introduced	16.0.R5
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of TCAs for measurement interval
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">measurement-interval</a> <i>keyword</i> <a href="#">threshold-cross-alerts</a> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R5
Platforms	All

**delay-events** *boolean*

Synopsis	Enable delay TCAs for the measurement interval
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">measurement-interval</a> <i>keyword</i> <a href="#">threshold-cross-alerts</a> <a href="#">delay-events</a> <i>boolean</i>
Tree	<a href="#">delay-events</a>
Default	false
Introduced	16.0.R5
Platforms	All

**loss-events** *boolean*

Synopsis	Enable loss TCAs for the measurement interval
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">measurement-interval</a> <i>keyword</i> <a href="#">threshold-cross-alerts</a> <a href="#">loss-events</a> <i>boolean</i>
Tree	<a href="#">loss-events</a>
Default	false
Introduced	16.0.R5
Platforms	All

## mpls

Synopsis	Enable the <b>mpls</b> context
Context	<b>configure</b> <a href="#">oam-pm session string mpls</a>
Tree	<a href="#">mpls</a>
Notes	The following elements are part of a mandatory choice: <b>ethernet</b> , <b>ip</b> , or <b>mpls</b> .
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## dm

Synopsis	Enable the <b>dm</b> context
Context	<b>configure</b> <a href="#">oam-pm session string mpls dm</a>
Tree	<a href="#">dm</a>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## admin-state *keyword*

Synopsis	Administrative state of the MPLS DM test
Context	<b>configure</b> <a href="#">oam-pm session string mpls dm admin-state keyword</a>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## delay-template *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Reference to a streaming delay template for the test
Context	<b>configure</b> <a href="#">oam-pm session string mpls dm delay-template string</a>
Tree	<a href="#">delay-template</a>
String Length	1 to 64

Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **interval** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Elapsed time between query messages sent for the test
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls dm interval</b> <i>number</i>
Tree	<b>interval</b>
Range	1000   2000   3000   4000   5000   6000   7000   8000   9000   10000
Units	milliseconds
Default	1000
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **pad-tlv-size** *number*

#### **WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Size of the pad TLV in query messages sent for the test
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls dm pad-tlv-size</b> <i>number</i>
Tree	<b>pad-tlv-size</b>
Range	0   2 to 257
Units	octets
Default	0
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**reflect-pad** *boolean***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Copy the pad TLV in each query to the response
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">mpls dm reflect-pad</a> <i>boolean</i>
Tree	<a href="#">reflect-pad</a>
Default	false
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**test-duration** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Duration of an on-demand test
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">mpls dm test-duration</a> <i>number</i>
Tree	<a href="#">test-duration</a>
Range	1 to 86400
Units	seconds
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**test-id** *number***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Test ID for query and response messages
Context	<b>configure</b> <a href="#">oam-pm session</a> <i>string</i> <a href="#">mpls dm test-id</a> <i>number</i>
Tree	<a href="#">test-id</a>
Range	0 to 67108863
Notes	This element is mandatory.

Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **dscp keyword**

Synopsis	DSCP value for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls dscp keyword</b>
Tree	<b>dscp</b>
Options	be, cp1, cp2, cp3, cp4, cp5, cp6, cp7, cs1, cp9, af11, cp11, af12, cp13, af13, cp15, cs2, cp17, af21, cp19, af22, cp21, af23, cp23, cs3, cp25, af31, cp27, af32, cp29, af33, cp31, cs4, cp33, af41, cp35, af42, cp37, af43, cp39, cs5, cp41, cp42, cp43, cp44, cp45, ef, cp47, nc1, cp49, cp50, cp51, cp52, cp53, cp54, cp55, nc2, cp57, cp58, cp59, cp60, cp61, cp62, cp63
Default	be
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **fc keyword**

Synopsis	Forwarding class for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls fc keyword</b>
Tree	<b>fc</b>
Options	be, l2, af, l1, h2, ef, h1, nc
Default	be
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **lsp**

Synopsis	Enter the <b>lsp</b> context
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp</b>
Tree	<b>lsp</b>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## mpls-tp-static

Synopsis	Enable the <b>mpls-tp-static</b> context
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp mpls-tp-static</b>
Tree	<b>mpls-tp-static</b>
Notes	The following elements are part of a choice: <b>mpls-tp-static</b> , <b>rsvp</b> , or <b>rsvp-auto</b> .
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## lsp string

Synopsis	LSP to be tested
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp mpls-tp-static</b> <i>string</i>
Tree	<b>lsp</b>
String Length	1 to 64
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## rsvp

Synopsis	Enable the <b>rsvp</b> context
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp rsvp</b>
Tree	<b>rsvp</b>
Notes	The following elements are part of a choice: <b>mpls-tp-static</b> , <b>rsvp</b> , or <b>rsvp-auto</b> .
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## lsp string

Synopsis	LSP to be tested
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp rsvp</b> <b>lsp</b> <i>string</i>
Tree	<b>lsp</b>
String Length	1 to 64
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**udp-return-object** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address used by far end of the test to send response
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp rsvp udp-return-object</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">udp-return-object</a>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**rsvp-auto**

Synopsis	Enable the <b>rsvp-auto</b> context
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp rsvp-auto</b>
Tree	<a href="#">rsvp-auto</a>
Notes	The following elements are part of a choice: <b>mpls-tp-static</b> , <b>rsvp</b> , or <b>rsvp-auto</b> .
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**from** *string*

Synopsis	IPv4 address used to identify the LSP to be tested
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp rsvp-auto from</b> <i>string</i>
Tree	<a href="#">from</a>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**lsp-template** *string*

Synopsis	LSP template used to identify the LSP to be tested
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp rsvp-auto lsp-template</b> <i>string</i>
Tree	<a href="#">lsp-template</a>
String Length	1 to 32
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**to string**

Synopsis	IPv4 address used to identify the LSP to be tested
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp rsvp-auto to</b> <i>string</i>
Tree	<b>to</b>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**udp-return-object** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address used by far end of the test to send response
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls lsp rsvp-auto udp-return-object</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<b>udp-return-object</b>
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**pattern** (*keyword* | *number*)

Synopsis	Pattern value repeated to fill padding field of packet
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls pattern</b> ( <i>keyword</i>   <i>number</i> )
Tree	<b>pattern</b>
Range	0 to 65535
Options	sequential
Default	0
Introduced	16.0.R6
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**profile** *keyword*

Synopsis	QoS profile for the session
Context	<b>configure</b> <b>oam-pm session</b> <i>string</i> <b>mpls profile</b> <i>keyword</i>
Tree	<b>profile</b>
Options	in, out
Default	out
Introduced	16.0.R6

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **t**tl *number*

Synopsis MPLS TTL value for the session  
 Context **configure** [oam-pm session](#) *string* [mpls ttl](#) *number*  
 Tree [ttl](#)  
 Range 1 to 255  
 Default 255  
 Introduced 16.0.R6  
 Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **session-type** *keyword*

#### **WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis Session type  
 Context **configure** [oam-pm session](#) *string* [session-type](#) *keyword*  
 Tree [session-type](#)  
 Options proactive, on-demand  
 Default proactive  
 Introduced 16.0.R5

**fd-avg** [[direction](#)] *keyword*

Synopsis	Add a list entry for <b>fd-avg</b>
Context	<b>configure</b> <a href="#">oam-pm streaming delay-template</a> <i>string</i> <b>fd-avg</b> <i>keyword</i>
Tree	<a href="#">fd-avg</a>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[direction]** *keyword*

Synopsis	Traffic flow direction of the OAM-PM test or metric
Context	<b>configure</b> <a href="#">oam-pm streaming delay-template</a> <i>string</i> <b>fd-avg</b> <i>keyword</i>
Tree	<a href="#">fd-avg</a>
Options	forward, backward, round-trip
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ifdv-avg** [[direction](#)] *keyword*

Synopsis	Add a list entry for <b>ifdv-avg</b>
Context	<b>configure</b> <a href="#">oam-pm streaming delay-template</a> <i>string</i> <b>ifdv-avg</b> <i>keyword</i>
Tree	<a href="#">ifdv-avg</a>
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**[direction]** *keyword*

Synopsis	Traffic flow direction of the OAM-PM test or metric
Context	<b>configure</b> <a href="#">oam-pm streaming delay-template</a> <i>string</i> <b>ifdv-avg</b> <i>keyword</i>
Tree	<a href="#">ifdv-avg</a>
Options	forward, backward, round-trip
Notes	This element is part of a list key.
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## sample-window *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Sample window duration for the template
Context	<b>configure</b> <a href="#">oam-pm streaming delay-template</a> <i>string</i> <a href="#">sample-window</a> <i>number</i>
Tree	<a href="#">sample-window</a>
Range	10 to 60
Units	seconds
Default	60
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

## window-integrity *number*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Measurements for the sample window validity
Context	<b>configure</b> <a href="#">oam-pm streaming delay-template</a> <i>string</i> <a href="#">window-integrity</a> <i>number</i>
Tree	<a href="#">window-integrity</a>
Range	1 to 100
Units	percent
Default	50
Introduced	19.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### 3.30 openflow commands

```

configure
- openflow
  - apply-groups reference
  - apply-groups-exclude reference
  - of-controller number
    - address string
    - admin-state keyword
    - apply-groups reference
    - apply-groups-exclude reference
    - description string
    - echo-interval number
    - echo-multiple number
    - ipv6-address string
    - role keyword
    - tls-server-profile reference
    - version keyword
  - of-switch string
    - admin-state keyword
    - apply-groups reference
    - apply-groups-exclude reference
    - aux-channel boolean
    - controller (ipv4-address-no-zone | ipv6-address-no-zone) port number
      - apply-groups reference
      - apply-groups-exclude reference
      - ofc-loopback (ipv4-address-no-zone | ipv6-address-no-zone)
      - service-name string
      - tls-client-profile reference
    - description string
    - echo-interval number
    - echo-multiple number
    - flowtable number
      - apply-groups reference
      - apply-groups-exclude reference
      - max-size number
      - mismatch-action keyword
      - switch-defined-cookie boolean
    - logical-port-status keyword
    - ofs-id number

```

### 3.30.1 openflow command descriptions

#### openflow

Synopsis	Enter the <b>openflow</b> context
Context	<b>configure</b> <a href="#">openflow</a>
Tree	<a href="#">openflow</a>
Introduced	16.0.R4
Platforms	All

#### of-controller [[controller-id](#)] *number*

Synopsis	Enter the <b>of-controller</b> list instance
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i>
Tree	<a href="#">of-controller</a>
Max. Instances	1
Introduced	16.0.R4
Platforms	VSR-NRC

#### [[controller-id](#)] *number*

Synopsis	OpenFlow controller ID
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i>
Tree	<a href="#">of-controller</a>
Max. Range	0 to 4294967295
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	VSR-NRC

#### address *string*

**WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Local IPv4 address for the OpenFlow controller
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i> <a href="#">address</a> <i>string</i>
Tree	<a href="#">address</a>
Introduced	16.0.R4
Platforms	VSR-NRC

### **admin-state** *keyword*

Synopsis	Administrative state of OpenFlow controller instance
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i> <a href="#">admin-state</a> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R4
Platforms	VSR-NRC

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R4
Platforms	VSR-NRC

### **echo-interval** *number*

Synopsis	Interval for monitoring OpenFlow control channels
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i> <a href="#">echo-interval</a> <i>number</i>
Tree	<a href="#">echo-interval</a>
Range	10 to 3600
Units	seconds
Default	10
Introduced	16.0.R4
Platforms	VSR-NRC

**echo-multiple** *number*

Synopsis	Consecutive lost messages before channel declared down
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i> <a href="#">echo-multiple</a> <i>number</i>
Tree	<a href="#">echo-multiple</a>
Range	3 to 100
Default	3
Introduced	16.0.R4
Platforms	VSR-NRC

**ipv6-address** *string*

Synopsis	IPv6 address for the OpenFlow channel to the controller
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i> <a href="#">ipv6-address</a> <i>string</i>
Tree	<a href="#">ipv6-address</a>
Introduced	19.10.R1
Platforms	VSR-NRC

**role** *keyword*

Synopsis	Role when multiple controllers connected to OF switch
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i> <a href="#">role</a> <i>keyword</i>
Tree	<a href="#">role</a>
Options	equal
Default	equal
Introduced	16.0.R4
Platforms	VSR-NRC

**tls-server-profile** *reference***WARNING:**

Modifying this element toggles the **admin-state** of the parent element automatically for the new value to take effect.

Synopsis	Profile name used by the controller
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i> <a href="#">tls-server-profile</a> <i>reference</i>

Tree	<a href="#">tls-server-profile</a>
Reference	<b>configure</b> <a href="#">system security tls server-tls-profile</a> <i>string</i>
Introduced	16.0.R4
Platforms	VSR-NRC

**version** *keyword*

Synopsis	Version negotiated between OF controller and switch
Context	<b>configure</b> <a href="#">openflow of-controller</a> <i>number</i> <a href="#">version</a> <i>keyword</i>
Tree	<a href="#">version</a>
Options	version-1-3-1
Default	version-1-3-1
Introduced	16.0.R4
Platforms	VSR-NRC

**of-switch** [[name](#)] *string*

Synopsis	Enter the <b>of-switch</b> list instance
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i>
Tree	<a href="#">of-switch</a>
Max. Instances	8
Introduced	16.0.R4
Platforms	All

**[name]** *string*

Synopsis	OpenFlow switch name
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i>
Tree	<a href="#">of-switch</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

**admin-state** *keyword*

Synopsis	Administrative state of the OpenFlow switch instance
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <b>admin-state</b> <i>keyword</i>
Tree	<a href="#">admin-state</a>
Options	enable, disable
Default	disable
Introduced	16.0.R4
Platforms	All

**aux-channel** *boolean*

Synopsis	Enable the auxiliary connection for the H-OFS instance
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <b>aux-channel</b> <i>boolean</i>
Tree	<a href="#">aux-channel</a>
Default	false
Introduced	16.0.R4
Platforms	All

**controller** [[address](#)] (*ipv4-address-no-zone* | *ipv6-address-no-zone*) [port](#) *number*

Synopsis	Enter the <b>controller</b> list instance
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <b>controller</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port</a> <i>number</i>
Tree	<a href="#">controller</a>
Max. Instances	2
Introduced	16.0.R4
Platforms	All

**[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	IP address of the OpenFlow channel to the controller
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <b>controller</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <a href="#">port</a> <i>number</i>
Tree	<a href="#">controller</a>

Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

### **port number**

Synopsis	Controller port ID
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">controller</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <i>port number</i>
Tree	<a href="#">controller</a>
Range	1 to 65535
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

### **ofc-loopback** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Loopback IP address in the VPRN
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">controller</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <i>port number</i> <a href="#">ofc-loopback</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">ofc-loopback</a>
Introduced	16.0.R4
Platforms	All

### **service-name** *string*

Synopsis	Administrative service name
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">controller</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> ) <i>port number</i> <a href="#">service-name</a> <i>string</i>
Tree	<a href="#">service-name</a>
String Length	1 to 64
Introduced	16.0.R4
Platforms	All

**tls-client-profile** *reference*

Synopsis	TLS profile name for use on the control channel
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">controller</a> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> ) <a href="#">port</a> <i>number</i> <b>tls-client-profile</b> <i>reference</i>
Tree	<a href="#">tls-client-profile</a>
Reference	<b>configure</b> <a href="#">system security</a> <a href="#">tls client-tls-profile</a> <i>string</i>
Introduced	16.0.R4
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 255
Introduced	16.0.R4
Platforms	All

**echo-interval** *number*

Synopsis	Interval for monitoring OpenFlow control channels
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">echo-interval</a> <i>number</i>
Tree	<a href="#">echo-interval</a>
Range	1 to 3600
Units	seconds
Default	10
Introduced	16.0.R4
Platforms	All

**echo-multiple** *number*

Synopsis	Consecutive lost messages before channel declared down
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">echo-multiple</a> <i>number</i>
Tree	<a href="#">echo-multiple</a>
Range	3 to 100

---

Default	3
Introduced	16.0.R4
Platforms	All

**flowtable** [*table-id*] *number*

Synopsis	Enter the <b>flowtable</b> list instance
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">flowtable</a> <i>number</i>
Tree	<a href="#">flowtable</a>
Max. Instances	1
Introduced	16.0.R4
Platforms	All

**[table-id]** *number*

Synopsis	OpenFlow table ID
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">flowtable</a> <i>number</i>
Tree	<a href="#">flowtable</a>
Max. Range	0 to 4294967295
Notes	This element is part of a list key.
Introduced	16.0.R4
Platforms	All

**max-size** *number*

Synopsis	Maximum size of the flow table
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">flowtable</a> <i>number</i> <a href="#">max-size</a> <i>number</i>
Tree	<a href="#">max-size</a>
Range	1 to 524288
Default	1000
Introduced	16.0.R4
Platforms	All

**mismatch-action** *keyword*

Synopsis	Action taken when no match entries found in flow table
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">flowtable</a> <i>number</i> <b>mismatch-action</b> <i>keyword</i>
Tree	<a href="#">mismatch-action</a>
Options	drop, fall-through, packet-in
Default	fall-through
Introduced	16.0.R4
Platforms	All

**switch-defined-cookie** *boolean*

Synopsis	Enable switch-defined cookie encoding
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <a href="#">flowtable</a> <i>number</i> <b>switch-defined-cookie</b> <i>boolean</i>
Tree	<a href="#">switch-defined-cookie</a>
Default	false
Introduced	16.0.R4
Platforms	All

**logical-port-status** *keyword*

Synopsis	Logical port type for status change reporting
Context	<b>configure</b> <a href="#">openflow of-switch</a> <i>string</i> <b>logical-port-status</b> <i>keyword</i>
Tree	<a href="#">logical-port-status</a>
Options	rsvp-te, mpls-tp, sr-te
Max. Instances	3
Introduced	16.0.R4
Platforms	All

**ofs-id** *number***WARNING:**

Modifying this element recreates the parent element automatically for the new value to take effect.

Synopsis	OFS switch ID
----------	---------------

---

Context	<b>configure openflow of-switch</b> <i>string ofs-id number</i>
Tree	<i>ofs-id</i>
Range	1 to 8
Introduced	16.0.R6
Platforms	All

### 3.31 policy-options commands

```

configure
- policy-options
  - apply-groups reference
  - apply-groups-exclude reference
  - as-path string
    - apply-groups reference
    - apply-groups-exclude reference
    - expression string
  - as-path-group string
    - apply-groups reference
    - apply-groups-exclude reference
    - entry number
      - apply-groups reference
      - apply-groups-exclude reference
      - expression string
  - community string
    - apply-groups reference
    - apply-groups-exclude reference
    - expression
      - apply-groups reference
      - apply-groups-exclude reference
      - exact boolean
      - expr string
    - member string
  - damping string
    - apply-groups reference
    - apply-groups-exclude reference
    - half-life number
    - max-suppress number
    - reuse number
    - suppress number
  - global-variables
    - name string
      - address (ipv4-address-no-zone | ipv6-address-no-zone)
      - apply-groups reference
      - apply-groups-exclude reference
      - decimal decimal-number
      - number number
      - prefix (ipv4-prefix | ipv6-prefix)
      - value string
  - policy-statement string
    - apply-groups reference
    - apply-groups-exclude reference
    - default-action
      - action-type keyword
      - add-paths-send-limit (number | keyword)
      - admin-tag-policy (param-midstring-64 | string)
      - advertise-label keyword
      - aigp-metric
        - add (number | string)
        - set (keyword | number | string)
      - apply-groups reference
      - apply-groups-exclude reference
      - as-path
        - add (param-midstring | string)
        - replace (param-midstring | string)
      - as-path-prepend
        - as-path (number | string | keyword)
        - repeat (number | string)

```

configure policy-options policy-statement default-action bgp-high-priority

```

- bgp-high-priority boolean
- bgp-leak boolean
- bgp-med
  - adjust string
  - set (keyword | number | string)
- bgp-tunnel-metric
  - prefer-aigp boolean
  - prefer-med boolean
  - value (string | number)

### 3.31.1 policy-options command descriptions

#### policy-options

Synopsis	Enter the <b>policy-options</b> context
Context	<b>configure</b> <a href="#">policy-options</a>
Tree	<a href="#">policy-options</a>
Introduced	16.0.R1
Platforms	All

#### as-path [[name](#)] *string*

Synopsis	Enter the <b>as-path</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">as-path</a> <i>string</i>
Tree	<a href="#">as-path</a>
Introduced	16.0.R1
Platforms	All

#### [\[name\]](#) *string*

Synopsis	AS path name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">as-path</a> <i>string</i>
Tree	<a href="#">as-path</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

#### expression *string*

Synopsis	Regular expression string
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">as-path</a> <i>string</i> <a href="#">expression</a> <i>string</i>
Tree	<a href="#">expression</a>
Description	This command configures a route policy AS path regular expression statement to use in route policy entries.

An AS path in a BGP route matches an AS path regular expression, if the path matches the pattern of the regular expression. A regular expression incorporates terms and operators that use the terms. An individual AS number is an elementary term in the AS path regular expression. More complex terms can be built from elementary terms. The following are key operators supported by SR OS:

- .
- \*
- ?
- {n}
- {m,n}
- {m, }

To reverse the match criteria when specifying a list of ranges or single values using square brackets, use the non-match operator (^) before the elements within the square brackets.

String Length	1 to 255
Introduced	16.0.R1
Platforms	All

### **as-path-group** [[name](#)] *string*

Synopsis	Enter the <b>as-path-group</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">as-path-group</a> <i>string</i>
Tree	<a href="#">as-path-group</a>
Introduced	16.0.R1
Platforms	All

### **[name]** *string*

Synopsis	AS path group name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">as-path-group</a> <i>string</i>
Tree	<a href="#">as-path-group</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**entry** [*entry*] *number*

Synopsis	Enter the <b>entry</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">as-path-group</a> <i>string</i> <i>entry</i> <i>number</i>
Tree	<a href="#">entry</a>
Introduced	16.0.R1
Platforms	All

**[entry]** *number*

Synopsis	AS path entry ID
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">as-path-group</a> <i>string</i> <i>entry</i> <i>number</i>
Tree	<a href="#">entry</a>
Range	1 to 128
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**expression** *string*

Synopsis	Regular expression string
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">as-path-group</a> <i>string</i> <i>entry</i> <i>number</i> <a href="#">expression</a> <i>string</i>
Tree	<a href="#">expression</a>

Description This command configures an AS path group regular expression.

An AS path in a BGP route matches an AS path group, if the pattern of the path matches the concatenation of all regular expressions in the group. A regular expression incorporates terms and operators that use the terms. An individual AS number is an elementary term in the AS path regular expression. More complex terms can be built from elementary terms. The following are key operators supported by SR OS:

- .
- \*
- ?
- {n}
- {m,n}
- {m, }

To reverse the match criteria when specifying a list of ranges or single values using square brackets, use the non-match operator (^) before the elements within the square brackets.

---

String Length	1 to 255
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **community** [[name](#)] *string*

Synopsis	Enter the <b>community</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">community</a> <i>string</i>
Tree	<a href="#">community</a>
Introduced	16.0.R1
Platforms	All

### **[name]** *string*

Synopsis	Community name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">community</a> <i>string</i>
Tree	<a href="#">community</a>
Description	This command configures a route policy community name.  String values must be composed of printable, 7-bit ASCII characters. If the string contains special characters (#, \$, spaces, and so on), the entire string must be enclosed within double quotes.
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **expression**

Synopsis	Enable the <b>expression</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">community</a> <i>string</i> <a href="#">expression</a>
Tree	<a href="#">expression</a>
Introduced	16.0.R1
Platforms	All

**exact** *boolean*

Synopsis	Match exactly for the specified expression
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">community</a> <i>string</i> <a href="#">expression</a> <b>exact</b> <i>boolean</i>
Tree	<a href="#">exact</a>
Default	false
Introduced	16.0.R1
Platforms	All

**expr** *string*

Synopsis	Community expression value
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">community</a> <i>string</i> <a href="#">expression</a> <b>expr</b> <i>string</i>
Tree	<a href="#">expr</a>
String Length	1 to 900
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

**member** [[member](#)] *string*

Synopsis	Add a list entry for <b>member</b>
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">community</a> <i>string</i> <a href="#">member</a> <i>string</i>
Tree	<a href="#">member</a>
Introduced	16.0.R1
Platforms	All

**[member]** *string*

Synopsis	Community member value
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">community</a> <i>string</i> <a href="#">member</a> <i>string</i>
Tree	<a href="#">member</a>
Description	This command configures a BGP community value.

Each member of a community list is a standard, extended, or large community value or a regular expression that potentially matches many community values. A regular expression incorporates terms and operators that use the terms. An individual numerical digit is an elementary term in the community regular expression. More complex terms

can be built from elementary terms. The following are key operators supported by SR OS:

- .
- \*
- ?
- {n}
- {m,n}
- {m, }

To reverse the match criteria when specifying a list of ranges or single values using square brackets, use the non-match operator (^) before the elements within the square brackets.

String Length	1 to 72
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **damping** [name] *string*

Synopsis	Enter the <b>damping</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <b>damping</b> <i>string</i>
Tree	<a href="#">damping</a>
Introduced	16.0.R1
Platforms	All

### **[name]** *string*

Synopsis	Damping profile name
Context	<b>configure</b> <a href="#">policy-options</a> <b>damping</b> <i>string</i>
Tree	<a href="#">damping</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **half-life** *number*

Synopsis	Time after the FOM value is halved
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">damping</a> <i>string</i> <a href="#">half-life</a> <i>number</i>
Tree	<a href="#">half-life</a>
Range	1 to 45
Units	minutes
Introduced	16.0.R1
Platforms	All

### **max-suppress** *number*

Synopsis	Maximum time for a route to remain suppressed
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">damping</a> <i>string</i> <a href="#">max-suppress</a> <i>number</i>
Tree	<a href="#">max-suppress</a>
Range	1 to 720
Units	minutes
Introduced	16.0.R1
Platforms	All

### **reuse** *number*

Synopsis	Value below which a suppressed route can be used again
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">damping</a> <i>string</i> <a href="#">reuse</a> <i>number</i>
Tree	<a href="#">reuse</a>
Range	1 to 20000
Introduced	16.0.R1
Platforms	All

### **suppress** *number*

Synopsis	Value above which a route is suppressed
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">damping</a> <i>string</i> <a href="#">suppress</a> <i>number</i>
Tree	<a href="#">suppress</a>
Range	1 to 20000
Introduced	16.0.R1

Platforms All

## global-variables

Synopsis Enter the **global-variables** context  
 Context **configure** [policy-options](#) [global-variables](#)  
 Tree [global-variables](#)  
 Introduced 16.0.R4  
 Platforms All

### name [[variable-name](#)] *string*

Synopsis Enter the **name** list instance  
 Context **configure** [policy-options](#) [global-variables](#) [name](#) *string*  
 Tree [name](#)  
 Max. 1000  
 Instances  
 Introduced 16.0.R4  
 Platforms All

### [\[variable-name\]](#) *string*

Synopsis Global variable name used to reference policy functions  
 Context **configure** [policy-options](#) [global-variables](#) [name](#) *string*  
 Tree [name](#)  
 String Length 1 to 32  
 Notes This element is part of a list key.  
 Introduced 16.0.R4  
 Platforms All

### address (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address of the policy variable  
 Context **configure** [policy-options](#) [global-variables](#) [name](#) *string* [address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)  
 Tree [address](#)

Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	16.0.R4
Platforms	All

### **decimal** *decimal-number*

Synopsis	Attribute decimal to which variable name is resolved
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">global-variables</a> <a href="#">name</a> <i>string</i> <b>decimal</b> <i>decimal-number</i>
Tree	<a href="#">decimal</a>
Range	0.000 to 4294967295.000
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	19.7.R1
Platforms	All

### **number** *number*

Synopsis	Numerical value of the policy variable
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">global-variables</a> <a href="#">name</a> <i>string</i> <b>number</b> <i>number</i>
Tree	<a href="#">number</a>
Range	0 to 4294967295
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	16.0.R4
Platforms	All

### **prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Prefix value associated with the variable name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">global-variables</a> <a href="#">name</a> <i>string</i> <b>prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**value string**

Synopsis	Policy variable value
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">global-variables</a> <a href="#">name</a> <i>string</i> <b>value</b> <i>string</i>
Tree	<a href="#">value</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	16.0.R4
Platforms	All

**policy-statement [name] string**

Synopsis	Enter the <b>policy-statement</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>
Tree	<a href="#">policy-statement</a>
Max. Instances	65535
Introduced	16.0.R1
Platforms	All

**[name] string**

Synopsis	Route policy statement name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i>
Tree	<a href="#">policy-statement</a>
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

**default-action**

Synopsis	Enable the <b>default-action</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <b>default-action</b>

Tree	<a href="#">default-action</a>
Introduced	16.0.R1
Platforms	All

### **action-type** *keyword*

Synopsis	Action type for routes matching the route policy entry
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">action-type</a> <i>keyword</i>
Tree	<a href="#">action-type</a>
Options	accept, reject, next-entry, next-policy
Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **add-paths-send-limit** (*number* | *keyword*)

Synopsis	BGP Add-Paths send limit applied for routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">add-paths-send-limit</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">add-paths-send-limit</a>
Range	1 to 16
Options	multipaths
Introduced	16.0.R1
Platforms	All

### **admin-tag-policy** (*param-midstring-64* | *string*)

Synopsis	Administrative tag policy name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">admin-tag-policy</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">admin-tag-policy</a>
String Length	1 to 64
Introduced	16.0.R1
Platforms	All

**advertise-label** *keyword*

Synopsis	Label allocation for matched BGP routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">advertise-label</a> <i>keyword</i>
Tree	<a href="#">advertise-label</a>
Description	This command configures the label allocation method for advertised routes. The effect of this command depends on the context where the associated policy is applied.
Options	per-prefix, pop, pop-and-forward
Introduced	16.0.R1
Platforms	All

**aigp-metric**

Synopsis	Enter the <b>aigp-metric</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">aigp-metric</a>
Tree	<a href="#">aigp-metric</a>
Introduced	16.0.R1
Platforms	All

**add** (*number* | *string*)

Synopsis	AIGP metric to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">aigp-metric</a> <a href="#">add</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 32
Range	0 to 4294967295
Notes	The following elements are part of a choice: <b>add</b> or <b>set</b> .
Introduced	16.0.R1
Platforms	All

**set** (*keyword* | *number* | *string*)

Synopsis	AIGP metric
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">aigp-metric</a> <a href="#">set</a> ( <i>keyword</i>   <i>number</i>   <i>string</i> )
Tree	<a href="#">set</a>

String Length	1 to 32
Range	0 to 4294967295
Options	igp
Notes	The following elements are part of a choice: <b>add</b> or <b>set</b> .
Introduced	16.0.R1
Platforms	All

## as-path

Synopsis	Enter the <b>as-path</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">as-path</a>
Tree	<a href="#">as-path</a>
Introduced	16.0.R1
Platforms	All

## add (*param-midstring* | *string*)

Synopsis	AS path to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">as-path</a> <b>add</b> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>add</b> or <b>replace</b> .
Introduced	16.0.R1
Platforms	All

## replace (*param-midstring* | *string*)

Synopsis	AS path to replace
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">as-path</a> <b>replace</b> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">replace</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>add</b> or <b>replace</b> .
Introduced	16.0.R1

Platforms All

### **as-path-prepend**

Synopsis Enter the **as-path-prepend** context

**bgp-high-priority** *boolean*

Synopsis	Tag routes as high priority for fast table updates
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">bgp-high-priority</a> <i>boolean</i>
Tree	<a href="#">bgp-high-priority</a>
Description	<p>When configured to <b>true</b>, eligible BGP routes matched by the policy entry or policy default-action are tagged as needing faster route table updates.</p> <p>This action applies only when the policy is applied as a BGP import policy to a base router BGP peer or VPRN BGP peer and applies only to the following route types:</p> <ul style="list-style-type: none"> <li>• IPv4</li> <li>• label-IPv4</li> <li>• IPv6</li> <li>• label-IPv6</li> </ul> <p>This command is useful when the BGP RIB contains a large number of routes and quick routing table updates are needed for a small subset of these routes. The effectiveness of this command decreases as the subset becomes a larger proportion of the total RIB.</p> <p>When configured to <b>false</b>, no routes are tagged for faster route table updates.</p>
Default	false
Introduced	20.5.R1
Platforms	All

**bgp-leak** *boolean*

Synopsis	Allow leaking for BGP routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">bgp-leak</a> <i>boolean</i>
Tree	<a href="#">bgp-leak</a>
Default	false
Introduced	16.0.R1
Platforms	All

**bgp-med**

Synopsis	Enter the <b>bgp-med</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">bgp-med</a>
Tree	<a href="#">bgp-med</a>
Introduced	19.7.R1
Platforms	All

## **adjust** *string*

Synopsis	BGP-MED adjustment
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">bgp-med</a> <b>adjust</b> <i>string</i>
Tree	<a href="#">adjust</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>adjust</b> or <b>set</b> .
Introduced	19.7.R1
Platforms	All

## **set** (*keyword* | *number* | *string*)

Synopsis	BGP-MED assignment
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">bgp-med</a> <b>set</b> ( <i>keyword</i>   <i>number</i>   <i>string</i> )
Tree	<a href="#">set</a>
String Length	1 to 32
Range	0 to 4294967295
Options	igp, min-igp
Notes	The following elements are part of a choice: <b>adjust</b> or <b>set</b> .
Introduced	19.7.R1
Platforms	All

## **bgp-tunnel-metric**

Synopsis	Enter the <b>bgp-tunnel-metric</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <b>bgp-tunnel-metric</b>
Tree	<a href="#">bgp-tunnel-metric</a>
Description	Commands in this context configure the tunnel-table metrics associated with BGP label unicast routes that pass through to the default action of the policy.
Introduced	20.5.R1
Platforms	All

**prefer-aigp** *boolean*

Synopsis	Use AIGP attribute as tunnel metric when present
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">bgp-tunnel-metric</a> <a href="#">prefer-aigp</a> <i>boolean</i>
Tree	<a href="#">prefer-aigp</a>
Description	<p>When configured to <b>true</b>, and a BGP-LU route is selected for installation in TTM and it is matched by this action in a BGP import policy. The TTM metric of the tunnel is set to the AIGP metric value of the BGP-LU route plus the IGP cost to reach the BGP next-hop if it has the AIGP path attribute, otherwise it is set to the value implied by the value leaf.</p> <p>When configured to <b>false</b>, the AIGP attribute is removed from the advertised routes and is ignored if present in the received routes.</p>
Default	false
Introduced	20.5.R1
Platforms	All

**prefer-med** *boolean*

Synopsis	Use MED attribute as tunnel metric when present
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">bgp-tunnel-metric</a> <a href="#">prefer-med</a> <i>boolean</i>
Tree	<a href="#">prefer-med</a>
Description	<p>When configured to <b>true</b>, if a BGP-LU route is selected for installation in the TTM and is matched by this action in a BGP import policy, the TTM metric of the tunnel is set to the MED metric value of the BGP-LU route with the IGP cost to reach the BGP next hop added to it.</p> <p>When configured to <b>false</b>, the BGP tunnel metric associated with the BGP-LU route accepted by this policy action is not determined using the MED attribute.</p>
Default	false
Introduced	23.3.R1
Platforms	All

**value** (*string* | *number*)

Synopsis	BGP tunnel table metric value
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">bgp-tunnel-metric</a> <i>value</i> ( <i>string</i>   <i>number</i> )
Tree	<a href="#">value</a>
Description	This command configures a BGP tunnel metric is assigned to routes that do not match any entry.

If a BGP-LU route is selected for installation in TTM and it is matched by this action in a BGP import policy, the TTM metric of the associated tunnel is set to this value (or the value associated with the parameter name) if either:

- the `prefer-aigp` option is set to `false`
- the `prefer-aigp` option is set to `true` but the BGP-LU route does not have an AIGP attribute

String Length	1 to 32
Range	0 to 4294967295
Introduced	20.5.R1
Platforms	All

## community

Synopsis	Enter the <b>community</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">community</a>
Tree	<a href="#">community</a>
Introduced	16.0.R1
Platforms	All

## add (*param-midstring-64* | *string*)

Synopsis	List of community names to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">community</a> <b>add</b> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 64
Max. Instances	28
Notes	The following elements are part of a choice: ( <b>add</b> and <b>remove</b> ) or <b>replace</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

## remove (*param-midstring-64* | *string*)

Synopsis	List of community names to remove
----------	-----------------------------------

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">community</a> <a href="#">remove</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">remove</a>
String Length	1 to 64
Max. Instances	28
Notes	The following elements are part of a choice: ( <b>add</b> and <b>remove</b> ) or <b>replace</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

### **replace** (*param-midstring-64* | *string*)

Synopsis	List of community names to replace
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">community</a> <a href="#">replace</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">replace</a>
String Length	1 to 64
Max. Instances	28
Notes	The following elements are part of a choice: ( <b>add</b> and <b>remove</b> ) or <b>replace</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

### **create-mpls-tunnel** *boolean*

Synopsis	Create an MPLS tunnel
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">create-mpls-tunnel</a> <i>boolean</i>
Tree	<a href="#">create-mpls-tunnel</a>
Description	When configured to <b>true</b> , the router creates an MPLS tunnel. This command is supported for only the following address families: <ul style="list-style-type: none"> <li>• evpn</li> <li>• ipv4</li> <li>• ipv6</li> <li>• label-ipv4</li> </ul>

- label-ipv6
- vpn-ipv4
- vpn-ipv6

Default	false
Introduced	21.10.R1
Platforms	All

### **create-udp-tunnel** *boolean*

Synopsis	Create an MPLS-over-UDP tunnel
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">create-udp-tunnel</a> <i>boolean</i>
Tree	<a href="#">create-udp-tunnel</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **damping** (*keyword* | *param-midstring* | *string*)

Synopsis	Damping profile used for routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">damping</a> ( <i>keyword</i>   <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">damping</a>
String Length	1 to 32
Options	none
Introduced	16.0.R1
Platforms	All

### **dest-class** *number*

Synopsis	Default destination class for the policy statement
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">dest-class</a> <i>number</i>
Tree	<a href="#">dest-class</a>
Description	This command specifies the policy accounting destination class index to associate with matched routes.
Range	1 to 255

Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **egress-statistics** *boolean*

Synopsis	Enable egress statistics for BGP-LU routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">egress-statistics</a> <i>boolean</i>
Tree	<a href="#">egress-statistics</a>
Description	When configured to <b>true</b> , this command enables the allocation of statistical indexes to BGP labeled unicast route entries that are programmed on egress data paths.  When configured to <b>false</b> , this command disables the allocation of statistical indexes to BGP-LU route entries.
Default	false
Introduced	20.10.R1
Platforms	All

### **flex-algo** (*string* | *number*)

Synopsis	Flexible algorithm for BGP next-hop autobind operation
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">flex-algo</a> ( <i>string</i>   <i>number</i> )
Tree	<a href="#">flex-algo</a>
Description	This command configures the Flex-Algorithm for use in the BGP next-hop automatic bind operation in a BGP import policy. A Flex-Algorithm aware autobind of the BGP next-hop is enabled when the route is matched by the policy statement entry.  Flex-Algorithm aware next-hop lookup is supported for unicast BGP, VPRN, and BGP-LU.  This command is not supported for multicast address families.
String Length	1 to 32
Range	128 to 255
Introduced	20.10.R1
Platforms	All

### **ingress-statistics** *boolean*

Synopsis	Enable ingress statistics for BGP-LU routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">ingress-statistics</a> <i>boolean</i>

Tree	<a href="#">ingress-statistics</a>
Description	When configured to <b>true</b> , this command enables the allocation of statistical indexes to BGP labeled unicast route entries that are programmed on ingress data paths. For effective operation, a prefix must be advertised with a label per prefix for ILM statistics.  When configured to <b>false</b> , this command disables the allocation of statistical indexes to BGP-LU route entries.
Default	false
Introduced	20.10.R1
Platforms	All

### **install-backup-path** *boolean*

Synopsis	Install a preprogrammed backup path for the prefix
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">install-backup-path</a> <i>boolean</i>
Tree	<a href="#">install-backup-path</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **local-preference** (*number* | *string*)

Synopsis	BGP local preference for routes not matching any entry
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">local-preference</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">local-preference</a>
String Length	1 to 32
Range	0 to 4294967295
Introduced	16.0.R1
Platforms	All

### **metric**

Synopsis	Enter the <b>metric</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">metric</a>
Tree	<a href="#">metric</a>
Introduced	16.0.R1

Platforms All

### **add** (*number* | *string*)

Synopsis Metric to add

Context **configure** [policy-options](#) [policy-statement](#) *string* [default-action](#) [metric](#) [add](#) (*number* | *string*)

Tree [add](#)

String Length 1 to 32

Range 0 to 4294967295

Notes The following elements are part of a choice: **add**, **set**, or **subtract**.

Introduced 16.0.R1

Platforms All

### **set** (*number* | *string*)

Synopsis Metric to assign

Context **configure** [policy-options](#) [policy-statement](#) *string* [default-action](#) [metric](#) [set](#) (*number* | *string*)

Tree [set](#)

String Length 1 to 32

Range 0 to 4294967295

Notes The following elements are part of a choice: **add**, **set**, or **subtract**.

Introduced 16.0.R1

Platforms All

### **subtract** (*number* | *string*)

Synopsis Metric to subtract

Context **configure** [policy-options](#) [policy-statement](#) *string* [default-action](#) [metric](#) [subtract](#) (*number* | *string*)

Tree [subtract](#)

String Length 1 to 32

Range 0 to 4294967295

Notes The following elements are part of a choice: **add**, **set**, or **subtract**.

Introduced 16.0.R1

Platforms All

## multicast-redirect

Synopsis Enter the **multicast-redirect** context

Context **configure** [policy-options](#) [policy-statement](#) *string* [default-action](#) [multicast-redirect](#)

Tree [multicast-redirect](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## fwd-service *string*

Synopsis Service ID for multicast redirection

Context **configure** [policy-options](#) [policy-statement](#) *string* [default-action](#) [multicast-redirect](#) [fwd-service](#) *string*

Tree [fwd-service](#)

Default Base

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## ip-int-name *string*

Synopsis Alternate interface where IGMP messages are redirected

Context **configure** [policy-options](#) [policy-statement](#) *string* [default-action](#) [multicast-redirect](#) [ip-int-name](#) *string*

Tree [ip-int-name](#)

String Length 1 to 32

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

## nat-policy (*param-midstring* | *string*)

Synopsis BGP-VPN imported route and a NAT policy association

Context **configure** [policy-options](#) [policy-statement](#) *string* [default-action](#) [nat-policy](#) (*param-midstring* | *string*)

Tree [nat-policy](#)

Description	<p>This command assigns a NAT policy to the matched routes that do not have a more specific NAT policy configured under action.</p> <p>A dynamic route obtained by BGP-VPN can be imported into an inside (private side) routing context in NAT environment. This route must be associated with a NAT policy that maps traffic into a NAT pool and outside routing context. If the NAT policy is not specified within the route policy entry, the imported NAT route is, by default, associated with the default NAT policy defined in the NAT inside routing context.</p> <p>All BGP-VPN routes that are destined to be imported into the NAT inside routing context must have action-type <b>accept</b> regardless of whether the NAT policy is configured in the action.</p>
String Length	1 to 32
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

### **next-hop** (*keyword | ipv4-address-no-zone | ipv6-address-no-zone | string*)

Synopsis	Next-hop IP address applied to routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <b>next-hop</b> ( <i>keyword   ipv4-address-no-zone   ipv6-address-no-zone   string</i> )
Tree	<a href="#">next-hop</a>
String Length	1 to 32
Options	peer-address, self
Introduced	16.0.R1
Platforms	All

### **origin** (*keyword | string*)

Synopsis	BGP origin for routes that are exported into BGP
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <b>origin</b> ( <i>keyword   string</i> )
Tree	<a href="#">origin</a>
String Length	1 to 32
Options	igp, egp, incomplete
Introduced	16.0.R1
Platforms	All

### **origin-validation-state** (*keyword | string*)

Synopsis	Origin validation state for routes
----------	------------------------------------

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">origin-validation-state</a> ( <i>keyword</i>   <i>string</i> )
Tree	<a href="#">origin-validation-state</a>
String Length	1 to 32
Options	valid, not-found, invalid
Introduced	16.0.R1
Platforms	All

### **preference** (*number* | *string*)

Synopsis	Route preference applied to routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">preference</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">preference</a>
String Length	1 to 32
Range	1 to 255
Introduced	16.0.R1
Platforms	All

### **resolve-static** *boolean*

Synopsis	Resolve next hop of a static route for the BGP next hop
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">resolve-static</a> <i>boolean</i>
Tree	<a href="#">resolve-static</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **route-table-install** *boolean*

Synopsis	Allow BGP route installation in the route table
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">route-table-install</a> <i>boolean</i>
Tree	<a href="#">route-table-install</a>
Default	true
Introduced	19.10.R1

Platforms All

### **source-class** *number*

Synopsis Default source class for the policy statement

Context **configure** [policy-options](#) [policy-statement](#) *string* [default-action](#) [source-class](#) *number*

Tree [source-class](#)

Description This command specifies the policy accounting source class index to associate with matched routes.

Range 1 to 255

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

### **sr-label-index**

Synopsis Enter the **sr-label-index** context

Context **configure** [policy-options](#) [policy-statement](#) *string* [default-action](#) [sr-label-index](#)

Tree [sr-label-index](#)

Description Commands in this context configure the policy action to associate a BGP segment-routing label index value with all /32 BGP labeled IPv4 routes.

The use of this action in a policy entry that matches more than one /32 labeled IPv4 route may create SID conflicts.

This action only takes effect in BGP peer import policies (and only on received /32 labeled IPv4 routes) and in route table import policies associated with the labeled IPv4 RIB.

When this action occurs in a policy applied as a peer import policy, a prefix SID attribute can be added to a received /32 labeled IPv4 route that was not sent with this attribute, or the received prefix SID attribute can be replaced with a new one.

Introduced 19.10.R1

Platforms All

### **prefer-igp** *boolean*

Synopsis Use the SR label index from the IGP route when present

Context **configure** [policy-options](#) [policy-statement](#) *string* [default-action](#) [sr-label-index](#) [prefer-igp](#) *boolean*

Tree [prefer-igp](#)

Description	<p>When configured to <b>true</b>, BGP obtains the SID index from the IGP route (if a SID index is present) and the <b>configure router bgp segment-routing prefix-sid-range global</b> command is set to <b>true</b>.</p> <p>This command applies only to route table import policies.</p> <p>When configured to <b>false</b>, or the SID index is not present in the IGP route, or the <b>configure router bgp segment-routing prefix-sid-range global</b> command is not set to <b>true</b>, BGP obtains the label index value from the <b>value</b> command.</p>
Default	false
Introduced	19.10.R1
Platforms	All

### **value** (*string* | *number*)

Synopsis	BGP SR label index associated with routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">sr-label-index</a> <i>value</i> ( <i>string</i>   <i>number</i> )
Tree	<a href="#">value</a>
Description	<p>This command specifies the BGP SR label index value to be associated with a route or routes.</p> <p>If this command specifies an index value that causes a SID conflict with another BGP route, all conflicting BGP routes are re-advertised with label values based on dynamic allocation rather than SID-based allocation.</p> <p>If this command specifies an index value that causes a SID conflict with an IGP route, the BGP route is re-advertised with a label value based on dynamic allocation rather than SID-based allocation.</p>
String Length	1 to 32
Range	0 to 524287
Introduced	19.10.R1
Platforms	All

### **sr-maintenance-policy** (*param-midstring* | *string*)

Synopsis	SR maintenance policy as an action
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">sr-maintenance-policy</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">sr-maintenance-policy</a>
Description	This command applies a named segment routing maintenance policy as an action for route policies. It is only used for SR policy routes.
String Length	1 to 32

Introduced	20.10.R1
Platforms	All

### **sr-return-path-bfd-label** (*policy-var-name* | *number*)

Synopsis	S-BFD return path label
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <b>sr-return-path-bfd-label</b> ( <i>policy-var-name</i>   <i>number</i> )
Tree	<a href="#">sr-return-path-bfd-label</a>
Description	<p>This command configures an additional MPLS label to add to the bottom of the label stack for the S-BFD packet and sets the S-BFD session to echo mode.</p> <p>This command applies to the initiator of the S-BFD sessions. The label value can either be a binding SID for an SR policy or another MPLS path configured on the reflector router. Instead of being routed through the IGP path, the S-BFD packet returns to the initiator through the MPLS return path. This value takes precedence over the return path label value in a maintenance policy (configured using the <b>configure router segment-routing maintenance-policy return-path-label</b> command) that is also applied as the policy-statement action. This command can only be configured if the <b>sr-maintenance-policy</b> is also configured.</p> <p>If this command is unconfigured, and there is no <b>return-path-label</b> command configuration in the maintenance policy that is also applied as an action, and the policy statement is reevaluated, S-BFD returns to asynchronous mode and no return path label is pushed by the initiator node. S-BFD packets for this LSP or path received by the reflector are routed through the IGP path.</p>
String Length	1 to 32
Range	32 to 1048512
Introduced	23.10.R1
Platforms	All

### **srv6-locator** (*param-midstring-64* | *string*)

Synopsis	Locator for SRv6 TLV to use
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <b>srv6-locator</b> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">srv6-locator</a>
Description	<p>This command configures either a string encoding a midstring parameter delimited by at signs (@), or a reference to a named locator for the SRv6 TLV to use.</p> <p>For a VRF export policy, the referenced locator must already be configured using the commands in the <b>configure service vprn segment-routing-v6 locator</b> context.</p>

For a BGP export policy, the referenced locator must already be configured using the commands in the **configure router segment-routing segment-routing-v6 base-routing-instance locator** context.

String Length	1 to 64
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **srv6-micro-segment-locator** (*param-midstring-64* | *string*)

Synopsis	Micro-segment locator for SRv6 TLV to use
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">srv6-micro-segment-locator</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">srv6-micro-segment-locator</a>
Description	<p>This command configures either a string encoding a midstring parameter delimited by at signs (@), or a reference to a named micro-segment locator for the SRv6 TLV to use.</p> <p>For a VRF export policy, the referenced micro-segment locator must already be configured using the commands in the <b>configure service vprn segment-routing-v6 micro-segment-locator</b> context.</p> <p>For a BGP export policy, the referenced micro-SID locator must already be configured using the commands in the <b>configure router segment-routing segment-routing-v6 base-routing-instance micro-segment-locator</b> context.</p>
String Length	1 to 64
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **srv6-return-path-bfd-sid** (*policy-var-name* | *ipv6-address*)

Synopsis	SRv6 return path BFD SID applied to SRv6 policy routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">srv6-return-path-bfd-sid</a> ( <i>policy-var-name</i>   <i>ipv6-address</i> )
Tree	<a href="#">srv6-return-path-bfd-sid</a>
Description	This command configures the S-BFD session to echo mode and pushes an additional SRv6 SID in the SRH only for S-BFD packets sent on the imported SRv6 policy.
String Length	1 to 32
Introduced	23.3.R1
Platforms	All

**sticky-ecmp** *boolean*

Synopsis	Specify the sticky ECMP flag for BGP ECMP routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">sticky-ecmp</a> <i>boolean</i>
Tree	<a href="#">sticky-ecmp</a>
Default	false
Introduced	16.0.R1
Platforms	All

**tag** (*number* | *string*)

Synopsis	OSPF RIP or IS-IS tag applied to routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">tag</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">tag</a>
String Length	1 to 32
Range	1 to 4294967295
Introduced	16.0.R1
Platforms	All

**type** (*number* | *string*)

Synopsis	OSPF metric type applied to routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">default-action</a> <a href="#">type</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">type</a>
String Length	1 to 32
Range	1 to 2
Introduced	16.0.R1
Platforms	All

**description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1

Platforms All

### **entry** [entry-id] *number*

Synopsis Enter the **entry** list instance  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number*  
 Tree [entry](#)  
 Introduced 16.0.R1  
 Platforms All

### **[entry-id]** *number*

Synopsis Entry ID for a route policy entry  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number*  
 Tree [entry](#)  
 Range 1 to 4294967295  
 Notes This element is part of a list key.  
 Introduced 16.0.R1  
 Platforms All

### **action**

Synopsis Enable the **action** context  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#)  
 Tree [action](#)  
 Introduced 16.0.R1  
 Platforms All

### **action-type** *keyword*

Synopsis Action type for routes matching the route policy entry  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#) [action-type](#) *keyword*  
 Tree [action-type](#)  
 Options accept, reject, next-entry, next-policy

Notes	This element is mandatory.
Introduced	16.0.R1
Platforms	All

### **add-paths-send-limit** (*number* | *keyword*)

Synopsis	BGP Add-Paths send limit applied for routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">add-paths-send-limit</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">add-paths-send-limit</a>
Range	1 to 16
Options	multipaths
Introduced	16.0.R1
Platforms	All

### **admin-tag-policy** (*param-midstring-64* | *string*)

Synopsis	Administrative tag policy name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">admin-tag-policy</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">admin-tag-policy</a>
String Length	1 to 64
Introduced	16.0.R1
Platforms	All

### **advertise-label** *keyword*

Synopsis	Label allocation for matched BGP routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">advertise-label</a> <i>keyword</i>
Tree	<a href="#">advertise-label</a>
Description	This command configures the label allocation method for advertised routes. The effect of this command depends on the context where the associated policy is applied.
Options	per-prefix, pop, pop-and-forward
Introduced	16.0.R1
Platforms	All

## **aigp-metric**

Synopsis	Enter the <b>aigp-metric</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">aigp-metric</a>
Tree	<a href="#">aigp-metric</a>
Introduced	16.0.R1
Platforms	All

## **add** (*number* | *string*)

Synopsis	AIGP metric to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">aigp-metric</a> <a href="#">add</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 32
Range	0 to 4294967295
Notes	The following elements are part of a choice: <b>add</b> or <b>set</b> .
Introduced	16.0.R1
Platforms	All

## **set** (*keyword* | *number* | *string*)

Synopsis	AIGP metric
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">aigp-metric</a> <a href="#">set</a> ( <i>keyword</i>   <i>number</i>   <i>string</i> )
Tree	<a href="#">set</a>
String Length	1 to 32
Range	0 to 4294967295
Options	igp
Notes	The following elements are part of a choice: <b>add</b> or <b>set</b> .
Introduced	16.0.R1
Platforms	All

## as-path

Synopsis	Enter the <b>as-path</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">as-path</a>
Tree	<a href="#">as-path</a>
Introduced	16.0.R1
Platforms	All

## add (*param-midstring* | *string*)

Synopsis	AS path to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">as-path</a> <a href="#">add</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>add</b> or <b>replace</b> .
Introduced	16.0.R1
Platforms	All

## replace (*param-midstring* | *string*)

Synopsis	AS path to replace
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">as-path</a> <a href="#">replace</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">replace</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>add</b> or <b>replace</b> .
Introduced	16.0.R1
Platforms	All

## as-path-prepend

Synopsis	Enter the <b>as-path-prepend</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">as-path-prepend</a>
Tree	<a href="#">as-path-prepend</a>
Introduced	16.0.R1

Platforms All

### **as-path** (*number* | *string* | *keyword*)

Synopsis AS number to prepend to the AS path attribute

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#) [as-path-prepend](#) [as-path](#) (*number* | *string* | *keyword*)

Tree [as-path](#)

String Length 1 to 32

Range 1 to 4294967295

Options most-recent

Introduced 16.0.R1

Platforms All

### **repeat** (*number* | *string*)

Synopsis Number of times to prepend the specified AS number

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#) [as-path-prepend](#) [repeat](#) (*number* | *string*)

Tree [repeat](#)

String Length 1 to 32

Range 1 to 50

Default 1

Introduced 16.0.R1

Platforms All

### **bgp-high-priority** *boolean*

Synopsis Tag routes as high priority for fast table updates

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#) [bgp-high-priority](#) *boolean*

Tree [bgp-high-priority](#)

Description When configured to **true**, eligible BGP routes matched by the policy entry or policy default-action are tagged as needing faster route table updates.

This action applies only when the policy is applied as a BGP import policy to a base router BGP peer or VPRN BGP peer and applies only to the following route types:

- IPv4

- label-IPv4
- IPv6
- label-IPv6

This command is useful when the BGP RIB contains a large number of routes and quick routing table updates are needed for a small subset of these routes. The effectiveness of this command decreases as the subset becomes a larger proportion of the total RIB.

When configured to **false**, no routes are tagged for faster route table updates.

Default	false
Introduced	20.5.R1
Platforms	All

### **bgp-leak** *boolean*

Synopsis	Allow leaking for BGP routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">bgp-leak</a> <i>boolean</i>
Tree	<a href="#">bgp-leak</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **bgp-med**

Synopsis	Enter the <b>bgp-med</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">bgp-med</a>
Tree	<a href="#">bgp-med</a>
Introduced	19.7.R1
Platforms	All

### **adjust** *string*

Synopsis	BGP-MED adjustment
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">bgp-med</a> <a href="#">adjust</a> <i>string</i>
Tree	<a href="#">adjust</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>adjust</b> or <b>set</b> .

Introduced 19.7.R1  
 Platforms All

### **set** (*keyword* | *number* | *string*)

Synopsis BGP-MED assignment  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#) [bgp-med](#) [set](#) (*keyword* | *number* | *string*)  
 Tree [set](#)  
 String Length 1 to 32  
 Range 0 to 4294967295  
 Options igp, min-igp  
 Notes The following elements are part of a choice: **adjust** or **set**.  
 Introduced 19.7.R1  
 Platforms All

### **bgp-tunnel-metric**

Synopsis Enter the **bgp-tunnel-metric** context  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#) [bgp-tunnel-metric](#)  
 Tree [bgp-tunnel-metric](#)  
 Description Commands in this context configure the tunnel-table metrics associated with BGP label unicast routes that pass through to the default action of the policy.  
 Introduced 20.5.R1  
 Platforms All

### **prefer-aigp** *boolean*

Synopsis Use AIGP attribute as tunnel metric when present  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#) [bgp-tunnel-metric](#) [prefer-aigp](#) *boolean*  
 Tree [prefer-aigp](#)  
 Description When configured to **true**, and a BGP-LU route is selected for installation in TTM and it is matched by this action in a BGP import policy. The TTM metric of the tunnel is set to the AIGP metric value of the BGP-LU route plus the IGP cost to reach the BGP next-hop if it has the AIGP path attribute, otherwise it is set to the value implied by the value leaf.

When configured to **false**, the AIGP attribute is removed from the advertised routes and is ignored if present in the received routes.

Default	false
Introduced	20.5.R1
Platforms	All

### **prefer-med** *boolean*

Synopsis	Use MED attribute as tunnel metric when present
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">bgp-tunnel-metric</a> <a href="#">prefer-med</a> <i>boolean</i>
Tree	<a href="#">prefer-med</a>
Description	When configured to <b>true</b> , if a BGP-LU route is selected for installation in the TTM and is matched by this action in a BGP import policy, the TTM metric of the tunnel is set to the MED metric value of the BGP-LU route with the IGP cost to reach the BGP next hop added to it.  When configured to <b>false</b> , the BGP tunnel metric associated with the BGP-LU route accepted by this policy action is not determined using the MED attribute.
Default	false
Introduced	23.3.R1
Platforms	All

### **value** (*string* | *number*)

Synopsis	BGP tunnel table metric value
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">bgp-tunnel-metric</a> <a href="#">value</a> ( <i>string</i>   <i>number</i> )
Tree	<a href="#">value</a>
Description	This command configures a BGP tunnel metric is assigned to routes that do not match any entry.  If a BGP-LU route is selected for installation in TTM and it is matched by this action in a BGP import policy, the TTM metric of the associated tunnel is set to this value (or the value associated with the parameter name) if either: <ul style="list-style-type: none"> <li>the <code>prefer-aigp</code> option is set to false</li> <li>the <code>prefer-aigp</code> option is set to true but the BGP-LU route does not have an AIGP attribute</li> </ul>
String Length	1 to 32
Range	0 to 4294967295

Introduced	20.5.R1
Platforms	All

## community

Synopsis	Enter the <b>community</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">community</a>
Tree	<a href="#">community</a>
Introduced	16.0.R1
Platforms	All

## add (*param-midstring-64* | *string*)

Synopsis	List of community names to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">community</a> <a href="#">add</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 64
Max. Instances	28
Notes	The following elements are part of a choice: ( <b>add</b> and <b>remove</b> ) or <b>replace</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

## remove (*param-midstring-64* | *string*)

Synopsis	List of community names to remove
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">community</a> <a href="#">remove</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">remove</a>
String Length	1 to 64
Max. Instances	28
Notes	The following elements are part of a choice: ( <b>add</b> and <b>remove</b> ) or <b>replace</b> . This element is ordered by the user.

Introduced	16.0.R1
Platforms	All

### **replace** (*param-midstring-64* | *string*)

Synopsis	List of community names to replace
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">community</a> <a href="#">replace</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">replace</a>
String Length	1 to 64
Max. Instances	28
Notes	The following elements are part of a choice: ( <b>add</b> and <b>remove</b> ) or <b>replace</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

### **create-mpls-tunnel** *boolean*

Synopsis	Create an MPLS tunnel
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">create-mpls-tunnel</a> <i>boolean</i>
Tree	<a href="#">create-mpls-tunnel</a>
Description	When configured to <b>true</b> , the router creates an MPLS tunnel. This command is supported for only the following address families: <ul style="list-style-type: none"> <li>• evpn</li> <li>• ipv4</li> <li>• ipv6</li> <li>• label-ipv4</li> <li>• label-ipv6</li> <li>• vpn-ipv4</li> <li>• vpn-ipv6</li> </ul>
Default	false
Introduced	21.10.R1
Platforms	All

**create-udp-tunnel** *boolean*

Synopsis	Create an MPLS-over-UDP tunnel
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">create-udp-tunnel</a> <i>boolean</i>
Tree	<a href="#">create-udp-tunnel</a>
Default	false
Introduced	16.0.R1
Platforms	All

**damping** (*keyword* | *param-midstring* | *string*)

Synopsis	Damping profile used for routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">damping</a> ( <i>keyword</i>   <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">damping</a>
String Length	1 to 32
Options	none
Introduced	16.0.R1
Platforms	All

**dest-class** *number*

Synopsis	Default destination class for the policy statement
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">dest-class</a> <i>number</i>
Tree	<a href="#">dest-class</a>
Description	This command specifies the policy accounting destination class index to associate with matched routes.
Range	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**egress-statistics** *boolean*

Synopsis	Enable egress statistics for BGP-LU routes
----------	--

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">egress-statistics</a> <i>boolean</i>
Tree	<a href="#">egress-statistics</a>
Description	When configured to <b>true</b> , this command enables the allocation of statistical indexes to BGP labeled unicast route entries that are programmed on egress data paths. When configured to <b>false</b> , this command disables the allocation of statistical indexes to BGP-LU route entries.
Default	false
Introduced	20.10.R1
Platforms	All

### **flex-algo** (*string* | *number*)

Synopsis	Flexible algorithm for BGP next-hop autobind operation
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">flex-algo</a> ( <i>string</i>   <i>number</i> )
Tree	<a href="#">flex-algo</a>
Description	This command configures the Flex-Algorithm for use in the BGP next-hop automatic bind operation in a BGP import policy. A Flex-Algorithm aware autobind of the BGP next-hop is enabled when the route is matched by the policy statement entry. Flex-Algorithm aware next-hop lookup is supported for unicast BGP, VPRN, and BGP-LU. This command is not supported for multicast address families.
String Length	1 to 32
Range	128 to 255
Introduced	20.10.R1
Platforms	All

### **forwarding-class**

Synopsis	Enter the <b>forwarding-class</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forwarding-class</a>
Tree	<a href="#">forwarding-class</a>
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**fc keyword**

Synopsis	Forwarding class associated with the route
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forwarding-class</a> <b>fc</b> <i>keyword</i>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**priority keyword**

Synopsis	Route priority
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">forwarding-class</a> <a href="#">priority</a> <i>keyword</i>
Tree	<a href="#">priority</a>
Options	low, high
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ingress-statistics boolean**

Synopsis	Enable ingress statistics for BGP-LU routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">ingress-statistics</a> <i>boolean</i>
Tree	<a href="#">ingress-statistics</a>
Description	When configured to <b>true</b> , this command enables the allocation of statistical indexes to BGP labeled unicast route entries that are programmed on ingress data paths. For effective operation, a prefix must be advertised with a label per prefix for ILM statistics.  When configured to <b>false</b> , this command disables the allocation of statistical indexes to BGP-LU route entries.
Default	false
Introduced	20.10.R1
Platforms	All

**install-backup-path boolean**

Synopsis	Install a preprogrammed backup path for the prefix
----------	--

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">install-backup-path</a> <i>boolean</i>
Tree	<a href="#">install-backup-path</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **local-preference** (*number* | *string*)

Synopsis	BGP local preference for routes not matching any entry
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">local-preference</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">local-preference</a>
String Length	1 to 32
Range	0 to 4294967295
Introduced	16.0.R1
Platforms	All

### **metric**

Synopsis	Enter the <b>metric</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">metric</a>
Tree	<a href="#">metric</a>
Introduced	16.0.R1
Platforms	All

### **add** (*number* | *string*)

Synopsis	Metric to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">metric</a> <a href="#">add</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 32
Range	0 to 4294967295
Notes	The following elements are part of a choice: <b>add</b> , <b>set</b> , or <b>subtract</b> .
Introduced	16.0.R1

Platforms All

### **set** (*number* | *string*)

Synopsis Metric to assign

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#) [metric](#) **set** (*number* | *string*)

Tree [set](#)

String Length 1 to 32

Range 0 to 4294967295

Notes The following elements are part of a choice: **add**, **set**, or **subtract**.

Introduced 16.0.R1

Platforms All

### **subtract** (*number* | *string*)

Synopsis Metric to subtract

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#) [metric](#) **subtract** (*number* | *string*)

Tree [subtract](#)

String Length 1 to 32

Range 0 to 4294967295

Notes The following elements are part of a choice: **add**, **set**, or **subtract**.

Introduced 16.0.R1

Platforms All

### **multicast-redirect**

Synopsis Enter the **multicast-redirect** context

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [action](#) [multicast-redirect](#)

Tree [multicast-redirect](#)

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**fwd-service *string***

Synopsis	Service ID for multicast redirection
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">multicast-redirection</a> <a href="#">fwd-service</a> <i>string</i>
Tree	<a href="#">fwd-service</a>
Default	Base
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ip-int-name *string***

Synopsis	Alternate interface where IGMP messages are redirected
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">multicast-redirection</a> <a href="#">ip-int-name</a> <i>string</i>
Tree	<a href="#">ip-int-name</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nat-policy (*param-midstring* | *string*)**

Synopsis	BGP-VPN imported route and a NAT policy association
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">nat-policy</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">nat-policy</a>
Description	<p>This command assigns a NAT policy to the matched routes that do not have a more specific NAT policy configured under action.</p> <p>A dynamic route obtained by BGP-VPN can be imported into an inside (private side) routing context in NAT environment. This route must be associated with a NAT policy that maps traffic into a NAT pool and outside routing context. If the NAT policy is not specified within the route policy entry, the imported NAT route is, by default, associated with the default NAT policy defined in the NAT inside routing context.</p> <p>All BGP-VPN routes that are destined to be imported into the NAT inside routing context must have action-type <b>accept</b> regardless of whether the NAT policy is configured in the action.</p>
String Length	1 to 32
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**next-hop** (*keyword* | *ipv4-address-no-zone* | *ipv6-address-no-zone* | *string*)

Synopsis	Next-hop IP address applied to routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">next-hop</a> ( <i>keyword</i>   <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>string</i> )
Tree	<a href="#">next-hop</a>
String Length	1 to 32
Options	peer-address, self
Introduced	16.0.R1
Platforms	All

**origin** (*keyword* | *string*)

Synopsis	BGP origin for routes that are exported into BGP
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">origin</a> ( <i>keyword</i>   <i>string</i> )
Tree	<a href="#">origin</a>
String Length	1 to 32
Options	igp, egp, incomplete
Introduced	16.0.R1
Platforms	All

**origin-validation-state** (*keyword* | *string*)

Synopsis	Origin validation state for routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">origin-validation-state</a> ( <i>keyword</i>   <i>string</i> )
Tree	<a href="#">origin-validation-state</a>
String Length	1 to 32
Options	valid, not-found, invalid
Introduced	16.0.R1
Platforms	All

**preference** (*number* | *string*)

Synopsis	Route preference applied to routes
----------	------------------------------------

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">preference</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">preference</a>
String Length	1 to 32
Range	1 to 255
Introduced	16.0.R1
Platforms	All

### **resolve-static** *boolean*

Synopsis	Resolve next hop of a static route for the BGP next hop
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">resolve-static</a> <i>boolean</i>
Tree	<a href="#">resolve-static</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **route-table-install** *boolean*

Synopsis	Allow BGP route installation in the route table
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">route-table-install</a> <i>boolean</i>
Tree	<a href="#">route-table-install</a>
Default	true
Introduced	19.10.R1
Platforms	All

### **source-class** *number*

Synopsis	Default source class for the policy statement
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">source-class</a> <i>number</i>
Tree	<a href="#">source-class</a>
Description	This command specifies the policy accounting source class index to associate with matched routes.

Range	1 to 255
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## sr-label-index

Synopsis	Enter the <b>sr-label-index</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <b>sr-label-index</b>
Tree	<a href="#">sr-label-index</a>
Description	<p>Commands in this context configure the policy action to associate a BGP segment-routing label index value with all /32 BGP labeled IPv4 routes.</p> <p>The use of this action in a policy entry that matches more than one /32 labeled IPv4 route may create SID conflicts.</p> <p>This action only takes effect in BGP peer import policies (and only on received /32 labeled IPv4 routes) and in route table import policies associated with the labeled IPv4 RIB.</p> <p>When this action occurs in a policy applied as a peer import policy, a prefix SID attribute can be added to a received /32 labeled IPv4 route that was not sent with this attribute, or the received prefix SID attribute can be replaced with a new one.</p>
Introduced	19.10.R1
Platforms	All

## prefer-igp *boolean*

Synopsis	Use the SR label index from the IGP route when present
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <b>sr-label-index</b> <a href="#">prefer-igp</a> <i>boolean</i>
Tree	<a href="#">prefer-igp</a>
Description	<p>When configured to <b>true</b>, BGP obtains the SID index from the IGP route (if a SID index is present) and the <b>configure router bgp segment-routing prefix-sid-range global</b> command is set to <b>true</b>.</p> <p>This command applies only to route table import policies.</p> <p>When configured to <b>false</b>, or the SID index is not present in the IGP route, or the <b>configure router bgp segment-routing prefix-sid-range global</b> command is not set to <b>true</b>, BGP obtains the label index value from the <b>value</b> command.</p>
Default	false
Introduced	19.10.R1
Platforms	All

**value** (*string* | *number*)

Synopsis	BGP SR label index associated with routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">sr-label-index</a> <a href="#">value</a> ( <i>string</i>   <i>number</i> )
Tree	<a href="#">value</a>
Description	<p>This command specifies the BGP SR label index value to be associated with a route or routes.</p> <p>If this command specifies an index value that causes a SID conflict with another BGP route, all conflicting BGP routes are re-advertised with label values based on dynamic allocation rather than SID-based allocation.</p> <p>If this command specifies an index value that causes a SID conflict with an IGP route, the BGP route is re-advertised with a label value based on dynamic allocation rather than SID-based allocation.</p>
String Length	1 to 32
Range	0 to 524287
Introduced	19.10.R1
Platforms	All

**sr-maintenance-policy** (*param-midstring* | *string*)

Synopsis	SR maintenance policy as an action
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">sr-maintenance-policy</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">sr-maintenance-policy</a>
Description	This command applies a named segment routing maintenance policy as an action for route policies. It is only used for SR policy routes.
String Length	1 to 32
Introduced	20.10.R1
Platforms	All

**sr-return-path-bfd-label** (*policy-var-name* | *number*)

Synopsis	S-BFD return path label
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">sr-return-path-bfd-label</a> ( <i>policy-var-name</i>   <i>number</i> )
Tree	<a href="#">sr-return-path-bfd-label</a>

Description	<p>This command configures an additional MPLS label to add to the bottom of the label stack for the S-BFD packet and sets the S-BFD session to echo mode.</p> <p>This command applies to the initiator of the S-BFD sessions. The label value can either be a binding SID for an SR policy or another MPLS path configured on the reflector router. Instead of being routed through the IGP path, the S-BFD packet returns to the initiator through the MPLS return path. This value takes precedence over the return path label value in a maintenance policy (configured using the <b>configure router segment-routing maintenance-policy return-path-label</b> command) that is also applied as the policy-statement action. This command can only be configured if the <b>sr-maintenance-policy</b> is also configured.</p> <p>If this command is unconfigured, and there is no <b>return-path-label</b> command configuration in the maintenance policy that is also applied as an action, and the policy statement is reevaluated, S-BFD returns to asynchronous mode and no return path label is pushed by the initiator node. S-BFD packets for this LSP or path received by the reflector are routed through the IGP path.</p>
String Length	1 to 32
Range	32 to 1048512
Introduced	23.10.R1
Platforms	All

### **srv6-locator** (*param-midstring-64* | *string*)

Synopsis	Locator for SRv6 TLV to use
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <b>srv6-locator</b> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">srv6-locator</a>
Description	<p>This command configures either a string encoding a midstring parameter delimited by at signs (@), or a reference to a named locator for the SRv6 TLV to use.</p> <p>For a VRF export policy, the referenced locator must already be configured using the commands in the <b>configure service vprn segment-routing-v6 locator</b> context.</p> <p>For a BGP export policy, the referenced locator must already be configured using the commands in the <b>configure router segment-routing segment-routing-v6 base-routing-instance locator</b> context.</p>
String Length	1 to 64
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **srv6-micro-segment-locator** (*param-midstring-64* | *string*)

Synopsis	Micro-segment locator for SRv6 TLV to use
----------	---

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">srv6-micro-segment-locator</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">srv6-micro-segment-locator</a>
Description	This command configures either a string encoding a midstring parameter delimited by at signs (@), or a reference to a named micro-segment locator for the SRv6 TLV to use. For a VRF export policy, the referenced micro-segment locator must already be configured using the commands in the <b>configure service vprn segment-routing-v6 micro-segment-locator</b> context. For a BGP export policy, the referenced micro-SID locator must already be configured using the commands in the <b>configure router segment-routing segment-routing-v6 base-routing-instance micro-segment-locator</b> context.
String Length	1 to 64
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **srv6-return-path-bfd-sid** (*policy-var-name* | *ipv6-address*)

Synopsis	SRv6 return path BFD SID applied to SRv6 policy routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">srv6-return-path-bfd-sid</a> ( <i>policy-var-name</i>   <i>ipv6-address</i> )
Tree	<a href="#">srv6-return-path-bfd-sid</a>
Description	This command configures the S-BFD session to echo mode and pushes an additional SRv6 SID in the SRH only for S-BFD packets sent on the imported SRv6 policy.
String Length	1 to 32
Introduced	23.3.R1
Platforms	All

### **sticky-ecmp** *boolean*

Synopsis	Specify the sticky ECMP flag for BGP ECMP routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">sticky-ecmp</a> <i>boolean</i>
Tree	<a href="#">sticky-ecmp</a>
Default	false
Introduced	16.0.R1
Platforms	All

**tag** (*number* | *string*)

Synopsis	OSPF RIP or IS-IS tag applied to routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">tag</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">tag</a>
String Length	1 to 32
Range	1 to 4294967295
Introduced	16.0.R1
Platforms	All

**type** (*number* | *string*)

Synopsis	OSPF metric type applied to routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">action</a> <a href="#">type</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">type</a>
String Length	1 to 32
Range	1 to 2
Introduced	16.0.R1
Platforms	All

**conditional-expression**

Synopsis	Enable the <b>conditional-expression</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">conditional-expression</a>
Tree	<a href="#">conditional-expression</a>
Introduced	16.0.R1
Platforms	All

**route-exists** *string*

Synopsis	Conditional expression to test route existence
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">conditional-expression</a> <a href="#">route-exists</a> <i>string</i>
Tree	<a href="#">route-exists</a>
String Length	1 to 255

Introduced	16.0.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	16.0.R1
Platforms	All

### **from**

Synopsis	Enable the <b>from</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a>
Tree	<a href="#">from</a>
Description	Commands in this context configure policy match criteria based on the route's source or the protocol from which it is received. If conditions are not specified, all route sources are considered to match.
Introduced	16.0.R1
Platforms	All

### **aggregate-contributor** *boolean*

Synopsis	Enable aggregate route match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">aggregate-contributor</a> <i>boolean</i>
Tree	<a href="#">aggregate-contributor</a>
Description	<p>When configured to <b>true</b>, matches all routes (BGP and non-BGP) that have contributed to an active aggregate route. If the prefix tree above a particular route includes no active aggregate routes or the most specific active aggregate route in the prefix tree above this route has a policy that rejects the route, then it is not considered as an aggregate-contributor.</p> <p>This match condition is only supported when used in a BGP export policy. If it is used in an entry of a BGP import policy, <b>vrf-export</b> policy or <b>vrf-import</b> policy, no routes are matched by that entry.</p>

When configured to **false**, no routes (BGP and non-BGP) that have contributed to an active aggregate route are matched.

Default	false
Introduced	20.10.R1
Platforms	All

### **area string**

Synopsis	OSPF area as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">area</a> <i>string</i>
Tree	<a href="#">area</a>
Introduced	16.0.R1
Platforms	All

### **as-path**

Synopsis	Enter the <b>as-path</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">as-path</a>
Tree	<a href="#">as-path</a>
Introduced	16.0.R1
Platforms	All

### **group (param-midstring | string)**

Synopsis	AS path group as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">as-path</a> <a href="#">group</a> ( <a href="#">param-midstring</a>   <a href="#">string</a> )
Tree	<a href="#">group</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>group</b> or <b>name</b> .
Introduced	16.0.R1
Platforms	All

### **length**

Synopsis	Enter the <b>length</b> context
----------	---------------------------------

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from as-path</a> <a href="#">length</a>
Tree	<a href="#">length</a>
Introduced	16.0.R1
Platforms	All

### **qualifier** *keyword*

Synopsis	Higher or lower values to be accepted as match criteria
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from as-path</a> <a href="#">length</a> <a href="#">qualifier</a> <i>keyword</i>
Tree	<a href="#">qualifier</a>
Options	equal, or-higher, or-lower
Default	equal
Introduced	16.0.R1
Platforms	All

### **unique** *boolean*

Synopsis	Use unique AS numbers as matching criteria
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from as-path</a> <a href="#">length</a> <a href="#">unique</a> <i>boolean</i>
Tree	<a href="#">unique</a>
Default	false
Introduced	16.0.R1
Platforms	All

### **value** (*number* | *string*)

Synopsis	AS numbers in the AS path that match on the BGP route
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from as-path</a> <a href="#">length</a> <a href="#">value</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">value</a>
String Length	1 to 32
Range	0 to 255
Introduced	16.0.R1
Platforms	All

**name** (*param-midstring* | *string*)

Synopsis	AS path name to match
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from as-path</a> <i>name</i> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">name</a>
Description	This command specifies an AS path regular expression name for the route policy entry. Policy parameters must be enclosed by at-signs (@) and may be midstring; for example, "@variable@", "start@variable@end", "@variable@end", or "start@variable@".
String Length	1 to 32
Notes	The following elements are part of a choice: <b>group</b> or <b>name</b> .
Introduced	16.0.R1
Platforms	All

**cluster-id**

Synopsis	Enter the <b>cluster-id</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from cluster-id</a>
Tree	<a href="#">cluster-id</a>
Introduced	16.0.R1
Platforms	All

**ip-address** *string*

Synopsis	Cluster list attribute IP addresses for route matching
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from cluster-id</a> <a href="#">ip-address</a> <i>string</i>
Tree	<a href="#">ip-address</a>
Max. Instances	5
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>none-cluster-list</b> . This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

**none-cluster-list** *boolean*

Synopsis	Specify matching BGP routes without a cluster ID
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">cluster-id</a> <b>none-cluster-list</b> <i>boolean</i>
Tree	<a href="#">none-cluster-list</a>
Default	false
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>none-cluster-list</b> .
Introduced	16.0.R1
Platforms	All

**color** *number*

Synopsis	Color ID as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">color</a> <i>number</i>
Tree	<a href="#">color</a>
Description	This command configures an SR Policy color ID as a route policy match criterion. This match criterion is only used in import policies.
Range	0 to 4294967295
Introduced	20.10.R1
Platforms	All

**community**

Synopsis	Enter the <b>community</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">community</a>
Tree	<a href="#">community</a>
Introduced	16.0.R1
Platforms	All

**count**

Synopsis	Enter the <b>count</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">community</a> <b>count</b>
Tree	<a href="#">count</a>
Introduced	16.0.R1

Platforms All

### **qualifier** *keyword*

Synopsis Higher or lower values to be accepted as match criteria

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [from](#) [community](#) [count](#) **qualifier** *keyword*

Tree [qualifier](#)

Options equal, or-higher, or-lower

Default equal

Introduced 16.0.R1

**expression string**

Synopsis	Community expression statement as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">community</a> <a href="#">expression</a> <i>string</i>
Tree	<a href="#">expression</a>
Description	<p>This command configures a community expression statement as a match criterion for the policy statement. This statement is a logical expression string composed of logical operators (keywords AND, OR, NOT), community names delimited by square brackets [], and parentheses ( ) to group subexpressions. If the expression contains special characters (for example, #, \$, spaces), the entire string must be enclosed in double quotes.</p> <p>The expression specified must already be defined using the <b>configure policy-options community expression expr</b> command.</p> <p>The following are examples of valid logical expressions:</p> <pre>"[community_list_A] OR ([community_list_B] AND [community_list_C])" "NOT [community_list_A]" "[community_list_A] AND [community_list_B] OR [community_list_C]" "NOT ([community_list_A] OR [community_list_B] OR [community_list_C])"</pre>
String Length	1 to 900
Notes	The following elements are part of a choice: <b>expression</b> or <b>name</b> .
Introduced	16.0.R1
Platforms	All

**name** (*param-midstring-64* | *string*)

Synopsis	Community list name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">community</a> <a href="#">name</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">name</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>expression</b> or <b>name</b> .
Introduced	16.0.R1
Platforms	All

**distinguisher number**

Synopsis	SR policy distinguisher as a match criterion
----------	--

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">distinguisher</a> <i>number</i>
Tree	<a href="#">distinguisher</a>
Description	This command configures an SR Policy distinguisher as a route policy match criterion. This match criterion is only used in import policies.
Range	0 to 4294967295
Introduced	20.10.R1
Platforms	All

### **endpoint** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	SR policy endpoint address as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">endpoint</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">endpoint</a>
Description	This command configures an SR Policy endpoint address as a route policy match criterion. This match criterion is only used in import policies.
Introduced	20.10.R1
Platforms	All

### **evpn-type** *keyword*

Synopsis	EVPN type as a match criterion for the entry
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">evpn-type</a> <i>keyword</i>
Tree	<a href="#">evpn-type</a>
Options	ethernet-auto-discovery, mac-ip-advertisement, inclusive-multicast, ethernet-segment, ip-prefix, selective-multicast, multicast-join-sync, multicast-leave-sync, selective-pmsi-auto-discovery
Introduced	16.0.R4
Platforms	All

### **external** *boolean*

Synopsis	Specify the external IS-IS route as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">external</a> <i>boolean</i>
Tree	<a href="#">external</a>
Default	false

Introduced	16.0.R1
Platforms	All

### **family** *keyword*

Synopsis	Address family as the match condition
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">family</a> <i>keyword</i>
Tree	<a href="#">family</a>
Options	ipv4, vpn-ipv4, ipv6, mcast-ipv4, vpn-ipv6, l2-vpn, mvpn-ipv4, mdt-safi, ms-pw, flow-ipv4, route-target, mcast-vpn-ipv4, mvpn-ipv6, flow-ipv6, evpn, mcast-ipv6, label-ipv4, label-ipv6, bgp-ls, mcast-vpn-ipv6, sr-policy-ipv4, sr-policy-ipv6, flow-vpn-ipv4, flow-vpn-ipv6
Max. Instances	20
Introduced	16.0.R1
Platforms	All

### **flowspec**

Synopsis	Enter the <b>flowspec</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">flowspec</a>
Tree	<a href="#">flowspec</a>
Introduced	16.0.R4
Platforms	All

### **dest** (*param-midstring* | *string*)

Synopsis	BGP FlowSpec route matches per destination IP prefix
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">flowspec</a> <a href="#">dest</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">dest</a>
String Length	1 to 32
Introduced	16.0.R4
Platforms	All

**source** (*param-midstring* | *string*)

Synopsis	BGP FlowSpec route matches per the source IP prefix
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">flowspec</a> <a href="#">source</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">source</a>
String Length	1 to 32
Introduced	16.0.R4
Platforms	All

**group-address** (*param-midstring* | *string*)

Synopsis	Prefix list of multicast group addresses for mathcing
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">group-address</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">group-address</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	All

**host-ip** (*param-midstring* | *string*)

Synopsis	Prefix list of IGMP host IP addresses for matching
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">host-ip</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">host-ip</a>
String Length	1 to 32
Introduced	16.0.R1
Platforms	All

**interface** (*named-item* | *interface-name* | *interface-name* | *interface-name*)

Synopsis	Interface name as match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">interface</a> ( <i>named-item</i>   <i>interface-name</i>   <i>interface-name</i>   <i>interface-name</i> )
Tree	<a href="#">interface</a>
String Length	1 to 32

Max. Instances	1
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

## interface-subnets

Synopsis	Enter the <b>interface-subnets</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from interface-subnets</a>
Tree	<a href="#">interface-subnets</a>
Description	<p>Commands in this context configure the applied router instance and interfaces that are used as the matching condition within each policy statement entry when exporting the IP address of the associated interface to a routing protocol.</p> <p>The interface subnet policy statement match criterion is applied to the following unicast use case contexts:</p> <ul style="list-style-type: none"> <li>• <b>export</b>, when used with OSPFv2, OSPFv3, IS-IS, RIP, RIPng, and BGP</li> <li>• <b>route-table-import</b>, when used with BGP</li> <li>• <b>vrf-export</b>, when used with MP-BGP</li> </ul>
Introduced	21.2.R1
Platforms	All

## ip-int-name *string*

Synopsis	Interface name as the match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from interface-subnets</a> <a href="#">ip-int-name</a> <i>string</i>
Tree	<a href="#">ip-int-name</a>
Description	This command specifies the interface name to match when exporting the IP address of the associated interface to a routing protocol.
String Length	1 to 32
Max. Instances	10
Notes	This element is ordered by the user.
Introduced	21.2.R1
Platforms	All

### **service string**

Synopsis	Service ID of the interface subnets
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">interface-subnets</a> <a href="#">service</a> <i>string</i>
Tree	<a href="#">service</a>
Default	Base
Introduced	21.2.R1
Platforms	All

### **level number**

Synopsis	IS-IS route level as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">level</a> <i>number</i>
Tree	<a href="#">level</a>
Range	1 to 2
Introduced	16.0.R1
Platforms	All

### **local-preference**

Synopsis	Enter the <b>local-preference</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">local-preference</a>
Tree	<a href="#">local-preference</a>
Introduced	16.0.R1
Platforms	All

### **qualifier keyword**

Synopsis	Higher or lower values to be accepted as match criteria
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">local-preference</a> <a href="#">qualifier</a> <i>keyword</i>
Tree	<a href="#">qualifier</a>
Options	equal, or-higher, or-lower
Default	equal
Introduced	16.0.R1

Platforms All

### **value** (*number* | *string*)

Synopsis BGP routes per local preference value or variable name

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [from](#) [local-preference](#) [value](#) (*number* | *string*)

Tree [value](#)

String Length 1 to 32

Range 0 to 4294967295

Introduced 16.0.R1

Platforms All

### **metric**

Synopsis Enter the **metric** context

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [from](#) [metric](#)

Tree [metric](#)

Introduced 16.0.R1

Platforms All

### **qualifier** *keyword*

Synopsis Higher or lower values to be accepted as match criteria

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [from](#) [metric](#) [qualifier](#) *keyword*

Tree [qualifier](#)

Options equal, or-higher, or-lower

Default equal

Introduced 16.0.R1

Platforms All

### **value** (*number* | *string*)

Synopsis Local preference value or variable name

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">metric</a> <a href="#">value</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">value</a>
String Length	1 to 32
Range	0 to 4294967295
Introduced	16.0.R1
Platforms	All

### **mvpn-type** *keyword*

Synopsis	MVPN type as a match criterion for the entry
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">mvpn-type</a> <i>keyword</i>
Tree	<a href="#">mvpn-type</a>
Options	intra-as-ipmsi-auto-discovery, inter-as-ipmsi-auto-discovery, s-pmsi-auto-discovery, intra-as-segment-leaf-auto-discovery, source-active-auto-discovery, shared-tree-join, source-tree-join
Introduced	16.0.R1
Platforms	All

### **neighbor**

Synopsis	Enter the <b>neighbor</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">neighbor</a>
Tree	<a href="#">neighbor</a>
Introduced	16.0.R1
Platforms	All

### **ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *ipv4-address-with-zone* | *ipv6-address-with-zone*)

Synopsis	IP address to match the neighbor
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">neighbor</a> <a href="#">ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> )
Tree	<a href="#">ip-address</a>
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>prefix-list</b> .
Introduced	16.0.R1

Platforms All

### **prefix-list** (*param-midstring* | *string*)

Synopsis Name to match the neighbor prefix list

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [from](#) [neighbor](#) [prefix-list](#) (*param-midstring* | *string*)

Tree [prefix-list](#)

String Length 1 to 32

Notes The following elements are part of a choice: **ip-address** or **prefix-list**.

Introduced 16.0.R1

Platforms All

### **next-hop**

Synopsis Enter the **next-hop** context

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [from](#) [next-hop](#)

Tree [next-hop](#)

Introduced 16.0.R1

Platforms All

### **ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address of the next hop to match

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [from](#) [next-hop](#) [ip-address](#) (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [ip-address](#)

Notes The following elements are part of a choice: **ip-address** or **prefix-list**.

Introduced 16.0.R1

Platforms All

### **prefix-list** (*param-midstring* | *string*)

Synopsis Name of a next hop prefix list to match

Context **configure** [policy-options](#) [policy-statement](#) *string* [entry](#) *number* [from](#) [next-hop](#) [prefix-list](#) (*param-midstring* | *string*)

Tree	<a href="#">prefix-list</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>prefix-list</b> .
Introduced	16.0.R1
Platforms	All

### **origin keyword**

Synopsis	Route origin match criteria
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">origin</a> <i>keyword</i>
Tree	<a href="#">origin</a>
Description	<p>This command configures a match criteria for the origin attribute of the route. The origin attribute is applicable to BGP routes and to the following subscriber-management routes:</p> <p>Host routes (for example, IPv4 /32 address, or IPv6 SLAAC prefix) carry the origin attribute with AAA, dynamic, or static values, depending on the address assignment method. For CUPS hosts, the origin attribute is always PFCP. Host routes can also be distinguished using the <b>sub-mgmt</b> option for the <b>protocol</b> command.</p> <p>Dynamically provisioned prefixes or loopback addresses use AAA or PFCP origin values, depending on the protocol that provides the prefix and address. Dynamic routes can also be distinguished using the <b>direct</b> option for the <b>protocol</b> command.</p> <p>Statically configured prefixes under the subscriber interface do not have an origin attribute. These routes can be distinguished using the <b>direct</b> option for the <b>protocol</b> command.</p> <p>Framed routes for non-CUPS hosts do not have an origin attribute. Framed routes for CUPS hosts use PFCP for the origin attribute. Alternatively, framed routes can be distinguished using the <b>managed</b> option for the <b>protocol</b> command.</p> <p>The values that are specific to subscriber-management routes are never carried in BGP updates as part of the BGP origin attribute and are not visible within the BGP process.</p>
Options	igp, egp, incomplete, any, aaa, dynamic, static, bonding, pfcp
Introduced	16.0.R1
Platforms	All

### **origin-validation-state keyword**

Synopsis	Origin validation state used for match criteria
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">origin-validation-state</a> <i>keyword</i>
Tree	<a href="#">origin-validation-state</a>

Description	This command specifies a validation state that is used to match BGP routes based on their origin validation state.
Options	valid, not-found, invalid
Introduced	16.0.R1
Platforms	All

### **ospf-type** *number*

Synopsis	OSPF type metric applied to unmatching route entries
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">ospf-type</a> <i>number</i>
Tree	<a href="#">ospf-type</a>
Range	1 to 2
Introduced	16.0.R1
Platforms	All

### **path-type** *keyword*

Synopsis	Path type as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">path-type</a> <i>keyword</i>
Tree	<a href="#">path-type</a>
Options	ibgp, ebgp
Introduced	16.0.R1
Platforms	All

### **policy** (*string* | *string*)

Synopsis	Policy statement as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">policy</a> ( <i>string</i>   <i>string</i> )
Tree	<a href="#">policy</a>
String Length	1 to 255
Introduced	16.0.R1
Platforms	All

## policy-variables

Synopsis	Enter the <b>policy-variables</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">policy-variables</a>
Tree	<a href="#">policy-variables</a>
Introduced	16.0.R1
Platforms	All

### name [[variable-name](#)] *string*

Synopsis	Enter the <b>name</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">policy-variables</a> <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
Max. Instances	10
Introduced	16.0.R1
Platforms	All

### [[variable-name](#)] *string*

Synopsis	Global variable name used to reference policy functions
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">policy-variables</a> <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### address ([ipv4-address-no-zone](#) | [ipv6-address-no-zone](#))

Synopsis	IP address of the policy variable
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">policy-variables</a> <a href="#">name</a> <i>string</i> <a href="#">address</a> ( <a href="#">ipv4-address-no-zone</a>   <a href="#">ipv6-address-no-zone</a> )
Tree	<a href="#">address</a>

Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	16.0.R1
Platforms	All

### **decimal** *decimal-number*

Synopsis	Attribute decimal to which variable name is resolved
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from policy-variables</a> <i>name</i> <i>string</i> <b>decimal</b> <i>decimal-number</i>
Tree	<a href="#">decimal</a>
Range	0.000 to 4294967295.000
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	19.7.R1
Platforms	All

### **number** *number*

Synopsis	Numerical value of the policy variable
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from policy-variables</a> <i>name</i> <i>string</i> <b>number</b> <i>number</i>
Tree	<a href="#">number</a>
Range	0 to 4294967295
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	16.0.R1
Platforms	All

### **prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Prefix value associated with the variable name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from policy-variables</a> <i>name</i> <i>string</i> <b>prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<a href="#">prefix</a>
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .

Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**value string**

Synopsis	Policy variable value
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">policy-variables</a> <a href="#">name</a> <i>string</i> <a href="#">value</a> <i>string</i>
Tree	<a href="#">value</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	16.0.R1
Platforms	All

**prefix-list** (*param-midstring-64* | *string*)

Synopsis	Prefix list as match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">prefix-list</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">prefix-list</a>
String Length	1 to 64
Max. Instances	28
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

**prefix-list-override** [[prefix-list](#)] *string*

Synopsis	Enter the <b>prefix-list-override</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">prefix-list-override</a> <i>string</i>
Tree	<a href="#">prefix-list-override</a>
Description	Commands in this context convert a prefix list to a specific match type. The routing policy uses the converted list as a match condition.

The prefix list to be converted can be specified by its name, as an expression containing the name of a global variable that holds the name of the prefix list, or as an expression containing the name of a subroutine variable that holds the name of the prefix list.

Max. Instances	1
Introduced	23.10.R1
Platforms	All

### **[prefix-list]** *string*

Synopsis	Prefix list to be converted
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">prefix-list-override</a> <i>string</i>
Tree	<a href="#">prefix-list-override</a>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

### **end-length** *number*

Synopsis	Prefix range end length
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">prefix-list-override</a> <i>string</i> <b>end-length</b> <i>number</i>
Tree	<a href="#">end-length</a>
Range	0 to 128
Notes	The following elements are part of a choice: ( <b>end-length</b> and <b>start-length</b> ) or <b>through-length</b> .
Introduced	23.10.R1
Platforms	All

### **start-length** *number*

Synopsis	Prefix range start length
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">prefix-list-override</a> <i>string</i> <b>start-length</b> <i>number</i>
Tree	<a href="#">start-length</a>
Range	0 to 128

Notes	The following elements are part of a choice: ( <b>end-length</b> and <b>start-length</b> ) or <b>through-length</b> .
Introduced	23.10.R1
Platforms	All

### **through-length** *number*

Synopsis	Prefix through length
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">prefix-list-override</a> <i>string</i> <b>through-length</b> <i>number</i>
Tree	<a href="#">through-length</a>
Range	0 to 128
Notes	The following elements are part of a choice: ( <b>end-length</b> and <b>start-length</b> ) or <b>through-length</b> .
Introduced	23.10.R1
Platforms	All

### **type** *keyword*

Synopsis	New match type for entries in referenced prefix list
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">prefix-list-override</a> <i>string</i> <b>type</b> <i>keyword</i>
Tree	<a href="#">type</a>
Options	exact, longer, through, range
Default	exact
Introduced	23.10.R1
Platforms	All

### **protocol**

Synopsis	Enter the <b>protocol</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">protocol</a>
Tree	<a href="#">protocol</a>
Description	Commands in this context configure the match criterion based on protocols for a route policy statement entry and may be used for both import and export policies.
Introduced	16.0.R1

Platforms All

### **instance** (*keyword* | *number*)

Synopsis	Instance for protocol IS-IS, OSPF, or OSPFv3 to match
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from protocol</a> <a href="#">instance</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">instance</a>
Description	This command specifies the OSPF, OSPFv3, or IS-IS instance to be used as the match criterion.  When this command is explicitly configured, the <b>name</b> command must be configured to identify the protocol (OSPF, OSPFv3, or IS-IS).
Range	0 to 127
Options	all
Default	0
Introduced	16.0.R1
Platforms	All

### **name** *keyword*

Synopsis	List of protocol names as the match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from protocol</a> <a href="#">name</a> <i>keyword</i>
Tree	<a href="#">name</a>
Description	This command specifies a protocol list for the match criterion. If multiple protocols are specified, the protocol names must belong to the following protocol set: <ul style="list-style-type: none"> <li>• direct</li> <li>• static</li> <li>• isis</li> <li>• aggregate</li> <li>• bgp</li> <li>• bgp-label</li> <li>• direct-interface</li> </ul> <p>If multiple protocols are specified, the <b>instance</b> command cannot be explicitly configured.</p> <p>The protocol <b>direct-interface</b> route type matches the specific direct interface host IPv4 / 32 and IPv6 /128 routes.</p>

Options	direct, static, bgp, isis, ospf, rip, aggregate, bgp-vpn, igmp, pim, ospf3, ldp, sub-mgmt, mld, managed, vpn-leak, nat, periodic, ipsec, dhcpv6-pd, dhcpv6-na, dhcpv6-ta, dhcpv6-pd-excl, ripng, bgp-label, direct-interface, arp-nd, rib-api, dhcp-client, evpn-ift, srv6, video
Max. Instances	5
Introduced	16.0.R1
Platforms	All

### **route-distinguisher-list** (*param-midstring-64* | *string*)

Synopsis	Route distinguisher list as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">route-distinguisher-list</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">route-distinguisher-list</a>
Description	This command specifies the (possibly parameterized) name of a route distinguisher (RD) list.  This match condition is supported by policies applied as VRF-import or BGP peer import policies. A BGP route can match a policy entry with this match criterion if the NLRI field contains an RD that is matched by at least one of the entries in the RD list.  BGP routes belonging to address families other than VPN-IPv4, VPN-IPv6, MCAST-VPN-IPv4, MCAST-VPN-IPv6, EVPN, FlowSpec-VPN IPv4, FlowSpec-VPN IPv6, MVPN-IPv4, or MVPN-IPv6 route do not match policy entries with this match criterion.
String Length	1 to 64
Introduced	23.3.R1
Platforms	All

### **source-address**

Synopsis	Enter the <b>source-address</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">source-address</a>
Tree	<a href="#">source-address</a>
Introduced	16.0.R1
Platforms	All

### **ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Source IP address to match
----------	----------------------------

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">source-address</a> <a href="#">ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">ip-address</a>
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>prefix-list</b> .
Introduced	16.0.R1
Platforms	All

### **prefix-list** (*param-midstring* | *string*)

Synopsis	Name of a source address prefix list to match
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">source-address</a> <a href="#">prefix-list</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">prefix-list</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>prefix-list</b> .
Introduced	16.0.R1
Platforms	All

### **srv6-sid-prefix** (*policy-var-name* | *ipv6-unicast-prefix*)

Synopsis	SRv6 SID or uSID as match criterion for the BGP route
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">srv6-sid-prefix</a> ( <i>policy-var-name</i>   <i>ipv6-unicast-prefix</i> )
Tree	<a href="#">srv6-sid-prefix</a>
Description	<p>This command configures either the name of a prefix policy variable or an IPv6 prefix and prefix length, as a match criterion for a BGP route.</p> <p><b>Note:</b> If the name of a prefix policy variable is the match criterion, the name must start and end with an at sign (@).</p> <p>A BGP route matches this condition if it has an SRv6 TLV, and the SID or micro-segment (uSID) value in that TLV is matched by the bits of the IPv6 prefix (up to the specified prefix length).</p> <p>This match condition is supported in BGP import policies, BGP export policies, and VRF or VSI import policies.</p>
String Length	1 to 32
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**srv6-tlv keyword**

Synopsis	SRv6 TLV presence as match criterion for BGP route
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">srv6-tlv</a> <i>keyword</i>
Tree	<a href="#">srv6-tlv</a>
Description	<p>This command configures whether the entry matches a BGP route with a prefix SID attribute containing an SRv6 TLV.</p> <p>If this command is not configured, a BGP route can match the entry, regardless of whether it has a prefix SID attribute or whether that prefix SID attribute has SRv6 TLVs.</p> <p>This match condition is supported in BGP import policies, BGP export policies, and VRF or VSI import policies.</p> <p>If the <b>present</b> option is configured, a BGP route only matches this entry if it has a prefix SID attribute containing an SRv6 TLV.</p> <p>If the <b>not-present</b> option is configured, a BGP route only matches this entry if it does not have a prefix SID attribute containing an SRv6 TLV.</p>
Options	present, not-present
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**state keyword**

Synopsis	State used as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">state</a> <i>keyword</i>
Tree	<a href="#">state</a>
Description	This command configures a criterion that identifies in resilient gateways which routes are associated with an active context and which routes are associated with a standby context.
Options	srrp-master, srrp-non-master, ipsec-master-with-peer, ipsec-master-without-peer, ipsec-non-master, fsg-active, fsg-standby, fsg-active-path-restoration
Introduced	16.0.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**tag (number | keyword)**

Synopsis	Route tag used as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">from</a> <a href="#">tag</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">tag</a>

Range	1 to 4294967295
Options	no-tag
Introduced	16.0.R1
Platforms	All

**to**

Synopsis	Enable the <b>to</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <b>to</b>
Tree	<a href="#">to</a>
Introduced	16.0.R1
Platforms	All

**level number**

Synopsis	IS-IS route level as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <b>to</b> <a href="#">level</a> <i>number</i>
Tree	<a href="#">level</a>
Range	1 to 2
Introduced	16.0.R1
Platforms	All

**neighbor**

Synopsis	Enter the <b>neighbor</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <b>to</b> <a href="#">neighbor</a>
Tree	<a href="#">neighbor</a>
Introduced	16.0.R1
Platforms	All

**ip-address** (*ipv4-address-no-zone* | *ipv6-address-no-zone* | *ipv4-address-with-zone* | *ipv6-address-with-zone*)

Synopsis	IP address to match the neighbor
----------	----------------------------------

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">to neighbor</a> <a href="#">ip-address</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>ipv4-address-with-zone</i>   <i>ipv6-address-with-zone</i> )
Tree	<a href="#">ip-address</a>
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>prefix-list</b> .
Introduced	16.0.R1
Platforms	All

### **prefix-list** (*param-midstring* | *string*)

Synopsis	Name to match the neighbor prefix list
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">to neighbor</a> <a href="#">prefix-list</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">prefix-list</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>prefix-list</b> .
Introduced	16.0.R1
Platforms	All

### **prefix-list** (*param-midstring-64* | *string*)

Synopsis	Prefix list as match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">to prefix-list</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">prefix-list</a>
String Length	1 to 64
Max. Instances	28
Notes	This element is ordered by the user.
Introduced	16.0.R1
Platforms	All

### **protocol**

Synopsis	Enter the <b>protocol</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">to protocol</a>

Tree	<a href="#">protocol</a>
Introduced	16.0.R1
Platforms	All

### **instance** (*keyword* | *number*)

Synopsis	Instance for the IS-IS, OSPF, or OSPF3 protocol
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">to protocol</a> <a href="#">instance</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">instance</a>
Range	0 to 127
Options	all
Default	0
Introduced	16.0.R1
Platforms	All

### **name** *keyword*

Synopsis	Protocol name to match
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry</a> <i>number</i> <a href="#">to protocol</a> <a href="#">name</a> <i>keyword</i>
Tree	<a href="#">name</a>
Options	bgp, isis, ospf, rip, bgp-vpn, ospf3, ldp, vpn-leak, ripng, bgp-label, evpn-ift
Max. Instances	2
Introduced	16.0.R1
Platforms	All

### **entry-type** *keyword*

Synopsis	The entry type for a route policy entry
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">entry-type</a> <i>keyword</i>
Tree	<a href="#">entry-type</a>
Options	numbered, named
Default	numbered
Introduced	19.10.R1

Platforms All

### **named-entry** [[entry-name](#)] *string*

Synopsis Enter the **named-entry** list instance

Context **configure** [policy-options](#) [policy-statement](#) *string* **named-entry** *string*

Tree [named-entry](#)

Max. Instances 16384

Notes This element is ordered by the user.

Introduced 19.10.R1

Platforms All

### **[entry-name]** *string*

Synopsis Route policy entry name

Context **configure** [policy-options](#) [policy-statement](#) *string* **named-entry** *string*

Tree [named-entry](#)

String Length 1 to 255

Notes This element is part of a list key.

Introduced 19.10.R1

Platforms All

### **action**

Synopsis Enable the **action** context

Context **configure** [policy-options](#) [policy-statement](#) *string* **named-entry** *string* **action**

Tree [action](#)

Introduced 19.10.R1

Platforms All

### **action-type** *keyword*

Synopsis Action type for routes matching the route policy entry

Context **configure** [policy-options](#) [policy-statement](#) *string* **named-entry** *string* **action** **action-type** *keyword*

Tree	<a href="#">action-type</a>
Options	accept, reject, next-entry, next-policy
Notes	This element is mandatory.
Introduced	19.10.R1
Platforms	All

### **add-paths-send-limit** (*number* | *keyword*)

Synopsis	BGP Add-Paths send limit applied for routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">add-paths-send-limit</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">add-paths-send-limit</a>
Range	1 to 16
Options	multipaths
Introduced	19.10.R1
Platforms	All

### **admin-tag-policy** (*param-midstring-64* | *string*)

Synopsis	Administrative tag policy name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">admin-tag-policy</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">admin-tag-policy</a>
String Length	1 to 64
Introduced	19.10.R1
Platforms	All

### **advertise-label** *keyword*

Synopsis	Label allocation for matched BGP routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">advertise-label</a> <i>keyword</i>
Tree	<a href="#">advertise-label</a>
Description	This command configures the label allocation method for advertised routes. The effect of this command depends on the context where the associated policy is applied.
Options	per-prefix, pop, pop-and-forward

Introduced	19.10.R1
Platforms	All

## **aigp-metric**

Synopsis	Enter the <b>aigp-metric</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">aigp-metric</a>
Tree	<a href="#">aigp-metric</a>
Introduced	19.10.R1
Platforms	All

## **add** (*number* | *string*)

Synopsis	AIGP metric to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">aigp-metric</a> <a href="#">add</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 32
Range	0 to 4294967295
Notes	The following elements are part of a choice: <b>add</b> or <b>set</b> .
Introduced	19.10.R1
Platforms	All

## **set** (*keyword* | *number* | *string*)

Synopsis	AIGP metric
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">aigp-metric</a> <a href="#">set</a> ( <i>keyword</i>   <i>number</i>   <i>string</i> )
Tree	<a href="#">set</a>
String Length	1 to 32
Range	0 to 4294967295
Options	igp
Notes	The following elements are part of a choice: <b>add</b> or <b>set</b> .
Introduced	19.10.R1
Platforms	All

## as-path

Synopsis	Enter the <b>as-path</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">as-path</a>
Tree	<a href="#">as-path</a>
Introduced	19.10.R1
Platforms	All

## add (*param-midstring* | *string*)

Synopsis	AS path to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">as-path</a> <a href="#">add</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>add</b> or <b>replace</b> .
Introduced	19.10.R1
Platforms	All

## replace (*param-midstring* | *string*)

Synopsis	AS path to replace
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">as-path</a> <a href="#">replace</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">replace</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>add</b> or <b>replace</b> .
Introduced	19.10.R1
Platforms	All

## as-path-prepend

Synopsis	Enter the <b>as-path-prepend</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">as-path-prepend</a>
Tree	<a href="#">as-path-prepend</a>

Introduced	19.10.R1
Platforms	All

### **as-path** (*number* | *string* | *keyword*)

Synopsis	AS number to prepend to the AS path attribute
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">as-path-prepend</a> <a href="#">as-path</a> ( <i>number</i>   <i>string</i>   <i>keyword</i> )
Tree	<a href="#">as-path</a>
String Length	1 to 32
Range	1 to 4294967295
Options	most-recent
Introduced	19.10.R1
Platforms	All

### **repeat** (*number* | *string*)

Synopsis	Number of times to prepend the specified AS number
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">as-path-prepend</a> <a href="#">repeat</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">repeat</a>
String Length	1 to 32
Range	1 to 50
Default	1
Introduced	19.10.R1
Platforms	All

### **bgp-high-priority** *boolean*

Synopsis	Tag routes as high priority for fast table updates
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">bgp-high-priority</a> <i>boolean</i>
Tree	<a href="#">bgp-high-priority</a>
Description	<p>When configured to <b>true</b>, eligible BGP routes matched by the policy entry or policy default-action are tagged as needing faster route table updates.</p> <p>This action applies only when the policy is applied as a BGP import policy to a base router BGP peer or VPRN BGP peer and applies only to the following route types:</p>

- IPv4
- label-IPv4
- IPv6
- label-IPv6

This command is useful when the BGP RIB contains a large number of routes and quick routing table updates are needed for a small subset of these routes. The effectiveness of this command decreases as the subset becomes a larger proportion of the total RIB.

When configured to **false**, no routes are tagged for faster route table updates.

Default false

Introduced 20.5.R1

Platforms All

### **bgp-leak** *boolean*

Synopsis Allow leaking for BGP routes

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [action](#) [bgp-leak](#) *boolean*

Tree [bgp-leak](#)

Default false

Introduced 19.10.R1

Platforms All

### **bgp-med**

Synopsis Enter the **bgp-med** context

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [action](#) [bgp-med](#)

Tree [bgp-med](#)

Introduced 19.10.R1

Platforms All

### **adjust** *string*

Synopsis BGP-MED adjustment

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [action](#) [bgp-med](#) [adjust](#) *string*

Tree [adjust](#)

String Length 1 to 64

Notes	The following elements are part of a choice: <b>adjust</b> or <b>set</b> .
Introduced	19.10.R1
Platforms	All

### **set** (*keyword* | *number* | *string*)

Synopsis	BGP-MED assignment
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">bgp-med</a> <b>set</b> ( <i>keyword</i>   <i>number</i>   <i>string</i> )
Tree	<a href="#">set</a>
String Length	1 to 32
Range	0 to 4294967295
Options	igp, min-igp
Notes	The following elements are part of a choice: <b>adjust</b> or <b>set</b> .
Introduced	19.10.R1
Platforms	All

### **bgp-tunnel-metric**

Synopsis	Enter the <b>bgp-tunnel-metric</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">bgp-tunnel-metric</a>
Tree	<a href="#">bgp-tunnel-metric</a>
Description	Commands in this context configure the tunnel-table metrics associated with BGP label unicast routes that pass through to the default action of the policy.
Introduced	20.5.R1
Platforms	All

### **prefer-aigp** *boolean*

Synopsis	Use AIGP attribute as tunnel metric when present
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">bgp-tunnel-metric</a> <b>prefer-aigp</b> <i>boolean</i>
Tree	<a href="#">prefer-aigp</a>
Description	When configured to <b>true</b> , and a BGP-LU route is selected for installation in TTM and it is matched by this action in a BGP import policy. The TTM metric of the tunnel is set to the

AIGP metric value of the BGP-LU route plus the IGP cost to reach the BGP next-hop if it has the AIGP path attribute, otherwise it is set to the value implied by the value leaf.

When configured to **false**, the AIGP attribute is removed from the advertised routes and is ignored if present in the received routes.

Default	false
Introduced	20.5.R1
Platforms	All

### **prefer-med** *boolean*

Synopsis	Use MED attribute as tunnel metric when present
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">bgp-tunnel-metric</a> <b>prefer-med</b> <i>boolean</i>
Tree	<a href="#">prefer-med</a>
Description	<p>When configured to <b>true</b>, if a BGP-LU route is selected for installation in the TTM and is matched by this action in a BGP import policy, the TTM metric of the tunnel is set to the MED metric value of the BGP-LU route with the IGP cost to reach the BGP next hop added to it.</p> <p>When configured to <b>false</b>, the BGP tunnel metric associated with the BGP-LU route accepted by this policy action is not determined using the MED attribute.</p>
Default	false
Introduced	23.3.R1
Platforms	All

### **value** (*string* | *number*)

Synopsis	BGP tunnel table metric value
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">bgp-tunnel-metric</a> <b>value</b> ( <i>string</i>   <i>number</i> )
Tree	<a href="#">value</a>
Description	<p>This command configures a BGP tunnel metric is assigned to routes that do not match any entry.</p> <p>If a BGP-LU route is selected for installation in TTM and it is matched by this action in a BGP import policy, the TTM metric of the associated tunnel is set to this value (or the value associated with the parameter name) if either:</p> <ul style="list-style-type: none"> <li>the <code>prefer-aigp</code> option is set to false</li> <li>the <code>prefer-aigp</code> option is set to true but the BGP-LU route does not have an AIGP attribute</li> </ul>
String Length	1 to 32

Range	0 to 4294967295
Introduced	20.5.R1
Platforms	All

## community

Synopsis	Enter the <b>community</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">community</a>
Tree	<a href="#">community</a>
Introduced	19.10.R1
Platforms	All

## add (*param-midstring-64* | *string*)

Synopsis	List of community names to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">community</a> <a href="#">add</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 64
Max. Instances	28
Notes	The following elements are part of a choice: ( <b>add</b> and <b>remove</b> ) or <b>replace</b> . This element is ordered by the user.
Introduced	19.10.R1
Platforms	All

## remove (*param-midstring-64* | *string*)

Synopsis	List of community names to remove
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">community</a> <a href="#">remove</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">remove</a>
String Length	1 to 64
Max. Instances	28
Notes	The following elements are part of a choice: ( <b>add</b> and <b>remove</b> ) or <b>replace</b> .

This element is ordered by the user.

Introduced 19.10.R1  
 Platforms All

### **replace** (*param-midstring-64* | *string*)

Synopsis List of community names to replace  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [action](#) [community](#) [replace](#) (*param-midstring-64* | *string*)  
 Tree [replace](#)  
 String Length 1 to 64  
 Max. Instances 28  
 Notes The following elements are part of a choice: (**add** and **remove**) or **replace**.  
 This element is ordered by the user.  
 Introduced 19.10.R1  
 Platforms All

### **create-mpls-tunnel** *boolean*

Synopsis Create an MPLS tunnel  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [action](#) [create-mpls-tunnel](#) *boolean*  
 Tree [create-mpls-tunnel](#)  
 Description When configured to **true**, the router creates an MPLS tunnel.  
 This command is supported for only the following address families:
 

- evpn
- ipv4
- ipv6
- label-ipv4
- label-ipv6
- vpn-ipv4
- vpn-ipv6

 Default false  
 Introduced 21.10.R1  
 Platforms All

**create-udp-tunnel** *boolean*

Synopsis	Create an MPLS-over-UDP tunnel
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">create-udp-tunnel</a> <i>boolean</i>
Tree	<a href="#">create-udp-tunnel</a>
Default	false
Introduced	19.10.R1
Platforms	All

**damping** (*keyword* | *param-midstring* | *string*)

Synopsis	Damping profile used for routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">damping</a> ( <i>keyword</i>   <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">damping</a>
String Length	1 to 32
Options	none
Introduced	19.10.R1
Platforms	All

**dest-class** *number*

Synopsis	Default destination class for the policy statement
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">dest-class</a> <i>number</i>
Tree	<a href="#">dest-class</a>
Description	This command specifies the policy accounting destination class index to associate with matched routes.
Range	1 to 255
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

**egress-statistics** *boolean*

Synopsis	Enable egress statistics for BGP-LU routes
----------	--

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">egress-statistics</a> <i>boolean</i>
Tree	<a href="#">egress-statistics</a>
Description	When configured to <b>true</b> , this command enables the allocation of statistical indexes to BGP labeled unicast route entries that are programmed on egress data paths. When configured to <b>false</b> , this command disables the allocation of statistical indexes to BGP-LU route entries.
Default	false
Introduced	20.10.R1
Platforms	All

### **flex-algo** (*string* | *number*)

Synopsis	Flexible algorithm for BGP next-hop autobind operation
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">flex-algo</a> ( <i>string</i>   <i>number</i> )
Tree	<a href="#">flex-algo</a>
Description	This command configures the Flex-Algorithm for use in the BGP next-hop automatic bind operation in a BGP import policy. A Flex-Algorithm aware autobind of the BGP next-hop is enabled when the route is matched by the policy statement entry. Flex-Algorithm aware next-hop lookup is supported for unicast BGP, VPRN, and BGP-LU. This command is not supported for multicast address families.
String Length	1 to 32
Range	128 to 255
Introduced	20.10.R1
Platforms	All

### **forwarding-class**

Synopsis	Enter the <b>forwarding-class</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">forwarding-class</a>
Tree	<a href="#">forwarding-class</a>
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**fc keyword**

Synopsis	Forwarding class associated with the route
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">forwarding-class</a> <b>fc</b> <i>keyword</i>
Tree	<a href="#">fc</a>
Options	be, l2, af, l1, h2, ef, h1, nc
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**priority keyword**

Synopsis	Route priority
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">forwarding-class</a> <a href="#">priority</a> <i>keyword</i>
Tree	<a href="#">priority</a>
Options	low, high
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

**ingress-statistics boolean**

Synopsis	Enable ingress statistics for BGP-LU routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">ingress-statistics</a> <i>boolean</i>
Tree	<a href="#">ingress-statistics</a>
Description	When configured to <b>true</b> , this command enables the allocation of statistical indexes to BGP labeled unicast route entries that are programmed on ingress data paths. For effective operation, a prefix must be advertised with a label per prefix for ILM statistics.  When configured to <b>false</b> , this command disables the allocation of statistical indexes to BGP-LU route entries.
Default	false
Introduced	20.10.R1
Platforms	All

**install-backup-path boolean**

Synopsis	Install a preprogrammed backup path for the prefix
----------	--

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">install-backup-path</a> <i>boolean</i>
Tree	<a href="#">install-backup-path</a>
Default	false
Introduced	19.10.R1
Platforms	All

### **local-preference** (*number* | *string*)

Synopsis	BGP local preference for routes not matching any entry
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">local-preference</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">local-preference</a>
String Length	1 to 32
Range	0 to 4294967295
Introduced	19.10.R1
Platforms	All

### **metric**

Synopsis	Enter the <b>metric</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">metric</a>
Tree	<a href="#">metric</a>
Introduced	19.10.R1
Platforms	All

### **add** (*number* | *string*)

Synopsis	Metric to add
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">metric</a> <a href="#">add</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">add</a>
String Length	1 to 32
Range	0 to 4294967295
Notes	The following elements are part of a choice: <b>add</b> , <b>set</b> , or <b>subtract</b> .
Introduced	19.10.R1

Platforms All

### **set** (*number* | *string*)

Synopsis Metric to assign

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [action](#) [metric](#) [set](#) (*number* | *string*)

Tree [set](#)

String Length 1 to 32

Range 0 to 4294967295

Notes The following elements are part of a choice: **add**, **set**, or **subtract**.

Introduced 19.10.R1

Platforms All

### **subtract** (*number* | *string*)

Synopsis Metric to subtract

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [action](#) [metric](#) [subtract](#) (*number* | *string*)

Tree [subtract](#)

String Length 1 to 32

Range 0 to 4294967295

Notes The following elements are part of a choice: **add**, **set**, or **subtract**.

Introduced 19.10.R1

Platforms All

### **multicast-redirect**

Synopsis Enter the **multicast-redirect** context

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [action](#) [multicast-redirect](#)

Tree [multicast-redirect](#)

Introduced 19.10.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**fwd-service *string***

Synopsis	Service ID for multicast redirection
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">multicast-redirection</a> <a href="#">fwd-service</a> <i>string</i>
Tree	<a href="#">fwd-service</a>
Default	Base
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**ip-int-name *string***

Synopsis	Alternate interface where IGMP messages are redirected
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">multicast-redirection</a> <a href="#">ip-int-name</a> <i>string</i>
Tree	<a href="#">ip-int-name</a>
String Length	1 to 32
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**nat-policy (*param-midstring* | *string*)**

Synopsis	BGP-VPN imported route and a NAT policy association
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">nat-policy</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">nat-policy</a>
Description	<p>This command assigns a NAT policy to the matched routes that do not have a more specific NAT policy configured under action.</p> <p>A dynamic route obtained by BGP-VPN can be imported into an inside (private side) routing context in NAT environment. This route must be associated with a NAT policy that maps traffic into a NAT pool and outside routing context. If the NAT policy is not specified within the route policy entry, the imported NAT route is, by default, associated with the default NAT policy defined in the NAT inside routing context.</p> <p>All BGP-VPN routes that are destined to be imported into the NAT inside routing context must have action-type <b>accept</b> regardless of whether the NAT policy is configured in the action.</p>
String Length	1 to 32
Introduced	21.5.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-e, 7750 SR-s, VSR

**next-hop** (*keyword* | *ipv4-address-no-zone* | *ipv6-address-no-zone* | *string*)

Synopsis	Next-hop IP address applied to routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">next-hop</a> ( <i>keyword</i>   <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i>   <i>string</i> )
Tree	<a href="#">next-hop</a>
String Length	1 to 32
Options	peer-address, self
Introduced	19.10.R1
Platforms	All

**origin** (*keyword* | *string*)

Synopsis	BGP origin for routes that are exported into BGP
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">origin</a> ( <i>keyword</i>   <i>string</i> )
Tree	<a href="#">origin</a>
String Length	1 to 32
Options	igp, egp, incomplete
Introduced	19.10.R1
Platforms	All

**origin-validation-state** (*keyword* | *string*)

Synopsis	Origin validation state for routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">origin-validation-state</a> ( <i>keyword</i>   <i>string</i> )
Tree	<a href="#">origin-validation-state</a>
String Length	1 to 32
Options	valid, not-found, invalid
Introduced	19.10.R1
Platforms	All

**preference** (*number* | *string*)

Synopsis	Route preference applied to routes
----------	------------------------------------

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">preference</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">preference</a>
String Length	1 to 32
Range	1 to 255
Introduced	19.10.R1
Platforms	All

**resolve-static** *boolean*

Synopsis	Resolve next hop of a static route for the BGP next hop
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">resolve-static</a> <i>boolean</i>
Tree	<a href="#">resolve-static</a>
Default	false
Introduced	19.10.R1
Platforms	All

**route-table-install** *boolean*

Synopsis	Allow BGP route installation in the route table
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">route-table-install</a> <i>boolean</i>
Tree	<a href="#">route-table-install</a>
Default	true
Introduced	19.10.R1
Platforms	All

**source-class** *number*

Synopsis	Default source class for the policy statement
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">source-class</a> <i>number</i>
Tree	<a href="#">source-class</a>
Description	This command specifies the policy accounting source class index to associate with matched routes.

Range	1 to 255
Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS

## sr-label-index

Synopsis	Enter the <b>sr-label-index</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">sr-label-index</a>
Tree	<a href="#">sr-label-index</a>
Description	<p>Commands in this context configure the policy action to associate a BGP segment-routing label index value with all /32 BGP labeled IPv4 routes.</p> <p>The use of this action in a policy entry that matches more than one /32 labeled IPv4 route may create SID conflicts.</p> <p>This action only takes effect in BGP peer import policies (and only on received /32 labeled IPv4 routes) and in route table import policies associated with the labeled IPv4 RIB.</p> <p>When this action occurs in a policy applied as a peer import policy, a prefix SID attribute can be added to a received /32 labeled IPv4 route that was not sent with this attribute, or the received prefix SID attribute can be replaced with a new one.</p>
Introduced	19.10.R1
Platforms	All

## prefer-igp *boolean*

Synopsis	Use the SR label index from the IGP route when present
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">sr-label-index</a> <a href="#">prefer-igp</a> <i>boolean</i>
Tree	<a href="#">prefer-igp</a>
Description	<p>When configured to <b>true</b>, BGP obtains the SID index from the IGP route (if a SID index is present) and the <b>configure router bgp segment-routing prefix-sid-range global</b> command is set to <b>true</b>.</p> <p>This command applies only to route table import policies.</p> <p>When configured to <b>false</b>, or the SID index is not present in the IGP route, or the <b>configure router bgp segment-routing prefix-sid-range global</b> command is not set to <b>true</b>, BGP obtains the label index value from the <b>value</b> command.</p>
Default	false
Introduced	19.10.R1
Platforms	All

**value** (*string* | *number*)

Synopsis	BGP SR label index associated with routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">sr-label-index</a> <a href="#">value</a> ( <i>string</i>   <i>number</i> )
Tree	<a href="#">value</a>
Description	<p>This command specifies the BGP SR label index value to be associated with a route or routes.</p> <p>If this command specifies an index value that causes a SID conflict with another BGP route, all conflicting BGP routes are re-advertised with label values based on dynamic allocation rather than SID-based allocation.</p> <p>If this command specifies an index value that causes a SID conflict with an IGP route, the BGP route is re-advertised with a label value based on dynamic allocation rather than SID-based allocation.</p>
String Length	1 to 32
Range	0 to 524287
Introduced	19.10.R1
Platforms	All

**sr-maintenance-policy** (*param-midstring* | *string*)

Synopsis	SR maintenance policy as an action
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">sr-maintenance-policy</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">sr-maintenance-policy</a>
Description	This command applies a named segment routing maintenance policy as an action for route policies. It is only used for SR policy routes.
String Length	1 to 32
Introduced	20.10.R1
Platforms	All

**sr-return-path-bfd-label** (*policy-var-name* | *number*)

Synopsis	S-BFD return path label
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">sr-return-path-bfd-label</a> ( <i>policy-var-name</i>   <i>number</i> )
Tree	<a href="#">sr-return-path-bfd-label</a>

Description	<p>This command configures an additional MPLS label to add to the bottom of the label stack for the S-BFD packet and sets the S-BFD session to echo mode.</p> <p>This command applies to the initiator of the S-BFD sessions. The label value can either be a binding SID for an SR policy or another MPLS path configured on the reflector router. Instead of being routed through the IGP path, the S-BFD packet returns to the initiator through the MPLS return path. This value takes precedence over the return path label value in a maintenance policy (configured using the <b>configure router segment-routing maintenance-policy return-path-label</b> command) that is also applied as the policy-statement action. This command can only be configured if the <b>sr-maintenance-policy</b> is also configured.</p> <p>If this command is unconfigured, and there is no <b>return-path-label</b> command configuration in the maintenance policy that is also applied as an action, and the policy statement is reevaluated, S-BFD returns to asynchronous mode and no return path label is pushed by the initiator node. S-BFD packets for this LSP or path received by the reflector are routed through the IGP path.</p>
String Length	1 to 32
Range	32 to 1048512
Introduced	23.10.R1
Platforms	All

### **srv6-locator** (*param-midstring-64* | *string*)

Synopsis	Locator for SRv6 TLV to use
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">srv6-locator</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">srv6-locator</a>
Description	<p>This command configures either a string encoding a midstring parameter delimited by at signs (@), or a reference to a named locator for the SRv6 TLV to use.</p> <p>For a VRF export policy, the referenced locator must already be configured using the commands in the <b>configure service vprn segment-routing-v6 locator</b> context.</p> <p>For a BGP export policy, the referenced locator must already be configured using the commands in the <b>configure router segment-routing segment-routing-v6 base-routing-instance locator</b> context.</p>
String Length	1 to 64
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **srv6-micro-segment-locator** (*param-midstring-64* | *string*)

Synopsis	Micro-segment locator for SRv6 TLV to use
----------	---

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">srv6-micro-segment-locator</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">srv6-micro-segment-locator</a>
Description	This command configures either a string encoding a midstring parameter delimited by at signs (@), or a reference to a named micro-segment locator for the SRv6 TLV to use. For a VRF export policy, the referenced micro-segment locator must already be configured using the commands in the <b>configure service vprn segment-routing-v6 micro-segment-locator</b> context. For a BGP export policy, the referenced micro-SID locator must already be configured using the commands in the <b>configure router segment-routing segment-routing-v6 base-routing-instance micro-segment-locator</b> context.
String Length	1 to 64
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **srv6-return-path-bfd-sid** (*policy-var-name* | *ipv6-address*)

Synopsis	SRv6 return path BFD SID applied to SRv6 policy routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">srv6-return-path-bfd-sid</a> ( <i>policy-var-name</i>   <i>ipv6-address</i> )
Tree	<a href="#">srv6-return-path-bfd-sid</a>
Description	This command configures the S-BFD session to echo mode and pushes an additional SRv6 SID in the SRH only for S-BFD packets sent on the imported SRv6 policy.
String Length	1 to 32
Introduced	23.3.R1
Platforms	All

### **sticky-ecmp** *boolean*

Synopsis	Specify the sticky ECMP flag for BGP ECMP routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">sticky-ecmp</a> <i>boolean</i>
Tree	<a href="#">sticky-ecmp</a>
Default	false
Introduced	19.10.R1
Platforms	All

**tag** (*number* | *string*)

Synopsis	OSPF RIP or IS-IS tag applied to routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">tag</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">tag</a>
String Length	1 to 32
Range	1 to 4294967295
Introduced	19.10.R1
Platforms	All

**type** (*number* | *string*)

Synopsis	OSPF metric type applied to routes
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">action</a> <a href="#">type</a> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">type</a>
String Length	1 to 32
Range	1 to 2
Introduced	19.10.R1
Platforms	All

**conditional-expression**

Synopsis	Enable the <b>conditional-expression</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">conditional-expression</a>
Tree	<a href="#">conditional-expression</a>
Introduced	19.10.R1
Platforms	All

**route-exists** *string*

Synopsis	Conditional expression to test route existence
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">conditional-expression</a> <a href="#">route-exists</a> <i>string</i>
Tree	<a href="#">route-exists</a>

String Length	1 to 255
Introduced	19.10.R1
Platforms	All

### **description** *string*

Synopsis	Text description
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">description</a> <i>string</i>
Tree	<a href="#">description</a>
String Length	1 to 80
Introduced	19.10.R1
Platforms	All

### **from**

Synopsis	Enable the <b>from</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <b>from</b>
Tree	<a href="#">from</a>
Introduced	19.10.R1
Platforms	All

### **aggregate-contributor** *boolean*

Synopsis	Enable aggregate route match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">aggregate-contributor</a> <i>boolean</i>
Tree	<a href="#">aggregate-contributor</a>
Description	<p>When configured to <b>true</b>, matches all routes (BGP and non-BGP) that have contributed to an active aggregate route. If the prefix tree above a particular route includes no active aggregate routes or the most specific active aggregate route in the prefix tree above this route has a policy that rejects the route, then it is not considered as an aggregate-contributor.</p> <p>This match condition is only supported when used in a BGP export policy. If it is used in an entry of a BGP import policy, <b>vrf-export</b> policy or <b>vrf-import</b> policy, no routes are matched by that entry.</p> <p>When configured to <b>false</b>, no routes (BGP and non-BGP) that have contributed to an active aggregate route are matched.</p>
Default	false

Introduced 20.10.R1  
 Platforms All

### **area string**

Synopsis OSPF area as a match criterion  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [from area](#) *string*  
 Tree [area](#)  
 Introduced 19.10.R1  
 Platforms All

### **as-path**

Synopsis Enter the **as-path** context  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [from as-path](#)  
 Tree [as-path](#)  
 Introduced 19.10.R1  
 Platforms All

### **group** (*param-midstring* | *string*)

Synopsis AS path group as a match criterion  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [from as-path](#) [group](#) (*param-midstring* | *string*)  
 Tree [group](#)  
 String Length 1 to 32  
 Notes The following elements are part of a choice: **group** or **name**.  
 Introduced 19.10.R1  
 Platforms All

### **length**

Synopsis Enter the **length** context  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [from as-path](#) [length](#)  
 Tree [length](#)

Introduced	19.10.R1
Platforms	All

### **qualifier** *keyword*

Synopsis	Higher or lower values to be accepted as match criteria
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from as-path</a> <a href="#">length</a> <b>qualifier</b> <i>keyword</i>
Tree	<a href="#">qualifier</a>
Options	equal, or-higher, or-lower
Default	equal
Introduced	19.10.R1
Platforms	All

### **unique** *boolean*

Synopsis	Use unique AS numbers as matching criteria
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from as-path</a> <a href="#">length</a> <b>unique</b> <i>boolean</i>
Tree	<a href="#">unique</a>
Default	false
Introduced	19.10.R1
Platforms	All

### **value** (*number* | *string*)

Synopsis	AS numbers in the AS path that match on the BGP route
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from as-path</a> <a href="#">length</a> <b>value</b> ( <i>number</i>   <i>string</i> )
Tree	<a href="#">value</a>
String Length	1 to 32
Range	0 to 255
Introduced	19.10.R1
Platforms	All

**name** (*param-midstring* | *string*)

Synopsis	AS path name to match
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from as-path</a> <a href="#">name</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">name</a>
Description	This command specifies an AS path regular expression name for the route policy entry. Policy parameters must be enclosed by at-signs (@) and may be midstring; for example, "@variable@", "start@variable@end", "@variable@end", or "start@variable@".
String Length	1 to 32
Notes	The following elements are part of a choice: <b>group</b> or <b>name</b> .
Introduced	19.10.R1
Platforms	All

**cluster-id**

Synopsis	Enter the <b>cluster-id</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from cluster-id</a>
Tree	<a href="#">cluster-id</a>
Introduced	19.10.R1
Platforms	All

**ip-address** *string*

Synopsis	Cluster list attribute IP addresses for route matching
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from cluster-id</a> <a href="#">ip-address</a> <i>string</i>
Tree	<a href="#">ip-address</a>
Max. Instances	5
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>none-cluster-list</b> . This element is ordered by the user.
Introduced	19.10.R1
Platforms	All

**none-cluster-list** *boolean*

Synopsis	Specify matching BGP routes without a cluster ID
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from cluster-id</a> <a href="#">none-cluster-list</a> <i>boolean</i>
Tree	<a href="#">none-cluster-list</a>
Default	false
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>none-cluster-list</b> .
Introduced	19.10.R1
Platforms	All

**color** *number*

Synopsis	Color ID as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from color</a> <i>number</i>
Tree	<a href="#">color</a>
Description	This command configures an SR Policy color ID as a route policy match criterion. This match criterion is only used in import policies.
Range	0 to 4294967295
Introduced	20.10.R1
Platforms	All

**community**

Synopsis	Enter the <b>community</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from community</a>
Tree	<a href="#">community</a>
Introduced	19.10.R1
Platforms	All

**count**

Synopsis	Enter the <b>count</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from community</a> <a href="#">count</a>
Tree	<a href="#">count</a>
Introduced	19.10.R1

Platforms All

### **qualifier** *keyword*

Synopsis Higher or lower values to be accepted as match criteria

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [from](#) [community](#) [count](#) **qualifier** *keyword*

Tree [qualifier](#)

Options equal, or-higher, or-lower

**expression string**

Synopsis	Community expression statement as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from community</a> <a href="#">expression</a> <i>string</i>
Tree	<a href="#">expression</a>
Description	<p>This command configures a community expression statement as a match criterion for the policy statement. This statement is a logical expression string composed of logical operators (keywords AND, OR, NOT), community names delimited by square brackets [], and parentheses ( ) to group subexpressions. If the expression contains special characters (for example, #, \$, spaces), the entire string must be enclosed in double quotes.</p> <p>The expression specified must already be defined using the <b>configure policy-options community expression expr</b> command.</p> <p>The following are examples of valid logical expressions:</p> <pre>"[community_list_A] OR ([community_list_B] AND [community_list_C])" "NOT [community_list_A]" "[community_list_A] AND [community_list_B] OR [community_list_C]" "NOT ([community_list_A] OR [community_list_B] OR [community_list_C])"</pre>
String Length	1 to 900
Notes	The following elements are part of a choice: <b>expression</b> or <b>name</b> .
Introduced	19.10.R1
Platforms	All

**name** (*param-midstring-64* | *string*)

Synopsis	Community list name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from community</a> <a href="#">name</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">name</a>
String Length	1 to 64
Notes	The following elements are part of a choice: <b>expression</b> or <b>name</b> .
Introduced	19.10.R1
Platforms	All

**distinguisher number**

Synopsis	SR policy distinguisher as a match criterion
----------	--

Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">distinguisher</a> <i>number</i>
Tree	<a href="#">distinguisher</a>
Description	This command configures an SR Policy distinguisher as a route policy match criterion. This match criterion is only used in import policies.
Range	0 to 4294967295
Introduced	20.10.R1
Platforms	All

### **endpoint** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	SR policy endpoint address as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">endpoint</a> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<a href="#">endpoint</a>
Description	This command configures an SR Policy endpoint address as a route policy match criterion. This match criterion is only used in import policies.
Introduced	20.10.R1
Platforms	All

### **evpn-type** *keyword*

Synopsis	EVPN type as a match criterion for the entry
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">evpn-type</a> <i>keyword</i>
Tree	<a href="#">evpn-type</a>
Options	ethernet-auto-discovery, mac-ip-advertisement, inclusive-multicast, ethernet-segment, ip-prefix, selective-multicast, multicast-join-sync, multicast-leave-sync, selective-pmsi-auto-discovery
Introduced	19.10.R1
Platforms	All

### **external** *boolean*

Synopsis	Specify the external IS-IS route as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">external</a> <i>boolean</i>

Tree	<a href="#">external</a>
Default	false
Introduced	19.10.R1
Platforms	All

### **family** *keyword*

Synopsis	Address family as the match condition
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">family</a> <i>keyword</i>
Tree	<a href="#">family</a>
Options	ipv4, vpn-ipv4, ipv6, mcast-ipv4, vpn-ipv6, l2-vpn, mvpn-ipv4, mdt-safi, ms-pw, flow-ipv4, route-target, mcast-vpn-ipv4, mvpn-ipv6, flow-ipv6, evpn, mcast-ipv6, label-ipv4, label-ipv6, bgp-ls, mcast-vpn-ipv6, sr-policy-ipv4, sr-policy-ipv6, flow-vpn-ipv4, flow-vpn-ipv6
Max. Instances	20
Introduced	19.10.R1
Platforms	All

### **flowspec**

Synopsis	Enter the <b>flowspec</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">flowspec</a>
Tree	<a href="#">flowspec</a>
Introduced	19.10.R1
Platforms	All

### **dest** (*param-midstring* | *string*)

Synopsis	BGP FlowSpec route matches per destination IP prefix
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">flowspec</a> <a href="#">dest</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">dest</a>
String Length	1 to 32
Introduced	19.10.R1
Platforms	All

**source** (*param-midstring* | *string*)

Synopsis	BGP FlowSpec route matches per the source IP prefix
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">flowspec</a> <a href="#">source</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">source</a>
String Length	1 to 32
Introduced	19.10.R1
Platforms	All

**group-address** (*param-midstring* | *string*)

Synopsis	Prefix list of multicast group addresses for mathcing
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">group-address</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">group-address</a>
String Length	1 to 32
Introduced	19.10.R1
Platforms	All

**host-ip** (*param-midstring* | *string*)

Synopsis	Prefix list of IGMP host IP addresses for matching
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">host-ip</a> ( <i>param-midstring</i>   <i>string</i> )
Tree	<a href="#">host-ip</a>
String Length	1 to 32
Introduced	19.10.R1
Platforms	All

**interface** (*named-item* | *interface-name* | *interface-name* | *interface-name*)

Synopsis	Interface name as match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from</a> <a href="#">interface</a> ( <i>named-item</i>   <i>interface-name</i>   <i>interface-name</i>   <i>interface-name</i> )
Tree	<a href="#">interface</a>

String Length	1 to 32
Max. Instances	1
Notes	This element is ordered by the user.
Introduced	19.10.R1
Platforms	All

## interface-subnets

Synopsis	Enter the <b>interface-subnets</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from interface-subnets</a>
Tree	<a href="#">interface-subnets</a>
Description	<p>Commands in this context configure the applied router instance and interfaces that are used as the matching condition within each policy statement entry when exporting the IP address of the associated interface to a routing protocol.</p> <p>The interface subnet policy statement match criterion is applied to the following unicast use case contexts:</p> <ul style="list-style-type: none"> <li>• <b>export</b>, when used with OSPFv2, OSPFv3, IS-IS, RIP, RIPng, and BGP</li> <li>• <b>route-table-import</b>, when used with BGP</li> <li>• <b>vrf-export</b>, when used with MP-BGP</li> </ul>
Introduced	21.2.R1
Platforms	All

## ip-int-name *string*

Synopsis	Interface name as the match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from interface-subnets</a> <a href="#">ip-int-name</a> <i>string</i>
Tree	<a href="#">ip-int-name</a>
Description	This command specifies the interface name to match when exporting the IP address of the associated interface to a routing protocol.
String Length	1 to 32
Max. Instances	10
Notes	This element is ordered by the user.
Introduced	21.2.R1

Platforms All

### **service** *string*

Synopsis Service ID of the interface subnets

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [from interface-subnets](#) [service](#) *string*

**origin** *keyword*

Synopsis	Route origin match criteria
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from origin</a> <i>keyword</i>
Tree	<a href="#">origin</a>
Description	<p>This command configures a match criteria for the origin attribute of the route. The origin attribute is applicable to BGP routes and to the following subscriber-management routes:</p> <p>Host routes (for example, IPv4 /32 address, or IPv6 SLAAC prefix) carry the origin attribute with AAA, dynamic, or static values, depending on the address assignment method. For CUPS hosts, the origin attribute is always PFCP. Host routes can also be distinguished using the <b>sub-mgmt</b> option for the <b>protocol</b> command.</p> <p>Dynamically provisioned prefixes or loopback addresses use AAA or PFCP origin values, depending on the protocol that provides the prefix and address. Dynamic routes can also be distinguished using the <b>direct</b> option for the <b>protocol</b> command.</p> <p>Statically configured prefixes under the subscriber interface do not have an origin attribute. These routes can be distinguished using the <b>direct</b> option for the <b>protocol</b> command.</p> <p>Framed routes for non-CUPS hosts do not have an origin attribute. Framed routes for CUPS hosts use PFCP for the origin attribute. Alternatively, framed routes can be distinguished using the <b>managed</b> option for the <b>protocol</b> command.</p> <p>The values that are specific to subscriber-management routes are never carried in BGP updates as part of the BGP origin attribute and are not visible within the BGP process.</p>
Options	igp, egp, incomplete, any, aaa, dynamic, static, bonding, pfcp
Introduced	19.10.R1
Platforms	All

**origin-validation-state** *keyword*

Synopsis	Origin validation state used for match criteria
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">origin-validation-state</a> <i>keyword</i>
Tree	<a href="#">origin-validation-state</a>
Description	This command specifies a validation state that is used to match BGP routes based on their origin validation state.
Options	valid, not-found, invalid
Introduced	19.10.R1
Platforms	All

**ospf-type** *number*

Synopsis	OSPF type metric applied to unmatching route entries
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">ospf-type</a> <i>number</i>
Tree	<a href="#">ospf-type</a>
Range	1 to 2
Introduced	19.10.R1
Platforms	All

**path-type** *keyword*

Synopsis	Path type as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">path-type</a> <i>keyword</i>
Tree	<a href="#">path-type</a>
Options	ibgp, ebgp
Introduced	19.10.R1
Platforms	All

**policy** (*string* | *string*)

Synopsis	Policy statement as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">policy</a> ( <i>string</i>   <i>string</i> )

Tree	<a href="#">policy</a>
String Length	1 to 255
Introduced	19.10.R1
Platforms	All

## policy-variables

Synopsis	Enter the <b>policy-variables</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">policy-variables</a>
Tree	<a href="#">policy-variables</a>
Introduced	19.10.R1
Platforms	All

## name [[variable-name](#)] *string*

Synopsis	Enter the <b>name</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">policy-variables</a> <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
Description	Commands in this context configure global variables for use across BGP peers of a common type (transit, peer, customer, and so on).
Max. Instances	10
Introduced	19.10.R1
Platforms	All

## [[variable-name](#)] *string*

Synopsis	Global variable name used to reference policy functions
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">policy-variables</a> <a href="#">name</a> <i>string</i>
Tree	<a href="#">name</a>
String Length	1 to 32
Notes	This element is part of a list key.
Introduced	19.10.R1

Platforms All

### **address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis IP address of the policy variable

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [from policy-variables](#) [name](#) *string* **address** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Tree [address](#)

Notes The following elements are part of a mandatory choice: **address**, **decimal**, **number**, **prefix**, or **value**.

Introduced 19.10.R1

Platforms All

### **decimal** *decimal-number*

Synopsis Attribute decimal to which variable name is resolved

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [from policy-variables](#) [name](#) *string* **decimal** *decimal-number*

Tree [decimal](#)

Range 0.000 to 4294967295.000

Notes The following elements are part of a mandatory choice: **address**, **decimal**, **number**, **prefix**, or **value**.

Introduced 19.10.R1

Platforms All

### **number** *number*

Synopsis Numerical value of the policy variable

Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [from policy-variables](#) [name](#) *string* **number** *number*

Tree [number](#)

Range 0 to 4294967295

Notes The following elements are part of a mandatory choice: **address**, **decimal**, **number**, **prefix**, or **value**.

Introduced 19.10.R1

Platforms All

**prefix** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Prefix value associated with the variable name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from policy-variables</a> <i>name string prefix (ipv4-prefix   ipv6-prefix)</i>
Tree	<a href="#">prefix</a>
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

**value** *string*

Synopsis	Policy variable value
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from policy-variables</a> <i>name string value string</i>
Tree	<a href="#">value</a>
String Length	1 to 32
Notes	The following elements are part of a mandatory choice: <b>address</b> , <b>decimal</b> , <b>number</b> , <b>prefix</b> , or <b>value</b> .
Introduced	19.10.R1
Platforms	All

**prefix-list** (*param-midstring-64* | *string*)

Synopsis	Prefix list as match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from prefix-list</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">prefix-list</a>
String Length	1 to 64
Max. Instances	28
Notes	This element is ordered by the user.
Introduced	19.10.R1
Platforms	All

**prefix-list-override** [[prefix-list](#)] *string*

Synopsis	Enter the <b>prefix-list-override</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from prefix-list-override</a> <i>string</i>
Tree	<a href="#">prefix-list-override</a>
Description	<p>Commands in this context convert a prefix list to a specific match type. The routing policy uses the converted list as a match condition.</p> <p>The prefix list to be converted can be specified by its name, as an expression containing the name of a global variable that holds the name of the prefix list, or as an expression containing the name of a subroutine variable that holds the name of the prefix list.</p>
Max. Instances	1
Introduced	23.10.R1
Platforms	All

**[prefix-list]** *string*

Synopsis	Prefix list to be converted
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from prefix-list-override</a> <i>string</i>
Tree	<a href="#">prefix-list-override</a>
Notes	This element is part of a list key.
Introduced	23.10.R1
Platforms	All

**end-length** *number*

Synopsis	Prefix range end length
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from prefix-list-override</a> <i>string</i> <a href="#">end-length</a> <i>number</i>
Tree	<a href="#">end-length</a>
Range	0 to 128
Notes	The following elements are part of a choice: ( <b>end-length</b> and <b>start-length</b> ) or <b>through-length</b> .
Introduced	23.10.R1
Platforms	All

**start-length** *number*

Synopsis	Prefix range start length
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from prefix-list-override</a> <i>string</i> <b>start-length</b> <i>number</i>
Tree	<a href="#">start-length</a>
Range	0 to 128
Notes	The following elements are part of a choice: ( <b>end-length</b> and <b>start-length</b> ) or <b>through-length</b> .
Introduced	23.10.R1
Platforms	All

**through-length** *number*

Synopsis	Prefix through length
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from prefix-list-override</a> <i>string</i> <b>through-length</b> <i>number</i>
Tree	<a href="#">through-length</a>
Range	0 to 128
Notes	The following elements are part of a choice: ( <b>end-length</b> and <b>start-length</b> ) or <b>through-length</b> .
Introduced	23.10.R1
Platforms	All

**type** *keyword*

Synopsis	New match type for entries in referenced prefix list
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from prefix-list-override</a> <i>string</i> <b>type</b> <i>keyword</i>
Tree	<a href="#">type</a>
Options	exact, longer, through, range
Default	exact
Introduced	23.10.R1
Platforms	All

**protocol**

Synopsis	Enter the <b>protocol</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from protocol</a>
Tree	<a href="#">protocol</a>
Description	Commands in this context configure the match criterion based on protocols for a route policy statement entry and may be used for both import and export policies.
Introduced	19.10.R1
Platforms	All

**instance** (*keyword* | *number*)

Synopsis	Instance for protocol IS-IS, OSPF, or OSPFv3 to match
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from protocol</a> <a href="#">instance</a> ( <i>keyword</i>   <i>number</i> )
Tree	<a href="#">instance</a>
Description	This command specifies the OSPF, OSPFv3, or IS-IS instance to be used as the match criterion.  When this command is explicitly configured, the <b>name</b> command must be configured to identify the protocol (OSPF, OSPFv3, or IS-IS).
Range	0 to 127
Options	all
Default	0
Introduced	19.10.R1
Platforms	All

**name** *keyword*

Synopsis	List of protocol names as the match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from protocol</a> <a href="#">name</a> <i>keyword</i>
Tree	<a href="#">name</a>
Description	This command specifies a protocol list for the match criterion. If multiple protocols are specified, the protocol names must belong to the following protocol set: <ul style="list-style-type: none"> <li>• direct</li> <li>• static</li> <li>• isis</li> <li>• aggregate</li> </ul>

- `bgp`
- `bgp-label`
- `direct-interface`

If multiple protocols are specified, the **instance** command cannot be explicitly configured.

The protocol **direct-interface** route type matches the specific direct interface host IPv4 / 32 and IPv6 /128 routes.

Options	<code>direct</code> , <code>static</code> , <code>bgp</code> , <code>isis</code> , <code>ospf</code> , <code>rip</code> , <code>aggregate</code> , <code>bgp-vpn</code> , <code>igmp</code> , <code>pim</code> , <code>ospf3</code> , <code>ldp</code> , <code>sub-mgmt</code> , <code>mld</code> , <code>managed</code> , <code>vpn-leak</code> , <code>nat</code> , <code>periodic</code> , <code>ipsec</code> , <code>dhcpv6-pd</code> , <code>dhcpv6-na</code> , <code>dhcpv6-ta</code> , <code>dhcpv6-pd-excl</code> , <code>ripng</code> , <code>bgp-label</code> , <code>direct-interface</code> , <code>arp-nd</code> , <code>rib-api</code> , <code>dhcp-client</code> , <code>evpn-iftl</code> , <code>srv6</code> , <code>video</code>
Max. Instances	5
Introduced	19.10.R1
Platforms	All

### **route-distinguisher-list** (*param-midstring-64* | *string*)

Synopsis	Route distinguisher list as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from route-distinguisher-list</a> ( <i>param-midstring-64</i>   <i>string</i> )
Tree	<a href="#">route-distinguisher-list</a>
Description	This command specifies the (possibly parameterized) name of a route distinguisher (RD) list.  This match condition is supported by policies applied as VRF-import or BGP peer import policies. A BGP route can match a policy entry with this match criterion if the NLRI field contains an RD that is matched by at least one of the entries in the RD list.  BGP routes belonging to address families other than VPN-IPv4, VPN-IPv6, MCAST-VPN-IPv4, MCAST-VPN-IPv6, EVPN, FlowSpec-VPN IPv4, FlowSpec-VPN IPv6, MVPN-IPv4, or MVPN-IPv6 route do not match policy entries with this match criterion.
String Length	1 to 64
Introduced	23.3.R1
Platforms	All

### **source-address**

Synopsis	Enter the <b>source-address</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from source-address</a>

Tree	<a href="#">source-address</a>
Introduced	19.10.R1
Platforms	All

### **ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone*)

Synopsis	Source IP address to match
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">source-address</a> <b>ip-address</b> ( <i>ipv4-address-no-zone   ipv6-address-no-zone</i> )
Tree	<a href="#">ip-address</a>
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>prefix-list</b> .
Introduced	19.10.R1
Platforms	All

### **prefix-list** (*param-midstring | string*)

Synopsis	Name of a source address prefix list to match
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">source-address</a> <b>prefix-list</b> ( <i>param-midstring   string</i> )
Tree	<a href="#">prefix-list</a>
String Length	1 to 32
Notes	The following elements are part of a choice: <b>ip-address</b> or <b>prefix-list</b> .
Introduced	19.10.R1
Platforms	All

### **srv6-sid-prefix** (*policy-var-name | ipv6-unicast-prefix*)

Synopsis	SRv6 SID or uSID as match criterion for the BGP route
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">srv6-sid-prefix</a> ( <i>policy-var-name   ipv6-unicast-prefix</i> )
Tree	<a href="#">srv6-sid-prefix</a>
Description	This command configures either the name of a prefix policy variable or an IPv6 prefix and prefix length, as a match criterion for a BGP route.  <b>Note:</b> If the name of a prefix policy variable is the match criterion, the name must start and end with an at sign (@).

A BGP route matches this condition if it has an SRv6 TLV, and the SID or micro-segment (uSID) value in that TLV is matched by the bits of the IPv6 prefix (up to the specified prefix length).

This match condition is supported in BGP import policies, BGP export policies, and VRF or VSI import policies.

String Length	1 to 32
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **srv6-tlv** keyword

Synopsis	SRv6 TLV presence as match criterion for BGP route
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">srv6-tlv</a> keyword
Tree	<a href="#">srv6-tlv</a>
Description	<p>This command configures whether the entry matches a BGP route with a prefix SID attribute containing an SRv6 TLV.</p> <p>If this command is not configured, a BGP route can match the entry, regardless of whether it has a prefix SID attribute or whether that prefix SID attribute has SRv6 TLVs.</p> <p>This match condition is supported in BGP import policies, BGP export policies, and VRF or VSI import policies.</p> <p>If the <b>present</b> option is configured, a BGP route only matches this entry if it has a prefix SID attribute containing an SRv6 TLV.</p> <p>If the <b>not-present</b> option is configured, a BGP route only matches this entry if it does not have a prefix SID attribute containing an SRv6 TLV.</p>
Options	present, not-present
Introduced	23.7.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-s, 7950 XRS, VSR

### **state** keyword

Synopsis	State used as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> from <a href="#">state</a> keyword
Tree	<a href="#">state</a>
Description	This command configures a criterion that identifies in resilient gateways which routes are associated with an active context and which routes are associated with a standby context.
Options	srrp-master, srrp-non-master, ipsec-master-with-peer, ipsec-master-without-peer, ipsec-non-master, fsg-active, fsg-standby, fsg-active-path-restoration

Introduced	19.10.R1
Platforms	7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, VSR

**tag** (*number* | *keyword*)

Synopsis	Route tag used as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">from tag</a> ( <i>number</i>   <i>keyword</i> )
Tree	<a href="#">tag</a>
Range	1 to 4294967295
Options	no-tag
Introduced	19.10.R1
Platforms	All

**to**

Synopsis	Enable the <b>to</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">to</a>
Tree	<a href="#">to</a>
Introduced	19.10.R1
Platforms	All

**level** *number*

Synopsis	IS-IS route level as a match criterion
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">to level</a> <i>number</i>
Tree	<a href="#">level</a>
Range	1 to 2
Introduced	19.10.R1
Platforms	All

**neighbor**

Synopsis	Enter the <b>neighbor</b> context
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">policy-statement</a> <i>string</i> <a href="#">named-entry</a> <i>string</i> <a href="#">to neighbor</a>
Tree	<a href="#">neighbor</a>

Introduced 19.10.R1  
 Platforms All

### **ip-address** (*ipv4-address-no-zone | ipv6-address-no-zone | ipv4-address-with-zone | ipv6-address-with-zone*)

Synopsis IP address to match the neighbor  
 Context **configure** [policy-options](#) [policy-statement](#) *string* [named-entry](#) *string* [to neighbor](#) [ip-address](#) (*ipv4-address-no-zone | ipv6-address-no-zone | ipv4-address-with-zone | ipv6-address-with-zone*)

Introduced 20.7.R1

Platforms All

**[address]** (*ipv4-address-no-zone* | *ipv6-address-no-zone*)

Synopsis	Address mask for matching routes to the prefix entry
Context	<b>configure</b> <b>policy-options</b> <b>prefix-list</b> <i>string</i> <b>prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>type</b> <b>keyword</b> <b>mask-pattern</b> ( <i>ipv4-address-no-zone</i>   <i>ipv6-address-no-zone</i> )
Tree	<b>mask-pattern</b>
Description	<p>This command specifies the address mask to compare against the prefix entry to determine whether the route is considered a match.</p> <p>A route matches the prefix entry if the following conditions are met.</p> <ul style="list-style-type: none"> <li>• The bitwise logical AND of the prefix address and its mask matches the bitwise logical AND of the route address and its mask.</li> <li>• The prefix length of the prefix entry matches the prefix length of the route.</li> </ul> <p>For example, for a prefix entry of 17.1.0.0/32, routes with an address 17.1.x.0 (where x can be 0 through 255) and a prefix length of 32 match the entry.</p>
Notes	This element is part of a list key.
Introduced	20.7.R1
Platforms	All

**start-length** *number*

Synopsis	Start in the prefix range length
Context	<b>configure</b> <b>policy-options</b> <b>prefix-list</b> <i>string</i> <b>prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>type</b> <b>keyword</b> <b>start-length</b> <i>number</i>
Tree	<b>start-length</b>
Range	0 to 128
Notes	The following elements are part of a choice: <b>mask-pattern</b> , ( <b>end-length</b> and <b>start-length</b> ), <b>through-length</b> , or <b>to-prefix</b> .
Introduced	16.0.R1
Platforms	All

**through-length** *number*

Synopsis	Prefix through length
Context	<b>configure</b> <b>policy-options</b> <b>prefix-list</b> <i>string</i> <b>prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>type</b> <b>keyword</b> <b>through-length</b> <i>number</i>
Tree	<b>through-length</b>
Range	0 to 128

Notes	The following elements are part of a choice: <b>mask-pattern</b> , ( <b>end-length</b> and <b>start-length</b> ), <b>through-length</b> , or <b>to-prefix</b> .
Introduced	16.0.R1
Platforms	All

### **to-prefix** [**ip-prefix**] (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	Add a list entry for <b>to-prefix</b>
Context	<b>configure</b> <b>policy-options</b> <b>prefix-list</b> <i>string</i> <b>prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>type</b> <i>keyword</i> <b>to-prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<b>to-prefix</b>
Notes	The following elements are part of a choice: <b>mask-pattern</b> , ( <b>end-length</b> and <b>start-length</b> ), <b>through-length</b> , or <b>to-prefix</b> .
Introduced	20.7.R1
Platforms	All

### **[ip-prefix]** (*ipv4-prefix* | *ipv6-prefix*)

Synopsis	IP prefix for "to" match type
Context	<b>configure</b> <b>policy-options</b> <b>prefix-list</b> <i>string</i> <b>prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> ) <b>type</b> <i>keyword</i> <b>to-prefix</b> ( <i>ipv4-prefix</i>   <i>ipv6-prefix</i> )
Tree	<b>to-prefix</b>
Description	<p>This command configures an IP prefix to use in a route policy prefix list for the to match type. If the prefix entry is in the format <i>prefix1/length1</i>, and this command is configured in the format <i>prefix2/length2</i>, a route matches the prefix entry if the following conditions are met.</p> <ul style="list-style-type: none"> <li>• The route shares the same most-significant bits (specified by <i>length1</i>) with the prefix entry</li> <li>• The route shares the same most-significant bits (specified by <i>length2</i>) with this IP prefix value</li> <li>• The prefix length of the route is in the range of <i>length1</i> to <i>length2</i> (inclusive)</li> </ul> <p>For example, for a prefix entry of 10.0.0.8 with a to IP prefix value of 10.0.0.0/32, routes 10.0.0.0/8, 10.0.0.0/9, 10.0.0.0/10, and so on, to 10.0.0.0/32 are considered matches for the prefix entry.</p>
Notes	This element is part of a list key.
Introduced	20.7.R1
Platforms	All

**route-distinguisher-list** [*name*] *string*

Synopsis	Enter the <b>route-distinguisher-list</b> list instance
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">route-distinguisher-list</a> <i>string</i>
Tree	<a href="#">route-distinguisher-list</a>
Introduced	23.3.R1
Platforms	All

**[name]** *string*

Synopsis	Route distinguisher list name
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">route-distinguisher-list</a> <i>string</i>
Tree	<a href="#">route-distinguisher-list</a>
Description	This command creates a list of entries used to match the RD in BGP routes of specific address families.
String Length	1 to 64
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	All

**rd-entry** [*rd*] *string*

Synopsis	Add a list entry for <b>rd-entry</b>
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">route-distinguisher-list</a> <i>string</i> <a href="#">rd-entry</a> <i>string</i>
Tree	<a href="#">rd-entry</a>
Max. Instances	128
Introduced	23.3.R1
Platforms	All

**[rd]** *string*

Synopsis	Route distinguisher
Context	<b>configure</b> <a href="#">policy-options</a> <a href="#">route-distinguisher-list</a> <i>string</i> <a href="#">rd-entry</a> <i>string</i>
Tree	<a href="#">rd-entry</a>

---

Description	<p>This command creates an RD matching entry containing an IPv4 address or ASN and the assigned number. The following formats are supported:</p> <ul style="list-style-type: none"><li>• <i>a.b.c.d/m:*</i> – RD in IPv4 format with a wildcard character (such as 10.0.0.0/16:*)</li><li>• <i>a.b.c.d/m:n</i> – RD in IPv4 format with a specific number (such as 10.0.0.2/32:535)</li><li>• <i>asn:*</i> – RD in ASN format with a wildcard character (such as 65000:*)</li><li>• <i>asn:n</i> – RD in ASN format with a specific number (such as 65000:535)</li></ul> <p>See the "Route distinguishers" section of the <i>7450 ESS, 7750 SR, 7950 XRS, and VSR Layer 3 Services Guide: IES and VPRN</i> for information about Type values.</p>
String Length	3 to 28
Notes	This element is part of a list key.
Introduced	23.3.R1
Platforms	All

### 3.32.1 port command descriptions

#### **port** [[port-id](#)] *string*

Synopsis	Enter the <b>port</b> list instance
Context	<b>configure port</b> <i>string</i>
Tree	<a href="#">port</a>
Introduced	16.0.R1
Platforms	All

#### **[port-id]** *string*

Synopsis	Port ID
Context	<b>configure port</b> <i>string</i>
Tree	<a href="#">port</a>
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

#### **access**

Synopsis	Enter the <b>access</b> context
Context	<b>configure port</b> <i>string</i> <a href="#">access</a>
Tree	<a href="#">access</a>
Description	Commands in this context configure egress and ingress pool policy commands.
Introduced	16.0.R1
Platforms	All

#### **egress**

Synopsis	Enter the <b>egress</b> context
Context	<b>configure port</b> <i>string</i> <a href="#">access</a> <a href="#">egress</a>
Tree	<a href="#">egress</a>

Description	Commands in this context specify the configuration of access egress buffer pools to determine how a CBS-reserved space is handled and the strategy for utilizing the shared buffer space.
Introduced	16.0.R1
Platforms	All

### **pool** [*name*] *string*

Synopsis	Enter the <b>pool</b> list instance
Context	<b>configure</b> <i>port string access egress pool string</i>
Tree	<i>pool</i>
Description	Commands in this context configure pool policies for the pool instance.
Introduced	16.0.R1
Platforms	All

### **[name]** *string*

Synopsis	Pool name for the access port
Context	<b>configure</b> <i>port string access egress pool string</i>
Tree	<i>pool</i>
String Length	1 to 32
MD-CLI Default	default
Notes	This element is part of a list key.
Introduced	16.0.R1
Platforms	All

### **amber-alarm-threshold** *number*

Synopsis	Threshold for the amber alarm on oversubscription
Context	<b>configure</b> <i>port string access egress pool string amber-alarm-threshold number</i>
Tree	<i>amber-alarm-threshold</i>
Range	1 to 1000
Units	percent
Introduced	16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **red-alarm-threshold** *number*

Synopsis Threshold for the red alarm on oversubscription

Context **configure** *port string access egress pool string red-alarm-threshold number*

Tree [red-alarm-threshold](#)

Range 1 to 1000

Units percent

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **resv-cbs**

Synopsis Enter the **resv-cbs** context

Context **configure** *port string access egress pool string resv-cbs*

Tree [resv-cbs](#)

Introduced 16.0.R1

Platforms All

### **amber-alarm-action**

Synopsis Enter the **amber-alarm-action** context

Context **configure** *port string access egress pool string resv-cbs amber-alarm-action*

Tree [amber-alarm-action](#)

Introduced 16.0.R1

Platforms All

### **max** *number*

Synopsis Maximum percentage for reserved CBS of the pool

Context **configure** *port string access egress pool string resv-cbs amber-alarm-action max number*

Tree [max](#)

Description This command specifies the maximum percentage for the reserved CBS of the pool. The maximum reserved CBS must not be less than the value of the reserved CBS.

To enable adaptive CBS sizing the **max**, **step**, and **cbs** commands must be configured. The **cbs** command must also be configured to a percentage other than the default value.

When unconfigured, CBS adaptive sizing is not enabled.

Range	1 to 100
Units	percent
Introduced	16.0.R1
Platforms	All

### **step** *number*

Synopsis	Step-size percentage for reserved CBS of the pool
Context	<b>configure</b> <i>port string access egress pool string resv-cbs amber-alarm-action step number</i>
Tree	<i>step</i>
Description	This command specifies the step-size percentage for the reserved CBS of the pool. To enable adaptive CBS sizing the <b>max</b> , <b>step</b> , and <b>cbs</b> commands must be configured. The <b>cbs</b> command must also be configured to a percentage other than the default value. When unconfigured, CBS adaptive sizing is not enabled.

Range	1 to 100
Units	percent
Introduced	16.0.R1
Platforms	All

### **cbs** (*number* | *keyword*)

Synopsis	Percentage of the pool buffer space reserved for CBS
Context	<b>configure</b> <i>port string access egress pool string resv-cbs cbs (number   keyword)</i>
Tree	<i>cbs</i>
Range	0 to 100
Units	percent
Options	auto
Default	auto
Introduced	16.0.R1
Platforms	All

**slope-policy** *reference*

Synopsis	Policy for the RED slope and TAF values
Context	<b>configure</b> <a href="#">port</a> <i>string</i> <a href="#">access</a> <a href="#">egress</a> <a href="#">pool</a> <i>string</i> <b>slope-policy</b> <i>reference</i>
Tree	<a href="#">slope-policy</a>
Reference	<b>configure</b> <a href="#">qos</a> <a href="#">slope-policy</a> <i>string</i>
Introduced	16.0.R1
Platforms	All

**ingress**

Synopsis	Enter the <b>ingress</b> context
Context	<b>configure</b> <a href="#">port</a> <i>string</i> <a href="#">access</a> <b>ingress</b>
Tree	<a href="#">ingress</a>
Introduced	16.0.R1
Platforms	All

**pool** [[name](#)] *string*

Synopsis	Enter the <b>pool</b> list instance
Context	<b>configure</b> <a href="#">port</a> <i>string</i> <a href="#">access</a> <a href="#">ingress</a> <a href="#">pool</a> <i>string</i>
Tree	<a href="#">pool</a>
Introduced	16.0.R1
Platforms	All

**[name]** *string*

Synopsis	Pool name for the access port
Context	<b>configure</b> <a href="#">port</a> <i>string</i> <a href="#">access</a> <a href="#">ingress</a> <a href="#">pool</a> <i>string</i>
Tree	<a href="#">pool</a>
String Length	1 to 32
MD-CLI Default	default
Notes	This element is part of a list key.
Introduced	16.0.R1

Platforms All

### **amber-alarm-threshold** *number*

Synopsis Threshold for the amber alarm on oversubscription

Context **configure** *port string access ingress pool string amber-alarm-threshold number*

Tree [amber-alarm-threshold](#)

Range 1 to 1000

Units percent

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **red-alarm-threshold** *number*

Synopsis Threshold for the red alarm on oversubscription

Context **configure** *port string access ingress pool string red-alarm-threshold number*

Tree [red-alarm-threshold](#)

Range 1 to 1000

Units percent

Introduced 16.0.R1

Platforms 7450 ESS, 7750 SR, 7750 SR-a, 7750 SR-e, 7750 SR-s, 7950 XRS

### **resv-cbs**

Synopsis Enter the **resv-cbs** context

Context **configure** *port string access ingress pool string resv-cbs*

Tree [resv-cbs](#)

Introduced 16.0.R1

Platforms All

### **amber-alarm-action**

Synopsis Enter the **amber-alarm-action** context

Context **configure** *port string access ingress pool string resv-cbs amber-alarm-action*

Tree [amber-alarm-action](#)

Introduced	16.0.R1
Platforms	All

**max number**

Synopsis	Maximum percentage for reserved CBS of the pool
Context	<b>configure</b> port string access ingress pool string resv-cbs amber-alarm-action max number
Tree	max
Description	<p>This command specifies the maximum percentage for the reserved CBS of the pool. The maximum reserved CBS must not be less than the value of the reserved CBS.</p> <p>To enable adaptive CBS sizing the <b>max</b>, <b>step</b>, and <b>cbs</b> commands must be configured. The <b>cbs</b> command must also be configured to a percentage other than the default value.</p> <p>When unconfigured, CBS adaptive sizing is not enabled.</p>
Range	1 to 100
Units	percent
Introduced	16.0.R1
Platforms	All

**step number**

Synopsis	Step-size percentage for reserved CBS of the pool
Context	<b>configure</b> port string access ingress pool string resv-cbs amber-alarm-action step number
Tree	step
Description	<p>This command specifies the step-size percentage for the reserved CBS of the pool.</p> <p>To enable adaptive CBS sizing the <b>max</b>, <b>step</b>, and <b>cbs</b> commands must be configured. The <b>cbs</b> command must also be configured to a percentage other than the default value.</p> <p>When unconfigured, CBS adaptive sizing is not enabled.</p>
Range	1 to 100
Units	percent
Introduced	16.0.R1
Platforms	All

**cbs** (*number* | *keyword*)
